| Writing | 1.3, 2.1-2.4, 3.1-3.4 | *Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material*  
*Prepares clear and detailed information and instructions using format, structure and tone suitable to audience* |
| Oral    | 1.2, 3.2, 3.3 | *Explains financial issues and requirements clearly, using facts and examples, and uses listening and* |
### Communication
- questioning techniques to obtain sequenced instructions

### Numeracy
- Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals and arrange/compare numerical information
- 1.1-1.3, 2.1-2.4, 3.1-3.4

### Navigate the world of work
- Recognises, understands and monitors adherence to legislative and organisational requirements in undertaking own work
- 1.1-1.3, 2.1-2.4, 3.1-3.3

### Interact with others
- Understands the importance of using appropriate practices and protocols when handling confidential information
- 3.3, 3.4

### Get the work done
- Takes responsibility for own workload and monitors adherence to specified goals and timelines
- Uses digital technologies to access, record, store, organise and compile data as required
- 1.1-1.3, 2.1-2.4, 3.1-3.4

</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:
- maintain daily transactions and identify and respond to discrepancies and errors
- transfer and record financial data accurately
- reconcile expenditures and revenue in a timely manner.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify the key provisions of relevant legislation, codes of practice and national standards that may affect financial record keeping
- discuss organisational policies and procedures relating to maintaining financial records
- define credits/creditors and debits/debtors
- describe principles of double entry bookkeeping and accrual accounting
- identify methods of presenting financial data.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:
- office equipment and resources
- computer equipment and relevant software
- examples of source documents relating to financial record keeping
- case studies and, where possible, real situations.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes skills and knowledge required to process payroll from provided data using manual and computerised payroll systems.

It applies to individuals employed in a range of work environments who are responsible for payroll functions within an organisation. They may work as individuals providing administrative support within an enterprise, or may be other members of staff who have been delegated payroll responsibilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Elements and Performance Criteria

<table>

</tr>
</tbody>
</table>
Oral
Communication
1.1, 3.1-3.4
• Explains financial issues clearly using terminology and
tone appropriate to audience
• Uses questioning and listening skills in verbal
exchanges to clarify information

Numeracy
1.1-1.3, 2.1, 2.2, 2.5,
3.1-3.3
• Uses a limited range of mathematical calculations to
calculate and reconcile amounts and arrange/compare
numerical information

Navigate the
world of work
1.2, 1.3, 2.1, 2.3-2.6,
3.1, 3.2, 3.4
• Adheres to legislative requirements and organisational
policies and procedures relevant for own work

Interact with
others
1.1, 2.2, 3.1-3.3
• Selects the appropriate mode of communication for a
specific purpose
• Collaborates with others to achieve predetermined
goals

Get the work
done
1.1-1.3, 2.1-2.6, 3.2,
3.4
• Takes responsibility for own workload and monitors
adherence to specified goals and timelines
• Recognises and takes responsibility for resolving
problems relevant to own role
• Takes responsibility for routine low-impact decisions
within familiar situations
• Uses digital technologies to access, record, store,
organise and compile data as required

Performance Evidence

Evidence of the ability to:

- plan and perform payroll calculations in accordance with all legislative and organisational requirements, and predetermined timelines
- refer enquiries outside area of responsibility to an appropriate authority.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation, standards and codes of practice that may affect payroll operations
- outline relevant organisational policies and procedures
- list the different types of payroll systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer with relevant software
- payroll data (samples or actual
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to prepare financial reports in line with statutory reporting requirements. It encompasses compiling and analysing data.

This unit applies to individuals that are required to apply specialised knowledge and analytical skills to prepare financial reports as part of their job role.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the BSB Business Services Training Package Companion Volume Implementation Guide or the relevant regulator for specific guidance on regulatory requirements.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Compile and analyse financial data</td>
<td>1.1 Collect, evaluate and code current financial data to ensure consistency, quality and accuracy in accordance with organisational requirements</td>
</tr>
<tr>
<td></td>
<td>1.2 Use conversion and consolidation procedures to compile data in accordance with organisational requirements</td>
</tr>
<tr>
<td></td>
<td>1.3 Make, record and disclose asset and liability valuations in compliance with accounting standards</td>
</tr>
</tbody>
</table>
### ELEMENT | PERFORMANCE CRITERIA
---|---
1.4 Ensure that discrepancies, unusual features or queries are identified, resolved or referred to the appropriate authority  
1.5 Identify and record effects of taxation

2. Prepare reports
  2.1 Correctly record income and expenditure to ensure compliance with statutory requirements  
  2.2 Correctly identify relevant receipts, revenue documentation and payments  
  2.3 Prepare reports according to statutory and ethical requirements, and organisational procedures relating to conflict of interest, confidentiality, and disclosure statements  
  2.4 Present charts, diagrams, tables and supporting data in required format  
  2.5 Review statements and data for errors and compliance with statutory requirements and organisational procedures, and amend as required  
  2.6 Submit statutory requirement reports to appropriate authorities within stated deadlines

3. Provide financial business recommendations
  3.1 Review recommendations and ensure they are logically derived and supported by evidence  
  3.2 Provide recommendations to enhance the effectiveness of functions and services  
  3.3 Ensure recommendations are concise and relevant to the direction and control of organisational operations  
  3.4 Identify and prioritise significant issues in statements including comparative financial performances for review and decision making  
  3.5 Ensure structure and format of reports are clear and conform to organisational and statutory requirements

### Foundation Skills
This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

<table>
<thead>
<tr>
<th>Skill</th>

Performance Evidence

Evidence of the ability to:

- organise and present financial data to highlight relevant features and meet workplace requirements including:
- budget variances
- budgets and forecasts
- cash flow/profit reports
- balance sheets
- financial year reports
- operating statements
- expenditure and receipts
- profit and loss statements
- use conversion and consolidation procedures such as moving averages, standardised variables, trend analysis and unit costs
- identify, resolve or refer discrepancies such as:
- absence of auditable trail
- expenditure report mismatches
- incorrect payments and unreconciled cash flows
- record income and expenditure to meet statutory requirements
- calculate liabilities for tax including completing Business Activity Statements, where applicable
- provide financial business recommendations
- apply knowledge of relevant legislation and regulations
- perform double entry bookkeeping and accrual accounting.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.
Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key provisions of legislation, regulation and codes of practice relevant to financial operations
- key techniques used for forecasting and analysis
- key features of the options, methods and practices for deductions, benefits and depreciations
- current business taxation requirements for preparing corporate accounting reports
- current financial legislation and statutory requirements relating to taxable transactions and reporting requirements
- ethical requirements associated with preparing financial reports for corporate entities, including conflict of interest, confidentiality, and disclosure requirements
- industry-standard methods and formats used to present financial data.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer with relevant software
- examples of financial data, reports and documents
- workplace financial policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:
- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financial record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

<td>This version first released with BSB Business Services Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Application

This unit describes the skills and knowledge required to recruit, develop and support committee members in an organisation. This includes planning for committee recruitment, communicating with members and prospective committee members, and coordinating processes.

It applies to individuals responsible for activities as members of committees or boards of governance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Governance

Elements and Performance Criteria

Performance Evidence

Evidence of the ability to:

- communicate effectively with a diverse range of people on issues relevant to committee membership and roles
- recruit, select and induct people for committee roles according to policies, procedures and legislative requirements
- coordinate people, processes and information for committee recruitment and induction purposes
- contribute to analysis and decision making on issues relevant to committee member recruitment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list relevant legislation and organisational policies relating to the employment of committee members, who may be unpaid workers
- outline a range of decision making techniques
- explain committee and management roles and responsibilities
- describe the organisational history, structure, core functions, code of conduct, constitution, policies and procedures, and reporting processes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical committee recruitment and coordination activities and include access to:
Assessment Requirements for BSBGOV502 Recruit and coordinate committee members

- actual or simulated committee recruitment and coordination
- examples of committee role descriptions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Identify existing and potential conflict</td>
<td>1.1 Determine if conflict exists and its possible causes&lt;br&gt;1.2 Identify potential situations of future conflict&lt;br&gt;1.3 Develop strategies to prevent conflict</td>
</tr>
<tr>
<td>2. Consider the conflict situation</td>
<td>2.1 Consider if the conflict relates to operational or strategic activity&lt;br&gt;2.2 Acknowledge the issue(s) and the roles of the parties involved, noting that board and committee members' roles are strategic and employees' roles are operational</td>
</tr>
</tbody>
</table>
ELEMENT | PERFORMANCE CRITERIA
--- | ---
2.3 Ascertain how the roles of the parties involved have impacted upon the conflict  
2.4 Develop resolution strategies in accordance with legislation, the organisation's constitution and in consultation with conflicting parties  
2.5 Seek professional advice where needed, maintaining discretion and confidentiality  
2.6 Ensure the wellbeing of individuals and the organisation is considered when developing resolution strategies

3. Use strategies to resolve conflict | 3.1 Promptly, appropriately and impartially implement resolution strategies that are in line with legislation and the roles of the parties involved  
3.2 Diffuse emotional situations by focussing on the issue(s) rather than the individual(s) concerned  
3.3 Follow organisational grievance policy if conflict has escalated to grievance level  
3.4 Allow sufficient time for the conflict to be resolved  
3.5 Monitor and evaluate the process used to resolve the conflict

Foundation Skills
This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

<table>
<thead>
<tr>
<th>Skill</th>

</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>1.1, 3.1</td>
<td>• Interprets various texts to guide activities and decisions</td>
</tr>
<tr>
<td>Writing</td>
<td>1.3, 2.4</td>
<td>• Collates and compiles material using clear and detailed language to convey specific information, requirements and recommendations</td>
</tr>
</tbody>
</table>
| Oral Communication | 2.2-2.4, 3.2 | • Participates in a variety of spoken exchanges using suitable tone, language and strategies to confirm, clarify or repair understanding  
• Make constructive suggestions when required  
• Elicits views and opinions of others by active listening and questioning |
Navigate the world of work  
1.1, 1.3, 2.1, 2.2, 2.4, 3.1, 3.2, 3.4  
- Takes personal responsibility for adherence to legal/regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect the organisation as a whole  
- Recognises and follows explicit and implicit protocols and meets expectations associated with own role

Interact with others  
2.2, 2.4, 2.6, 3.2, 3.3,  
- Follows accepted communication practices and protocols, adjusting personal communication style in response to values, beliefs and cultural expectations of others

Get the work done  
1.3, 2.1, 2.4, 2.5, 3.1, 3.3, 3.4  
- Develops plans to manage relatively complex tasks with an awareness of how they may contribute to longer term operational strategic goals  
- Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account  
- Recognises and addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek expertise of others

Assessment Requirements for BSBGOV507 Manage board or committee and organisational conflict

Modification History

<table>
<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- communicate, negotiate and work cooperatively regarding conflict with:
  - other board or committee members
  - management and staff of the organisation
  - key stakeholders
- develop strategies to prevent conflict both within the board or committee and between the board or committee and operational personnel
- develop resolution strategies with conflicting parties
- diffuse emotional conflict situations by focusing on the issues at hand
- monitor and evaluate conflict resolution processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss potential situations of future conflict
- explain the roles of the parties involved (in terms of board or committee member roles as opposed to operational personnel roles)
- discuss options for conflict resolution and situations that would warrant the use of the following methods:
  - formal discussions with third party presence
  - informal discussions
  - following organisational policies
  - professional advice
  - grievance procedures
• describe conflict monitoring and evaluation processes
• describe legislative and organisational constitutional requirements in relation to conflict.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical committee or board of governance activities and include access to:
• examples of conflict resolution.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees’ reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate’s agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies
• explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

• workplace policies and procedures
• business technology
• position descriptions
• legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to manage all aspects of recruitment selection and induction processes in accordance with organisational policies and procedures.

It applies to individuals or human resource personnel who take responsibility for managing aspects of selecting new staff and orientating those staff in their new positions. It is not assumed that the individual will be directly involved in the selection processes themselves, although this may well be the case.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:
- develop or critically analyse a policy and procedures framework for recruitment, selection and induction
- identify the need for recruitment
- prepare and oversee appropriate documentation required for recruitment
- select and advise job applicants appropriately
- manage the induction process
- comply with relevant legislation and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- describe recruitment and selection methods, including assessment centres
- explain the concept of outsourcing
- describe the purpose of employee contracts and industrial relations
- summarise relevant legislation, regulations, standards and codes of practice that may affect recruitment, selection and induction
- explain why terms and conditions of employment are an important aspect of recruitment
- explain the relevance of psychometric and skills testing programs to recruitment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:
• an appropriate range of documentation and resources normally used in the workplace
• relevant organisational policies and procedures
• relevant legislation, regulations and codes of practice
• business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to collect, process and store, and maintain workplace information and systems. It also includes the maintenance of filing and records systems.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Performance Evidence

Evidence of the ability to:

- collect and process workplace information according to organisational policies and procedures and related regulatory requirements
- record and document information accurately within expected timeframes
- store, classify and maintain documents and records correctly.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify key provisions of relevant legislation, regulations, standards and codes of practice that may affect information management
- outline organisational policies and procedures relating to collecting and processing workplace information
- identify and describe organisational recordkeeping/filing systems and security procedures
- describe a range of filing systems including paper-based and software-based.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- office equipment and resources
- examples of workplace information systems.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to implement and review the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information which plays a significant part in the organisation’s effectiveness.

It applies to individuals whose work will normally be carried out within routine and non-routine methods and procedures which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1 Identify and source information needs

1.1 Determine and locate information required by teams
1.2 Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to organisational policies

2 Collect, analyse and report information
2.1 Collect information, which is adequate and relevant to the needs of teams, in a timely manner
### ELEMENT | PERFORMANCE CRITERIA
---|---

2.2 Ensure information is in a format suitable for analysis, interpretation and dissemination

2.3 Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired

| 3 Implement information systems | 3.1 Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes
3.2 Use technology available in the work area to manage information effectively
3.3 Submit recommendations for improving the information system to designated persons and/or groups |

| 4 Prepare for information system changes | 4.1 Collect information about information system future needs in consultation with colleagues, including those who have a specialist role in resource management
4.2 Ensure estimates of information system future needs reflect the organisation’s business plans, and customer and supplier requirements
4.3 Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes
4.4 Prepare team members to work with new technology and information system changes |

Performance Evidence

Evidence of the ability to:
- identify, source and analyse information to determine
  - information system needs
  - whether it is fit for purpose
  - trends and developments
- implement and review the workplace information system
- review a workplace information system and prepare and present a submission recommending improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify the information systems that are, or should be, available in the workplace
- explain the information management systems and technology typically associated with the workplace including:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- business technology
- a workplace information system
- workplace policies and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of ability to:

- design a new system for the organisation that clearly supports innovation, is innovative and is based on:
  - analysis of the organisation’s objectives, current systems, resources and barriers in relation to innovation
  - individual and group techniques with stakeholders to generate, test and evaluate several concepts and options for the new system
- consult with and analyse and integrate feedback from relevant stakeholders to develop a plan for the new system that addresses:
  - the need for external assistance
  - the impact of the new system on people, resources and other organisational practices
  - budget, timelines, responsibilities
  - a communication strategy
  - a learning and development strategy
- trial the new system including taking account of all consultative, coaching and technical issues and review it in relation to its goals for fostering innovation
- open the improvement process to ongoing collaborative input and challenge
- adjust system to reflect evaluation feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how the new system supports innovation in the organisation
• explain the concepts and theories of change management including ways of introducing change in different organisational contexts and change management communication strategies
• explain the concepts and theories of innovation and how these link to innovation in practice
• explain techniques for generating, testing and evaluating concepts and options for new systems
• analyse the technical context in which the system is being developed
• outline the typical ways in which systems may present barriers to innovation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

• workplace documents and
• case studies and, where possible, real situations
• office equipment and resources
• interaction with others
• current industry technology used in the development of systems.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to provide general assistance to senior staff organising importing and exporting of goods. Work may be for an external client or for the organisation in which the individual is employed.

It applies to individuals who work under the supervision of a more experienced colleague in various international work contexts. They may exercise discretion and judgement using appropriate knowledge of requirements for importing and exporting goods.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – International Business

</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- follow legislative and organisational guidelines for importing and exporting goods
- communicate effectively with managerial and carrier personnel
- accurately calculate the cost of importing or exporting specific goods
- produce accurate documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline legislation, codes of practice and national standards relevant to business operations in an international trade context
- list international and Australian regulatory bodies and their roles and responsibilities
- identify organisational policies and procedures relating to business operations in an international trade context
- briefly outline the process used in the organisation for the importing or exporting of goods
- outline significant trade routes and modes of transport used by the organisation
- explain the penalties for incorrect customs declarations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources
- examples of importing and exporting documents
• case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements

Application

This unit describes the skills and knowledge required to effectively identify, select and use available methods of digital communication in a workplace context. Such methods may include electronic mail (email), instant messaging and other similar applications/web-based platforms.

It applies to individuals who use digital technology to communicate with business stakeholders (including co-workers and customers). This will be particularly relevant to individuals in teams that work remotely. The individual will use a limited range of practical skills and fundamental knowledge in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 3.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- identify suitable methods for digital communication in the context of the purpose and content of the proposed communication
- follow organisational and technology provider requirements when communicating electronically across multiple digital applications/platforms, including in relation to security of communications
- follow organisational policy and procedures when managing all aspects of digital communication, including by storing, filing and archiving/deleting inbound communications
- communicate electronically with targeted groups of colleagues, clients or similar as relevant to organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of existing and emerging methods of digital communication, including strengths and limitations of each
- Key features of relevant industry practice relating to digital communication etiquette in a workplace setting
- Key features of commercial sensitivities in relation to knowledge management
- Key features of relevant organisational policies and procedures relating to the use of digital communication

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry technology
- relevant organisational policies and procedures
- relevant workplace documentation and resources
- industry applications/platforms for communicating digitally.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- design spreadsheets that address a range of data and organisational requirements
- use software functions, graphics and support materials to create spreadsheets
- apply knowledge of formatting requirements for workplace documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formatting requirements of workplace documents
- identify organisational guidelines on spreadsheet design and use
- explain organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
  - selecting layout and style
  - opening and generating files
  - producing documents within designated timelines
  - naming and storing documents
  - printing and presenting documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements
• describe functions and features of contemporary computer applications
• outline organisational policies, plans and procedures
• list organisational requirements for document design e.g. style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

• office equipment and resources
• relevant software applications
• examples of style guides
• organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- follow organisational and safe work practices including:
  - ergonomic requirements
  - energy and resource conservation techniques
- adhere to organisational requirements for:
  - producing documents within designated timelines
  - naming and storing documents
- adhere to task requirements when producing complex documents including:
  - using appropriate styles and layout consistently throughout the document
  - using correct formatting and document structure
- resolve issues by referring to user documentation and online help
- use appropriate data storage options
- apply knowledge of complex operation and functions of industry software applications
- communicate with relevant personal.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline various formatting styles and their effect on formatting, readability and appearance of documents
- explain organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- describe purpose and contents of an organisational style guide.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant workplace documentation and resources
- industry software packages and user instructions.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to design and produce complex desktop published documents.

This unit applies to individuals employed in a range of work environments who require well-developed skills in desktop publishing. They may be individuals providing administrative support within an enterprise, or others responsible for production of their own documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
| 1. Prepare to produce desktop published documents | 1.1 Use safe work practices including addressing ergonomic requirements and using work organisation strategies  
1.2 Use energy and resource conservation techniques  
1.3 Identify document purpose, audience, presentation and final output requirements, and clarify with relevant personnel as required  
1.4 Identify organisational and task requirements for desktop |
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>published documents to ensure consistency of style and image</td>
</tr>
</tbody>
</table>
| 2. Design desktop published documents | 2.1 Design document to enhance readability and appearance, according to organisational and task requirements  
2.2 Determine document type and assess production and design requirements  
2.3 Set up and use master pages, templates and styles to ensure consistency of design and layout  
2.4 Set up colour palettes according to organisational and task requirements |
| 3. Create desktop published documents | 3.1 Prepare, format and enter required text  
3.2 Import text from other applications and resolve any formatting issues  
3.3 Scan or import graphics from other applications and resolve any formatting issues  
3.4 Use complex software functions to arrange text and graphics on page, according to organisational and task requirements |
| 4. Finalise desktop published documents | 4.1 Ensure pages and combined graphics and text are composed correctly, to suit organisational and task requirements  
4.2 Check numerical sequencing and layout of document is correct, to meet binding and finishing requirements  
4.3 Incorporate bleed allowance in margins and borders |
| 5. Produce desktop published documents | 5.1 Review text for possible errors and omissions, and resolve any issues  
5.2 Produce completed document in line with required final output  
5.3 Name and store text documents, in accordance with organisational requirements and exit application without information loss/damage  
5.4 Prepare text documents within designated timelines and organisational requirements for speed and accuracy  
5.5 Use manuals, user documentation and online help to overcome problems with document design and production |
## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must ‘manage up’ as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:
- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:
- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning
• workplace innovation
• workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

• information about the organisation, including organisational structure, goals, objectives and plans
• case studies, and where possible, real situations
• workplace equipment and resources
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to determine collection needs to accession and de-accession collection material for galleries and collection bodies.

It applies to individuals who possess specialised knowledge, have a degree of autonomy and are responsible for managing all aspects of collections development.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Library – Collection Management

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
| 1 Determine collection needs | 1.1 Review collection material against organisational objectives and collection requirements  
1.2 Determine priorities in consultation with key stakeholders |
| 2 Assess collection material to be accessioned | 2.1 Use options to identify material that could be accessioned to meet collection needs  
2.2 Assess key internal and external factors that impact options  
2.3 Obtain expert advice on material and its relevance to collections |
### ELEMENT

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.4 Assess potential material for significance and relevance to collections according to organisational collection management policies</td>
<td></td>
</tr>
<tr>
<td>2.5 Examine records to establish provenance and confirm significance</td>
<td></td>
</tr>
<tr>
<td>2.6 Identify resources required for accessing collection material</td>
<td></td>
</tr>
<tr>
<td>2.7 Develop recommendations for accessing collection material according to collection needs</td>
<td></td>
</tr>
</tbody>
</table>

#### 3 Coordinate accessing of collection material

| 3.1 Seek approval for accessing collection material |
| 3.2 Establish clear conditions for accessing collection material according to organisational procedures and guidelines |
| 3.3 Organise appropriate resources to access collection material according to approval and conditions |
| 3.4 Comply with legal, ethical and financial requirements and cultural protocols in the accessing process |
| 3.5 Negotiate terms and organise transfer of rights according to organisational procedures |
| 3.6 Document agreements and terms according to organisational procedures and guidelines |

#### 4 Coordinate de-accessioning of collection material

| 4.1 Identify material to be de-accessioned from collections |
| 4.2 Consult with experts on the material to determine impact of de-accessioning on the collection |
| 4.3 Select options to de-accession material |
| 4.4 Develop and implement recommendations for de-accessioning collection material according to organisational policies and strategies |

Performance Evidence

Evidence of the ability to:
- make and justify decisions regarding accessioning and de-accessioning collection material to meet collection needs
- apply organisational procedures and guidelines to manage development of collections
- negotiate and document processes and agreements in relation to collection material.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify and interpret organisational procedures and guidelines regarding managing specific items and whole collections
- identify and explain the purpose of subject matter expertise, including curatorial and conservation
- locate and interpret sources for accessioning and de-accessioning options
- interpret and explain information regarding comparable collections and their importance
- describe legal, ethical and financial requirements for accessioning and de-accessioning
- locate and interpret cultural protocols for collections development and management that impact accessioning and de-accessioning of cultural material, including those for Aboriginal or Torres Strait Islander material
- explain security issues associated with collection material.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Collection Management field of work and include access to:

- an established or proposed collection as basis of decision-making
- organisational objectives, procedures and guidelines
- relevant personnel to reflect necessary communication and negotiation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- develop procedures for moving and storing collection material
- implement and monitor procedures for moving and storing collection material
- integrate into procedures, internal, external and technical issues that impact movement and storage of collection material.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- assess copyright, moral rights and intellectual property legislation and issues that impact moving and storing collection material
- identify and interpret cultural protocols that affect movement and storage of material, including Aboriginal or Torres Strait Islander material
- outline legal and administrative requirements for moving and storing collection material
- interpret procedures and practices for protection, transportation, storage and security of collection material
- explain safety legislation and requirements that impact moving and storing collection material
- describe technical and conservation issues associated with moving and storing collection material.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Collection Management field of work and include access to:

- relevant policies and procedures manuals
- a collection, for which procedures can be planned.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation’s systems and procedures
- manage and support personnel to achieve performance objectives, including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to use interpersonal and risk management skills to:

- clearly communicate the organisation’s objectives, values and standards to a range of stakeholders using appropriate media and language
- influence, support and provide resources for individuals and groups to:
  - participate in consultations and decision making processes
  - contribute to innovation and improvements
  - achieve their responsibilities and objectives
- facilitate consultative decision making processes with relevant internal and external stakeholders
- demonstrate ethical conduct and professional competence and continuing professional development
- encourage others to adopt business ethics and build their commitment to the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain business ethics and their application to leadership
- outline leadership styles and their application in supporting the organisation’s mission, objectives and values
- explain the impact of legislation in providing leadership in the organisation
- explain the organisation’s mission, purpose and values
- describe organisation objectives, plans and strategies
- explain organisational change processes.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to establish the strategic direction of the organisation, sustain competitive advantage and enhance competitiveness. It covers analysis and interpretation of relevant markets, capability assessment of the organisation and analysis of the organisation’s existing and potential competitors and allies. It also covers implementation of the strategic plan and developing specific actions and initiatives that will be undertaken by people working in various roles.

It applies to individuals working in senior roles in the organisation who have responsibility for ensuring that the organisation is positioned to ensure its long-term viability and success.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:
- consult and communicate effectively with relevant stakeholders to:
  - confirm or revise the organisation’s mission, vision and values
  - validate findings of research and analysis
  - get input to and endorsement of strategic plans
  - brief relevant parties about the plan
- analyse organisation’s internal and external environment to formulate strategic plans including:
  - background and research relevant to the plan
  - legislation, regulations and codes of practice, including for intellectual property
  - objectives, strategies and priorities
  - roles and responsibilities
  - performance indicators
  - timeframes
  - consideration of co-operative ventures
  - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
• outline the legislation, regulations and codes of practice relevant to the organisation’s strategic plan.
• give examples of risks and risk management strategies relevant to strategic planning including:
  • intellectual property rights and responsibilities
  • other risks
• outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
• identify internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
• outline techniques for developing organisational values.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:
• relevant legislation, regulations, standards and codes
• workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan.

It applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements, marketing approaches and strategic, business and operational plans
- write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas
- implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate
- monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce
- consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers
- provide an analysis of the strengths and weaknesses of a business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline processes for developing business plans
- describe performance objectives and measures including key performance indicators
- identify key stakeholders.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- appropriate documentation and resources normally used in the workplace
- strategic, business and operational plans
- business information and data
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- use structured processes to evaluate current performance against best practice benchmarks to identify areas for improvement
- engage relevant stakeholders in establishing and maintaining evaluating systems and processes to achieve agreed quality targets
- use leadership and communication techniques to promote a quality culture
- undertake continuous monitoring of systems and processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- articulate quality management objectives with reference to relevant legislation, standards and codes of practice
- outline typical barriers to establishing quality systems in an organisation and possible strategies to address them
- explain change management techniques that can support the implementation of quality systems
- explain leadership and engagement strategies that can support a quality culture in an organisation
- describe benchmarking strategies for analysing production and financial performance.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- develop, implement, monitor and review corporate governance
- access and interpret legislation and regulations to identify corporate governance compliance requirements
- research and analyse information to identify trends in corporate governance practices and reporting
- establish and implement processes for corporate governance adherence including determining corporate governance indicators and establishing a reporting plan
- meet statutory reporting requirements
- monitor compliance and analyse the causes of non-compliances including analysing governance reports, returns, review processes and the information technology system
- identify and implement corrective actions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislation, regulations and statutory requirements and standards that relate to corporate governance obligations for the organisation including at least those covering:
  - finances and taxation
  - industrial relations, equal opportunity, employment records and superannuation
  - intellectual property
  - corporate entities
  - competition, ethical practice and consumer rights
  - work health and safety
- outline principles of internal control including statutory requirements
- understand statutory reporting requirements
- state the principles of valuation and apply common methods of depreciation.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources including governance reports and returns
- business information technology systems
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Segment market</td>
<td>1.1 Identify criteria for use in segmenting market in accordance with marketing plan</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify and access sources of information for segmenting and profiling markets in accordance with marketing plan</td>
</tr>
<tr>
<td></td>
<td>1.3 Segment market in accordance with identified criteria</td>
</tr>
<tr>
<td></td>
<td>1.4 Review market segments for their usefulness in terms of factors such as their size, potential, distinctive needs, easy identification of members or distinctive media use patterns</td>
</tr>
</tbody>
</table>
## ELEMENT | PERFORMANCE CRITERIA
--- | ---
1.5 Select market segments to meet marketing objectives, and choose and apply new segmentation criteria if required

2. Identify target market
- 2.1 Evaluate approaches to determining and describing total market for a product or service
- 2.2 Define target market in terms of consumers to be included as prospective users of a product or service, and selected market segments
- 2.3 Use segment descriptors to describe target market
- 2.4 Identify available strategic marketing options and select targeting strategies that best meet requirements of the marketing plan

3. Profile target audience
- 3.1 Describe total market and selected market segments using a consumer profile
- 3.2 Identify consumer characteristics in standard statistical terms and/or descriptive terms used in media selection in consumer profile
- 3.3 Use demographic and/or psychographic descriptions in consumer profile in accordance with requirements of the marketing plan
- 3.4 Describe consumer attitudes to products or services being offered
- 3.5 Ensure profile meets organisational requirements of language, format, content and level of detail

4. Develop positioning strategy
- 4.1 Identify available positioning strategies and choose a strategy to meet marketing requirements and consumer profile
- 4.2 Write a positioning implementation plan containing several options, in accordance with organisational requirements
- 4.3 Submit plan to supervisor within specified timelines and make appropriate adjustments based on feedback

## Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Performance Evidence

Evidence of the ability to:
- develop a market positioning strategy that documents market segmentation, consumer profiling, targeting and strategies relevant to a product or service being offered to the marketplace.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify relevant information relating to the Australian Marketing Institute Code of Professional Conduct
- outline requirements of legislation affecting marketing roles
- explain data collection and analysis techniques
- outline relevant industry knowledge including:
  - components of marketing mix
  - elements of marketing planning
- explain marketing communications concepts and processes
- identify organisational structures, roles, responsibilities, business and marketing plans
- demonstrate knowledge of relevant product and service standards and best practice models
- outline relevant statistical terms used by the Australian Bureau of Statistics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to plan, implement and manage basic marketing and promotional activities. It is a foundation unit covering general and basic marketing and promotional activities that do not require detailed or complex planning or implementation.

It applies to people with no previous experience in marketing. It could be undertaken as part of a broader role of a person in a small enterprise, or as part of a marketing plan for a larger enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Performance Evidence

Evidence of the ability to:
- work with others to plan and document a project based on organisational parameters
- complete and update all relevant documentation
- examine impact that project changes could have on final outcomes
- undertake project finalisation activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- explain basic project governance models
- describe project finalisation and evaluation products
- identify and describe project life cycle stages, phases and structures relevant to industry and project
- explain project planning documents and their specific formats relevant to industry and context
- outline key organisational policies and procedures
- describe various types of project initiation documentation
- identify types of project logs and registers in use in this context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:
- project documentation, including information about life cycle processes
Assessment Requirements for BSBPMG417 Apply project cycle management processes

Date this document was generated: 3 September 2020

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- work with others to establish various stakeholders' needs and interests
- engage with project stakeholders using effective interpersonal skills and appropriate methods of communication
- select and use communications methods relevant to the project needs and stakeholder expectations
- complete all relevant documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe different types of stakeholders
- explain the different levels of stakeholder engagement on projects
- describe techniques and strategies for stakeholder engagement
- explain why the interests and expectations of stakeholders must be considered
- describe common problems leading to variances in stakeholder engagement.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation detailing stakeholder engagement
- examples of stakeholder engagement activities.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

</table>

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
• give examples of project management tools and how they contribute to a project
• outline types of documents and other sources of information commonly used in defining the parameters of a project
• explain processes for identifying and managing risk in a project
• outline the organisation’s mission, goals, objectives and operations and how the project relates to them
• explain the organisation’s procedures and processes that are relevant to managing a project including:
  • lines of authority and approvals
  • quality assurance
  • human resources
  • budgets and finance
  • recordkeeping
  • reporting
• outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

### Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Reading</strong></td>
<td>• Gathers and analyses textual information from a range of sources and identifies relevant and key information to assist in the supply chain management process</td>
</tr>
<tr>
<td><strong>Writing</strong></td>
<td>• Designs, develops and revises strategic documents appropriate to audience and context</td>
</tr>
</tbody>
</table>
| **Oral Communication**       | • Uses clear language and appropriate features to provide information to a variety of individuals  
                                  • Uses active listening and questioning techniques to convey and clarify information                                                                                                                 |
| **Numeracy**                 | • Analyses and compares financial information to assist in managing, evaluating and improving the supply chain                                                                                               |
| **Navigate the world of work** | • Contributes to organisation’s strategic directions by developing and revising organisational policies and procedures  
                                  • Complies with all legal requirements relevant to own responsibilities and considers the implications of these when negotiating, planning and undertaking work |
| **Interact with others**     | • Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience  
                                  • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction                                 |
| **Get the work done**        | • Develops plans to manage complex supply chain activities, with an awareness of how they contribute to strategic goals  
                                  • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account  
                                  • Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles that may be adaptable to future situations  
                                  • Actively identifies digital systems, devices and applications with potential to meet current or future needs |

Performance Evidence

Evidence of the ability to:
- critically evaluate organisational supply chain management
- successfully manage a supply chain in accordance with organisational policies and procedures, including:
  - implement a supply chain strategy
  - monitor supply chain activities
  - co-ordinate staff and engage relevant stakeholders
  - liaise with suppliers to drive efficiencies
  - evaluate and formulate recommendations to improve supply chain management strategy.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:
- key features of organisational objectives and their relationship to the supply chain strategy
- key requirements relating to the management of a supply chain, including:
  - organisational policies and procedures for procurement, tendering and contracting
  - contracting and tendering
  - ethical behaviour
  - purchasing and procurement
  - supply chain management
- techniques to establish collaborative relationships
• relevant legislation, regulations, standards and organisation policies.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the administration – procurement and contracting field of work and include access to:

• organisation policies and procedures
• supply chain strategies and relevant supply chain management records
• office equipment and supplies
• case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- use appropriate sources to document accurate information about the organisation’s products and services
- prepare and provide advice about products and services according to organisational requirements
- evaluate promotional activities including consideration of:
  - whether promotional materials meet organisational requirements
  - actual costs against budget
  - customer feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list authoritative sources of information about the organisation’s products and services
- outline the organisation’s products and services
- outline the policies and procedures that apply when providing advice or recommendations about products and services
- list and describe organisational promotional activities
- explain methods used to gather verifiable customer feedback about products and services
- explain how and why customer feedback is analysed.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

- relevant organisational policies and procedures
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- identify clients’ preferred communication styles and methods and potential barriers to communications and use appropriate communication styles and strategies
- apply communication techniques to establish rapport and promote two-way communication
- develop and implement client loyalty strategies and service standards based on business objectives and client information
- develop and implement strategies to elicit feedback from clients and use it to improve relationships and customer satisfaction
- maintain contacts and participate in formal and informal networks that support the business and enhance personal knowledge of the market.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of strategies that can build client loyalty including those that focus on:
  - financial incentives and special offers
  - premium services and private/dedicated facilities
  - loyalty programs, rewards and recognition
- outline issues that are commonly addressed in client care/service standards in the industry
- outline typical barriers to communicating with clients and possible strategies to address them
- give examples of strategies for feedback
- describe the principles and techniques for effective communication and networking
- outline networking opportunities relevant to the business with reference to:
• government, industry and professional associations
• trade shows, conferences, briefings and other professional development activities
• existing groups or networks
• businesses and individuals
• outline aspects of organisational policies, procedures and processes that are relevant to communicating with clients and participating in networks.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations - relationship management field of work and include access to:
• relevant workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- identify research requirements and objectives
- gather, organise and present research information
- communicate effectively with research stakeholders to clarify requirements
- maintain and handle information and documents systematically and securely
- preparing reports on research findings including:
  - recommendations based on the analysis of research information
  - clear and justified assumptions and conclusions
  - use of efficient and reliable research methods
- analyse, evaluate and interpret research information to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of organisational policies and procedures relating to:
  - the access of digital information
  - the storage/transmission of information
  - legal and ethical obligations relating to workplace information
  - key concepts related to research and analysis including reliability and validity
  - key features of research processes and strategies to identify new sources (online and print) of information and efficient and effective use.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1. Construct an applied research strategy
   1.1 Clarify and confirm applied research purpose and needs of the target group
   1.2 Determine policies and procedures in relation to conducting applied research
   1.3 Establish mechanisms for collecting and maintaining data in a |
### ELEMENT | PERFORMANCE CRITERIA
---|---
| systematic manner | 1.4 Analyse factors affecting the reliability and validity of data 1.5 Review relevant research ethics and codes of conduct 1.6 Prepare applied research strategy and hypothesis 1.7 Frame a research strategy in consideration of available tools and resources |

2. Use a range of applied research techniques

| 2.1 Review and evaluate a range of applied research methods, theories and data collection techniques 2.2 Select appropriate methods to gather and analyse data 2.3 Use suitable technology and technology services to support data collection and analysis 2.4 Access appropriate sources of information and contributors relevant to the research 2.5 Optimise relevance of the research through integrity of the data collected and analysis tools used |

3. Analyse and present findings

| 3.1 Evaluate how research findings such as trends and changes will impact on learning strategy 3.2 Review data and research findings for accuracy of details and adherence to any legal requirements 3.3 Collate and analyse data for relevance against the original applied research strategy 3.4 Document and present research findings in a clear and logical manner consistent with audience needs 3.5 Identify the need for and an appropriate approach to, further research |

### Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Learning</td>
<td>3.5</td>
<td>Evaluates and reflects on the need for further research to contribute to ongoing organisational improvement</td>
</tr>
</tbody>
</table>
### Reading
1.1, 1.2, 1.5, 2.4, 3.1, 3.2
- Collects, analyses, compares and evaluates textual information from a range of resources to inform research strategies

### Writing
1.6, 3.3, 3.4
- Develops texts dealing with complex ideas and concepts
- Uses specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal, ethical and organisational requirements

### Oral Communication
1.1, 3.4
- Uses specialised vocabulary appropriate to context and audience to discuss and confirm research requirements
- Applies listening and questioning techniques to check or confirm understanding

### Numeracy
3.2, 3.3
- Applies knowledge of mathematical information to statistically analyse data and identify possible trends and confirm reliability

### Navigate the world of work
1.2, 1.5, 3.2
- Is highly autonomous, taking responsibility for determining applicable organisational policies and procedures and considering legal and ethical obligations
- Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others

### Interact with others
3.4
- Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals

### Get the work done
1.1, 1.2, 1.3, 1.7, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3
- Develops plans for complex activities, regularly reviewing priorities and performance during implementation, identifying and addressing issues as they arise
- Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks
- Uses formal analytical thinking to make informed decisions about research strategies and techniques, seeking input, advice and feedback as required

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
  - specific research questions or hypotheses
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - full description of the data collection methods
  - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques
- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

Performance Evidence

Evidence of the ability to:

- document the steps used to determine the criteria for a business or records system appropriate to the organisation’s business functions and reporting requirements
- develop and implement a business or records system including documented rules, procedures, user instructions and training materials.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the general principles and processes of records management and records management systems, such as:
  - systems of control
  - records continuum theory
  - mandate and ownership of business process
  - environmental context
  - records characteristics
- describe the internal controls required of the business or records system
- outline the characteristics of the organisational functions, structure and culture relevant to the setup of the business or records system
• describe the organisational policies and strategies required by a newly established business or records system
• outline key provisions of relevant legislation that apply to a business or records system.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

• relevant workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify the scope and context of the risk management process including:
  - stakeholder analysis
  - political, economic, social, legal, technological and policy context
  - current arrangements
  - objectives and critical success factors for the area included in scope
  - risks that may apply to scope
- consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes
- develop and implement an action plan to treat risks
- monitor and evaluate the action plan and risk management process
- maintain documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- outline organisational policies, procedures and processes for risk management.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

</tr>
<tr>
<td></td>
<td>3.4 Evaluate the system for recording prospect information</td>
</tr>
</tbody>
</table>
3.5 Refine the system for recording prospect information based on evaluation of system

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**

literacy skills to interpret legal requirements, company policies and procedures
research and data analysis skills to determine prospect requirements
technology skills to design and record formats to facilitate information storage and retrieval.

**Required knowledge**

principles of buyer motives
identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:
anti-discrimination
ethical principles
consumer protection
contract law
privacy laws
Trade Practices Act

benefits and key features of own organisation's and competitors' products
information management strategies used to manage prospect data
prospecting methods used in the sales process.

**Evidence Guide**
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

<table>
<thead>
<tr>
<th>Critical aspects for assessment and evidence required to demonstrate competency in this unit</th>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>demonstration of the use and management of different prospecting methods targeting a present, previous and new client research and establishment of criteria used in qualifying leads identified through prospecting methods recording, storage and retrieval of prospect information.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Context of and specific resources for assessment</th>
<th>Assessment must ensure:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>access to an actual workplace or simulated environment access to organisational sales prospect information, databases and records.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Method of assessment</th>
<th>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>analysis of responses to case studies and scenarios assessment of criteria developed to qualify sales leads demonstration of prospecting methods direct questioning combined with portfolios of evidence and third party workplace reports of on-the-job performance by the candidate observation of use of prospecting methods oral or written questioning to assess knowledge of principles of buyer motives review of research undertaken to establish criteria for qualifying leads evaluation of the system developed to record prospect information.</td>
</tr>
</tbody>
</table>
**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- customer service units
- other sales units.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Prospecting methods** may include:
- brokers
- cold canvassing
- databases
- direct mail
- internet
- intra organisational leads
- journals
- magazines
- media advertising
- networking
- newspapers
- personal observation
- public records
- referrals
- spotters
- telemarketing

**Products** may include:
- goods
- ideas
- services
Clients may include:

- consumers
- customers
- members
- patients
- members of other business units within an organisation
- other work teams within an organisation
- person or organisation who receives or has the potential to receive products, services or ideas supplied by the organisation

Buyer motives may include:

- browsing
- buying for unqualified prospect e.g. dependant
- gift
- housekeeping
- replacement item
- self reward
- self-gratification

Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and services
  - taking corrective action where necessary
- negotiate and arrange contracts, including:
  - seeking legal advice
  - investigating procurement rights
  - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including
  - prioritising risks with highest probability of occurrence and greatest negative impact on the business
  - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.
Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB402 Plan small business finances

Modification History

<table>
<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
</table>
| Release 2 | This version first released with BSB Business Services Training Package Version 2.0.  
Version created to clarify intent of unit |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

Performance Evidence

Evidence of the ability to:

- develop a financial plan which identifies financial requirements of the business, including cash flow projections and a projected profit statement
- follow the financial plan, including:
  - demonstrating an awareness of appropriate legal requirements
  - implementing strategies to monitor financial performance
- identify sources and investigate costs of securing appropriate financial assistance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain break-even analysis
- clarify costing for the business, including margin or mark-up, hourly charge-out rates and unit costs
- summarise financial decision-making relevant to the business
- outline methods and relative costs of obtaining finance
- summarise principles for preparing balance sheets
- provide a detailed explanation of:
  - principles for preparation of cash flow forecasts
  - principles for preparation of profit and loss statements
• purpose of financial reports
• explain relevant accounting terminology
• describe working capital cycles.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

• software for financial calculations
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies or where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to monitor and improve business performance via a clear marketing strategy integrated into the business plan.

It applies to individuals who operate a small business independently or within a larger organisation. Individuals in this role analyse and interpret market data.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Performance Evidence

Evidence of the ability to:
- determine marketing activity focus in line with objectives of the business plan
- evaluate customer base
- understand what is ethically and culturally appropriate
- determine a marketing mix according to market and business needs, including:
  - ability to optimise sales and profit
  - ability to evaluate costs and benefits
  - determine customer needs and promotional activities
- determine marketing strategies, including briefing appropriate personnel on their responsibilities
- identify marketing opportunities in the digital environment
- develop approaches to engage, respond and monitor customers in the digital space
- monitor and evaluate activities and performance, and correct performance gaps
- consult and communicate effectively with relevant people
- research and monitor ongoing changes and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
• discuss industry market trends
• identify performance evaluation methods
• explain methods of analysing costs and benefits of marketing strategies
• summarise methods of developing marketing objectives and marketing mix
• compare current digital devices, platforms and technologies for effectiveness in achieving marketing objectives
• outline methods of monitoring customer satisfaction
• identify relevant market analysis and research
• provide a detailed explanation of relevant marketing concepts and methods.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

• business technology
• software for analysis of data
• workplace documents and case studies or where possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

| Release 2 | This version released with BSB Business Services Training Package Version 2.0.  
|           | Version created to clarify intent of unit                                 |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

Performance Evidence

Evidence of the ability to:

- develop a business plan which provides for finance, marketing and provision of products or services to facilitate all business goals and objectives
- identify and plan all work health and safety (WHS) and duty of care responsibilities
- identify and assess internal and external risks to the business
- develop risk management strategies including a contingency plan for non-conformance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to business operation, especially in regard to WHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- explain methods of evaluation
- summarise WHS responsibilities and procedures for identifying hazards relevant to the business
- outline planning processes
- describe preparation of a business plan
- identify principles of risk management relevant to small business planning
- outline common risks particular to the small business type or industry
- explain reasons for, and benefits of, business planning
Assessment Requirements for BSBSMB404 Undertake small business planning

- clarify relevant industry codes of practice
- outline setting goals and objectives
- explain types of business planning – feasibility studies; strategic, operational, financial and marketing planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an action plan
  - identifying risk management procedures
  - developing a quality system
  - implementing performance measures
  - utilising technologies to optimise business performance
- implement and monitor strategies and procedures developed, including:
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
  - record and research business improvements
  - make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.
Knowledge Evidence
To complete the unit requirements safely and effectively, the individual must:

- summarise relevant industry codes of practice
- explain methods for implementing operation and revenue control systems
- summarise methods for monitoring performance and implementing improvements
- outline work health and safety (WHS) responsibilities and procedures for managing hazards
- identify relevant principles of risk management, including risk assessment
- clarify quality system principles and methods
- summarise relevant performance measures
- discuss role of innovation
- outline systems to manage staff, stock, expenditure, services and customer service
- identify technical or specialist skills relevant to business operations.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- operate the business according to the business plan, including:
  - adhering to legal requirements
  - meeting requirements of financial backers
  - defining strategies for debt collection and contingencies for debtors
  - managing cash flow
  - defining key performance indicators
  - communicating with relevant people
  - monitor the business against financial plan and make changes as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss benchmarking
- explain financial decision-making relevant to the business
- summarise significant financial indicators
- outline purposes of financial reports
- clarify preparation and interpretation of budget/actual reports
- identify principles for preparing balance sheets and their interpretation
- outline debt collection procedures or strategies
• characterise principles for preparing profit and loss statements and their interpretation
• discuss stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

• business equipment and resources
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies or where possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- use the business plan to:
  - determine staffing requirements
  - coordinate skill-gap training where required
  - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation
- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an operational plan
  - identifying risk management procedures
  - developing a quality assurance process
  - developing and implementing performance measures
  - utilising existing, new and emerging digital technologies to optimise business performance
- implement and evaluate strategies and procedures developed, including:
  - controlling stock, expenditure, and work health and safety risks
  - identifying and meeting staffing requirements
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
- record and research business improvements, including the potential to implement new and emerging digital technologies
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of relevant legislation and industry codes of practice
- Key features of methods for implementing operation and revenue control systems
• Key features of methods for evaluating performance and implementing improvements
• Key features of work health and safety (WHS) responsibilities and procedures for managing hazards
• Key features of relevant principles of risk management, including risk assessment
• Key features of quality assurance system principles and methods
• Key features of the role of digital technologies and innovation in modern business
• Key features of systems to manage staff, stock, expenditure, services and customer service
• Key features of required technical or specialist skills relevant to business operations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

• business equipment and resources, including business technology
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies or possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
  - measure current resource usage
  - solve problems and generate ideas for improvements
  - evaluate and implement strategies to improve resource usage
  - plan, implement and integrate improvements into operations
  - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements
• explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues
• outline common environmental and energy efficiency issues within the industry
• give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation
• outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
  • supply chain, procurement and purchasing
  • quality assurance
  • making recommendations and seeking approvals

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies or, where possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to understand and comply with work health and safety (WHS) Acts, regulations and codes of practice in the workplace.

This unit applies to individuals who contribute to actions to achieve compliance with WHS legislation as part of their WHS responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Performance Evidence

Evidence of the ability to:

- identify and apply work health and safety (WHS) legislative requirements applicable to the workplace, occupation and industry, including keeping up to date with legislation and relevant publications
- identify and act on non-compliances with WHS legislation
- identify duty holders
- communicate WHS information to others
- refer issues of non-compliance to responsible persons or authorities and seek advice from appropriate sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the WHS legislative duties of self and others including limits on own expertise
- outline the key organisational WHS policies, procedures, processes and systems
- outline the key requirements in relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- identify obligations and duties for consultation and who must be consulted
- identify people who could be accessed for help
- identify the consequences of non-compliance
- explain ways to get information about compliance with legislation.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans with information on compliance requirements
- relevant Acts, regulations, codes of practice, licensing requirements and standards
- guidance materials and alerts issued by the relevant WHS regulator
- relevant WHS data files
- appropriate office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to lead the management of work health and safety (WHS) risks in an organisation. The unit includes facilitating the identification of hazards and potential hazards, leading the assessment of associated risks, selecting and implementing suitable risk controls, and evaluating the overall effectiveness of the organisational WHS risk management process. It involves communicating with stakeholders throughout the process.

The unit applies to those in an organisation who provide specialised knowledge and guidance to a range of personnel when leading the management of WHS risks.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- plan, implement and evaluate a systematic process for managing work health and safety (WHS) risk in a work area.

During the above, the candidate must:

- identify, interpret and apply information from a range of sources, including organisational and legislative requirements
- review WHS risk-management process according to established scope and key performance indicators
- consult effectively with required stakeholders using appropriate interpersonal communication skills.

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- commonwealth and state/territory WHS laws relating to WHS risk management, including WHS Acts, regulations, codes of practice and standards
- WHS information and data that applies to WHS risk-management process, including:
  - organisational and duty holder legal requirements
  - organisational policies and procedures relating to identifying hazards, assessing risks and implementing risk controls
  - key components of the work health and safety management system (WHSMS)
- internal and external sources of WHS information and data, and procedures for accessing them
• organisational behaviour and culture in relation to WHS risk management activities and their impact on WHS and the work team, including organisation’s risk appetite
• key components of effective consultation and participation strategies
• tools and techniques to:
  • identify health and safety hazards
  • assess risks, taking into account nature and impact of risk, and likelihood of risk arising
  • identify and select suitable risk controls
  • facilitate effective communication and consultation processes, and identify key personnel related to communication
• application and limitations of techniques and tools for identifying hazards, and analysing and assessing risks
• hierarchy of control measures:
  • its use in establishing level of risk
  • factors limiting effectiveness of types of controls
  • role and limitations of procedural controls
  • use of personal protective equipment
• other functional areas in the organisation that impact on the management of WHS-related risks
• impact of workforce characteristics and composition on WHS risk and its management, including:
  • cultural background/diversity
  • gender
  • labour market changes
  • levels of language, literacy and numeracy skills in the workforce
  • workforce structure and organisation, including part-time, casual and contract workers, shift rosters and geographical location
  • workers with specific support needs and limitations
  • workplace cultural attitudes towards alcohol and other drug use
• principles of decision-making.

Assessment Conditions
Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:
• workplace equipment and resources
• WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
• case studies and, where possible, real situations
• opportunities for interaction with others.
Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWH518 Manage WHS hazards associated with maintenance and use of plant

Modification History

<table>
<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 5.0.</td>
</tr>
</tbody>
</table>

Application

This unit describes the skills and knowledge required to effectively manage work health and safety (WHS) hazards and to comply with WHS laws, as they apply to the management or control of items of plant being maintained and used in a workplace. It requires strong communication skills and systematic approaches to identify and resolve WHS issues associated with plant.

The unit applies to those who provide guidance to others in the workplace in managing WHS hazards associated with plant. The unit does not apply to the design, manufacture, supply, installation, construction or commissioning of plant or issuing of licences associated with plant.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where model WHS laws have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The model WHS laws include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

### 1. Identify WHS hazards associated with plant
1.1 Access sources of WHS information, data and advice relating to items of workplace plant
1.2 Inspect items of plant and identify how they are to be used, according to organisational policies and procedures
1.3 Determine WHS hazards arising from plant use, condition, suitability, location and potential abnormal situations
1.4 Consult with others to confirm hazard identification
1.5 Record and report identified hazards according to organisational policies and procedures

### 2. Assess WHS risks associated with plant
2.1 Access sources of information, data and advice to assist with assessing WHS risks associated with identified plant hazards
2.2 Consult with others to inform WHS risk assessment according to organisational policies and procedures
2.3 Record and report on WHS risk assessment according to WHS laws and organisational policies and procedures

### 3. Control WHS risks associated with maintenance and use of plant
3.1 Access sources of information, data and advice to inform development of risk controls for safe maintenance and use of plant
3.2 Develop risk controls to be implemented according to the hierarchy of control measures, WHS legislative requirements and organisational policies and procedures
3.3 Consult with, and report to, required internal and specialist personnel in relation to risk controls to be implemented
3.4 Communicate rights, obligations and duties of workplace personnel in relation to identified hazards and risk controls associated with plant
3.5 Monitor effectiveness of implemented risk controls
3.6 Record and report on implemented risk controls according to WHS legislative requirements and organisational policies and procedures

### 4. Advise on registration, use of plant
### ELEMENTS

**PERFORMANCE CRITERIA**

licensing and certification issues associated with plant requiring operator licensing and/or certification according to WHS legislative requirements

4.2 Document registration, licensing and certification requirements according to organisational procedures

4.3 Monitor and report compliance with WHS regulatory requirements for registration, licensing and certification according to organisational procedures

4.4 Communicate registration, licensing and certification requirements to required personnel

5. Manage training requirements for plant maintenance and operation

5.1 Identify WHS-related training needs associated with plant items, and applicable registration, licensing and certification requirements

5.2 Identify skill gaps of those maintaining and using plant, and determine and communicate their associated training needs

5.3 Ensure training is undertaken and completed prior to commencing work with new plant and/or new system of work

5.4 Maintain training records according to WHS requirements and organisational policies and procedures

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- develop and implement work health and safety (WHS) related risk controls for at least two different items of plant according to the hierarchy of control measures, WHS legislative requirements and organisational policies and procedures
- identify and manage licensing and training requirements associated with at least two different items of plant.

During the above, the candidate must:

- manage effective identification of hazards
- communicate, according to established protocols, to:
  - advise relevant personnel of their rights, obligations, and duties in relation to hazards and risk controls associated with plant
  - seek specialist advice as required.

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- key features of WHS Acts, regulations, codes of practice and other instruments issued by WHS regulators relating to managing WHS hazards associated with plant, including role and duty of persons conducting a business or undertaking (PCBUs)
- organisational WHS policies, procedures, processes and systems relating to hazard management process, including:
  - identifying and accessing internal and external sources of WHS information and data
  - inspecting plant and its use
  - consulting with internal and external personnel
• recording and reporting identified WHS hazards
• recording and reporting risk assessment outcomes and risk controls
• developing risk controls and monitoring the effectiveness of their implementation
• documenting registration, licensing and certification requirements
• monitoring and reporting compliance with regulatory requirements for registration, licensing and certification
• basic principles of incident causation and injury processes relating to plant
• differences between a hazard and a risk
• factors that impact on risk
• hierarchy of control measures and its use in choosing between different risk controls
• strategies for identifying risk controls and monitoring their effectiveness, including:
  • workplace inspections
  • robotic and technological processes, and their potential risks and limitations
  • review of adequacy of plant operating procedures
• high-risk work licences required for specific plant
• methods for providing evidence of compliance with WHS laws
• plant-specific knowledge:
  • basic physics of fluids under pressure and pressure vessels, and behaviour of pressurised fluid when pressure is released
  • hazards associated with plant
  • systems of work associated with plant
  • industry practices related to permit to work, and isolation and tag-out systems
  • registration requirements of plant, licensing and certification competencies
• risk controls relating to operation of plant, including:
  • strategies for guarding moving parts in machinery
  • access and egress
  • dangerous parts
  • emergency stops and warning devices
• WHS-related training requirements for plant operators relating to:
  • items of new plant
  • new or changed systems of work associated with plant.

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

• WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
• sources of information, data and advice in relation to plant hazards
Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to select and use computer software and organise electronic information and data.

It applies to individuals who apply a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

1. Select and use technology

1.1 Select appropriate technology and software applications to achieve requirements of the task

1.2 Adjust workspace, furniture and equipment to suit user’s ergonomic requirements

1.3 Use technology according to organisational requirements and in a way that promotes a safe work environment

2. Process and organise

2.1 Identify, open, generate or amend files and records according
ELEMENT | PERFORMANCE CRITERIA
--- | ---
data | to task and organisational requirements
2.2 Operate input devices according to organisational requirements
2.3 Store data appropriately and exit applications without damage to or loss of, data
2.4 Use manuals, training booklets and/or online help or helpdesks to overcome basic difficulties with applications

3. Maintain technology | 3.1 Identify and replace used technology consumables in accordance with manufacturer’s instructions and organisational requirements
3.2 Carry out and/or arrange routine maintenance to ensure equipment is maintained in accordance with manufacturer’s instructions and organisational requirements
3.3 Identify equipment faults accurately and take action in accordance with manufacturer’s instructions or report fault to designated person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Performance Evidence

Evidence of the ability to:

- select and use technology safely and according to organisational requirements
- access, retrieve and store required data
- demonstrate basic maintenance on a range of equipment using manuals or help-files
- identify and address faults according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisation’s work health and safety requirements
- outline the organisation's requirements for file naming and storage
- explain why regular back-ups of data are done
- list 'routine maintenance' tasks
- summarise the procedure for addressing equipment faults.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- electronic files and data
- workplace documentation and equipment manuals
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

| Release 2 | This version first released with BSB Business Services Training Package Version 1.1.  
|           | Version created to correct mapping table information                       |
| Release 1 | This version first released with BSB Business Services Training Package Version 1.0.  |

Performance Evidence

Evidence of the ability to:

- prepare and communicate own work plan
- schedule work objectives and tasks to support the achievement of the workgroup goals
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from clients and colleagues
- plan and access learning opportunities to extend personal work competencies.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how business technology applications can be used to schedule tasks and plan work
- explain techniques to prepare personal plans and establish priorities
- identify methods to identify and prioritise personal learning needs
- outline a range of professional development options
- explain methods to elicit, analyse and interpret feedback
- provide a detailed explanation of methods that can be used to evaluate own performance.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documentation including policies and procedures, and benchmarks for work group productivity and performance
- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - a personal development plan
  - personal goal setting
  - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation’s policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- plan, draft and finalise three different simple documents that accurately convey the required basic information in a format suitable for the intended audience and in accordance with organisational policies and procedures for document production.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the process for checking basic grammar, spelling and punctuation
- describe different communication methods
- describe how audience, purpose and method of communication influence the tone of a document.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources to assist in document production
- organisational policies and procedures
- examples of documents to review.

Assessors must satisfy NVR/AQTF assessor requirements.

</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- plan, draft and finalise complex documents that require review and analysis of a range of information sources
- use business technology to apply formatting, and incorporate graphics
- edit the draft text to ensure accuracy and clarity of information, obtain feedback on the draft and revise the draft
- apply the enterprise style guide/house style.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the enterprise style guide/house style
- outline formatting styles and their impact on formatting, readability and appearance of documents
- explain rules and conventions for written English, as defined by general and specialist sources.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources
- organisational policies and procedures
- organisational style guides.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to develop community programs to ensure maximum participation.

This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

Elements and Performance Criteria

*Elements define the essential outcomes*  
*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Develop program parameters

1.1 Analyse issues of wide community concern to develop an agency position and to ascertain the priority for new program

1.2 Undertake appropriate work to ascertain support, capacity for a coordinated effort and factors which will effect provision of services

1.3 Undertake research to identify key people, priorities to be addressed, possible strategies and options for action

1.4 Identify measures and evidence of program plan
success and possible risks

1.5 Develop appropriate plans via participation of relevant communities and stakeholders

2. Design programs with the community

2.1 Develop a program plan which reflects identified parameters and incorporates an evaluation of a range of program options within organisation policy

2.2 Engage stakeholder participation to determine preferred program options particularly in areas of high priority or with targeted communities

2.3 Seek help from participating agencies for implementation arrangements

2.4 Develop and implement promotion and marketing strategies

2.5 Develop and maintain systems and resources for administrative support of community programs

2.6 Identify and seek resources

3. Implement programs

3.1 Conduct and evaluate pilots and make adjustments to ensure the program achieves its objectives

3.2 Implement and monitor in accordance to the plan

4. Evaluate programs

4.1 Evaluate program design and outcomes according to criteria and specifications identified in the program plan

4.2 Use results of evaluation for revision and ongoing development

4.3 Involve interested and/or relevant people in program evaluation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

*Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*
Unit Mapping Information

No equivalent unit

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed, implemented and evaluated at least 1 community program

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies
- social, community and youth issues
- contemporary economics and politics and their impact on community development
- traditional community development approaches:
  - needs-based
  - gap-based
- principles and practices of contemporary community development approaches and techniques for mobilisation in relation to:
  - asset-based (ABCD)
  - rights-based
- social movements
- sociology fundamentals, including:
  - commonly accepted social theories
  - social inequality
- sociology of class
- sociology of gender, including impacts of culture on gender dynamics

**Assessment Conditions**

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Significant changes to performance criteria  
New evidence requirements for assessment including volume and frequency requirements  
Significant changes to knowledge evidence |

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed 1 engagement plan  
- facilitated at least 3 group discussions, including:  
  - used a range of group facilitation strategies to enhance interactions between group members and to gather relevant feedback  
  - provided feedback to the group regarding outcomes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- communication styles and techniques  
- group facilitation processes and mechanisms for group support  
- principles of effective community engagement and participation  
- traditional and contemporary models of engagement  
- community engagement techniques including online tools and use of social media  
- methods of research  
- sustainability  
- empowerment; community control and hegemony
• capacity building
• asset based community development
• methods of engagement and participation
• evaluation and review
• building and maintaining partnerships
• social capital
• reporting mechanisms
• reengagement strategies for individuals who are disengaged

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified aspects of at least 1 organisation’s structure and philosophy which support community development work and the potential implicit barriers to that work
- prepared at least 1 report on community development activities and projects in a comprehensive and accurate manner and presented to relevant stakeholders and management

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies
- structures and systems that support or present barriers to community development
- principles of participatory democracy
- range of management and governance structures operating with the community services industry
- social, economic, political, cultural and economic development
- all possible funding sources
- critical theories for analysing human service organisations
- critique of managerial approaches including:
  - management systems and principles
  - performance standards
  - service quality development
  - consumer focus
  - enterprise agreements
  - performance monitoring and review
- change management principles

**Assessment Conditions**

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed a Governance Policy for at least one organisation
- prepared Board Papers that included:
  - progress against the organisation’s strategic plan and/or business plan
  - information and recommendations for at least 2 governance issues and 2 management issues
- participated in a Board meeting, including:
  - communicating concerns and recommendations for at least 2 issues
  - obtaining a decision on future directions for at least 2 issues
  - recording minutes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- different types of Boards
- purpose, structure and requirements of business plan and strategic plans
- legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation
- roles and responsibilities of particular functions on the Board
- role policies and procedures play in the effective running of an organisation
• separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)

• human resource management practices as they relate to the development of effective working relationships between paid staff and volunteer and/or paid Boards

• organisation's governance policy guidelines including policies and procedures in:
  o role of Board
  o Board structure
  o role of individual Directors
  o role of Chairperson
  o role of Company Secretary
  o role of Chief Executive Officer (CEO)
  o Board meetings
  o Board meeting agenda
  o Board papers
  o Board minutes
  o the Board calendar
  o delegation of authority
  o monitoring
  o strategy formulation
  o service and advice
  o contacts
  o Chief Executive Officer (CEO) evaluation
  o Director protection
  o Board evaluation
  o Director development
  o Director selection and induction

**Assessment Conditions**

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned and implemented all aspects of the recruitment of 2 volunteers
- developed and implemented 1 induction program for volunteers, that included:
  - organisation purpose and services
  - role of volunteers in the organisation
  - insurance
  - rights & responsibilities of all parties including work health and safety (WHS)
  - organisation structure and lines of communication and authority
  - expenses and reimbursements processes
  - relevant policies and procedures and codes of conduct
- conducted a performance review for 1 volunteer

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies relating to the employment of unpaid workers
- rights and responsibilities of both organisation and volunteer
- implications of differences in attitudes and values in working in the organisation
• Universal declaration on volunteering and current national volunteering codes and standards
• definitions of volunteering
• paid versus unpaid role responsibilities and the delineation of these roles
• structure of volunteer sector including support and recruitment agencies
• role of government and government bodies in volunteering
• motivations of volunteers, what can de-motivate volunteers and how volunteer motivation changes over time
• different models of volunteering taken from an organisation perspective, including the involvement of volunteers as service providers, fundraisers, corporate volunteering, activist and in community development
• range of diverse sectors and roles where volunteers are involved
• screening processes, including police checks, interviews, application forms, referee checks and meetings
• current trends and issues in volunteering
• engagement strategies for volunteering
• performance appraisal methods and techniques
• recognition and rewards for volunteers

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Equivalent to CPCCCM2010A

Unit Descriptor
This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

Application of the Unit
Construction work is undertaken on domestic and commercial work sites within new construction, renovation or refurbishment, and maintenance.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - organisational skills, including the ability to plan and set out work
  - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment
Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person’s demonstrated ability and applied knowledge
- all assessment that is part of a structured learning
experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work at heights** includes:
- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

**Information** includes:
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

**Workplace health and safety** is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan:
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
  - AS6001 - 1999 Working platforms for domestic application
  - AS1576 - Scaffolding
  - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

**Statutory and regulatory authorities** include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

**Hazards** include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials
• light
• manual handling
• moisture
• noise
• photovoltaic (solar) panels
• stationary and moving plant
• work at heights.

**Tools and equipment** include:

• air compressors and hoses
• hand and power tools
• nail guns
• power leads
• scaffolding.

**Materials** include:

• materials used on the construction work site.

**Environmental requirements** include:

• clean-up management
• noise and dust
• vibration
• waste management.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Required skills for this unit are:
REQUIRED SKILLS AND KNOWLEDGE

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- evaluating own actions and making judgments about performance and necessary improvements
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- organisational skills, including the ability to plan and set out work
- recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- crane operations and limitations
- designs and functions of lifting equipment
- dogging equipment
- dogging techniques
- elevated work platforms
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- logbooks
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, drawings and specifications
- processes for the calculation of material requirements
REQUIRED SKILLS AND KNOWLEDGE

- quality requirements
- relevant Acts, regulations and codes of practice
- safe working at heights and fall arrest
- safe working load tags
- signalling methods and communications
- types, characteristics, uses and limitations of plant, tools and equipment
- weather and ground considerations
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- safely and effectively operate and use tools, plant and equipment
- communicate and work effectively and safely with others
- as a minimum, read tags, sling, load, direct and land loads in conjunction with a slewing
EVIDENCE GUIDE

mobile crane with a telescopic boom and a winch, out of sight for:

- rigid heavy loads to two thirds capacity of the crane
- luff movements, boom retract and boom extend, slew right and slew left, winch up and down in combination
- a flexible load with a minimum of three lifting points
- using hand signals and whistle from minimum radius to maximum radius.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of
EVIDENCE GUIDE

the Construction, Plumbing and Services Training Package

- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions, where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to performing dogging
- relevant Australian standards
- safe work procedures relating to performing dogging
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Planning and preparation include:
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.

Safety (OHS) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the
RANGE STATEMENT
conduct of operational risk assessment and treatments associated with:
- earth leakage boxes
- lighting
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- use of firefighting equipment
- use of tools and equipment
- workplace environmental requirements and safety.

Tools and equipment include:
- brick cages
- kibbles
- personnel cages
- rescue cages
- rubbish bins
- spreader bars and beams.

Quality requirements include:
- internal company quality policy and standards
- manufacturer specifications, where specified
- relevant regulations, including Australian standards
- workplace operations and procedures.

Environmental requirements include:
- clean-up management
- noise
- vibration
- waste management.

Calculations include:
- delivery dockets
- load charts
- load share
- pre-cast compliance charts
- safe working loads
- standard calculations.
RANGE STATEMENT

Slings include:
- chain
- flexible steel wire rope
- natural or synthetic fibre.

Lifting devices:
- include:
  - eye bolts
  - lifting clutches
  - shackles
  - snatch blocks
  - tags
- may include:
  - collared eye bolts
  - equalizing sheaves
  - lifting lugs
  - rigging screws
  - turn buckles.

Load slinging methods include:
- straight sling
- adjustable sling
- reeved sling
- inclined sling.

CraneS include:
- fixed cranes
- hydraulic mobile cranes
- lattice boom mobile cranes
- slew cranes
- tower cranes.

Unit Descriptor

Unit descriptor
This unit of competency specifies the outcomes required to carry out OHS requirements through safe work practices at any on or off-site construction workplace. It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

Application of the Unit

Application of the unit
This unit of competency covers fundamental OHS necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

The unit relates directly to the general induction training program specified by the National Code of Practice for Induction for Construction Work (ASCC 2007) required to enter a construction work site. Completion of unit CPCCOHS1001A covers this requirement.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
  - determine and report hazards and risks
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - MSDS, JSA and safe work method statements
    - other relevant documentation
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,
EVIDENCE GUIDE

indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse
RANGE STATEMENT

**Designated personnel** to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:

- designated safety officers, determined by the enterprise, who have undertaken specific safety response training
- managers or other senior personnel
- personnel competent and/or licensed in the safe handling of asbestos
- supervisors.

**Safe work practices:**

- **include:**
  - day to day observation of OHS policies and procedures
  - emergency procedures
  - risk assessment
  - use of basic firefighting equipment
- relate to:
  - access to site amenities, such as drinking water and toilets
  - general requirements for safe use of plant and equipment
  - general requirements for use of personal protective equipment and clothing
  - housekeeping to ensure a clean, tidy and safer work area
  - no drugs and alcohol at work
  - preventing bullying and harassment
  - smoking in designated areas
  - storage and removal of debris.

**Duty of care requirements:**

- legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
- relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
- may relate to:
  - own responsibilities to comply with safe work practices, including activities that
RANGE STATEMENT

Incidents include:

- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
  - breathing apparatus malfunctioning to the extent that the user's health is in danger
  - collapse of the floor, wall or ceiling of a building being used as a workplace
  - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
  - collapse or partial collapse of a building or structure
  - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
  - damage to or malfunction of any other major plant
  - electric shock
  - electrical short circuit, malfunction or explosion
  - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
  - any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- JSA and safe work method statements
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards
RANGE STATEMENT

Information includes:

- OHS and welfare Acts and regulations
- safety codes of practice
- diagrams or sketches
- emergency situation contacts
- evacuation plans
- instructions issued by authorised organisational or external personnel
- labels
- manufacturer specifications and instructions
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements, such as Acts, regulations and codes of practice
- relevant Australian standards
- reports of near misses or accidents
- safe work procedures or equivalent documentation
- safety meeting minutes
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Hazardous materials include:

- ACM
- cleaning chemicals, including those in pressurised containers
- glues
- insulation materials
- solvents
- treated timber products.

Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

Signs and symbols include:

- emergency information signs (exits, equipment, first aid)
- fire signs (location of fire alarms and
RANGE STATEMENT

- firefighting equipment
- hazard identification, facility or location signs
- regulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning)
- safety tags and lockout (danger tags, out of service tags)
- site safety, directional, traffic and warning signs and symbols.

Asbestos-containing materials are identified:
- includes recognising common types of ACM that may be found in construction materials and buildings
- covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.

Asbestos-containing materials are reported to:
- person in control of the workplace as set out in the relevant Asbestos Management Code.

Personal protective equipment is to include:
- aprons
- arm guards
- caps
- dust mask/respirators
- ear muffs/plugs
- gloves
- hard hats
- high visibility retro reflective vests
- jackets
- overalls
- safety glasses/goggles
- steel capped boots
- UV protective clothing and sunscreen.

Tools and equipment include:
- firefighting equipment
- first aid kit
- ladders and work platforms
- personal protective equipment.

Materials include:
- first aid materials suitable for emergency first aid treatment of minor injuries.

Prohibited tools and equipment that cannot be used near identified
- high-speed abrasive power and pneumatic tools, high pressure water cleaners, compressed
RANGE STATEMENT

ACM include: air or abrasive blasting
- any vacuum cleaning equipment not specifically designed for safe work with asbestos.

Environmental requirements are to cover workplace quality management and include:
- clean-up protection
- stormwater protection
- waste management.

Types of fire includes:
- electrical, chemical, gas, mechanical, paper, wood or natural fire.

Fire equipment includes:
- breathing apparatus
- fire extinguishers
- fire hydrant and hoses
- fire reel
- fire truck
- manual firefighting instruments, such as fire blankets.

Emergency response and evacuation procedures include:
- emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel
- extinguishing fires, organisational first aid requirements and evacuation.

Co-requisite units Nil
Functional area

Functional area
CPCPCM2040A Read plans and calculate plumbing quantities

Modification History
Changes to performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPCM2004A

Unit Descriptor
This unit of competency specifies the outcomes required to use and interpret plans and specifications associated with construction work, and accurately complete measurements and calculations to establish quantities of materials for the plumbing and services industry.

The unit requires the interpretation of plans, drawings and specifications to interpret requirements, and making measurements and calculations to determine quantities of plumbing materials.

Application of the Unit
This unit of competency supports skills to read and interpret plans for a variety of plumbing and services applications.

Site location for work application may be either domestic or commercial and may be a new work site or an existing structure being renovated, extended, restored or maintained. It may be a customer's premises or employer's workplace, either on or off-site.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised
text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

**Elements and Performance Criteria**

1. **Prepare for work.**
   1.1 Plans, drawings, specifications and standards are obtained and required calculations are identified.
   1.2 *Work health and safety* (WHS) requirements associated with reading plans, calculating plumbing requirements and the workplace environment are adhered to throughout the work.
   1.3 *Quality assurance requirements* are identified and adhered to according to workplace requirements.
   1.4 Work area and materials are prepared to support the efficient reading of plans and the calculation of plumbing requirements.

2. **Identify types of plans and drawings and their functions.**
   2.1 Plans and *drawings* used in the plumbing industry are identified.
   2.2 Key functions of each type of drawing are identified.
   2.3 Key users of drawings are identified.

3. **Identify commonly used scales, symbols and abbreviations.**
   3.1 Commonly used scales, symbols and abbreviations are used.
   3.2 Function of legend is understood and identified.

4. **Locate and identify key features on a services plan.**
   4.1 Key features and dimensions of sectional details and *elevations on a plan* are identified and located.
   4.2 Location and types of services are identified.
   4.3 General and structural features and major horizontal and
vertical measurements are located.

5 Read and interpret job specifications.
   5.1 Purpose of job specification is identified.
   5.2 Details in job specification are obtained.
   5.3 Job specifications are read in conjunction with plans.

6 Obtain measurements and perform calculations
   6.1 Work measurements are obtained.
   6.2 Quality assurance requirements associated with calculations are applied.
   6.3 Measurements and dimensions are obtained from plans.
   6.4 Simple calculations are carried out.

7 Calculate material quantities.
   7.1 Material quantities are calculated and recorded from plans and specifications according to workplace procedure.
   7.2 Information from plans, specifications and work area are obtained from job instructions.
   7.3 Measurements are identified and recorded.

8 Clean up.
   8.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice, and job specification.
   8.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.
   8.3 Information is accessed and documentation completed according to workplace requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - request relevant documentation and information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- literacy skills to:
  - complete relevant workplace documentation
  - read and interpret:
    - documentation from a variety of sources
    - plans and specifications
  - record calculations, measurements and material quantities
- numeracy skills to apply measurements and calculations
- plan-reading skills, including:
  - boundaries
  - easements (sewer, stormwater, etc.)
  - existing services
  - orientation
  - pedestrian and vehicular access
  - preservation orders
  - set backs
  - site features
  - site geography, including levels
  - surrounding buildings and fences
- planning and organising skills to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

Required knowledge

- job safety analysis (JSA) and safe work method statements (SWMS)
- measurements, calculations and quantities
- range of plans and specifications relevant to the plumbing and services industry
- relevant Acts, regulations and codes of practice
- simple industry calculations
• symbols, dimensions, terminology and key features of plans
• tools, equipment and materials relative to plans, drawings and specifications
• work schedules, work plans, charts, work bulletins and memos
• workplace safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

• locating, interpreting and applying relevant information, standards and specifications for reading plans and calculating plumbing quantities
• applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
• given the plans and specifications for a project, completing the following in respect of interpreting the plans and determining quantities:
  • apply sustainability principles and concepts
  • identify type and purpose of the plan and drawing
  • identify its dimensions, symbols, abbreviations, key features, title and reference date (as current version)
  • identify material types from the specifications, measurements and calculations, indicating items of plumbing material required, ensuring:
    • correct selection and use of appropriate processes, tools and equipment
    • completion of all work to specification
• compliance with regulations, standards and organisational quality procedures and processes.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

• an induction procedure and requirement
• realistic tasks or simulated tasks covering the minimum task requirements
• relevant specifications and work instructions
• tools and equipment appropriate to applying safe work practices
• support materials appropriate to activity
• workplace instructions relating to safe work practices and addressing hazards and emergencies
• material safety data sheets
• research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

• satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
• reinforce the integration of employability skills with workplace tasks and job roles
• confirm that competency is verified and able to be transferred to other circumstances and
Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person’s demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work health and safety** is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control, including of electrical hazards
- hazardous materials and substances
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
• workplace environment and safety.

**Quality assurance requirements** may include:

• Australian standards
• environmental policy
• Environment Protection Authority (EPA)
• internal company quality assurance policy and risk management strategy
• International Standards Organisation
• site safety plan
• workplace operations and procedures.

Types of **drawings** may include:

• drainage plans
• elevations and sections
• floor plans
• hydraulic plans
• mechanical services and drainage plans
• sanitary plans
• sewerage plans
• site plans
• specifications.

Key features of detailed **elevations and plans** may include:

• boundaries
• building lines
• cross-sections of construction details
• easements
• layout of rooms
• location of works relative to other buildings
• orientation
• service locations
• shape of building and structure
• type of construction
• type of structure, including structural members
• vertical and horizontal measurements.

**Measurements** may include:

• all dimensions used in plumbing
• laser or similar technology
• SI units of measurement
• the use of:
  • calipers
• dividers
• rulers
• squares
• tape measures.

**Calculations:**
• are to be performed manually or with the aid of a calculator
• require numeracy skills to apply the basic arithmetic calculations of addition, subtraction, multiplication and division in order to estimate simple projects and determine consumables required for a task, and may include:
  • area
  • circumference
  • diameter
  • gradient
  • length
  • mass
  • perimeter
  • pressure
  • ratios (e.g. ingredients, elements and triangulation)
  • scales
  • volume.

**Materials** for reading plans and calculating plumbing quantities may include:
• drawings
• plans
• specifications.

**Information** may include:
• instructions issued by authorised organisational or external personnel
• manufacturer specifications and instructions
• organisation work specifications and requirements
• recognised formulas or tables accepted by the regulatory authority
• regulatory and legislative requirements, particularly those pertaining to:
  • building codes
  • WHS and environmental requirements
  • plumbing and gasfitting authority regulations
- relevant Australian standards
- safe work procedures relating to reading plans and calculating plumbing requirements
- verbal, written and graphical instructions, including:
  - charts and hand drawings
  - plans and sketches
  - job drawings
  - material safety data sheets (MSDS)
  - memos
  - plans and specifications
  - signage
  - work bulletins
  - work schedules.

Key features of *specifications* may include:
- material details
- preferred suppliers
- quality of finishes
- quantities
- specific skill requirements.

**Tools and equipment** may include:
- calculators
- laser measuring devices
- rulers, dividers, tape measures or squares.

CPCPCM2043A Carry out WHS requirements

Modification History
Changes to application, elements and performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPCM2023A

Unit Descriptor
This unit of competency specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in a plumbing and services work environment.

The unit requires the performance of work in a safe manner through awareness of risks, work requirements and the planning and performance of safe work practices with concern for personal safety and the safety of others.

It includes the initial response to workplace emergencies; the safe use of electricity; the identification of hazardous materials, including asbestos; and compliance with legislated work safety practices.

Application of the Unit
This unit of competency supports safe work practices for the plumbing and services industry.

Site location for work application may be either domestic or commercial and may be a new work site or an existing structure or fitting being renovated, extended, restored or maintained. It could also be conducted in an on or off-site workshop or at a customer's premises.

The unit does not cover the removal of asbestos, which is a licensed activity.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.
## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

<table>

are applied effectively and immediately.

3.3 *Asbestos-containing materials (ACM) are identified* on a work site *and reported* to designated personnel.

4 Plan and prepare for safe work practices.

4.1 Quality assurance requirements of company operations and safe work practices are identified and adhered to.

4.2 Personal protective equipment (PPE) is selected, correctly fitted and used according to the requirements of the job.

4.3 Tools and equipment are selected consistent with safe work practice requirements, checked for serviceability, and any faults are reported to supervisor.

4.4 Required barricades, hoardings and signage are determined and erected at job location.

4.5 Material safety data sheets (MSDS) are identified and applied.

4.6 *Sustainability principles and concepts* are observed when preparing for and undertaking work process.

5 Use safe work practices to carry out work.

5.1 Work is carried out safely and according to state or territory statutory requirements and company policy.

5.2 *Safety hazards* and common workplace accidents and incidents are identified in the course of work and reported according to policy.

5.3 Industry, site and personal safety rights and responsibilities are applied.

5.4 Prohibited tools and equipment in areas with identified asbestos are identified and isolated.

5.5 Firefighting equipment is selected and used according to type of fire and correct operating procedures.

5.6 Current site emergency and first aid procedures are followed.
### 6 Maintain safety of self and others.

- **6.1** Safety signs, identified in terms of colour and shape, symbols and alarms, are adhered to.
- **6.2** Hazardous chemicals and materials are identified, handled and stored, maintaining the safety to self, others and the environment.
- **6.3** Incidents are reported according to legislative requirements and workplace procedures.
- **6.4** Common causes of accidents in the industry are identified and prevention measures implemented in line with site induction.
- **6.5** Site area is maintained to prevent incidents and accidents and protect self and others.

### 7 Use electricity safely.

- **7.1** Safest supply and route for electrical supply are determined.
- **7.2** Leads are supported and placed according to regulations.
- **7.3** Power board visual check is conducted.
- **7.4** Leads and equipment are checked for tags and visual damage.
- **7.5** Electrical hazards are identified and reported.

### 8 Apply emergency response.

- **8.1** *Emergencies* are identified.
- **8.2** *Emergency response* is provided according to company procedures and requirements.
- **8.3** Details of actions taken are reported according to company procedures and requirements using appropriate communications.

### 9 Clean up work site area.

- **9.1** Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specifications.
- **9.2** Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations.
and standard work practices.

9.3 Information is accessed and documentation completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - complete written reports and other relevant documentation
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to:
  - evaluate safety issues in the workplace and determine appropriate action
  - recognise WHS hazards, including asbestos, and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
  - initiative and enterprise skills to identify and report to appropriate personnel any faults in tools or materials
- literacy skills to read and interpret:
  - documentation from a variety of sources
  - MSDS
  - work safety procedures and instructions
- self-management skills to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology

Required knowledge

- asbestos management code relating to prevention of exposure
- job safety analysis (JSA) and safe work method statements (SWMS)
• manual handling techniques
• MSDS
• relevant legislation, regulations and workplace requirements relating to WHS, including hazard reduction and personal safety
• requirements for working in confined spaces and at height, including on roofs
• tools and equipment prohibited from being used near identified ACM
• risk assessment
• safe work practices in normal working environment
• types, possible location and risks of ACM, including serpentine and amphobile groups and their use in common building materials
• workplace and equipment safety requirements
• workplace hazards and their precautions and reduction
• workplace response to emergencies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

• locate, interpret and apply relevant information, standards and specifications for applying safe work practices in the workplace
• apply safety requirements throughout the performance of work sequences, including electrical requirements and personal protective clothing and equipment
• apply sustainability principles and concepts
• undertake site and workplace induction
• correctly identify the location of ACM
• understand and apply policies and procedures for reporting presence of ACM to designated personnel
• assess workplace risks and interpret and apply safe work practices
• understand workplace requirements for emergency response, including evacuation procedures
• correctly locate and identify workplace firefighting and other safety equipment and appliances
• correctly select and use appropriate processes, tools and equipment
• safely complete all work to specification
• comply with regulations, standards and workplace instructions, procedures and processes, including reporting and documentation
• communicate and work effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:
• an induction procedure and requirement
• realistic tasks or simulated tasks covering the minimum task requirements
• relevant specifications and work instructions
• tools and equipment appropriate to applying safe work practices
• support materials appropriate to activity
• workplace instructions relating to safe work practices and addressing hazards and emergencies
• material safety data sheets
• research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:
• satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
• include direct observation of tasks in real or
simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace induction may include:

- first aid officers and kits
personnel competent and/or licensed in the safe handling of asbestos
site induction work site locations
specific site WHS issues
specific site requirements.

Safe work practices are to be according to state and territory legislation and regulations and may include:

• handling of materials
• hazard control procedures and procedures for handling hazardous materials and substances
• PPE prescribed under legislation, regulations and workplace policies and practices
• use of firefighting equipment
• use of first aid equipment
• use of tools and equipment
• workplace environment and safety.

Statutory and regulatory authorities include:

• commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

Identifying and reporting asbestos-containing materials:

• includes recognising common types of ACM that may be found in construction materials and buildings
• covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, millboard, asbestos flues, sheeting under ceramic or vinyl floor or wall tiles in wet areas
• involves reporting ACM to person in control of the workplace as set out in the relevant Asbestos Management Code.

Sustainability principles and concepts:

• cover the social, economic and environmental use of resources to meet current and future needs
• may include:
  • selecting appropriate components and material
  • choosing efficient products
  • using material efficiently
  • storing and disposing of hazardous material to ensure minimal environmental impact.
Safety hazards may include:
- hazards and risks associated with tools and equipment
- inflammable materials and fire hazards
- lifting practices
- lighting, gases, electricity and water
- spillage, waste and debris
- toxic and hazardous substances
- working at heights
- working in confined spaces.

Emergencies may include:
- accidents
- fires
- injuries
- sudden illness.

Emergency response may include:
- common site signs
- equipment tags
- facility or location signs
- safety barricades and warning signs
- site direction
- traffic signs
- workplace evacuation involving staff and customers.

CPCPCM2047A Carry out levelling

Modification History
Prerequisite unit updated
Changes to performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPCM2027A

Unit Descriptor
This unit of competency specifies the outcomes required to plan and use levelling equipment to establish, record and apply those levels to the plumbing and services industry.

Application of the Unit
This unit of competency supports skills to undertake levelling operations for application in the plumbing and services industry.
Site location for work application may be either domestic or commercial and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
CPCPCM2043A Carry out WHS requirements

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of
performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

1. **Prepare for work.**
   - **1.1** Requirements of the job are determined and various levels are obtained.
   - **1.2** *Work health and safety* (WHS) and environmental requirements associated with levelling activities are adhered to throughout the work.
   - **1.3** *Quality assurance requirements* are identified and adhered to according to workplace requirements.
   - **1.4** *Tools and equipment*, including personal protective equipment, are selected and checked for serviceability.

2. **Perform levelling.**
   - **2.1** Height to be transferred is identified from drawings, plans or instructions.
   - **2.2** *Levelling equipment* is set up and operated according to manufacturer instructions, workplace procedures and relevant Australian standards.
   - **2.3** Levels are taken, recorded and marked according to job requirements and workplace procedures within the required tolerance and specifications.
   - **2.4** *Sustainability principles and concepts* are observed when preparing for and undertaking work process.

3. **Clean up.**
   - **3.1** Work area is cleared and materials are disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification.
   - **3.2** Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.
   - **3.3** *Information* is accessed and documentation completed according to workplace requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - determine requirements, follow instructions and access information
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools, equipment or materials
- literacy skills to:
  - complete workplace documentation
  - read and interpret:
    - plans and specifications
    - documentation from a variety of sources
- numeracy skills to apply measurements and calculations
- planning and organising skills to plan and set out work
- technical skills to operate levelling equipment to read, record, establish and check:
  - levels: horizontal, vertical and at gradient used for the placement of plumbing and services
  - recording levels at specific points along a set out
  - recording and checking levels in drainage and sanitary excavations and plumbing services
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology

Required knowledge

- different types of levelling equipment, their applications and their method of operation
- how to access relevant information, including codes and technical standards
- job safety analysis (JSA) and safe work method statements (SWMS)
- process of establishing, recording and checking levels and alignment
• relevant statutory requirements related to establishing, recording and checking levels
• simple calculations relating to carrying out levelling
• SI system of measurements
• workplace and equipment safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

• locating, interpreting and applying relevant information, standards and specifications for the establishment, recording and checking of levels
• applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
• using either a pipe laser, rotary laser or automatic level and either boning rods or string line
• grading a pipe (or equivalent) over 10 metres on a grade to a tolerance of + or - 5mm, ensuring:
  • applying sustainability principles and concepts
  • correctly identifying, recording and checking level
  • correctly selecting and using appropriate processes, tools and equipment
  • completing all work to specification
  • complying with regulations, standards and organisational quality procedures and processes
  • communicating and working effectively and safely with others.

Context of and specific

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental
resources for assessment

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has
complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

---

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work health and safety** is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control, including of electrical hazards
- hazardous materials and substances
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
- workplace environment and safety.

**Quality assurance requirements** may include:

- environmental policy
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- relevant Australian standards
- site safety plan
- workplace operations and procedures.
**Tools and equipment** may include:
- hand tools
- measuring equipment
- string line.

**Levelling equipment** may include:
- boning rods
- rotating laser level
- pipe laser level
- spirit level
- water level.

**Sustainability principles and concepts:**
- cover the social, economic and environmental use of resources to meet current and future needs
  - may include:
    - efficient use and recycling of tools and equipment
    - disposing of waste material to ensure minimal environmental impact
    - energy efficiency
    - water efficiency.

**Information** may include:
- building codes
- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- job drawings
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- WHS and environmental requirements
- organisation work specifications and requirements
- plans and sketches
- regulatory and legislative requirements, particularly those pertaining to plumbing and gasfitting authority regulations
- relevant Australian standards
- safe work procedures relating to handling and storing levelling equipment
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.
Unit Sector(s)

Functional area

Custom Content Section

Not applicable.
CPCPPS5027A Design irrigation systems

Modification History
Changes to unit descriptor, application, performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPPS5007A

Unit Descriptor
This unit of competency specifies the outcomes required to design irrigation systems to relevant Australian standards, codes, the National Construction Code (NCC) and other relevant legislative requirements to meet occupier needs and industry standards.

Application of the Unit
This unit of competency supports development of skills and knowledge required for competent workplace performance in a consultancy or supervisory capacity in relation to the design of irrigation systems for residential, commercial, industrial, sporting and agricultural properties with or without connection to reticulated supply.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

1 Evaluate design parameters.

1.1 Scope of work for irrigation systems is established.

1.2 Design requirements are determined from relevant Australian standards, codes, plans, specifications and client brief.

1.3 Cost-benefit analysis is conducted comparing a range of pipe materials and system designs.

1.4 Statutory and regulatory requirements and relevant Australian standards and codes for the design of irrigation systems are interpreted, analysed and applied.

1.5 Manufacturer requirements and trade and technical manuals are interpreted.

1.6 Additional research, including a desktop study, is conducted to outline design parameters.

1.7 Flow and pressure tests are conducted.

1.8 Water sources, volumes and areas to be irrigated are established.

1.9 Soil types are analysed and categorised, and impacts on irrigation systems are documented.

1.10 Factors that contribute to quality, safety and time efficiency are determined.

1.11 Performance requirements are established, considering safety of system users or building occupants.

2 Plan and detail system components.

2.1 Layout of pipework systems and type and location of fittings, valves and controls are planned.

2.2 Type, location and requirements for backflow prevention devices are detailed.

2.3 Pipe sizes, velocities, flows and pressures are calculated for a range of applications.
2.4 Approved materials and jointing methods for irrigation systems are specified.

2.5 Sections and components of the irrigation system are detailed.

2.6 Pipe supports are designed for a range of applications.

2.7 Pump enclosure and control requirements are sized and detailed.

2.8 Installation requirements are specified for irrigation management system.

2.9 Water storage requirements are determined.

2.10 Allowance for pipe movement is made.

3 Design and size systems.

3.1 Irrigation systems are designed for a range of residential, commercial, industrial, sporting and agricultural applications.

3.2 Range of delivery systems and layout are designed.

3.3 Irrigation systems are designed and sized using calculations and computer software packages.

3.4 Required water application is determined to establish and maintain plant life.

3.5 Sustainability principles and concepts are applied throughout the design process.

4 Prepare documentation.

4.1 Client brief of the desired design is prepared.

4.2 Plans and specifications are prepared for a range of irrigation systems.

4.3 Testing and commissioning schedule is prepared.

4.4 Operation and maintenance manual is produced.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - communicate with others to ensure safe and effective work practices
  - confirm job specifications and client requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- literacy skills to:
  - prepare written documentation, including:
    - operation and maintenance manual
    - plans, specifications and schedules
  - read and interpret:
    - plans, specifications, drawings and design briefs
    - standards and manufacturer requirements and manuals
    - statutory and regulatory requirements
- initiative and enterprise skills to develop creative and responsive approaches
- numeracy skills to apply measurements and calculations
- planning and organising skills to:
  - research, collect, organise and understand information relating to the design of irrigation systems
  - take initiative and make decisions
- problem-solving skills to analyse requirements, consider options and design an appropriate system
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technical skills to design irrigation systems to National Construction Code, relevant Australian standards, and other relevant legislative requirements
- technology skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology

Required knowledge

- application of National Construction Code or relevant Australian standards and codes, manufacturer specifications, and operating procedures relevant to the sector
- common terminology and definitions used in the design of irrigation systems
- nature of materials used and effects of performance under various conditions
- principles of technology used in design of irrigation systems for a range of applications
- work health and safety (WHS) requirements, including relevant statutory regulations, codes and standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to, as a minimum, provide evidence of the ability to:

- design, size and document layout details of an irrigation system, including a specification for a:
  - sports oval incorporating stormwater collection and use, with a mains pressure drinking water top-up and with chemical additives
  - a landscaped area for a mixed development site connected to a main pressure recycled (non-drinking) water main
- evaluate and document design parameters to relevant Australian standards and codes, and regulatory, client and manufacturer requirements.
- plan and detail system components that include:
  - backflow prevention devices
  - irrigation management-control system
  - pumping requirements
  - water delivery outlets
  - piping requirements
- design and size two irrigation systems, using appropriate calculations and computer software for specific applications
- prepare testing and commissioning schedules
- prepare operation and maintenance manuals
- apply sustainability principles and concepts throughout the design
- communicate with others to ensure safe and effective work site operations.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:
- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions, including design brief drawings, specifications, codes, design concepts and construction schedules
- tools and equipment appropriate to applying safe work practices, including computers, software and calculators
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:
- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and
correctly interpret the essential underpinning knowledge required for practical application
• reinforce the integration of employability skills with workplace tasks and job roles
• confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:
• competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
• where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
• all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Scope of work:
• must include:
  • interpretation of plans and specifications
sizing and documenting layout irrigation systems for applications, including residential, sporting and agricultural properties.

- may be for new projects or an existing structure being renovated, extended, restored or maintained.

**Design requirements** must include:

- architectural plans
- backflow requirements
- interpretation and application of irrigation services, drawings and symbols
- irrigation management system
- owner requirements
- precipitation and evaporation rates
- pumping requirements
- required water application to establish and maintain plant life
- source of irrigation water
- sprinkler head spacings
- system requirements
- water storage requirements.

**Cost-benefit analysis:**

- compares the range of suitable materials and system choices available to enable cost-effective choices to be made without compromising integrity of project
- may include:
  - design styles
  - expected design life
  - labour costs
  - material costs
  - required water application to establish and maintain plant life
  - safety factors
  - speed of installation
  - suitability of materials
  - system choices
  - use of recycled or alternative water.

**Statutory and regulatory requirements and relevant Australian standards and codes**

- Acts, regulations and commonwealth, state or territory, and local government requirements
- AS/NZS3500 National plumbing and drainage
may include:

- AS2200 Design charts for water supply and sewerage
- National Construction Code
- state or territory health department requirements
- other relevant Australian standards or codes.

**Manufacturer requirements** may include:

- irrigation management system
- material specifications
- pump tables
- sprinkler head performance
- sub-surface irrigation
- technical and trade manuals.

**Desktop study** may include collection and interpretation of data for design purposes in:

- architectural and building plans
- site layout plans, which may include:
  - sports ovals
  - golf courses
  - residential, commercial, industrial and agricultural properties
  - local government parks
- manufacturer data
- documents, which may include:
  - applications
  - brochures
  - forms
  - policies
  - other reports as available.

**Flow and pressure tests** may include:

- interpretation of flow and pressure tests
- on-site measurement of flows (l/s), velocity (m/s) and pressure (kPa).

**Water sources, volumes and areas to be irrigated** may include:

- sources:
  - drinking water
  - non-drinking (recycled) water
  - rain water
  - grey water
  - creeks
  - dams
• lakes  
• rivers  
• streams  
• tanks  
• other approved water sources  
• volumes and areas:  
  • amount and duration of water supply  
  • areas to be irrigated  
  • number of control stations required  
  • total amount and flow rate required for each control station.

**Soil types** may include:

• gravels  
• light, medium and heavy clays  
• loams  
• rock  
• sands.

**Performance requirements** may include:

• flow, velocity, pressure and discharge requirements, established using relevant Australian standards, codes and manufacturer information  
• required water application to establish and maintain plant life.

**Layout of pipework systems:**

• may include:  
  • distribution  
  • dual feed systems  
  • range pipes  
  • ring main  
  • single pipe  
  • control stations  
• should not unduly affect aesthetic appeal and building integrity  
• should have principles of economy, serviceability, durability and fit for use applied.

**Fittings, valves and controls** may include:

• fittings:  
  • bends  
  • elbows
• sprinkler heads
• tees
• unions
• valves:
  • backflow prevention
  • excess pressure
  • isolating
  • pressure limiting
  • pressure reduction
  • strainers
• controls:
  • irrigation management system
  • control stations
  • control wiring
  • nodes.

**Backflow prevention devices** may include:
• double-check valve assembly (DCV)
• dual-check valve with intermediate vent (DuCV)
• pressure type vacuum breaker (PVB)
• reduced pressure zone device (RPZD)
• registered air gap (RAG)
• registered break tank (RBT)
• reduced pressure detector assembly (RPDA)
• reduced pressure zone device (RPZD)
• other approved backflow prevention devices
• may be located as:
  • individual protection
  • zone protection
  • containment protection.

**Materials** may include:
• composite pipework
• copper (Cu)
• cross-linked polyethylene (PE-X)
• polypropylene (PP)
• polybutylene (PB)
• polyvinyl chloride (PVC)
• other relevant materials.

**Jointing methods** include:
• brazing
• compression
• electrofusion welding
• flaring
• mechanical joints
• rubber ring joints
• screwing
• soldering
• other approved jointing methods.

Sections and components of the irrigation system must include:

• irrigation stations:
  • number, size, area, volume of water required, delivery requirements, operation and activation of stations, sprinkler patterns, location and distribution of sprinkler heads, obstacle avoidance, water minimisation, waste minimisation and timing
• manifold systems:
  • manifolds to stations, headers, branches, timers, isolators, servo valves, electronics, power supplies and manual activation
• sensors:
  • moisture sensors, soil sensors, temperature sensors, humidity sensors, weather stations and computer automation
• automatic controls:
  • station controllers, servo valves, isolating valves, water tractors and timers
• sprinklers, drippers and irrigators:
  • sprinkler heads, sprinkler flows, impact sprinklers, gear-driven sprinklers, water tractors, water cannons, tape drippers, individual drippers, flow controlled drippers, in-ground irrigation tapes and root inhibitor systems
• sprinkler patterns:
  • head to head, square, triangular, circular, quarter overlap, half overlap, full overlap, double overlap and other overlap patterns.

Pipe supports may include:

• thrust blocks
• bedding
• bracket spacing
• corrosion protection
- cover
- manufacturer-recommended specific fixings
- material requirements
- provision for pipe movement.

**Pump enclosure and control requirements** may include:

- acoustic performance
- automatic change-over
- automatic controls
- dual-pump provision
- impeller sizing
- inlet and outlet design requirements
- installation and mounting requirements
- irrigation management control system
- pressure gauges
- pump controls
- pump selection
- pump sizing
- pump housing
- space requirements
- valve requirements
- variable speed control.

**Installation requirements** may include:

- pipe connection:
  - bedding and backfilling
  - corrosion
  - cover
  - ground stability
  - impact
- level of workmanship
- manufacturer recommendations
- pipe support
- provision for pipe movement
- serviceability and access.

**Applications:**

- may include:
  - agricultural crops
  - garden irrigation
  - golf courses
  - greenhouses
• lawn watering
• local government parks
• nurseries
• sports ovals
• should also cover:
  • individual crop water requirements
  • types of plants and their respective crop factors.

**Delivery systems and layout may include:**

• main delivery
• number and design of control stations
  • design includes:
    • avoiding obstacles
    • irregular shapes
    • minimising water wastage
    • range of irrigation applications
• range pipes
• ring mains
• size and water delivery of sprinklers
• sprinkler head patterns and placement.

**Sustainability principles and concepts:**

• cover the current and future social, economic and environmental use of resources
  • may include:
    • selecting appropriate material to ensure minimal environmental impact
    • efficient use of material
    • efficient energy usage/capital outlay comparison
    • water efficiency
    • reuse of water, such as rainwater, grey water and recycled non-drinking water
    • consideration of the Green Building Council of Australia rating scheme.

**Plans:**

• may include:
  • axonometrics
  • cross-sections
  • details
  • elevations
  • isometrics
• schematics
• sections
• may be produced using:
  • computer generation
  • drawing equipment.

**Specification** may include:
• bedding
• flow requirements
• irrigation management control system
• jointing
• manufacturer requirements
• materials
• pumps
• residual pressures
• safety (WHS)
• specialised components
• sprinkler head selection
• storage tanks
• support
• testing
• valve selection
• water treatment
• workmanship.

**Testing** may include:
• defect inspection
• hydrostatic
• mains pressure
• performance
• quality assurance (QA) audit.

**Commissioning schedule** may include:
• system certification
• flow test
• leak check
• pressure test
• system purge
• system defect
• system functions as per design
• valve and system operation.
**Operation and maintenance manual** includes:

- as installed drawings
- results of commissioning test
- certification documentation
- maintenance schedules
- manufacturer brochures and technical information
- operational procedures
- valve function.

CPCPWT3027A Connect irrigation systems from drinking water supply

Modification History
Prerequisite unit changed
Minor changes throughout the unit
Not equivalent to CPCPWT3017A

Unit Descriptor
This unit of competency specifies the outcomes required to connect irrigation and watering systems from a drinking water supply. It does not include the commissioning of backflow prevention devices or arrangements.

Application of the Unit
Site location for work application may be either domestic or commercial, and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
CPCPCM2043A Carry out WHS requirements

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent
Elements and Performance Criteria

1 Prepare for work.

1.1 Plans and specifications are obtained.

1.2 Work health and safety (WHS) and environmental requirements associated with connecting irrigation systems from a drinking water supply are adhered to throughout the work.

1.3 Quality assurance requirements are identified and adhered to according to workplace requirements.

1.4 Tasks are planned and sequenced in conjunction with others involved in or affected by the work and statutory and regulatory authorities’ requirements.

1.5 Tools and equipment for connecting irrigation systems, including personal protective equipment, are selected and checked for serviceability.

1.6 Work area is prepared to support efficient connection of irrigation systems from a drinking water supply.

2 Identify installation requirements.

2.1 Connection size and hazard rating are determined from plans, specification, relevant Australian standards and/or site inspection using relevant information.

2.2 Valve is sized according to plans and specification.

2.3 Back flow prevention devices are confirmed as being according to hazard rating.

2.4 Materials and equipment are identified, ordered and collected according to workplace procedures.

2.5 Materials and equipment are checked for compliance with relevant Australian standards, docket and order form, and for acceptable condition.

2.6 Sustainability principles and concepts are observed when preparing for and undertaking work process.
3 Connect and test system.

3.1 Excavation is set out and made according to plans and specifications and undertaken with consideration given to existing structures and services.

3.2 Service pipe is isolated and cut to accommodate take off branch according to authorities' requirements.

3.3 Back flow prevention device is fitted according to relevant Australian standards and manufacturer specifications.

3.4 System is connected and flushed to required standard.

3.5 Water supply is restored and system tested according to relevant Australian standards.

3.6 Ground surface is restored.

4 Clean up.

4.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification.

4.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.

4.3 Documentation is completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

• communication skills to:
  • access information
  • enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  • follow instructions
  • identify requirements
• use language and concepts appropriate to cultural differences
• use and interpret non-verbal communication, such as hand signals
• initiative and enterprise skills to identify and accurately report to appropriate personnel any faults in tools, equipment or materials
• literacy skills to:
  • complete workplace documentation
  • read and interpret:
    • documentation from a variety of sources
    • plans and specifications
• numeracy skills to apply measurements and calculations
• planning and organising skills to:
  • plan and sequence tasks with others
  • plan and set out work
• teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
• technical skills to cut into a water supply and install a take-off branch and fitting valves and backflow prevention devices for an irrigation or watering system
• technology skills to:
  • access and understand site-specific instructions in a variety of media
  • use mobile communication technology

**Required knowledge**

• characteristics and application of different pipes and fittings, including fixing and joining techniques and methods
• drinking water supplies and protection measures
• implications of cross connections and air gaps
• job safety analysis (JSA) and safe work method statements (SWMS)
• process of connecting irrigation systems from a drinking water supply
• processes for accessing information and for calculating material requirements
• properties of water, including pressure and flow rates
• relevant statutory requirements related to connecting irrigation systems from a drinking water supply
• SI system of measurement
• Australian standards applicable to the connection
• use of test equipment and procedures
• various types of irrigation systems and types of materials used
• workplace and equipment safety requirements
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, relevant Australian standards and specifications to connect an irrigation system from a drinking water supply
- applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
- given the plans and specifications, connecting an irrigation system to a drinking water supply, ensuring:
  - application of sustainability principles and concepts
  - correct identification of location, design and details of proposed installations
  - correct selection and use of appropriate processes, tools and equipment
  - completing all work to specification
  - compliance with regulations, relevant Australian standards and organisational quality procedures and processes
  - communicating and working effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will
usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a
number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge.

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work health and safety** is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control
- identifying and testing for electrical hazards
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including recognising and preventing hazards associated with:
  - hazardous materials and substances
  - other machines
  - surrounding structure and facilities
  - trees
  - trip hazards
  - underground services
  - uneven and unstable terrain
- use of tools and equipment
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- use of firefighting equipment
- use of first aid equipment
- workplace environment and safety.

**Environmental requirements** cover water quality management and may include:
- clean-up protection
- waste management.

**Quality assurance requirements** may include:
- environment policy
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- site safety plan
- workplace operations and procedures.

**Statutory and regulatory authorities** include:
- commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

**Tools and equipment** may include:
- chain blocks
- electrical bonding and bridging strap
- elevated work platforms
- forklifts
- hand and power tools
- hand excavation equipment
- hand trolleys
- hoists and jacks
- lifting and load shifting equipment
- measuring equipment
- mechanical excavation equipment
- rollers
- scaffolding
- silver solder and brazing equipment
- trench shoring equipment.
Information may include:
- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- job drawings
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- organisation work specifications and requirements
- plans and sketches
- regulatory and legislative requirements, particularly those pertaining to:
  - building codes
  - WHS and environmental requirements
  - plumbing regulations
- relevant Australian standards
- safe work procedures relating to connecting irrigation systems from a drinking water supply
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Materials may include:
- backflow prevention devices
- copper tube
- fittings and connections
- joints
- polymer pipes
- valves.

Sustainability principles and concepts:
- cover the current and future social, economic and environmental use of resources
- may include:
  - selecting appropriate material to ensure minimal environmental impact
  - efficient energy and water use
  - efficient use and recycling of material
  - disposing of waste material to ensure minimal environmental impact.
Unit Sector(s)

Functional area

Unit sector: Plumbing and services

Custom Content Section

CPPFES2005A Demonstrate first attack firefighting equipment

Modification History
Revised unit
Unit updated and equivalent to PRMPFES05B Use portable fire fighting equipment

Unit Descriptor
This unit of competency specifies the outcomes required to demonstrate the use of portable fire extinguishers, fire hose reels and fire blankets.

Application of the Unit
This unit of competency supports fire protection equipment service technicians responsible for demonstrating to customers how to interpret and follow manufacturers’ instructions on various first attack firefighting equipment in emergency situations.

Licensing/Regulatory Information
Work in this area must be completed according to relevant legislative, industry, customer and organisational requirements, including occupational health and safety (OHS) policies and procedures.
Different states and territories may have regulatory mechanisms that apply to this unit. Candidates are advised to check for regulatory limitations.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of
performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Demonstrate correct use of portable fire extinguishers to extinguish simulated fires.
   
   1.1 Fire type and classification are determined.
   
   1.2 Fire extinguishers are selected to attack different fires.
   
   1.3 Safe use of fire extinguishers is demonstrated according to manufacturers’ instructions and relevant OHS and workplace policies and procedures.

2 Demonstrate correct use of fire hose reels.
   
   2.1 Safe use of hose reels is demonstrated according to manufacturers’ instructions and relevant OHS and workplace policies and procedures.
   
   2.2 Water is turned off in the approved sequence and hose reel is checked for leaks.
   
   2.3 Hose reel is rewound correctly after use.

3 Demonstrate correct use of fire blanket.
   
   3.1 Safe use of fire blankets is demonstrated according to manufacturers’ instructions and relevant OHS and workplace policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- decision-making skills to select correct first attack firefighting equipment for different types of fires
- effective customer service
- language, literacy and numeracy skills to:
  - communicate with others in a clear and concise manner
  - read and comply with work instructions and specifications
CPPFES2005A Demonstrate first attack firefighting equipment

Evidence Guide
The evidence guide provides advice on assessment and must be read in conjunction with the
performance criteria, required skills and knowledge, range statement and the Assessment
Guidelines for the Training Package.
Overview of assessment

This unit of competency could be assessed by practical
demonstration, using simulated fire situations. Due to safety and cost
factors, methods of extinguishing class D, E and F fires are confined
to oral explanations and role play or simulations only.
All practical demonstrations involving the use of simulated fires
must adhere to the safety and environmental regulations relevant to
each state or territory.

Critical aspects for
assessment and evidence
required to demonstrate
competency in this unit

A person who demonstrates competency in this unit must be able to
provide evidence of the required skills and knowledge specified in
this unit.
In particular the person should demonstrate the ability to:


select correct portable firefighting equipment for a particular
type of fire

Page 6022 of 7826
Skills Impact


### Context of and specific resources for assessment

Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. Resource implications for assessment include:

- actual or simulated work environment
- portable firefighting equipment.

### Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Property Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

### Guidance information for assessment

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

This unit could be assessed on its own or in combination with other units relevant to the job function, for example:

- CPPFES2004A Identify types of installed fire safety equipment and systems
- CPPFES2006A Prepare for installation and servicing operations.

### Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.
**Fire types** may include:
- combustible metals
- cooking oils and fats
- energised electrical equipment
- flammable and combustible liquids
- flammable gases
- ordinary combustibles.

**Classifications** of fires include:
- classes A, B, C, D, E and F.

**Fire extinguishers** may include:
- carbon dioxide
- foam
- powder
- vaporising liquid
- water
- wet chemical.

**OHS and workplace policies and procedures** may be located in quality assurance and/or procedures manuals relating to:
- appropriate techniques to use in relation to emergency management of fires
- assessing work site for hazards and risks prior to preparing the work site for the work procedure
- displaying signs and using barriers in the work area
- OHS policies, procedures and programs, including:
  - risk and hazard recognition
  - emergency procedures
  - awareness of electrical hazards
  - following confined spaces procedures
  - first aid
  - personnel practices and guidelines outlining work roles, responsibilities and delegations
- safety procedures, including those for working safely:
  - around electrical wiring, cables and overhead powerlines
  - around tools and equipment
  - on ladders and raised platforms
- using personal protective equipment, including:
  - safety glasses or goggles
  - safety boots or shoes
  - hard hats
  - earmuffs or plugs.

**Hose reel** types may be:
- swing-hinged
- vehicle-mounted
- wall-mounted.

CPPSIS2012 Assist in collecting basic spatial data

Modification History
Release 1.

Replaces superseded non-equivalent CPPSIS2012A Assist in the collection of spatial data.

This version first released with CPP Property Services Training Package Version 3.

Application
This unit of competency specifies the outcomes required to assist team members to collect basic spatial data in the field using surveying methods. Basic spatial data refers to measurements of distances, angles and height difference. The unit covers preparing for data collection by clarifying tasks and equipment to be used, and checking equipment for safe working order. The unit also covers participating in spatial data gathering activities, including recording data in the correct format and using equipment in a safe manner. It covers finalising work tasks by checking and storing equipment and reporting faults or problems, and completing and storing data and documentation. The unit requires the ability to follow instructions and communicate with team members, and to apply mathematical concepts used for basic surveying methods.

The unit supports those who work under direct supervision in a surveying team, in positions relating to field data collection and administration.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit
Nil

Unit Sector
Surveying and spatial information services

Elements and Performance Criteria
Elements describe the performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised
essential outcomes. text is used, further information is detailed in the range of conditions.

1. Prepare to collect basic spatial data.
   1.1. Task requirements are clarified with appropriate persons.
   1.2. Equipment is selected to meet task requirements in consultation with appropriate persons.
   1.3. Equipment is checked to ensure it is in safe working order according to organisational requirements.

2. Collect basic spatial data.
   2.1. Data is collected and recorded in correct format in line with task and organisational requirements.
   2.2. Data is checked for accuracy and problems are reported to appropriate persons.
   2.3. Equipment is used according to task and safety requirements and manufacturer specifications, and problems are reported to appropriate persons.

3. Finalise spatial data collection tasks.
   3.1. Equipment is checked and stored safely according to organisational requirements and manufacturer specifications.
   3.2. Unsafe or faulty equipment is reported according to organisational requirements.
   3.3. Data and documentation are completed and stored according to organisational requirements.

Foundation Skills
This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill Performance feature

Numeracy skills to:
• use mathematical concepts in surveying methods relating to distance and angles.
Oral communication skills to:

• ask questions to clarify task requirements and equipment selection.

Reading skills to:

• locate specific information in standard operating procedures
• understand forms required for recording collected data.

Writing skills to:

• record clear and accurate measurements that can be interpreted by a third party.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Appropriate persons must include at least one of the following:

• experienced colleague
• site personnel
• supervisor or line manager.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CPPSIS2012 Assist in collecting basic spatial data

Modification History

Release 1.

Replaces superseded non-equivalent CPPSIS2012A Assist in the collection of spatial data.

This version first released with CPP Property Services Training Package Version 3.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also collect basic spatial data for two field projects according to organisational procedures and instructions, and using surveying methods. For each project, the person must use safety equipment, including personal protective equipment (PPE), and a communication device.

During the above projects, the person must collect the basic spatial data using four of the following tools and equipment:

- clinometer or device to measure vertical angles
- compass
- data recording equipment
- digital or hard copy map
- distance measuring tape
- distance measuring wheel
- level
- scientific calculator
- simple global positioning system (GPS) device to determine position
- simple laser measuring device.

While assisting in collecting the above basic spatial data, the person must:

- communicate clearly with others to clarify work tasks and equipment use
- comply with organisational requirements and manufacturer specifications
- report problems and seek assistance with work tasks
- use organisational proformas to record accurate measurements and data.
Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:
- industry-accepted standards for recording surveying measurements and data
- organisational policies and procedures relating to:
  - accessing manufacturer specifications
  - collecting spatial data
  - formats for records and documentation
  - reporting problems
  - selecting and using the tools and equipment specified in the performance evidence
  - using communications equipment
  - working safely when using surveying equipment and working in the field.

Assessment Conditions

The following must be present and available to learners during assessment activities:
- equipment:
  - as specified in the performance evidence
  - PPE
- specifications:
  - equipment operating manuals and manufacturer specifications
  - standard operating procedures and documentation relating to work tasks
- relationships with team members and supervisor:
  - access to supervisor and other appropriate persons for assistance with work tasks.

Timeframe:
- as specified by task and organisational requirements.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPPSIS5035 Obtain and validate spatial data

Modification History
Release 1.

Replaces superseded equivalent CPPSIS5035A Obtain and validate spatial data.

This version first released with CPP Property Services Training Package Version 3.

Application
This unit of competency specifies the outcomes required to obtain and validate spatial data to meet client specifications. The unit covers analysing project requirements and agreements and determining appropriate data acquisition options. It also covers applying industry-accepted validation methodologies to assess the validity and integrity of data and resolve problems. The unit requires the ability to use technology to access, manipulate, archive and retrieve a range of spatial data. It also requires the ability to record metadata and complete documentation and written communications.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, cartography, town planning, mapping or geographic information systems (GIS).

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Pre-requisite Unit
Nil

Unit Sector
Surveying and spatial information services

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of
1. Prepare for spatial data acquisition.
   1.1. Project specifications, client instructions and agreements are determined and analysed according to organisational requirements.
   1.2. Data requirements are confirmed with appropriate persons and resources are allocated to project tasks according to organisational requirements.
   1.3. Protocols for communicating with spatial data providers are followed according to organisational requirements.
   1.4. Viability of provider’s service agreement is assessed based on advice from appropriate persons.
   1.5. Data acquisition options are determined according to project specifications and organisational requirements.
   1.6. Data is received and processed according to project specifications and organisational requirements.

2. Validate spatial data.
   2.1. Data is assessed for validity and integrity according to project specifications.
   2.2. Omissions and gaps in spatial data are identified and resolved in consultation with appropriate persons.
   2.3. Metadata is recorded according to organisational requirements.
   2.4. Documentation is completed and stored according to organisational requirements.

**Foundation Skills**

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

**Skill**

Planning and organising skills to:

- delegate project tasks to staff.
Numeracy skills to: • interpret and analyse statistics.

Oral communication skills to: • negotiate data requirements with clients and service providers.

Reading skills to: • interpret contractual obligations detailed in legal documents, such as contracts, agreements, memorandums of understanding, and licences
• analyse detailed technical descriptions of spatial data and their qualifiers.

Writing skills to: • communicate with clients and data providers using email
• record measurements with accuracy and precision.

Technology skills to: • use a computer and software to access, manipulate, archive and retrieve a range of spatial data.

Problem-solving skills to: • apply contingency measures to resolve identified errors
• verify authenticity of data against specifications.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Appropriate persons must include at least two of the following:
• client
• end user
• financial or legal specialist
• manager
• qualified surveyor
• spatial data provider
• supplier
• town planner.
Metadata must include at least three of the following:

- availability
- conditions of use
- coordinate system
- currency
- custodian
- data accuracy
- data description
- date of acquisition
- licence
- quality
- source
- spatial data acquisition methodologies
- version control.

Assessment Requirements for CPPSIS5035 Obtain and validate spatial data

Modification History
Release 1.

Replaces superseded equivalent CPPSIS5035A Obtain and validate spatial data.

This version first released with CPP Property Services Training Package Version 3.

Performance Evidence
A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also obtain and validate spatial data that meets client specifications for two different projects.

While obtaining and validating the above spatial data, the person must:

- apply contingency measures when solving problems relating to data
- comply with organisational requirements and manufacturer specifications when using the equipment specified in the assessment conditions
- comply with organisational requirements for:
  - allocating resources, delegating duties and working within budgetary constraints
  - communicating with clients and spatial data providers
  - recording metadata and completing documentation
  - working safely when using screen-based equipment
- comply with legal requirements relating to client service provision, and accessing and managing spatial data
- exercise precision when archiving, retrieving, managing and manipulating spatial data
- use industry-accepted methods for assessing the validity and integrity of spatial data and resolving errors.

Knowledge Evidence
A person demonstrating competency in this unit must demonstrate knowledge of:

- industry-accepted standards relating to obtaining and validating spatial data
- legal requirements for accessing, storing, retrieving and archiving digital and hard copy spatial data, including data privacy and information copyright
- methods for assessing and validating spatial datasets and dataset sources
organisational requirements relating to:
  - work health and safety
  - client services
  - human resource management
  - completing documentation
  - spatial data capture methodologies
  - spatial data formats and structures
  - key features of spatial reference systems.

Assessment Conditions
The following must be present and available to learners during assessment activities:

- equipment:
  - computer with software appropriate for spatial data management and electronic communication
  - printer
- specifications:
  - organisational policies and procedures relating to:
    - work health and safety
    - data privacy and information copyright
    - project budget and resources
- physical conditions:
  - access to equipped work station
- relationships with team members and supervisor:
  - working in a team.

Timeframe:
- as specified by client and project requirements.

Assessor requirements
As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Modification History

Release 1.

Replaces superseded equivalent CPPSIS5064A Manipulate and analyse GIS data.

This version first released with CPP Property Services Training Package Version 3.

Application

This unit of competency specifies the outcomes required to coordinate geographic information system (GIS) data manipulation and analysis to meet client specifications. The unit covers analysing client needs and GIS data format requirements and developing procedures; assessing the applicability of existing tools, models, theories and applications; and developing models to achieve the required outcome, including feasible parameters, equations and assumptions. The unit also covers verifying data source integrity and manipulating and analysing data for presentation. The unit requires the ability to use computers and GIS software as well as querying and programming languages to capture geographic information, obtain information from databases, and create layers on maps. It also requires the ability to comply with organisational and legal requirements relating to client consultation and data ownership.

The unit supports those who work in a lead role in a surveying or spatial information services team in areas such as surveying, town planning, cartography, mapping and GIS.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to
essential outcomes. demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Prepare to meet client GIS data needs.
   1.1. Client requirements and project specifications for GIS data format are determined in consultation with appropriate persons.
   1.2. Parameters for data manipulation and analysis are specified according to project specifications.
   1.3. New procedures for manipulating and analysing data to meet project specifications are documented.

2. Establish GIS data models.
   2.1. Applicability of existing tools, models, theories, applications and solutions is reviewed against project specifications.
   2.2. Feasible parameters, equations and assumptions are developed according to project specifications.
   2.3. Models are established to meet project specifications according to organisational requirements.

3. Manipulate and analyse GIS data.
   3.1. Processes for data manipulation and analysis are determined and used to meet project specifications.
   3.2. Source data limitations and other restricting factors are analysed to ensure data integrity, and problems are identified and resolved or contingencies are managed.
   3.3. Data is isolated and retrieved from source, and interrogated to ensure reliability according to project specifications.
   3.4. Data is manipulated and prepared for presentation media, and project is finalised according to organisational requirements.

**Range of Conditions**

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

**Appropriate persons** must include at least one of the following:

• client
• colleague
• end user
• manager
• spatial data supplier.
Unit Mapping Information

Companion Volume implementation guides are found in VETNet -
Assessment Requirements for CPPSIS5064 Coordinate GIS data manipulation and analysis

Modification History

Release 1.

Replaces superseded equivalent CPPSIS5064A Manipulate and analyse GIS data.

This version first released with CPP Property Services Training Package Version 3.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit. The person must also coordinate geographic information system (GIS) data manipulation and analysis to meet client needs for two different projects.

While coordinating the above GIS data manipulation and analysis projects, the person must:

- negotiate with clients regarding data format requirements
- conduct research to source geographic information
- develop parameters, equations and assumptions to meet task requirements
- develop procedures and establish models for data analysis that meet established client specifications for data format
- analyse data sources to verify data integrity to ensure:
  - accuracy
  - completeness
  - confidence limits
  - currency
  - quality
  - resolution
  - scale
- build up elements of a database
- capture geographic information
- manipulate and analyse datasets using general query and programming languages, scripts and command lines
- use GIS software to manipulate and analyse data for display on a map
- comply with organisational and legal requirements for:
  - client consultation
• data ownership, including accessing and using spatial data, including copyright, intellectual property, data privacy and trade practices
• comply with organisational requirements for recording data and completing documentation, and using screen-based equipment.

**Knowledge Evidence**

A person demonstrating competency in this unit must demonstrate knowledge of:

• data reduction and manipulation techniques
• database structures and spatial features of databases
• line instructions and programming languages to capture geographic information
• methods for creating layers on maps
• querying and browsing techniques for obtaining information from databases
• types of spatial data formats
• organisational and legal requirements for accessing and using spatial data, including copyright, intellectual property, and trade practices
• organisational policies and procedures relating to:
  • accessing, recording and storing spatial data
  • communicating with clients and end users
  • completing records and documentation
  • custodianship of data
  • using computer systems and software to manipulate GIS data.

**Assessment Conditions**

The following must be present and available to learners during assessment activities:

• equipment:
  • computer and software appropriate for manipulating GIS data
• specifications:
  • organisational policies, procedures and documentation relating to data privacy and information copyright
• physical conditions:
  • access to equipped work station
• relationships with team members and supervisor:
  • working in a team.
• relationships with clients:
  • client consultation required.

**Timeframe:**

• as specified by task and organisational requirements.

**Assessor requirements**
As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

**Links**

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b
CPPWMT5043A Develop and implement an environmental management strategy

Modification History
Revised unit
Unit updated and equivalent to PRMWM43A Develop an environmental management strategy

Unit Descriptor
This unit of competency specifies the outcomes required to develop and implement an environmental management strategy. It requires the ability to analyse practices and develop environmental management strategies by working effectively with stakeholders.

Application of the Unit
This unit of competency supports individuals with supervisory responsibilities for developing waste management strategies. It includes contributing to the development of strategies, systems and plans, as well as recognising the need for expert advice.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of
performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Define scope of environmental management strategy.
   1.1 Needs and expectations for development of environmental management strategy are identified.
   1.2 Constraints under which environmental strategy can be developed are identified.
   1.3 Clear and concise statement of environmental objectives is prepared and feasibility of environmental management options is evaluated.

2 Determine environmental management strategy development process.
   2.1 Process models applicable to scope of environmental management strategy are identified.
   2.2 Process models are assessed and a suitable model for achieving the strategy’s objectives is selected.
   2.3 Principal stakeholders are identified to maximise their participation in development process.
   2.4 Stakeholders are consulted regarding acceptance of proposed strategy development process.

3 Identify resources required for environmental management strategy.
   3.1 Resource requirements of the strategy are determined in an accurate and comprehensive manner.
   3.2 Financial budget required for management strategy is prepared.
   3.3 Human resource and skill requirements for strategy are identified.
   3.4 Facility and equipment needs for strategy are identified to ensure all requirements can be met on time.

4 Identify and prioritise
   4.1 Existing data is collated in a comprehensive manner relevant to the scope and strategy.
4.2 Existing data is evaluated to identify need for further data collection.

4.3 Additional data is obtained to ensure a comprehensive database for effective analysis.

4.4 Available data is assessed against scientifically established criteria and community expectations within *applicable legislation and codes*.

4.5 Common problems and opportunities are grouped to formulate environmental issues that can be actioned by stakeholders.

4.6 *Criteria to prioritise* environmental issues are established.

5 Prepare environmental management strategy.

5.1 Practical actions that enable a resolution of environmental issues in line with strategy objectives are determined.

5.2 Clear and concise draft documentation is prepared for the strategy to obtain feedback from stakeholders.

5.3 Feedback is evaluated and a response is formed.

5.4 Local approval of the environmental management strategy is obtained.

6 Prepare implementation plan for environmental management strategy.

6.1 Actions are prioritised to provide the most effective resolution of issues within available resources.

6.2 Resources are allocated to match action priorities.

6.3 Processes are monitored and modified as required to ensure the strategy is achieving objectives.

6.4 Responsible parties with the capacity to carry out strategy actions are identified.

6.5 Achievable timelines, schedules and targets that enable strategy objectives to be met within required timeframes are established.

6.6 *Supervisory processes* and checks and measures are implemented to ensure work is completed within *time*.
Monitor and review effectiveness of environmental management strategy.

7.1 Regular data to provide accurate measures of performance are collected and analysed.

7.2 Outcomes of strategy objectives are compared to assess respective effectiveness.

7.3 Changes are made to strategy as required in a timely manner to ensure outcomes are achieved.

7.4 Information obtained during monitoring and review is used to develop new strategies based on accumulated knowledge and experience.

### Required Skills and Knowledge

- This section describes the skills and knowledge required for this unit.

#### Required skills

- **analytical skills to:**
  - determine appropriate waste management service
  - review operations
  - conduct feasibility tests

- **interpersonal skills to:**
  - manage consultation processes
  - present strategy

- **management skills to:**
  - apply change management techniques
  - conduct budgeting
  - organise work practices safely and efficiently
  - conduct strategic problem solving
  - plan work practices
  - identify and minimise hazards and risks
  - organise work methodically
  - monitor performance
  - apply quality assurance practices
  - use information technology to complete tasks

- **oral communication skills to:**
• ask questions
• listen actively
• consult
• give instructions
• provide strategic information
• reading skills to interpret:
  • plans
  • complex documentation
• written communication skills to:
  • write reports
  • prepare complex strategic documentation

**Required knowledge**

• environmental issues relating to:
  • life cycle of products: re-new, re-use and recycle
  • environmental regulations
  • renewable energy
• features required for an environmental management strategy, including:
  • site contract requirements
  • reclamation
  • training outline
  • waste minimisation
  • waste prevention
  • work procedures
  • environmental education
  • past and future reviews and audits relating to environmental management
  • recycling requirements
  • internal and external audits
  • monitoring personnel performance following training
  • quality control checks relating to environmental management
  • review of effectiveness of new procedures and processes
  • targets, such as:
    • carbon emissions reduction
    • cleaner production
    • lean management
    • recycling rates
    • waste minimisation
• identification and strategic knowledge of:
  • waste types, streams and characteristics
  • waste non-conformances
- unanticipated waste
- waste non-conformance procedures
- waste containment
- waste disposal and recovery routes
- occupational health and safety (OHS) requirements relating to:
  - dangerous goods and hazardous substances
  - OHS hierarchy of control
- resource recovery options relating to:
  - valuable resources within materials
  - potential resources to be recovered
- waste assessment to identify:
  - resource needs
  - hazards and risks
- waste audit, including:
  - analysing waste practices
  - analysing previous audit plans and audit processes
  - outlining possible benefits and outcomes from conducting a waste assessment
  - types of client waste management surveys and their uses
  - sampling techniques
- waste management provision, including:
  - organisational requirements and structure, including workplace communication channels and procedures
  - legislation, regulations and codes of practice applicable to specific waste management functions
  - waste management options
  - nature and significance of waste minimisation hierarchy life cycle assessment
  - organisational pricing schedules
  - duty of care

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Skills Impact
| assessment and evidence required to demonstrate competency in this unit | provide evidence of the required skills and knowledge specified in this unit.  
In particular the person should demonstrate the ability to: 
- identify environmental management objectives 
- consult stakeholders consulted in development strategy 
- prioritise environmental issues by level of importance and impact 
- amalgamate issues in order to develop environmental management strategy. |
|---|---|
| Context of and specific resources for assessment | Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements.  
Resource implications for assessment include:  
- work plans and approved specifications  
- forms and procedures manuals. |
| Method of assessment | The process of developing an environmental management strategy must comply with the objectives of the client as well as with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of environmental management strategy.  
Assessment methods must:  
- satisfy the endorsed Assessment Guidelines of the Property Services Training Package  
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application  
- reinforce the integration of employability skills with workplace tasks and job roles  
- confirm that competency is verified and able to be transferred to other circumstances and environments. |
| Guidance information for assessment | Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.  
Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.  
This unit could be assessed on its own or in combination with other... |
units of competency relevant to the job function, for example:
- CPPCMN4001B Develop workplace policies and procedures for sustainability
- CPPWMT5004A Develop waste management strategies.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Environmental management strategy may include: | • **air and water** pollution  
• biodiversity protection and protection of natural resources  
• carbon emission  
• ecosystem management  
• wildlife and endangered species. |
| Constraints may include: | • budgets  
• knowledge  
• resources  
• time. |
| Feasibility of environmental management options must include: | • commitment to environmental management strategies  
• compliance with legislation  
• cost-benefit analysis  
• costs  
• lead time  
• process constraints  
• resource requirements, including equipment and personnel  
• resources available. |
| Process models may include: | • implementation strategies, including:  
• material safety data sheets (MSDS)  
• measurement and recording  
• OHS procedures  
• personal protective equipment (PPE)  
• legislation and codes  
• site contract requirements  
• work procedures  
• objectives pertaining to:  
• changes to processes and procedures |
- environmental issues
- education and training
- past and future reviews and audits
- recycling requirements
- reduction of waste
- review strategies, including:
  - internal and external audits
  - monitoring statistics
  - monitoring personnel performance following training
  - undertaking quality control checks
  - reviewing effectiveness of new procedures and processes
  - formalising review strategies via re-planning
  - sampling
  - counting waste
- targets, such as:
  - carbon emissions reduction
  - lean management
  - recycling rates
  - waste minimisation.

**Stakeholders** may include:

- business
- community
- council
- funding bodies
- government
- industry
- interest groups
- land management agencies
- local authorities
- statutory authorities.

**Human resource** may include:

- community experts
- consultants
- government agencies
- internal staff
- project officers
- volunteers.

**Data** may include:

- existing reports or programs
- questionnaires
- references
- stakeholder input
- surveys.
| **Applicable legislation and codes** may include: | codes, including: |
| | Australian Code for the Transport of Dangerous Goods by Road and Rail |
| | industry |
| | commonwealth, state and territory legislation, including: |
| | anti-discrimination |
| | environmental protection |
| | equal employment opportunity |
| | freedom of information |
| | industrial |
| | OHS |
| | trade practices |
| | road laws. |
| **Criteria to prioritise** may include: | benefit |
| | budget constraints |
| | business objectives |
| | community preferences |
| | environmental issues: |
| | impact |
| | legislative provisions |
| | resources |
| | timeframes. |
| **Supervisory processes** may include: | delegating |
| | implementing |
| | monitoring |
| | overseeing |
| | planning |
| | reviewing |
| | targeting practices to meet deadlines. |
| **Time available** may include considering: | client instructions |
| | contingencies |
| | past experiences |
| | skills and experience of operatives |
| | location of project |
| | methods to be employed |
| | resources and equipment to be used. |

CPPWMT5045A Develop site safety plans

Modification History
Revised unit
Unit updated and equivalent to PRMWM45B Develop site safety plan

Unit Descriptor
This unit of competency specifies the outcomes required to develop an on-site safety plan for a waste management environment. It requires the ability to plan activity for safe work practices.

Application of the Unit
This unit of competency supports individuals responsible for developing on-site safety plans. It includes contributing to the development of operational procedures, in addition to safety principles.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

1  Review site safety requirements.
   1.1 Details of site and site requirements are obtained and reviewed to determine specific safety requirements.
   1.2 Organisational requirements, occupational health and safety (OHS) regulations and legislation and codes are identified.
   1.3 Site safety requirements are identified according to organisational requirements.

2  Determine site safety requirements.
   2.1 Safety information necessary to ensure safety of personnel and general public is included in the on-site safety plan.
   2.2 Site areas are identified and classified in safety plan.
   2.3 Exact locations of first aid and emergency facilities are identified in on-site safety plan.
   2.4 Wastes on site are clearly identified in on-site safety plan by location and type.
   2.5 Emergency and personal protective equipment (PPE) requirements and potential hazards and risks are identified for specific site areas in on-site safety plan.
   2.6 Emergency response action or procedures are identified according to on-site safety plan.
   2.7 On-site safety plan is reviewed following feedback from stakeholders.

3  Communicate on-site safety plan to personnel.
   3.1 On-site safety plan is communicated promptly and clearly to relevant personnel according to organisational requirements, OHS regulations and legislation and codes.
   3.2 Personnel’s understanding of all aspects of on-site safety plan is confirmed through questioning and observation.
   3.3 Feedback from personnel is obtained and integrated into on-site safety plan.
3.4 On-site safety plan is kept in an accessible place, according to organisational requirements, OHS regulations and legislation and codes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - determine site safety options
  - review operations
- basic illustration skills for drawing simple site maps
- interpersonal skills to:
  - manage consultation processes
  - present safety plan
- management skills to:
  - apply change management techniques
  - conduct strategic problem solving
  - plan work practices
  - identify and minimise hazards and risks
  - organise work methodically
  - apply quality assurance practices
  - use information technology to complete tasks
  - use emergency and personal protective equipment
- reading skills to interpret:
  - work or material requirements
  - materials safety data sheets (MSDS)
- written communication skills to:
  - write reports
  - prepare complex strategic documentation
- critical thinking skills to develop on-site safety plan, identifying:
  - resource needs
  - hazards and risks
- oral communication skills to:
  - ask and answer questions
  - explain on-site safety plan to personnel
• give instructions
• seek feedback
• listen actively

**Required knowledge**

• environmental issues relating to:
  • life cycle of products: re-new, re-use and recycle
  • environmental regulations

• features required for on-site safety plan pertaining to:
  • site contract requirements
  • waste disposal methods
  • waste minimisation
  • waste prevention
  • waste segregation
  • work procedures
  • environmental issues
  • education and training outline
  • recycling and recovery requirements
  • monitoring personnel performance following safety training
  • quality control checks
  • review of effectiveness of new procedures and processes

• identification of safety issues pertaining to:
  • waste types, streams and characteristics and level of associated danger
  • waste non-conformances
  • unanticipated waste
  • waste non-conformance procedures
  • waste contaminants
  • hazardous waste
  • waste containment
  • waste disposal and recovery routes

• OHS requirements relating to:
  • dangerous goods and hazardous substances
  • OHS hierarchy of control

• waste audit, including:
  • analysing waste safety practices
  • analysing previous audit plans and audit processes pertaining to safety

• waste management provision, including:
  • organisational requirements in relation to safety
  • organisational structure and reporting requirements
  • legislation, regulations and codes of practice applicable to specific waste management
functions
  - waste management safety options

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>This unit of competency could be assessed by demonstration of site safety plans developed.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to:  
  - identify site safety requirements  
  - specify all necessary PPE required to undertake work safely in each site area  
  - gather necessary information to develop on-site safety plan following consultation with stakeholders  
  - apply OHS requirements and duty of care to provide safe environment for personnel and general public. |
| Context of and specific resources for assessment | Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. Resource implications for assessment include:  
  - work plans and approved specifications  
  - forms and procedures manuals. |
| Method of assessment | An on-site safety plan must be developed in line with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of the plan. Assessment methods must:  
  - satisfy the endorsed Assessment Guidelines of the Property Services Training Package  
  - include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application |
• reinforce the integration of employability skills with workplace tasks and job roles
• confirm that competency is verified and able to be transferred to other circumstances and environments.

Guidance information for assessment

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

This unit could be assessed on its own or in combination with other units of competency relevant to the job function, for example:

• CPPCMN3001B Participate in environmentally sustainable work practices
• CPPCMN4007A Manage workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Details of site and site requirements may include:**

• areas allowing access to general public
• organisational and site OHS requirements
• number of personnel on site
• potential hazards and risks, including level of risk
• waste incoming
• waste present at site.

**Organisational requirements may include information found in:**

• briefing papers
• job sheets
• letters
• memos
• operations manuals
• quality assurance documents
• tender and contract documents
• verbal or written instructions
• work procedures.

**Legislation and codes**

• codes, including:
**Site safety requirements may include:**
- Australian Code for the Transport of Dangerous Goods by Road and Rail
- industry
commonwealth, state and territory legislation, including:
- anti-discrimination
- environmental protection
- equal employment opportunity
- freedom of information
- industrial
- OHS
- trade practices
- road laws.

**Site safety requirements must include:**
- all necessary requirements to ensure the safety of:
  - environment
  - equipment
  - general public
  - personnel
  - structures.

**Site safety requirements may also include:**
- awareness of potential hazards and risks
- communication requirements
- confined space awareness
- emergency procedure guides
- emergency response equipment
- emergency shut-down and lock-out procedures
- evacuation area
- first aid
- induction
- PPE requirements
- site security
- training
- warning signs and barriers.

**Site areas may include:**
- evacuation areas
- first aid bays
- general public access areas
- restricted areas.

**First aid and emergency facilities may include:**
- breathing apparatus
- eye baths
- fire extinguishers
- first aid kits.

**Wastes on site may**
- solid (non-hazardous), e.g. construction and demolition
### Potential hazards and risks are those identified by the organisation that may lead to:
- damage to plant, vehicle or property
- harm to the environment
- illness or injury to employees, contractors or the public
- injuries resulting from manual handling and repetitive work.

### Potential hazards and risks may include:
- broken glass
- broken metal
- compaction equipment
- contamination
- dust
- fire
- gases and fumes
- hazardous waste (e.g. sharps)
- narrow driveways
- other vehicles and equipment
- overhanging signs
- projectiles
- spark-producing equipment
- unguarded conveyor belts

### Emergency and personal protective equipment should include:
- liquid (non-hazardous), e.g. chemical and aqueous
- hazardous – regulated, prescribed, quarantined, medical and clinical
- recoverable resources, e.g. recyclable and green waste.

### Emergency and personal protective equipment must include:
- communications equipment
- eye protection, such as goggles and protective glasses
- eyewash kit
- fire extinguishers
- first aid kit
- footwear
- gloves
- overalls and protective clothing.

### Emergency and personal protective equipment could also include:
- breathing apparatus
- emergency procedure guides
- face shields or masks
- hard hats
- hearing protection
- MSDS
- spill kit.

### Personal protective equipment must be:
- cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements
- worn when required according to organisational requirements
- stored according to organisational requirements.
Emergency response action or procedures may include:

- weather.
- cleaning up
- containing emergency
- isolating or shutting down equipment or plant
- evacuation
- first aid
- making site safe
- notifying authorities
- using PPE.

Application

This unit describes the skills and knowledge required to use a range of computer-aided design and drafting (CADD) program functions to produce drawings. The focus of this unit is on the technical skills required to operate CADD, not on design skills.

It applies to individuals who use computer-aided drawing skills in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – art, craft and design

**Range of Conditions**

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**CADD functions and features** must include:

- drawing tools to support methods for drawing:
  - lines
  - arcs
  - polylines
  - texts
  - dimensions
- edit functions
- plotting and printing
- view displays
- working with layers.

<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with CUA Creative Arts and Culture Training Package version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- select computer-aided design and drafting (CADD) hardware and software to suit project requirements
- follow operating instructions and organisational procedures
- use features and functions of a CADD program to produce drawings that meet project objectives
- use feedback from others to refine and produce final drawings within specified timelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevant hardware, software, tools and equipment used for CADD
- describe the ways in which CADD is used within the specific workplace situation
- describe typical features and functions of CADD programs, including drawing tools, view displays, edit functions, working with layers, plotting and printing.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- CADD equipment and software
- project or concept information
- operating instructions and organisational procedures
- relevant people.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to apply a range of techniques to produce technical drawings that meet required standards and conventions.

It applies to individuals who use technical drawings in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – art, craft and design

Performance Evidence

Evidence of the ability to:

- produce technical drawings which:
  - show a command of selected techniques
  - adhere to technical drawing standards and conventions
  - satisfy specified drawing purposes and concepts
  - follow workplace procedures and safety requirements
  - use feedback from others to refine and produce final drawings
  - meet deadlines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- explain technical drawing techniques and their application to a range of contexts and subject matter
- explain current standards and conventions for technical drawing
- describe work health and safety requirements for preparation of technical drawing materials and equipment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:
• equipment and materials required to produce technical drawings
• documented technical drawing requirements
• workplace documentation
• relevant people.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with CUA Creative Arts and Culture Training Package version 2.0.</td>
</tr>
</tbody>
</table>

Application

This unit describes the skills and knowledge required to work with Aboriginal and Torres Strait Islander cultural material in a culturally appropriate manner. It involves the complex and interrelated elements of Aboriginal and Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities; elements that may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

It applies to individuals who source, handle, interpret and exhibit Aboriginal or Torres Strait Islander cultural material in accordance with specific cultural and consultative requirements. The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander people. This unit also reflects that there is no single Aboriginal or Torres Strait Islander culture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cultural services - Aboriginal and Torres Strait Islander cultural heritage

<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with CUA Creative Arts and Culture Training Package version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- source Aboriginal or Torres Strait Islander cultural material for display or exhibition
- consult in a culturally sensitive and effective manner with Aboriginal or Torres Strait Islander community members and custodians about the display of cultural material
- develop agreements for the use of cultural material and record them where required
- undertake activities preparing for the display of Aboriginal or Torres Strait Islander cultural material in a logical and efficient manner, demonstrating knowledge of cultural protocols and practices
- move, store, display, maintain and return cultural material in a manner consistent with established cultural protocols.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain nature and scope of Aboriginal or Torres Strait Islander cultural material appropriate for exhibition or display
- identify appropriate keeping places for cultural material not suitable/forbidden for exhibition or display
- explain issues and protocols relating to the use and return of cultural material to Aboriginal or Torres Strait Islander communities
- identify copyright, moral rights and intellectual property issues with particular reference to Aboriginal or Torres Strait Islander cultural material
- identify sources of support for developing Aboriginal and Torres Strait Islander collections
• describe current conventions of collection management, including appropriate consultations and respect for traditional custodianship when working with Aboriginal or Torres Strait Islander cultural material, including non-western concepts of collecting
• explain cultural protocols and appropriate consultations for identifying, moving, storing, maintaining and displaying cultural material in the relevant community context
• explain current industry policy on acquiring and managing Aboriginal and Torres Strait Islander cultural material.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in Aboriginal and Torres Strait Islander cultural heritage environments. The assessment environment must include access to:
• Aboriginal or Torres Strait Islander cultural material or information on material when access is not available
• information about cultural protocols.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Assessment must ensure involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant Aboriginal or Torres Strait Islander community.

</tbody>
</table>

Application

This unit describes the skills and knowledge required to handle, pack and unpack collection material when moving or storing it. It involves using techniques and materials suited to the material in accordance with established guidelines.

It applies to individuals who handle, move and store different types of collection material. Movement and storage may be within the same building of an organisation or to an external location. Storage may be short or long-term.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cultural services - collection management

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Determine movement and storage requirements</td>
<td>1.1 Assess documentation to determine scope of work required for movement and storage of collection material</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify organisational procedures and guidelines and specific requirements and confirm with relevant personnel</td>
</tr>
<tr>
<td></td>
<td>1.3 Assess collections to estimate projected current and future storage requirements with relevant personnel</td>
</tr>
</tbody>
</table>
## ELEMENT | PERFORMANCE CRITERIA
---|---
1.4 Seek specialist advice or assistance where required

### 2. Pack and unpack collection material
- 2.1 Select appropriate packing materials, tools and equipment and use safely
- 2.2 Handle collection material safely and in a manner that maintains integrity of collection material
- 2.3 Apply conservation and sustainability principles in the use of packaging materials
- 2.4 Label packaging to facilitate easy identification by others during transportation and within storage facilities
- 2.5 Recycle and dispose of waste responsibly

### 3. Move collection material
- 3.1 Select appropriate handling and moving equipment, and use safely
- 3.2 Handle collection material in a manner that protects individual items and contributes to efficient loading and unloading processes
- 3.3 Identify hazardous items and load them in a manner that minimises health and safety risk
- 3.4 Inspect load prior to transportation to ensure that items are loaded and secured appropriately, and make adjustments as required
- 3.5 Prepare transportation documentation

### 4. Arrange collection material and update records
- 4.1 Install, position or store collection material as required and within expected timeframes
- 4.2 Clear and clean work areas according to organisational procedures
- 4.3 Refer problems to relevant personnel as required
- 4.4 Update existing movement and storage records and prepare new records as required
- 4.5 Store records according to organisational policies and procedures

<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with CUA Creative Arts and Culture Training Package version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- identify nature and scope of movement or storage work through review of workplace documentation and consultation with relevant personnel
- determine the job-specific requirements, based on the collection material to be moved and stored, and any cultural protocols and stakeholders to be considered
- prepare identified requirements, seeking specialist advice or assistance where required
- handle, move and store collection items using appropriate tools, equipment, techniques and organisational procedures to maintain the integrity of the collection material and meet required timeframe for movement and storage
- use safe and sustainable work practices during movement and storage work to:
  - handle collection material safely
  - use transport equipment and packaging material safely
  - minimise hazards during the work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the key organisational procedures and guidelines relating to:
  - storage and transport documentation and records
  - use of materials, tools and equipment, including labelling
  - manual handling and work health and safety (WHS) procedures and requirements
  - preventive pest management processes
  - waste recycling and disposal
- describe the packing and storage approaches and techniques for:
• culturally sensitive material
• different types of collection material
• internal and external transportation
• short and long-term storage
• explain the record-keeping procedures for collection movement and storage
• identify the security requirements and issues to be considered when moving or storing collection material.
• list sources of specialist advice for moving and storing collection material.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

• a collection to be moved and stored
• materials, tools and equipment for packing, moving and storing collection items
• organisational procedures relating to moving and storing collection material
• sources of advice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Links

CULMS002B Research and evaluate Aboriginal or Torres Strait Islander cultural material

Modification History
Not applicable.

Unit Descriptor
Unit descriptor This unit describes the performance outcomes, skills and knowledge required to research the context and interpretation of Aboriginal or Torres Strait cultural material. As such, the unit focuses on the skills to analyse cultural material, including current collections and the impact of post-colonial history. These skills then form the basis for appropriate treatment and interpretation of cultural material. The unit includes a focus on appropriate consultation with the traditional custodians of cultural material.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit
Application of the unit This unit has particular application to Aboriginal or Torres Strait Islander peoples.

The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander peoples. This unit also recognises that there is no single Aboriginal or Torres Strait Islander culture.

The unit deals with complex and interrelated elements of Aboriginal or Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities across the continent and islands of Australia. These may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

Any organisation or individual planning to train or assess this unit would be expected to work in a culturally appropriate manner with the appropriate Aboriginal or...
Torres Strait Islander community, for example through the establishment of a local Aboriginal or Torres Strait Islander reference group. In particular, it is vital to ensure respectful integration of any local cultural knowledge or protocols that will inform the implementation of the unit.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Prerequisite units Nil

Employability Skills Information
Employability Skills The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

<tr>
<td><strong>1.3</strong> Critically evaluate the validity of the range of interpretations of cultural material and the cultural relevance to its traditional custodians</td>
<td></td>
</tr>
</tbody>
</table>

| 2 Assess post-colonial interpretation of Aboriginal or Torres Strait Islander cultural material | **2.1** Critically evaluate the ways in which different aspects of post-colonisation history have affected the interpretation of Aboriginal or Torres Strait Islander cultural material |
| | **2.2** Critically evaluate collections in relation to the **context** in which materials were collected and interpreted and the respect shown for **cultural protocols** in sourcing, handling and exhibiting cultural material |
| | **2.3** Assess ways in which interpretations by those other than traditional custodians may have impacted on communities and/or individuals |

| 3 Develop approaches to the interpretation of Aboriginal or Torres Strait Islander cultural material | **3.1** Identify and explore potential **new and appropriate approaches to the interpretation of cultural material** based on knowledge and understanding of consultation with traditional custodians and respect for their wishes |
| | **3.2** Integrate the concept and practice of community consultation within interpretive approaches |
| | **3.3** Develop substantiated positions for interpretive approaches |
| | **3.4** Enhance interpretative approaches **by challenging and adapting** own ideas |

| 4 Communicate new approaches to stakeholders | **4.1** Identify **key stakeholders** in the interpretation and exhibition of cultural material, including traditional custodians |
ELEMENT PERFORMANCE CRITERIA

4.2 Consult and negotiate ways with stakeholders in culturally appropriate ways to interpret Aboriginal or Torres Strait Islander cultural material in accordance with wishes of traditional custodians.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills
- research and critical-thinking skills to analyse, interpret and present complex and varied references for application to cultural material
- literacy skills to critically evaluate and communicate ideas and concepts surrounding cultural material.

Required knowledge
- broad range of sources of information about post-colonial history, theory and cultural practice relating to Aboriginal or Torres Strait Islander cultural material
- key aspects of post-colonial history and its impact on the collection and interpretation of Aboriginal or Torres Strait Islander cultural material
- copyright, moral rights and intellectual property issues and legislation with particular reference to Aboriginal or Torres Strait Islander cultural material
- cultural protocols and appropriate consultations for the movement, storage and maintenance of cultural material in the relevant context/type of display
- cultural protocols for the exhibition of cultural material in the relevant community context.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction.
EVIDENCE GUIDE

with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sound knowledge of information sources for Aboriginal or Torres Strait Islander cultural material
- knowledge of cultural protocols and practices as well as appropriate consultative processes in seeking information
- application of research and analytical skills to evaluate Aboriginal or Torres Strait Islander cultural material and its context.

Context of and specific resources for assessment

Assessment must ensure:

- involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant community
- access to sources of information on Aboriginal or Torres Strait Islander cultural material.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- project to research a specific collection of Aboriginal or Torres Strait Islander cultural material
- project to research and document the cultural significance of particular objects
- case studies to assess ability to research and use different types of information in the analysis of cultural material
- oral or written questioning to assess knowledge of cultural material.

Holistic assessment with other units relevant to the industry sector, workplace and job role is
EVIDENCE GUIDE

recommended, for example:

- CULMS001B Work with Aboriginal or Torres Strait Islander cultural material
- other collection and exhibition management units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant sources of information may include:

- community members (family groups, cultural educators, Elders)
- libraries
- museums
- archives
- cultural centres
- community organisations
- Indigenous units within local, state or national bodies

Cultural material may be:

- part of an existing collection (public or private)
- not yet part of a collection
- held by the local Aboriginal or Torres Strait Islander community or broader community
- held by an organisation external to the community
- held by individuals
- in the care of traditional custodians

The context of cultural material may relate to:

- pre-colonisation cultural practices
- post-colonisation collection and interpretive practices
- cultural/spiritual significance of cultural material to community
- the way material was acquired and historical view
RANGE STATEMENT

of Indigenous collections
• treatment of collection materials
• dispersal of skeletal remains and cultural materials within and outside of Australia
• men's or women's business
• secret or non-secret business
• rarity
• locality

Formal and informal research techniques may include:
• discussion
• note taking, listing
• interviews
• questionnaires
• critical discourse
• analysis
• reflection
• comparing information
• summation
• judgement
• observation

Information may relate to:
• philosophy
• Indigenous world views
• effects of colonisation on Indigenous lives and cultures
• dreaming stories
• world histories
• cultural issues
• spiritual beliefs
• aesthetics
• politics
• gender and identity issues
• land and place - traditional custodians of Country
• signs and symbols in cultural practice
• evaluative criticism in relation to interpretations made by post-colonial interpreters
• oral histories
RANGE STATEMENT

*Cultural protocols* may relate to:
- acquisition of material
- transportation
- storage
- written documentation on cultural materials
- exhibition
- geographic location
- degree of consultation with traditional custodians
- respect for the wishes of traditional custodians

*New and appropriate approaches to interpretation* may relate to:
- local Aboriginal or Torres Strait Islander community involvement
- different perceptions of both pre and post-colonial history
- interpretation in the context of post-colonial effects and behaviours
- local history
- oral histories
- appropriate consultation with traditional custodians
- respect for the wishes of traditional custodians
- industry/sector debate

*Challenging and adapting ideas* may include:
- comparing
- contrasting
- reflecting
- critiquing
- judging
- considering merit
- discussing and debating

*Key stakeholders* may include:
- Indigenous communities, including traditional custodians
- current holders of collections (private and public)
- cultural centres
- Indigenous units within local, state and national bodies
- museum/heritage organisations
Unit Sector(s)

Not applicable.

Competency field

Competency field  Aboriginal or Torres Strait Islander Museum Practice
CULMS010B Contribute to the preservation of cultural material

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit describes the performance outcomes, skills and knowledge required to contribute to the preservation of cultural material through a sound knowledge of conservation principles, practices and ethics and the application of basic preservation activities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit
Application of the unit
This unit applies to individuals who have significant knowledge of preservation issues and may be involved in the application of basic preservation techniques with the involvement of a professional conservator.

The content of this unit relates to work that has a significant impact on Australia's cultural heritage and care must be taken to ensure appropriate implementation of the unit.

Any individual or organisation planning to undertake training and/or assessment of this unit must therefore consult with an appropriately qualified conservator or conservation organisation. The Australian Institute for the Conservation of Cultural Material is the recognised professional body in this area.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites

Prerequisite units  Nil

Employability Skills Information

Employability Skills  The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Seek and access <em>opportunities to develop, update and maintain knowledge of preservation</em> issues and concepts</td>
</tr>
<tr>
<td></td>
<td>Integrate knowledge into work activities within scope of individual responsibility</td>
</tr>
<tr>
<td>2</td>
<td>Undertake <em>basic preservation activities</em> within scope of responsibility as agreed with a conservator and in accordance with <em>organisational plans and policies</em></td>
</tr>
<tr>
<td></td>
<td>Correctly apply techniques in a manner which</td>
</tr>
</tbody>
</table>
ELEMENT   PERFORMANCE CRITERIA
maintains the integrity of the cultural material

2.3 Record data generated in the course of activities clearly and accurately in the appropriate format

2.4 Follow health, safety and environmental requirements at all times

2.5 Ensure that ethical and cultural protocols are adhered to at all times

Required Skills and Knowledge

Required Skills and knowledge
This section describes the skills and knowledge required for this unit.

Required skills
- learning skills to undertake ongoing professional development and acquisition of knowledge around preservation issues and concepts
- literacy skills to interpret conservation plans, to research conservation information, document and to report on condition of cultural material.

Required knowledge
- distinction between preservation, conservation and restoration
- basic preservation principles and methods
- principles and methods for handling cultural material
- available sources of appropriate expert advice
- AICCM Code of Ethics and Code of Practice
- copyright, moral rights and intellectual property legislation and issues that impact on conservation
- cultural protocols that impact on conservation of cultural material, including those for Aboriginal or Torres Strait Islander material
- role of a conservator and of a person working under the guidance of a conservator, including the scope of work undertaken by each and rationale for this
- requirements for safe work and manual handling
- formats and features of conservation plans, object condition reports.
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sound general knowledge of preservation techniques relevant to the collection/industry sector
- understanding of conservation ethics and cultural protocols, including limitations on the scope of work to be undertaken
- practical demonstration of competent and safe techniques working on one or more items under the guidance of a conservator.

Context of and specific resources for assessment

Assessment must ensure:

- access to cultural material
- access to equipment, materials and tools used in basic preservation activities.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- assessment of cultural material on which the candidate has worked
- direct observation of the candidate using techniques
- evaluation of candidate's responses to different collection scenarios to assess ability to develop approaches for different preservation needs and articulate different challenges and issues to be considered
- oral or written questioning to assess knowledge of different techniques and procedures.
EVIDENCE GUIDE

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CULMS009B Implement preventive conservation activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Opportunities to develop, update and maintain knowledge of preservation issues and concepts may include:

- research
- attendance at seminars, workshops
- membership of professional organisations
- using conservator as a mentor
- reading current journals, newsletters and electronic discussion lists

Basic preservation activities will vary depending on the type of cultural material, but may include:

- surface cleaning
- designing/making storage enclosures and display supports
- attaching backboards to paintings
- creating hanging systems for paintings
- mounting and framing

Activities must be undertaken in accordance with advice from a specialist conservator to avoid potential damage to cultural material.

Organisational plans and policies vary in structure and

- preservation plans
- conservation plans
RANGE STATEMENT

name but may include:

- collection management policies
- disaster preparedness policies

**Cultural material** is defined as 'objects, collections, artworks, specimens, structures or sites' and includes:

- archaeological material
- books and manuscripts
- cultural sites/buildings
- ethnographic material
- flora and fauna
- film/audiovisual material
- furniture
- photographs
- technological/industry items
- textiles
- works on paper/canvas

**Health, safety and environmental requirements** may relate to:

- use of chemicals or other toxic substances
- storage of chemicals
- provision and use of safety equipment
- safe manual handling
- safe use of tools and equipment
- reporting of occupational health and safety issues, including events and near misses
- impact on other parts of the collection
- toxic and hazardous materials in a collection
- condition/stability of item (dirt, mould, dust and pesticides)

**Cultural protocols** may relate to:

- who can handle the cultural material
- where an item may be handled
- when an item may be handled
- consultation on potential treatments
- storage requirements
- appearance of the item
- relationship between item and other material in the collection
- methods and approaches to display
Unit Sector(s)

</table>

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated carton packing equipment.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for operating and monitoring a carton erection process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared for, started up, operated, and shut down all items of equipment involved in the carton erection process on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
  - cleaning and sanitation processes are completed
  - carton magazines and guides are operational
  - insert magazines and guides are operational
  - any adjacent coding equipment is set up and operational
  - line controls (conveyors) are operational
  - line lube is operational and being correctly applied
  - all hot melt guns or jets are operational
  - equipment is set for correct carton dimensions
  - vacuum pump is operational
  - carton feeds are set up and accurately aligned for 6 or 12 pack cartons
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - compressed air pressure is at correct level
  - vacuum pressure is at correct level
  - hot melt units are maintained with correct wax level
  - carton supply is maintained
  - carton inserts are maintained
  - vacuum cups are picking up properly
  - hot glue strokes are correct length and producing a firm seal
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved the packaging process
• completing workplace records as required
• applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence
An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
• purpose and principles of the carton erection equipment
• key features of carton erection equipment and components
• links to related work areas in the packaging process
• effect of process stages on end product
• quality characteristics and uses of end product
• effect of product and materials on process outcomes
• emergency and troubleshooting procedures
• process specification, procedures and operating parameters
• equipment and instrumentation components, purpose and operation
• basic operating principles of process control systems where relevant
• services required
• significance and methods of monitoring control points
• common causes of variation and corrective action required
• workplace health and safety hazards and controls
• routine maintenance requirements
• lock-out and tag-out procedures
• procedures and responsibility for reporting problems
• shutdown and cleaning requirements associated with changeovers and types of shutdown
• recording requirements and procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • carton erection equipment
  • carton erection resources and consumables
  • tools and equipment for adjusting and maintaining equipment
  • personal protective equipment
• specifications:
  • work procedures and operator manuals or instructions.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed basic packaging tests and inspections at a minimum of two different critical control points on an operating packaging line, including:

- confirming test equipment is ready for operation, including:
  - recognising and rejecting contaminated or faulty glassware and equipment
  - conducting safety checks
  - replacing consumables
  - setting instrument and calibration
- operating test equipment according to workplace procedures and manufacturer instructions
- carrying out routine tests
- reading and interpreting results
- recording results as required
- monitoring the process and test equipment to identify out-of-specification results or non-compliance
- taking corrective action in response to out-of-specification results, anomalies or non-compliance
- reporting and/or recording corrective action according to workplace procedures
- following procedures to repeat or validate results
- liaising with other work areas involved the packaging process
- applying safe work practices and identifying health and safety in the workplace hazards and controls.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common bottling and packaging techniques
- enterprise policy and procedure with regard to:
  - packaging line quality assurance testing
  - health and safety in the workplace
- purpose and principles of the test
- relevant standards and specifications, and basic legislative requirements (e.g. quality, health, safety, labelling and equipment) and their implications
- procedure specification and operating parameters
- effect of sampling and testing stages on results or outcomes
- start-up and set-up procedures required
- common causes and knock-on effects of inaccuracies and preventive or corrective action required
- normal range of results on products or packaging items tested
- emergency procedures for a range of operational problems
- procedures and responsibility for reporting problems
- health and safety in the workplace hazards and controls
- cleaning and sanitising requirements of equipment and work area
- sampling plan and procedures relevant to work task.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - tools and equipment for conducting tests
  - personal protective equipment
  - instructions, information, specifications and schedules
  - products and materials on which to conduct tests
- specifications:
  - work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated and automated product labelling equipment.

This unit applies to individuals who work under broad direction and exercise autonomy and judgement, and are responsible for applying basic principles to the operation and monitoring of a labelling process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

1.2 Select, fit and use appropriate personal protective equipment |
Elements | Performance Criteria
--- | ---
Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element.

1.3 Ensure that product and materials are available to meet labelling requirements
1.4 Prepare product and materials to meet labelling requirements
1.5 Ensure that services are available and ready for operation
1.6 Prepare product labelling equipment and check to confirm readiness for use according to operating instructions
1.7 Set equipment to meet labelling requirements

2. Operate and monitor the labelling process

2.1 Start up labelling equipment according to operating instructions
2.2 Monitor control points to confirm performance is maintained within specification
2.3 Products are labelled according to specification
2.4 Monitor labelling equipment to confirm operating condition
2.5 Identify, rectify and report out-of-specification end product, process and equipment performance
2.6 Liaise with operators in other work areas to ensure ongoing packaging process runs efficiently and effectively

3. Shut down the labelling process

3.1 Shut down labelling equipment according to operating instructions
3.2 Prepare labelling equipment for cleaning and maintenance according to workplace procedures

4. Conduct house-keeping activities

4.1 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures according to workplace procedures
4.2 Conduct work according to workplace environmental guidelines
4.3 Record workplace information according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

| Skill | Description |
Skill | Description
--- | ---
Oral communication | • Report out of specification details clearly using language, tone and pace appropriate to audience
Get the work done | • Respond to predictable routine problems, faults and out of specification issues, and implements standard or logical solutions

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down an automated or semi-automated product labelling system on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
  - heating glue to correct temperature
  - checking glue meets specification according to label type
  - confirming dryness of container in readiness for labels
  - checking labels meet specification of product
  - inserting labels, correctly orientated in magazine
  - feeding label web through application mechanism
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - label adhesion
  - label orientation
  - label damage
  - label positioning
  - smooth versus bubbled labels
  - misprinted labels
  - any label or product coding applied as part of the process
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved in the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of labelling equipment
- key features of labelling equipment and components
- links to related processes
- effect of process stages on end product
- quality characteristics of end product
- product and materials preparation requirements and effect of variation on the process which may include effect on end results of:
  - glue temperature
  - glue type
  - wet containers
  - faulty label feed
  - incorrect or inaccurate labels
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- routine maintenance requirements
- health and safety in the workplace hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- waste handling requirements and procedures
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - a product labelling context
  - work procedures and instructions
  - personal protective equipment
  - products, consumables and materials
• documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively implemented the food safety program and procedures on two separate occasions in a food processing or food packaging environment, including:

- identifying own responsibilities with regard to food safety
- identifying food safety risks in the workplace and the control measures used to manage them
- applying control measures in own work
- monitoring compliance with food safety standards
- identifying and acting on non-compliances, and participating in improving safety
- maintaining required standards of personal hygiene.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of critical control point (CCP)-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and the food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
• Food Standards Code and why it exists
• common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
• basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
• methods used to monitor that food safety is under control, including the purpose of sampling
• action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
• purpose of keeping records, and the recording requirements of the food safety program
• methods used in the workplace to isolate or quarantine food that may be unsafe
• product and ingredient traceability procedures, such as product recall where required by work responsibilities
• clothing and footwear requirements for working in and/or moving between food handling areas
• personal clothing maintenance, laundering and storage requirements
• appropriate bandages and dressings to be used when undertaking food handling
• housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
• procedures to follow in the event of pest sighting or discovery of infestation
• purpose and importance of cleaning and sanitation procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real food processing workplace
• resources, equipment and materials:
  • food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods
  • sampling and test procedures and related equipment
  • appropriate clothing and related apparatus
  • reporting and monitoring systems
• specifications:
  • work instructions and procedures relevant to work task
  • cleaning and sanitation policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively monitored the implementation of quality and food safety programs on two different occasions, including:

- confirming quality and food safety program requirements, risks and control measures of the work area
- confirming that control measures are in place and that personnel in the work area are equipped and informed to implement programs
- identifying, addressing and following up on non-compliances
- identifying causes of non-compliance
- conducting risk assessments and recommending responsive actions
- providing support to others to implement the programs
- completing and maintaining documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- procedures and responsibilities for food safety relevant to the workplace
- principles of a critical control point (CCP) analyses approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control, and confirming that controls are met
- Food Standards Code
- basic concepts of quality assurance, including hazards, risk assessment and control methods
• methods to manage and support quality and food safety in the workplace, including systems for maintaining and updating documents, including operating procedures and specifications
• clothing and footwear requirements for working in and/or moving between food handling areas, including personal clothing maintenance, laundering and storage requirements
• appropriate bandages and dressings to be used when undertaking food handling
• housekeeping requirements and responsibilities relating to own work, including use and storage of housekeeping/cleaning equipment
• procedures to follow in the event of pest sighting or discovery of infestation
• purpose and importance of cleaning and sanitation procedures
• legislative requirements for food safety and quality
• awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
• suitable standard for materials, measuring devices, equipment and utensils used in the work area
• properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
• reasons that food safety/quality hazards occur, including an understanding of common microbiological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes
• procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials
• sampling procedures, test methods and inspections
• options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses, and level of responsibility for decision-making
• methods used in the workplace to isolate or quarantine food that may be unsafe
• waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, including hazardous waste
• traceability and recall procedures within level of responsibility
• documentation system and procedures, including recordkeeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
• internal and external auditing arrangements, roles and responsibilities as they relate to own work responsibilities
• appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
Assessment Requirements for FBFESY3001 Monitor the implementation of quality and food safety programs

- skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - personal protective clothing and equipment as required
  - reporting and monitoring systems
- specifications:
  - food safety program for the work area that identifies critical control points, control measures and corrective actions
  - quality policy, system and procedures
- relationships:
  - interactions with work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to participate in the development and review of a hazard analysis critical control point (HACCP)-based food safety program.

The unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others, and who participate in the development of a food safety program typically limited to their immediate work area.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence
An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has actively participated in a food safety team on a minimum of two occasions, including:

- identifying food safety hazards in the critical control points (CCPs) of production processes
- establishing and validating control standards and methods for a minimum of two potential hazards
- applying food safety procedures.

Knowledge Evidence
An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and intent of food safety legislation, including Food Standards Code
- the roles and responsibilities for developing and maintaining the food safety program, including roles of internal and external auditors and authorised officers
- techniques for applying critical control point principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredients and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards and contamination likely to occur given product type and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition and time and temperature as relevant to food handled
- acceptable control methods for identified hazards, and required corrective actions when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability, personal hygiene, and how they can be used as part of a food safety program
- validation and verification processes and techniques and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - workplace food safety program documentation
- specifications:
  - review/audit arrangements
  - advice on quality and food safety legislation
  - procedures for developing or modifying specifications and other advice on food safety requirements
  - reporting/recording system
- relationships (internal and/or external):
  - interactions with team members.

Application

This unit of competency describes the skills and knowledge required to set up, monitor, and adjust a process to produce creamed honey.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of machines and equipment used to cream honey in a production environment within the honey processing industry.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- conducted pre-start checks on machinery used for creaming honey
- started, operated, monitored and adjusted process equipment used for creaming honey to achieve required quality outcomes
- taken corrective action in response to typical faults and inconsistencies
- completed workplace records in required format
- applied safe work practices, and identified work health and safety hazards and controls
- safely shut down equipment
- applied food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic principles of crystallisation, including:
  - an understanding of crystal structure and where appropriate
  - methods used to reduce crystal size
  - the effects of temperature and agitation on crystal formation
  - appropriate ratio of seed to liquid honey
  - factors that influence the crystallisation process, including moisture content and crystal size
- basic operating principles of equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
• purpose and location of sensors and related feedback instrumentation
• services required for creamed honey manufacture and action to take if services are not available
• quality and organoleptic characteristics of different types of honey processed
• quality characteristics to be achieved by the final product, and related test methods used to confirm quality
• quality requirements of seed and liquid honey used, and the effect of variation on the final product
• operating requirements, parameters and corrective action required where the process is outside specified operating parameters (including ambient and processing temperatures, agitation speeds, and holding times and temperatures)
• typical equipment faults and related causes, including:
  • signs and symptoms of faulty equipment
  • early warning signs of potential problems
• methods used to monitor each stage of the production process, including inspecting, measuring and testing as required
• inspection or test points (control points) in the process and the related procedures and recording requirements
• contamination and food safety risks associated with the process and related control measures (this relates specifically to air inclusion and moisture content, and related methods of control)
• common causes of variation and corrective action required
• factors that affect the stability and shelf-life of the finished product and options to extend shelf-life, including storage conditions for packed product
• work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
• requirements of different shutdowns as appropriate to the process and workplace production requirements, including:
  • emergency and routine shutdowns
  • procedures to follow in the event of a power outage
• isolation, lock out and tag out procedures and responsibilities
• procedures and responsibility for reporting production and performance information
• environmental issues and controls relevant to the process, including waste/ rework collection and handling procedures related to the process
• basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
• routine maintenance procedures for creamed honey manufacture equipment
• cleaning and sanitation procedures for creamed honey manufacture equipment.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

• physical conditions:
• a workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • process and related equipment and services
  • seed and liquid honey
  • personal protective clothing and equipment
  • sampling schedules, and test procedures and equipment
  • cleaning procedures, materials and equipment
• specifications:
  • work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  • information on equipment capacity and operating parameters
  • production schedule/batch instructions
  • specifications, control points and processing parameters
  • documentation and recording requirements and procedures
• relationships:
  • interactions with team members and supervisors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively carried out a minimum of three, different manual handling tasks, including:

- identifying the risks associated with each manual handling task (to self and others)
- eliminating risks, including through movement, posture and effectively using equipment provided
- modifying work to eliminate or minimise risk
- applying safe work procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different types of manual handling activities, including lifting, reaching, pushing, pulling, holding, restraining, throwing and carrying
- types of injuries that can result from manual handling
- aspects of manual handling that may be risks (hazard identification), including:
  - repetitive or sustained application of force
  - repetitive or sustained awkward posture
  - repetitive or sustained movement
  - application of high force
- manual handling of unstable or unbalanced loads, such as liquids or animals
- workplace procedures and responsibilities for identifying and reporting manual handling hazards
- factors to be considered when assessing manual handling risks relevant to work role (refer to workplace risk assessment sheets and code of practice advice where available), including:
- postures
- movements
- force required
- duration and frequency of manual handling activity
- environmental conditions, such as hot and cold work environments
- procedures and responsibilities for conducting risk assessments of manual handling tasks
- typical options for eliminating or controlling manual handling risks associated with work functions, including principles of hierarchy of control and the advantages and disadvantages of different options
- types of equipment and/or techniques used to eliminate or reduce manual handling risks in the workplace, including when and how to use each type of technique/equipment relevant to manual handling tasks in work role
- level of authority to address health and safety issues related to manual handling and related workplace arrangements for managing safety issues
- sources of advice on manual handling relevant to work function
- equipment available to assist manual handling, related inspections required to identify faulty equipment and related reporting procedures
- personal protective equipment checks including:
  - check for correct fit
  - appropriate for task
  - undamaged
- movement and postures that increase the risk of injury, and movements and postures to minimise the force in the body as applied to specific tasks in the workplace.

### Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - work procedures, including advice on manual handling requirements and safe work practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to maintain food safety when loading and transporting temperature-sensitive ingredients and products.

This unit applies to loading, unloading and transport activities where the transport operator does not have direct physical contact with food. Where food is handled directly by the transport operator, the relevant food handling unit also applies.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0</td>
</tr>
</tbody>
</table>

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has maintained food safety when loading, unloading and transporting food on at least one occasion, including:

- accessing workplace information to determine food handling and transport requirements
- selecting, fitting and using PPE
- confirming that the vehicle and associated equipment are appropriate and ready for use, including confirming that vehicle type is capable of maintaining the required temperature range for product
- preparing transport containers (this will vary depending on the type of food and transport method), such as checking cleaning records and, where required, confirming product compatibility to ascertain that appropriate level of cleaning has occurred
- preparing the storage/holding environment as required, including confirming that temperature parameters for the loading and unloading areas are met
- following procedures to load/unload food to ensure that materials/product is loaded/unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food or non-food items that can cause contamination (osmosis)
- monitoring temperature parameters and related food safety control points before, during and after transporting food, and recording information in the required format
- taking appropriate corrective action in response to failure to meet temperature parameters or other food safety requirements as required by workplace procedures
- cleaning and sanitising food containers according to enterprise procedures
- following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
• work health and safety hazards and controls, including the purpose and limitations of protective clothing and equipment
• food safety control points in the loading/unloading and transportation of food materials and product, and related methods of control
• characteristics of food transported and related transport environment requirements
• microbiological, physical and chemical hazards that can occur when loading, transporting and unloading food, appropriate to nature and method of food transported, including the types of hazards likely to occur, the conditions under which they occur, and possible consequences
• methods and procedures used to control food safety hazards (this depends on the type of controls and equipment used), including the purpose and operation of equipment procedures in place to maintain food safety and workplace records, such as temperature control charts and cleaning and sanitation records
• procedures used to confirm that transportation and related food safety equipment is appropriate for use and operational, such as equipment capacity to maintain a given temperature environment appropriate to the food product
• cleaning and sanitation requirements for maintaining food safety when loading, unloading and transporting food
• potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported, where contamination by osmosis is a possibility.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • workplace information, including temperature charts and cleaning records
  • food storage vehicles, containers and receptacles
  • food materials and product to be loaded/unloaded and transported
• specifications:
  • work procedures relevant to loading/unloading and transportation, including advice on required temperature parameters to be maintained
  • food safety information
  • loading/unloading and transport advice/schedules
  • documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a packaging process or sub-system.

This unit applies to individuals who operate and monitor a packaging process and associated equipment in a food processing packaging environment. The unit applies in a food processing packaging environment where no other specific packaging unit is available.

A packaging process may relate to primary and secondary packaging activities. It typically requires the operation of a series of related items of equipment to achieve the required outcome.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a packaging process on at least one occasion, including:

- accessing workplace information to identify packaging requirements
- selecting, fitting and using PPE
- confirming supply of necessary packaging components/consumables, materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - setting coders and printers
  - selecting appropriate equipment settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for packaging requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been completed
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting packaging equipment to achieve required outcomes, including:
  - packaging components/consumables and/or product
  - monitoring control points (for example, weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity) as required to confirm process remains within specification
  - monitoring supply and flow of materials to and from the process
  - taking corrective action in response to out-of-specification results
  - responding to and/or reporting equipment failure within level of responsibility
  - locating emergency stop functions on equipment
• following isolation and lock-out/tag-out procedures as required to take packaging equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
• completing workplace records as required
• maintaining work area to meet housekeeping standards
• using process control systems according to enterprise procedures
• cleaning and sanitising equipment according to enterprise procedures
• following relevant work health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

• purpose and basic principles of the packaging process, including:
  • the purpose and characteristics required of packaging materials used
  • the principles of the packaging process used (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
• product and packaging coding requirements and related legal requirements, including product weight
• basic operating principles of equipment, including:
  • main equipment components
  • status and purpose of guards
  • equipment operating capacities and applications
  • the purpose and location of sensors and related feedback instrumentation
• services required and action to take if services are not available
• the flow of processes supplying the packaging process and the effect of outputs on downstream processes
• quality characteristics required of the packaging process, including seal integrity requirements
• effect of variation in inputs, including packaging components/consumables, materials and/or services, on process performance
• operating requirements and parameters, and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam-up
• typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
• methods used to monitor the packaging process, including visual inspecting, and measuring and testing as required by the process
• inspection or test points (control points) in the process and the related procedures and recording requirements
• contamination/food safety risks related to stages in the packaging process, and related control measures
• common causes of variation and corrective action required
• work health and safety hazards and controls relevant to the packaging process
• requirements of different shutdowns as appropriate to the packaging process, including:
  • emergency and routine shutdowns and procedures to follow in the event of a power outage
  • conducting basic equipment referencing where required
• isolation, lock-out and tag-out procedures and responsibilities
• procedures and responsibility for reporting production and performance information
• environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
• basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
• cleaning and sanitation procedures for packaging equipment.

Assessment Conditions
Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • personal protective clothing and equipment
  • packaging and related equipment and services
  • materials to be packaged and packaging components/consumables
  • sampling schedules, test procedures and equipment
• specifications:
  • work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  • information on equipment capacity and operating parameters
  • specifications, control points and operating parameters
  • documentation and recording procedures
  • cleaning procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a filtration process.

This unit applies to individuals who work under general supervision and exercise limited autonomy in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a filtration process and associated equipment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a filtration process on at least one occasion, including:

- accessing workplace information to identify filtration processing requirements
- selecting, fitting and using personal protective clothing and/or equipment
- confirming supply of necessary materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - selecting and fitting appropriate screens and equipment components
  - selecting settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been carried out
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting filtration process and equipment to achieve required outcomes, including:
  - flow rates
  - residence time
  - solids for in-feeds and out-feeds (this is typically done by conducting a spin test)
- monitoring supply and flow of materials to and from the filtration process
- taking corrective action in response to out-of-specification results, including identifying and responding to sieve or screen blockages or tears
- identifying and/or reporting equipment faults, including confirming condition screens and sieves and replacing damaged components within level of responsibility
- locating emergency stop functions on equipment
• follow isolation and lock-out/tag-out procedures to take filtration and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
• cleaning and sanitising filtration equipment
• completing workplace records
• maintaining work area to meet housekeeping standards
• using process control systems according to workplace procedures
• following relevant work health and safety procedures.

Knowledge Evidence
An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

• purpose and basic principles of filtration, including stages and changes that occur during filtration
• basic operating principles of filtration equipment, including:
  • main equipment components
  • status and purpose of guards
  • equipment operating capacities and applications, including relevant screens and sieves by filtration equipment
  • the purpose and location of sensors and related feedback instrumentation
• services required for operation of filtration equipment used in the workplace
• the flow of the filtration process and the effect of product output on downstream processes
• effect of raw material characteristics on filtration performance
• quality characteristics required of filtration process output
• test methods used to monitor solids in in-feed and out-feed streams
• operating requirements and parameters for the filtration process and corrective action required where operation is outside specified operating parameters
• typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems, including screen or sieve damage
• common causes of variation in the operation of the filtration process and corrective action required
• spoilage and other food safety risks associated with filtration
• work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
• requirements of different shutdowns as appropriate to the filtration process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
• cleaning procedures appropriate for the range of filtration components used
• isolation, lock-out and tag-out procedures and responsibilities required for the operation of the filtration process
• cleaning and sanitising methods and procedures required for the filtration process
• procedures and responsibility for reporting production and performance information
• environmental issues and controls relevant to filtration, including handling of effluent
• basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions

• resources, equipment and materials:
  • personal protective clothing and equipment
  • filtration and related equipment and services
  • materials required for filtration
  • sampling schedules and test procedures and equipment as required
  • cleaning procedures, materials and equipment

• specifications:
  • work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, and batch/recipe instructions
  • information on equipment capacity and operating parameters
  • production schedule/batch instructions
  • documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare process equipment for cleaning in place or in-line. It applies to food processing equipment that is fixed in place and cannot be moved to a cleaning station. It requires the operator to initiate, monitor and control variables during cleaning.

This unit applies to individuals who work in food processing facilities performing a defined range of activities, most of which are routine and predictable.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively cleaned food processing equipment that is fixed in place, on a minimum of two occasions, including:

- shutting down equipment and preparing for cleaning
- preparing and using chemicals according to safe work requirements
- cleaning equipment to meet work standards
- monitoring cleaning and report or address any non-compliances
- flushing equipment and dispose of waste according to environmental guidelines
- completing required documentation
- applying safe work practices and identify health and safety hazards and controls in the workplace
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of cleaning in place (CIP), including the use and functions of caustic and acid solutions, and cleaning sequence and stages as required in the workplace
- purpose and use of cleaning equipment and chemicals used
- terminology relating to the chemical solutions used
- safe work procedures, including appropriate signage of cleaning activities, and safe handling and storage of cleaners and sanitisers used
- health and safety workplace procedures, including purpose and limitations of personal protective equipment
- cleaning and sanitising requirements, including different levels of cleaning requirements
Assessment Requirements for FBOPR2063 Clean equipment in place

- characteristics of cleaning and sanitising chemicals used, including basic composition as well as compatibility of chemicals with types of equipment
- methods used to render equipment safe to clean, including the status and purpose of equipment guards, relevant lock out/tag out and isolation procedures
- equipment settings required for cleaning and operating
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- inspection points for cleaning and sanitising
- consequences of contamination of process flows by cleaning solutions and related safeguards
- types of waste generated by both the production and the cleaning process and related collection, treatment and disposal requirements
- environmental consequences of incorrect cleaning waste disposal procedures
- requirements to liaise with/advise related work areas
- reporting and recording systems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - personal protective clothing and equipment
  - equipment to be cleaned, and related CIP system
  - chemicals and/or automated chemical addition system
- specifications:
  - workplace standard operating procedures and task-related documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively cleaned and sanitised a minimum of two different items of equipment, including:

- preparing equipment for cleaning
- preparing and use chemicals according to safe work requirements
- cleaning and sanitising equipment to meet work standards
- monitoring cleaning and reporting or addressing any non-compliances
- disposing of waste according to environmental guidelines
- completing required documentation
- applying safe work practices and identifying health and safety hazards and controls in the workplace
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose of cleaning and sanitation and importance in maintaining food safety
- functions of cleaners, sanitisers and related equipment
- safe work procedures, including appropriate signage of cleaning activities, safe handling and storage of cleaners and sanitisers used, safety when using cleaning methods
- health and safety requirements in the workplace, including purpose and limitations of personal protective equipment (PPE)
- cleaning and sanitation requirements relating to work responsibilities, including the need for different levels of cleaning where relevant
- procedures for preparing cleaners and sanitisers as required
- cleaning methods to be followed relating to workplace procedures
• other work areas/operators who need to be consulted/advised on timing of cleaning
• methods used to render equipment safe to clean, including understanding the status and purpose of equipment guards, relevant lock out/tag out and isolation procedures and related equipment settings for both cleaning and operating as required
• procedures for cleaning and sanitising
• types of waste generated by the cleaning process and related collection, treatment and disposal requirements
• potential environmental impact of incorrect waste handling
• inspection, cleaning and storage requirements of cleaning equipment used
• inspection points and methods for confirming the effectiveness of cleaning and sanitation, including visual inspection, and where required, recording of cleaning conducted
• inspection requirements to confirm equipment condition, including acceptable equipment condition, ability to identify faulty or unacceptable equipment, and take required corrective action
• recording requirements and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • cleaning and sanitising equipment according to workplace requirements
  • cleaning equipment and chemicals
  • PPE
• specifications:
  • workplace standard operating procedures and task-related documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to inspect equipment and carry out routine maintenance and adjustment using a limited range of hand tools.

This unit applies to individuals who perform routine maintenance in a food and beverage environment. It typically targets the production worker responsible for conducting simple and routine maintenance tasks to support the operation of machines or equipment.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

<tbody>
<tr>
<td>Release 1</td>
<td>This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively conducted routine maintenance on a minimum of two different items of plant and/or equipment, including:

- identifying routine maintenance tasks for machine or equipment
- monitoring operation and identifying need for maintenance tasks
- carrying out routine maintenance tasks according to workplace procedures
- on completion of maintenance tasks, returning equipment to operational order, including confirming that all equipment parts, nuts and bolts are accounted for and correctly tightened
- scheduling maintenance tasks that are beyond one's own job role and communicating requirements with affected personnel
- selecting and using appropriate tools to undertake routine maintenance within scope of own job role
- assessing readiness for returning machine or equipment to operation or referring for further attention
- completing maintenance documentation
- applying safe work practices and identifying health and safety hazards and controls in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems and programs in place to manage routine maintenance of plant and equipment in the workplace
- responsibilities for participating in the maintenance program, including operator role and the role of others
- procedures for raising maintenance orders where requirements are outside operator role
Assessment Requirements for FBOPR2065 Conduct routine maintenance

- basic operating principles of equipment to be maintained
- signs and symptoms of faulty equipment and early warning signs of potential problems
- basic checks used to confirm the nature of maintenance requirements, including distinguishing between mechanical and electrical faults and identifying probable causes or conditions that may increase maintenance requirements of equipment used
- procedures for issuing, maintaining and storing tools used
- safe use of hand tools and measuring instrumentation relevant to maintenance responsibilities
- lubrication requirements, including requirements to use food grade lubricants as required, and consequences of using incorrect type or amount of lubricants
- safe work procedures, including appropriate signage of maintenance activities, use of appropriate personal protective equipment, and awareness of safety hazards and controls relating to maintenance tasks
- methods used to render equipment safe to work on or clean including lock out/tag out and isolation procedures (in some cases this may involve liaising with other maintenance operators)
- procedures and inspections to be carried out to confirm that equipment is in operating order and all parts are accounted for
- food safety risks arising from poor personal hygiene, cleaning and housekeeping practices and procedures associated with routine maintenance
- maintenance planning, scheduling and recording procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - maintenance tools and equipment
  - operational machinery and equipment
  - safety equipment
  - spares and consumables
- specifications:
  - operation procedures
  - service equipment and maintenance instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively taken 10 samples, in line with the sampling plan, including:

- accessing and interpreting sampling plan to identify requirements
- selecting, fitting and using personal protective equipment
- preparing for sampling to ensure required tools, containers and labels are available
- following sampling procedures and the sampling plan to collect samples from the designated points, in the quantities and at the times specified
- identifying atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules
- completing sample records according to workplace requirements, such as labelling samples as required
- transferring samples for testing
- maintaining work area to meet housekeeping standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of personal protective equipment
- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples, and related handling and preparation requirements and responsibilities
• characteristics of materials sampled, and common contaminants and related conditions under which contamination is likely to occur
• sampling techniques relevant to samples collected, such as sterilisation methods and procedures
• the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
• procedures and responsibility for reporting and recording sampling information, including legislative requirements
• procedures for preparing samples.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • sampling plan
  • recording and reporting system
  • sampling equipment and containers as required
  • product/source material to be sampled.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to conduct work in a food handling area where the work does not involve direct food contact.

This unit applies to individuals who typically work in stores, warehousing, cleaning and maintenance roles. This unit is not appropriate for a person who has direct contact with food or raw materials or ingredients. Where this is a requirement, refer to relevant food safety units.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked safely and effectively in a food handling area, in a non-food handling role, to effectively maintain food safety standards on at least two different occasions, including:

- accessing and applying workplace information on food safety policies and procedures relevant to own work
- fitting and using appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- checking own work area to identify food safety hazards
- carrying out work responsibilities to ensure that food safety is not compromised
- taking necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognising and reporting situations or procedures that could compromise food safety
- sorting and disposing of waste according to workplace procedure
- maintain workplace standards in work area.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of protective clothing and equipment
- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non-food handling areas
• suitable standards for materials and equipment used in the food handling area, including materials that are unsuitable for use
• methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised
• the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring
• cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area
• waste collection, recycling and handling procedures
• workplace standards to be maintained in the work area.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • work area and related equipment to undertake work function
  • waste collection, treatment, recycling and/or disposal equipment
• specifications:
  • food safety policies and procedures relevant to work role
  • work procedures, including procedures for entering and exiting food handling areas.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated a process control interface on at least two occasions, including:

- recognising and responding to error messages and alarms
- accessing relevant performance data using the control system, including locating and interpreting performance trend information
- recording log information using the interface system according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- processes and equipment being controlled, including required processing sequences
- operating principles of process control and interface system, including the relationship between control panels, systems and the physical equipment, and where relevant, operating conditions required for accurate information input from sensors and related instrumentation
- action required to respond to error messages and alarms
- typical faults that can occur when operating a process control interface and corrective action required
- performance data collected by the control interface system and its application to troubleshoot performance, including the ability to identify and investigate related trend data to track cause and effect
- recording requirements and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • process control interface hardware and software
  • work station or equipment to be controlled
  • process to be controlled
  • communication systems and equipment
  • workplace information recording systems, requirements and procedures
• specifications:
  • operating procedures and related advice on equipment operation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively used numerical applications for work purposes, on at least two different occasions, including:

- identifying whether a calculation or estimation is required to meet workplace requirements
- performing calculations involving basic addition, subtraction, division and multiplication to support work role (this may involve use of a calculator and conversion tables)
- using estimation techniques to check quantities, ratios, speed and other required data estimates
- using estimation techniques to check calculated results and workplace data
- recording calculations and measurement information accurately, according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- mathematical processes, including addition, subtraction, multiplication and division
- application of calculation and estimation techniques to meet work requirements
- units of measurement used in the workplace, including whole numbers, fractions and decimals to one decimal point (this may include use of conversion charts)
- representation of numerical information relevant to work requirements, including charts, graphs and tables
- recording requirements and responsibilities relevant to work role.

Assessment Conditions

Assessment of skills must take place under the following conditions:
Assessment Requirements for FBOPR2069 Use numerical applications in the workplace

Date this document was generated: 3 September 2020

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - real or simulated work tasks requiring simple estimation and calculation
  - conversion tables, calculators and measuring instruments.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element.

2. Participate in maintaining and improving quality at work

2.1 Monitor work area, materials, processes and product to ensure compliance with quality requirements and health and safety procedures
2.2 Conduct work in accordance with workplace environmental guidelines
2.3 Identify and report non-conformance in inputs, process, product and/or service according to workplace reporting requirements
2.4 Take corrective action within level of responsibility to maintain quality standards
2.5 Raise quality issues with designated personnel
2.6 Record quality data in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has applied quality systems and procedures on at least two separate occasions, including:

- identifying control points or inspection points for own work and related methods used to monitor quality
- maintaining quality of own work, including relevant checks and inspections where required in order to monitor control points and check and inspect equipment, materials, product, packaging consumables, processing conditions and service standards relevant to own work
- determining when and how to make adjustments to maintain output within specified parameters
- identifying and responding to out-of-specification or unacceptable inputs and/or outputs
- recording quality data in required format.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quality policy, procedures and responsibilities
- quality system used in the workplace, sources of information on quality requirements, the role of internal and external auditors, as appropriate, and performance improvement processes
- basic concepts of quality assurance, including hazards, risk assessment and control methods
- requirements of internal and external customers
- control points for own work, including the purpose of the control point, the risk if not controlled and the method of control used
- monitoring, testing and inspection procedures relating to process control requirements
Assessment Requirements for FBOPR2070 Apply quality systems and procedures

Date this document was generated: 3 September 2020

- scope to correct/control variation within equipment and process capacity parameters
- evidence of out-of-specification or unacceptable performance
- procedures for responding to out-of-specification or unacceptable performance/outcomes, including procedures for identifying or isolating materials or product of unacceptable quality
- systems used to trace product ingredients as relevant to own work
- requirements to report and record quality information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - sampling and test procedures and related equipment
  - systems for recording quality information
- specifications:
  - work instructions
  - quality policy, system and procedures, including company codes of practice/Good Manufacturing Practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively provided and applied workplace information on at least one occasion, including:

- identifying and accessing information to undertake work responsibilities
- ascertaining or clarifying information requirements by asking questions
- preparing and presenting simple written or verbal presentations that structure and present information in a logical sequence
- working effectively with others to achieve work outcomes
- respecting and, where appropriate, representing the views of others
- recording information in required format.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- communication channels, including consultative arrangements established in the workplace
- common colloquial and technical terms relating to work function
- sources of information and advice relating to work responsibilities
- methods and technologies used to access, record and store workplace information, including print, and screen-based systems as relevant to the workplace
- presentation techniques to convey information on a range of typical workplace subjects appropriate to the audience
- recognition of different personal communication styles and appropriate communication options
- recognition of cultural diversity as appropriate in the workplace
- reporting roles and responsibilities
• interpersonal skills, including active listening, questioning, seeking and responding to feedback
• basic meeting procedures to identify and achieve meeting/discussion outcomes.

Assessment Conditions
Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • advice on work roles and responsibilities
  • typical workplace information
  • standard forms and equipment for recording workplace information, as required.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up a production or packaging line on at least one occasion, in line with production schedule, including:

- conducting pre-start checks on machinery used for production to determine cleaning, maintenance and operation readiness
- determining production parameters and requirements
- setting up line according to production requirements
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records and communicate line status with other personnel as required
- applying safe work practices and identifying hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operating principles of equipment and related accessories, including equipment adjustment points, range and location/alignment requirements of sensors and related feedback instruments, and status and purpose of guards
- operating capacities of equipment used in the work area, including different types of equipment and/or components by processing operations
- nature of set-up/changeover requirements, including product compatibility and related cleaning requirements, impact of variation in materials or product on set-up requirements, and equipment and/or attachment changeovers related to given products
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- pre-start checks required by set-up/changeover
• related processes and personnel dependent on line set-up, and communication responsibilities
• isolation, lock-out and tag out procedures and responsibilities
• health and safety hazards and controls in the workplace
• procedures and responsibility for reporting equipment performance information
• operating principles of process control, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • personal protective equipment
  • production/packaging schedule and related advice on setup/changeover requirements
  • process/packaging equipment and related accessories and services
  • materials/consumables required of the process
  • hand tools
• specifications:
  • information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and monitor interrelated processes in a production system.

This unit of competency describes the skills and knowledge required to set up, operate, adjust and monitor interrelated processes in a production system. A production system typically involves a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome.

This unit applies to individuals who have skills and knowledge of the operational requirements of the production system for the industry in which it is applied. Individuals apply higher level planning and problem-solving skills, work under broad direction and take responsibility for their own work.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated interrelated processes in a production system, on at least one occasion, including:

- conducting pre-start checks on production system components
- confirming machine set-up is ready to achieve production requirements
- applying safe work practices and identify hazards and controls
- selecting and fitting personal protective equipment (PPE)
- starting, operating, monitoring and adjusting process equipment throughout the system to achieve required quality outcomes
- identifying system problems and taking corrective action
- conducting operational handovers
- shutting down system
- identifying and investigating opportunities for operational improvements within areas of responsibility
- completing workplace records
- shutting down equipment according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the production system, including the system process flow, the interrelationships of each process to identify the impact of variation on related processes, and optimisation options
- basic operating principles of equipment and related accessories used by the system, including equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments
• operating capacities of equipment used in the system, including different types of equipment and/or components by processing/packaging operations
• related systems and responsibilities for interaction, including related production systems, services supply, packaging/warehousing, maintenance, laboratory/quality assurance and planning and scheduling
• product characteristics and common types of variation in materials and/or ingredients used, including the effect of variation on each stage of the system and scope to adjust or correct
• typical production related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials, incorrect settings and poor operator control
• relevant procedures, specifications and operating parameters for the system and the individual processes
• isolation, lock-out and tag out procedures and responsibilities
• hazards, risks, controls and methods for monitoring processes within the system, including health and safety in the workplace, food safety, quality and environmental hazards and risks
• workplace system and approach to equipment maintenance
• process improvement procedures and related consultative arrangements
• troubleshooting procedures and problem-solving techniques
• communication responsibilities to inform related work areas/support functions and other shifts of operational status and production issues
• procedures and responsibility for reporting production and performance information.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • PPE
  • production system equipment and related accessories and services
  • materials/consumables required by the process
  • communication and recording systems and procedures
• specifications:
  • production schedule and related advice on system requirements
  • information on equipment capacity and operating parameters.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated interrelated processes in a packaging system on at least two separate occasions, including:

- setting and/or adjusting equipment to meet packaging requirements
- inspecting equipment condition to identify any signs of wear
- confirming selection of appropriate settings and/or related parameters
- ensuring that isolation or lock outs are cancelled
- confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly
- ensuring any scheduled maintenance has been carried out
- confirming that all safety guards are in place and operational loading and/or positioning product, packaging components and consumables.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the packaging system, including:
  - the process flow and the interrelationships of each previous processes that can affect packaging outcomes, packaging technology, and packaging equipment components
- basic operating principles of equipment and related accessories used by the system, including:
  - equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments
- operating capacities of equipment used in the system, including different types of equipment and/or components by processing/packaging operations
related systems and responsibilities for interaction, including related production and further packaging/storage stages, services supply, maintenance, laboratory/quality assurance and planning and scheduling

technical knowledge of product/packaging characteristics and the main factors that impact on shelf-life

typical packaging related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials and finished product, incorrect settings and poor operator control

relevant procedures, specifications and operating parameters for the system and the individual processes

isolation, lock out and tag out procedures and responsibilities

hazards, risks, controls and methods for monitoring processes within the system, including health and safety, food safety, quality and environmental hazards and risks in the workplace

workplace system and approach to equipment maintenance

process improvement procedures and related consultative arrangements

troubleshooting procedures and problem-solving techniques

communication responsibilities to inform related work areas/support functions and other shifts of operational status and production issues

procedures and responsibility for reporting production and performance information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace

resources, equipment and materials:

- personal protective equipment
- production schedule and related advice on system requirements
- packaging system equipment and related accessories and services
- product, packaging components and consumables by the process
- communication and recording systems and procedures

specifications:

- information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively participated in work teams or groups of at least three people, on a minimum of two different occasions, including:

- actively participating in discussion about identifying team goals and expectations
- planning work to maximise outcomes for team
- applying communication skills to engage with other participants
- participating in and supporting the achievement of team goals.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to plan work to maximise outcomes for team
- appropriate communication skills to engage with other participants
- procedures for establishing team goals and performance standards
- methods used to measure achievement of personal and team goals
- team goals and personal role to achieving work outcomes
- common group communication processes, including:
  - basic negotiation skills
  - conflict resolution
  - giving and receiving feedback
- importance of team goals and expectations and personal role within the team
- oral communication skills and language, including:
  - questioning
  - active listening
Assessment Requirements for FBPPPL2001 Participate in work teams and groups
Date this document was generated: 3 September 2020

- asking for clarification
- seeking advice from supervisor
- working in a culturally diverse workforce.

Assessment Conditions
Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace

- resources, equipment and materials:
  - workplace arrangements for establishing company, workplace and team goals

- relationships:
  - opportunities to participate in team processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has actively participated in processes to improve work outcomes on at least two different occasions, including:

- planning investigation and data collection methods
- developing objectives and parameters for investigation
- collecting and analysing data and evidence to test ideas
- presenting improvement plans with evidence to support rationale
- implementing and monitoring improvement processes
- ensuring improvement plans reflect overall organisational objectives.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- objectives to be addressed by improvement proposals, including quality, work health and safety, environmental management, cost, efficiency and job satisfaction
- the context in which improvement occurs, including capital expenditure and labour budgets, equipment capacity and production targets
- workplace improvement processes
- data collection and analysis techniques appropriate to the nature of the improvement opportunity and the workplace
- communication techniques to support data collection, consultation and teamwork required to participate in improvement processes
- problem solving strategies
- resources required to support investigation, including:
  - internal and external resources
negotiating access to resources
identifying expertise
recognising improvement requirements in team members
the importance of providing and gaining feedback
issues that may occur in a culturally diverse workforce.

Assessment Conditions
Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - information storage and retrieval systems
- specifications:
  - relevant technical information and personnel resources
  - relevant workplace documentation
- relationships (internal and/or external):
  - opportunities to interact with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required for individuals to participate in auditing, where it occurs in an area that the person is not directly responsible for and where they are required to follow a formal, structured process. It is designed to support participation in auditing a range of programs designed to identify hazards, assess risk and implement control measures.

At this level, the person would typically work under direction and may be required to operate within established audit procedures. Participation implies that the person can participate in all stages of an audit but is not responsible for negotiating audit scope, allocating audit tasks to others or reporting on audit outcomes.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has participated in an audit process on at least one occasion, including:

- collecting, assessing and providing information as required by the audit process
- acting on risk identified in the audit process
- following up on audit outcomes by developing action plans
- communicating outcomes to work personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements and procedures for participating in an audit
- the purpose and scope of an audit, including the stages involved in the audit process
- roles and responsibilities of individuals involved in an audit process
- types of information required for a range of audit situations, including:
  - health and safety in the workplace
  - quality
  - environmental
- techniques for collecting information, including options, relevance and strengths and weaknesses of each method to ensure data is adequate and representative
- data analysis methods relevant to the audit process
- communication skills and techniques appropriate to the workplace to inform other personnel of audit outcomes and modified work practices
- technical knowledge relevant to the program being audited in order to:
• verify compliance
• assess adequacy of control measures
• relevance to industry standards
• purpose and responsibilities for maintaining records
• process to transition audit deficiencies into corrective action plans.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately
    represents a real workplace to collect data and observe compliance
• resources, equipment and materials:
  • workplace program documentation
  • information systems and data collection technology
• specifications:
  • audit procedures and standards as applied in the workplace
  • relevant legislation, industry standards and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational
education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has reported on workplace performance on at least one occasion, including:

- confirming the reporting and recording systems and procedures for a specific work area
- recording information on work performance in accordance with reporting procedures
- reporting variances and inconsistencies
- maintaining security of work documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and responsibilities for the information records and reports to be maintained or produced, including accuracy levels and timelines
- types of information to be recorded, including but not limited to:
  - timesheets
  - log sheets
  - recipes/specifications
  - operating procedures
  - production statistics
  - downtime
  - labour
  - materials usage levels
- techniques used to collate and assess information, including typical recording outcomes to identify unusual or incorrectly recorded information
• likely causes of variation and related reporting responsibilities
• information system access levels and codes, such as levels within software
• effective communication strategies relevant to reporting role
• relevant regulatory and licensing, legislative requirements, industrial awards and agreements.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • performance data
  • recording/reporting formats and systems
• specifications:
  • workplace policies, codes of practice and procedures
  • relevant information on licensing, legislation and industrial awards and agreements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to oversee packaging operations in a food and beverage processing environment and to assess the nature, and likely causes, of packaging problems.

The unit applies to senior operators and managers who are responsible for overseeing packaging processes and work within known parameters. They provide and communicate solutions to a range of predictable or unpredictable problems.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist so local requirements must be checked.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has analysed and evaluated at least two types of food packaging, including (for each):

- analysing packaging system components, including:
  - materials used and interaction with product
  - costs
  - processes
  - legal and customer requirements
  - environmental and handling implications
- analysing and confirming safety aspects of processes and equipment
- analysing non-conformances and packaging problems and determining probable cause
- proposing improvements to the packaging system.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of packaging and the properties of packaging materials designed to protect products and extend shelf-life, including the role of packaging in providing:
  - protection of products from contamination (microbial, pest infestation and physical damage)
  - barriers (atmospheric, moisture, flavour and light)
  - package seal ability and seal integrity
  - easy-to-open access to products
  - information to consumers about products
- market appeal
- materials and their properties
- packaging interactions with food products
- costs
- features of packaging design that preserve products
- legislative requirements relating to packaged products and food safety
- requirements of products handled in the workplace, including coated packaging products, and active/interactive packaging films
- factors that influence the selection of packaging materials
- corrective actions to prevent packaging non-conformance
- characteristics of products, and their behaviour when packaged, across the shelf-life of the product
- typical problems that occur in the packaging process, and likely causes and appropriate response options including:
  - pathogens and spoilage that occur in packaged food and the conditions required for their occurrence
  - intrinsic features of food type, including pH, water activity, nutrient content, presence of microbiological compounds, respiration rate (fresh fruit and vegetables) and biological structure
  - extrinsic factors, including processing method, temperature, water loss and humidity, maturity (applies to maturity of fruit and vegetables when harvested), handling, cleaning, sanitation and personal hygiene practices, and gaseous composition of storage atmosphere
  - food spoilage indicators, including microbial contamination, enzymic browning and sensory degradation of characteristics, such as flavour, aroma, colour and texture
  - the effect of gas composition for modified atmosphere packaging processes, including knowledge of the role of the most commonly used gases in food packaging (carbon dioxide, oxygen, nitrogen), reactions between gases, packaged products and packaging materials
- quality assurance systems to ensure that packaged products meet customer and legal requirements
- relevant sources of technical expertise and related authority levels to address packaging issues.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- **physical conditions:**
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- **resources, equipment and materials:**
  - product, packaging components and consumables
  - packaging process equipment
• specifications:
  • relevant standard operating procedures
  • packaging specifications
  • workplace information recording systems, requirements and procedures.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volume Implementation Guides are found in VETNet: -
Application

This unit of competency describes the skills and knowledge required to select appropriate vine material, prepare cuttings, graft and undertake post-graft treatment and storage.

The unit applies to individuals in wine grape nurseries who work under general supervision, with limited autonomy and accountability for their own work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared to bench graft vines, bench grafted vines and completed the bench grafting activities at least once, including:

- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment according to job requirements
- selecting and preparing appropriate vine material for grafting, including disbudding
- performing bench grafting of vines according to workplace practices
- following workplace requirements for grafting and post-grafting treatment and packing of vines
- monitoring grafted vines by identifying, rectifying or reporting out-of-specification vine grafts
- identify and address non-conformance
- cleaning up and storing equipment according to workplace requirements
- disposing of waste according to environmental policies and workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and principles of grafting and disbudding
- criteria for successful grafting:
  - variety and clone
  - matching cambium
  - matching bevels and sizes
  - wood diameters
  - customer or workplace requirements
• importance of selection and use of rootstock and vinifera
• advantages of using clonal and registered vine improvement rootstock material
• criteria for selecting parent vines for scion material
• procedures and optimum conditions for the storage of grafting material
• preparing vine material for grafting, including:
  • removal from cold storage
  • soaking
  • heat treatment
  • disbudding
  • hydration
  • grading
• procedures for monitoring the grafting process and equipment operation to identify non-conformance
• purpose and components of grafting equipment and cleaning equipment
• packing, labelling and storing grafted vines relevant to:
  • cold room layout
  • cold room temperature variations
  • customer requirements
  • storage time requirements
  • care of vines to minimise damage by moisture and disease
• procedures and responsibility for reporting problems
• environmental issues and controls, including:
  • identifying, rectifying and reporting environmental non-conformance
  • sorting, collecting, treating, recycling or disposing of waste
• cleaning requirements and procedures for work area and equipment
• reporting and recording required information.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a plant nursery workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • appropriate personal protective equipment
  • equipment, services and corresponding information
  • products and materials
  • cleaning procedures, materials and equipment
  • documentation and recording requirements and procedures
• specifications:
• work procedures, including advice on company practices, safe work practices, quality and environmental requirements
• workplace grafting specifications
• work instructions and schedules
• legislative and local quarantine regulations and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has carried out at least two potting operations involving potting propagated material and post-potting treatment including:

- using personal protective equipment (PPE), safety data sheets (SDS) and following health and safety requirements in the workplace
- ensuring materials are available and ready for potting process
- selecting and mixing potting media and treatments according to workplace procedures
- cleaning pots and work surfaces according to workplace procedures
- preparing cuttings before potting including waxing or grading methods
- potting cuttings and labelling trays according to workplace procedures
- transferring potted cuttings to a growing environment
- maintaining hydration requirements
- disposing of waste according to workplace procedures
- completing records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including:
  - purpose and application of PPE
  - SDS
  - operating equipment according to workplace procedures
  - safe handling and preparation of equipment, potting media and chemicals
- process for preparing cuttings for potting, including:
  - grading
- waxing
- dipping in hormones
- hydrating
- potting process and standards of potting, including:
  - resources and materials used for the potting process
  - selecting, operating, maintaining and storing equipment according to workplace procedures
  - planting cuttings, according to workplace procedures
  - labelling trays according to workplace procedures
  - watering potted cuttings
- process of transferring and placing potted cuttings to growing environment
- report and address non-conformances according to workplace procedures
- principles of nursery hygiene, including:
  - cleaning requirements and techniques for work area and equipment
- maintenance of work area and equipment according to workplace procedures including:
  - report and address environmental non-compliance
  - waste disposal requirements and procedures
- processes for reporting, recording and maintaining workplace records.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- physical conditions:
  - nursery shed or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment
  - equipment, services and corresponding information
  - potting products and materials
  - cleaning procedures, materials and equipment
  - system for recording information
- specifications:
  - work procedures, including advice on company practices, safe work practices, and environmental requirements
  - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared for hand pruning, hand pruned vines and completed hand pruning operations at least once including:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE)
- following pruning equipment safety procedures
- starting and operating hand pruning equipment safely according to workplace procedures
- pruning correctly according to workplace procedures
- identify and address non-conformances
- performing shut down procedures according to workplace procedures
- following environmental procedures
- disposing of cuttings according to workplace procedures
- maintaining records according to workplace guidelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic components of and the purpose for pruning vines, including:
  - basic difference between cane and spur pruning
  - pruning requirements
  - different parts of the vine, including vine trunk and permanent framework, canes and cordons, tendrils and buds
- techniques and principles of pruning vines:
  - selecting the best possible spurs and canes
  - positioning spurs or canes
  - cleanly removing sucker shoots
  - leaving the correct quantity of spurs, rods and buds
• making cuts correctly and cleanly
• recognising and removing unwanted growth
• rolling and securing extension canes onto trellis wire
• health and safety hazards and controls in the workplace including purpose and application of PPE
• correct operating procedures for pruning equipment, including:
  • handling pruning equipment safely
  • oiling moving parts and sharpening procedures
  • safe handling of pruning equipment
  • starting up and operating automatic pruning equipment as required
  • monitoring and recognising performance problems with pruning equipment
  • cleaning and storage requirements of pruning equipment
  • using appropriate cleaning techniques
• shut down procedures
• processes for the routine preventive maintenance of equipment
• identifying, rectifying and reporting environmental non-compliance
• processes for maintaining work area:
  • environmental issues and controls
  • disposal requirements of vine cuttings
• procedures and responsibility for reporting problems and anomalies
• recording workplace information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a vineyard workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • pruning equipment, services and corresponding information
  • products and materials
  • cleaning procedures, materials and equipment
  • documentation and recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, quality and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared cuttings for callusing and maintained the callusing environment on at least two separate occasions including:

- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment (PPE)
- observing hygiene and housekeeping standards including cleaning and sanitising of work area, equipment and boxes
- preparing callusing media and boxes to specification
- preparing cuttings and applying pre-callusing treatment
- placing cuttings into callusing boxes
- monitoring and maintaining callusing environment to specification
- monitoring cuttings for correct callusing and reporting problems according to procedures
- applying post-callusing treatments
- removing callused cuttings
- recording appropriate information.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including:
  - purpose of PPE
  - correct operating procedures for equipment
  - safe and effective handling of equipment
  - safe preparation and handling of chemicals
- cleaning requirements and procedures for work area and equipment
- principles of nursery hygiene
- environmental considerations and required controls
- waste disposal requirements and procedures
- correct procedures for preparing cuttings for callusing
- correct procedures for placing cuttings into boxes
- effects of variety, clone and source of cuttings on the placement and labelling of cuttings in boxes
- purpose and benefit of carrying out pre- and post-callusing treatments
- procedures used to carry out pre- and post-callusing treatments
- procedures for preparing pre-mixed callusing media
- factors in a controlled callusing environment that affect the vine cutting:
  - methods of pasteurising and treating callusing media
  - temperature
  - relative humidity
  - moisture levels of growing medium
- methods for setting, monitoring and maintaining the required temperature and relative humidity
- correct procedures for preparing callusing boxes
- quality control process in the callusing environment
- common problems that occur during callusing and how to resolve them
- procedures and responsibilities for reporting problems and anomalies
- procedures for maintaining workplace records
- procedures for selecting, operating, maintaining and storing the required equipment
- correct procedures for removing and transferring callused cuttings.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - equipment, services and corresponding information relevant to callusing
  - products and materials for callusing
  - cleaning procedures, materials and equipment
  - documentation, recording requirements and procedures
- specifications:
  - work procedures, including advice on company practices, safe work practices, quality and environmental requirements
  - work instructions and schedules.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to dig and process vine rootlings.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with obtaining and processing rootlings.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the following for obtaining and processing rootlings from a field nursery, a sand bed and a callusing room, including:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE) according to job requirements
- handling and using treatments and disinfectants
- selecting and mixing treatments to required concentrations
- sanitising equipment and work surfaces according to workplace procedures
- set up and operate equipment according to workplace procedures
- treating, bundling, storing and labelling rootling according to workplace procedures
- preparing, packing and loading rootling for dispatch according to workplace procedures
- identifying and reporting non-conformances
- treating and disposing of waste according to workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- safe equipment operation, storage and maintenance requirements according to workplace procedures
- principles of nursery hygiene for equipment and cleaning requirements
- methods for handling rootlings in different environments
- processes for treating rootlings:
  - hydration of all rootlings
• chemical treatment of all rootlings
• common features of vine rootlings health
• procedures for monitoring the standard of rootlings, and grading and sorting them for:
  • diameter of stem
  • appearance
  • length and number of shoots
  • strength of graft union
• package, storage requirements and procedures for rootlings ready for sale, including:
  • cold room layout and temperature variations
  • customer requirements
  • storage time requirements
• procedures for checking stock against orders, including:
  • quantity of stock
  • varieties and clones
  • quality of stock is within specifications
  • procedures and responsibilities for reporting problems and anomalies
• procedures for dispatching stock, including:
  • correct manual handling
  • correct use of mechanical transfer equipment
• procedures for collecting and disposing of waste
• environmental issues and controls
• recording workplace information.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a plant nursery workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • equipment, services and corresponding information
  • products and materials
  • cleaning procedures, materials and equipment
  • system for recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
  • work instructions and schedules.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has tended to containerised nursery plants by treating plants to maintain growth and maintaining nursery facilities and demonstrating the following on at least one occasion:

- using personal protective equipment (PPE)
- identifying and following safety data sheets and health and safety in the workplace procedures
- sanitising equipment and following hygiene procedures
- selecting, mixing and applying chemical treatments according to workplace procedures
- monitoring irrigation system
- irrigating and monitoring plants according to workplace procedures
- identifying and reporting non-conformances
- maintaining workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- principles and operations of irrigation systems used in tending plants in nurseries
- maintaining irrigation system:
  - fixing blockages, leaking heads and hoses
  - servicing irrigation system components
  - identifying and reporting non-compliances
- recognising underperformance of the irrigation system, including:
  - dry spots
• water dumping
• abnormal water flow
• principles and practices of tending nursery plants:
  • weed control
  • removing dead or diseased plant materials
• workplace procedures for operating equipment:
  • calibrating and adjusting equipment
  • carrying out pre-operational checks
  • applying particular settings
  • shut down procedures
• environmental issues and controls including waste disposal
• workplace procedures for reporting non-conformances
• procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:
• physical conditions:
  • a plant nursery workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • irrigation and maintenance equipment, services and corresponding information
  • products and materials
  • cleaning materials and equipment
  • system for recording information
• specifications:
  • workplace procedures, including advice on company practices, safe work practices, quality and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared for vine training, trained vines and completed vine training activities on at least one occasion including:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE) according to job requirements
- setting up and operating equipment according to workplace procedures
- training vines according to instructions, including heading height, selection of appropriate laterals, positioning of laterals, securing of laterals, removing unwanted laterals from trunk and crown
- identifying and addressing non-conformances
- cleaning up and storing equipment according to workplace procedures
- maintaining records according to workplace procedures
- disposing of waste according to environmental guidelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- safe and effective handling of equipment
- maintenance and storage of equipment according to workplace procedures
- range of vine training techniques, features, benefits and procedures
- different parts of the grapevine, including vine trunk and permanent framework, laterals, canes and cordons, tendrils and buds, and fruit
- how to report and address non-conformances according to workplace procedures
- responsibilities for identifying and controlling environmental issues
- cleaning and storage requirements and procedures for equipment
• workplace procedures and responsibility for:
  • reporting problems
  • cleaning up
  • maintenance
  • handling and disposing of waste
  • reporting required information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a vineyard workplace or an environment that accurately represents workplace conditions

• resources, equipment and materials:
  • PPE
  • vine training equipment, services and corresponding information
  • range of grape vine varieties
  • cleaning procedures, materials and equipment
  • system for recording information

• specifications:
  • work procedures, including advice on company practices, safe work practices, and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively taken and processed vine cuttings using hand-operated equipment on at least two separate occasions including:

- following health and safety procedures in the workplace
- selecting, fitting and using personal protective equipment (PPE)
- selecting cuttings and cutting according to workplace procedures
- using a variety of hand-operated or handheld cutting equipment
- treating, bundling, and labelling cuttings according to workplace procedures
- identifying and addressing non-conformances in cutting propagation of grape vines
- disposing of waste according to workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and environmental controls in the workplace
- purpose and application of PPE
- selection, setup and maintenance of vine cutting equipment
- vine components:
  - vine trunk and permanent framework
  - canes and cordons
  - tendrils and buds
- procedures for selecting and taking vine cuttings:
  - correct length and diameter
  - correct number of buds on the cutting
• degree of straightness
• cuts made correctly and cleanly
• top cut at 45° angle or bottom bud flat, 1-2 cm from nearest bud
• number of buds left on the vine
• treating cuttings procedures:
  • hydration of all cuttings
  • removing unwanted plant material
  • mixing treatments
• collecting and storing vine cuttings procedures:
  • numbers per bundle
  • all lying the same way in the bundle (basal and distal ends)
  • secure tying and labelling of bundles
  • maintaining hydration of cuttings
• cutting propagation techniques for grape vines:
  • identification of vine cuttings
  • cutting collection and storage requirements, including hydration
• features of healthy and unhealthy vine cuttings used to grade cuttings
• packing and storing cuttings:
  • cold room layout and temperature variations
  • storage time requirements
• cleaning requirements and environmental procedures for work area and equipment
• identifying and addressing non-compliances
• maintaining workplace records
• legislation, regulations and codes of practice related to handling of vine cuttings.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a vineyard workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • equipment, services and corresponding information
  • cuttings and treatments
  • cleaning procedures, materials and equipment
  • system for recording information
• specifications:
  • work procedures, including advice on company practices, safe work practices and environmental requirements
  • legislative and local quarantine regulations and codes of practice
• work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated at least three different types of vineyard equipment and for each type has demonstrated the following:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE)
- selecting and confirming availability of equipment, and preparing according to workplace procedures
- setting up, starting up, operating and shutting down equipment according to workplace procedures
- adjusting equipment operation to meet workplace conditions including yard, weather and terrain
- identifying and addressing non-conformances
- sorting, collecting, treating and disposing of waste according to environmental and workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in all operating conditions
- selecting, fitting and using appropriate PPE
- basic equipment used and operated in a vineyard environment
- purpose, features, components and operational safety requirements of equipment:
  - all-terrain vehicles
  - tractor-mounted forklift
  - front-end loader
• towed equipment (e.g. gondola)
• three-point linkage equipment (e.g. discs)
• power take-off driven equipment (e.g. slasher)
• equipment with hydraulics (e.g. tipping trailer)
• confirming equipment status and condition, including:
  • fuel
  • water
  • oil (e.g. engine, gearbox and hydraulics)
  • belts
  • air intake
  • tyre pressure
  • metal fatigue or wear and tear
• following equipment shut down procedures
• identify and address non-conformances
• required weather conditions for equipment operation
• types of workplace terrain
• significance and methods of monitoring equipment performance
• procedures and responsibility for reporting problems and maintaining workplace records
• environmental issues and controls
• identifying, rectifying and reporting environmental non-compliance
• cleaning and storing according to workplace procedures
• collecting, treating and recycling or disposing of waste
• routine maintenance procedures for equipment
• recording requirements and procedures
• legislation and quarantine codes of practice related to vineyard operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:
• physical conditions:
  • a vineyard workplace or simulated environment that accurately reflects performance in a real workplace setting
• resources, equipment and materials:
  • appropriate PPE
  • vineyard equipment and associated attachments
  • cleaning materials and equipment
• specifications:
  • work procedures, including advice on company practices, safe work practices and environmental requirements
  • legislative and local quarantine regulations and codes of practice
  • system for recording requirements and procedures
• work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to treat grape vine cuttings with hot water to meet industry standards.

The unit applies to individuals who are required to follow workplace procedures to use hot water treatment for cuttings in a vineyard.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

</table>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared hot water treatments, treated cuttings and carried out the post-treatment procedures on at least two separate occasions and demonstrated the following:

- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment according to job requirements
- applying current viticulture industry standards to heat treatment of cuttings
- handling and treating cuttings according to workplace procedures
- monitoring treatment processes and responding according to workplace procedures
- disposing of waste according to instructions and workplace procedures
- maintaining records according to industry and workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and process of hot water treatment
- how to set up equipment for hot water treatment according to workplace procedures
- how to prepare cuttings for treatment or re-hydration
- how to prepare water for cool down, hot water treatment and hydration:
  - testing and adjusting chlorination levels
  - checking and adjusting temperature levels
- current industry standards, legislation and workplace specifications for hot water treatments
- reasons for using different specifications for hot water treatments
- how to monitor the dipping process to ensure compliance according to workplace procedures including:
• monitoring critical control points for compliance with specifications
• analysing readouts from data logging devices
• maintaining level of agitation in the tanks
• maintaining chlorine level
• recalibrating thermometers

• procedures for storing treated cuttings:
  • separating from untreated cuttings to prevent contamination
  • covering with clean covers
  • placing cuttings in vented plastic bags to prevent dehydration
  • placing cuttings in the cold room

• workplace health and safety hazards and controls when undertaking hot water treatments

• principles of nursery hygiene

• cleaning requirements and procedures for work area and equipment

• environmental issues and controls:
  • identifying, rectifying and reporting environmental non-compliance
  • waste disposal requirements and procedures

• reporting and recording workplace procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a plant nursery workplace or an environment that accurately represents workplace conditions

• resources, equipment and materials:
  • personal protective equipment used for heat treatment of vines
  • equipment, services and corresponding information
  • products and materials to be treated
  • equipment cleaning procedures and materials
  • system for recording requirements and procedures

• specifications:
  • work procedures, including advice on company practices, safe work practices and environmental requirements
  • legislative and local quarantine regulations and codes of practice and industry standards for heat treatment of grape vines
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated, monitored and maintained nursery cold storage facilities at least once and demonstrated the following including:

- following health and safety procedures in the workplace
- applying workplace procedures to cold room operations
- selecting and fitting personal protective equipment (PPE)
- monitoring cold storage and stock conditions according to workplace procedures
- identifying and reporting on anomalies
- shutting down, cleaning, sanitising and securing cold storage facilities
- identifying and addressing non-conformances
- maintaining records according to workplace procedures

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls when working in a cold room, including:
  - PPE
  - health and safety procedures
- accessing workplace information required to operate cold storage facilities
- principles and practices of cold room planning and operation, including:
  - purpose and components of a cold room
  - operating cold room equipment according to workplace procedures
- principles and practices of maintaining cold room performance including:
  - packing and monitoring a cold room including temperature, humidity and air flow
• common non-conformances and the corrective action required
• effect of cold storage on cuttings
• post-storage treatment of cuttings
• applying cold room plan
• moving material in and out of cold room
• using manual and mechanical transfer methods
• monitoring the health of cuttings during storage and checking for signs of:
  • dehydration
  • fungal infection
• starting up and shutting down equipment
• cold room nursery hygiene, including:
  • workplace environmental procedures and regulations
  • cleaning and sanitising requirements
  • waste collection and disposal
  • maintaining work area according to workplace procedures
• types of workplace records.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a plant nursery workplace or an environment that accurately represents workplace cool room conditions
• resources, equipment and materials:
  • PPE used for operating a cold storage facility
  • equipment, services and materials for use in a cold storage facility
  • manual and mechanical cold storage transport
  • system for recording information
• specifications:
  • workplace procedures, including advice on company practices and safe work practices
  • equipment instructions and operation specifications
  • quarantine regulations and relevant codes of practice
  • industry standard procedures for cold storage of grape vines
  • cold room storage plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the following on at least two separate occasions when supporting mechanical harvesting operations including:

- accessing workplace information to identify job requirements
- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment (PPE)
- checking and confirming readiness of equipment before operation
- starting and operating equipment according to instructions
- monitoring harvesting operation to achieve job requirements
- identify and address non-conformances
- treating and delivering grapes according to task requirements
- shutting down equipment according to workplace procedures
- cleaning and storing equipment according to workplace procedures
- sorting, collecting, treating and disposing of waste according to environmental and workplace procedures
- maintaining appropriate records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key factors that will affect grape and wine quality, including:
  - temperature
  - oxidation
  - material other than grapes collected
  - speed of processing
  - treatment requirement
Assessment Requirements for FBVIT2018 Support mechanical harvesting operations

- health and safety hazards and controls in the workplace
- how to select, fit and use appropriate PPE
- procedures for identifying and addressing environmental issues
- procedures for carrying out pre-operational checks of equipment
- procedures for selecting, attaching, setting up and operating harvesters and tractor trailers used in the workplace
- procedures for collecting grapes to avoid damage to grapes, equipment, vines, trellises or fences
- procedures for shutting down, cleaning and maintaining equipment
- common problems during grape collection activities and methods for avoiding addressing and reporting them, including:
  - equipment breakages or malfunction
  - vine or trellis damage
  - grape quality and quantity
  - matter other than grapes collected
  - load weight
  - treatment application to fruit loads
  - collection accuracy of grapes
  - tipping accuracy of grapes at receival point
  - congestion or backlog at receival point
- recording requirements and procedures
- legislation and quarantine codes of practice related to vineyard products.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a vineyard workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - appropriate PPE
  - equipment with attached gondola or trailer
  - products and materials to be collected and delivered
  - cleaning procedures, materials and equipment
  - system for recording requirements and procedures
- specifications:
  - work procedures, including advice on company practices, safe work practices and environmental requirements
  - legislative and local quarantine regulations and codes of practice.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to coordinate vineyard operations in a range of day-to-day activities in areas such as harvesting, nursery, pruning or canopy management.

The unit applies to individuals who coordinate operations within a vineyard. They work under broad direction and exercise autonomy and judgement where required.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively coordinated operations in a vineyard involving day-to-day activities in areas of harvesting, nursery, pruning or canopy management at least once, including:

- complying with health and safety requirements in the workplace
- selecting and fitting personal protective equipment (PPE)
- determining activities required of the vineyard processes and individuals in order to meet job targets
- allocating activities and monitoring their implementation
- providing team leadership and instruction for vineyard personnel
- identifying and addressing non-conformances
- completing workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace planning processes:
  - planning and scheduling vineyard activities
- personnel requirements:
  - equipment and materials required
  - location
  - transport
  - timing
  - environmental conditions
  - other vineyard activities
• quality and quantity requirements
• vineyard health and safety hazards and controls in the workplace
• vineyard environmental issues and controls
• team leadership communication principles and strategies
• procedures for monitoring and reporting on individual and team performance
• vineyard activities to be monitored:
  • compliance with workplace, environmental and quality procedures
  • individual and team performance
  • achievement of targets, timelines and performance requirements
  • team members’ learning needs
  • instructing individuals and groups
  • providing feedback to individuals and groups
  • resolving conflicts
• how to recognise, correct and report non-conformances
• how to maintain workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a vineyard workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • vineyard equipment, services and corresponding information
  • products and materials required for vineyard work
  • system for recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, people management, quality and environmental requirements
  • work instructions and schedules
• relationships (internal and/or external):
  • small work groups or teams to coordinate.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to plant, maintain and process field nursery vines.

The unit applies to individuals who carry out workplace procedures in completing tasks associated with maintaining a field nursery.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively undertaken activities to maintain a field nursery at least once including planting, maintaining and processing field nursery vines and:

- following health and safety in the workplace procedures
- selecting and fitting personal protective equipment (PPE)
- planting in field nursery according to workplace procedures
- following vine protection procedures
- preparing for, implementing and monitoring nursery activities
- preparing vine rootlings for transport
- monitoring the health of rootlings
- Identify and addressing non-conformances.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- PPE
- preparation of field nursery bed for planting:
  - treatment of weeds
  - soil cultivation and nutrition
  - planning vine planting
  - application of weed matting
  - herbicide and fertiliser treatments
  - positioning irrigation pipes and points
- methods of planting in field nursery
- selection and application of vine protection methods, including:
  - weather conditions
  - vineyard pests
  - orientation of vineyard
  - irrigation or fertilisation schedule
- maintenance of health of growing vines
- common causes and signs of growth disorders and corrective action required:
  - soil moisture
  - signs of disease and pests and nutrient deficiency
  - water stress
  - growth rate
- procedures for lifting vine rootlings from the nursery bed:
  - ensuring minimal plant damage
  - roots undercut
- procedures for transporting rootlings:
  - trimming
  - counting and bundling
  - labelling, grading and packing
- procedures for taking corrective action in response to out-of-specification growth or appearance
- procedures and responsibility for reporting problems
- environmental issues and controls
- reporting and recording requirements.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a field plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - field nursery equipment
  - products and materials required for field nursery work
  - a system for recording information
- specifications:
  - work procedures, including advice on company practices, safe work practices and environmental requirements
  - work instructions and schedules.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to attach, set up and detach spreading and seeding equipment that requires calibration.

The unit applies to individuals who complete spreading and seeding activities such as planting cover crops and ensuring deep incorporation of ameliorants and fertilisers.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

</tbody>
</table>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down seed spreading equipment at least once and demonstrated the following, including:

- recognising health and safety hazards and applying controls in the workplace
- selecting and using personal protective equipment (PPE)
- ensuring availability of specified materials and preparing according to workplace requirements
- selecting, attaching, setting up and calibrating equipment to meet job requirements
- starting, operating and shutting down equipment in accordance with workplace procedures
- monitoring spreading or seeding operations to achieve specified result
- shutting down the equipment according to workplace procedures
- taking corrective action in response to non-conformance results
- disposing of waste materials according to workplace and environmental policies
- recording information accurately.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and application of spreading and seeding operations within the vineyard growing system, including:
  - soil ameliorants
  - inter-row cropping species and varieties
  - inter-row cropping practices and techniques
  - inorganic and organic fertilising materials
  - process specifications, procedures and operating parameters
  - application parameters for seed or spreading materials:
- correct variety or type of seed and fertiliser
- correct soil ameliorant and treatment
- application rate
- volume
- application depth
- density
- coverage
- required weather conditions for activity
- soil characteristics as they apply to spreading and seeding operations
- purpose and operation of seeding and spreading equipment and instrumentation components:
  - common causes of non-conformance and corrective action required
  - significance and methods of monitoring equipment performance
  - storage procedures for equipment and materials
  - routine maintenance procedures for equipment
  - start up and shutdown sequence
- equipment status and condition:
  - belts and chains
  - lubricants
  - hydraulics
  - air intake
  - tyre pressure and wear
  - wear and tear
- how to select, attach, set up and calibrate equipment to meet job requirements
- how to select, prepare and load materials according to job requirements
- how to start up, operate and monitor equipment
- how to conduct routine maintenance of equipment according to workplace procedures
- local environment and operating conditions
- health and safety hazards and controls in the workplace
- PPE
- procedures and responsibility for reporting non-conformances
- procedures for collecting, sorting, treating, disposing of and recycling waste to meet environmental compliance
- equipment cleaning requirements and procedures
- storage requirements associated with temporary or seasonal breaks in activity
- procedures for maintaining workplace records.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- physical conditions:
Assessment Requirements for FBPVT3003 Operate spreading and seeding equipment

- an agricultural or horticultural workplace or an environment that accurately represents workplace conditions

- resources, equipment and materials:
  - PPE
  - spreading and seeding equipment, services and corresponding information
  - spreading and seeding products and materials
  - cleaning procedures, materials and equipment
  - documentation and recording requirements and procedures

- specifications:
  - work procedures, including advice on company practices, safe work practices, equipment calibration and environmental requirements
  - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively monitored and maintained three different containerised nursery plants and demonstrated the following:

- identifying and following health and safety in the workplace procedures
- selecting and using personal protective equipment (PPE)
- identifying environmental factors and their effect on plant growth and health
- monitoring and controlling irrigation and treatments to meet production outcomes
- identifying and addressing non-conformances
- confirming available stock levels to meet customer requirements
- preparing stock for dispatch
- dispatching nursery plant stock to meet customer requirements
- completing documentation to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic vine physiology, as it applies to:
  - transpiration
  - water intake
  - nutrient uptake
  - photosynthesis
  - respiration
  - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality:
• buds, nodes and tendrils
• cambium, epidermis, phloem and xylem
• leaf blade, bract and petiole
• bunch, berries and flowers
• key grape varieties and their distinguishing features:
  • berry and bunch characteristics
  • frost and disease resistance
  • flavour and style
• annual grapevine growth stages:
  • budburst
  • flowering
  • on set of ripening
  • maturity
• irrigation systems and methods including:
  • methods of calculating daily water needs
  • methods for monitoring water use
  • relationship between water needs of nursery plants and environmental parameters
• maintenance of irrigation systems:
  • fixing blockages
  • servicing irrigation system components
  • identifying and reporting faults in the irrigation system
  • fixing leaking heads and hoses
  • monitoring water requirements
  • using soil moisture devices
• checking plants for physical signs of water stress or waterlogging
• types of potting media, their characteristics and effect on plant growth
• tests to determine quality of potting media:
  • pH, drainage, aeration
  • salinity
  • nitrate levels
  • water repellence
• maintenance of work area to meet workplace hygiene standards:
  • removing weeds
  • removing dead or diseased plant materials
  • washing work area on transfer of plants
  • disinfecting tools, equipment and work areas
  • using foot baths on entry to different work areas
• procedures for applying treatments to vines:
  • fungicides
  • fertilisers
• insecticides
• hormones
• pruning
• hardening off
• preparing, mixing and using chemicals
• quality parameters for nursery plants
• treatments required by plants at different growth stages
• health and safety hazards and controls in the workplace:
  • selecting, fitting and using appropriate PPE
  • identifying potential and existing hazards in the work area and implementing safe work procedures to minimise hazards
• procedures for monitoring and preparing stock for dispatch:
  • packing, dispatching and handling techniques of nursery plants
  • labelling containers
  • checking orders against stock prepared
  • hydrating stock
• procedures and responsibility for reporting problems and anomalies
• procedures for liaising with customers
• procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:
• physical conditions:
  • a plant nursery or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • equipment, services and corresponding information
  • nursery stock
  • hygiene procedures, materials and equipment
  • system for recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, plant quality and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</table>

Application

This unit of competency describes the skills and knowledge required to install and maintain vine trellising.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with installing and maintaining a vine trellis and take responsibility for their own work using discretion and judgement in the selection and use of available resources.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively installed and maintained a vine trellis at least twice and demonstrated the following:

- identifying health and safety hazards and controls in the workplace
- using and fitting personal protective equipment (PPE)
- carrying out trellis repairs according to workplace procedures
- laying out posts and supports according to workplace procedures
- cutting, securing, positioning and tensioning wires according to workplace procedures
- storing unused materials according to workplace procedures
- collecting and disposing of waste according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and components of the trellis system:
  - trellis installation process
  - maintenance requirements of vineyard trellising and how to repair them
  - addressing non-conformances in trellis installation
  - selecting appropriate materials, including type and quantity
- health and safety hazards and controls in the workplace:
  - safe handling of materials and equipment
  - purpose and application of PPE
- how to repair a trellis, including:
  - positioning and depth of posts and strainers
  - positioning and number of wires
• tightness and grade of wire
• practices to lay out posts and supports, including:
  • spacing
  • type
  • numbers
  • positioning
• practices to run out wire including:
  • positioning
  • cutting correct length
  • erecting trellis ends and assemblies
  • securing of ends
• methods of attaching foliage and trellis wires including:
  • spacing
  • alignment
  • height
  • tension
  • fixing method
  • joining systems
• operation of trellising equipment:
  • checking equipment
  • using hand tools
• environmental issues, controls and reporting requirements
• cleaning and storage requirements and procedures for equipment and materials.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a grape growing workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • trellising equipment, services and corresponding information
  • trellising materials
  • cleaning and storing procedures, materials and equipment
  • documentation and recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices and environmental requirements
  • work instructions and schedules.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to select appropriate vine material and graft vines in the field.

The unit applies to individuals are required to follow workplace procedures in completing tasks associated with a grape growing workplace and take responsibility for their own work using discretion and judgement in the selection and use of available resources.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively grafted vines in the field on at least two separate occasions including:

- selecting and preparing vine material for grafting, including disbudding
- using and fitting personal protective equipment (PPE)
- carrying out grafting of vines in the field according to workplace procedures
- conducting post-grafting treatment and packing of vines
- monitoring grafted vines, identifying and reporting non-compliances
- disposing of waste according to environmental workplace procedures
- recording and reporting results of grafting according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and application of PPE
- health and safety hazards and controls in the workplace
- how to set up and operating equipment
- environmental issues and controls
- procedures and responsibility for reporting non-conformances
- soil characteristics as they apply to vine establishment:
  - structure
  - compaction
  - condition
  - present moisture
  - present nutrients and toxic factors
- parts of the vine
- planting requirements and procedures:
• spacing
• row width
• depth
• soil preparation
• rootling preparation
• soil compaction
• planting procedure
• rootling health
• correct disposal of waste material
• cleaning and storage of equipment
• appearance and features of healthy vine planting material
• cleaning and storage requirements for equipment
• recording workplace information.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a grape growing workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • field grafting equipment and services
  • grape vines
  • cleaning procedures, materials and equipment
  • system for recording information
• specifications:
  • workplace procedures, including advice on company practices, safe work practices, and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down specialised canopy management equipment on at least one occasion including:

- recognising health and safety hazards in the workplace and applying controls
- selecting and using personal protective equipment (PPE)
- attaching and setting up equipment to meet job requirements
- starting, operating, and shutting down equipment safely and according to workplace procedures
- taking corrective action according to non-conformances
- disposing of waste according to workplace procedures
- recording information according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key factors affecting the canopy management technique, including:
  - climate, forecast and current weather conditions
  - vineyard aspect and terrain
  - grape variety and vigour
  - grape quality and characteristics required
  - trellis design
  - harvesting techniques
  - disease risk and occurrence
  - stage of maturity and development
- canopy management equipment, operating parameters and procedures
• factors influencing vine vigour:
  • grape variety
  • trellis design
  • vine spacing
  • fertilisers
  • irrigation
  • rootstock
• features and benefits of a range of canopy management styles and techniques and their respective effect on grape quality, cropping yield and wine production requirements, including techniques to manage:
  • light penetration and shading
  • air circulation and disease reduction
  • annual growth stages of vine development
  • crop quality and quantity
• significance and method of monitoring canopy management activities
• purpose and basic components of canopy management equipment
• operational procedures for equipment:
  • attaching equipment to tractor
  • setting up equipment to meet requirements
  • confirming equipment status and condition
  • operating equipment to meet requirements
  • starting and shutting down equipment
  • recognising equipment performance problems and rectifying and reporting
  • cleaning and storing equipment
  • detaching equipment from tractor
  • using appropriate cleaning techniques
  • carrying out routine maintenance of equipment
• monitoring canopy management activities:
  • width of canopy
  • speed of tractor and power take-off rpm
  • density of foliage
  • air circulation
  • light penetration or shade
  • bud numbers, spur length
  • vine damage
  • rate of progress
• health and safety hazards and controls in the workplace
• selecting, fitting and using PPE
• environmental issues and controls
• basic vine canopy problems or anomalies
• taking corrective action in response to non-conformances
• system for reporting problems
• cleaning and storage requirements and procedures for equipment
• maintaining workplace records.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a vineyard or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • canopy management equipment, services and corresponding information
  • vines requiring canopy management
  • cleaning procedures, materials and equipment
  • documentation and recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, canopy management and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has set up and safely operated a mechanical harvester to meet harvesting requirements on at least one occasion including:

- following health and safety in the workplace procedures
- selecting, fitting and using personal protective equipment (PPE)
- preparing, attaching and setting up equipment according to workplace procedures
- starting, operating and shutting down equipment according to workplace procedures
- adjusting operation to suit weather and terrain conditions
- identifying and addressing non-conformances
- managing the disposal of waste according to environmental workplace procedures
- recording information according to procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and environmental controls in the workplace
- PPE
- key grape varieties and their distinguishing features for harvesting:
  - berry and bunch characteristics
  - frost and disease resistance
  - flavour and style as it applies to harvest
  - factors that affect grape ripening
  - effect of fruit quality on wine
- purpose of mechanical harvester components and operation including:
  - crop level
• grape variety
• vine age
• row height, width and trellis design
• slope, angle of row
• visibility
• monitoring mechanical harvester operation:
  • vine damage
  • grape quality and maturity
  • harvesting effectiveness (amount of fruit left in fruiting zone)
  • matter other than grape (MOG) collected
• maintenance procedures for equipment
• procedures and responsibility for non-conformances
• cleaning and storage procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a wine agricultural or horticultural workplace or an environment that accurately
    represents workplace conditions
• resources, equipment and materials:
  • PPE
  • equipment, services and corresponding information
  • cleaning procedures, materials and equipment
  • a system for recording information
• specifications:
  • work procedures, including advice on equipment operations, company practices, safe
    work practices and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational
education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored, implemented and evaluated a soil management program for a vineyard at least once and demonstrated the following including:

- accessing workplace information to identify vineyard soil requirements
- ensuring use of workplace health and safety procedures
- selecting and fitting personal protective equipment
- determining requirements for vineyard soil management and making recommendations for approval
- coordinating resources and activities to implement soil management program
- monitoring and identifying non-conformances with the effectiveness of soil management program
- completing workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety hazards and controls including selecting, fitting and using appropriate personal protective equipment
- soil management techniques and their effect on soil, vine growth, cropping levels and wine quality:
  - ideal soil environment for vines plus specific requirements of grapes grown
  - visual signs of vine nutrient deficiencies
  - sampling techniques and procedures
  - routine testing techniques and procedures
  - interpretation of routine tests
• procedures for monitoring the vineyard and interpreting the results to identify vineyard soil management requirements, including:
  • soil moisture content
  • water table level
  • weed population
  • nutrient levels in plant and soil
  • signs of vine nutrient deficiencies
  • climatic conditions
  • cover crop practices
  • soil analyses including pH and salinity
  • evidence of hard pans
  • soil texture
  • vine root distribution
  • irrigation water quality
  • erosion risk
  • soil management history
  • growth of mid-row sward
• procedures for planning and implementing the soil management program:
  • resources, including operators with appropriate skills
  • equipment availability and capability
  • materials and chemicals
  • maintenance programs and supplies
  • specific needs of individual blocks
  • application rates for soil addition
  • environmental conditions
• procedures for monitoring soil management activities:
  • operator performance
  • operating conditions
  • operating results
  • material supplies
  • equipment performance
• how to identify, rectify and report environmental non-conformance
• procedures and responsibility for reporting non-conformance
• consulting with appropriate personnel:
  • presenting and justifying recommendations to senior personnel
  • instructing and supervising operators
• application rates for soil addition
• how to complete workplace records.
Assessment Conditions

Assessment of skills must take place under the following conditions:

- **physical conditions:**
  - a vineyard workplace or an environment that accurately represents workplace conditions

- **resources, equipment and materials:**
  - personal protective equipment
  - sampling and testing equipment, services and corresponding information
  - vineyard soils and growing media
  - documentation and recording requirements and procedures

- **specifications:**
  - work procedures, including advice on company practices, safe work practices, soil quality and environmental requirements
  - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to treat and prepare vine cuttings and freshly dug rootlings for sale or planting in the vineyard.

The unit applies to individuals who carry out workplace procedures in completing tasks associated with shed nursery activities.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively treated and prepared vine cuttings and freshly dug rootlings on at least two separate occasions including:

- identifying and using personal protective equipment (PPE)
- following health and safety and environmental procedures in the workplace
- conducting cuttings treatment and callusing activities according to workplace procedures
- preparing rootlings for packing and storage
- maintaining nursery environment to optimise plant health
- identifying and addressing non-conformances
- completing documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and environmental controls including selecting, fitting and using PPE
- procedures and responsibilities for reporting problems
- common features of healthy vine cuttings or rootlings:
  - thickness of original cane
  - no evidence of pests and diseases
  - number, strength and distribution of new roots
  - number, maturity and distribution of shoots
  - visually complete and robust graft union
- common features of unhealthy vine cuttings or rootlings:
  - galls on stem and roots
- no shoots or roots
- damaged or destroyed buds
- excessive disease staining or spots on canes
- immature wood
- shoots on incorrect nodes
- faulty or broken graft unions
- too few or unevenly distributed root development

- pre-callusing treatment requirements:
  - purpose and benefit of treatments
  - fungicide treatment
  - re-hydration
  - scoring
  - root promoter treatment
  - cutting just below basal bud
  - assimilation after cool storage

- storage requirements of cuttings prior to callusing:
  - preparation requirements of callusing environment
  - callusing options
  - optimum callusing environment and its effect on the vine cutting
  - common problems that occur during callusing and how they should be resolved

- preparation requirements for rootlings and procedures for sales or transfer to vineyard

- package or storage requirements and procedures for rootlings ready for sale or transfer:
  - handling cuttings or rootlings to minimise damage
  - counting, bundling and labelling cuttings as required

- factors that influence how a cutting should be graded:
  - rootling preparation
  - packing preparation
  - packaging and storage requirements

- how to prepare sand bed or callusing room including:
  - packing sand or vermiculite
  - lining boxes
  - ensuring heaters and ventilators are working correctly to required temperature

- how to plant or place cuttings in callusing environment as required:
  - feeling into ground or sand
  - packing into boxes with vermiculite
  - watering in
  - correct number of cuttings per box
  - spacing (not too tight)
  - correct way up (basal end at bottom)
  - arranging according to variety, clone and source
• labelling and mapping of beds
• adding hormone mixes
• how to monitor callusing environment to maintain optimum conditions:
  • temperature
  • relative humidity
  • moisture levels of growing medium
  • weed and pest prevention
• how to pack rootlings to comply with customer requirements and standards:
  • maintenance of rootling health
  • minimisation of vine damage
  • mode of transport
  • destination time
  • storage time and method
  • prevention of dehydration
• how to trim rootlings (top growth and roots) ready for planting
• how to grade rootlings to comply with customer requirements
• waste disposal requirements and procedures
• hygiene requirements and procedures for work area and equipment, and considerations handling different batches and varieties
• environmental issues and controls:
  • identifying, rectifying and reporting environmental non-compliance
  • collecting, sorting, grading, treating and disposing of waste as required
• reporting and recording requirements
• how to prepare and mix chemicals safely
• how to recognise problems and anomalies with vines, equipment and materials.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a shed nursery workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • shed nursery equipment, services and corresponding information
  • cuttings, rootlings, materials and resources required for shed nursery work
  • documentation and recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, workplace hygiene, plant quality and environmental requirements
  • work instructions and schedules.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FDFFS1001A Follow work procedures to maintain food safety

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to maintain food safety when carrying out work tasks. Basic food safety practices include personal hygiene and conduct, food handling, housekeeping and waste disposal related to work tasks and responsibilities where work involves routine manual processes and/or operation of simple automated equipment. |

Application of the Unit

| Application of the unit | This unit is based on and equivalent to the guideline food safety unit GFSBFSPA Follow basic food safety practices. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH1001A Follow work procedures to maintain Good Manufacturing Practice. |

Licensing/Regulatory Information
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |

Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Handle food safely | 1.1. Food handling requirements are identified  
1.2. Food handling is carried out according to the food safety program  
1.3. The workplace is maintained in a clean and tidy order to meet workplace standards  
1.4. Work is conducted in accordance with workplace environmental guidelines |
| 2. Identify, control and report food safety hazards | 2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements  
2.2. Processes, practices or conditions which are not consistent with the food safety program are identified and corrective action is taken within the level of responsibility |
| 3. Comply with personal hygiene standards | 3.1. Personal hygiene meets the requirements of the food safety program  
3.2. Health conditions and/or illness are reported as required by the food safety program  
3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program  
3.4. Movement around the workplace complies with the food safety program |
# Required Skills and Knowledge

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**
- locate and follow workplace information relating to food safety responsibilities
- monitor own work and implement any controls as required by the food safety program, such as visual inspection and checks
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- identify and correct or report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and/or dispose of out-of-specification or contaminated materials, ingredients and product, waste and recyclable material according to food safety program as required by work responsibilities
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- clean and sanitise equipment according to enterprise procedures
- record food safety information according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

**Knowledge of:**
- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work, as well as an awareness of the possible consequences of
REQUIRED SKILLS AND KNOWLEDGE

- not following these procedures
- common types and sources of contamination that occur in the work area, such as cross contamination
- control methods and procedures used in the workplace, such as reporting non-compliance and following instructions
- storage and handling requirements for ingredients, materials and product used related to work role
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where required
- purpose and importance of cleaning and sanitation procedures
- suitable standard for materials, equipment and utensils used in the work area
- waste collection, recycling and handling procedures relevant to own work responsibilities
- procedures to follow in the event of pest sighting or discovery of infestation
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- cleaning procedures where relevant
- recording requirements and responsibilities where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Evidence of ability to:  
  - identify food safety handling requirements in the workplace  
  - apply and monitor own compliance with food safety standards  
  - maintain required standards of personal hygiene |
**EVIDENCE GUIDE**

- maintain clean and tidy work area
- report non-compliances
- apply safe work practices and identify OHS hazards and controls.

**Context of and specific resources for assessment**

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as Good Manufacturing Practice (GMP)
- related work instructions and procedures
- work tasks and responsibilities
- cleaning and sanitation policies and procedures
- appropriate clothing and related apparatus
- reporting and monitoring systems.

**Method of assessment**

This unit should be assessed together with core and other units of competency relevant to the work role. Examples could be:

- FDFOP2004A Clean and sanitise equipment
- FDFOP1009A Follow work procedures to maintain quality.

Where the company operates a combined quality/food safety system, assessment of this unit should be combined with assessment of:

- FDFOP1009A Follow work procedures to maintain quality.

**Guidance information for assessment**

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work
## RANGE STATEMENT

<table>
<thead>
<tr>
<th><strong>situation, needs of the candidate, accessibility of the item, and local industry and regional contexts)</strong> may also be included.</th>
</tr>
</thead>
</table>

### Food safety program

A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures.

### Food safety information

Food safety information may be provided in:
- food safety program
- standard operating procedures (SOPs)
- specifications
- log sheets
- written or verbal instruction

### Food handling

Food handling refers to:
- food receipt and storage
- food preparation, cooking, holding, cooling, chilling and reheating
- packaging
- disposal

### Products/materials handled and stored

Products/materials handled and stored can include:
- raw materials
- ingredients
- consumables
- part-processed product
- finished product
- cleaning materials

### Breach of food safety procedures

Examples of a breach of food safety procedures could include:
- failure to check delivery temperatures of potentially hazardous chilled food
- failure to place temperature-sensitive food in temperature controlled storage conditions
## RANGE STATEMENT

| Promptly | • failure to wash hands when required  
|          | • use of cloths for unsuitable purposes |

### Responsibility for monitoring food safety

Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace.

### Food safety hazard

A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect.

### Personal hygiene requirements

Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations.

### Reporting of health conditions and illness requirements

Reporting of health conditions and illness requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations.

### Appropriate clothing and footwear

Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include:

- purpose designed overalls or uniforms
- hair-nets
- beard snoods
- gloves
- overshoes

FDFGR3002A Demonstrate knowledge of animal nutrition principles

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the animal nutrition knowledge required by stockfeed milling operators who are required to liaise with nutritionists, other technical and professional staff and customers. |

Application of the Unit

| Application of the unit | This unit applies to stockfeed operators who are required to have knowledge of animal nutrition principles and the effect of stockfeed on animal performance. This knowledge would be applied in liaison with professional and technical staff on customer requirements and in liaison directly with customers. |

Licensing/Regulatory Information
Not applicable.

</tr>
</tbody>
</table>
**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**

- access and interpret workplace information, including standard operating procedures (SOPs), labels, recipes, customer supplied information and material data safety sheets (MSDS)
- use and application of workplace terminology
- sequence information against production processes
- assess quality standards
- identify resources in the enterprise for further information, including nutritionists, other technical and professional specialist and reference materials

### Required knowledge

**Knowledge of:**

- typical nutrition requirements of animals supported by stockfeed, including horses, beef cattle, dairy cattle, pigs, sheep, poultry (both meat and egg production) and marine animals (aquaculture). Knowledge would be restricted to standard daily requirements of main food groups (proteins, carbohydrates etc), typical daily volume of feed required and type of feed (e.g. solid, liquid, plant or animal based)
- how nutritional needs of target animal may vary according to species, gender, health, pregnancy, lactation, age, season, geography, production purpose and form of production and feeding, e.g. feedlot, free range, use of stock feed for supplementary or full feeding
- factors affecting animal acceptance of stockfeed, including palatability and presentation
- range of raw materials typically used in stockfeed, including grains, molasses/liquids, proteins (vegetables and animal), additives (vitamins, minerals and medications) and fibre
- impact of operator controlled factors on stockfeed quality, including temperatures, moisture, sizing, sieving and liquid additions
- impacts of stockfeed on animal performance, including positive effects on animal performance and effects of incorrect feed on animal safety, animal performance and export contamination

---

**Evidence Guide**

**EVIDENCE GUIDE**
EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Evidence is required of animal nutrition and performance requirements that are affected by stockfeed related factors, such as ingredients, recipe, processing and presentation.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- identify and interpret customer requirements from stockfeed
- relate stockfeed type to animal nutrition and production requirements
- liaise with nutritionist and other professional and technical staff on animal nutrition requirements of stockfeed.

Context of and specific resources for assessment

The candidate is to be assessed on animal nutrition and production knowledge relevant to the stockfeed products and processes in the workplace.

Method of assessment

Evidence may include third party report, portfolio, work documentation, response to questions, and so on, that address the performance criteria and critical aspects for assessment.

Guidance information for assessment

Performance against this standard must be assessed in an industry context. For valid and reliable assessment the activity should closely replicate the work environment, circumstances and equipment likely to be encountered in a workplace.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different
**RANGE STATEMENT**

Work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Stockfeed production | Stockfeeds commercially produced by enterprises as well as customer provided formulations. The range of stockfeed can include:  
• pellets  
• liquids  
• mashes  
• blocks |
|----------------------|-------------------------------------------------------------------------------------------------|
| Target species       | Target species may include:  
• land and marine animals raised commercially for meat, skin products and milk |

FDFOP2038A Operate a grinding process

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down processes, such as grinding, rolling and breaking to reduce the particle size of grains and pulses. |

Application of the Unit

| Application of the unit | This unit has application in a food production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of grinding equipment and processes. When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

**Ability to:**
- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services to the grinding process
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- operate stockfeed control panel to transfer and grind product
- monitor and adjust the grinding process and equipment operation to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, and running adjustments to hammer mills and roller mills
- monitor supply and flow of materials to and from the grinding process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
### REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- demonstrate batch/product changeovers
- sort, collect, treat, recycle or dispose of waste
- maintain work area to meet housekeeping standards
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

**Knowledge of:**

- purpose and basic principles of the grinding process, including the characteristics of materials, which can be reduced to a suitable form for product such as stockfeed
- basic operating principles of equipment, such as main equipment components, bulk materials transfer systems and equipment, dust collection equipment, grinding equipment operating capacities and applications, and the purpose and location of magnets, sensors and related feedback instrumentation
- services required and action to take if services are not available
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- the flow of the grinding process and the effect of product output on downstream processes
- quality characteristics and uses of grinding process outputs
- effect of the grinding process on the end product
- effect of raw material characteristics on grinding process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the grinding process and related control measures
REQUIRED SKILLS AND KNOWLEDGE

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the risk of dust explosion and an understanding of the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- conduct pre-start checks on machinery used for grinding
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards
## EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>and controls</th>
</tr>
</thead>
<tbody>
<tr>
<td>safely shut down equipment</td>
</tr>
<tr>
<td>apply food safety procedures to work practices.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions
- specifications, control points and processing parameters
- production schedule/batch instructions
- information on equipment capacity and operating parameters
- grinding and related equipment and services
- stock required for the grinding process
- sampling schedules and test procedures and equipment as required
- documentation and recording requirements and procedures
- cleaning procedures, materials and equipment as required.

### Method of assessment

This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:

- FDFOP2004A Clean and sanitise equipment
- FDFOP2011A Conduct routine maintenance
- FDFOP2013A Apply sampling procedures
- FDFOP2030A Operate a process control interface
- MSL973001A Perform basic tests.

### Guidance information for assessment

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
Range Statement

<table>
<thead>
<tr>
<th>RANGE STATEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Policies and procedures</th>
<th>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Legislative requirements</td>
<td>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</td>
</tr>
<tr>
<td></td>
<td>* the Food Standard Code, including the labelling, weights and measures legislation</td>
</tr>
<tr>
<td></td>
<td>* legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity</td>
</tr>
<tr>
<td>Workplace information</td>
<td>Workplace information may include:</td>
</tr>
<tr>
<td></td>
<td>* standard operating procedures (SOPs)</td>
</tr>
<tr>
<td></td>
<td>* specifications</td>

Application

This unit describes the skills and knowledge required to participate in and provide specialist advice on defined financial products in the emissions markets.

It applies to individuals who use specialised knowledge (including the mandatory knowledge outlined in ASIC RG146 Appendix A2.11), analytical skills and systematic approaches to manage the provision of advice to clients.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the FNS Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Comply with regulatory framework unique to emissions markets</td>
<td>1.1 Identify domestic and international regulatory framework within which emissions reduction schemes are placed</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify key legislation, regulation and industry codes of practice relevant to operating within Australian emissions markets</td>
</tr>
<tr>
<td></td>
<td>1.3 Comply with relevant legal and regulatory principles when operating in emissions markets</td>
</tr>
<tr>
<td></td>
<td>1.4 Discuss regulatory risk for both voluntary and regulated</td>
</tr>
<tr>
<td>ELEMENT</td>
<td>PERFORMANCE CRITERIA</td>
</tr>
<tr>
<td>---------</td>
<td>----------------------</td>
</tr>
<tr>
<td>emissions markets, and determine possible impacts of pending regulatory or legislative change</td>
<td></td>
</tr>
</tbody>
</table>

| 2. Evaluate scope and impact of emissions markets | 2.1 Identify regulated and voluntary carbon markets and outline how they operate  
2.2 Distinguish respective supply and demand drivers for voluntary and regulated markets  
2.3 Describe price drivers for emissions products  
2.4 Differentiate participants in carbon markets and motivations for their participation  
2.5 Distinguish functions of primary and secondary emissions markets  
2.6 Discuss auction types and processes  
2.7 Describe functions, requirements and rules for registries |

| 3. Identify types of emissions products, their characteristics and liabilities | 3.1 Compare different types of emissions products and instruments traded in compliance and voluntary markets  
3.2 Identify key features of compliance market products  
3.3 Describe risks inherent within each product and their potential impact in given context  
3.4 Describe transactional processes for each product, including acquiring, transferring and surrendering  
3.5 Describe tax treatment of emissions products, including deductibility of costs where relevant |

| 4. Apply knowledge of emissions products | 4.1 Determine relevant information influencing the market  
4.2 Analyse relevant information when selecting products for emissions markets transaction  
4.3 Devise strategies for using emissions market products  
4.4 Seek advice, guidance and specialist expertise when required  
4.5 Apply knowledge of financial market transactional processes when operating in emissions markets  
4.6 Complete relevant documentation and complete any additional organisational processes |

| 5. Maintain emissions market knowledge | 5.1 Review relevant emissions trading markets sources regularly and apply any changes in daily work  
5.2 Maintain professional competence in market knowledge in accordance with codes of conduct and/or organisational |
### Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<table>
<thead>
<tr>
<th>Skill</th>
<th>Performance Criteria</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

Performance Evidence

Evidence of the ability to:

- research, analyse and update information, including regulatory changes impacting on emissions markets and operations
- provide and apply specialist knowledge relating to emissions markets to daily work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and describe types of products and their characteristics including:
  - types of emissions units, and their characteristics (encompassing carbon units, Australian carbon credit units and eligible international emissions units)
  - characteristics of emissions units including their status as personal property, and how they are typically derived from inception to the point of acquiring status as a financial product
  - risks associated with each type of emission unit, including rating, restrictions on their use, transfer and bankability for future use
  - processes for acquiring, transferring and surrendering emissions units, including compliance with the requirements of the Australian National Registry of Emissions Units
- outline the operation of regulated and voluntary carbon markets including:
  - geopolitical context of carbon markets, including the influence of political and economic factors and corporate social responsibility
  - main participants in carbon markets, and their key objectives and participation behaviours as factors influencing market activity
- emissions unit supply and demand factors and regulated price factors influencing market activity and prices
- issue of carbon units via auction, and auction types
- types of transactions in carbon markets, including transactions relating to the carbon pricing mechanism and in voluntary markets, and the function of financial markets facilitating such trading (including internationally)
- potential trading strategies and their implementation in carbon markets (e.g. hedging and investment strategies)
- risks associated with carbon markets, including liquidity, pricing, credit, operational and regulatory risks
- carbon market transaction documentation, including documentation used for different types of counterparties and transactions, their key terms and conditions, and advantages and disadvantages
- explain the regulated emissions legal environment including disclosure and compliance, covering:
  - domestic regulatory framework for the carbon pricing mechanism, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units
  - domestic regulatory framework for the Carbon Farming Initiative, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units
  - international regulatory framework for carbon trading, including the Clean Development Mechanism
  - relevant legal principles (e.g. Corporations Act, ASIC Act, Privacy Amendment (Private Sector) Act, Australian National Registry of Emissions Units Act, National Greenhouse and Energy Reporting Act, Carbon Credits (Carbon Farming Initiative) Act, Clean Energy Act)
  - the relationship between ethical and regulatory requirements (e.g. good faith, utmost good faith, full disclosure of remuneration and/or fees and any other conflicts of interest that may influence the adviser’s recommendation), and the application of these requirements in professional practice
  - relevant industry standards and codes of conduct
  - regulators’ guidelines, including ASIC Regulatory Guide (RG)146 requirements
  - dispute resolution procedures (external and internal)
- outline the taxation obligations in the emissions market including:
  - taxation treatment of emissions units and taxation issues relating to emissions units
  - deductibility of costs associated with emissions units.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial markets field of work and include access to:

- office equipment, technology, software and consumables
- emissions markets information.
Assessors must satisfy NVR/AQF assessor requirements.

</table>

Application

This unit describes the skills and knowledge to estimate and measure quantities, to convert units within the metric system and between metric and non-metric units, to calculate area and volume including compound shapes and to use Pythagoras’ theorem.

This unit applies to individuals who need numeracy skills at Australian Core Skills Framework (ACSF) level 4 to undertake a vocational training pathway or workplace tasks.

This unit is designed for integration and contextualisation with vocational units to support achievement of vocational competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- make accurate measurements
- calculate area and volume of shapes including compound shapes
- calculate sides of triangles using Pythagoras’ theorem
- make conversions between units.

Note: Where a specific volume and/or frequency is not specified, evidence must be provided at least once.

Knowledge Evidence

Evidence of the following knowledge must be demonstrated:

- units of measurement for specific workplace tasks
- names and basic properties of a range of 2D and 3D shapes
- Pythagoras’ theorem.

Assessment Conditions

Assessment texts and tasks reflect those typically found in the workplace.

Individuals can access a range of established support resources.

 Culturally appropriate processes and techniques suited to the language, literacy and numeracy capacity of individuals and the work being performed must be used.
Reasonable adjustments can be made to ensure equity in assessment for people with disabilities.

Assessors must satisfy NVR/AQTF assessor requirements, have a sound knowledge of the ACSF and have demonstrable expertise in the vocational contextualisation and assessment of the core skill - numeracy.

<td>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to assess and manually fall small trees with a low level of complexity and to complete operator maintenance.

Basic trees typical to the scope of this unit may include the following characteristics:

- lean and distribution of the crown weight does not create a complex situation to assess or fell
- small dimensions relative to local forest size distribution
- no excessive lean
- no visible damage or defect
- species that are not prone to free splitting and adverse reactions during felling
- single stem or non-complex multi-stems
- diameter of tree is less than chainsaw bar length
- grown on terrain and slope that does not add significant complexity to the operation

The unit applies to those in a forest, agricultural, local council, emergencies services and other government agency environment. With the exception of minor forest produce, it is not relevant to commercial harvesting operations.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</td>
</tr>
</tbody>
</table>

1. Prepare for felling

| 1.1 Identify and adhere to work specifications and site environmental protection measures relevant to felling basic trees in line with organisational requirements and relevant regulations |
| 1.2 Review and check job requirements with appropriate personnel |
| 1.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations |
| 1.4 Identify trees to be retained and felled |
| 1.5 Establish and maintain communication with others according to WHS requirements |

2. Prepare for felling

| 2.1 Review location and stability for conditions likely to affect felling activities |
| 2.2 Identify and report site environmental conditions to appropriate personnel |
| 2.3 Identify and control potential and existing risks and hazards |
| 2.4 Monitor and exclude location and activity of other personnel on the work site |

3. Assess tree and plan felling

| 3.1 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required |
| 3.2 Confirm that tree is safe to fell |
| 3.3 Visually assess tree for felling characteristics, defects and stresses |
| 3.4 Assess and check required falling direction and possible deviation |
| 3.5 Plan sequence of cuts to fell tree according to standard felling procedures |
| 3.6 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements |

4. Apply tree felling techniques

| 4.1 Fell individual trees using selected cutting techniques according to WHS and job requirements |
| 4.2 Adjust cutting technique in response to movement and condition of tree |
### ELEMENTS | PERFORMANCE CRITERIA
--- | ---
4.3 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable  
4.4 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen  
4.5 Identify and implement procedures for removal of trees that are hung-up  
4.6 Dispose of waste materials in line with environmental and operational requirements

| 5. Maintain equipment | 5.1 Inspect equipment on completion of trimming and cutting activities  
5.2 Identify damaged saws and cutting attachments for repair or replacement according to organisational requirements and manufacturer recommendations  
5.3 Remove, clean, adjust or replace chain and other components according to manufacturer recommendations  
5.4 Maintain tools and equipment according to WHS requirements and manufacturer recommendations |

### Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

| Numeracy skills to: | • estimate tree dimensions, including height, length, diameter and volume  
• complete routine calculations and report on size, length, diameter of felled trees. |
| Oral communication skills to: | • select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees  
• interpret hand signals with other operators to ensure safe tree felling |
| Reading skills to: | • interpret:  
• workplace health and safety and other organisational procedures  
• work orders  
• manufacturers’ maintenance recommendations. |
| Writing skills to: | • complete accurate basic records for tree felling process, equipment faults and maintenance requirements. |
Planning and organising skills to:

- identify an unsafe tree
- efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at a basic level
- comply with organisational policies and procedures relevant to felling trees manually at a basic level
- comply with applicable licensing or certification requirements relevant to felling trees manually
- effectively communicate and use safe working practices, including maintaining an awareness of activity by other personnel in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at a basic level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
• fell basic trees using a appropriate cuts safely without damage to personnel, equipment and surrounding environment
• identify trees that are hung up
• select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
• assess, plan and safely operate chainsaw equipment to manually fell trees at a basic level in forest, rural and community environments
• use tree felling techniques including scarf cutting, back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction.

**Knowledge Evidence**

A person competent in this unit must be able to demonstrate knowledge of:

• Workplace health and safety (WHS) requirements including:
  - PPE and clothing
  - safety equipment
  - first aid equipment
  - firefighting equipment
  - hazard and risk control procedures
  - fatigue management procedures
  - appropriate signage
  - elimination of hazardous materials and substances procedures
  - safe forest practices, including required actions relating to fire
  - techniques for manual handling, including shifting, lifting and carrying
• types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
• typical tree defects and how these affect tree felling activities:
  - shakes
  - insect defects
  - knots and resin pockets
  - pipe
  - drysides
• identifying trees:
  - that contain hazards and are deemed unsafe to fell
  - considered outside own skill level
  - trees where cuts made may lead to loss of control of tree in felling
• hazards and related risks and the impact on felling trees of:
  - uneven and unstable terrain
  - unsafe trees
  - fires
  - overhead and underground services
• excavations
• traffic
• structures
• hazardous materials
• insects and animals
• other personnel and machinery
• methods used to remove trees that are hung up and procedures for removal
• methods for assessing chain condition
• environmental protection measures to follow when felling trees related to:
  • native vegetation
  • soil and water
  • heritage and archeological artefacts
  • flora and fauna
  • geomorphologic features
  • landscape
  • external site pollution
  • recreational opportunities
  • regeneration opportunities
  • cleaning plant, tools and equipment
  • disposing of, recycling and reusing timber and other waste
• key features of these varying environmental conditions and their effects on basic tree felling activities:
  • general forest lean
  • ground growth
  • ground hazards and obstacles
  • ground slope
  • gullies
  • presence and density of seed and habitat trees
  • water courses
  • wet and adverse weather conditions
  • wind speed and direction
• the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  • warning signs
  • chainsaw and components
  • PPE and clothing
  • first aid equipment
  • maintenance requirements
  • support tools.
Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment that contains small trees with a low level of falling complexity
- PPE and clothing including:
  - safety helmet
  - safety gloves
  - protective footwear
  - eye protection
  - hearing protection
  - high visibility clothing
  - leg protection (trousers or chaps)
- materials and equipment including:
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers’ instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - relevant state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to maintain engine or electrically operated hand-held chainsaws. It includes sharpening chains and completing routine and frequently required service requirements as well as periodic servicing. Work is completed in a variety of work settings including a forest environment, agricultural, workshop, arboretum and horticultural settings.

The unit applies to chainsaw operators.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement. This is the first release of this unit in the new standards format.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete these routine and frequently required service requirements on chainsaws in line with manufacturer's instructions:
  - removing, checking and cleaning air filter for damage and penetration of foreign material
  - cleaning saw body, air intake vents and cooling fins
  - cleaning chain brake
  - inspecting chain and guide bar
  - checking screws and nuts for tightness
  - checking safety devices
  - filling fuel tanks and chain oil tanks
- complete these types of periodic service requirements on chainsaws in line with manufacturer's instructions:
  - replacing drive sprocket
  - cleaning or replacing and setting spark plug
  - checking and replacing fuel filter
  - checking chain brake, oil system, flywheel assembly, anti-vibration system, muffler and spark arrestor
  - inspecting and replacing starter cord and starter spring
• matching pitches and gauges of cutting components
• dressing and cleaning cutter bar
• cleaning fly wheel
• removing and cleaning exhaust and fire screen
• complete these activities to check and sharpen chain saw chains in line with manufacturer's instructions:
  • inspecting and adjusting chain
  • inspecting and replacing chain that is worn, damaged or incorrectly sharpened
  • sharpening chain types and setting of depth gauges.

Knowledge Evidence
A person competent in this unit must be able to demonstrate knowledge of:
• types, purpose, features and operation of chainsaws for which repairs are completed
• features and names of different parts of chainsaws
• purpose, features and operation of tools and equipment used to repair and maintain chainsaws
• specifications and types of bars, chains and sprockets
• differences between frequent and periodic chainsaw maintenance requirements
• techniques for:
  • removing chains and other chainsaw components
  • assessing chain condition
  • sharpening chains to specified requirements
  • reassembling chainsaw components
• hazards for maintaining chainsaws and methods to minimise associated risks:
  • loud noise and exhaust fumes
  • mechanical vibration
  • handling hazardous substances
  • cuts and hot surfaces
  • rotating parts
• organisational procedures specific to repairing and maintaining chainsaws:
  • workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  • communication reporting lines
  • recording and reporting repairs, maintenance activities and equipment faults
• environmental protection practices for repairing and maintaining chainsaws:
  • cleaning plant, tools and equipment
  • disposing of, recycling and reusing materials
  • disposing of hazardous substances.
Assessment Conditions

The following resources must be made available:
- engine or electrically operated hand-held chainsaws
- tools and equipment used to repair and maintain chainsaws
- consumable chainsaw parts, oil and fuel
- personal protective equipment suitable for repairing and maintaining chainsaws including:
  - Safety boots
  - Safety helmet
  - Cut resistant leg protection
  - First aid kit
  - Hearing protection
  - High visibility clothing
  - Eye protection
  - Apron
  - Chain mesh gloves
- manufacturers’ instructions and recommendations for repair and maintenance of chainsaws
- template documents for recording repairs, maintenance activities and equipment faults.
- organisational procedures for repairing and maintaining chainsaws.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:
- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</table>

Application

This unit describes the outcomes required to trim and cut felled trees with a chainsaw and to complete operator maintenance. It applies to situations where the production of timber is not the primary focus of the activity.

The unit applies to a forestry worker, chainsaw operator, forest harvester, harvesting technician and arboriculture worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

</tr>
</tbody>
</table>
## Elements and cutting

- **Select appropriate personal protective and other equipment and check for operational effectiveness**
- **Plan trimming and cutting activities in line with work order and environmental conditions**

## 2. Visually assess felled trees

- **Assess tree location and stability for conditions likely to affect safety of trimming and cutting activities**
- **Visually assess tree for defects and identify stresses within tree**
- **Mark trees too dangerous to cut safely and refer to appropriate personnel**

## 3. Plan cutting

- **Move or stabilise tree for safe cutting in line with site procedures**
- **Select cutting pattern to optimise time and manageable removal of sections**
- **Identify options for utilisation of product**
- **Plan cutting sequence to maintain control of cut sections and minimise cutting problems**
- **Select cutting positions considering tree stresses**
- **Clear debris from work area to allow safe access and prevent saw damage and personal injury**

## 4. Use chainsaw to trim and cut trees

- **Monitor location and movement of other personnel and modify work to ensure safety**
- **Establish and maintain communication to ensure safety**
- **Secure tree section on each side of planned cut; evaluate and control potential movement**
- **Operate chainsaw to cut tree and limbs and adjust cutting technique in response to movement and condition of tree and limbs**
- **Prepare cut sections for removal from the site**

## 5. Complete equipment maintenance

- **Follow organisational safety procedures to lock out equipment**
- **Check chain for bluntness or damage**
- **Remove, sharpen, adjust and replace chain and other components in line with manufacturer recommendations**
- **Record and report trimming and cutting records, equipment faults**

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit.

There must be evidence that, on at least one occasion, the individual has:

- safely and efficiently used a chainsaw to complete these activities:
  - trim and cut hardwood or softwood trees
  - delimb trees
  - trim branches
  - trim burls and other small growths
- used the following cutting techniques:
  - bridging cuts
  - swinging cuts
  - side bind cuts
  - boring
  - wedge cut
  - ripping cuts
- trimmed and cut trees in varied weather conditions
- completed the following maintenance activities on a chainsaw:
  - sharpening
  - refuelling
  - inspection, identification and replacement of bar, chain, drive sprockets
  - bar oil checks and top up
• air filter, check, clean and replacement
• cleaning of saw body, air intake vents and cooling fans
• fitting spare chain and tension chain.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

• environmental protection measures including:
  • action to limit the impact of noise, wind speed and direction, fallen trees, ground slope, ground hazards and obstacles, general forest lean
  • action to limit the impact to ground growth, canopy, density of trees
  • action to limit the impact on flora, fauna and habitat
  • soil and water protection
• cleaning plant, tools and equipment
• disposing of, recycling and reusing timber and other waste
• key features of these varying site conditions and effects on tree cutting and trimming activities:
  • ground growth
  • ground hazards and obstacles
  • ground slope
• key features of these varying weather conditions and effects on tree cutting and trimming activities:
  • dry, wet and adverse weather conditions
  • low and moderate wind speed and direction
• typical tree defects and how they affect tree cutting activities:
  • splits
  • falling damage
  • fire damage
  • insect infestation
  • pipe
  • shake
  • twist
  • knots and resin pockets
  • the presence of foreign bodies such as stakes and nails
• typical tree stresses and how they affect tree cutting activities:
  • tension (fibres being stretched)
  • compression (fibres being squashed)
  • neutral fibres
• range of chainsaw cutting techniques:
  • bridging cuts
- swinging cuts
- side bind cuts
- delimming
- boring
- wedge cut
- ripping cuts
- cutting patterns used to optimise time and recovery of product from trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- purpose, features, operation and basic non-specialist repair and maintenance of chainsaws
- methods for assessing chain condition
- organisational procedures specific to tree trimming and cutting activities:
  - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  - communication reporting lines
  - recording and reporting tree cutting outcomes, equipment faults and maintenance requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
  - chainsaws
  - chainsaw fuel and oil containers
  - support tools appropriate for work tasks (hammer, wedges, logging tape, cant hook and/or breaking bar)
  - mobile plant and equipment appropriate for work tasks (wood chipper and/or loaders)
  - maintenance tools and equipment for chainsaws
  - personal protective equipment suitable for cutting trees and maintaining chainsaws
- specifications:
  - manufacturer’s instructions for use and maintenance of equipment
  - work order with specific instructions for tree cutting activities
  - template reports for recording tree cutting outcomes, equipment faults and maintenance requirements
  - organisational procedures for tree trimming and cutting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures for navigating in a remote or trackless area
- select, interpret, and use maps and other written and diagrammatic information for navigation
- use maps, compass and navigation aids to plan routes and navigate in remote or trackless area which must be either:
  - standard magnetic compass using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
  - global positioning system (GPS)
  - cadastral maps (maps that show the boundaries and ownership of land parcels)
  - topographic maps
  - general maps
- plan and conduct an efficient navigation, effectively bypassing obstacles within designated timeframes
- maintain navigation tools and equipment
- establish and maintain effective communication with appropriate personnel as required
- record navigation activities.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for navigating in a remote or trackless area
• environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition on completion of activity
• organisational and site standards, requirements, policies and procedures for navigating in remote or trackless areas
• factors that may affect navigation, including:
  • types of terrain and gradient
  • weather conditions
  • obstacles
  • distance
  • estimated travelling time
  • availability of resources, including water, rest stops, camp sites
  • access and exit routes
• use and features of various maps, images and charts including:
  • cadastral and topographic maps
  • charts
  • guide books
  • photographs and other digital imagery
  • sketches
  • diagrams
• representation of topographic features on maps and plans, including:
  • grid lines and numbers
  • contour lines
  • magnetic variation
  • scale
  • map legend
  • local features
  • markers and beacons
  • water depth
• common scales and reference information used on maps and plans
• features and uses of environmental navigation aids:
  • survey markers
  • track markers and beacons
  • signs
  • arrows
  • natural landmarks and reference points
• purpose, features and operation of navigation equipment, and procedures for their safe use and maintenance, including
  • global positioning system (GPS) device
  • magnetic compass, including adjustment for local magnetic variation
  • locator beacons
Assessment Requirements for FWPCOT3202 Navigate in remote or trackless areas

- personal protective equipment and clothing
- techniques for estimating distance travelled within a particular activity context
- established communication modes, methods and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- site to navigate
- navigation equipment
- work order, workplace requirements and site standards for navigating in remote or trackless areas.
- communication devices.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Application

This unit of competency describes the outcomes required to trim high branches reachable with a power driven pole saw and to promote tree growth by trimming and felling excess branches.

Power driven pole saw in this unit refers to professional standard pole-mounted chain saws that are typically fuel types, but may be battery powered, and generally telescopic.

It applies to those who operate a pole saw in a forest environment and includes equipment maintenance.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- undertake trimming with a pole saw to correctly and safely demonstrate competency in the following:
- assess trees and site conditions to work safely
- correct use of safety attire and protective equipment
- conduct pre-operational checks of pole saw
- trim trees at safe height and angle in line with manufacturer recommendations and organisational safe working practices
- select/adjust trimming sequence and cutting techniques in response to various tree characteristics and site conditions
- conduct operator maintenance.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements and site standards for carrying out pole saw operations
- environmental risks and hazards associated with trimming trees with a pole saw
- characteristics of trees and timber defects
- Branch Bark Ridge (BBR) and Bark Branch Collar (BBC)
- appropriate trimming sequence and cutting techniques
- manufacturer recommendations and organisational safe working practices for operating a pole saw at safe height and angle limits
- methods for assessing condition of pole saw chain
- established communication channels and protocols
• problem identification and resolution strategies, and common fault finding techniques
• procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:
• a professional standard fuel or battery powered pole-mounted chain saw with telescopic extension
• work order, workplace requirements and site standards for conducting pole saw operations
• relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</table>

Application

This unit of competency describes the outcomes required to safely operate a four wheel drive (4x4) vehicle on unsealed roads.

The unit applies to operating a 4x4 vehicle in a variety of work settings with different terrains.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow applicable workplace safety, environmental and regulatory requirements and codes of practice relevant to operating a 4x4 vehicle
- follow organisational policies and procedures relevant to operating a 4x4 vehicle, including:
  - own work role and responsibilities
  - procedural manuals
  - quality and continuous improvement
  - WHS, emergency and evacuation procedures
  - recording and reporting requirements
  - equipment use, maintenance and storage requirements
  - environmental management requirements
- communicate and work safely with others in rough terrain when operating a 4x4 vehicle
- perform pre-start checks of vehicle and equipment suitable to different terrains by checking loads and tyre pressure, selecting navigation aids and advising passengers of safety precautions
- operate safely, a 4x4 vehicle, on unsealed road conditions and different terrain types, including negotiating steep slopes, by identifying hazards and assessing risks
- use appropriate range, gear, speed, driving and braking techniques safely when operating a 4x4 vehicle on a steep slope
• demonstrate safe use of a jack to support a 4x4 vehicle while changing a tyre under relevant road terrains and conditions within the operating environment
• park and shut down 4x4 vehicle in line with manufacturer specifications and organisational requirements
• perform and document operational maintenance as permitted by vehicle operator handbook.

Knowledge Evidence
A person competent in this unit must be able to demonstrate knowledge of:
• four wheel drive operational information
• structural differences between conventional two wheel drive and a four wheel drive including:
  • recovery hooks and mounting features
  • purpose and use of front wheel hubs
  • factors affecting tyre size, fitment, rating and pressure
• applicable regulations, standards, codes of practice and established safe practices relevant to the operating a 4x4 vehicle
• road rules, regulations, permit and licence requirements of the relevant state or territory
• environmental protection requirements including the safe disposal of waste material
• prestart checks for 4 x 4 vehicle on:
  • fuel, either diesel, gas or petrol
  • water
  • oil
  • brake and transmission fluid levels
  • battery water levels and electrolyte checks
  • tyres
  • belts
  • leads
  • hydraulic lines and connections
  • air cleaners
  • brakes
  • off-road safety equipment
  • traction devices
• Types of communication equipment including:
  • personal location beacon (PLB)
  • flares
  • markers
  • phone
  • radio
  • V-Sheet
- Safe operating conditions for a 4X4 vehicle
  - Interpreting weather conditions to determine suitability for driving
  - Determining food, water, PPE (sunglasses, high-visibility vest, etc.) and clothing requirements for journey
  - Selecting routes to minimise damage to the environment
  - On and off-road conditions
  - Traffic pattern and density
  - Visibility
  - Loading of four-wheel drive, including techniques to reduce overloading
- Types of environmental risks and hazards associated with operating a 4x4 vehicle on unsealed roads including:
  - Rocks and other unexpected obstacles
  - Damage to vehicle
  - Tidal influences
  - Fire in vehicle
  - Faulty brakes
  - Leaking fuel
  - Faulty steering mechanism on vehicle
  - Animals and objects in vehicle path
  - Crocodiles and snakes in some areas
  - Windy or foggy sections of terrain
  - Steep slopes
  - Side slopes
  - Slippery surfaces
  - Landslides
  - Overhead tree limbs
  - Black ice
  - Towing trailers
  - Other vehicles
  - Fallen trees, limbs and logs
  - Icy terrain
  - Flooded terrain
  - Oil on road
  - Parked vehicles on road
  - Pedestrians on or near the road
  - Poor visibility
- 4x4 driving techniques in different terrains including:
  - Smooth
  - Rough
  - Uneven
Assessment Requirements for F WPCOT3259 Operate a four wheel drive on unsealed roads

September 2020

- slippery
- wet
- boggy
- sandy
- steep or hilly
- rock
- icy
- snow
- mud, including:
  - brown clay
  - black silt
  - salt pan mud
  - red
- hard ground
- water
- operational knowledge of a 4x4 vehicle, including controls, instruments, indicators and their use
- tyre management principles for checking, changing and maintenance
- workplace communication channels and protocols
- techniques for travelling in convoy
- problem identification and resolution strategies, and common fault-finding techniques relevant to safely operating a four wheel drive vehicle
- types of tools and equipment relating to a 4x4 vehicle, and procedures for their safe use and maintenance
- maintenance equipment including spares and fluids
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace offering conditions including different terrain on unsealed roads and steep slopes
- materials and equipment relevant to undertaking work applicable to this unit, including manual or automatic four-wheel drive or all-wheel drive
- specifications and work instructions relevant to workplace requirements and the safe operation of four wheel drive vehicles
- personal protective equipment required for operating a four wheel drive on unsealed roads
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<th>Release</th>
<th>Comment</th>
</tr>
</thead>
</table>
| 1       | Replaces equivalent unit FPICOT6204A Use carbon accounting to estimate emissions in the workplace which was first released with FP111 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including ‘Required Skills and Knowledge, Evidence Guide and Range Statement’.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- For a given forest and wood products industry organisation within any sector:
  - identify mandatory and voluntary obligations for carbon accounting
  - define organisational objectives for participating in carbon accounting processes
  - define boundaries for the carbon inventory
  - select a methodology for carbon accounting calculations for emissions and offsets
- Complete two different carbon accounting calculations for two different time periods in line with the selected methodology and include the following factors:
  - direct greenhouse gas (GHG) emissions
  - indirect GHG emissions
  - on-site and off-site emissions (geographical)
  - upstream emissions
  - downstream emissions
  - full cycle accounting
  - non-CO2 emissions; soil disturbance, fertilisation, biomass combustion

In forest applications also consider the following:

- above ground biomass
- below ground biomass
- dead organic matter - wood, litter
- soil organic matter
Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Methods to access, locate and select applicable objectives and key content in relevant international and national conventions, protocols, standards and guidance frameworks, including the following key references:
  - Kyoto Protocol
  - ISO 14000 essentials:
    - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
  - Greenhouse Gas Protocol Corporate Standard
  - Copenhagen Agreement
  - National Greenhouse Accounts (NGA) Factors Workbook
  - Key drivers for carbon accounting
  - Basic theory of the greenhouse effect and its impacts
  - Basic principles of the carbon cycle and influences
  - Carbon accounting terminology, frameworks and methods used to calculate carbon emissions and offsets
  - Types of emissions and offset sources included in common calculations:
    - Direct GHG emissions
    - Indirect GHG emissions
    - On-site and off-site emissions (geographical)
    - Upstream emissions
    - Downstream emissions
    - Full cycle accounting
    - Non-CO2 emissions: soil disturbance, fertilisation, biomass combustion
  - Sources of secondary data for carbon accounting
    - national statistical agencies
    - research institutes
    - information from sectoral experts
  - Organisational and operational boundaries for the carbon inventory
  - The full range of organisational emission sources and methods used to select key emission factors for calculations.

Assessment Conditions

The following resources must be made available:

- Computer, keyboard and spreadsheet software to prepare and maintain calculations
- Documents, spreadsheets and commonly used pro formas for calculating carbon emissions
Assessment Requirements for FWPCO T6204 Use carbon accounting to estimate emissions

Date this document was generated: 3 September 2020

- Access to international and national conventions, protocols, standards and guidance frameworks including the following key references:
  - Kyoto Protocol
  - ISO 14000 essentials:
    - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
  - Greenhouse Gas Protocol Corporate Standard
  - Copenhagen Agreement
  - National Greenhouse Accounts (NGA) Factors Workbook

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:
- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Application

This unit of competency describes the outcomes required to plan for and safely cut vegetation using a professional standard blade type brushcutter. Work is completed in a variety of work settings including forest environments, farms, nurseries and local council environments.

The unit applies to forestry worker, plantation forest officer, arboriculture worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- assess, plan and safely complete brushcutting jobs in line with work order prescribing areas and types of vegetation to be cut
- on completion of each of the above jobs:
  - dispose of cut vegetation in line with environmental protection practices
  - complete operator maintenance operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
  - compete basic records for equipment faults and maintenance requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- typical workplace hazards associated with operating brushcutters and methods of minimising risks:
  - ground growth
  - ground slope
  - ground hazards
  - noise
  - weather
  - kickback
• flying objects
• safe working distances from other people present
• purpose, features and safe operation of brushcutters
• the correct ergonomic position in which to conduct brushcutter operations, including using a safety harness and handle adjustments
• methods for assessing blade condition, removing and replacing
• operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
• different types of vegetation and the appropriate brushcutting methods
• environmental protection practices for disposing of cut vegetation:
  • recycling vegetation where appropriate
  • sending vegetation to landfill only where it cannot be recycled
  • redirecting vegetation for energy recovery.
• organisational procedures specific to brushcutting operations:
• workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
• communication reporting lines
  • recording and reporting equipment faults and maintenance requirements.

Assessment Conditions
The following resources must be made available:
• brushcutters
• maintenance tools and equipment for removing and replacing blades
• consumable fuel, brushcutter blades and other components
• personal protective equipment suitable for operating brushcutters
• manufacturers’ instructions for use and maintenance of equipment
• work order with specific instructions for brushcutting operations
• template documents for recording equipment faults and maintenance requirements
• relevant personnel for the purposes of communicating information
• organisational procedures for operating brushcutters.
Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</tbody>
</table>

Application

This unit of competency describes the outcomes required to plan and monitor the implementation of seed collection or sowing programs. The unit includes collection of native and non-native species.

The unit applies to those who manage seed collection in settings such as: forest environments, farms, agriculture, nurseries and local councils.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

</tbody>
</table>
1. **Identify seed collection opportunities and determine a suitable area for seed collection.**

1.2 Identify seed collection opportunities and determine a suitable area for seed collection.

1.3 Select seed collection methods and determine the quantity, cost and impacts on provenances and species.

1.4 Identify the required approvals and seek and obtain from relevant authorities.

1.5 Determine measurable performance indicators, specifications and targets.

1.6 Seed collection plan, costs and performance indicators are clearly documented and communicated to appropriate personnel.

2. **Implement and monitor seed collection**

2.1 Coordinate and schedule resources required for seed collection.

2.2 Establish and maintain communication with others to ensure safety.

2.3 Implement the seed collection plan.

2.4 Monitor seed collection activities to ensure compliance requirements are adhered to.

2.5 Adjust seed collection activities to meet site conditions and communicate to appropriate personnel.

3. **Review seed collection**

3.1 Assess and evaluate data from seed collection activity to confirm techniques, methodologies and costs are in line with plan.

3.2 Identify issues and impediments to seed collection activities and program costs.

3.3 Prepare a cost benefit analysis and make recommendations to improve future seed collecting activity.

3.4 Record and report seed collection activity to appropriate personnel.

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
  - follow legal and regulatory requirements, and codes of practice for managing seed collection
  - follow organisational policies and procedures for managing seed collection
  - develop a plan for seed collection which includes measurable performance indicators, specifications and targets
  - coordinate and schedule resources, and manage the work of others to achieve specific outcomes
  - monitor seed collection operations, ensuring that activity follows quality standards
  - document results from seed collection activities and prepare a report for relevant personnel.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for managing seed collection
- organisational and site standards, policies and procedures for managing seed collection
- environmental risks and hazards of seed collection
- seed collection methods including:
  - climbing
• removal of branches with rifle
• elevated platform vehicles
• collecting after falling or felling
• ladders
• shaking
• biological signs that indicate that the seed crop is ready to be collected
• procedures to extract and handle seed from collected material, including handling procedures of the seed crop after picking
• treatment and documentation requirements of extracted seed
• characteristics of seed including:
  • provenance
  • potential growth characteristics
  • forest types
  • optimum time to collect
  • physiology and biology
  • dormancy
  • species
• process for approvals to undertake seed collection
• established communication channels and protocols
• procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:
• seed collection site
• tools and equipment required to collect seed
• relevant personnel for the purposes of communicating information
• organisational requirements and standards for managing seed collection.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- apply safe and efficient techniques to identify, extract, clean and store seed in line with species requirements, work order and organisational guidelines
- operate seed extraction units and equipment including
  - kilns operated by gas, solar energy, oil or electricity
  - sieves of various sizes
  - air-drying racks and trays
  - conveyor belt
- clean, maintain and calibrate seed extraction units and equipment
- record seed species information and extraction results including
  - species name
  - weight
  - place or origin
  - container identifier.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:
• regulations, standards, codes of practice and established safe practices for extracting seed
• organisational and site standards, policies and procedures for extracting seed
• environmental protection requirements for extracting seed
• the cleaning maintenance and calibration of plant, tools and equipment
• hazards associated with seed extraction, processing and storage
• seed species, including native and non-native
• seed extraction processes
• identification of seed species from capsules
• storage procedures and requirements for different seed species
• procedures for recording and reporting workplace information.

Assessment Conditions
The following resources must be made available:
• manual or automated seed extraction equipment
• material with seed to be extracted
• relevant personnel for the purposes of communicating information
• documents, spreadsheets and commonly used proforma documents
• work order, workplace requirements and site standards for extracting seed.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<td>Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FP11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

Persons competent in this unit should be able to effectively fell most trees except very large trees, and/or those with significant defects and/or characteristics that cause excessive complexity.

It applies to trees that have a diameter greater than the bar length of the chainsaw.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution, which can be assessed and readily adapted to falling direction with the use of wedges and/or control with hinge-wood
- various dimensions relative to local forest size distribution
- limited visible damage or defect
- species prone to free splitting and adverse reactions during felling
- single or multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at an intermediate level
- comply with organisational policies and procedures relevant to felling trees manually at an intermediate level
- comply with applicable licensing and certification requirements relevant to felling trees at an intermediate level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an intermediate level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell intermediate trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up
• select, prepare and maintain chainsaw equipment including recognising faults, problems
  and malfunctions
• assess, plan and safely operate chainsaw equipment to manually fell trees at an
  intermediate level in forest, rural and community environments
• use tree felling techniques including scarf cutting, back cutting to provide hinge-wood
  and the use of wedges to assist in controlling falling direction

Knowledge Evidence
A person competent in this unit must be able to demonstrate knowledge of:

• Workplace health and safety (WHS) requirements including:
  • PPE and clothing
  • safety equipment
  • first aid equipment
  • firefighting equipment
  • hazard and risk control procedures
  • fatigue management procedures
  • appropriate signage
  • elimination of hazardous materials and substances procedures
  • safe forest practices, including required actions relating to fire
  • techniques for manual handling, including shifting, lifting and carrying
  • types and purposes of cuts to fell trees, including scarf cutting and back cutting to
    provide hinge-wood and maintain control of tree
• typical tree defects and how these affect tree felling activities:
  • shakes
  • insect defects
  • knots and resin pockets
  • pipe
  • drysides
• Identifying trees:
  • that contain hazards and are deemed unsafe to fell
  • considered outside own skill level
  • trees where cuts made may lead to loss of control of tree in felling
• hazards and related risks and the impact on felling trees of:
  • uneven and unstable terrain
  • unsafe trees
  • fires
  • overhead and underground services
  • excavations
• traffic
• structures
• hazardous materials
• insects and animals
• other personnel and machinery
• methods used to remove trees that are hung up and procedures for removal
• methods for assessing chain condition
• environmental protection measures to follow when felling trees related to:
  • native vegetation
  • soil and water
  • heritage and archeological artefacts
  • flora and fauna
  • geomorphologic features
  • landscape
  • external site pollution
  • recreational opportunities
  • regeneration opportunities
  • cleaning plant, tools and equipment
  • disposing of, recycling and reusing timber and other waste
• key features of these varying environmental conditions and their effects on intermediate tree felling activities:
  • general forest lean
  • ground growth
  • ground hazards and obstacles
  • ground slope
  • gullies
  • presence and density of seed and habitat trees
  • water courses
  • wet and adverse weather conditions
  • wind speed and direction
• the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  • warning signs
  • chainsaw and components
  • PPE and clothing
  • first aid equipment
  • maintenance requirements
  • support tools
  •
Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
  - Safety helmet
  - Safety gloves
  - Protective footwear
  - Eye protection
  - Hearing protection
  - High visibility clothing
  - Leg protection (trousers or chaps)
- materials and equipment including:
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers’ instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - applicable state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPIFGM3213 Fall trees manually (advanced), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.

Persons competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution that adds significant complexity yet can be assessed and adapted to site requirements
- larger dimensions relative to local forest size distribution
- substantial lean
- damage or defect that requires complex felling techniques
- multi-legged, hollow butts, culls and stags
- species prone to free splitting and adverse reactions during felling
- single or complex multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add significant complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

## Unit Sector

Forest Growing and Management

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements describe the essential outcomes.</th>
<th>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</th>
</tr>
</thead>
</table>
| **1. Prepare for felling** | 1.1 Identify and comply with applicable work health and safety (WHS), environmental, legislative and organisational requirements relevant to felling trees  
1.2 Identify and adhere to site environmental protection measures according to relevant legislation and regulations  
1.3 Review job requirements and check with appropriate personnel  
1.4 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations  
1.5 Sharpen and adjust chainsaw or change components according to manufacturer recommendations  
1.6 Identify and control potential and existing risks and hazards in the work area  
1.7 Identify trees to be felled as being safe to fell  
1.8 Establish and maintain communication with others according to OHS requirements |
| **2. Visually assess site conditions and surroundings** | 2.1 Review terrain and slope to determine if they add significant complexity to the operation  
2.2 Assess general factors affecting felling requirements and detect and control specific forest or site risks and hazards  
2.3 Assess and progressively plan tree-felling sequence for individual trees |
| **3. Assess tree and plan felling** | 3.1 Locate and visually assess tree for felling characteristics  
3.2 Confirm tree is safe to fell  
3.3 Assess and check required falling direction and possible deviation  
3.4 Plan sequence of cuts to fell tree according to standard felling procedures  
3.5 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from |
| 4. Apply tree-felling techniques | 4.1 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements  
4.2 Fell individual trees using planned techniques according to site requirements, at a safe distance from other personnel in the work area  
4.3 Adjust cutting technique in response to movement and condition of tree  
4.4 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable  
4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen  
4.6 Identify and implement procedures for removal of trees that are hung-up  
4.7 Dispose of waste materials in line with environmental and operational requirements  
4.8 Detect, rectify and report blunt or damaged saw chain according to workplace procedures  
4.9 Monitor chainsaw for operational effectiveness and record and report faults, malfunctions and problems according to workplace procedures |

**Foundation Skills**

*This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.*

| Numeracy skills to: | • measure and record tree height, length and diameter  
• estimate, measure and compare height, size and distance relevant to tree felling  
• calculate product mass of individual trees and determine fall zone |
| Oral communication skills to: | • select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees  
• interpret hand signals with other operators to ensure safe tree felling |
| Reading skills to: | • interpret:  
• workplace health and safety, industry standards and
| Regulations for felling trees and other relevant tree felling procedures  
| - work orders  
| - manufacturers maintenance recommendations  

**Writing skills to:**

- complete forms to record WHS considerations for felling trees  
- report equipment faults and request maintenance of equipment.  
- complete log book requirements

**Planning and organising skills to:**

- identify an unsafe tree.  
- efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.

**Problem solving skills to:**

- plan and apply the hierarchy of risk control  
- review and identify work requirements  
- recognise own limitations in conditions and trees for felling  
- identify problems and equipment faults and demonstrate appropriate response procedures

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPIFGM3213 Fall trees manually (advanced), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including OHS, environmental and organisational policies and procedures relevant to felling trees at an advanced level
- comply with applicable licensing or certification requirements relevant to felling trees manually at an advanced level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an advanced level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell advanced trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment
• identify trees that are hung up
• select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
• assess, plan and safely operate chainsaw equipment to manually fell trees at an advanced level in forest, rural and community environments
• use tree felling techniques including scarf cutting, back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction

Knowledge Evidence
A person competent in this unit must be able to demonstrate knowledge of:

• workplace health and safety (WHS) requirements including:
  • PPE and clothing
  • safety equipment
  • first aid equipment
  • firefighting equipment
  • hazard and risk control procedures
  • fatigue management procedures
  • appropriate signage
  • elimination of hazardous materials and substances procedures
  • safe forest practices, including required actions relating to fire
  • techniques for manual handling, including shifting, lifting and carrying
• types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
• typical tree defects and how these affect tree felling activities:
  • shakes
  • insect defects
  • knots and resin pockets
  • pipe
  • drysides
• Identifying trees:
  • that contain hazards and are deemed unsafe to fell
  • considered outside own skill level
  • trees where cuts made may lead to loss of control of tree in felling
• hazards and related risks and the impact on felling trees of:
  • uneven and unstable terrain
  • unsafe trees
  • fires
  • overhead and underground services
  • excavations
  • traffic
Assessment Requirements for FWPFGM3213 Fall trees manually (advanced)

Date this document was generated: 3 September 2020

- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
  - native vegetation
  - soil and water
  - heritage and archeological artefacts
  - flora and fauna
  - geomorphologic features
  - landscape
  - external site pollution
  - recreational opportunities
  - regeneration opportunities
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on advanced tree felling activities:
  - general forest lean
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - gullies
  - presence and density of seed and habitat trees
  - water courses
  - wet and adverse weather conditions
  - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  - warning signs
  - chainsaw and components
  - PPE and clothing
  - first aid equipment
  - maintenance requirements
  - support tools
Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
  - safety helmet
  - safety gloves
  - protective footwear
  - eye protection
  - hearing protection
  - high visibility clothing
  - leg protection (trousers or chaps)
- materials and equipment including;
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers’ instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - applicable state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Design two measurement programs for two individual sites to calculate current and expected biomass and carbon stocks of:
  - trees above and below ground
  - other vegetation
  - litter layer
  - soil.
- Complete survey and sampling activities for one of those sites using the measurement plan designed.
- Record and analyse all data collected for the site, estimate current carbon stocks, select a growth model and predict and document biomass growth and carbon stocks.
- Complete a report on survey and sampling activities recommending improvements for future processes.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Requirements for obtaining permits and licences for site sampling activities and the authority from whom approval must be obtained.
- Characteristics and growth habits of local vegetation.
- Soil characteristics and topography of local area.
Assessment Requirements for FWPGM5219 Undertake carbon stock sampling of forests and plantations

- Purpose, features and application of measurement programs used to calculate current and expected biomass and carbon stocks of the following:
  - trees above and below ground
  - other vegetation
  - litter layer
  - soil
  - wood products.
- Data collection and sampling methods for estimating carbon stocks.
- Statistical analysis techniques applicable to biomass and carbon assessments.
- Methods used to predict biomass growth and carbon stock growth, specifically the use of growth models.
- Purpose, features and operation of survey and assessment equipment and tools, including:
  - geographic information systems
  - interpretation of topographic maps and aerial photography
- Organisational procedures specific to carbon stock sampling, including:
  - workplace health and safety with particular emphasis on risk assessment and control
  - communication reporting lines
  - recording and reporting sampling data.

Assessment Conditions

The following resources must be made available:

- topographic maps
- aerial photography
- geographic information systems
- documents and commonly used proformas for recording sampling data
- organisational procedures for carbon stock sampling.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Develop a comprehensive written plan to manage sustainability tree inventory for a given site.
- Incorporate these inclusions in the plan:
  - risk management strategy to manage and minimise risks
  - quality assurance practices for collecting, documenting and verifying data
  - required data collection and administrative tools
  - required human resources and responsibilities
  - data recording methodology
  - recording and reporting procedures.
- For a specified period, analyse data and record and report on the following types of outcomes:
  - established growth rates
  - established volumes
  - forecasted outputs
  - forecasted sustainability
  - monitored sustainability
  - preserved forest sustainability.
- Evaluate the effectiveness of the tree inventory plan and complete a report including recommendations for improving future plans and tree management approach.
Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Role of wood or waste products in generating renewable energy through biomass.
- Behavioural characteristics of a range of tree species.
- Silvicultural practices associated with management objectives.
- Key sustainability indicators for tree management.
- Key content and application of mensuration theory.
- Risks involved managing a sustainable tree inventory and methods used to minimise impacts, including:
  - biological
  - pests and diseases
  - weather and climate change
  - economic risk
  - erosion
  - fire
  - market failure
  - natural disaster
  - sabotage
  - water
  - structural failure.
- External influences and how they impact on managing a sustainable tree inventory, including:
  - international and Australian forestry and environmental standards
  - state, territory and local laws
  - advisory standards and codes of practice
  - land tenure and access
  - neighbouring tenure and access
  - habitat
  - cultural and heritage sites
  - agriforestry arrangements
  - fire management
  - data availability
  - human resource skills and availability.
- Purpose, features and application of inventory management tools, including:
  - measuring or diameter tapes
  - dataloggers and laptops
  - log sheets
  - compass
  - clinometer
  - height sticks
- prisms
- mobile GPS
- maps
- survey and title data
- survey equipment
- gantt charts
- flow charts.
- Key features and benefits of different recording methodologies, including:
  - dataloggers
  - log sheets
  - manual or electronic data transfer
  - analytical techniques and formulae
  - radio, UV, laser advanced technology
  - digital dataloggers and laptop computers
  - desk or field surveys
  - testing and calibration records.
- Organisational procedures specific to managing sustainable tree inventory:
  - communication reporting lines
  - database management and document control.

**Assessment Conditions**

The following resources must be made available:

- Computers, keyboards, printers and software used to document plans and reports.
- Administrative tools and equipment for managing sustainable tree inventory:
  - filing systems
  - field templates
  - operational manual
  - land access information
  - gantt charts
  - flow charts.
- Documents and commonly used pro formas used to document risk management strategies and tree inventory plans.
- Organisational procedures for managing sustainable tree inventory.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

**Assessor requirements**
Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Application

This unit of competency describes the outcomes required to operate a mobile chipping or mulching unit to chip or mulch timber refuse such as branches and other timber waste left after felling operations. Work is completed in a forest or forest farm setting.

The unit applies to those who operate a mobile chipping or mulching unit in a forest environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

</table>

**Foundation Skills**

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

**Numeracy skills to:**

- identify quantities of required material within work orders
- read basic numerical machine settings and choose according to chip size
- complete routine production records involving quantities tallied against orders.

**Oral communication skills to:**

- ask questions and actively listen to clarify contents of work orders.
Reading skills to:

- interpret workplace health and safety and other organisational procedures
- work orders
- manufacturers’ instructions and maintenance recommendations.

Writing skills to:

- complete accurate basic records for production outcomes and equipment faults.

Planning and organising skills to:

- efficiently and logically sequence the stages of preparation and processing activities using work order to guide activities.

<td>1</td>
<td>Replaces equivalent unit FPIHAR2206B Operate a mobile chipper/mulcher, which was first released with FP111 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete chipping and mulching jobs in line with individual work orders which prescribe different quantities of timber refuse and different chip sizes
- complete operator maintenance, including fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement to manufacturer recommendations and site procedures.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest and forest farm settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- types of timber refuse suitable and unsuitable for chipping and mulching
- purpose, features and operation of mobile chipping and mulching units
- capacity of chippers and mulchers to cope with differing sizes and diameters of branch
- feed rates at which waste is fed into chippers and mulchers to optimise output without damaging or blocking machinery
- methods for checking cutting blade condition
• operator maintenance procedures including for fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement
• common hazards associated with chipping and mulching operations and methods to minimise associated risks
• organisational procedures specific to chipping and mulching timber refuse:
  • workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  • communication reporting lines
  • recording and reporting production outcomes and equipment faults.

Assessment Conditions
The following resources must be made available:
• mobile chipping and mulching units feeding into a truck or other form of transportation:
  • truck mounted
  • trailer mounted
• tools and consumables for operator maintenance
• tools and equipment for removing and replacing cutters
• consumable cutters
• personal protective equipment suitable for chipping and mulching timber refuse
• timber refuse for processing
• manufacturers’:
  • instructions for equipment use
  • recommendations for operator maintenance
• work order with specific instructions for chipping or mulching timber refuse
• template documents for recording production outcomes and equipment faults
• relevant personnel for the purposes of communicating information
• organisational procedures for chipping and mulching timber refuse.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence
•

Significant changes to elements and performance criteria.  
Revised evidence requirements, including volume and frequency of assessment. |

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.
Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
--- | ---
Elements define the essential outcomes. | Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation | 1.1 Recognise an emergency situation  
1.2 Identify, assess and minimise immediate hazards to health and safety of self and others  
1.3 Assess the casualty and recognise the need for CPR  
1.4 Seek assistance from emergency response services

2. Perform CPR procedures | 2.1 Perform cardiopulmonary resuscitation in accordance with ARC guidelines  
2.2 Display respectful behaviour towards casualty  
2.3 Operate automated external defibrillator (AED) according to manufacturer’s instructions

3. Communicate details of the incident | 3.1 Accurately convey incident details to emergency response services  
3.2 Report details of incident to workplace supervisor as appropriate  
3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Unit Mapping Information

No equivalent unit.

Significant changes to elements and performance criteria.  
Revised evidence requirements, including volume and frequency of assessment. |

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:  
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
• performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
• responded appropriately in the event of regurgitation or vomiting
• managed the unconscious breathing casualty
• followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
• followed the prompts of an automated external defibrillator (AED)
• Responded to at least one simulated first aid scenario contextualised to the candidate’s workplace/community setting, including:
  • demonstrated safe manual handling techniques
  • provided an accurate verbal or written report of the incident

Knowledge Evidence
The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:
• State/Territory regulations, first aid codes of practice and workplace procedures including:
  • ARC Guidelines relevant to the provision of CPR
  • safe work practices to minimise risks and potential hazards
  • infection control principles and procedures, including use of standard precautions
  • requirements for currency of skill and knowledge
• Legal, workplace and community considerations, including:
  • awareness of potential need for stress-management techniques and available support following an emergency situation
  • duty of care requirements
  • respectful behaviour towards a casualty
  • own skills and limitations
  • consent
  • privacy and confidentiality requirements
  • importance of debriefing
• Considerations when providing CPR, including:
  • airway obstruction due to body position
  • appropriate duration and cessation of CPR
  • appropriate use of an AED
  • chain of survival
  • standard precautions
• Basic anatomy and physiology relating to:
  • how to recognise a person is not breathing normally
  • chest
• response/consciousness
• upper airway and effect of positional change

Assessment Conditions
Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment resources must include:
• adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
• AED training device
• workplace injury, trauma and/or illness record, or other appropriate workplace incident report form

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor Requirements
Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
• performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
• responded appropriately in the event of regurgitation or vomiting
• managed the unconscious breathing casualty
• followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
• followed the prompts of an Automated External Defibrillator (AED)
• Responded to at least one simulated first aid scenario contextualised to the candidate’s workplace/community setting, including:
  • demonstrated safe manual handling techniques
  • provided an accurate verbal or written report of the incident
• Applied first aid procedures for the following:
  • allergic reaction
  • anaphylaxis
  • bleeding control
  • choking and airway obstruction
  • respiratory distress, including asthma
  • shock

**Knowledge Evidence**

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

• State/Territory regulations, first aid codes of practice and workplace procedures including:
  • ARC Guidelines relevant to provision of CPR and first aid
  • safe work practices to minimise risks and potential hazards
  • Infection control principles and procedures, including use of standard precautions
  • requirements for currency of skill and knowledge
• legal, workplace and community considerations, including:
  • awareness of potential need for stress-management techniques and available support following an emergency situation
  • duty of care requirements
  • respectful behaviour towards a casualty
  • own skills and limitations
  • consent
  • privacy and confidentiality requirements
  • importance of debriefing
• considerations when providing basic emergency life support, including:
  • airway obstruction due to body position
- appropriate duration and cessation of CPR
- appropriate use of an AED
- chain of survival
- standard precautions
- principles and procedures for first aid management of the following scenarios:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - cardiac conditions, including chest pain
  - chocking and airway obstruction
  - respiratory distress, including asthma
  - shock
  - stroke
- basic anatomy and physiology relating to:
  - considerations in provision of first aid for specified conditions
  - chest
  - how to recognise a person is not breathing normally
  - response/consciousness
  - upper airway and effect of positional change

**Assessment Conditions**

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing
Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

**Assessor requirements**

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
• performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
• performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
• responded appropriately in the event of regurgitation or vomiting
• managed the unconscious breathing casualty
• followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
• followed the prompts of an Automated External Defibrillator (AED)
• Responded to at least two simulated first aid scenarios contextualised to the candidate’s workplace/community setting, including:
  • conducted a visual and verbal assessment of the casualty
  • demonstrated safe manual handling techniques
  • post-incident debrief and evaluation
  • provided an accurate verbal or written report of the incident
• Applied first aid procedures for the following:
  • allergic reaction
  • anaphylaxis
  • bleeding control
  • choking and airway obstruction
  • envenomation, using pressure immobilisation
  • fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  • respiratory distress, including asthma
  • shock

Knowledge Evidence
The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:
• State/Territory regulations, first aid codes of practice and workplace procedures including:
  • ARC Guidelines relevant to provision of CPR and first aid
  • safe work practices to minimise risks and potential hazards
  • infection control principles and procedures, including use of standard precautions
  • requirements for currency of skill and knowledge
• legal, workplace and community considerations including:
  • awareness of potential need for stress-management techniques and available support following an emergency situation
  • duty of care requirements
- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
  - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reaction
  - anaphylaxis
  - basic care of a wound
  - bleeding control
  - burns
  - cardiac conditions, including chest pain
  - choking and airway obstruction
  - crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  - eye and ear injuries
  - fractures
  - febrile convulsions
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma
  - seizures, including epilepsy
  - shock
  - soft tissue injuries, including strains and sprains
  - stroke
Assessment Requirements for HLTAID003 Provide first aid

- unconsciousness
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment resources must include:
- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

New evidence requirements for assessment, including use of contextualised remote scenarios. |

Application

This unit describes the skills and knowledge required to provide first aid response and emergency life support to a casualty in a remote and/or isolated situation.

The unit applies to workers who may be required to prepare for and provide a first aid response in locations beyond the reach of timely medical assistance.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*
## Elements and Performance Criteria

</tbody>
</table>
### ELEMENT

*Elements define the essential outcomes.*

### PERFORMANCE CRITERIA

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

3.4 Assist in the evacuation of the casualty by following directions given by emergency response services as required

3.5 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

### Foundation Skills

*The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.*

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

* assessor requirements statement  
* foundation skills lead in statement  
* licensing statement  
* modification history to reflect 2012 standards  
Equivalent outcome. |
| Release 4 | Updated mapping information. Changes to assessment requirements.  
Equivalent outcome. |
| Release 3 | Updated mapping information. Equivalent outcome. |
| Release 2 | Minor changes to formatting to improve readability. |
| Release 1 | This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages.  
Significant changes to elements and performance criteria, changes to scope of unit.  
New evidence requirements for assessment, including use of contextualised remote scenarios. |

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
• performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
• responded appropriately in the event of regurgitation or vomiting
• managed the unconscious breathing casualty
• followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
• followed the prompts of an Automated External Defibrillator (AED)

• Responded to at least three simulated first aid scenarios contextualised to the candidate’s remote and/or isolated situation:
  • demonstrated safe manual handling techniques
  • conducted a visual and verbal secondary survey assessment of the casualty
  • assessed vital signs, including respirations, pulse and temperature
  • post-incident debrief and evaluation
  • provided an accurate verbal and written report of the incident

• Applied first aid response in a remote situation for the following:
  • allergic reaction
  • anaphylaxis
  • basic care of a wound
  • bleeding control
  • choking and airway obstruction
  • envenomation, using pressure immobilisation
  • environmental impacts, including hypothermia, hyperthermia, dehydration and heat stroke
  • fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  • head, neck and spinal injuries, using immobilisation principles
  • respiratory distress, including asthma
  • shock

Knowledge Evidence
The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

• State/Territory regulations, first aid codes of practice and workplace procedures including:
  • ARC guidelines relevant to provision of CPR and first aid
  • safe work practices to minimise risks and potential hazards
  • infection control principles and procedures, including use of standard precautions
  • requirements for currency of skill and knowledge
  • legal, workplace and community considerations including:
• awareness of potential need for stress-management techniques and available support following an emergency situation
• duty of care requirements
• respectful behaviour towards a casualty
• own skills and limitations
• consent
• privacy and confidentiality requirements
• importance of debriefing
• considerations when providing first aid, including:
  • airway obstruction due to body position
  • appropriate duration and cessation of CPR
  • appropriate use of an AED
  • chain of survival
  • standard precautions
  • how to conduct a visual and verbal secondary survey assessment
  • assessment and interpretation of vital signs, including respirations, temperature and pulse
• principles and procedures for first aid management of the following scenarios, contextualised to the candidate’s remote and/or isolated situation:
  • abdominal injuries
  • allergic reaction
  • anaphylaxis
  • basic care of a wound
  • bleeding control
  • burns
  • cardiac conditions, including chest pain
  • choking and airway obstruction
  • crush injuries
  • diabetes
  • dislocations
  • drowning
  • envenomation
  • environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  • eye and ear injuries
  • febrile convulsions
  • fractures
  • head, neck and spinal injuries
  • minor skin injuries
  • needle stick injuries
• poisoning and toxic substances
• respiratory distress, including asthma
• seizures, including epilepsy
• shock
• soft tissue injuries, including sprains and strains
• stroke
• unconsciousness
• remote considerations in the provision of first aid, including:
  • typical hazards and strategies for preparing supplies to address contingencies
  • management options relating to transporting casualty, including aero-medical evacuation
  • how to identify and prepare areas for safe evacuation, including aero-medical evacuation
  • how and when to access emergency response services
  • communication systems, equipment and methods available in remote situations
  • priorities of management in first aid when dealing with life-threatening conditions
  • specific considerations contextualised to alpine, desert, marine, rural/remote settings and tropical environments
• basic anatomy and physiology relating to:
  • how to recognise a person is not breathing normally
  • chest
  • response/consciousness
  • upper airway and effect of positional change
  • considerations in provision of first aid for specified conditions, including specific considerations for remote settings

**Assessment Conditions**

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

• Assessment resources must include:
  • adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
  • adrenaline auto-injector training device
  • AED training device
  • placebo bronchodilator and spacer device
  • roller bandages
  • thermometer
  • triangular bandages
  • workplace First Aid kit suitable for remote locations
Assessment Requirements for HLT AID005 Provide first aid in remote situations

- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements
Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

</tr>
</tbody>
</table>

Application

This unit describes the skills and knowledge required for workers to participate in safe work practices to ensure their own health and safety, and that of others.

The unit applies to all workers who require knowledge of workplace health and safety (WHS) to carry out their own work, either under direct supervision or with some individual responsibility.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
Elements define the essential outcomes. Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Follow safe work practices
   - 1.1 Follow workplace policies and procedures for safe work practices
   - 1.2 Identify existing and potential hazards in the workplace, report them to designated persons, and record them according to workplace procedures
   - 1.3 Follow workplace emergency procedures

2. Implement safe work practices
   - 2.1 Identify and implement WHS procedures and work instructions
   - 2.2 Identify and report incidents and injuries to designated persons according to workplace procedures
   - 2.3 Take actions to maintain safe housekeeping practices in own work area

3. Contribute to safe work practices in the workplace
   - 3.1 Raise WHS issues with designated persons according to organisational procedures
   - 3.2 Participate in workplace safety meetings, inspections and consultative activities
   - 3.3 Contribute to the development and implementation of safe workplace policies and procedures in own work area

4. Reflect on own safe work practices
   - 4.1 Identify ways to maintain currency of safe work practices in regards to workplace systems, equipment and processes in own work area
   - 4.2 Reflect on own levels of stress and fatigue, and report to designated persons according to workplace procedures

Foundation Skills
The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- **Reading** – in order to accurately read and interpret workplace safety policies and
procedures including safety signs, dangerous goods classifications and safety instructions

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

Unit Mapping Information

No equivalent unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- contributed to a WHS meeting or inspection in workplace
- conducted a workplace risk assessment and recorded the results
- consistently applied workplace safety procedures in the day-to-day work activities required by the job role
- followed workplace procedures for reporting hazards
- followed workplace procedures for a simulated emergency situation.
Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
  - state/territory WHS authorities
  - rights and responsibilities of employers and workers, including duty of care
  - hazardous manual tasks
  - infection control
- safety signs and their meanings, including signs for:
  - dangerous goods classifications
  - emergency equipment
  - personal protective equipment (PPE)
  - specific hazards such as sharps, radiation
- hazard identification, including:
  - definition of a hazard
  - common workplace hazards relevant to the industry setting
  - workplace procedures for hazard identification
- workplace emergency procedures
- workplace policies and procedures for WHS

Assessment Conditions

Skills must be demonstrated:

- in the workplace

OR

- in an environment that provides realistic in-depth industry validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment must ensure use of:

- current workplace policies and procedures for WHS
- PPE relevant to the workplace and job role of the worker

In addition, assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

Evidence of the ability to:

- develop acceptance criteria for a project
- document acceptance criteria according to organisational standards
- present the document to stakeholders and obtain approval.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business area
- outline project planning methodologies and tools
- identify and apply quality processes
- interpret system development plans
- identify technical tools and their use relating to task list when formulating metrics and milestones
- explain the theory and purpose of metrics.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- client requirements
- technical specifications
• organisational and process goals
• critical business requirements
• predefined high-level acceptance criteria
• project deliverables
• future organisational business processes test plan
• project budget timeframe.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to manage spare parts in all areas of telecommunications and includes maintenance of a database, stock control and dispatch.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements</th>
<th>Performance Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
| 1. Manage receipt and dispatch of spare parts | 1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work  

1.2 Identify hazards and make worksite safe according to relevant safety legislation and company work practices, and use personal |
protective equipment
1.3 Unload, unpack and store incoming spare parts using appropriate methods and enterprise procedures, and check off delivered items on documentation
1.4 Package, label and relocate outgoing spare parts ready for dispatch using enterprise procedures
1.5 Update parts database to reflect current spare parts movements and holdings, following each dispatch or delivery, and complete any other administrative task required by enterprise

2. Store spare parts
2.1 Label spare parts using appropriate identification scheme and place in predefined storage locations
2.2 Observe antistatic precautions when handling equipment susceptible to damage by electrostatic discharge
2.3 Display, maintain and update material safety data sheets (MSDS) on site

3. Manage stock flow
3.1 Action spare parts requests by checking database for availability and location, and organise the dispatch
3.2 Monitor levels of spare parts stock by examining database reports against enterprise usage and replenishing stock when necessary
3.3 Investigate and keep records of alternative suppliers of spare parts to minimise impact of availability and cost issues with regular suppliers
3.4 Monitor spare parts with limited shelf life, and dispose of and replace when necessary
3.5 Audit spare parts holdings for ready supply of items to minimise disruptions to job completions
3.6 Update database from appropriate documentation each time a store’s transaction occurs to maintain validity of data

## Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Performance Criteria</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>1.1, 1.5, 2.2, 3.1, 3.3, 3.4</td>
<td>• Recognises and interprets written and visual text to determine key information, and specific requirements and responsibilities</td>
</tr>
</tbody>
</table>
| Writing | 1.3-1.5, 2.1, 2.3, 3.1, 3.3 | • Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations  
• Uses expected writing conventions and forms |
| Oral Communication | 3.1 | • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning |
| Numeracy | 1.3-1.5, 3.2-3.5 | • Uses mathematical skills to estimate materials and evaluate and predict resource requirements |
| Navigate the world of work | 1.1-1.4, 2.1-2.3 | • Takes personal responsibility for adherence to legal and regulatory requirements relevant to spare parts work context, and draws attention to any issues that may affect self or others  
• Recognises and follows explicit and implicit company and health and safety protocols, and meets expectations associated with own role |
| Get the work done | All | • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, when managing receipt and dispatch, storage and stock flow  
• Uses systematic, analytical processes when monitoring and auditing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria  
• Initiates standard problem solving procedures when identifying hazards within immediate context  
• Seeks to improve a future response through investigating alternative suppliers  
• Uses database systems and tools to access, organise, analyse and display information relevant to role |

Performance Evidence

Evidence of the ability to:

- safely apply spare parts management procedures
- efficiently arrange for storage and ordering of spare parts
- research alternative parts replacements
- accurately update spare parts management database.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and database operation
- describe handling of:
  - chemicals and dangerous materials
  - sensitive electronic equipment using antistatic procedures and safeguards
- outline modern storage practices and identification of parts location
- outline work health and safety (WHS) procedures
- identify service level agreements
- describe stocktake and audit of spare parts holdings
- identify telecommunications components and assemblies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:
• a site where work may be conducted
• current equipment
• a database for relevant regulations
• organisational procedures
• equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

LGACOM404B Establish cooperative arrangements with other organisations

Modification History
LGACOM404B Release 1: Primary release.

Unit Descriptor
The unit covers identifying, developing, implementing and monitoring cooperative arrangements with other organisations in an effort to improve services provided to the community. The unit is appropriate for staff working in areas of council where community and business development are a major focus.

Application of the Unit
This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be
consistent with the Evidence Guide.

Elements and Performance Criteria

| 1. Identify opportunities for cooperative arrangements | 1.1. Opportunities for *cooperative arrangements* are identified through consultation with *other organisations*.  
1.2. Opportunities identified are analysed to ensure they will provide an increased level, or at least an equivalent level, of service to the community. |
| 2. Develop and implement cooperative policies and projects with other organisations | 2.1. Cooperative policies are agreed upon by all participating organisations and disseminated to all involved staff.  
2.2. Project objectives and *performance indicators* are determined and plans are drawn up to facilitate the smooth implementation and conduct of collaborative projects.  
2.3. Implementation methods are organised and agreed actions and work programs are allocated to relevant staff.  
2.4. Communications strategies are put in place to enable efficient and coherent implementation and conduct.  
2.5. Resources are identified and accessed in the most cost-effective manner.  
2.6. Communities are informed of the changes and benefits in service delivery due to the new collaborative arrangements. |
| 3. Monitor and evaluate the effectiveness of the collaborative venture | 3.1. Project progress is evaluated with reference to planned time lines and performance criteria at predetermined intervals to assess effectiveness for council and community.  
3.2. Project is reviewed and project plan and resource allocations are revised when necessary.  
3.3. Information gathered from project evaluation is used to provide input to continuous improvement and planning processes.  
3.4. Problems or contingencies that arise are managed and resolved professionally and promptly in conjunction with relevant personnel. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- negotiation with a range of personnel and other agencies
- research and evaluation, including cost-benefit analysis
- written and verbal communication with public and council personnel affected by implementation
- strategic and business planning
- planning and organisational
- time management
- ability to work as part of a team particularly with people from diverse backgrounds
- problem solving
- using appropriate software and technology

Required Knowledge

- relevant council policies and procedures
- sustainable practices
- council operations
- council goals, objectives and strategies
- other organisations potentially interested in cooperative arrangements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- establish cooperative arrangements with other organisations on behalf of council that create measurable benefits to the organisation, incorporate effective evaluation mechanisms and support corporate direction and strategies
- communicate cooperative arrangements and their benefit effectively throughout the organisation.
Context of assessment

Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

Evidence required for demonstration of consistent performance

Evidence will need to be gathered over time across a range of variables depending on council work flow and planning cycle as long as the critical aspects of evidence can be demonstrated.

Resource implications

Access to organisations with whom cooperative arrangements are to be developed or to simulated case studies.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Cooperative arrangements** may include:

- joint funding for projects
- shared promotional resources
- joint ventures to build or construct community facilities
- sponsorship arrangements

**Other organisations** may include:

- other councils within the region, state or nation
- regional organisations of councils
- state or commonwealth agencies
- private or business enterprises
- community groups

**Performance indicators** may include:

- increases in revenue
- customer satisfaction reports
- increases in service usage
• increased tourism to the region or municipality

</table>
| **1. Devise consultation strategies** | 1.1. A range of consultation strategies is identified and assessed for suitability.  
1.2. *Interested and affected parties* are identified.  
1.3. *Resources* required to conduct consultation are assessed.  
1.4. *Consultation strategies* are chosen that *enable and encourage relevant groups* or individuals to be involved.  
1.5. *Legislative* and council requirements are reviewed to ensure strategies meet all criteria. |
| **2. Conduct consultations** | 2.1. *Information* is prepared that is clear, accurate and appropriate to the needs of all parties.  
2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved.  
2.3. *Information is presented* to affected parties at an appropriate time and place.  
2.4. *Access and equity* requirements are implemented in the consultations.  
2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame.  
2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed. |
| **3. Record, analyse and report on results** | 3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed.  
3.2. Appropriate suggestions for improvement are incorporated into design parameters.  
3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised.  
3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern.  
3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur. |
ELEMENT

PERFORMANCE CRITERIA

3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to devise and conduct community consultations where:

- consultation ensures council’s image or reputation is maintained or enhanced
- community consultation produces valid and useful information
Context of assessment
Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.

Method of assessment
The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance
Evidence should be gathered over a period of time in a range of actual or simulated management environments.

Resource implications
Access to a range of real or simulated consultation processes including:

- public and community meetings and forums
- surveys and door knocks
- appropriate communications equipment and aids such as overhead projectors and computer-based presentations

Range Statement
The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Interested and affected parties** may include:

- community groups
- other authorities
- individuals
- emergency authorities (police, fire and ambulance)
- private sector business interests
- special interest groups
- experts

**Resources** may include:

- human
Consultation strategies may include:
- financial
- locations
- public meetings
- phone-ins
- questionnaires
- informal gatherings
- door knocks
- council meetings

Enabling and encouraging relevant groups to be involved may include:
- physical accessibility
- diverse language needs
- culture, including Indigenous, youth and non-English speaking background
- physical environment
- number of people

Legislation may include:
- local government
- anti-discrimination
- planning

Information may include:
- written and oral records
- anecdotes
- reports
- instructions
- directions from supervisor or management
- interviews
- formal and informal team meetings

Access and equity may include:
- subject matter
- manner in which consultations are conducted
- physical accessibility
- community profile

Presentation of information may include:
- graphics
- models
- computer animations
- video displays
- overhead transparencies
- handouts
- display plans
- interpreter service

| 1. Assess potential conflict situations | 1.1 Signs, stages and possible *causes of conflict* are identified and anticipated.  
1.2 Appropriate responses are evaluated against organisational procedures and *legal requirements*.  
1.3 Additional information is identified and sought as required to assist in the assessment of the conflict situation. |
| 2. Implement conflict resolution strategies | 2.1 Factors and issues relevant to the conflict are clarified.  
2.2 Strategies for dealing with conflict situations are developed in accordance with organisational procedures.  
2.3 Assistance is sought as required and is appropriate to the person's skill and responsibility.  
2.4 Options for resolution of the conflict are identified which allow for constructive responses to be negotiated.  
2.5 *Negotiation techniques* are used to maintain positive interaction and to divert and minimise aggressive behaviour.  
2.6 Effective *communication techniques* are used to ensure understanding of information received or relayed.  
2.7 *Social and cultural differences* are taken into account in the negotiation style and approach taken.  
2.8 Mutual agreement to the situation and its resolution is confirmed and follow up action is agreed upon by all parties.  
2.9 Systems, records and reporting procedures are maintained according to organisational procedures. |
| 3. Evaluate response and outcome | 3.1 Effectiveness of response is evaluated and reviewed according to information available and organisational practices.  
3.2 Accurate and constructive observations of incidents are provided in reviewing and debriefing the situation.  
3.3 Records and reports are provided and maintained according to organisational requirements.  
3.4 Effects of stress are recognised and addressed through stress management techniques and debriefing. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- problem-solving strategies to know how to deal with unexpected questions or attitudes
- interpersonal skills to develop rapport with other parties in the conflict
- capacity to evaluate own response to situations of conflict and manage own emotions
- communication skills to effectively come to an agreed outcome
- negotiation skills to negotiate difficult situations and resolve problems as they arise
- flexibility to adjust quickly to differing situations
- empathy to develop rapport and understanding with and for the other party
- dealing with difficult people and situations

Required Knowledge

- legislative and/or other legal provisions
- conflict resolution strategies
- organisational policies and procedures relating to managing conflict through negotiation
- recording and reporting procedures
- principles of cooperative team work
- different social and cultural practices

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- interpret accurately and comply with legal and procedural requirements
- identify typical symptoms and causes of conflict in the workplace and ways of resolving conflict situations
- select conflict resolution strategies that are most effective for the objective
- use negotiation techniques to defuse and resolve conflict
- use communication techniques to give clear and accurate
information in a form that is preferred and understood by the receiver

**Context of assessment**

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

**Relationship to other units**

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

**Method of assessment**

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

**Evidence required for demonstration of consistent performance**

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of formal and informal situations, involving different types of problems and clients.

**Resource implications**

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

**Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.
Causes of conflict may include:
- refusal to follow directions and guidance
- dissatisfaction of client with council service or information
- disagreement between members of the public
- disagreement between members of the organisation
- ejection of persons
- persons suffering from emotional distress
- bystander behaviour

Legal requirements may include:
- relevant state and commonwealth legislation
- decisions of relevant tribunals
- roles and responsibilities
- terms and conditions of employment

Negotiation techniques may include:
- strategic questioning and listening to gather information and direct the focus of the people involved
- positive, confident and cooperative language
- control of tone of voice and body language
- using language and concepts appropriate to the people involved
- using clear presentations of options and consequences
- demonstrating flexibility and willingness to compromise
- summarising positions and agreements made to confirm understanding between the negotiating parties

Communication techniques may include:
- verbal and non-verbal language
- two-way interaction
- constructive feedback
- active listening
- reflection and summarising

Social and cultural differences may include:
- verbal and non-verbal language
- beliefs and values
- religious or spiritual observances
- relationships and family structures
- social conventions
- codes of conduct

Unit Sector(s)

Common
LGAGCM710A Manage contracts and contractors

Modification History
LGAGCM710A Release 2: Layout adjusted.
LGAGCM710A Release 1: Primary release.

Unit Descriptor
This unit covers the skills and knowledge required of senior managers responsible for overseeing the development of tenders and the subsequent management of contracts and contractors.

Effective and efficient management of external contracts is now a major component of many managers' roles. The need for high levels of accountability and transparency while managing commercial relationships is addressed in this unit.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit
This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations that provide the boundaries for the operation of councils is essential. The unique nature of councils, as a tier of government, directed by elected members and reflecting the needs of local communities must be appropriately reflected.

This unit may also be contextualised to other public or private sectors as long as the essential outcomes of the unit are not changed.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
**Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Scope council process and service requirements | 1.1 *Council procedures and protocols for management of tenders and contracts* are identified, considered and used.  
1.2 Council's strategic and operational plans are reviewed and considered to determine scope and nature of project or service to be contracted.  
1.3 Size and scope of *project or service to be contracted* are determined and documented.  
1.4 Process to manage tender and contract is documented and appropriate sign-off is secured in line with standard operating procedures. |
| 2. Ensure tender process is planned and managed effectively | 2.1 Anticipated expense levels of tender are identified and justified.  
2.2 Tender objectives, including quality, quantity, location, time frame requirements and price limits are clearly defined and documented.  
2.3 Processes for letting of tender are put in place in line with standard operating procedures.  
2.4 *Selection processes* are developed that comply with legislative requirements, council policies and procedures.  
2.5 Choice of contractor is justifiable, agreed upon and recorded according to council policies.  
2.6 Contract is negotiated and agreement reached to maximise benefits for council and following appropriate legal scrutiny and advice.  
2.7 Contract is drafted and signed according to legislative and organisational requirements and project objectives, reflecting agreement outcomes. |
| 3. Manage contract to achieve desired outcomes | 3.1 Management plan is developed to ensure effective management of contract.  
3.2 Performance of contractual obligations is managed in accordance with agreed contract and management plan. |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
3.3 Performance by contractor is reviewed using agreed processes, with any variances analysed and agreed changes implemented to ensure project objectives are met within legal framework of contract.
3.4 *Reports of project progress* and outcomes are prepared and presented in accordance with management plan and standard organisational procedures.
3.5 Contracts are concluded in line with management plan and contractual requirements.

4. Manage relationships with contractors
4.1 Code of conduct is used and communicated to contractors to ensure relationship between parties is managed ethically, transparently and in accordance with legal requirements and council policies and procedures.
4.2 Regular and formalised communication processes with contractors are established and rigorously applied.
4.3 Sound business relationships with contractors are established and maintained to ensure effective communication and the early identification of potential service delivery problems.
4.4 Contractual disputes that arise are managed in accordance with contractual requirements and using established mediation mechanisms.

5. Plan for improved contract management and service delivery processes
5.1 Effectiveness and benefits of contracting process and related service delivery are analysed.
5.2 Opportunities for process and service delivery improvements are identified and communicated to appropriate senior personnel within council.

**Required Skills and Knowledge**

This describes the essential skills and knowledge and their level, required for this unit

**Required Skills**

- tender management
- high-level negotiation
- literacy and numeracy skills to manage contracts
- project management
- high-level written and oral communication
- analysis of organisational systems, processes and activities
- developing a range of possible options in solving problems
- time management

**Required Knowledge**

- legal and council requirements for letting and managing tenders
- council code of conduct for the management of relationships with contractors

**Evidence Guide**

**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. The candidate will demonstrate the capacity to manage contracts and contractors effectively, ethically and leading to the attainment of stated council objectives.

**Critical aspects of evidence to be considered**

The demonstrated ability to:

- manage contracts and contractors within council

**Context of assessment**

Assessment of performance requirements in this unit should be undertaken with the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the range of variables applicable to the workplace environment.

**Method of assessment**

The following assessment methods are suggested:

- preparation of a major workplace project report/portfolio (that may incorporate assessment of related units) as a key form of assessment that enables candidates to integrate the learning and assessment project into their regular work responsibilities, which enables integrated and holistic assessment of the complex skills and knowledge addressed in this unit
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies
- written and oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioner
- completion of self-paced learning materials, including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance

Evidence should be gathered over a period of time in a range of actual or simulated management environments.

Resource implications

Access to a workplace or simulated case study that provides the following resources:

- relevant council documents, such as strategic and operational plans
- relevant local government legislation and regulations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Council procedures and protocols for the management of tenders and contracts** may include:

- codes of conduct for transparent and accountable management of contracts and contractors
- tendering procedures
- reporting requirements

**Contracts** may cover provision of:

- short-term, one-off services
- lengthy and complex relationships with external service providers offering services to the community

**Project or service to be contracted** may relate to any sphere of council operation but typically may include:

- capital works
- parks and gardens maintenance
- provision of community care services, such as family care, disability services or child care
- provision of waste and recycling service

**Tender selection processes** may include:

- advertising period
- use of selective tenders, tender panels and 'open' tenders for contracts of differing values
- establishment of weighted selection criteria
- establishment of a selection panel with complementary expertise

**Reports of project progress** may include:

- compliance with required timelines
- indicators of service levels and quality
- actual cost against budgeted cost
- customer satisfaction

**Required Skills**

- oral and written communication
- research
- evaluation
- decision making
- negotiation
- consultation
- media liaison

**Required Knowledge**

- cultural context
- location and resources
- legal requirements
- organizational processes
- equity and diversity principles
- council policies and procedures
- state or territory and commonwealth government departments and agencies
- Indigenous land use agreements

Evidence Guide

**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also
Critical aspects of evidence to be considered

The demonstrated ability to:

- conduct appropriate research to identify traditional owners
- identify key stakeholders and establish rapport and credibility to facilitate the negotiation process
- conduct negotiations with traditional owners to reach agreement
- register an Indigenous land use agreement.

Context of assessment

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

Evidence required for demonstration of consistent performance

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

Resource implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.
Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

**Protocols for consultation** may include:
- use of interpreters
- talking to the appropriate people
- respecting cultural differences
- respecting family, kinship and clan relationships
- allowing sufficient time for the parties to receive, absorb and respond to information

**Appropriate research** may include:
- register searches
- consultation with the relevant native title representative body
- NNTT decisions and records
- state or territory government policies

**Other stakeholders** may include:
- other landholders
- lessees
- state or territory government agencies
- commonwealth departments and agencies
- other Aboriginal or Torres Strait Islander people with historical connections to the area

**Culturally appropriate protocols** may include:
- representation and mandate
- methods of communication in face to face meetings
- time frames
- meeting times
- venues
- use of interpreters
- levels of confidentiality

**Expert advice** may include:
- solicitors and barristers
- native title representative bodies
- native title holders/applicants
- NNTT
- the federal court
- state or territory governments
- other professionals with relevant expertise, including anthropologists, archaeologists, valuers, planners and mediators

**Appropriate agencies** may include:
- federal court
- NNTT
- federal attorney-general's department
- native title representative bodies
Arrangements may include:

- state or territory governments
- formal or registered agreements
- informal agreements

Unit Sector(s)

Land Management
LGALAND504A Undertake effective consultation with Indigenous people on matters of cultural heritage

Modification History

LGALAND504A Release 2: Layout adjusted.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1 Conduct background research** | 1.1 Previous Indigenous cultural heritage and resource surveys are identified and reviewed.  
1.2 Relevant commonwealth and state or territory legislation and peak local government associations and council policies are researched and documented.  
1.3 Extent to which cultural heritage of other non-Indigenous cultures should be acknowledged is identified and taken into consideration. |
| **2 Identify the correct Indigenous people that are authorised to speak for a place** | 2.1 *Indigenous people with rights and interests in a place* are identified through the traditional owners, especially those authorised to speak for a place.  
2.2 Both men and women with rights and interests in an area or place are identified because men and women may be responsible for different heritage places and values and may need to be consulted separately.  
2.3 Other Indigenous people are identified who may not necessarily be traditional owners but who have interests in a place.  
2.4 Indigenous people from surrounding areas who may be affected by a project or activity are identified and consulted.  
2.5 *Protocols* that Indigenous people have established for consultation are identified and adhered to throughout the process.  
2.6 Consultation on each new project is undertaken, unless traditional owners and other Indigenous people agree that this is not necessary.  
2.7 Non-Indigenous people with rights or interests in the place are identified and consulted. |
| **3 Consult with relevant Indigenous people to discuss the project or activity** | 3.1 *Potential implications of the project or activity* are outlined factually and clearly.  
3.2 All *relevant documentation and information* are provided to the traditional owners and all other Indigenous people with rights and interests in a place.  
3.3 Sufficient time is allowed for all Indigenous people to decide whether they wish to become involved in the activity or project and to provide informed consent.  
3.4 All Indigenous groups with an interest in a place are provided with the same information and given sufficient time to provide informed consent.  
3.5 Where groups are in dispute, a process for developing
<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 4 Establish a process for addressing Indigenous cultural heritage matters | 4.1 Manner, timing and level of consultation and involvement with the project or activity are agreed.  
4.2 The copyright holders of any work undertaken with Indigenous people and the management regime for Indigenous heritage places are identified.  
4.3 Need for separate reports for male and female traditional owners and a further report that is publicly available is established.  
4.4 Dissemination of reports is carried out effectively.  
4.5 The process for obtaining informed consent for displaying any gathered information is identified and agreed.  
4.6 Protocols and agreements are formalised and documented.  
4.7 Indigenous people are involved in the development of any terms of reference for, and selection of, consultants.  
4.8 Resources required to maintain community involvement are identified and secured.  
4.9 Relevant documentation for council is prepared, including presentation of alternative options. |
| 5 Consult with relevant Indigenous people in identifying their cultural heritage places and values | 5.1 Commonwealth and state or territory laws relating to Aboriginal and Torres Strait heritage are complied with by obtaining necessary permits for surveys and other activities required to identify Indigenous heritage values.  
5.2 Sensitive information collected in the course of identifying Indigenous heritage places and values is protected from further unnecessary disclosure.  
5.3 Details relating to custodians of information are recorded and protected from further unnecessary disclosure. |
| 6 Implement project or activity | 6.1 Meetings are held with identified stakeholders that enable Indigenous people to explain issues relating to Indigenous heritage to non-Indigenous stakeholders.  
6.2 Processes for mediation and dispute resolution are identified and established.  
6.3 A precautionary approach is identified in cases where Indigenous people refuse to be involved in a project.  
6.4 A process to prevent damage or desecration to any Indigenous heritage place is identified and established.  
6.5 Proposal or activity is revised or rejected in light of Indigenous people not agreeing because of unacceptable impact on their cultural heritage. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- oral and written communication
- cross-cultural competence
- gender and disability
- evaluation
- decision making
- research
- networking
- negotiation and dispute resolution

Required Knowledge

- cultural context
- community controls
- location and resources
- organisational processes
- equity and diversity principles
- legal requirements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- conduct research into cultural heritage and protect any sensitive information collected in the course of the research process
- identify Indigenous people with rights and interests in a place
- meet with Indigenous people to discuss a project or activity
and reach agreement about involvement and consent to their involvement in the project or activity
- establish a process for addressing Indigenous cultural heritage matters in relation to a project or activity.

**Context of assessment**
Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

**Relationship to other units (prerequisite or co-requisite units)**
To enable holistic assessment this unit may be assessed with other units that form part of the job role.

**Method of assessment**
The following assessment methods are suggested:
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

**Evidence required for demonstration of consistent performance**
Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

**Resource implications**
The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

**Range Statement**
The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in
the Performance Criteria is detailed below.

**Indigenous people with rights and interests in a place** may include:
- traditional owners
- men
- women
- Indigenous people authorised to speak for a place
- use of interpreters
- talking to the appropriate people
- laws and customs relating to places
- respecting family, kinship and clan relationships

**Protocols** may include:
- use of interpreters
- talking to the appropriate people
- laws and customs relating to places
- respecting family, kinship and clan relationships

**Non-Indigenous people with rights or interests in a place** may include:
- landholders
- lessees
- tourists and recreational users
- state or territory government agencies
- commonwealth departments and agencies

**Potential implications of the project or activity** may include:
- economic or financial
- cultural
- social
- environmental
- educational
- others

**Relevant documentation and information** may include:
- maps
- reports

                                                                           3.4 Data is interrogated to ensure reliability.  
                                                                           3.5 Data is prepared for presentation media.                                                                                                                                                                    |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

### Required Skills

- analysing options
- using tools within software to manipulate data
- reading external data sets into data model

### Required Knowledge

- database structures
- scripting and commands
- line instructions and programming
- operating systems:
- range of tools, models, theories, applications and solutions
- data analysis and manipulation techniques.
Evidence Guide

Overview of assessment requirements
A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered
Suitable procedures are developed.
New procedures are documented.
Appropriate models are used and/or created.

Context of assessment
On the job or in a simulated work environment.

Method of assessment
The following assessment methods are suggested:
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance
Evidence will need to be gathered over time across a range of variables.

Resource implications
Access to geographic information systems databases and operating systems.

- UNIX
- DOS
- Windows
- NT
Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

*Source data limitations* may include:
- currency
- structure
- accuracy
- source of data

*Factors* may include:
- time
- command line operation
- menu drivers options

| 1 Analyse request to develop solution | 1.1 Specific problem or question is clarified in consultation with *end user* to establish *end result specifications*.  
1.2 Information required to achieve result is defined and required *data* sets are correctly determined. |
| 2 Assess data availability | 2.1 Availability of required data sets is ascertained through research of *internal* and *external sources*.  
2.2 Custodianship of data is confirmed and access and pricing are determined.  
2.3 Data is obtained in line with *industry standards*, statutory requirements and council policy.  
2.4 Where appropriate, *procedures* are developed to capture data. |
| 3 Assess data quality | 3.1 Data is assessed for *integrity* to determine suitability for task.  
3.2 Disparities between data sets are investigated and resolved to ensure integrity of data used. |
| 4 Run standard query | 4.1 Appropriate standard query is selected.  
4.2 Selected query is run to achieve required outcome. |
| 5 Validate outcome | 5.1 Appropriate data validation procedures are determined.  
5.2 *Outcome* is validated in line with predetermined procedures.  
5.3 Procedures to refine model or analytical procedures are developed.  
5.4 End user is consulted regarding suitability of outcome and amendments are negotiated as necessary. |

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

**Required Skills**

- analysing options
- researching and accessing information
- attention to detail
- negotiating with customers
**Required Knowledge**

- database structures
- scripting and commands
- line instructions and programming
- operating systems
- SQL or other generic query language
- relationship of spatial features of database
- specific geographic information systems software, such as Genamap, MapInfo or ArcInfo
- potential inaccuracies and problems
- internal and external policies and practices relating to custodianship of data, pricing and access including industry standards, statutory requirements and council policies
- legislation relating to trade practices, copyright, intellectual property, local government acts, roads act and freedom of information legislation.
- UNIX
- DOS
- Windows
- NT

**Evidence Guide**

**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

**Critical aspects of evidence to be considered**

The demonstrated ability to:

- consider integrity of data
- ensure end result meets customer needs, including time frames.

**Context of assessment**

Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria applicable to the workplace environment, within the scope of the Range Statement.

**Method of assessment**

The following assessment methods are suggested:

- observation of the learner performing a range of workplace
tasks over sufficient time to demonstrate handling of a range of contingencies

- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

**Evidence required for demonstration of consistent performance**

Evidence should be gathered over a period of time in a range of actual or simulated management environments.

**Resource implications**

Access to a workplace or simulated case study that provides the following resources:

- relevant hardware and software such as geographic information systems, CAD, desktop publishing, desktop mapping, spreadsheets, word processing, multimedia, graphic animation, plotters, printers and terminals

**Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**End users** may be:

- council departments
- residents and rate payers
- real estate agents
- general public
- council management
- elected members
- state and federal departments
- neighbouring councils
- bus companies
- statutory bodies including land titles office
- land information council
- utilities

**End result specification** may include:

- graph
- map
- table
- equations
Data may include:
- parameters
- graphical
- spatial
- textual
- hard copy and paper documents, including work registers, rate books, plans and maps
- computer records using applications programs (databases, spreadsheets and accounting packages) relating to physical or virtual features, including council assets, community facilities, demographic data, census data, property ownership, property boundaries, zonings, organisations, rateable land, dog ownership, bus routes, property classifications, utilities and services and council facilities

External sources of data sets may include:
- other councils
- water authority
- telecommunications industry
- gas authority
- electricity authority
- land titles office
- valuer general
- private industry
- land information council
- street directory companies
- surveys
- orthophotography

Internal sources of data sets may include:
- old plans
- rates books
- deeds books
- transaction books
- surveys
- aerial photographs

Industry standards may include:
- protocols
- de facto standards
- confidentiality
- privacy

Procedures for manipulation of data sets may include:
- SQL or other generic query language
- scripts
- programming language

Integrity of data may include:
- accuracy
- quality, which may be affected by age or condition of hard copy documents
- currency
- completeness
- resolution
- confidence limits
- scale

**Outcome** may include:

- information for external or internal client
- creation of map layer
- building up elements of database

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare inventory of heritage and cultural assets | 1.1 *Heritage* and cultural assets within the community, and council expectations and requirements relating to them, are identified.  
1.2 The *significance* of each heritage and cultural asset is assessed according to established criteria and community expectations.  
1.3 An adequate *information* base of significant places is obtained through comprehensive field investigation and research.  
1.4 *Data* is collected accurately and objectively on heritage and cultural assets.  
1.5 A comprehensive inventory of heritage and cultural assets is prepared with full and detailed descriptions of history and significance. |
| 2 Assess threats and opportunities for the protection of heritage and cultural assets | 2.1 *Threats* and opportunities are identified to ensure all factors are fully assessed.  
2.2 Based on input from council and the community, criteria are established to enable threats and opportunities to be prioritised. |
| 3 Identify and develop strategies for the protection of heritage and cultural assets | 3.1 *Criteria* are established to identify priorities.  
3.2 Consultation with the community and property owners is undertaken to seek views on the conservation action required to protect the significant attributes of the area.  
3.3 A framework for the legal protection of heritage and cultural assets is established through existing legislation.  
3.4 Practical and appropriate strategies to conserve heritage and cultural assets are determined.  
3.5 The effectiveness of strategies is assessed through a comparison with methods used elsewhere.  
3.6 The policy elements of the proposed heritage program are determined.  
3.7 Innovative approaches are developed to protect heritage and cultural assets in response to the local community need. |
| 4 Implement strategies for the protection of heritage and cultural assets | 4.1 The study and program are adopted by the local authority.  
4.2 Consultation is undertaken with the community and property owners about the study and proposed heritage program.  
4.3 Financial resources are identified and procured within budget cycles to support the achievement of required
ELEMENT PERFORMANCE CRITERIA

4.4 Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met.
4.5 Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes.
4.6 Community education and information materials are prepared and distributed to ensure ongoing support for the strategy.
4.7 The strategy is incorporated into council policies and procedures and relevant legislation.
4.8 A timetable for implementation is established and priorities are set.

5 Monitor and review the effectiveness of strategies to protect heritage and cultural assets
5.1 Further research is undertaken on places listed as being of local significance in the study.
5.2 Additional plans of significance are identified and reviewed.
5.3 An annual heritage report is prepared if required.
5.4 Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills
- research
- collation of information from local, national and international sources
- evaluation methodologies
- consultation with a range of community and government agencies
- strategic planning
- budgeting and lifecycle costings
- community education strategies
- project management

Required Knowledge
- heritage assets
- cultural assets
- asset classification
- council structures and services
- town planning
- community needs and expectations
- regulations, standards and policies
- community information

Evidence Guide

Overview of assessment requirements
A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered
The demonstrated ability to:
- identify and protect heritage and cultural assets
- identify and implement strategies to protect heritage and cultural assets
- put in place monitoring processes

Context of assessment
Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.

Method of assessment
The following assessment methods are suggested:
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance
Evidence should be gathered over a period of time in a range of actual or simulated management environments.
**Resource implications**  Access to a workplace or simulated case study that provides the following resources:

- relevant data such as survey information
- historical research
- existing reports
- studies and texts
- financial and budget information
- real or simulated consultation process
- copies of relevant regulations, standards and policies

**Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

**Heritage** may include:

- cultural and environmental issues
- national and local area significance
- danger component of heritage element or structure

**Significance** may be:

- aesthetic, historical, scientific and social aspects
- community expectations
- national
- state
- regional
- local
- contributory

**Data** includes:

- survey information
- historical research
- existing reports
- studies and texts

**Information** may include:

- written and oral records
- reports
- instructions
- directions from supervisor and management
- formal and informal interviews
- team meetings
- reports from other services, agencies, specialists and experts
- media

**Threats** may include:

- political emphasis
• reductions in maintenance
• lack of planning
• other authorities' planning
• competing interests
• community attitudes

Criteria may include:
• community preferences
• budget constraints
• legislative provisions
• resources
• time frames
• age
• outstanding craftsmanship
• architectural style
• construction technology
• an association with important events or figures
• building type
• rarity
• technical or creative achievement
• representing a way of life
• artistic
• religious or cultural associations

Places of significance may include:
• buildings
• structures
• plantings
• subsurface remains

| 1 Capture animals or reptiles | 1.1 Response to request for assistance is timely and efficient use of resources is observed.  
1.2 Traffic control precautions are used and access to incident site is controlled to ensure safety of public.  
1.3 Safe and humane methods of handling *animals or reptiles* are observed.  
1.4 Where appropriate, animals or reptiles are disposed of in accordance with legislative and council requirements and relevant statutes.  |
| 2 Assess transport or care needs | 2.1 *Transport* or intermediate care is provided according to protocols or legislation.  
2.2 Containment and loading are secure and safe.  
2.3 Temporary holding facilities are arranged or negotiated with landowners where necessary.  |
| 3 Impound animals or reptiles | 3.1 Impounding decision is consistent with legislative and council requirements.  
3.2 *Ownership* of animals is determined using council records or stock brands.  
3.3 Advisory/penalty notices are issued according to council regulations.  |
| 4 Monitor or care for animals or reptiles | 4.1 Feeding and handling of animals during care is undertaken in accordance with pound procedures and legislative and council requirements.  
4.2 Safe work practices, procedures and environmental conditions are observed during handling, monitoring and care duties.  |
| 5 Release animals or reptiles to owners/carers or return to environment | 5.1 Decision to release or restore animal to environment is in accordance with relevant legislation and procedures.  
5.2 Auction of unclaimed stock is performed according to council procedures.  
5.3 Recovery of costs and revenue is assessed and enforced according to relevant legislation and procedures.  |
| 6 Report on animals or reptiles that are captured, impounded or disposed of | 6.1 Reports containing accurate information drawn from council registers are forwarded to relevant officers or authorities.  |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- computers
- video, voice recorders and radio communication
- preparing and issuing instructions and/or explanations to the public
- reporting to council

Required Knowledge

- animal and reptile behaviour
- predators
- dominance
- fear
- aggression
- applicable impounding techniques
- animal and reptile handling and disabling techniques
- animal and reptile dietary and impounding needs
- routine medicinal, chemical and dipping application
- animal health treatment
- humane disposal techniques
- safe and effective use of firearms
- stock brands
- identification tags
- microchip reading
- local area geography
- terrain
- urban and rural navigation
- relevant statutes
- notice-serving process
- court evidence
- traffic control licensing requirements and direction

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work
practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

Impounding techniques used are appropriate to animal or reptile species and the condition of the animal or reptile.

Assessments of animal or reptile health and condition, and the appropriate disposal of animals or reptiles, are in accordance with council policies and procedures.

Traffic control is in accordance with relevant licensing requirements.

Use of firearms is in accordance with relevant licensing requirements.

Notices are served in accordance with council regulations.

Safe work practices and concern for public safety are displayed by care and control staff.

Context of assessment

On the job or in a simulated work environment.

Written or oral testing.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance

Competency in duties may be displayed with domestic animals, livestock, wildlife or reptiles.

Resource implications

Access to a workplace or simulated environment that encompasses impounding processes, techniques and equipment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in
the Performance Criteria is detailed below.

**Animals or reptiles may include:**
- domestic pets
- livestock
- feral animals
- native animals
- reptiles

**Capture or control may include:**
- traps
- poles and ropes
- tongs
- tranquilliser guns
- firearms
- vehicles
- loading and yarding
- health, condition and behaviour of animal or reptile from observation or reports
- supervision of, or communication to, other staff or agency personnel
- disposal of deceased animals or reptiles

**Transport may include:**
- dedicated or contracted transport
- appropriate for care and human safety.

**Ownership issues may include:**
- verification of claims to ownership by such things as tags or microchips
- recovery of costs relating to transport, sustenance and penalties

**Unit Sector(s)**
Regulatory Services
LMFGG2002B Apply First Aid

Modification History

Employability Skills Information

| Employability skills | This unit contains employability skills. |
**Elements and Performance Criteria Pre-Content**

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify the need for First Aid | 1.1. Initial assessment is made of extent and nature of First Aid required from personal observation and/or witness reports  
1.2. Initial assessment is reported to personnel/emergency services in accordance with workplace procedures |
| 2. Ensure the safety of patient and carer | 2.1. Hygiene is maintained for protection of patient and carer  
2.2. Hazards to the patient and carer are identified and appropriate action is taken to prevent further injury to either party  
2.3. Patient is made as comfortable as possible and reassured by word, manner and actions |
| 3. Assess patient and apply First Aid | 3.1. Patient is assessed against the DRABC (danger, response, airway, breathing, ventilation and circulation) model  
3.2. Vital signs are measured, recorded and any changes noted and reported as appropriate  
3.3. Treatment appropriate to the patient's injuries is provided in accordance with recognised First Aid techniques  
3.4. First Aid equipment is operated/applied in accordance with recognised procedures and standards  
3.5. Patient's condition is monitored and reported as required by workplace procedures, with treatment being modified as appropriate  
3.6. Treatment is maintained until qualified medical assistants assume responsibility or until the patient is evacuated  
3.7. Provide additional assistance as requested by |
### ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | medical/emergency services personnel
 3.8. Details of First Aid administered are reported in accordance with workplace procedures
4. **Complete work** | 4.1. First Aid equipment is recovered (if practical), cleaned, inspected/tested, refurbished, replaced and stored as appropriate
4.2. Medical waste is disposed of in accordance with workplace requirements
4.3. Equipment faults are rectified and reported in accordance with workplace procedures
4.4. Documentation is completed as required by legislative, regulatory and workplace requirements

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect, organise and analyse information related to workplace health and safety systems and procedures and the application of these to work situations
- communicate ideas and information on workplace safety issues, including the treating and recording/reporting of workplace incidents/accidents/illnesses and interpersonal communication with casualties
- plan and organise activities, including the inspection of first aid support facilities and treatment areas to ensure their completeness, adequacy, equipment and serviceability
- work with others and in a team to promote an awareness of first aid within the workplace and its provision when required
- use mathematical ideas and techniques to correctly complete measurements and calculations associated with assessment, treatment and monitoring of patient's condition
- use problem solving skills to assess and determine treatments and priorities in providing first aid to a patient
- use the workplace technology related to the reporting, recording and responding to workplace injuries and illnesses

#### Required knowledge

- workplace procedures and requirements for the treatment of workplace injuries/illnesses
REQUIRED SKILLS AND KNOWLEDGE

- reporting responsibilities and requirements
- the provision of first aid including:
  - systems of the body (respiratory, skeletal, digestive, circulatory, nervous, urinary, skin)
  - causes and management of unconsciousness
  - priorities for life support (DRABC model)
  - resuscitation techniques
  - bleeding control and laceration treatment
  - patient assessment
  - principles of initial patient management
  - management and treatment of fractures and soft tissue injuries
  - management and treatment of burns

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects of evidence

- Accurately follow workplace procedures for reporting injuries/illnesses and providing First Aid in the workplace
- Identify and respond to injuries/illnesses occurring in the workplace
- Apply emergency response First Aid
- Provide appropriate treatment to and monitor patient's condition
- Accurately report and document injuries and illnesses and treatment provided

Resource implications

- First Aid kit, stretchers and medical/First Aid facility
- Enterprise health and safety policies and procedures
- Personal protective equipment
- Patients

Method of assessment

Assessment should be by direct observation of tasks and questioning on underpinning knowledge.
Assessment may be conducted in conjunction with
**EVIDENCE GUIDE**

<table>
<thead>
<tr>
<th></th>
<th>assessment of other relevant units of competency.</th>
</tr>
</thead>
</table>

**Context of assessment**

| Assessment may occur on the job or in a workplace simulated facility with relevant equipment, work instructions, casualties and urgency. |

---

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Unit context**

- The provision of First Aid and workplace responsibilities is to conform to OHS legislation, material safety management systems, hazardous substances and dangerous goods code and local safe operating procedures
- Work is carried out in accordance with legislative obligations, relevant health regulations and organisation insurance requirements
- Work involves assessing situations, identifying appropriate control measures, awareness of emergency services responsibilities and responsiveness, treating injuries and maintaining equipment
- Work may be conducted without supervision and guidance

**First Aid**

- First Aid is that assistance given to a patient who has suffered an injury or illness in the workplace. It is that assistance which is deemed necessary to attempt to resuscitate, stabilise and/or treat the patient until qualified medical personnel assume responsibility or until the patient is evacuated for appropriate medical treatment.
- First Aid may include:
  - cardio-pulmonary resuscitation (CPR)

MEM05004 Perform routine oxy fuel gas welding

Modification History
Release 1. Supersedes and is equivalent to MEM05004C Perform routine oxy acetylene welding

Application
This unit of competency defines the skills and knowledge required to prepare materials and perform routine oxy fuel gas welding of mild/low carbon steel and cast iron where the welding is not required to meet an Australian Standard or equivalent.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements MEM05055 Weld using oxy fuel gas welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Fuel gases include one (1) or more of the following:
- acetylene
- liquefied petroleum gas (LPG)
- hydrogen

Materials include one (1) or more of the following:
- mild/low carbon steel
- cast iron

Consumables include one (1) or more of the following:
- filler rods
- fluxes

Welds include the following:
- butt
- fillet

Preparation includes one (1) or more of the following:
- preheating
- setting up jigs
- fixtures
- clamps
- joint preparation

Fuel gas welding equipment includes the following:
- gas cylinders
- hoses
- blowpipes
- tips and nozzles
- regulators
- flashback arrestors
Unit Mapping Information

Assessment Requirements for MEM05004 Perform routine oxy fuel gas welding

Modification History

Release 1. Supersedes and is equivalent to MEM05004C Perform routine oxy acetylene welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- cleaning and preparing materials for welding
- setting up:
  - gas cylinders
  - hoses
  - blowpipes
  - tips and nozzles
  - regulators
  - flashback arrestors
- selecting settings and consumables
- butt and fillet weld materials to comply with specifications
- cleaning welds according to SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- preparatory requirements
- equipment and equipment settings
- purpose of, and setting up requirements, of:
  - gas cylinders
  - hoses
  - blowpipes
  - tips and nozzles
  - regulators
  - flashback arrestors
- fuel gas properties and applications
- weld characteristics.

**Assessment Conditions**

- Assessors must:
  - have vocational competency in performing routine oxy fuel gas welding at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
  - Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
  - Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
  - Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Unit Descriptor

| Unit descriptor | This unit covers preparing materials and performing routine oxy acetylene welding. |

Application of the Unit

| Application of the unit | This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels. Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, OHS regulations and/or licensing requirements, Unit MEM05022C (Perform advanced welding using oxy acetylene process) should be selected. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

### Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment.
### EVIDENCE GUIDE

**Guidelines for the Training Package.**

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.</td>
</tr>
<tr>
<td>Method of assessment</td>
<td>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</td>
</tr>
</tbody>
</table>

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Cutting includes one (1) or more of the following:
- hand held
- self-propelled straight line cutters

Methods include one (1) or more of the following:
- manual
- automatic

Fuel gases include one (1) or more of the following:
- acetylene
- liquefied petroleum gas (LPG)
- hydrogen

Material includes various thicknesses and types of one (1) or more of the following:
- ferrous
- non-ferrous
- non-metallic

Equipment includes the following:
- gas cylinders
- hoses
- blowpipes
- tips and nozzles
- regulators
- flashback arrestors

Assessment Requirements for MEM05007 Perform manual heating and thermal cutting

Modification History
Release 1. Supersedes and is equivalent to MEM05007C Perform manual heating and thermal cutting

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting equipment appropriate to the material
- checking condition of equipment
- setting up:
  - gas cylinders
  - hoses
  - blowpipes
  - tips and nozzles
  - regulators
  - flashback arrestors
- operating equipment to cut materials making appropriate cutting allowances to ensure material is used in most economical way
- identifying defects and taking appropriate remedial action
- heating material to specification
- checking final product for compliance with specifications.

Knowledge Evidence
Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- cutting processes appropriate to various materials
- heating and cutting specifications
- purpose of, and setting up requirements, of:
  - gas cylinders
  - hoses
  - blowpipes
• tips and nozzles
• regulators
• flashback arrestors
• tools, equipment, techniques and procedures for heating and cutting
• potential equipment faults
• assembling procedures for equipment and accessories
• equipment pre-checks and operation
• procedures for adjusting heating and cutting equipment
• cutting allowances and reasons for applying them
• procedures and reasons for minimising waste material
• cutting defects and their causes and tools, equipment and techniques required to correct defects.

Assessment Conditions

• Assessors must:
  • have vocational competency in performing manual heating and thermal cutting at least to the level being assessed with relevant industry knowledge and experience
  • satisfy the assessor requirements in the Standards for Registered Training Organisations 2015 or its replacement and comply with the National Vocational Education and Training Regulator Act 2011, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
  • Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
  • Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
  • Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings
- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

#### Required knowledge

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment
### REQUIRED SKILLS AND KNOWLEDGE

- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

### Evidence Guide

#### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>A person who demonstrates competency in this unit must be able to perform manual heating and thermal cutting.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with manual heating/thermal cutting or other units requiring the exercise of the skills and knowledge covered by this unit.</td>
</tr>
</tbody>
</table>
EVIDENCE GUIDE

Method of assessment
Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questions should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Guidance information for assessment

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

MEM05012 Perform routine manual metal arc welding

Modification History
Release 1. Supersedes and is equivalent to MEM05012C Perform routine manual metal arc welding

Application
This unit of competency defines the skills and knowledge required to carry out routine manual metal arc welding (MMAW) of low carbon mild steel where the welding is not required to meet an Australian Standard or equivalent.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A
Unit Weight: 2

Pre-requisite Unit
MEM11011 Undertake manual handling
MEM13015 Work safely and effectively in manufacturing and engineering
MEM16006 Organise and communicate information

Competency Field
Fabrication
Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine job requirements
   1.1 Follow standard operating procedures (SOPs)
   1.2 Comply with work health and safety (WHS) requirements at all times
   1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
   1.4 Identify job requirements from specifications, job sheets or work instructions

2 Prepare materials and equipment for welding
   2.1 Identify location of welds in accordance with procedures and job specifications
   2.2 Clean and prepare materials ready for welding
   2.3 Set up welding equipment according to SOPs
   2.4 Select correct electrodes and adjust settings to suit application

3 Perform routine welding using MMAW
   3.1 Weld materials to job requirements
   3.2 Clean welds according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:
- butt
- fillet

Preparing includes one (1) or more of the following:
- cleaning
- setting up jigs
- fixtures
- clamps
- joint preparation

Welding equipment includes the following:
- welding leads
- welding machines
- electrode holder

Cleaning includes one (1) or more of the following:
- slag and spatter
- cleaning
- using files
- grinders

Assessment Requirements for MEM05012 Perform routine manual metal arc welding

Modification History
Release 1. Supersedes and is equivalent to MEM05012C Perform routine manual metal arc welding

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for performing routine manual metal arc welding (MMAW)
- cleaning and preparing materials to specifications
- setting up welding equipment, selecting appropriate electrodes and adjusting settings to suit application
- welding materials to comply with specifications
- cleaning welds for slag and splatter in accordance with SOPs.

Knowledge Evidence
Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- material and equipment preparation
- equipment set-up and settings
- appropriate welding consumables consistent with standard operating procedures
- MMAW processes and properties.

Assessment Conditions
Assessors must:

- have vocational competency in performing routine manual metal arc welding at least to the level being assessed with relevant industry knowledge and experience
- satisfy the assessor requirements in the Standards for Registered Training Organisations 2015 or its replacement and comply with the National Vocational Education and Training Regulator Act 2011, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
• Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

• Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.

• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:
- preparing materials and electrodes
- setting up welding equipment
- welding with MMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- performing measurements for joint preparation and routine MMAW

Required knowledge

Look for evidence that confirms knowledge of:
- material and equipment preparation
- properties and characteristics of materials and consumables
- weld characteristics
- equipment set-up and settings
- MMAW processes and properties
- post-welding treatments
- safe welding practices
- use and application of personal protective equipment

Evidence Guide

EVIDENCE GUIDE

MEM05015 Weld using manual metal arc welding process

Modification History
Release 1. Supersedes and is equivalent to MEM05015D Weld using manual metal arc welding process

Application
This unit of competency has been developed for Engineering Tradesperson – Fabrication apprenticeship training and the recognition of trade-level skills in manual metal arc welding (MMAW) on heavy or light metal fabrications. It may also apply to other trade occupations requiring higher level MMAW welding skills.

Weld quality would typically conform to AS 1554 General Purpose, and American Bureau of Shipping (ABS) or equivalent.

Where manual thermal processes associated with preparation, pre-heat and/or post-heat is required unit MEM05007 Perform manual heating and thermal cutting and unit MEM05008 Perform advanced manual thermal cutting, gouging and shaping, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A
Unit Weight: 4

Pre-requisite Unit
MEM05012 Perform routine manual metal arc welding
MEM05051 Select welding processes
MEM05052 Apply safe welding practices
MEM09002 Interpret technical drawing
MEM11011 Undertake manual handling
MEM12023 Perform engineering measurements
MEM12024  Perform computations
MEM13015  Work safely and effectively in manufacturing and engineering
MEM14006  Plan work activities
MEM16006  Organise and communicate information
MEM18001  Use hand tools
MEM18002  Use power tools/hand held operations

Competency Field
Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1  Determine job requirements
   1.1  Follow standard operating procedures (SOPs)
   1.2  Comply with work health and safety (WHS) requirements at all times
   1.3  Use appropriate personal protective equipment (PPE) in accordance with SOPs
   1.4  Identify job requirements from specifications, drawings, job sheets or work instructions

2  Prepare materials for MMAW
   2.1  Prepare materials to achieve the required weld requirements
   2.2  Assemble/align materials to specification, where required

3  Select, assemble and set up welding equipment and consumables
   3.1  Identify and select welding equipment and electrodes, accessories and consumables appropriate to the material
   3.2  Assemble and set up AC or DC welding equipment
Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

4 Minimise and rectify distortion
   4.1 Apply appropriate distortion prevention measures
   4.2 Rectify any distortion using appropriate techniques

5 Weld to job specification using MMAW
   5.1 Ensure weld deposit is to specifications
   5.2 Clean joints to specifications

6 Ensure weld conformance
   6.1 Inspect weld joints visually for conformance to specifications
   6.2 Rectify any weld defects with minimum loss of sound metal using correct techniques and tools
   6.3 Complete weld records, where required

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:
- fillet and butt welds carried out in all positions

Materials include one (1) or more of the following:
- ferrous, including carbon or stainless steel
- non-ferrous metals
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- alloys suitable for MMAW welding

**Preparation of materials** includes one (1) or more of the following:

- pre-heating
- setting up of jigs
- fixtures and clamps
- joint preparation (e.g. beveling)

**Distortion prevention measures include one (1) or more of the following:**

- preheating
- setting up of jigs
- fixtures and clamps

**Rectify includes the use of one or more of the following:**

- oxy acetylene
- air arc equipment
- grinding devices

**Defects include one (1) or more of the following:**

- porosity
- slag inclusions
- discontinuities
- lack of penetration
- undercut

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to MEM05015D Weld using manual metal arc welding process

Assessment Requirements for MEM05015 Weld using manual metal arc welding process

Modification History
Release 1. Supersedes and is equivalent to MEM05015D Weld using manual metal arc welding process

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for welding using manual metal arc welding process (MMAW) to the specified standard
- selecting appropriate weld and joint preparation methods
- consistently weld a range of materials to the specified standard or equivalent using AC or DC welding machines and electrodes while preventing distortion
- rectifying any defects
- completing weld records related to MMAW onto standard workplace forms.

Knowledge Evidence
Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- material preparation for MMAW
- weld joint preparations
- welding electrode classification
- causes of distortion for materials when welded
- causes of weld defects and methods of rectification
- relationships between amperage, electrode and material
- standards for MMAW, including AS 1554 General Purpose any other equivalent standards.

Assessment Conditions
- Assessors must:
  - have vocational competency in welding using MMAW process at least to the level being assessed with relevant industry knowledge and experience
• satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.

• Assessment must include evidence of 160 hours of workplace practice associated with the skills of this unit in a functioning workplace.

• All aspects of competent application of the unit must be addressed including prerequisite competency units and associated workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

• Knowledge assessment may be either verbal or written but must adequately reflect the knowledge requirements of the unit and its prerequisites in a functioning workplace.

• Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.

• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05017 Weld using gas metal arc welding process

Modification History
Release 1. Supersedes and is equivalent to MEM05017D Weld using gas metal arc welding process

Application
This unit of competency has been developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade-level skills in gas metal arc welding (GMAW) on heavy or light metal fabrications. It may also apply to other trade occupations requiring higher level GMAW welding skills.

Weld quality would typically conform to Australian Standard 1554 General Purpose, and American Bureau of Shipping (ABS) or equivalent.

Where manual thermal processes associated with preparation, pre-heat and/or post-heat is required unit MEM05007 Perform manual heating and thermal cutting and unit MEM05008 Perform advanced manual thermal cutting, gouging and shaping, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band:  A
Unit Weight:  4

Pre-requisite Unit
MEM05050 Perform routine gas metal arc welding
MEM05051 Select welding processes
MEM05052 Apply safe welding practices
MEM09002 Interpret technical drawing
MEM11011 Undertake manual handling
MEM12023 Perform engineering measurements
MEM12024    Perform computations
MEM13015    Work safely and effectively in manufacturing and engineering
MEM14006    Plan work activities
MEM16006    Organise and communicate information
MEM18001    Use hand tools
MEM18002    Use power tools/hand held operations

**Competency Field**

Fabrication

**Elements and Performance Criteria**

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1. **Determine job requirements**
   1.1 Follow standard operating procedures (SOPs)
   1.2 Comply with work health and safety (WHS) requirements at all times
   1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
   1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

2. **Prepare materials for GMAW**
   2.1 Prepare materials to achieve the required weld requirements
   2.2 Assemble/align materials to specification where required

3. **Select, assemble and set up welding equipment and consumables**
   3.1 Identify and select welding equipment and electrodes, accessories and consumables appropriate to the material
   3.2 Assemble and set up AC or DC welding equipment
**Elements describe the essential outcomes.**

**Performance criteria describe the performance needed to demonstrate achievement of the element.**

**4 Minimise and rectify distortion**

4.1 Apply appropriate distortion prevention measures

4.2 Rectify any distortion using appropriate techniques

**5 Weld to job specification using GMAW**

5.1 Ensure weld deposit is to specifications

5.2 Clean joints to specifications

**6 Ensure weld conformance**

6.1 Visually inspect weld joints for conformance to specifications

6.2 Rectify any weld defects with minimum loss of sound metal using correct techniques and tools

6.3 Complete weld records, where required

**Foundation Skills**

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Welds include the following:**

- fillet and butt welds carried out in all positions

**Materials include one (1) or more of the following:**

- ferrous, including carbon or stainless steel
- non-ferrous metals
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- alloys suitable for GMAW

**Preparation includes one (1) or more of the following:**
- pre-heating
- setting up of jigs
- fixtures and clamps
- joint preparation (e.g. bevelling)

**Distortion prevention measures include one (1) or more of the following:**
- pre-heating
- setting up of jigs
- fixtures and clamps

**Rectify includes the use of one (1) or more of the following:**
- oxy acetylene
- air arc equipment
- grinding devices

**Defects include one (1) or more of the following:**
- porosity
- slag inclusions
- discontinuities
- lack of penetration
- undercut

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to MEM05017D Weld using gas metal arc welding process

**Links**

Assessment Requirements for MEM05017 Weld using gas metal arc welding process

Modification History
Release 1. Supersedes and is equivalent to MEM05017D Weld using gas metal arc welding process

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for welding using gas metal arc welding process (GMAW) to the specified standard
- selecting appropriate weld and joint preparation methods
- consistently weld materials to the specified standard or equivalent using AC or DC welding machines and electrodes while preventing distortion
- rectifying any defects
- completing weld records related to GMAW onto standard workplace forms.

Knowledge Evidence
Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- types of gases and their uses
- relationships between amperage/wire feed, voltage, gas flow, electrode and material
- application of weld metal transfer (short arc and spray)
- correct welding machine, leads, hand pieces and electrodes
- material preparation
- weld joint preparations
- filler wire classification
- causes of distortion for materials when welded
- causes of weld defects and methods of rectification
- standards for GMA welding, including Australian Standard 1554 General Purpose and any other equivalent standards.
Assessment Conditions

- Assessors must:
  - have vocational competency in welding using GMAW process at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Assessment must include evidence of 160 hours of workplace practice associated with the skills of this unit in a functioning workplace.
- All aspects of competent application of the unit must be addressed including prerequisite competency units and associated workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge assessment may be either verbal or written but must adequately reflect the knowledge requirements of the unit and its prerequisites in a functioning workplace.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05019 Weld using gas tungsten arc welding process

Modification History
Release 1. Supersedes and is equivalent to MEM05019D Weld using gas tungsten arc welding process

Application
This unit of competency has been developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade-level skills in gas tungsten arc welding (GTAW) on heavy or light metal fabrications. It may also apply to other trade occupations requiring higher level GTAW welding skills.

Weld quality would typically conform to AS 1554 General Purpose and American Bureau of Shipping (ABS), or equivalent.

Where manual thermal processes associated with preparation, pre-heat and/or post-heat is required unit MEM05007 Perform manual heating and thermal cutting and unit MEM05008 Perform advanced manual thermal cutting, gouging and shaping, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A
Unit Weight: 4

Pre-requisite Unit
MEM05049 Perform routine gas tungsten arc welding
MEM05051 Select welding processes
MEM05052 Apply safe welding practices
MEM09002 Interpret technical drawing
MEM11011 Undertake manual handling
MEM12023 Perform engineering measurements
MEM12024 Perform computations
MEM13015 Work safely and effectively in manufacturing and engineering
MEM14006 Plan work activities
MEM16006 Organise and communicate information
MEM18001 Use hand tools
MEM18002 Use power tools/hand held operations

Competency Field
Fabrication

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine job requirements
   1.1 Follow standard operating procedures (SOPs)
   1.2 Comply with work health and safety (WHS) requirements at all times
   1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
   1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

2 Prepare materials for GTAW
   2.1 Prepare materials to achieve the required weld requirements
   2.2 Assemble/align materials to specification, where required

3 Select, assemble and set up welding equipment and consumables
   3.1 Identify and select welding equipment and electrodes, accessories and consumables appropriate to the material
   3.2 Assemble and set up AC or DC welding equipment
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

4 Minimise and rectify distortion
   4.1 Apply appropriate distortion prevention measures
   4.2 Rectify any distortion using appropriate techniques

5 Weld to job specification using GTAW
   5.1 Ensure weld deposit is to specifications
   5.2 Clean joints to specifications

6 Ensure weld conformance
   6.1 Visually inspect weld joints for conformance to specifications
   6.2 Rectify any weld defects with minimum loss of sound metal using correct techniques and tools
   6.3 Complete weld records, where required

Foundation Skills

MEM05049 Perform routine gas tungsten arc welding

Modification History
Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Application
This unit of competency defines the skills and knowledge required to prepare the materials and carry out routine gas tungsten arc welding (GTAW) and applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements Unit MEM05019 Weld using gas tungsten arc welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

   1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
   1.4 Identify job requirements from specifications, sketches, job sheets or work instructions

2 Prepare materials and equipment for welding
   2.1 Identify location of welds in accordance with procedures and job specifications
   2.2 Clean and prepare materials ready for welding
   2.3 Set up welding equipment to meet work requirement
   2.4 Select settings and consumables to suit application

3 Perform routine welding using GTAW
   3.1 Weld materials to job requirements
   3.2 Clean welds according to SOPs

Foundation Skills
This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:
- butt
- fillet

Materials include one (1) or more of the following:
- low carbon/mild steels
- aluminium

Prepared includes one (1) or more of the following:
- pre-heating
- setting up jigs
- fixtures
- clamps
- joint preparation

Welding equipment includes the following:
- hoses
- welding leads and gas shrouds
- electrodes
- gas regulator
- liners
- contact tips

Consumables include the following:
- tungsten electrodes, filler wire and shielding gas

Clean includes the following:
- slag and spatter

Assessment Requirements for MEM05050 Perform routine gas metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures and safe work practices
- identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas metal arc welding (GMAW)
- cleaning and preparing materials for welding to specifications
- setting up welding equipment, including selecting settings and consumables to suit application
- consistently welding materials to specifications
- cleaning welds in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- shielding gas properties and applications
- post-welding treatments
- weld characteristics.

Assessment Conditions

- Assessors must:
  - have vocational competency in performing routine GMAW process at least to the level being assessed with relevant industry knowledge and experience
satisfy the assessor requirements in the Standards for Registered Training Organisations 2015 or its replacement and comply with the National Vocational Education and Training Regulator Act 2011, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.

Where possible assessment must occur in operational workplace situations. Competency Field
Machine and process operations

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine job requirements
   1.1 Follow standard operating procedures (SOPs)
   1.2 Comply with work health and safety (WHS) requirements at all times
   1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
   1.4 Identify job requirements from specifications, sketches, job sheets or work instructions

2 Set up machine
   2.1 Select appropriate machine and tools to meet work requirements
   2.2 Sharpen cutting tools, as required
   2.3 Install tools according to procedures
   2.4 Set guards and adjust, as required

3 Operate machine
   3.1 Mount material to be machined and secure using clamping device/ appropriate to the material and work requirements
   3.2 Operate machine to suit work and material requirements
   3.3 Check machined component against work requirements and predetermined finish
   3.4 Make adjustments, as required
Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, accessibility of the item, and local industry and regional contexts) are included.

Machines include one (1) or more of the following:
- lathe
- radial arm drill
- mill

Cutting tools include one (1) or more of the following:
- lathe tools
- milling cutters
- drills

Materials include one (1) or more of the following:
- ferrous
- non-ferrous

Clamping devices include one (1) or more of the following:
- chucks
- vices
- clamps
- bars and packing

Assessment Requirements for MEM07032 Use workshop machines for basic operations

Modification History
Release 1. Supersedes and is equivalent to MEM07032B Use workshop machines for basic operations

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:
- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications and work instructions for machine operations
- setting up machines and selecting, sharpening and mounting tools required for the required job
- mounting the material to be processed and safely operating the machine
- checking machined components to ensure it meets specifications and making adjustments, as required.

Knowledge Evidence
Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:
- safe work practices and procedures and use of personal protective equipment (PPE)
- cutting tool sharpening methods and techniques
- units of measurement, tool geometry and numerical operations required for basic machining operations
- safe operation of tool sharpening equipment and consequences of incorrect sharpening
- machine set-up and consequences of incorrect speeds and feeds
- procedures for operating workshop machines
- reasons for poor surface finish.

Assessment Conditions
- Assessors must:
  - have vocational competency in using workshop machines for basic operations at least to the level being assessed with relevant industry knowledge and experience
• satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

• Where possible assessment must occur in operational workplace situations. Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Calculations are performed using one (1) or more of the following:**
- pen and paper
- a calculator
- tables
- tablets
- computers

**Relevant sources include one (1) or more of the following:**
- charts
- graphs
- diagrams
- measurement data
- reference manuals
- specifications

**Applications include computations associated with one (1) or more of the following:**
- pressure
- volume
- temperature
- heat
- speed
- power
- elasticity
- density
- mass
- force

**Arithmetic operations include the following:**
- application of subtraction, addition, multiplication and division
- manipulation of decimals, fractions and mixed numbers and whole numbers
- using formulas
- determining percentages
- calculation of proportions and ratios

**Charts and graphs include one (1) or more of the following:**
- simple histograms
- control charts
- pie charts

Assessment Requirements for MEM12024 Perform computations

Modification History
Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting data from job instructions and relevant sources to establish required outcomes
- determining the appropriate calculation method to suit the application
- performing calculations and confirming answer/s
- producing and interpreting simple charts and graphs from given data.

Knowledge Evidence
Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- formulae applicable to the determination of perimeter, area and volume of simple geometric shapes and the reasons for using dimensions with the same units
- techniques and procedures for rounding off figures when estimating approximate answers
- features and use of mixed numbers, decimals, fractions and whole numbers
- procedures for carrying out calculations involving fractions and using each of the four basic rules of addition, subtraction, multiplication and division
- concept of percentage and procedures to be followed in converting a decimal and fraction to a percentage
- concepts and calculations of ratio and proportion
- scales applicable to the axes of the graphs or charts
- types of charts and/or graphs used in the individual’s field of work
- upper and lower limits of acceptability applicable to data entered on a graph or chart
- trends indicated by the slope or gradient of a graph
- action to be taken when given trends occur or set limits are approached on graphs or charts
- procedures for drawing 'lines of best fit'
- trends indicated by the graphs or charts drawn.
Assessment Conditions

- Assessors must:
  - have vocational competency in performing computations at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the Standards for Registered Training Organisations 2015 or its replacement and comply with the National Vocational Education and Training Regulator Act 2011, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18001 Use hand tools

Modification History
Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Application
This unit of competency defines the skills and knowledge required to use a range of hand tools for a variety of general engineering applications.

This unit should not be selected if the hand tool is dedicated to a single operation or machine or when a machine-specific/customised tool is used.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A
Unit Weight: 2

Pre-requisite Unit
MEM11011 Undertake manual handling
MEM13015 Work safely and effectively in manufacturing and engineering
MEM16006 Organise and communicate information
Competency Field
Maintenance and diagnostics

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine job requirements
1.1 Follow standard operating procedures (SOPs)
1.2 Comply with work health and safety (WHS) requirements at all times
1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
1.4 Identify job requirements from specifications, drawings, job sheets or work instructions

2 Use hand tools for general engineering applications
2.1 Select hand tools appropriate to the task requirements
2.2 Use hand tools to produce outcomes that meet job specifications
2.3 Identify unsafe or faulty tools and mark for repair according to designated procedures before, during and after use
2.4 Undertake routine maintenance of tools using engineering principles, tools, equipment and procedures
2.5 Store hand tools safely in appropriate location according to procedures and manufacturers’ recommendations

Foundation Skills
This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Hand tools include one (1) or more of the following:**
- hacksaws
- hammers
- punches
- screwdrivers
- sockets
- wrenches
- scrapers
- chisels
- gouges
- wood planes
- files of all cross-sectional shapes and types
- hand held taps and dies

**Applications include one (1) or more of the following:**
- adjusting
- dismantling
- assembling and finishing of items or components
- finishing, cutting, scraping of metallic and non-metallic material to size and shape
- tapping/retapping and threading/rethreading new/damaged threads

**Drawings include one (1) or more of the following:**
- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
- work specifications that include graphic representations that do not require interpretation

**Job specifications include one (1) or more of the following:**
- finish
- tension
- size
- shape

**Routine maintenance includes one (1) or more of the following:**
- cleaning
- lubricating
- tightening
- simple tool repairs
- adjustments

Assessment Requirements for MEM18001 Use hand tools

Modification History
Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using hand tools to produce the desired outcome to job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine maintenance and cleaning of hand tools, including storage.

Knowledge Evidence
Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and applications of different hand tools used in a general engineering context, including hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and sizes
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools, including lubricating, tightening, simple tool repairs and adjustments using engineering principles and relevant equipment
- storage location and procedures for a range of hand tools.

Assessment Conditions
Assessors must:
- have vocational competency in using hand tools at least to the level being assessed with relevant industry knowledge and experience
- satisfy the assessor requirements in the Standards for Registered Training Organisations 2015 or its replacement and comply with the National Vocational Education and Training Regulator Act 2011, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
• Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

• Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.

• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers’/standard operating procedures

#### Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>A person who demonstrates competency in this unit must be able to use hand tools for a range of general engineering applications.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using hand tools or other units requiring the exercise of the skills and knowledge covered by this unit.</td>
</tr>
<tr>
<td>Method of assessment</td>
<td>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</td>
</tr>

## Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Power tools include one (1) or more of the following:**
- electric or pneumatic/hydraulic drills
- grinders
- jigsaws
- nibblers
- cutting saws
- Sanders
- planers
- routers
- pedestal drills
- pedestal grinders

**Power tool operations include one (1) or more of the following:**
- clamping
- alignments
- adjustments

**Applications include one (1) or more of the following:**
- loosening and fastening items or components
- shaping, finishing, cutting, grinding of metallic and non-metallic materials and/or tool bits to size and shape

**Drawings include one (1) or more of the following:**
- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
- work specifications that include graphic representations that do not require interpretation

**Clamping includes one (1) or more of the following:**
- multigrips
- vices
- jigs and fixtures
- clamps

**Job specifications include one (1) or more of the following:**
- finish
- size
- shape

**Operational maintenance includes one (1) or more of the following:**
- cleaning
- lubricating
- tightening

MEMPE001A Use engineering workshop machines

Modification History
New unit - Release 1

Unit Descriptor
This unit of competency involves setting up and machining components using lathes and other machines, such as milling machines, cut off saws, pedestal grinders and fixed position drilling machines. Tooling might need to be re-sharpened but not ground up from a blank.
The settings for the machines will be calculated by the learner from given formulas, surface speeds and feed rates.

Application of the Unit
This unit is designed for use in a pre-employment skills introduction program and is suitable for use in institutional-based vocational programs. Skills development will take place under direct supervision.

This unit is not to be used in a traineeship or apprenticeship training program or associated qualifications. It is only to be used in pre-employment programs and carries no credit towards apprenticeship/trade and other qualification types in manufacturing and engineering.

This unit should be integrated with the work in the project unit, MEMPE006A Undertake a basic engineering project, and skills developed when required by the project.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Prepare a job plan
   1.1 Identify job requirements from drawings or other relevant materials in consultation with an instructor/teacher/trainer
   1.2 Identify appropriate machines in accordance with job requirements
   1.3 Identify appropriate tooling in accordance with job requirements
   1.4 Calculate cutting speeds and feeds
   1.5 Prepare a job/project plan showing machines, tooling, cutting speeds and feeds and an appropriate sequence of operations
   1.6 Confirm plan with instructor

2 Prepare for machining
   2.1 Obtain appropriate tooling and materials
   2.2 Set up tools and materials as required
   2.3 Set speeds and feeds

3 Perform machining operations
   3.1 Use and wear appropriate personal protective equipment
   3.2 Follow safe machining practices
   3.3 Machine materials to job requirements
   3.4 Use measuring equipment as required
3.5 Store completed work in a manner which will prevent/minimise potential damage

4 Complete work requirements

4.1 Clear work area of waste and clean according to requirements

4.2 Maintain and/or store machines, tools and equipment according to instructions

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- preparing a job plan
- preparing for machining
- performing machining
- calculating speeds and feeds
- using measuring equipment as required
- appropriately cleaning and storing of equipment
- applying safe working practices
- using and applying personal protective equipment

Required knowledge

Required knowledge includes:

- safe machine operation procedures
- material and equipment preparation requirements
- basic marking out techniques
- use and care of measuring tools
- types of machines for cutting, grinding, drilling, turning and milling
- work and tool holding methods for each machine
- safe working practices
- use and application of personal protective equipment
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>A person who demonstrates competency in this unit must be able to prepare materials and use engineering workshop machines to produce engineering components.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Assessors must be satisfied that the candidate can: • work safely • prepare job plans • prepare for machining • perform machining • calculate speeds and feeds • use measuring equipment as required • clean and store equipment as instructed.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>• This unit must be assessed in a learning institution. • Assessment must cover the successful use of a lathe and other relevant workshop machines. • The skills covered by this unit would usually be demonstrated by an individual working alone under direct supervision. • The assessment environment should not disadvantage the candidate. • This unit may be assessed in conjunction with any other units addressing the safety, quality, communication, hand tools, machine operation, recording and reporting associated with using workshop machines.</td>
</tr>
<tr>
<td>Method of assessment</td>
<td>• Assessment must satisfy the endorsed Assessment Guidelines of the MEM05 Metal and Engineering Training Package. • Assessment methods must be by direct observation of tasks and include questioning on underpinning knowledge to ensure correct interpretation and application.</td>
</tr>
</tbody>
</table>
Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.

Assessment should be in conjunction with assessment of the project unit and other units integrated into the project.

**Guidance information for assessment**

Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

---

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Other relevant materials**

Other relevant materials may include but are not limited to:

- drawings
- sketches
- job instructions
- schematics
- diagrams
- technical manuals

**Appropriate machines**

Appropriate machines may include but are not limited to:

- milling machines
- cut off saws
- pedestal grinders
- fixed position drilling machines
- computer controlled machines
| Measuring equipment | Measuring equipment may include but is not limited to:
<table>

MSL904001 Perform standard calibrations

Modification History

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Application

This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.

This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Calibration

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare items for calibration

1.1 Select the authorised calibration procedure in
calibration

1. Identify hazards and use appropriate personal protective equipment (PPE), safety equipment and procedures

1.2 Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure

1.3 Assemble and set up specified reference standards and associated equipment prior to testing

1.4 Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary

1.5 Identify and minimise potential sources of measurement error

2 Perform calibration

2.1 Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement

2.2 Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment)

2.3 Adjust device under test to bring readings within specification and record data (as-left or after adjustment) where required

2.4 Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results

2.5 Seek appropriate advice when interpretation of results is outside authorised scope of approval

3 Document results

3.1 Estimate and document uncertainty of measurement in accordance with workplace procedures, where required

3.2 Document compliance/non-compliance with test requirements and/or specifications

3.3 Record the results of each test/calibration accurately, unambiguously and objectively
3.4 Ensure confidentiality of workplace information

4 Finalise calibration

4.1 Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information as required

4.2 Report any non-compliance and verify next course of action with supervisor

4.3 Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in workplace procedures

4.4 Store test equipment/measurement standards and results in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace procedures include the current version of one or more of:

- Australian and international standards and codes covering:
  - general requirements for the competence of testing and calibration laboratories, laboratory safety, quality and environmental management
  - accuracy of measurement methods and results, expression of uncertainty (GUM), quantifying uncertainty in analytical measurement, quality assurance of measurement equipment
  - national work health and safety (WHS) standards and codes of practice
• registration/licensing and/or National Association of Testing Authorities (NATA) accreditation requirements
• safety requirements for equipment, materials or products; material safety data sheets (MSDS); and incident and accident/injury reports
• standard operating procedures (SOPs), recording and reporting procedures
• quality manuals, equipment and operating/technical manuals
• test methods and calibration procedures (validated and authorised)
• test methods and calibration procedures published by international, national or regional standards, reputable technical organisations, scientific texts or journals and equipment manufacturers
• laboratory layout, work flows and schedules

Standard calibrations

Standard calibrations include, but are not limited to, testing and/or calibrating the following equipment and reference materials using standard methods and procedures:

• test equipment, such as anemometers, balances, barometers, callipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments
• electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references
• working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers

Hazards

Hazards include, but are not limited to, one or more of:

• electric shock
- disturbance or interruption of services
- manual handling of heavy equipment boxes
- sources of electromagnetic radiation (lasers and RF generators/transmitters)
- fluids under pressure
- heat sources, such as ovens

**Safety procedures**

Safety procedures include, but are not limited to, one or more of:

- ensuring access to service shut-off points
- use of PPE, such as hearing protection, gloves, safety glasses and coveralls
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

**Reference materials**

Reference materials include, but are not limited to, one or more of:

- colour standards
- graded granular materials
- hardness blocks

**WHS and environmental management requirements**

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

**Unit Mapping Information**

Assessment Requirements for MSL904001 Perform standard calibrations

Modification History
Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- selecting and applying appropriate test methods and calibration procedures
- safely calibrating test and measurement equipment in accordance with standard calibration procedures and documented test methods on at least two (2) occasions
- maintaining close attention to all relevant procedures, regulatory requirements and the accuracy and precision of measurement to ensure the quality and integrity of test/calibration results
- critically examining each calibration step to ensure repeatability and validity of data
- using calibration and correction charts
- performing calculations to give results in appropriate accuracy, precision and units
- using statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement, where required (can use software)
- preparing test/calibration documentation that is accurate and complies with requirements
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and reporting opportunities for improvements.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures and applications
- National Association of Testing Authority's (NATA) and National Measurement Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- reporting procedures and legislative requirements
Assessment Requirements for MSL904001 Perform standard calibrations

- handling, transport, storage and operation of reference and working standards
- work health and safety (WHS) and laboratory environmental control requirements.

Additional knowledge requirements relevant to the workplace context that apply for different calibration fields must be assessed, including testing and calibration conducted in the following fields:
- acoustic and vibration measurement
- chemical testing
- construction materials testing
- electrical testing
- heat and temperature measurement
- mechanical testing
- metrology
- non-destructive testing
- optics and radiometry
- pressure measurement.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- This unit of competency may be assessed with:
  - MSL924001 Process and interpret data
  - relevant MSL974000 series unit/s of competency
  - relevant MSL975000 series unit/s of competency
- Holistic assessment methods include:
  - review of calibration results, uncertainty calculations and workplace documentation completed by the candidate
  - feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate
• observation of the candidate performing standard calibrations
• oral or written questioning to check required knowledge of standard calibration procedures.

Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:

• specialised calibration/test equipment, reference standards and laboratory facilities
• calibration methods, procedures and equipment specifications
• workplace quality manual and procedures.

Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

The assessor must demonstrate both technical competence and currency.

Technical competence can be demonstrated through:

• relevant VET or other qualification/Statement of Attainment AND/OR
• relevant workplace experience

Currency can be demonstrated through:

• performing the competency being assessed as part of current employment OR
• having consulted with a laboratory about performing the competency being assessed within the last twelve months.

Application

This unit of competency describes the skills and knowledge to plan and complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available guidelines and advice. Work plans may need to be modified with supervisor agreement to suit changing conditions and priorities.

This unit of competency applies to instrument operators, laboratory assistants and technical assistants working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively planned, prioritised and completed 2 laboratory/field work tasks on 2 separate occasions, including:
  - working independently
  - working in a team context.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures/guidelines for work
- ethical and professional work performance
- problem-solving strategies
- effective interpersonal communication and conflict resolution techniques
- effective team operations for groups
- strategies to maintain work flow
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
• workplace procedures
• equipment and materials for relevant technical tasks.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Application

This unit of competency covers the ability to record and store data, perform simple calculations of scientific quantities and present information in tables and graphs. The unit of competency requires personnel to solve predictable problems using clear information or known solutions. Where alternatives exist, they are limited or apparent.

This unit of competency is applicable to production operators, field assistants and laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accurately coding, checking, recording and storing data in the required format
- performing simple calculations involving scientific quantities, with or without a calculator or computer software. The following must be performed:
  - decimals, fractions, ratios, proportions and percentages
  - unit conversion, multiples and submultiples
  - use of significant figures, rounding off, estimation and approximation
  - substitution of data in formulae
  - conversions between SI units
  - performing at least five (5) of the following calculations:
    - perimeters
    - angles
    - areas (m²) and volumes (mL, L, m³) of regular shapes (e.g. packaging and moulds)
    - average mass, mass %, density, specific gravity, moisture, relative and absolute humidity
    - ratios, such as mass to mass, mass to volume and volume to volume percentages
    - industry specific ratios, such as g/cm², kg/m²
    - concentration (e.g. g/100mL, mg/L, mg/L)
    - dilution
    - statistical values, such as mean, median, mode and standard deviation
    - average count, colonies per swab surface and cell counts (live and dead/total)
    - process variables, such as pressure, velocity and flow rates
% content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
- food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability
- preparing and interpreting straightforward tables, graphs and charts of data
- recognising obvious features and trends in data, including:
  - maximum and minimum values
  - spread of data
  - increasing/decreasing data, rate of change
  - outliers, data beyond control limits or normal range
- presenting accurate results in the required format
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements.

**Knowledge Evidence**

Must provide evidence that demonstrates knowledge of:
- concepts of metrology, including:
  - that all measurements are estimates
  - repeated measurements belong to a sample of the measured parameter
  - repeatability, precision, accuracy and significant figures
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and security of data
- work health and safety (WHS) and environment requirements.

**Assessment Conditions**

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment, and assessment evidence must be relevant to the particular workplace context. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in either case).

• This unit may be assessed with technical units, such as:
  • MSL973013 Perform basic tests
  • MSL973014 Prepare working solutions
  • MSL973019 Perform microscopic examination

• Holistic assessment methods include:
  • review of data worksheets, calculations, graphs and tables prepared by the candidate
  • review of records transcribed, maintained or stored by the candidate
  • feedback from supervisors and peers
  • observation of the candidate as they record data and perform calculations
  • questions to assess understanding of relevant procedures and trends in data.

• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • data sets and records
  • computer and relevant software or laboratory information system
  • relevant workplace procedures.

• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

• The assessor must demonstrate both technical competence and currency.

• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience.

• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL924001 Process and interpret data

Modification History
Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Application
This unit of competency covers the ability to retrieve data, evaluate formulae and perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

This unit of competency is applicable to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Data

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Retrieve and check data

1.1 Store and retrieve data using appropriate files and/or application software

1.2 Verify the quality of data using workplace procedures

1.3 Rectify errors in data using workplace procedures
2 **Calculate scientific quantities**

2.1 Calculate statistical values for given data

2.2 Calculate scientific quantities using given formulae and data and estimate uncertainties

2.3 Ensure calculated quantities are consistent with estimations and expectations

2.4 Report all calculated quantities using the appropriate units and correct number of significant figures

3 **Present data**

3.1 Present data in clearly labelled tables, charts and graphs

3.2 Graph data using appropriate scales to span the range of data or display trends

3.3 Report all data using the appropriate units and number of significant figures

4 **Interpret data**

4.1 Interpret significant features of tables, charts and graphs, including gradients, intercepts, maximum and minimum values, and limit lines

4.2 Recognise and report trends in data

5 **Keep accurate records and maintain confidentiality**

5.1 Transcribe information accurately

5.2 Verify the accuracy of records following workplace procedures

5.3 File and store workplace records in accordance with workplace procedures

5.4 File all reference documents logically and keep them up-to-date and secured

5.5 Observe workplace confidentiality standards
Foundation Skills
This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements
Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:
- Australian and international standards, guides and the National Association of Testing Authorities (NATA) Technical Notes that cover the application of international system of units (SI), accuracy of measurement methods and results, and quantifying uncertainty in measurement
- national measurement regulations and guidelines
- validated sampling and test procedures and spreadsheets developed in-house for assay and process calculations where applicable
- workplace procedures, manuals and/or plans covering quality assurance, customer service, material safety data sheets (MSDS), equipment, supplier catalogues and handbooks

Data
Data includes:
- worksheets, spreadsheets and/or databases linked to information management systems
- results of observations, tests and measurements, analyses, surveys and/or quality assurance and control assessments

Calculations
Calculations are performed with or without a calculator and using computer software, spreadsheets, databases and statistical packages

Records
Records include information associated with one or more of:
- purchase of equipment and materials, service records
- safety procedures
- history of calibration and test results

**Work health and safety (WHS) and environmental management requirements**

WHS and environmental management requirements include:
- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

**Links**

Companion Volumes, including Implementation Guides, are available at VETNet: https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b75f4b23-54c9-4ce9-a5db-d3502d154103
Assessment Requirements for MSL924001 Process and interpret data

Modification History
Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- retrieving coding, recording and checking data
- calculating scientific and statistical quantities with or without a calculator or computer software, including the following items:
  - converting units involving multiples and submultiples
  - scientific notation, significant figures, round off, estimate and approximate
  - transposing and evaluating formulae
  - fractions, decimals, proportions and percentages
  - mean
  - median
  - mode
  - standard deviation
- performing at least five (5) of the following calculations:
  - perimeters and angles
  - percentage and absolute uncertainties in measurements and test results
  - areas (m²) and volumes (mL, L, m³) of regular shapes, such as packaging
  - dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability
  - ratios, such as mass to mass, mass to volume and volume to volume percentages
  - concentration, such as molarity, g/100mL, mg/L, mg/L, ppm, ppb, dilution mL/L
  - average count, colonies per swab surface and cell counts, such as live and dead/total
  - process variables, such as pressure, gauge pressure, velocity and flow rates
  - biological oxygen demand (BOD), chemical oxygen demand (COD) and total organic carbons (TOC)
  - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability, % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
  - mechanical properties, such as stress, strain, moduli and force
  - presenting accurate results in the required format (significant figures, uncertainty units)
- preparing and presenting data in the following formats:
• tables
• graphs
• line graphs
• histograms
• pie charts, bar charts and control charts
• semi-quantitative observations expressed on a scale (e.g. 1 to 4 or + to ++++)
• recognising and interpreting significant points, anomalies and trends in data
• maintaining the confidentiality of data in accordance with workplace and regulatory requirements
• keeping accurate records that are up-to-date and secure.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

• concepts of metrology, including:
  • that all measurements are estimates
  • measurements belong to a population of measurements of the measured parameters
  • repeatability, precision, accuracy and significant figures
  • sources of error, and uncertainty associated with measurement steps
  • traceability
• the international system of units (SI)
• scientific and technical terminology relevant to job role
• procedures for coding, entering, storing, retrieving and communicating data
• procedures for verifying data and rectifying mistakes
• procedures for maintaining and filing records, and maintaining security of data
• work health and safety (WHS) and environment requirements.

Assessment Conditions

• Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
• Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
• This unit of competency may be assessed with:
  • MSL924002 Use laboratory application software
  • technical units, such as:
    • relevant MSL973000 series units of competency
    • relevant MSL974000 series units of competency.
• Holistic assessment methods include:
  • review of data worksheets, calculations, computer files (such as spreadsheets, databases and statistical analysis), graphs, tables and/or charts prepared by the candidate
  • review of records transcribed, maintained or stored by the candidate
  • feedback from supervisors and peers
  • questions to assess understanding of calculations, relevant procedures and trends in data
  • observation of the candidate as they process data, file and store records.
• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • data sets and records
  • a calculator
  • spreadsheets, computer software, databases and statistical packages
  • computer and relevant software or laboratory information system
  • relevant workplace procedures.
• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
• The assessor must demonstrate both technical competency and currency.
• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience
• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

Companion Volumes, including Implementation Guides, are available at VETNet: https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b75f4b23-54c9-4ce9-a5db-d3502d154103
MSL924002 Use laboratory application software

Modification History
Release 1. Supersedes and is equivalent to MSL924002A Use laboratory application software

Application
This unit of competency covers the ability to use and apply computer software in the laboratory, field and/or production plants for analysis and reporting.

This unit of competency is applicable to technical officers and laboratory technicians in all industry sectors. It describes the application and use of software packages in the context of a laboratory or fieldwork. Typically this software would be for the storage, retrieval, analysis and display of information. There is no expectation that candidates would be able to customise the software to meet specific needs.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Data

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Access application software
   1.1 Identify software required for the task
   1.2 Open software from a personal computer or network terminal
   1.3 Use information sources to locate details of software
features and instructions for its use

2 Use software for specified purposes

2.1 Input a range of scientific data into a computing system
2.2 Conduct searches for the retrieval of required data
2.3 Use application features for efficient computation
2.4 Construct data sets and databases for numerical and graphical analyses

3 Produce reports of retrieved data and/or processed data

3.1 Analyse data using features of the software package
3.2 Select options for constructing data reports
3.3 Print the results of data analyses using features of the software package
3.4 Integrate data from diverse application software units in a report
3.5 Report the outcomes and rationale for database searches where appropriate
3.6 Reference data sources according to the style requirements of the workplace

4 Perform simple record housekeeping

4.1 Maintain archived data according to workplace standard procedures
4.2 Maintain hard copy data according to workplace standard procedures
4.3 Apply approved antivirus software and standard quarantine procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Standards, codes of practice, workplace standard procedures**

Where reference is made to Australian/international standards, industry codes of practice or workplace standard procedures, the latest version must be used.

**Information sources**

Information sources include, but are not limited to, one or more of:

- printed and/or online manuals of workplace standard instructions
- printed and/or online manuals for hardware and software
- on-screen instructions embedded in the software
- printed and/or online training materials that orient software to workplace needs
- online networks and communities of practice

**Software packages**

Software packages include:

- common applications, such as word processing, spreadsheets and databases
- graphical and statistical analysis applications
- database and laboratory information management systems

**Work health and safety (WHS) and environmental management requirements**

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant
Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL924002A Use laboratory application software

Links

Assessment Requirements for MSL924002 Use laboratory application software

Modification History

Release 1. Supersedes and is equivalent to MSL924002A Use laboratory application software

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- selecting the most appropriate software package for the task from the suite of software applications available
- using software for the analysis, reporting and management of laboratory and field data and information, such as quality control and instrument performance characteristics
- using software application features and instructions to input, save, analyse, sort, retrieve and display records and data
- using in-house software manuals to augment skills and solve operational problems
- using virus scanning software to protect in-house software and data.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- terminology associated with the software packages used in job role
- basic knowledge of the types of spreadsheet, database and data analysis packages that are available
- application of specific software package features to laboratory tasks relevant to job role
- relationship between the protocol for data input and file storage of the data
- general file and record maintenance
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).

This unit of competency may be assessed with:
- MSL925001 Analyse data and report results
- relevant MSL974000 series units of competency
- relevant MSL975000 series units of competency

Holistic assessment methods include:
- review of analysis tasks linking test results to the generation of reports by the candidate
- review of simple statistical and/or graphical analysis of quality control data completed by the candidate.

Access is required to all instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
- a computer network, personal computer or laptop
- software packages that cover databases, spreadsheets, statistical analysis and simple graphics output
- input and output data.

Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

The assessor must demonstrate both technical competency and currency.

Technical competence can be demonstrated through:
- relevant VET or other qualification/Statement of Attainment AND/OR
- relevant workplace experience.

Currency can be demonstrated through:
- performing the competency being assessed as part of current employment OR
- having consulted with a laboratory about performing the competency being assessed within the last twelve months

MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History
Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Application
This unit of competency covers the general cleaning of work surfaces, cleaning and storage of equipment and the monitoring of laboratory stocks under direct supervision.

This unit of competency is applicable to laboratory assistants and instrument operators working in all industry sectors.

This unit of competency forms a major part of the work of laboratory assistants. They work in accordance with work instructions and standard operating procedures (SOPs) which incorporate all relevant aspects of work health and safety (WHS) legislation and the codes, guidelines, regulations and Australian Standards applying to environmental hazards and dangerous goods.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Quality

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.
|   | **Clean work preparation areas** | 1.1 Clean preparation areas using appropriate cleaning agents and equipment according to workplace procedures |
|   |                               | 1.2 Remove spillages, if they occur, using appropriate agents, personal protective equipment (PPE) and workplace procedures |
|   |                               | 1.3 Collect and segregate wastes in accordance with workplace procedures, relevant codes and regulations |
|   | **Clean, maintain and store equipment** | 2.1 Collect used equipment, inspect for faults and, where necessary, remove from service |
|   |                               | 2.2 Use appropriate agents, apparatus and techniques to clean equipment |
|   |                               | 2.3 Store clean equipment in the designated locations and manner |
|   | **Monitor stocks of materials and equipment** | 3.1 Perform stock checks and maintain records of usage as directed |
|   |                               | 3.2 Store labelled stocks for safe and efficient retrieval |
|   |                               | 3.3 Inform appropriate personnel of impending stock shortages to maintain continuity of supply |
|   | **Maintain a safe work environment** | 4.1 Use established safe work practices and PPE to ensure personal safety and that of other personnel |
|   |                               | 4.2 Report potential hazards and/or maintenance issues in own work area to designated personnel |
|   |                               | 4.3 Minimise the generation of waste and environmental impacts |
|   |                               | 4.4 Dispose of waste in accordance with workplace procedures, relevant codes and regulations |
Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards, guidelines and codes covering WHS; laboratory design and construction; occupational protective equipment; labelling of workplace substances; storage, handling and transport of dangerous goods; environmental management; physical containment levels and facility types
- industry specific codes, regulations and guidelines, such as Australian Radiation Protection and Nuclear Safety Agency (ARPANS) Codes of Practice, Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations and Import Guidelines, gene technology regulations, National Health and Medical Research Council (NHMRC) Guidelines, and animal welfare

Typical equipment

Typical equipment includes, but is not limited to, one or more of:

- balances; glassware; plastic ware; glass, plastic and quartz cuvettes, pipettes, burettes and volumetric glassware
- blending, mixing and separating equipment, such as sieves and centrifuges
- autoclaves, dishwashers, refrigerators, freezers, ovens, hotplates, mantles, burners and muffle furnaces, microwave ovens, ultrasonic cleaners, incubators and water baths, and gas cylinders
- fume hoods, biohazard containers and biological safety cabinets
- microtomes and tissue processors, cell counters and staining machines
- colorimeters/spectrometers and polarimeters, light and fluorescence microscopes
- thermometers, thermohygrographs, hydrometers, conductivity meters and pH meters and ion-selective electrodes, noise meters,
melting point apparatus, viscometers and instrument chart recorders
- steel ruler/tapes and spirit levels, shovels, scoops, plates, rods, cylinder moulds and buckets
- riffles and splitters and mixers, compaction rammers and soil classification equipment, penetrometers, force measuring equipment and tensiometers, and hardness testing equipment
- animal cages
- vehicles

Typical materials

Typical materials include, but are not limited to, one or more of:
- consumable items, such as syringes, pipette tips and weigh boats
- PPE
- distilled water, reagents, chemicals, disinfectants, detergents, agar media and plates
- equipment spares, such as fuses, bulbs and batteries
- oils/lubricants, fuels, industrial gases and cryogenics, such as dry ice and liquid nitrogen
- paper and stationery
- reference samples and standards

Cleaning requirements

Cleaning requirements include one or more of:
- decontamination and/or disinfection
- hygiene monitoring
- minimising environmental impacts
- operation of automatic cleaning apparatus, such as pipette washers, ultrasonic cleaners and dishwashers
- sterilisation and disposal of wastes using boiling, high pressure air or steam, microwaves, chemicals, gas, filtration, ultraviolet radiation and autoclaving
- use of specialised techniques, such as chromic acid baths and soaking in hypochlorite

Preparation areas

Preparation areas include one or more of:
- benches
- fume cupboards
- sheds
- sinks
Agents for cleaning  Agents for cleaning include one or more of:
- cleaning solutions
- decontaminants
- organic solvents

Spillages  Spillages include one or more of:
- chemicals
- radioactive materials
- biologically active materials

Waste  Waste includes, but is not limited to, one or more of:
- broken glass and sharps
- disposable PPE
- spent reagents, spent or excess samples and test pieces, solvents and batteries
- used containers, boxes, bags and palettes, plastic and metals
- microorganisms

Stock records  Stock records include one or more of:
- calibration and maintenance history
- data sheets
- handbooks, warranty documents, catalogues, manuals and material safety data sheets (MSDS)
- records of usage, loans and breakages

Maintenance issues  Maintenance issues include, but are not limited to, one or more of:
- hygiene issues, prevention of contamination, cleaning, recycling and waste disposal
- checking materials and equipment are fit for purpose, equipment malfunction, and checking serviceability before storage
- potential hazards, incidents and emergencies, spillages, leakages, breakages and contamination
- stock requirements and shortages, and storage constraints

Hazards  Hazards include, but are not limited to, one or more of:
- sharps, broken glassware and hand tools
• aerosols from broken centrifuge tubes and pipetting
• microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids
• chemicals, such as acids, heavy metals, pesticides and hydrocarbons
• sources of ignition, flammable liquids and gases
• cryogenic agents, such as dry ice and liquid nitrogen
• electric shock
• fluids under pressure, such as steam and industrial gas cylinders
• crushing, entanglement and cuts associated with moving machinery or falling objects
• manual handling, working at heights and working in confined spaces
• occupational overuse syndrome, slips, trips and falls
• pedestrian and vehicular traffic
• solar radiation, dust and noise

**Established safe work practices**

Established safe work practices include, but are not limited to, one or more of:

• applying containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets, and Class PCII, PCIII, and PCIV physical containment facilities
• ensuring access to service shut-off points
• following established manual handling procedures for tasks involving manual handling
• handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer instructions
• identifying and reporting operating problems or equipment malfunctions
• labelling of samples, reagents, aliquoted samples and hazardous materials
• recognising and observing hazard warnings and safety signs
• reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/wastewater, gases, smoke, vapour, fumes, odours and particulates
• use of PPE, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots
WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time.
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c63a03b-4a6b-4ae5-9560-1e3c5f462baa
Assessment Requirements for MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History
Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Performance Evidence
• Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
  • following workplace procedures, relevant codes and guidelines when maintaining the laboratory/field workplace
  • applying information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
  • working safely and minimising exposure of hazards to self, others and the laboratory
  • safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
  • safely removing spillages and disposing of wastes
  • safely storing equipment and materials using workplace procedures, relevant codes and guidelines
  • monitoring and reporting stock levels and the condition of laboratory materials and equipment
  • keeping accurate, up-to-date records
reporting potential hazards and maintenance issues using workplace procedures.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:
• workplace procedures for the cleaning of work preparation areas, materials and equipment
• storage requirements for specific materials and equipment
• workplace procedures for minimisation and disposal of waste
• workplace procedures for monitoring of laboratory stocks
• work health and safety (WHS) and environment requirements.

Assessment Conditions
• Judgement of competence must be based on holistic assessment of the evidence.
  Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
• Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
• This unit of competency may be assessed with:
  • MSL943002 Participate in laboratory or field workplace safety

Holistic assessment methods include:
• observation of the candidate's techniques for cleaning and/or removal of spillages and waste disposal
• review of stock records completed by the candidate
• feedback from supervisors and peers
• questioning to assess required knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment.
• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • work preparation areas, stocks, materials and equipment, cleaning, decontamination and/or disinfection agents and equipment
  • personal protective equipment (PPE)
  • stock order firms, labels and records/forms.
• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
• The assessor must demonstrate both technical competence and currency.
• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience.
• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History
Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Application
This unit of competency covers the ability to perform set-up, pre-use and in-house calibration/validation checks on equipment and assist with its maintenance.

This unit of competency is applicable to laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Perform set-up and pre-use checks of laboratory equipment

- 1.1 Perform laboratory equipment set-up and pre-use checks in accordance with workplace procedures
- 1.2 Perform safety checks in accordance with relevant workplace and instrumental procedures
- 1.3 Identify faulty or unsafe components and equipment and report to appropriate personnel
- 1.4 Complete equipment log books/records to meet
2  **Perform calibration checks**

   2.1 Start up equipment according to operating procedures
   2.2 Use specified standards for calibration check
   2.3 Check equipment in accordance with calibration procedures and schedules
   2.4 Record all calibration data accurately and legibly
   2.5 Compare data with specifications and/or previous records to identify non-compliant equipment
   2.6 Quarantine out-of-calibration equipment

3  **Assist with equipment maintenance**

   3.1 Ensure all equipment work areas are clean during and after equipment use
   3.2 Perform basic maintenance in accordance with workplace procedures
   3.3 Clean and store equipment according to workplace and/or manufacturer’s specifications/procedures
   3.4 Identify and replace, repair or dispose of damaged/worn equipment as appropriate

4  **Maintain records**

   4.1 Record and report information on unsafe or faulty equipment according to workplace procedures

**Foundation Skills**

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- National work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines
- Industry specific codes, regulations and guidelines, such as good laboratory practice (GLP)
- Workplace documents, such as standard operating procedures (SOPs), quality and equipment manuals, calibration check and maintenance schedules, material safety data sheets (MSDS) and safety procedures, material, production and product specifications, production and laboratory schedules, workplace recording and reporting procedures, and waste minimisation and safe disposal procedures

Typical equipment

Typical equipment includes, but is not limited to, one or more of:

- Balances; glassware; plastic ware; glass, plastic and quartz cuvettes, pipettes, burettes and volumetric glassware
- Blending, mixing and separating equipment, such as sieves and centrifuges
- Autoclaves, dishwashers, refrigerators, freezers, ovens, hotplates, mantles, burners and muffle furnaces, microwave ovens, ultrasonic cleaners, incubators and water baths, and gas cylinders
- Fume hoods, biohazard containers and biological safety cabinets
- Microtomes and tissue processors, cell counters and staining machines
- Colorimeters/spectrometers and polarimeters, light and fluorescence microscopes
- Thermometers, thermohygrographs, hydrometers, conductivity meters and pH meters and ion-selective electrodes, noise meters, melting point apparatus, viscometers and instrument chart recorders
- Steel ruler/tapes and spirit levels, shovels, scoops, plates, rods, cylinder moulds and buckets
- riffles and splitters and mixers, compaction rammers and soil classification equipment, penetrometers, force measuring
equipment and tensiometers, and hardness testing equipment

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time.
- applying standard precautions relating to the potentially hazardous nature of samples.
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance.

Assessment Requirements for MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History
Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- performing set-up and pre-use checks for at least three (3) items of equipment
- recognising non-standard behaviour of equipment
- performing calibration checks for at least two (2) items of basic equipment using standard procedures
- obtaining reliable calibration data with the required accuracy and precision
- identifying non-compliant equipment by comparing calibration data with specifications and/or previous data records
- following workplace data recording and reporting procedures
- performing basic cleaning and/or maintenance tasks for at least three (3) items of equipment
- following all relevant work health and safety (WHS) and environmental management requirements.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:

- role and importance of regular calibration checks and maintenance of equipment
- function of key components of the equipment and details of the pre-use, calibration and safety checks and operating procedures for items of equipment used
- sources of uncertainty in equipment operation and their control
- basic equipment cleaning, maintenance and storage procedures for items of equipment used
- workplace procedures for recording data and reporting results
- relevant hazards, WHS and environmental management requirements.

Assessment Conditions
- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.

Foundation skills are integral to competent performance of the unit and should not be assessed separately.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).

This unit of competency may be assessed with:
- MSL973001 Perform basic tests

Holistic assessment methods include:
- review of equipment log book entries, calibration data and maintenance records generated by candidate
- feedback from peers and supervisors about the candidates ability to perform calibration checks and assist with basic maintenance
- observation of the candidate performing equipment set-up, pre-use checks, shutdown procedures, calibration checks, cleaning and maintenance tasks
- oral or written questioning to check required knowledge of workplace procedures for the safe use, cleaning and maintenance of the items of equipment used.

Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
- standard laboratory equipped with appropriate equipment and reference materials; cleaning, decontamination and/or disinfection agents and equipment; and personal protective equipment (PPE)
- workplace procedures, equipment manuals and information/records management system.

Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

The assessor must demonstrate both technical competence and currency.

Technical competence can be demonstrated through:
- relevant VET or other qualification/Statement of Attainment AND/OR
- relevant workplace experience.

Currency can be demonstrated through:
- performing the competency being assessed as part of current employment OR
- having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL934002 Apply quality system and continuous improvement processes

Modification History
Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

Application
This unit of competency covers the exercise of good laboratory practice (GLP) and effective participation in quality improvement teams. Personnel are required to ensure the quality and integrity of their own work, detect non-conformances and work with others to suggest improvements in productivity and quality.

This unit of competency is applicable to laboratory technicians working in all industry sectors who contribute to quality improvements in areas or processes associated with their own job function and/or specialisation. This unit of competency is relevant to experienced technical officers who may work individually or as part of a team.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

**Foundation Skills**

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Standards, codes, procedures and/or workplace requirements**

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories,
quality management systems and plans, measurement management, and sampling and testing

- national work health and safety (WHS) standards and codes of practice, and National Association of Testing Authorities (NATA) accreditation program requirements
- national measurement regulations and guidelines
- specific codes, regulations guidelines, procedures and methods, such as Australia New Zealand Food Standards (ANZFS) Code, Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), National Health and Medical Research Council (NHMRC) Guidelines, and Therapeutic Goods Regulations
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- customer-specific requirements/standards

**Quality control procedures**

Quality control procedures include one or more of:

- standards imposed by regulatory and licensing bodies
- working to a customer brief or batch card and associated quality procedures
- checklists to monitor job progress against agreed time, costs and quality standards
- preparation of sampling plans
- the use of hold points to evaluate conformance
- the use of inspection and test plans to check compliance

**Sustainable work practices**

Sustainable work practices include, but are not limited to, one or more of:

- examining work practices that use excessive electricity
- switching off equipment when not in use
- regularly cleaning filters
- insulating rooms and buildings to reduce energy use
- recycling and reusing materials wherever practicable
- minimising process waste

**Quality improvement**

Quality improvement tools and techniques include using one or
tools and techniques

more of:
- plan, do, check, act (PDCA)
- Ishikawa fishbone diagrams and cause and effect diagrams, logic tree, similarity/difference analysis, Pareto charts and analysis, force field/strength, weakness, opportunities, threats (SWOT) analysis
- run charts, control charts, histograms and scattergrams to present routine quality control data
- statistical analysis of quality control data, mean, median, mode, ranges and standard deviations

Communication

Communication includes interactions with one or more:
- supervisors, managers and quality managers
- administrative, laboratory and production personnel
- internal/external contractors, customers and suppliers

Quality improvement opportunities

Quality improvement opportunities include, but are not limited to, one or more of:
- production processes
- hygiene and sanitation procedures
- reductions in waste and re-work
- laboratory layout and work flow
- safety procedures
- communication with customers
- methods for sampling, testing and recording data

Documenting and reporting information about quality

Documenting and reporting information about quality includes, but are not limited to, one or more of:
- verbal responses
- data entry into laboratory or workplace database
- brief written reports using workplace proformas

WHS and environmental management requirements

WHS and environmental management requirements include:
- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially
hazardous nature of samples

- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

Links

Assessment Requirements for MSL934002 Apply quality system and continuous improvement processes

Modification History

Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
- applying relevant quality control procedures and regulatory requirements to ensure the quality and integrity of the products/services or data provided in work area
- applying and promoting sustainability principles and work practices in work area
- detecting non-conforming products or services and recognising opportunities for improvements in work area
- using at least three (3) quality improvement tools and techniques to analyse performance in work area
- applying effective problem-solving strategies, such as identifying inputs and outputs, sequencing a process, identifying and rectifying a problem step, and root cause analysis
- following workplace procedures for recording and reporting information about quality
- implementing and monitoring approved actions, changes and improvement strategies consulting and working with other team members to suggest improvements in productivity and quality.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:
- business goals and quality requirements associated with job function and/or work area as a basis for decision making and action
- scientific and technical requirements of the processes, procedures, equipment and instrumentation associated with the candidate’s work tasks and duties
- specifications for laboratory products and services in the work area
- sustainable energy principles
- workplace procedures associated with the candidate’s regular technical duties
- layout of the workplace, divisions and laboratory
- organisational structure of the workplace
- lines of communication
- role of laboratory services to the workplace and customers
- work health and safety (WHS) and environment requirements.
Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
  - MSL924001 Process and interpret data
  - MSL954001 Obtain representative samples in accordance with sampling plan
  - relevant MSL974000 series units of competency
  - relevant MSL975000 series units of competency
- Holistic assessment methods include:
  - review of documentation completed by the candidate as part of regular quality control feedback from supervisors and/or customers regarding quality of products/services and/or data regularly provided by the candidate observation of the candidate's performance and participation in quality improvement teams over time in the workplace review of reports from quality improvement teams where the candidate's role is clearly outlined and verified verified reports of improvements suggested and implemented by the candidate individually use of suitable simulations and/or a pilot plant and/or a range of quality improvement case studies and scenarios.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - workplace quality manual and procedures, quality control data/records
  - customer complaints and rectifications.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience.
Assessment Requirements for MS1934002 Apply quality system and continuous improvement processes

Date this document was generated: 3 September 2020

- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL934003 Maintain and control stocks

Modification History
Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Application
This unit of competency covers the ability to order, maintain and control the use of laboratory materials and/or equipment in the work area.

This unit of competency is applicable to technicians and technical officers working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

1. Label, document and store stocks in accordance with relevant standards and specific safety requirements
1.2 Follow stock rotation procedures to maximise use of stocks within permitted shelf life
1.3 Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level |
1.4 Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate

1.5 Initiate quality control sampling and testing procedures when appropriate

1.6 Report stock problems outside own knowledge and authority limitations to relevant personnel

2 Order and receive materials and equipment

2.1 Determine requirements of customers and suppliers using appropriate communication and interpersonal skills

2.2 Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions

2.3 Place and/or follow up approved orders using workplace systems and procedures

2.4 Check condition of received goods and take appropriate action

3 Maintain stock records

3.1 Record all relevant details accurately using the specified forms/computer system

3.2 Ensure that written information is legible and indelible

3.3 File all records in the designated place

4 Maintain a safe work environment

4.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel

4.2 Minimise the generation of wastes and environmental impacts

4.3 Ensure the safe collection of redundant/ outdated stocks for subsequent disposal
Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory design and construction; laboratory safety; quality and environmental management; and labelling, storage, handling and transport of hazardous substances
- national work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines, and national environmental protection measures
- specific legislation, regulations, codes, guidelines, procedures and methods, such as Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), dangerous goods, animal welfare, Australian Quarantine and Inspection Service (AQIS) Export Control Orders and Import Guidelines, Australian Radiation Protection and Nuclear Safety Agency (ARPANSA), gene technology, and National Health and Medical Research Council (NHMRC)
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- customer database and supplier catalogues, customer-specific requirements/standards, internal/external stock orders and overdue actions

Workplace

Workplace procedures include, but are not limited to, one or more of:
procedures

- ordering, purchase and receipt of stocks
- verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes)
- organisation of compatible batch or lot numbers
- storage of stocks, stock control and rotation of stock
- quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins)
- reporting non-conformances

Records

Records include, but are not limited to, one or more of:

- current inventories, stock usage, orders and progress of orders
- equipment servicing and repairs
- quality control sampling, testing and stock rotation

Hazards

Hazards include, but are not limited to, one or more of:

- electric shock
- chemicals, such as acids and hydrocarbons
- microbiological organisms associated with blood and blood products
- radioisotopes
- sharps, such as broken glassware
- disturbance or interruption of services
- manual handling of heavy boxes
- fluids under pressure and industrial gas bottles

Safety procedures

Safety procedures include:

- use of personal protective equipment (PPE), such as hearing protection, gloves, safety glasses, coveralls and safety boots
- ensuring access to service shut-off points
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Assessment Requirements for MSL934003 Maintain and control stocks

Modification History
Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accessing online databases and/or catalogues efficiently
- following workplace procedures for predicting and/or determining demand for stock; and researching, ordering and receiving stock, materials and equipment
- maintaining stocks of materials and equipment at prescribed levels for the work area, through regular inspections, timely ordering of replacement items and follow-up of late orders
- performing quality control sampling and testing and rotating stock in accordance with workplace procedures
- managing peak and seasonal variations in stock usage and production conditions
- interpreting labelling information (lot number, batch and date) and material safety data sheets (MSDS) correctly
- applying procedures for safe (manual) handling, storage and transport of stocks
- completing and recording all stock records and documentation accurately
- demonstrating effective communication and interpersonal skills when dealing with customers and suppliers.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:

- terminology associated with ordering and storage of stocks
- laboratory stock, product and service information relevant to job role
- types of hazardous chemical reactions and the rationale for recommended storage systems
- workplace procedures and quality system requirements for stock control
- codes of practice and regulations concerning the labelling, handling, storage and transport of stock relevant to job role
- relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions
- Judgement of competence must be based on holistic assessment of the evidence.
  Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.

- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).

- This unit of competency may be assessed with:
  - MSL935004 Maintain instruments and equipment

- Holistic assessment methods include:
  - review of documentation for orders prepared by the candidate
  - examination of stock records maintained by the candidate
  - feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers
  - oral or written questioning to check knowledge of the maintenance and control requirements for a selection of stock
  - observation of the candidate handling stock and conducting quality control sampling and testing.

- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - stocks of materials and equipment
  - stock order forms and documentation
  - sampling and testing equipment
  - online information systems, inventories, print records, databases and catalogues
  - codes of practice and regulations concerning the handling, storage and transport of the stock.

- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

- The assessor must demonstrate both technical competence and currency.

- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience.

- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973007 Perform microscopic examination

Modification History
Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Application
This unit of competency covers the ability to set up a light microscope for optimum resolution, to prepare routine samples and to observe, identify and report sample characteristics.

This unit of competency is applicable to laboratory or technical assistants in all industry sectors. The unit of competency covers limited interpretation and analysis of results. Troubleshooting of equipment and procedures is not required.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

### Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Standards, codes, procedures and/or workplace requirements**

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- National work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- Specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements, principles of good laboratory practice (GLP), and Australian code of good manufacturing practice for medicinal
products (GMP)

- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- workplace procedures for microscopic examination of samples

### Preparation of samples

Preparation of samples includes, but is not limited to, one or more of:

- drying and cooling
- physical separation, centrifugation, filtration and chemical separation
- sub-sampling
- labelling
- aseptic transfer of specimen
- thin film or smear on a slide
- fixing of films to minimise cell damage and the production of artefacts
- staining of fixed material to illustrate required characteristics
- mounting of stained films, sections and whole mounts to ensure long-term preservation
- permanent labels for smears, films and sections for presentation, storage and retrieval
- selection of diluent to preserve or enhance visibility of the cells to be counted
- serial dilution to enable individual cells to be reliably counted
- filling a counting chamber in one continuous flow without bubbles or overflow
- selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling

### Biological samples

Biological samples include, but are not limited to, one or more of:

- smears, impression smears, sections, squashes, films and whole mounts
- a monolayer of cells in smears and films
- fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques
- blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes
- stained sections of animal tissues using regressive haematoxylin
and eosin to differentiate cytoplasmic and nuclear detail
- differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium)
- stained whole mounts of helminths
- whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae
- pond water organisms
- onion root tip squash
- midstream sample of urine

### Physical samples
Physical samples include, but are not limited to, one or more of:
- sand
- asbestos fibres
- coal samples
- construction materials for testing
- geological specimens

### Sample characteristics
Sample characteristics are restricted to what can be viewed by bright light microscopy and include, but are not limited to, one or more of:
- shape and size of particles
- presence of contamination
- colour
- consistency and variability
- number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains)
- type of cells, percentage of atypical cells, presence/absence of cells, size of cells, viable and non-viable cells and trajectory
- presence of stained material, such as starch
- colour/staining and morphology
- motility

### Workplace safety procedures
Workplace safety procedures include, but are not limited to, one or more of:
- ergonomic layout, correct illumination and organisation of workbench
- use of biohazard containers and laminar flow cabinet
- correctly labelling reagents and hazardous materials
- use of PPE, such as safety glasses, gloves and coveralls
- handling and storing hazardous materials and equipment in
accordance with labels, MSDS and manufacturer instructions

- regularly cleaning and decontaminating equipment and work areas

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time

- applying standard precautions relating to the potentially hazardous nature of samples

- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL973007 Perform microscopic examination

Modification History
Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely performing microscopic examination of at least three (3) different samples and correctly identifying and reporting the characteristics of each
- checking suitability of samples, such as labelling, spillage, spoilage due to incorrect storage and transport conditions, temperature control and suitability for the examination
- safely preparing routine biological and/or physical samples in accordance with workplace procedures or standard methods
- checking the quality of prepared samples, such as:
  - clean and scratch-free microscope slides to reduce artefacts
  - preparation according to specified procedure/method
  - homogeneous suspension of sample
  - films and smears that have been fixed rapidly
  - thin films with a monolayer of cells
  - appropriate whole mounts for intact organisms
  - correct sample identification during and after processing
- performing pre-use checks of equipment, such as calibration, routine cleaning and maintenance, and use by dates of reagents
- setting up a light microscope for optimal resolution
- accurately observing, identifying and reporting sample characteristics
- performing counts on samples and basic measurements using grids
- performing accurate calculations as required by the method, such as:
  - dilutions
  - percentage viability
  - number of cells in original sample after dilution
  - calculation of cells/ml in a number of squares of a counting chamber
- interpreting and recording test results reliably
- logging and tracking samples through all steps from sample receipt to completion of the examination and reporting
- minimising cross-contamination and contamination of the laboratory and environment
- using personal protective equipment (PPE) and safety procedures to maintain personal safety and that of others
• handling/storing samples and equipment and collecting/disposing of waste in accordance with workplace procedures.

**Knowledge Evidence**

Must provide evidence that demonstrates knowledge of:

• nature of samples, sample preparation methods, methods of examination and associated hazards
• parts and functions of a light microscope and steps taken to optimise the resolution of images
• importance and appropriate use of controls and certified reference materials
• workplace and/or legal traceability requirements
• relevant work health and safety (WHS) and environment requirements.

**Assessment Conditions**

• Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
• Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
• This unit of competency may be assessed with:
  • MSL922001 Record and present data
  • MSL933002 Contribute to the achievement of quality objectives
  • MSL943002 Participate in laboratory or field workplace safety
  • MSL953001 Receive and prepare samples for testing
• Holistic assessment methods include:
  • review of data records prepared by the candidate, such as counts, observations and results
  • feedback from supervisors and peers about adherence to workplace procedures and sample preparation/examination methods
  • observation of the candidate performing microscopic examinations
  • oral/written questions about workplace procedures covering safe preparation and examination of samples.
Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:

- a standard laboratory equipped with appropriate equipment, including light microscopes and samples
- workplace procedures, standard methods and materials
- equipment, such as glass slides, counting chambers (e.g. haemocytometer), optical graticules and stage micrometers, and tissue culture flasks
- a light microscope, such as:
  - bright field illumination microscope up to 1000 x magnification
  - stereomicroscopes and dissection microscopes
  - compound microscope
  - phase contrast microscope
  - inverted microscope.

Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

The assessor must demonstrate both technical competence and currency.

Technical competence can be demonstrated through:

- relevant VET or other qualification/Statement of Attainment AND/OR
- relevant workplace experience.

Currency can be demonstrated through:

- performing the competency being assessed as part of current employment OR
- having consulted with a laboratory about performing the competency being assessed within the last twelve months.

| Release 1 | This version was released in *MSL Laboratory Operations Training Package Release 2.0.*  
Supersedes and equivalent to MSL974006 Perform biological procedures. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. |

Application

This unit of competency describes the skills and knowledge to interpret work requirements, prepare samples, and perform routine biological procedures. These procedures may involve several steps and are used to classify organisms and biologically active compounds by analysing their biological and/or chemical characteristics. This unit includes interpretation of results and troubleshooting obvious departures from standard procedures.

This unit of competency applies to technical assistants working in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- classify 2 organisms from 2 different kingdoms to species level using a dichotomous approach
- safely and accurately performed 3 multistep biological procedures, using a minimum of 2 different techniques from the following list:
  - multistep staining:
    - haematological
    - histological
    - microbiological
  - preparation and examination of samples to demonstrate mitosis microscopically
  - preparation and enumeration of microscopic samples
  - colorimetry
  - spectrophotometry
  - chromatography
  - electrophoresis
  - electrochemistry
  - multistep molecular technique
  - multistep immunological technique.

Knowledge Evidence

There must be evidence the candidate has knowledge of:
• biological principles and concepts underpinning tests and procedures associated with job role:
  • basic classification and taxonomy of organisms including prokaryotes and eukaryotes, bacteria, viruses, fungi, plants, animals, parasites and prions
  • interrelationships of biological systems including the carbon cycle and energy cycle
  • basic structure and function of a plant and animal cell and the respective organelles (plant and animal)
  • cell membrane activity, including diffusion (passive, facilitated and active), osmosis, tonicity and plasmolysis
  • plant and animal tissue types
  • phases of the cell cycle including phases of mitosis
  • mendelian genetics including inheritance, meiosis, karyotypes, dominant and recessive traits, genotypes, phenotypes, and pedigrees
  • basic structure and function of chromosomes, nucleic acids and proteins
  • chemical and physical characteristics of organic molecules
  • basic structure and function of including carbohydrates, fats and amino acids
  • basic role of biologically significance of ions, including calcium, iron, magnesium, sodium, potassium, chloride and phosphate
• purpose of procedures implemented (why they are used and what they demonstrate)
• calculation steps to give results in appropriate units and precision
• importance and appropriate use of controls and certified reference materials
• awareness of environmental sustainability issues as they relate to the work task
• legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all clinical information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

• use of suitable facilities, equipment and resources, including:
  • a standard laboratory equipped with appropriate test equipment and instruments, safety equipment, reagents and materials
  • standard operating procedures (SOPs) and testing methods
  • records, including:
    • test calibration results
    • equipment use, maintenance and servicing history
    • faulty or unsafe equipment
    • batch number, catalogue number and use-by-date for analytical kits.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

</tbody>
</table>

Application

This unit of competency describes the skills and knowledge to participate in laboratory investigations involving animals, plants and related environmental parameters. The animals or plants might be single specimens, parts of specimens or be in culture or under propagation. The investigations might also be part of experimental models that examine interactions of animals and/or plants and their environments. Investigations would generally relate to taxonomy, physiology and pathology, and would be oriented to scientific research, food production and manufacture, and to investigation of biological environments and ecosystems.

This unit applies to laboratory technicians and technical officers working in biological, biotechnology and environmental industry sectors. It is expected that all work would conform to statutory and work health and safety (WHS) codes of practice. This unit of competency assumes that personnel perform tests and procedures under the close supervision of scientific staff and that the workplace will equip its workers with relevant animal handling skills should they be required. The unit does not cover procedures related to the handling of vertebrates that are subject to national and state/territory animal care and ethics regulations.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL974021 Perform biological procedures
Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1  Process specimens and documentation
   1.1  Identify specimens and request forms that do not comply with minimum industry requirements for labelling, identification and test requests
   1.2  Record any discrepancies and indicate what action is required
   1.3  Log samples, recording details that allow accurate tracking and chain of custody

2  Participate in the identification and classification of species
   2.1  Record macroscopic and/or microscopic details of specimens to assist in their identification and classification
   2.2  Use taxonomic keys to assist in the identification and classification of species
   2.3  Perform laboratory analyses that can assist in identification and classification of species
   2.4  Preserve specimens for future reference
   2.5  Label preserved specimens for storage and reliable retrieval from collections

3  Maintain viability and integrity of specimens during experimentation
   3.1  Provide nutrients and environments to maintain viability of individual specimens and organisms being cultured or propagated
   3.2  Perform procedures and analyses to monitor the experimental environment
   3.3  Perform procedures and analyses to monitor the physiology of organisms in the experimental environment
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

3.4 Adjust nutrient requirements and environmental conditions as indicated by monitoring data

3.5 Report (to supervisors) data and phenomena that may risk viability of individual specimens or cultures

3.6 Report (to supervisors) data and phenomena that are incompatible with the experimental design parameters

4 Integrate laboratory and field data

4.1 Locate field data relevant to the study or experiment

4.2 Match field and laboratory data codes for tracking, reporting and chain of custody requirements

4.3 Log field and laboratory data into information systems

4.4 Assist with writing reports of experiments and related field studies

Foundation Skills
This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Oral communication skills to interact effectively and use appropriate scientific terminology and technical concepts to report data and phenomena that may risk viability of individual specimens or cultures, or are incompatible with the experimental design parameters.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information
Equivalent to MSL975017 Perform laboratory-based ecological techniques, Release 1.

</tr>
</tbody>
</table>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively identified and classified at least 5 different animal and plant species for scientific and experimental purposes
- processed, labelled, preserved and stored at least 5 different kinds of specimens, taking care not to contaminate sterile environments or specimens
- performed procedures and analyses to monitor the physiology of 5 different organisms/specimens in the experimental environment and maintained their viability.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- growth requirements of organisms that are subjects of laboratory or greenhouse culture or propagation relevant to job role
- general anatomy of plants and animals that is useful as classification data
- processes that are essential for preservation of plant and animal material for use as reference material
- relationships between field and laboratory data that are useful in giving commentary on the integrity or distress in biological environments
- rationale for selection of techniques used to monitor the experimental environment and the effects of variables on organisms in the experimental environment
- uses of environmental impact statements that incorporate the results of field and laboratory analyses
- workplace and/or legal traceability requirements
- awareness of environmental sustainability issues as they relate to the work task
• legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all client information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

• use of suitable facilities, equipment and resources, including:
  • equipment and resources for investigating the physiology of plants and animals in the laboratory
  • workplace procedures, sampling plans, test methods and equipment manuals
  • computers and programs for simulated experiments or data analysis
  • items of equipment, reagents, specimens and systems for botanical and zoological techniques
  • laboratory information management systems (LIMS), databases, record and filing systems, including specimen accessioning.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMSUP280 Manage conflict at work

Modification History
Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Application
This unit of competency covers the skills and knowledge required to manage conflict in a range of personal conflict situations.

This unit of competency applies to personnel who are required to liaise and cooperate with other members of the team and to work towards finding common ground and opportunities for problem resolution. It applies to any interactions in the workplace, including interactions between co-workers, between staff and customer/client, and between staff and supervisor.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

Competency Field
Support

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes
Performance criteria describe the performance needed to demonstrate achievement of the element
1. **Identify potential sources of conflict**
   1.1 Identify actions which are likely to promote a reaction in others
   1.2 Assess the other person’s needs and/or concerns
   1.3 Assess own ability to respond to the other person’s needs
   1.4 Recognise possible causes of conflict
   1.5 Identify potential conflict situations

2. **Identify range of alternative approaches**
   2.1 Discuss with the other person their needs and concerns
   2.2 Identify own needs and concerns and discuss with other person
   2.3 Identify possible approaches through which the needs and concerns of both may be met
   2.4 Develop a range of alternative approaches for achieving goals

3. **Resolve conflicts**
   3.1 Identify areas of common ground or objectives that can be mutually supported
   3.2 Agree on an approach which will meet the majority of objectives for both parties
   3.3 Implement the approach
   3.4 Check that the agreed requirements are being met and that conflict has been resolved

4. **Respond to problems**
   4.1 Identify possible problems in the conflict management process
   4.2 Determine problems needing action
   4.3 Determine possible causes
   4.4 Rectify problem using appropriate solution within area
of responsibility

4.5 Follow through items initiated until final resolution has occurred

4.6 Report problems outside area of responsibility to designated person

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Conflict

Conflict in the context of this unit refers to interpersonal conflict and may arise in any work-related context.

Potential sources of conflict

Potential sources of conflict include conflicts arising from one or more of the following:

- different learning/problem solving styles
- different work or personal priorities
- different personality styles
- conflicting key performance indicators (KPIs), work goals or targets
- different social, cultural, religious or ethnic background or different gender of sexual preference
- different interpretation of requirements or ‘the rules’
Approaches to resolving conflict
Approaches to resolving conflict will be based on direct communication and include one or more of the following:

- informal, face-to-face discussions
- formal/structured face-to-face discussions
- through the use of:
  - telephones and two-way radios
  - memos, faxes, letters or emails

Routine problems
Routine problems must be resolved by applying known solutions. Routine problems are predictable and include one or more of the following:

- anger or aggression arising from industrial relations matters
- disagreements over processes or work practices
- variations in opinions about circumstances or events
- interpersonal disputes arising from changes in personal circumstances

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to relevant procedures.

Unit Mapping Information
Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Links

Assessment Requirements for MSMSUP280 Manage conflict at work

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Performance Evidence

- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:
  - recognise situations, actions and verbal and non-verbal communication that indicate potential or actual conflict
  - communicate about needs and concerns of self and others and areas of common ground using:
    - appropriate verbal and non-verbal communication
    - statements that focus on issues and facts, not people and personalities
    - accurate reflection of people’s needs and concerns
  - implement conflict resolution approach and monitor its success
  - apply known solutions to routine problems
  - manage conflict as it arises.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- likely sources of conflict in own job/workplace
- indicators of potential conflict
- communication approaches to resolving conflict
- conflict resolution skills relevant to own job/workplace.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will use one or a combination of:
    - totally off the job, in which case it will use case studies and role plays as well as questions
    - evidence drawn totally from performance in the workplace
• will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency.

• may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.

• Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

• Assessment in a simulated environment should use evidence collected from one or more of:
  • walk-throughs
  • pilot plant operation
  • demonstration of skills
  • industry based case studies/scenarios
  • ‘what ifs’.

• Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).

• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

• Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

• Foundation skills are integral to competent performance of the unit and should not be assessed separately.

• As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

Links
Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027
MSTGN3003 Estimate and cost job

Modification History
Release 1. Supersedes and is equivalent to LMTGN3003B Estimate and cost job

Application
This unit of competency covers skills and knowledge required to estimate materials, labour and time requirements, and establish costs for products and services.

The unit of competency applies to estimating and costing products and services for an identified project, activity or operation.

Discretion, initiative and judgement must be demonstrated on the job, either individually or in a team environment. Work may involve referral of matters to other workplace personnel. Work is undertaken according to established procedures involving a range of products, services and equipment.

This unit of competency is applicable to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

Competency Field
Generic

Unit Sector
Not applicable
### Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1. **Gather relevant information about job**
   - **1.1** Obtain details of customer requirements through discussion with customer or from information supplied
   - **1.2** Develop details of products and services to be provided and any special provisions
   - **1.3** Determine delivery details and methods of transportation, where necessary
   - **1.4** Record details and document specifications

2. **Estimate materials, labour and time**
   - **2.1** Research, locate and interpret technical information about materials, equipment, products and services required for the job
   - **2.2** Estimate types, quality and quantities of materials required for work
   - **2.3** Estimate acceptable price range for required products
   - **2.4** Estimate labour requirements to perform required services
   - **2.5** Estimate time requirements to perform required services

3. **Calculate costs**
   - **3.1** Calculate total materials costs and labour costs
   - **3.2** Calculate transport and delivery costs for products, as required
   - **3.3** Determine allowances for overheads and mark-up percentages
   - **3.4** Calculate total job cost
   - **3.5** Calculate final cost to customer

4. **Document and**
   - **4.1** Use calculators, computers with appropriate software or other aids to estimate, calculate and verify costings
verify details according to workplace procedures

4.2 Document details of costs and charges

4.3 Obtain verification of costs, calculations and other details by other enterprise personnel, as required

4.4 Prepare customer quotation in appropriate format to meet required enterprise or industry standards

4.5 Document and record details for future reference

Foundation Skills
This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTGN3003B Estimate and cost job

Assessment Requirements for MSTGN3003 Estimate and cost job

Modification History
Release 1. Supersedes and is equivalent to LMTGN3003B Estimate and cost job

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting work orders, customer requirements, specifications and instructions for products and materials to be used
- locating and interpreting technical information about products, materials, equipment and operating procedures
- estimating and costing materials and equipment, labour, time, transport and overheads, on at least two (2) occasions
- calculating total costs of products or services
- calculating costs to customer and preparing quotation
- using calculators, computer programs and other aids to estimate, calculate and communicate costs
- documenting and communicating job-related information, including customer requirements; products, materials and labour required; costing calculations for products, materials and labour and special conditions in required format
- maintaining accurate records.

Knowledge Evidence
Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- products and services offered by the enterprise
- details of materials, products and equipment
- workplace costing procedures
- components of overheads costs
- components of direct labour costs
- work flow and manufacturing processes
- basic mathematical processes and formulas
- labour rates and approximate costs of products and materials
- use of calculators, computers and other technology
• industry standards for customer service and providing quotations
• workplace procedures
• recording and reporting practices.

Assessment Conditions
• Assessors must:
  • satisfy National Vocational Education and Training Regulator (NVR)/Australian Quality Training Framework (AQTF) assessor requirements
  • have vocational competency in estimating and costing jobs, at least to the level being assessed, with relevant industry knowledge and experience.
• Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
• The unit is applicable to all TCF sectors and assessment must ensure it is delivered to suit the industry it is being applied to.

Application

This unit describes the skills required to operate basic flow control and regulating devices in irrigation systems.

This unit applies to those working as field and operational staff with responsibility for using flow control and metering devices according to organisational procedures.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or in a team, under direct supervision using own familiar resources as required, while performing routine tasks in range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.
## Competency Field

Irrigation

## Elements and Performance Criteria

</tbody>
</table>
| **1. Monitor and regulate required flows in irrigation systems** | 1.1 Access and apply operating requirements for flows in irrigation systems.  
1.2 Use equipment to assist operational activities.  
1.3 Monitor, measure and record flows at designated locations and systems according to schedule.  
1.4 Identify potential operational problems and provide proactive advice.  
1.5 Adjust flow regulation and control mechanisms to increase and decrease flow. |
| **2. Record and report system adjustments** | 2.1 Produce information relating to flow adjustments.  
2.2 Collect, record and report information on flows and abnormalities. |
| **3. Respond to contingencies** | 3.1 Identify and assess potential risks and contingencies in the operation of flow control and regulating devices.  
3.2 Respond to potential and actual risks and contingencies.  
3.3 Inform relevant personnel within organisation of potential risks. |
Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- collecting and reporting system performance information
- interpreting data
- producing information, including at least one of:
  - meter reading reports
  - daily running sheets
- adjusting and maintaining flow system control mechanisms
- securing flow regulation devices
- identifying flow requirements
- preparing for and conducting flow monitoring
- identifying and reporting operational problems
- completing records and reports

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- impact of the principles of hydraulics on the operation of flows
- system layout
- risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site
Assessment Requirements for NWPIRR002 Operate basic flow control and regulating devices in irrigation systems

- system flow control mechanisms
- relevant lock-out procedures for mechanical and electrical installations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR005 Develop and review a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and review a surface water plan. It includes ensuring environmental considerations are met and source of supply is maintained. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to leaders working in water organisations with responsibility for the development and review of surface water resources including but not limited to rivers and streams, dam catchments, flood retarding, overland flow controls and related drainage. It does not include flood routing through storages.

Those undertaking this unit would work autonomously and lead personnel whilst performing sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation

Unit Sector

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
1 **Prepare for surface water flow and quality management**  
   1.1 Identify hazards, assess risks and implement control measures associated with surface water flow requirements  
   1.2 Identify, interpret and synthesise relevant data to monitor and test water flow, quality and quantity requirements, including release figures  
   1.3 Identify, interpret and analyse historic source water flow and system capacity information  
   1.4 Identify and interpret environmental factors impacting surface water flows and quality  
   1.5 Identify, interpret and review resource and operational protocols  
   1.6 Complete complex calculations and incorporate analysed results into the surface water plan  

2 **Develop the surface water plan**  
   2.1 Identify and interpret surface water management requirements  
   2.2 Identify, interpret and validate stakeholder requirements impacting surface water  
   2.3 Develop a surface water plan according to relevant legislation, industry standards and workplace procedures  
   2.4 Identify, investigate and report breaches of surface water management controls  

3 **Review the surface water plan**  
   3.1 Analyse and report deviations from planned performance measures  
   3.2 Review objectives of the management and implementation plans  
   3.3 Review parameters for water usage and quality through monitoring and testing programs  
   3.4 Report and recommend changes to plan objectives, workplace procedures and usage and quality parameters  
   3.5 Provide advice and guidance to water users and stakeholders
Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR063 Develop and review surface water management plan.

Assessment Requirements for NWPIRR005 Develop and review a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- developing and reviewing a surface water plan to ensure environmental considerations are met and source of supply is maintained
- developing effective surface water plans addressing the water organisation’s objectives and requirements
- gathering, interpreting and synthesising information including:
  - historical data
  - monitoring and testing results
  - relevant legislation, industry standards and workplace procedures
  - stakeholder requirements
- identifying and interpreting environmental factors
- identifying hazards, assessing risks and implementing control measures associated with surface water flow requirements
- preparing reports and recommendations for changes to the objectives of the surface water plan and its implementation
- reviewing the implementation and development plan
- reading and interpreting complex data and performing complex calculations to track and manage performance of surface water
- using data from testing and other monitoring arrangements to track the performance of the surface water plan and inform the review of the plan

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- climatic and weather characteristics and impacts
- changes to water flow and levels over time
- complex calculations
- hydraulic analysis
- physical assets associated with surface water management
• public and government reporting requirements
• relevant legislation, regulations, industry standards and workplace procedures relating to surface water
• relevant water data including:
  • flow
  • quality and quantity requirements
  • release figures
• rights of water authority control and management procedures
• risk management principles
• stakeholder requirements and rights associated with managing surface water
• surface water sources

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

• relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
• applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

</tbody>
</table>

1 Develop and implement monitoring and testing

1.1 Develop an implementation strategy for the surface water plan according to workplace procedures
programs

1.2 Coordinate management plan activities relating to the surface water plan and determine responsibilities and timelines for implementation

1.3 Plan, design and implement monitoring and testing programs

1.4 Identify hazards, assess risks and implement control measures for monitoring and testing programs

1.5 Gather historical surface water collection information and evaluate as input to the planning process

1.6 Monitor water usage, water flow and water quality according to the plan

1.7 Record and analyse test results and education programs

2 Monitor and evaluate performance of surface water plans

2.1 Review objectives of the surface water and implementation plans

2.2 Identify, investigate and report deviations of surface water flows and controls from management objectives

2.3 Monitor and review environmental factors impacting the collection of surface water

2.4 Make recommendations for changes to plan objectives and procedures and usage and quality parameters

2.5 Provide advice and guidance to water stakeholders

3 Report on monitoring and implementation activities

3.1 Identify and report deviations from the surface water plan

3.2 Review and report operational problems of controls and regulations from the surface water and implementation plans

3.3 Make recommendations for changes to plan objectives

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR072 Implement and coordinate surface water management plan.

Assessment Requirements for NWPIRR007 Implement and coordinate a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

• designing and implementing testing processes and programs
• gathering, interpreting and synthesising information to underpin the implementation of a surface water plan including:
  • current legislation and standards
  • effectiveness of plan controls
  • historical data
  • stakeholder requirements
  • water quantity and quality test results
• implementing management plans for surface water to ensure environmental considerations are met and source of supply is maintained
• monitoring and evaluating the outcomes of the surface water plan
• preparing reports and recommendations for future action
• providing advice about water usage and communicating with stakeholders
• reading and interpreting numerical data related to surface water and environmental factors

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

• climatic and weather characteristics and impacts
• environmental and sustainability considerations
• hydraulic analysis
• monitoring and performance procedures
• operation and interrelationships of surface water flows and controls
• operational and maintenance problems
• physical and regulatory control limitations
• relevant legislation, industry standards, regulations and workplace procedures
• risk management principles
• surface water system objectives

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:
• relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
• applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Application

This unit of competency describes the skills required to plan and prepare for the construction of open channels or drains and to complete construction operations and subsequent site restoration.

This unit applies to those working as field and operational staff involved in the construction of earthen channels and drains for stormwater or irrigation systems or the remodelling or reconstruction of unserviceable systems.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturers’ guidelines.

Those undertaking this unit would work under direct supervision, while performing routine tasks and ensuring minimal damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

</tr>
</tbody>
</table>

1. **Plan and prepare for construction work**
   1.1 Determine work requirements from design plans, specifications, instructions and work orders.
   1.2 Check site and identify hazards.
   1.3 Make appropriate drainage and diversion arrangements without damage to environment.
   1.4 Check equipment and open-cut excavation methods to ensure that safety requirements of task and site are met.
   1.5 Select suitable soil material.

2. **Construct channels or drains**
   2.1 Construct earthen channels, drains and batters to planned width, depth and gradient.
   2.2 Compact soil, apply additives and take earth samples.
   2.3 Check construction works to ensure that specifications are met.

3. **Restore work site and equipment**
   3.1 Check, maintain and store equipment, tools and materials.
   3.2 Restore work site and add environmental improvements or controls to complete work, according to plans.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

</tbody>
</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing reports and logs
- using safety and personal protective equipment
- using tools and machinery
- interpreting plans, charts and instructions
- applying procedures and standards
- applying channel, drain and batter construction techniques
- identifying soil types, mechanics and compaction rates
- selecting and operating appropriate compaction plant, including tamping foot and smooth drum roller
- operating communication systems
- performing work related calculations
- constructing open earthen channels and drains
- planning work and preparing work site according to given specifications and instructions
- cutting channels to specification
- compacting soil
- taking soil samples
- checking that work meets specifications
- cleaning and storing equipment
- restoring work site
Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- channel and drain system design basics
- channel and drain system layout
- environmental aspects of construction
- channel, drain and batter construction processes
- measures to reduce channel deterioration, infestation of weeds, pests and seepage
- relevant utilities and service providers
- safe use of lasers
- use of automatic levels
- basic levelling techniques
- profiles and boning rods
- survey principles
- soil types, mechanics and compaction rates
- capabilities of plant used for construction, including equipment operation, capacity and limitations
- communication systems
- work related calculations
- hazardous materials handling
- landscape and ground structure of work area
- risk factors and potential hazards of construction processes
- effects of weather and conditions on construction site or plant
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Application

This unit of competency describes the skills required to construct irrigation delivery or stormwater drainage assets on site and to install both constructed assets and prefabricated components.

This unit applies to those working as field staff with specific responsibility for ensuring that the construction and installation of irrigation or stormwater drainage assets is completed in a safe and timely manner.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under indirect supervision, while performing routine tasks and ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- planning meter installation and construction
- undertaking calculation of head, flow and measurements of pipes and pressure
- undertaking locational assessment and risk analysis for meter installation
- sampling and testing soil for backfill and installation structures
- analysing the impact of water infiltration on the stability of structures
- measuring the head of water to judge sufficiency for meter's accuracy
- checking power supply and links
- installing ancillary equipment
- positioning solar panels to maximise power collection
- undertaking a job safety analysis and checking hazards and safety requirements
- using and storing equipment on site
- determining excavation requirements
- calculating sump and headwall elevation and orientation
- calculating pipe and meter pit elevation, fall and presentation
- installing transducers and cabling safely
- interpreting manufacturer requirements for fitting meters in meter pits
- using techniques to protect meters from disturbance
- assessing the effectiveness of backfill
- undertaking site restoration
- identifying and analysing client requirements, site conditions and their impact on the types of meter required, and the design of the installation
Assessment Requirements for NWPIRR014 Install meters for rural water supplies  Date this document was generated: 3 September 2020

- identifying and analysing environmental conditions and limitations and the impact of work to be undertaken
- identifying and analysing safety risks and hazards and responding to remove risks and hazards
- preparing sites and equipment for installation
- identifying faults, changes and failure indicators

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the purpose and standards for non-urban water metering
- community expectations for water measurement and use
- standards for the installation of non-urban meters in open and closed conduit systems
- the social, environmental, economic and political responsibilities of water authorities in relation to meter installation
- requirements for checking the pattern approval of meters and compliance with meter installation standards
- meter manufacturers’ guidelines and installation manual for specific meters
- the organisation’s policies and procedures for water meter installation
- conditions for meter location and suitable installation assets and meters for the conditions
- causes of flow disturbance
- potential environmental causes of meter failure
- the organisation’s environmental impact guidelines
- maintenance requirements for meter facility within and open channel
- relevant safety requirements including confined space

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least two of the different fault types listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading and analysing electronic display
- inputting data into electronic controller
- working with low voltage wiring
- reading manufacturers’ instructions, plans, exploded drawings and parts catalogues
- reading verification marks
- using tags and seals
- confirming the site and the meter
- checking meter condition
- replacing components
- documenting the maintenance

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant organisational policies and procedures for water meter maintenance
- organisational rights and responsibilities
- manufacturers' maintenance procedures for specific meter types
- knowledge of checking pattern approval requirements
- standards for non-urban metering
Assessment Requirements for NWPIRR022 Maintain meters for rural water supplies

- GPS coordinates
- meter types and accuracy limits
- roles and responsibilities of maintenance personnel
- WHS guidelines
- environmental, cultural and heritage guidelines

**Assessment Conditions**

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Application

This unit describes the skills required to monitor the operation of flow control. This includes measuring and regulating devices, controlling water supply source systems and/or distribution systems.

This unit applies to those working as field staff with a responsibility for monitoring the operation of flow control, measuring and regulating devices, conducting maintenance and ensuring that problems and anomalies are rectified by specialist technicians.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturer specifications.

Those undertaking this unit would work under indirect supervision, performing routine tasks ensuring minimum damage to the environment, in a familiar context.
No licensing, legislative or certification requirements apply to unit at the time of publication.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and reporting operational problems
- collecting and reporting system performance information
- inspecting flow regulation, measuring and regulating devices
- producing reports and logs
- using communication systems
- giving and receiving instructions
- interpreting plans, charts and instructions
- interpreting policies, procedures and standards
- monitoring the operation of flow control, measuring and regulating devices
- selecting appropriate equipment and tools, including personal protective equipment
- identifying devices and equipment to be monitored and relevant operational specifications
- collecting and recording information on device performance
- conducting routine maintenance tasks and securing devices
- identifying and reporting problems and anomalies
- inspecting system and networks
- collecting and recording data on system performance
- reporting monitoring and inspecting findings
- identifying and reporting on system performance
Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- monitoring flow control, measuring and regulating devices’ performance
- system hydraulics
- system layout
- relevant utilities and service bodies
- communication systems
- materials handling
- environmental, landscape and ground structure of water distribution system and network risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site
- flow measurement procedures
- data collection and recording
- system flow control mechanisms and control systems
- lock out procedures for mechanical and electrical installations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

</tbody>
</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assessing environmental impact
- operating irrigation and/or domestic stock supply system
- checking channel flow
- identifying customer requirements for irrigated culture and environmental factors that impact on the irrigation system
- consulting historic system information and stakeholders as appropriate
- confirming performance requirements for an irrigation system management plan
- implementing monitoring and testing programs and investigating and reporting deviations from planned parameters
- evaluating performance of water deliveries and investigating and reporting deviations from agreed service levels
- evaluating performance targets
- analysing and reporting data
- identifying and reporting problems
- making recommendations for system performance or customer service improvements

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislation, policies and procedures
Assessment Requirements

- customer expectations and requirements
- impact of the principles of hydraulics on the operation of flows
- coordination processes
- principles of scheduling
- system layout and operations
- environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
- environment, landscape and ground structure of work area
- risk factors and potential hazards of irrigation and/or domestic and stock supply systems
- equipment operation, capacity and limitations
- water flow calculations
- gravity systems
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

<tr>
<td></td>
<td>• Assessment Requirements created drawing upon specified assessment information from superseded unit</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing basic reports and logs
- following plans, charts and instructions
- performing work related calculations
- operating irrigation and/or domestic stock supply system
- checking channel flow
- identifying control system faults
- preparing schedules for water deliveries for customer orders for irrigation and/or domestic stock supply systems
- analysing volumes and flow rates required for water deliveries
- monitoring and regulating system performance
- adjusting system according to demand
- coordinating flow regulating devices
- completing relevant documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- system hydraulics
- impact of the principles of hydraulics on the operation of flows
• coordination processes
• principles of scheduling
• system layout and operations
• policies and standard operating procedures
• communication systems
• environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
• environment, landscape and ground structure of work area
• risk factors and potential hazards of irrigation and/or domestic and stock supply systems
• equipment operation, capacity and limitations
• effects of weather and conditions on operation of site plant
• water flow calculations
• flow measurement procedures
• gravity systems
• control systems

**Assessment Conditions**

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Application

This unit describes the skills required to prepare work sites. The ability to follow work instructions, use a range of equipment and tools to prepare a safe work site and subsequently to restore the site to the required condition is essential to satisfactory performance.

This unit applies to those working as field and operational staff performing a wide range of functions that support construction, maintenance and operations processes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturer specifications.

Those undertaking this unit would work under supervision, performing routine tasks, in mostly familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- setting up compacting and reinstating a site
- interpreting and applying numerical data in specifications and plans
- excavating backfill
- preparing site for planting and plant vegetation
- interpreting plans, instructions, standard operating procedures and work requirements
- using tools and equipment
- identifying and responding to operational problems
- planning work site layout
- selecting, using, maintaining, cleaning, storing and securing materials and equipment
- clearing and preparing work site according to specifications
- restoring work site
- cleaning, maintaining and storing equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS
- risk factors and potential hazards of site preparation and restoration
- environmental aspects of site preparation and restoration
• trenching, shoring and excavation management
• excavation procedures and site restoration
• relevant utilities and service bodies

- PC 2.1 reworded
- PC 3.1 revised

Application

This unit describes the skills required to work near utility services during the construction, repair or installation of utilities’ infrastructure. Work activities may involve trench excavation or the application of trenchless technologies for installation or repair.

This unit applies to those involved in the construction, repair or installation of underground utility infrastructure and locating, identifying and protecting existing utilities’ infrastructure to prevent damage, injury, death or loss of service.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under supervision, performing routine tasks, in mostly familiar context ensuring minimum damage to the environment.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

• locating and identifying utilities
• assessing and identifying risk of potential hazards associated with each utility
• responding to all types of emergencies relating to utility services
• using basic mathematics for calculations and measurement
• communicating with employees, other service providers and customers
• gathering information regarding location of utilities at a particular site
• applying safe work methods for locating and protecting utilities at or near a work site
• selecting and using tools and equipment
• monitoring use of equipment
• using agreed procedures and signals to ensure timely warnings of proximity to utilities’ apparatus
• protecting and supporting apparatus during performance of work tasks and during site restoration
• applying emergency procedures in response to a range of specific incidents

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.
• published guidelines for working near utility services in the state or territory in which
work is being undertaken
• system layout
• environmental aspects of excavation
• relevant utilities and service bodies
• communication systems
• landscape and ground structure of work area
• risk assessment and identification of potential hazards associated with each utility
• emergency response procedures for all types of utility services
• equipment operation, capacity and limitations
• effects of weather and conditions on site or plant

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with
access to equipment and infrastructure appropriate to the outcome. Competency should be
demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPSOU006 Develop and manage a flood plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and manage a flood plan. It includes analysing and modelling data relating to flooding, developing effective management and warning systems and communicating outcomes concisely. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to those working as leaders with responsibility for the preparation of flood management strategies and flood warning systems. Those undertaking this unit would work autonomously with leadership responsibilities, while performing complex tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Source

Unit Sector

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1 Plan and prepare for flood operations</td>
<td>1.1 Access and interpret historical rainfall run-off and flooding regimes of specific catchments</td>
</tr>
</tbody>
</table>
1.2 Collate and analyse simulated, hypothetical and estimated rainfall intensity data and model catchment

1.3 Estimate and record flood levels, extents and flow rates

1.4 Identify and interpret storage asset specifications including regulatory requirements, industry standards and workplace procedures

1.5 Identify resources, environment and stakeholders at risk during a flood event

2 Develop a flood plan

2.1 Consult with stakeholders to obtain input for flood planning

2.2 Develop and document a plan for managing the flood impact on a storage asset

2.3 Confirm performance measures for flood operations

2.4 Develop plan components and activities for implementation

2.5 Develop a flood plan according to relevant legislation, industry standards, workplace procedures and environmental requirements

3 Monitor and evaluate flood plan

3.1 Assess and record a flood event according to industry standards and workplace procedures

3.2 Evaluate the roles of storage and retarding basins safety and flood attenuation strategies

3.3 Evaluate current flood classifications and impacts according to flood plan

3.4 Formulate planning controls for flood plain and waterway management

3.5 Evaluate current flood warning systems according to flood plan

3.6 Recommend and develop changes to existing flood plain and waterway management controls and warning systems

4 Report on implementation of the plan

4.1 Collate, analyse and record information according to workplace procedures
4.2 Prepare and present reports to relevant persons

4.3 Communicate findings and recommendations to stakeholders according to workplace procedures and relevant regulations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to NWPSOU028 Prepare and report on data related to flood operations.

Links

Assessment Requirements for NWPSOU006 Develop and manage a flood plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing and developing flood mitigation warning systems and strategies
- analysing, interpreting and modelling flood data
- assessing and recording a flood event
- communicating flood planning findings with stakeholders and relevant persons
- developing a flood plan including:
  - documenting an implementation plan
  - identifying plan components and activities for completion
  - specifying environmental requirements
- developing critical flood warning systems
- developing strategies to mitigate the impact of potential future floods
- identifying and interpreting storage asset specifications

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- catchment hydrology principles including the roles of:
  - retarding basins
  - safety and flood attenuation strategies
  - water storage
- current flood classifications and flood warning systems
- performance measures for flood operations
- relevant documentation associated with developing and managing a flood plan including:
  - industry standards
  - workplace procedures
- relevant legislation and regulatory requirements associated with developing and managing a flood plan including:
  - by-laws
Assessment Requirements for NWPSOU006 Develop and manage a flood plan

- environmental legislation
- work health and safety (WHS) legislation
- planning schemes
- storage asset specifications
- water flow measurement and flow routing models

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Assessment Requirements for NWPSOU007 Implement and coordinate a catchment plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing, interpreting and recording test results
- communicating responsibilities of the catchment plan with personnel and stakeholders
- confirming performance measures for the catchment plan
- designing and implementing monitoring and testing activities
- developing implementation plans including objectives and requirements specified in the catchment plan
- evaluating objectives and performance measures of the catchment plan and reporting deviations
- identifying and reporting investigation results
- gathering, interpreting and synthesising information for the water catchment plan including:
  - environmental impacts
  - historical data
  - plan components
  - relevant legislation and industry standards
  - stakeholder requirements
  - water quality test results
- implementing and managing activities in water catchments that impact on water yield and quality
- performing activities associated with implementing and managing catchment plan components
- preparing reports and recommendations for future action

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- environmental impacts of water catchment
- catchment plan development and components
• problem identification and investigation
• relevant information associated with implementing and coordinating a water catchment plan including:
  • historical records and data
  • water industry standards
  • water industry legislation and regulations
  • workplace policies and procedures
• risk management principles
• water quality determinants

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:
• relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
• applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

|         | • Unit code updated  
|         | • Content and formatting updated to comply with the new standards  
|         | • All PC transitioned from passive to active voice  
|         | • Unit title changed to better reflect unit outcomes |

Application

This unit describes the skills required to operate and control reclaimed water irrigation and the use of reclaimed water for irrigation practices.

This unit applies to those working as staff members with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, performing routine tasks in a familiar context, ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

| 1. Assess sites for reclaimed water irrigation | 1.1 Identify soil/water interactions and soil properties important for plant growth.  
1.2 Identify soil sampling sites, collect samples and conduct soil testing.  
1.3 Classify soils using field texture, pH and structure analysis.  
1.4 Monitor and determine the water holding capacity of the soil. |
| 2. Assess quality of reclaimed water for irrigation | 2.1 Sample and test reclaimed water and interpret quality parameters.  
2.2 Determine crops suitable for the quality of reclaimed water and site conditions. |
| 3. Implement reclaimed water irrigation | 3.1 Identify basic features of irrigation systems.  
3.2 Operate and maintain irrigation equipment.  
3.3 Identify and apply irrigation scheduling options for reclaimed water.  
3.4 Produce water budgets using crop factors and climate data.  
3.5 Apply irrigation water and collect and monitor tail water or runoff. |
| 4. Respond to water or soil quality issues | 4.1 Develop irrigation management options to respond to water quality issues.  
4.2 Identify and apply requirements and options for soil ameliorants.  
4.3 Monitor infiltration and drainage. |
| 5. Compile reclaimed water irrigation records | 5.1 Compile reports from system data.  
5.2 Report observations outside defined parameters for further action. |

## Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.
Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

**Unit Mapping Information**

This unit supersedes and is equivalent to NWP362B Monitor, operate and control reclaimed water irrigation.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- monitoring and managing soil
- solving operational problems
- accessing, interpreting and applying relevant legislation
- apply environmental policies, plans and procedures
- assessing environmental risks at the work site
- identifying soil groups
- using safety and personal protective equipment
- sampling and testing soil and water
- monitoring, operating and controlling reclaimed water irrigation
- analysing critical aspects of reclaimed water reuse management relating to the project or site
- implementing reclaimed water reuse irrigation
- identifying environment, health and safety risks and impact on soil, stock and operators
- applying environmental procedures
- participating in and contributing to reviews of reclaimed water reuse procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- key principles of irrigation practices, including irrigation scheduling
- key characteristics of reclaimed water
- relevant legislative requirements
- standard operating procedures
- primary agencies involved in drinking water quality management
- water quality performance indicators
- an overview of the water supply system
- water hazardous agents and preventative strategies
- community and agency roles and responsibilities in monitoring water quality
- best management practices for the use of reclaimed water for irrigation purposes
- reclaimed water usage licensing procedures and requirements
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site or plant
- interpretation and use of material safety data sheets

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PMBWELD301 Butt weld polyethylene plastic pipelines

Modification History

Release 1. Supersedes and is equivalent to PMBWELD301B Butt weld polyethylene plastic pipelines

Application

This unit of competency covers the skills and knowledge required to butt weld polyethylene (PE) plastic pipelines. It applies to welding undertaken in the field and in factory conditions. Pipelines may be for transmission of gas or liquids.

This unit of competency applies to experienced operators who are required to calculate appropriate welding parameters to be used, set up equipment, perform butt weld, assess joints against specifications and solve problems within area of responsibility.

This unit of competency applies to an experienced operator demonstrating theoretical and technical knowledge and well developed skills in situations that require some discretion and judgement. The operator may work alone or as a member of a team or group and will work in liaison with other shift team members, team leader and supervisor, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Welding

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.
### Identify materials as being compatible for welding

1.1 Identify materials as polyethylene (PE) from specifications and work site instructions

1.2 Identify PE materials and pipes supplied as being compatible for welding from specifications

### Calculate appropriate pipe welding parameters

2.1 Identify welding machine type and operating data

2.2 Identify pipe materials and dimensions

2.3 Perform welding parameter calculations for individual welding machines and pipe details

2.4 Prepare field operational sheets as per enterprise requirements

### Maintain and calibrate welding equipment

3.1 Set up welding equipment and work area

3.2 Ensure safety equipment is available and operational

3.3 Identify non-conformance, report and rectify

3.4 Check operation and calibrate where required, heating, trimming, and pressure systems

### Perform welding to required standard

4.1 Assemble pipeline components in welding machine

4.2 Clean, align and trim pipe ends

4.3 Perform heating, welding, and cooling phases using calculated welding parameters

4.4 Monitor and record achieved weld parameters for each joint according to enterprise requirements

4.5 Clean up equipment when completed according to enterprise procedures

4.6 Clean up work site, dispose of scrap materials according to enterprise procedures

4.7 Use personal protective equipment (PPE) according to enterprise requirements
5  **Assess quality of completed joints**

- 5.1 Identify quality requirements for joints
- 5.2 Assess joints against specification requirements, and report results
- 5.3 Identify and report non-conformances according to enterprise requirements

### Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used.

Applicable legislation, regulations, standards and codes of practice include:

- health, safety and environmental (HSE) legislation, regulations and codes of practice relevant to the workplace, manual handling and hazardous materials
- Australian/international standards relevant to the materials being used and products being made, including one or more of:
  - AS/NZS 4130:2009 Polyethylene (PE) pipes for pressure applications, or its replacement
  - AS/NZS 4131:2010 Polyethylene (PE) compounds for pressure pipes and fittings, or its replacement
  - AS/NZS 4401:2006 Plastics piping systems for soil and waste discharge (low and high temperature) inside buildings - Polyethylene (PE), or its replacement
  - AS/NZS 5065:2005 Polyethylene and polypropylene pipes and fittings for drainage and sewerage applications, or its replacement
- ISO 21307:2011 Plastics pipes and fittings -- Butt fusion jointing procedures for polyethylene (PE) pipes and fittings used in the construction of gas and water distribution systems or its replacement.
- any relevant licence and certification requirements.

All operations to which this unit applies are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and such requirements the legislative requirements take precedence.

**Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or any combination of:
- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

**Tools and equipment**

Tools and equipment include:
- hydraulic activated butt welding machines
- pipe supports
- measurement devices, including one or more of:
  - pressure gauges
  - timers
  - temperature probes
  - callipers
  - computer-based pressure/temperature monitors
- cleaning equipment
- spray equipment.

Additional tools and equipment will be selected as required from:
- hand tools used in this process.
- hoists/lifting equipment not requiring any special permits or licences
- manual handling, aids such as hand carts and trolleys
- relevant PPE.

**Hazards**

Hazards must be identified and controlled. Identifying hazards requires consideration of:

- power tools, leads and power supplies
- hazardous products and materials
- cutting equipment
- sharp edges, swarf and scrap
- protrusions or obstructions
- slippery surfaces, spills or leaks
- rotational equipment or vibration
- smoke, dust, vapours or other atmospheric hazards
- high temperatures
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- equipment failures
- machinery, equipment and product mass
- other hazards that might arise.

**Problems**

Routine and non-routine problems must be resolved.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person.

Non-routine problems are unexpected problems or variations of previous problems and include one or more of:

- variations in quality
- emergency situations
- intermittent faults.
Operational knowledge includes one or more of:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people.

Routine problems are predictable and have known solutions and include one or more of:

- variable PE materials and pipes as supplied
- equipment malfunction or wear and tear
- variable field site conditions.

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to PMBWELD301B Butt weld polyethylene plastic pipelines
