Assessment Requirements for PMBWELD301 Butt weld polyethylene plastic pipelines

Modification History

Release 1. Supersedes and is equivalent to PMBWELD301B Butt weld polyethylene plastic pipelines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- read and interpret designs, plans, patterns, procedures, job specifications, instruments/control panels, material labels and safety data sheets (SDS)
- plan the welding process and sequence tasks
- use mathematics to calculate welding parameters
- set up butt welding equipment and materials/components to meet specifications
- operate the equipment to weld the materials
- monitor key variables, including:
  - temperature
  - pressure
  - alignment
  - colour and uniformity
  - surface finish/appearance
  - tolerance for weld/joint
  - consistency of weld
  - product output rate
  - mechanical strength of weld (e.g. tensile strength results)
  - product integrity and general conformance to specification
- make adjustments to remedy faults and nonconformity
- maintain output and product quality using appropriate instruments, controls, test information and readings
- calibrate equipment according to procedures
- identify hazards and apply relevant hazard controls
- apply safety procedures
- apply housekeeping procedures
- apply waste management procedures
- recognise early warning signs of equipment/processes needing attention or with potential problems
- distinguish between causes of problems, including:
  - operational problems
• instrument failure/malfunction
• electrical failure/malfunction
• mechanical failure/malfunction
• wrong readings
• equipment design deficiencies
• materials properties
• process variables
• raw material variations/contamination
• process abnormalities
• procedural errors
• recognise and prioritise problems requiring action
• resolve routine and non-routine problems
• communicate effectively with team/work group and supervisors
• complete workplace records.

**Knowledge Evidence**

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including knowledge of:

• function and operating principles of butt welding equipment, components and ancillary equipment
• types and application of butt welding processes and their effect on the welded product
• impact of variations in welding process variables and raw materials on product quality and production output
• factors which may affect product quality or production output and appropriate remedies
• characteristics of materials and their behaviour in relation to welding process variables and stages of production
• quality requirements at each production stage
• common adjustments in process variables and their impact on product quality and production output
• impact of variations in raw materials and equipment operation in relation to final product
• possible changes to materials properties to better suit specific process requirements
• routine and non-routine problems that may arise, the range of possible causes and appropriate actions
• organisation procedures relevant to the work environment/job role
• hierarchy of control
• hazards that may arise in the job/work environment and:
  • their possible causes
  • potential consequences
  • appropriate risk controls.
Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- In all plants it may be appropriate to assess this unit concurrently with units such as:
  - teamwork
  - communication.
- Where the assessees do not currently possess evidence of competency in PMBPROD287 Weld plastics materials, it may be co-assessed with this unit.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start and stop procedures and responding to problems
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from demonstration of skills and one or more of:
  - walk-throughs
  - pilot plant operation
  - industry-based case studies/scenarios
  - ‘what if’s’.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
• In addition the assessor or anyone acting in subject matter expert role in assessment shall demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.
• Technical competence can be demonstrated through one or more of:
  • relevant VET or other qualification/Statement of Attainment
  • appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  • appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
• Currency can be demonstrated through one or more of:
  • being currently employed undertaking the type of work being assessed
  • being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation’s policies and procedures
  • having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  • conducting on the job training/assessments of the type of work being assessed
  • being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMBWELD302 Electrofusion weld polyethylene pipelines

Modification History
Release 1. Supersedes and is equivalent to PMBWELD302B Electrofusion weld polyethylene pipelines

Application
This unit of competency covers the skills and knowledge required to weld polyethylene (PE) plastic pipes using electrofusion. It applies to welding of pipes and pipelines undertaken in the field and in factory conditions. Pipelines may be for transmission of gas or liquids.

This unit of competency applies to experienced operators who are required to select welding parameters to be used, set up equipment, perform electrofusion weld, assess joints against specifications and solve problems within area of responsibility.

This unit of competency applies to an experienced operator demonstrating theoretical and technical knowledge and well developed skills in situations that require some discretion and judgement. The operator may work alone or as a member of a team or group and will work in liaison with other shift team members, team leader and supervisor, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

5 Identify compatibility of commercial electrofusion control systems

5.1 Identify electrofusion welding control unit type and operating data
5.2 Identify pipe material and dimension compatibility with electrofusion fittings
5.3 Identify control unit compatibility with electrofusion fitting control

Foundation Skills
This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework
The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used.

Applicable legislation, regulations, standards and codes of practice include:

- health, safety and environmental (HSE) legislation, regulations and codes of practice relevant to the workplace, manual handling and hazardous materials
- Australian/international standards relevant to the materials being used and products being made, including one or more of:
  - AS/NZS 4129:2000 Fittings for polyethylene (PE) pipes for pressure applications, or its replacement
  - AS/NZS 4130:2009 Polyethylene (PE) pipes for pressure applications, or its replacement
  - AS/NZS 4131:2010 Polyethylene (PE) compounds for pressure pipes and fittings, or its replacement
  - AS/NZS 4401:2006 Plastics piping systems for soil and waste
discharge (low and high temperature) inside buildings - Polyethylene (PE), or its replacement

- ISO 21307:2011 Plastics pipes and fittings -- Butt fusion jointing procedures for polyethylene (PE) pipes and fittings used in the construction of gas and water distribution systems, or its replacement
- any relevant licence and certification requirements.

All operations to which this unit applies are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and such requirements the legislative requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or any combination of:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Tools and equipment

Tools and equipment include:

- calibrated output electrofusion control units
- pipe clamp supports
- measurement devices, including one or more of:
  - timers
  - temperature probes
  - callipers
  - computer-based output monitors
- cleaning equipment
- spray equipment.

Additional tools and equipment will be selected as required from:

- hand tools used in this process
- hoists/lifting equipment not requiring any special permits or licences
- manual handling aids, such as hand carts and trolleys
- relevant personal protective equipment (PPE).

**Hazards**

Hazards must be identified and controlled. Identifying hazards requires consideration of:

- power tools, leads and power supplies
- hazardous products and materials
- cutting equipment
- sharp edges, swarf and scrap
- protrusions or obstructions
- slippery surfaces, spills or leaks
- rotational equipment or vibration
- smoke, dust, vapours or other atmospheric hazards
- high temperatures
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- equipment failures
- machinery, equipment and product mass
- other hazards that might arise.

**Problems**

Routine and non-routine problems must be resolved.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person.

Non-routine problems are unexpected problems or variations of previous problems and include one or more of:

- variations in quality
- emergency situations
- intermittent faults.
Operational knowledge includes one or more of:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people.

Routine problems are predictable and have known solutions and include one or more of:

- variable PE materials and pipes as supplied
- equipment malfunction or wear and tear
- variable field site conditions.

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to PMBWELD302B Electrofusion weld polyethylene pipelines

Assessment Requirements for PMBWELD302 Electrofusion weld polyethylene pipelines

Modification History
Release 1. Supersedes and is equivalent to PMBWELD302B Electrofusion weld polyethylene pipelines

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:
- read and interpret designs, plans, patterns, procedures, job specifications, instruments/control panels, material labels and safety data sheets (SDS)
- plan the welding process and sequence tasks
- set up electrofusion welding equipment and materials/components to meet specifications
- prepare electrofusion joint assemblies
- operate the electrofusion control unit to weld the materials/components
- monitor key variables, including:
  - voltage
  - fusion time
  - cooling time
  - alignment
  - product output rate
  - product integrity and general conformance to specification
- maintain and calibrate equipment according to procedures
- identify hazards and apply relevant hazard controls
- apply safety procedures
- apply housekeeping procedures
- apply waste management procedures
- recognise early warning signs of equipment/processes needing attention or with potential problems
- distinguish between causes of problems, including:
  - operational problems
  - instrument failure/malfunction
  - electrical failure/malfunction
  - mechanical failure/malfunction
  - wrong readings
  - materials properties
  - process variables
  - raw material variations/contamination
- procedural errors
- recognise and prioritise problems requiring action
- resolve routine and non-routine problems
- communicate effectively with team/work group and supervisors
- complete workplace records
- do basic arithmetical manipulations, including additions, subtractions, divisions, fractions and percentages.

**Knowledge Evidence**

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including knowledge of:

- function and operating principles of electrofusion welding equipment, components and ancillary equipment
- impact of variations in welding process variables and raw materials on product quality and production output
- factors which may affect product quality or production output and appropriate remedies
- characteristics of materials and their behaviour in relation to welding process variables and stages of production
- quality requirements at each production stage
- common adjustments in process variables and their impact on product quality and production output
- routine and non-routine problems that may arise, the range of possible causes and appropriate actions
- organisation procedures relevant to the work environment/job role
- hierarchy of control
- hazards that may arise in the job/work environment and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

**Assessment Conditions**

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- In all plants it may be appropriate to assess this unit concurrently with units such as:
  - teamwork
  - communication.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
• will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency.

• must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start and stop procedures and responding to problems.

• may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.

• Assessment should occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

• Assessment in a simulated environment should use evidence collected from demonstration of skills and one or more of:
  • walk-throughs
  • pilot plant operation
  • industry-based case studies/scenarios
  • ‘what ifs’.

• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews.

• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

• Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

• The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.

• Foundation skills are integral to competent performance of the unit and should not be assessed separately.

• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

• In addition the assessor or anyone acting in subject matter expert role in assessment shall demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.

• Technical competence can be demonstrated through one or more of:
  • relevant VET or other qualification/Statement of Attainment
  • appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  • appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
• Currency can be demonstrated through one or more of:
  • being currently employed undertaking the type of work being assessed
  • being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation’s policies and procedures
  • having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  • conducting on the job training/assessments of the type of work being assessed
  • being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

Application

This unit describes the skills required to identify, implement and monitor relevant policy and report on implementation.

This unit applies to public sector staff and other stakeholders working in a role where they are required to support policy implementation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion:

• reading complex and formal documents and providing information on their application
• preparing accurate written reports with language and structures suited to the intended audience
• working with legislation drafters and legal advisers
• consulting on and preparing policy guidelines
• adjusting communication to suit different audiences
• gathering and analysing policy feedback

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

• practices and procedures for developing policy guidelines
• policy feedback mechanisms
• current organisation policies
• government policies and international policy obligations that impact on organisation policy
• organisation and government procedures and protocols
• public sector codes of ethics and code/s of conduct
Assessment Conditions
This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.
Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Unit Descriptor

This unit covers management of generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project start-up activities, coordinating project implementation, monitoring the project and arranging follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of Procurement and Contract Management.

In practice, managing simple projects overlaps with other generalist and specialist work activities such as applying government processes, using resources, gathering information, managing contracts etc.

This unit, and unit PSPPM405A Administer simple projects, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.
Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<table>
<thead>
<tr>
<th>Elements</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Implement start-up activities | 1.1 The *project plan* is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy.  
1.2 Project *stakeholders’* understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.  
1.3 *Required systems* are established and maintained throughout the project in accordance with the project plan.  
1.4 A working knowledge of *project management tools* is used to facilitate integration of project activities and achievement of project outcomes. |

| 2. Coordinate project implementation | 2.1 *Integration and management* of project activities are handled in accordance with the project plan.  
2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan.  
2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures.  
2.4 Project *change proposals* are received and changes are recommended/made in accordance with the project plan, and documented in accordance with *policy and procedures*. |

| 3. Monitor project | 3.1 All aspects of the project are continually monitored and corrective action is taken as necessary to maintain progress in |
ELEMENT

PERFORMANCE CRITERIA

3. Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders.

3. Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.

3. Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.

3. Programmed review of objectives and achievement is implemented in accordance with the project plan.

4. Arrange project follow-up activities

4.1 Project deliverables are analysed against specifications, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.

4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.

4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.

4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
• using project management tools applicable to small scale or low risk projects
• applying ethical decision making and problem solving related to project management of small scale or low risk projects
• writing recommendations and preparing implementation support packages requiring precision of expression
• applying workplace safety procedures in line with project requirements
• accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:
• legislation, organisational policies and procedures that may impact on project management, for example:
  • public sector codes of ethics/conduct
  • occupational health and safety and environment requirements
  • project governance requirements
  • quality standards
• risk management
• procurement guidelines
• human resources
• equal employment opportunity, equity and diversity principles
• project management tools to suit a range of small scale or low risk projects
• project management principles
• organisational and political context

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

• Pre-requisite units that must be achieved prior to this unit: Nil
• Co-requisite units that must be assessed with this unit: Nil
• Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  • PSPETHC401A Uphold and support the values and principles of public service
  • PSPGOV402B Deliver and monitor service to clients
  • PSPGOV403B Use resources to achieve work unit goals
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLN401A Encourage compliance with legislation in the public sector
- PSPPROC410A Administer contracts
- PSPPM401B Design simple projects
- PSPPM403B Close simple projects

*Excluded units that may not contribute to the same qualification as this unit:*
- PSPPM405A Administer simple projects

**Overview of evidence requirements**

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

**Resources required to carry out assessment**

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

**Where and how to assess evidence**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
• Aboriginal and Torres Strait Islander people
• women
• young people
• older people
• people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:
• case studies
• demonstration
• portfolios
• questioning
• scenarios
• authenticated evidence from the workplace and/or training courses

For consistency of assessment
Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement
The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in bold italics in the Performance Criteria is explained here.

Project plan will include some or all of:
• acquisition strategies
• budget and financial management strategy
• contract management
• cost estimates
• evaluation criteria
• expected outcomes/measurable benefits of the project
• facilities
• inclusions and exclusions from project
• information/communication strategy
• intellectual property strategies
• milestones
• objectives
• outputs/project deliverables and their acceptance criteria
• people plan including human resource management and human resource development
• performance criteria/indicators
• project control mechanisms
• project implementation strategy
• project governance strategy
• purpose
• quality assurance
• quality control
• quality standards for project
• rationale
• required project resources
• resource management
• risk management
• roles and responsibilities
• schedule/timeline
• task/work breakdown structure (WBS)

**Stakeholders** may include:

• project sponsor/funding bodies
• clients or customers (internal and external)
• industry
• other agencies
• general public
• relevant interest groups
• unions
• functional areas
• the organisation’s senior management
• Ministers
• project team
• steering committee members
• end user
• supplier/service provider

**Required systems for project management** may include:

• planning and monitoring system
• financial management including:
  • budget allocation/funding
  • income generated
  • expenditure
• recordkeeping for documented information such as:
  • correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

**Project management tools** may include:
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual

**Integration of project activities** may include:
- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

**Management** may include:
- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management
- contract management
Change proposals may include:

- change management
- scope
- administration
- engineering, technical, technology changes
- time
- cost
- resources

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Specifications may include:

- functional
- technical
- performance
- material

Unit Descriptor

This unit covers management of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes managing start-up, project implementation, project integration and follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Manage start-up activities | 1.1 *Project plans* are refined in consultation with steering committee and team members, and precise details are included for schedules of activities, milestones and resources.  
1.2 *Required systems* are established and maintained throughout the project in accordance with the complexity of the project and in line with the project plan.  
1.3 Project team members' understanding of and commitment to fulfilling the project requirements and their roles and responsibilities for the duration of the project are confirmed.  
1.4 *Project management tools* are selected and applied effectively to achieve project outcomes. |
| 2. Manage project implementation | 2.1 *Integration* and *management* of complex project activities are handled in accordance with the project plan.  
2.2 Leadership and required *development* are provided to the project team, and morale, stress levels and triggers are managed throughout the life of the project in accordance with organisational *policy and procedures*.  
2.3 *Stakeholder* input and expectations are managed throughout the project in accordance with the communication plan.  
2.4 Disagreements and disputes are resolved to the satisfaction of stakeholders or referred to a higher authority in accordance with organisational policy and procedures.  
2.5 Project *change proposals* are negotiated, agreed and documented in accordance with policy and procedures. |
| 3. Manage project integration | 3.1 All aspects of the project and related projects are integrated and links are established to ensure objectives are met in accordance with the project plan. |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan and staff and contractors are regularly consulted to discuss progress and ensure effective results.
3.3 Project integration is monitored, and management plans and any related contracts are reviewed and amended as appropriate, with results reported in accordance with mechanisms identified in the communication plan.
3.4 Ongoing progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the project.
3.5 Programme review of objectives and achievement is planned and implemented in accordance with the project plan.

4. Coordinate project follow-up activities
4.1 Significant judgment is applied in the analysis of project deliverables against specifications, performance standards and project objectives, and the results are reported to stakeholders.
4.2 Support package arrangements are identified and offered to stakeholders who will be required to apply the project results.
4.3 Options for stakeholders to take account of environmental and cultural factors in applying the project results are included in the support package.
4.4 Operational and support authorities are consulted to investigate any testing/trialling/construction and evaluation requirements resulting from the project, and funding implications estimated in project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project outcomes
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- negotiating with stakeholders and team members using communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools applicable to reasonably complex projects
• applying ethical decision making and problem solving related to project management of reasonably complex projects
• writing recommendations and preparing project reports requiring precision of expression
• applying workplace safety procedures in line with project requirements
• accessing/preparing information electronically or in hard copy

Knowledge requirements
Look for evidence that confirms knowledge and understanding of:
• legislation, organisational policies and procedures that may impact on project implementation, for example:
  • public sector codes of ethics/conduct
  • occupational health and safety and environmental and sustainability requirements
• project governance requirements
• quality standards
• risk management
• procurement guidelines
• financial management and budgetary framework
• human resources
• equal employment opportunity, equity and diversity principles
• project management tools to suit a range of reasonably complex projects in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
• project management systems
• organisational and political context
• critical analysis in a project management context
• business and commercial issues related to the projects managed

Evidence Guide
The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together
• Pre-requisite units that must be achieved prior to this unit: Nil
• Co-requisite units that must be assessed with this unit: Nil
• Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment
process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPPM501B Design complex projects
- PSPPM503B Close complex projects
- PSPPROC501A Manage contract risk
- PSPPROC503A Manage contract performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management in the organisation and the public sector
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing complete projects, including coping with difficulties, irregularities and breakdowns in routine
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

</thead>
</table>
| 1. Review project activity | 1.1 Evaluation of project process, supplier performance and achievement against objectives is undertaken in consultation with **stakeholders** and results are reported in accordance with the **project plan** evaluation framework and organisational **policy and procedures**.  
1.2 The extent to which clients needs were met is evaluated and action to rectify problems is identified and documented.  
1.3 Implications of project outputs/outcomes for policies and operating procedures are identified and recommendations are made for their amendment.  
1.4 Information obtained from the evaluation of the project is provided in accordance with organisational requirements so it may be used to improve relevant policy and practice. |
| 2. Manage project closure | 2.1 Any funding associated with the project is acquitted against project budget items, and financial records are checked for accuracy and completed in accordance with organisational procedures.  
2.2 Project wind-down is **managed** and **documentation**, records and **approvals** are handled in accordance with project plan and organisational policy and procedures.  
2.3 Project stakeholders are debriefed, and infrastructure and resources are redeployed in accordance with organisational policy and procedures.  
2.4 Project hand-over to user/s is completed in accordance with organisational procedures, and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.  
2.5 Stakeholders are advised of procedures and authorities for initial support to apply project results where relevant, and strategies |
ELEMENT PERFORMANCE CRITERIA
are provided to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge
This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements
Look for evidence that confirms skills in:

- analysing results and evaluating outcomes against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing stakeholders and redeploying resources and infrastructure
- acquitting and reporting on resource expenditure including time and costs
- using project management tools applicable to reasonably complex projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements
Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
  - project governance requirements
  - quality standards
  - risk management
  - procurement guidelines
  - financial management
  - human resource management and development
  - equal employment opportunity, equity and diversity principles
  - project specifications and objectives
- project management tools to suit a range of reasonably complex projects in
terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
- project management principles and systems
- critical analysis in a project management context
- business and commercial issues related to the projects managed
- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together
- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil
- Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV517A Coordinate risk management
  - PSPPM501B Design complex projects
  - PSPPM502B Manage complex projects
  - PSPPROC504A Finalise contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:
- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- reviewing and closing complex projects in a range of (3 or
more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools suited to reasonably complex projects

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing and closing complex projects, including coping with difficulties, irregularities and breakdowns in routine
- reviewing and closing complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people

Application

This unit describes the skills required to cover the exercise of powers under the organisation's enabling legislation and other relevant legislation for regulation, monitoring, inspection and investigation.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently as part of a team, performing routine tasks involving a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

| **1. Establish regulatory powers** | 1.1 Access and use current information relating to enabling legislation and regulations to maintain up-to-date knowledge of requirements.  
1.2 Confirm powers provided under the legislation and the boundaries of those powers.  
1.3 Identify and confirm compliance requirements of the legislation, related regulations, standards, codes of practice and policy.  
1.4 Identify and confirm acts and omissions that comprise non-compliance or offences under the legislation. |
| **2. Apply enabling legislation** | 2.1 Identify and analyse circumstances where regulatory powers will be exercised to determine response or measures to apply.  
2.2 Identify circumstances requiring the exercise of regulatory powers that are outside own limits and refer to others.  
2.3 Identify risks associated with the exercise of regulatory powers and strategies to manage risks.  
2.4 Apply enabling legislation consistent with the boundaries and powers contained therein. |
| **3. Utilise other legislation and standards** | 3.1 Identify other legislation and standards which impact on powers and confirm their requirements.  
3.2 Resolve or refer apparently conflicting legislative directions. |
| **4. Work with other organisations** | 4.1 Identify organisations that have jurisdictions which may overlap and establish and maintain relationships.  
4.2 Identify organisations available to provide assistance and advice or take referrals and establish relationships for mutual benefit.  
4.3 Follow organisational protocols and procedures when working with other organisations.  
4.4 Refer compliance matters to other organisations for action when required.  
4.5 Follow lead agency protocols and/or lines of authority during operations involving more than one organisation. |
Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPREG401C Exercise regulatory powers.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis
- using information technology to access relevant legislation and procedures
- reading complex written materials and applying them to work practices
- using scanning techniques
- engaging in discussion involving exchanges of often complex oral information
- choosing regulatory responses and/or measures to fit the circumstances and justifying those responses against legislation, guidelines, policy and regulations

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- full range of regulatory powers and the limits to those powers
- enabling legislation
- offences under the legislation
- aspects of criminal law, administrative law, industrial law, contract law
- statutory time limits
- terminology used in legislation and procedures
- organisational policies, guidelines and regulations
- public sector legislation including, health and safety and environment relating to the exercise of regulatory powers
Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

</tbody>
</table>

### Application

This unit describes the skills required to issue advice, instructions, warnings, notices, fines and other actions in response to non-compliance situations. It includes attending situations where non-compliance is suspected or alleged, and taking action on non-compliance.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work in as part of a team under routine guidance, performing routine tasks in a range of mostly familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

### 1. Attend situations where non-compliance is suspected/alleged

1.1 Follow procedure.
1.2 Maintain personal conduct.
1.3 Protect the safety of self and others.
1.4 Make prompt requests for assistance.
1.5 Carry out activities and actions in accordance with rules of evidence.

### 2. Take action on non-compliance

2.1 Consider mitigating circumstances.
2.2 Select action on non-compliance to match the seriousness of the offence.
2.3 Inform clients of the action, justification for it and their rights of appeal.
2.4 Take action in accordance with legal requirements.
2.5 Carry out personal actions and/or conduct in accordance with protocols and protect the rights and responsibilities of clients.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPREG405B Act on non-compliance.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking negotiation and conflict resolution
- applying risk management and self-preservation techniques
- using judgment and decision making
- exchanging often complex oral information in a form to suit diverse audiences
- writing requiring accuracy of expression and formality in structure and format

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation
- organisational parameters for decision-making
- range of appropriate actions possible for different offences
- negotiation in the context of achieving compliance
- awareness of social and cultural issues

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.
Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUACOM012 Liaise with media at a local level

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to liaise with media at an incident and for providing information about local events. It includes determining media requirements for providing information to publicise an event.

The unit is applicable to personnel of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

</tr>
</tbody>
</table>
1.3 Operational responsibilities are balanced against provision of information to the media

2.1 A positive image of the organisation is maintained when liaising with the media

2.2 Every opportunity is used to promote the organisation, its services and personnel, in accordance with organisational requirements

2.3 Information is supplied to the media when operational situation permits

3.1 Relationship is established with media contacts, in accordance with organisational requirements

3.2 Event details and support materials are gathered and presented in a logical and concise manner to the media

3.3 Information provided to media is recorded and maintained, in accordance with organisational requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUACOM012B Liaise with media at a local level.

Links

Assessment Requirements for PUACOM012 Liaise with media at a local level

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- communicating facts
- determining media requirements
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- liaising with media and other organisations
- maintaining positive image of the organisation to the media
- prioritising between operational responsibilities and provision of information to media
- providing information to the media
- publicising an event

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- communication techniques and skills
- media relationships
- media requirements
- operational responsibilities
- opportunities for media interest and events
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and procedures relating to media liaison
- presentation of information in a newsworthy and informative manner
- provision of relevant and succinct information
- requirements of different media
- role of media in disseminating information
Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, regulations, codes of practice and operation manuals.

Unit Descriptor

This unit describes the outcomes required to identify, plan and implement treatment options in order to reduce risk.

Application of the Unit

This unit applies to people working in a relatively simple and routine workplace in which they use the organisation’s policy and procedures. They would normally have local supervisory/management responsibility and will apply known solutions to a variety of predictable problems.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR027 Assess operational risk

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance
The essential outcomes of a Unit of Competency. needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Make risk decision** | **1.1** Calculated level of risk is compared to the established **risk criteria** and determined to be acceptable or unacceptable in consultation with the supervisor.  
**1.2** Risk that is determined as unacceptable is documented and noted for treatment. |
| **2. Identify and select treatment options** | **2.1** *Treatment options* of known risks are identified and confirmed as contained in *organisational standards and guidelines* or supervisor’s guidance.  
**2.2** Treatment options under consideration are evaluated for **effectiveness** within the given context.  
**2.3** Selected treatment options are documented and communicated in accordance with organisational policies and procedures. |
| **3. Implement treatment options** | **3.1** *Treatment plans* incorporating selected options are implemented in accordance with organisational policies and procedures.  
**3.2** Treatment plans are communicated in the workplace in accordance with organisational policies and procedures. |
| **4. Monitor and review risk and the process** | **4.1** Effectiveness and efficiency of the treatment plan is *monitored*, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity.  
**4.2** Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process.  
**4.3** Treatments are adjusted and communicated following the review process. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with personnel at all levels of organisation and risk management specialists
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically treat risks and, where appropriate, access resources
- manage simple project implementation
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specific methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- treatment options for risks relevant in the workplace
- team work principles and strategies
- basic project management strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening
Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholders’ involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace.

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplace

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of treating operational risk, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of treating operational risk in a range of 3 or more contexts or occasions, over time

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and should include a combination of two or more of:
Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

**Risk criteria** may include:
- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

**Treatment options** may include:
- avoidance of the risk
- removing a risk source
- changing the likelihood of an initiating event or source of risk occurring
- a hazard impacting on elements at risk
- changing the consequences of an identified hazard impact
- sharing the risk
- retaining the risk based on an informed decision

**Organisational standards and guidelines** may include:
- regulatory or legislative requirements
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational OHS, risk management or resilience
policies or operating procedures

**Effectiveness** may include:
- benefits to the individual
- benefits to the organisation
- cost benefits resulting from the implementation of the treatment
- cost of implementing the treatment option

**Treatment plans** may include:
- budgeting
- expected outcome of treatments
- performance measures
- responsibilities
- review process to be set in place
- schedules

**Monitored** may include:
- critical observation
- identification of changes over time
- regular checking
- regular recording

**Unit Sector(s)**
Not applicable.

**Custom Content Section**

PUAEMR027 Assess operational risk

Modification History
PUAEMR027 Release 1: Primary release.

Unit Descriptor
This unit describes the outcomes required to identify and assess risk in an operational environment.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit
This competency applies to workers at a relatively simple and routine level, in which they use established organisational policy and procedures. Workers would normally have local supervisory or management responsibility and apply known solutions to a variety of predictable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Unit of Competency.
Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
---|---
1. **Establish the risk context** | 1.1 Objectives and scope are identified using organisational risk management standards and guidelines.
1.2 *Risk criteria* are identified and confirmed as contained in organisational policies, procedures or supervisor guidance.
1.3 *Structure for the planning* required to conduct a risk assessment is determined.
1.4 *Stakeholder* aims and objectives are identified and recorded in accordance with workplace procedures and guidelines.

2. **Identify risk** | 2.1 All possible sources of risk which may affect the situation or objectives are identified and recorded in consultation with stakeholders.
2.2 Risks are identified using a *specified methodology or tool* in accordance with workplace procedures and guidelines.
2.3 Risk statements describing consequences are generated.

3. **Analyse risk** | 3.1 Risks are analysed by estimating the likelihood of particular consequences occurring.
3.2 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures.

4. **Evaluate risk** | 4.1 Levels of risk are prioritised for treatment.
4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors.
4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented.

**Required Skills and Knowledge**

This describes the essential skills and knowledge and their level, required for this unit.
Required Skills

- communicating effectively with risk management specialists and people at all organisational levels
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically assess risks and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (e.g. % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care as applies in emergency risk management context
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening
Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder’s involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplaces

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of operational risk assessment, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of operational risk assessment in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Organisational risk management standards and guidelines** may include:
- regulatory or legislative requirements e.g. ohs act
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational ohs, risk management or resilience policies or operating procedures

**Risk criteria** may include:
- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

**Structure for the planning** may include:
- documentation required
- analysis tools which are required to conduct the assessment
- approach taken to conduct the assessment
- depth of assessment

**Specified methodology or tools** may include:
- a risk matrix
- analysis of risk registers
- brainstorming
- business continuity planning
- examining any available data e.g. audit
results/incident reports

- expert judgement
- focus groups
- nomogram
- scenario analysis

**Unit Sector(s)**

PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to a wildfire, work as a safe and situationally aware member of a crew to attack and extinguish a fire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to firefighting personnel who work as a member of a team. It includes preparing to respond to fire; proceeding to fire; obtaining and using firefighting equipment and extinguishing media; combating wildfire; observing and reacting to wildfire and weather conditions; participating in mop up and patrol activities; supporting operations and recovering and storing equipment. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

Competency Field

4.6 Evidence of fire cause and area of fire origin are protected

4.7 Communication is maintained at all times with all personnel

5 Observe and react to wildfire and weather conditions

5.1 Changing conditions at the fire are observed and their effects on fire behaviour are noted and reported

5.2 Weather conditions and changes to fire behaviour are observed and reported

5.3 Variations in topography, fuel features and fuel arrangements are observed and reported

5.4 Escape routes and safety zones are confirmed and maintained throughout the incident

5.5 Communication is maintained with other firefighting personnel throughout operational activities

6 Participate in mop up and patrol activities and support operations

6.1 Mopping up activities are carried out, as directed

6.2 Patrol of the perimeter or sector of the fire is maintained, as directed

6.3 Activities to support firefighting operations are carried out, as directed

7 Recover and store equipment

7.1 Equipment and consumables are recovered, as directed

7.2 Firefighting equipment is collected and stored at the incident

7.3 Cleaning and maintenance are carried out in accordance with organisational procedures

7.4 Damaged or lost equipment is identified and reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

extinguishing media must include two of the following

- class A foam
- retardants
- soil
- water
- wetting agents

personal protective clothing and equipment must include

- eye and head protection
- turnout uniform and gloves

types of wildfire must include

- surface

types of fuel must include one of the following

- forest
- grass
- scrub

firefighting equipment must include

- hand tools
- hose and small gear
- pump
- tanker

firefighting tactics must include

- control line construction
- mopping up
- patrol
- use of extinguishing media
- dry and wet firefighting

suppression techniques must include

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR204B Respond to wildfire.

Assessment Requirements for PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- combating wildfires
- communicating on the fire ground using a range of tools
- detecting hot spots, hazardous trees, unsecured wildfire perimeter
- maintaining situational awareness
- maintaining health and safety of self and others in work area
- observing and reacting to wildfire and weather conditions
- obtaining and using firefighting equipment and extinguishing media
- participating in mop ups, patrol activities and support operations
- participating in entrapment safety procedures
- preparing to respond to a fire
- proceeding to a fire
- reacting to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- recovering, reinstating and storing equipment
- undertaking dry and wet wildfire attack
- undertaking operational activities safely, in accordance with organisational procedures
- using extinguishing media in wildfire control
- using wildfire control tools and equipment
- working with firefighting equipment
- working as a member of a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication on the fire ground using radio and telephone
• consumables including flagging tape, fuel, rubbish and signs
• extinguishing media, water, foam and suppressants
• escape routes including prepared tracks, roads, trails and waterways
• earth moving equipment such as bulldozers, graders and tractors with blades
• equipment for firefighting including chainsaw, ropes and lines, drip torch and knap sack
• evidence related to fire cause including fresh vehicles tracks, items or objects at scene, nature and behaviour of fire at the scene upon arrival, nature and colour of smoke and number of columns, people and vehicles leaving the scene and whether gates on access routes to the fire were closed, opened or locked
• fire behaviour
• fuel features including arrangement and distribution, moisture content, quantity, size and type
• indicators of fire behaviour including flame height and length, noise, rate of spread, smoke colour and density, spotting and extreme fire behaviour
• organisational documentation, policies and operating procedures
• safety zones including bare ground, burnt areas, clearings, rivers and site of recent wildfire or prescribed burn, static water bodies and defendable space
• support operations including providing and transporting food, water and equipment
• tactics for firefighting including backburning, burning out and patrol
• types of wildfire including crown and ground
• types of fuel including crop, heath, peat, coal, combustible soils and plantation
• strategies for firefighting including defensive, direct and indirect attack, offensive and parallel attack
• variations in topography including aspect, elevation, landscape features and slope
• weather conditions including atmospheric stability, relative humidity, temperature and variations to wind speed and direction
• wildfire control tactics and techniques
• wildfire hazards
• Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including health and fitness requirements, hygiene and wellbeing, safe work practices, safety assessments and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that
reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Unit Descriptor

This unit covers the competency required to respond to a wildfire, work as a safe and situationally-aware member of a crew to attack and extinguish a fire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR215 Prevent injury

Employability Skills Information

This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1. **Prepare to respond to fire**
   1.1 Information about location of fire, *type of wildfire* and most effective route to the fire is obtained, taking into account local conditions.
   1.2 Personal protective clothing and equipment, and food and fluid requirements are identified and relevant preparations undertaken prior to departure as per organisational standards.

2. **Proceed to fire**
   2.1 Location of the fire and *type of fuel* is confirmed on approach.
   2.2 Access to the area is gained safely without damage to vehicles and equipment, and minimum damage to the environment.
   2.3 **Evidence relevant to fire cause** is noted and brought to the attention of the supervisor.
   2.4 **Indicators of fire behaviour** are observed and communicated to supervisor.

3. **Obtain and use firefighting equipment and extinguishing media**
   3.1 Nominated *extinguishing media* and *firefighting equipment* are located and obtained.
   3.2 Equipment is used in accordance with organisational and manufacturer’s procedures.

4. **Combat wildfire**
   4.1 Instructions are received, *firefighting strategies and tactics* are confirmed and implemented in accordance with organisational safe work practices and procedures.
   4.2 **Suppression techniques**, equipment and extinguishing media appropriate to wildfire conditions are used.
   4.3 Control lines are prepared in accordance with supervisor’s instructions.
   4.4 Equipment is positioned, made ready for use and protected from damage in accordance with
organisational procedures.

4.5 Fire is attacked taking into account **wildfire hazards** as directed and in accordance with organisational procedures.

4.6 Evidence of fire cause and area of fire origin are protected.

4.7 *Communication* is maintained at all times in accordance with organisational procedures.

5. **Observe and react to wildfire and weather conditions**

5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor.

5.2 *Weather conditions* and changes to fire behaviour are observed and reported to supervisor.

5.3 *Variations in topography, fuel features* and fuel arrangements are observed and effect on fire behaviour is reported to supervisor as required.

5.4 *Escape routes* and *safety zones* are identified and maintained at all times.

5.5 Communication is maintained with other firefighting personnel and supervisor throughout operational activities.

6. **Participate in mop-up and patrol activities and support operations**

6.1 Mopping-up activities are carried out in accordance with organisational procedures.

6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures.

6.3 Activities to *support firefighting operations* are carried out in accordance with organisational procedures.

7. **Recover and store equipment**

7.1 Equipment and *consumables* are recovered as directed.

7.2 Equipment is stored in accordance with organisational procedures.

7.3 Cleaning and maintenance are carried out in accordance with organisational procedures.

7.4 Damaged or lost equipment is reported in accordance with organisational procedures.

**Required Skills and Knowledge**

This describes the essential skills and knowledge and their level, required for this unit.
Required Skills
- detect hot spots, hazardous trees, unsecured wildfire perimeter
- undertake dry and wet wildfire attack
- use wildfire control tools and equipment
- work as a member of a team

Required Knowledge
- communication on the fireground
- extinguishing media, water, foam, suppressants
- fire behaviour (fuel, weather and topography)
- health and fitness requirements
- hygiene and wellbeing
- organisational operating procedures
- safe work practices
- wildfire control tactics and techniques
- wildfire hazards, safety techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:
- react to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- use firefighting equipment
- participate in dry wildfire control
- use extinguishing media in wildfire control
- maintain health and safety of self, other workers and people in the immediate work area
- participate in mop-up and patrol
- undertake operational activities safely

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated field-based workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an agency approved simulated and/or field-based workplace environment.

Specific resources for assessment

Access is required to:
• controlled or contained fires and/or simulated workplace environment
• firefighting equipment and extinguishing media

**Method of assessment**
In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated workplace or in agency-approved simulated work environment. Forms of assessment that are typically used include:
• direct observation
• interviewing the candidate
• journals and workplace documentation
• third party reports from supervisors
• written or oral questions

**Range Statement**
The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

Co-requisite Unit/s  Nil
PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply safe work practices when operating in or around aircraft at an airbase. It includes working safely near aircraft and facilitating safe ground support and it applies to personnel working in the public safety sector who work around aircraft.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

<td>1.2 Precautions and clearances are obtained and followed</td>
</tr>
</tbody>
</table>
when operating on or near aircraft movement areas

1.3 Any approach to an operating aircraft is made, in accordance with organisational aircraft approach procedures, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew

1.4 Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes

1.5 Typical manoeuvring patterns of aircraft are anticipated through activities

1.6 Instructions or signals from pilots or staff controlling aircraft are complied with, in accordance with organisational procedures

1.7 Site hazards are identified and risks are assessed and control measures are implemented

2 Facilitate safe ground support

2.1 Appropriate precautions are observed when positioning vehicles or equipment close to aircraft

2.2 Aircraft design features are taken into account whilst boarding, loading or handling aircraft

2.3 Instructions from pilots and staff coordinating aircraft operations, organisational procedures and placards are followed during ground support operations

2.4 Aircraft loading is conducted under pilot or flight crew member supervision and appropriate weight, balance and loading system are complied with

2.5 Areas are designated and separated, in accordance with site features and specific operations being conducted

2.6 Fitting of equipment to an aircraft is conducted under pilot supervision, in accordance with appropriate regulatory approvals

2.7 Aircraft fuels, oils, and supplies are stored and handled, in accordance with regulatory requirements and organisational procedures

2.8 Aircraft or equipment defects or hazards are reported to pilot and/or appropriate supervisor

2.9 Appropriate aerodrome regulations are complied with
Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR209B Work safely around aircraft.

Links

Assessment Requirements for PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- complying with regulatory requirements and organisational procedures
- delivering briefings in appropriate locations including an area that is free of distractions including movement and noise, is safe and convenient to subsequent deployment needs and has the necessary facilities and equipment
- ensuring safety and quality procedures are applied
- identifying hazards and risks and acting to minimise, mitigate, control or eliminate
- implementing precautions and working safely whilst around aircraft
- using personal protective clothing and equipment and specialist aviation support equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aerodrome layout, facilities and services including working zones and lighting facilities
- aerodrome legislation, industry standards, regulations and security procedures
- aircraft features and movement characteristics
- aircraft performance, operation, loading and refuelling precautions
- assessment and risk mitigation processes
- organisational documentation, policies and procedures
- participation in briefings including Situation, Mission, Execution, Administration, Command/control, Safety (SMEACS) and questions
- personal protective clothing and equipment including fire extinguisher, first aid kit, high visibility protective overalls and vests, respiratory protection, signalling devices, lighting or beacons and head, hand, eye, ear and foot protection
- roles and responsibilities of personnel supervising, managing and supporting aircraft operations
- site hazards
• suitable locations for conducting briefings and debriefings
• types of aircraft including aeroplanes, helicopters, remotely piloted aircraft and airborne vehicles
• Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safe work practices around aircraft

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

• a range of relevant exercises, case studies and/or simulations
• relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
• applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Assessment Requirements for PUAFIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes:

- applying safe work practices in accordance with organisational Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) policies and procedures
- identifying hazards and using risk control measures
- identifying workplace hazards and risks and advising others
- implementing hazard and risk control procedures
- monitoring effectiveness of hazard and risk control procedures
- selecting equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- working with organisational procedures including the selection and use of personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- basic principles of a dynamic risk assessment and safe person approach
- hazards, including heat illness, fire, structural, aerial operations, hazardous materials and vehicles
- methods of hazard identification, risk control reporting and debriefing
- organisational documentation, policies and procedures for hazard and risk management
- personal protective clothing and equipment requirements
- risks to life, community, property and the environment
- situational awareness actions that support safety in the work place
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including occupational hazards and risks encountered in the workplace, safety assessments, risk mitigation processes and risk control measures such as eliminate, isolate and substitute
Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

</table>
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply safe work practices in accordance with organisational work health and safety policies and procedures
- identify typical hazards and risks in the workplace, and apply control measures
- select equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- select personal protective clothing

Required Knowledge

- basic principles of risk assessment
- methods of hazard and risk control and reporting, and debriefings
- occupational hazards and risks encountered in the workplace
- organisational health and fitness guidelines
- personal protective clothing and equipment requirements
- risk control measures such as eliminate, isolate and substitute
- signs of fatigue, heat related illness, dehydration, fatigue and stress
- situational awareness
- welfare management, such as signs of occupational stress, limiting stress, dealing with stress and seeking assistance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- correctly identify hazards and risks in the workplace
- apply organisational procedures including the correct selection and use of personal protective equipment and clothing
- advise and report workplace hazards and risks, and apply and monitor control measures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.
resources for assessment

Competency should be assessed on-the-job and/or in a range of simulated environments.

Specific resources for assessment

Access is required to:

- appropriate protective clothing and equipment
- organisational procedures.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Hazards** may include:

- aerial retardant drops
- aircraft
- broken terrain
- biological, bites, infections, stings
- chemicals
- confined space
- electricity
- entrapment
- environmental
- falling objects
- explosions
Risks may include:
- damage to property and environment
- injury to self and/or team members
- loss of life and property

Workplace may include:
Locations where activities and operations may occur such as:
- confined spaces
- mobile property
- open spaces
- public and private property (including crown land)
- structures
- water

Personal protective clothing and equipment must include:
- emergency response clothing

and may also include:
- chainsaw chaps
- chemical protective clothing
- eye, ear and head protection
- face shield
- personal accessories kit
- personal distress units
- personal lines
- respiratory protection

Controlling risks must include:
- adequate food, fluid and other welfare needs during operations
- appropriate training
- eye, sight, hearing protection
| Changes in incident behaviour and conditions may include: | Environmental conditions  
|                                                         | Escalation of incident |
| Debriefings may include:                               | End of incident  
|                                                         | End of shift |

**Unit Sector(s)**

**Custom Content Section**

Not applicable.
PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work as a member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to personnel who work as a member of a crew or team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR204 Respond to wildfire

Competency Field

outcomes. demonstrate achievement of the element.

1 **Receive and report details of wildfire**

1.1 Details of the wildfire including location, type, behaviour and developments are received and recorded

1.2 Fire details are reported, in accordance with organisational requirements

2 **Prepare to respond to fire**

2.1 Location of wildfire is confirmed and safest access route is determined

2.2 Personal protective clothing and equipment, apparel, food and water are obtained before departure, in accordance with organisational requirements

2.3 Most appropriate appliance or vehicle is selected and used

3 **Proceed to fire**

3.1 Location of wildfire is confirmed by observation or from instructions while on approach

3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or environmentally sensitive areas

3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of appropriate authorities

3.4 Navigational aids are used for planning and operational purposes

3.5 Notification of arrival and appropriate report is provided

4 **Protect people and assets**

4.1 As far as conditions allow the number, location and safety of people and assets in the threatened area is determined and assessed

4.2 Appropriate protective procedures are implemented, under direction, to protect persons in the path of a wildfire

4.3 Access by the public and personnel to hazardous locations is controlled, as directed, in accordance with organisational procedures

4.4 Defensibility of property and assets is considered and, if appropriate, assistance is provided to help occupiers

4.5 Safety of people and assets in the threatened area is
monitored

4.6 Safety of people and security of assets in the area is checked and reported after the fire

5 Combat wildfire

5.1 Briefing is received including area of operations, strategies and tactics to be employed

5.2 Escape routes and safety zones are confirmed and communicated to personnel

5.3 Firefighting media and equipment are selected and used in accordance with organisational procedures

5.4 Fire hazards are identified and action is taken to minimise the risks of injury to the public, personnel and self

5.5 Firefighting strategies and tactics are implemented to achieve objectives and to minimise overall damage and impact on assets and the environment

5.6 Fuel, weather and topographical factors are observed and potential fire behaviour is anticipated and acted upon to ensure safety

5.7 Communication is maintained with supervisor through the chain of command and with other firefighters in the work area

5.8 Fire control activities are undertaken to minimise overall damage and impact on assets and the environment

5.9 Potential fire behaviour is considered and acted upon to ensure safety and achievement of objectives

5.10 Fire reports are provided to supervisor, as required

5.11 Area of origin and evidence of fire cause are protected and brought to the attention of supervisor or relevant authority, in accordance with organisational procedures

6 Conduct mop up and patrol activities

6.1 Mop up activities are carried out, in accordance with organisational procedures

6.2 Patrol of the fire is maintained

7 Recover and maintain equipment

7.1 Equipment is made ready for operational use, in accordance with organisational procedures
7.2 Damaged or missing equipment is replaced, recorded and/or reported, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- anticipating and reacting to changing wildfire behaviour
- applying Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing risk to life, property and the environment
- contributing to the implementation of firefighting strategies
- combating wildfires, performing firefighting tactics, and using firefighting equipment and extinguishing media
- communicating and working with team members
- conducting mop ups and patrol activities
- detecting hot spots and hazardous trees
- implementing and monitoring firefighting strategies and tactics
- interpreting fire weather, fuels and terrain and predicting likely impact on fire behaviour
- maintaining safety and health of self, other workers and people in a wildfire area
- participating in briefings and confirming instructions
- preparing to respond to wildfires, using navigation equipment
- proceeding to wildfires
- receiving, recording and reporting information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- crew protective procedures
- access to wildfires
- recognition of environmentally sensitive areas and actions to minimise damage
- escape routes including prepared tracks, roads, trails and waterways
- fire behaviour and its response to different fuels, topography and weather conditions
- fire cause
- fireground hazards
- fire report requirements
- fuel types and factors that impact fire development
- media and equipment for firefighting
- means of transport to fire ground
- navigational aids including aerial photographs, compass, global positioning systems and maps
- organisational documentation, policies and procedures
- potential fire behaviour including fire development, flame height and intensity, fuel load and arrangement, rate of speed, spotting, change due to terrain, topography, changes due to weather conditions, winds and fire winds.
- protective procedures including alerts and warnings, in situ protection and relocation
- safety zones including bare ground, burnt areas, clearings, rivers, site of recent wildfire or prescribed burns and static water bodies
- strategies for firefighting including offensive strategies including direct attack, indirect attack, parallel attack and combined attack and defensive strategies including community and asset protection
- tactics for firefighting including back burning and burning out, control line construction - hand and machine and direct suppression and extinguishment
- tasks for firefighting including application of firefighting media, control line construction, mopping up and patrol
- topographical factors that affect fire development
- types of fires including crown, ground and surface
- types of assets that require protection
- weather factors that influence fire development
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safety near vehicles and machines

**Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.
Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - access to wildfire or prescribed burns and/or approved field based environment
  - firefighting equipment and extinguishing media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Unit Descriptor

This unit covers the competency required to work as a situation-aware member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR204B Respond to wildfire
**Employability Skills Information**

This unit contains employability skills.

**Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a Unit of Competency. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Receive and report details of wildfire | 1.1 Details of the wildfire including its location, *type*, behaviour and development are received and recorded.  
1.2 Fire details are reported in accordance with organisational procedures. |
| 2. Prepare to respond to fire | 2.1 Location of the wildfire is confirmed and the safest effective *access* route is determined.  
2.2 *Personal protective clothing and equipment*, apparel, food and water are obtained before departure, in accordance with organisational requirements.  
2.3 Most appropriate method of transport to the wildfire is selected and used. |
| 3. Proceed to fire | 3.1 Location of the wildfire is confirmed by observation or from instructions while on approach.  
3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or *environmentally sensitive areas*.  
3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of the appropriate authority.  
3.4 *Navigational aids* are used for planning and operational purposes. |
| 4. Protect people and assets | 4.1 As far as conditions allow, number, location and safety of people and *assets* in the threatened area is determined and assessed. |
4.2 Appropriate **protective procedures** are implemented under direction, to protect persons in the path of a wildfire.

4.3 Access by the public and personnel to hazardous locations is controlled as directed and in accordance with organisational procedures.

4.4 Defensibility of property is considered and, if appropriate, assistance is provided to help occupiers.

4.5 Safety of people and assets in the threatened area is monitored during the course of the fire.

4.6 Safety of people and security of assets in the area is checked and reported after the passing of the fire.

5. **Combat wildfire**

5.1 Access to the area of operations is gained in the safest and most effective manner.

5.2 Notification of arrival and appropriate report is provided.

5.3 Briefing is received including area of operations, strategies and tactics to be employed.

5.4 Most suitable location to commence wildfire control operations is selected.

5.5 **Firefighting media and equipment** are selected and used effectively and safely in accordance with organisational procedures.

5.6 **Fire hazards** are identified and action taken to minimise the risk of injury to the public, personnel and self.

5.7 **Firefighting strategies** are implemented to achieve objectives in accordance with organisational procedures.

5.8 Fire control activities are undertaken to minimise overall damage and impact on assets and the environment.

5.9 **Potential fire behaviour** is considered and acted upon to ensure safety and achievement of objective.

5.10 **Fuel, weather and topographical factors** are observed and potential fire behaviour anticipated.

5.11 Communication is maintained with supervisor and other firefighters in the work area.

5.12 **Fire reports** are provided to supervisor as required.

5.13 Area of origin and **evidence of fire cause** are protected and brought to attention of supervisor or relevant authority.

5.14 **Escape routes** and **safety zones** are established
and communicated to personnel.

6. **Conduct mop-up and patrol activities**
   - 6.1 Mop-up activities are carried out in accordance with guidelines and conditions.
   - 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures and guidelines.

7. **Recover and maintain equipment**
   - 7.1 Equipment is made up and made ready for operational use in accordance with organisational procedures.
   - 7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with organisational procedures.

---

**Required Skills and Knowledge**

This describes the essential skills and knowledge and their level, required for this unit.

**Required Skills**

- communicate effectively in writing and orally
- detect hot spots and hazardous trees
- interpret fire weather, fuels and terrain and predict the likely impact on fire behaviour
- mop-up
- read maps
- receive briefings and confirm instructions
- undertake back burning and burning out
- use wildfire control tools and equipment
- work as part of a team

**Required Knowledge**

- defensive/offensive firefighting strategies and tactics:
  - asset protection
  - backburning and burning out
  - control lines and firebreaks
  - defendable space
  - direct, indirect, parallel attack
  - fire attack procedures
  - lighting patterns
  - standard operating procedures; reporting; patrol; mop-up
  - wet, dry firefighting
  - fire behaviour:
- fire development
- flame height and intensity
- rate of spread,
- junction zones
- spotting
- firefighting protocols
- fireground hazards
- fire weather conditions and impact on fire behaviour:
  - atmospheric stability
  - relative humidity
  - temperature
  - wind speed and direction
- fuel and its impact on fire behaviour
  - moisture content, quantity, type, arrangement and distribution,
  - size, drought effect, curing
- organisational first aid requirements
- organisational procedures for dealing with injury
- protection of area of origin and evidence of fire cause
- safety near vehicles and machines
- terrain and physical feature and their impact on fire behaviour and suppression:
  - aspect
  - fuel variations
  - slope
  - weather variations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:
- anticipate and react to changing wildfire behaviour
- observe and react to weather behaviour
- accurately assess whether or not it is safe to defend assets
- undertake dry wildfire control activity
- monitor effectiveness of tactics
- use firefighting equipment and extinguishing media
- maintain safety and health of self, other workers and
people in the wildfire area
- use communication equipment
- read maps
- protect area of origin and evidence of fire cause

**Consistency in performance**
Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.

**Context of and specific resources for assessment**

**Context of assessment**
Evidence of performance at a wildfire or prescribed burn is required for attainment of Elements 5 and 6 of this unit.

The remaining elements should be assessed in an agency approved field-based environment or simulation.

**Specific resources for assessment**
Access is required to:
- access to wildfire or prescribed burns and/or approved field-based environment
- firefighting equipment and extinguishing media

**Method of assessment**
In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:
- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

**Range Statement**
The Range Statement relates to the Unit of Competency as a whole. It allows for
different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

| **Types** must include: | • crown  
| | • ground  
| | • surface  
| **Access** may include: | • aircraft  
| | • boat  
| | • foot  
| | • vehicle  
| **Environmentally sensitive areas** may include: | • areas of:  
| | • fragile soils  
| | • native flora and fauna  
| | • rare and endangered species  
| | • threat to water quality  
| **Navigational aids** must include: | • maps  
| and may also include: | • aerial photographs  
| | • compass  
| | • global positioning systems  
| **Assets** may include: | • area of rare or sensitive flora and fauna  
| | • buildings  
| | • culturally significant sites  
| | • crops  
| | • plantations  
| | • property  
| | • public lands  
| | • stock  
| | • utilities and infrastructure (rail, power and telephone lines, water supply structures, communications towers, bridges)  
| **Protective procedures** may include: | • alerts and warnings  
| | • in-situ protection  
| | • relocation  
| **Firefighting media** must include: | • water  
| and may also include: | • Class A foam  
| | • earth  
| | • fire suppressants (short and long term)  
| | • retardants  

| **Firefighting equipment** must include: | • wetting agent  
| • driptorch  
| • hand tools  
| • hose and small gear  
| • pump  
| • tanker  
| and may also include: | • aircraft  
| • chainsaw  
| • earth moving machinery  
| • knap sack  
| • ropes and lines  
| **Fire hazards** must include: | • burns  
| • disorientation  
| • environmental  
| • falling branches and trees  
| • falling objects  
| • fatigue  
| • heat-related illness (heat exhaustion and dehydration)  
| • lack of visibility  
| • manual handling  
| • mine shafts  
| • rolling objects  
| • smoke inhalation  
| • snake or insect bite  
| • sprain or fracture  
| • trips/falls  
| • water bombing operation  
| **Firefighting strategies** must include: | • combination attack  
| • combined strategy  
| • defensive strategy  
| • direct attack  
| • indirect attack  
| • mop-up  
| • offensive strategy  
| • parallel attack  
| • patrol  
| **Potential fire behaviour may include:** | • fire development  
| • flame height and intensity  
| • fuel load and arrangement  
| • rate of spread |
- spotting
- change due to terrain, topography
- change due to weather conditions - winds, fire whirls

**Fuel** may include:
- crop
- forest
- grass
- heath
- plantation:
  - stage 1 – post establishment
  - stage 2 – pre-canopy closure
  - stage 3a – canopy closure (unpruned)
  - stage 3b – canopy closure (pruned)
  - stage 4 – thinned
  - stage 5 – mature
  - stage 6 – harvesting/clear felling
- scrub

**Fuel factors** which may impact on fire development must include:
- arrangement/distribution
- effects of drought
- moisture content
- quantity
- seasonal effects
- size
- topography
- type

**Weather factors** which may impact on fire development must include:
- anabatic winds
- atmospheric stability
- cold fronts
- diurnal variations
- katabatic winds
- land breezes
- local effects
- relative humidity
- sea breezes
- temperature
- vegetation edge effects
- wind changes
- wind direction and speed

**Topographical factors** which may impact on fire development must include:
- aspect
- elevation
- local wind effects
Fire reports may include:
- effectiveness of strategies and tactics
- fire behaviour
- number and status of resources
- safety and hazards
- weather
- welfare of personnel
- work achieved and required

Evidence of fire cause may include:
- fresh vehicles tracks
- nature and behaviour of fire at the scene upon arrival
- nature and colour of smoke and number of columns
- people and vehicles leaving the scene
- whether gates on access routes to the fire are closed, opened or locked

Escape routes may include:
- prepared tracks
- roads
- trails
- waterways

Safety zones may include:
- bare ground
- burnt areas
- clearings
- rivers
- site of a recent wildfire or prescribed burn
- static water bodies

Unit Sector(s)
Not applicable.
PUAFIR312 Operate aerial ignition equipment in an aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, operate and maintain aerial ignition equipment in an aircraft. Aerial ignition equipment is used to drop incendiaries, capsules or gelled petroleum, from fixed wing aircraft or helicopter.

Aerial ignition operations are undertaken to modify or reduce fuel loads in key areas and to decrease fire intensity and suppression difficulty at wildfires or prescribed burns.

The unit applies to personnel responsible for the safe, effective and efficient conduct of aerial ignition operations to a specified burn prescription and/or fire suppression operation and for liaising with ground and support crews including incendiary operation supervisors.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR209 Work safely around aircraft

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS PERFORMANCE CRITERIA
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for operations of ignition equipment

1.1 Personal protection clothing and equipment and other safety equipment is selected, inspected and tested, in accordance with organisational procedures, prior to operations commencing

1.2 Requirements for aerial ignition operations are identified and confirmed with relevant personnel

1.3 Activities are undertaken, in accordance with industry standards, legislation, organisational procedures, Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

1.4 Incendiary device to be used is confirmed

1.5 Incendiary devices and associated consumable materials are stored and transported, in accordance with the organisational procedures and requirements

1.6 Ignition equipment is installed in aircraft, in accordance with the organisational procedures and aircraft operator requirements

1.7 Ignition equipment is inspected to ensure correct operation

1.8 Mixing operations for incendiary device are undertaken, in accordance with organisational procedures, manufacturers' guidelines and prevailing conditions

1.9 Incendiary devices are loaded into ignition equipment, in accordance with the organisational procedures

1.10 Ignition equipment is tested and adjusted, where required, to ensure correct operation

2 Conduct aerial ignition operations

2.1 Ignition equipment is operated, in accordance with organisational procedures and the manufacturers' specifications

2.2 Adjustments to ignition equipment are undertaken, as required, in response to changed conditions or alterations to burn plan

2.3 Emergency procedures are conducted, as required
2.4 Communications between pilot, navigator and ignition equipment operator are maintained throughout the operation

2.5 Ignition operations are conducted, in accordance with burn plan

3 Service, maintain and store incendiary equipment

3.1 Excess incendiary devices are disposed of, in accordance with organisational procedures

3.2 Ignition equipment is serviced, maintained and repaired within scope of authority

3.3 Equipment faults are documented and forwarded to appropriate personnel for action

3.4 Ignition equipment is stowed and forwarded to appropriate personnel for maintenance

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Ignition equipment must include one of the following:

- automated incendiary machines
- hand held manual incendiary injection
- helitorch aerial or drip torch

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR312B Operate aerial ignition equipment in an aircraft.

Links

Assessment Requirements for PUA FIR312 Operate aerial ignition equipment in an aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes:

- adhering to safe working practices if machine or ignition equipment malfunctions
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including aircraft or other emergency procedures and personal protective clothing and equipment
- conducting aerial ignition operations using approved devices and equipment
- demonstrating pre-flight testing and installation of aerial ignition equipment
- following approved flight plan
- implementing industry standards and legislation
- operating for extended periods in an aircraft
- preparing for ignition equipment
- reporting equipment malfunctions, accidents and incidents
- selecting, inspecting and testing personal protective clothing and equipment
- servicing, maintaining, repairing and storing approved devices and equipment
- using communications equipment
- using ignition equipment including helitorch aerial or drip torch, hand held manual incendiary injection and automated incendiary machines
- working as a member of a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- aircraft safety
- characteristics and limitations of incendiary devices and equipment
- emergency procedures
- guidelines relating to safe use of equipment including personal protective equipment
- incendiary capsule materials including potassium permanganate, ethylene glycol (antifreeze),
Assessment Requirements for PUAFIR312 Operate aerial ignition equipment
in an aircraft

Assessment Requirements

- petroleum products, gelling powder and methanol
- ignition equipment including helitorch aerial or drip torch, hand held manual incendiary injection equipment and automated incendiary machines
- industry standards
- lighting patterns
- mechanical knowledge sufficient to service, maintain and repair aerial ignition equipment
- mixing equipment
- organisational documentation, policies and procedures including procedures for working in aerial ignition operations
- service, maintenance and repair of equipment
- personal protection clothing and equipment including ear protectors, eye protection, gloves and other personal protection gear, fire resistant clothing, footwear, rubber gloves, vapour masks and respirators and safety helmets with visors
- types and applications of aerial ignition equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety and emergency procedures for undertaking aerial ignition operations, risk mitigation and hazard identification

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Assessment will take place in a simulated environment followed by an assessment by an accredited operator on the job.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - aerial ignition equipment and materials
  - aircraft
  - an area to conduct operations
  - appropriate tools for testing, maintenance and inspection of equipment
  - personal protective equipment and relevant safety equipment
• safe disposal facilities
• transport of incendiary devices and ignition equipment
• applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, conduct and evaluate simple prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for preparing, conducting and evaluating a simple prescribed burn on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

Competency Field

Fire

Unit Sector

Fire
**Elements and Performance Criteria**

**ELEMENTS**

Elements describe the essential outcomes.

**PERFORMANCE CRITERIA**

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 **Prepare to burn**

1.1 Burn operations for a simple prescribed burn are identified and undertaken, in accordance with approved prescribed burn plan, burn plan objectives, organisational procedures and legislative and regulatory requirements

1.2 Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements

1.3 Burn notifications and plans are issued to persons or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements

1.4 Control lines, including secondary control lines, are specified and prepared, in accordance with organisational procedures

1.5 Prescribed burn plan operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works are completed

1.6 Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures

1.7 Fuel conditions are monitored, in accordance with organisational procedures and prescribed burn plan

1.8 Resource requirements are confirmed with reference to burn plan

2 **Conduct burn**

2.1 Prescribed burn notifications are issued, in accordance with organisational procedures

2.2 Pre-burn checks are conducted, in accordance with organisational procedures

2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly

2.4 Resources are gathered and personnel are briefed, in accordance with prescribed burn plan and contingency
arrangements

2.5 Burn ignition strategies, including lighting techniques patterns and sequences are implemented, in accordance with organisational procedures and prescribed burn plan

2.6 Burning is monitored, patrol activities are conducted and operational changes made, as required

2.7 Contingencies are implemented, in accordance with prescribed burn plan, as required

2.8 Burn documentation is kept, in accordance with organisational procedures

2.9 Burn operations are concluded and burn security is implemented, in accordance with organisational procedures

2.10 Crews are debriefed and resources released from the burn

2.11 Incidents are reported and investigated, in accordance with organisational procedures

3 Conduct post burn activities

3.1 Outcomes of the burn are assessed against burn objectives, in accordance with organisational procedures

3.2 Variations from the burn plan are reported, in accordance with organisational procedures

3.3 Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures

3.4 Prescribed burn records are submitted, in accordance with the organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions may be found in the Companion Volume Implementation Guide.

Prescribed burn plan must include:
- approval of plan for the conduct of prescribed burning
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

Burn objectives must include one or more of the following:
- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

Personnel or organisation must include one or more of the following:
- personnel or organisations who
  - have an interest in adjacent land to which a burn could spread
  - have an interest in managing the consequences of a burn
  - have an interest in specific assets
  - have an interest in the area to be burned
  - may be concerned by evidence of a burn

Resources must include one or more of the following:
- contingency resources
- crews for control, suppression and ground ignition
- equipment and supplies
- logistical support
- other vehicles
- tankers

Burn ignition strategies and tactics must include:
- contingency arrangements
- fire behaviour to be achieved
- ignition methods, lighting patterns, sequencing and timing of ignition

Lighting techniques must include one or more of the following:
- hand held
- vehicle mounted propelled incendiaries
- wind and waterproof matches

Lighting techniques and patterns must include:
- contour lighting
- echelon
- grid
- line
lighting sequence must include one or more of the following

- multi-line
- spot
- lighting sequences that considers
  - fuel arrangement
  - fuel moisture
  - slope
  - time of day
  - wind direction

monitoring burn must include one or more of the following

- fire shape and spread
- flame height
- fuel moisture content
- predictions
- rate of spread
- recording
- safety considerations
- smoke development
- weather observation
- wind speed and direction

concluding operations and burn security must include one or more of the following

- mitigating hazards for public safety
- mopping up and black out
- patrolling burn area
- reopening roads
- transfer of responsibility, as per organisational procedures

outcomes of the burn must include one or more of the following

- achievement of burn objectives
- escapes
- external impacts
- levels of scorch
- percentage of area burnt
- reporting and storage of burn documentation

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR412 Conduct simple prescribed burns.

Assessment Requirements for PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazards, risk mitigation and safety of personnel
- checking burn and crew activities
- completing burn notifications
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings, safe burns utilising resources and post burn activities including operations and security
- confirming resources, location, construction and suitability of control lines for prescribed burns
- identifying and implementing restoration and rehabilitation activities
- implementing contingency arrangements
- interpreting and implementing simple prescribed burn plans
- interpreting simple prescribed burn plans and objectives, fire behaviour conditions and existing and forecast weather conditions
- monitoring equipment
- planning for contingencies
- preparing for a simple prescribed burn
- recording actions taken
- using fire prediction tools and resources

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- briefing and debriefing content and processes
- burn notification including verbal and written notification
- characteristics of a simple prescribed burn including completed in one shift, involves
minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area

- conclusion of simple prescribed burns including operations and security
- contingency arrangements including command structure, safety considerations such as escape routes and safety zones, actions to take in the event of unexpected fire behaviour changes, resolution of escapes, special resources and secondary control lines, resource requirements, resolution of resource breakdowns, injury on fire line and burn targets not met
- contingency plans
- fire prediction tools
- ground ignition patterns and techniques
- impact of conditions at simple prescribed burns on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative and organisational authorisations required
- organisational documentation, policies and procedures
- outcomes of simple prescribed burn
- personnel and organisations involved in simple prescribed burn activities
- required permits
- resource requirements
- restoration and rehabilitation
- seasonal restrictions on simple prescribed burns
- simple prescribed burn and securing burn monitoring
- techniques, patterns and sequencing for lighting
- types of property and assets
- types of simple prescribed burns, prescribed burn plans and objectives
- weather conditions including: temperature, relative humidity, weather changes, atmospheric stability, drought index, fire danger index, weather forecasts, actual or anticipated changes in conditions and progress targets not met
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

**Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.
Competency should be demonstrated in a range of actual and/or field based workplace environments with evidence collected from undertaking a simple prescribed burn being required.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - fire management and contingency plans
  - lighting and suppression crews
  - lighting and suppression equipment
  - simple prescribed burn plans
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

2.13 Prescribed burn plan is prepared, in accordance with organisational procedures

3 Gain approval of prescribed burn plan

3.1 Prescribed burn plan is submitted for approval, in accordance with organisational procedures and legislative requirements

3.2 Modifications and amendments to prescribed burn plan are made based on feedback received

3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

simple prescribed burn plan must include

- an approved plan for conduct of simple prescribed burn
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

simple prescribed burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- management of cultural sites and activities
- protection of fire sensitive ecological communities
target consultation groups must include one or more of the following:

- vegetation management
- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- groups or individuals that may be adversely affected
- other groups and people within prescribing organisation

lighting techniques must include:

- hand held
- wind and/or waterproof matches

lighting patterns include one or more of the following:

- contour lighting
- echelon
- grid
- line
- multi-line
- spot

operational hazards must include two or more of the following:

- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous material
- high fuel loads
- ignition methods
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following:

- impact of smoke on vulnerable communities near burn area
- safety of any people permanently or temporarily in burn area
- safety of people involved with burn implementation
- safety of people on areas adjacent to burn area
- camps or recreational areas
- commercial land use such as crops or industry
- cultural sites or historical buildings
- other property and assets
- plantations

property and assets must include two or more of the following that are near the burn area:

- camps or recreational areas
- commercial land use such as crops or industry
- cultural sites or historical buildings
- other property and assets
- plantations
research plots and reference areas
stock
urban areas
utilities - power and telephone lines, water supply structures and communications towers

environmental and ecological risks must include

- impact on
  - native flora and fauna including rare and endangered species
- smoke
- soil
- use of chemical fire suppressants
- water quality or supply

resources must include one or more of the following

- crews for ground ignition and suppression
- equipment backup
- ignition and suppression equipment and supplies
- logistical support
- other vehicles
- tankers

Assessment Requirements for PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes:

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- assessing fuel types and quantities in burn area
- determining actions to minimise impacts of simple prescribed burn
- developing contingency arrangements
- developing pre-burn work schedule
- gaining simple prescribed burn approval
- identifying and working with resources
- identifying burn areas including developing timelines for planning and conduct of simple prescribed burn, simple prescribed burn objectives, strategies and tactics to meet simple prescribed burn objectives, ignition strategies and lighting techniques and patterns for ignition
- identifying resources
- identifying, assessing and mitigating operational hazards and risks
- identifying, assessing and mitigating risks to people, property and assets, ecological and environmental risks
- implementing legislation and regulations
- interpreting map of area and identifying key features
- predicting anticipated fire behaviour and intensity in burn area
- preparing plans and map for simple prescribed burning
- targeting consultation groups are identified, liaised with and consulted

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of
• accumulated fuels
• characteristics of simple prescribed burns including completed in one shift, involves minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
• contingencies
• effects of fire on vegetation, fauna, people, property, assets, ecology and the environment
• fire behaviour for fuel type being prescribed
• fire prediction tools
• ignition strategies and tactics
• legislative, regulatory, organisational and permit requirements for simple prescribed fires
• notification requirements
• organisational documentation, policies and procedures
• planned burn hazards and risks
• resource requirements and capabilities
• simple prescribed burn plans
• simple prescribed burning ignition and suppression strategies
• smoke management
• target groups and community
• traffic management plan requirements
• Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment Requirements for PUAFIR504 Assist with formulation and implementation of plans and policies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assisting in the development, implementation and evaluation of policies, procedures or plans
- assisting in the preparation and implementation of organisational business plans
- contributing to strategic and operational planning processes
- developing and proposing submissions
- facilitating policy and plan change within the organisation
- following consultative processes
- identifying and considering stakeholder concerns
- implementing change management strategies to deal with resistance to policy development
- monitoring the administration of organisational policies, procedures and plans

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- concepts involved in the policy cycle
- consultative procedures and processes in the policy cycle
- methods for implementing and evaluating policies, procedures and plans
- organisational documentation, policies and procedures including submissions
- reasons for resistance to policy development and strategies for dealing with issues that arise
- role of management, employees and stakeholders in policy and plan development
- stakeholders and external organisations
- submission types
- types of operational plans
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation
Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated over time and in a range of contexts; the evaluation of the development and implementation of organisational plans and policies may require a few months.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR506 Conduct complex prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare and conduct complex prescribed burns, in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. A burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. A prescribed burn may require several separate ignitions (ground and/or aerial) possibly over several days. It may have several high value assets requiring complex protection actions.

The unit applies to personnel responsible for preparing, conducting and evaluating complex prescribed burns on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

### 1  Prepare to burn

- **1.1** Complex prescribed burn operations are identified and undertaken, in accordance with approved prescribed burn plan, burn objectives, organisational procedures, and legislative and regulatory requirements.
- **1.2** Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements.
- **1.3** Burn notifications and plans are issued to personnel or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements.
- **1.4** Control lines, including secondary control lines are specified and prepared, in accordance with organisational procedures.
- **1.5** Prescribed burn plan, operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works completed.
- **1.6** Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures.
- **1.7** Fuel conditions are monitored, in accordance with organisational procedures.
- **1.8** Resource requirements are confirmed with reference to burn plan and anticipated conditions.
- **1.9** Forecast weather conditions are monitored throughout prescribed complex burn.

### 2  Conduct burn

- **2.1** Burn notifications are issued, in accordance with organisational procedures.
- **2.2** Pre-burn checks are conducted, in accordance with.
organisational procedures

2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly

2.4 Resources are gathered and personnel briefed, in accordance with prescribed burn plan and contingency arrangements

2.5 Burn ignition strategies and tactics are implemented, in accordance with prescribed burn plan and organisational procedures including lighting techniques for ground and aerial ignition, as relevant to the specific burn, lighting patterns and lighting sequence

2.6 Burning is monitored, patrol activities are conducted and operational changes made, as required

2.7 Contingencies are implemented, as required, in accordance with prescribed burn plan

2.8 Burn documentation is kept, in accordance with organisational procedures

2.9 Burn operations are concluded and burn security is implemented in accordance with organisational requirements

2.10 Crews are debriefed and resources released from the burn

2.11 Incidents are reported and investigated in accordance with organisational procedures

3 Conduct post burn activities

3.1 Outcomes of burn are assessed and reported against burn objectives, in accordance with organisational procedures

3.2 Variations from burn plan are reported, in accordance with organisational procedures

3.3 Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures

3.4 Complex prescribed burn records are submitted, in accordance with organisational procedures
Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include
- an approved plan for conduct of prescribed burning
- map identifying the area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following
- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

operational hazards must include one or more of the following
- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- ignition methods
- plant
- road traffic
- vegetation

environmental and ecological risks must include three or more of the following
- impact of smoke
- impact of use of any chemical fire suppressants
- impact on native flora and fauna, including rare and endangered species
- impact on soil
- impact on water quality or supply

contingency arrangements must include
- actions to take in the event of unexpected weather
- command structure
• dealing with escapes
• resource breakdowns
• resource requirements
• safety considerations including escape
  routes and safety zones
• special resources and/or secondary control
  lines
• wind changes

personnel or organisations must include one or
more of the following
• personnel or organisations who
  • have an interest in managing the
    consequences of a burn
  • have an interest in preventing health
    impacts from smoke e.g. nursing homes,
    health departments
  • have an interest in specific assets
  • have an interest in the area to be burned
  • may be adversely affected by the burn
  • may be concerned by evidence of a burn
  • may have adjacent land to which a burn
    could spread

resource requirements must include one or
more of the following
• contingency resources
• crews for
  • aircraft ground support
  • control and suppression
  • ground ignition
• equipment and supplies
• logistical support
• tankers and other vehicles

burn ignition strategies and tactics must
include:
• contingency arrangements
• fire behaviour to be achieved
• ignition methods, lighting patterns,
  sequencing and timing of ignition

lighting techniques for ground and aerial
ignition must include
• aerial drip torch
• aerial incendiaries
• hand held of vehicle mounted propelled
  incendiaries
• wind and/or waterproof matches

lighting patterns must include
• contour lighting
• echelon
• grid
• line
• multi-line
lighting sequence must include
- spot
- fuel arrangement
- fuel moisture
- slope
- time of day
- wind direction

monitoring complex prescribed burn must include
- fire development, shape and spread
- flame height
- fuel moisture content
- predictions
- rate of spread
- recording
- safety considerations
- smoke development
- weather observations

conclusion and complex prescribed burn security activities must include
- mitigating hazards for public safety
- mopping up and blacking out
- patrolling burn area
- reopening roads
- transfer of responsibility procedures

outcomes of the complex prescribed burn must include
- achievement of burn objectives
- escapes
- external impacts
- levels of scorch
- percentage of area burnt
- reporting and storage of burn documentation
- all those involved with burn implementation
- any in areas adjacent to burn area
- any permanently or temporarily in burn area
- impact of smoke on vulnerable communities near burn area

safety of people must include
- all those involved with burn implementation
- any in areas adjacent to burn area
- any permanently or temporarily in burn area
- impact of smoke on vulnerable communities near burn area

**Unit Mapping Information**

This unit replaces and is equivalent to PUAFIR511 Conduct complex prescribed burns.

Assessment Requirements for PUAFIR506 Conduct complex prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings
- conducting post burn activities
- conducting safe complex prescribed burn operations by utilising appropriate resources (ground and air)
- confirming location, construction and suitability of control lines for prescribed burns
- confirming resources required
- evaluating outcomes against objectives
- identifying and protecting assets
- implementing complex prescribed burn plans for designated area
- implementing contingency arrangements
- interpreting and implementing complex prescribed burn plans
- interpreting existing and forecast weather conditions and fire behaviour conditions
- issuing verbal and written burn notifications
- monitoring burn and patrol activities
- preparing to burn
- recording actions taken
- responding to changing conditions
- restoring and rehabilitating sites
- using fire prediction tools
- using monitoring equipment
- utilising lighting techniques and sequencing
- working with ignition patterns and techniques
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- characteristics of complex prescribed burns including involvement of a variety of fuels and terrain, medium to large areas, moderate to high risk, range of fire intensity and significant potential impact on assets
- contingency plans
- evaluation of burn outcomes against objectives
- fire prediction tools and their use
- fuel sampling techniques
- ground and aerial ignition patterns and techniques
- impact of conditions of a complex prescribed burn on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative, regulatory and organisational authorisations
- organisational documentation, policies and procedures
- permit requirements
- prescribed burns monitoring and securing
- procedures for monitoring, concluding and securing burn
- resource requirements and capabilities
- restoration and rehabilitation activities including site stabilisation and recording and reporting future restoration and rehabilitation requirement
- seasonal restrictions on prescribed complex burns
- smoke modelling and smoke impacts
- techniques, patterns and sequencing for lighting
- traffic management plans
- types of prescribed complex burns
- types of property and assets within or near burn area including urban areas, commercial land use such as crops or industry, any cultural sites or historical buildings, other property and assets, stock, utilities such as power and telephone lines, water supply, structures and communications towers, camps or recreational areas, plantations and research plots and reference areas
- verbal and written burn notifications
- weather conditions including temperature, relative humidity, wind, atmospheric stability, drought index, fire danger index, weather forecasts and actual or anticipated changes in conditions
- weather monitoring techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include
requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in an operational environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - an area for proposed complex prescribed burn
  - authorisation to light burn
  - fire management plans
  - lighting and suppression crews
  - lighting equipment
  - prescribed burn plans including plan for proposed assessment burn
- suppression equipment applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR515 Develop complex prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop complex prescribed burn plans for specified burn areas to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area at a time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. The burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. It may require several separate ignitions, ground and/or aerial, possibly over several days and it may include a number of high value assets requiring complex protection actions.

The unit is applicable to personnel responsible for developing complex prescribed burn prescriptions.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

<tr>
<td>2 Prepare prescribed burn plan for a complex burn</td>
<td>2.1 Key features of burn area are identified including variations in terrain, fuel types and quantities, control lines and weather.</td>
</tr>
<tr>
<td></td>
<td>2.2 Risks from the proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environmental and ecological risks.</td>
</tr>
<tr>
<td></td>
<td>2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures.</td>
</tr>
<tr>
<td></td>
<td>2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined.</td>
</tr>
<tr>
<td></td>
<td>2.5 Burn ignition strategies and tactics suited to location that provide required fire behaviour and intensity are determined, in accordance with organisational procedures.</td>
</tr>
<tr>
<td></td>
<td>2.6 Lighting techniques and patterns for both ground based and aerial ignition for specific burn are identified.</td>
</tr>
</tbody>
</table>
2.7 Strategies for mitigating hazards and risks are identified and preparatory works are implemented

2.8 Strategies and tactics for controlling prescribed burn are identified

2.9 Type and quantity of resources required are identified

2.10 Conditions for implementation of burn ignition strategies and tactics are specified, in accordance with organisational procedures

2.11 Prescribed burn plan is prepared, in accordance with organisational procedures

2.12 Contingencies are outlined in prescribed burn plan

3 Gain prescribed burn plan approval

3.1 Prescribed burn plan is submitted for approval, in accordance with legislative and organisational requirements

3.2 Modifications and amendments to prescribed burn plan are made, based on feedback received

3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Complex prescribed burn plans must include

- approved plan for conduct of prescribed burning
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

Burn objectives must include one or more of the following

- asset, biodiversity and community protection
- habitat management
- hazard reduction
target consultation groups must include one or more of the following
- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- other groups and people within the prescribing organisation
- people that may be affected by burn

burn ignition strategies and tactics must include
- fire behaviour to be achieved
- ignition methods, sequencing and timing of ignition

lighting techniques for ground and aerial ignition must include
- aerial drip torch
- aerial incendiaries
- hand held and vehicle mounted propelled incendiaries
- wind and/or waterproof matches

lighting patterns must include one or more of the following
- contour lighting
- echelon
- grid
- line
- multi-line
- spot

operational hazards must include two or more of the following
- adjoining land use and proximity to urban areas
- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- high fuel loads
- ignition method
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following
- impact of smoke on vulnerable communities near the burn area
- safety of any people permanently or

temporarily in burn area
  • safety of people involved with burn implementation
  • safety of people on areas adjacent to burn area
  • any of the following that are in or near the burn area
    • camps or recreational areas
    • commercial land use such as crops or industry
    • cultural sites or historical buildings
    • other property and assets
    • plantations
    • research plots and reference areas
    • stock
    • urban areas
    • utilities - power and telephone lines, water supply structures and communications towers

environmental and ecological risks must include
  • impact of native flora and fauna including rare and endangered species
  • impact of smoke
  • impact of soil
  • impact of use of chemical fire suppressants
  • impact on water quality or supply

resources required must include one or more of the following
  • aircraft and crews including incendiary operations supervisors and machine operators for aerial ignition
  • aircraft ground support
  • control line standards
  • crews and supervisors for ground ignition, control and patrol work
  • equipment and supplies including fuel and incendiaries
  • planning and logistical support
  • pre-burn work schedule
  • tankers, other ignition and suppression vehicles, equipment and fuel

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR513 Develop complex prescribed burn plans.
Links

Assessment Requirements for PUAFIR515 Develop complex prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes:

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risks mitigation and safe work practices
- assessing characteristics of multiple fuel types, terrain and weather
- consulting with target groups
- developing a pre-burn work schedule
- developing contingency arrangements
- documenting complex prescribed burn plans including objectives
- gaining complex prescribed burn approval
- identifying actions to minimise impacts of complex prescribed burn preparation
- identifying resources
- identifying, assessing and mitigating operational hazards and risks including to people, property, assets, ecology and environment
- identifying, liaising and consulting with target consultation groups
- interpreting maps of area and identifying key features
- predicting fire behaviour and intensity in burn area
- preparing maps for complex burn operational use
- preparing plans for complex prescribed burns including developing lighting techniques and patterns for ground and aerial ignition, tactics involving multiple fuel types, ignition strategies, burn objectives, strategies and tactics to meet objectives and timelines for planning and conduct of burn
- recommending actions and communicating them
- responding to feedback and adjusting plans for approval

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes
knowledge of

- accumulated fuels
- burn feasibility
- characteristics of a simple prescribed burn including completed in one shift, involves minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
- characteristics of complex prescribed burn including medium to large areas, moderate to high risk, range of fire intensity, significant potential impact on assets and variety of fuels and terrain
- complex prescribed burning ignition and suppression strategies including ignition patterns and sequences for ground and aerial
- contingency arrangements including command structure, safety considerations including escape routes and safety zones, actions in event of unexpected weather, resolution to escapes, special resources and/or secondary control lines, additional resource requirements and resolution to resource breakdowns
- control line suitability
- effects of fire on people, property, assets, ecology and environment
- fire prediction tools
- fuel sampling techniques
- legislative, regulatory, organisational and permit requirements
- organisational documentation, policies and procedures including pre-burn procedures
- planned burn hazards and risks
- resource capabilities
- smoke modelling
- traffic management
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- written and verbal notification requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.
Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - area requiring application of fire under prescribed conditions
  - existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR601 Develop and administer organisational policies, procedures and practices

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to administer policies, procedures and practices to support the achievement of organisational and operational objectives. The unit applies to personnel required to lead a team to develop policies and supporting procedures to meet identified organisational needs. Policies developed will require integration into the organisation’s strategic and business planning.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR504 Assist with the formulation and implementation of plans and policies

PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to conduct an initial assessment on receipt of a call, when enroute and/or at the incident and to then take action to maintain public safety, preserve scene and record details and information on arrival at the scene of an accident or incident.

The unit is applicable personnel who are the first to arrive at the scene of an accident or incident. It applies to public safety personnel at an incident who need to understand the importance of maintaining the legal integrity of a scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying questioning skills to gain accurate information
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information and liaising with all stakeholders
- conducting assessment enroute and at the incident scene
- implementing organisational policies and procedures
- observing scene and surrounding environment
- recording and reporting details of incident scene in accordance with organisational requirements
- securing and preserving scene, evidence and area or origin
- securing scene including removing non-emergency personnel from scene, isolating scene and erecting barriers
- taking notes accurately

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- factors impacting on public safety and scene preservation including those that could impact on safety of investigators, response team, security and/or preservation of actual site, security and preservation of situational evidence and traffic
- factors that may impact security of scene including topography, climatic conditions, human interference, animal interference, preservation of life/property, structural integrity and availability of personnel
- methods of securing scene
- organisational and legislative requirements
- organisational documentation, policies and procedures
- organisational procedures relative to scene preservation, collecting information and taking
Assessment Requirements for PUALAW001 Protect and preserve incident scene

- witness details
- tactical factors affecting quality of investigation including environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services and boundaries
- types of incident scenes
- witness details including name, contact details and other details are recorded, in accordance with organisational policies, procedures and legislative requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Unit Descriptor

This unit covers the competency required, on arrival at the scene of an accident or incident, to conduct initial assessment, take action to maintain public safety and preserve the scene, and note and record details and information.

The unit is particularly applicable in cases where organisation personnel are the first to arrive at the scene of an accident or incident.

Application of the Unit

This unit applies to all public safety workers at an incident who need to understand the importance of maintaining the legal integrity of the scene. It is not a specialist Crime Scene Investigation unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Secure and preserve scene | 1.1 Initial assessment is participated in to identify factors which will impact on public safety and scene preservation.  
1.2 Incident/accident scene is effectively secured to preserve the scene and maintain public safety in line with legislative requirements. |
| 2. Record and report details of incident scene | 2.1 Details of the scene are noted, recorded and reported according to organisation's policies and procedures.  
2.2 Witness details and information volunteered are recorded in accordance with organisational and legislative requirements.  
2.3 Information is communicated to relevant personnel in line with organisation's procedures. |

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills
- listening  
- note taking  
- observation  
- questioning  
- reporting

Required Knowledge
- legislative and organisation requirements relating to scene preservation
- methods of securing scene
- organisation requirements for taking witness details and information
- regulatory requirements for taking witness details and information
- techniques for estimating distance
- techniques for removing public from scene
- types of information which may assist in investigations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation’s policies and procedures.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

Incident scene may include:

- urban fire
- wild fire
- vehicle fire
- crime scene
- search for missing persons or evidence
- vehicle accident
- natural disaster
- industrial/mining accident
- incident involving death or injury to person or
damage to property
  - urban scene
  - rural scene
  - indoor scene
  - outdoor scene
  - animal incident
  - marine
  - aircraft
  - train
  - explosions
  - hazardous materials

Assessment of scene may be conducted:
  - at scene
  - en route to and from scene

Factors impacting may include:
  - public safety risk factors including factors that could impact on the safety of investigators
  - response team
  - the security/preservation of the actual site
  - the security and preservation of situational evidence
  - traffic
  - tactical factors affecting the quality of the investigation including environmental circumstances
  - chronology of events
  - access to scene
  - number of persons at scene
  - availability of support services
  - boundaries
  - incident scene specialists
  - forensic experts
  - potential witnesses
  - victims
  - other bystanders
  - personnel from other organisations
  - media
  - coroners
  - pathologists
  - medical practitioners
  - undertakers
  - forensic accountants
  - information technology consultants
  - legal officers
  - owners and/or occupiers

Persons at scene may include:
Security of scene may be affected by:

- topography
- climatic conditions
- human interference
- animal interference
- preservation of life/property
- structural integrity
- availability of personnel

Securing scene may include:

- removing non-emergency personnel from scene
- isolating scene
- erecting barriers

Details of scene may include:

- date
- time
- location
- damage
- persons present
- property involved
- possible causes
- items of evidence
- injuries
- status of utilities services such as broken water pipes
- animal species present
- flora
- fauna
- size and construction of building
- occupancy
- insurance details

Witness details may include:

- name
- contact details
- other details in accordance with organisation’s policies and procedures

Relevant personnel may include:

- supervisor
- team leader
- police
- investigating officer
- other organisation’s personnel

Communication may include:

- verbal
- completing standard forms
- written

Recording and reporting may include:

- taking notes
- completing standard forms
- making sketches
Preserving scene may include:

- taking photographs
- taping
- electronic videoing
- preserving evidence and the area of origin

Organisational and legislative requirements may vary between sectors and organisations and may include:

- legislation relevant to the operation/incident/response
- legislation relevant to the organisation
- operational
- corporate and strategic plans
- operational procedures
- operational performance standards
- organisation’s personnel practices and guidelines
- organisation’s quality standards

Unit Sector(s)

Not applicable.
PUAMAN005 Manage projects

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage and evaluate projects.

The unit is applicable to any personnel undertaking a project management role. This includes management of small and short term projects as well as roles with a specific project management focus.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUATEA003 Lead, manage and develop teams

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
1 Identify project scope

1.1 Identify and record scope, objectives and outcomes of project

1.2 Strategy to achieve project objectives, outcomes and client requirements is developed

1.3 A risk management system is developed and applied to ensure project objectives can be met within organisational accountability frameworks

2 Acquire project resources

2.1 Project resources and equipment are identified, acquired and allocated

2.2 Project scope and objectives are analysed to determine tasks to achieve agreed outcomes on time and within budget

2.3 Process for monitoring, evaluating and reporting performance against objectives are developed and applied

2.4 Roles and responsibilities of team members and stakeholders are identified and agreed

3 Manage project activities

3.1 Project is initiated, in accordance with organisational policies and strategic direction, in consultation with stakeholders

3.2 Tasks are implemented, in accordance with project plan and organisational procedures

3.3 Communication process is established including responsibilities for conflict resolution

3.4 Progress is monitored to ensure time, performance, cost and quality of project is achieved

3.5 Proposed variations are investigated and negotiated, in consultation with stakeholders

4 Finalise project and evaluate and report on activities

4.1 Project is completed, outcomes are recorded and opportunities for future improvement are established

4.2 Evaluation of completed project is undertaken against agreed objectives and is reported to stakeholders
Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAMAN005B Manage projects.

Assessment Requirements for PUAMAN005 Manage projects

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing outcomes on completion of project
- designing strategies to achieve project outcomes and client requirements
- evaluating and reporting on project performance and project achievements
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying and preparing project scope
- implementing communication strategies with internal and external clients
- managing project according to predetermined timeframes and available resources
- maximising team effectiveness and staff selection
- monitoring project progress
- negotiating with contractors and suppliers
- obtaining project resources

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- basics of contract law
- communication techniques
- cost schedule control systems
- human resource management and policies
- integration of project activities
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements
- organisational procurement guidelines
- project management systems, tools and techniques
- project plans
- project specifications and objectives
- resource management
- risk management techniques
• types of stakeholders

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

• a range of relevant exercises, case studies and/or simulations
• relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
• applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOPE015 Conduct briefings and debriefings

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to lead and conduct a briefing and/or a debriefing in operational and nonoperational situations, in a range of environments. It includes planning and preparing for briefings and debriefings, conducting briefings and debriefings and concluding briefings and debriefings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

PUAOPE016 Manage a multi-team sector

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage a multi-team response at an incident which may be time critical and/or potentially threatening to life, property or the environment.

An individual performing in this role has the title of Sector or Division Commander and/or Level 1 Operations Officer and is delegated responsibility by either the Incident Controller or Operations Officer. The individual is responsible for managing a sector or division at an incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

One of the following:
PUAFIR302 Suppress urban fire
PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing information and support the chain of command
- adapting tactics
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing effectiveness of strategies and tactics on sector or division
- briefing and debriefing personnel
- completing documentation
- conducting an assessment of the area of operation
- deploying and managing human and physical resources
- establishing command of sector or division
- following organisational policies and procedures
- identifying and assessing risks
- implementing operations portion of the incident action plan
- leading teams
- maintaining shared situational awareness
- making decisions, negotiating and resolving conflict
- managing and monitoring sector or division operations
- managing post incident operations including demobilisation arrangements
- providing reports through the chain of command
- using communications systems

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- Australasian Inter-service Incident Management System (AIIMS) structure
- constraints on actions that may limit available options
- equipment and personnel capabilities for incident type
• human and physical resources available for the incident
• incident action plan objectives, strategies and tactics including Incident Controller's intent
• incident site layouts
• initial response options
• organisational command structure
• organisational policies, procedures and documentation for managing operations
• post operational procedures
• processes for implementing, monitoring, amending and reviewing strategies and tactics
• requirements for reporting and recording
• risk assessment
• types of incidents
• Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

• a range of relevant exercises, case studies and/or simulations
• relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
• applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work with others whilst making a positive contribution to the effectiveness and efficiency of a team in a work environment, when under direct supervision. Limited responsibility towards others is required.

The unit applies to personnel working in public safety and is particularly pertinent to new staff in assisting with integration into the team culture of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attending and working in a variety of team situations
- completing organisational documentation
- contributing to organisational goals and team activities, team meetings and the achievement of tasks consistent with goals
- displaying interpersonal skills and encouraging team members
- following instructions
- following organisational policies and procedures
- giving and receiving support to and from team members
- identifying work conditions and types of activities to be undertaken
- listening and using a variety of communication skills
- providing appropriate suggestions, feedback and information to team members
- reporting information
- requesting assistance from appropriate personnel
- sharing knowledge and information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- composition of teams including roles and responsibilities of members
- nonoperational and operational communication processes
- organisational documentation, policies and procedures
- organisational goals and activities
- potential work task conditions
- techniques for assisting and supporting others
- techniques for giving and receiving feedback in a constructive manner
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation
Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with RGR Racing and Breeding Training Package Version 3.0.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to carry out mare mating procedures using stallions for natural service to maximise conception rates and live foal outcomes. It includes identifying mares in oestrus, attending mares for service, providing support for reproductive services and keeping accurate records.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

<table>
<thead>
<tr>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- carried out natural mating preparation and service procedures for at least three mares, including:
  - two with a foal at foot
  - one maiden mare
- maintained accurate records of mating and breeding activities for each individual horse.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices relevant to mare mating procedures:
  - relevant horse breeding terminology
  - relevant anatomy and physiology of male and female reproductive systems in horses, including conception and gestation
  - common infertility in mares and what may be treated by veterinarians
  - oestrus cycle in mares and dioestrus behaviour and its detection
- safe work practices:
  - safe horse handling techniques
  - hazard and risk identification and minimisation
  - personal protective equipment (PPE)
  - biosecurity, hygiene and infection control practices relevant to mating procedures
- key regulatory requirements relating to animal welfare
- mare identification methods, including mare status and stallion booking
- procedures for preparation for mating, including:
Assessment Requirements for RGRHBR302 Carry out natural mare mating procedures

- uterine swabbing and treatment
- role of veterinarians in carrying out follicle and pregnancy testing
- mare handling procedures, including types and purpose of different handling restraints
- workplace recording and reporting procedures, including stud recordkeeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace with teasing yards, stud veterinary facilities, breeding area or barn and foal restraint areas
- resources, equipment and materials:
  - mares to be mated, assessed as suitable for the experience and skill of the individual
  - at least one working stallion and teaser
  - tack, equipment and restraints required for teasing and natural mating
  - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
- specifications:
  - workplace recording and reporting forms or systems
  - work instructions or program for carrying out mating procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</table>

Application

This unit of competency describes the skills and knowledge required to assist with mare artificial insemination (AI) procedures to maximise conception rates and live foal outcomes. It includes identifying mares in oestrus, attending mares for service, providing support for reproductive services and keeping accurate records.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

<table>
<thead>
<tr>
<th>Unit of competency</th>
<th>Prerequisite requirement</th>

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements</th>
<th>Performance Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
| 1. Prepare for AI mare procedures | 1. Interpret the work program to determine work to be undertaken, and confirm with management  
2. Communicate with other workers to ensure smooth operation of the production process  
3. Adhere to requirements for the care and handling of horses  
4. Select, use and maintain personal protective equipment (PPE) for safety and hygiene purposes |
| 2. Identify mares in a state of oestrus | 1. Identify and select mares due for teasing or service  
2. Identify work health and safety hazards, including horse behaviour and body language, assess risks and implement suitable controls  
3. Catch and restrain selected mare, and foal if present, using safe horse handling techniques, for teasing or other oestrus identification procedures  
4. Complete stud records according to workplace requirements |
| 3. Attend mares for AI | 1. Prepare mare for AI routines according to stud practice  
2. Restrain mare safely for AI and secure any foal at foot in close proximity  
3. Attend mare for the AI process  
4. Return mare, and foal if present, to box or paddock  
5. Complete workplace records |
| 4. Handle mares for routine veterinary reproductive procedures | 1. Handle mare and foal to ensure both are settled and safe  
2. Lead mare (and foal) into crush, ensuring safety and wellbeing of both mare and foal, if present  
3. Use an appropriate restraint method in the crush  
4. Provide support for manual or ultrasound follicle and pregnancy testing procedures and AI  
5. Assist the veterinarian to prepare for examination, swabbing, treatment or AI of the mare |
Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- carried out artificial insemination (AI) procedures with at least three mares, including at least one with foal at foot
- maintained accurate records of AI and breeding activities for each individual horse.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant horse breeding terminology
- relevant anatomy and physiology of male and female reproductive systems in horses, including:
  - conception and gestation
  - common infertility in mares and what may be treated by veterinarians
  - oestrus cycle in mares and dioestrus behaviour and its detection
- procedures for preparation for AI
- requirements of veterinarians in carrying out follicle and pregnancy testing
- mare handling procedures, including types and purpose of different handling restraints for mares
- mare identification methods, including mare status and stallion booking
- infection control and testing of mares
- key regulatory requirements relating to animal welfare
- safe work practices:
  - safe horse handling techniques
  - hazard and risk identification and minimisation
  - personal protective equipment (PPE)
biosecurity and hygiene practices relevant to AI procedures
workplace recording and reporting procedures, including stud recordkeeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - various mares requiring AI assessed as suitable for the experience and skill of the individual
  - tack, equipment and restraints required for AI
  - PPE fitted and applicable for task for individual
  - workplace recording and reporting forms or systems
- specifications:
  - work instructions or program for carrying out AI procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- identified and assessed the suitability of at least three horses for specific uses
- maintained appropriate records of each horse assessed
- evaluated the overall suitability of each horse for specific uses, and reported on findings.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- desirable and undesirable conformations for specific uses
- common blemishes on fore and hind limbs and hooves
- common behavioural issues in horses
- desirable and undesirable natural gaits
- process for determining characteristics needed for specific uses
- impact of breeding or parentage on individual horse suitability for a specific use
- factors that affect suitability of an individual horse for a specific use, including gender, class and age
- how the final assessment could affect value of horse
- horse industry terminology relevant to assessing horse suitability.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
Assessment Requirements for RGRHBR304 Assess suitability of horses for specific uses

Date this document was generated: 3 September 2020

- various live horses to be assessed for suitability for specific uses, assessed as suitable for the experience and skill of the individual
- specifications:
  - criteria for specific uses the horses are to be used for.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- safely handled and conducted a range of routine activities with young horses, including:
  - caught and handled three foals
  - assisted with weaning three foals
  - prepared and presented three yearlings for sale
  - completed required records for each horse.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- suitable facilities for weaning and yearling preparation
- potential dangers to the foal and mare during weaning, and appropriate actions to reduce them
- stress responses sometimes associated with weaning for both mare and weanling:
  - fretting
  - over-heating
  - refusing food
  - overeating
  - self-inflicted injuries
- potential dangers to the yearlings during sale preparation, and appropriate actions to reduce them:
  - removing any potential hazards from stalls and handling areas
  - exercising in confined areas
  - monitoring exercise
- effects of exercise on joints and bones of the legs
• various responses in yearlings associated with sale preparation:
  • fretting
  • poor appetite
  • overeating
  • stable vices
• suitable tack and equipment for young horses
• safe horse handling techniques for young horses
• key features of regulatory requirements relevant to working with horses for:
  • work health and safety, including use of personal protective equipment
  • animal welfare
  • biosecurity.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions, including a small handling yard and crush
• resources, equipment and materials:
  • various young horses including weaning foals, weanlings and yearlings – note that young horses can be less compliant and highly reactive, and should be assessed as suitable for the experience and skill of the individual
  • appropriate tack for handling and caring for young horses
  • personal protective equipment (PPE) correctly fitted and applicable for task for individual
• specifications:
  • work instructions and workplace procedures for handling young horses.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- safely handled, fed and cared for at least three young horses (covering foals, weanlings and/or yearlings)
- observed each young horse and reported on behaviour and development
- educated three young horses to be led, tied and paraded in hand.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for raising young horses, including:
  - desirable and undesirable conformation and strategies to address undesirable conformation or characteristics
  - developmental disorders of young horses
  - diseases and common illnesses associated with young horses
  - monitoring behaviour
- animal health and welfare practices for young horses:
  - feeding and nutrition requirements for young horses and weaning foals
  - vaccination, worming and rotational or seasonal parasite programs
  - weaning practices
  - enrichment activities
- work health and safety practices applicable to working with young horses
- safe horse handling techniques for educating young horses
- hygiene, infection control and biosecurity practices applicable to working with young horses
- key principles and features of animal welfare legislation.
Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions

- resources, equipment and materials:
  - various young horses – note that young horses can be less compliant and highly reactive, and should be assessed as suitable for the experience and skill of the individual
  - appropriate tack and equipment used for handling and caring for young horses
  - personal protective equipment (PPE) correctly fitted and applicable for task of individual

- specifications:
  - work instructions and workplace procedures for handling young horses.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- monitored and prepared at least two mares for foaling
- checked and monitored the condition of each mare post-foaling
- handled one newly born foal safely
- recorded and reported details of mares and foals according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for foaling down mares, including:
  - signs of dystocia or malpresentation by timing rate of progress in giving birth and the initial presentation of the foal
  - stages of foaling and common timeframes, including water breaking, expulsion of the foetus, and expulsion of afterbirth
  - scenarios where specialist advice or assistance is needed
  - reasons for undertaking and timing of IgG (immunoglobulin) test on newborn foals
  - common timeframes for foals to stand and drink
  - features of safe and secure post-foaling environment
- safe work practices:
  - safe and ethical horse handling techniques
  - hazard identification and practices for controlling risks in foaling and post-foaling environment
  - personal protective equipment (PPE) for safety and infection control
  - maintaining hygienic and environmentally responsible workplace practices
Assessment Requirements for RGRHB R307 Carry out procedures for foaling down mares

Date this document was generated: 3 September 2020

- workplace recording and reporting requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - various live mares in-foal and newborn foals assessed as suitable for the experience and skill of the individual
  - appropriate tack for horse and activity
  - PPE correctly fitted and applicable to activity for the individual
  - equipment required for foaling down
- specifications:
  - work instructions for carrying out foaling down of mares
  - foaling recording/reporting forms.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to assist with the administration and maintenance of horse stud records and horse nominations for sale, bonus schemes or exhibition.

The unit applies to individuals who work under supervision and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding or other horse industry environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assisted with preparing nominations for at least three horses for sale, bonus scheme and/or exhibition
- obtained or prepared information, records and/or registrations for two external bodies as instructed
- maintained accurate routine stud records relevant to own role
- identified and recorded arrival and departure of at least three horses
- entered information and data into workplace systems.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- nature of stud business in which the individual works
- processes and protocols of the stud business in which the individual works
- types of records and record keeping system used by the horse stud
- requirements and procedures laid down by the relevant breed societies or the keeper of the relevant stud book
- legislative requirements and workplace procedures and instructions relevant to role for:
  - animal health and welfare
  - biosecurity
  - workplace health and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions
• specifications:
  • for stud records
  • application or entry forms for exhibitions, bonus schemes or sales.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with RGR Racing and Breeding Training Package Version 3.0.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to handle and care for stallions, particularly throughout the mating process.

The unit applies to individuals who use specialised horse breeding knowledge and skills and have experience working with stallions. They have responsibility for a work activity, area or team, and provide and communicate solutions for a range of predictable and sometimes unpredictable problems in the horse breeding sector.

Licensing, legislative, regulatory or certification requirements apply to this unit. Users are advised to check with the relevant Principal Racing Authority for current licence or registration requirements.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

<table>
<thead>
<tr>
<th>Unit of competency</th>
<th>Prerequisite requirement</th>

Performance Evidence
An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- safely handled and attended at least one stallion throughout three mating processes and/or semen collections used for artificial insemination (AI)
- cared for and monitored the stallion for signs of disease, ill health or injury
- maintained workplace records for stallion.

Knowledge Evidence
An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for handling and caring for stallions, including:
  - stallion behaviour, body language and potential safety risks
  - common equine injury and disease that affect breeding stallions
  - procedures for monitoring stallion health
  - indicators of stallion health and welfare
  - accurate identification and recording in the mating process
  - strategies for managing efficient and well-managed stud activities to maximise conception rates and live foal outcomes
- work health and safety requirements and safe work practices:
  - safe horse handling techniques
  - hazard identification, risk assessment and controls
  - handling frozen semen and working with liquid nitrogen – AI only
  - types and correct fit of personal protective equipment (PPE)
  - duty of care for workers
- key requirements of environmental and biosecurity procedures, including for:
Assessment Requirements for RGRHBR403 Handle and care for breeding stallions

Date this document was generated: 3 September 2020

- disposing of wastes
- infection control
- site hygiene
- workplace recording and reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - at least one live stallion – note that stallions can be less compliant and highly reactive, and should be assessed as suitable for the experience and skill of the individual
  - various mares for mating, or dummies
  - equipment and restraints required for mating activities
  - appropriate tack for horse and activity
  - PPE correctly fitted and applicable to activity for the individual
- specifications:
  - work instructions or program for carrying out mating procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- managed processes for the sale and/or exhibition of at least three horses
- prepared forms and records for three external organisations
- followed up on processes to ensure the maintenance of accurate and up-to-date stud records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operations and business objectives of the workplace stud
- workplace stud program, procedures and instructions
- procedures and requirements for:
  - breed societies
  - keeper of the relevant stud book
  - sales and exhibition bodies
  - breeding bonus schemes
- breeding records and data and reporting requirements, including:
  - service and foaling dates
  - horse and foal identification
  - stallion and mare deaths
  - stillbirths and neonatal deaths
  - abnormalities
- regulatory requirements relevant to role for:
  - animal health and welfare
• work health and safety
• biosecurity
• employment of staff and contractors
• financial reporting.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • application or entry forms for exhibitions or sales
  • financial and other workplace records or systems
• specifications:
  • stud records for selected horses.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of telescope materials handler operations that safely, effectively and efficiently follow workplace procedures to carry out work activity on at least two occasions, and include:

- performing pre-start, start-up and shutdown procedures
- checking controls, brakes and attachments for manoeuvrability and serviceability and rectifying or reporting faults
- operating the telescopic materials handler
- attaching and securing appropriate lifting gear
- shifting the load
- selecting, fitting, testing, using and removing attachments, which must be certified and approved in line with workplace procedures
- transporting the machine and equipment between work sites
- parking and securing equipment

In the course of the above the candidate must also:

- locate and apply required documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting potential hazards and environmental issues, and assess risks
- access, interpret and apply technical information
- apply fault finding techniques
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with telescopic materials handler operations
Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for telescopic materials handler operations, including those relating to:

- isolation and traffic control responsibilities and authorities
- safety data sheet and hazardous materials handling methods
- development and compliance with job safety analyses and safe work method statement
- maintenance and basic diagnostic
- recyclable materials
- housekeeping activities
- environmental management plan

Key factors affecting work activities described in performance evidence above, including:

- telescopic materials handler types, characteristics, technical capabilities and limitations
- calculating safe working loads
- methods of changing machine attachments
- safe operating techniques in varying terrain
- telescopic materials handler and attachment operating techniques

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - telescopic materials handler
  - attachments
  - personal protective equipment
- be conducted in a safe environment and,
- be assessed in context of this sector's work environment and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed and
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements
Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided, and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of wheel loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the wheel loader for operations and adjusting techniques to suit site conditions
- shifting loads, carries the load as close to the ground as possible and deposits load to the correct location
- parking and securing the equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques
- conduct loading and unloading
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment according to original equipment manufacturer manual
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- inspect and prepare work area
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations

Knowledge Evidence
The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:
Key policies and procedures, legislation and established requirements for wheel loader operation without attachments, including those relating to:
• work health and safety, including signs of operator fatigue and how it should be managed
• operational, maintenance and basic diagnostics
• housekeeping activities
• personal protective equipment
• maintenance and basic diagnostics
• fire, accident and emergency
Key factors affecting work activities described in performance evidence above, including:
• equipment processes, technical capability and limitations
• geological and technical data
• loading techniques
• plans, reports, maps, specifications

Assessment Conditions
Mandatory conditions for assessment of this unit are stipulated below. The assessment must:
• include access to:
  • wheel loader
  • materials to be shifted
  • personal protective equipment
• be conducted in a safe environment; and,
• be assessed in context of this sector's work environment; and,
• be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• confirm consistent performance can be applied in a range of relevant workplace circumstances
Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

**Assessor requirements**

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of scraper operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating scraper, and adjusting techniques to suit site conditions
- completing a variety of scraper operations including:
  - loading
  - load carrying
  - load discharge
  - equipment positioning
  - towing and pushing
- parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- demonstrate safe working around overhead power line and live stockpiles
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply techniques for load carry and load discharge
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations
• organise work activities to meet all task requirements

Knowledge Evidence
The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for scraper operation without attachments, including those relating to:
• isolation requirements
• fires, accidents and emergencies
• work health and safety, including signs of operator fatigue and how it should be managed
• apply operational, maintenance and basic diagnostics
• personal protective equipment
• recyclable materials
• completing housekeeping activities

Key factors affecting work activities described in performance evidence above, including:
• ground conditions
• equipment processes, technical capability and limitations
• geological and technical data

Assessment Conditions
Mandatory conditions for assessment of this unit are stipulated below. The assessment must:
• include access to:
  • scraper
  • materials to be loaded, hauled and dumped
  • personal protective equipment
• be conducted in a safe environment; and,
• be assessed in context of this sector’s work environment; and,
• be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• confirm consistent performance can be applied in a range of relevant workplace circumstances
Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements
Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>

### Other sectors

Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.

---

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.*

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.***

***While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.***

Application

This unit describes the skills and knowledge required to operate a skid steer loader to load, haul and distribute materials.

This unit applies to those working in site-based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Unit Sector

Civil infrastructure

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types (i.e. one different material per occasion) including:
  - stripping/spreading materials
  - backfilling
  - excavations
  - mixing materials
- selecting, fitting, testing, using and removing attachments on at least two occasions (i.e. one attachment per occasion), the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
  - multipurpose bucket
  - forks
  - dozer blade
  - backhoe
  - auger
  - chain digger
  - power broom
  - profiler
  - tiller/mixer
  - rotary hoe
• hammer
• asphalt cutter/saw
• concrete cutter/saw
• rake
• assisting with loading and unloading skid steer loader from float/trailer
• safely parking and securing equipment

In the course of the above the candidate must also:
• locate and apply relevant documentation, policies and procedures
• select and wear personal protective equipment required for work activities
• apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
• apply problem solving and troubleshooting techniques when operating equipment
• monitor and manage equipment performance using indicators and alarms
• identify common equipment faults
• apply levelling techniques
• establish weight of load
• manage changes in the loads centre of gravity during transportation
• select and use the required tools and equipment
• apply methods of changing machine attachments
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations
• organise work activities to meet all task requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operations, including those relating to:
• isolation requirements for skid steer loader
• fires, accidents and emergencies
• work health and safety, including signs of operator fatigue and how it should be managed
• traffic control responsibilities and authorities
• project quality requirements
• chain of responsibility for loading and unloading of equipment
• operational, maintenance and basic diagnostics
• personal protective equipment
• recyclable materials
• housekeeping activities
Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

**Assessment Conditions**

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - a skid steer loader
  - materials to be shifted
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

**Assessor requirements**

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
• possessing a high level of RII training product knowledge
• having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
• demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
• the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF indicator level***</th>
<th>Required assessor or industry subject matter expert experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure</td>
<td>1</td>

</tr>
<tr>
<td></td>
<td>2</td>
<td>2 Years</td>
</tr>
<tr>
<td>Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure</td>
<td>3-6</td>
<td>3 Years</td>
</tr>
<tr>
<td>Other sectors</td>
<td></td>
<td>Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.</td>
</tr>
</tbody>
</table>

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

***While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loader/backhoe operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types (i.e. one different material type per occasion) including:
  - mixing materials
  - stripping/spreading materials
  - trench excavation
  - backfilling
  - lifting and carry materials
  - loading dump trucks, wagons, hoppers, chutes, and cutting/boxing
- selecting, fitting, testing, using and removing at least two attachments (i.e. one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
  - extending devices
  - tilt bucket
  - buckets
  - compaction wheel
  - ripper
  - plate compactor
  - rock breaker
  - auger
• broom
• mower/scraper
• forklift
• 4 in 1 bucket and free/rock grab
• parking and securing of equipment

In the course of the above work the candidate must also:
• locate and apply relevant documentation, policies and procedures
• select and wear personal protective equipment required for work activities
• carry out vehicle refuelling requirements and procedures where applicable
• apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
• apply problem solving and troubleshooting techniques when operating equipment
• monitor and manage equipment performance using indicators and alarms
• identify common equipment faults
• apply levelling techniques
• establish weight of load
• manage changes in the loads centre of gravity during transportation
• select and use the required tools and equipment
• work safely around other machines and personnel
• apply methods of changing machine attachments
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations
• organise work activities to meet all task requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for backhoe/loader operations, including those relating to:
• isolation requirements
• fires, accidents and emergencies
• work health and safety, including signs of operator fatigue and how it should be managed
• site isolation and traffic control responsibilities and authorities
• project quality requirements
• operational, maintenance and basic diagnostics
• personal protective equipment
• recyclable materials
• housekeeping activities
Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - backhoe/loader
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
• having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
• demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
• the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF indicator level***</th>

</tr>
<tr>
<td>Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure</td>
<td>3-6</td>
<td>3 Years</td>
</tr>
<tr>
<td>Other sectors</td>
<td></td>
<td>Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.</td>
</tr>
</tbody>
</table>

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Application

This unit describes the skills and knowledge required to conduct grader operations. This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of grader operations that safely, effectively and efficiently follow workplace procedures to meet carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types including:
  - cutting and maintaining drains
  - forming/upgrading/maintaining roads
  - mixing/spreading materials
  - scarifying and ripping
  - cutting and trimming of battens
  - trimming of road sub-grades and pavements
  - site clean-up
  - form and carry a windrow
- selecting, fitting, testing, using and removing at least two attachments, the attachment must be certified and approved in line with workplace procedures
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
• carry out vehicle refuelling requirements and procedures where applicable
• apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
• apply problem solving and troubleshooting techniques when operating equipment
• monitor and manage equipment performance using indicators and alarms
• identify common equipment faults
• establish weight of load
• apply levelling techniques
• apply cut and fill techniques
• conduct towing of equipment/plant
• select and use the required tools and equipment
• apply methods of changing machine attachments
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations
• organise work activities to meet all task requirements.

Knowledge Evidence
The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for grader operations, including those relating to:
• isolation requirements
• fires, accidents and emergencies
• work health and safety, including signs of operator fatigue and how it should be managed
• site isolation and traffic control responsibilities and authorities
• project quality requirements
• chain of responsibility for loading and unloading of equipment
• operational, maintenance and basic diagnostics
• personal protective equipment
• recyclable materials
• housekeeping activities
• machine guidance systems and laser levelling equipment

Key factors affecting work activities described in performance evidence above, including:
• equipment processes, technical capability and limitations
• drawings and sketches
• ground conditions
• materials characteristics, including density and viscosity

Key features associated with civil construction works, including:
- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - unit plant type
  - materials to be shifted
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector’s work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.
It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF indicator level***</th>
<th>Required assessor or industry subject matter expert experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure</td>
<td>1</td>

<td>2 Years</td>
</tr>
<tr>
<td>Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure</td>
<td>3-6</td>
<td>3 Years</td>
</tr>
<tr>
<td>Other sectors</td>
<td>Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.</td>
<td></td>
</tr>
</tbody>
</table>

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Application

This unit describes the skills and knowledge required to operate and shift materials using skid steer loaders with the standard bucket attachment.

This unit applies to those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Unit Sector

Coal mining
Extractive
Metalliferous mining

Elements and Performance Criteria

1.2 Obtain, interpret, clarify and confirm work requirements
1.3 Identify hazards and environmental issues, assess the risk and
### ELEMENT | PERFORMANCE CRITERIA
--- | ---
Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Implement control measures in line with workplace policies
   1.4 Select and wear personal protective equipment required for work activities
   1.5 Obtain, identify and implement traffic signage requirements according to standard operating procedures and safe work practices
   1.6 Select required skid steer loader equipment and confirm suitability for work activities
   1.7 Obtain and interpret emergency procedures for skid steer loader, and be prepared for fires, accidents and emergencies
   1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity

2. Operate skid steer loader in line with established requirements | 2.1 Carry out prestart and start-up checks in line with workplace procedures
   2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures
   2.3 Drive and operate skid steer loader using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures
   2.4 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment
   2.5 Monitor and manage equipment performance using indicators and alarms

3. Load, carry and place materials to complete work activity | 3.1 Establish weight of load and ensure it is within safe operational limits of the machine
   3.2 Position machinery to ensure stable and effective shift of materials according to work requirements
   3.3 Shift materials safely and effectively, using hand, audible and communication signals, in line with workplace procedures
   3.4 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures

4. Relocate the skid steer loader | 4.1 Prepare skid steer loader for relocation according to workplace procedures
   4.2 Move skid steer loader safely between worksites, observing relevant codes and traffic management requirements

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations without attachments that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating skid steer loader, and adjusting techniques to suit site conditions
- shifting loads to the correct location, carrying them as close to the ground as possible
- performing at least one of the following skid steer loading tasks on each occasion (i.e. two different tasks in total):
  - stripping and spreading materials
  - backfilling
  - loading vehicles
  - excavations
  - mixing materials
  - site clean up
  - lifting and carrying materials
  - using communication methods to confirm activity, direction of travel, and process to safely move and transport load
  - shifting and placing materials
  - assisting with loading and unloading skid steer loader from float/trailer
  - park up, shut down and prepare machine for maintenance

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
• apply safe work practices and identify and report potential hazards and environmental issues, and assess risks
• monitor and manage equipment performance using indicators and alarms
• identify common equipment faults
• apply problem solving and troubleshooting techniques when operating equipment
• select and use required tools and equipment
• inspect and prepare work area
• manage changes in the loads centre of gravity during transportation
• use a range of communication techniques and equipment essential to the safe completion of work instruction, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with skid steer loader operations

Knowledge Evidence
The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operation without attachments, including those relating to:

• materials handling using safety data sheets
• environmental protection
• fire, accident and emergency
• work health and safety, including signs of operator fatigue and how it should be managed
• site isolation and traffic control responsibilities and authorities
• project quality requirements
• maintenance and basic diagnostics
• housekeeping activities
• personal protective equipment
• chain of responsibility for loading and unloading of equipment
• machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

• technical capabilities and limitations
• equipment specifications
• ground conditions
• type and weight of load

Assessment Conditions
Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

• include access to:
  • a skid steer loader
• materials to be shifted
• personal protective equipment
• be conducted in a safe environment; and,
• be assessed in context of this sector’s work environment; and,
• be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

**Assessor requirements**

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

• vocational competencies at least to the level being delivered and assessed
• current industry skills directly relevant to the training and assessment being provided
• current knowledge and skills in vocational training and learning that informs their training and assessment
• formal relevant qualifications in training and assessment
• having knowledge of and/or experience using the latest techniques and processes
• possessing a high level of RII training product knowledge
• having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
• demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
• the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:
### Industry sector

</tbody>
</table>

Application

This unit describes a participant’s skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

<p>| Plan and prepare for working in confined space | 1.1  Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant |
|                                               | 1.2  Obtain, confirm, clarify and apply work instructions and agreed procedure |
|                                               | 1.3  Obtain, confirm, clarify and apply safety requirements |</p>
<table>

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - obtain appropriate entry permit and instructions for performing work in confined space
  - interpreting and applying safe work method statements
  - apply tagging and lock out
  - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
  - entering the confined space
  - using atmospheric monitoring devices prior to entering the confined space
  - working in the confined space
  - using atmospheric monitoring devices during confined space activity
  - applying safe materials handling methods
  - exiting the confined space
  - remove tagging and lock out
Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

*Note*: The minimum years of current experience required for assessors may vary depending on the AQF level of the qualification being assessed and/or the industry sector.
## Industry sector

<table>
<thead>

</tbody>
</table>

Application

This unit describes a participant’s skills and knowledge required to work safely at heights in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

</tr>
</tbody>
</table>

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - accessing, interpreting and applying technical and safety information for working at heights
  - assessing hazards and risk associated with working at heights and implement control methods
  - selecting wearing and caring for personal protective equipment
  - identifying required safety systems including fall protection and associated equipment
  - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
  - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials
• complying with equipment manufacturer’s instructions and specifications
• safe shifting and handling of tools and materials
• adhering to statutory and regulatory authority requirements
• the nature of work undertaken at heights
• complying with heights safety systems
• the processes of providing for safe working practices
• using safety equipment/systems and considerations to facilitate working safely at heights
• complying with safe work methods

Assessment Conditions

• An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
• this unit is best assessed in the context of this sector’s work environment;
• where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
• this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
• assessors must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
• assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
• where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
• assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF** Level</th>
<th>Required assessor or Industry subject matter expert experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction</td>
<td>1</td>
<td>1 Year</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>2 Years</td>
</tr>
<tr>
<td>Drilling, Coal Mining and Extractive (Quarrying)</td>
<td>3-6</td>
<td>3 Years</td>
</tr>
<tr>
<td>Metalliferous Mining and Civil Construction</td>
<td>3-6</td>
<td>5 Years</td>
</tr>
<tr>
<td>Other sectors</td>
<td>Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.</td>
<td></td>
</tr>
</tbody>
</table>

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS205E Control traffic with stop-slow bat

Modification History
This unit replaces RIIWHS205D Control traffic with stop-slow bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Application
This unit describes the skills and knowledge required to control vehicle and pedestrian traffic using stop-slow bats, hand signals and approved communication devices in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work in teams in live traffic environments under some degree of supervision.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented registered training organisations are advised to contextualise the unit of competency by referring to the existing state/territory OHS legislative requirements.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Prepare to control traffic</td>
<td>1.1 Select and wear personal protective equipment required for work activities 1.2 Access, interpret and confirm work instructions and plan work 1.3 Access, interpret and apply required workplace policies, procedures, jurisdictional safety and environmental protection requirements 1.4 Obtain and interpret site emergency procedures and prepare for accidents and emergencies 1.5 Select tools and equipment, check for serviceability, and rectify faults and report according to workplace policies and procedures</td>
</tr>
<tr>
<td>2. Control traffic and operate</td>
<td>2.1 Adjust approved communication devices according to site</td>
</tr>
</tbody>
</table>
1.2 Direct traffic using hand held stop-slow bat and visibly clear and unobstructed hand signals as required
1.3 Monitor traffic, make adjustments for changing traffic conditions and position waiting vehicles as required
1.4 Communicate messages to other personnel, confirm recipient understanding and clarify as required
1.5 Check and perform maintenance on approved communication devices according to requirements
1.6 Check communications contact after nominated period of non-contact
1.7 Report traffic offenders according to workplace policies and procedures

3. Conduct housekeeping activities

3.1 Confirm and remove signs and devices in line with job requirements and cover as required
3.2 Clean, check and store tools and equipment
3.3 Report environmental damage and potential for future damage as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Numeracy</td>
<td>• Applies basic mathematical problem solving processes, including simple addition, subtraction, multiplication and division</td>
</tr>
<tr>
<td>Oral communication</td>
<td>• Listens to short, explicit instructions for work procedures and asks questions to clarify and confirm</td>
</tr>
<tr>
<td>Reading</td>
<td>• Identifies and interprets information from workplace procedures, documentation, legislation and regulations</td>
</tr>
<tr>
<td>Technology</td>
<td>• Identifies purposes, specific functions and key features of common digital systems and tools and operates them as required</td>
</tr>
<tr>
<td>Writing</td>
<td>• Produces and completes workplace reports using appropriate vocabulary, grammatical structures and conventions</td>
</tr>
</tbody>
</table>
Unit Mapping Information

Supersedes and is equivalent to RIIWHS205D Control traffic with stop-slow bat.

Links

Assessment Requirements for RIIWHS205E Control traffic with stop-slow bat

Modification History
This unit replaces RIICWD503D Prepare traffic management plans and traffic guidance schemes. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence
The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Control traffic with a stop-slow bat according to traffic guidance schemes in a manner that is safe and follows workplace policies and procedures on at least two occasions, including:
  - directing pedestrian traffic, including at least one of the following:
    ~ pedestrians with mobility issues
    ~ pedestrians with prams
    ~ cyclists
  - using approved communication devices to transmit message and report traffic offenders, including the use of at least one of the following devices:
    ~ hand held radios
    ~ telephones.

During the above, the candidate must:

- coordinate operations with pilot vehicle in a shuttle flow work arrangement
- participate in risk assessment and management processes
- identify the type and scope of hazards and their impact and recommend risk control measures
- identify key environmental protection issues and describe required solutions
- locate and complete at least one incident report
- complete housekeeping requirements.

Knowledge Evidence
The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- risk assessment processes and hierarchy of control
- work instructions and procedures for planning work
- jurisdictional safety requirements relevant to temporary traffic management
• environmental protection requirements
• site emergency procedures
• site and equipment safety requirements
• traffic control requirements and procedures for directing the following pedestrian traffic groups:
  • pedestrians with mobility issues
  • pedestrians with prams
  • cyclists
• traffic guidance scheme and traffic management plan compliance
• communication device operations, including:
  • hand held radios
  • telephones
• traffic control equipment types, characteristics, technical capabilities and limitations
• operational and maintenance procedures for equipment
• site isolation and traffic control responsibilities and authorities
• the effects of travel speed and vehicle mass on stopping distances.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

• include access to:
  • stop-slow bat
  • personal protective equipment
  • hand held radio or telephone
• be conducted in a safe environment; and
• be assessed in context of this sector’s work environment on a real live road setting under supervision; and
• be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and
• confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the traffic management plans that meet all of the required outcomes including:
  - complying with written and verbal reporting requirements and procedures
  - communicating clearly and concisely with others to receive and clarify work instructions
  - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of implementing traffic management plans that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - complying with State/Territory regulations on three separate live traffic projects, and
  - completing one (1) project controlling site construction vehicles
  - identify and select traffic guidance scheme according to conditions
  - identify and select traffic guidance scheme according to conditions select and implement signage and device requirements, position and display according to site plan
• monitor and adjust scheme according to variances in requirements
• apply procedures to deal with non-compliant crew and motorists

Knowledge Evidence
The candidate must demonstrate knowledge of implementing a traffic management plan through:
• accessing, interpreting and applying legislative, organization and site requirements and procedures for:
  • JSAs/JSEA/Safe work method statement
  • potential hazards and risks
  • controlling traffic
  • basic signalling
  • signs and devices
  • radio operations
• identifying equipment types, characteristics, technical capabilities and limitations
• identifying site isolation and traffic control responsibilities and authorities
• identifying quality requirements
• applying civil construction terminology

Assessment Conditions
• An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
• this unit is best assessed in the context of this sector’s work environment;
• where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
• this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
• assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
• assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,

- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

<table>
<thead>
<tr>

SIRRINV001 Receive and handle retail stock

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However, in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

</tbody>
</table>
areas. perishable and other stock to prevent loss or damage as required.

1.3. Remove and dispose of waste to minimise safety risks and environmental impacts.

1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.

2. Accept stock delivery.

2.1. Check incoming stock quantities against order documentation.

2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.

2.3. Record stock delivery, and report discrepancies with orders as required.

2.4. Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.

2.5. Store or display stock promptly in designated location.

3. Replenish stock levels.

3.1. Rotate, replenish and present stock according to organisational requirements for stock levels.

3.2. Record stock waste or shrinkage according to organisational procedures.

3.3. Maintain optimal stock levels on retail shop floor.

**Foundation Skills**

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to:

- interpret:
  - plain English documents that outline organisational policies and procedures for stock control
  - basic order and delivery documentation and stock labels.

Numeracy skills to:

- calculate stock levels.

Planning and organising skills to:

- complete stock control activities in a logical and time efficient sequence.

Technology skills to:

- use stock control technology to aid stock control processes.

**Unit Mapping Information**

No equivalent unit.

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
  - receive and process incoming stock
  - store retail stock
  - maintain retail stock levels
  - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
  - stock quality is poor
  - stock quantity errors
  - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
  - rotation and replenishment
  - product life cycle
- organisational stock control policies and procedures for:
  - receiving stock from suppliers
  - recording incoming stock
  - recording and reporting stock discrepancies and quality issues
  - recording stock waste and shrinkage
  - stock quality standards
  - unpacking, storage and display of stock
  - damaged or missing stock
Assessment Requirements for SIRRINV001 Receive and handle retail stock

- key features of retail products that relate to handling and storage:
  - handling techniques to minimise damage
  - general care
  - optimum storage conditions
  - features of damaged or spoiled stock
  - correct disposal methods
- safe manual handling techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

**Assessment Conditions**

Skills must be demonstrated in a retail environment. This can be:
- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:
- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
  - delivery dockets
  - orders
  - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SIRRINV002 Control stock

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

Competency Field

<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Monitor stock receipt and dispatch.</td>
<td>1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.</td>
</tr>
<tr>
<td></td>
<td>1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed</td>
</tr>
</tbody>
</table>
1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
1.4. Act on variations to quantity and quality of delivered stock.
1.5. Supervise safe stock handling and storage.

2.1. Monitor stock and maintain stock at required levels.
2.2. Maintain, monitor and adjust stock reorder cycles as required.
2.3. Provide clear information to team members about individual stock recording responsibilities.
2.4. Maintain stock storage and movement records.
2.5. Record and report stock discrepancies.
2.6. Monitor stock performance and identify and report fast and slow-selling items.

3. Process and follow up orders.

3.1. Process and raise stock orders according to organisational procedures.
3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
3.3. Liaise with suppliers to ensure continuity of supply.
3.4. Resolve routine supply problems or refer to appropriate personnel for action.
3.5. Distribute stock within the organisation according to required allocations.
3.6. Handle routine supply problems or refer to management as required by store policy.

4.1. Regularly check storage of stock and ensure its protection.
4.2. Identify, record and report stock losses.
4.3. Identify avoidable losses and establish reasons for them.
4.4. Recommend solutions and implement procedures to prevent future losses.

5. Coordinate stocktake or cyclical count.

5.1. Explain procedures for stocktake and cyclical counts to team members.
5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
5.3. Provide team members with clear directions for performance of each task.
5.4. Produce accurate reports for management on stocktake data, including discrepancies.
**Foundation Skills**

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Assessment Requirements for SIRRINV002 Control stock

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)
- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
  - rotation and replenishment
  - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

### Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:
- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:
- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SIRRMER001 Produce visual merchandise displays

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to display retail merchandise. It requires the ability to prepare, produce and maintain merchandise displays in accordance with visual merchandising requirements.

This unit applies to all businesses that sell retail merchandise. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However, in smaller businesses, senior personnel might also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

</tbody>
</table>
the display.

1.3. Prepare product labels and price tickets from in-house documents and according to organisational requirements.

1.4. Unpack merchandise according to manufacturer instructions.

2. Display merchandise.

2.1. Produce display following visual merchandising display guidelines.

2.2. Ensure merchandise is displayed according to manufacturer instructors where specific requirements for display and storage exist.

2.3. Display merchandise labels and price tickets according to organisational requirements.

2.4. Handle and move stock and equipment according to safe manual handling guidelines to prevent injury to self.

2.5. Promptly return excess stock to storage area, and store according to organisational requirements.

2.6. Check and ensure area around the display remains clear of debris.

3. Maintain display.

3.1. Review displays against visual merchandising display guidelines, and refine as required.

3.2. Maintain clear and correct product and pricing information for merchandise.

3.3. Identify damaged or out of date stock, and remove from display as required.

3.4. Rotate and replenish merchandise to maintain optimum stock levels.

3.5. Monitor the display regularly to maintain appearance and cleanliness of display and display area.

Foundation Skills

Foundation skills essential to perform in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to: • interpret plain English documents that outline organisational policies and procedures related to display of merchandise.

Numeracy skills to: • estimate dimensions of display areas and appropriate size of displays from display documentation.

Planning and organising skills to: • prepare for display and complete display activities in a logical and time-efficient sequence.

Technology skills to: • prepare product labels and price tickets.
Unit Mapping Information

Assessment Requirements for SIRRMER001 Produce visual merchandise displays

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines and organisational procedures to prepare and produce three merchandise displays, from the following list, of varying sizes and complexities:
  - an existing merchandise range
  - a new merchandise range
  - a seasonal merchandise range
  - a promotional event
  - discounted merchandise
- maintain each of the above displays and display area, adequate stock level and appearance of display.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- basic principles of visual merchandising as they relate to producing retail visual merchandise displays
- visual merchandise display guidelines and how they are used in creating a retail displays
- organisational procedures for:
  - correct manual handling techniques for protection of self and merchandise
  - correct storage of merchandise and equipment
  - damaged or out of date stock
  - maintenance of display areas
  - merchandise rotation and replenishment
  - product labelling and pricing
  - unpacking merchandise.

Assessment Conditions
Skills must be demonstrated in a retail environment. This can be:
• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:
• a range of retail merchandise
• display areas
• retail display equipment and props
• product labels and price tickets
• ticketing and pricing equipment
• organisational visual merchandise display guidelines
• organisational procedures for:
  • manual handling techniques for protection of self and merchandise
  • storage of merchandise and equipment
  • damaged or out of date stock
  • maintenance of display areas
  • merchandise rotation and replenishment
  • product labelling and pricing
  • unpacking merchandise
• assessment activities that allow the individual to:
  • work within commercial speed, timing and productivity
  • manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

</tbody>
</table>
1. Plan appropriate timing for producing and dismantling visual merchandise displays.

1.4. Communicate roles and responsibilities for visual merchandising to team members.

1.5. Plan and coordinate promotional and special event displays as directed by management.

2. Supervise visual merchandise activities.

2.1. Supervise construction and maintenance of displays to achieve balance and visual impact.

2.2. Ensure display information accurately depicts product or service being promoted.

2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow.

2.4. Ensure displays meet organisational standards and visual merchandise guidelines.

2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.

3. Review impact of visual merchandise activities.

3.1. Evaluate promotions or special event displays and determine impact on sales results.

3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

**SKILLS**

**DESCRIPTION**

Problem solving skills to:

- overcome difficulties relevant to the display of merchandise.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
  - an existing merchandise range
  - a new merchandise range
  - a seasonal merchandise range
  - a promotional event
  - discounted merchandise
- for each of the above visual merchandising activities:
  - communicate requirements with team members
  - monitor visual merchandising displays and standards
  - report on the effectiveness of the above merchandising activities.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - merchandise labelling and pricing
  - required stock levels
  - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
  - Australian Consumer Law
  - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
  - types of displays and their impact
• display location
• display lighting
• display signage
• fundamental elements and principles of visual design and their use in the display and merchandise of products
• commercial impact of incorrect pricing both favourable and unfavourable:
  • customer complaints
  • profitability
• safe work practices for displaying merchandise with particular emphasis on:
  • safe use of equipment
  • safe manual handling techniques for bending, lifting and shifting heavy items
• product knowledge relevant to visual merchandise activities:
  • price
  • features
  • benefits.

**Assessment Conditions**

Skills must be demonstrated in a retail environment. This can be:

• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:

• retail merchandise
• display areas
• retail display equipment and props
• product labels and price tickets
• ticketing and pricing equipment
• relevant documentation:
  • organisational visual merchandise display guidelines
  • organisational policies and procedures for:
    • merchandise labelling and pricing
    • required stock levels
    • merchandise rotation and replenishment
  • relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
    • Australian Consumer Law
    • Work Health and Safety (WHS)
• team members; these can be:
  • individuals in an industry workplace, or
• individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:
- consistently apply organisational policies and procedures to:
  - balance a register or terminal on three occasions with complete accuracy
  - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
  - identify and resolve three different types of balancing discrepancies
  - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:
- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
  - opening and closing
  - balancing
  - clearance of terminal and transference of tender
  - recording takings
  - consumables required by system
  - security
- cash handling procedures:
  - counting cash
  - handling cash floats
  - change required, denominations of change and tendering change
  - security
- organisational policies and procedures for non-cash transactions:
  - credit cards
  - EFTPOS
- vouchers
- organisational policies and procedures for:
  - exchanges
  - refunds
  - lay-by
  - cash handling
  - cash float
  - operation of point-of-sale equipment
  - register or terminal balance
  - security of cash and non-cash transactions.

### Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:
- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:
- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to coordinate a retail office. It involves maintaining office procedures, processing data in response to information requests, composing reports and correspondence, maintaining recording and filing systems and maintaining digital storage media and computer filing systems.

Application of the Unit
This unit applies to team member who coordinate a retail office, responding accurately and appropriately to requests for information and maintaining records and filing systems, including computerised records, according to store policy and procedures. Those with managerial responsibility undertake this unit.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

</tr>
<tr>
<td></td>
<td>3.3. Use correct spelling, punctuation and grammar.</td>
</tr>
<tr>
<td></td>
<td>3.4. Draft and set out correspondence and reports according to store policy.</td>
</tr>
<tr>
<td></td>
<td>3.5. Produced edited report and dispatch to relevant personnel.</td>
</tr>
<tr>
<td></td>
<td>3.6. Copy and securely file final report according to store policy.</td>
</tr>
<tr>
<td>4. Maintain existing recording and filing systems.</td>
<td>4.1. Maintain recording and filing systems according to store policy.</td>
</tr>
<tr>
<td></td>
<td>4.2. Allocate new documents to designated category.</td>
</tr>
<tr>
<td></td>
<td>4.3. Monitor the issue and return of documents to ensure the integrity of the system is maintained.</td>
</tr>
<tr>
<td></td>
<td>4.4. Archive, remove and update documents to ensure appropriate space available for current records.</td>
</tr>
<tr>
<td></td>
<td>4.5. Identify and locate required files and dispatch to nominated person or section within designated time limits.</td>
</tr>
</tbody>
</table>
4.7. Maintain documents in good condition and in correct location.
4.8. Separate confidential files from general files, with access available to nominated personnel only.
4.9. Monitor security system to ensure issued files are traceable at all times.

5. Maintain computer storage media.

5.1. Maintain storage media and filing system according to store policy and procedures.
5.2. Format digital storage media using correct procedures.
5.3. Create back up files to ensure safety, security and confidentiality of files is maintained.
5.4. Store back up files in the designated manner and location.
5.5. Regularly perform virus checks on the system and back up storage media.
5.6. Store hardware according to manufacturer instructions.
5.7. File and store software according to organisational procedures.
5.8. Observe Work Health and Safety (WHS) guidelines relating to screen based equipment and ergonomic work stations.

6. Maintain computer filing system.

6.1. Determine document filing requirements.
6.2. Create a filing system that reflects the size, nature and complexity of the workplace.
6.3. Implement security checks where necessary.
6.4. Add file names to the filing system as required.
6.5. Update the filing system regularly by deleting or archiving old files.
6.6. Exit programs according to screen prompts to preserve data.

**Required Skills and Knowledge**

This section describes the essential skills and knowledge and their level, required for this unit.

**Required skills**

- literacy and numeracy skills to:
  - process, record and document information
  - write reports
  - use various computer software packages
- interpersonal communication skills to:
  - deal with information requests through clear and direct communication
  - ask questions to identify and confirm requirements
• share information
• use language and concepts appropriate to cultural differences
• use and interpret non-verbal communication

**Required knowledge**

• store policy and procedures in regard to:
  • store administration and financial systems
  • systems and methods for organisation of work routine
  • appropriate clerical or office systems
  • mail procedures
  • transport procedures, including cab charge and courier systems
  • systems and procedures for processing information
• types and functions of records management systems
• types and functions of office technology, including:
  • computer
  • printer
  • software packages
  • installation of hardware and software packages
  • software licensing requirements
• relevant WHS requirements in relation to the retail office
• principles and techniques in interpersonal communication skills

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

• consistently implements workplace office procedures
• responds accurately and appropriately to requests for information according to store policy
• consistently applies procedures for maintaining records and filing system, including computerised records.

**Context of and specific resources for assessment**

Assessment must ensure access to:

• a retail work environment
• sample policy and procedures in regard to:
  • store administration and clerical or office systems
  • processing of information
• format and technical vocabulary
• WHS legislation and codes of practice
• a range of office equipment, including:
  • computer
  • printer
  • software packages
  • a work team.

Methods of assessment
A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
• observation of performance in the workplace
• third-party reports from a supervisor
• answers to questions about specific skills and knowledge
• review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment
Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the performance criteria is detailed below.

**Ordering** procedures may include:
• fax
• phone
• email
• internet.

**Store policy and procedures** in regard to:
• store administration and clerical systems
• document format and technical vocabulary.

**Special requests and requirements** may include:
• mail
• ordering of stock
• bill payment
• taxation paperwork
• courier service
• transport, e.g. taxi, cab charge
• special mail procedures.

**External information sources**
• distributors
may include:

- suppliers
- manufacturers
- technical support personnel
- maintenance personnel.

Modes of access to identified sources may include:

- contact person
- contact details.

Relevant information may include:

- orders
- files
- letters
- correspondence
- warranties.

Options and alternatives may be limited by:

- regulatory requirements
- cost-effectiveness
- store policy.

Relevant personnel may include:

- relevant managers
- supervisor
- team leader.

Recording and filing systems may be:

- paper-based
- electronic.

Digital storage media may include:

- floppy disk
- USB drive
- zip disk
- CD-ROM
- DVD-ROM
- digital tape
- external hard drive.

Hardware may include:

- computer
- keyboard or typewriter
- printer
- scanner
- monitor
- mouse
- storage media.

OHS guidelines may include:

- lighting
- seating
- posture
- ventilation
- glare and reflection
- keyboard equipment and radiation
- eye strain.
• setting up work stations.

<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Engage customers.</td>
<td>1.1.Greet customers in a polite and friendly manner within designated response times and make them a priority over other workplace duties.</td>
</tr>
</tbody>
</table>
1.2. Clearly communicate with customers using appropriate verbal and non-verbal communication.

1.3. Adapt communication style to appropriately communicate with customers from diverse backgrounds.

2. Assist customers.

2.1. Identify and act on opportunities to assist customers and be available to assist customers when needed.

2.2. Question and actively listen to customers to determine their needs.

2.3. Resolve routine customer problems according to individual responsibility level and organisational policies and procedures.

2.4. Address general customer enquiries and provide accurate information in a clear and courteous manner.

3. Contribute to a service culture.

3.1. Act in line with organisational service standards to ensure quality customer service.

3.2. Show interest in customer’s needs and maintain a welcoming customer environment free of complacency.

3.3. Seek assistance from relevant personnel when customer’s needs are beyond scope of own responsibility.

3.4. Identify and take opportunities to improve customer service standards.

3.5. Refer customer service issues and feedback to relevant personnel for action.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
  - customers from diverse backgrounds
  - resolution of two routine customer problems
  - provision of accurate information to address two general customer enquiries
  - referral of unresolved customer enquiry
  - use of effective communication techniques and positive body language.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
  - designated customer service response times
  - interacting with customers
  - solving routine customer problems
  - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
  - open and closed questioning
  - paraphrasing
  - effective listening
  - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
  - positive customer service
  - poor customer service
organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational service standards and procedures for:
    - designated customer service response times
    - interacting with customers
    - solving routine customer problems
    - providing information to customers
  - customers from a diverse range of backgrounds; these can be:
    - individuals in an industry workplace, or
    - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessment Requirements for SIRXCEG003 Build customer relationships and loyalty

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information and assistance to four different customers regarding the following to build customer brand loyalty:
  - promotional activities
  - products and services
  - brand or business customer benefits
- identify trends in customer purchasing patterns and make recommendations that enhance customer service and loyalty
- take appropriate action to resolve two escalated customer complaints.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- techniques for:
  - providing personalised extemporary customer service
  - anticipating customer preferences, needs and expectations throughout the service experience
  - building customer loyalty
  - resolving escalated customer complaints
  - pacifying dissatisfied customers
- commercial benefits of building customer relationships and loyalty
- industry and organisational:
  - professional service standards
  - attitudes and attributes expected when engaging with customers
  - different customer service needs and expectations
  - types of customer benefits
  - essential features and use of customer databases
- key aspects of Australian consumer and privacy law as relevant to customer interactions.
Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:
- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:
- relevant documentation:
  - industry and organisational:
    - professional service standards
    - attitudes and attributes expected when engaging with customers
    - different customer service needs and expectations
    - types of customer benefits
  - current plain English regulatory documents distributed by government regulators for:
    - Australian Consumer Law
    - privacy law
- customers; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

</tbody>
</table>

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves managing the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts, and identifying and locating facilities requirements.

The unit covers the application of store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment.

Application of the Unit
This unit applies to staff with managerial responsibility in a retail environment.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

</tbody>
</table>
| 1. Manage store maintenance program. | 1.1. Monitor and maintain premises, fittings, fixtures and equipment, according to store policy and procedures and relevant legislation.  
1.2. Identify deficiencies in store maintenance procedures and take remedial action as required.  
1.3. Obtain expert or specialist advice as required, according to store policy.  
1.4. Initiate contingency plan within scope of authority in the event of maintenance problems. |
| 2. Manage retail equipment maintenance. | 2.1. Develop and implement procedures to ensure retail equipment is maintained according to store policy.  
2.2. Monitor and implement maintenance program for retail equipment, according to manufacturer design specifications and store policy.  
2.3. Identify and rectify equipment faults where possible, without undue delay.  
2.4. Report equipment faults or failures, according to service agreements and store policy. |
| 3. Negotiate maintenance contracts. | 3.1. Negotiate maintenance contracts with contractors and suppliers according to store policy and procedures.  
3.2. Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to relevant personnel.  
3.3. Monitor maintenance procedures to ensure products and tasks meet contract specifications. |
| 4. Identify facilities and space requirements. | 4.1. Identify facilities and space requirements to reflect business needs and volume, according to store policy and budget requirements.  
4.2. Locate suitable facilities and space to facilitate expansion or change of use in line with store policy and procedures.  
4.3. Consult, as required, with senior manager or business owner to determine optimum strategy for store space and location. |
4.4. Maximise use of space, with consideration to existing configuration, to optimise the merchandising of existing and incoming stock.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - ensure listening and understanding
  - negotiate contracts and relay contractual requirements to staff
  - obtain expert or specialist advice
  - report faults
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- negotiation skills to negotiate maintenance contracts with contractors and suppliers
- literacy and numeracy skills to:
  - apply accounting processes and record data
  - develop, document and record procedures
  - estimate measurements and volumes
  - maintain records
  - read and interpret manufacturer instructions
  - work within a budget

Required knowledge

- store policy and procedures in regard to:
  - maintenance of store facilities
  - maintenance of retail equipment
- maintenance contract terms and options
- contract specifications
- relevant legislation and statutory requirements relating to managing store facilities, including:
  - work health and safety (WHS) legislation
  - food safety legislation and regulations
- relevant industry codes of practice relating to managing store facilities
- principles and techniques in:
monitoring performance of contracts
- negotiating, in particular contract negotiation
- interpersonal communication

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and uses space and facilities effectively
- evaluates and reports on effectiveness of maintenance contracts.

Context of and specific resources for assessment

Assessment must ensure access to:
- a retail work environment
- relevant documentation, such as:
  - maintenance contracts
  - store policy and procedures on maintenance of facilities, and contract negotiation
  - relevant legislation and statutory requirements
  - WHS
  - legislation and industry codes of practice
- a team
- equipment and technology.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- observation of performance in the workplace
- case study or research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

---

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

**Store policy and procedures in regard to:**

- store maintenance
- facilities management
- reporting mechanisms
- WHS
- food safety.

**Relevant legislation may include:**

- federal, state or territory and local legislation
- food safety regulations
- WHS.

**Expert or specialist advice may be sought regarding:**

- point-of-sale terminals
- EFTPOS terminals
- computers, scanners and printers
- pricing equipment
- electronic bar coding equipment
- portable data entry
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- fixtures and fittings
- food preparation equipment.

**Faults may be reported:**

- verbally
- in writing
- by email
- to service personnel
• to contractors
• to relevant managers
• to supervisor.

Contracts:
• may be negotiated internally and externally
• may involve:
  • quality standards
  • building maintenance services
  • cleaning
  • security
  • electrical services
  • plumbing services
  • equipment maintenance.

Relevant personnel may include:
• managers
• supervisors
• specialist staff.

Assessment Requirements for SIRXIND002 Organise and maintain the store environment

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- organise and maintain a designated work area, within a store environment, during three shifts
- correctly use cleaning products and equipment to perform two cleaning tasks within the store environment.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- common cleaning product labels that identify chemicals and hazardous substances and their meaning
- organisational policies and procedures relevant to the organisation and maintenance of the store environment:
  - work health and safety (WHS)
  - general housekeeping
  - personal hygiene
  - reporting problems and faults
  - point of sale stock requirements
  - use, maintenance and storage of cleaning products and equipment
  - use of hazardous cleaning substances
  - waste disposal, recycling and environmental protection.

Assessment Conditions
Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for:
work health and safety
- general housekeeping
- personal hygiene
- reporting problems and faults
- point of sale stock requirements
- use, maintenance and storage of cleaning products and equipment
- use of hazardous cleaning substances
- waste disposal, recycling and environmental protection
- cleaning products and equipment
- manufacturer instructions for use of cleaning equipment, cleaning materials and hazardous substances
- workplace waste for disposal
- work areas to be maintained
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SIRXINV004A Buy merchandise

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit
Application of the unit
This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

<tr>
<td>7 Introduce product</td>
<td>7.1 Inform relevant personnel of new product ranges and advise on preferred location</td>
</tr>
<tr>
<td>ranges.</td>
<td>of merchandise.</td>
</tr>
<tr>
<td></td>
<td>7.2 Implement <em>staff training</em> in product knowledge to introduce product range.</td>
</tr>
</tbody>
</table>
|                         | 7.3 Demonstrate or display new ranges to *staff* according to store merchandising plan.
ELEMENT | PERFORMANCE CRITERIA
--- | ---
8 Maximise profit. | 8.1 Calculate or estimate individual product range contributions against budget and targets.
 | 8.2 Develop and implement product range assessment checks against budget and targets.
 | 8.3 Calculate or estimate overall selling space contributions according to store merchandising plan.
 | 8.4 Maximise profit margins in negotiations with suppliers.
 | 8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law.
 | 8.6 Negotiate specifications for terms of trade.

9 Rationalise stock. | 9.1 Review and update stock range at regular intervals.
 | 9.2 Identify stock lines to be deleted and take action to minimise adverse effect on profit.
 | 9.3 Consolidate stock as required to maximise sales potential.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
  - market trends and projections
  - sales figures and investment levels
  - space requirements
- negotiation skills
  - interpersonal communication skills to:
    - liaise with relevant personnel
    - establish supplier relationships, negotiate supply of goods
    - provide information and training on product range
    - provide feedback and coaching through clear and direct communication
REQUIRED SKILLS AND KNOWLEDGE

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
  - developing pricing policies
  - calculating and estimating product range contributions
  - calculating the cost of stock loss and dissipation
  - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - marketing
  - buying
  - profit margins
  - quality control
  - stock inventory levels: current and future
  - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
  - market needs
  - range of merchandise available
  - market competition
  - existing and possible new suppliers
  - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:
- a retail work environment
- relevant information and documentation, including:
  - store policy and procedures
  - legislation and statutory requirements
  - industry codes of practice
  - merchandise and supplier data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

*Store merchandise and marketing policies* may include:
- store culture
- current market position
- target market.

*Customer requirements* may be monitored by:
- questionnaires
- surveys
- observation.

*Merchandise range* may include:
- existing stock
- new stock.
RANGE STATEMENT

**Impact on business operations** may include:
- buying
- ordering patterns
- planning
- budgeting.

**Relevant personnel** may include:
- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

**Feedback** may be sought and given:
- verbally
- in writing
- in groups
- individually.

**Performance indicators** may include:
- price
- quality
- performance
- supply reliability
- merchandise range.

**Negotiation** process may include:
- face-to-face
- correspondence
- meetings
- telephone or electronic media.

**Pricing arrangements** may include:
- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

**Market factors** may include:
- fashion trends
RANGE STATEMENT

- product availability
- sales performance.

**Legal requirements** may include:
- sale of second-hand goods
- Trade Practices and Fair Trading Acts
- licence, patent or copyright arrangements
- pricing procedures, including GST requirements.

**Staff training** may include:
- on-the-job
- off-the-job
- one-on-one coaching
- any combination of the above.

**Staff** may include:
- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

**Terms of trade** may include:
- special buys
- payment terms
- promotional deals with supplier.

Stock lines may be **deleted** due to:
- changes in store policy and culture
- sales performance
- customer requirements
- fashion trends
- product availability
- problems with supply.

Methods to **consolidate stock** may include:
- movement of stock between departments or stores.

SIRXMER004A Manage merchandise and store presentation

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit describes the performance outcomes, skills and knowledge required to manage merchandise and store presentation.

Application of the Unit
Application of the unit
This unit requires the team member to apply knowledge of store merchandising to plan and manage store advertising and promotions, manage store pricing policies and housekeeping. It includes interpretation of and compliance with store layout and visual merchandising policies, developing and implementing procedures to manage merchandise pricing, and managing all aspects of store housekeeping, including contingency procedures. This role applies to frontline retail managers.

Licensing/Regulatory Information
Not applicable.

ELEMENT | PERFORMANCE CRITERIA
--- | ---
2.4 | Negotiate arrangements with suppliers in regard to special promotional activities.
2.5 | Coordinate store activities to complement shopping centre or retail complex promotions.
2.6 | Develop and implement assessment checks to measure effectiveness of promotions, including layout, visual impact and customer response.
2.7 | Document and report on promotional activities.

3 | Manage store pricing policies.
3.1 | Maintain store pricing according to *organisation pricing policies and procedures* in regard to pricing.
3.2 | Maintain accurate information on pricing trends and changes and communicate to relevant staff.
3.3 | Develop and implement procedures for pricing according to store policies and *legislative requirements*.

4 | Manage housekeeping.
4.1 | Develop and implement store policies and procedures in regard to *store housekeeping and maintenance*.
4.2 | Develop and manage rosters or schedules, ensuring store housekeeping standards are monitored and maintained.
4.3 | Initiate *contingency plan* in the event of merchandise or store presentation problems.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- providing feedback on performance
- interpersonal communication skills to:
  - communicate store standards and expectations to staff
  - consult floor staff
  - negotiate arrangements with suppliers, through clear and direct communication
  - ask questions to identify and confirm requirements
REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- roster development
- report writing
- literacy skills in regard to:
  - researching, analysing and interpreting a broad range of written material
  - preparing rosters
  - preparing reports
  - documenting results

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
  - layout and presentation
  - advertising and promotions
  - pricing or marking down of goods, including risk assessment
  - housekeeping for premises, fittings, fixtures and equipment
  - store merchandise and service range
  - store merchandising plan
  - range and availability of new products and services
  - customer demand and market trends
  - product quality standards
- OHS legislation and codes of practice
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements
- principles and techniques in:
  - visual merchandising
  - project management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
- collaboratively plans layout and presentation of merchandise according to store policies and procedures
- assesses effectiveness of layout and presentation according to sales targets or predetermined objectives
- collaboratively plans, coordinates and implements advertising and promotions activities according to store policies and procedures
- assesses and reports on effectiveness of advertising and promotions to staff and management according to store policies and procedures
- collaboratively plans, coordinates and implements pricing activities according to store policies and procedures
- collaboratively plans, coordinates and implements housekeeping activities according to store policies and procedures and OHS legislation, regulations and codes of practice.

Context of and specific resources for assessment

Assessment must ensure access to:
- a retail work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store merchandising plan
  - legislation and statutory requirements
  - OHS legislation, regulations and codes of practice
- a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

**Visual merchandising policies and plans** may include:
- target market
- market research
- store image
- store layout and space availability
- seasonal lines
- pricing policy.

**Promotional activities** may involve:
- external and in-store activities
- corporate or locally based activities
- dealing with advertising agencies and consultants.

**Promotions** may include:
- advertising
- catalogues
- newspapers
- posters
RANGE STATEMENT

- radio or TV
- suppliers
- internet
- website.

Organisation pricing policies and procedures may include:
- marking down of slow moving stock
- soiled or damaged goods
- goods close to use-by date
- end of season stock
- pricing policies, including GST requirements.

Legislative requirements may include:
- Trade Practices and Fair Trading Acts
- consumer law.

Store housekeeping and maintenance may include:
- store premises
- fittings
- fixtures
- equipment.

Contingency plan may include:
- major spillages
- flood, storm or cyclone
- breakages
- blackout
- break-in.

1. Place and arrange merchandise. 1.1. Unpack *merchandise* according to *store policy and procedures* and *legislative requirements*. 1.2. Place merchandise on floor, fixtures and shelves in determined locations according to work health and safety (WHS) legislative requirements. 1.3. *Display* merchandise to achieve a balanced, fully-stocked appearance and promote sales. 1.4. Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedures. 1.5. Place stock range in line with fixtures, ticketing, prices and bar codes. 1.6. Rotate stock according to stock requirements and store procedure. 1.7. Ensure stock presentation conforms to special *handling techniques* and other *safety requirements*. 2. Prepare and apply labels and tickets. 2.1. Prepare *labels and tickets* for window, wall or floor displays according to store policy. 2.2. Prepare tickets using electronic equipment or neatly by hand according to design specifications and store procedures. 2.3. Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action according to store procedures. 2.4. Use, maintain and store electronic ticketing and labelling equipment according to manufacturer’s instructions and store procedures. 2.5. Place labels and tickets visibly and correctly on merchandise. 2.6. Replace labels and tickets according to store policy. 3. Maintain displays. 3.1. Reset or dismantle unsuitable or out-of-date displays and *special promotion areas* as directed. 3.2. Assist supervisor in selection of merchandise for display. 3.3. Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures. 3.4. Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and...
3.5. Identify optimum stock levels and replenish stock according to store policy.

3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.

4. Protect merchandise.

4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - read and interpret store procedures and guidelines
  - read and interpret manufacturer instructions
  - self-management skills to complete tasks in a set timeframe
  - technology skills to operate and maintain manual and electronic labelling and ticketing equipment

Required knowledge

- store policies and procedures in regard to:
  - availability and use of display materials
  - correct storage of stock
  - correct storage procedures for labelling and ticketing equipment and materials
  - location of display areas
  - merchandise range
  - merchandising, ticketing and pricing of stock
  - scheduling for building or rotating displays
  - stock replenishment
  - stock rotation
  - store promotional themes, including advertising, catalogues and special offers
  - correct manual handling techniques for protection of self and merchandise
  - principles of display
  - elements and principles of design and trends in retail design
  - relevant WHS regulations, including:
    - manual handling
    - hygiene and sanitation
• hazardous substances
• labelling of workplace substances
• relevant legislation and statutory requirements relating to merchandising product
• pricing procedures, including inclusion and exclusion of GST
• relevant industry codes of practice relating to merchandising product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
• applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
• displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
• prepares display labels and price tickets for merchandise with regard to store policies and procedures
• operates, maintains and stores a range of ticketing equipment according to:
  • store policy and procedures
  • industry codes of practice
  • manufacturer instructions and design specifications
• identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
• maintains display areas and replenishes stock as required according to store procedures and legislative requirements
• performs correct manual handling, storage and display techniques.

Context of and specific resources for assessment

Assessment must ensure access to:
• a real or simulated retail work environment
• a range of ticketing and pricing equipment
• merchandise for display
• display materials and props
- cleaning materials
- relevant documentation, such as:
  - store policy and procedure manuals on housekeeping, merchandising and WHS
  - manufacturer instructions and operation manuals for electronic ticketing equipment
  - relevant legislation and industry codes of practice.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXLS201 Sell products and services
- SIRXLS002A Advise on products and services.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

*Merchandise* may be characterised by:

- type
- brand
- size
- customer needs
- colour
- price.

*Store policy and procedures* in regard to:

- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.

*Legislative*

- pricing requirements, including GST requirements
requirements may include:
- industry codes of practice
- discounted items
- Australian Consumer law.

Display may include:
- setting new displays
- maintaining existing displays.

Handling techniques may vary according to:
- stock characteristics
- store policy
- legislative requirements
- industry codes of practice.

Safety requirements may relate to:
- transport, storage and handling of goods
- hazardous substances
- labelling of workplace substances.

Preparation of labels and tickets may involve:
- pricing gun
- shelf tickets
- shelf talkers
- written labels
- swing ticketing
- bar coding
- price boards
- header boards.

Special promotion areas may be:
- permanent or temporary
- interior or exterior
- publicly accessible
- windows
- shelves
- wall fixtures
- on floor.

1. Interpret a visual merchandising plan.
   1.1. Identify *design requirements* of visual merchandising plan or manual.
   1.2. Source *resources required* to implement plan.
   1.3. Identify *factors that may affect the plan*.
   1.4. Apply organisation’s visual merchandising standards to the plan.

2. Monitor display requirements.
   2.1. Regularly monitor display to ensure it meets the requirements of the *visual merchandising plan*.
   2.2. Identify *damage or changes to the display*.
   2.3. Take action to rectify unwanted changes to the display.

3. Maintain displays in line with organisational requirements and plan.
   3.1. Maintain display so that it is clean and tidy.
   3.2. Make additions or changes to display to ensure it consistently adheres to the visual merchandising plan.
   3.3. Maintain organisation’s requirements for visual merchandising in the display.

4. Contribute to the visual merchandising standards of the organisation.
   4.1. Interpret visual merchandising standards of the organisation.
   4.2. Identify opportunities for improving visual merchandising standards.
   4.3. Make contributions to the visual merchandising standards as appropriate.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- artistic interpretation skills to create displays according to visual merchandising standards
- communication skills to share ideas
- creative thinking skills to generate ideas for improving visual merchandising standards
- literacy skills to interpret visual merchandising manuals
• observation skills to identify damage to displays or deviations from visual merchandising standards
• practical skills to maintain and update displays according to the visual merchandising plan

Required knowledge
• basic design principles
• basic principles of visual merchandising
• work health and safety (WHS) requirements relating to monitoring displays
• organisation’s visual merchandising principles
• resources required to implement visual merchandising plans
• procedures for safe use of tools, equipment and materials used in visual merchandising displays

Evidence Guide
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit
Evidence of the following is essential:
• interprets and identifies the design requirements of a visual merchandising plan
• monitors the display closely and completes regular maintenance to ensure it meets the requirements of the visual merchandising plan and the organisation’s visual merchandising standards
• contributes appropriately to the ongoing development of the organisation’s visual merchandising standards.

Context of and specific resources for assessment
Assessment must ensure access to:
• a real or simulated retail visual merchandising work environment
• relevant documentation, such as:
  • store policy and procedures manuals
  • store visual merchandising standards.

Method of assessment
A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
• observation of performance in the workplace
• third-party reports from a supervisor
• customer feedback
• answers to questions about specific skills and knowledge.

Guidance information

1. Review the image of the store.
   1.1. Analyse the components of the store image.
   1.2. Access and analyse relevant store documentation in relation to store image.
   1.3. Promote the store image in an appropriate manner.

2. Research market demands for the store.
   2.1. Select an appropriate area for research of market demands.
   2.2. Use appropriate market research techniques according to store policy.
   2.3. Plan market research according to store policy and procedures.
   2.4. Collect, analyse and present data in an appropriate manner.

3. Profile the store’s customers.
   3.1. Research the demography of the store’s customers.
   3.2. Develop a demographic profile.
   3.3. Access information about changing trends and relate to customer demands.

4. Implement methods to attract customers to store.
   4.1. Access and analyse information about the customer.
   4.2. Generate ideas to develop methods for attracting customers.
   4.3. Select and develop a suitable idea in collaboration with others in the organisation.
   4.4. Present and discuss the idea with relevant personnel.
   4.5. Evaluate the idea to ensure that it meets the requirements for the target customers.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills
- interpersonal skills to:
  - carry out market research
  - generate ideas and discuss with relevant personnel through clear and direct communication
• ask questions to identify and confirm requirements
• use language and concepts appropriate to cultural differences
• use and interpret non-verbal communication
• collaborate with team members
• literacy and numeracy skills to:
  • interpret store policy and procedures
  • conduct research
  • analyse data
  • generate reports

Required knowledge
• store policy and procedures in regard to:
  • accessing documentation
  • promoting store image
• market research methods
• evaluation methods
• creative thinking techniques
• techniques in interpersonal communication

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
• analyses components of the store image by accessing relevant store documentation
• promotes the store image in an appropriate manner
• researches market demands using appropriate market research techniques
• accurately profiles store customers
• generates ideas for attracting customers to store
• selects and develops a suitable idea in collaboration with others
• presents and discusses idea with supervisor
• evaluates idea to ensure that it meets requirements for target customers
• implements the idea according to store policies and budgetary requirements.
Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store documentation in relation to store image
  - market data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- case studies
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

Components of the store image may include:

- logo
- products
- services
- layouts
- displays
- tickets
- visual merchandising
- promotional events and themes.

Store documentation may include:

- sales reports
- customer surveys
- market research.

Appropriate areas for research

- location
may focus on: 

- consumer
- product
- brand
- price
- layout
- advertising.

**Market research techniques** may include:

- interviews
- observations
- surveys
- questionnaires.

**Store policy** may relate to:

- marketing
- market research.

**Data** may include:

- internal: customer orders, random surveys, complaints, returns
- external: ABS statistics, books, newspaper reports, supplier information.

**Customers** may include:

- new or repeat contacts
- external and internal contacts
- business customers or individuals
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

**Demographic profile** may include:

- age
- buying power
- family structures
- employment patterns
- education levels
- tourism
- mobility
- occupations
- marital status
- cultural and ethnic background
- income levels
- population size.

**Changing trends** may include:

- tourism
- immigration
- technology
- selling approaches
Customer demands may vary according to:

- leisure time
- environmental issues
- discount operators
- quality demands
- advances in technology.

Ideas may be generated using techniques such as:

- product association
- brainstorming
- visualising
- telling stories
- creative writing
- lateral thinking
- mind mapping, drawings
- using prompts.

Methods for attracting customers may include:

- advertising
- seasonal promotions
- new product launches
- public relations
- publicity.

Relevant personnel may include:

- team leader
- supervisor
- manager.

Methods used to evaluate ideas may include:

- developing checklists
- discussing the process with colleagues or supervisors
- writing a report of the outcomes.

<td>1.2. Interpret information about availability, features and benefits of products and services.</td>
</tr>
</tbody>
</table>
1.3. Compare products and services based on product information.
1.4. Identify and use opportunities to update knowledge for the product and service range.

2. Respond to customer requests.
   2.1. Answer customer questions about products and services with current and accurate information.
   2.2. Use questions to clarify customer information needs.
   2.3. Explain product and service details using clear communication.
   2.4. Source additional information when answer to customer request is unknown or refer to relevant colleagues.

3. Enhance information provided.
   3.1. Identify situations where additional information may assist the customer.
   3.2. Advise on alternative products or services that may meet customer needs when requested item is not available.
   3.3. Recommend complementary products, specials, new lines and promotions to customers according to their needs.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Assessment Requirements for SIRXPDK001 Advise on products and services

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- access and interpret sources of information on four different products or services
- respond to four different customer inquiries for product or service information that individually or cumulatively require provision of information on all of the following:
  - features and benefits
  - price
  - alternative products or services
  - complementary products or services.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - interactions with customers
  - product or service pricing
- basic key aspects of legislation that impact provision of information for the product or service range:
  - Australian Consumer Law
  - product or service specific legislation
- interpersonal communication techniques:
  - active listening and questioning
  - communication methods which convey information clearly and concisely
- product and service information for the product or service range:
  - features and benefits
  - price
  - care and handling of products
  - availability
  - storage requirements, shelf life and use by date
  - warranties
- ingredients or materials contained in product
- origins
- alternative products and services
- complementary products and services.

**Assessment Conditions**

Skills must be demonstrated in a services industries environment. This can be:
- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:
- a product or service range
- sources of product information
- relevant documentation:
  - current plain English regulatory documents distributed by government regulators outlining factors that impact provision of information for the product or service range
  - price lists
  - organisational policies and procedures relevant to product and service advice
- customers; these can be:
  - customers in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

</table>

1. Confirm features of specific supply chains.  
   1.1. Determine position of the business in the supply chain.  
   1.2. Analyse features and impact of business relationships with suppliers to the business.  
   1.3. Establish benchmarks of supply chain efficiency.  

2. Maintain information on suppliers.  
   2.1. Obtain and store information on suppliers of products and services to a retail or wholesale business according to business policy and procedures.  
   2.2. Update and regularly review information on suppliers of products and services to a business.  
   2.3. Store information on nature and feature of business relationship with suppliers to a retail or wholesale business and report, according to confidentiality, security, and business requirements.  

3. Review distribution arrangements.  
   3.1. Review, compare and analyse sales, customer satisfaction and performance reports.  
   3.2. Review factors affecting supply of retail or wholesale products and services.  

4. Devise policy and procedures for distribution and supply.  
   4.1. Establish policy and procedures for supply and distribution to business customers and end consumers.  
   4.2. Establish procedures to collect and analyse information on distribution chain management.  

5. Forecast future contingencies affecting supply chain management.  
   5.1. Analyse forecasted market demand to confirm future requirements.  
   5.2. Communicate forward supply needs for the business to suppliers according to policy and contract provisions.  
   5.3. Confirm factors affecting forward purchasing and supply arrangements.  
   5.4. Set standards for supply of products and services to the business in qualitative and quantitative terms.  
   5.5. Communicate procedures for enforcing quality of supply to the business to relevant internal and external personnel.  

6. Improve supply and distribution chain.  
   6.1. Evaluate supply chain against agreed benchmarks and overall
effectiveness. impact on business performance.

6.2. Benchmark comparative performance of supply chain against best in class or competitors.

6.3. Assess factors affecting future distribution and supply of products.

6.4. Make recommendations to relevant personnel to respond to opportunities for improvements in customer supply and distribution relationships.

6.5. Confirm impact of proposed improvements to supply and distribution activities against budget and operational plans.

6.6. Use prevailing trading terms to enhance supply and distribution chain management.

6.7. Generate reports on business relationships with suppliers to the business using available business technology and agreed measures.

6.8. Complete reports to relevant personnel (internal and external to operational unit) to promote recommended implementation of improvement to supply and distribution chain.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - communicate forward business needs to suppliers
  - communicate procedures to relevant internal and external personnel through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication

- literacy and numeracy skills to:
  - interpret a range of workplace documentation
  - access and maintain information on suppliers
  - generate reports and recommendations for supply and distribution chain improvement to relevant personnel

- analytical skills to collect, organising and evaluate information

- management skills to:
  - implement benchmarks of supply chain efficiency
  - devise effective policy and procedures
Required knowledge

- relevant business policy and procedures
- principles and techniques in analysis, assessment, development and implementation
- approval processes and key personnel
- supply cycle
- supply chain for business and typical supply chain models used in different industry sectors and businesses
- procedures for collecting and analysing distribution chain management
- position of the business in the supply chain
- factors affecting supply and distribution management
- work and team priorities
- current forecasts and trends
- market information and data collection
- sales plans
- principles and techniques for measuring supply chain efficiency and quality standards
- Work Health and Safety (WHS) aspects of job
- relevant commercial law and legislation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- evaluates and seizes opportunities to improve supply chain for a product or service within an operational context
- identifies and understands a range of current and emerging supply chain management models
- applies tools to measure and quantify supply chain quality standards and efficiency for a retail or wholesale business
- develops clear and effective policy and procedures for wholesale or retail distribution or supply activities
- develops and implements realistic and measurable performance benchmarks for supply and distribution into a business.

Context of and specific

Assessment must ensure access to:
resources for assessment

- a retail or wholesale work environment
- relevant sources of supply chain information
- relevant documentation, such as:
  - policy and procedure manuals
  - supply and distribution reports
  - supplier records
- a range of suppliers.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

**Business relationships** may be influenced by:

- due diligence requirements
- risk sharing
- market position
- planning cycles and timing
- cost and price analysis
- terms and conditions agreed
- intellectual property and technology rights
- value management
- continuous improvement
- supply chain management
- infrastructural and capital outlay requirements
- organisational systems integration and compatibility.

**Suppliers** may be:

- commercial companies
• public agencies or organisations
• governments
• community and not-for-profit organisations
• internal.

**Benchmarks** may include:
• Australian standards
• international standards
• professional standards
• industry standards
• performance indicators
• quality measures and criteria
• planning milestones and timeframes
• manufacturer and supplier standards.

**Information on suppliers** may include:
• representative's name and contact details
• range of products and/or services
• transaction records
• contact history
• account terms
• prices
• dispatch and shipping procedures
• records of supplier performance
• details of items supplied or returned.

**Business policy and procedures** may relate to:
• purchasing
• supply and distribution of products or services
• approval processes
• storage and transport of goods.

Methods used to **store information** may be:
• manual
• electronic or digital.

**Factors affecting future distribution and supply** of retail or wholesale products and services may include:
• merchandise availability
• transport availability
• time requirements
• budget requirements
• logistics.

**Relevant personnel** may include:
• manager or supervisor
• colleagues
• business or area manager
• specialist or technical personnel.

**Reports** may be delivered:
• verbally
• in writing
• in groups
• individually.

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
  - monitoring adherence to organisational security policies and procedures
  - responding to two occurrences of non-adherence to security policies and procedures
  - communicating security policies and procedures to one team member
  - ensuring security equipment is utilised and in correct working order
  - reporting on opportunities for improved store security.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - use of security equipment
  - suspicious customer behaviour
  - suspicious team member behaviour
  - armed robbery
  - cash and non-cash security
  - merchandise security
  - theft
  - responding to security breaches
  - reporting security risks and breaches
  - surveillance of merchandise
  - personal security
  - general store security
  - team members’ security training
  - security for opening and closing premises
  - reporting problems and faults
  - security of visitors, sales representatives, contractors and vendors
  - security risks likely to endanger customers or team members
- legislation as relevant to store security and own level of responsibility:
  - privacy laws
  - Australian Consumer Law
  - reporting procedures
- impacts of security breaches on individuals and organisation:
  - emotional distress
  - financial loss
  - commercial impacts
- common security risks within the retail workplace and techniques to:
  - identify risk
  - minimise risk
- types of store alarms and security systems used in industry.

**Assessment Conditions**

Skills must be demonstrated in a services industry environment. This can be:
- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:
- relevant equipment:
  - alarm systems
  - surveillance equipment
  - point-of-sale equipment
  - communication equipment
- relevant documentation:
  - current plain English regulatory documents distributed by government regulators
  - legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
  - organisational policies and procedures as listed in the Knowledge Evidence
- customers and team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SIRXRSK404 Control store security

Modification History
The version details of this endorsed unit are in the table below. The latest information is at the top.

<table>
<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Release</td>
<td>This is a revised unit, based on and equivalent to SIRXRSK004A Control store security.</td>
</tr>
</tbody>
</table>

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to control store security according to organisational policy and relevant legislation.

It involves developing and implementing security procedures for the prevention of theft, ensuring the safety of all personnel in the event of a robbery, and monitoring all security procedures.

Application of the Unit
This unit applies to team members responsible for facilitating the detection and prevention of theft and stock loss and the safety and security of staff and customers in the event of robbery.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Develop store security procedures.
   1.1. Consider store requirements and identify security procedures required to maximise safety of staff, customers and assets.
   1.2. Develop procedures to facilitate the detection and prevention of internal or external theft according to organisational policy and procedures.
   1.3. Develop procedures to ensure maximum safety and security of staff and customers in the event of robbery.
   1.4. Develop procedures for opening and closing premises and cash registers, cash security and non cash transactions.
   1.5. Finalise, document and process security procedures according to organisational policy.

2. Implement and monitor store security procedures.
   2.1. Communicate security procedures to staff according to organisational policy and procedures.
   2.2. Implement and monitor security procedures to facilitate the detection and prevention of internal or external theft according to organisational policy and procedures.
   2.3. Implement and monitor procedures to ensure maximum safety and security of staff and customers in the event of robbery.
   2.4. Develop and implement procedures for opening and closing premises and cash registers, cash security and non cash transactions.
   2.5. Monitor and maintain implementation of security procedures.

   3.1. Measure and analyse existing, and extrapolate potential, stock loss or dissipation through theft.
   3.2. Report on stock loss or dissipation through theft, its impact on business operations and possible solutions.
   3.3. Establish and implement stock control procedures to monitor, control and minimise stock loss through theft.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - converse clearly and directly with staff
  - use and interpret non-verbal communication
- literacy and numeracy skills to:
  - access and interpret store policy documents
  - calculate the cost of stock loss
  - document security procedures
  - handle cash
  - maintain records
- research and analysis skills to:
  - analyse stock control data
  - develop procedures
- problem-solving skills to establish and implement stock control procedures

Required knowledge

- organisational policy and procedures that relate to the development of store procedures for:
  - security
  - detection and apprehension of thieves
  - non-cash transactions
  - cash handling
  - stock control
- principles and techniques for:
  - detecting and preventing theft
  - ensuring safety of personnel in the event of robbery
- relevant codes of practice, legislation and statutory requirements, including:
  - industry codes of practice
  - retail case law or common law
  - state laws relating to property offences
  - work health and safety (WHS) legislation
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

<table>
<thead>
<tr>
<th>Evidence of the following is essential:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• develops and implements security procedures to facilitate the detection and prevention of theft</td>
</tr>
<tr>
<td>• develops and implements procedures to ensure safety and security of internal and external clients in the event of robbery</td>
</tr>
<tr>
<td>• calculates, analyses and reports on the cost and potential impact of identified loss and dissipation on:</td>
</tr>
<tr>
<td>• buying</td>
</tr>
<tr>

</tr>
<tr>
<td>• WHS legislation and codes of practice</td>
</tr>
<tr>
<td>• a team</td>
</tr>
<tr>
<td>• a range of security equipment.</td>
</tr>
</tbody>
</table>

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
• observation of performance in the workplace
• role play
• case studies
• written or verbal questioning to assess knowledge and understanding
• review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

---

### Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

**Security procedures**

may relate to:

• armed robbery
• cash and cash movement
• customers
• equipment
• events likely to endanger customers or staff
• opening and closing of premises
• premises
• records
• staff and staff property
• stock
• theft
• visitors, sales representatives and contractors.

**Organisational policy and procedures in regard to:**

• cash handling
• non-cash transactions
• security
• stocktaking.

**Staff**

may include:

• full-time, part-time, casual or contract staff
• people from a range of cultural, social and ethnic backgrounds
• people with a range of responsibilities and job descriptions
• people with varying degrees of language and literacy
• small work teams
Non-cash transactions may include:
- cheques
- customer refunds
- EFTPOS and credit cards
- gift vouchers.

Techniques used to communicate security procedures may include:
- mentoring and coaching
- on-the-job or off-the-job training
- posters and pamphlets
- simulated events.

Impact on business operations may include:
- budgeting
- buying
- ordering patterns
- planning.

Stock control procedures may include:
- minimising out-of-date stock
- minimising theft
- monitoring stock levels
- quality control
- stocktaking and cyclical counts.

Unit Sector(s)
Cross-Sector

Competency Field
Risk Management and Security
Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Establish customer needs.</td>
<td>1.1.Connect with the customer within designated response times and establish rapport.</td>
</tr>
<tr>
<td></td>
<td>1.2.Use questioning and active listening to facilitate effective two-way communication.</td>
</tr>
</tbody>
</table>
1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.

1.4. Determine and clarify customer preferences, needs and expectations.

2. Provide advice on products and services.

2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.

2.2. Clearly explain and promote product and service features and benefits where relevant.

2.3. Advise on promotional events where relevant.

2.4. Provide additional information to address customer questions and objections.

2.5. Offer comparisons to competitor product or service range as required.

2.6. Collaborate with the customer to determine product or service option most suited to their needs.

2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.

3. Facilitate the sale of products and services.

3.1. Select and use appropriate techniques to close sale.

3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.

3.3. Farewell customer on leaving, and invite to return.

3.4. Provide any required after sales service according to organisational procedures.

**Foundation Skills**

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

**Reading skills to:**

- interpret:
  - detailed in-house and supplier product information documents
  - plain English documents that outline organisational customer service policy and procedures.

**Numeracy skills to:**

- interpret basic fee information from in-house documents and complete basic pricing calculations.

**Problem-solving skills to:**

- respond to customer objections and provide appropriate solutions to satisfy customer needs.

**Technology skills to:**

- use technologies equipped with search functionality and information systems to source product and service information.
Unit Mapping Information

Assessment Requirements for SIRXSL001 Sell to the retail customer

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
  - appropriate communication
  - establishment and clarification of customer needs, wants and expectations
  - product and/or service knowledge
  - appropriate sales approach to sell benefits and features of products and/or services
  - overcome objections and close sales
  - upsell and/or cross sell additional products and/or services that complement the sale
  - promotion of customer loyalty and repeat sales.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
  - cultural diversity
  - special needs
- sales techniques:
  - opening techniques
  - recognising buying signals
  - strategies to focus customer on specific products and services
  - selling add-ons and complementary products
  - overcoming customer objections
  - closing techniques
• primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
• primary components of privacy law, and actions that retail business must take to protect privacy of customer information
• for the specific retail sector:
  • professional service standards and protocols for retail industry personnel
  • attitudes and attributes expected by the retail industry to work with customers
  • different customer service needs and expectations
• for the particular retail organisation:
  • product and service knowledge:
    • product and service range offering
    • product specifications, features and benefits
  • designated response times for providing customer service
  • customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:
• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:
• relevant documentation:
  • organisational policies and procedures for:
    • customer service
    • sale of products and services
    • resolving customer complaints
    • collection and storage of customer details
  • organisational product information and price lists
  • supplier brochures, information sheets and price lists
  • promotional activity information
  • current plain English regulatory documents distributed by government regulators for:
    • consumer protection law
    • privacy law
• customers with whom the individual can interact to sell products and services; these can be:
  • individuals in an industry workplace, or
  • individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation
• assessment activities that allow the individual to:
  • work within commercial speed, timing and productivity
  • manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SIRXLS002 Follow point-of-sale procedures

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to follow point-of-sale work systems, process transactions and complete sales.

It applies to individuals working in frontline operational roles in a diverse range of industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for SIRXSLS002 Follow point-of-sale procedures

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow procedures for set up, maintenance and close of point-of-sale area/terminal on three different occasions
- perform three point-of-sale transactions for each of the following:
  - cash sales
  - non-cash sales
- perform three point-of-sale transactions for each of the following:
  - refunds
  - exchanges
- make six accurate financial calculations relating to product pricing that individually or cumulatively involve:
  - multiple products
  - products of varying prices
  - products with percentage discounts
- follow procedures to complete four sales that require post purchase activity.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - exchanges
  - refunds
  - lay-by
- basic key aspects of legislation that impact point-of-sale activities:
  - Australian Consumer Law
- features of products sold by the organisation
- functions and procedures for operating point-of-sale equipment:
  - opening and closing
  - clearance of terminal and transference of tender
• recording takings
• consumables required by system
• security
• cash handling procedures:
  • counting cash
  • handling cash floats
  • change required, denominations of change and tendering change
  • security
• procedures for non-cash transactions:
  • credit cards
  • EFTPOS
  • vouchers
• types of purchase follow up activities and associated organisational policies and procedures:
  • placing of orders
  • delivery
  • issuing of invoices
  • issuing of receipts
  • wrapping and packing.

**Assessment Conditions**

Skills must be demonstrated in a service industries environment. This can be:

• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:

• organisational policies and procedures for point-of-sale activities
• current plain English regulatory documents distributed by government regulators outlining key aspects of legislation that impact point-of-sale activities as listed in the Knowledge Evidence
• point-of-sale equipment and consumables
• financial transaction documentation for non-cash sales
• cash
• assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessment of performance is to be consistent with the evidence guide.</td>
</tr>
</tbody>
</table>

1. **Develop relationships with customers.**
   - 1.1. Establish rapport with *customers* and express genuine interest to *clarify customer requirements* and enhance *outcomes*.
   - 1.2. Maintain *professional ethics* with the customer to promote store image and credibility.
   - 1.3. Identify *customer needs and preferences* to maximise sales opportunities.
   - 1.4. Maximise sales opportunities by use of add-on and complementary *sales techniques*.
   - 1.5. Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.
   - 1.6. Use effective methods to close sales.

2. **Apply expert knowledge.**
   - 2.1. Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to *legislative requirements*.
   - 2.2. Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.
   - 2.3. Provide evaluation of product range, demonstrate features and benefits of products or services where appropriate, and make recommendations to the customer to maximise sales potential.
   - 2.4. Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to *store policy*.
   - 2.5. Calculate prices and discounts according to pricing determinants and store policy.

3. **Provide post-sales support.**
   - 3.1. Provide evidence of ongoing support as sale is concluded.
   - 3.2. Explain *back-up service* and reassure customer according to legislative requirements and store policy.
   - 3.3. Provide customer with store or salesperson’s contact details to ensure customer follow-up according to store policy.
   - 3.4. Enter customer and transaction details into *customer database* according to store policy.
4. Plan sales presentations.
   4.1. Plan presentation to complement product characteristics.
   4.2. Select client group according to product characteristics and store merchandising policy.
   4.3. Access promotional materials where required and distribute to client group.
   4.4. Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.

5. Implement sales presentations.
   5.1. Ensure sufficient numbers of adequately briefed support staff, where required, for presentation.
   5.2. Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups.
   5.3. Demonstrate products or services to create a buying environment.
   5.4. Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future sales presentations, according to store sales policy.

6. Maintain and use a customer database.
   6.1. Maintain customer confidentiality as required by store policy and legislative requirements.
   6.2. Develop and maintain accurate customer records and store securely according to store policy and procedures.
   6.3. Identify and follow up regular customers according to store marketing policy.
   6.4. Use customer records to advise customers on products and services of possible interest.
   6.5. Implement customer loyalty schemes where required according to store promotional activities.

7. Deal with difficult customers.
   7.1. Acknowledge customer complaints and problems and reassuringly support difficult customers to produce positive outcome.
   7.2. Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration.
   7.3. Develop customer’s confidence in the candidate and product or service to promote long-term trust and commitment to store.
   7.4. Establish mutually acceptable resolution of complaint.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills
- communication and interpersonal skills to resolve conflict
- literacy and numeracy skills to:
  - access and read relevant product information
  - calculate prices and discounts
  - read store policies and procedures
  - record client and sales information
- sales skills to apply selling techniques, including:
  - add-ons and complementary sales
  - identifying buying signals
  - opening and closing techniques
  - overcoming customer objections
  - presenting product information
  - promoting enhanced sustainability features of selected products and services
  - using strategies to focus customer on specific merchandise

**Required knowledge**
- customer types and needs, including:
  - customer buying motives, customer behaviour and cues
  - functional and psychological needs
  - individual and cultural differences, demographics, lifestyle and income
- work health and safety (WHS) requirements relating to:
  - manual handling
  - plant and equipment
  - hazardous substances and dangerous goods
  - workers compensation
- relevant industry codes of practice, legislation and statutory requirements relating to building relationships with clients
- store policies and procedures in regard to:
  - efficient use of resources
  - establishing, maintaining and using customer records
  - methods of maintaining customer confidentiality and secure storage of customer details
  - price negotiation and payment and credit options
  - pricing, including GST requirements
  - resolving customer complaints
  - updating and maintaining customer mailing lists
- store and area merchandise and service range
**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies:
  - detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
  - industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
  - store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations, and providing after-sales support
- develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and discerning customer buying motives, requirements and preferences
- establishes, records and maintains customer records and details, maintaining customer confidentiality, ensuring secure storage of data, and using customer records to maximise customer interest and create a buying atmosphere
- evaluates personal or team sales performance to maximise future sales
- maximises sales opportunities by using effective selling techniques, applying detailed product knowledge, and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- plans, prepares and conducts sales presentations and briefs
- supports staff where required, to create a buying environment and maximise sales performance
- resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution
- uses effective questioning, listening and observation skills to determine customer requirements.

### Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
• policy and procedures manuals
• industry codes of practice and relevant legislation
• WHS legislation and codes of practice
• a range of customers with different requirements
• an appropriate range of products and equipment
• a customer database system.

Method of assessment
A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
• observation of the candidate in the workplace
• customer feedback
• written or verbal questioning to assess knowledge and understanding
• review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment
Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Customers may include:
• a single customer, couples, families or groups
• customers with routine or special requests
• internal and external contacts
• new or repeat contacts
• people from a range of social, cultural and ethnic backgrounds
• people with varying physical and mental abilities.

Clarification of customer requirements may be achieved by:
• active listening
• appropriate questioning
• empathy
• observation
• reassurance and confirmation.

Outcomes may include:
• credibility of store
• customer commitment
- customers’ trust
- increased return customer base.

Maintaining professional ethics with the customer may include:
- confirmed appraisals of products and services
- honesty
- positive statements.

Customer needs and preferences may include:
- brand
- customer physical needs
- price
- product characteristics
- product type
- size.

Sales techniques will include:
- add-on and complementary products and services
- selling up or down
- suggestive selling
- variety of methods of closing sales.

Legislative requirements may include:
- environmental protection legislation
- health and welfare law specific to local government, state and federal legislation
- liquor laws
- WHS
- pricing procedures, including GST requirements
- privacy laws
- sale of second-hand goods
- tobacco laws
- Australian Consumer Law and fair trading Acts
- transport, storage and handling of goods.

Store policy and procedures in regard to:
- dealing with difficult customers
- maintaining and using client records
- promotional, marketing, discounting and reward programs
- resolving customer complaints
- selling products and services.

Back-up service may include:
- delivery specifications
- financial products and services
- installation
- returns policies
- technical support
- warranties and guarantees.

Customer database may be:
- computer-based
- manual.
Product characteristics may include:
- features and benefits
- price range
- supplier or manufacturer information
- target group.

Promotional materials may include:
- brochures
- business cards
- pamphlets
- posters
- promotional merchandise
- vouchers.

Sales presentations may be:
- at client site
- in-house
- verbal
- visual.

Customer records may include:
- anniversaries and special dates
- details of items bought or returned
- name and contact details
- personal preferences
- transaction records.

Customer loyalty schemes may include:
- credit or discount facilities
- customer clubs
- customer reward schemes
- special offers.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to monitor, maintain and improve sales and service delivery. It involves market research, developing new markets, and marketing products and services within the culture of the overall store policy.

The unit requires the team member to develop and maintain excellence in sales and service delivery by ensuring the provision of a well-resourced working environment for fellow staff. The team member is required to proactively pursue the continuous improvement of operations by seeking, evaluating and reporting feedback from customers and colleagues on sales and service delivery and working conditions; and locating and negotiating adequate supply of stock and other necessary resources according to store policy.

Application of the Unit
This unit applies to staff with managerial responsibility.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

</tr>
</tbody>
</table>

1. Establish and respond to customer requirements.
   - 1.1. Plan and develop strategies to enhance provision of customer service according to store policy.
   - 1.2. Research and *analyse customer needs* in regard to local geographic and cultural issues.
   - 1.3. Resolve *customer* complaints referred by *staff*, according to store policy.
   - 1.4. Monitor sales and service targets and plans to ensure that customer requirements are met, and take appropriate remedial action if required.
   - 1.5. Encourage staff to take responsibility for meeting customer requirements.
   - 1.6. Seek and use feedback from customers to improve future operations.

2. Monitor, maintain and improve sales and service delivery.
   - 2.1. Implement, communicate and review *policies and procedures for sales and service delivery* on a regular basis.
   - 2.2. Maintain adequate *resource* allocation for client service provision in line with *store policy and procedures*.
   - 2.3. Ensure sales and service targets and plans are consistent with quality and functional *specifications*.
   - 2.4. Communicate sales and service targets and plans to *relevant personnel* according to implementation schedules.
   - 2.5. Provide *feedback* to staff on operations and outcomes.
   - 2.6. Take corrective measures to minimise *factors that may cause disruption to operations*.
   - 2.7. Monitor and evaluate effectiveness of corrective actions for future operational planning.
   - 2.8. Ensure current and accurate *records* on sales are available to authorised personnel.

3.1. *Negotiate and implement arrangements with suppliers*, according to store policies and procedures, and communicate to relevant personnel.

3.2. Authorise and communicate special pricing arrangements and customer payment agreements to relevant staff and management personnel according to store policy.

3.3. Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.

3.4. Identify and communicate market factors affecting *supply* to relevant personnel.

3.5. Convey complete and accurate records of negotiations and agreements to appropriate personnel within designated time limits.

3.6. Take immediate corrective action where potential or actual *problems with supply* are indicated.

3.7. Identify and develop new suppliers to maintain and improve sales and service delivery.

4. Provide productive work environment.

4.1. Establish and maintain a sufficient supply of resources of the necessary quantity and quality to meet customer requirements.

4.2. Regulate and monitor access to and use of resources for maximum efficiency and sustainability.

4.3. Maintain staff working conditions to meet requirements of *relevant legislation* and store policy.

4.4. Ensure that maintenance frequency and use of equipment conform to recommended schedules and procedures.

4.5. Replace, repair or adapt resources that do not meet requirements as soon as practicable and with minimum disruption to work activity.

4.6. Communicate *recommendations* for improving conditions to relevant personnel within designated timeframe.

4.7. Maintain complete, accurate records and make them available to authorised personnel.

---

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**
communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - communicate with staff through clear and direct communication
  - negotiate with suppliers and customers
  - present information
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences

literacy and numeracy skills to:
  - calculate costs and pricing arrangements
  - document results
  - estimate volume
  - interpret and maintain data
  - prepare reports
  - research, analyse and interpret a broad range of written material

technical skills to use new technology

Required knowledge

- customer demand and market trends
- principles and techniques for:
  - interpersonal communication
  - purchasing and supply specifications
  - stock control
- product quality standards
- range and availability of new products and services, especially those with enhanced sustainability features
- relevant industry codes of practice applicable to the sales environment
- relevant legislation and statutory requirements, including work health and safety (WHS) requirements applicable to the sales environment
- store merchandise and service range
- store merchandising plan
- store policies and procedures in regard to:
  - efficient and sustainable use of resources
  - pricing procedures, including GST requirements
  - quality assurance and control
  - sales and service delivery
  - stock maintenance and control
  - supply specifications
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
- maintains, monitors and evaluates sales and service delivery
- communicates sales and service targets and plans and provides feedback on operations and outcomes to relevant personnel according to store policy
- proactively improves sales and service delivery operations
- interprets and maintains data on sales and services delivery
- negotiates and arranges supply of goods according to store policy and procedures
- authorises pricing and payment agreements according to store policy and procedures
- maintains, monitors and evaluates supply of stock.

### Context of and specific resources for assessment

Assessment must ensure access to:
- a retail work environment
- relevant documentation, such as:
  - policy and procedures manuals
  - sales and service delivery targets and plans
  - records of sales and service
  - legislation and statutory requirements
  - industry codes of practice
  - WHS legislation and codes of practice
  - suppliers
  - a team.

### Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- observation of the candidate in the workplace
- customer feedback
- research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

### Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Methods used to analyse customer needs may be:

- qualitative
- quantitative.

Customer may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Policies and procedures for sales and service delivery may involve:

- customer complaints
- customer service and sales training
- service standards
- staff induction
- staff presentation.

Resource may include:

- equipment and technology
- finances
- materials
- people
- time.

Store policy and procedures in regard to:

- interaction with customers
- interaction with other team members
- WHS
- quality assurance and control
- acquisition and sale of products and services.

Specifications may include:

- customer agreements
- operational means for meeting agreements
- specific functional duties within the organisation.

Relevant personnel may include:

- managers
include:
- members of own or other work teams
- supervisors.

*Feedback* may be sought and given:
- in groups
- in writing
- individually
- verbally.

*Factors that may cause disruption to operations* may include:
- operational resources
- quality of materials
- supply.

*Records* may be:
- electronic
- hard copy.

Techniques used to *negotiate* with suppliers may include:
- correspondence
- email
- face-to-face contact
- meetings
- telephone.

*Arrangements with suppliers* may relate to:
- credit levels
- delivery
- partnerships and exclusivity
- pricing.

Sources of *supply* may include:
- external organisations
- internal departments and teams
- internal and external personnel.

*Problems with supply* may involve:
- cost
- coverage or content
- quality
- quantity
- time schedules or scales.

*Relevant legislation* may include:
- equal employment opportunity and anti-discrimination laws
- federal, state and local legislation
- WHS.

*Recommendations* may be communicated to:
- colleagues, specialists, staff from other departments
- external organisations with a health, safety or environmental responsibility
- government bodies
- higher-level managers
- subordinates.

Sales
SISXRES001 Conduct sustainable work practices in open spaces

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to plan and conduct work in open spaces while upholding sustainable practices. This unit requires the ability to conduct research of the current land condition, capability, uses and practices, and develop and implement strategies to achieve sustainable practices for outdoor programs and activities.

This unit applies to operation or program managers who are responsible for planning, implementing and evaluating sport, recreation or fitness programs and activities across a range of activity areas. They work autonomously with responsibility for management of resources and upholding of sustainable work practices.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

activities for work in open spaces.

within the local community.

1.2 Review and document relevant codes of practice and local government requirements for use of open space.

1.3 Consult with colleagues and other stakeholders about issues of responsibility for environmental and social sustainability.

2. Conduct minimal impact activities.

2.1 Select and use minimal impact techniques and procedures appropriate to the area.

2.2 Conduct activities using positive sustainable outcomes for local communities and environments.

2.3 Advise clients of appropriate behaviours in open space environments and address any unacceptable behaviours.

3. Monitor impacts and changes.

3.1 Monitor and record changes in the natural environment using appropriate technology.

3.2 Collect environmental information on behalf of environmental agencies or local government as required.

3.3 Advise appropriate authorities of environmental and social change promptly.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

<table>
<thead>
<tr>
<th>SKILLS</th>
<th>DESCRIPTION</th>
</tr>
</thead>
</table>
| Reading skills to: | • analyse data on conservation strategies  
• research usage and potential usage. |
| Writing skills to: | • develop a plan to improve efficiency while drawing on data analysis. |
| Learning skills to: | • maintain currency of information related to sustainable practices in open spaces. |
| Problem-solving skills to: | • assess threats and opportunities  
• compare conservation strategies and select appropriate strategies  
• monitor and evaluate the effectiveness of strategies and develop alternative strategies where appropriate  
• identify current use of resources  
• develop strategies to maximise efficiency of resource use. |
| Planning and organising skills to: | • work within identified timeframes and budgets  
• plan, implement and monitor strategies for optimal resource use. |
Self-management skills to:

- establish criteria to evaluate open spaces.
- apply sustainable work practices on an ongoing basis.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct at least three sessions in two or more open space environments to minimise environmental impacts of sport, fitness or recreation activities
- for each of the sessions incorporate:
  - local government requirements
  - industry codes of practice
  - provision of advice to clients regarding the use of open spaces
  - management of client behaviour in open spaces
- provide feedback on the environmental impact of at least five sport, fitness or recreation activities conducted in open spaces.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation, regulations and land management requirements and guidelines:
  - permits in national parks or on land under control of traditional owners
  - restrictions on camp site operations and use of open fires
- global environmental issues, in particular a layperson understanding of the science associated with:
  - climate change
  - energy
  - land management
  - waste and consumption
  - water
- environmental and social impacts of sport, fitness or recreation industry in relation to global environmental issues in particular sites and communities
- practical sustainability considerations for sport, fitness or recreation operations, incorporating those related to:
  - environmentally or culturally sensitive areas and associated minimal impact practices
  - handling and disposal of waste, including human waste
• industry codes of practice
• use of water sources
• minimal impact techniques and procedures in relation to:
  • activity-specific guidelines
  • energy use
  • group size
  • interaction with wildlife
  • local customs and courtesies
  • noise
  • setting of camps
  • souveniring
  • use of tracks
  • waste disposal
• biophysical and socio-cultural elements in an environment and the relationship between them
• information collection techniques for monitoring environmental and social impact, including what is observed and measured and how specific data is recorded.

Assessment Conditions

Skills must be demonstrated in:
• an outdoor space that could be used for sport, recreation or fitness work purposes.

Assessment must ensure access to:
• areas or locations containing natural systems or components of these systems
• resources and information relevant to the natural system
• relevant information impacting on conservation of natural systems
• relevant stakeholder and local government information regarding the use of open spaces
• industry code of ethical practice
• organisational documentation relevant to open space planning.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SITTGDE001 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to share information about a specific local Australian Indigenous culture. It is this localised focus that distinguishes this unit from SITTGDE007 Research and share information on Australian Indigenous cultures.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of local cultural knowledge, appropriate behaviour and local community consultation.

This unit applies to those people who are able to share local Australian Indigenous cultural knowledge with others. They may work at many different levels, as cultural knowledge has no direct relationship with organisational levels of responsibility.

The local Australian Indigenous cultural knowledge necessary to achieve competency in this unit may only be accessible to those individuals who identify as elders or who are authorised by local elders on behalf of their communities.

There are many different Indigenous language groups in Australia, therefore the focus of cultural interpretation will vary and should ultimately be decided in consultation with elders on behalf of the local community.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SITTGDE001 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with local Australian Indigenous community elders or persons approved by relevant local Indigenous community elders on at least three occasions and in a culturally appropriate manner to identify acceptable protocols for sharing aspects of local Indigenous culture with others.
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and at three different sites.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- culturally acceptable practices and protocols within a specific local Australian Indigenous community that address:
  - the type of information that can be shared
  - who can give information
  - who can receive the information
  - what activities are appropriate
  - who should be involved in activities
- aspects of a specific local Australian Indigenous culture as appropriate to specific community:
  - art
  - bush foods and medicine
  - dance
  - music
  - storytelling
  - tools and implements
- copyright and intellectual property issues associated with providing information about local Australian Indigenous cultures.
Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace where research is conducted and shared on Australian Indigenous cultures
- a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

- sites where Indigenous cultural experiences take place:
  - cultural centre
  - gallery
  - natural setting
- involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
- customers with whom the individual can interact; these can be:
  - customers in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:

- have worked in the tourism industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE002 Work as a guide

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to work effectively as a guide. It covers key legal, ethical, safety, environmental and professional development issues that guides must consider in their day-to-day work.

This unit applies to guides who may work across multiple industry sectors as employees, volunteers, or independent contractors. They may operate within a single site, or in a particular city, region or tourist precinct, but often move across sites, cities and regions.

Guides apply discretion and judgement within established organisational procedures, and when guiding a tour or activity they take a lead role without supervision. Sometimes guides are the owner-operators of small tour operations.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

1. **Plan guiding activity.**
   - 1.1. Identify key guide information sources and contacts.
   - 1.2. Review required roles and responsibilities for prospective guiding activity.
   - 1.3. Plan resource, labour and logistical aspects of the guiding activity.
   - 1.4. Use industry knowledge and guide networks to enhance the quality of guiding services provided to customers.

2. **Communicate with tourism industry operators.**
   - 2.1. Liaise with internal and external stakeholders to organise all aspects of the guiding activity.
   - 2.2. Achieve mutual understanding and agree on details relevant to guiding activities.
   - 2.3. Provide accurate information and explanations about customer requirements and special requests.
   - 2.4. Identify nature and key facts of operational problems and provide appropriate solutions in consultation with tourism operator.

3. **Guide tours or activities.**
   - 3.1. Conduct guiding activities according to legal, industry and safety requirements.
   - 3.2. Actively participate in risk assessment as an integral part of work activities.
   - 3.3. Take account of ethical considerations for particular contexts.
   - 3.4. Support sustainable work practices.

4. **Develop guiding skills and knowledge.**
   - 4.1. Identify and use opportunities to update knowledge and skills required by guides.
   - 4.2. Maintain knowledge of technologies used by guides.
   - 4.3. Identify and access sources of guide support when required.
   - 4.4. Share knowledge with colleagues to enhance quality of service provided to customers.

Assessment Requirements for SITGDE002 Work as a guide

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct three guiding activities with different customers or groups which involve:
  - liaising with one or more tourism industry operators
  - identifying potential operational problems and appropriate solutions
  - incorporating client requirements and special requests
- undertake a full risk assessment for each of the above guiding activities that:
  - identifies inherent risks
  - identifies hazards
  - reports on hazards
- demonstrate how legal, ethical, safety and sustainability requirements have been met in the planning of each of the above guiding activities.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- interrelationship between tour operations and wholesaling sectors and the role of guiding in the tourism industry
- cultural considerations in dealing with industry colleagues, customers, suppliers and local communities
- roles and responsibilities for guides, and the specific roles of each of these guides:
  - adventure guides
  - city hosts
  - driver guides
  - meet and greet guides
  - site guides
  - tour guides
  - tour managers
- roles and services provided to guides by peak guiding bodies and industry associations to assist in developing guiding knowledge
- industry and legal compliance requirements that affect guiding operations:
- consumer protection laws
- occupational licensing and industry accreditation
- contents of various guiding codes of conduct or practice and the impacts of non-compliance
- public liability and the guide’s duty of care
- environmental laws
- permit requirements for operating in protected areas
- Queensland Tourism Services Act 2003 requirements for guides when working in Queensland
- work health and safety
- different types of technologies and their uses:
  - presentation technologies
  - radio-frequency identification (RFID) codes for handheld devices
  - social networking
- opportunities to update own knowledge as a guide:
  - familiarisation tours
  - industry seminars
  - participation in industry accreditation schemes
  - participation or membership in professional guide associations
  - research
  - social networking
  - training courses
- tourism operators that work in collaboration with guides:
  - inbound tour operators
  - other guides
  - retail outlets:
    - factory outlets
    - opal or souvenir outlets
    - tax free stores
  - suppliers of any tourism product or service that is a component of the touring itinerary:
    - accommodation providers
    - airlines
    - attraction or theme parks
    - coach companies
    - cultural sites
    - event venues
    - food and beverage outlets
    - tour operators and cruise operators
- safety issues that affect guiding operations in particular contexts, particularly those related to customer safety in different environments
• ethical considerations for guides:
  • compliance with industry codes of conduct
  • cultural considerations
  • dealings with local communities
  • dealings with Indigenous communities
  • provision of services as promoted or confirmed
  • relationships with industry colleagues, customers and suppliers
  • avoiding unconscionable conduct

• sustainable work practices includes considerations for:
  • economic:
    • business profitability
  • environmental:
    • minimal impact practices
    • waste minimisation
  • social:
    • host community interactions
    • Australian Indigenous contexts.

**Assessment Conditions**

Skills must be demonstrated in an operational guiding environment. This can be:

• a real guiding activity
• a simulated industry environment or activity.

Assessment must ensure access to:

• environments in which guiding activities take place:
  • tourist attractions
  • visitor sites
  • on board various forms of transportation

• organisational specifications:
  • codes of conduct
  • procedures for liaising with tourism industry operators that are involved in the operation of guided activities
  • running sheets for tours and activities
  • incident report templates
  • passenger lists
  • risk assessment template
  • microphone
  • props and signage
• customer groups of a size and nature that reflect the commercial environment in which the guide operates
• tourism industry operators with whom the individual can interact; these can be:
  • those involved in organising a tour or activity who interact with the individual during the assessment process; or
  • individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context
• participants undertaking a tour or activity for whom the individual can act as guide; participants can be:
  • those participating in a tour or activity who interact with the individual during the assessment process; or
  • individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:
• have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to research and share information about Australian Indigenous cultures in an appropriate way. It focuses on information that is widely available to the general community.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of culturally appropriate behaviour and local community consultation.

This unit applies across many industry sectors. It is particularly relevant to cultural tourism operations and to individuals who work in customer service and guiding roles with differing levels of responsibility. Information could apply to Australian Indigenous communities and cultures across Australia, or to a specific Australian Indigenous community and culture.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Research general information on Australian Indigenous cultures.

   1.1. Identify key information sources on Australian Indigenous cultures.
   1.2. Select and use formal and informal research techniques to access current, accurate and relevant information about Australian Indigenous cultures.
   1.3. Obtain information in a culturally appropriate way.

2. Share general information on Australian Indigenous cultures.

   2.1. Identify and use Australian Indigenous interpreters where possible.
   2.2. Provide guidance to customers on appropriate behaviour when interacting with Australian Indigenous people.
   2.3. Share clear and accurate information on Australian Indigenous cultures to enhance cultural awareness, ensuring acknowledgment of the diversity of cultures.
   2.4. Share information in a manner respectful of local community values and customs.
   2.5. Answer questions according to community wishes about what information can be shared.
   2.6. Respond to culturally inappropriate behaviour by customers to minimise the likelihood of causing offence.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

Writing skills to:

   • make notes about Australian Indigenous culture to share with others.

Learning skills to:

   • develop own knowledge and understanding of Australian Indigenous cultures.
Teamwork skills to:

- work respectfully with Australian Indigenous interpreters and Australian Indigenous communities or with those who are authorised by elders on behalf of the community with regard to the preparation of appropriate information and activities.

Unit Mapping Information

Assessment Requirements for SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with relevant Australian Indigenous community elders or persons approved by relevant Indigenous community elders in a culturally appropriate manner to identify acceptable protocols for sharing knowledge on local Indigenous culture with others
- using relevant sources of information listed in the knowledge evidence, undertake research on Australian Indigenous culture relevant to the regional context to develop current knowledge of:
  - art and music
  - bushcraft, bush food and bush medicine
  - contemporary Australian Indigenous life and culture
  - cultural centres, galleries and natural sites
  - dance
  - history, pre- and post-European contact
  - land ownership
  - tools and implements
  - traditional life and culture
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and using at least three different locations.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on Australian Indigenous cultures:
  - artworks
  - events
  - exhibitions
  - experiences (of self or others)
  - films
  - images
  - internet
• music
• performances
• Indigenous people
• traditional owners
• presentations
• professional associations
• printed texts

• protocols for researching and sharing information about Australian Indigenous cultures that address:
  • the type of information that can be shared
  • who can give information
  • who can receive the information
  • what activities are appropriate
  • who should be involved in activities

• fundamental Australian Indigenous intellectual property issues:
  • strong links between intellectual property and cultural heritage
  • issues associated with the reproduction and sale of Indigenous cultural works.

**Assessment Conditions**

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

• an industry workplace where research is conducted and shared on Australian Indigenous cultures
• a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

• cultural sites, galleries or natural settings
• information sources verified or supported by Indigenous communities
• involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
• customers with whom the individual can interact; these can be:
  • customers in an industry workplace who are assisted by the individual during the assessment process; or
  • individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:
• have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

flora, fauna and landscape.

1. Evaluate credibility and reliability of information sources.

2. Use formal and informal research techniques to access current, accurate and relevant information.

3. Determine potential subjects of customer interest and make focus of research activities.

2. Prepare specialised information on flora, fauna and landscape.

2.1. Analyse information and develop interpretive themes and messages to meet customer needs.

2.2. Organise information to support ways in which it will be used and presented.

3. Update knowledge of specialised information on flora, fauna and landscape.

3.1. Identify and use opportunities to maintain currency of knowledge about specialised topics.

3.2. Proactively seek opportunities to enhance and expand own knowledge base.

3.3. Incorporate updated and expanded knowledge into work activities.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

**SKILLS**

**DESCRIPTION**

**Reading skills to:**

- interpret potentially complex and detailed information on flora, fauna and landscape.

**Writing skills to:**

- make notes from research on flora, fauna and landscape.

**Initiative and enterprise skills to:**

- establish an interpretive framework
- evaluate and adapt information for practical workplace purposes
- create key messages, themes and storylines for customers.
- use the internet as a research tool.

**Technology skills to:**

Assessment Requirements for SITTGED008 Prepare specialised interpretive content on flora, fauna and landscape

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:
• prepare three different presentations, with each presentation:
  • using at least four credible and reliable sources of information
  • demonstrating knowledge of flora, fauna and landscape as listed in the knowledge evidence
  • using appropriate ecological terminology and concepts
  • incorporating interpretive themes and messages
  • organising information in a logical and suitable manner for presentation.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:
• role of interpretation in creating a powerful customer experience
• sources of information on flora, fauna and landscape in the relevant geographic context
• landscapes of interest within a local region and their general characteristics
• key ecological terminology and concepts:
  • biodiversity and abundance
  • biotic and physical factors
  • carbon cycle
  • community relations
  • energy flow
  • food web
  • life cycles
  • nutrient cycle
  • populations
  • succession
  • water cycle
  • zonation
• interrelationships between parts of the ecosystem:
• developmental processes related to the formation of local landscapes:
  • geological formations and history
  • soil composition and its relation to plant and animal life and water catchment areas
• principles of Gondwana theory and the impact of Gondwana on plant and animal communities
• major landscape types and their characteristics:
  • alpine
  • coastal
  • desert
  • outback
  • temperate
  • tropical
• major species of flora and fauna within the local landscape:
  • characteristics
  • commonalities
  • interactions between species and the environment
  • nature of species and where it is found
  • nutrition and life cycles
  • roles of individual species
  • species harmful to humans
• identification techniques for flora and fauna
• environmental influences that affect landscape:
  • climate
  • earthquake
  • fire
  • flood
• human impact on landscape:
  • industrial activity
  • land clearing
  • mining
• management regimes and codes of practice for local landscape
• Australian Indigenous perspective on local landscape
• information sources frequently used by guides:
  • artworks
  • events
  • exhibitions
  • experiences and observations (of self or others)
  • films
  • geological societies, plant study groups or wildlife societies
  • images

</tr>
</tbody>
</table>
1. Research specialised information on cultural and heritage environments.

   1.1. Identify key sources of specialised information about cultural and heritage environments.
   1.2. Evaluate credibility and reliability of information sources.
   1.3. Use formal and informal research techniques to access current and relevant information.
   1.4. Determine potential subjects of customer interest and make focus of research activities.

2. Prepare specialised information on cultural and heritage environments.

   2.1. Analyse information and develop interpretive themes and messages to meet customer needs.
   2.2. Organise information to support the ways in which it will be used and presented.

3. Update knowledge of specialised information on cultural and heritage environments.

   3.1. Identify and use opportunities to maintain currency of knowledge about specialised topics.
   3.2. Proactively seek opportunities to enhance and expand own knowledge base.
   3.3. Incorporate updated and expanded knowledge into work activities.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

Reading skills to:

   • interpret potentially complex and detailed information on cultural and heritage environments.

Writing skills to:

   • make notes on cultural and heritage environments.

Initiative and enterprise skills to:

   • establish an interpretive framework
   • evaluate and adapt information for practical workplace purposes
   • create key messages, themes and storylines for customers.
   • use the internet as a research tool.

Technology skills to:
Unit Mapping Information

Assessment Requirements for SITTGDE010 Prepare specialised interpretive content on cultural and heritage environments

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:
- prepare three different presentations, with each presentation:
  - using at least four credible and reliable sources of information
  - demonstrating knowledge of cultural and heritage environments as listed in the knowledge evidence
  - using appropriate ecological terminology and concepts
  - incorporating interpretive themes and messages
  - organising information in a logical and suitable manner for presentation.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:
- the role of interpretation in creating a powerful customer experience
- sources of information on cultural and heritage environments
- cultural and heritage environments, natural and built:
  - art galleries
  - cultural centres
  - heritage trails
  - historic localities or regions
  - historic theme parks
  - Indigenous art or occupation sites
  - museums
  - prehistoric and fossil sites
- nature and significance of each cultural or heritage environment:
  - how the environment developed and evolved
  - historically and culturally significant features, details of any exhibits, displays or performances
  - individuals associated with the environment, their roles and impacts
  - role of the environment in the local community, both past and present
Assessment Requirements for SITGDE010 Prepare specialised interpretive content on cultural and heritage environments

- relationship of the environment to past and current Australian culture and history
- information sources frequently used by guides:
  - artworks
  - events
  - exhibitions
  - experiences and observations (of self or others)
  - films
  - images
  - internet
  - music
  - objects
  - local experts
  - traditional owners
  - performances
  - presentations
  - professional associations
  - printed texts, books, journals, magazines, newspapers
  - technical information.

Assessment Conditions

Skills must be demonstrated in an operational guiding environment. This can be:
- an industry workplace where specialised interpretive content is developed for guiding activities
- a simulated activity involving the development of specialised interpretive content for guiding activities.

Assessment must ensure access to:
- current sources of information as listed in the knowledge evidence
- current interpretive resources
- equipment used to source, record and store information:
  - computer and software
  - internet
  - data storage equipment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:
- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD002 Develop interpretive activities

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives for an activity; develop operational aspects; and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE005 Prepare and present tour commentaries or activities.

The unit applies to many industry sectors and has particular relevance in tourism, sport and recreation, and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and developing interpretive activities may be for a series of activities in a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1. Establish need for activities.
   1.1. Identify need for interpretive activities, based on customer, organisation and community needs.
   1.2. Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues.

2. Create activities.
   2.1. Identify and evaluate a range of potential information and resources, including other specialists as required.
   2.2. Develop interpretive framework for activities.
   2.3. Generate and select ideas for potential messages, themes and storylines.
   2.4. Identify relationships between themes, storylines and the site.
   2.5. Incorporate interpretive media that matches the site.
   2.6. Conduct a risk assessment and incorporate controls into activity development.
   2.7. Evaluate and integrate legal, ethical and sustainability considerations.
   2.8. Develop resources to support activities.
   2.9. Develop activity within budget to meet agreed objectives.

3. Evaluate activities.
   3.1. Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities.
   3.2. Modify activities according to feedback received.
   3.3. Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Assessment Requirements for SITTPPD002 Develop interpretive activities

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and develop one single interpretive activity and one series comprising at least three interpretive activities combined into an overall program, for at least two of the following:
  - attractions
  - guided activities or walks
  - sporting activities
  - theme parks
  - virtual activities
- plan and develop the above interpretive activities using at least two of the following themes:
  - cultural
  - heritage
  - historical
  - nature
- ensure above interpretive activities include key messages that reflect subject matter knowledge and meet the needs of different customer groups and commercial and operational constraints
- identify review mechanisms for above interpretive activities.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- subject matter around which activities are developed
- influential principles and theories of interpretation
- physical and digital interpretive media
- resource considerations for the development of interpretive activities:
  - apps and other digital content
  - costumes
  - guest speakers
  - handouts
- information and communications technology
- natural resources
- props
- professional organisations
- special interest organisations
- specialists:
  - actors and performers
  - creative designers
  - cultural advisers
  - designers
  - environmental educators
  - heritage specialists
  - historians
  - interpretation consultants
  - marketers
  - subject matter experts
  - technical experts
- practical processes that support activity development:
  - budgeting
  - evaluation
  - needs analysis
  - resource development
  - scheduling
- creative communication techniques for interpretive activities:
  - games
  - illustrated talks
  - role-playing
  - sensory awareness exercises
  - storytelling
  - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes:
  - determining overall risk level
  - determining exposure to the risk
  - estimating probability of negative impacts
  - identifying consequences that could result from the identified risk
- legal, ethical and sustainability considerations for activity development:
  - cultural appropriateness
  - duty of care
  - minimal impact
• minimising waste and conserving resources.

**Assessment Conditions**

Skills must be demonstrated in an operational tourism environment. This can be:

• an industry workplace
• a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

• a real or simulated environment for which interpretive activities can be planned and developed
• information sources on subject matter of interpretive activities, resources and other specialists
• current technology for use in activity development
• customers sufficient in number to reflect different customer, organisational or community needs and locations for interpretive activities; these can be:
  • customers in an industry workplace who are assisted by the individual during the assessment process; or
  • individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:

• have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD009 Develop environmentally sustainable tourism operations

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to plan strategically for environmentally sustainable operations. This is subject to a range of regulatory requirements that relate to environmental sustainability at land management agency and federal, state or territory, and local government level. It requires the ability to establish and operate a sustainable operation and to monitor its environmental impact.

The unit applies to those in the tourism industry with managerial responsibilities in strategic planning and product development. Planning may be for a whole region or local area or for a particular venue, organisation, event or product. The unit applies to any operation with a strong focus on environmental sustainability.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

outcomes. demonstrate achievement of the element.

1.2. Conduct evaluations prior to any decision to establish operation.
1.3. Consult stakeholders and incorporate their views into planning process.
1.4. Investigate methods of managing impact.
1.5. Develop strategies that provide social and economic returns to communities.
1.6. Proactively seek opportunities for new, innovative and more sustainable approaches to conducting operations.
1.7. Develop strategies that balance environmental sustainability and economic viability.

2. Implement environmentally sustainable operations. 2.1. Establish and integrate best practice environmental standards to limit negative environmental impacts.
2.2. Evaluate and use technologies for environmental best practice.
2.3. Develop environmentally-friendly codes of practice for the operation and for customer use.
2.4. Conduct operations according to environmentally sustainable practices, guidelines and legal requirements.
2.5. Promote environmental awareness among stakeholders.

3. Evaluate environmental impact. 3.1. Monitor and assess environmental impacts as part of regular management reviews.
3.2. Monitor compliance with codes of practice and legislative requirements.
3.3. Initiate follow-up action based on assessment of environmental impact and compliance.

### Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

<table>
<thead>
<tr>
<th>SKILLS</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading skills to:</td>
<td>• interpret materials describing environmental regulatory requirements and codes of practice.</td>

</tbody>
</table>
Oral communication skills to:

- consult with diverse stakeholders on potentially divisive and nuanced issues.

Numeracy skills to:

- perform complex calculations to assess profitability considerations.

Problem-solving skills to:

- respond to complex internal and external management challenges.

Initiative and enterprise skills to:

- evaluate complex issues and information, and develop strategic responses.

Planning and organising skills to:

- coordinate interrelated planning and operational processes.

Assessment Requirements for SITTPPD009 Develop environmentally sustainable tourism operations

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop a plan for a tourism operation that supports environmental sustainability and provides evidence of:
  - analysis of key environmental issues
  - consultation with key stakeholders
  - evaluation of proposed operation
  - development of strategies and operational approaches that maximise positive impacts
  - integration of current legislation, regulations and industry codes
- implement the above plan, complying with environmentally sustainable practices, guidelines and legal requirements
- monitor and evaluate the environmental impact of the above tourism operation through:
  - community consultation and involvement
  - internal and external education programs
  - implementing sustainable operational initiatives:
    - regularly reviewing optimal group sizes
    - scheduling for optimal weather conditions and seasons
    - selecting most appropriate equipment and transport modes.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- current research trends in the area of ecologically sustainable operations
- current and emerging issues and trends relevant to above operation and the environment
- global environmental issues, in particular a layperson’s understanding of the science associated with:
  - climate change
  - energy
  - land management
  - waste and consumption
  - water
• relevance of particular environmental issues to the area or region of work and the specific features and vulnerabilities of the local environment
• methods of environmental evaluation:
  • environmental impact study (EIS)
  • evaluation of organisational capacity to comply with:
    • environmental and community protection laws
    • industry and ecotourism codes of practice
  • social sustainability
  • site studies
• consultation and communication mechanisms used by organisations in the product development process:
  • features
  • nature
  • objectives and outcomes
  • scope
  • time parameters
• strategic frameworks and operational systems and procedures that support environmentally sustainable operations:
  • customers
  • equipment and supplies
  • staff
• ways of balancing ecological sustainability and the economic viability of an operation
• potential negative environmental impacts:
  • disturbance of flora and fauna
  • introduction of exotic and feral species
  • physical damage
  • pollution
  • visual impacts
  • waste issues
• laws, regulations and land management requirements and guidelines:
  • need for permits in national parks or on land under control of traditional owners
  • restrictions on operations in relevant areas.

**Assessment Conditions**

Skills must be demonstrated in a destination, location, organisation or event for which an environmentally sustainable operation can be established. This can be:

• an industry workplace
• a simulated industry environment set up for the purposes of assessment.
Assessment must ensure access to:

- current information about environmental practices:
  - legislation
  - guidelines
  - industry codes of practice
- current information and communications technology to support the research and planning process
- stakeholders with whom consultations can take place; these can be:
  - consumer representatives
  - host community
  - investors
  - government authorities
  - land management agencies
  - suppliers of environmentally-friendly products; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITXCCS002 Provide visitor information

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to access general information on facilities, products and services available in the local area and to provide this to visitors.

The unit applies to frontline service personnel working in a range of tourism, travel, hospitality, entertainment and cultural contexts. Information is often provided face-to-face, but may be by telephone or other remote mechanisms.

It applies to frontline service personnel who routinely respond to visitor requests for general local area information. They may be working independently or with guidance from others in restaurants, hotels, wineries, attractions, entertainment venues, tour operations, visitor information centres and at tour desks.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Client and Customer Service

Unit Sector

Cross-Sector

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Access and update visitor information.
   1.1. Identify and access sources of visitor information.
   1.2. Obtain general information on local facilities, products and services to meet different visitor needs.
   1.3. Share information with colleagues to support the efficiency and quality of service.
   1.4. Identify and use opportunities to update and maintain local area knowledge.

2. Provide information to visitors.
   2.1. Identify specific information and assistance needs of visitors, including those with special needs.
   2.2. Provide appropriate scope and depth of information to meet visitor needs.
   2.3. Identify and use opportunities to promote internal products and services.

3. Seek feedback on information provision.
   3.1. Proactively seek visitor feedback to ensure required information has been provided.
   3.2. Follow procedures for any formal visitor evaluation.
   3.3. Provide information on visitor feedback to relevant colleagues.

### Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

<table>
<thead>
<tr>

</tr>
<tr>
<td>Learning skills to:</td>
<td>• review own knowledge of information required to assist visitors and participate in activities that continuously update it.</td>
</tr>
</tbody>
</table>

### Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the
candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Opportunities to update and maintain local area knowledge** must include at least four of the following:

- informal discussions with colleagues and visitors
- internal newsletters and external promotional material
- local information centre
- participating in local familiarisation tours
- local media: newspaper, radio and television
- personal observation or exploration
- principal or supplier of the product or service
- staff noticeboards
- team meetings.

Assessment Requirements for SITXCCS002 Provide visitor information

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information about local area features to three different visitors on three different occasions
- provide above information and assistance in a culturally appropriate manner and according to organisational service standards
- extend personal knowledge of relevant facilities, products and services
- seek formal and informal feedback from visitors on above services.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on the available local area facilities, products and services:
  - brochures
  - library
  - local council
  - local people and local identities with specialised knowledge
  - local visitor guide booklets and maps
  - online reservation systems
  - organisation information
  - organisation-designed information systems
  - principal supplier of a product
  - product library
  - room directories
  - social media websites
  - state or territory government tourism authority information systems
  - timetables
- information on the local area features:
  - accommodation options
  - dining options
• entertainment venues
• local attractions
• local personal services facilities
• local shopping facilities
• local transport options
• organisation-specific information
• road conditions
• sporting facilities
• tours, local outings and trips
• travelling routes
• weather conditions
• organisational service procedures and standards:
  • designated response times for acknowledging customers and their enquiry
  • personal presentation and hygiene standards
• awareness of customs and practices of various social and cultural groups of visitors to assist with meeting visitor needs and expectations in regards to:
  • modes of greeting, farewelling and conversation
  • body language and body gestures
  • formality of language
  • clothing
• methods of collecting feedback:
  • formal:
    • surveys
    • interviews
    • structured questioning
  • informal:
    • observation
    • casual discussion
• organisational service procedures and standards.

Assessment Conditions

Skills must be demonstrated in an operational customer service environment in a service based industry such as tourism, travel, hospitality or events where information is sourced and provided to visitors. This can be:

• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:
- sources of information on the local area facilities, services and general products, and their availability
- organisational specifications for customer service standards
- visitor surveys and feedback forms
- visitors from different cultural backgrounds with whom the individual can interact; these can be:
  - visitors to an industry workplace during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

and external customers. within designated response times using appropriate verbal and non-verbal communication.

1.2. Observe and respond to non-verbal communication of customers.

1.3. Use active listening and questioning to facilitate effective two-way communication.

1.4. Select a medium of communication appropriate for the customer and situation.

2. Follow defined organisational standards when delivering service.

2.1. Practise high standards of personal presentation and hygiene according to organisational requirements.

2.2. Follow organisational customer service policies and procedures.

2.3. Adhere to professional standards expected of service industry personnel.

3. Provide service to customers.

3.1. Establish rapport with customer to promote goodwill and trust during service delivery.

3.2. Identify customer needs and expectations, including customers with special needs.

3.3. Promptly meet all reasonable customer needs and requests.

3.4. Identify and anticipate operational problems and take action to minimise the effect on customer satisfaction.

3.5. Recognise and act upon opportunities to deliver additional levels of service beyond customer’s immediate request.

4. Respond to customer complaints.

4.1. Proactively recognise customer dissatisfaction and take swift action to avoid escalation to a complaint.

4.2. Respond to customer complaints in a professional manner.

4.3. Identify solutions in consultation with customer.

4.4. Resolve complaints according to own level of responsibility and organisational policy.

4.5. Escalate complex service issues to higher level staff for action.

5. Provide internal feedback on customer service practices.

5.1. Provide ongoing internal feedback on service practices, policies and procedures, and suggest improvements.

5.2. Identify individual and recurring complaints and provide internal feedback to avoid future occurrence.

Assessment Requirements for SITXCCS006 Provide service to customers

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify customer requirements and provide quality customer service to three different internal and three different external customers to meet requirements
- provide service to above customers in line with organisational customer service standards and within designated organisational response times
- demonstrate procedures to respond to and resolve three different customer complaints according to organisational policies and procedures
- demonstrate effective communication with the above internal and external customers, including any with special needs
- seek formal and informal feedback from customers on above service.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- principles of quality customer service and positive communication
- appropriate non-verbal communication for customer service:
  - body language
  - culturally specific communication customs and practices
  - dress and accessories
  - gestures and mannerisms
  - use of space
  - voice tonality and volume
- methods for enhancing service delivery in response to staff and customer feedback
- specific industry sector:
  - professional service standards expected of service industry personnel
  - attitudes and attributes expected by the service industries to work with customers
  - standards of personal presentation and hygiene
  - different customer service and communication expectations, especially those with special service needs
- particular organisation:
- types of customers
  - external
  - internal
  - new
  - regular or repeat
  - visitors
- designated response times for acknowledging customers and their enquiry
- personal presentation and hygiene standards
- customer service policies and procedures, in particular those for:
  - acknowledging and greeting customers
  - complaint and dispute management
  - empowerment of different levels of personnel to resolve complaints, disputes, service issues and customer compensation
  - loyalty programs
  - presentation standards for customer environment, customer service personnel, and documents and promotional materials
  - pricing guarantees
  - product quality
  - refunds and cancellation fees
  - response times
  - service guarantees
  - training staff for customer service and complaint handling
- awareness of special needs, customs and practices of various social and cultural groups of customers in regards to:
  - modes of greeting, farewelling and conversation
  - body language and body gestures
  - formality of language
  - clothing
- methods of collecting feedback:
  - formal:
    - surveys
    - interviews
    - structured questioning
  - informal:
    - observation
    - casual discussion
- essential features, conventions and usage of different types of communication techniques and equipment.
Assessment Conditions

Skills must be demonstrated in an operational business environment where customers are served. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies, procedures and templates relating to:
  - customer service standards
  - designated response times
  - presentation standards
  - procedures for dealing with customer complaints
  - customer surveys and feedback collection
  - recording and reporting customer feedback
- internal and external customers with different cultural backgrounds and special service needs with whom the individual can interact; these can be:
  - customers in an industry workplace during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SITXCOM004 Address protocol requirements

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to source and access information on protocol requirements to fulfil any sales or operational need. It requires the ability to identify appropriate information sources, access and interpret specific details of protocol requirements, and coordinate the use of protocol.

The unit applies to many tourism, travel, hospitality and event sectors and is particularly relevant to events, function coordination, tour operations and tour guiding.

Protocol affects a broad range of business and government activity and the breadth and depth of protocol knowledge required will vary. This unit does not require in-depth knowledge of protocol requirements, but rather focuses on the ability to collect and interpret protocol information.

This unit applies to a range of people working independently or with limited guidance, including tour and event coordinators and managers, tour guides, and front of house or duty managers.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

Competency Field
Communication and Teamwork

Unit Sector
Cross-Sector
Elements and Performance Criteria

**ELEMENTS**

Elements describe the essential outcomes.

1. Source information on appropriate protocol requirements.
   1.1. Assess the need for protocol to be followed for the particular situation.
   1.2. Identify relevant sources of protocol information.
   1.3. Liaise with customers to determine appropriate protocol.
   1.4. Interpret relevant protocol information to inform work practice.

2. Coordinate the use of protocol.
   2.1. Identify specific work activities requiring a particular protocol to be observed.
   2.2. Provide protocol briefings to staff and suppliers.
   2.3. Coordinate the use of correct protocol for the delivery of product or service.

3. Update knowledge of protocol.
   3.1. Identify and use opportunities to update protocol knowledge.
   3.2. Share updated knowledge with customers and colleagues as required.

**PERFORMANCE CRITERIA**

Performance criteria describe the performance needed to demonstrate achievement of the element.

**Foundation Skills**

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

**SKILLS**

**DESCRIPTION**

Reading skills to:
- interpret unfamiliar and complex protocol information.

Writing skills to:
- compose correspondence reflecting correct protocols, when preparing correspondence to dignitaries and officials, invitations, and team briefing papers.

Oral communication skills to:
- liaise with customers, clients, their agents and personal assistants to confirm protocol requirements
- address dignitaries and officials using appropriate language.

Self-management skills to:
- take responsibility for meeting protocol requirements.

Assessment Requirements for SITXCOM004 Address protocol requirements

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:
- source accurate information on protocol requirements for at least two of the following:
  - organising an event or function, such as a meeting, reception or tour
  - organising accommodation
  - issuing marketing materials reflecting correct titles of dignitaries
  - meeting the requirements of dignitaries and officials
  - meeting the requirements of entertainers and masters of ceremony
  - integrate protocol requirements into oral and written material for each of the above
  - update and integrate knowledge of protocol when organising each of the above.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:
- main types of civic functions held in Australia
- importance and role of protocol in different business situations
- key sources of information on protocol for:
  - Australian honours system:
    - order of precedence
    - ranks and forms of address
    - wearing of honours and medals
  - involvement of Indigenous Australians and other cultural groups in business activities
  - correct use of national and state symbols:
    - flags
    - anthems
    - military salutes
  - forms of address for different dignitaries and officials, both for written correspondence and in oral communication
- sources of protocol information:
  - Aboriginal Land Councils
• Australia Day Council
• customers, clients, their agents and personal assistants
• federal, state or territory, and local government protocol departments
• internet
• libraries
• Office of the United Nations
• specific work activities impacted by protocol requirements:
  • addressing and introducing dignitaries and officials
  • correspondence to dignitaries and officials
  • issuing invitations
  • liaison with dignitaries and officials
  • preparing:
    • briefing papers
    • marketing materials
  • running sheets
• protocols for the following different situations:
  • invitations to dignitaries and officials
  • arrival procedures, for heads of state or government officials
  • introduction protocols and order of speakers
  • order of precedence for official guests
  • seating arrangements
  • dress styles
• opportunities to update protocol knowledge:
  • informal networking with colleagues
  • internet research
  • reading relevant journals.

Assessment Conditions

Skills must be demonstrated in an operational tourism, travel, hospitality or events environment. This can be:
  • an industry workplace
  • a simulated industry environment.

Assessment must ensure access to:
  • current protocol information relevant to organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Application

This unit describes the skills and knowledge required to contribute to the assessment process.

It applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role, and for whom collecting the evidence for assessment is an adjunct to principal work responsibilities. The unit applies to those involved in collecting evidence for assessment against units of competency or accredited courses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| 1. Clarify role and responsibilities in the assessment process | 1.1 Discuss and confirm the purpose of the assessment with relevant people  
1.2 Discuss and confirm benchmarks for assessment with the qualified assessor  
1.3 Access, read and clarify assessment plan with the qualified assessor  
1.4 Discuss and agree with the qualified assessor specific responsibilities in gathering evidence, and the types of evidence to be gathered |
| 2. Confirm organisational arrangements for evidence gathering | 2.1 Access and confirm relevant assessment system policies and procedures, organisational, legal and ethical requirements, and other relevant advice on assessment  
2.2 Clarify the nominated assessment tools and methods for collecting evidence with the qualified assessor, to ensure that the procedures to be followed, and the instruments to be used are clear  
2.3 Discuss and confirm with the relevant people the assessment context, including the candidate’s characteristics and any need for reasonable adjustments  
2.4 Confirm and arrange resource requirements in consultation with relevant people |
| 3. Collect evidence in accordance with the assessment plan | 3.1 Explain the assessment process to the candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to the qualified assessor, prior to undertaking assessment activities  
3.2 Use assessment instruments to gather quality evidence within the available time and resources, according to organisational, legal and ethical requirements |
| 4. Record and report findings | 4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to the assessment system’s policies and procedures  
4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment, and whether the evidence collected meets the rules of evidence  
4.3 Document areas for improvement in collecting evidence for future assessment activities |
Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- clarifying the role to be taken during the assessment
- clarifying the assessment plan with the qualified assessor, including agreement about:
  - what evidence will be collected
  - how the evidence will be collected
- carrying out a minimum of three evidence-gathering activities and, on each occasion:
  - document evidence in a clear and concise manner
  - document feedback from others involved in the assessment

reporting findings to the qualified assessor, including an explanation of how the assessment meets the rules of evidence on each of the three occasions.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment
- the principles of assessment
- the rules of evidence
- the different purposes of assessment
- the diversity of assessment contexts
- different types of evidence
- evidence-gathering methods
- the purpose and features of assessment tools, and assessment plans
- potential barriers and processes relating to evidence-gathering procedures, and assessment processes
- the organisational policies and procedures relevant to this unit of competency.

**Assessment Conditions**

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to qualified assessors for consultation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one’s own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.
Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee’s employer to meet its WHS obligations for the mentee.
Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</tr>
</tbody>
</table>
1.2 Packaging technology suitable for the goods to be packed is selected

1.3 Packaging materials are identified and matched to specifications

1.4 Work plan is followed, materials are used economically and appropriate packaging is used to minimise loss and damage in transit or storage

1.5 Work is planned in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements

1.6 Completed packed goods are stacked to minimise damage from within and outside

2 Label packaged products/loads

2.1 Workplace labelling standards are identified

2.2 Appropriate goods handling, labelling and other identification symbols are used

2.3 Invoices and picking slips are attached as required

2.4 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2011A Package goods.

Companion Volume implementation guides are found in VETNet -
Assessment Requirements for TLIA2011 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when packaging goods
- completing documentation related to work activities when packaging goods
- estimating the size, shape and special requirements of goods and loads
- implementing contingency plans when packaging goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance when packaging goods
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting instructions, procedures and labels relevant to packaging goods
- selecting and using relevant communications, computing equipment and materials when packaging goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to packaging goods
- Documentation requirements for packaging goods, such as a workplan
- Housekeeping standards and procedures
- Operational work systems, equipment, management and site operating systems for packaging goods
- Problems that may occur when packaging goods and appropriate action that can be taken to resolve these problems
- Relevant WHS/OHS and environmental protection procedures and guidelines
- Site layout and obstacles
- Workplace procedures and policies for packaging goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- A range of relevant exercises, case studies and/or other simulations
- Relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- Applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2014 Use product knowledge to complete work operations

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements and relevant regulations, as part of work activities within the transport and logistics industries.

It includes identifying products in a subsection of a warehouse or other storage area, examining quality, reporting on products, as well as using inventory and labelling systems to identify and locate products.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
A – Handling Cargo/Stock

Unit Sector
Not applicable.

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in products and services in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when handling, transporting and storing products and providing information on products and services
- completing documentation related to work activities
- estimating the size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- reading and comprehending simple statements in English
- reading, interpreting and following instructions, procedures, information and signs relevant to handling, transporting, storing products and providing information on products and services
- selecting and using relevant communications, computing and load handling equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:
• Australian codes and regulations relevant to products being identified, handled, transported, stacked and/or stored as part of work operations
• categories or groups of products and requirements for special handling, stacking and storage
• documentation requirements including reports and records concerning damaged or contaminated goods
• focus of operation of work systems, equipment, management and site operating systems for packaging goods
• housekeeping standards and procedures
• purpose and use of cataloguing and labelling systems
• site layout and obstacles
• strategies to seek out sources of product knowledge and to use this information to inform work
• types of equipment and storage areas appropriate for different categories of goods including perishable, fragile, dangerous, composition/state goods
• workplace procedures and policies for identifying, handling, stacking and storing particular categories of products.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

and stock control systems in use in the workplace

and systems are identified

1.2 Reasons for common database approach to inventory records and documentation in the warehouse are explained

1.3 Procedures for identifying and reporting discrepancies or variances are identified

2 Use re-order procedures to maintain stock levels

2.1 Stock level maintenance checking is conducted

2.2 Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures

2.3 Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures

3 Organise cyclical stock counts and report discrepancies or variances

3.1 Process for cyclical stock count is planned and work is allocated to team members

3.2 Clear directions on tasks to be performed are given

3.3 Stocktake activities are conducted in accordance with workplace procedures

3.4 Types and causes of record discrepancies are identified

3.5 Procedures for noting and correcting minor discrepancies are used

3.6 Major discrepancies are reported in accordance with workplace procedures

3.7 Workplace documentation is completed

4 Produce reports on record keeping and inventory functions

4.1 Types of reports to be produced from inventory records systems are identified

4.2 Reports are produced in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

TLIA3038 Control and order stock

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to control and order stock for a workplace store in accordance with relevant codes of practice, regulations and workplace procedures.

It specifically covers maintaining stock levels and records, organising and administering stocktakes, identifying stock losses, processing stock orders and following up orders.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

and records

1.2 Stock security systems are monitored and adjusted as required

1.3 Stock re-order cycles are maintained, monitored and adjusted as required

1.4 Colleagues are informed about their individual responsibilities for recording stock

1.5 Stock storage and movement records are maintained in accordance with workplace procedures

1.6 Stock performance is monitored and fast/slow moving items are identified and reported in accordance with workplace procedures

2 Organise and administer stocktakes

2.1 Stocktakes are organised at the appropriate time and responsibilities are allocated to staff

2.2 Accurate reports on stocktake data are produced within designated timelines

3 Identify stock losses

3.1 Losses are accurately identified, recorded and assessed against potential loss as forecast, on a regular basis

3.2 Identified losses are reported in accordance with workplace procedures

3.3 Avoidable losses are identified, reasons are established, and appropriate solutions are recommended and implemented to prevent future avoidable losses

4 Process stock orders

4.1 Orders for stock are accurately processed in accordance with workplace procedures

4.2 Stock ordering and recording systems are accurately maintained

4.3 Purchase and supply agreements are correctly used and appropriate details are recorded

4.4 Negotiated purchase and supply agreements are recorded accurately and filed for retrieval

5 Follow up orders

5.1 Delivery process is monitored to meet agreed deadlines

5.2 Appropriate liaison is undertaken with colleagues and suppliers to ensure continuity of supply
5.3 Routine supply problems are followed up or referred to the appropriate person in accordance with workplace policy

5.4 Stock is distributed in accordance with agreed allocations

6 Complete documentation

6.1 Required records and documentation are confirmed

6.2 Required records and documentation are completed clearly and proofread

6.3 Required records and documentation are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3038A Control and order stock.

TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads, in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific code, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

1.4 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation

1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load

1.6 Ancillary equipment is operated in accordance with workplace procedures and manufacturer instructions during loading and unloading operations

2 Secure and protect vehicle and load

2.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions

2.2 Load is protected in accordance with legal and workplace safety requirements

2.3 Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity

2.4 Loaded vehicle is inspected and checked for security to travel

3 Complete documentation

3.1 Documentation is completed and proofread in accordance with workplace procedures

3.2 All required cargo transportation documentation is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3014 Load and unload vehicles carrying special loads.

Links

Companion Volume Implementation Guides are found in VETNet -
Assessment Requirements for TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating and working collaboratively effectively with others when loading and unloading special loads
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and correctly using load handling equipment when loading and unloading hazardous cargo and specialised cargo including:
  - powders
  - raw grain product
  - controlled waste
- identifying and interpreting containers and goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of relevant documentation
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment and conforming to industry and work health safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) standards
- using manual handling techniques safely

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of
the requirements of the elements and performance criteria and include knowledge of:

- characteristics of special loads including:
  - powders
  - raw grain product
  - controlled waste
- containers and goods coding, IMDG Code markings and emergency information panels, including their meaning and implications for loading and unloading processes
- housekeeping standards and procedures
- methods for securing special loads
- National Load Restraint Guide (LRG)
- relevant state/territory mass and loading regulations for special loads, including current Australian Dangerous Goods (ADG) Code and Australian Code for the Transport of Explosives by Road and Rail
- risks and hazards when loading and unloading special loads, and related precautions to control the risk
- site layout considerations and obstacles to unloading operations
- WHS/OHS/OSH procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national LRG, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
Assessment Requirements for TLID0001 Load and unload vehicles carrying special loads

Date this document was generated: 3 September 2020

TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and care for livestock in transit, in accordance with relevant regulations and industry codes of practice for caring for livestock in transit.

It includes preparing to transport livestock, caring for and controlling livestock in transit, using appropriate animal husbandry techniques, and completing relevant documentation as required.

Work is performed under limited or minimum supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1 Prepare to transport livestock</td>
<td>1.1 Health condition and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace procedures</td>
</tr>
</tbody>
</table>
1.2 Vehicle is checked that it is positioned correctly on loading dock, hazards are identified and required action is taken to minimise, control or eliminate identified hazards in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and workplace procedures

1.3 Livestock crate drainage system is inspected to ensure drainage of livestock effluent from the vehicle is in accordance with regulatory requirements and workplace procedures

1.4 Livestock crate is checked for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit in accordance with regulatory requirements and workplace procedures

1.5 Poor quality livestock is identified and reported to specified person/s in accordance with workplace procedures

1.6 Feed provisions and other requirements including veterinary products for livestock, prior to and during transit, are identified and organised

1.7 Portable stockyards are assembled as required in accordance with regulatory requirements and workplace procedures

1.8 National vendor declaration is obtained and checked for accuracy in accordance with regulatory requirements

1.9 Loaded livestock is visually assessed to ensure correct density of livestock within the pen and adjustments are made as required in accordance with regulatory requirements and workplace procedures

2 Care for and control livestock in transit

2.1 Wellbeing of livestock is regularly monitored during loading, transit and unloading, and appropriate action is taken in accordance with relevant government regulations, workplace procedures, and humane and permit requirements

2.2 Relevant handling equipment is used to aid handling of livestock during loading and unloading operations, in accordance with regulations and workplace procedures

2.3 Action is taken for care and wellbeing of livestock in an
accident during transit

2.4 Distressed livestock is identified and handled in an appropriate manner in accordance with regulatory requirements and workplace procedures

3 Use animal husbandry techniques

3.1 Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in accordance with relevant government regulations, workplace procedures, and humane and permit requirements

3.2 Prescribed medication is administered to livestock in accordance with veterinary directions and workplace procedures

4 Completion of documentation

4.1 National vendor declaration transport section is completed correctly and clearly by transport operator

4.2 National vendor declaration is given to the appropriate person upon reaching destination on the declaration

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3020 Care for livestock in transit.

Assessment Requirements for TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- inspecting vehicle to ensure livestock crate drainage system is in place and is effective in control of livestock effluent
- checking livestock crate for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit
- loading livestock to ensure correct density of livestock within the pen
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) requirements and guidelines and workplace procedures
- communicating effectively and working collaboratively with others in the care of livestock in transit
- completing relevant documentation including relevant sections of National Vendor declaration
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit
Assessment Requirements for TLID0002 Care for livestock in transit

- insurance rights and requirements of clients
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- WHS/OHS/OSH requirements and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

TLID1001 Shift materials safely using manual handling methods

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
D – Load Handling

Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>

</tr>
<tr>
<td>1 Assess risks associated with</td>
<td>1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method</td>
</tr>
</tbody>
</table>
**relocating load**

1.2 Storage locations are determined and potential routes to be followed are identified

1.3 Effect of load relocation on original load base is predicted

1.4 Points of balance are estimated

1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance

1.6 Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered

1.7 Risks in potential routes are considered

1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods

1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified

1.10 Team lifting processes are considered when moving loads

1.11 Appropriate personal protective equipment is determined

1.12 Size to weight ratio of items to be manually handled are identified

**2 Plan load relocation**

2.1 Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment

2.2 Process for relocating load is proposed including predicting and planning for potential difficulties

2.3 Proposed process is checked for compliance with code of practice and workplace procedures

**3 Relocate load**

3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements

3.2 Applications appropriate for team relocation of load are identified

3.3 Team lifting tasks are coordinated

3.4 Planned process and route are followed
3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability.

3.6 Relocation is checked to see it meets work requirements and variance/s are reported.

**Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

**Unit Mapping Information**

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

**Links**

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
  - controlled actions on a movement during lifting
  - distance over which load is to be shifted
  - frequency of shifting operations
  - load on the spine during lifting
  - postures and positions during lifting
  - rotation and side movement of the spine during lifting
  - time allowed for shifting the load
  - type, weight and position of the load
  - work layout
  - site layout and obstacles
  - workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice
and operation manuals.

TLID2010 Operate a forklift

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
D – Load Handling

Unit Sector
Not applicable.
## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

### 1 Check forklift condition

1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task

1.2 Attachments are checked to ensure appropriate adjustment and operation

1.3 Mirrors and seats are adjusted for safe operation by driver

1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements

### 2 Drive forklift

2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions

2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage

2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques

2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning

2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures

### 3 Operate forklift to handle loads

3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected

3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures

### 4 Monitor site conditions

4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made

4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
5 Monitor and maintain forklift performance

5.1 Performance and efficiency of vehicle operation is monitored during use

5.2 Defective/irregular performance and malfunctions are reported to relevant personnel

5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Links

Assessment Requirements for TLID2010 Operate a forklift

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2022 Conduct weighbridge operations

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to conduct weighbridge operations in accordance with regulatory requirements and workplace procedures, within the transport and logistics industry.

It includes setting up for weighbridge operations, weighing loaded and unloaded vehicles, finalising weighbridge operations, and completing required records and documentation.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
D – Load Handling

Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
1 Set up for weighbridge operations

1.1 Weighbridge systems, including equipment, computer and recording arrangements, are checked for operational status

1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturer instructions and relevant legislation

1.3 Accurate reporting of results of inspection and testing is kept in accordance with statutory requirements, workplace procedures and industry guidelines

1.4 Hazards are identified, risks are assessed and control measures are implemented

1.5 Faults/discrepancies in weighbridge operation are identified and appropriate action is undertaken in accordance with workplace procedures

2 Weigh loaded vehicles

2.1 Vehicles likely to exceed weighbridge weight limit are turned away in accordance with workplace procedures

2.2 Vehicles are directed onto platform to obtain accurate weight

2.3 Weight of loaded stationary vehicle is registered against vehicle and load identification

2.4 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement

2.5 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

3 Weigh unloaded vehicles

3.1 Vehicles are directed onto platform to obtain accurate weight

3.2 Weight of unloaded stationary vehicle is registered against vehicle

3.3 Proposed load weight is assessed for conformance to statutory requirements

3.4 Loading operations are commenced in accordance with legal loading weight, customer requirements and workplace procedures, and vehicle is re-weighed to establish final load weight, as required

3.5 Vehicle and load information are entered into workplace recording system and invoice is issued to driver, as required
3.6 Driver signatures on weighbridge documents, invoices or receipts are obtained in accordance with statutory and workplace requirements

3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

4 Complete weighbridge operations

4.1 Weighbridge systems, including equipment, computer and recording arrangements are secured or made ready for next shift

4.2 Record of operations is maintained and filed in accordance with workplace procedures and statutory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2022A Conduct weighbridge operations.

Links

Assessment Requirements for TLID2022 Conduct weighbridge operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- identifying, selecting, and efficiently and effectively using weighbridge equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of weighbridge equipment
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems, errors or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- setting up and maintaining weighbridge equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:
- calculation method and approaches for metric and imperial systems
- classification procedures
- correct weighing procedures including statutory and workplace requirements
- emergency response procedures
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- problems that may occur when conducting weighbridge operations and appropriate action that can be taken to resolve these problems
- records and documentation requirements for weighbridge operations
- relevant regulations for conducting weighbridge operations including current Australian Dangerous Goods (ADG) Code
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout
- weights and measures regulations
- workplace procedures for conducting weighbridge operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

TLIE0002 Process workplace documentation

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:
- Minor statement changes in Assessment Conditions.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to process workplace documentation and gather data in accordance with workplace requirements. Processing documentation/data is carried out as an integral part of work operations in the context of the workplace concerned.

It includes planning and completing documentation and data gathering to fulfil an identified purpose, including legislative obligations.

Work may be performed in a team or autonomous working situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIE0002 Process workplace documentation

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) legislation and workplace procedures
- completing workplace documentation and forms
- ensuring processed information and data is checked for relevance, accuracy and completion
- operating and adapting to differences in electronic applications and systems in accordance with operating procedures
- reading, interpreting and organising information and data needed for completing and processing workplace documentation and forms
- working collaboratively with others when completing and processing workplace documentation, data and forms
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- writing and entering information and data into electronic applications and systems in a timely manner.

Knowledge Evidence

- procedures for processing workplace documentation and data using relevant workplace technology
- relevant procedures and duty of care requirements
- relevant WHS/OHS legislation, regulatory requirements and workplace responsibilities
- requirements and sources for workplace documentation, including:
  - data
  - diaries
  - forms
  - logs
• typical problems in processing workplace documentation and data and appropriate action and solutions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:
• a range of relevant exercises, case studies and/or other simulations
• relevant and appropriate materials, tools, electronic applications and systems, equipment and personal protective equipment (PPE) currently used in industry
• applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
E – Communication and Calculation

Unit Sector
Not applicable.

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.
1 **Estimate loads for transport or storage**

1.1 Order forms/work orders are read and requirements are noted

1.2 Shape, balance characteristics, dimensions and mass of load/s are identified

1.3 Area/volume required for storage is estimated

1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system

2 **Estimate load limits of transport and/or storage**

2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures

2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated

3 **Organise load**

3.1 Load/s is restricted to allowable range

3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems

3.3 Appropriate workplace documentation is completed

**Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

**Unit Mapping Information**

This unit replaces and is equivalent to TLIE3002A Estimate/calculate mass, area and quantify dimensions.

Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Date this document was generated: 3 September 2020

• workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

TLIE3004 Prepare workplace documents

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>

</thead>
<tbody>
<tr>
<td>Plan workplace</td>
<td>Purpose and audience for document are identified</td>
</tr>
</tbody>
</table>
document

1.2 Appropriate format for document is established to meet workplace requirements

1.3 Relevant information is identified and selected for inclusion in document

2 Prepare workplace document

2.1 Document is drafted in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary appropriate for reader/s

2.2 Document is edited and presented in a final version appropriate to task

3 Complete workplace forms

3.1 Work related form/s is interpreted to identify information required for its completion

3.2 Required information for completion of form is gathered from relevant sources in accordance with workplace procedures

3.3 Form/s is completed in accordance with workplace policy and procedures, and applicable regulations and codes

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3004A Prepare workplace documents.

TLIF2010 Apply fatigue management strategies

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry. Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
F – Safety Management

Unit Sector
Not applicable.

<tr>
<td>1 Identify and act on signs of fatigue</td>
<td>1.1 Potential causes of fatigue are identified and action is taken to minimise their effects in accordance with company procedures</td>
</tr>
</tbody>
</table>
1.2 Personal warning signs of fatigue are recognised and necessary steps are taken in accordance with workplace procedures, to ensure that effective work capability and alertness are maintained.

2 Implement strategies to minimise fatigue

2.1 Workplace procedures are assessed to minimise fatigue

2.2 Factors that increase the risk of fatigue-related accidents and incidents are minimised

2.3 Fatigue management strategies are implemented in accordance with workplace policy

2.4 Lifestyle choices are made that promote the effective long-term management of fatigue

2.5 Effective practices in combating fatigue are adopted and applied

2.6 Personal fatigue management strategies are communicated to relevant people

2.7 Appropriate counter measures are planned to combat fatigue

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

Assessment Requirements for TLIF2010 Apply fatigue management strategies

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required action to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate action in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance
Assessment Requirements for TLIF2010 Apply fatigue management strategies

- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIG2007 Work in a socially diverse environment

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to apply cultural awareness, communication principles and problem-solving techniques to facilitate working in a socially diverse environment. This is done in accordance with workplace procedures, relevant anti-discrimination and equal employment opportunity regulations.

It includes communicating with customers and colleagues from diverse backgrounds and dealing with cross-cultural misunderstandings.

Work is performed with limited or minimum supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
G – Teamwork

</table>
and colleagues from diverse backgrounds are valued and treated with respect and sensitivity

1.2 Cultural differences are accommodated in verbal and non-verbal communication

1.3 Where language barriers exist, efforts are made to communicate through use of gestures or simple words in the other person’s language

1.4 Assistance from colleagues, reference books or outside organisations is obtained as required

2 Deal with cross-cultural misunderstandings

2.1 Issues that may cause conflict or misunderstanding in the workplace are identified

2.2 Difficulties are addressed with the appropriate people and assistance is sought from team leader/supervisor as required

2.3 When difficulties or misunderstandings occur, possible cultural differences are considered

2.4 Efforts are made to resolve misunderstandings, taking account of cultural considerations

2.5 Issues and problems are referred to the appropriate team leader/supervisor for follow-up

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLG2007 Work in a socially diverse environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- communicating and working effectively with others when working in a socially diverse environment
- completing documentation related to working in a socially diverse environment
- reading, interpreting and applying instructions, legislation, procedures, information and signs relevant to working in a socially diverse environment
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic awareness of the culture of Australia’s indigenous and non-indigenous peoples
- cultural awareness
- principles of equal employment opportunity (EEO) and anti-discrimination legislation as they apply to individual employees
- principles that underpin cultural awareness
- recognition of the different cultural groups in Australian society
- recognition of various international customer groups (appropriate to the sector and individual workplace)
- typical cross-cultural misunderstandings and problems that can occur in the workplace, and appropriate ways of dealing with them.
Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to interpret road maps and to navigate routes as part of transport operations. It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements.

Work is performed under general or limited supervision. It involves the application of map reading principles and procedures when interpreting street directories and road maps, and following pre-determined routes.

Work must be carried out in accordance with relevant state/territory roads and traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
H – Route Planning and Navigation

Unit Sector
Not applicable.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

### 1 Identify and determine pre-planned route

1.1 Pre-determined route documentation is accessed and interpreted

1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed

1.3 Street directory, GPS and road map symbols are recognised and interpreted

1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate map

1.5 Pre-determined route directions are interpreted and route is traced using a street directory, GPS and road map

1.6 Key intersections and other landmarks along route are identified for use in following planned route

1.7 Alternative contingency routes are identified for emergencies or traffic delays

1.8 Pre-determined route is correctly followed

### 2 Complete necessary documentation

2.1 Required route documentation is completed in accordance with purpose of transportation and workplace requirements

2.2 Required route documentation is filed in accordance with workplace requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions
Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information
This unit replaces and is equivalent to TLIH2001A Interpret road maps and navigate pre-determined routes.

Links

Assessment Requirements for TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing documentation related to route navigation
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment in accordance with workplace protocols
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job role
- reading and interpreting relevant instructions, procedures, information and signs
- using global positioning system (GPS) devices to navigate pre-determined routes as required
- using maps and other route documentation to correctly identify and interpret:
  - map symbols
  - roads and intersections
  - town and suburb locations
- working collaboratively with others as required (such as fleet managers, sales team)
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on a particular route
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations/rest stops as required
- operational procedures for interpreting road maps, using GPS devices and navigating routes
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards and issues
- traffic conditions at various times of the day/night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate action that should be taken
- workplace requirements for recording and documenting route information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIH3002 Plan and navigate routes

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to plan and navigate routes as part of transport operations, in accordance with relevant state/territory roads and traffic authority regulations.

It includes interpreting information from a road map, street directory or global positioning system (GPS) device; planning the most appropriate route taking into account pertinent factors; and completing required trip documentation in accordance with operational requirements.

This unit relates to the work of transport and distribution personnel involved in passenger services and/or the delivery of a range of possible goods and materials including valuables, secured products documents and materials.

Work is performed under general or limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
H – Route Planning and Navigation

Unit Sector
Not applicable.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

### 1 Interpret street maps

1.1 Symbols in a street directory/road map/GPS are recognised and interpreted

1.2 Places are identified in a directory index and information is used to locate places on appropriate map

### 2 Plan routes

2.1 Given a location and a destination, the most direct and alternative routes between two points are identified using a street directory/road map/GPS

2.2 Hazards are identified, risks are assessed and control measures are implemented

2.3 Information on height, width and load limits of road infrastructure and other restrictions on thoroughfares is accessed, interpreted and taken into account when planning a route for a journey, as required

2.4 Suitable route is selected to ensure the most efficient, safe, secure and legal transport operation, taking into account relevant criteria for transport operation concerned

### 3 Follow planned route

3.1 Planned route is correctly followed with aid of a street directory, road map and/or GPS system

3.2 Geographic regions, tourism features and other places of interest are identified, as required

3.3 Route documentation is completed in accordance with purpose of transportation and workplace requirements

3.4 Parking procedures are observed in accordance with enterprise procedures and relevant legislative requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH3002A Plan and navigate routes.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLIH3002 Plan and navigate routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and interpreting required information and developing contingency routes (including road restrictions, traffic conditions, service stations/rest stops)
- adapting to changes and difference in vehicle navigation technology, maps and street directories as they relate to route planning
- adapting to changes in vehicle navigation technology, maps and street directories as they relate to route planning
- applying fatigue management techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- implementing contingency arrangements
- interpreting and following operational instructions and prioritising work
- interpreting information to allow effective route planning
- modifying route planning activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in vehicles, loads and equipment in accordance with standard operating procedures
- planning alternative routes for contingencies such as road works, emergencies or delays
- planning and navigating a route effectively
- planning for transport routes to meet workplace requirements
- planning routes in accordance with workplace guidelines
- reading and interpreting relevant instructions, procedures, information and signs:
  - estimating route distances using map information
  - identifying roads and intersections
  - identifying town and suburb locations
  - reading and interpretation of map symbols
  - reporting and/or rectifying identified problems promptly, in accordance with workplace procedures
- selecting and using relevant route planning and navigation technology including GPS devices.

### Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic GPS operation
- current information about accidents or emergencies that might close or restrict traffic on particular routes
- features and contents of maps and street directories, and techniques for their use in transport navigation
- known traffic conditions at various times of the day along specific routes
- location of service stations and rest stops
- operational procedures for planning and navigating transport routes
- physical hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards on long routes
- workplace requirements for recording and documenting route information.

### Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy
requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIK2010 Use information technology devices in the workplace

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use information technology devices in the workplace in accordance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures, within the transport and logistics industry.

It includes identifying information technology equipment and systems; setting up, using and shutting down computer-based equipment and systems; and inputting, storing and presenting files/data. It also involves implementing workplace procedures for managing and securing data.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

K – Technology

Unit Sector

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
1 Identify infotechnology systems

1.1 Types of infotechnology equipment used in the work area are identified

1.2 Functions of equipment, component parts and accessories are identified

1.3 Applications for workplace activities of different infotechnology equipment and systems are interpreted

1.4 Routine faults in operating systems, software applications and operator errors are identified

1.5 Sources of information on rectifying/reporting faults with operating equipment, systems and application are identified

2 Access and operate computer-based equipment and systems

2.1 Work environments and equipment are adjusted to meet ergonomic requirements and workplace policies and procedures

2.2 Systems are accessed and checked, as required, for viruses

2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturer guidelines

2.4 Infotechnology equipment and software operating manuals and/or help screens are used to inform work practices

2.5 Required application software packages and accessories are selected and accessed

2.6 Required file and/or data to be accessed is identified

2.7 Files/data are filed in accordance with workplace procedures

2.8 Shut-down procedures for files, applications and equipment are followed

3 Input, store and present files/data

3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader, touch screen or other system

3.2 Accurate input is confirmed

3.3 Files are accessed in accordance with workplace
3.4 Data is manipulated to suit work requirements and is checked for accuracy

3.5 Saved files are accessed through relevant directories

3.6 Information and disk/s are stored, as required

3.7 Information is presented using computerised projection facilities as required

4 Implement workplace procedures for managing and securing data

4.1 Security procedures are followed in accordance with workplace procedures

4.2 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Foundation Skills
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information
This unit replaces and is equivalent to TLK2010A Use infotechnology devices in the workplace.

Links
Companion Volume Implementation Guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and/or completing electronic documentation through the use of infotechnology devices in the workplace
- adapting to differences in software and hardware equipment in accordance with operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices in the workplace
- applying relevant legislation and workplace procedures
- identifying and using computer equipment, software, processes and procedures required within the job context
- identifying fault-finding procedures
- implementing contingency plans when using infotechnology devices in the workplace including using security and backup software and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- operating infotechnology devices used within the workplace in accordance with operational requirements
- reading and interpreting instructions, procedures, information, operational instructions and manuals relevant to using infotechnology devices in the workplace
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of
the requirements of the elements and performance criteria and include knowledge of:

- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines for using computer equipment in the workplace
- typical problems that can occur when using infotechnology devices and computer applications in the workplace and related appropriate action that can be taken to prevent or solve these problems
- WHS/OHS risks and hazards when using computer equipment for work tasks, and ways of controlling these risks/hazards
- workplace procedures for using computer equipment and application software appropriate for work role.

**Assessment Conditions**

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIL5019 Implement and monitor transport logistics

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to implement and monitor transport logistics in accordance with relevant regulatory requirements, standards and codes of practice, including the Australian Dangerous Goods (ADG) Code and workplace procedures.
It includes mobilising resources, coordinating multi-modal transport activities, monitoring consignment/s and implementing a contingency management strategy.
Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.
The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.
No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
L – Resource Management

Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
1 Mobilise resources

1.1 Optimal resource level is acquired to meet operational schedule requirements

1.2 Relevant regulatory and insurance requirements are determined and implemented

1.3 Allocated resources are assessed and monitored to ensure operational effectiveness and efficiency

1.4 Changes to resource allocation are undertaken where deficiencies or over-supply are apparent, in accordance with enterprise procedures

2 Coordinate multi-modal transport activities

2.1 Facilities, personnel and equipment are made ready to accommodate interchange functions

2.2 Security arrangements are invoked as required

2.3 Loading and unloading operations are conducted in accordance with operational schedule and applicable statutory requirements, codes of practice and enterprise procedures

2.4 Relevant documentation is completed/updated in accordance with operational schedule and reporting requirements

3 Monitor consignment tracking

3.1 Consignment tracking systems are monitored against workplace quality standards

3.2 Variations from workplace quality standards are identified and appropriate action is initiated to rectify identified problems or to institute required improvements

4 Implement contingency management strategy

4.1 Operational schedule is continually reviewed in taking into account information updates, reports and feedback

4.2 Nature, extent and impact of issues or incidents are identified and assessed against contingency management strategy

4.3 Relevant information is processed to establish priorities and responses for dealing with issues or incidents

4.4 Operations are redirected and controlled to meet changes in transport environment and tasks, in accordance with enterprise procedures

4.5 Liaison is initiated and maintained with organisations/individuals affected by changed operational schedules
4.6 Actions undertaken are clearly documented and filed

Foundation Skills
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information
This unit replaces and is equivalent to TLIL5019A Implement and monitor transport logistics.

Links

Assessment Requirements for TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and monitoring transport logistics
- completing documentation related to implementing and monitoring transport logistics
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communication equipment to required protocol
- prioritising work and coordinating self and others in relation to transport logistics activities
- providing leadership and working collaboratively with others
- reading and interpreting transport schedules, regulatory requirements, customer instructions, workplace procedures and manuals relevant to implementing and monitoring transport logistics
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and applying appropriate application of technology, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant Australian standards and associated certification requirements
- business policies, procedures and plans including procedures for outsourcing components of operations and engaging additional resources
- code, regulatory, permit and licence requirements relevant to transport logistics
- operational transport logistics systems, resources, management and workplace operating systems
- problems that may occur when implementing and monitoring transport logistics and action that can be taken to resolve or report these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and regulations
- relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to transport logistics
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- risks and hazards related to implementing and monitoring transport logistics and ways of controlling the risks involved
- transport and equipment applications, capacities, configurations, safety hazards and control mechanisms
- workplace policies and procedures, including those covering issue resolution and grievance
- workplace procedures for implementing and monitoring transport logistics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Pre-requisite Unit

</tbody>
</table>

1 Plan work/task

1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and site inspection is conducted in accordance with workplace procedures

1.2 Work area operating surface is assessed to determine suitability for operational use of forklift truck in accordance with workplace procedures

1.3 Suitability of forklift truck and attachment working load limit (WLL) is determined for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures

1.4 Working area is inspected and appropriate paths for operating the forklift truck and moving and placing load/s in work area are assessed and managed in accordance with workplace procedures

1.5 Hazard and risk control measures are identified and reported to relevant person/s in accordance with workplace procedures

1.6 Traffic management plan implementation is confirmed in accordance with workplace procedures

1.7 Appropriate communication procedures are identified with relevant people in accordance with workplace procedures

1.8 All work is confirmed to ensure coverage of work/task requirements for the relevant work area is in accordance with workplace procedures
2 Prepare for work/task

2.1 Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures

2.2 Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures

2.3 Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures

2.4 Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures

2.5 Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures

2.6 Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements

2.7 Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures

2.8 Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures

2.9 Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures

3 Perform work/task

3.1 Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures

3.2 Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures
3.3 Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures

3.4 Unplanned and unsafe situations are responded to in accordance with safe work procedures

3.5 Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures

3.6 Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures

4 Pack Up

4.1 Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures

4.2 Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2001 Licence to operate a forklift truck

Links

Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
  - maintaining safe operating speed
  - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
  - battery charge as required by manufacturer requirements
  - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
  - checking for signs of paint separation and stressed welds indicating potential structural weakness
  - document evidence of damage
  - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
  - ensuring availability of correct forklift truck logbook and updating records as required
  - ensuring forklift truck tynes or other attachment/s are securely fitted
  - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
  - fluid leaks
  - lights are working effectively
  - safety equipment checks
  - signage and labels to ensure they are visible and legible
  - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
  - insufficient lighting
  - other specific hazards including dangerous goods
  - overhead hazards and fixed structures, roof beams and doorways
  - restricted and poorly ventilated areas
• surface suitability based on forklift truck and task requirements
• the risk of collision with people, moving plant and fixed structures
• weather conditions
• complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
• conducting operational checks, which must ensure:
  • all controls are located, identified and tested for functionality
  • all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
  • hazard warning systems (e.g. reversing beepers, lights and horns) are functional
  • recording and maintaining accurate information relating to forklift truck operations
  • safety devices as fitted
  • start-up is in accordance with manufacturer requirements
  • steering, transmission and brake functions comply with operating requirements
  • there are no unusual noises
• confirming and following traffic management plan procedures relevant to their role in the work area
• conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
• determining relevant lifting attachment to perform work/task
• determining lift requirements including:
  • positioning of unusually balanced/shaped loads
  • centre of gravity
  • dynamic nature of load
  • tyne/attachment positioning
  • weight
• ensuring risk control measures within the work area are effective as per workplace procedures
• identifying, isolating and tagging out defective equipment and reporting to authorised person/s
• interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
• interpreting workplace procedures in relation to various environmental conditions
• maintaining communication with other workplace personnel through using worksite procedures including:
  • audible and visual warning devices
  • signage
  • two-way radio
  • verbal instructions
  • written instructions
• maintaining three points of contact whilst accessing and egressing forklift truck and ensuring
rungs / steps are free of hazards
- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
  - aligning tynes/attachment to load
  - carrying out a lift to 75% of the maximum height
  - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
  - correctly using horns and mirrors in workplace
  - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
- driving applicable to conditions and moving loads safely
- driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
  - an 'S' bend with a minimum 90 degrees left and right turn
  - ensuring load/s remains stable through pick up, transport and placement
  - forklift truck speed is appropriate to load and surroundings
  - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
  - tilting mast (or forks if applicable) to ensure balance of load
  - using gluts/dunnage appropriately and lowering load safely
  - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
- reporting to relevant person/s on site risk control measures that are not in place or are deficient
- setting up an exclusion zone
- securely parking forklift truck and isolating in appropriate position including:
  - minimising possible access by unauthorised person/s
  - tynes/attachment lowered to required position in accordance with manufacturer requirements
  - park brake applied
  - switching off, isolating fuel/power source and removing key according to workplace procedures
- shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:
• Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
• communication procedures including:
  • audible and visual warning devices
  • hand signals
  • questioning techniques
  • signage
  • traffic warning systems
  • two-way radio
  • written instructions
• forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
• impact of the following on the operation of the forklift truck including:
  • failure/loss of control including brakes and steering
  • failure of equipment during forklift truck operations
  • forklift truck instability causes including:
    • deterioration of ground condition
    • overloading
    • pick up and placement of load
    • irregular loads
  • operating on ramps and uneven surfaces and in restricted spaces
• use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
  • labels on the actual load
  • markings on the actual load
  • paperwork such as consignment notes, running sheets and weighbridge dockets
  • weighing a carton and calculating load
• manufacturer requirements, instructions and operator's manual
• problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
  • wind
  • lightning
  • water/ice impacted surface/ground
  • rain
  • extreme heat
  • Ultra violet (UV) exposure
• problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
  • lock out and tag out procedures
• relevant procedures for refuelling and recharging forklift truck using appropriate PPE
including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling
- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
  - bale clamps
  - carpet spike for carpet rolls
  - drum carrier
  - jib attachment
  - paper roll clamps
  - personnel work platforms
  - rotators
  - slippers/fork extensions on tynes
- suitability and lifting capability of the attachment to be used
- shut down procedures for a forklift truck in accordance with manufacturer requirements
- traffic management plan procedures and requirements
- typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
- workplace procedures including work plan which may be verbal, documented/written, or electronically generated
- work area operating surface suitability including issues with:
  - backfilled ground
  - bitumen (damaged, cracked)
  - concrete (damaged, cracked)
  - hard compacted soil
  - potholes
  - railway tracks
  - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
  - soft soils
  - trench covers

Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety
and Health (OSH) requirements, safe work and workplace procedures

**Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
  - approved codes of practice and relevant guidance material
  - relevant Australian technical standards
  - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

Companion Volume Implementation Guide -
TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to safely operate a boom-type Elevating Work Platform (EWP) where the length of the boom is 11 metres or more in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a Risk Work Licence (HRWL) to operate this plant.

Boom-type elevating work platform means a telescoping device, hinged device, or articulated device, or any combination of these, used to support a platform on which personnel, equipment and materials may be elevated.

A person performing this work is required to hold a boom-type elevating work platform HRWL.

This unit requires a person operating an EWP to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licensing class as detailed in this unit.

1 Plan work/task

1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and a site inspection is completed in accordance with workplace procedures

1.2 Work area ground/operating surface is assessed to determine suitability for operational use of EWP in accordance with manufacturer requirements and workplace procedures

1.3 EWP capabilities are established for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures

1.4 Appropriate paths for operating the EWP and moving in work area are assessed and determined in accordance with workplace procedures

1.5 Relevant hazard and risk control measures are applied and advised to relevant person/s in accordance with workplace procedures
1.6 Traffic management plan implementation is confirmed in accordance with workplace procedures

1.7 Appropriate communication procedures are identified, with relevant people in accordance with workplace procedures

1.8 All work is confirmed to ensure coverage of work/task requirements for the relevant work area in accordance with workplace procedures

2 Prepare for work/task

2.1 Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with workplace procedures

2.2 Risk control measures for hazards identified are checked for implementation in accordance with workplace procedures

2.3 Safety equipment including Personal Protective Equipment (PPE) are inspected, fitted correctly and used in accordance with manufacturer requirements and safe work procedures

2.4 EWP is accessed in a safe manner in accordance with manufacturer requirements and safe work procedures

2.5 Pre-start EWP checks are carried out in accordance with manufacturers requirements and safe work procedures

2.6 EWP is started and is checked for any abnormal noises in accordance safe work procedures

2.7 EWP is positioned correctly as per work plan in work area in accordance with relevant manufacturer requirements and safe work procedures

2.8 EWP is stabilised appropriately in accordance with the workplan, relevant manufacturer requirements and safe work procedures
2.9 Operational checks from base controls are carried out in accordance with relevant manufacturer requirements and safe work procedures

2.10 All platform controls are located, identified and tested in accordance with manufacturer requirements and safe work procedures

2.11 All damage and defects are reported and appropriate action is taken to rectify in accordance with manufacturer requirements and safe work procedures

2.12 EWP logbook is inspected and is correct for the EWP, is completed and signed in accordance with manufacturer requirements and safe work procedures

2.13 Weather and work environmental conditions are assessed to determine any impact on EWP operation and positioning as per workplan in accordance with manufacturer requirements and safe work procedures

3 Perform work/task

3.1 Relevant hazard prevention/control measures identified are checked for implementation in accordance with safe work procedures

3.2 EWP is safely located at point of work in work area in accordance with safe work procedures

3.3 EWP platform is positioned for work tasks and stability and all operations are monitored constantly in accordance with safe work procedures

3.4 Work gear and tools are stowed and secured in accordance with safe work procedures

3.5 EWP is operated using all movements in accordance with safe work procedures and manufacturer requirements

3.6 Unplanned and unsafe situations are responded to in accordance with safe work procedures
3.7 All communication signals are correctly interpreted and followed whilst EWP is operated in accordance with safe work procedures

3.8 EWP platform is accessed and egressed in accordance with safe work procedures and manufacturer requirements

3.9 EWP is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures

4 Pack up

4.1 Post-operational EWP checks are carried out in accordance with manufacturer requirements and safe work procedures

4.2 EWP boom is retracted, lowered, stowed and secured in accordance with manufacturer requirements and safe work procedures

4.3 Safety equipment and PPE is disconnected from platform in accordance with safe work procedures

4.4 Relevant motion locks and brakes are applied as required in accordance with manufacturer requirements and safe work procedures

4.5 Outriggers and/or stabilisers, plates or packing if fitted are stowed and secured in accordance and with manufacturer requirements and safe work procedures

4.6 EWP is shut down in accordance with manufacturer requirements and safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions may be found in the Companion Volume Implementation Guide.

**Unit Mapping Information**

This unit replaces and is equivalent to TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Companion Volume Implementation Guide -
Assessment Requirements for TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:
- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- advising relevant person/s on site in relation to any hazards and risk elimination/control strategies
- applying safe operating procedures for an Elevating Work Platform (EWP) including all functions within the safe working rated capacity including:
  - boom/s as low as possible and fully retracted whilst travelling (self propelled EWP only)
  - boom/s in line with EWP where practical whilst travelling (self propelled EWP only)
  - EWP stability
  - gently accelerating and braking to minimise boom/s swing (self propelled EWP only)
  - maintaining safe operating speed in relation to the work condition
  - travelling with work platform raised to an appropriate height for the terrain and visibility in relation to direction of travel (self propelled EWP only and in accordance with manufacturers specifications)
- applying emergency procedures
- applying traffic management plan procedures relevant to their role in the work area
- carrying out operational checks on EWP including:
  - testing of all EWP safety devices
  - all controls are located, identified and tested for functionality from the base controls and platform controls
  - hazard warning systems including travel beepers and lights are functional
  - start-up is in accordance with manufacturer requirements
  - steering, transmission and brake functions comply with operating requirements (self
propelled EWP only)

- there are no unusual noises
- carrying out pre-start checks, including visual inspection which must include:
  - battery fluid level as required by manufacturer requirements
  - checking compliance plate is relevant to the load/s being used on the EWP
  - engine / mechanical fluid level checks as required by manufacturer requirements
  - ensuring availability of correct logbook and updating records as required
  - ensuring EWP platform and attachment/s fitted in platform are secured
  - evidence of damage
  - fluid leaks
  - lights are working effectively (where fitted)
  - safety equipment checks
  - signage and labels to ensure they are visible and legible
  - structural weaknesses including paint separation or stressed welds
  - wheels and tyres for damage/correct inflation if applicable
- checking compliance plate and load chart for reach requirements and load suitability
- clarifying workplan and checking understanding
- complying with Commonwealth, State and/or Territory work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) legislation and regulations
- controlling and operating a boom type elevating work platform ensuring movements and control functions are safe, smooth and comply with operating requirements including:
  - any combination of the movement of the extending boom used to support a platform on which personnel, equipment and materials are elevated to perform the work task/s
  - avoidance of ground depressions
  - correctly using observer guidance of work platform, main chassis and extending boom
  - demonstrating the safe operation of an EWP in forward and reverse, while maintaining visibility (where applicable)
  - driving (where applicable) applicable to conditions and moving platform and load/s safely
  - ensuring warning devices are functioning correctly
  - interpreting directional arrows correctly on platform controls during forward, reverse, left and right
  - lowering boom to its resting position
  - monitoring platform, main chassis and extending boom movement constantly ensuring safe work procedures are followed
  - raising platform and slewing within manufacturer requirements
  - raising platform to its full extent or 75% of the maximum height capacity (whichever is greater)
  - stability of the EWP and the work platform
  - manoeuvring and positioning the platform to perform work task/s safely whilst at its full extent or a minimum height of 75% of the maximum capacity (whichever is greater)
• conducting and applying hazard identification and risk elimination or minimisation strategies including:
  • barricades and controls to prevent the risk of collision with people, moving vehicles and fixed structures
  • environmental conditions including:
    • wind
    • lightning
    • water impacted ground
    • rain
    • extreme heat
    • Ultra Violet (UV) exposure
  • ground conditions (surface and slopes) and assessing work area operating surface suitability based on machine and task requirements
  • overhead hazards including electric lines and service pipes
  • personal protective equipment (PPE)
  • restricted areas and crush points from work platform and external surroundings
  • safety related tags on electrical switches/isolators that have an impact on point of work of EWP operator
  • sufficient lighting
  • suitable area for set-up, positioning and safely operating EWP
  • suitable firm and stable operating surface
  • use of safety observer
• entering work platform correctly including:
  • lowering platform safely and stably to appropriate height to access safely
  • clipping on of fall restraint/arrest device
  • accessing platform safely
• exiting work platform correctly including:
  • lowering platform safely and stably to appropriate height to egress safely
  • unclipping of fall restraint/arrest device
  • exiting platform safely
• identifying, isolating and tagging out defective equipment and reporting to authorised person/s
• inspecting and using relevant safety equipment, including:
  • anchor point/s
  • emergency retrieval system from base controls and platform controls where fitted
  • energy absorber/s
  • lanyard/s
  • safety harness/es
• interpreting and confirming relevant documentation, workplace instructions, safety information and emergency procedures for the work task and relevant area
• interpreting workplace procedures in relation to various work environmental conditions
• maintaining communication with other workplace personnel using appropriate workplace procedures including procedures to ensure all movements are conveyed clearly and succinctly including:
  • 2-way radio
  • audible and visual warning devices
  • making and interpreting hand signals
  • questioning to confirm understanding
  • signage
  • written instructions
• recording and maintaining accurate information relating to EWP operations
• reporting to relevant person/s on site risk control measures that are not in place or deficient
• stabilising procedures for an EWP including:
  • checking levels
  • removing obstacles and obstructions
  • deploying and retracting outriggers (if fitted)
  • establishing correct size plates for packing (if required)
• shutting down a boom type EWP in accordance with manufacturer requirements and workplace procedures
• using and interpreting EWP manufacturer requirements and data, including compliance plate and load chart, to enable correct EWP selection for task including:
  • boom
  • platform
  • weight including outrigger load or wheel load.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

• Australian and industry standards, codes of practice and guidelines to safely operate an EWP (boom length 11 metres or more) including:
  • nominal reach, measured horizontally from centre point of rotation to outer edge of platform in its most extended position
  • vertical distance from floor of platform to surface supporting elevating work platform with platform at its maximum height
• appropriate mathematical calculations to estimate loads ensuring EWP is not overloaded
• appropriate workplace communication procedures including:
  • 2-way radio
  • audible and visual warning devices
  • questioning techniques
  • signage
  • hand signals
• traffic warning systems
• written instructions
• compliance with permit condition requirements including:
  • from electrical supply authority
  • if operating on roads or footpaths
• EWP characteristics and capabilities, manufacturer requirements and instructions
• hazards including:
  • all ground and/or operating surface hazards
  • traffic including pedestrians, vehicles, other mobile plant and building structures
  • overhead hazards including electric lines, service pipes, doorways, roof beams, and lights
  • obstacles or obstructions
  • insufficient lighting
  • other relevant hazards
• identification and avoidance of person/s potential crush or entrapment points
• identification and avoidance of potential contact with overhead electrical conductor’s
• identification and avoidance of potential contact with structures near work platform/boom or chassis
• impact of the following on the operation of the EWP including:
  • failure/loss of control including brakes and steering
  • failure of equipment including hydraulic system
  • EWP and platform instability due to:
    • deterioration of ground/operating surface condition
    • gradient of operating surface
    • overloading
    • poor load placement
    • irregular loads
  • emergency procedures and safety equipment, including the use of:
    • safety harness/es
    • energy absorbers
    • lanyard/s
    • anchor point/s
    • emergency retrieval systems
• lock out and tag out procedures
• problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions
• procedures for recording, reporting and maintaining workplace records and information
• relevant manufacturer requirements and instructions
• relevant procedures for refuelling/recharging EWP using appropriate PPE
• risk assessment process including hierarchy of control:
  • elimination
• substitution
• isolation
• engineering controls
• administrative controls
• personal protective equipment (PPE)
• problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations
• procedures for shutting down a boom type EWP in accordance with manufacturer requirements
• relevant documentation requirements
• suitability and lifting capability of the EWP to be used
• traffic management plan procedures and requirements
• typical routine problems encountered operating a EWP and adjustments required for correction
• wind speed factors that affect stability of EWP as per manufacturer requirements
• work area operating surface suitability including issues with:
  • backfilled ground
  • bitumen (damaged, cracked)
  • concrete (damaged, cracked)
  • hard compacted soil
  • potholes
  • railway tracks
  • rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
  • soft soils
  • trench covers
• work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and codes of practice requirements for boom type elevating work platforms
• work plan which may be verbal, documented/written, or electronically generated

**Assessment Conditions**

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace
Assessment Requirements for TILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Date this document was generated: 3 September 2020

Resources for assessment must include access to:

- Simulators must not be used in the assessment of this unit of competency
- appropriate boom-type elevating work platform (boom length 11 metres or more) in a safe/serviceable condition in accordance with manufacturer requirements
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
  - approved codes of practice and relevant guidance material
  - relevant Australian technical standards
  - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable).

Companion Volume Implementation Guide -
TLILIC2001 Licence to operate a forklift truck

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit specifies the skills and knowledge required to operate a forklift truck safely.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck high risk work (HRW) licence.

This unit requires a person operating a forklift truck to plan the work, conduct routine checks on a forklift truck, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information
This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit
Not applicable.

Competency Field
LIC – Licensing
Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1 Plan work

1.1 Potential workplace hazards are identified

1.2 Risk control measures are identified consistent with regulatory requirements and the hierarchy of control

1.3 Appropriate forklift truck is selected in accordance with load and workplace conditions

1.4 Working area is inspected to determine appropriate paths for moving loads and forklift truck in accordance with workplace conditions

1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures

2 Conduct routine checks

2.1 Prior to operation, forklift truck is visually checked for any damage or defects

2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard

2.3 All controls are located, identified and confirmed

2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures

2.5 Forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise

2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
2.7 All forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures.

2.8 Issues, defects and damage identified during routine checks are reported and recorded in accordance with workplace procedures, and appropriate action is taken.

3 **Shift load**

3.1 Weight of load is assessed to ensure compliance with forklift truck data plate specifications.

3.2 Appropriate hazard prevention/control measures are implemented and communicated to personnel in the work area.

3.3 Forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures.

3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards.

3.5 Load movement is monitored constantly to ensure safety of personnel and load, and structural stability.

3.6 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans.

4 **Shut down and secure forklift truck**

4.1 Forklift truck is parked to avoid hazards.

4.2 Forklift truck is shut down in accordance with manufacturer specifications and workplace procedures.

4.3 Routine post-operational forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures.

4.4 Forklift truck is secured to prevent unauthorised access/use.

4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken.
Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Performance feature</th>
</tr>
</thead>
</table>
| Employment skills to:         | • operate a forklift truck in different types of workplaces transferring key principles of safe operation to different contexts  
                                 | • improve own performance in safely and efficiently operating a forklift truck by incorporating learnings from different workplaces and different conditions into current performance |
| Numeracy skills to:           | • interpret numerical information including:                                        |
|                               |   • selecting appropriate forklift in accordance with load and workplace conditions   |
|                               |   • load weight assessment, to ensure compliance with forklift truck data plate specifications |
|                               |   • controlling and monitoring instrument readings                                    |
| Language skills to:           | • use and interpret vocabulary specific to forklift truck operations and workplace procedures to communicate with other workplace personnel |
|                               | • use non-verbal feedback to support effective communication                          |
|                               | • use relevant communications conventions                                             |
| Literacy (reading) skills to: | • interpret documentation that includes technical specificity including:              |
|                               |   • forklift truck data plate                                                         |
|                               |   • plant operation manuals and manufacturer specifications                           |
|                               |   • workplace procedures, including emergency plan                                    |
|                               |   • workplace signage and labels                                                      |
| Literacy (writing) skills to: | • accurately record and maintain information relating to operating a forklift truck, including: |
|                               |   • incident reports                                                                  |
|                               |   • vehicle checking and maintenance records                                          |
| Self-management skills        | • implement risk control measures                                                    |
|                               | • initiate emergency management strategies                                           |

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information
This unit is equivalent to TLILIC2001A Licence to operate a forklift truck

Links
Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874e-0b3f7036d851
Assessment Requirements for TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a forklift truck and satisfy all of the unit elements, performance criteria and foundations skills requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating a forklift truck
- carrying out post-start operational checks, which must ensure:
  - attachment movements and control functions are smooth and comply with operating requirements
  - hazard warning systems (e.g. lights and horns) are functional
  - safety devices are checked, including
    - deadman’s switch
    - emergency descent device (hydraulic)
    - reversing beepers
  - start-up is in accordance with procedures
  - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
  - battery charge checks, as required
  - ensuring availability of logbook, records, handbook and/or operating manuals
  - fitting and interpreting forklift truck data plate
  - fluid checks
  - forklift truck attachment security checks
  - identifying approved modifications and/or attachments fitted, to manufacturer specifications in accordance with forklift truck or attachment data plate
  - locating, identifying and confirming all controls
  - safety equipment checks
  - signage and label visibility and legibility checks
  - updating records as required
- communicating with other workplace personnel through
  - using appropriate worksite protocols
• listening
• making and interpreting hand signals
• questioning to confirm understanding
• signage
• verbal and non-verbal language
• written instructions
• complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
• conducting and monitoring safe forklift truck operations that include moving loads safely, driving and manoeuvring, picking up and placing loads at various stack heights and carrying out all functions to the maximum height and load capacity
• driving a forklift truck with load in forward and reverse, while maintaining visibility
• planning and preparing for forklift truck operations including:
  • conducting a workplace risk assessment
  • identifying hazards associated with operating a forklift truck, which must include
    • forklift truck instability (e.g. due to overloading, poor load placement, irregular loads)
    • ground conditions (e.g. condition of pavement, slopes)
    • insufficient lighting
    • overhead hazards (e.g. electric lines, service pipes)
    • traffic (e.g. pedestrians, vehicles, other plant) and the risk of collision with people, moving plant and fixed structures
    • weather conditions (e.g. wind, lightning, rain)
  • selecting hazard prevention strategies in accordance with the hierarchy of control
  • putting in place effective controls for identified hazards
  • visually checking a forklift truck for any damage or defects prior to operation including
    • evidence of damage
    • leaks
    • structural weaknesses (including paint separation or stressed welds)
• receiving and interpreting workplace instructions, safety information and emergency procedures
• shutting down a forklift truck in accordance with manufacturer specifications and workplace procedures including
  • parking in a suitable location away from dangerous areas
  • correctly positioning fork arms (tips down, tilted forward, lowered to ground)
  • selecting appropriate transmission/gear for parking (relevant to transmission type)
  • applying hand/parking brake
  • turning off engine power
  • removing ignition key as required
  • shutting off LPG gas cylinder valve as required
• securing equipment in accordance with manufacturer specifications and against unauthorised operation
• securing site
• ensuring access ways are clear
• identifying and segregating defective equipment and reporting to authorised personnel
• connecting batteries to charger as required
• verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including
  • environmental conditions (e.g. wind, lightning, storms)
  • failure/loss of control (e.g. brakes and steering)
  • failure of equipment (e.g. hydraulic system)
  • forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

• Australian and industry standards relevant to operating a forklift truck
• Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one’s own responsibilities
• forklift truck characteristics and capabilities (including use of load data plates)
• forklift truck operations and safe operating techniques
• hierarchy of control:
  • elimination
  • substitution
  • isolation
  • engineering controls
  • administrative controls
  • personal protective equipment (PPE)
• methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
  • control labels
  • forklift data plates/labels
  • forklift warning decals
• organisational and workplace standards, requirements, policies and procedures for operating a forklift truck
• procedures for recording, reporting and maintaining workplace records and information
• relevant Australian and industry standards, codes of practice and guidelines to safely
operate a forklift truck

- risk control measures including:
  - barricades and traffic control (e.g. traffic management plan)
  - compliance with permit condition requirements from electrical supply authority, including
    - adequate illumination
    - disconnected power
    - excavation safeguards
    - insulated electric lines
    - maintaining safety observer zone
    - movement of obstructions
    - observing limits of approach
    - pedestrian control (barricades, signs, etc.)
    - power disconnection or compliance with electrical supply authority requirements
    - safety tags on electrical switches/isolators
    - using safety observer inside exclusion zone
    - using personal protective equipment
- selecting forklift truck to suit load and workplace conditions
- typical routine problems encountered operating a forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements.
If the working zone is located at a ‘live’ site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must not be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring that candidates have access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of Performance Assessment
- relevant workplace procedures and standards for operating a forklift truck, including:
  - approved codes of practice and guidance
  - relevant Australian and international technical standards
  - manufacturer guidelines (instructions, specifications or checklists) for the purpose of Performance Assessment
  - relevant industry standards and operating procedures (where applicable)
  - safe work method statements (SWMS), as required.

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.
Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Analyse supply requirements

1.1 Purpose and specifications of required goods/services are identified

1.2 Criteria to evaluate potential or existing contractor performance is established

1.3 Quantities of required goods/services are determined

1.4 Frequency of ordering/requesting of goods/services is identified

2 Evaluate potential contractors

2.1 Contractors of requested goods/materials/services are identified

2.2 Comparative costings for goods/materials/services are obtained

2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed

2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures

2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service

2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors

2.7 Information and data generated during selection process is filed and maintained in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4002A Source goods/services and evaluate contractors.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken.
Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services, and evaluating potential supply contractors.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIR4003 Negotiate a contract

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to contract transport and logistics services in compliance with relevant regulations, standards, legal requirements, codes of practice and workplace procedures.

It includes negotiating the contract, finalising the contract negotiations, as well as completing all contract requirements with a contractor.

The unit generally applies to those with responsibility for resource coordination and allocation, and who lead individuals or teams.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

essential outcomes.

demonstrate achievement of the element.

1 Negotiate contract specifics with contractor

1.1 Requirements of the contract are clearly documented and agreed to by the relevant parties

1.2 Areas of ambiguity or concern are clarified and resolved

1.3 Negotiations are undertaken with selected contractor for the contracting of required goods/services on a ‘without prejudice’ basis

1.4 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor including the determination of key performance indicators

1.5 Alternative contractors are negotiated with if agreement is unable to be reached with preferred contractor

1.6 Contract negotiations are conducted in accordance with established workplace requirements and relevant legislation

2 Complete contract negotiations

2.1 Contract documentation is drafted in accordance with relevant legislation, workplace procedures and negotiated conditions of service and supply

2.2 Technical support in drafting contracts is accessed as required

2.3 Contract documentation is signed and exchanged between relevant parties

3 Complete enterprise contract requirements

3.1 Documentation systems are established to ensure traceability of orders and financial transactions

3.2 Workplace systems that require interaction with contractors are identified and actioned

3.3 Quality assurance procedures for supplied goods/services are initiated

3.4 Contract and ancillary documentation is completed and stored as required, in accordance with workplace procedures and regulatory requirements
Foundation Skills
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIR4003 Negotiate a contract

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying activities to cater for variations in workplace contexts and environment
- operating electronic communications equipment to required protocol
- planning and monitoring work activities in terms of schedule
- prioritising work and coordinating self and others in relation to workplace activities
- providing leadership and working collaboratively with others when negotiating a contract
- reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
- selecting and applying appropriate technology and information systems.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and the range of conditions on at least one occasion and include:
• applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
• applying relevant legislation and workplace procedures
• communicating and working effectively with others when negotiating a contract
• completing documentation related to negotiating a contract
• modifying activities to cater for variations in workplace contexts and environment
• operating electronic communications equipment to required protocol
• planning and monitoring work activities in terms of schedule
• prioritising work and coordinating self and others in relation to workplace activities
• providing leadership and working collaboratively with others when negotiating a contract
• reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
• selecting and applying appropriate technology and information systems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

• a range of relevant exercises, case studies and/or other simulations
• relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace

Modification History
Not Applicable

Unit Descriptor

1) Descriptor

This unit specifies the mandatory requirements of occupational health and safety and how they apply to the various electrotechnology work functions. It encompasses responsibilities for health and safety, risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Application of the Unit
Not Applicable

Licensing/Regulatory Information

1.2) License to practice

**During Training:** Competency development activities are subject to regulations directly related to licencing, occupational health and safety and where applicable contracts of training such as apprenticeships.

**In the workplace:** The application of the skills and knowledge described in this unit require a license to practice in the workplace where work is carried out on electrical equipment or installations which are designed to operate at voltages greater than 50 V a.c. or 120 V d.c.

Other conditions may apply under State and Territory legislative and regulatory requirements.
Pre-Requisites

Prerequisite Unit(s) 2)

2.1) Competencies

There are no prerequisite competencies for this unit.

Employability Skills Information

Employability Skills 3)

This unit contains Employability Skills

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

Application of the Unit 4)

This unit addresses information, processes and techniques for the application of general occupational health and safety requirements in workplaces and is essential for employees without managerial or supervisory responsibilities.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a unit of competency

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

7) This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of safe working practices and applying OHS practices in the workplace.

The knowledge and skills shall be contextualised to current industry standards, technologies and practices.

KS01-EE101A Occupational Health and Safety principles

Evidence shall show an understanding of Occupational Health and Safety to an extent indicated by the following aspects

T1 The basic legal requirements covering occupational health and safety in the workplace encompassing:

- underlying principles of OH&S
- general aims and objectives of the relevant state or territory legislation relating to OH&S.
- employer and employee responsibilities, rights and obligations.
- major functions of safety committees and representatives.
- powers given to Occupational Health and Safety Inspectors
- housekeeping and potential hazards in relation to improper housekeeping
- selecting appropriate personal protective equipment (PPE) given hazardous situations

T2 The work environment encompassing:

- typical hazards associated with a range of work environments
- procedures used to control the risks associated with these hazards
- principles of risk assessment / management and state the purpose of each.
- hierarchy of OH&S hazard control measures.
- required documentation for risk assessment.
- commonly used workplace safety signs.
- workplace emergencies that pose a threat to health and safety and suitable procedure for an emergency workplace evacuation.
- appropriate fire extinguisher for a given type of fire.
- requirements for the location, mounting and maintenance of portable fire extinguishers.
- basic process of fighting a fire.
- Importance of safe premises, buildings and security in an industrial setting and the consequences of non-compliance.
- standard work procedure.

T3 Manual Handling encompassing:
REQUIRED SKILLS AND KNOWLEDGE

- typical manual handling injuries and the effect they can have on lifestyle
- situations that may cause manual handling injuries
- correct procedures for lifting and carrying to prevent manual handling injuries

T4 Chemicals in the workplace encompassing:
- hazardous substances and dangerous goods.
- classification of chemicals as hazardous substances and/or dangerous goods
- requirements for labelling of chemicals in the workplace
- safe storage procedures for chemicals
- purpose and interpretation of material safety data sheet (MSDS)

T5 Working at heights encompassing:
- dangers associated with working on ladders and scaffolds
- identification of work area as a height risk and use appropriate safety equipment to prevent a fall
- selecting an appropriate ladder for a given situation and perform a safety check before use
- precautions that should be taken when ascending and working off a ladder
- precautions that should be taken when working on and around a scaffold and elevated platforms.

T6 Confined spaces encompassing:
- hazards associated with working in a confined space
- identifying workplace situations that could be classified as a confined space
- control measures for working in a designated confined space

T7 Physical and psychological hazards encompassing:
- short and long term effects of excessive noise and techniques to avoid damage to hearing due to excessive noise
- effects of vibration on the human body and work practices to protect against vibration
- effects of thermal stress on the human body and work practices to protect against thermal stress
- effects of ultraviolet (UV) radiation on the human body and work practices to protect against UV radiation.
- dangers associated with laser operated equipment and tools and suitable protective measures to overcome the danger.
- occupational overuse syndrome, how it occurs and means to overcome it
- factors that cause stress in the workplace, symptoms of a person suffering from stress and personal stress management techniques
- detrimental effects and dangers of drug and alcohol use in the workplace

T8 Working safely with electricity encompassing:
- effects of electric shock on the human body
REQUIRED SKILLS AND KNOWLEDGE

- common causes of electrical accidents
- precautions that can minimise the chance of electric shock (earthing, extra low voltage, fuses, circuit breakers and residual current devices – RCDs)
- protection offered by a residual current device (RCD)
- need for ensuring the (safe) isolation of an electrical supply
- appropriate method of removing an electric shock victim from a live electrical situation

T9 Life support - CPR in the workplace encompassing:

- First Aid.
- responsibilities of the First Aider.
- priorities of first aid management for any accident or injury.
- procedures required at an accident scene.
- legal and ethical issues, which may impact on the management of care.
- 'Duty of Care'.
- examination of a casualty for injuries.
- effect of cardio pulmonary arrest on the body.
- Managing simulated conditions of: airway obstruction; respiratory arrest and cardio pulmonary arrest,
- single and two-person cardio pulmonary resuscitation (CPR).
- signs and symptoms of an altered level of consciousness
- management of simulation of a casualty with an altered level of consciousness.
- signs and symptoms of shock.
- management of simulation of a casualty in shock

Evidence Guide

EVIDENCE GUIDE

9) The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

The Evidence Guide forms an integral part of this unit. It must be used in conjunction with all parts of the unit and performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment

9.1) Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over
EVIDENCE GUIDE

time. This approach is best utilised in Apprenticeship programs and reduces assessment intervention. It is the industry-preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accordance with industry and regulatory policy.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Sources of evidence need to be 'rich' in nature to minimise error in judgment.

Activities associated with normal everyday work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its 'richness'. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practised. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required to demonstrate competency in this unit

9.2)

Before the critical aspects of evidence are considered all prerequisites must be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated performance criteria shall be demonstrated on at least two occasions in accordance with the 'Assessment Guidelines - UEE07'. Evidence shall also comprise:

- A representative body of work performance demonstrated within the timeframes typically expected of the discipline, work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able
EVIDENCE GUIDE

to:

- Implement Occupational Health and Safety workplace procedures and practices, including the use of risk control measures as specified in the performance criteria and range statement encompassing:
  
- Apply sustainable energy principles and practices as specified in the performance criteria and range statement
  
- Demonstrate an understanding of the essential knowledge and associated skills as described in this unit. It may be required by some jurisdictions that RTOs provide a percentile graded result for the purpose of regulatory or licensing requirements.
  
- Demonstrate an appropriate level of skills enabling employment
  
- Conduct work observing the relevant Anti Discrimination legislation, regulations, polices and workplace procedures
  
- Demonstrated consistent performance across a representative range of contexts from the prescribed items below:
    
  - Applying OHS practices in the workplace as described in 8) and including:
    
  A Preparing to enter the workplace including, the use of work permits and clearances and isolation permissions.
  
  B Understanding and following risk control safe work methods.
  
  C Applying work procedures and instructions as they apply to risk control measures.
  
  D Dealing with accidents and emergencies within the scope of responsibility.
  
  E Participation in consultation processes, identifying hazards and implementing and monitoring control measures.
  
  F Dealing with unplanned events
  
Note:
Ability to implement these Occupation Health and Safety
EVIDENCE GUIDE

measures shall be demonstrated on all occasions safety issues arise.

Context of and specific resources for assessment

9.3)
This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to undertake actual work as prescribed in this unit.

These should be used in the formal learning/assessment environment.

Note:
Where simulation is considered a suitable strategy for assessment, conditions for assessment must be authentic and as far as possible reproduce and replicate the workplace and be consistent with the approved industry simulation policy.

The resources used for assessment should reflect current industry practices in relation to applying OHS practices in the workplace.

Method of assessment

9.4)
This unit shall be assessed by methods given in Volume 1, Part 3 'Assessment Guidelines'.

Note:
Competent performance with inherent safe working practices is expected in the Industry to which this unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and skills described in this unit.

Concurrent assessment and relationship with other units

9.5)
This unit shall be assessed concurrently, as it relates to other units undertaken in a possible skill clusters or qualification.
Components of this unit are included in the critical aspects of evidence of all units to help ensure the appropriate level of responsibility for safety has been acquired.
Range Statement

RANGE STATEMENT

8) This relates to the unit as a whole providing the range of contexts and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

This unit shall be demonstrated in relation to each of the following

- Relevant Occupational Health and Safety legislation, regulations and codes of practice related to hazards present in the industry and particular workplace
- Accepted industry work procedures and the specific safety procedures and work instructions for particular workplace.

Generic terms used throughout this Vocational Standard shall be regarded as part of the Range Statement in which competency is demonstrated. The definition of these and other terms that apply are given in Volume 2, Part 2.1.

Unit Sector(s)
Not Applicable

Competency Field

2.2) Literacy and numeracy skills

Participants are best equipped to achieve competency in this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 'Literacy and Numeracy'

Reading 3 Writing 3 Numeracy 3

**Unit Descriptor**

**Unit Descriptor 1)**

1.1) Descriptor

This unit covers attaching flexible cords and plugs to electrical equipment for connection to supplies up to 230V a.c. This may be incidental to or a primary and regular function of work related to a principle function in the workplace. It encompasses working safely, identifying plug configurations, selecting and using testing and measuring devices, terminating and connecting cords/plugs and conductors, safety testing and reporting.

**Application of the Unit**

4) This unit applies to any formal recognition for this standard at the aligned AQF 2 level or higher.

**Licensing/Regulatory Information**

1.2) License to practice

The skills and knowledge described in this unit may require a license to practice in the workplace. However, practice in this unit is subject to regulations directly related to occupational health and safety and where applicable contracts of training such as apprenticeships.

Note: Candidates are to meet regulator eligibility requirements by providing formal
1.2) License to practice
confirmation from the relevant state/territory regulator for the respective work class and scope of work prior to developing and being conferred competent.

Pre-Requisites
Prerequisite Unit(s) 2)

2.1) Competencies
Granting competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

UEENEEE1 Apply Occupational Health and Safety regulations, codes and practices in the workplace
01A

Employability Skills Information
Employability Skills 3)
This unit contains Employability Skills
The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content
6) Elements describe the essential outcomes of a unit of competency
Elements and Performance Criteria

ELEMENT PERFORMANCE CRITERIA

1 Plan and prepare to attach flexible cord(s) and plug(s).
   1.1 Work is planned and prepared to ensure OHS policies and procedures are followed, and the work is appropriately sequenced in accordance with requirements.
   1.2 Condition and ratings under which the flexible cords and plugs are to operate is determined from requirements and in consultation with appropriate personnel followed by written instruction.
   1.3 Flexible cords and plugs are selected to comply with standards and requirements for the condition and rating to be determined.
   1.4 Materials necessary to complete the work are obtained in accordance with established procedures and checked against job requirements.
   1.5 Tools, equipment and testing devices needed to carry out the work are obtained in accordance with established procedures and checked for correct operation and safety.
   1.6 Flexible cord(s) is prepared without damage to insulation and conductors and in accordance with requirements.

2 Attach flexible cord(s) and plug(s).
   2.1 OHS policies and procedures are followed.
   2.2 Single insulated metal framed equipment is earthed in accordance with requirements.
   2.3 The integrity of double insulated equipment is maintained in accordance with requirements.
   2.4 Conductors are connected to terminals in accordance with requirements to ensure the required polarity is affected.
3 Test equipment for operation and safety.

3.1 Appropriate tests of the cord(s) and plug(s) connected to the electrical equipment are conducted in accordance with requirements and to established procedures to ensure safe installation and operation.

3.2 Ongoing checks of the quality of work are undertaken in accordance with established procedures.

4 Locate and repair fault(s) in attached flexible cord(s) and plug(s).

4.1 Electrical equipment and attached flexible cord(s) and plug(s) are isolated, where necessary, in accordance with established procedures.

4.2 Other OHS policies and procedures are followed.

4.3 Visual checks of the attached flexible cord(s) and plug(s) are carried out in accordance with established procedures to detect any abnormal or obvious damage or fault.

4.4 Fault(s) in attached flexible cord(s) and plug(s) are confirmed and components to be replaced are determined and details recorded in accordance with established procedures.

4.5 Fault(s) in attached flexible cord(s) and plug(s) are repaired in accordance with established procedures, where necessary.

4.6 Approval is obtained in accordance with established procedures from appropriate personnel, before any contingencies are implemented.

5 Provide status report(s).

5.1 Status report(s) are completed and notified in accordance with established procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

7) This describes the essential skills and knowledge and their level,
required for this unit.

Evidence shall show that knowledge has been acquired of safe working practices and attaching cords and plugs to electrical equipment for connection to a single phase 230 Volt supply.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-EP024A Flexible cords and plugs to 230 V

Evidence shall show an understanding of flexible cords and plugs to 230 V to an extent indicated by the following aspects

T1 Safety encompassing:

* OH&S and electrical safety requirements
* requirements of AS/NZS 4836:2001 Safe working practices on low voltage installations

T2 The basic electrical circuit encompassing:

* simple electric circuit (supply, control device and load)
* symbol, units of measurement and the abbreviation for electromotive force, potential difference, current and resistance.
* drawing of a basic electrical circuit using correct symbols
* using multiples and submultiples for voltage, current and resistance values
* a.c and d.c supplies
* single phase electrical loads
* electrical circuit protection devices

T3 Relationships in an electrical circuit encompassing:

* relationship between voltage, current and resistance (Ohm’s law)
* changes in circuit parameters for altered values of voltage, current and resistance
* electrical power in relationship to d.c. or resistive a.c. circuits

T4 Test Equipment - resistance measurement encompassing:

* types of electrical test equipment used for resistance measurement (analogue and digital multimeters, insulation resistance testers and continuity testers)
* selection of appropriate electrical test instrument for continuity and insulation resistance measurement
* using analogue and digital multimeters for resistance measurement (ensuring zero setting, correct scale selection, avoidance of parallax error and estimation of between division readings for analogue multimeters)
* continuity tests and using a continuity tester to check the polarity of a three core extension cord
* insulation resistance tests and minimum values for insulation resistance for low voltage equipment
* reasons for insulation resistance testing is conducted at higher than supply voltage (AS/NZS3000 requirements)
* using insulation resistance hand held tester
* care and storage of electrical instruments
* regulatory requirements in regard to the maintenance and testing of test instrumentation for resistance measurement.

T5 Selection of flexible cords and plugs to suit given applications
encompassing:

* types, structures and applications of common cores (parallel two core unsheathed ('figure 8') cords, light duty sheathed, ordinary duty sheathed, heavy duty sheathed and textile braided)

* determining the current rating of a range of commonly used flexible cords

* service duty

* purpose of colour coding and the recommended single phase colour code and the conventional code used in the most common alternative colours

* selection of appropriate flexible cords for a range of single phase appliances in regard to application, load, and service duty

* identification of correct plug and socket polarities for the range of commonly used 230 volt plug socket combinations

* factors affecting the choice of plugs and sockets including IP rating

* selection of the correct plug and socket combinations for a range of applications including use in damp areas

T6 Connecting flexible cords and plugs to appliances encompassing:

* design features of plugs and sockets which protect the conductor terminations from undue force when disconnecting a cord - tortuous path

* cord preparation - not to mark/damage the inner core when stripping the sheath for termination, double the end of the conductor to be terminated

* purpose of earthing

* structure of double insulated appliances, symbol, reasons they should not be earthed, and maintenance of the integrity of the double insulation

* preparation of the surfaces at an earthing connection before and after completion of the termination including terminations exposed to corrosion, and those
for which no specific earthing terminal is provided

* fitting a range of various plugs and sockets with attention to requirements, colour code, polarity, and correct termination of conductors with the sheath well into the body, and the cord grip anchored

* terminate cords to several appliances utilising the appropriate cord type and rating

T7 Testing encompassing:

* importance of conducting both visual and electrical tests to ensure leads are safe and appropriate for connection to supply in regard to physical condition, sufficiently high insulation resistance, continuity, arrangements for protection against indirect contact are undamaged and in place, appropriate IP rating, and arrangements for protection against dangers of mechanical movement as relevant are undamaged and in place

* check polarity of plug, and for any abnormal or obvious damage or fault

* minimum acceptable value of insulation resistance between active neutral and earth

* conduct insulation resistance and continuity tests prior to, and after, connecting cords and plugs to appliances

* fault finding attached cords and plugs, and cord extension leads

T8 Producing documentation and reports encompassing:

* nature and content of, and the need to produce, status reports and documents

* Producing status reports and documents

Evidence Guide

EVIDENCE GUIDE
EVIDENCE GUIDE

9) The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The Evidence Guide forms an integral part of this Unit and shall be used in conjunction with all components parts of this unit and performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment

9.1) Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment intervention. It is the industry-preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. In some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accordance with industry and regulatory policy.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety issues inherent in working with electricity, electrical equipment, gas or any other hazardous substance/material present a challenge for those determining competence. Sources of evidence need to be 'rich' in nature to minimise error in judgment.

Activities associated with normal everyday work influence decisions about how/how much the data gathered will contribute to its 'richness'. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practised. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required

9.2) Before the critical aspects of evidence are considered all
Evidence Guide

To demonstrate competency in this unit

Prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated performance criteria shall be demonstrated on at least two occasions in accordance with the 'Assessment Guidelines - UEE07'.

Evidence shall also comprise:

- A representative body of work performance demonstrated within the timeframes typically expected of the discipline, work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:
  - Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the performance criteria and range statement
  - Apply sustainable energy principles and practices as specified in the performance criteria and range statement
  - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit. It may be required by some jurisdictions that RTOs provide a percentile graded result for the purpose of regulatory or licensing requirements.
  - Demonstrate an appropriate level of skills enabling employment
  - Conduct work observing the relevant Anti Discrimination legislation, regulations, polices and workplace procedures
  - Demonstrated consistent performance across a representative range of contexts from the prescribed items below:
    - Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply as described in 8) and including:
      - Demonstrating consistent performance for each element of the unit
      - Meeting the performance criteria associated with each element of competence by employing the techniques, procedures, information and resources available in the workplace
EVIDENCE GUIDE

C  Demonstrating an understanding of the underpinning knowledge and skills shown in the Essential Knowledge and Associated Skills section of the unit

D  Planning and preparing to attach flexible cord(s) and plug(s) up to 230 V a.c

E  Attaching, replacing and repairing flexible cord(s) and plug(s) to equipment, safely up to 230 V a.c

F  Testing flexible cord(s), plug(s) and connected equipment for operation and safety up to 230 V a.c., including polarity and continuity testing

G  Finding and repairing fault(s) in attached flexible cord(s) and plug(s) in accordance with established procedures

H  Providing status report(s)

I  Dealing with unplanned events by drawing on essential knowledge and skills to provide appropriate solutions incorporated in a holistic assessment with the above listed items

Note:
Successful completion of relevant vendor training may be used to contribute to evidence on which competency is deemed. In these cases the alignment of outcomes of vendor training with performance criteria and critical aspects of evidence shall be clearly identified

Context of and specific resources for assessment

9.3) This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to undertake actual work as prescribed by this unit.
- Workplace evidence to be produced in an industry/regulator approved recording system (logbook) confirming skills development under appropriate supervision

These should be part of the formal learning/assessment environment.
EVIDENCE GUIDE

Note:

Where simulation is considered a suitable strategy for assessment, conditions must be authentic and as far as possible reproduce and replicate the workplace and be consistent with the approved industry simulation policy.

The resources used for assessment should reflect current industry practices in relation to attaching cords and plugs to electrical equipment for connection to a single phase 230 Volt supply.

Method of assessment

9.4) This unit shall be assessed by methods given in Volume 1, Part 3 'Assessment Guidelines'.

Note:
Competent performance with inherent safe working practices is expected in the Industry to which this unit applies. This requires assessment in a structured environment which is intended primarily for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and skills described in this unit.

Concurrent assessment and relationship with other units

9.5) There are no concurrent assessment recommendations for this unit.

Range Statement

RANGE STATEMENT

8) This relates to the unit as a whole providing the range of contexts and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

This unit shall be demonstrated in relation to any cord, cable and plug connected equipment or cord extension leads intended for single-phase supplies up to 230 V.

Note:

Limitations of this unit. This unit does not cover the knowledge and skills necessary for work:
RANGE STATEMENT

a) Competencies associated with high current faults
b) On complex electrical apparatus, circuits and electrical work
c) In hazardous areas or on electrical equipment that is part of an explosion protection technique
d) Nor competencies associated with fixed wiring.

Safe Working. Safe procedures for working within the scope of this unit shall be in accordance with AS/NZS 4836:2001 ‘Safe working on low-voltage electrical installations.’

Generic terms used throughout this Vocational Standard shall be regarded as part of the Range Statement in which competency is demonstrated. The definition of these and other terms that apply are given in Volume 2, Part 2.1.

Unit Sector(s)
Not Applicable

Custom Content Section

2.2) Literacy and numeracy skills

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 ‘Literacy and Numeracy’

Reading 3  Writing 3  Numeracy 3

Competency Field

Competency Field 5)

Restricted and Specialisations
UETTDREL14 Working safely near live electrical apparatus as a non-electrical worker

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Application

This unit covers compliance with working safely up to the defined safe approach distance (SAD) near energised electrical apparatus, including electrical powerlines, for non-electrical workers.

It includes work functions that may be performed, such as vegetation control, scaffolding, rigging, painting and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker. Also included is the preparation of risk assessment control measures that encompass job safety assessment. It does not include any work that is or may be performed by other competent operatives within the defined safe working zone. The defined safe working zone is that so defined by relevant state or territory regulatory agencies/bodies, local government legislation, industry bi-partite bodies, guidelines/codes of practices or other related requirements for safe work and access near live electrical and mechanical apparatus.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licencing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

There are no prerequisite competencies to this unit.

1.10 Electricity infrastructure assets, related voltages and requirements for working safely near live electrical apparatus as non-electrical worker are identified

1.11 SAD, including any zones thereof that may apply, as defined in industry guidelines, requirements and/or established procedures for the intended work are confirmed

2 Carry out work safely near live electrical apparatus as non-electrical worker

2.1 WHS/OHS principles and practices to reduce the incidents of accidents are identified in accordance with given instructions, requirements and/or established procedures

2.2 Working safely and complying with all safety requirements for working near live electrical apparatus as a non-electrical worker are followed in accordance with given instructions and established routines/procedures

2.3 Processes for monitoring and reporting/referring hazards and WHS/OHS risks to immediate authorised personnel for directions according to established procedures are followed

2.4 Non-routine events are referred to immediate authorised personnel for directions according to established procedures

2.5 Unexpected events associated with working safely near live electrical apparatus as a non-electrical worker are responded to using acquired known solutions and skills related to routine procedures to ensure work instructions and established procedures are met

3 Complete work safely near live electrical apparatus as non-electrical worker

3.1 Work schedule and anomalies for completion and checking of the work are reported to authorised personnel in accordance with established procedures

3.2 Processes for reporting to accidents and/or incidents authorised personnel are confirmed in accordance with established procedures

3.3 Requirements for returning work permits and/or access authorisation permits are confirmed

3.4 Appropriate personnel are notified of work completion according to established procedures
3.5 Works completion records and report forms/data sheets are completed accurately in accordance with given instructions and established procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UETTDREL14A Working safely near live electrical apparatus as a non-electrical worker.

Assessment Requirements for UETTDREL14 Working safely near live electrical apparatus as a non-electrical worker

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- applying sustainable energy principles and practices
- completing all of the following:
  - confirming the safe working zone for safe work and access near live electrical apparatus
  - identifying relevant technical standards, acts, regulations and codes/guidelines
  - identifying established (enterprise) procedures
- completing all of the following:
  - confirming the principles of electricity, the three phase power system, electric shock and resuscitation, and power system
  - recognising aerial voltage systems
  - identifying low voltage (LV) aerial circuits
  - identifying high voltage (HV)
- identifying all of the following:
  - procedures in the event of an incident
  - events constituting an incident
  - procedures for responding to incidents
  - hazard and risk assessment procedure
  - conduct worksite hazard assessment
  - confirmation of essential components of hazard assessment checks
  - applying hazard identification in electrical work
  - confirmation of the basic safety principles for work on electrical works
  - hazard identification and risk assessment
  - hazard control
  - risk assessment and management (job safety analysis (JSA)) control
  - the hierarchy of controls, including evaluation, worksite hazard and risk assessment checklist, pre-job hazard assessment check (HAC) items, planned inspection and
pre-work hazard risk assessment form
• identifying all of the following:
  • use of work permits and/or authorisation permits
  • sustainable energy principles and practices
  • possible effects of weather conditions on working near electrical apparatus as a non-electrical worker
  • dealing with unplanned events on at least one (1) occasion.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:
• basic electrical principles encompassing:
  • fundamental units - basic measurement of units
  • electrical characteristics of material - characteristics of solid materials; insulators; and terms electrical charge, electrical current and electromagnetic forces
  • nature of electrical current and change - basic rules of electrical current flow
  • sources of electricity - basic fundamentals of alternating current (a.c.), direct current (d.c.) and single electromagnetic field source (induction)
  • simple circuits - circuit protection devices used on the network; effects of an open circuit, a closed circuit and a short circuit and earthing – using the ground as a form of conductor to return current back to a source
  • resistance - relationship between voltage and current and resistance (Ohms Law)
  • effects of current - physiological effects and protection for physiological effects; basic principle by which electrical current can result in the production of heat, light and electromagnetic fields and typical effects of current
  • three phase and single-phase power systems - star delta configurations, three phase star connections, relationship between line and phase voltages, three phase 4 wire systems - purpose of the neutral
  • consequences of short circuits - arc flash, electricity supply industry (ESI) protection schemes
  • magnetism - magnetic field patterns, concepts of electromagnetism, effects of electromagnetism and magnetic fields around straight conductors
  • hazards encountered in an ESI environment - touch and step potentials, electric shock, fire, chemicals, falls and safe use of tools and equipment
• transmission, distribution and rail power systems encompassing:
  • relationship between the transmission, distribution and rail/tram system within an overall power system - different organisations responsible for generation, transmission, distribution and rail/tram; how they correlate and their functions
  • characteristics of a transmission, distribution and rail system - principal components; typical voltage levels and methods of transmission and distribution, including grid type transmission systems, radial, parallel and ring main feeders
  • relationship between an overhead and underground supply systems within an overall
Assessment Requirements for UETDREL14 Working safely near live electrical apparatus as a non-electrical worker

Date this document was generated: 3 September 2020

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.

- power system - advantages/disadvantages and applications
- single line drawings and layouts - drawings and layouts of transmission and distribution systems, including radial, parallel and ring main feeders and the HV equipment associated with substations
- fundamentals for working safely near live electrical apparatus for non-electrical worker encompassing:
  - standards, guidelines/codes of practice, Commonwealth/state/territory/local government legislation, supply authority regulations and/or enterprise requirements, including relevant certification and licensing applicable to working safely up to the defined safe working zone near energised electrical apparatus, including electrical powerlines, for non-electrical worker
  - WHS/OHS policies and procedures for working safely - duties of a safety observer, permit to work systems and isolation procedures, safe application of different types of tools and equipment and operation of mobile plant and machinery (e.g. elevated work platform (EWP)) near live electrical apparatus
  - techniques and precautions in undertaking different work functions and working safely up to the defined safe working zone near energised electrical apparatus (including electrical powerlines) for non-electrical worker (work functions that may be performed include vegetation control, scaffolding, rigging, painting and/or any other activity that requires working safely near live electrical apparatus by a non-electrical worker).

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Application

This unit covers the performance of rescue procedures from an elevated work platform (EWP) in the workplace. It specifies the mandatory requirements of rescue from a raised EWP by a work party member on the ground and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licencing requirements which must be confirmed prior to commencing this unit.

### 1 Prepare to perform EWP rescue procedures

1.1 Instruction in hazards and risk control measures for specific work areas and work activities are identified and obtained

1.2 Tools and emergency equipment are checked for safety, functionality and placed in an accessible location to facilitate response and rescue according to established procedures

### 2 Carry out EWP rescue procedures

2.1 Workplace procedures and work instructions for controlling risk are followed

2.2 Workplace procedures for removing the victim, where necessary, from contact with or in vicinity of live apparatus and lowering the EWP to the ground are followed

2.3 Workplace procedures for removing the victim from the EWP are followed

2.4 Workplace procedures for carrying out cardiopulmonary resuscitation (CPR), if required at the site, and treatment, where necessary, by medical professionals are followed

2.5 The worksite is secured and entry controlled until appropriate authorities inspect and release the site

### 3 Complete the EWP rescue procedure

3.1 Processes for reporting accidents and/or incidents to authorised personnel are confirmed in accordance with established procedures

---

**Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for UETTDRRF03 Perform EWP rescue

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- identifying operational instructions and confirming the function of emergency equipment to facilitate rescue from an incident on an elevated work platform (EWP)
- accessing controls and lowering the EWP in accordance with mobile equipment instructions/workplace procedures
- removing the victim from the EWP to the ground in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency procedures for the EWP rescue of a victim encompassing:
  - inspection of rescue equipment
  - assessing hazards to rescuer, victim and others
  - isolation procedures, where appropriate
  - safe approach distances (SAD) appropriate to EWP rescue
  - involvement of external emergency services
  - emergency retrieval systems
- emergency procedures required to undertake EWP rescue of a victim encompassing:
  - placement of rescue equipment
  - controlling hazards to rescuer, victim and others
  - maintaining SAD appropriate to EWP rescue
  - practical steps in rescuing a person
  - removing victim to safe location/place of safety.
Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry for performing EWP rescue
- applicable documentation, including workplace procedures, relevant industry standards, equipment specifications, regulations, codes of practice and operation manuals.

UETTDRRF08 Perform EWP controlled descent escape

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Application

This unit covers the performance of elevated work platform (EWP) controlled descent escape procedures in the workplace. It specifies the mandatory requirements for self-rescue from a raised EWP and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licencing requirements which must be confirmed prior to commencing this unit.

Assessment Requirements for UETTDRRF08 Perform EWP controlled descent escape

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- accessing, inspecting, securing and attaching emergency descent equipment to self in accordance with workplace procedures
- evacuating the elevated work platform (EWP) and descending to the ground in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- procedures for EWP controlled descent escape encompassing:
  - inspection of rescue equipment
  - assessing hazards to self and others
  - involvement of external emergency services as appropriate
  - safe approach distances (SAD) appropriate to EWP controlled descent escape
- procedures required for EWP controlled descent escape encompassing:
  - fitting of rescue equipment
  - controlling hazards to self and others
  - maintaining SAD for an EWP controlled descent escape
  - removing self to safe location/place of safety

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory
requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Description

This skill set covers the skills and knowledge to plan and manage a farm business and the associated risks.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC41019 Certificate IV in Agribusiness
- AHC51419 Diploma of Agribusiness Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS512 Develop and implement family business structures and relationships
- AHCBUS516 Develop and review a business plan
- AHCBUS517 Monitor and review business performance
- BSBRSK501 Manage risk
Target Group
This skill set is for individuals who plan and manage a farm business and the associated risks.

Suggested words for Statement of Attainment
These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *BSB Business Services Training Package* meet the requirements for those responsible for farm business planning and management, including risk management.

</table>
| Release 1| This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0.  
Supersedes and is equivalent to AHCSS00043 Vertebrate Pest Management Planning Skill Set. Minor edits, title changed, and units of competency updated to current versions. |

Description

This skill set prepares individuals working in the rural and land management sector who are required to consult with stakeholders and design and develop pest management plans.

Pathways Information

These units of competency provide credit towards AHC30318 Certificate III in Rural and Environmental Pest Management and AHC41716 Certificate IV in Pest Management.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCPMG306 Determine pest control techniques
- AHCPMG409 Implement a pest management plan
- AHCPMG412 Develop a pest management plan
- AHCPMG413 Define the pest problem
- BSBPMG418 Apply project stakeholder engagement techniques

Target Group

This skill set is for individuals who are:

- Authorised Control Officers in NSW and the ACT
- Agency biosecurity officers
- Local government officers
- Land owners
- Land managers.

**Suggested words for Statement of Attainment**

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meets the industry standards for applying a strategic planning approach to the principles of integrated pest management.

<td>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to AHCSS00026 Advanced Chemical Spray Application Skill Set. Unit codes and titles amended.</td>
</tr>
</tbody>
</table>

Description

This skill set provides the skills and knowledge required to interpret weather conditions, plan and develop procedures, transport, handle and store chemicals and implement chemicals and monitor the safe application of chemicals using machinery and equipment.

Pathways Information

These units of competency provide credit towards a large number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including but not limited to AHC40116 Certificate IV in Agriculture and AHC40316 Certificate IV in Production Horticulture.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCHM304 Transport and store chemicals
- AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases
- AHCCHM404 Develop procedures to minimise risks in the use of chemicals
- AHCCHM405 Plan and implement a chemical use program
- AHCMOM315 Operate chemical application machinery and equipment
- AHCWRK302 Monitor weather conditions
Target Group
This skill set is for individuals responsible for planning, risk management and application tasks associated with the spray application of chemicals used in primary production.

Suggested words for Statement of Attainment
These competencies from the AHC Agriculture, Horticulture, Conservation and Land Management Training Package meet the industry requirements for those responsible for planning and risk management associated with the spray application of chemicals in primary production.

<td>Skill Set. Minor editing changes.</td>
</tr>
</tbody>
</table>

Description

This skill set describes the skills and knowledge required to transport, handle, store, prepare and apply chemicals.

Pathways Information

These units of competency provide credit towards qualifications in Certificate II, Certificate III and Certificate IV in various sectors of the horticulture and agriculture industry including the following broad industries:

- Production Agriculture
- Production Horticulture
- Amenity Horticulture ( Arboriculture, Parks and Gardens, Landscaping)
- Nursery Production and Retail
- Turf Management
- Animal Breeding and Racing
- Beekeeping
- Pest Management (Vertebrate, Weeds and Invertebrate)
- Conservation and Land Management (Lands, Parks and Wildlife, Natural Area Restoration)
- Irrigation
- Indigenous Land Management.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.
Skill Set Requirements

- AHCCCHM304 Transport and store chemicals
- AHCCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Target Group

This skill set is for individuals responsible for applying agricultural chemicals.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet state/territory licensing requirements for the application of agricultural chemicals.

<td>This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to AHCSS00028 Basic Introduction to Beekeeping Skill Set. Minor edits.</td>
</tr>
</tbody>
</table>

Description

This skill set describes the basic skills and knowledge required to operate a beehive or small apiary.

Pathways Information

These units of competency provide credit toward the AHC31818 Certificate III in Beekeeping.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK203 Open and reassemble a beehive
- AHCBEK205 Prepare and use a bee smoker
- AHCBEK206 Assemble and maintain beekeeping components
- AHCBEK302 Manipulate honey bee brood
- AHCBEK304 Remove a honey crop from a hive
- AHCBEK313 Manage pests and disease within a honey bee colony

Target Group

This skill set is for entry level workers in the beekeeping industry and for hobbyist beekeepers.
Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the basic requirements for the maintenance and monitoring of beehives.

Description

This skill set covers the skills and knowledge required of consultants and advisors who provide guidance and advice on the establishment of a carbon farming project to generate carbon credits. It also applies to carbon farming project managers.

Note the term 'advice' referred to in this skill set does not relate to financial advice which requires an Australian Financial Services License (AFSL). This skill set does not address the skills or the generic knowledge requirements in 'ASIC Regulatory Guide 146: Training of financial product advisors'.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC50116 Diploma of Agriculture
- AHC51216 Diploma of Community Coordination and Facilitation
- AHC51419 Diploma of Agribusiness Management
- AHC60319 Advanced Diploma of Agribusiness Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project
- AHCCFP501 Advise on carbon farming project planning and implementation
- FNSFMK512 Apply knowledge of emissions markets
- LGALAND503A Develop agreements with native title holders/traditional owners
Target Group

This skill set is for agribusiness consultants and advisors who provide guidance and advice on the establishment of a carbon farming projects to generate carbon credits.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, Financial Services Training Package and the Local Government Training Package meet the requirements for individuals who provide advice on carbon farming projects to generate carbon credits.
