Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and document contingency plans for compost production
- document a compost production plan consistent with enterprise capabilities and constraints
- identify and interpret relevant information and conditions that could influence compost production
- make product available to customers as required
- produce and document a compost production schedule

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of compost production scheduling
- control of hazards in handling raw materials and product
- processing duration for various raw materials
- raw materials and their characteristics
- relationship between key compost recipe variables and compost production
- systems, technologies and methods in compost production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess characteristics of different raw materials as relevant to manufacture of particular products according to compliance requirements
- define raw material specifications and acceptance criteria
- Identify raw materials and product specifications to incorporate into business and marketing plans and strategies
- develop criteria and identify raw material requirements from corporate documents
- draft a supply contract with inclusions as negotiated
- support reliable and secure supply of consistent quality raw materials
- review processes, plant and site capabilities against requirements for receiving and processing raw materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for securing raw materials
- capabilities and limitations of site and plant
- environmental and site licenses and associated risks and restrictions
- potential risks and hazards related to various raw materials
- raw material assessment and characterisation
- raw materials used in compost production
- regulations and standards governing raw materials
- standard forms of supply contracts
- technical and industry literacy to source and interpret test data
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- handle and store velvet carefully according to food safety legislation
- accurately and consistently grade velvet using industry grading specifications and record grading results
- sell velvet and review the grading and marketing of the product
- implement enterprise work health and safety and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- National Velvet Accreditation Scheme (NVAS)
- food safety requirements for velvet
- grading specifications
- requirements for handling and storing velvet to maximise quality
- enterprise work health and safety and biosecurity policies

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- apply the NVAS to own enterprise
- establish and maintain a bona fide client-veterinarian relationship
- apply relevant state and territory legislation and industry codes of practice as they relate to own enterprise
- demonstrate knowledge of legal aspects of possession and use of approved drugs
- establish systems to satisfy the Deer Industry Association of Australia’s (DIAA’s) quality assurance program
- implement enterprise work health and safety, biosecurity and animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- animal welfare issues and legislation relating to velvet antler harvesting
- basic and applied principles of anatomy, physiology, pain control and pharmacology relevant to velvet harvesting
- DIAA’s NVAS and quality assurance program
- definitions and requirements with respect to veterinary supervision and legal responsibilities of deer producers and veterinarians
- drug withholding periods and tissue residues
- management of deer before and after velveting
- nature of a bona fide legal relationship
- principles and process of velveting, including potential complications
- relevant action of drugs used for velveting on body function, and detrimental results of drug administration
• relevant legislation relating to restricted drugs
• work health and safety legislation, codes of practice and enterprise requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- safely handle and restrain deer including dealing with aggressive or difficult animals
- administer drugs to deer under supervision of a registered veterinarian
- velvet unassisted a minimum of three deer under supervision of a registered veterinarian
- comply with the National Velvet Accreditation Scheme (NVAS) and quality assurance program of the Deer Industry Association of Australia (DIAA)
- manage deer effectively before, during and after velveting
- implement emergency response procedures when required
- develop and maintain effective working relationships with a range of organisations operating in the deer industry
- communicate with work team using industry standard terminology
- implement enterprise work health and safety, biosecurity and animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal welfare legislation and issues
- definitions of, and requirements with respect to, veterinary supervision and legal responsibilities of deer producers and veterinarians
- drug legislation relating to deer velvet harvesting
- food safety requirements relating to drug residues and withholding periods, and the hygienic handling of velvet
- management of deer before and after velveting
- surgical velveting procedures
- NVAS and quality assurance program of the Deer Industry Association of Australia (DIAA)
- enterprise work health and safety, biosecurity and animal welfare policies

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess a land area for sustainable use
- conduct soil and water quality tests
- design for the health and sustainability of soils and plants
- implement sustainable practices
- interpret specifications and plans
- outline an integrated approach to land and water management
- prepare a detailed plan or design, specifications and where appropriate a proposal or quotation for sustainable land improvement
- consult with clients
- protect water resources, riparian zones and vegetation in a development area
- research, interpret and apply appropriate legislation and regulations
- select plants and soils for their integrated functional roles
- use a range of graphic techniques for illustrating landscape design components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of designing sustainable landscapes
  - assessment techniques
  - environmental controls and codes of practice applicable to the business and to the improvement works
  - botany, plant physiology, taxonomy and nomenclature
  - identification and selection of soils, growing media, plants, shrubs and trees
• irrigation practices
• legislation and regulations relating to soil and water degradation issues and construction
• specific legislation and regulations for landscape design and development
• specific requirements for sustainability
• surface hydrology
• sustainable land and water use principles and practices applicable in the region
• types, properties and characteristics of a wide range of soils and growing media
• workplace health and safety legislation and regulations

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess landscape sites
- consult with clients
- design scaled concept drawing and construction plans
- determine survey levels and site grading
- identify and select plants, shrubs and trees
- identify dimensions and qualities of materials
- implement professional practices
- interpret architectural designs and details
- operate Computer-Aided Design (CAD) software and/or draft plans by hand
- specify hard landscaping requirements
- use graphic techniques to industry standards for illustrating landscape design components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of preparing a landscape project design
  - establishment of site levels
  - landscape construction and engineering principles
  - drafting techniques
  - environmental implications of landscape project works
- botany, plant physiology, taxonomy and nomenclature
- how to identify and treat soils
- plant identification, selection and culture
- work health and safety risk in office and outdoor environments

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out a landscape site assessment and develop recommendations.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- collect and collate information on site features
- consult with and advise clients
- document assessment and recommendations in a site plan and assessment report
- identify vegetation and soils
- interpret and produce plans
- maintain assessment data records
- sample soils and growing media
- verify existing site details

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices of assessing landscape sites
  - current land use and environmental threats to and problems with site
  - interpretation of results from assessment and testing
  - local, state and federal regulations
  - measurement and surveying techniques
  - plant nutrition
  - protocols of site access
  - soil and growing media types, structure, texture and soil pH
  - soil chemical and physical properties
  - soil field tests and soil sampling techniques
  - techniques to ameliorate soil properties
- vegetation common within the region, using botanical and regionally accepted common names, age, health and conditions of vegetation

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate project costs
- develop a final design and project report
- draw plans to construction standards
- identify and document project timelines
- interpret detail architectural and landscape design drawings
- liaise with stakeholders, staff and contractors
- select appropriate materials and plants
- specify dimensions, footings and qualities of materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of designing for construction of landscape features
  - construction standards
  - drainage issues and the available resources to resolve problems
  - how to select appropriate plants and materials
  - materials available in the marketplace
  - plant specifications for a range of plants appropriate to the design
  - principles of surveying
  - site services, including electrical and water provision
  - stone walling, including gabions
  - the essentials of retaining walls
Assessment Requirements for AHICDEN504 Design for construction of landscape features

- the paving process

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare dairy facilities and equipment to industry safety and hygiene standards
- operate milking equipment to carry out milking in an effective and efficient manner
- complete milking operation and return livestock to paddocks
- clean dairy facilities and equipment to industry standards
- recognise and isolate unsuitable milk
- identify sickness or abnormal behaviour in livestock
- communicate with supervisor and staff
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning and maintenance of milking facilities, machinery and equipment such as sheds, yards, milking machines and teat sprays
- anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
- relevant work health and safety requirements
- relevant animal welfare practices and requirements such as handling and moving livestock
- work routines, procedures and impacts of bad practices for milking operations
- criteria and methods for determining milk quality
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species
- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

## Element: Milking Operations

### Performance Criteria:
- **Enterprise Objectives**
  - 1.2 Identify and comply with requirements for the maintenance of milk quality
  - 1.3 Determine and maintain resources and equipment requirements
  - 1.4 Identify work health and safety hazards, assess risks and implement control measures

## Element: Determine Milking Procedures

### Performance Criteria:
- 2.1 Determine milking routines and procedures for milking operations, with consideration to the range of variable conditions
- 2.2 Check water supplies for availability and check and adjust milking equipment to ensure good operational condition
- 2.3 Implement milking procedures with minimum stress to livestock and maximum yield within reasonable timeframes
- 2.4 Rectify minor malfunctions of equipment or milking systems to manufacturer's specifications and report more complex repairs for specialist attention

## Element: Implement Livestock Health Treatment Program

### Performance Criteria:
- 3.1 Monitor livestock health and condition
- 3.2 Carry out livestock testing according to enterprise plan and seek advice from supervisors and experts for potential health issues
- 3.3 Carry out livestock health treatments during drying off with minimal stress and weight loss according to veterinary or expert advice
- 3.4 Implement hygiene practices to prevent cross-infection during milking operations
- 3.5 Take milk samples and label appropriately
- 3.6 Complete and maintain livestock health records
- 3.7 Carry out all livestock handling and husbandry in line with enterprise animal welfare policies

## Element: Coordinate and Monitor Milking Operations

### Performance Criteria:
- 4.1 Monitor milking procedures for efficiency, effectiveness and compliance with relevant requirements
- 4.2 Monitor and maintain milk quality
- 4.3 Monitor costs to ensure operations are completed and maintained within budget
- 4.4 Clean work areas and equipment, and dispose of organic and non-organic waste in an environmentally responsible manner
- 4.5 Complete documentation and records accurately and promptly
Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- determine requirements for milking operations
- schedule, coordinate and monitor milking operations
- implement livestock health treatment program
- conduct milk sampling and testing
- implement drying off programs according to livestock health strategy
- recognise and rectify machinery malfunctions
- participate in livestock recording programs
- clean work areas and milking equipment
- apply enterprise work health and safety policies
- apply enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking facilities, machinery and equipment
- enterprise and industry requirements for milking operations such as production targets, finances, required resources, manpower and equipment
- criteria, methods and industry standards for determining milk quality
- factors affecting milk quality, and their effects and impacts on enterprise production targets and enterprise viability
- work routines, procedures and impacts of bad practices for milking operations
- anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
- relevant hygiene and biosecurity practices and requirements for milking operations
- relevant animal welfare practices and requirements for milking operations
- relevant livestock testing, health treatment and preventive medicine applicable to milking operations
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species
- types and maintenance of required documentation and records
- types, handling, use and disposal of detergents and cleaning agents, Work Health and Safety and environmental practices for these agents
- relevant requirements, methods and methods for waste and debris storage and disposal
- relevant work health and safety legislation, regulations and codes of practice

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations for dairy waste disposal operations
- maintain and operate a dairy waste storage and disposal system in accordance with work health and safety and environmental legislation, regulations and codes of practice
- monitor dairy waste disposal system
- carry out irrigation from dairy waste storages.
- observe, identify and react appropriately to environmental implications and work health and safety hazards associated with the dairy recycling system
- conduct hygiene and administration activities
- apply enterprise work health and safety policies
- apply enterprise environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise work program and program requirements for dairy waste disposal operations
- relevant work health and safety requirements
- tools, equipment and systems used for dairy waste disposal operations (dairy waste handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for dairy waste disposal operations
- environmental impacts of dairy waste disposal operations and dairy waste irrigation, and strategies to mitigate such impacts
- irrigation techniques for dairy waste
- functions, maintenance and service of effluent pits
Assessment Requirements for AHCDRY302 Operate a dairy recycling system

- methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
- documentation and type of records that need to be completed for effluent operations
- relevant biosecurity requirements and environmental sustainability practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to manage milking shed routines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Dairy (DRY)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- oversee the routine maintenance and service of milking equipment and replacement of consumables
- oversee the conduct of milking operations
- identify possible causes of decline in milk quality including animal infection and teat damage identify faults in milking equipment and rectify
- oversee cleaning and disinfection of milk area and equipment after milking
- maintain records of the milking operation
- manage unsuitable milk from at risk cows
- maintain enterprise practices for milk quality in co-operation with dairy factory personnel
- implement enterprise work health and safety policies
- implement enterprise animal welfare and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking facilities, machinery, equipment and consumables
- enterprise and industry requirements for milking operations such as production targets, finances, required resources, manpower and equipment
- work routines, procedures and impacts of bad practices for milking operations
- relevant industry standards, guidelines, codes of practice and programmes for milking operations, milk quality assurance and milking shed routines
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species and their impact on milking operations and milk quality
• criteria, methods and industry standards for determining milk quality
• factors affecting milk quality, and their effects and impacts on enterprise production targets and enterprise viability
• anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
• relevant hygiene and biosecurity practices and requirements for milking operations
• relevant livestock testing, health treatment and preventive medicine applicable to milking operations
• types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
• environmental impacts of milking operations and strategies to mitigate such impacts
• relevant work health and safety requirements
• relevant animal welfare practices and requirements

**Assessment Conditions**

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have handled and stored explosives, including:

- checked explosives for damage or defects and implemented corrective action
- conducted risk assessment and implemented safe work procedures
- prepared and displayed placards on vehicles transporting explosives
- loaded and transported components of explosives safely in accordance with legislative and regulatory requirements and workplace procedures
- established and implemented monitoring and recording systems for handling, storing and transporting explosives according to legislative and regulatory requirements
- defined requirements and authorisations for the safe handling and storage of explosives
- implemented security procedures for explosives
- identified and implemented emergency procedures for transporting and storing explosives.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- local conditions and factors in the handling, transporting and storage of explosives
- care and preventive measures required to eliminate risk of fire and deterioration of stored explosive materials
- procedures for buying commercial explosives and blasting agents
- explosive materials and their identification
- defective or damaged explosives and emergency procedures
- explosives code of practice, regulations and legislation
- environmental conditions required for safe storage of explosive materials
• loading and storing practices for explosives
• security procedures and best practice
• materials handling procedures
• mandatory and workplace records when handling, storing and transporting explosives.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • explosives or realistic representations of explosives
  • tools and equipment required to handle and transport explosives
  • personal protective equipment
• specifications:
  • workplace instructions, procedures and processes for handling explosives
  • explosive safety data sheets
  • explosives related legislation and codes of practice
• relationships:
  • team member(s) or supervisor to gain approvals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to recognise and record fauna that are commonly encountered when undertaking agricultural, horticultural and land management activities.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have recognised fauna in the field, including:

- accessed a natural area in a manner suitable to observe fauna causing minimal disruption and damage to the environment
- identified and selected processes, situations, equipment and resources for observation of fauna
- observed and record the details of observations according to enterprise requirements
- recognise fauna according to characteristics
- followed workplace procedures and supervisor instructions for identifying, recognising and recording fauna
- applied work health and safety policies and procedures to fauna observation activities
- applied animal welfare practices when observing fauna
- prepared documentation relevant to fauna observations and identification.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for identifying fauna, including:
  - identification techniques and resources
  - fauna behaviour
  - fauna habitats
  - tracks, scats and traces
  - typical characteristics of fauna
- nomenclature and naming conventions
- techniques for observing, identifying and reporting fauna
• purposes for observing and monitoring fauna
• workplace health and safety procedures when conducting observations
• procedures for reporting rare, uncommon or notifiable fauna
• animal welfare and environmental codes of practice relevant to the observation of fauna.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated where target fauna species inhabit or an environment that accurately represents these conditions
• resources, equipment and materials:
  • target fauna
  • tools and equipment required for fauna observations
  • personal protective equipment required while conducting observations
• specifications:
  • workplace policies, procedures, processes and instructions
  • specifications for fauna recognition activity
  • legislation/codes of practice relevant to fauna and environment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to evaluate and coordinate a response to natural resource emergencies involving fauna.

This unit applies to working within own area of responsibility in a response to a wildlife emergency. These individuals are required to take responsibility for their own work and take limited responsibility for other workers and possibly volunteers.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate natural resource emergency
- implement and coordinate response to emergency in accordance with enterprise procedures and health and safety requirements
- follow enterprise procedures to ensure the safety of self, other personnel, the general public and the wildlife
- determine management options including returning animal to wild or temporary captive management, according to authority and enterprise policies and procedures
- follow instructions from veterinarians or authorities to care for animal
- remove and dispose of animal carcases in accordance with authority instructions
- complete debrief and prepare reports to enterprise standards
- apply workplace health and safety policies and procedures when implementing emergency plans
- apply appropriate animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- health risks associated with animals
- public relations and media management
- incident management systems
- State/Territory and local wildlife emergency authorities and organisations
- local authorities for wildlife emergencies
- potential biosecurity risks associated with wildlife rescue operations
• basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to prepare a fauna management plan including controlling or maintaining fauna populations.

This unit applies to managers of natural areas and technical specialists who manage and provide advice on fauna populations.

Firearms licensing conditions may apply to this unit. Specific determination should be sought through the relevant State or Territory.

Scientific licenses may be required if the management plan involves endangered or threatened species or critical habitats. Specific determination should be sought through the relevant State or Territory.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

| 1. Assess fauna populations | 1.1 Conduct surveys for distribution, ecology, viability, genetic diversity and threats  
1.2 Determine increase or decrease in species population size and range  
1.3 Assess desirability of the population change in terms of impact on immediate environment  
1.4 Assess condition of the environment and habitats for ongoing support of the species  
1.5 Research species numbers in other locations to determine significance of local population  
1.6 Assess attitudes of stakeholders to the species to determine acceptable range of population management options  
1.7 Complete a cost/benefit analysis of population management options |
| 2. Prepare management plan | 2.1 Develop plan of management from assessment  
2.2 Prepare submissions for funding to implement the management plan  
2.3 Assess plan of management in terms of costs and available funds, according to enterprise procedures |
| 3. Control or maintain fauna population | 3.1 Develop plan to control or maintain species into a series of intervention measures in accordance with resource constraints and legislative requirements  
3.2 Implement measures to manage population according to legislative requirements  
3.3 Obtain permits for population management according to legislative requirements  
3.4 Inform stakeholders and staff about population management measures, according to enterprise procedures  
3.5 Ensure management measures comply with work health and safety, animal welfare, biosecurity and environmental sustainability policies and procedures  
3.6 Ensure staff are trained and, where required, licensed to manage population  
3.7 Manage incidents with species according to legislative, enterprise, work health and safety and public safety requirements  
3.8 Monitor and adjust management plan and record results in accordance with legislative and enterprise requirements |
Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- assess fauna populations and their habitat
- assess the impact of fauna population on the environment
- determine the stability and importance of fauna populations for their species
- plan intervention measures to improve species distribution, habitat and survivability
- prepare a fauna management plan in accordance with legislative requirements and enterprise procedures, including informing staff and stakeholders
- implement plan to control or maintain fauna populations
- develop workplace health and safety procedures within the management plan
- incorporate biosecurity procedures in the management plan
- apply animal welfare practices when managing fauna populations
- apply appropriate sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- legislative and enterprise requirements
- ecology of species, habitats, predators, competitors
- survey and assessment techniques
- key anatomical and behavioural characteristics and reproduction patterns of species
- signs and symptoms of health issues in the species
- management planning
- requirements of licences for scientific, educational and conservation activities
• requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to assist with prescribed burning for agricultural or natural resource management purposes.

This unit applies to personnel participating in lighting and conducting prescribed burns under direct supervision.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- prepare machinery and equipment to enterprise requirements before burning
- continually monitor weather conditions throughout the burn
- use personal protective equipment as required and check, clean and store on completion of the burn
- identify appropriate safe escape routes throughout the burn
- maintain communication with supervisor and other staff at all times throughout the burn
- carry out clean up operations according to supervisor instructions to enterprise standards
- apply work health and safety procedures throughout the burn.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- fire behaviour
- extinguishing media and equipment
- communication equipment and procedures
- burning tactics and techniques
- assets that need protecting throughout the burn
- fire hazards, safety techniques
- organisation’s operating procedures for prescribed burn
- contingency plans and emergency procedures for the burn
• purpose and use of personal protective equipment
• work health and safety policies and procedures relevant to prescribed burning
• key concepts of work health and safety and environmental legislative and enterprise requirements.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and manage wildfire hazard reduction programs in accordance with enterprise procedures, local fire agencies, work health and safety policies and legislative requirements
- rate wildfire risks to the environment, buildings, structures and cultural sites according to fuel loads, climate, location, accessibility and ecology
- develop effective strategies for wildfire hazard reduction that comply with local fire agency and regulatory requirements
- plan wildfire hazard reduction programs that take into account local fire history, climate fuel loads, location and accessibility
- review hazard reduction plans, strategies and operational procedures with other agencies to enterprise and regulatory requirements
- maintain records of pesticides and chemical agents used, hazard reduction and fire incidents according to enterprise procedures
- manage consultation with local community to ensure their support for program
- use industry standard terminology
- apply work health and safety policies and procedures in the planning and implementation of wildfire hazard reduction strategies
- apply biosecurity measures to wildfire hazard reduction planning
- incorporate appropriate sustainability practices in wildfire hazard reduction planning

Knowledge Evidence

The candidate must demonstrate knowledge of:

- wildfire prevention strategies
• contact details for local fire agencies in the case of an emergency
• local authorities, agencies and other land users
• hazards associated with wildfire prevention strategies
• fire behaviour in a rural/bush environment in known climatic conditions of the specified area
• range of equipment applicable to wildfire hazard reduction
• approved, safe use of equipment
• environmental, public health and safety issues
• types of chemical and biological hazards and how they should be handled
• the local fire history, fuel loads, climate, location, accessibility
• geophysical systems and ecology of the area
• organisational procedures and priorities for wildfire hazard reduction programs
• work health and safety, local fire agencies and legislative requirements that apply to prescribed burns

Assessment Conditions

Assessment must take place in a simulated environment.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to plan and monitor plans for prescribed burning in areas associated with fuel management and for the conservation of ecological and cultural assets.

The unit includes the identification of advantages and risks in burning for fuel management, identification of ecological and cultural assets and values and the conducting, monitoring and evaluation of a prescribed burn.

This unit applies to individuals whose job roles include preparing and monitoring plans for prescribed burning for fuel management taking into consideration the ecological and cultural assets and values of the target area. Work is undertaken without supervision. They may also have responsibility for the work of others involved in the program.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan, monitor, evaluate and report prescribed burning according to organisational procedures and legislative requirements
- identify wildfire hazards and risks of wildfire impacts
- identify ecological and cultural assets that may be affected by burning and preparation for burning activities
- develop and meet objectives for prescribed burn strategies, tactics and outcomes
- minimise environmental impact
- minimise impact on cultural assets
- recognise and consult with stakeholders
- research and apply lessons of history of burns in the area or site
- apply work health and safety legislative requirements to prescribed burn plans

Knowledge Evidence

The candidate must demonstrate knowledge of:

- wildfire hazards and risk management strategies
- prescribed burning strategies
- basic wildfire behaviour
- legislation relevant to wildfire hazard reduction, cultural heritage and protection of flora and fauna
- effects of fire on vegetation, fauna and fuel accumulation
- effects of fire on areas and places of cultural significance
- resource requirements to conduct burning activities
• risks in burning for fuel management

**Assessment Conditions**
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to design a hydroponic system. It applies to those who design systems for hydroponic production of horticultural crops.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Carry out preliminary research</td>
<td>1.1 Research type of crop to be grown based on sound marketing principles</td>
</tr>
</tbody>
</table>
## Performance criteria

### 1. Develop a plan for a hydroponic system

1.2 Research the growing requirements of the crop based on sound horticultural practices  
1.3 Establish the associated risks of growing a particular crop based on sound horticultural practices  
1.4 Calculate estimated yield and crop turnover time from historical data and research statistics  
1.5 Determine quantity of the plants to be grown based on a cost benefit analysis

### 2. Assess the suitability of a site

2.1 Assess the physical characteristics of the site  
2.2 Ascertain and assess the proximity of the site to markets  
2.3 Identify legal requirements in relation to the site and the development of a hydroponic farm  
2.4 Identify and consider the environmental implications of developing a hydroponic farm on the site

### 3. Select the required system

3.1 Research main types of hydroponic systems  
3.2 Carry out analysis on each type of system for the chosen crops  
3.3 Carry out a cost/benefit analysis on each system for each type of crop  
3.4 Determine the type of hydroponic system to be installed

### 4. Design the hydroponic system

4.1 Select and document the water collection and storage system on the plan  
4.2 Select the irrigation system and its components according to the required volume of water and flow rate  
4.3 Select and document the fertigation system  
4.4 Determine the dimensions of the controlled environment structure following full consideration of the relevant factors  
4.5 Determine the environmental control system and document specifications on the plan

### 5. Prepare and document the design

5.1 Develop a design plan  
5.2 Determine specifications and detailed costings with the help of experts, if required  
5.3 Develop and document detailed production procedures and schedules  
5.4 Present documentation to the client for final approval
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- research the growing requirements, risks and returns of the proposed crop
- select, design or customise a system for the site and purpose
- survey the site for suitability and environmental impacts, and gain approvals
- develop a design plan
- present a design plan to clients

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for developing a hydroponic system plan
- advantages and disadvantages of the different equipment used in hydroponic systems
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- legislation and regulations relating to the establishment of a hydroponic system
- plant growing media choices, their properties and enterprise specifications
- technical requirements and operating parameters of recirculated and non-recirculated systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the level of work required to maintain the cultural place
- prepare for and carry out maintenance activities in accordance with organisational, cultural and environmental requirements
- report deterioration or damage to place to supervisor
- report incidents of breaches of legislation including vandalism
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential threats to area
- techniques of site maintenance and protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- observe and accurately identify species of animals or plants in a natural area
- record and report observations in required format
- carry out a survey of plants and animals in a natural area in a manner that minimises disruption or degradation to the environment
- apply work health and safety practices in the context of own work
- use maps or GPS to accurately plot or describe locations

Knowledge Evidence

The candidate must demonstrate knowledge of:
- criteria used to group species
- common, Indigenous and scientific names of plants or animals
- biological species occurring in the study area
- undesirable plants (weeds) and animals
- the basic requirements for ensuring the welfare of animals included in the observation activity described in the relevant Codes of Practice, if animals are being observed

Assessment Conditions

Assessment must comply with community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for assessment.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and provide appropriate information on cultural knowledge
- investigate cultural knowledge in accordance with cultural protocols
- determine relationships between land features, seasons and spirituality
- identify plants, animals and resources used for medicine and food in a given area
- provide information on cultural knowledge in accordance with cultural protocols
- follow cultural protocols when carrying out work
- collect plant and animal samples in accordance with legislative requirements and animal welfare codes of practice, where appropriate
- apply environmentally sustainable work practices when working on Country
- identify individuals who are authorised to possess cultural knowledge
- use common and Indigenous names for plants and animals
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- plant and animal uses and significance relating to a particular Community, group or region
- common and Indigenous names for plants and animals significant to the Community
- cultural protocols relevant to region, Community and scope and type of cultural knowledge
- role and rights of Indigenous peoples in maintaining and controlling cultural knowledge
- Indigenous protocols for identifying individuals who are authorised to possess cultural knowledge
- Intellectual and cultural property rights
- The basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

**Assessment Conditions**

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to develop awareness of, and apply the protocols of Aboriginal culture, including the need to identify the appropriate persons when approaching a Community and the cultural and social protocols associated with that task.

This unit applies to following cultural protocols and details the specific cultural, gender and kinship sensitivities of working in Aboriginal Communities and on Country with diverse cultural requirements.

The unit applies to individuals working with lore/law men and women either autonomously or under the supervision and cultural authority of Traditional Owners or Elders for specific Country. They work under broad direction and use discretion and judgement in the selection and use of available resources.

This unit is also applicable to the work of repatriation workers and anthropologists. However, cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and consult with appropriate cultural authorities for a Community, place or site
- identify cultural information, material and cultural expression that is appropriate to be shared
- identify groups to be consulted in relation to owners or custodians of cultural and Community knowledge, information and/or material
- follow cultural protocols for consultation, research and recording information about particular Communities
- show respect and cultural sensitivity towards Aboriginal people, their beliefs, customs, values, lore/law, ceremonies and history

Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural diversity within Aboriginal Communities
- the cultural rights and responsibilities when using Community knowledge, information and material
- Aboriginal cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- customs, history, protocols of the Community with which they are working
Assessment Conditions

Assessment of this unit must be conducted by recognised and appropriate Community Elders and/or Custodians with appropriate assessor qualifications or co-assessed by a qualified assessor in cooperation and discussion with an appropriate with Community Elders and/or Custodians.

Assessors must satisfy the current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to use traditional Aboriginal controlled burning practices on Country to manage natural and cultural resources.

This unit applies to Aboriginal sites workers and Land Managers who carry out burns on Country as part of their job role. They work under broad direction and use discretion and judgement in the selection and use of available resources.

The unit involves and requires a high level of awareness and experience with Aboriginal culture and communities and the need to observe Aboriginal cultural protocols. It is expected that this work will be undertaken as part of a team working under supervision in most cases.

Cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Indigenous Land Management (ILM)
## Elements and Performance Criteria

<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

### 1. Plan burn activities

1.1 Develop working relationships that will assist in the planning and implementation of traditional Aboriginal cultural burning on Country with stakeholders

1.2 Identify and consult appropriate cultural authorities and obtain approval to be on Country

1.3 Obtain cultural knowledge through the appropriate knowledge holder or Cultural Manager

1.4 Identify ceremonial requirements for fire practices necessary for inclusion in burn plan

1.5 Develop a burning plan and schedule for the target area based on traditional cultural knowledge of seasonal conditions, historical information on burns, Aboriginal ceremonial requirements, legislative requirements, environmental sustainability, biosecurity and work health and safety considerations and safety concerns

1.6 Advise local fire services and agencies of proposed burn plan

### 2. Protect life, property and conserve fauna and flora species in burn area

2.1 Implement burn according to Aboriginal cultural burning techniques and consistent with the burn plan and schedule

2.2 Exclude visitors from target areas, entertainment areas and areas possibly affected by smoke or risk from escaping fire

2.3 Advise neighbours and agencies of the intention to burn to ensure safety and maintain client relations

2.4 Protect Aboriginal sites, assets and entertainment areas according to Aboriginal cultural protocols and fire industry practices

2.5 Apply fire breaks to the area to maintain control of the fire and burn intensity

2.6 Remove animals in danger in the burn area before starting the controlled cultural burn, where possible

2.7 Assess flora for impact on fire-sensitive communities and species

### 3. Burn defined areas

3.1 Maintain radio communication with other workers in the area throughout the burn

3.2 Use appropriate personal protective equipment and follow work health and safety policies and procedures during the burn

3.3 Assess weather forecasts and current weather conditions to determine appropriate conditions and timing for burn

3.4 Use appropriate ignition techniques, patterns, fire control and safety procedures to conduct the burn

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:
- identify appropriate cultural authorities for a Community, place or for a site
- develop working relationships with Aboriginal and non-Aboriginal stakeholders
- apply traditional Aboriginal cultural burning techniques
- follow burn plans and control burning operations according to enterprise procedures to:
  - protect Aboriginal sites, assets and entertainment areas to Community protocols and requirements
  - protect life, property and conserve fauna and flora species during burning
  - achieve the correct intensity of burn
  - maintain biosecurity
  - meet environmental sustainability requirements
  - adhere to organisational safety and environmental protection policies and procedures
  - select existing, and construct additional fire breaks according to enterprise requirements to maintain control of fire
  - ignite fires according to burn plan and enterprise procedures
  - use radio communication according to enterprise procedures
  - apply appropriate animal welfare practices when handling and moving animals in preparation for the burn
  - follow work health and safety policies and procedures throughout the burn process to protect self and others
Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural Authorities within the Community
- traditional Aboriginal rationale and techniques for cultural burning
- the life cycles of flora and fauna of forests/plantations and effect of burning operations
- required intensity and appropriate frequency of fire
- sequence, location and pattern of recent and historical fire burns
- Aboriginal ceremonial requirements for fire practices
- seasonal cycle of weather patterns
- work health and safety policies and procedures
- emergency procedures
- ignition techniques and patterns
- fire control techniques
- emergency fire services
- organisational and enterprise policies and procedures for conservation of places of cultural significance
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to own prescribed burns
- sustainable environmental practices
- safety procedures for conducting fire operations
- enterprise work health and safety policies and procedures for carrying out controlled burning
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- develop working relationships with stakeholders in cultural sites
- canvass views in a culturally sensitive way to determine the heritage value and preservation issues of a cultural site
- observe cultural protocols in dealing with stakeholders and land managers
- develop action and emergency plans to mitigate and manage the risk of damaging incidents or loss of heritage value
- document the submissions to implement conservation and restoration activities and support the incident management activities
- supervise staff in performing restoration and conservation activities
- include work health and safety procedures in operational plans and training to manage incidents
- ensure plans include environmentally sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- enterprise policies and procedures for conservation of places of cultural significance
- operational activities engaged for conservation, restoration and risk management
- Indigenous protocols, consultation processes and networks
- budgetary and financial approval processes
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- survey an area for landforms and sites that may hold cultural significance
- assess any physical signs, and source local information on human activity in the area, to indicate culturally significant sites
- ensure cultural protocols are followed
- maintain field notes on the location and details of sites in accordance with enterprise procedures or guidelines
- implement protection measures pending further investigation
- develop and document an assessment report for places of cultural significance according to enterprise and legislative standards
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of cultural places in land based, coastal zones and marine parks or reserves
- threats to cultural places from both natural causes and human activity
- application of State or Territory and Commonwealth legislation relevant to Indigenous land management
- enterprise procedures for reporting places of potential significance
- relevant protection measures for significant sites
- methods of locating position of site
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- gather information to support the proposal for a negotiated outcome for a given area of land
- conduct culturally appropriate consultation with stakeholders
- determine the relevance and implications of applicable acts and legislation
- contribute to the development of the proposal
- provide feedback on the development of proposal

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant State land and sea resources acts and legislation
- relevant Local Government land and sea resources acts and legislation
- relevant Commonwealth land and sea resources acts and legislation
- roles of different organisations in land and sea management
- the existence of alternative forms of input and control in land and sea management

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to record and document Community history.

All work is done according to enterprise procedures and cultural protocols.

This unit applies to individuals who demonstrate autonomy, judgement and limited responsibility for others in known or changing contexts.

Cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record and document Community history in accordance with Community protocols and permissions
- prepare for interviews by identifying topics, people to be interviewed, questions and interview processes and checking equipment
- identify appropriate individuals or groups for interviews and obtain necessary permissions
- use communication skills and language appropriate to the interviewee
- set up all recording equipment according to enterprise procedures and needs of interview processes
- conduct either individual or group interviews to elicit a wide range of information
- take detailed notes of conversations for further reference and to help source supporting information
- transcribe and edit information, using supporting documentation where possible
- store recorded media and transcripts to maintain recording quality and accuracy and security and privacy requirements according to enterprise procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- background and context of subject areas covered in the interviews/sessions
- objectives of the natural and/or cultural resource research
- range of communication approaches
- relevant cultural protocols
- enterprise procedures relating to the recording, management and storage of oral and community information
Assessment Requirements for AHCILM404 Record and document Community history

Date this document was generated: 3 September 2020

- recording techniques and media
- set-up and use of microphones and video cameras
- use of still cameras
- Community protocols, customs and Cultural Authorities for recording cultural knowledge and history

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current Standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- outline effects of current work related issues for Indigenous Communities and individuals
- determine the impacts of competing factors on self-esteem and identity
- design work practices to accommodate cultural identity
- incorporate elements to boost self-esteem of Indigenous workers
- respond to workplace issues where work practices are poorly aligned to cultural identity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Indigenous Communities with whom the organisation works, and their protocols
- cultural customs and heritage
- connections between self-esteem, identity, Community and work
- Indigenous history of particular Communities
- legislation and policies impacting on Indigenous Communities and organisations
- strategies to support development of workers’ self-esteem and identity

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use a range of electronic and manual recording systems to support research
- identify stakeholders including current tenure, Indigenous history and community interest
- review existing knowledge of national and cultural resources and sites using literature reviews, site inspections, consultation and expert advice
- develop research objectives and research design
- coordinate staff and resources for research project
- conduct field investigations to investigate impacts on fauna, flora and natural resources of the site
- facilitate a consultation and decision-making process
- report on the field investigation to enterprise and legislative requirements
- apply work health and safety practices in field investigations
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of conservation legislation, charters, Codes of Practice relating to natural and cultural resource areas
- systems and processes for assessing significance
- ecology and biological diversity of the area under assessment, including aspects of living organisms, habitats and communities, and interactions between species
- geological diversity including aspects of stratigraphy, palaeontology, paedology, and soil classification of the area under assessment
Assessment Requirements for AHCILM501 Conduct field research into natural and cultural resources

- microbiology including entomology for the area under assessment
- accepted scientific processes, including conservation processes and charters
- major impacts on natural resources, such as geological settings, ecological processes, and interaction between natural and cultural processes
- monitoring requirements including fabric deterioration, damage and likely causes of deterioration and damage
- relevant legislation and agreements that apply to area, including a good understanding of the concepts and potential operation of the Burra Charter
- legislation under which enterprise operates and research is commissioned

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review the cultural resources in the area and level of deterioration
- assess the compatibility of current utilisation with cultural and heritage values
- investigate feasible land uses that maintain the cultural integrity of the site
- carry out a risk assessment for damage/deterioration to cultural sites
- consult with stakeholders according to cultural protocols
- develop strategies for management of cultural resources that take into account cultural and environmental requirements
- apply cultural protocols to investigation and development of policies
- apply enterprise policies and procedures to undertake assessment of resources, consultation with stakeholders and development of new policies
- apply appropriate sustainability practices to management strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the range of conservation strategies for cultural areas
- policies from all levels of government and within the specific region, including those under catchment plans that apply to land management practices
- the application and interpretation of Australian Natural Heritage Charter and the Burra Charter and the interpretation of the charters as they apply to use of cultural resources
- enterprise policies and procedures for carrying out investigations, consultations and development of policies
- design and implementation of consultation processes
- policy analysis and impact statements
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- incorporate the prior assessment of significance into an operational plan
- research traditional building techniques to carry out repairs and maintenance
- seek expert advice to meet special building and conservation requirements from the plan of management
- maintain the cultural and environmental integrity of the site and surrounds during and on completion of building
- supervise the work of others to ensure compliance with restoration plan and requirements
- apply work health and safety practices in the context of own work and the work of others
- apply environmentally sustainable practices in maintenance and restoration works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant concepts of the Burra Charter, heritage and building acts, and other relevant legislation
- conservation architecture techniques applicable to the restoration of cultural places
- interpretation of archaeological reports or assessments of Aboriginal cultural sites and artefacts
- traditional and current building practices
- project management processes
- building or maintenance requirements and specifications
- work health and safety requirements and risk management practices
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- propose a negotiated outcome for a given area of Country according to Community guidelines
- identify implications for an area of Country for government, agency and Community perspectives and issues
- gather and analyse information on a given area to develop an analytical framework for land use
- formulate and communicate proposals for given area of Country according to Community and government requirements
- document and seek endorsement for a proposal that seeks to negotiate an outcome for a given area of Country
- prepare documentation to Community, government and organisational requirements
- follow Community customs, protocols, heritage, Country and culture relevant to proposal

Knowledge Evidence

The candidate must demonstrate knowledge of:

- consultation approaches
- cultural customs and heritage of Country
- application of State land and resources acts and legislation relevant to Country
- relevant international and national conventions and agreements
- management and use of the resources of the specific area
- processes and proposals for resolving issues regarding access and use of land according to consultation outcomes and organisational procedures
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- define and apply cultural processes within an Indigenous organisation according to Community and organisational guidelines and best practice procedures
- recognise differences between Indigenous and non-Indigenous management processes
- identify the accommodation required to meet non-Indigenous business requirements through Indigenous management processes

Knowledge Evidence

The candidate must demonstrate knowledge of:
- contemporary management practices and styles
- Indigenous management practices and styles
- business planning and strategic planning practices
- Candidates must demonstrate an in depth knowledge of legislation and regulations that apply to management of an organisation.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to install and maintain basic electric fences.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
## Elements

**Elements describe the essential outcomes.**

**Performance Criteria**

1. Prepare for basic electric fencing operations
   - 1.1 Confirm work instructions with supervisor
   - 1.2 Identify health and safety hazards and risks in the workplace and report to supervisor
   - 1.3 Select tools and equipment appropriate to meet job requirements
   - 1.4 Carry out routine pre-operational checks of tools
   - 1.5 Identify faulty or unsafe tools and segregate for repair or replacement
   - 1.6 Select, check and fit appropriate personal protective equipment

2. Perform basic electric fencing operations
   - 2.1 Identify and recover re-useable electric fencing materials
   - 2.2 Identify and carry out repair requirements according to instructions
   - 2.3 Calculate electric fencing wire requirements
   - 2.4 Erect electric fences to contour
   - 2.5 Install electric fence components according to manufacturer instructions

3. Complete basic electric fencing operations
   - 3.1 Fill post holes to remove potential hazards and minimise environmental impact according to workplace procedures
   - 3.2 Clear and tidy work site and dispose of all non-reusable materials according to environmental procedures
   - 3.3 Transport and store tools and re-usable materials
   - 3.4 Report on further work or repair requirements according to workplace procedures

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<table>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have carried out basic electric fencing operations, including:

- identified health and safety hazards and risks and reported to supervisor
- interpreted work plans and confirmed with supervisor
- selected electric fencing tools and equipment and carried out pre-operational checks and replaced or repaired identified faulty equipment
- selected, checked and correctly fitted personal protection equipment (PPE)
- calculated and measured electric fencing wire requirements
- identified and recovered useful electric fencing materials
- erected and repaired electric fencing according to instructions
- minimised environmental impact
- cleaned and tidied up work area, stored tools and equipment and disposed of waste according to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- uses and structures of electric fence types
- uses and types of standard fencing tools, materials and their maintenance and storage
- common electric fencing hazards and safety
- portable and mains power electric fences
Assessment Requirements for AHCINF201 Carry out basic electric fencing operations

- installation, construction and repair techniques for electric fences
- estimating and calculating electric fencing requirements
- relevant work health and safety and environmental code of practice for electric fencing
- health and safety in the workplace, including:
  - PPE required for working on electric fences
  - environmental considerations when disposing of waste materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an outdoor environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - electric fencing materials, tools and equipment
  - PPE
- specifications:
  - workplace documents, including procedures, processes, instructions and job specifications
  - manufacturers' operating instructions for fencing equipment
  - legislation/codes of practice for fencing
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have installed and maintained farm fencing, including:

- identified health and safety hazards and risks and reported to supervisor
- selected, checked and correctly fitted personal protective equipment (PPE)
- selected materials, tools and equipment and arranged for availability on site
- conducted pre-operational checks and repaired or replaced tools and equipment identified with faults
- assessed and confirmed farm fencing requirements and confirmed with supervisor
- dismantled and recovered usable materials from existing fence
- installed and repaired fence posts and stays, erected fences, installed and tensioned fencing wire and netting, installed and checked gates and components
- recorded work activities according to work instructions
- cleaned up the fencing site and removed and disposed of, or recycled, waste according to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- designs and purpose of a range of conventional fencing
- wire types, knots, tensions applications and limitations
- common hazards involved in fencing installation, maintenance and repair
• tools and equipment used for fencing and their safe operation, storage and maintenance
• fencing materials manufacturers specifications and guidelines
• health and safety in the workplace, including:
  • PPE required for working on farm fences
• environmental considerations when disposing of waste materials.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in an outdoor environment or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • fences, fencing tools, materials and equipment
  • PPE
• specifications:
  • workplace documents including procedures, instructions and wire specifications
  • manufacturers’ operating instructions for fencing equipment
  • legislation/codes of practice for fencing
• relationships:
  • supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be observed and repairing properties and structures, in a situation that does not require the specialist skills of another trade.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- interpret and apply task instructions
- communicate with work team and supervisor
- select, prepare and safely use of a broad range of tools
- carry out routine maintenance to infrastructure, structures and facilities
- store or dispose of unused or waste materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics, capabilities and limitations of materials, equipment and tools
- operation of water taps and reticulation systems
- types of building cladding and finishes, purpose and use
- identification of defects and appropriate repair methods
- appropriate selection of repair materials
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice and procedures with regard to protection of the environment
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

The candidate must provide evidence that they can:

- identify and report hazards and use safe work practices
- confirm work plan and priorities with enterprise supervisor or manager
- assess the nature of required repairs and maintenance
- read and interpret maps, plans, site drawings and simple technical drawings
- carry out building or construction work efficiently and safely
- confirm that the completed or repaired structure meets the standard specified
- operate a broad range of tools and equipment
- complete minor earthworks to specifications
- minimise environmental impacts and dispose of waste appropriately
- estimate and calculate volumes, usage and measurements
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- machinery and equipment required to carry out property improvements, construction and repairs
- types of building materials required to carry out property improvements, construction and repairs
- concreting procedures and techniques
- wood and steel fabrication procedures
- drainage requirements around structures, tracks and roads
- legislative requirements with regard to construction and structural improvements
• types of building cladding and finishes, purpose and use
• relevant Codes of Practice with regard to protection of the environment
• work health and safety and environmental legislative and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to plan, construct and maintain an electric fence.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer’s specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- develop an electric fencing plan for the enterprise
- identify hazards and implement safe operating procedures
- calculate and measure fencing requirements and calculate costings off the fencing plan
- read and interpret plans and site maps and mark out fence lines
- construct an electric fence that meets specifications and the needs of the enterprise
- operate fencing tools and construction equipment
- test and monitor the electric fence for earthing and current flow, resistance and leakage
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- basic operation of electric fences including earthing and current flow, resistance and leakage
- differences between portable and mains power
- issues affecting electric fencing in relation to the whole property plan
- range of electric fencing designs, construction methods and materials
- dangers posed by electricity to personnel and livestock
- conditions under which electric fences may cause fire
- safe methods for diagnosing routine faults
- common electric fencing hazards and safety precautions
- relevant State/Territory legislation and regulations regarding electric fences
- work health and safety legislative requirements
• relevant codes of practice with regard to protection of the environment

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- site the fence line according to property or land management plan
- estimate, cost and source fencing materials and arrange delivery
- identify hazards and implement safe work practices
- carry out fencing operations safely and efficiently
- construct a fence that meets specifications in plan or contract and is within tolerances for materials
- construct gate assemblies and swing gates
- string and strain wires to manufacturer’s recommended tension
- use and maintain fencing machinery and equipment
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues affecting property fence planning and construction
- procedures for planning fencing in relation to the whole property plan
- range of fencing designs, construction methods and materials
- types of fencing construction tools and equipment
- fencing materials and costings
- common fencing hazards and safety precautions
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice with regard to the protection of the environment
- hazard identification, assessment and control
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and implement safe systems of work
- read labels and signage to differentiate between extra low voltage and other electrical systems
- read and follow manufactures manuals and enterprise procedures for extra low voltage wiring
- size cables and wires to suit calculated load
- install wiring systems
- check and notify completed installation activities
- follow enterprise work health and safety procedures and safely work with extra low voltage systems

Knowledge Evidence

The candidate must demonstrate knowledge of:
- basic electricity and electrical principles relating to extra low voltage wiring
- applications, materials and techniques relevant to the industry sector
- isolation and tagging procedures
- computerised controller systems
- enterprise policies and procedures
- testing equipment and procedures
- relevant legislation and guidelines for installing extra low voltage wiring.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- advise public on park or reserve access and activities
- provide information on safety requirements
- monitor visitor activities to ensure compliance with park or reserve conditions of entry, safety and environmental requirements
- act on non-compliance activities promptly
- report incidents according to organisation procedures and legislative requirements
- use standard industry terminology
- follow work health and safety policies and procedures and monitor visitor activities to ensure safety of general public

Knowledge Evidence

The candidate must demonstrate knowledge of:

- limits to personal and legal authority to act on non-compliance with site access conditions
- enterprise procedures, work health and safety and legislative requirements
- enterprise security systems and communication equipment
- conditions for visitors entering park

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to construct access tracks and clear vegetation on rural land.

This unit applies to workers in land management who are required to implement erosion control principles and apply specialised earthmoving techniques to fine tolerances. Work is often carried out in varied conditions and landscapes that require operators to develop skills that are unique to this sector.

All work is undertaken in accordance with relevant national, State, and local legislation and/or regulations.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Licenses for vehicles and machinery may be required for this unit. Specific determination should be sought through the relevant State or Territory.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- select and prepare equipment
- determine control points, required grades and water crossing points and structures from field observations
- confirm that plans comply with legislative requirements by checking with a supervisor or authorised person
- construct tracks to organisational standards
- excavate, transport, dump and compact road material according to job sequence and endorsed industry practices
- finish track surface
- clean worksite to organisational standards
- operate machinery according to manufacturer and safe operating procedures
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence
The candidate must demonstrate knowledge of:
- erosion and sediment control standards, principles and issues that apply to the construction of the access track, including:
  - soils and soil formation
  - earthmoving principles
  - total catchment issues
  - how to manage peak water flows
- subsurface and surface drainage principles and systems
- key concepts of the relevant wildlife, environmental, planning, ground water legislation
- biosecurity in the context of own work
- permits and licenses required for the construction of access tracks

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define the scope and criteria on which to base inspection
- define the hazards and risks to work health and safety and the environment associated with the inspection
- conduct inspections, complying with statutory requirements and enterprise protocols for entry to private property
- conduct inspections in a manner that minimises environmental impacts
- operate equipment and vehicles according to organisation procedures
- establish environmental impacts caused by the presence of the target
- document the inspection findings and recommend follow up actions
- apply work health and safety practices in the context of own work
- take precautions to minimise environmental risks during inspection

Knowledge Evidence

The candidate must demonstrate knowledge of:

- risk management processes
- characteristics of inspection targets
- inspection procedures and techniques
- monitoring techniques
- reporting protocols
- relevant legislative and regulatory requirements including environmental protection legislation
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to dive to support scientific research, monitoring and inspection roles associated with places or areas of significance.

All work is undertaken to legislative, manufacturer, enterprise and code of practice requirements.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

This unit requires compliance with the current Australian Standard for Occupational Diving Operations: Scientific Diving.

Dive certificates and licensing apply for this unit and specific determination should be sought from the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

| 1. Plan diving operations | 1.1 Determine dive objectives  
1.2 Assess number and type of dives to develop a dive program that will meet objectives  
1.3 Determine equipment and personnel required for dive operations  
1.4 Consult appropriate people about the dive objectives and proposed program |
| 2. Prepare for diving operations | 2.1 Obtain equipment and personnel required for dive operations  
2.2 Obtain appropriate notification and consents for dive plans  
2.3 Check equipment condition  
2.4 Send faulty equipment for repair or replacement  
2.5 Assess requirements for and source consumables  
2.6 Check personnel for competence and possession of a current medical clearance  
2.7 Develop safety and emergency procedures for the dive program  
2.8 Conduct a safety hazard analysis and risk assessment |
| 3. Conduct dive | 3.1 Establish communications procedures for all dives  
3.2 Perform pre-dive checks  
3.3 Complete assessment of environmental factors before entering the water  
3.4 Conduct dives within the parameters of the special dive plan, including entry, descent, working on dive objective and exit  
3.5 Amend dive procedures within enterprise requirements, codes of practice and personal authority in light of dive conditions, and any changes to dive objectives  
3.6 Monitor dive conditions and suspend or cancel dives where safety or equipment operation considerations warrant  
3.7 Suspend dives where personnel have completed allowed number of dives according to no-decompression limit tables  
3.8 Remove equipment from site at completion of dives  
3.9 Log dives  
Carry out dives according to Australian Standard |
| 4. Debrief diving team | 4.1 Review procedures and outcomes after dive  
4.2 Amend procedures and dive plans  
4.3 Record dive debriefing |
| 5. Check and store equipment | 5.1 Check dive equipment for condition and operation  
5.2 Send faulty equipment for repair or replacement  
5.3 Test and store equipment |
Element | Performance criteria
--- | ---
5.4 | Record equipment use
6. Review diving program | 6.1 Review dive plan in light of debriefing, outcomes achieved, risk assessments and safety analysis and future requirements 6.2 Record and report review conclusions
7. Respond to diving incidents | 7.1 Monitor dive operations to identify potential or actual incidents 7.2 Suspend or cancel dive operations where potential or actual maladies have been identified 7.3 Ensure a rescue plan has been developed for all dives and that the plan has been communicated to the dive team as part of the pre-dive briefing 7.4 Apply diver first aid to injured or distressed personnel 7.5 Notify emergency authorities where assistance is required 7.6 Review procedures and dive plan in light of risks identified and potential or actual malady 7.7 Record all incidents on the enterprise register

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

**Unit Mapping Information**

This unit is equivalent to AHCLPW305A Perform diving for scientific purposes.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan to carry out a dive
- prepare to dive
- carry out pre-dive checks and safety risk assessments
- monitor dive conditions, respond to incidents and amend dive procedures if necessary
- debrief dive team
- store diving equipment
- dive safely and according to organisational policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- interpretation of no-decompression limit tables to determine maximum length and number of dives allowed
- the physics of diving
- dive equipment
- safety risks associated with scientific dives
- dive planning
- Australian Standards for occupational diving
- rescue procedures
- oxygen administration procedures
- agency standing orders for notification
- emergency service procedures
- dive communication procedures and equipment
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish client intentions and requirements
- communicate the process, policies and relevant legislation to the applicant
- discuss the scope and application of the submission in light of preliminary discussion
- present findings and feedback to the applicant
- provide further information and explain the appeal process if application is rejected
- explain provisions within Federal and State legislation or relevant land use to landholder
- interpret aerial photographs, maps and geographical information systems to identify particular landmarks and areas
- undertake investigations to determine scope and impact of request

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevance and impact of Federal and State legislation and regulations related to land use
- catchment characteristics of land in question
- vegetation types native to area
- signs and landmarks in aerial photographs, maps and geographic information system (GIS)
- agency policies and procedures
- formats for presenting information to clients
- process for applying for changes in land use and process for appeals if application is rejected
Assessment Requirements for AHCLPW401 Process applications for changes in land use

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish the cultural value and significance of the place
- prepare or source checklists for inspection
- inspect the place to establish a schedule of maintenance and monitor site management
- prepare reports to enterprise standards
- submit report and recommendations based on requirements of contract including a review of existing management systems
- monitor surroundings to establish restoration, reclamation, modification and protection required in the immediate area
- conduct safety hazard analysis and risk assessments according to organisational policies and procedures
- monitor stakeholder views for impact on cultural significance, approach to maintenance, restoration and modification, and current and proposed uses of the place or area
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant aspects of Australian Heritage Commission legislation and requirements, State or Territory Heritage requirements and World Heritage requirements
- relevant environmental standards and best practice guidelines
- application of national and International Charters of the International Council on Monuments and Sites (ICOMOS), including the Burra Charter to monitoring of cultural places
- environmental legislation and codes of practice
Assessment Requirements for AHCLPW403 Inspect and monitor cultural places

- processes of environmental and artefact deterioration and damage
- maintenance, restoration and modifications that could be applied to place or area
- threats to place or area, including visitor impacts

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to access geographical information and incorporate it onto maps for use in land management.

This unit applies to those whose job role includes preparing maps by hand or by using geographical information systems (GIS) for land management purposes.

This unit applies to individuals who have limited responsibilities for others in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source data sets that provide the required information
- validate the data for currency and compare to ground observations
- present data to workplace requirements
- incorporate data onto a map
- use drafting and editing processes to ensure accuracy of data and maps and to ensure reports and maps meet organisational standards
- provide a map key and any supporting information required
- evaluate maps for suitability for purpose and value in making land management decisions

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land management processes relevant to map being prepared
- mapping principles and conventions including layout, legends, scale, media, printing and presentation styles
- use of software and hardware such as GIS, computer-aided design (CAD), desktop publishing, desktop mapping, multimedia, graphic animation, plotters and printers

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use monitoring techniques suitable for the environment and species
- install and use monitoring equipment
- develop systems to capture, maintain and analyse data
- make observations and record data on species diversity and abundance
- analyse data
- ensure the monitoring process is correctly targeted and implemented

Knowledge Evidence

The candidate must demonstrate knowledge of:

- ecosystems
- plant and animal classification
- monitoring systems for flora, fauna and microorganism populations
- accepted scientific processes for monitoring biodiversity
- set up and use of monitoring equipment
- data recording and analysis techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to develop a management plan for a designated area.

This unit applies to land managers who are responsible for the development of management strategies and the documentation of management plans with a defined emphasis on flora or fauna and covering the range of biodiversity present in a designated area.

These individuals apply judgement and have defined responsibilities in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

<td>1. Define the need for a management plan</td>
<td>1.1 Identify management plan objectives for the designated area</td>
</tr>
</tbody>
</table>
## Element | Performance criteria
---|---
1. | 1.2 Consult with client to achieve agreement on brief  
1.3 Identify planning team, including specialists and consultants
2. Undertake preliminary planning activities | 2.1 Identify major stakeholders  
2.2 Ascertain availability of specialists to assist in management planning work and prepare contracts  
2.3 Establish timelines for development of the management plan and reporting arrangements to client  
2.4 Identify resources required for the development of management strategies
3. Prepare a site description | 3.1 Identify and map landscape values of the area  
3.2 Identify and map physical features and characteristics of the area  
3.3 Research land uses and determine and record their effects on the designated area  
3.4 Assess and document physical condition of site including civil design concepts, where relevant  
3.5 Document biological characteristics of the site including the existence of native and pest fauna and flora populations, habitat requirements for fauna, seasonal and nutritional influences on lifecycles
4. Analyse site information and description | 4.1 Evaluate information in terms of core principles and objectives  
4.2 Produce site plans, technical reports and maps  
4.3 Determine priorities and key conservation issues  
4.4 Prepare longitudinal projections of continuing impacts  
4.5 Assess land capability  
4.6 Identify and document opportunities and constraints to meeting planning objectives and goals  
4.7 Present to stakeholders and incorporate feedback into planning documentation
5. Identify management strategies | 5.1 Identify management strategies that address defined objectives  
5.2 Design management strategies to alleviate existing impacts, pests, and diseases or to target management actions  
5.3 Cost and compare management strategies to existing budgets and available resources  
5.4 Plan staging of work to prioritise outcomes and management resource allocation  
5.5 Consult with stakeholders and incorporate feedback into planning documentation
6. Prepare the management plan | 6.1 Document site information and management strategies into a draft management plan for consultation
<table>
<thead>
<tr>
<th>Element</th>
<th>Performance criteria</th>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- discuss management plan objectives, deliverables and timeline with client
- prepare a site plan detailing landscape values, physical features and characteristics, past and present land uses, physical condition and biological characteristics
- assess land capability and identify conservation issues on and surrounding the site
- analyse site information and description to assess feasibility of management objectives
- develop and cost recommended actions in line with client requirements
- present a draft management plan to client for discussion
- consult with stakeholders and incorporate feedback into the final management plan
- prepare documentation to enterprise standards and to meet client needs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- civil design concepts
- management planning principles and issues
- environmental assessment, survey and analysis techniques and practical application to a range of habitats and landscapes
- native fauna or flora physiology, habitat requirements, and seasonal and nutritional influences on life cycle
- wildlife habitats associated with the designated area and local geographic region
- pest plant and animal and disease identification, physiology, control techniques, and equipment, pesticides and habitat requirements
- land management strategies including:
- pest management or control techniques
Assessment Requirements for AHCLPW501 Develop a management plan for a designated area

- techniques and strategies for use in the management, rehabilitation and enterprise use of native Australian habitats, species and landscapes
- Indigenous flora regeneration and revegetation techniques, equipment and methods of application in relation to a range of landscape characteristics
- management and rehabilitation techniques for the wildlife and habitat relevant to the designated area
- soil, plant and water testing processes and procedures, interpretation and application of results

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- review existing data on land use changes according to program guidelines
- undertake title searches
- schedule physical inspection with land holder
- collect evidence from the site on potential impacts on species diversity and soil and water quality according to legislative requirements and enterprise procedures
- record any evidence of issues with cultural values of the site
- interpret aerial photographs, maps and geographic information systems
- compile reports to agency standards and make recommendations supported by evidence

Knowledge Evidence

The candidate must demonstrate knowledge of:
- relevant Federal and State legislation and regulations that apply to vegetation clearance and land use
- agency policies and procedures
- formats for reporting
- assessment approaches for area of notification

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine priorities based on areas of high significance, the level of risk to sensitive areas, and the potential for revenue generation
- identify projects from the agreed priorities
- develop budgets for projects and apply for funding
- brief and train staff to carry out tasks and projects safely and in accordance with organisation policies, procedures and the management plan
- apply work health and safety policies and procedures to plans and strategies
- apply biosecurity measures to plans and strategies
- apply appropriate sustainability practices to plans and strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- park or reserve management approaches
- human resource and financial management
- works and project management practices
- policies applying across all levels of government and within the specific region, including those under catchment plans
- Australian Natural Heritage Charter and the Burra Charter and the interpretation of the charters
- good planning practice and enterprise planning procedures and timelines
Assessment Conditions

Any assessment undertaken on Aboriginal Country must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review existing planning documents and sources of information to inform the plan
- identify land management issues and potential solutions
- identify stakeholders to form discussion groups and seek individual input to planning
- organise for the collection and analysis of data to inform planning and monitor progress
- work with stakeholders and technical advisers to develop goals and performance criteria
- develop a draft plan for widespread consultation and feedback
- finalise the regional resource management plan
- complete all documentation to enterprise standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- regional and rural planning concepts from town planning, rural industry planning, and natural resource planning perspectives
- impact of government processes and industry activities in social and economic terms
- consultative techniques that take into consideration cross-cultural and cultural factors relevant to social structures
- local government operations that affect the regional resource management plan
- natural resource management and issues
- sources of technical advice

Assessment Conditions

Assessors must satisfy current standards for RTOs.
Assessment Requirements for AHCLPW601 Coordinate the preparation of a regional resource management plan

Date this document was generated: 3 September 2020

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- apply safe work practices in landscape construction and maintenance
- clean up on completion of landscaping work
- prepare materials, tools and equipment for landscaping work
- undertake landscape work as directed

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for supporting landscape work
- safe work practices
- preparing for landscape work and cleaning up on project completion
- basic construction techniques
- landscaping tools and equipment
- maintenance practices for planted areas
- repair and maintenance of landscape features
- workplace health and safety and safe work practices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can

- read and interpret site and construction plans
- identify work health and safety hazards
- calculate materials required and mark out the area to be retained
- mark out the site and assemble materials
- construct footings and place reinforcing
- construct retaining walls as specified
- clear up the site and dispose of waste

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of low profile retaining walls
- construction approaches and methods
- construction materials for retaining walls
- safe lifting practices for large and heavy components
- methods of disposing soil and waste materials in order to minimise damage to the environment
- the environmental effects of altering water flow when installing retaining walls with or without drainage media
- the environmental impact of soil disturbance when excavating an area to be retained

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for installation and site safety
- read and interpret site plans
- undertake ground preparation for the path
- lay base material and surface aggregate materials
- set the path out
- reinstate site at completion of work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of aggregate path installation
- base and aggregate materials and their performance
- environmental impacts of soil disturbance when installing paths
- types of machinery used in path construction
- types of signs and barriers that need to be erected around the site
- tools and equipment used for installing paths

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- read and interpret site and tree protection plans
- select and operate tools and equipment for protecting trees, constructing and assembling tree protection devices and for traffic control
- measure materials used in constructing and assembling tree protection devices
- assemble and build protection devices
- clean up materials and maintain worksite

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the principles and practices of installing tree protection devices
- how to care and maintain trees during protection operations
- techniques for assembling or constructing a range of tree protection devices
- the application of a range of tree protection devices suitable to the requirements of the tree species
- the damage that can occur to trees during construction work
- principles and techniques relating to the choice of tools and equipment for installing tree protection devices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to set out a site for construction works in accordance with site plans and specifications. This may be done in advance of proposed works or in conjunction with construction works already being carried out.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and specifications
- use mathematical and geometrical principles to mark out a site for construction work
- use a range of surveying instruments
- establish datum points and survey benchmarks on site
- take and verify site levels

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of site set out for landscape works
- how other plans may be referred to in assisting setting out a site
- how to determine if other plans may be referred when setting out a site

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- mark out a site for timber structures and features according to design drawings and specifications
- apply a variety of surface finishes
- establish levels and prepare footings where required
- estimate quantities
- use levelling equipment
- excavate footings
- fix, join or assemble timbers using a variety of recognised methods
- use a power tools efficiently and safely

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the principles and practices for erecting timber structures
- common timber joins
- levelling principles and techniques
- footings for timber structures and their construction methods
- timber fixing methods and products
- timber properties and characteristics

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine project requirements from plans
- calculate material and resource requirements
- organise work and use tools and equipment
- use tools and equipment to construct paving
- clean up, store and maintain tools, machinery and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of paving
- landscape paving materials
- methods and practices for maintaining and repairing paved areas
- methods of work schedule programming
- set-out techniques
- the range and use of required materials, equipment and machinery

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to install and construct a retaining wall.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpret documentation associated with retaining wall projects
- calculate material and resource requirements
- establish survey benchmarks
- excavate and profile soil levels
- use tools and equipment to construct retaining wall projects

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of retaining walls
- environmental impacts of landscape works
- landscape retaining wall materials and construction techniques
- legislative requirements and codes of practice affected by landscape works
- local council permit requirements for landscape works
- materials, equipment and machinery that may be required for the project
- methods and practices for maintaining and repairing retaining walls
- set out techniques
- work health and safety issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare metal structures and features using plans and specifications
- mark out sites for metal structures and features using design drawings and specifications
- use surveying instruments
- establish levels and prepare footings
- excavate footings
- estimate quantities
- use power tools efficiently and safely
- measure and mark lengths of metal components
- fix, join or assemble metal components using a variety of recognised methods
- apply a variety of surface finishes.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing metal structures and features
- levelling principles and techniques
- footings for metal structures and their construction methods.
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- locate existing services and utilities, local by-laws and regulations
- determine tree transplanting requirements from specifications
- prepare tools and equipment, tree and new site for tree transplanting
- calculate tree mass and size for safe removal
- bind and wrap root balls and crowns
- lift, reinstall and stabilise a tree

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of tree transplanting
- causes of stress in trees resulting from transplanting, storage and transportation
- environmental impact of tree removal and transplantation
- principles and methods of operating tree moving equipment
- problems and methods relating to the aftercare of trees during their establishment period
- requirements for securing and signage when transporting trees on road vehicles
- safety procedures and potential hazards of removing and transplanting trees
- the relevant Australian Standards and codes of practice
- tree anatomy and physiology as it relates to transplanting trees
- tree transplanting techniques
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify scope of landscape project work
- identify personnel and other resource requirements
- develop a project plan
- calculate materials and equipment
- control the quality of supplied materials
- monitor, record and report on progress of a works program
- complete a landscape works report
- liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of supervising landscape works
- causes of disruption to work programs and their effect on quality and time schedules
- environmental impacts of landscape works
- hazard identification, assessment and control
- how to conduct site assessment and work site establishment
- issuing of instructions, variations and requests for information
- format, frequency and documentation for job reporting requirements
- legislative requirements and legal responsibilities
- contracts, plans and specifications for project documentation
- supervision techniques of staff and sub-contractors
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- read maps and plans
- record levels of survey items and site features
- orientate a landscape site
- use survey equipment
- analyse surveying and levelling results
- map orientation and levels and issues of levels on a scale plan
- book and log results
- produce scale drawings for designs and costings
- Liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the principles and practices of establishing site levels
- techniques to deal with different garden shapes
- surveying tools and equipment used in landscape projects

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to manage landscape projects.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare landscape project documentation
- develop and cost a bill of quantities
- develop a schedule of works
- organise and manage the works program and works team
- identify sub-contracted work and program
- manage sub-contractors
- identify, negotiate and implement variations to the contract
- identify and rectify non-conforming elements to the contract
- liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of managing landscape projects
- project management principles
- public liability and legal responsibilities
- regulations having possible bearing on landscape projects
- the environmental implications of a landscape project
- types of landscape machinery and equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Assess the sites and trees</td>
<td>1.1 Undertake site assessments to identify site conditions which may impact upon transplanting activities at the lifting site and the transplant site</td>
</tr>
</tbody>
</table>
### Element | Performance criteria
--- | ---
1.2 | Identify work health and safety hazards, assess risks and implement suitable controls
1.3 | Liaise with authorities and information services to determine location of services and utilities, and regulations governing the transplanting and transportation of trees
1.4 | Assess trees for viability for transplanting to ensure the best time and conditions are chosen according to tree species characteristics

| 2. Determine transplanting requirements | 2.1 Identify the appropriate tools, equipment, machinery and specialist contractors
2.2 | Identify the tree species to be transplanted
2.3 | Determine excavation methods and root ball preparation according to the characteristics of the species
2.4 | Determine crown reduction and protection tasks according to the characteristics of the species and the appropriate Australian Standard
2.5 | Calculate root ball and tree mass to determine appropriate lifting and transport requirements
2.6 | Coordinate labour requirements to ensure trees are prepared, lifted, transported and re-installed with minimum stress to the trees, and with regard to safety and environmental factors
2.7 | Identify a transport route with regard to the size and shape of the tree and road transport vehicle requirements
2.8 | Determine and document an aftercare plan outlining monitoring frequency and methods to maintain the health and viability of the transplanted trees in the program

| 3. Document a tree transplanting program | 3.1 Document the transplanting program
3.2 | Document resources and costing details
3.3 | Communicate transplanting program for implementation
3.4 | Assess completed tree transplanting program to ensure that transplantation was undertaken according to the identified program and budget guidelines

### Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Unit Mapping Information
This unit is equivalent to AHCLSC503A Manage a tree transplanting program.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess tree viability for transplantation
- liaise with authorities and information services regarding transplanting and transporting trees
- calculate project resources and costs
- calculate root ball and tree mass and size
- assess crown and root reduction requirements
- determine transplant and transportation requirements and removal methods
- develop transport plan
- develop a budget
- document and communicate transplanting program, contingency planning and after-care plan
- assess and control risks

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of tree transplanting management
- aftercare management
- causes of stress in trees resulting from transplanting, storage and transportation
- current practices and techniques in tree preparation, lifting, transportation and replanting
- local government tree protection and preservation regulations
- methods of managing tree moving operations
- planning considerations and environmental implications of transplanting activities
• requirements for securing and signing trees for road transportation
• the relevant Australian Standards and Codes of Practice
• tree anatomy, physiology and biochemistry
• tree transplanting techniques appropriate to the specific requirements of the species

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels and work health and safety symbols
- use safe animal handling techniques
- use livestock handling tools and equipment
- assist in monitoring livestock health and welfare
- provide assistance to repair and maintain facilities
- follow work health and safety policies
- follow enterprise animal welfare and sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- safe work practices
- animal handling techniques including animal welfare requirements
- tools and equipment
- repair and maintenance of facilities
- work health and safety and environmental protection legislation and enterprise procedures.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- identify a range of feed types and qualities
- identify feed contaminants
- prepare and distribute feed
- check watering systems
- recognise and rectify minor operational faults
- interpret and apply task instructions, communicate with work team and supervisor and record and report faults, workplace hazards and accidents
- complete records and documentation of feed use and volumes for the enterprise section
- use machinery and equipment associated with providing feed
- report on feeding to supervisors
- follow enterprise work health and safety policies
- follow enterprise biosecurity and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- silo operations, tractors and associated feeding machinery and equipment
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures
- common grains, meals, pelleted and liquid feeds
- evidence of spoilage and handling of spoilt feeds
- enterprise work health and safety, biosecurity and environmental policies
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle livestock safely and humanely
- monitor and assess livestock health and welfare
- select, use and maintain specialised animal health equipment
- prepare treatment site, facilities and equipment
- administer treatments to livestock
- monitor the effectiveness of treatments and report issues
- keep and maintain records
- dispose of unused treatments safely and in an environmentally correct manner
- recognise ill health and abnormal behaviour in livestock
- recognise fear and aggressive behaviour in livestock
- recognise heat stress
- follow enterprise animal welfare emergency procedures
- follow enterprise work health and safety policies
- follow enterprise biosecurity, animal welfare and sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water quality and animal requirements
- feed requirements and quality
- workplace biosecurity and euthanasia procedures
- safe handling of sick and dead livestock
- livestock handling principles and livestock behaviour
Assessment Requirements for AHCLSK202 Care for health and welfare of livestock

Date this document was generated: 3 September 2020

- signs of heat stress
- symptoms of ill-health in livestock
- the range of common diseases affecting livestock
- vaccination programs
- relevant legislation and regulations relating to waste and environment management, livestock health, stock medicines and animal welfare
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to assist animals and their newborn at birthing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Prepare for birthing | 1.1 Check animal records and confirm anticipated birthing date where possible  
1.2 Check condition and health status of pregnant animal and monitor prior to imminent birthing  
1.3 Check birthing equipment, resources and materials and prepare for use  
1.4 Give females access to shelter to give birth in during severe weather conditions  
1.5 Identify hazards and report to supervisor  
1.6 Use safe work practices |
| 2. Assist at the birthing process | 2.1 Monitor environment and animals to ensure birth progresses normally  
2.2 Check for presence of predators and implement control measures where necessary and report to supervisor  
2.3 Handle animals calmly with minimal disruption to the birthing process and in line with enterprise animal welfare policies  
2.4 Identify animals experiencing birthing difficulties and intervene as appropriate  
2.5 Seek supervisor or veterinary advice if birth complications cannot be resolved |
| 3. Provide post-birthing assistance | 3.1 Monitor post-birthing health and bonding of female and newborn  
3.2 Maintain birthing environment, facilities and equipment in a safe, hygienic and operational state and report or fix faults  
3.3 Keep records of birth |

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement predator control strategies
- prepare birthing environment, materials and resources to industry standards
- recognise signs of imminent birthing of animals
- apply contingency measures for birthing in the event of adverse weather conditions
- monitor birthing and provide assistance if required or refer on if birthing difficulties require veterinary assistance
- recognise abnormalities in newborn animals
- provide a non threatening environment and access to adequate feed and water immediately post birthing.
- carry out animal husbandry procedures associated with birthing
- monitor animal condition and recognise abnormal behaviour
- provide due care and handle animals humanely in line with enterprise animal welfare policies
- maintain a safe and secure post-birthing environment
- select birthing equipment and materials and check for operation
- demonstrate safe and environmentally responsible workplace practices
- identify hazards and use safe work practices in the birthing environment
- communicate abnormalities, equipment faults and workplace hazards and report and maintain animal records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal behaviour, basic health and nutritional requirements
• birthing environment requirements for animals
• birthing equipment and materials, their components and functions
• birthing intervention and non-intervention strategies
• effects of adverse weather conditions on birthing process and newborn animals
• effects of inadequate nutrition on animals and newborn
• enterprise policies with regard to treating animals, recording and reporting routines
• environmental impacts and minimisation measures associated with animal production
• hazards associated with handling animals
• relevant livestock gestation and appropriate birthing and husbandry procedures
• personal protective clothing and equipment and when and how it should be used
• problems associated with birthing and remedial treatment
• procedures for cleaning and maintaining treatment equipment and materials
• predator behaviour and control procedures
• relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety and animal welfare.

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and follow safe operating procedures
- check livestock regularly
- handle livestock safely and humanely
- identify signs of ill health, injury and abnormality
- identify symptoms of ill health or injury
- deal efficiently and calmly with livestock emergencies
- complete basic livestock first aid procedures
- record and report serious issues or injuries.
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- range of ailments that may occur or affect livestock
- application of a range of basic treatments under veterinary supervision
- behaviour of the relevant species
- environmental controls and codes of practice applicable to the enterprise
- organisations livestock production and management plans
- relevant work health and safety legislative requirements
- relevant animal welfare and biosecurity legislation and codes of practice
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- prepare handling areas, gates and access routes for livestock movement
- monitor and anticipate livestock behaviour
- recognise enterprise livestock identification systems
- identify and draft livestock during handling operations
- move and control livestock using low stress livestock handling techniques
- minimise undue stress and risk to livestock and handlers
- recognise livestock abnormalities
- assess, calculate and record livestock numbers
- control the environmental impacts associated with livestock production within the limitations of own responsibility
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production
- regulatory controls with regard to handling livestock on public roads where required
- common livestock breeds
Assessment Requirements for AHCLSK205 Handle livestock using basic techniques

- basic nutritional and welfare requirements
- range of common livestock abnormalities, illnesses and injuries and associated signs
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check loading facilities for correct operation and hazards to animals and workers
- sort livestock as required and separate unsuitable animals for transport
- load and unload livestock
- anticipate animal behaviour
- provide and maintain appropriate animal feed and water
- complete relevant documentation and affix individual tags if required
- monitor animal health and welfare
- read and interpret mustering, work and loading plans and maps
- calculate animal numbers to assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity policies as required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal handling and movement methods and techniques
- basic animal health and nutritional requirements
- animal herding and flocking behaviour
- techniques and uses of working dogs where appropriate
- types of animal health treatments that may be required
- common diseases and injuries in livestock
- common abnormal livestock behaviours
• causes of livestock being unfit for transport
• legislative documentation requirements for livestock transport
• relevant work health and safety, biosecurity and animal welfare requirements

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

2.3 Report additional assistance required for assessing pregnancy status to the supervisor for remedial action |
| 3. Feed pregnant animal | 3.1 Identify nutritional needs of pregnant animals and confirm against the feeding plan  
3.2 Identify animals with special feeding needs and give them preferential feeding and record  
3.3 Implement supplementary feeding as required and record accordingly  
3.4 Maintain a safe and secure environment for pregnant animals  
3.5 Handle animals with minimum stress and discomfort to the animals without excessive yarding or shedding in line with enterprise animal welfare policies |

### Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

### Unit Mapping Information

This unit is equivalent to AHCLSK208A Monitor livestock to parturition
Links

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- observe livestock health and wellbeing from joining
- maintain appropriate nutritional and environmental requirements
- recognise and report abnormalities for remedial action
- provide a safe and secure environment for the promotion of the welfare and wellbeing of pregnant animals through to birthing.
- administer preventative health treatments
- calculate animal numbers, measure feed, assess rate and frequency of feeding, and calculate animal gestation
- communicate orally and in writing, animal behaviour and identified abnormalities
- control environmental impacts associated with animal production
- handle pregnant animals with due care
- observe and accurately report animal behaviour
- observe local climatic conditions
- follow relevant work health and safety requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of adverse weather conditions and inadequate nutrition on pregnant animals and their newborn
- effect of local climatic conditions on the timing of shearing, separating and transporting pregnant animals
• environment codes of practice with regard to animal production
• correct livestock handling techniques for dry and pregnant animals
• health and nutritional requirements for pregnant animals
• housing requirements for intensively produced animals
• livestock identification methods
• pregnant animals behaviour and abnormalities
• pregnancy checking and confirmation procedures (including scanning)
• health treatments, procedures and methods to livestock when required
• relevant work health and safety requirements
• relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions
Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Application

This unit of competency describes the skills and knowledge required to monitor the supply of potable water for livestock from water storages and sources.

All work must be carried out to comply with workplace procedures, work health and safety, legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Livestock (LSK)

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements</th>
<th>Performance criteria</th>
</tr>
</thead>
</table>
Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element.
---|---
1. Monitor water supplies | 1.1 Inspect water supplies routinely
1.2 Recognise high and low water levels and report to supervisor
1.3 Carry out treatment of water quality problems or pathogens according to enterprise procedures
1.4 Record and report information on water supplies
2. Inspect and clear intake and outlet points | 2.1 Inspect intakes and outlets
2.2 Report potential blockages and clear actual blockages
2.3 Check and replace water filters as required
2.4 Reposition intake lines as necessary to ensure unobstructed suction
2.5 Clear strainers of debris and sludge
3. Operate water delivery equipment | 3.1 Identify hazards and risks and report to supervisor
3.2 Prepare and check water delivery equipment
3.3 Operate water delivery equipment
3.4 Check outflow to ensure water delivery equipment is operating correctly
3.5 Shut down water delivery equipment as required
3.6 Report on activities and water delivery equipment

Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety procedures
- record and report water supply information, activities and system performance
- read and follow manufacturers procedures
- problem solve to identify potential as well as actual blockages
- undertake basic poly pipe repairs
- check outflow rates
- clear blockages using safe working procedures
- check flow rates
- inspect and report on water supplies with only routine supervision
- follow work health and safety requirements.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water delivery systems and components and their operation
- common water quality problems
- enterprise procedures for carrying out inspections, recording and reporting water information and system performance
- environmental impacts and procedures for water supplies
- relevant work health and safety requirements.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- read and interpret muster plans and maps
- prepare equipment and working dogs (when used) for handling livestock
- implement directions for mustering
- monitor livestock behaviour and recognise abnormalities
- muster and move livestock along prepared routes in a calm and controlled manner
- handle livestock safely and humanely, monitor welfare of mustered stock
- monitor and minimise impacts to the environment
- communicate effectively with the muster team
- calculate livestock numbers and assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements where required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mustering and movement methods and techniques
- livestock basic health and nutritional requirements
- livestock herding/flocking behaviour
- environmental codes of practice with regard to livestock production
- working dogs uses and techniques (where appropriate)
- legislative requirements for stock movement along public roads
• environmental impacts and procedures for livestock movements and musters
• relevant work health and safety requirements
• relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

 Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- monitor and record livestock condition
- provide feed and feed supplements in accordance with feeding plan
- monitor livestock health and condition, and recognise abnormalities
- employ safe and environmentally responsible systems and procedures with regard to the handling of livestock and feed
- read and interpret feeding plan, work plan and supervisors instructions
- communicate and report livestock feeding abnormalities and workplace hazards, and maintain livestock records
- assess and calculate herd/flock numbers, measure feed and rate and frequency of feeding
- safely handle livestock in line with enterprise animal welfare policies
- report feeding abnormalities and maintain records
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional requirements for livestock (including water)
- types of feed and feed supplements (including pastures and grazing)
- types of noxious and toxic plants relevant to feeding areas
- livestock health and behaviour
- livestock scoring and weighing methods
• environmental impact of livestock
• safe livestock handling techniques and procedures
• hazards associated with handling livestock and control measures
• personal protective clothing and equipment
• relevant work health and safety requirements
• relevant animal welfare and biosecurity legislation and codes of practice

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- assess and calculate alpaca numbers
- prepare handling areas, gates and access routes for alpaca movement
- monitor and anticipate alpaca behaviour in handling operations
- identify, sort, move and control alpacas for handling and husbandry operations
- use correct equipment, and calming and humane methods to minimise undue stress and risk to alpacas or handlers
- carry out typical basic alpaca husbandry tasks
- recognise and report signs of unusual behaviour, unhealthy animals or abnormal conditions
- control environmental impacts associated with alpaca handling and husbandry
- feed and provide adequate clean water to alpacas
- identify a range of plants poisonous to alpacas
- provide due care in the handling of alpacas
- read and comprehend oral and written information and instructions and maintaining alpaca handling records
- use enterprise alpaca identification systems
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
• alpaca behavioural characteristics and movement in handling areas
• classes of alpacas and their basic nutritional and welfare requirements
• components and functions of handling equipment
• enterprise identification systems for alpacas
• environmental codes of practice with regard to alpaca production
• correct handling techniques and restraint methods
• alpaca husbandry procedures and why they are carried out
• regulatory controls relating to the transport of animals on public roads
• relevant work health and safety requirements
• relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to clean and maintain livestock pens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, follow safe work practices and use personal protective equipment appropriately
- make appropriate preparations for cleaning livestock pens
- clean and maintain pens
- complete cleaning and maintenance operation
- follow relevant environmental and biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements and methods of cleaning livestock pens
- environmental and biosecurity impacts of pen cleaning operation and measures to mitigate these impacts
- types and use of tools, equipment and machinery for pen cleaning operation and the maintenance, servicing and storage of such tools, equipment and machinery
- environmental and biosecurity impacts and methods of disposal of effluent, bio-waste and waste generated by the cleaning operation
- cleaning and maintenance of feeding and watering troughs or similar equipment
- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety, biosecurity and environmental management policies
Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK218 Ride educated horses to carry out basic stock work

Modification History

<table>
<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 2</td>
<td>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to handle and ride calm horses educated to muster and move livestock. It addresses the potential risks associated with working with and around horses and livestock.

The unit applies to individuals who have experience in riding horses assessed as calm, consistent and obedient. They work under general supervision, with some accountability for their own work, identifying and providing solutions to a limited range of predictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- ACMEQU202 Handle horses safely
- ACMEQU206 Perform horse riding skills at walk, trot and canter.

Note the following chain of prerequisites that also applies to this unit.
### Unit of competency

| 2.7 Confirm with supervisor that the assigned horse is suitable for required work and own skill level  
2.8 Prepare horse for ridden work including a pre-exercise groom  
2.9 Fit and adjust, for individual horses, the appropriate working gear to manage and control horse for required work | |

### 3. Ride horses for stock work

3.1 Select and use equipment (PPE) for riding  
3.2 Lunge horse safely and humanely to check gear fit and horse behaviour  
3.3 Mount horse safely  
3.4 Safely control the horse at walk, trot, and canter prior to beginning stock work  
3.5 Practise appropriate safety drills and safely perform emergency manoeuvres including one-rein stops  
3.6 Using safe riding techniques, ride quiet, consistent and obedient horses to carry out basic stock work duties  
3.7 Work and safely control horse at a walk, trot, and canter as part of stock husbandry routines  
3.8 Safely dismount horse  
3.9 Report and record stock work activities

### 4. Provide post ride care

4.1 Remove gear and groom, wash, or clean horse, according to workplace policy  
4.2 Water and feed horse in line with workplace policy  
4.3 Release horse safely to appropriate enclosure, paddock, or yard  
4.4 Check, clean, maintain, and store working gear and PPE  
4.5 Report damaged or repair working gear as instructed

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<table>

© Commonwealth of Australia, 2020
### Skill Description

**Writing**
- Record data and observations about livestock in workplace forms accurately

**Oral communication**
- Use active listening and questioning techniques to clarify and confirm instructions and report information

**Navigate the world of work**
- Follow workplace procedures, including safe work and safe horse handling practices and animal welfare principles, in own role and work area

**Get the work done**
- Plan and organise tasks and assemble equipment to complete basic livestock activities, taking safety and risk factors into consideration

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has safely ridden at least two different calm, consistent and obedient horses educated for stock work to carry out at least three assigned jobs involving riding horses for basic stock work duties. For each job there must be evidence that the individual has:

- prepared for the job by:
  - recognising hazards and implementing required risk control measures
  - identifying relevant work health and safety requirements
  - selecting and using suitable personal protective equipment (PPE)
  - selecting suitable saddlery and equipment
  - identifying the assigned horse by gender, colour markings, and brands
  - catching assigned horse and assessing for health and soundness
  - communicating with supervisor to discuss concerns and suitability of horse for the assigned job
- handled horse safely and humanely during job including:
  - safely and correctly fitting, then checking and adjusting working gear to suit individual horse
  - mounting horse safely
  - riding and controlling horse, at a walk, trot, and canter, to perform basic stock work duties
  - adhering to animal welfare policies when working around horses and livestock
  - minimising stress of livestock when checking, mustering, and moving livestock
  - dismounting horse safely
- completed post-ride activities including:
Assessment Requirements for AHC1SK218 Ride educated horses to carry out basic stock work

- cleaning, feeding and watering horse
- checking, cleaning and maintaining tack
- completing records as required by workplace.

In addition, there must be evidence that the individual has monitored the condition of at least one horse (which may be one of the above-mentioned three horses), including:

- identifying signs of ill health, injury, or poor condition, and reporting to supervisor
- safely and humanely administering basic treatments under supervision
- carrying out basic hoof care and cleaning safely and humanely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key features of work health and safety, animal welfare codes of practice, biosecurity requirements, and sustainability practices in the context of own job role
- basic pre-activity risk assessment for basic stock work
- common horse gender, colours, markings, and other identifying features
- common basic features of horse behaviour and psychology
- the features of livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant workplace procedures, industry standards, and guidelines for horse riding and riding safety, including lungeing or riding in a yard before outside and one-rein stops
- basic care and husbandry, and procedures for horses
- the common signs of disease or injury in horses, basic anatomy and physiology of the horse
- the use of horses for workplace operations
- care and maintenance of working gear.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions, including livestock handling yards and paddocks
- resources, equipment and materials:
  - various live, calm, consistent and obedient horses educated for stock work and assessed as suitable for the experience and skill of the individual
  - livestock to muster, move, and check
  - appropriate tack for individual, horse and activity
  - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
Assessment Requirements for AHC1S1K218 Ride educated horses to carry out basic stock work

September 2020

- specifications:
  - work instructions and procedures for carrying out basic stock work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to apply preventative health treatments and other medications to livestock under professional supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- prepare, clean and maintain treatment site, facilities and equipment to industry standards
- select and utilise equipment and materials appropriate for treating requirements and match to work tasks
- muster, move and handle livestock for health treatments
- administer preventative health treatments in accordance with work plan
- monitor effectiveness of treatments and provide follow up if required
- maintain records of treatments
- assess and calculate herd/flock numbers, measure dosage and quantities
- monitor livestock behaviour and recognise abnormalities
- apply contingency measures for administering treatments in the event of adverse weather conditions
- carry out animal husbandry procedures
- provide due care and handle livestock humanely
- communicate abnormalities, equipment faults and workplace hazards
- read and interpret manufacturers specifications, work and maintenance plans, veterinary chemical labels and Safety Data Sheets (SDS’s)
- apply relevant work health and safety requirements
- apply relevant biosecurity requirements
- apply relevant animal welfare practices
- apply relevant environmental sustainability practices
Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment and materials for treating livestock, their components and functions
- livestock health treatments, procedures and methods
- livestock identification methods
- mustering and moving techniques
- withholding periods for residues in meat, milk or wool
- technique of disposing of livestock residues and waste appropriately
- hazards associated with handling livestock and veterinarian medicines and chemicals
- implications and management of veterinary medicine and/or chemical resistance
- personal protective clothing and equipment and when and how it should be used and maintained
- procedures for cleaning and maintaining treatment equipment and materials
- enterprise policies with regard to treating livestock, recording and reporting routines
- relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, biosecurity and the use and control of hazardous substances

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and implementing safe operating procedures
- accurately score alpaca condition
- assist with ultrasonography and blood collection if requested by professional service providers
- clean up work site and safely dispose of waste
- monitor the condition of female and male alpacas
- recognise ovulation and detect oestrus in females
- supervise alpaca mating and assisting as appropriate
- conduct a spit off
- conduct and commission pregnancy tests
- identify and implement action required as a result of pregnancy tests
- communicate effectively with other team members and veterinarians
- apply relevant work health and safety requirements
- apply relevant biosecurity policies requirements
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- alpaca handling and assisted joining techniques
- alpaca health and abnormalities
- alpaca movement and behavioural characteristics
- enterprise and industry identification system for alpaca
Assessment Requirements for AHC1SK302 Mate and monitor reproduction of alpacas

- enterprise and industry policies regarding recording and reporting routines for matings
- management of female and male body conditions core through nutrition programs
- Johne's disease status mating procedures
- mobile mating procedures
- relevant Personal Protective Equipment (PPE) and when and how it should be used
- pregnancy testing techniques, including detection of ovulation
- state and territory animal welfare legislation and codes of practice
- relevant state and territory legislation, regulations and codes of practice with regard to work health and safety and biosecurity

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out feedlot operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes or practice and sustainability practices.

This unit applies to corporate, small scale or opportunity lot feeding of cattle, sheep and goats.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

| 1. Prepare to work with livestock feed | 1.1 Check work to be undertaken from work program and confirm with supervisor where necessary.  
1.2 Identify work health and safety hazards, assess risks and apply suitable control measures  
1.3 Select, use and maintain suitable personal protective equipment  
1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken  
1.5 Identify environmental impacts of undertaking work, assess likely outcomes and, if necessary, take responsible action |
| 2. Mix feed | 2.1 Calibrate scales and containers to be used for measurements  
2.2 Identify ingredients from instructions and obtain from storage locations  
2.3 Measure ingredients in the specified ratios and quantities  
2.4 Blend ingredients adequately and hygienically in the manner specified using appropriate equipment  
2.5 Carry out grinding, where required, in the manner specified and using appropriate equipment |
| 3. Feed livestock | 3.1 Store feed appropriately  
3.2 Check the physical quality, quantity and type of feed on their arrival to the shed  
3.3 Feed livestock at scheduled time, rate and frequency  
3.4 Maintain quality and hygiene of feed throughout the feeding process |
| 4. Apply and maintain feedlot hygiene and biosecurity procedures | 4.1 Examine livestock entering feedlot, check their documentation and quarantine them for specified period  
4.2 Maintain cleanliness and hygiene by selecting and using appropriate cleaning methods  
4.3 Maintain thorough personal hygiene practices in all activities associated with handling livestock, including reducing risks from diseases transmissible to humans (zoonotic diseases)  
4.4 Dismantle and clean equipment and fittings and replace correctly  
4.5 Place and dispose of waste and debris in allocated areas, and ensure run-off is managed according to the Feedlot Code of Practice, environmental legislation and public health standards  
4.6 Check and sign in visitors to feedlot according to enterprise and industry procedures |
Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- apply relevant work health and safety requirements, identify hazards and implement safe work procedures
- prepare equipment and machinery mixing feed
- identify a range of grain and feed types and qualities
- mix livestock feed
- feed livestock
- follow relevant procedures for the safe and environmentally responsible disposal of waste
- apply and maintain relevant feedlot hygiene and biosecurity procedures
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- relevant work health and safety requirements
- relevant biosecurity requirements
- relevant animal welfare practices
- tools and equipment used for working with livestock feed, their functions and maintenance
- environmental impacts of working with livestock feed and mitigation methods
- measurement systems for livestock feed, and calibration and maintenance of measuring equipment
- types of grains and feed ingredients (grains, meals, vitamins, minerals and premix formulations) used for feeding livestock, their functions, characteristics and quality assessment methods
• methods and equipment for blending and grinding of feed
• methods of storage and handling of livestock feed and impact of feed quality changes on livestock
• livestock feeding programs and impact of program changes or variations on livestock
• impact of biosecurity practices on livestock in a feedlot
• cleaning methods, cleaning agents, their proper use and disposal, and relevant Work Health and Safety practices
• common zoonoses and their impacts on human and livestock health
• management and disposal of waste, debris and run-offs according to relevant biosecurity and environmental regulations, codes of practice, industry and enterprise standards
• management of and biosecurity requirements for visitors to the feedlot

Assessment Conditions
Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for post mortem, ensuring appropriate handling and use of equipment, personal protective equipment and disinfectants
- identify work health and safety and biosecurity hazards and implement risk controls
- handle carcasses safely and appropriately
- perform external examination and post mortem examination of carcass
- dispose of carcass appropriately
- carry out post necropsy procedures of cleaning and disinfection of equipment, post mortem site and personal protective equipment
- prepare biological samples for sending to the laboratory where appropriate
- carry out procedures for personal hygiene
- apply relevant work health safety environmental and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sequence of actions in conducting a post mortem examination
- appropriate handling and use of post mortem equipment, personal protective equipment and disinfectants
- requirements for correct preparation, labelling and packaging of biological samples
- anatomy and physical features of the species being examined
- common causes of death for the species being examined
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species
- relevant work health and safety environmental and biosecurity requirements, and carcass disposal regulations

**Assessment Conditions**

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a livestock carcass:
- carry out post mortem examination

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and implement safe work procedures
- estimate water requirements based on average and peak demand for water
- test and monitor machinery and equipment for correct operation and recognise minor faults and report major faults
- identify the components of a range of water supply systems
- arrange water supply system components and materials
- use hand and power tools safely
- carry out routine servicing and minor repairs on a range of water supply systems and equipment
- work as part of a contract team as required
- demonstrate safe and positive environmental working practices
- test water quality as directed
- read and interpret a water supply plan
- measure and calculate lubrication requirements
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:
- livestock requirements and average and peak demand for water
- operational principles of various pumps and pumping systems
- functions and components of a range of water supply systems
- operation and maintenance of diesel and petrol engines
• factors which affect water quality, various water contaminants and remedial action
• advantages and disadvantages of different types of water supply systems
• State and Territory work health and safety legislative requirements relevant to the job role
• relevant legislative requirements with regard to property water supply systems
• environmental code of practices associated with maintenance activities.

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain biosecurity procedures and report concerns immediately
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- read and interpret production and other information in a manner that is readily accessible for both management and operators
- monitor shed temperature and adjust as required
- read and interpret spreadsheet information using a software package
- discuss production performance, risk and hazard potential, quality of output, and methods of production with both management and operators
- read and interpret the activities contained in livestock production plans
- observe, identify and react appropriately to work health and safety hazards and environment risks
- recognise when performance standards are not met and investigate and report findings in written form
- provide supervision of staff including allocating duties and feedback on performance
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- prepare and present production and other information in a manner that is readily accessible for both management and operators
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
• biosecurity procedures and codes of practice
• common livestock diseases and clinical signs
• relevant industry, environmental and quality standards (including ISO9002:1094)
• animal welfare codes of practice and procedures
• types of sheds and equipment
• raw data to determine issues and problems
• recording and reporting requirements
• fundamentals of quarantine and control methods
• common feed ingredients and additives
• water reticulation systems and quality
• State and Territory work health and safety legislation and codes of practice relevant to the sector

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to euthanase livestock without distress or suffering prior to cessation of their vital life functions.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Individuals must hold firearms licenses if they are using firearms to euthanase livestock.

Individuals must comply with national and local regulations for disposal of the carcass.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant animal welfare requirements
- implement relevant work health and safety practices
- implement relevant biosecurity requirements
- prepare for euthanasia
- carry out euthanasia
- confirm signs of death in a euthanased animal
- handle, prepare or dispose of carcass in line with workplace procedures, national and local regulations
- clean and store equipment and materials
- record details of the euthanasia.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- their responsibilities with regard to animal welfare as outlined in the relevant animal welfare codes of practice
- relevant work health and safety and biosecurity requirements, explain the requirements of statutory legislation and codes of practice related to euthanasing livestock
- workplace procedures for euthanasia of livestock as required, describe animal handling, restraint and behaviour for carrying out euthanasia
- signs of death in an animal
- anatomy and physical features of the relevant livestock species
methods of euthanasia suitable for the livestock species as outlined in the relevant codes of practice.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to identify and draft or sort animals for sale, breeding or other enterprise requirements.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- handle and draft livestock in line enterprise animal welfare practices
- identify criteria for animal selection
- control and sort livestock
- select animals according to selection criteria
- safely and humanely apply identification devices
- appraise and grade animals
- recognise livestock abnormalities
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- handling techniques and restraint methods
- animal movement and drafting
- animal welfare principles
- livestock behaviour relevant to drafting
- selection criteria for breeding stock
- livestock identification systems and devices
- enterprise animal identification procedures
- State and Territory work health and safety and animal welfare legislative and enterprise requirements.
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices for animal health treatment
- identify the symptoms of parasite infestation and other diseases
- monitor animal health status and refer to the production plan for intervention strategies
- select livestock prone to infection for culling
- accurately diagnose the type and severity of infection or parasite infestation
- arrange and coordinate equipment and resources
- read and interpret chemical and veterinary health labels, manufacturer’s specifications and Safety Data Sheets (SDSs)
- calculate animal numbers and measure treatment dosage and rates
- select and administer treatments appropriate to treat infections and infestations and observe withholding periods
- drench and vaccinate livestock
- provide due care and humanely handle animals
- return animals to prepared and clean environments
- monitor animals for treatment effectiveness
- apply relevant work health and safety requirements
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of parasite infestation and their symptoms
- parasite resistance of different classes of livestock
• application procedures and effects of veterinary chemicals
• types of health preparation treatments
• enterprise vaccination program and procedures
• identification of and prescribed treatments for infections and infestations
• grazing management strategies used in internal parasite control
• drenching equipment, drenches and their efficiency
• relevant codes of practice with regard to the safe use and handling of hazardous substances
• withholding periods for treated animals
• animal handling and restraint techniques
• animal welfare principles
• relevant work health and safety and animal welfare legislative and enterprise requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor pasture health and condition
- assess herd/flock health and condition and live weight
- identify livestock nutritional requirements
- order feed if requested in line with feeding plan
- identify feeding problems and animals that require individual treatment
- handle livestock humanely and monitor animal welfare
- respond to or report negative environmental impacts of feeding
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutrient and feeding requirements of a range of livestock
- different types of agricultural feeds
- factors that affect feed supply and demand for a grazing operation
- grazing practices which maximise pasture growth and quality to best match herd/flock feed requirements
- purpose of feed conservation in relation to enterprise feed supply and livestock requirements
- different types of pasture grazing systems, including rotation, strip and set stocked grazing
- ways of determining a feed surplus
- role of spelling subdivision in effective pasture and animal management
- different supplementary feeding options for livestock
- environmental controls and codes of practice applicable to the enterprise
- nutrient values of pasture and supplementary feedstuffs
- codes of practice with regard to animal welfare and environmental protection

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to coordinate artificial insemination and fertility management of livestock.

This unit can be delivered in the context of the following industries: beef cattle, dairy cattle, alpacas, sheep and goats.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Operators performing artificial insemination may require accreditation and certification, such as National Herd Improvement Association of Australia Inc. accreditation for cattle AI technicians.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare females for insemination
- detect females in oestrus
- sterilise equipment and prepare hygienic worksite prior to insemination procedures
- coordinate the artificial insemination of animals
- monitor livestock post insemination
- coordinate and record the results of pregnancy testing
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices relevant to work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- body condition scoring
- relevant husbandry and management practices for pregnant and non-pregnant female livestock
- relevant anatomy and physiology of female livestock
- reproductive physiology and pregnancy development of female livestock
- requirements and procedures of artificial insemination
- reproductive diseases and complications in female livestock
- pregnancy testing methods
- relevant work health and safety, animal welfare and biosecurity requirements, and sustainability practices
Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- facilitate artificial insemination

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to feed and care for animals through the latter stages of pregnancy to birthing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

| 1. Identify and provide animal nutritional needs | 1.1 Identify nutritional needs of pregnant animals and confirmed against the feeding plan  
1.2 Determine and provide feed supplements as required  
1.3 Implement procedures to minimise feed wastage and spillage, and dispose and recycle feed waste  
1.4 Identify hazards, assess risks and implement control measures |
| 2. Monitor feeding process | 2.1 Monitor grazing and supplementary feeding to ensure animals are maintained in the required condition  
2.2 Record and report feeding abnormalities  
2.3 Identify and assess environmental implications associated with animal production and implement relevant measures |
| 3. Maintain a secure environment for animals | 3.1 Monitor and maintain condition and security of paddocks, shelter and housing  
3.2 Carry out basic repair work and report  
3.3 Assess risk of predators to newborn animals and report in line with workplace procedures  
3.4 Implement environmentally responsible measures to eradicate or control identified predators |
| 4. Carry out animal husbandry procedures | 4.1 Prepare animals for birthing  
4.2 Determine and administer preventative health treatments  
4.3 Prepare and administer contingency measures as required  
4.4 Provide protection from weather for newborn animals  
4.5 Apply enterprise animal welfare policies to all livestock husbandry and handling activities |

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- match supply of grazing or predetermined rations to nutritional requirements for pregnant animals
- monitor animal health and condition and recognise abnormalities
- carry out animal husbandry procedures, and provide due care and handle animals humanely in line with enterprise animal welfare policies
- maintain animal shelter and housing where applicable
- administer preventative health treatments
- implement contingency measures in the event of adverse weather or birthing difficulties
- employ safe and environmentally responsible systems and procedures with regard to the handling of animals, feed, hazardous substances and predator control strategies
- read and interpret manufacturers specifications, work and feeding plans, and Safety Data Sheets
- assess and calculate herd/flock numbers, measure feed, assess rate and frequency of feeding, and calculate animal gestation
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- physiological and behavioural signs of impending birth
- animal behaviour and nutritional requirements of pregnant animals
- pasture and animal grazing management
• feed and feed supplements for pregnant animals and when to provide them
• effects of weather conditions, and inadequate nutrition on pregnant animals and their newborn
• preventative health treatments, procedures and methods
• animal husbandry procedures
• environmental impact of animals on ground cover and minimisation measures
• hazards associated with handling animals and veterinarian medicines and chemicals
• State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare and poisons
• predators and behaviour patterns and control and eradication measures
• relevant licensing and permit requirements (firearms)
• enterprise policies with regard to birthing animals, recording and reporting routines.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

| 1. Prepare paddocks or yards | 1.1 Confirm particular livestock mating plan with supervisor  
1.2 Select paddocks or yards and stock to appropriate levels  
1.3 Plan predator control program and implement where appropriate  
1.4 Identify hazards, assess risks, implement controls and report safety concerns to the supervisor  
1.5 Select and use safety and personal protective equipment |
| 2. Prepare dams for joining | 2.1 Monitor live weight of dams through weighing and condition scoring  
2.2 Adjust nutrition levels to achieve targeted joining weights in line with feeding strategy  
2.3 Implement dam health and husbandry operations  
2.4 Draft mobs for joining |
| 3. Prepare sires for joining | 3.1 Carry out physical examination of sires prior to joining  
3.2 Seek veterinary advice where appropriate  
3.3 Determine mating ratios  
3.4 Select replacement sires in time to allow adjustment to new environment  
3.5 Carry out sire health, handling and husbandry operations in line with individual requirements and enterprise animal welfare policies  
3.6 Test mate sires to assess libido and serving capability if required  
3.7 Monitor sires environment for optimum mating performance |
| 4. Join sires to dam mobs | 4.1 Select dates for joining where appropriate according to the mating plan  
4.2 Organise test joinings for new sires if appropriate  
4.3 Introduce sires to herds or individual dams to ensure good contact  
4.4 Remove sires from herds at the scheduled time |
| 5. Monitor mating activity | 5.1 Observe and record mating activity  
5.2 Observe distribution of sires within each mob  
5.3 Take remedial action if required |
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK315A Prepare for and implement natural mating of livestock

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- prepare dams and sires for joining
- manage dams and sires during joining
- appraise breeding soundness in animals
- estimate live weights
- monitor joining activity
- prepare joining paddocks
- assess the serving capacity and fertility of males pre joining
- ensure females are above minimum body weights to exhibit oestrus
- use sufficient males for the number of females to be mated in the group
- use back up sires where single sire mating is practised
- record mating details
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mating behaviour of sires and dams
- optimum live weights and condition for mating
- physical abnormalities and mating problems in males and females
- environmental influences on joining
• work health and safety and animal welfare legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- plan for and provide livestock feed and water requirements
- maintain livestock facilities and handling equipment
- restrain, handle and groom livestock using safe and humane methods and procedures
- train livestock for showing
- comply with animal welfare requirements
- prepare livestock to competition standards
- parade and present livestock for show
- read and interpret written information, receive, comprehend and communicate oral information, write basic statements and maintain livestock records
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- competition requirements for grooming, handling and presentation
- components and functions of handling equipment
- handling techniques, restraint methods and when to use them
- livestock grooming and training techniques (to lead and stand correctly)
- livestock health and nutritional requirements
- preparation and maintenance requirements for livestock facilities and equipment
- livestock movement and behavioural characteristics in handling and confined areas
• work health and safety, animal welfare and livestock movement legislative requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select livestock for exhibition
- prepare animals for exhibition
- present livestock to best advantage
- promote the product to clients and pursue sales opportunities
- communicate with staff during preparations, exhibit officials and potential customers
- identify potential exhibits against selection criteria to accurately select livestock/fleeces
- train animals to be led and presented in competition
- organise entries, resources and facilities for showing
- arrange and prepare for transport
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria for competition judging
- preparation procedures
- requirements for entry of competitors
- transportation requirements
- feeding and nutrition requirements
- communication and supervision techniques
- observation methods
• relevant legislative work health and safety requirements, especially as they relate to livestock and fleece exhibitions, and animal transportation, animal welfare and safe livestock handling techniques
• enterprise and industry policies and codes of practice with regard to livestock exhibitions, sales, livestock transportation, and recording and reporting requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1. **Prepare for care of newborn and young**
   - 1.1 Identify, select and prepare facilities, equipment and supplies needed to provide care
   - 1.2 Assess and prepare for the needs of newborn and young animals
   - 1.3 Implement and observe feeding routines
   - 1.4 Identify and maintain hygiene, health and environmental requirements
   - 1.5 Handle newborn and young animals humanely in line with enterprise animal welfare policies

2. **Provide care for newborn and young**
   - 2.1 Provide feed and feed supplements as required
   - 2.2 Monitor relationship between mother and young and implement strategies to address any problems where appropriate
   - 2.3 Maintain and monitor feeding, water and shelter areas for correct operation, cleanliness and hygiene
   - 2.4 Treat routine health and feeding problems, including digestive upsets and infections

3. **Monitor health of newborn and young**
   - 3.1 Monitor newborn and young against benchmarks for growth, health and development
   - 3.2 Take appropriate action for sick, weak, orphaned and injured, newborn and young
   - 3.3 Seek assistance for more complex health and feeding problems
   - 3.4 Separate newborn and young requiring routine husbandry and health procedures treat and return
   - 3.5 Carry out treatments and checks appropriately

4. **Meet ongoing requirements**
   - 4.1 Identify young animals ready for weaning and wean according to weaning programs
   - 4.2 Identify and meet feeding requirements
   - 4.3 Handle animals regularly as required
   - 4.4 Keep and maintain records
   - 4.5 Ensure all work is conducted safely and in accordance with enterprise requirements, work health and safety and animal welfare legislation and regulations

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- weigh and assess condition of newborn and young animals
- work within animal welfare legislative requirements and enterprise and industry guidelines
- identify abnormal conditions and report or react promptly
- safely and humanely handle and care for newborn and young animals
- recognise signs of stress or ill health in newborn and young animals
- communicate with other personnel
- provide support as needed to veterinarians attending to sick newborn and young animals
- collect samples
- identify the young and their parent
- use feed, shelter and ventilation equipment
- calculate feed and dose rates
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- newborn and young animals development and growth
- newborn and young animals feed, shelter and environmental requirements
- common deformities
- infection controls and treatment programs
- significance of colostrum to livestock
- feeding systems and weaning strategies
- husbandry procedures
- hygiene and cleanliness requirements
- enterprise requirements for rearing of newborn and young animals and recording and reporting requirements
- relevant legislative animal welfare health and work health and safety requirements especially as they relate to safe animal handling techniques, feeding, animal treatments, and rearing and caring for newborn and young animals

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare site, equipment and livestock for slaughter safely and appropriately
- conduct the slaughter of livestock in compliance with relevant requirements and regulations
- complete slaughter operations
- dispose of, or destroy offal and waste products in an environmentally responsible manner and according to State/Territory and local authority health standards
- comply with all relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements
- preparation, selection and use of the site, equipment and livestock for the slaughter
- methods and procedures for the humane slaughter of livestock
- preparation, processing and disposal of the carcass and its parts after slaughter
- post-slaughter procedures for the site and equipment
- anatomy and physical features of the species being slaughtered
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species
- codes of practice for the welfare and husbandry of relevant livestock species
Assessment Requirements for AHCLSK319 Slaughter livestock

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a live animal:

- prepare for slaughter
- slaughter animal
- complete slaughter operations

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to safely and efficiently transport livestock to a destination within specified timeframes.

Animal welfare and low stress stock handling principles and practices are to be observed at all times.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards, assess risks and implement safe work procedures
- interpret transport plan requirements
- coordinate the transport of livestock
- safely, load livestock while maintaining load within specifications
- distribute animals on transport to prevent overcrowding and minimise risk of injury
- obtain relevant permits and comply with movement restrictions
- ensure documentation and livestock identification is in place
- ensure appropriate recording including use of technology where applicable
- safely unload livestock
- review health and condition of livestock after transit
- demonstrate safe and humane handling of livestock according to animal welfare codes of practice
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- industry and legislative requirements for the transport of livestock
- model codes of practice for the welfare of animals Land transport (various species)
• animal welfare, biosecurity and work health and safety legislative requirements
• environmental codes of practice with regard to vehicle operation and livestock transport
• market requirements in relation to the quality and condition of livestock
• process of sourcing and costing transportation alternatives
• livestock transport recording and documentation requirements
• enterprise policies with regard to the use of vehicles and equipment
• relevant documentation requirements and procedures

Assessment Conditions
Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to service and repair bores and windmills. This includes activities such as replacing parts, checking equipment for wear and tear, determining lime deposits, stripping, dismantling or reassembling bores and windmills.

These activities carry risk of falls due to working at heights, injury due to working with moving parts and machinery.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes of practice and manufacturer’s specifications

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- apply basic diagnostic techniques
- recognise faults and deterioration of components and carry out repairs to bore, mill heads and pumps to ensure the full function and flow of water supplies
- select and match tools and equipment with work requirements
- apply safe workplace and positive environmental procedures
- read and interpret enterprise policy, maintenance plans, manufacturer specifications and Safety Data Sheets (SDSs)
- effectively communicate with contractors and supervisor, record and report maintenance details and outcomes
- calculate volumes, and measure speed, flow rates and distance
- maintain all components of bores and windmills
- carry out testing procedures to determine correct operation
- refer to bore histories for troubleshooting
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- construction of bores and windmills and maintenance requirements
- diesel engine components, maintenance requirements and repair procedures
- working principles of diesel engines
- drive systems and components
- types and uses of lubricants and other servicing materials
Assessment Requirements for AHC151K321 Service and repair bores and windmills

- servicing characteristics of bores and windmills
- types, characteristics, uses and limitations of hand and power tools
- basic diagnostic processes and techniques
- environmental codes of practice with regard to maintenance activities
- work health and safety legislative requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- manoeuvre transport machinery or truck in difficult sites and conditions
- drive truck safely using all available controls
- clean and store vehicles and equipment
- identify operational faults
- complete time sheets and other maintenance records as required
- use communication methods to advise and anticipate conditions
- interpret plans, reports, maps, specifications
- maintain and store records, reports, and log books
- select, fit, and use personal and protective equipment
- operate and load a truck in accordance with Road Traffic Regulations
- plan, load, unload and move a range of loads over a full range of road conditions in accordance with Road Traffic Regulations
- conduct pre-start and post-operational checks
- maintain the quality and integrity of transported produce
- apply relevant work health and safety requirements
- apply relevant biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturers and work site requirements including property conditions, and hazards on the property and on the open road
Assessment Requirements for AHCLSK322 Transport farm produce or bulk materials  

Date this document was generated: 3 September 2020

- road traffic laws and licensing requirements
- organisational procedures for use of vehicles and equipment
- relevant work health and safety requirements for storage of materials and equipment
- work health and safety legislation, codes of practice, procedures, and principles, including manual handling
- emergency procedures
- site safety requirements
- equipment safety requirements
- operational, start up, and shutdown procedures and checks
- hauling and towing procedures
- receipt and document requirements at both ends of the transport operation
- differences in handling and operation with bagged and bulk loads
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs to the Assessment Conditions.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe operating procedures
- handle animals humanely and with minimal stress in line with animal welfare legislation codes of practice
- perform a recommended method of castration with attention to hygiene
- administer pre or post operative treatments
- monitor castrated animals
- carry out animal husbandry tasks in hygienic manner
- record the number and health of animals post castration
- work effectively as a part of a team and communicate with supervisors
- apply relevant work health and safety requirements
- apply relevant animal welfare and environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- male anatomy as it relates to castration
- castration methods for various species of livestock
- organisation castration, hygiene and animal welfare procedures and policies
- industry standards for the care and husbandry of animals
- industry and enterprise requirements for debris, waste material and animal residues disposal
- relevant work health and safety legislation, codes of practice and industry and enterprise requirements
- relevant animal welfare legislation, codes of practice and industry and enterprise requirements
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to mix and mill feed for intensive livestock production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable control measures
- follow enterprise mill and mix stockfeed work program
- order and store feeds and ingredients
- identify feed ingredients and obtain from storage locations
- measure ingredients in the specified ratios and quantities
- mix feeds and ingredients in line with industry quality standards and requirements
- recognise and rectify minor operational faults and perform routine maintenance
- complete records and documentation of feed use and volumes for the shed
- conduct post-procedural hygiene and administration activities
- implement relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise requirements for mixing and milling feeds
- relevant work health and safety requirements
- tools and equipment machinery used for mixing and milling feeds, and the cleaning, maintenance, servicing and storage of such tools and equipment
- environmental impacts of mixing and milling feeds and strategies to mitigate such impacts
- type of feed ingredients and procedures for ordering, handling and storage of feed ingredients
• the impact of seed, chemical, insect and fungal contamination of grain. This includes an awareness of the industry process in place to monitor these contaminants - the National Residue Survey (NRS), the National Antibiotic Residue Minimisation (NARM) and programmed basket surveys
• measurement equipment for feed ingredients, and their calibration and maintenance
• procedures for mixing, blending and milling feed ingredients and feeds
• documentation and record keeping requirements for mixing and milling feed
• relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- obtain colostrum from suitable donor animals and select suitable frozen colostrum
- handle and feed new born animals appropriately
- handle frozen colostrum according to enterprise and health and safety procedures
- store colostrum for future use
- follow relevant work health and safety and animal welfare requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:
- nutritional needs of newborn animals and the need for feeding colostrum to newborn animals
- selection of suitable donor animals
- methods and equipment used to collect colostrum
- care, husbandry and management of newborn animals
- handling of frozen colostrum
- administration of colostrum to newborn animals and their post-administration care
- storage procedures of colostrum
- relevant work health and safety and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.
Assessments for the following performance evidence must be conducted on live animals:

- obtain colostrum
- administer colostrum to newborn animals

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable controls
- make preparations to work with effluent disposal equipment
- maintain and operate effluent storage and disposal system in compliance with approval granted by local government and state environment protection authority
- monitor effluent disposal system
- conduct cleaning and hygiene practices associated with effluent operations
- implement relevant environmental practices
- complete organisational records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- an enterprise work program and program requirements for effluent operations
- relevant work health and safety requirements
- tools, equipment and systems used for effluent operations (effluent handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for effluent operations
- environmental impacts of effluent operations and liquid effluent irrigation, and strategies to mitigate such impacts
- irrigation techniques for liquid effluent
- functions, maintenance and service of effluent pits
- methods and maintenance of effluent composting
• methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
• documentation and type of records that need to be completed for effluent operations
• relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and use safe work practices in the calving environment
- carry out cow husbandry procedures and recognise signs of imminent calving
- apply contingency measures for calving in the event of difficulties
- prepare calving environment, materials and resources to industry standards
- ability to correctly apply calving ropes/chains and use suitable calf pulling equipment
- monitor cow condition and recognise abnormal behaviour/presentations
- ability to manual palpate and recognise simple malpresentations
- recognise abnormalities in calving behaviour, expulsion of foetus and placenta, and progress of calf immediately after birth
- recognise when normal assistance procedures are not adequate to assist the calving and specialist veterinary support is required
- maintain a safe and secure post-calving environment
- demonstrate safe and environmentally responsible workplace practices
- apply relevant work health and safety requirements
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- calving behaviour and basic health and nutritional requirements as directed
- calving equipment and materials, their components and functions
- calving intervention and non-intervention strategies
- normal calf presentation v abnormal that may need assistance
• problems associated with calving and intervention and follow up treatment
• enterprise policies with regard to calving down, recording and reporting routines
• health and injury hazards associated with handling cattle
• personal protective clothing and equipment, and when and how it should be used
• procedures for cleaning and maintaining treatment equipment and materials
• relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety and animal welfare.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor animal health status
- identify animals requiring treatment
- determine the type and scope of treatment
- identify work health and safety hazards, assess risks and implement control measures associated with administering treatments to animals
- handle, restrain and treat animals without compromising animal welfare
- monitor animals post treatment and complete workplace recording requirements
- implement relevant animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information to be gathered from livestock production plans, animal health plans and individual animal records
- signs of health, signs of ill health and methods of assessing livestock health
- biosecurity requirements, husbandry and management strategies and procedures for ill or injured animals
- methods for humane and safe handling and restrain of animals
- common diseases of the livestock species, and strategies for treatment and management of such diseases
- typical and common medications, vaccines, the routes of administration in animals and keeping/storage of such medications
- work health and safety requirements associated with administering treatments to animals
• principles and regulations for veterinary medicines treatment and Withholding Periods in animals
• environmental impacts of administering treatments to animals and strategies to mitigate these impacts
• enterprise heat load management plans
• types of and disposal methods for organic and non-organic waste
• documentation and type of records that need to be completed for animal treatments

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to monitor the suitability of rations and pen conditions for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Monitor ration and water levels | 1.1 Source information on ration ingredients and composition from enterprise livestock production and/or feed plans  
1.2 Assess ration levels, composition and consistency and identify potential production and health issues for different pens and classes of livestock  
1.3 Identify strategies for removing wet, mouldy and fouled ration from bunks, and preventing livestock from access to unsuitable rations  
1.4 Assess water quantity and quality to meet requirements of livestock |
| 2. Inspect pen status and condition | 2.1 Source information on pen group status from enterprise livestock production plan  
2.2 Assess pen infrastructure, feed bunks, feed apron and water troughs together with animal feeding behaviour and identify performance and potential issues  
2.3 Identify strategies to control leaking troughs, and prevent livestock from access to damaged pen or feeding areas  
2.4 Assess pen surface conditions and behaviours of livestock in consideration of prevailing weather conditions  
2.5 Identify strategies for adjusting stocking density, providing access to shade, modifying pen drainage, cleaning pen and modifying the ration |
| 3. Assess manure condition | 3.1 Assess manure consistency and colour as indicators of individual animal and herd health  
3.2 Identify strategies for increasing roughage in ration, courser processing of grains and adjusting rations for sick animals |
| 4. Check pen hygiene | 4.1 Assess feed bunks, feed aprons and water troughs for fouling and unhygienic build-ups of waste  
4.2 Identify strategies for resolving animal production and health issues, work health and safety concerns, and cleaning of pens to prevent odour and insect problems |
| 5. Report and record incidents as required | 5.1 Report incidents and problems to supervisor as required  
5.2 Record and monitor effectiveness of strategies adopted |

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor ration and water levels and respond to issues as required
- inspect pen status and condition and respond to issues as required
- assess manure condition and respond as required
- check pen hygiene and respond to issues as required
- report and record incidents
- communicate with work team and supervisors
- implement relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information on rations, water, housing infrastructure and feeding infrastructure that can be gathered from livestock production and feeding plans
- principles and elements of nutrition and the impact of nutrition on livestock production
- nutritional requirements of different livestock species, classes and life stages
- impacts of poor nutrition and unsuitable rations on livestock production, and strategies to mitigate these impacts
- how rations can be adjusted or modified to benefit sick animals
- housing requirements and housing management of different livestock species, classes and life stages
- feeding and water requirements, and feeding and water management of different livestock species, classes and life stages
• impacts of unsuitable housing, feeding and watering infrastructure on livestock and strategies to mitigate these impacts
• effects of weather on housing and feeding infrastructure and strategies to mitigate such effects
• methods for using manure as assessment of livestock health
• methods for maintaining, cleaning and removing waste from housing and feeding infrastructure
• documentation, record keeping and methods for monitoring effectiveness of adopted strategies
• relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to conduct the most efficient and humane mulesing procedure in circumstances where all alternative methods of breech flystrike prevention have been evaluated and mulesing is considered the most appropriate of these for the long-term welfare of the sheep.

This unit applies to sheep farmers and contractors in the livestock industry who normally operate under limited supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

<th>Element</th>
<th>Performance criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
| 1. Conduct pre-mulesing evaluations | 1.1 Identify and comply with relevant State/Territory legislation, regulations and animal welfare standards and guidelines  
1.2 Identify industry standards and guidelines  
1.3 Seek expert advice and discuss alternative strategies to manage flystrike susceptibility prior to undertaking mulesing procedures  
1.4 Confirm workplace requirements for use of mulesing  
1.5 Conduct pre-operative evaluation of sheep  
1.6 Assess risks associated with mulesing procedure and implement measures to control the risks such as using appropriate Personal Protective Equipment |
| 2. Prepare for mulesing operations | 2.1 Identify and order all required supplies and equipment in advance  
2.2 Monitor weather conditions to determine optimal conditions for operation and recovery of sheep from the procedure  
2.3 Select suitable time of day for operation to minimise the separation time of lambs and ewes  
2.4 Engage adequate number of skilled workers  
2.5 Select appropriate yards, paddocks and pastures for each mob and each day to allow adequate time for mothering up of lambs after separation from the ewes  
2.6 Use appropriate procedures for mustering, movement and handling so that stress to sheep is kept to a minimum  
2.7 Allow lambs to settle and cool after yarding |
| 3. Select, maintain and use appropriate equipment | 3.1 Maintain all equipment in clean, hygienic and working conditions to reduce the risk of infection and cross-infection in sheep  
3.2 Maintain cradles to be used for mulesing in good working condition and can be operated to ensure minimal risk to the operator or lamb, especially when loading and unloading  
3.3 Set, grind and sharpen mulesing shears to working standards  
3.4 Disinfect mulesing shears after sharpening, before use and between each animal  
3.5 Prepare wash-down, soaking and disinfecting containers for use  
3.6 Prepare and test chemical application equipment to check for operational efficiency  
3.7 Clean and disinfect all equipment at the end of operation and store appropriately to minimise contamination |
<table>
<thead>
<tr>
<th>Element</th>
<th>Performance criteria</th>
</tr>
</thead>
</table>
| 4. Conduct mulesing procedures | 4.1 Conduct all procedures in accordance with work health and safety, animal welfare and biosecurity requirements  
4.2 Maintain a high standard of hygiene throughout the operation in relation to facilities, operators’ hands, handling and equipment  
4.3 Handle lambs calmly and use appropriate restraints such as cradles  
4.4 Perform mulesing procedure in accordance with model code of practice and industry standards  
4.5 Apply pain relief to the wound immediately after the procedure in accordance with industry standards and legislative requirements, and following label and Safety Data Sheet (SDS) instructions  
4.6 Apply insecticide dressing to the surrounding intact wool bearing skin (not the wound) immediately after the procedure in accordance with industry standards and following label and SDS instructions  
4.7 Continually evaluate wound symmetry, size and position, and breaks in selvage (muscle fascia)  
4.8 Remove lambs from cradles so they land gently on all four feet |
| 5. Conduct post-mulesing management procedures | 5.1 Allow lambs, following release, to 'mother-up' to ewes as soon as possible  
5.2 Provide immediate treatment for lambs that are abandoned or unable to stand or walk  
5.3 Monitor lambs for abnormal signs such as infection and septicaemia  
5.4 Maintain and update required documentation and records |

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

**Unit Mapping Information**

This unit is equivalent to AHCLSK334A Plan, prepare and conduct mulesing procedures

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of mulesing
- identify optimal conditions for carrying out mulesing procedures
- conduct pre-operative evaluation of lambs submitted for mulesing procedures and risk assessment in consultation with sheep manager
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with industry best standards and legislative requirements
- follow low stress stock mustering, movement and handling procedures
- carry out mulesing operations in accordance with industry recognised best practice mulesing techniques and hygiene standards
- follow appropriate procedures and label directions to provide pain relief plus insecticide dressing as required
- monitor animals' behaviour post-mulesing for health and well-being including the ability to recognise signs of post-mulesing complications
- communicate post-mulesing management requirements to sheep manager
- accurately document and maintain appropriate records
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare and biosecurity requirements
- relevant codes of practice and industry standards for mulesing
- reasons and requirements for mulesing in sheep
- body condition scoring (BCS), breech wrinkle scoring (BRWR) and breech cover scoring (BCOV) in lambs and adult sheep
- methods and strategies of flystrike control
- effects of weather, environmental, facility, flock, individual animal and human factors on mulesing operations
- use and maintenance of materials and equipment for mulesing
- principles and maintenance of hygiene in mulesing operations
- methods and techniques for handling and restraint of adult sheep and lambs
- use of pain relief and insecticide treatment in mulesing procedures
- anatomy and external features of sheep
- health and animal welfare implications of post mulesing complications in sheep
- signs of ill health and related management strategies in sheep
- use of and regulatory considerations for the use of disinfectants
- relevant care, husbandry and management strategies for sheep flocks
- relevant legislation, regulations and codes of practice, including those relating to work health and safety, animal welfare, veterinary practitioner/surgeons’ Acts, stock diseases and waste disposal, agricultural and veterinary chemical use

**Assessment Conditions**

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- conduct mulesing procedures

Assessors must satisfy current standards for RTOs.

</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>AHCv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to plan, prepare and conduct Dropped Ovary Technique (DOT) procedures for controlling fertility in females in extensive beef herds, where alternative options for the management of cull heifers and cows, other than spaying, have been evaluated but deemed unsuitable or unavailable.

This unit applies to cattle producers and contractors in the livestock industry who normally operate under limited supervision. It is essential that candidates who undertake this unit have at least one year’s prior experience working with cattle.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes or practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit. Regulations in some States and Territories restrict the conduct of the DOT procedure to registered veterinarians. There is a direct link between this unit of competency and approval for lay operators to perform the DOT procedure in some State/Territory jurisdictions.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of DOT procedures in consultation with cattle manager
- identify optimal conditions for carrying out DOT procedures
- conduct pre-operative evaluation of cattle submitted for ovary dropping and risk assessment in consultation with cattle manager
- comply with animal welfare legislation, animal welfare standards and guidelines, State and Territory veterinary surgeons’ or practitioners’ legislation and regulations and relevant codes of conduct
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with legislative requirements
- follow low-stress stock mustering, movement and handling procedures
- carry out DOT procedures in accordance with industry recognised best practice DOT procedure and processing rates, implement remedial actions and hygiene standards
- communicate post-spay management requirements to cattle manager
- accurately document and maintain appropriate records
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alternative options available to control fertility in cattle
- animal welfare and biosecurity requirements for the use of DOT in cattle
- anatomy and reproductive features of cattle
Assessment Requirements for AHCI3K335 Conduct dropped ovary technique procedures for spaying cattle

- body condition scoring of cattle
- relevant cattle nutrition and husbandry requirements for the specific cattle management system
- industry recognised best practice DOT procedure and processing rates
- use of, and regulatory considerations for the use of disinfectants
- health and animal welfare implications of post-operative complications of the use of DOT in cattle
- animal welfare legislation, animal welfare standards and guidelines, State and Territory veterinary surgeons’ or practitioners’ legislation and regulations and relevant codes of conduct as they apply to DOT
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace OR the workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for performance evidence must be conducted in an on-farm workplace situation with access to appropriate female cattle, facilities and equipment.

Assessment for the following performance evidence must be conducted on live animals:
- conduct DOT procedures

Assessors must satisfy current standards for RTOs.

AHCLSK337 Train, care for and ride horses for stock work

Modification History

<table>
<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to handle, ride and train horses to muster, move and separate livestock. It covers caring for horses and equipment, and addresses the potential risks associated with working with and around horses and livestock.

This unit applies to individuals who have experience working in the livestock industry and in riding educated, compliant and manageable horses to muster and check stock on grazing properties. Work is normally carried out independently, under broad direction according to workplace procedures.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- AHCLSK218 Ride educated horses to carry out basic stock work

Note the following chain of prerequisites that also applies to this unit.

<table>

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has cared for, ridden and trained at least two different horses for stock work. The following points must be demonstrated for each horse:

- identifying work health and safety hazards and implementing safe work procedures
- selecting and maintaining saddlery and equipment
- handling and preparing horses for riding and livestock work
- using calm and humane handling methods to minimise undue stress and risk to horses, handlers, and livestock according to animal welfare requirements
- developing a working relationship with the horse or horses in own care
- monitoring health and condition of horses, including carrying out basic hoof care and cleaning
- identifying signs of ill health, injury, or poor condition and administering basic treatments
- training horses to:
  - calmly carry out required movements for working stock, including safety movements, stops, turns and rollbacks
  - work and control a mob of livestock as a whole
- riding, controlling and stopping the horse to carry out checking, mustering and moving livestock as part of property operations
- assessing and monitoring horse behaviour during riding activities and taking corrective action if required
- completing post-ride activities including:
  - cleaning, feeding and watering horse
  - checking and maintaining tack
  - completing records as required by workplace.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common horse colours and markings, gender and other identifying features
- horse movement and behavioural characteristics, and learning theories relevant to stock work
- livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant industry standards and practices, and workplace procedures and guidelines for horse riding and riding safety, including lunging, riding in a yard before riding outside, and one-rein stops
- approaches to horse education for stock work and associated learning theories
- basic care husbandry and management procedures for horses
- common signs of unsoundness, including injury, disease, work stress or other disorders in horses
- basic anatomy and physiology of the horse
- use of horses for workplace operations
- care and maintenance of working gear
- horse conformation and work readiness or level of education
- horse handling and riding techniques
- key requirements of work health and safety and animal welfare regulations, and codes of practice relevant to working and interacting with horses.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions containing livestock handling facilities
- resources, equipment and materials:
  - various live, suitably educated, compliant and manageable horses to be trained for stock work and assessed as suitable for the experience and skill of the individual
  - livestock to use in training horses
  - appropriate tack for individual, horse and stock work activity
  - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
- specifications:
  - work instructions and workplace procedures for training, caring for and riding horses for stock work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to develop feeding plans for a production system.

This unit applies to supervisors and unit managers who are responsible for nutrition and feeding in an intensive livestock production facility.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- discuss feed and nutritional content with nutritionist and managers
- identify a range of raw ingredients
- operate a range of feeding equipment
- perform basic trouble shooting of the feeding operation
- monitor animal intake and performance
- read and interpret manufacturers' specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- interpret and apply task instructions, communicate with work team and supervisor, and record and report faults, workplace hazards and accidents
- accurately measure and calculate volumes, consumption and storage requirements
- complete the required records of feed use and livestock performance
- comply with enterprise biosecurity, environmental and animal welfare procedures and policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- control of common livestock diseases and preventative measures including the placement of medications in feed
- growth and development in livestock
- milling systems
- dietary needs and analysis of feed samples
- organisations sampling requirements and techniques
- where to access appropriate legislative requirements, manufacturer’s instructions and enterprise procedures/instructions
- silo operations and configuration, machinery and operating practices
- codes of practice and enterprise policies with regard to work health and safety, biosecurity, environment and animal welfare
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures.

**Assessment Conditions**

Competency is to be assessed in the workplace, OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- research predicted seasonal pasture production for the area
- estimate the feed value of a standing pasture at different times of the year
- calculate the feed demand for different types of livestock and production phases
- match feed supply and demand
- assess feeding plan alternatives
- develop and document a feeding plan

Knowledge Evidence

The candidate must demonstrate knowledge of:
- nutritional and daily energy requirements of livestock
- water quality and livestock tolerances
- nutritional value of different feedstuffs
- assessment procedures to ascertain livestock condition
- methods of assessing pastures quality and quantity
- pasture livestock carrying capacity
- supplementary feeding strategies
- change in nutritional requirements during late pregnancy and lactation

Assessment Conditions

Competency is to be assessed in the workplace or simulated environments that accurately reflect performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine measurable indicators, specifications and targets for the intensive enterprise assess the resources required for unit operations
- establish processes/strategies, procedure and controls to meet quality assurance requirements and production targets
- communicate production program to relevant personnel and complete administration activities
- manage livestock and the production environment
- implement quarantine procedures and monitor disease status of stock
- manage effluent and waste generated by production operations
- monitor and adjust production system for output, QA compliance, costs and profitability.
- prepare recommendations for future production programs based on the conduct of the operations, the data collected and the discussions with enterprise staff and contractors
- implement relevant work health and safety, biosecurity, animal welfare and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type and use of information that can be gathered from enterprise programs, documents and records
- types of resources required, types of products, methods for assessing and calculating resources and products by using information from enterprise programs, documents and records
• type of measurable indicators, specifications and targets for the production system using information from enterprise programs, documents and records
• functions, parameters and scope of enterprise production programs and production plans
• relevant regulatory, industry and enterprise approvals, licences, authorities, documentation, records and reporting requirements for enterprise production operations
• manpower, materials and equipment requirements for carrying out effective and efficient enterprise production operations
• relevant work health and safety requirements
• signs of health, signs of ill health and methods of assessing livestock health
• types and functions of housing and feeding infrastructure relevant to the enterprise production operations and methods for assessing damage, wear and tear to infrastructure
• techniques, procedures and requirements for post-mortem examination of livestock carcasses
• common diseases of livestock, and methods for assessing and evaluating disease status
• relevant biosecurity requirements, quarantine requirements, functions, components and facilities required of an enterprise quarantine system
• regulatory and industry requirements for effluent storage and disposal, types and functions of effluent storage and disposal systems, and methods for assessing and calculating effluent production
• regulatory and industry requirements, methods and systems for waste and debris storage and disposal
• relevant environment requirements and sustainability practices
• functions and aspects of production environment maintenance programs
• relevant animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to oversee animal marking operations.

This unit applies to livestock producers and those with supervisory responsibilities within livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor safe operating procedures
- plan, cost and schedule resource requirements
- prepare and implement a work plan for marking
- prioritise and schedule marking operations
- determine and allocate staff roles and responsibilities
- monitor the health and well-being of animals during and after marking
- manage staff and operations and establish and monitor performance targets
- document and prepare plans and reports for the understanding of staff and management
- implement and monitor relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- management processes and procedures
- cost analysis techniques
- procedures for planning and developing marking plans
- marking and production plans
- codes of practice with regard to animal marking and animal health and welfare
- use of veterinary medicines and their administration
- animal marking methods and procedures
- work health and safety and animal welfare legislation, codes of practice and enterprise requirements
- animal behaviour and nutritional requirements
Assessment Conditions

Competency is to be assessed in the workplace or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse key production data, herd/flock information and market requirements
- set production targets and identify resources needed to achieve them
- plan accommodation that meets animal welfare and production requirements
- develop feeding plans and evaluate alternatives for feed purchasing, milling and distribution
- determine work responsibilities and staffing requirements
- handle waste and effluent in line with environmental requirements and legislation
- monitor, review and adjust intensive production plans
- implement relevant work health and safety requirements
- implement relevant biosecurity, animal welfare and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- functions, parameters and scope of production plans
- type and use of information from enterprise production plans and enterprise production data that can be used to formulate production system planning and production unit performance targets
- type and use of information on herd/flock characteristics; regulatory, industry and enterprise requirements; industry and enterprise standards and benchmarks; market specifications for product qualities, product standards and market trends; production unit’s history and data, for the formulation of the production system plan and performance targets
Assessment Requirements for AHC1SK407 Plan and monitor intensive production systems

Date this document was generated: 3 September 2020

- types, quantities, assessment and calculation, procurement and selection of manpower, material, equipment and other resources required for the production plan
- types and functions of, and methods for assessing and calculating requirements of, housing, effluent management and environmental management infrastructure
- efficiency and cost benefit ratios of different types of housing, effluent management and environmental effluent infrastructure and systems, taking into account animal welfare requirements and enterprise production targets
- types, functions and cost benefit ratios of livestock feeds
- relevant aspects and impacts of production cycles and staff job roles on production planning
- relevant regulatory, industry and enterprise documentation, records and reporting requirements for implementation of production plans
- methods for assessing and evaluating production plans
- relevant work health and safety requirements
- relevant environmental requirements and sustainability practices
- relevant biosecurity requirements
- relevant animal welfare practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out pregnancy testing in livestock.

This unit can be delivered in the context of the following industries: cattle and horses.

This unit does not cover ultrasound scanning for pregnancy diagnosis.

This unit applies to those whose job role includes testing animals for pregnancy using manual diagnosis procedures. Veterinary advice may need to be sought in some cases where pregnancy symptoms are difficult to detect, or animals are to be identified as pregnant for sale.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for pregnancy testing  coordinate and arrange support for pregnancy testing
  - arrange support for pregnancy testing
  - draft animals and source information on joining to assist in pregnancy testing
  - restrain animals for pregnancy testing using humane methods and facilities
  - carry out manual pregnancy diagnosis procedures in adherence with animal welfare codes
  - monitor animals after pregnancy testing
  - maintain records of pregnancy testing
  - apply relevant animal welfare requirements
  - implement relevant work health and safety animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant anatomy and physiology of the animal species
- reproductive physiology and pregnancy development of the animal species
- husbandry and management strategies for pregnant and non-pregnant animals
- pregnancy testing methods
- reproductive diseases and complications in the animal species
- relevant work health and safety, animal welfare and biosecurity legislation, codes of practice and industry and enterprise policies
- recording and reporting systems used in conjunction with pregnancy diagnosis and animal breeding programs.
Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- carry out pregnancy diagnosis procedures

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards, assess risks and implement and monitor safe work practices and appropriate hygiene procedures
- monitor the health and wellbeing of animals
- detect possibility of disease through parameters such as loss of bodyweight behaviour or length of time required to eat food
- recognise clinical symptoms (normal vs. abnormal)
- recognise abnormal physiological and behavioural signs in livestock
- collect samples for testing for internal parasites and diseases
- implement preventative health strategies
- administer vaccines and medications to animals
- maintain records associated with animal health programs
- implement relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- symptoms of common livestock diseases and parasite infestations
- storage conditions for a range of chemicals, including veterinary chemicals
- types of vaccines and how they work
- zoonotic diseases and their mode of transmission
- animal anatomy and physiology relevant to the collection of tissue, organ, blood and other biological samples in live and dead animals and the conduct of post-mortems
- relevant biosecurity requirements
• management practices and processes to minimise noise, odours, and debris from the livestock operations
• relevant legislation, regulations and codes of practice relating to the use of veterinary medicines, animal diseases, animal welfare and waste and environmental management,
• relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select, purchase and induct livestock for feedlotting according to enterprise requirements
- source advice on feed and feeding regime with nutritionist and managers
- oversee the preparation of rations for feedlot livestock
- supervise feeding of feedlot livestock and provide advice to staff where required
- monitor livestock performance on weight gains and meeting carcass criteria and diagnose feeding problems and remove animals for treatment
- review procedures in response to feedback from slaughter point and customers
- complete the required records of feed use and livestock performance
- implement relevant work health and safety, animal welfare, biosecurity and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types and use of information to be gathered from enterprise plans and management for the determination of suitable feedlot livestock to be procured
- breeds, classes and characteristics of feedlot livestock
- criteria for assessment and selection of feedlot livestock
- regulatory, industry and enterprise requirements and procedures for purchase, delivery and movement of feedlot livestock.
- principles of nutrition, feeding strategies and feeding management of feedlot livestock
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of feedlot livestock
- types, forms and characteristics of livestock feeds
• process and requirements of a cost benefit analysis
• procedures and resource requirements for mixing, blending and milling feed ingredients and feeds
• relevant work health and safety requirements
• signs of health, ill health, good condition and poor condition in livestock, and methods for assessing livestock health and condition in relation to nutrition and feeding
• possible production changes in relation to changes in nutrition, feeds and feeding strategies
• types of and disposal methods for organic and non-organic waste
• relevant environmental requirements and sustainability practices
• regulatory, industry and enterprise requirements for selection, movement and dispatch of livestock for slaughter
• types and use of information that can be gathered from slaughter facilities and downstream customers to formulate, improve or adjust nutritional and feeding strategies for feedlot livestock
• relevant animal welfare and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to supervise the natural mating of livestock.

This unit applies to livestock producers and those with supervisory responsibilities within pastoral production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

| 1. Prepare animals for breeding | 1.1 Access and confirm requirements of enterprise breeding program and relevant animal data  
1.2 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls in line with enterprise policies  
1.3 Identify and prepare joining areas using a range of selection factors  
1.4 Handle animals safely and humanely to minimise stress and discomfort and in line with industry and enterprise animal welfare requirements  
1.5 Draft animals according to mating plan and in appropriate ratios to encourage optimum mating  
1.6 Determine and meet sire requirements in advance of mating  
1.7 Prepare and examine animals for mating |
| 2. Implement breeding program and monitor mating | 2.1 Access veterinary advice according to animal’s needs, enterprise requirements and industry practice  
2.2 Identify and schedule dates and timing of breeding  
2.3 Carry out physical examination of animals to evaluate health and welfare status of animals  
2.4 Observe behaviour of animals during joining to identify necessity of intervention and assistance  
2.5 Provide assistance as required |
| 3. Complete breeding program | 3.1 Remove sires from herd, mob or flock where required  
3.2 Monitor mating activity to ensure successful joinings have occurred, to identify problems and to effect remedial action as required  
3.3 Arrange for pregnancy testing to determine the effectiveness of joining  
3.4 Record and document data to develop history of mating performance and outcomes  
3.5 Research industry information of emerging and prevailing practices and compare with enterprise practice to recommend future improvements |
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards, assess risks and implement and monitor of safe operating procedures
- carry out physical examination of sires and females for health and breeding soundness
- prepare animals for joining
- monitor joining activity and returns to oestrus
- access, interpret and record data associated with mating program
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- mating behaviour
- anatomy and physiology of the reproductive organs and reproductive process in animals
- required live weights and conditions for mating
- environmental influences and their effects on joining
- ovulation stimulation and synchronisation
- enterprise's breeding programs and selection criteria (EBV & ASBV)
- pregnancy testing/ scanning procedures
- animal health and abnormalities
- relevant State/Territory legislation, regulations and Codes of Practice with regard to work health and safety and animal welfare
- enterprise and industry policies with regard to recording and reporting requirements
- identification of veterinary and non-veterinary procedures
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research livestock price trends and budgeted returns
- organise transport
- negotiate on price and terms
- assess livestock and condition
- arrange transport and insurance
- check on health status and condition of livestock
- complete records associated with livestock transport
- implement relevant quarantine/biosecurity practices where required
- implement relevant work health and safety requirements
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock assessment for relevant features / traits
- livestock selling procedures
- matching livestock to feed available
- livestock transportation
- animal health procedures
- livestock insurance
- relevant legislative work health and safety requirements especially as they relate to livestock sales, livestock products, animal welfare, animal transportation for local and export markets, and safe livestock handling techniques
Assessment Requirements for AHCSI5412 Arrange livestock purchases

- enterprise and industry policies and codes of practice with regard to livestock sales, livestock transportation, and recording and reporting requirements (NLIS)

**Assessment Conditions**

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the need for livestock handling facilities
- evaluate and recommend alternative options
- determine the site and design the handling facility for the site
- incorporate work health and safety and animal welfare requirements, potential environmental impacts and enterprise operational principles for livestock handling and movement into design
- estimate cost of building the designed facilities
- develop a detailed plan for livestock handling facility

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behaviour and design interactions
- enterprise livestock handling facility requirements
- requirements of transportation vehicles and loading areas
- costing methodologies
- livestock handling options and accommodation facilities and their uses
- site constraints in relation to livestock handling facilities
- industry and legislative requirements for the planning and establishment of livestock handling facilities
- relevant work health and safety legislative requirements
- codes of practice with regard to environmental protection and animal welfare
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop selection criteria for a breeding program
- select animals that have defects in conformation and /or productivity
- select animals that display characteristics associated with desirable genetic traits
- select animals according to a breeding program's selection criteria
- assess and record performance information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of genetic selection for multi traits
- structural abnormalities and their potential impact on production
- correlated traits
- market requirements and related physical and measurable traits
- enterprise animal selection criteria
- strategies for animal selection -including individual traits, measured performance, Estimated Breeding Value (EBVs & ASBVs), and indexes
- use of breeding value percentile tables

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to escort livestock during export.

This unit applies to animal attendants who escort livestock on sea voyages.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They may provide direction to others, and use discretion and judgement in the selection, allocation and use of available resources. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCLSK331 Comply with industry animal welfare requirements
AHCLSK307 Euthanase livestock

Unit Sector

Livestock (LSK)
## Elements and Performance Criteria

<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

### 1. Carry out administration requirements

1.1 Obtain and clarify details of the livestock to be exported from the exporter or producer
1.2 Establish effective communication links between all parties to the consignment and any relevant organisations or agencies
1.3 Investigate and verify specific details of the vessel/plane to facilitate loading and transit operations
1.4 Complete required certification, permit and invoicing arrangements according to exporter requirements and relevant legislation
1.5 Estimate nutritional and veterinary requirements and order required quantities according to exporter directions, established industry standards and load specifications

### 2. Prepare for livestock to be loaded

2.1 Comply with work health and safety policies and procedures, including selection of appropriate Personal Protective Equipment (PPE)
2.2 Ensure that animal welfare and biosecurity requirements are met
2.3 Establish communication lines with all shipboard personnel for the voyage
2.4 Review exporter instructions according to loading criteria
2.5 Identify appropriate infrastructure for loading
2.6 Perform basic risk analysis for loading and recommend preventative measures
2.7 Identify appropriate on-board loading resources including personnel requirements
2.8 Check and ensure all on-board equipment is in working condition, including the veterinary kit and euthanasia equipment

### 3. Load and accompany livestock on transport

3.1 Observe and follow work health and safety policies and procedures, animal welfare, biosecurity and environmental requirements
3.2 Load and secure prepared livestock safely and humanely according to animal welfare, biosecurity, work health and safety and exporter requirements
3.3 Check and verify loading densities and conditions in accordance with the loading plan and regulatory requirements
3.4 Monitor and record water and feed provision to livestock and report any abnormalities or variance from feed budgets to the appropriate party
<table>
<thead>
<tr>
<th>Element</th>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out pre-shipping and consignment administration procedures
- make preparations for loading of livestock
- load livestock onto the carrier
- handle, treat and feed livestock in accordance with relevant animal welfare, biosecurity, health and environmental legislation and codes of practice and in consideration of customer requirements
- identify signs of ill health and injury, or signs of abnormal or depressed appetite
- handle and restrain livestock for observation and treatment as required
- oversee the care of livestock in transit
- communicate effectively with exporting agents and related agencies, as well as the Master/Captain, officers and seamen on board
- complete export documentation including daily records of animal observations and conditions
- communicate effectively with exporting agents and related agencies, as well as transportation officers and staff
- implement relevant work health and safety, animal welfare, biosecurity and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare, biosecurity and quarantine, and environmental legislation and codes of practice
• regulatory requirements and industry standards for the transport of livestock using sea carriers
• typical exporter and shipping company requirements, policies and procedures
• how conflicts should be handled between regulatory requirements and requirements of exporters or shipping companies
• working culture and specifications for imported livestock of common importing countries
• care, husbandry and management procedures for health and welfare of all classes of livestock - including pregnant livestock - in transit
• methods and techniques for handling and restraint of all classes of livestock
• methods and techniques for loading and unloading of livestock
• signs of health, anatomy and physiology of the livestock species
• zoonoses of livestock and preventative health strategies for humans and livestock
• common diseases of the livestock species and preventative health strategies
• signs of ill health and related management strategies in the livestock species
• methods and techniques of euthanasia
• disposal of animal carcasses on-board sea carriers
• on-board procedures and responsibilities
• use and maintenance of personal protective equipment, veterinary, euthanasia and disinfectant materials and equipment
• invoice, receipt and document requirements at both ends of the transport operation
• strategies for effective communication between all parties to the consignment, relevant organisations and agencies, and on-board carrier personnel

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:
• load and transport livestock

Competency for the unit can be determined in a single species.

Assessors must satisfy current standards for RTOs

</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to manage horses for stock work, including coordinating specialist services from veterinarians and farriers.

The unit applies to individuals, experienced in riding horses for stock work, who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources, and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has demonstrated management of at least two horses and two workers undertaking stock work on a property, including:

- developing and implementing management plans for the condition and health of horses in the workplace
- monitoring and managing the health and welfare of horses and developing feeding plans for horses in the workplace
- developing work programs for horses in the workplace
- matching horse type and experience to rider and task
- supervising and coordinating activities and tasks requiring the use of horses in the workplace, and monitoring the outcomes
- managing the provision of training for inexperienced horses
- identifying and treating ill or injured horses and consulting with veterinarians
- coordinating the horse work of other property personnel such as horse breakers, veterinarians, farriers and other farm staff
- communicating task requirements to staff and arrangements for breaking-in of horses to staff and contractors
- observing, identifying and reacting appropriately to environmental implications and work health and safety hazards
- applying relevant animal welfare and biosecurity requirements to managing horses.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of work health and safety and animal welfare regulations and codes of practice relevant to working and interacting with horses
• key requirements of biosecurity and environment sustainability requirements relevant to working and managing horses
• industry and workplace policies, procedures and guidelines relevant to the job role
• feeding plan and work program for individual horses in the workplace
• care, husbandry and management procedures for horses
• signs of health, anatomy, physiology and behaviour of the horse
• signs of ill health in horses and management strategies for common illnesses
• strategies for and management of breaking in of horses and training inexperienced horses
• use of horses for workplace operations
• strategies for effective communication in the workplace
• strategies for effective supervision and management of staff in the workplace.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions

- resources, equipment and materials:
  - various horses used in livestock work assessed as suitable for the experience and skill of the individual
  - appropriate tack for individual, horse and stock work activity
  - personal protective equipment (PPE) correctly fitted and applicable to activity for individual

- specifications:
  - work instructions and workplace procedures relating to managing horses
  - access to legislation and industry information related to managing horses

- relationships with others:
  - management and specialists to interact with regarding the management of horses
  - staff to coordinate and match to horse suitability.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to plan for livestock production and manage the implementation of such a plan.

This unit applies to farm managers with extensive or intensive livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop livestock production plans
- manage all resources for a grazing enterprise
- implement grazing strategies that match livestock needs and optimise pasture growth
- maintain the farm natural resource base through sustainable practice
- plan and monitor the finances of the production unit
- observe, identify and react appropriately to animal welfare, biosecurity and environmental implications and work health and safety hazards
- monitor and manage animal health, welfare and nutrition
- supervise livestock husbandry operations
- analyse and assess the economic impact of specific situations
- establish processes/strategies, procedures and controls for livestock production
- assess land capability
- comply with legal and taxation requirements
- maintain records of production.
- assess, and then adopt profitable innovations
- implement and monitor relevant work health and safety, animal welfare, biosecurity and environmental requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock nutrition
- health and welfare of animals within the production system.
• key considerations in a livestock breeding operation
• livestock husbandry and management practices
• land capability and its relevance to planning livestock production in the context of the whole farm
• sustainable land use principles and practices applicable in the region
• environmental controls and codes of practice applicable to the enterprise
• budgeting and financing for an enterprise
• cost benefit analysis,
• management practices and processes to minimise noise, odours and debris from the livestock operations
• relevant legislation and regulations relating to soil and water degradation issues, animal health and welfare, biosecurity and chemical use
• relevant work health and safety legislation and codes of practice

Assessment Conditions
Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate markets and sales opportunities
- calculate cost of production and target sale price
- select sales outlets
- select selling method and negotiate with brokers, sellers and agents
- prepare and implement marketing plan
- ensure that the product meets legislative and industry requirements for fitness for sale
- coordinate sales and transport logistics for livestock products
- analyse sales data and trends to maximise future profit margins

Knowledge Evidence

The candidate must demonstrate knowledge of:

- market specifications for the products produced
- quality assurance procedures and their implementation
- sales outlets
- current and alternate sale methods
- preparation of livestock and transportation systems
- price risk and sales strategies
- sales analysis
- enterprise and industry policies and codes of practice with regard to livestock sales transportation, recording and reporting requirements
- market access requirements - Minimum Residue Levels (MRLs) and the variance between countries, withholding periods after treatment
Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to assess breeding requirements, select livestock for breeding, and monitor and evaluate the breeding program.

The unit applies to managers of livestock properties who are responsible for breeding programs and use of resources appropriate to meet property breeding aims. They take responsibility and exercise autonomy in undertaking complex work analysing, designing and communicating solutions to sometimes complex problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

| 1. Plan breeding program | 1.1 Assess and clarify breeding requirements to meet property or organisational aims  
1.2 Identify and arrange resources to support breeding requirements  
1.3 Select breeding options to optimise results and consistency  
1.4 Undertake economic assessments to establish the feasibility of the breeding objectives  
1.5 Formulate breeding program to meet organisation objectives, and ensure sufficient flexibility to accommodate contingencies |
| 2. Select livestock for breeding | 2.1 Determine selection criteria for the visual and objective methods of selecting livestock based on heritability and economic returns for the property  
2.2 Establish culling and replacement practices to maintain or improve appropriate herd size, animal ratios and grade of livestock  
2.3 Assess genetic gain potential to determine and justify herd or flock structure  
2.4 Source genetic material to optimise genetic gain within the herd or flock from suitable sources  
2.5 Check and monitor selected livestock to ensure condition and welfare status meets breeding program requirements  
2.6 Carry out measurements of production and genetic characteristics, and evaluate results within appropriate breeding program requirements |
| 3. Monitor breeding program | 3.1 Supervise implementation of the breeding program for efficiency and effectiveness  
3.2 Prioritise and implement changes necessary to achieve breeding aims according to breeding program requirements  
3.3 Examine and control allocated resources within organisation budgetary constraints  
3.4 Maintain safe workplace and environmentally responsible practices in line with industry and organisation work health and safety and environment sustainability requirements  
3.5 Observe and comply with relevant legislative requirements associated with livestock production, such as animal welfare and biosecurity requirements |
Elements | Performance Criteria

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has developed and implemented a minimum of one breeding strategy for an operation or property, including:

- identifying genetic information for existing and potential livestock through breed data
- using industry programs to benchmark and identify sources of genetic material
- developing a breeding objective
- implementing selection strategies for livestock
- implementing animal welfare strategies to handle livestock safely and humanely
- monitoring progress in a breeding program and undertaking reviews
- evaluating breeding program
- documenting and reviewing data derived from the breeding strategy
- maintaining a safe and hazard-free workplace environment
- monitoring and minimising impacts to the environment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- difference between genotype and phenotype, the heritability of genetic traits and the basic genetic theory related to genetic correlation of traits
- relevance of generation interval in relation to commercial improvement
- relevance of estimated breeding values in the development of a multi-trait selection strategy
- economic impact of production characteristics
• features of and measurement of production and genetic characteristics used in breeding programs
• relevant work health and safety and biosecurity requirements, and animal welfare and environment sustainability practices
• key requirements of regulations and codes of practice relevant to developing and implementing a breeding strategy, including:
  • work health and safety
  • animal welfare
  • biosecurity
  • sustainability practices.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions
• specifications:
  • work instructions and workplace procedures relevant to developing and implementing a breeding strategy
  • organisational documentation relating to breeding information and financial arrangements required to develop a breeding strategy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify livestock diseases relevant to the workplace and local environment
- develop prevention and treatment strategies for diseases
- implement a proactive risk management approach to managing animal health and welfare
- implement health and welfare strategies appropriate to the livestock species
- calculate dose rates and schedule treatments
- implement and monitor relevant work health and safety requirements
- implement and monitor relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock health and abnormalities
- preventative health strategies
- principles of genetic resistance and immunity
- contingency and operational planning
- relevant animal welfare legislation, regulations and codes of practice
- relevant environmental protection legislation and codes of practice
- treatment applications, handling and consequences of their use
- relevant quarantine, biosecurity and emergency legislation, codes of practices and procedures
- relevant work health and safety legislative requirements
Assessment Conditions

Competency is to be assessed in the workplace or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the effectiveness of a range of effluent management systems to meet the requirements of statutory, local government and environment authorities for effluent disposal
- conduct cost benefit analysis of livestock effluent management systems to select a suitable effluent management system
- design and plan the layout of an effluent system that meets environmental standards and enterprise requirements
- design an effluent management system
- incorporate the enterprise work health and safety and environmental management policies into the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, characteristics, disadvantages and advantages of effluent management systems (including storage, recycling, processing and disposal)
- regulatory requirements, including environmental, sustainability work health and safety and biosecurity requirements, industry standards, industry and enterprise production parameters, data and information for the design and planning of effluent management systems
- uses and processes for cost benefit analyses, and their applications in relation to livestock production and effluent management
- types and use of information required, and methods for the assessment and determination of effluent production, output and volume for livestock enterprises
• effects and impacts of different livestock production systems on the design and planning of effluent management systems
• types and use of information and advice from other professions or industry sectors that are relevant to livestock enterprises in the design of effluent management systems, including engineering and financial professions

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency covers the planning required to determine the genetic selection of a pure breed or cross breeding program to suit the farm environment. The plan will aim to increase production and financial return by using genetic improvement of the livestock for meat production, dairy production and fibre production and the evaluation of the current breeding program. Data is collected and analysed in order to select sires and dams to improve the livestock to meet the product specifications chosen for the enterprise. Evaluation of the breeding program is carried out on completion.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit is applicable to a person who has a role in managing a breeding enterprise. This unit is likely to require consultation with breed societies, importers and distributors of genetic material, local livestock agents, processors and marketers of the product.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse profit for the breeding enterprise
- select suitable market specifications for the enterprise
- develop selection criteria for a breeding program
- select livestock for a breeding program on phenotype and genotype
- assess farm facilities to carry out a breeding program
- use Breed Object index
- arrange Artificial Insemination (AI) and Embryo Transfer (ET) programs
- implement the breeding program
- feed livestock to ensure success of a breeding program
- organise drugs, animal identification and all equipment in clean working order in preparation for the program
- keep breeding and production records
- submit records and information for statistical analysis and registration of livestock
- handle livestock safely and humanely
- interpret feedback information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- theory of cell division and the structure of DNA
- heritability estimates for the selected characteristics
- recording and understanding breed pedigrees
- dominant genetic traits and marker genes
Assessment Requirements for AHCSK507 Plan, monitor and evaluate strategies to improve livestock through genetics

- accuracy of the genetic potential of the selected breeding trait for the program
- genetic defects
- value of heterosis in a breeding program
- ethics and codes of practice for the welfare of livestock on the breeding program
- phenotype selection criteria
- market specifications targeted by the breeding program
- long term breeding aims
- pregnancy testing procedure
- veterinary and non-veterinary standard operating procedures
- sources for genetic information, up to date program design and implementation procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply organisational or industry procedures for customer complaints
- investigate the details of and background to the complaint and refer to other parties if required
- negotiate an outcome with the customer if appropriate
- process the complaint according to enterprise policy
- recommend appropriate action arising from the complaint

Knowledge Evidence

The candidate must demonstrate knowledge of:

- State/Territory/Commonwealth legislation, regulations, industry codes of practice, standards and guidelines
- organisational policy and procedures for dealing with complaints
- strategies for dealing with customer complaints
- negotiation and communication strategies
- the individual’s role in processing customer complaints

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- engage customers, in relation to giving advice, receiving information and creating additional sales opportunities
- assess and demonstrate cost benefits of products
- ensure that information and directions on the product label are understood by the customer
- research supplier information
- supply Safety Data Sheets (SDSs) with all registered chemicals
- encourage add on sales and represent the enterprise in a professional manner
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential environmental impact of chemicals
- enterprises business values, structure, products and services
- chemical formulations, available proprietary products and their applications
- the content and legal status of registered chemical labels
- relevant HAZCHEM, AGSAFE, Australian Dangerous Goods, work
- health and safety, industry, fair trading, trade practices, and sales of goods legislation
- enterprise policies and procedures relating to customer service
- relevant licences/accreditation regarding the sale and handling of farm chemicals
- work health and safety, pesticides and environmental legislation, codes of practice and enterprise procedures
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to provide advice on agronomic products.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to rural products merchandisers whose job role includes providing advice on agronomic products including fertilisers.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research sources of agronomic information to retain technical currency in all aspects of agronomy relevant to local district requirements
- engage with and give advice to customers
- ensure that the advice and product type are applicable and suitable for the purpose and growing environment of the client
- encourage add on sales
- represent the enterprise in a professional manner when dealing with customers
- follow enterprise of work health and safety polices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- customer service techniques
- systems and procedures for the safe handling of products
- enterprises business values, structure, products and services
- industry terminology for products
- requirements of local or specific customers
- relevant requirements of work health and safety, industry, fair trading, trade practices, sales of goods, environment and public liability legislation
- agronomic products including fertilizers and crop seeds and their uses
- relevant components of State/Territory Acts relating to fertilisers and certified seeds
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- advise customers as to the range of livestock products available for their specific application/environment
- engage with and give advice to customers
- ensure that the advice, product type, application and suitability are understood by the customer
- advise customers on risks to worker safety or animal welfare from use of the product
- encourage add on sales
- represent the enterprise in a professional manner when dealing with customers
- follow enterprise work health and safety policies
- follow enterprise biosecurity, animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- customer service and selling techniques
- systems and procedures for the safe handling of products
- enterprises’ business values, structure, products and services
- livestock industry equipment, animal handling systems and stockfeeds
- relevant work health and safety, animal welfare and biosecurity legislation, fair trading, trade practices, and sales of goods legislation
- relevant components of State/Territory Acts relating to stock feeds
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- take soil, plant tissue and water samples
- use and explain use of nutrient management tools
- provide information on the relationship between soil types, water, crops, fertiliser and soil ameliorant use
- follow enterprise work health and safety policies
- follow enterprise biosecurity and sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop nutrient requirements - both macro and micro nutrients
- effect of soil ameliorants in dispersion and adjustment for acidity or alkalinity (pH)
- fertiliser and soil ameliorant application methods, including timing and frequency of fertiliser and soil ameliorant application to minimise losses
- fertiliser and soil ameliorants availability and relative costs
- industry production regimes and fertiliser practices
- sources of technical information
- major nutrient management risks of leach, run-off, load, blow, mine and how these impact on the environment
- nutrient management advisory tools and processes used by advisers in making a crop nutrition recommendation
- organisational work health and safety and environmental procedures, practices and policies in operating sampling equipment
- packaging and dispatch procedures for samples
• physical, chemical and biological properties related to a healthy soil and environment,
• sampling tools and methods, including soil, plant tissue and water tests; yield monitoring; and electrical conductivity survey
• impact of climate on soil productivity
• environmental impacts including soil structural decline, fertility decline, acidification and salinity, erosion, loss of organic matter, water quality, fertiliser and soil ameliorant impurities, and greenhouse gas emissions
• work health and safety legislation
• use, transport, handling and storage requirements of fertiliser and soil ameliorants in terms of legislation, codes of practice, environmental stewardship and human safety

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate pressure loss due to irrigation components
- calculate pumping requirements
- conduct research of products
- estimate requirements for materials and components from a plan
- identify adverse environmental impacts of irrigation pumping activities and take appropriate remedial action
- implement and follow work health and safety and environmental requirements
- interpret irrigation plans
- interpret pump curves
- monitor performance of pumps and irrigation components
- pressure testing pumps
- provide customer service
- select irrigation components for a system
- use pressure testing equipment
- use recorded information to review energy and water efficiency for an irrigation system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation sales and service
- basic irrigation system diagnostic techniques
- demonstration and assembly of irrigation products and components
- determination of pump capacities in relation to proposed application
• interpretation of manufacturers specifications
• irrigation components technical specifications and suitability
• price negotiation and payment options
• pump and irrigation equipment characteristics, technical capabilities and limitations
• pump and irrigation equipment components, controls, features and functions
• store irrigation products and pump range
• store product and service and repair policy

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare design and installation estimates
- plan installation
- facilitate the completion of the installation
- implement work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking facilities and milking machine/equipment installations
- requirements, resources, components and financial aspects of planning milking equipment installations for milking facilities and enterprises
- requirements, resources, components and manpower for implementing installation of milking machine/equipment
- relevant enterprise considerations for milking facilities and milking equipment installations
- keys aspects and components of tender submissions and contracts for work
- types of relevant approvals, authorities and permits required, and procedures to obtain these approvals, authorities and permits
- relevant work health and safety requirements
Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine cooling and storage system requirements
- determine milk pre-cooling requirements
- determine milk storage requirements
- install milk cooling and storage equipment
- operate and maintain milk cooling and storage equipment
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant requirements and industry standards for design, planning, installing and operating milk cooling and milk storage systems
- types, functions, cleaning, operating, monitoring and maintenance of milk cooling and milk storage systems and all components
- requirements, components and considerations for designing, planning, siting and installing milk cooling and milk storage systems and their components, and to meet the needs of the enterprise
- requirements, criteria and assessment methods for determining water quality and the impacts of water quality on maintenance and performance of milk cooling and milk storage systems
- possible faults, problems and poor performance with milk cooling and milk storage systems and their components, impacts on enterprise operations and corrective actions for these faults and problems
Assessment Requirements for AHCMKH403 Design and install enterprise milk cooling and storage

- criteria and methods for assessing performance of milk cooling and milk storage systems and their components
- requirements and assessment methods for determining enterprise milk production levels
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- order installation components
- inspect and prepare installation site
- manufacture components in the workshop
- install machine/equipment
- commission test installed machine/equipment
- implement work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- types, functions, cleaning, operation, monitoring and maintenance of milking facilities and milking machine/equipment
- requirements, resources, components, manpower and procedures for installation of milking machine/equipment
- requirements, criteria and procedures for making alterations/modifications to milking machine/equipment
- Australian Standards for Milking Equipment Installation and Performance, regulatory requirements and procedures for reporting non-compliance
- implications and impacts of non-compliance of milking machine/equipment
- relevant requirements and considerations for installing milking machine/equipment
- keys aspects and components of contracts for work
- types of relevant approvals, authorities and permits required, and procedures to obtain these approvals, authorities and permits
- criteria and methods for assessing performance of milking machine/equipment
• requirements, procedures and assessment criteria for mechanical testing of milking machine/equipment
• possible faults, problems and poor performance with milking machine/equipment and corrective actions for these faults, problems and poor performance
• requirements, methods and procedures for site cleaning, waste and debris disposal
• relevant work health and safety requirements

Assessment Conditions
Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to assist with routine maintenance tasks for small engine machinery and associated equipment.

The unit applies to individuals who assist with routine maintenance tasks while working alongside a supervisor exercising limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

## Elements

Elements describe the essential outcomes.

<table>
<thead>
<tr>
<th>Performance Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

### 1. Prepare for basic routine maintenance

1.1 Read or listen to work instructions from supervisor and clarify where necessary

1.2 Select tools and supplies required to carry out basic routine maintenance tasks according to job requirements

1.3 Select, fit and use personal protective equipment applicable to job requirements

1.4 Carry out routine pre-operational checks of machinery and equipment according to operation and maintenance manual and make adjustments where required

1.5 Identify and segregate faulty or unsafe machinery and equipment for repair or replacement

1.6 Identify health and safety hazards in the workplace and report safety concerns to supervisor

### 2. Carry out basic routine maintenance

2.1 Carry out greasing, lubrication and other basic servicing of machinery and equipment

2.2 Make routine adjustments and repairs to machinery and equipment

2.3 Use safe workplace practices and methods when undertaking basic routine maintenance tasks

### 3. Complete basic routine maintenance activities

3.1 Clean and store tools according to workplace procedures

3.2 Clean and maintain work areas and return to operating condition

3.3 Collect, treat and dispose or recycle waste from maintenance activities according to workplace procedures

3.4 Report malfunctions, faults, wear or damage of tools to supervisor

### Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assisted with routine maintenance tasks for at least two different types of small engine machinery and associated equipment and has:

- identified hazards and reported to supervisor
- tested machinery and equipment to identify maintenance requirements
- carried out routine repairs and adjustments required for maintenance of machinery and equipment
- cleaned and maintained work area and returned to operating condition
- applied safe and environmentally responsible workplace practices
- used oral communication skills and language competence to communicate effectively with others
- followed workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, characteristics and functions of machinery and equipment
- types, characteristics and functions of tools used in maintenance of machinery and equipment
- machinery and equipment operation and maintenance manual
Assessment Requirements for AHCMM0101 Assist with routine maintenance of machinery and equipment

- environmental impacts of machinery servicing and disposal methods for fuels, oils and other wastes
- workplace procedures applicable to health and safety in the workplace and machinery maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - machinery and equipment
  - maintenance tools and equipment
  - personal protective equipment applicable to the task being undertaken
- specifications:
  - machinery operation and maintenance manual
  - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- relationships:
  - supervisors
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to undertake pre-start checks, operate and shut down two wheel motorbikes.

The unit applies to individuals who operate two wheel motorbikes to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

### Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<table>
<thead>
<tr>
<th>Skill</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>• Interpret textual information from a range of sources to identify relevant and key information about workplace operations</td>
</tr>
</tbody>
</table>
| Oral communication | • Use clear language to report malfunctions, faults and irregular performance or damage  
• Participate in verbal exchanges to respond to questions and clarify information |
| Numeracy | • Calculate quantities of vehicle fluids including oil and fuel  
• Identify correct tyre pressures |
| Navigate the world of work | • Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility |

### Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

| Pre-operational checks must include: | • vehicle damage and serviceability  
• engine oil  
• fuel  
• brakes  
• tyres, including pressure and condition  
• vehicle controls. |
| Biosecurity implications | • control of cross site contamination. |
must include:

| Two wheel motorbike good riding techniques must include: | • pre-positioning and adjustment of body weight when going uphill, including standing up and body forward  
• pre-positioning and adjustment of body weight when going downhill, including standing up and body rearward  
• leaning the two wheel motorbike towards the slope and pressing hard on the outside (downhill) footrest, keeping the body weight on top of the tyre tread when riding across slopes  
• standing up to improve situational awareness, when operating in restricted visibility situations, rough terrains and crossing obstacles. |

| Unload, load and secure motorbike must include at least one of the following: | • trailer  
• transportation device  
• on site vehicle storage. |

Performance Evidence
An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a two wheel motorbike on at least two different riding surface conditions and on an even, uneven and sloping terrain and has:

- operated a two wheel motorbike without a passenger
- identified hazards and risks associated with two wheel motorbike areas of operation
- identified and avoided riding surfaces, terrains and slopes that are dangerous to safe operation of two wheel motorbikes
- complied with legislation and workplace safety plan in regard to carrying passengers
- selected and worn two wheel motorbike helmet that was fit for purpose
- selected, correctly fitted, used and maintained personal protective equipment
- started, steered, manoeuvred, positioned and stopped a two wheel motorbike in a controlled manner
- applied two wheel motorbike good riding techniques to pre-position the body to assist bike stability
- unloaded, loaded and secured two wheel motorbike safely.

Knowledge Evidence
An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with two wheel motorbike areas of operation
- components, controls and features of two wheel motorbikes and their functions
- two wheel motorbike functional applications
- operating principles and operating methods of two wheel motorbikes
Assessment Requirements for AHCMMOM201 Operate two wheel motorbikes

- two wheel motorbike good riding techniques, including requirements to pre-position and adjust body weight for riding uphill, downhill and on uneven terrain
- workplace safety plan and operators manual
- impacts and consequences of substandard environmental and biosecurity practices
- load limits and two wheel motorbike capabilities and the effects to dynamic stability on the two wheel motorbike including:
  - passengers
  - weight distribution
  - load security
  - liquid or shifting loads
  - effect of load when operating on uneven or sloping terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
  - tie down devices
  - vehicle ramps
  - loading surfaces and angle
- effects of different riding surfaces and terrain conditions on the operation of two wheel motorbikes
- variations in state/territory regulations, legislation and licensing requirements in regard to two wheel motorbike use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - no riders under 16 years of age on adult sized two wheel motorbikes
  - no towing
  - helmets must be worn whilst operating two wheel motorbikes
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
  - two wheel motorbike
  - vehicle fuel
  - two wheel motorbike helmet
  - enclosed shoes
- specifications:
  - two wheel motorbike manufacturer specifications and operator manuals
- timeframes:
  - according to the job requirements.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and complete tractor operations under general supervision in the agriculture, horticulture and land management sectors.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Prepare tractor for operation | 1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks  
1.2 Source and interpret machinery operation and maintenance manual and manufacturer instructions for tractor operation  
1.3 Select and maintain personal protective equipment and safety equipment according to workplace safety requirements  
1.4 Fit and use personal protective equipment according to job requirements and task to be undertaken  
1.5 Select and attach equipment as directed by supervisor  
1.6 Conduct tractor routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor |
| 2. Operate tractor | 2.1 Carry out pre-start and start up procedures required for tractor operation  
2.2 Drive and operate tractor in a smooth and controlled manner  
2.3 Apply workplace environmental and biosecurity procedures associated with tractor operation and minimise impact  
2.4 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment  
2.5 Complete work according to agreed plan as directed by supervisor  
2.6 Report abnormal monitoring system indicators and alarms to supervisor |
| 3. Complete tractor operation | 3.1 Park tractor and conduct shut down procedures  
3.2 Perform routine operational servicing according to the operation and maintenance manual  
3.3 Report malfunctions, faults, irregular performance or damage to supervisor  
3.4 Clean, decontaminate, secure and store tractor and attached equipment  
3.5 Remove and store keys in the required location  
3.6 Maintain tractor and equipment use records in required format |
Foundation Skills

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:

• maintenance interval schedule daily check
• machine damage and serviceability
• guards are in place and undamaged
• checking for missing parts
• fluid leaks and levels
• fuel level
• brakes and clutch operation
• condition of tyres or tracks
• machine controls.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, safely operated and completed tractor operations under general supervision at least once and has:

- identified and reported hazards and implemented safe operating procedures
- carried out tractor pre-operational checks and reported faults to supervisor
- driven and operated a tractor safely, in a smooth and controlled manner
- operated tractors in even and uneven terrain conditions
- carried out tractor shut down procedures
- maintained tractor use records and reported faults or malfunctions
- minimised environmental impacts associated with tractor operation
- followed workplace health and safety procedures for safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor operation and maintenance manuals
- tractor steering systems and features
- features, operational functions and procedures for attached equipment
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities
Assessment Requirements for AHCMM02 Operate tractors

- effects of various surface and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of vehicles
- health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
  - tractors
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - tractor operation and maintenance manual
  - industry and workplace biosecurity procedures applicable to tractor operation
  - legislation relevant to tractor operation and licensing requirements
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken pre start checks, operated, maintained and shut down at least two types of basic machinery and equipment used in the agriculture, horticulture or land management sectors. For each type, the individual must have demonstrated the following:

- identified and reported hazards and implemented safe working practices
- carried out basic machinery and equipment pre-operational checks including basic servicing and maintenance according to operation and maintenance manual
- operated basic machinery and equipment in a safe and controlled manner consistent with operation and maintenance manual and manufacturer specifications
- carried out safe shut down and storage procedures for basic machinery and equipment
- followed workplace health and safety procedures during the operation and use of basic machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with basic machinery and equipment operation
- pre-operational and safety checks for basic machinery and equipment
- operating principles and operating methods for basic machinery and equipment
- procedures for cleaning, securing and storing basic machinery and equipment
- risks associated with the operation of machinery and equipment in different types of weather and terrain conditions
- duty of care to self, others and the environment when using and operating basic machinery and equipment
workplace procedures applicable to work health and safety requirements to operate basic machinery and equipment safely.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- **physical conditions:**
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating the machinery
- **resources, equipment and materials:**
  - a range of basic machinery and equipment
  - enclosed toe shoes
  - safety equipment and personal protective equipment applicable to the machinery and equipment being used and the task being undertaken
- **specifications:**
  - basic machinery and equipment operation and maintenance manuals
  - industry and workplace biosecurity procedures applicable to basic machinery and equipment operation
- **timeframes:**
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and completed operational maintenance of at least two types of machinery used in the agriculture, horticulture or land management sectors. For each machinery type, the individual must have demonstrated the following:

- identified and reported hazards and implemented safe working practices
- selected and prepared tools and equipment required for machinery maintenance
- carried out lubrication and operational servicing of machinery
- conducted basic diagnostic tests required for maintenance of machinery
- checked machinery components for wear and tear, replaced parts, tagged and reported defects
- collected, removed and recycled or disposed of wastes according to workplace environmental procedures
- followed workplace health and safety procedures when undertaking operational maintenance of machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and uses of lubricants and other commonly used servicing materials
- operating principles of machinery including mechanical and auto-electrical systems
- servicing characteristics of plant and equipment
- types, characteristics, uses and limitations of hand power tools
- functions of components of common mechanical and hydraulic systems
- different working principles of two stroke, four stroke, petrol and diesel engines
set-up requirements of plant and equipment, and principles of calibration
• basic diagnostic processes and techniques used to identify faults
• sourcing machinery and equipment operation and maintenance manuals
• environmental impacts of machinery maintenance and disposal of fuels, oils and other wastes
• procedures applicable to health and safety in the workplace requirements to maintain machinery safely.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • machinery
  • maintenance tools and equipment
  • personal protective equipment applicable to the task being undertaken
• specifications:
  • machinery operation and maintenance manual
  • workplace procedures applicable to machinery maintenance
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to undertake pre-start checks, operate and shut down vehicles used in the agriculture, horticulture and land management sectors.

The unit applies to individuals who operate vehicles to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken pre-start checks, operated and shut down vehicles used in the agriculture, horticulture and land management sectors on at least one occasion and has:

- identified and reported hazards and implemented safe operating procedures for vehicle operation
- prepared the vehicle for use by undertaking routine pre-operational checks and maintenance tasks
- safely secured loads prior to vehicle operation
- driven the vehicle in a safe and controlled manner
- carried out vehicle shut down procedures including securing of vehicle and safe storage
- minimised environmental impacts associated with vehicle usage and operation
- followed workplace health and safety procedures during preparing vehicle for use, operation and shut down
- followed industry and workplace biosecurity procedures
- completed required documentation for vehicle use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with vehicle operations
- safety requirements for vehicle use and operation
- vehicle operation and maintenance manual
- vehicle components, controls, features, technical capabilities and limitations
- vehicle operating principles and operating methods
• load limits and the principles of weight distribution with regard to load shifting and vehicle movement
• effects of adverse surface and terrain conditions on the operation of vehicles
• duty of care to self, others and the environment when operating vehicles
• relevant legislation with regard to vehicle operation and licensing requirements
• environmental impacts relevant to operation of vehicles
• workplace procedures applicable to workplace health and safety requirements to operate a vehicle safely
• industry and workplace biosecurity procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  • individual must not be in a fatigued state when operating vehicles

• resources, equipment and materials:
  • a range of vehicles
  • vehicle loads
  • tie down devices
  • safety equipment and personal protective equipment applicable to the task being undertaken

• specifications:
  • vehicle operation and maintenance manuals
  • industry and workplace biosecurity procedures applicable to vehicle operation
  • legislation relevant to vehicle operation and licensing requirements

• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down grader operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for grader operations
- carried out pre-operational checks required for safe grader operation
- driven and operated a grader safely and modified operating technique to meet changing work conditions
- carried out grader shut down procedures including securing and safe storage of grader
- minimised environmental impacts associated with grader operation
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the grader
- followed industry and workplace biosecurity procedures
- completed required documentation for grader use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with grader operations
- grader and site safety requirements
- grader components, controls, features, technical capabilities and limitations
- grader operation and maintenance manual
- duty of care to self, others and the environment when operating a grader
- relevant legislation with regard to grader operation and licensing requirements
- environmental impacts relevant to the operation of graders
• workplace procedures applicable to health and safety in the workplace requirements to operate a grader safely
• industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  • individual must not be in a fatigued state when operating the machinery

• resources, equipment and materials:
  • graders
  • safety equipment and personal protective equipment applicable to the task being undertaken

• specifications:
  • grader operation and maintenance manuals
  • industry and workplace biosecurity procedures applicable to grader operation
  • legislation relevant to grader operation and licensing requirements

• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down front-end loader operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for front-end loader operations
- carried out front-end loader pre-operational checks for safe front-end loader operations
- driven and operated a front-end loader safely and modified operating technique to meet changing work conditions
- operated front-end loader features and attachments consistent with operation and maintenance manual and manufacturer specifications
- carried out front-end loader shut down procedures including securing and safe storage of front-end loader
- minimised environmental impacts associated with front-end loader operation
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the front-end loader
- followed industry and workplace biosecurity procedures
- completed required documentation for front-end loader use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with front-end loader operations
- front-end loader site safety requirements
- front-end loader components, controls, features, technical capabilities and limitations
Assessment Requirements for AHC0M207 Conduct front-end loader operations Date this document was generated: 3 September 2020

- front-end loader operation and maintenance manual
- duty of care to self, others and the environment when operating a front-end loader
- relevant legislation with regard to front-end loader operation and licensing requirements
- environmental impacts relevant to the operation of front-end loaders
- workplace procedures applicable to health and safety in the workplace requirements to operate a front-end loader safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
  - front-end loaders
  - attachments
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - front-end loader operation and maintenance manuals
  - industry and workplace biosecurity procedures applicable to front-end loader operation
  - legislation relevant to front-end loader operation and licensing requirements
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and shut down excavator operations in an agricultural environment.

The unit applies to individuals who conduct excavator operations to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down scraper operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for scraper operations
- carried out scraper pre-operational checks for safe scraper operations
- driven and operated a scraper safely including modifying operating technique to meet changing work conditions
- carried out scraper shut down procedures including securing and safe storage of scraper
- minimised environmental impacts associated with scraper operations
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the scraper
- followed industry and workplace biosecurity procedures
- completed required documentation for scraper use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with scraper operations
- scraper and site safety requirements
- scraper components, controls, features, technical capabilities and limitations
- scraper operation and maintenance manual
- duty of care to self, others and the environment
- relevant legislation with regard to scraper operation and licensing requirements
- environmental impacts relevant to the operation of scrapers
• workplace procedures applicable to work health and safety requirements to operate a scraper safely
• industry and workplace biosecurity procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  • individual must not be in a fatigued state when operating the machinery
• resources, equipment and materials:
  • scrapers
  • safety equipment and personal protective equipment applicable to the task being undertaken
• specifications:
  • scraper operation and maintenance manuals
  • industry and workplace biosecurity procedures applicable to scraper operation
  • legislation relevant to scraper operation and licensing requirements
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to safely operate a hand-held chainsaw and maintain it in working condition.

This unit applies to cross-cutting fallen timber using safe cutting techniques.

The unit applies to individuals who apply low risk work procedures and comply with worksite health and safety requirements when operating hand-held chainsaws to carry out routine work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

</tr>
</tbody>
</table>
Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| Personal protective equipment must include: | • safety helmet  
| | • mesh visor  
| | • gloves  
| | • hearing protection  
| | • safety glasses or goggles  
| | • safety boots.  
| Routine checks and maintenance must include at least two of the following: | • checking and adjusting bar  
| | • cleaning air filter  
| | • cleaning and/or replacing spark plug  
| | • sharpening chain.  
| Supports must include at least one of the following: | • fallen timber  
| | • saw horse trestle  
| | • v-shaped supports.  
| Cutting methods must include: | • pulling chains cuts (bottom of bar)  
| | • pushing chainsaw cuts (top of bar)  
| | • bore / plunge cuts (tip of bar).  
| Tools must include: | • bars  
| | • chains  
| | • files  
| | • plug spanner.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a hand-held chainsaw at least once, maintained it in working condition and demonstrated the following:

- determined site location for work and work details and clarified with supervisor
- identified site hazards, assessed risks and reported to supervisor
- confirmed work zone with work crew and monitored site
- confirmed first aid and emergency personnel, equipment and procedures
- applied hazard and risk assessment and implemented controls for chainsaw use
- performed routine checks and maintenance for chainsaw usage according to operation and maintenance manual
- identified, tagged and reported chainsaw faults and malfunctions
- recorded and implemented site health and safety in the workplace, environmental and traffic control measures
- used personal protective equipment that complies with Australian Standards
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- used appropriate tools and materials to maintain chainsaw
- applied environmentally responsible workplace practices
- applied low risk work practices including stopping, disengaging quickly and dealing with foreign matter
- cleaned and stored chainsaw
- followed workplace procedures relevant to safely operating a chainsaw.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles and practice for operating chainsaws
- chainsaw routine checks and maintenance according to operation and maintenance manual, including:
  - checking and adjusting bar
  - cleaning air filter
  - cleaning and replacing spark plug
  - sharpening chain
- workplace safe operating procedures
- hazards and risks when operating a chainsaw
- relevant Australian Standards concerning chainsaw operation including use of personal protective equipment
- components of chainsaws and their respective functions
- common defects in woody materials
- cutting methods and techniques, patterns and sequence of cuts
- health and safety in the workplace requirements for the operation of a chainsaw including caution and hazard signs and symbols
- environmental impacts associated with operating chainsaws.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - personal protective equipment must be worn whilst operating chainsaw
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
  - chainsaws
  - chainsaw tools
  - wood
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - chainsaw manufacturer specifications and operator manuals
- timeframes:
  - according to the job requirements.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and complete cane haulage vehicle operations in the sugar cane production industry.

The unit applies to individuals who operate cane haulage vehicles to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated a cane haulage vehicle to haul a load of cane safely and efficiently at least once and has demonstrated the following:

- identified hazards and risks associated with cane haulage vehicle operation implemented safe work practices
- carried out cane haulage vehicle pre-operational checks
- checked haulage equipment prior to use
- driven and operated a cane haulage vehicle safely including modifying operating technique to meet changing work conditions
- operated cane haulage vehicle features and attachments consistent with operation and maintenance manual and manufacturer specifications
- used safe pushing and towing practices to haul cane safely and efficiently
- carried out cane haulage vehicle shut down procedures
- minimised environmental impacts associated with cane haulage vehicle operation
- followed workplace health and safety procedures
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with cane haulage vehicle operations
- site safety requirements for cane haulage operations
- cane haulage vehicle components, controls, features, technical capabilities and limitations
- operating methods of cane haulage vehicles including pushing and towing
principles of weight distribution with regard to load shifting and vehicle movement
risks associated with the operation of cane haulage vehicles in different weather and terrain conditions
cane haulage processes and spillage minimisation techniques
cane harvesting processes as they relate to collection and haulage of harvests
duty of care to self, others and the environment including environmental impacts relevant to the operation of cane haulage vehicles
relevant legislation with regard to cane haulage vehicle operation and licensing requirements
environmental impacts associated with operating a cane haulage vehicle
workplace procedures applicable to health and safety in the workplace requirements to operate a cane haulage vehicle safely
industry and workplace biosecurity procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:
physical conditions:
  a workplace setting or an environment that accurately represents workplace conditions
  individual must not be under the influence of alcohol or drugs
  individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  individual must not be in a fatigued state when operating the machinery
resources, equipment and materials:
  cane haulage vehicles
  cane
  safety equipment and personal protective equipment applicable to the task being undertaken
specifications:
  cane haulage vehicle operation and maintenance manuals
  industry and workplace biosecurity procedures applicable to cane haulage vehicle operation
  legislation relevant to cane haulage vehicle operation and licensing requirements
timeframes:
  according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has mown a commercial site using a commercial lawnmower at least once and has:

- determined the condition of the existing grass surface and sought advice for subsequent routine preparations and treatments
- prepared site and equipment used for mowing
- used lawnmower, equipment, machinery and implements according to manufacturer specifications
- operated a commercial mower safely including making adjustments for attached implements and modifying techniques to meeting changed conditions
- minimised environmental impacts associated with lawnmower operation
- implemented lawnmower shut down procedures
- carried out routine servicing and maintenance and recorded malfunctions, faults or irregular performance
- cleaned and stored mower according to workplace guidelines
- followed workplace health and safety procedures for safe use and operation of commercial lawnmowers.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of grass preparation
- preparation methods and treatments required for optimal maintenance of grass surfaces
- effect of adverse outdoor climatic conditions on commercial lawnmower operations
- use of lawnmower, equipment, machinery and implements according to manufacturer specifications
- commercial lawnmower operation and maintenance requirements
- hazards and risks associated with commercial lawnmower operation
- environmental impacts relevant to the operation of commercial lawnmowers
- workplace procedures applicable to health and safety in the workplace requirements to operate a commercial lawnmower safely.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:
- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - commercial lawn mower
  - lawnmower implements
  - personal protective equipment specific to lawnmower operation
- specifications:
  - lawn mower manufacturer specifications and manufacturer guidelines
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to safely operate a side by side utility vehicle including undertaking pre-start checks and shut down procedures.

The unit applies to individuals who operate side by side utility vehicles to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

| Oral communication            | • Use clear language to report malfunctions, faults and irregular performance or damage  
                                 | • Participate in verbal exchanges to respond to questions and clarify information |
| Numeracy                      | • Calculate quantities of vehicle fluids including oil and fuel  
                                 | • Calculate load volumes and weights  
                                 | • Identify correct tyre pressure |
| Navigate the world of work    | • Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility |

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:

• vehicle damage and serviceability  
• fuel  
• brakes  
• tyres including pressure and condition  
• vehicle controls.

Personal protective equipment must include:

• a suitable helmet according to operators manual  
• enclosed toe shoes

Side by side utility vehicle driver skills must include:

• parking across the slope when parking on a hill or gradient  
• on-board weight distribution  
• load security  
• crossing obstacles  
• avoiding hazards.

Safety features must include at least three of

• roll-over protective structure  
• seat belts
the following:

- side nets
- doors
- occupant hand holds
- tyre selection and inflation pressure.

Unload, load and secure side by side utility vehicle must include at least one of the following:

- trailer
- transportation device
- on site vehicle storage.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a side by side utility vehicle on at least two riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with side by side utility vehicle use
- identified and avoided driving surfaces, terrains and slopes that are dangerous to safe operation of side by side utility vehicles
- selected and worn side by side utility vehicle helmet that is fit for purpose according to operators manual
- selected, fitted and used other personal protective equipment that is required for the task
- maintained personal protective equipment in suitable condition for use
- unloaded the side by side utility vehicle safely and checked it is safe to use
- operated and manoeuvred side by side utility vehicles in different surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a side by side utility vehicle in a controlled manner
- selected appropriate modes of operation and applied side by side utility vehicle driver skills to assist vehicle stability
- parked the side by side utility vehicle safely and checked for any damage, malfunctions or faults
- loaded and secured side by side utility vehicle safely
- minimised environmental impacts associated with side by side utility vehicle operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with side by side utility vehicle areas of operation
Assessment Requirements for AICMOM216 Operate side by side utility vehicles

- components, controls, modes and features of side by side utility vehicles and their functions
- side by side utility vehicle functional applications, including:
  - occupant hand holds, correct use, importance of reach and keeping body parts inside vehicle
  - roll-over protective structure
  - tyre selection and inflation pressure
  - side nets and doors
- operating principles and operating methods of side by side utility vehicles
- workplace safety plan for operating and maintaining side by side utility vehicles
- side by side utility vehicle operator’s manual
- side by side utility vehicle driver skills, including higher level two foot pedal operation skills, for technical applications
- effects of different surfaces and terrain conditions on the operation of side by side utility vehicle
- load limits and attachments specific to side by side utility vehicle capabilities and the effects to dynamic stability of the side by side utility vehicle including:
  - weight distribution
  - load security
  - liquid or shifting loads
  - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
  - tie down devices
  - vehicle ramps
  - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to side by side utility vehicle use
- environmental impacts associated with operating side by side utility vehicles and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:
- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - helmets must be worn whilst operating side by side utility vehicles according to operators manual
- resources, equipment and materials:
  - side by side utility vehicle
  - vehicle fuel
Assessment Requirements for AHCMMOM216 Operate side by side utility vehicles

- side by side utility vehicle helmet as identified by operator manual
- enclosed toe shoes
- specifications:
  - side by side utility vehicle manufacturer specifications and operator manuals
  - industry and workplace biosecurity procedures applicable to side by side utility vehicle operation
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a quad bike on at least two different riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with quad bike areas of operation
- identified and avoided riding surfaces, terrains and slopes that are dangerous to safe operation of quad bikes
- identified and confirmed quad bike no go areas
- selected, fitted and used quad bike helmet and other personal protective equipment that was fit for purpose
- maintained personal protective equipment in suitable condition for use
- unloaded the quad bike safely and checked it is safe to use
- operated and manoeuvred quad bikes in different riding surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a quad bike in a controlled manner
- applied quad bike active riding techniques to preposition operator body weight to assist bike stability
- parked the quad bike safely and checked for any damage, malfunctions and faults
- loaded and secured the quad bike safely
- minimised environmental impacts associated with quad bike operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with quad bike areas of operation including quad bike no go areas
- components, controls and features of quad bikes and their functions
- quad bike functional applications, including appropriate selection of machine for task
- workplace safety plan for operating and maintaining quad bikes
- quad bike operator's manual
- operating principles and operating methods of quad bikes
- circumstances when quad bike active riding techniques should be applied
- quad bike active riding techniques, including both when and when not to apply quad bike active riding techniques
- effects of different riding surfaces and terrain conditions on the operation of quad bikes
- load limits and attachments specific to quad bike capabilities and the effects to dynamic stability of the quad bike, including:
  - weight distribution
  - load security
  - liquid or shifting loads
  - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
  - tie down devices
  - vehicle ramps
  - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to quad bike use
- environmental impacts associated with operating quad bikes and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - no passengers on single seat quad bikes
  - no riders under 16 years of age on adult sized quad bikes
  - no towing
  - helmets must be worn whilst operating quad bikes
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
  - quad bike
  - vehicle fuel
  - a suitable quad bike helmet
  - enclosed toe shoes
• specifications:
  • quad bike operation and maintenance manual
  • industry and workplace biosecurity procedures applicable to quad bike operation
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

**Range of Conditions**

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

| Material resource requirements must include at least two of the following: | • tools                                                                 |
|                                                                          | • fuel                                                                  |
|                                                                          | • oil                                                                   |
|                                                                          | • cleaning agents                                                       |
|                                                                          | • solvents                                                              |
|                                                                          | • chemicals                                                             |
| Personal protective clothing and equipment must include:                  | • enclosed toe shoes                                                   |
|                                                                          | • safety glasses/goggles       |
| Contingency situations must include at least one of the following:       | • delays in delivery of equipment or machinery                           |
|                                                                          | • machinery or equipment breakdowns                                     |
|                                                                          | • poor weather conditions                                                |
|                                                                          | • poor quality materials                                                 |
|                                                                          | • unforeseen problems                                                   |

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has coordinated maintenance and repair of machinery and equipment for a small enterprise and has:

- identified workplace hazards, assessed risks and implemented safe workplace procedures
- interpreted documentation associated with work site activities
- sought specialist advice on repairs requiring specialist attention
- established priorities for repair and maintenance work to be carried out
- co-ordinated staff and resources to achieve work priorities
- minimised environmental impacts of machinery and equipment maintenance and repair activities
- responded to contingencies and taken corrective actions where necessary
- documented activities, timelines and material usage
- applied workplace health and safety procedures when organising and conducting maintenance and repair activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery required for the project
- environmental impacts of machinery and equipment maintenance and repair work and disposal of fuels, oils and other wastes
• workplace procedures applicable to health and safety in the workplace, and machinery and equipment maintenance and repair.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions

• resources, equipment and materials:
  • machinery and equipment
  • maintenance tools and equipment
  • material resources
  • safety equipment and personal protective equipment applicable to the task being undertaken

• specifications:
  • machinery operation and maintenance manual
  • workplace procedures applicable to health and safety in the workplace and machinery maintenance

• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare, inspect, maintain and record maintenance requirements for machinery that is used principally in agriculture, horticulture, and conservation and land management work.

The unit applies to individuals who conduct machinery maintenance under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

| Numeracy | • Calculate quantities of machinery fluids including oil  
• Identify correct tyre pressure |
| Navigate the world of work | • Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility |

---

### Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

Machinery and equipment must include at least one of the following:  
• heavy earthmoving equipment  
• tractors  
• vehicles and trucks  
• skid steer loaders  
• self-propelled harvesters and pickers  
• front end loaders  
• forklifts
- land levellers
- motorised turf mowing equipment
- spraying equipment
- pumps
- grain handling equipment.

Personal protective clothing and equipment must include:
- enclosed toe shoes
- safety glasses/goggles.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken maintenance of machinery that is used principally in agriculture, horticulture or conservation and land management work at least once and has:

- identified workplace hazards, assessed risks and implemented safe workplace procedures
- carried out engine and equipment inspection and maintenance
- carried out transmission inspection and maintenance
- carried out lubrication and replacement of oils and filters
- checked machinery and equipment components for wear and tear, replaced parts, tagged and reported defects
- minimised environmental impacts associated with undertaking machinery maintenance
- maintained machinery and equipment components
- recorded details of maintenance and monitoring
- applied workplace health and safety procedures when undertaking machinery maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- engine function principles
- turbo charging and after cooling
- assessing engine specifications in line with power requirements
- engine electric and hydraulic indicators and gauges
- transmission and drive systems
- machinery and equipment operation and maintenance manual
• environmental impacts of machinery servicing and disposal of fuels, oils and other wastes
• workplace procedures applicable to health and safety in the workplace and machinery maintenance.

Assessment Conditions
Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions

• resources, equipment and materials:
  • machinery and equipment
  • maintenance tools and equipment
  • safety equipment and personal protective equipment applicable to the task being undertaken

• specifications:
  • machinery operation and maintenance manual
  • workplace procedures applicable to health and safety in the workplace and machinery maintenance

• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated agricultural or horticultural machinery and equipment at least once and has:

- identified and reported workplace hazards and implemented safe operating procedures
- carried out machinery and equipment pre-operational checks including basic servicing and maintenance according to operation and maintenance manual
- operated machinery and equipment in a safe and controlled manner consistent with task requirements, conditions, operation and maintenance manual and manufacturer specifications
- attached ancillary equipment and checked for correct operation
- carried out machinery shut down procedures
- recognised, reported and documented defects in equipment and machinery and operational capacity
- cleaned, secured and stored machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with machinery and equipment operation
- pre-operational and safety checks for machinery and equipment according to operation and maintenance manual
- operating principles and operating methods for machinery and equipment
- procedures for cleaning, securing and storing machinery, equipment and materials
- risks associated with the operation of machinery and equipment in different weather conditions and difficult terrain conditions
• duty of care to self, others and the environment
• workplace procedures applicable to health and safety in the workplace requirements for operating machinery and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  • individual must not be in a fatigued state when operating machinery and equipment
• resources, equipment and materials:
  • a range of machinery and equipment
  • enclosed toe shoes
  • safety equipment and personal protective equipment applicable to the machinery and equipment being used and the task being undertaken
• specifications:
  • machinery and equipment operation and maintenance manuals
  • industry and workplace biosecurity procedures applicable to machinery and equipment operation
  • records must include details of the machinery and equipment that the individual was assessed on
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

### Elements

Elements describe the essential outcomes.

### Performance Criteria

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Assess the work site and confirm the suitability of the specialised machinery and equipment for the task
2. Select specialised machinery and equipment suitable for the task
3. Select and maintain personnel protective equipment applicable to the machinery and equipment to be operated and the task to be undertaken
4. Fit and use personal protective equipment according to workplace procedures and job requirements
5. Conduct routine pre-operational checks as described in operation and maintenance manual
6. Replace and report damaged or worn components in line with workplace requirements
7. Attach ancillary equipment and check for correct operation

2. Operate specialised machinery and equipment

1. Operate specialised machinery and equipment safely
2. Operate specialised machinery and equipment according to task requirements, conditions, operation and maintenance manual and manufacturer specifications
3. Monitor specialised machinery and equipment performance and efficiency and make adjustments where required
4. Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment

3. Complete specialised machinery and equipment operation

1. Conduct shut down of machinery according to workplace procedures
2. Perform routine operational servicing and minor maintenance according to operation and maintenance manual
3. Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures
4. Clean, secure and store specialised machinery and equipment according to workplace procedures
5. Maintain specialised machinery and equipment use records in required format
Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>• Interpret textual information from a range of sources to identify relevant and key information about workplace operations</td>
</tr>
<tr>
<td>Writing</td>
<td>• Document specialised machinery and equipment use</td>
</tr>
<tr>
<td>Oral communication</td>
<td>• Use clear language to report malfunctions, faults, irregular performance or damage</td>
</tr>
<tr>
<td>Numeracy</td>
<td>• Calculate quantities of machinery fluids including oil and fuel</td>
</tr>
<tr>
<td>Navigate the world of work</td>
<td>• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility</td>
</tr>
</tbody>
</table>

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Specialised machinery and equipment must include at least one of the following:

- feed mixers
- specialised turf equipment
- specialised nursery equipment
- livestock feeding systems
- specialised harvesting or planting equipment
- filtering and pumping equipment
- poultry performance monitoring equipment
- fertilising application
- grain handling equipment.

Pre-operational checks must include:

- specialised machinery and equipment damage and serviceability
- engine oil
- fuel
- specialised machinery and equipment controls
- reporting and tagging defects.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated specialised agricultural or horticultural machinery and equipment at least once and has:

- identified and reported hazards and implemented safe operating procedures
- carried out specialised machinery and equipment pre-operational checks including basic servicing and maintenance according to operation and maintenance manual
- operated specialised machinery and equipment in a safe and controlled manner consistent with task requirements, conditions, operation and maintenance manual and manufacturer specifications
- attached ancillary equipment and checked for correct operation
- carried out machinery shut down procedures
- recognised and reported defects in specialised machinery and equipment and operational capacity
- cleaned, secured and stored specialised machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with specialised machinery and equipment operation
- pre-operational and safety checks for specialised machinery and equipment according to operation and maintenance manual
- operating principles and operating methods for specialised machinery and equipment
- procedures for cleaning, securing and storing specialised machinery and equipment and materials
• risks associated with the operation of specialised machinery and equipment in different weather conditions and difficult terrain conditions
• duty of care to self, others and the environment
• workplace procedures applicable to health and safety in the workplace requirements for operating specialised machinery and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  • individual must not be in a fatigued state when operating specialised machinery and equipment
• resources, equipment and materials:
  • a range of specialised machinery and equipment
  • enclosed toe shoes
  • safety equipment and personal protective equipment applicable to the specialised machinery and equipment being used and the task being undertaken
• specifications:
  • specialised machinery and equipment operation and maintenance manuals
  • industry and workplace biosecurity procedures applicable to specialised machinery and equipment operation
  • records must include details of the specialised machinery and equipment that the individual was assessed on
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare and undertake activities required to ground spread fertiliser and soil ameliorants.

This unit applies to individuals who apply industry codes of practice and operating principles to ground spread fertiliser and soil ameliorants under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, manufacturer specifications, sustainability and biosecurity practices.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated fertiliser and soil ameliorant spreading equipment and machinery at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- assessed environmental and physical hazards that may be encountered when undertaking ground spreading operations and taken appropriate action to minimise risks
- communicated with clients to ensure a common understanding and agreement of task to be undertaken
- used maps and interpreted written instructions regarding areas to be spread including types of products and application rates
- maintained, calibrated and operated ground spreading equipment according to operation and maintenance manual, manufacturer specifications and in line with industry standards for uniformity of application
- monitored weather conditions during ground spreading operations and adjusted operations to minimise risk to local environment and personnel in the vicinity
- minimised environmental impacts associated with fertiliser and soil ameliorant application including attention to buffer zones and run-off
- applied fertiliser or soil ameliorants at rate agreed by customer to specified land area
- implemented shut down procedures including cleaning, securing, and safe storage of machinery
- completed operational and equipment maintenance records according to workplace procedures
- followed industry and workplace biosecurity procedures.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with fertiliser and soil ameliorant application, and machinery and equipment operation
- fertiliser and soil ameliorant machinery and equipment operating components, controls, features, technical capabilities and limitations
- operational limits of equipment with regard to uniformity of application and potential health and safety implications
- spreading characteristics of different fertiliser and soil ameliorant products
- environmental impacts associated with fertiliser spreading including hazards to waterways
- purpose of buffer zones
- methods of monitoring local weather conditions and the effects of changes on ground spreading activities
- operating principles and operating methods of fertiliser and soil ameliorant machinery and equipment
- procedures for cleaning, securing and storing fertiliser and soil ameliorant machinery, equipment and tools
- workplace procedures applicable to fertiliser and soil ameliorant application
- workplace procedures applicable to health and safety in the workplace and fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating fertiliser and soil ameliorant machinery
- resources, equipment and materials:
  - fertiliser and soil ameliorant machinery, equipment and tools
  - fertiliser or soil ameliorant products
  - protective clothing
  - respirators
  - protective eyewear
  - unlined rubber or plastic gloves
  - neoprene or nitrile boots
• safety equipment and personal protective equipment applicable to the task being undertaken
• specifications:
  • fertiliser and soil ameliorant machinery and equipment operation and maintenance manuals and manufacturer specifications
  • industry code of practice applicable to fertiliser and soil ameliorant application
  • industry and workplace biosecurity procedures applicable to fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a cane harvester to harvest a commercial crop of cane at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out cane harvester pre-operational checks according to operation and maintenance manual
- checked cane harvester equipment prior to use
- familiarised self with field and local conditions for harvest
- set and operated a cane harvester in a safe, controlled and correct manner and monitored for performance and efficiency
- operated cane harvester consistent with operation and maintenance manual and manufacturer specifications
- recognised and reported defects in cane harvester equipment and operational capacity
- communicated and co-operated with relevant personnel including haul-out drivers
- controlled and minimised cane spillage
- carried out cane harvester shut-down procedures
- cleaned and sterilised the harvester to prevent cross-site contamination
- minimised environmental impacts associated with cane harvester operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with cane harvester operations
• cane harvester and site safety requirements
• cane harvester components, controls, features, technical capabilities and limitations
• operating principles and operating methods for cane harvesters
• cane harvester processes and spillage minimisation techniques
• harvest and haulage processes as they relate to collection and haulage of harvests
• principles of the safe removal of obstacles from harvesters and adjustment of harvester settings
• duty of care to self, others and the environment
• relevant legislation with regard to cane harvester operation and licensing requirements
• environmental impacts associated with operating cane harvesters
• workplace procedures applicable to health and safety in the workplace and operating a cane harvester safely
• industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • in a range of weather and surface conditions and on a range of different terrains
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  • individual must not be in a fatigued state when operating cane harvester
• resources, equipment and materials:
  • cane harvester
  • cane
  • safety equipment and personal protective equipment applicable to the task being undertaken
• specifications:
  • cane harvester operation and maintenance manuals
  • industry and workplace biosecurity procedures applicable to cane harvesting
  • legislation relevant to cane harvester operation and licensing requirements
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to operate harvest machinery and equipment used for broadacre and row crop harvesting in the agriculture and horticulture sectors.

This unit applies to individuals who operate broadacre or row crop harvesting machinery and equipment under broad direction, and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated broadacre and row crop harvesting machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out harvest machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in broadacre and row crop harvest machinery equipment and operational capacity
- attached and detached ancillary equipment safely
- operated harvest machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and local conditions
- shut down machinery and equipment and recorded usage
- minimised environmental impacts associated with harvest machinery and equipment operation
- followed industry and workplace biosecurity procedures
- followed workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with broadacre and row crop harvest machinery and equipment operations
- broadacre and row crop harvest machinery and equipment components, controls, features, technical capabilities and limitations
Assessment Requirements for AHCMM0308 Operate broadacre and row crop harvest machinery and equipment

Date this document was generated: 3 September 2020

- manufacturer and workplace requirements for:
  - pre-operational checks
  - machinery operation techniques
  - operator level servicing
  - planned and emergency shut down procedures
- relevant legislation with regard to harvest machinery operation and licensing requirements
- environmental impacts associated with operating machinery and equipment used for harvesting
- workplace procedures applicable to health and safety in the workplace requirements and harvest machinery and equipment operation
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating harvest machinery
- resources, equipment and materials:
  - harvest machinery and equipment
  - broadacre or row crop
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - harvest machinery and equipment operation and maintenance manuals
  - industry and workplace biosecurity procedures applicable to broadacre and row crop harvesting
  - legislation relevant to harvest machinery operation and licensing requirements
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated land-forming machinery and equipment for agricultural or conservation earthworks purposes at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out land-forming machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in land-forming machinery and equipment and operational capacity
- attached and detached ancillary equipment safely
- operated land-forming machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and conditions
- shut down machinery and equipment and recorded usage
- minimised environmental impacts associated with land-forming machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with land-forming machinery and equipment operations
- land-forming machinery and equipment components, controls, features, technical capabilities and limitations
• manufacturer requirements and workplace requirements for:
  • pre-operational checks
  • machinery operation techniques
  • operator level servicing
  • planned and emergency shut down procedures
• general land forming concepts and practices including:
  • contouring, surface drainage and erosion
  • slope requirements
  • survey and set out
• workplace procedures applicable to health and safety in the workplace requirements for
  land-forming machinery and equipment operation
• environmental impacts associated with operating machinery and equipment used for
  land-forming
• industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • in a range of weather and surface conditions and on a range of different terrains
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may
    impair judgement
  • individual must not be in a fatigued state when operating land-forming machinery
• resources, equipment and materials:
  • land-forming machinery and equipment
  • safety equipment and personal protective clothing and equipment applicable to the task
    being undertaken
• specifications:
  • land-forming machinery and equipment operation and maintenance manuals
  • industry and workplace biosecurity procedures applicable to land-forming
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational
education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to operate precision technology used for the control of specialised machinery and equipment and to optimise specialised machinery performance.

The unit applies to individuals who operate precision control technology under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

| Numeracy                      | • Check and compare precision control technology data against job specifications  
|                               | • Download and interpret precision control technology data and record in operational records |
| Navigate the world of work    | • Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility |

**Range of Conditions**

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| Precision control technology must include at least one of the following: | • on-board Global Positioning System (GPS), Global Navigation Satellite System (GNSS) or Differential Global Positioning System (DGPS) precision control equipment  
|                                                                              | • fixed GPS, GNSS or DGPS precision control equipment. |
| Pre-operational checks must include at least one of the following:       | • precision control technology equipment damage and serviceability  
|                                                                              | • Automatic Section Control measurement check  
|                                                                              | • equipment dimension check  
|                                                                              | • GPS offset setting. |

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has used precision control technology in the operation of agricultural or horticultural machinery at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out precision control technology pre-operational checks according to operation and maintenance manual
- used technology to operate machinery in an efficient and controlled manner
- minimised environmental impacts associated with use of precision control technology to operate machinery
- performed routine maintenance tasks
- performed basic diagnostic procedures
- downloaded and uploaded data for the task
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- manufacturer specifications and requirements for:
  - precision control technology pre-operational checks
  - precision instrument controls, feature and functions
  - minor servicing requirements
- uploading and downloading of data produced during the operation of precision control machinery and associated equipment
- components and controls features and functions of equipment
- diagnostic techniques for operational performance
• characteristics, technical capabilities and limitations of associated machinery and equipment
• environmental impacts of using precision control technology to operate machinery.

Assessment Conditions

Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
  • individual must not be under the influence of alcohol or drugs
  • individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  • individual must not be in a fatigued state when operating precision control technology equipment
• resources, equipment and materials:
  • precision control technology equipment
• specifications:
  • precision control technology equipment operation and maintenance manuals
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated row crop planting and seeding machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out planting and seeding machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in row crop planting machinery and equipment and operational capacity
- attached and detached ancillary equipment
- operated planting and seeding machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and conditions
- followed planting requirements
- minimised environmental impacts associated with row crop planting and seeding machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with row crop planting and seeding machinery and equipment operations
- planting and seeding machinery and equipment components, controls, features, technical capabilities and limitations
Assessment Requirements for AHCMOM12 Operate row crop planting and seeding machinery and equipment Date this document was generated: 3 September 2020

- manufacturer requirements and workplace requirements for:
  - pre-operational checks
  - machinery operation techniques
  - operator level servicing
  - planned and emergency shut down procedures
- environmental impacts associated with operating machinery and equipment used for row crop planting and seeding
- workplace procedures applicable to health and safety in the workplace for row crop planting and seeding machinery and equipment operation
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - in a range of weather and surface conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating row crop planting and seeding machinery
- resources, equipment and materials:
  - row crop planting and seeding machinery and equipment
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - row crop planting and seeding machinery and equipment operation and maintenance manuals
  - industry and workplace biosecurity procedures applicable to row crop planting and seeding
- relationships:
  - supervisors
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated either lateral or centre pivot mobile irrigation machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out mobile irrigation machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in mobile irrigation machinery and equipment and operational capacity
- attached and detached ancillary equipment
- operated mobile irrigation machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and conditions
- shut down machinery and equipment and recorded usage
- minimised environmental impacts associated with mobile irrigation machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with mobile irrigation machinery and equipment operations
- mobile irrigation machinery and equipment components, controls, features, technical capabilities and limitations
- manufacturer requirements and workplace requirements for:
• pre-operational checks
• machinery operation techniques
• operator level servicing
• planned and emergency shut down procedures
• health and safety in the workplace procedures applicable to mobile irrigation machinery and equipment operation
• environmental impacts associated with operating machinery and equipment used for mobile irrigation
• industry and workplace biosecurity procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:

• physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating mobile irrigation machinery

• resources, equipment and materials:
  - mobile irrigation machinery and equipment
  - safety equipment and personal protective equipment applicable to the task being undertaken

• specifications:
  - mobile irrigation machinery and equipment operation and maintenance manuals
  - industry and workplace biosecurity procedures applicable to mobile irrigation

• timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

### Performance Criteria

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. **Prepare trailer, low loader or float for loading according to contractor policy**
2. **Load machine according to safe operating procedures and workplace procedures**
3. **Complete tie down procedures according to industry practice**
4. **Secure machine to prevent movement in transport according to industry practice**
5. **Display signs indicating oversized loads according to legislative requirements**
6. **Arrange permits, clearances and escorts for transporting oversized loads**

2. **Transport machines**

   1. **Plan transport route ensuring compliance with oversized loads, permits, clearances and relevant legislation**
   2. **Drive machines on or off road in compliance with relevant licensing requirements and regulations**
   3. **Transport machinery safely to destination according to licensing requirements and regulations**

3. **Unload machines**

   1. **Complete untie procedures according to industry practice**
   2. **Unload machines according to safe operating procedures and workplace procedures**
   3. **Complete workplace documentation in required format**

### Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>• Interpret textual information from a range of sources to identify relevant and key information about workplace operations</td>
</tr>
<tr>
<td>Navigate the world of work</td>
<td>• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility</td>
</tr>
</tbody>
</table>
Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| Load must include at least one of the following: | • side loaded  
| | • rear loaded.  
| Tie down must include at least one of the following: | • webbing straps  
| | • chains  
| | • wire rope  
| | • polypropylene or nylon filament rope  
| | • clevis claw hook  
| | • grab hook  
| | • ratchet hook.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has loaded, transported and unloaded large machinery used for earthmoving or agricultural operations at least once and has:

- identified hazards and risks and implemented safe work practices and procedures
- safely loaded and unloaded large earthmoving or agricultural machinery
- secured machinery as a transport load
- provided an escort for wide loads
- arranged permits and escorts as required by legislation
- driven machinery to destination, complying with requirements for moving wide loads
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation pertaining to transport of heavy vehicles and machinery
- machinery operating principles and operating methods used for earth moving and agricultural operations
- tying down procedures for large machinery
- relevant legislation with regard to vehicle operation and licensing requirements
- workplace procedures relevant to health and safety in the workplace requirements to transport machinery safely
- industry practice and workplace procedures relevant to transport of machinery.
**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- **physical conditions:**
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating machinery

- **resources, equipment and materials:**
  - a range of machinery
  - tie down devices

- **specifications:**
  - machinery operation and maintenance manuals
  - legislation relevant to vehicle operation and licensing requirements

- **timeframes:**
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to operate machinery and equipment used for specialised liquid and granular chemical application in agriculture and horticulture sectors.

This unit applies to individuals who apply legislative and regulatory requirements and operating principles to chemical application machinery and equipment operation under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

### Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| Chemical application | • specialised liquid chemical application machinery |
machinery and equipment must include at least one of the following:

- specialised granular application machinery
- machinery and equipment used for crop protection and pest management.

Personal protective equipment must include:

- protective clothing
- respirators
- protective eyewear
- unlined rubber or plastic gloves
- neoprene or nitrile boots.

Pre-operational checks must include:

- machine damage and serviceability
- checking for missing parts
- condition of tyres.

Biosecurity implications must include:

- control of cross-site contamination.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that, on at least one occasion, the individual has calibrated, operated and cleaned specialised liquid or granular chemical application machinery and equipment and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out chemical application machinery and equipment pre-operational checks according to operation and maintenance manual
- sourced and interpreted relevant Safety Data Sheets (SDS)
- performed minor maintenance
- recognised and documented defects in chemical application machinery and equipment and operational capacity
- attached and detached ancillary equipment
- calibrated and set up application components
- operated chemical application machinery according to operation and maintenance manual, manufacturer specifications, task requirements and regulatory requirements
- assessed and minimised spray drift risk
- completed operational records according to legislative and regulatory requirements
- minimised environmental impacts associated with chemical application machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
Assessment Requirements for AHCMOM315 Operate chemical application machinery and equipment

- hazards and risks associated with chemical application machinery and equipment operations
- categories of information contained in SDS
- chemical application machinery and equipment components, controls, features, technical capabilities and limitations
- manufacturer requirements and workplace requirements for:
  - pre-operational checks
  - machinery operation techniques
  - operator level servicing
  - planned and emergency shut down procedures
- features and functions of chemical application equipment components, including:
  - liquid spray; nozzles, tanks, agitation systems, pumps, filters, pressure regulation valves
  - granular applicators/dusters; hoppers, flow control valves
- effects of meteorological conditions on chemical application
- legislative and regulatory requirements applicable to chemical application
- workplace procedures applicable to health and safety in the workplace for chemical application machinery and equipment operation
- environmental impacts associated with operating chemical application machinery and equipment including spray drift
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating chemical application machinery
- resources, equipment and materials:
  - chemical application machinery and equipment
  - protective clothing
  - respirators
  - protective eyewear
  - unlined rubber or plastic gloves
  - neoprene or nitrile boots
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
• chemical application machinery and equipment operation and maintenance manuals and manufacturer specifications
• legislative and regulatory requirements applicable to chemical application
• industry and workplace biosecurity procedures applicable to chemical application
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has received and stored bulk fuel and has refuelled machinery or a vehicle on at least one occasion and has demonstrated the following:

- identified health and safety hazards in the workplace, assessed risks and implemented suitable controls
- received and stored bulk fuel according to workplace and regulatory requirements
- prepared for refuelling of machinery or a vehicle from fixed storage and from a portable container
- refuelled machinery or vehicle from fixed storage
- refuelled machinery or vehicle from portable containers
- completed refuelling according to workplace procedures
- completed required documentation
- minimised environmental impacts associated with machinery and vehicle refuelling
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulatory and industry requirements for the receipt and storage of bulk fuel, and refuelling operations
- health and safety in the workplace procedures relevant to machinery and vehicle refuelling
- types, use and maintenance of personal protective equipment
- types, features and use of fuels for machinery and vehicles
- requirements, types, features and facilities used to store and receive fuel
Assessment Requirements for AHC M08316 Refuel machinery or vehicle

- workplace procedures for checking fuel storage facilities, refuelling equipment and fuel transfer equipment for leaks
- types, features, use, maintenance and storage of fuel transfer and refuelling equipment
- risks and dangers associated with volatile fuel liquids and vapours, and mitigation and protection measures
- procedures for emptying fuel transfer equipment and checking that they are empty of residual fuel
- methods and procedures for securing portable fuel containers during transport
- environmental impacts of fuel leaks and spills
- types, features, use and maintenance of firefighting and spill response equipment
- legislation and workplace procedures relevant to containment methods and equipment for fuel spills
- workplace procedures applicable to environmental protection and sustainability procedures for mitigation and protection measures for fuel spills.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when refuelling machinery or vehicles
- resources, equipment and materials:
  - a range of machinery or vehicles
  - refuelling equipment
  - fuel
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - machinery or vehicle operation and maintenance manuals
  - regulations, legislation, industry requirements, manufacturer specifications and workplace procedures relevant to machinery and vehicle refuelling and fuel storage requirements
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and maintain tractor operations with attached equipment.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors with attachments under broad direction and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

</table>
• fuel level
• brakes and clutch operation
• condition of tyres or tracks
• machine controls.

Attachment must include one three point linkage, one Power Take Off (PTO) driven and one trailed implement from the following tractor attachments and implements:

• three point linkage implement linkage adjustment
• three point linkage PTO driven
• three point linkage hydraulic operated
• tractor mounted implement direct drive
• tractor mounted implement hydraulic operated
• tractor mounted implement PTO operated
• trailed implement manual adjustment
• trailed implement mechanical adjustment
• trailed implement PTO operated
• trailed implement hydraulic operated.

Biosecurity implications must include:

• control of cross-site contamination.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has used safe working practices when operating tractors and fitting and using attachments on at least one occasion and has:

- identified hazards and risks associated with operating tractors and using attachments
- implemented safe working practices to minimise risks when fitting and using attachments
- carried out tractor pre-operational checks and maintenance including tagging defects
- driven and operated a tractor safely, including modifying operating technique to meet changing work conditions
- selected and safely attached, removed, tested and used one three point linkage, one power take off driven and one trailed implement according to manufacturer specifications and weather conditions
- used safe towing practices
- operated tractors on an incline and an off-road surface with and without attachments and implements
- carried out tractor shut down procedures
- minimised environmental impacts associated with tractor operation
- applied workplace health and safety procedures or safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor steering systems and features
- tractor operation and maintenance manuals
- features, operational functions and procedures for safe fitting and use of attachments and implements
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities
- effects of various surface and difficult terrain conditions on tractor operation and use of attachments
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of tractors with attachments
- common injuries, causes and implications of using unsafe practices when operating tractors and fitting attachments
- workplace procedures relevant to health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
  - tractors
  - attachments
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - tractor operation and maintenance manual
  - industry and workplace biosecurity procedures applicable to tractor operation
  - legislation relevant to tractor operation and licensing requirements
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and complete major repair and overhaul of machinery and equipment.

The unit applies to individuals who apply specialised skills and knowledge to ensure that workplace machinery and equipment is repaired or overhauled in a way that enables minimal disruption to workplace operations. They have responsibility for their own work and for the quality of the work of others within known parameters. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that, on at least one occasion, the individual has undertaken major repair and overhaul of machinery and equipment in a manner that allows the core business of the enterprise to continue with minimal disruption and has:

- identified potential workplace hazards and implemented control measures
- diagnosed faults and identified the most effective and economic option in the replacement, repair and overhaul of components
- selected and used tools and materials appropriate to the task
- recognised and replaced deteriorated or worn parts
- disassembled and reassembled parts and components of machinery and equipment according to operation and maintenance manual and manufacturer specifications
- used and operated welding and thermal cutting equipment safely and effectively
- determined appropriate cutting and welding techniques
- disposed of wastes to minimise environmental impact
- recorded details of breakdowns, major repairs, overhauls and incidents in workshop record.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- assemblies and components of drive, electrical and hydraulic systems
- operational requirements of machinery and equipment
- detailed knowledge of mechanics and equipment operating systems
- use and storage of welding equipment
• maintenance manuals and manufacturer specifications for machinery and equipment operation relevant to repair tasks
• environmental impacts of machinery and equipment major repair and disposal of fuels, oils and other wastes
• workplace procedures applicable to health and safety in the workplace for major repair of machinery and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • machinery and equipment
  • repair and overhaul tools and equipment
  • welding equipment
  • safety equipment and personal protective equipment applicable to the task being undertaken
• specifications:
  • machinery and equipment operation and maintenance manual and manufacturer specifications
  • workplace procedures applicable to health and safety in the workplace and machinery maintenance
• relationships:
  • team members and supervisors
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has implemented and supervised the range of maintenance programs covering property, machinery and equipment that are required to be performed in an agriculture/horticulture industry enterprise, and has demonstrated the following on at least one occasion:

- identified potential workplace hazards and implemented control measures
- planned, costed and scheduled maintenance requirements
- allocated resources
- monitored and controlled costs within workplace budget requirements
- dealt with contingencies and rescheduled maintenance where necessary
- established and monitored performance targets for maintenance team
- monitored and reported on performance of maintenance activities
- ensured property, machinery and equipment are maintained in clean and safe operational condition
- communicated effectively with work team, contractors and management
- monitored health and safety in the workplace and adherence to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of maintenance requirements with regard to property, machinery and equipment
- maintenance and servicing cycles for property, machinery and equipment
- maintenance planning, scheduling and budgeting
- warranty, insurance agreements and indemnity provisions applicable to property, machinery and equipment maintenance
Assessment Requirements for AHCMMO402 Supervise maintenance of property, machinery and equipment

Assessment Conditions
Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - warranties, insurance agreements, and indemnity provisions
  - property, machinery and equipment maintenance plans and schedules
  - property, machinery and equipment budgets
- specifications:
  - property maintenance schedule
  - machinery and equipment operation and maintenance manual and manufacturer specifications
  - workplace procedures applicable to health and safety in the workplace and property, machinery and equipment maintenance
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that individual has coordinated, monitored and reviewed the operation and maintenance of machinery and equipment for an enterprise and has demonstrated the following on at least one occasion:

- identified potential workplace hazards and implemented safe working systems for machinery and equipment operation
- monitored machinery and equipment operations for a workplace
- evaluated machinery and equipment requirements for a workplace
- developed machinery and equipment operation and maintenance procedures according to health and safety guidelines, manufacturer specifications, workplace procedures and hazardous substances legislation
- scheduled, supervised and recorded the service and maintenance of machinery and equipment
- monitored machinery and equipment operations and maintenance requirements, and reviewed risk assessments periodically to ensure a safe operating environment
- communicated effectively with staff
- assessed staff capability in machinery maintenance and operation, and provided supervision and mentoring.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- servicing and maintaining machinery and equipment within area of responsibility
- methods of calculating the cost of machines and their contribution
- training and instruction techniques for directing the learning of staff
• hazard identification, risk assessment and procedures for developing risk controls
• workplace procedures, legislation and regulation requirements applicable to machinery and equipment maintenance and management
• environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
• workplace procedures applicable to health and safety in the workplace and machinery and equipment management.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • machinery and equipment maintenance plans and schedules
  • machinery and equipment budgets
• specifications:
  • machinery and equipment operation and maintenance manual and manufacturer specifications
  • workplace procedures and health and safety in the workplace procedures, legislation and regulation applicable to machinery and equipment maintenance and management
  • legislation and regulation requirements applicable to machinery and equipment management
  • environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
• relationships:
  • team members
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

**Foundation Skills**

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*
Skill | Description
--- | ---
Reading | • Identify and interpret information regarding maintenance requirements for machinery and equipment  
• Interpret information related to management of machinery and equipment
Writing | • Develop documentation to record machinery purchase, maintenance and replacement plans
Oral communication | • Initiate discussions with staff, contractors and suppliers, using clear language to communicate machinery management system, machinery and equipment maintenance schedules and workplace procedures  
• Use clear communications with management to discuss machinery purchase, running costs, servicing costs and budget
Numeracy | • Compare costs of services provided by off-property suppliers  
• Apply comparative analysis of machinery purchase and running costs
Navigate the world of work | • Identify and describe own workplace requirements associated with own role and area of responsibility  
• Monitor self and others adherence to workplace requirements including safety requirements
Interact with others | • Use appropriate language and communication skills to disseminate information within work team

**Range of Conditions**

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

| Machinery and equipment must include: | • vehicles and attachments  
• stationary and mobile plant used in the workplace. |
| Services must include: | • machinery repair  
• machinery overhaul  
• parts supply. |

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has established and managed a machinery management system for an enterprise and has demonstrated the following on at least one occasion:

- identified machinery and equipment requirements for a workplace
- identified potential workplace hazards and implemented safe working systems for machinery and equipment operation
- sourced, selected and managed machinery services provided by off-property suppliers
- managed machinery and equipment operation for a workplace
- managed machinery maintenance schedules for a workplace
- documented procedures for machinery and equipment operation and maintenance used in the workplace
- communicated effectively with staff
- identified staff training requirements for the safe operation of machinery and maintenance procedures
- developed and implemented training plans related to operation and maintenance of machinery in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- total costs associated with the use of machinery
- maintenance requirements of machinery and equipment
- storage and housing requirements for machinery
- safe operating procedures for machinery
• systems for monitoring machinery maintenance and operation
• licensing requirements for the operation of machinery
• workplace procedures applicable to health and safety in the workplace and environmental legislation and machinery management systems
• principles of staff learning, development and training.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • machinery and equipment maintenance schedules
  • machinery and equipment budgets
• specifications:
  • machinery and equipment operation and maintenance manual and manufacturer specifications
  • workplace procedures and health and safety in the workplace procedures, legislation and regulation applicable to machinery and equipment management
  • licensing and legislation applicable to machinery operation
  • environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM601 Analyse machinery options

Application

This unit of competency describes the skills and knowledge required to calculate, review and analyse machinery options within an agricultural, horticultural or land management enterprise.

This unit applies to individuals who apply advanced skills and knowledge to analysing machinery options and take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities. They work in contexts that are subject to change and adapt a range of fundamental principles accordingly.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has analysed machinery options for a workplace, including the associated costs and potential returns on capital investments, and has demonstrated the following on at least one occasion:

- compared the productivity and suitability of different types and brands of machinery
- identified and calculated total costs associated with machinery operations
- reviewed machinery requirements for a workplace and evaluated costed alternative options
- analysed the financial costs, tax impacts and investment risks for different types of machinery
- budgeted and incorporated benchmarks of energy efficiency for total running costs of machinery
- calculated potential returns from major capital investments in machinery over designated timeframes
- documented machinery usage analysis and preferred options
- reviewed the machinery options plan and analysis of options.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- benchmarking practices and procedures for determining machinery requirements, including energy efficiency, carbon footprint and water use efficiency
- capital budgeting techniques
- relevant taxation provisions relating to investment in machinery types including related technology and equipment
• risks associated with machinery investments
• analysis and planning processes required for machinery operation and location.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • machinery requirements and machinery options plan
  • machinery costs benchmark data
• timeframes:
  • according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to support natural area conservation.

All work is undertaken according to work site guidelines and supervisor's instructions, and in a safe and environmentally appropriate manner.

This unit applies to individuals who assist others undertaking conservation works in areas such as parks, natural areas, agricultural lands or areas undergoing rehabilitation.

This unit applies to individuals who work under close supervision and undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- prepare tools and equipment according to organisational requirements
- provide support for natural area conservation work
- stockpile waste materials for removal according to organisational requirements
- clean up site, tools and equipment
- conduct all work according to work health and safety and organisational requirements
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:
- tools and equipment used in conservation work
- revegetation techniques including planting, direct seeding, assisted natural regeneration and protection of remnant vegetation
- personal protective equipment required for conservation work
- biosecurity measures and sustainability practices required for own work

Assessment Conditions

Assessors must satisfy current standards for assessment.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow directions from supervisor to collect, extract, weigh and record seed
- apply safe work practices in collecting seed
- provide seed collecting support to others
- prepare, use and clean tools and equipment for seed collection
- conduct all work to organisational standards, environmental sustainability and biosecurity policies and procedures and work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable Commonwealth, State or Territory licensing required as they apply to own role
- range of processes for collecting, treating and storing seed
- organisational and site standards, requirements, policies and procedures for collecting seed
- seed collecting resources and equipment and procedures for their safe use, operation and maintenance
- recording and reporting requirements
- safety and environmental hazards associated with the collection, treatment and storage of seed
- range of seed species required for collection
- seed treatments and storage requirements for seed species collected
- types of diseases and pests likely to infect a range of seed species
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish the task and site with supervisor by referring to a revegetation plan
- carry out weed control and ground preparation as part of a team
- transport tools, plants and planting materials to the site
- carry out planting and regeneration techniques to organisational standards
- protect the restored area with plant guards and fencing
- remove any waste at the end of the job and clean site to pre-work condition
- carry out all work according to organisational standards and work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- common names of native plants and animals present in restoration area
- common names of weeds and pest animals present in restoration area
- the importance and value of the local provenance species
- natural area restoration techniques
- enterprise requirements for natural area restoration works

Assessment Conditions

Assessors must satisfy current standards for RTOs.

<th>TP Version</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>AHCv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain wildlife habitats and refuges to protect desirable animal species from predators
- identify native species that are present in the wildlife refuge
- confirm the features required for a wildlife habitat refuge
- provide harbors and modify habitat where necessary to provide refuge for native species
- assess the risk of vertebrate pest predators within the refuge
- implement strategies to control vertebrate pests in a wildlife habitat as directed by supervisor
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence
The candidate must demonstrate knowledge of:

- vertebrate predators present in local area
- harbours used by vertebrate pests
- wildlife habitats used by desirable animal species
- wildlife habitat modification techniques

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to maintain natural areas.

This unit applies to workers on land management projects who carry out the maintenance of natural areas.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- prepare to carry out maintenance activities in a manner which minimises damaging impacts to site
- consult with stakeholders, including traditional owners about pending maintenance works
- carry out agreed maintenance works with minimal damaging impacts to environment
- select and apply protective structures, devices and signs
- clean up the site and remove surplus materials and waste
- report completion of activities to supervisor
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:
- environmental factors to be considered in maintenance works, including:
  - ecology in land based, coastal zones or marine parks
  - marine, shore and land based species
  - natural and human threats to places of natural significance
  - pollution sources and damage potential
- basic protection and rehabilitation methods
- enterprise procedures for reporting maintenance works
- applicable State or Territory and Commonwealth legislation covering parks, conservation, environmental protection and heritage
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and preserve biological samples as part of a monitoring program according to enterprise procedures
- establish the sampling purpose and requirements
- plan the collection
- prepare equipment and facilities to take biological samples
- carry out biological sampling as part of a monitoring program and according to enterprise procedures
- preserve and record samples as part of a monitoring program and forward for testing if required according to enterprise procedures
- record sampling data and observations according to enterprise procedures
- report outcomes of collection according to enterprise procedures and monitoring program
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of biological samples that may be included in the plan, including water, animal, plant samples
- industry biological sampling and preserving guidelines and protocols
- field procedures for biological sampling and preservation
- collecting equipment and methods
- preservation equipment and processes
Assessment Requirements for AHCNAR302 Collect and preserve biological samples

- fauna and flora recognition relevant to sampling activities
- own role in complying with relevant environmental legislation

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out all revegetation works according to the planting plan or supervisor instructions
- prepare the site for revegetation works
- conduct a site hazard identification and risk control assessment
- recognise and treat plant diseases on a revegetation site
- treat weeds and competing plants
- clean and maintain the revegetated site
- use, clean, maintain and store machinery and equipment according to manufacturer instructions
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- revegetation techniques
- ecosystems, provenance and habitat requirements
- factors affecting the timing and method of planting
- identification of pests and diseases of trees
- principles and methods relating to the prevention and control of pests and diseases
- safety requirements when handling and using hazardous goods
- nutrient requirements of a range of plant species and cultivars
- physiology of plant growth
• techniques for protecting and securing or anchoring trees and shrubs
• soils, nutrients and ameliorants applicable to revegetation program

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- use direct seeding methods on revegetation sites, according to revegetation plans
- conduct work according to site procedures, regulations, work health and safety, other relevant legislation, and manufacturer specifications
- prepare the site for seeding with consideration to environmental impacts
- conduct seeding to maximise germination response
- complete seeding operations in line with site stability and environmental requirements
- operate, clean, maintain and store equipment safely and according to manufacturer instructions and organisational requirements
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:
- environmental procedures
- seasonality of plants identified for seeding
- equipment processes, technical capability and limitations
- equipment safety requirements
- fertiliser characteristics and application methods
- seeding methods
- soil dynamics
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain all necessary permissions and approvals to collect seed in a particular area, including operating in a particular jurisdiction, removal of native seed from a national park and permission from Elders or Custodians to work on Country
- use and maintain relevant material, equipment and resources efficiently and safely
- carry out seed collecting, cleaning and storage procedures efficiently and safely
- identify seed species relevant to plan
- follow organisational policies and procedures relevant to collecting seed
- distinguish between healthy and unhealthy parent plants for seed collection
- accurately record seed collection information and results
- apply work health and safety procedures for seed collection
- apply biosecurity measures in collection and storage of seeds
- apply sustainability practices in the context of own work

Knowledge Evidence

The candidate must explain:

- environmental protection requirements and procedures for minimising environmental impact
- native plant and seed characteristics of revegetation site
- types of diseases and pests likely to infect a range of seed species
- work health and safety requirements for seed collection methods
- procedures for collecting, storing and labelling seed
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have conducted photography fieldwork, including:

- determined the purpose of the photograph and prepared a specification
- ensured that appropriate permits and releases have been obtained for planned photographs
- assessed work health and safety risks and apply suitable controls
- selected, transported and stored the appropriate camera and equipment for specified photographs
- set up and adjusted camera settings to obtain planned photograph outcomes
- used at least 4 specialised photography techniques, including:
  - macro photography
  - photo points
  - evidentiary photography
- capture photographs and check against the photograph specification
- recorded field notes according to purpose and workplace procedures
- transferred photographs from camera, recorded and stored images according to workplace procedures and copyright requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic types of photography and photographic techniques applicable to field work
- legal requirements of copyright, privacy, permission, releases and environmental protection relating to taking photos for fieldwork
- work health and safety hazards, risks and controls
• purpose, setting up and operation of photographic equipment used in fieldwork
• principles of photography including aperture, shutter speed, depth of field, ISO, white balance, exposure compensation and dynamic range
• purpose and technique for specialist photography in land management, including:
  • identifying flora and fauna
  • vegetation communities and landscapes
  • photo-point surveys
  • photography for compliance evidentiary purposes
  • photography for publications
  • project monitoring and reporting
  • underwater
• media and methods used for documenting, labelling and storing photographs for analogue and digital photography.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in accessible field environment or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • camera, lens, equipment and media for capturing photographs
  • personal protective equipment
• specifications:
  • workplace documents including policies, procedures, processes, instructions and forms
  • use of manufacturer’s operating instructions for specific cameras and equipment
  • photographic specifications or briefs
  • copyright legislation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to read and interpret road and topographical maps for navigation or positioning and plotting purposes.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have read and interpreted maps, including:

- identified, selected and checked maps and equipment suitable for the navigation activity
- interpreted symbols, lines and features on maps to identify locations
- assessed and selected routes to a location using a map
- navigated and traversed a route of at least 2km long using maps and navigational aids
- identified current position by comparing nearby geographic features on maps
- identified impediments to efficient navigation and planned alternative routes
- interpreted map scale and estimated route distances
- marked location points on a map using map geographical features and Global Positioning Systems (GPS) data.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of maps and map reading
- types of maps and their use
- symbols and representations of topographical and geographical information used on maps
- common scales used on maps and their purpose
- features and use of common navigational aids, including:
  - compass
  - map distance meter (analogue and digital)
  - GPS
• compasses and dividers
• rulers and protractors
• advantages and disadvantages of different map and chart types and sources of error
• techniques for determining routes and estimating distances.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in an outdoor setting suitable for map reading and navigational; purposes or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • maps and navigational charts
  • navigational aids for map reading
• specifications:
  • manufacturers' instructions for navigation aids.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCNAR401 Supervise natural area restoration works

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- supervise natural area restoration works
- identify hazards and ensure safe systems of work are in place
- scope the natural area restoration works required and compare to specifications of work on the contract
- develop a work program and source labour and equipment to undertake the work
- maintain the supply of materials and access to equipment to allow restoration work to proceed
- coordinate team to achieve optimum performance
- monitor the work program and make adjustments to task schedule where required
- monitor work to achieve specified outcomes and to minimise environmental disturbance
- inspect work to ensure specifications are met and environmental impact is minimised
- report project completion to management or client according to enterprise requirements
- monitor the application of appropriate sustainability practices in natural area restoration works
- monitor team to ensure work health and safety policies and procedures are followed
- monitor team to ensure biosecurity measures are applied

Knowledge Evidence
The candidate must demonstrate knowledge of:
- strategies and techniques to avoid negative environmental impacts
- work programming
- natural area restoration techniques to be used in the works
• environmental factors to be considered in restoration works, including:
  • the role of native plants and animals in the ecosystem of the area
  • vertebrate pests and options for control
  • impact of weeds and pests and appropriate control methods
  • ability to assess restoration potential of sites
  • basic plant and animal ecology
  • knowledge of different ecosystems
  • team supervision
  • strategies for monitoring work quality and progress
  • application of work health and safety and environmental legislation, codes of practice and enterprise procedures in natural area restoration works

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- plan the implementation of revegetation works
- investigate site access and establishment issues
- plan for environmental impacts of site work practices and minimise safety risks to workers and the public
- assess site for opportunities and constraints associated with implementation of revegetation works
- establish the purpose and client preferences for the site to be revegetated
- carry out a site visit and confirm any planning requirements
- develop a plan for the site, detailing the resources required and the program of works
- develop schedules for the establishment and maintenance phases of the project
- document the staged implementation plan
- incorporate seasonal factors and impacts in the staging strategy to allow for planting, supply and care, wet day access, machinery use, fire hazards and establishment
- include work health and safety practices in plan

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the role of revegetation works in the restoration of the environment
- the environmental issues associated with undertaking revegetation works, how to comply with legislation and ensure that the impact on the environment is minimal, including:
- principles of ecology including specific native plant and animal relationships and habitat requirements
- identification, propagation and establishment techniques of specific native plant species
• chemical, cultural and biological weed and feral animal control techniques
• soil conservation and enhancement techniques and their advantages and disadvantages in reference to specific sites and habitats
• soil erosion control and stormwater management techniques
• maintenance requirements and practices for native plants prior to and after initial establishment
• growth habits and cultural requirements of specific native plants under a range of soil and environmental conditions
• site evaluation techniques including methods of analysing soils, waterways and their condition
• practical understanding of the advantages and disadvantages of options for revegetation procedures
• work health and safety hazards associated with undertaking revegetation works and the controls necessary to remove or minimise risks associated with them
• contract documents including specifications, plans of landscape works, services, supplies and surveyors documents

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to manage natural areas on a rural property.

This unit applies to management of programs on privately owned rural property, which are designed to enhance the sustainable ecological and economic capacity and outcomes of the land.

All work is undertaken in accordance with relevant national, State, Territory and local legislation and regulations.

This unit applies to individuals who manage projects and people and who provide and communicate solutions to a range of predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine features and characteristics of natural areas
- source topographical information and conservation data about a site
- assess the ecological value of natural areas on a property
- develop and implement management strategies in accordance with organisational guidelines and industry best practice
- consult with neighbouring landholders, local authorities and interest groups
- coordinate team to carry out work in natural areas according to management strategies and within statutory requirements
- develop and implement restoration and maintenance management strategies that meet relevant national, State, Territory and local legislation or regulations relating to environmental concerns
- ensure management plans incorporate work health and safety and biosecurity legislative requirements and appropriate sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- natural area restoration and management principles
- advantages and limitations of sustainable land management strategies, including environment sustainability as a ‘whole-system’ approach
- property planning and enterprise budgeting systems and procedures
Assessment Requirements for AHCNAR501 Manage natural areas on a rural property

- environmental issues especially in regard to water catchments, air, noise, ecosystems, habitat and waste minimisation that impact on management plan
- relevant State/Territory legislative requirements related to environmental protection and control standards.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to plan and conduct biological surveys and produce a biological survey report, according to client requirements and biological components to be surveyed.

This unit applies to land restoration managers who provide and communicate solutions to a range of predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan, conduct and report on biological surveys according to client requirements, enterprise policy and industry best practice
- identify the scope, objectives and constraints for a biological survey according to client requirements, the biological components to be surveyed and enterprise policy
- assess the availability of current data and determine data collection and processing needs
- identify biological indicators that are repeatable and statistically representative
- develop a survey plan that documents survey methods and indicators
- schedule survey activities and establish access to the site
- conduct a biological survey with data collection staged and recorded according to the survey plan
- produce a biological survey report with detailed analysis and conclusion, including a description and assessment of the specified biological components, in agreed timeframes to client and enterprise standards
- design and conduct biological survey in accordance with work health and safety and environmental legislative requirements
- ensure survey plan and activities complies with Animal Welfare Codes of Practice
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- biological classification systems
• plant and animal recognition relevant to survey area
• environmental factors that impact on vegetation and animal populations
• requirements for ensuring the welfare of animals described in the relevant Codes of Practice
• ecological principles and terminology
• energy flows and trophic structures of communities
• legal requirements relating to the protection and clearance of vegetation and animal species
• assessment, reporting and client liaison procedures and best practice techniques
• enterprise work team management guidelines
• work health and safety legislative requirements and Codes of Practice
• hazard identification, assessment and control measures

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- design a natural area restoration project according to client specifications and workplace and legislative requirements
- conduct an on site analysis to assess potential for regeneration and determine constraints, and use information to inform the design process
- establish the project purpose, scope and extent, and costs and benefits
- prepare a base plan incorporating landforms, soils, fauna and flora and habitat
- determine options for natural area restoration and incorporate into a concept design
- produce a final design with supporting documentation, including costings, planning, notes and specifications to give an interpretation of the plan to establish the quality and standards of the works and the responsibilities of the contractor during the implementation
- use professional graphic formats to present concept design

Knowledge Evidence

The candidate must demonstrate knowledge of:

- design process
- construction principles and practices
- graphical presentation and drafting techniques
- recognition of plant species and a range of ecological communities
- natural regeneration potential and limits
- ecological restoration theory and techniques
- drafting techniques
- developing and managing budgets
- calculations of materials, labour, machinery and equipment
Assessment Requirements for AHCNAR503 Design a natural area restoration project

- environmental implications of restoration works
- legislative requirements for natural area restoration works

Assessment Conditions

Assessor must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- manage a natural area restoration program
- carry out a detailed site assessment for restoration
- select appropriate vegetation restoration techniques for the program
- plan a natural area restoration program effectively
- ensure program complies with relevant legislative and program requirements
- calculate staff and resources required
- supervise staff to carry out natural area restoration works according to the program
- review natural area restoration program against issues identified in the management plan for the area
- monitor staff to ensure work health and safety policies and procedures are followed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- plant species and community recognition
- natural regeneration potential and limits
- ecological restoration theory and techniques
- factors affecting the timing and method of plant establishment
- identification of plant and animal threats to treated areas
- principles and methods relating to the prevention and control of pests and diseases
- safety requirements when handling and using hazardous goods
- soils and nutrients, plant selection and culture
- calculations for materials
Assessment Requirements for AHCNAR504 Manage natural area restoration programs

- legislative requirements
- preparation of plans and specifications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check client expectations for restoration strategies for compliance and discuss issues with client
- plan river restoration works according to client, environmental and legislative requirements
- develop erosion and sediment control measures
- follow industry guidelines to establish fauna habitat and vegetation species
- document the strategy for submission to the relevant consent authority
- prepare a detailed works plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant environmental protection, planning and groundwater legislation
- river restoration techniques and processes
- erosion and sediment control techniques
- planning procedure for erosion and sediment control
- erosion control and design principles and factors including:
  - soils and soil formation
  - levels and levelling
  - earthmoving principles
  - total catchment issues
  - managing peak water flows
  - subsurface and surface drainage principles and systems
• restoration principles and techniques
• legal requirements related to permits
• environmental issues
• relevant legislation and regulations relating to soil and water degradation issues

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and implement sustainable land use strategies
- identify the threats to sustainability for an area or region
- manage water resources and riparian zones
- manage vegetation and plant succession for an area
- manage the health and sustainability of soils
- incorporate sustainability principles into land use practices
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the role of biodiversity in farming systems
- sustainable land and water use principles and practices applicable to the region
- sustainable soil management
- soil appraisal and remediation strategies
- environmental controls and codes of practice applicable to the business and to the improvement works
- relevant legislation and regulations relating to soil and water degradation issues, chemical use and structural works
- relevant work health and safety and environmental protection legislation, regulations and codes of practice
- causes of land degradation
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion established an Australian native bee colony, including:

- recognised and selected appropriate Australian native stingless bees (ANSB) for domestication and prepared a strategy for managing the colony for a defined purpose
- identified a suitable structure to house an ANSB colony and acquired components
- used tools and equipment, including personal protective equipment (PPE), to safely prepare a structure to house an ANSB colony
- procured a population of ANSBs and established and located the colony in a suitable environment
- monitored the colony conditions, pests, diseases and disorders during establishment according to colony workplace and biosecurity procedures
- monitored, manipulated and assessed the colony to achieve strategic outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of Australian native bees and their basic biology and nesting habits for a given locality, including:
  - stinging
  - stingless
  - social
  - solitary
- ANSB and their attributes suitable for "domestication", including:
  - colony forming
  - health and safety risks
  - suitable environmental conditions
• role in pollination
• commercial and non-commercial outcomes for keeping ANSBs, including:
  • pollination and pollination services
  • honey production
  • education
  • conservation
  • pets
• developing, monitoring and assessing basic strategies for keeping ANSBs
• equipment and resources required for keeping ANSBs including beekeeping tools, use and maintenance
• structures to house Australian native stingless bees, including:
  • natural habitats
  • hives and hive designs
• health, hygiene and biosecurity considerations
• health and safety hazards and risks associated with handling and working with ANSB’s, including:
  • PPE
  • public safety
  • lifting and handling
  • safe use of tools
• methods used for procuring and establishing ANSBs, including:
  • legislative requirements when collecting wild populations
  • transfer techniques for wild colony
  • budding
  • splitting
  • trapping
  • purchasing established colony
• locating colonies and establishing native bee meliponary, including:
  • locality/location/region/
  • weather and temperature
  • orientation
  • access to food and water
  • proximity of colonies to each other and competition
• pests diseases and disorders of Australian native stingless bees and their control including biosecurity
• monitoring procedures and signs of a health or declining population
• ANSB manipulation techniques, including:
  • inspections
  • accessing honey
  • splitting.
Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - Australian native stingless bee colony
  - tools and equipment for assembling and working with Australian native stingless bee colonies
  - PPE
- specifications:
  - workplace procedures and specifications related to establishing Australian native stingless bee colonies
  - manufacturer’s instructions for equipment and machinery to maintain structures to house bee colonies
  - access to legislation and codes of practice related to Australian native stingless bee colonies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to plan and implement a biosecurity program.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication, however, where animals are involved in training and assessment, the AHC Training Package has the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- manage and maintain quarantine
- implement and monitor quarantine area sanitation
- disinfect facilities
- plan and implement pest control strategies
- establish a biosecure area
- manage visitor access and the storage and movement of inputs and outputs for biosecurity
- develop sanitation procedures to reduce the risk of disease
- apply integrated pest management practices to control pests in a biosecure area
- ensure staff are aware of and follow biosecurity procedures
- review biosecurity status based on records system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- diseases and pests that pose a threat and their likely causes of spread
- principles of risk management applied to biosecurity
- requirements for personal hygiene and quarantine procedures for site entry
- principles of disinfecting a site
- safe use of chemicals and cleaning agents
- integrated pest management and rotation of chemical pest controls
- cleaning and disinfecting procedures
- work health and safety, environmental and biosecurity legislation, codes of practice and enterprise procedures
Assessment Requirements for AHCNRM401 Plan and implement a biosecurity program

- record keeping requirements
- reporting incidents or issues
- safety practices related to use of equipment and materials used in cleaning and pest control
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice, where animals are affected by biosecurity plans

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop, implement and evaluate a rehabilitation strategy for a natural area in a coastal zone
- assess the condition of a natural area within a coastal zone and identify threats through review of existing information, site surveys, consultation and expert advice
- determine management options and facilitate the development of a strategy and action plan through analysis of information collected, stakeholder consultation and advice from management authority
- monitor and evaluate the implementation of the strategy
- prepare reports to enterprise and authority standards
- apply work health and safety practices in the context of own work and in managing volunteers and undertaking rehabilitation works
- incorporate sustainability practices into rehabilitation strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- coastal zone topographical features
- ecological principles and environmental assessment techniques
- coastal zone information resources including on native flora and fauna identification, habitat requirements, vulnerable and endangered species
- management and rehabilitation techniques and strategies for application within the coastal zone
- environmental degradation processes
- management strategies for cultural and heritage sites
• natural resource management planning and issues
• relevant legislative and regulatory requirements

**Assessment Conditions**
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to establish requirements for monitoring water quality and developing a program to monitor water quality in a given site. It includes carrying out water monitoring activities and evaluating program effectiveness.

This unit applies to those working in the role of coordinator or manager in an organisation, group or enterprise concerned with gathering information for land or water management purposes. The role is likely to include delegation of implementation tasks and may include consultation with specialists such as hydrologists and hydrographers.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must develop a water quality monitoring program in accordance with legislative and organisational policies. The candidate must also undertake the water quality monitoring.

The candidate must provide evidence that they can:

- establish scope, objectives and constraints and water quality monitoring requirements of the project through consultation with client
- undertake research and a site analysis to select suitable monitoring sites
- develop the monitoring plan in accordance with project brief and to meet client needs
- monitor water quality in accordance with project plan
- evaluate the program using data analysis, consultation with client and assessment against program objectives
- collect, transport and treat samples in accordance with organisational guidelines and policies
- analyse data according to scientific standards and organisational policies and guidelines
- apply work health and safety practices in the context of own work
- incorporate biosecurity into monitoring program
- apply sustainability practices in monitoring program
- draw conclusions based on appropriate evidence and reasoned arguments
- produce written reports to enterprise standards

Knowledge Evidence

The candidate must demonstrate knowledge of:
Assessment Requirements for AHCNRM502 Develop a water quality monitoring program

Date this document was generated: 3 September 2020

• water quality principles and factors including:
  • hydrological cycle
  • aquatic ecology
  • water quality indicators
  • chemical principles
  • catchment and coastal management issues contributing to surface and groundwater quality
  • standard techniques to assess ecological health of aquatic sites
  • mathematical sampling techniques
  • analytical techniques appropriate to water quality monitoring
  • data storage and management
  • accepted scientific processes and standards for data collection and analysis
  • statistical analysis
  • hazard identification, assessment and control

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate their ability to support the implementation of waterways improvement plans using a diverse range of strategies.

The candidate must provide evidence that they can:

- apply appropriate communication techniques to collect information on needs, inform funding opportunities, develop plans and submissions, and educate and resolve conflict
- identify and apply a diverse range of strategies to achieve the priorities and related targets from catchment plans
- liaise with, and give feedback to, a range of stakeholders to solve conflicts as they arise
- evaluate the progress towards achievement of priorities and targets
- prioritise projects based on regional targets and funding provisions
- determine funding requirements and identify enterprise funding mechanisms
- support the development of plans including establishing priorities and targets, strategies and programs, communication procedures, monitoring requirements and strategies and reporting processes
- identify aims, risks, outcomes and stages on the project in the project planning
- determine evaluation and reporting methods in the planning
- develop reports for stakeholders and for future planning purposes according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental legislation
Assessment Requirements for AHCNRM503: Support the implementation of waterways strategies

- obligations of landholders
- contemporary regional catchment strategies
- principles of community capacity building and engagement
- relevant policies across all levels of government and within the specific region, including those under catchment plans
- waterways management and improvement techniques, including:
  - fencing
  - revegetation
  - habitat restoration
  - pest plant control

Assessment Conditions

Assessors must satisfy current standards for RTOs.

2.5 Apply work health and safety policies and procedures, environmentally sustainable practices and biosecurity measures when analysing hydrological processes |
| 3. Design and implement field surveys and assess findings | 3.1 Determine objectives, locations and resource requirements for site assessments in consultation with supervisor or team  
3.2 Assess physical entities and processes, including threats, within representative management units  
3.3 Collect site data according to enterprise policies, procedures and guidelines |
| 4. Report on catchment hydrology | 4.1 Prepare a written overview on catchment hydrological behaviour  
4.2 Present a visual overview of catchment hydrological behaviour to stakeholders  
4.3 Provide advice and guidance on remediation measures consistent with catchment management objectives |

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

**Unit Mapping Information**

This unit is equivalent to AHCNRM504A Interpret and report on catchment hydrology.

**Links**

<tbody>
<tr>
<td>1</td>
<td>AHCv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and collate existing hydrological information
- collect and analyse hydrological data using appropriate sustainable practices
- collect and assess a wide range of hydrological data
- determine the movement of water within a catchment from existing data
- assess processes within catchment to evaluate non-sustainable practices in catchments
- report on catchment hydrological behaviour to organisational requirements
- apply work health and safety practices to the collection and testing of water
- apply an awareness of biosecurity in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of factors used for analysis of water catchment area:

- hydrological cycles
- chemical and physical properties of water
- rock and soil types including weathering processes
- fluvial geomorphology:
  - drainage basin function
  - factors influencing stream flow rates
  - interactions between ground and surface water
  - stream hierarchy and ordering
  - human impacts on surface water quality and quantity
- hydrogeology:
• aquifer types and properties
• aquifer discharge and recharge
• rates of water movement through aquifers
• human impacts on groundwater quality and quantity
• sustainable use of ground and surface water:
  • uses of water in catchments
  • water allocation
  • policies and strategies determining water use

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to provide technical advice on sustainable catchment management to land managers in a catchment area or region.

This unit applies to those in a catchment management role and are responsible for identifying and managing land degradation, as well as providing advice and information on programs and funding for the sustainable management of farms, small properties, recreational land and land used for commercial activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- provide technical advice on sustainable catchment management to land managers in a catchment area or region in accordance with State and regional legislation, regulations and strategies and stakeholder requirements
- review State and regional legislation, regulations and strategies relevant to the responsibilities of land managers
- analyse the issues, processes and techniques in sustainable land management and assess land management practices in relation to the long-term objectives of a catchment or region
- source and communicate advice on sustainable land management practices to a variety of land managers in a knowledgeable and non-threatening manner
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- geology:
  - rock types
  - weathering
  - soil formation and soil types
  - ecological processes:
  - energy flow through ecological systems
  - matter flow through ecological systems
  - nutrient cycling
  - land degradation processes and impacts:
Assessment Requirements for AHCNRM505 Provide technical advice on sustainable catchment management

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply effective consultation techniques to ensure stakeholder contribution to project priorities
- research and determine the environmental conditions of project worksites in relation to the wider catchment
- undertake consultation with stakeholders
- work with and support project partners during project implementation
- develop waterway monitoring program that includes selecting representative water quality and macro invertebrate monitoring sites
- monitor project to ensure it is meeting regulatory requirements
- evaluate the impact of projects on sustainable catchment management
- determine the physical and human resources necessary for project success
- determine suitable monitoring procedures that will provide sufficient information for evaluation and review of the project
- evaluate the environmental benefits of the works program using existing techniques and reporting guidelines
- complete reporting requirements to enterprise standards and to meet the needs of stakeholders, partners and investors

Knowledge Evidence

The candidate must demonstrate knowledge of physical characteristics and indicators of health of waterways and catchments, including:

- wetland and floodplain processes and function:
  - factors that influence stream flow
- stream dynamics
- stream formation
- eutrophication
- impacts of land use on waterways
- indicators of catchment health:
  - pest plant and animal infestations
  - vegetation decline
  - soil erosion
  - stream bank erosion
  - water quality decline
- water quality parameters:
  - physical and chemical properties of water
  - biological indicators of water quality

The candidate must demonstrate knowledge of:
- project planning processes
- permits and licences required for on-ground works

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can extract, compare and manipulate data in response to customer requests.

The candidate must provide evidence that they can:

- develop and document suitable procedures for data collection, manipulation and analysis
- use or create appropriate models
- use operating systems and computer applications for data analysis and report writing, according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- database structures
- scripting and commands
- line instructions and programming
- operating systems used by enterprise for data analysis and storage, including:
  - UNIX
  - DOS
  - Windows
  - NT
- range of tools, models, theories, applications and solutions
- data analysis and manipulation techniques
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate suspected breaches of NRM legislation in accordance with legal and organisational protocols and guidelines
- carry out preliminary investigations into a reported or suspected breach of land use legislation using organisational processes and procedures and in accordance with legislative and regulatory requirements
- seek approval to proceed with a full investigation
- carry out a site investigation according to organisational guidelines
- interview witnesses and land owners following organisational protocols
- document records of interviews, proceedings and site details according to legal requirements and organisational protocols
- check accuracy of all data and information collected and ensure it is sufficient to make an informed judgement
- make recommendations based on information collected
- complete final report with supporting documentation in line with policy guidelines and legislative and regulatory standards
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of Federal and State legislation and regulations to natural resource management issues
- types of breaches of natural resource management legislation
- organisational policies and procedures for investigating and reporting on breaches
• techniques for consulting with stakeholders, legal and agency policies and procedures
• assessment approaches for area of notification
• formats for compiling reports and submitting evidence

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine mechanisms and criteria for reviewing management plans and strategies
- analyse statistical trends to determine changes occurring in land management plans and strategies beyond normal variations
- analyse existing management plans and strategies
- modify management plans and strategies using clear and concise language in a standardised format
- implement modified management plans and strategies within appropriate timeframes, using approved communication and education strategies
- undertake internal and external consultation appropriate to the review process
- undertake training needs analysis for staff on implementing new management plans and strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mechanisms and criteria for reviewing management plans and strategies
- trends and threats both natural and from human activity, to places of natural significance, including:
  - ecosystems including the interrelationship of geophysical, hydrological, biological and meteorological factors
  - normal and abnormal life cycles of the biodiversity
  - pollution sources and damage potential
- legislation under which enterprise operates
Assessment Conditions
Assessor must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to develop a monitoring, evaluation and reporting program for an organisation to measure progress against targets and reporting responsibilities.

It includes the development of evaluation strategies to inform implementation of a natural resource management Monitoring, Evaluation, Reporting and Improvement framework (MERI Framework), used to manage human, social, natural, physical and financial assets.

This unit applies to individuals who analyse information and exercise judgement to complete a range of highly skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a monitoring, evaluation and reporting program for an organisation in accordance with the MERI Framework
- scope a project
- define terms of reference and context
- identify key stages and outcomes of the project
- assess and define data management requirements according to project requirements and objectives
- identify the resources needed to undertake the program, including financial, equipment, material and human resources
- develop data collection, management and analysis methodology and procedures
- design and manage a monitoring, evaluation and reporting program
- produce reports and planning documents to organisational standards
- review existing data and information appropriate to the plan, according to organisational requirements
- incorporate work health and safety practices, policies and procedures into the program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- program design considerations, including equality, technical validation and ethics
- quantitative and qualitative methods for monitoring and evaluation
- data management techniques
- sources of existing evidence and literature relevant to the program
- the MERI framework data collection protocols
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to implement a monitoring, evaluation and reporting program for an organisation to measure progress against targets and reporting responsibilities.

It includes implementation of evaluation strategies developed to inform a natural resource management Monitoring, Evaluation, Reporting and Improvement framework (MERI Framework), used to manage human, social, natural, physical and financial assets.

This unit applies to individuals who analyse information and exercise judgement to complete a range of highly skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

| 1. Implement a monitoring and evaluation strategy | 1.1 Follow the plan to collect relevant baseline data  
1.2 Consult with stakeholders and the community  
1.3 Brief colleagues, staff and contractors who will be involved in implementing the program, on the monitoring and evaluation methods selected and justification  
1.4 Implement chosen monitoring and evaluation methods in accordance with defined strategy  
1.5 Ensure standard procedures and recording templates are available for use  
1.6 Ensure program timelines are communicated to appropriate stakeholders and monitored |
| 2. Collect and analyse data | 2.1 Ensure data and information is collected following relevant standards and format  
2.2 Assess if further data or information is needed to answer key evaluation questions and adjust design as required  
2.3 Ensure data is appropriately stored and can be accessed as needed  
2.4 Coordinate colleagues and contractors involved in the monitoring and evaluation process  
2.5 Evaluate the effectiveness, efficiency and appropriateness of investment and project priorities as required by the evaluation design |
| 3. Prepare reports and information products | 3.1 Report against milestones and outputs  
3.2 Produce appropriate information products to keep stakeholders informed and engaged  
3.3 Communicate findings and activities to stakeholder groups according to program schedule  
3.4 Negotiate changes to projects and programs with stakeholders, based on MERI findings  
3.5 Apply findings to improve the delivery and alignment of projects and policy decisions with organisational targets and mission  
3.6 Ensure the style of reporting reflects the audience and how the information is to be used |
| 4. Review the monitoring and evaluation process | 4.1 Foster a culture of self-evaluation and learning through encouraging ongoing participation, consultation and communication with stakeholders  
4.2 Review and adapt ongoing evaluation strategy and processes and provide feedback on the implementation and the evaluation design |
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement a monitoring and evaluation strategy
- apply monitoring and evaluation methods to ensure integrity and validity of data
- collect and manage data related to the monitoring program according to enterprise procedures
- analyse complex information related to the monitoring program according to enterprise requirements
- prepare reports and information products to enterprise standards and to meet audience needs
- review the monitoring and evaluation process to contribute to continuous improvement

Knowledge Evidence

The candidate must demonstrate knowledge of:

- quantitative and qualitative methods for monitoring and evaluation
- data management processes and systems
- policy and program management processes
- adaptive management and review cycles
- MERI framework

Assessment Conditions

Assessors must satisfy current standards for RTOs.

2.2 Alter environmental parameters, as required, to meet the needs of nursery plants and market requirements  
2.3 Service irrigation system components for basic operational use and repair or replace basic user serviceable parts |
| 3. Determine daily water requirements | 3.1 Determine water requirements according to the needs of the plant and environmental parameters  
3.2 Apply water to meet the needs of the plant group  
3.3 Monitor water requirements of the plant |
| 4. Promote plant growth by intervention | 4.1 Test potting media in production areas to ensure quality specifications are met  
4.2 Monitor the health of the plant  
4.3 Undertake plant interventions as required  
4.4 Dispose of waste with full consideration of the environmental implications |
| 5. Complete work | 5.1 Clean and store equipment, tools and equipment  
5.2 Maintain records on all maintenance activities |

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

**Unit Mapping Information**

This unit is equivalent to AHCNSY301A Maintain nursery plants.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- prepare for nursery plant maintenance activities
- calculate daily water needs
- implement a range of plant maintenance activities
- monitor plant health
- operate irrigation systems
- recognise stages of plant growth
- record workplace information
- repair or replace user serviceable irrigation components

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the principles and practices of nursery plant maintenance
  - botany and plant physiology as it applies to plant maintenance
  - characteristics of various types of potting media
  - common problems that occur with nursery plants and their treatment
  - effect of different pruning and intervention methods
  - effects of environmental parameters on plant growth
  - factors affecting the growth of nursery plants
  - methods of calculating daily water needs
  - optimum growing conditions for a range of plants in a nursery
  - principles and operations of a range of irrigation systems used in nurseries
- processes for modifying environmental parameters
- relationship between plant water needs and environmental parameters
- symptoms of unhealthy plants
- treatments required by plants at different stages and environmental parameters

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

**Links**

| 1. Select product for an order | 1.1 Select and use materials, equipment and personal protective equipment (PPE)  
1.2 Select product from stock batches to match order forms or client request |
### Element | Performance criteria
--- | ---
1.3 | Assist clients onsite with selection or direct to particular product or display area
1.4 | Evaluate quality of product visually to ensure that it meets standard order requirements for quality
1.5 | Block up stockholding areas for presentation
1.6 | Monitor the amount of remaining product and retain information to inform other clients

2. | Maintain the stock inventory
2.1 | Collate orders in the sales or dispatch area
2.2 | Check orders for quality of product and for accuracy of quantity
2.3 | Keep electronic or manual records of outgoing sales in the product inventory
2.4 | Adjust the inventory of the quantity of nursery stock available for sale

3. | Prepare for dispatch or delivery
3.1 | Check product for correct labelling and replace incorrect labelling
3.2 | Package product for delivery and presentation to the client
3.3 | Pack product into containers for ease of handling
3.4 | Assist delivery of product by loading and stacking product according to the configuration of the transportation vehicle
3.5 | Check product quality at each stage in the delivery process
3.6 | Maintain and tidy sales and dispatch areas and packing and packaging materials

4. | Receive products
4.1 | Check incoming product for quality and correct quantities
4.2 | Transfer product to stock holding areas with appropriate manual handling techniques
4.3 | Transfer incoming documentation, receipts of delivery and invoices to administration

### Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate product quality
- interpret order forms
- maintain product records
- meet client service requirements
- monitor and carry out product dispatch and delivery processes
- select product for order requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of receiving and despatching nursery products
  - best practice guidelines for nursery hygiene
  - common sources of cross contamination from transport vehicles
  - environmental controls necessary for transporting plants
  - quality standards for the packing, packaging and labelling of products
  - quarantine policies and relevant quarantine legislation
  - stock control procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess site conditions, requirements and constraints impacting plantscaping
- select plants that meet the requirements of the display and chosen site
- determine spatial measurements of a plantscape
- identify and schedule materials, equipment and personnel to install a plant display
- install plants securely to ensure accessibility for maintenance and ascetic requirements
- maintain plants to meet their water, light and fertiliser requirements
- detect and control pests and diseases

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing and maintaining plantscapes
  - acclimatisation techniques for plants
  - characteristics and attributes of a range of plants used for plantscaping
  - commonly occurring problems with plantscaping
  - light and moisture tolerance/intolerance for common plant species
  - options for remedial action
  - photosynthesis, respiration, nutrient uptake and growth rate for plants
  - plant growth requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate orders, sales figures, ratios, proportions and application rates
- communicate with clients, work team members and supervisors
- coordinate own activities to deliver and maintain plant orders
- estimate treatment and product requirements, material sizes and quantities
- interpret and apply delivery schedules and marketing plans
- maintain mobile and remote displays and samples
- use reporting and work procedure documents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of delivering and promoting plants
  - botanical, common and trade names, growth habits, and presentation requirements for display of plants
  - industry labelling standards and methods
  - practical understanding of the range of plants available from the enterprise
  - standards and methods for the preparation and dispatch of promotional literature and lists for seasonal promotions
  - standards and methods of packaging, and delivery of plant orders, samples and displays
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare the growing environment to suit species and propagation method
- recognise and rectify problems and anomalies with parent plants, propagation material, propagation media, equipment and materials
- select appropriate propagation material
- handle potting mixes and propagation materials in a safe manner
- apply propagation techniques as appropriate to plants being propagated
- Provide aftercare to suit media conditions, plant requirements and propagation techniques

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for implementing a propagation plan
  - aftercare requirements for a range of propagated plants
  - problems that may occur performing propagation activities and preventative action
  - enterprise hygiene standards required for propagation activities
  - preferred types of propagation media for different species
  - propagation techniques required for a range of plants
  - quality specifications for parent plants and propagation materials
  - testing methods applied to propagation media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and prepare fertigation materials
- connect and calibrate fertigation equipment
- monitor and adjust the delivery of fertilisers
- shut down, clean equipment and dispose of waste

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of fertigation operation
  - fertigation injection equipment
  - chemical handling procedures for fertiliser, chlorine, acid and cleaning agents
  - cleaning procedures for fertigation equipment
  - Material Data Sheets (MDSs)
  - environmental impacts of delivering fertilisers via the irrigation system

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to plan a growing-on program and monitor the implementation of the program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and assess factors that could impact the growing-on program
- Identify labour, materials and activities involved in the growing-on program
- conduct research about production requirements, growth conditions and marketing implications of a growing-on program
- negotiate, budget and document plans
- communicate plans and schedules to staff
- oversee and monitor the growing-on program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of planning a growing-on program
  - application techniques for chemical and non-chemical intervention or treatments
  - chemical, cultural and biological pest, weed and disease control techniques
  - common problems of growing-on and preventative actions that may apply
  - enterprise hygiene standards required for growing-on activities
  - enterprise quality standards of nursery plant production
  - optimal growing requirements of nursery plants
  - preferred types of propagation media for different species
  - processes and techniques for preparing, costing and documenting plans for and scheduling growing-on activities
  - testing methods applied to propagation media
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- apply biodynamic principles
- develop and implement biodynamic production plan
- make and apply biodynamic preparations and compost
- enhance soil and plant health
- integrate and manage animals in a biodynamic enterprise
- apply enterprise work health and safety policies and guidelines
- implement enterprise animal welfare policies
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- animal health
- biodynamic preparations and their role in soil food web and atmosphere
- biodiversity, shelter belts, birds and native bush on biodynamic farm
- calcium-clay-silica polarities
- crop and animal rotation systems
- cultivation methods
- etheric and astral forces and how they relate to biodynamics
- experiments and testing methods such as chromatography and sensitive crystallisation
- green manuring
- management of insects and birds
paradigms of various farming systems: biodynamics, organics and permaculture, and holistic management
- peppering for animals and insects
- planting calendar
- purpose of various herbs and organs used for making biodynamic preparations
- relationship between soil, plant, animal and human health
- research in biodynamics principles and practices
- rhythms and cycles of planets and moon
- role of the biodynamic preparations 500-508
- role of bacteria and fungi
- role of humus
- soil: food web information, how it is made, its structure and feeding cycle
- water retention
- weed management
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and maintain animals in an organic production system
- provide a suitable diet and living environment for animals based on the National Organic Standards for Organic Livestock Production and/or agro-ecological principles
- integrate animals into an organic production system
- manage animal health and welfare using Organic Standards and/or agro-ecological principles
- manage grazing of animals and allowable inputs to enhance soil health and fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise animal welfare policies
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant organic certification requirements
- organic agriculture and agro-ecological principles
- animal health, pests, parasites and diseases
- relevant animal welfare code of practice
- grazing management, including pasture identification and assessment, feed budgeting and planned grazing strategies
- carrying capacity and sustainable pasture utilisation
- pasture, land and soil condition and indicators
- management options for animal health based on an understanding of pest life cycles, genetic selection and acquired immunity
Assessment Requirements for AHCORG402 Manage organic livestock production

- permitted, restricted and prohibited inputs and activities as described in the National Organic Standards for Organic Livestock Production relationship between soil, plant and animal health
- work health and safety and animal welfare legislation and codes of practice.
- record keeping
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>AHCv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- implement principles of organic agriculture and agroecology
- implement knowledge of interrelationships between soil fertility, animals, plants, pests and diseases
- devise and implement a soil improvement plan to correct imbalances and maintain soil fertility
- sample soils and analyse soil test results for a range of indicators of soil fertility
- work with natural processes and allowable inputs to improve and maintain soil fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- availability, use and definition of organic fertilisers
- structural properties of soils
- factors contributing to soil acidity, sodicity and salinity
- factors promoting soil and plant water-holding capacity
- importance of soil biological activity
- major nutrient elements and their role in plant growth
- methods and inputs that can be used to correct imbalances and maintain soil fertility
- principles of organic agriculture
- processes and practices that impact on soil structure, biological activity, water-holding capacity and weed patterns
• processes of aggregate and colloid formation
• range of soil analyses available and principles of each
• relationship between soil structure, water holding capacity and nutrient availability
• role of organic matter, humus and micro-organisms
• role of livestock in enhancing soil fertility
• role of macro and micro-elements in soil and plants
• role of weeds
• significance of levels and balance of soil fertility indicators
• soil food chains and food webs
• soil textural types and determinants
• when and how to take soil samples to test for indicators of soil fertility
• principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to arrange selling through community based marketing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Unit Sector

Organic Production (ORG)

<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>AHCv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify farm produce selling options
- identify and comply with requirements of a community marketing scheme and its characteristics
- establish relationships with community stakeholders and customers
- monitor and record community satisfaction levels and customer feedback and address concerns
- communicate the ‘farm story’ and the uniqueness of the enterprise to the community
- arrange timely transport and delivery of produce and address any special transport requirements
- comply with transport legislative requirements
- accurately record pre and post sale documentation and transactions
- identify and record potential improvements
- work with natural processes and allowable inputs to improve and maintain soil fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in selling produce through community based markets
- relevant legislation and regulations relating to work health and safety
- organic certification systems and standards
Assessment Requirements for AHCORG404 Arrange selling through community based marketing

- organisation policies and procedures related to supply chain management, purchasing, and contracting and tendering
- characteristics and composition of farm business marketing plans
- characteristics of community marketing schemes and the steps within a farm produce supply chain
- product knowledge related to goods and services required by the organisation
- ways to build trust and collaboration as opposed to competition
- business terms and conditions for purchasing, tendering and contracting
- ethical behaviour
- established communication channels and protocols
- procedures for operating electronic communications equipment
- procedures for recording and reporting workplace information and completing relevant documentation

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to manage the establishment and implementation of sustainable work practices in organic farming enterprises of all sizes and in a variety of work settings.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to production managers and workplace supervisors in an organic farming enterprise that are responsible for identifying selling options, developing a relationship with community groups, complying with community based marketing scheme requirements, organising appropriate transport and keeping sale records.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify businesses guidelines and principles for social, financial and environmental sustainability
- identify and interpret environmental regulations, sustainable organic farming requirements, farm plan and current best practice guidelines and principles
- implement strategies to integrate sustainability principles and practices into the farm system and identify continuous improvement opportunities
- monitor farm business sustainability initiatives for effectiveness and compliance
- adopt and document continuous improvement initiatives
- encourage staff and farm business stakeholders to embrace sustainability practices
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- best practice guidelines
- principles and processes relevant to sustainable organic farming
- compliance requirements for all relevant environmental/sustainability legislation, regulations and codes of practice including resource hazards/risks associated with work area, job specifications and procedures
- sustainability issues including environmental and social issues that relate to an organic farm
- external benchmarks used within an organic farming enterprise, including approaches to improving techniques used and expected outcomes
Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and document compliance requirements of the selected organic standard relating to the farm system
- identify and document key farm operations impacted by the organic standards
- support and train key personnel and staff to implement and foster a compliant organic supply chain culture
- keep accurate records at all key supply chain steps to verify and maintain organic compliance
- conduct an internal organic audit of the farm system and accurately complete associated records and documents
- participate in an annual organic audit and successfully close any identified corrective actions
- identify food safety requirements and ensure compliance of the farm system with industry standards
- ensure all farm records, traceability and production data is kept, monitored and maintained in compliance with National Organic Standard requirements
- comply with requirements of relevant organic standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- organic standards, compliance requirements and industry specifications
- applicable food safety and licensing requirements
- farm supply chain market requirements for product
- organic quality specifications for product
- enterprise and industry quality assurance systems
- strategies for control of hazards to organic compliance
- document control protocols

**Assessment Conditions**

Assessment may take place in a simulated or real workplace, however all evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement and manage a landless organic production system
- provide suitable nutrition and living environment for a landless based biological enterprise based on the relevant Organic Standards or agro-ecological principles
- manage health and welfare for a landless enterprise based on organic or agro-ecological principles
- manage breeding or restocking for a landless enterprise based on organic or agro-ecological principles
- maintain recording systems for production system
- implement biosecurity requirements
- implement organic or agro-ecological principles
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- organic certification requirements
- organic and agro-ecological principles
- enterprise relevant pests and diseases
- relevant animal welfare legislation and code of practices
- nutrition management, including feed types and assessment, feed budgeting and feeding strategies
- management options for preventative health based on an understanding of nutrition, life cycles, genetic selection, environmental conditions and acquired immunity
- management options for feeding and breeding based on organic and agro-ecological principles
- environmental conditions and infrastructure requirements for optimal enterprise performance and welfare
- work health and safety practices
- record keeping requirements
- relevant principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

**Assessment Conditions**

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

</table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement and manage an on farm compost system
- manage composting processes
- manage a composting site
- evaluate compost quality and implement remedial actions if required
- implement enterprise work health and safety policies
- follow site quarantine and biosecurity protocols

Knowledge Evidence

The candidate must demonstrate knowledge of:

- compost quality standards
- basic principles of composting
- different methods of composting
- characteristics of a range of raw materials
- fundamental characteristics of compost quality
- steps in pre-processing compost materials
- batch documentation techniques
- site and equipment requirements for on farm composting
- key process control stages critical to consistent compost production
- overview of systems and technologies used in compost production, particularly as relevant to farm
- characteristics and categories of a range of compost products,
- relevant environmental, work health and safety legislation and regulations
- record keeping requirements
- site quarantine and biosecurity protocols
- agro-ecological principles
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce if applicable

**Assessment Conditions**

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to design and document an organic farm landscape that will be used as the basis for an organic farm enterprise.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- source and interpret legislative requirements, industry standards and codes of practice
- identify compliant work practices and procedures
- conduct an audit of the natural resources and infrastructure of the property
- identify physical and biological characteristics and landscape features of the property
- develop farm soil map and determine land capability
- develop an organic landscape plan using appropriate development tools
- revise a draft plan and document the final organic landscape plan

Knowledge Evidence

The candidate must demonstrate knowledge of:
- applicable legislative documents and codes of practice relevant to farm landscape planning
- landscape types
- habitat and plant communities on farm
- relationship between land shape and soil type
- soil types
- different categories of cultural sites
- organic certification requirements
- landscape hydrology
- landscapes for agro-ecosystems
- native habitat requirements
- the requirements of the organic standard and agro-ecological principles
Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research and evaluate the suitability of different community marketing options for farm products
- research and identify applicable legislative, environmental, and certification requirements relevant to managing a community based marketing chain
- document specifications for the various components of the marketing chain management system in line with organisational and legislative requirements
- establish and document market specifications meet community expectations
- establish product marketing chain to meet marketing options
- establish farm business requirements for each step in the marketing chain
- establish compliance requirements at each step in the marketing chain
- conduct record keeping requirements for each step in the marketing chain
- develop and document a community based marketing plan
- develop and document a promotion plan
- collate customer feedback and use to improve market outcomes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in selling produce through community based markets
- relevant legislation and regulations relating to work health and safety
- organic certification systems and standards
- rural produce marketing and presentation
- organisation policies and procedures related to supply chain management, purchasing, and contracting and tendering
- characteristics and composition of farm business marketing plans
- characteristics of community marketing schemes and the steps within a farm produce supply chain
- product knowledge related to goods and services required by the organisation
- ways to build trust and collaboration as opposed to competition
- business terms and conditions for purchasing, tendering and contracting
- ethical behaviour
- established communication channels and protocols
- procedures for operating electronic communications equipment
- procedures for recording and reporting workplace information and completing relevant documentation

**Assessment Conditions**

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify personal and enterprise goals
- identify and document physical, biological, social and financial resources under management
- research and evaluate sustainable production systems and select and document a production system that meets sustainability and enterprise management goals
- develop a sustainable production plan
- match land capacity with production system design
- monitor and evaluate effectiveness of the sustainable production system
- modify the enterprise mix or production system where differences between the sustainable production plan and actual results are identified
- record and manage farm system information and data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in developing and monitoring a sustainable production plan
- relevant legislation and regulations relating to work health and safety, contractor engagement, animal health and welfare, chemical use and application, vehicle and plant use and soil and water degradation issues
- environmental protection requirements and codes of practice, including the safe disposal of products and waste material, available to the organisation
- organisational policies and procedures, standards and site requirements for risk management and hazard identification
- sustainable land use principles and practices applicable in the region
- farm planning processes

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Observe plant characteristics and record observations according to workplace procedures

2. Ensure congruence of specimens and observations by accurate labelling according to workplace procedures

2. Preserve plant specimens

2.1 Store collected plant specimens to prevent degradation until they can be preserved according to workplace procedures

2.2 Identify and select an appropriate preservation technique according to workplace requirements

2.3 Prepare and arrange specimens for preserving according to preservation technique and workplace procedures

2.4 Preserve the specimen according to selected preservation technique

2.5 Arrange and mount the preserved specimen and observation records according to workplace procedures

2.6 Package the specimens and submit for identification according to workplace procedures

3. Record and catalogue specimen

3.1 Record and catalogue specimen information according to workplace procedures

3.2 File records appropriately according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have collected and preserved plant specimens for identification, including:

- collected representative parts of plant specimens and recorded and labelled specimens with characteristic data for identification purposes
- stored labelled plant specimens ready for preservation
- determined a plant preservation technique
- arranged and preserved plant specimens according to procedures
- arranged and mounted preserved specimens with observation records ready for identification
- packaged specimens with observation data and submitted for identification
- recorded and catalogued specimen information according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic botanical requirements for plant identification purposes
- principles and practices of collecting plant materials
- characteristics of plants to be collected and recognising suitable specimens for collection
- storing plant specimens before preservation to maintain specimen integrity
- plant preservation techniques and the agencies and organisations that use them
- records and recording systems for plant collections and plant data.
Assessment Conditions

Assessment of skills must take place under the following conditions:

- **physical conditions:**
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions

- **resources, equipment and materials:**
  - live plant materials to be collected from the field
  - equipment and materials required for preserving and mounting plant specimens
  - records and recording systems for plants

- **specifications:**
  - workplace procedures and processes for preserving plants
  - workplace instructions and specifications for preserved plants.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to fell small trees where hazards have been assessed as low risk.

It is an introductory or base-level unit that covers felling procedures for small trees.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant state or territory.

Pre-requisite Unit

AHCMOM213 Operate and maintain chainsaws

Unit Sector

Plant culture and management (PCM)

| 1. Assist in preparation of work site | 1.1 Determine location of worksite and correct tree from the scope of works  
1.2 Identify site hazards, assess risks and report to supervisor  
1.3 Confirm work zone with work crew and monitor site  
1.4 Identify first aid and emergency personnel, equipment and procedures  
1.5 Record and implement work health, safety, site, environmental and traffic control measures |
| 2. Identify tree felling requirements | 2.1 Identify hazards associated with felling operation  
2.2 Assess risks and report to supervisor  
2.3 Examine topography and site conditions  
2.4 Identify factors influencing the tree felling operation and confirm findings with supervisor  
2.5 Identify *trees considered outside own skill level for felling* and seek assistance from appropriate personnel  
2.6 Determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor  
2.7 Receive instructions for tree felling operations from supervisor and clarify instructions prior to undertaking work |
| 3. Prepare for tree felling | 3.1 Select and prepare felling equipment and component options appropriate to the task being undertaken  
3.2 Prepare, transport and appropriately position support tools to minimise felling delays  
3.3 Select, check, use, maintain and store suitable safety and personal protective equipment (PPE)  
3.4 Clear fall zone of obstacles and articles which may be damaged by felled tree  
3.5 Establish clear escape route appropriate to site |
| 4. Fell tree | 4.1 Note and monitor location of other personnel  
4.2 Carry out tree felling operation  
4.3 Communicate with work team during operations using voice, hand and whistle signals  
4.4 Determine standard tree felling techniques, patterns and cut sequences by ground conditions and state of canopy  
4.5 Take corrective action in response to changing conditions or problems encountered  
4.6 Use planned escape route when tree starts to fall  
4.7 Monitor fall of tree and movement on ground until felled tree is stable  
4.8 Use low risk work practices in all activities |
Element | Performance criteria
--- | ---
5. Complete tree felling operation | 5.1 Determine appropriate method of clearing the site of felled tree 5.2 Select and use machinery required for removal of felled tree 5.3 Clear fall site of tree and all tree debris 5.4 Clean and store all machinery and equipment on completion of operation

**Foundation Skills**
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare, transport and appropriately position support tools to minimise felling delays
- assess topography and site conditions, identify factors influencing tree felling operation and confirm findings with supervisor
- receive instructions for tree felling operations from supervisor and clarify prior to undertaking work
- clear fall zone of obstacles and articles which may be damaged by felled tree
- confirm first aid and emergency personnel, equipment and procedures
- identify site hazards, assess risks and report to supervisor
- record and implement work health, safety, site, environmental and traffic control measures
- select, check, use, maintain and store suitable safety and personal protective equipment
- confirm work zone with work crew and monitor location of other personnel
- determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor
- determine standard tree felling techniques by ground conditions and state of canopy
- establish clear escape route appropriate to site
- safely operate a chainsaw to fell small trees
- monitor fall of tree and movement on ground until felled tree is stable
- take corrective action in response to changing conditions or problems encountered

Knowledge Evidence

The candidate must demonstrate knowledge of:

- corrective action
- emergency and first aid procedures
- felling equipment and components
• first aid and emergency personnel, equipment and procedures
• ground conditions
• how to determine natural direction of fall
• how to establish a clear escape route
• industry standard terminology
• low risk work practices
• obstacles and articles which may be damaged by felled trees
• positioning support tools
• safe operating procedures for felling small trees
• safe fall and exclusion zones
• selection, preparation and appropriate equipment for task
• standard tree felling techniques, patterns and cut sequences
• topography, site conditions and other factors influencing tree felling operations

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify goals, target site, soils and plants for implementing the program
- identify materials and their supply source
- monitor soil pH in the implementation site
- identify appropriate products and application methods appropriate to implementing nutrition program
- estimate treatment and product requirements, material sizes and quantities
- conduct a site hazard identification and risk control assessment
- determine nutritional problems in plants
- plant nutrition program specifications
- apply specific products at appropriate rates and record their application
- select, check and calibrate tools, equipment and machinery

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant nutrition
  - botany and plant physiology
  - methods of nutrient uptake by plants
  - nutrient cycling and its practical relevance to the specific plants and soils
  - nutrients required by plants grown within the enterprise
  - soil ameliorants commonly required to treat the soil problems experienced by the enterprise
  - the effects of nutrient deficiency and toxicity on plant species and varieties
• the environmental implications of soil ameliorant and fertiliser use
• the main simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, application rates and costs
• the relationship between soil characteristics and the availability of nutrients

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- develop product knowledge through research and access to in-house and online information
- interpret information sheets, labels, horticultural literature, specifications and design symbols
- investigate requests for information, identify and evaluate options, decide on a solution, and deliver recommendation and information to the client
- select plants from a range of available stock lists
- communicate with clients, work team members, supervisors, suppliers, contractors and consultants

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles of plant culture
  - broad range of plant species and their cultural requirements
  - duty of care in provision of advice and recommendations to retail, commercial and private clients
  - local plant suppliers, consultants, services, products and contractors
  - pest and disease symptoms, basic physiology and life cycle of pests and diseases, vulnerable plant growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications
  - plant identification techniques, plant selection, plant physiology, habit and growth characteristics of the plants
  - soil characteristics particularly in relation to the local region
• weed species, growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have identified plant specimens, including:

- identified and recorded key characteristics of plant morphology and identified to division level
- determined plant health and assessed effect on characteristics indicative to identification
- used reference materials to compare characteristics to taxonomic classification
- identified plant specimen to lowest level of taxonomic level (category)
- compiled identification data and recorded the identification and process according to workplace procedures
- reported outcomes to client according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant identification, including:
  - plant health problems indicative of plant species
  - basic physiology and life cycle of pests and diseases
  - botanical terms for plant morphology, physiology
- symptoms of plant pests and diseases that mask characteristics for identification
- methods of data capture
- plant identification techniques
- problem-solving techniques
- soil characteristics particularly in relation to the local region
- plant characteristics including tactile and sensory
• levels (categories) of taxonomic classification.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • live plant specimens
  • tools and equipment necessary for plant observations
  • botanical reference materials, plant data bases, plant keys
• specifications:
  • workplace documents including procedures and processes for recording data and preparing reports
  • workplace instructions, specifications or client briefs
• relationships:
  • real clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare materials and implement traffic management requirements for tree inspection
- document and implement traffic management requirements where required
- recognise a range of tree species and cultivars common to the region
- identify and report on the general health and condition of trees
- identify obvious potential structural defects, damage, pests and/or diseases
- recommend treatments for pest and disease problems
- recognise potential structural or other defects that require inspection by an arborist
- record findings and inform client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for inspecting trees
  - AS4373-2007 Pruning of amenity trees
  - botany and tree physiology
  - local government tree protection and preservation regulations
  - methods of determining tree dimensions
  - methods of low risk work
  - recognition of a wide range of trees common to the region
  - relevant Code of Practice
  - signs of structural defects, decay, damage and stress in trees
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to recommend plants and cultural practices. It applies to both sales staff in plant nurseries and garden centres and others in the amenity horticulture industries.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct literature and industry research, collate and analyse findings on plant species and cultivars, their characteristics and requirements
- comply with legislative requirements
- explain to the client work health and safety requirements or basic safety precautions relevant to the establishment and on-going maintenance of plants
- document client preferences and site particulars
- select plants that suit client preferences and suitability for the site
- report recommendations to the client that detail the types of plants chosen and their requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recommending plants and their cultural practices
  - customer service and communication skills
  - features of plant species and cultivars
  - innovation and recent practices in plant selection, use and performance
  - plant nomenclature (family, genus, species and cultivar) for the range of plants recommended by the enterprise
  - practical understanding of the physiology of the range of plants supplied and recommended by the enterprise and their comparative growth and performance characteristics in response to different cultural and environmental factors
- principles and practices for the establishment and maintenance of plants
- soil characteristics, particularly in relation to the geographical and climatic region from which clients generally originate

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and analyse information on regional site factors
- assess the physical, chemical and biological characteristics of soils
- assess the physical, nutritional and health requirements of plants
- develop a soil, plant and water testing program
- develop a program to achieve appropriate soil conditions and nutrient availability for plant growth, incorporating a soil health and plant nutrition plan
- research and analyse findings on plant nutritional requirements, nutrients available from soils and other growth media, and environmental implications of program
- select suitable management practices, soil amendments, additives and fertilisers

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of soil health and plant nutrition
  - characteristics of soil and other growth media types, uses and additives to enhance available nutrition for specific plants
  - main simple and compound fertiliser products available to enterprise, including analysis, solubility, salt index, application rates and costs
  - methods of nutrient uptake by plants and favourable conditions for effective uptake to occur
  - nutrients and water required by plants grown within enterprise and effects of nutrient deficiency and toxicity on individual plant species and varieties
  - visual and other symptoms of nutrient deficiency and toxicity on individual plant species and varieties
- organic matter, pest and disease, and nutrient interactions in soil and nutrient cycling
- environmental issues associated with selecting nutritional materials, implementing a plant nutrition program, legislation compliance requirements and ensuring minimal impact on environment
- the following types of relationships between soil and growth media characteristics and availability of nutrients to plants: macro and micro elements
- the following types of site evaluation techniques: methods of sampling and analysing soils and other growth media
- soil amendments commonly required to treat soil problems experienced by enterprise

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research information about plant health problems, their diagnosis and remedial treatments
- differentiate between pest, disease and nutrient-associated symptoms
- identify signs and symptoms of plant health problems
- assess the severity, extent and speed of onset of health problems in a specific situation
- determine possible causes of the problem
- liaise with specialist services, clients and management
- formulate a weed, pest and disease control program
- implement treatment programs to remedy the diagnosed health problems
- evaluate treatment program and recommend modifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant health
  - chemical use, toxicity and compatibility with target plants, growth media, and environmental characteristics of the horticultural region
  - chemical, cultural and biological control methods included in the integrated pest management (IPM) strategy of the enterprise
  - enterprise and industry record keeping and reporting policies and requirements
  - evaluation procedures, including cost/benefit analysis, for plant and growth media treatments in relation to plant health, enterprise budget and performance targets
  - plant anatomy, morphology, physiology, histology, pathology, taxonomy and nomenclature
Assessment Requirements for AHCPCM501 Diagnose plant health problems

- plant nutrition issues associated with the growth media used and horticultural region for specific plant species
- sustainable horticultural practices relevant to the enterprise or horticultural region
- taxonomic descriptions, horticultural function, cultural and growth requirements, and target growth and performance characteristics of specific horticultural plants for the achievement of enterprise production and business plans
- weeds, pests and disease detection methods, taxonomic identification, life cycle stages and characteristic symptoms for the specific horticultural plants of the enterprise

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a client brief on client’s needs, objectives and expectations, the purpose of the landscape and plant selection criteria
- compile a database of plant specimens and characteristics
- conduct site inspections and site assessments
- evaluate and determine plant selections
- identify and select from a range of plants appropriate to the site
- research reference sources
- select and appraise soils and growing media
- use comparative techniques
- assess quality of plants and materials meet specifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of specifying plants for landscapes
  - basic physiology and life cycle of pests and diseases
  - botany, plant morphology, physiology, taxonomy and nomenclature
  - methods of data capture
  - plant identification techniques
  - soil characteristics particularly in relation to the local region
  - soils appraisal techniques
  - symptoms of plant pests and diseases
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to design a specialised landscape.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

| 1. | Conduct a functional analysis of the site  
1.4 Develop a design brief and consult with client to negotiate agreement |
| 2. Design with plants as a main focus of the design project | 2.1 Categorise plant families and genera, species and cultivars suitable for the design  
2.2 Identify a wide range of plants for different design criteria and requirements, which include the use of aesthetic, ornamental, productive and economic plant groups  
2.3 Determine and select plants appropriate to the design criteria  
2.4 Use botanical nomenclature when documenting plants |
| 3. Consider a range of factors that may influence the performance of the plants | 3.1 Determine the implications of climate and environment on plant selection and design  
3.2 Select plants that are adaptive to micro and meso climates in domestic, and small to moderate-scale public spaces  
3.3 Report on the cultural techniques required to establish and maintain plants in specialised environments  
3.4 Identify soil types and condition and make recommendations for appropriate soil management techniques  
3.5 Identify organic and inorganic fertilisers and make appropriate recommendations  
3.6 Identify common plant disorders and make appropriate recommendations |
| 4. Develop specifications for the design | 4.1 Incorporate instructions on the use and production of compost  
4.2 Define the propagation techniques required  
4.3 Outline the planting techniques to be used  
4.4 Specify situations where staking and guying would be required  
4.5 Define the required pruning and shaping techniques to be used  
4.6 Outline the biological, organic and inorganic plant and plant pest management techniques to be used  
4.7 Seek expert advice on irrigation requirements for the design  
4.8 Develop a weed management plan  
4.9 Document the design plan and present to client |

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Develop a design brief in consultation with client to establish design purpose and requirements
- Identify the implications of climate and environment on plant selection and design
- Identify and design with plants appropriate for use in controlled environments
- Identify and recommend soils and plant nutrition requirements
- Identify and recommend plants appropriate to the design criterion
- Use botanical nomenclature when selecting plants
- Identify plant species and cultivars using botanical nomenclature
- Identify weeds and recommend appropriate weed management
- Identify biological, organic and inorganic plant and plant pest management techniques to be used
- Provide garden design solutions
- Compile the recommendations and document a design plan or report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Principles and practices of specialised landscape design
  - Aesthetic, ornamental, productive and economic plant groups
  - Allied horticultural, environmental and conservation industries and movements
  - Botanical geography (plant families, geographic distribution and links)
  - Botany - plant structures and physiology
  - Ethno botany (sustainability and the stories of plants)
- horticultural media, information and knowledge-based resources
- how to determine suitability of plants for different environments such as green buildings (rooftops), conservatories, glass houses and atriums
- irrigation and current progress in new irrigation techniques
- plant families and detailed knowledge of species and cultivars used in garden design, horticulture industry and other ornamental, productive and economic plant industries
- plant taxonomy and nomenclature
- principles and processes of plant culture
- the use and development of plants through history
- turf culture
- types, properties and characteristics of a wide range of soils and growing media

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Research, identify and document community, government and agricultural industry information, concerns and requirements in relation to fertiliser and soil ameliorant use and environmental stewardship
- Research, identify and document information and standards relating to transporting, handling, storing and applying fertilisers and soil ameliorants
- Identify and evaluate probability and severity of identified environmental risks associated with plant nutrition and soil fertility programs
- Calculate areas, ratios, proportions and application rates
- Liaise with managers and landowners, local and national organisations
- Develop a nutrient management plan
- Monitor effectiveness of plant nutrition and soil fertility management decisions over time
- Identify opportunities to improve efficiency and effectiveness of plant nutrition and soil fertility program
- Estimate treatment and product requirements, material sizes and quantities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Principles and practices of food safety risk assessment
- Environmental implications for environment of soil amendment and fertiliser use, that may include nutrient mining, run-off, nutrient loading of soil and water, toxicity, noise and dust
- Food safety issues relating to the use of fertilisers and soil ameliorants
- Law of the minimum and importance of nutrient interactions
• methods and pathways of nutrient uptake by plants and loss from soil
• nutrient cycling and its practical relevance to specific plants and soils encountered in local area, including role of soil biology
• nutrients required by plants grown within enterprise and effects of nutrient deficiency and toxicity on individual plant species and varieties
• relationship between soil characteristics and the availability of nutrients, including macro and micro elements, to plants
• single nutrient and complete fertiliser products encountered in local area, including physical attributes, nutrient analysis, solubility, salt index, application rates and costs, and appropriate application techniques and equipment
• soil amendments commonly used to treat local soil problems
• soil and water sampling techniques to adapt activities and instructions to a range of environmental contexts
• techniques for interpreting laboratory results and making fertiliser and amendment recommendations
• techniques to assess effects of fertiliser and amendment recommendations on soil, plants and water

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the economic threshold for a range of weed, pest or diseases
- develop an integrated pest management (IPM) strategy based on analysis of weed, pest or disease presence
- develop and implement monitoring procedures
- monitor costs of pest management plan to meet budget requirements
- oversee the implementation of an IPM pest management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing integrated pest management plans
  - application techniques for chemical and non-chemical treatments
  - cost/benefit analysis relevant to selection of weed, pest and disease control measures
  - crop and plant scouting and monitoring
  - ecological impacts of different control treatments
  - interaction of weed, pest and disease control measures
  - weeds and pests of specific horticultural enterprises
  - lifecycles of hosts, predators and pests and diseases

Assessment Conditions

Assessors must satisfy current standards for RTOs.
