An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have planned and implemented a chemical use program, including:

- sourced information and analysed its content for chemical application
- assessed the need for chemical use and ensured personnel are adequately trained in chemical use according to workplace procedures
- identified hazards, risks and provided controls, including personal protective equipment (PPE) for chemical application and off target impact
- assessed weather conditions and environmental sensitivity of the site
- documented chemical application and maintenance procedures according to workplace protocols
- determined chemicals required and mixing requirements according to workplace procedures and chemical label instructions
- develop a continuous improvement strategy to minimise risk
- communicated chemical application plan to personnel
- implemented procedures and monitored and evaluated personnel according to chemical application plan
- developed a continuous improvement strategy for chemical application plan
- implemented, monitored and evaluated a chemical application plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- source of information for developing plans, including:
 - legislation and regulations
 - codes of practice
 - chemical labels

- safety data sheets (SDS)
- industry requirements relating to chemical use
- strategies for identifying hazard, risks and controls
- risk factors, including:
 - human
 - animal health
 - product integrity
 - weather
 - residues and maximum residue levels
 - off target damage, spillage and environment
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities, limitations and calibration
- mixing chemicals, including:
 - rates
 - mixing order if more than one chemical
 - adjuvants
 - water quality
- life cycle of a variety of pests and the target stages
- implications of pest resistance to chemicals
- principles and practices of chemical application strategies and equipment including, integrated pest management and animal health strategies
- preparation and documentation of strategic plans and procedures
- signs of pest damage and signs of beneficial organisms
- operational factors to consider in a procedures, including:
 - transport, handling and storage
 - application methods, equipment and PPE
 - cleaning and decontamination
 - disposal of waste
- emergency procedures including first aid
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment required to implement the chemical application program
 - PPE
 - chemicals and relevant weighing and mixing equipment
- specifications:
 - specific workplace documents including policies and processes
 - manufacturers' operating instructions for chemicals, equipment and machinery
 - SDS
 - workplace instructions and job specifications
 - chemical information including legislation, codes of practice, chemical label instructions
- relationships:
 - team member(s) or work crew
- timeframes:
 - schedules and planned completion dates for a chemical application plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop and manage a chemical use strategy, including assessment of the risk of chemical transport, storage and handling.

The unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate a deep understanding in a specific technical area.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and evaluate need for chemical use	1.1 Evaluate pest control strategies and their relevance to workplace requirements 1.2 Identify, assess and incorporate external factors that influence the

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	chemical use strategy according to workplace conditions, legislation and codes of practice 1.3 Document requirements for chemical use strategy according to workplace requirements, legislation and codes of practice 1.4 Identify and review available chemicals and their methods of application and assess the relevance to the workplace requirements
2. Develop a chemical use risk management strategy	2.1 Identify and assess health and safety in the workplace hazards in the handling, transportation and storage of chemicals 2.2 Identify and document risk factors associated with the use of chemicals 2.3 Identify health and safety in the workplace hazards, risks and develop control measures according to regulatory requirements 2.4 Develop a risk management strategy for chemical use according to legislation and workplace principles 2.5 Research and document insurance cover for intended chemical use according to workplace guidelines
3. Develop and implement procedures for chemical management and use	3.1 Develop procedures for management and use of chemicals according to workplace guidelines 3.2 Develop and document procedures for risk control measures according to workplace guidelines 3.3 Develop and document procedures for communicating with stakeholders according to workplace guidelines 3.4 Distribute information on procedures for chemical management and use to stakeholders
4. Identify training and supervision needs and solutions for chemical use in the workplace	4.1 Develop a strategy for training, assessing and supervising personnel involved in chemical use according to workplace guidelines 4.2 Organise and provide suitable training and assessment for implementation of chemical use strategy
5. Monitor and evaluate the implementation of a chemical use strategy	5.1 Monitor the implementation of the chemical use strategy according to regulatory requirements and workplace procedures 5.2 Evaluate the effectiveness of the chemical use strategy and identify underperformances 5.3 Rectify underperformances in implementation according to workplace policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, evaluate and critique ideas and information from a wide range of complex texts
Writing	<ul style="list-style-type: none"> Prepare strategies expressing ideas, exploring complex issues and construct logical, succinct and accurate procedures
Oral Communication	<ul style="list-style-type: none"> Establish and maintain complex and effective communications with key stakeholders
Navigate the world of work	<ul style="list-style-type: none"> Work autonomously making high level decisions to achieve and improve organisational strategies Develop and implement strategies that ensures organisational policies, procedures and regulatory requirements are being met
Interact with others	<ul style="list-style-type: none"> Develop and implement communications strategies with internal and external persons in order to build rapport Use a variety of relevant communication tools and strategies in building and maintaining effective working relationships
Get the work done	<ul style="list-style-type: none"> Plan strategic priorities and outcomes within a flexible, efficient and effective context in a diverse environment exposed to competing influences Identify key factors that impact on decisions and their outcomes, drawing on experience, competing priorities, and decision making strategies

Assessment Requirements for AHCCHM501 Develop and manage a chemical use strategy

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed and managed a chemical use strategy, including:

- evaluated pest control strategies for workplace requirements
- identified, assessed and incorporated external factors, legislation, codes of practice and industry requirements into chemical use strategy
- reviewed available chemicals and their method of application and assessed their relevance to the workplace
- identified and assessed hazards and risks and developed control measures for a risk management strategy according to legislation and workplace guidelines
- researched and documented insurance cover for chemical use in the workplace
- developed procedures for management and use of chemicals according to workplace guidelines, including:
 - risk control measures
 - communication strategy to inform stakeholders of the chemical use strategy
- developed procedures that comply with legislation and workplace guidelines
- distributed information on procedures for chemical management to stakeholders
- developed and implemented a strategy for upskilling and supervising personnel for chemical use
- monitored the implementation of the chemical use strategy and evaluated and rectified underperformances, according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of a chemical control strategies, including:
 - relevant legislation, codes of practice and industry requirements covering health and safety in the workplace, hazardous substances, environment and food safety
 - workplace and regulatory requirements and options for the keeping of records
 - documentation
- hazards to human health, agricultural produce, and all aspects of the environment and non-target species of flora and fauna associated with the transport, storage, handling, application and disposal of chemicals, including:
 - routes of entry of chemicals into the body and the implications of this on chemical use management strategies
 - safety procedures including the maintenance, use, fit and decontamination of personal protective equipment (PPE)
 - monitoring of staff health exposed to chemicals according to regulatory requirements
 - emergency procedures for safety incidents involving chemicals
 - purpose and role of chemical labels and safety data sheets (SDS) in determining chemical transport, storage, handling, application and disposal procedures and practices to all staff
- external factors that affect chemical use, including:
 - influence of meteorological factors (wind, temperature, humidity, rain) on quality of chemical application, drift potential, effectiveness and efficacy of use
 - elements of a spray drift management strategy including measures to assess the potential for spray drift and prevent or control its occurrence
- pest control strategies and their benefits in terms of risk management and evaluation, including:
 - chemical
 - biological
 - cultural
 - Integrated Pest Management
 - Integrated Resistance Management
 - Integrated Animal Health Management
 - off-label chemical application and procedures
- equipment required, calibration and operation
- principles of residue effects and their management, including:
 - persistence in soil and water
 - accumulation in agricultural produce
 - rate of breakdown of residues in produce and in the environment
 - withholding periods
 - ways in which residues can occur
 - maximum residue levels
 - movement of and persistence and degradation of different types of chemicals
 - industry waste agreements

- source and purpose of insurance for use, transportation and storage of chemicals
- communication and negotiation strategies with stakeholders including community, workers and management, including informing on:
 - staff responsibilities
 - how to act in an emergency
 - neighbours when chemical spraying is planned
 - make agencies aware when accidents occur
- types of training needs including internal and external
- monitoring methods and procedures including periodical reviews of procedures, workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace with pest control requirements personnel and physical resources to implement and monitor chemical use strategy or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chemicals and spray equipment appropriate to control strategy
 - PPE
- specifications:
 - workplace documents including policies, procedures and processes to help formulate the chemical use strategy
 - manufacturers' operating and calibration instructions for equipment used in implementation to inform the procedures within the strategy
 - SDS
 - workplace instructions and procedures for implementing chemical use strategy
 - specific legislation, regulations and codes of practice
- relationships:
 - work team tasked with chemical control activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCOM201 Assess and receive raw materials for composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to receive green waste for processing at a compost facility, including measuring quantity for billing and assessing material quality for acceptability against specified enterprise requirements.

It applies to an employee of an enterprise engaged in commercial-scale composting operations.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Organise for work	1.1 Confirm specifications for raw materials 1.2 Select hand tools and check for serviceability 1.3 Identify, assess and report existing and potential hazards to health and safety 1.4 Use, maintain and store suitable personal protective equipment
2. Receive raw materials	2.1 Recognise and assess raw materials against acceptance criteria 2.2 Reject non-conforming materials 2.3 Note and report non-conformances 2.4 Estimate and record raw materials quantity 2.5 Calculate fee and charge to customer based on raw material type and quantity 2.6 Record fee payment and provide receipt
3. Unload raw materials	3.1 Give drivers directions for unloading at a specific location 3.2 Provide unloading assistance as required 3.3 Inspect and assess raw materials against specified acceptance criteria 3.4 Reject unacceptable materials 3.5 Note and report unacceptable materials 3.6 Identify and monitor designated unloading areas to ensure compliance with unloading instructions, containment and segregation of materials and availability of storage capacity
4. Remove contaminants and stockpile acceptable raw material	4.1 Remove physical unacceptable materials from raw materials 4.2 Segregate, stockpile and contain or otherwise manage raw materials in appropriate areas 4.3 Monitor raw material stockpiles to ensure adequate available storage capacity and containment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM201A Assess and receive raw materials for composting.

Assessment Requirements for AHCCOM201 Assess and receive raw materials for composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- inspect raw materials for contamination and acceptability against established criteria
- measure quantity for billing
- operate a weighbridge
- provide clear directions to drivers entering site
- receive raw material for processing at a compost facility
- record raw material quantity and calculate fee

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of composting raw material assessment
- characteristics of a range of raw green waste
- enterprise policies and procedures including workplace health and safety procedures
- safety risks to self and product posed by contaminants in raw materials and products
- standard risk control measures used in the industry to minimise risk associated with handling raw materials and products

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM202 Recognise and respond to fire emergencies on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prevent, recognise and provide first response to fire in material or compost piles.

This unit applies to a yard or general hand under supervision of an operations team leader or site foreman and fire brigade personnel.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Recognise a fire risk and undertake preventative actions	1.1 Obtain and clarify procedures for first response to fire 1.2 Identify location of firefighting equipment and check to ensure all equipment is available and ready for use 1.3 Recognise and report conditions that lead to fire and signs of fire 1.4 Observe enterprise procedures for emergencies 1.5 Implement temperature and moisture management procedures
2. Recognise and initiate response to fire	2.1 Identify nature and extent of fire 2.2 Report fire details and raise alarm 2.3 Implement preparations for water availability for fire brigade attendance 2.4 Identify hazards associated with fire emergency and take action to minimise risks to self, others and property 2.5 Secure immediate area of the emergency 2.6 Remove machinery and equipment from area where safe to do so 2.7 Select and set up firefighting equipment as directed by fire brigade personnel
3. Attack fire under direction of fire brigade	3.1 Apply appropriate firefighting and containment media in a safe and coordinated manner 3.2 Use firefighting methods and tactics as directed 3.3 Report and act upon potential for change in fire behaviour to fire brigade and supervisor 3.4 Identify and maintain clear line of retreat at all times 3.5 Observe conditions at fire and report their effects on fire development 3.6 Report significant changes to status of fire to supervisor and fire brigade
4. Carry out post-fire activities	4.1 Identify and control smouldering fire residuals according to fire brigade directions 4.2 Undertake break-up of windrows, buildings or structures 4.3 Remove spent fuel or burnt compost and debris 4.4 Undertake activities to complement post-fire operations and prevent further damage 4.5 Clear and clean site and equipment 4.6 Provide assistance to fire brigade to complete and record appropriate incident information 4.7 Report effectiveness of tactics employed 4.8 Seek feedback on performance and note improvements for future action

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM202A Recognise and respond to fire emergencies on a composting site.

Assessment Requirements for AHCCOM202 Recognise and respond to fire emergencies on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow emergency procedures
- operate pumps and set up water delivery system
- read and interpret site operation plans or maps
- recognise and report fire risks and incidents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recognising fire emergencies
- characteristics and operation of joints, hoses, valves and sprinkler components
- work health and safety and emergency management plans as part of enterprise operating procedures
- fire behaviour, extinguishing media and operating firefighting equipment
- fire control tactics and techniques, fire hazards and safety techniques
- operation of pumps
- pile size, moisture and porosity as causes of combustion
- procedures for safely using power and hand tools
- standard risk control measures used in the industry to minimise risk associated with fire response

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCOM203 Recognise raw materials, production processes and products on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify, confirm, locate, handle and maintain raw materials, products and physical contaminants on site
- implement site machinery and traffic management plans
- maintain site and machinery security requirements
- maintain site arrangement and segregation of materials and products to avoid contamination
- read and follow batch numbers and codes, and site operating plan
- recognise and locate key process control stages of production cycle and associated machinery on site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for raw material recognition
- characteristics of a range of raw materials
- company policies and procedures, including workplace health and safety requirements
- key process control stages critical to consistent quality in compost production
- overview of systems and technologies used in compost production, particularly as relevant to workplace
- range and characteristics of products
- safety risks associated with vehicles and machinery movement on site
- safety risks to self and product posed by contaminants in raw materials and products
- standard operating procedures to minimise risk associated with handling raw materials and products

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCOM301 Operate compost processing plant, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine appropriate operating methods
- implement work and equipment maintenance plans
- monitor input materials and report non-conformances
- monitor outputs and report out-of-specification product
- perform shutdown procedures and maintain records
- select and use a range of compost processing plant, machinery and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for operating compost processing plant
- enterprise guidelines associated with operation of plant, machinery and equipment
- environmental licenses, impacts and procedures identification of contaminants
- legislation, regulations and codes of practice with regard to operator licensing, roads and traffic requirements
- legislation, regulations and codes of practice with regard to workplace health and safety and the use and control of hazardous substances, such as fuel and recipe inputs
- lock-out and tag-out procedures for plant, machinery and equipment
- manufacturer specifications for servicing of plant, machinery and equipment
- operating principles and operating methods for plant, machinery and equipment
- potential risks and hazards associated with operation of plant, machinery and equipment
- principles of weight distribution with regard to load-shifting and machinery movement
- procedures for cleaning, securing and storing machinery, equipment and materials

- product types and characteristics
- raw material types and characteristics
- workplace health and safety legislation, codes of practice and specific hazards such as hazardous substances and exposure to organic micro particles

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCOM401 Develop a composting recipe

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate a compost recipe that is consistent with the technology and method available from combinations of raw materials
- document compost production plan consistent with plant capabilities and site constraints
- produce a compost recipe that will achieve defined product specifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of compost recipes
- control of hazards in handling raw materials and composting materials
- processing duration required for various raw materials
- range of commercial compost-based products
- raw materials and their characteristics
- relationship between key compost recipe variables and compost production
- systems, technologies and methods in compost production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM402 Plan and schedule compost production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and schedule compost production. This unit applies to product managers at a commercial-scale composting facility.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish production requirements	1.1 Quantify production requirements from raw material supply contracts and receipt data, sales and market trend information, and corporate marketing plan and strategy

Element	Performance criteria
	1.2 Identify conditions that affect production requirements with management, sales and marketing personnel 1.3 Estimate production requirements to meet customer requirements and site and equipment capacity in consultation with management, sales and marketing personnel 1.4 Monitor environmental and work health and safety impacts for compliance with enterprise plan and licence conditions 1.5 Document and submit production plan for management approval 1.6 Confirm availability of personnel, machinery and equipment for compost production 1.7 Develop contingency plan for oversupply or undersupply of raw material or product
2. Schedule production to meet requirement	2.1 Calculate batch types and volumes of compost-based products 2.2 Obtain laboratory and field test data of compost materials during and after production 2.3 Monitor and adjust production schedule according to field and laboratory test results 2.4 Make product available to customer in required quantities, to required quality and at required time

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM402A Plan and schedule compost production.

AHCFAU501 Manage fauna populations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare a fauna management plan, including controlling or maintaining fauna populations.

The unit applies to individuals who manage natural areas, and technical specialists who manage and provide advice on fauna populations.

Firearms licensing conditions may apply to this unit. Scientific licenses and permits may be required in some jurisdictions where the management plan involves endangered or threatened species, or critical habitats.

Pre-requisite Unit

Nil

Unit Sector

Fauna (FAU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess fauna populations	1.1 Conduct surveys for distribution, ecology, viability, genetic diversity and threats 1.2 Determine increase or decrease in species population size and range

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Assess desirability of the population change and impact on immediate environment</p> <p>1.4 Assess condition of the environment and habitats for ongoing support of species</p> <p>1.5 Research species numbers in other locations to determine significance of local population</p> <p>1.6 Assess attitudes of stakeholders to the species to determine acceptable range of population management options</p> <p>1.7 Complete a cost/benefit analysis of population management options</p>
2. Prepare management plan	<p>2.1 Develop plan of management from assessment</p> <p>2.2 Prepare submissions for funding to implement management plan</p> <p>2.3 Reconcile costs of plan for management against available funds</p>
3. Control or maintain fauna population	<p>3.1 Develop plan to manage species using a series of intervention measures according to resource constraints and legislative requirements</p> <p>3.2 Implement measures to manage population</p> <p>3.3 Obtain permits for population management according to legislative requirements</p> <p>3.4 Inform stakeholders and staff about population management measures</p> <p>3.5 Ensure management measures comply with workplace health and safety, animal welfare, biosecurity and environmental sustainability policies and procedures</p> <p>3.6 Ensure staff are trained and comply with licensing requirements for managing population</p> <p>3.7 Manage incidents with species according to legislative, workplace health and safety and public safety requirements</p> <p>3.8 Monitor and adjust management plan and record results in accordance with legislative and workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Conduct literature reviews on the impact of animal populations, and critically review results for the development of a fauna management plan
Writing	<ul style="list-style-type: none"> Prepare fauna management plans and supporting texts, expressing ideas and exploring complex issues that are constructed logically, succinctly and accurately
Oral communication	<ul style="list-style-type: none"> Establish and maintain effective oral communication with stakeholders and staff
Numeracy	<ul style="list-style-type: none"> Calculate animal population densities and compare results with researched results for comparable locations Prepare costing for management plan and reconciliation with available funding

Assessment Requirements for AHCFAU501 Manage fauna populations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared and implemented a management plan for at least one fauna species in its ecological environment.

There must also be evidence that the individual has:

- assessed fauna populations and their habitat
- assessed the impact of fauna population on the environment
- determined the stability and importance of fauna populations for their species
- planned intervention measures to improve species distribution, habitat and survivability
- prepared a fauna management plan in accordance with legislative requirements and workplace procedures, including:
 - developed workplace health and safety procedures
 - incorporated biosecurity procedures
 - informed staff and stakeholders
- implemented plan to control or maintain fauna populations
- applied ethical welfare practices when managing fauna populations
- applied appropriate sustainability practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislative and workplace requirements, including:
 - ethical standards and practices when working with fauna

- laws relevant to the protection of flora, fauna and marine environments
- ecological principles and practices as they apply to:
 - fauna species and their interrelationships with the environment
 - fauna and their habitat
 - predators and fauna population
 - competition between fauna species
- survey and assessment techniques, including:
 - survey materials and equipment
 - documenting and recording survey results
- key anatomical and behavioural characteristics and reproduction patterns of fauna species
- signs and symptoms of health issues in the species
- management planning methods and procedures
- requirements of licences for scientific, educational and conservation activities
- requirements for ensuring the welfare of animals described in the relevant codes of practice.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated for at least one fauna species in its ecological environment
- resources, equipment and materials:
 - fauna in the ecological environment
 - survey materials and equipment
- specifications:
 - specific workplace policies, procedures, processes for working with fauna
 - manufacturer operating instructions for survey equipment
 - legislation/codes of practice and standards for the ethical management of fauna.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCHYD301 Implement a maintenance program for hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a maintenance program for hydroponic growing systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor plant health	1.1 Interpret and clarify workplace information about the existing hydroponic system 1.2 Assess growth rate of plants against targets set in the production plan

Element	Performance criteria
	1.3 Assess plants for overall health 1.4 Assess plant for onset of fruit according to production plan
2. Monitor the hydroponic environment	2.1 Monitor environmental parameters according to the production plan and make adjustments as required 2.2 Collect samples and send off for analysis to identify potential sources of contamination 2.3 Monitor and adjust hygiene procedures 2.4 Monitor disposal of materials to ensure it follows enterprise guidelines
3. Monitor nutrient solution	3.1 Identify ingredients of the hydroponic nutrient solution 3.2 Take samples for testing and analysis 3.3 Interpret and discuss results 3.4 Modify nutrient solution to ensure correct balance of ingredients
4. Perform routine maintenance checks	4.1 Inspect all buildings and structures for wear and tear 4.2 Check equipment for delivering the nutrient solution 4.3 Check equipment controlling the atmospheric and root zone environments
5. Complete monitoring activities	5.1 Report problems to the manager 5.2 Record all checks

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD301A Implement a maintenance program for hydroponic systems.

Assessment Requirements for AHCHYD301 Implement a maintenance program for hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and assess plant health
- administer nutrients to a hydroponic system as instructed
- assist in performing nutrient measurement tests
- read nutrient analysis information
- undertake hydroponic system maintenance and repairs
- monitor hydroponic maintenance programs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for implementing a hydroponic maintenance program
- characteristics of healthy and unhealthy plants
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- equipment used in hydroponic systems
- plant growing media choices and their properties
- potential problems associated with a range of crops grown in a hydroponic environment
- properties of a nutrient solution
- recirculated and non-recirculated systems
- testing methods for a hydroponic nutrient solution
- testing methods for the gauging of environmental parameters

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCHYD302 Install hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install recirculating or non-recirculating hydroponic systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for installation	1.1 Interpret and clarify site plans and design specifications 1.2 Locate underground services according to site plans 1.3 Identify any potential site problems 1.4 Identify environmental implications of installing the system

Element	Performance criteria
	1.5 Clear the site for installation 1.6 Determine and arrange equipment and materials according to design and layout plans
2. Install a hydroponic system	2.1 Prepare site for and install drainage channels and water collection, and storage facilities according to design specifications 2.2 Assemble system infrastructure according to design specifications 2.3 Install system components according to design and layout plans and manufacturers specifications 2.4 Communicate problems associated with installation to the client or manager
3. Test and calibrate the system	3.1 Check infrastructure and systems are in working order and meet specifications 3.2 Calibrate hydroponic equipment 3.3 Install growing media 3.4 Test the system 3.5 Complete check list of all testing results
4. Complete installation operations	4.1 Clean and store all tools and equipment 4.2 Tidy site and remove and dispose of waste

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD302A Install hydroponic systems.

AHCHYD501 Develop a plan for a hydroponic system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design a hydroponic system. It applies to those who design systems for hydroponic production of horticultural crops.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary research	1.1 Research type of crop to be grown based on sound marketing principles

Element	Performance criteria
	1.2 Research the growing requirements of the crop based on sound horticultural practices 1.3 Establish the associated risks of growing a particular crop based on sound horticultural practices 1.4 Calculate estimated yield and crop turnover time from historical data and research statistics 1.5 Determine quantity of the plants to be grown based on a cost benefit analysis
2. Assess the suitability of a site	2.1 Assess the physical characteristics of the site 2.2 Ascertain and assess the proximity of the site to markets 2.3 Identify legal requirements in relation to the site and the development of a hydroponic farm 2.4 Identify and consider the environmental implications of developing a hydroponic farm on the site
3. Select the required system	3.1 Research main types of hydroponic systems 3.2 Carry out analysis on each type of system for the chosen crops 3.3 Carry out a cost/benefit analysis on each system for each type of crop 3.4 Determine the type of hydroponic system to be installed
4. Design the hydroponic system	4.1 Select and document the water collection and storage system on the plan 4.2 Select the irrigation system and its components according to the required volume of water and flow rate 4.3 Select and document the fertigation system 4.4 Determine the dimensions of the controlled environment structure following full consideration of the relevant factors 4.5 Determine the environmental control system and document specifications on the plan
5. Prepare and document the design	5.1 Develop a design plan 5.2 Determine specifications and detailed costings with the help of experts, if required 5.3 Develop and document detailed production procedures and schedules 5.4 Present documentation to the client for final approval

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD501A Develop a plan for a hydroponic system.

Assessment Requirements for AHCHYD501 Develop a plan for a hydroponic system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research the growing requirements, risks and returns of the proposed crop
- select, design or customise a system for the site and purpose
- survey the site for suitability and environmental impacts, and gain approvals
- develop a design plan
- present a design plan to clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing a hydroponic system plan
- advantages and disadvantages of the different equipment used in hydroponic systems
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- legislation and regulations relating to the establishment of a hydroponic system
- plant growing media choices, their properties and enterprise specifications
- technical requirements and operating parameters of recirculated and non-recirculated systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCILM201 Maintain cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain Indigenous cultural places according to Community guidelines and cultural protocols.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. This includes undertaking defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess maintenance work required	1.1 Identify works required under the management plan and enterprise procedures 1.2 Identify machine, equipment and materials necessary to carry out maintenance works 1.3 Estimate materials required for maintenance work

Element	Performance criteria
2. Prepare for maintenance	2.1 Organise machine, equipment and materials to carry out maintenance works 2.2 Prepare and assemble safety equipment and materials
3. Maintain condition of place	3.1 Undertake maintenance work according to work programs and work health and safety policies and procedures 3.2 Report presence of threats 3.3 Report evidence of deterioration and wear 3.4 Clean up site on completion of maintenance works
4. Protect cultural place	4.1 Report any evidence of damage to place to supervisor 4.2 Report any breach of legislation or enterprise regulations to supervisor 4.3 Maintain protective barriers and signs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCILM201 Maintain cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the level of work required to maintain the cultural place
- prepare for and carry out maintenance activities in accordance with organisational, cultural and environmental requirements
- report deterioration or damage to place to supervisor
- report incidents of breaches of legislation including vandalism
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential threats to area
- techniques of site maintenance and protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM202 Observe and report plants or animals

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe, record and report on the presence of plants or animals against criteria provided by a supervisor or as required under legislation or regulations.

All work is performed according to Community guidelines and cultural protocols.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. This includes undertaking defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and organise observations	1.1 Prepare a defined process for observation and seek agreement from supervisor 1.2 Obtain equipment for observation 1.3 Note requirements of legislation, protection agreements and enterprise procedures for species
2. Collect and record information	2.1 Identify and record presence of plants or animals, according to enterprise requirements 2.2 Collect plants or animal samples according to enterprise requirements and animal welfare codes of practice, where applicable 2.3 Follow protection and quarantine requirements under legislation, protection agreements and enterprise procedures for biosecurity 2.4 Make sure observation activities minimise degradation and disturbance to the environment, plants and animals 2.5 Carry out observation activities in accordance with work health and safety policies and procedures
3. Report data	3.1 Record and organise information on observed plants or animals according to enterprise recording and database arrangements 3.2 Communicate information to supervisors 3.3 Plot and describe locations of an organism using maps, Global Positioning System (GPS) and grid references

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCILM202 Observe and report plants or animals

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and accurately identify species of animals or plants in a natural area
- record and report observations in required format
- carry out a survey of plants and animals in a natural area in a manner that minimises disruption or degradation to the environment
- apply work health and safety practices in the context of own work
- use maps or GPS to accurately plot or describe locations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria used to group species
- common, Indigenous and scientific names of plants or animals
- biological species occurring in the study area
- undesirable plants (weeds) and animals
- the basic requirements for ensuring the welfare of animals included in the observation activity described in the relevant Codes of Practice, if animals are being observed

Assessment Conditions

Assessment must comply with community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for assessment.

AHCILM203 Record information about Country

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to record information and knowledge on Country from both an Indigenous and non-Indigenous perspective according to Community guidelines and cultural protocols.

This unit applies to working individually and also within a hierarchy of management and with others in a culturally appropriate way.

Individuals undertake defined activities and work in a structured context exercising limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect information	1.1 Determine boundaries and extent of Country

Element	Performance criteria
	1.2 Identify and record plant and animal species by Indigenous or common name 1.3 Identify and record special features and sites of Country 1.4 Determine relationships of plants and animals from Indigenous land and sea management and cultural perspectives 1.5 Collect information on relevant management practices for Country 1.6 Determine history of dispossession from Community sources and available literature 1.7 Determine simple food chains relevant to Country 1.8 Follow work health and safety policies and procedures when collecting information on Country
2. Review changes	2.1 Identify environmental changes since dispossession and the impacts of these changes on plant and animal communities 2.2 Document environmental trends and the impacts to Country 2.3 Record land and sea management practices that address environmental change
3. Document information	3.1 Record historical and cultural information about Country 3.2 Provide access to information to those who are authorised according to Community guidelines and protocols 3.3 Recognise and record ownership of information 3.4 Document conditions and parameters for using information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM203A Record information about country.

Assessment Requirements for AHCILM203 Record information about Country

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record details of plant and animal species according to enterprise procedures
- record information on Indigenous culture and history for Country
- document environmental changes and trends according to enterprise procedures
- collect and use information according to Community guidelines and protocols
- complete all documentation to enterprise standards, using Indigenous names or standard industry terminology, where appropriate
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- designated areas and features of Country
- local Indigenous or common names for plants and animals
- relationships between plants and animals and Indigenous culture
- protocols and customs relating to disclosure of knowledge about Country

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and provide appropriate information on cultural knowledge
- investigate cultural knowledge in accordance with cultural protocols
- determine relationships between land features, seasons and spirituality
- identify plants, animals and resources used for medicine and food in a given area
- provide information on cultural knowledge in accordance with cultural protocols
- follow cultural protocols when carrying out work
- collect plant and animal samples in accordance with legislative requirements and animal welfare codes of practice, where appropriate
- apply environmentally sustainable work practices when working on Country
- identify individuals who are authorised to possess cultural knowledge
- use common and Indigenous names for plants and animals
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- plant and animal uses and significance relating to a particular Community, group or region
- common and Indigenous names for plants and animals significant to the Community
- cultural protocols relevant to region, Community and scope and type of cultural knowledge
- role and rights of Indigenous peoples in maintaining and controlling cultural knowledge

- Indigenous protocols for identifying individuals who are authorised to possess cultural knowledge
- intellectual and cultural property rights
- the basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM306 Follow Aboriginal cultural protocols

Modification History

Release Number	TP Version	Comments
1	RGRv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop awareness of, and apply the protocols of Aboriginal culture, including the need to identify the appropriate persons when approaching a Community and the cultural and social protocols associated with that task.

This unit applies to following cultural protocols and details the specific cultural, gender and kinship sensitivities of working in Aboriginal Communities and on Country with diverse cultural requirements.

The unit applies to individuals working with lore/law men and women either autonomously or under the supervision and cultural authority of Traditional Owners or Elders for specific Country. They work under broad direction and use discretion and judgement in the selection and use of available resources.

This unit is also applicable to the work of repatriation workers and anthropologists. However, cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify Aboriginal beliefs and associated cultural protocols for different Country	1.1 Identify and document the importance of Aboriginal beliefs and the relationship of these beliefs with cultural landscapes 1.2 Recognise and respect gender roles 1.3 Respect language groups and kinship networks within specific Country that inform the basis of social relationships and Community roles 1.4 Recognise and respect cultural taboos, factions and avoidance relationships 1.5 Acknowledge the rights of individuals within Communities and on Country to hold specific knowledge and ceremony 1.6 Acknowledge the rights of individuals within Communities and on Country to hold responsibility for Aboriginal sites and the cultural rules associated with sharing that knowledge 1.7 Respect and affirm the inherent diversity that exists within cultures and Communities
2. Identify Aboriginal cultural authorities for specific Country in culturally appropriate ways	2.1 Apply various approaches and resources to identify cultural authorities for specific Country 2.2 Research difficulties in identifying cultural authorities in various states and territories 2.3 Identify and consult appropriate cultural authorities 2.4 Apply the identification by cultural authorities of appropriate persons within Communities who hold cultural knowledge relevant to determining the cultural significance of Aboriginal objects and places 2.5 Respect and implement the provision of advice by cultural authorities 2.6 Respect and implement rights and responsibilities associated with cultural knowledge, story, song, site and ceremony 2.7 Support cultural knowledge holders to inform the decision-making process to determine the cultural significance of objects and places 2.8 Acknowledge and respect traditional knowledge and practices in managing Country and environment

Element	Performance criteria
3. Relate Aboriginal cultural protocols to Community consultation	3.1 Identify and record key protocols required for Aboriginal Community consultation 3.2 Acknowledge determination of Aboriginal people as the primary source of cultural information 3.3 Select participants for and methods of consultation in accordance with decisions made by Aboriginal cultural authorities 3.4 Use communication approaches that place Aboriginal cultural protocols and values as a principal concern 3.5 Undertake participation in Community consultation following appropriate cultural protocols for that Country and Community
4. Recognise and administer Aboriginal ownership and intellectual property rights	4.1 Establish ownership rights and intellectual property rights of Aboriginal cultural information and material 4.2 Recognise rights to control cultural heritage by Aboriginal people as custodians of Aboriginal culture 4.3 Apply access restrictions to cultural knowledge, information and material 4.4 Follow confidentiality measures for recording secret, sacred materials 4.5 Determine and administer the ownership of cultural knowledge, information and material 4.6 Report any identified infringement of copyright
5. Access, transfer and use cultural information and material	5.1 Seek permissions from cultural authorities, relevant individuals and organisations for access and use of Aboriginal cultural information and material 5.2 Abide by decisions from cultural authorities, relevant individuals and organisations to deny permission for access and use of Aboriginal cultural information and material 5.3 Establish and implement parameters for processes of transfer of cultural knowledge 5.4 Observe cultural restrictions on Aboriginal cultural information and Aboriginal material 5.5 Acknowledge and observe copyright and licensing issues related to access and use of Aboriginal cultural material and cultural information 5.6 Follow Aboriginal cultural requirements for communications about, and display, access and handling of Aboriginal cultural information and material 5.7 Acknowledge and agree to the implications of consent for accessing, transferring and using cultural information and materials
6. Use appropriate	6.1 Observe appropriate use of personal protocols for addressing and

AHCILM307 Implement Aboriginal cultural burning practices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use traditional Aboriginal controlled burning practices on Country to manage natural and cultural resources.

This unit applies to Aboriginal sites workers and Land Managers who carry out burns on Country as part of their job role. They work under broad direction and use discretion and judgement in the selection and use of available resources.

The unit involves and requires a high level of awareness and experience with Aboriginal culture and communities and the need to observe Aboriginal cultural protocols. It is expected that this work will be undertaken as part of a team working under supervision in most cases.

Cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan burn activities	1.1 Develop working relationships that will assist in the planning and implementation of traditional Aboriginal cultural burning on Country with stakeholders 1.2 Identify and consult appropriate cultural authorities and obtain approval to be on Country 1.3 Obtain cultural knowledge through the appropriate knowledge holder or Cultural Manager 1.4 Identify ceremonial requirements for fire practices necessary for inclusion in burn plan 1.5 Develop a burning plan and schedule for the target area based on traditional cultural knowledge of seasonal conditions, historical information on burns, Aboriginal ceremonial requirements, legislative requirements, environmental sustainability, biosecurity and work health and safety considerations and safety concerns 1.6 Advise local fire services and agencies of proposed burn plan
2. Protect life, property and conserve fauna and flora species in burn area	2.1 Implement burn according to Aboriginal cultural burning techniques and consistent with the burn plan and schedule 2.2 Exclude visitors from target areas, entertainment areas and areas possibly affected by smoke or risk from escaping fire 2.3 Advise neighbours and agencies of the intention to burn to ensure safety and maintain client relations 2.4 Protect Aboriginal sites, assets and entertainment areas according to Aboriginal cultural protocols and fire industry practices 2.5 Apply fire breaks to the area to maintain control of the fire and burn intensity 2.6 Remove animals in danger in the burn area before starting the controlled cultural burn, where possible 2.7 Assess flora for impact on fire-sensitive communities and species
3. Burn defined areas	3.1 Maintain radio communication with other workers in the area throughout the burn 3.2 Use appropriate personal protective equipment and follow work health and safety policies and procedures during the burn 3.3 Assess weather forecasts and current weather conditions to determine appropriate conditions and timing for burn 3.4 Use appropriate ignition techniques, patterns, fire control and safety procedures to conduct the burn

Element	Performance criteria
	3.5 Apply fire to targeted areas according to Aboriginal cultural burning techniques, traditional frequency and organisation requirements 3.6 Identify targeted areas defined by burn specification or limiting factors 3.7 Check area to ensure all sections have received required burn in accordance with the burning plan 3.8 Complete and record assessment of burn 3.9 Monitor burning area to avoid wildfire outbreaks 3.10 Assess seasonal conditions and life cycles of flora and fauna for the end of fire practices

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM307A Implement Aboriginal cultural burning practices.

Assessment Requirements for AHCILM307 Implement Aboriginal cultural burning practices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or for a site
- develop working relationships with Aboriginal and non-Aboriginal stakeholders
- apply traditional Aboriginal cultural burning techniques
- follow burn plans and control burning operations according to enterprise procedures to:
- protect Aboriginal sites, assets and entertainment areas to Community protocols and requirements
- protect life, property and conserve fauna and flora species during burning
- achieve the correct intensity of burn
- maintain biosecurity
- meet environmental sustainability requirements
- adhere to organisational safety and environmental protection policies and procedures
- select existing, and construct additional fire breaks according to enterprise requirements to maintain control of fire
- ignite fires according to burn plan and enterprise procedures
- use radio communication according to enterprise procedures
- apply appropriate animal welfare practices when handling and moving animals in preparation for the burn
- follow work health and safety policies and procedures throughout the burn process to protect self and others

Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural Authorities within the Community
- traditional Aboriginal rationale and techniques for cultural burning
- the life cycles of flora and fauna of forests/plantations and effect of burning operations
- required intensity and appropriate frequency of fire
- sequence, location and pattern of recent and historical fire burns
- Aboriginal ceremonial requirements for fire practices
- seasonal cycle of weather patterns
- work health and safety policies and procedures
- emergency procedures
- ignition techniques and patterns
- fire control techniques
- emergency fire services
- organisational and enterprise policies and procedures for conservation of places of cultural significance
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to own prescribed burns
- sustainable environmental practices
- safety procedures for conducting fire operations
- enterprise work health and safety policies and procedures for carrying out controlled burning
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop working relationships with stakeholders in cultural sites
- canvass views in a culturally sensitive way to determine the heritage value and preservation issues of a cultural site
- observe cultural protocols in dealing with stakeholders and land managers
- develop action and emergency plans to mitigate and manage the risk of damaging incidents or loss of heritage value
- document the submissions to implement conservation and restoration activities and support the incident management activities
- supervise staff in performing restoration and conservation activities
- include work health and safety procedures in operational plans and training to manage incidents
- ensure plans include environmentally sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise policies and procedures for conservation of places of cultural significance
- operational activities engaged for conservation, restoration and risk management
- Indigenous protocols, consultation processes and networks
- budgetary and financial approval processes

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM402 Report on place of potential cultural significance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to report on place of potential cultural significance.

This unit applies to those whose job role includes investigating and reporting on places of potential cultural significance in consultation with stakeholders and Traditional Owners. A high level of cultural awareness and the need to observe cultural protocols are important parts of the process.

This unit applies to individuals who demonstrate autonomy, judgement and limited responsibility for others in known or changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate evidence of	1.1 Manage movement through park or reserve to minimise

Element	Performance criteria
past activities	<p>disturbance and degradation to the park or reserve and surrounding environments, especially in relation to known and potential places of significance, and to comply with Community protocols, legislative requirements, Codes of Practice and the park or reserve management strategy and plan</p> <p>1.2 Survey an area for land forms including caves and potential sites for rock art, flora, fauna and settings to identify potential places of previous human activity which could have cultural or natural significance</p> <p>1.3 Assess and document signs of previous human activity</p> <p>1.4 Review park or reserve activities in light of potential significance and maintain, modify or halt activities to maintain significance</p> <p>1.5 Where activities have affected or may affect the potential significance, record the original state of the non-Indigenous activities at the place, or for Indigenous activities, seek directions from Indigenous stakeholders or cultural reference group</p> <p>1.6 Where potential places of significance are identified, take field notes of location in terms of other park or reserve features, survey markers or global positioning</p> <p>1.7 Record reasons for identifying potential significance</p> <p>1.8 Refer location to Indigenous stakeholders or cultural reference group for further directions</p> <p>1.9 Follow work health and safety policies and procedures when working on site</p>
2. Implement interim protection measures	<p>2.1 Identify immediate and longer-term threats or risks associated with the conservation of the place according to enterprise guidelines, relevant charters and Codes of Practice</p> <p>2.2 Take interim protective measures to avoid degradation, disturbance, and deterioration and any action which may break cultural protocols</p> <p>2.3 Modify existing activities of personnel and visitors to reduce or eliminate risks to the significance of the place</p>
3. Report observation	<p>3.1 Collate and record field notes on location</p> <p>3.2 Review enterprise records to reveal any existing information about the non-Indigenous significance of the place</p> <p>3.3 Report finding and interim protective measures to colleagues</p> <p>3.4 Seek advice on the potential cultural and natural significance of the place and any additional required protective measures from Indigenous stakeholders or cultural reference group, from specialists in or external to the enterprise</p> <p>3.5 Document and report interim assessment of place according to legislative requirements, best practice guidelines and Codes of</p>

Element	Performance criteria
	Practice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM402A Report on place of potential cultural significance.

Assessment Requirements for AHCILM402 Report on place of potential cultural significance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- survey an area for landforms and sites that may hold cultural significance
- assess any physical signs, and source local information on human activity in the area, to indicate culturally significant sites
- ensure cultural protocols are followed
- maintain field notes on the location and details of sites in accordance with enterprise procedures or guidelines
- implement protection measures pending further investigation
- develop and document an assessment report for places of cultural significance according to enterprise and legislative standards
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of cultural places in land based, coastal zones and marine parks or reserves
- threats to cultural places from both natural causes and human activity
- application of State or Territory and Commonwealth legislation relevant to Indigenous land management
- enterprise procedures for reporting places of potential significance
- relevant protection measures for significant sites
- methods of locating position of site

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM403 Contribute to the proposal for a negotiated outcome for a given area of Country

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to contribute to the proposal for a negotiated outcome for a given area of Country.

This unit applies to those whose job role includes supporting and contributing to development proposals that relate to a given area of Country. It applies to individuals who demonstrate autonomy, judgement and limited responsibility for others in known or changing contexts.

All work is undertaken according to Community protocols.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Gather information to	1.1 Identify, gather, record and store information required to support

Element	Performance criteria
<p>support the proposal for a negotiated outcome for a given area of land</p>	<p>the proposal development</p> <p>1.2 Review legislation and government policies and plans of management relevant to the proposal</p> <p>1.3 Undertake consultation about the proposal with stakeholders, including Traditional Owners or custodians, community groups and other organisations involved in land and sea management in the specified area</p> <p>1.4 Identify areas of conflict between the different legislation and traditional customs and notify the proposal developer</p> <p>1.5 Define the scope of available alternatives for management and/or resolution of land, rivers, lakes and sea use issues</p> <p>1.6 Outline a description of the types of circumstances under which different alternatives can be applied</p> <p>1.7 Define processes that can be used to implement alternatives and relate to both mainstream ideas and culturally appropriate approaches for the area</p>
<p>2. Contribute to the development of the proposal</p>	<p>2.1 Identify, gather, record, store and analyse information relating to the expected outcomes of the proposal</p> <p>2.2 Identify, gather, record, store and analyse information relating to the proposal development</p> <p>2.3 Relate information about the expected outcomes of the proposal to stakeholders during proposal development process</p> <p>2.4 Identify main characteristics of any relevant State or Territory and Commonwealth Native Title Legislation and Lands Acts that apply to given area of Country</p> <p>2.5 Detail the implications of Native Title on given area of Country using appropriate formats</p>
<p>3. Provide feedback on the development of proposal</p>	<p>3.1 Provide oral or written feedback on the proposal to the proposal developer according to enterprise requirements</p> <p>3.2 Explain the proposal to key stakeholders using appropriate formats according to Community protocols</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCILM403 Contribute to the proposal for a negotiated outcome for a given area of Country

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- gather information to support the proposal for a negotiated outcome for a given area of land
- conduct culturally appropriate consultation with stakeholders
- determine the relevance and implications of applicable acts and legislation
- contribute to the development of the proposal
- provide feedback on the development of proposal

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant State land and sea resources acts and legislation
- relevant Local Government land and sea resources acts and legislation
- relevant Commonwealth land and sea resources acts and legislation
- roles of different organisations in land and sea management
- the existence of alternative forms of input and control in land and sea management

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM404 Record and document Community history

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to record and document Community history.

All work is done according to enterprise procedures and cultural protocols.

This unit applies to individuals who demonstrate autonomy, judgement and limited responsibility for others in known or changing contexts.

Cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for interviews with Community members	1.1 Determine purpose and objectives of interviews 1.2 Research background to topic and events 1.3 Identify people (narrators) who may be able to provide information on topic and events 1.4 Develop process for individual or group sessions with narrators according to topic and events to be covered 1.5 Develop and check basic questions for interviews with narrators 1.6 Obtain and check equipment, locations and other resources 1.7 Obtain permissions from Cultural Authority to conduct interviews about Community history and culture 1.8 Invite selected narrators
2. Conduct interviews with Community members	2.1 Explain oral history process to narrators to obtain their consent to record and use information provided 2.2 Set up and test recording equipment for operation 2.3 Identify recording media for later reference 2.4 Follow cultural protocols and use appropriate language 2.5 Use basic questions to initiate the interview 2.6 Take notes to identify supplementary questions and to support recording media 2.7 Manage interview process to obtain expected and unexpected information, including memories of incidents 2.8 Support narrator to express memories and opinions in an uncritical and positive setting 2.9 Provide positive feedback on the narrator's assistance 2.10 Manage the environment and distractions to maintain a positive response from the narrator 2.11 Manage session lengths to avoid tiring narrators and interviewer
3. Transcribe and edit information	3.1 Handle recorded media and transcripts to maintain recording quality and accuracy and security and privacy requirements 3.2 Transcribe interviews according to agreements with narrators 3.3 Provide draft written or oral transcripts to narrators for editing according to agreement with narrators 3.4 Complete editing according to narrator's wishes 3.5 Record and manage information on narrator's doubts or hesitancy on certain facts, and conflicting information between interviews

Element	Performance criteria
	separately from transcripts
4. Store records	4.1 Store recorded media and transcripts to maintain recording quality, accuracy, security and privacy requirements 4.2 Control access to records according to the narrator's wishes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM404A Record and document community history.

Assessment Requirements for AHCILM404 Record and document Community history

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record and document Community history in accordance with Community protocols and permissions
- prepare for interviews by identifying topics, people to be interviewed, questions and interview processes and checking equipment
- identify appropriate individuals or groups for interviews and obtain necessary permissions
- use communication skills and language appropriate to the interviewee
- set up all recording equipment according to enterprise procedures and needs of interview processes
- conduct either individual or group interviews to elicit a wide range of information
- take detailed notes of conversations for further reference and to help source supporting information
- transcribe and edit information, using supporting documentation where possible
- store recorded media and transcripts to maintain recording quality and accuracy and security and privacy requirements according to enterprise procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- background and context of subject areas covered in the interviews/sessions
- objectives of the natural and/or cultural resource research
- range of communication approaches
- relevant cultural protocols
- enterprise procedures relating to the recording, management and storage of oral and community information

- recording techniques and media
- set-up and use of microphones and video cameras
- use of still cameras
- Community protocols, customs and Cultural Authorities for recording cultural knowledge and history

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current Standards for RTOs.

AHCILM405 Develop work practices to accommodate cultural identity

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop work practices to accommodate cultural identity.

This unit applies to individuals who demonstrate autonomy, judgement and limited responsibility in known or changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate government policies and practices relating to Indigenous peoples since European settlement	1.1 Outline the intentions of government policies and practices since European settlement 1.2 Summarise the effects of these policies and practices on Aboriginal and Torres Strait Islander Communities 1.3 Outline how these policies and practices affected Community or

Element	Performance criteria
	family
2. Identify changes that have occurred in Indigenous societies	2.1 Summarise and document government policies operating since European settlement 2.2 Outline the changes that have occurred to Aboriginal and Torres Strait Islander societies as a result of policies and practices, the responses and the views of Indigenous groups 2.3 Describe the impacts of these changes on the Indigenous Community or family
3. Outline effects of current work related issues on Indigenous societies	3.1 Define key work related issues that impact on Aboriginal and Torres Strait Islander societies today 3.2 Describe and record the people involved in key issues 3.3 Summarise and record Community views on issues 3.4 Identify methods of addressing the keys issues 3.5 Predict the future outcomes or resolutions for these issues
4. Determine the impacts of competing factors on self-esteem and identity	4.1 Describe events and occurrences in everyday life that give rise to feelings of both positive and negative self-esteem for Indigenous personnel 4.2 Identify elements which affect self-esteem 4.3 Describe and record how these elements impact on self-esteem 4.4 Develop positive strategies for dealing with impacts on self-esteem and identity
5. Design work practices to accommodate cultural identity	5.1 Define and implement work practices which enhance individual's morale 5.2 Incorporate elements which affect self-esteem in work environments into the work practices 5.3 Consult staff in the preparation and design of these work practices according to Community and organisational protocols and guidelines 5.4 Develop positive strategies for dealing with work practices that impact on self-esteem and identity

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCILM405 Develop work practices to accommodate cultural identity

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- outline effects of current work related issues for Indigenous Communities and individuals
- determine the impacts of competing factors on self-esteem and identity
- design work practices to accommodate cultural identity
- incorporate elements to boost self-esteem of Indigenous workers
- respond to workplace issues where work practices are poorly aligned to cultural identity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Indigenous Communities with whom the organisation works, and their protocols
- cultural customs and heritage
- connections between self-esteem, identity, Community and work
- Indigenous history of particular Communities
- legislation and policies impacting on Indigenous Communities and organisations
- strategies to support development of workers' self-esteem and identity

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM501 Conduct field research into natural and cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct field research into natural resource and cultural areas for resource management and related purposes.

This unit applies to individuals who work autonomously and apply judgement and defined responsibility in known or changing contexts and within broad but established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Review existing knowledge	1.1 Examine existing information gathered through investigation and enterprise recording processes to determine key features 1.2 Review oral evidence, where it exists 1.3 Inspect sites to assess condition and availability of further information 1.4 Identify information, records and places previously destroyed or damaged or under threat as factors to be incorporated in the assessment process, strategies and plans 1.5 Assess scope of information for adequacy against the requirements of legislation, Codes of Practice, Burra Charter guidelines and protocols 1.6 Identify appropriate database, geographic information system and other electronic and manual recording systems for data collection 1.7 Identify and access sources of expertise in research environments, identification of pollution, degradation and disturbance, and national and international issues and agreements within and external to the enterprise 1.8 Identify and record areas of inadequate information
2. Identify stakeholders	2.1 Identify stakeholders in conjunction with local Communities and groups, and government documentation and interviews under the direction of a relevant cultural reference group 2.2 Investigate and record the current and relevant past land tenure for the place/area 2.3 Determine Indigenous interests through culturally appropriate approaches to regional and Community organisations and individuals 2.4 Apply proper protocols and conduct key consultations approaches to regional and Community organisations and individuals 2.5 Comply with privacy requirements according to the directions of stakeholders and legislative and enterprise requirements
3. Develop research approach	3.1 Determine objectives of the field research in conjunction with those commissioning the research 3.2 Use objectives to identify specific types of investigation, techniques to be used, and physical areas of investigation 3.3 Assess the types of investigation and techniques selected for hazards and risks in designated environment, including the work health and safety requirements, access issues, and management of the research in a range of weather and area conditions 3.4 Review existing information and data records to determine the starting points for the fieldwork 3.5 Ensure research methodology is consistent with the research objectives and in accordance with established natural resource

Element	Performance criteria
	<p>management practice</p> <p>3.6 Identify required resources to establish and maintain the research program within the required time schedules and ensure they are appropriate to the environments that will be encountered</p> <p>3.7 Select personnel for their competency in research techniques and safe operation in the expected environmental and cultural conditions</p> <p>3.8 Identify stakeholders to be included in the consultation process</p> <p>3.9 Estimate and submit costs of field research for approval</p> <p>3.10 Establish sampling and recording processes for research information according to best practice and scientific standards</p> <p>3.11 Ensure investigations comply with Burra Charter guidelines and other legislative requirements.</p>
4. Conduct field investigations	<p>4.1 Undertake consultation and fieldwork to obtain information required to meet investigation objectives</p> <p>4.2 Follow work health and safety, environmental sustainability and biosecurity policies and procedures when working in field</p> <p>4.3 Adjust previously determined methodology in light of progressive results and stakeholder feedback</p> <p>4.4 Coordinate observations, records and monitoring in accordance with scientific practice and to meet research objectives</p> <p>4.5 Determine ecological, biological and geological, microbiological and entomological diversity within specified area</p> <p>4.6 Identify and record evidence of cultural resources in area</p> <p>4.7 Identify impacts from areas external to natural and cultural resources in area under investigation</p> <p>4.8 Deploy equipment, techniques and people to carry out investigations</p> <p>4.9 Document and approve each field operation according to legislative and enterprise requirements for work in the research environment</p> <p>4.10 Source appropriate equipment and skills for the capture, management and sampling of animal species</p> <p>4.11 Analyse information for impact on previously held hypothesis and other resources</p>
5. Develop process for involving decision-makers	<p>5.1 Use information on stakeholders to determine interests held by organisations, groups and individuals and cultural dimensions</p> <p>5.2 Define issues to be addressed with interest groups</p> <p>5.3 Develop consultation and decision-making process to address the issues with individuals, groups and organisations in a culturally appropriate manner</p>

Element	Performance criteria
	5.4 Provide appropriate time for consultative processes within groups and between individuals to occur and to obtain feedback on issues 5.5 Form a decision-making group, such as cultural reference groups and other groups, where assistance is required to direct investigation, access information to address issues or review the significance of place or area
6. Report on the field investigation	6.1 Consult stakeholders on draft findings 6.2 Document the basis for the determination of outcomes to legislative requirements, the organisation's policies and practices, and international and national processes 6.3 Submit the determination of significance report to the organisation and its external review processes as required by legislation and Codes of Practice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM501A Conduct field research into natural and cultural resources.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCILM501 Conduct field research into natural and cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use a range of electronic and manual recording systems to support research
- identify stakeholders including current tenure, Indigenous history and community interest
- review existing knowledge of national and cultural resources and sites using literature reviews, site inspections, consultation and expert advice
- develop research objectives and research design
- coordinate staff and resources for research project
- conduct field investigations to investigate impacts on fauna, flora and natural resources of the site
- facilitate a consultation and decision-making process
- report on the field investigation to enterprise and legislative requirements
- apply work health and safety practices in field investigations
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of conservation legislation, charters, Codes of Practice relating to natural and cultural resource areas
- systems and processes for assessing significance
- ecology and biological diversity of the area under assessment, including aspects of living organisms, habitats and communities, and interactions between species
- geological diversity including aspects of stratigraphy, palaeontology, paedology, and soil classification of the area under assessment

- microbiology including entomology for the area under assessment
- accepted scientific processes, including conservation processes and charters
- major impacts on natural resources, such as geological settings, ecological processes, and interaction between natural and cultural processes
- monitoring requirements including fabric deterioration, damage and likely causes of deterioration and damage
- relevant legislation and agreements that apply to area, including a good understanding of the concepts and potential operation of the Burra Charter
- legislation under which enterprise operates and research is commissioned

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM502 Develop conservation strategies for cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop conservation strategies for cultural resources.

This unit applies to those who develop conservation strategies and management policies for cultural resources as part of the overall park management and planning process. These individuals take responsibility for their own work and who provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define components of cultural heritage significance	1.1 Define geographic and operational boundaries for conservation policy 1.2 Review and collate results of studies of cultural significance for

Element	Performance criteria
	<p>places and areas within the boundaries to develop park, reserve or region significance</p> <p>1.3 Develop limits of acceptable change in the forms of deterioration and damage to the places of cultural significance to legislative and enterprise requirements</p>
2. Review past strategies, plans and activities	<p>2.1 Compare previous strategies and plans with collated assessment of significance to determine compatibility</p> <p>2.2 Review current activities in the area to assess their compatibility with the collated assessment of significance</p> <p>2.3 Document areas of incompatibility</p>
3. Review current and potential resource uses	<p>3.1 Assess impact of current uses of the cultural resources against the set limits of acceptable change to determine success of conservation approach</p> <p>3.2 Assess feasible uses of resources against client requirements</p> <p>3.3 Develop possible changes to resource use to ensure sustainability of cultural values and environment</p>
4. Identify threats to cultural places	<p>4.1 Identify threats to cultural significance and the environment both external and internal to the area under consideration</p> <p>4.2 Make a risk assessment of all threats to determine potential impact on strategies</p> <p>4.3 Document policy changes required to address the threats</p>
5. Develop strategies for management of cultural resource	<p>5.1 Develop draft policy to address the cultural significance that meets any shortfalls in previous strategies, allows for compatible resource uses and addresses risks associated with any threats to the cultural values of the area</p> <p>5.2 Review policy to ensure compliance with Burra Charter guidelines</p> <p>5.3 Conduct consultations with stakeholders on draft policy in accordance with legislative, enterprise and good practice requirements</p> <p>5.4 Ensure consultations comply with cultural protocols and enterprise approaches to stakeholders</p> <p>5.5 Finalise management strategies to reflect stakeholder views as required in legislation, government policies, enterprise strategies and procedures, and environmental sustainability requirements</p> <p>5.6 Submit strategies for approval to legislative and enterprise requirements</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCILM502 Develop conservation strategies for cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review the cultural resources in the area and level of deterioration
- assess the compatibility of current utilisation with cultural and heritage values
- investigate feasible land uses that maintain the cultural integrity of the site
- carry out a risk assessment for damage/deterioration to cultural sites
- consult with stakeholders according to cultural protocols
- develop strategies for management of cultural resources that take into account cultural and environmental requirements
- apply cultural protocols to investigation and development of policies
- apply enterprise policies and procedures to undertake assessment of resources, consultation with stakeholders and development of new policies
- apply appropriate sustainability practices to management strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the range of conservation strategies for cultural areas
- policies from all levels of government and within the specific region, including those under catchment plans that apply to land management practices
- the application and interpretation of Australian Natural Heritage Charter and the Burra Charter and the interpretation of the charters as they apply to use of cultural resources
- enterprise policies and procedures for carrying out investigations, consultations and development of policies
- design and implementation of consultation processes
- policy analysis and impact statements

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM503 Manage restoration of cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the restoration of cultural places.

This unit applies to individuals who work autonomously and apply judgement and defined responsibility in known or changing contexts and within broad but established parameters. Individuals are required to manage large teams and projects.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan required restoration measures	1.1 Access prior assessment of cultural significance of place to determine range of actions 1.2 Develop short term plan of management and conservation from area strategies and plans according to legislative requirements, enterprise procedures and national and international charters

Element	Performance criteria
	1.3 Research traditional building techniques, materials and material availability to plan maintenance of fabric in traditional styles 1.4 Identify any prior works not in keeping with significance to determine appropriate maintenance actions 1.5 Determine any necessary structural engineering maintenance with experts to incorporate actions into maintenance schedule 1.6 Develop maintenance schedule to meet plan of management and conservation 1.7 Make submissions to obtain appropriate funds to complete works 1.8 Plan restoration work 1.9 Review plans to ensure compliance with Burra Charter guidelines and other legislative requirements
2. Manage restoration works	2.1 Obtain expert advice on specific maintenance works and contracts to meet requirements of management and conservation plans 2.2 Specify special building and conservation requirements in maintenance documentation to maintain significance, and use traditional building techniques, where appropriate 2.3 Supervise workers and contractors to ensure risk assessment is undertaken and work health and safety policies and procedures are followed 2.4 Inform and supervise workers to ensure significance of place is maintained and no damage or degradation is caused to environment
3. Clean-up after work	3.1 Supervise workers to ensure no damage is caused to surrounds, environment, fabric or building 3.2 Supervise workers to ensure work health and safety policies and procedures are followed 3.3 Supervise workers to remove materials, equipment and tools from place on completion of work

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM503A Manage restoration of cultural places.

Assessment Requirements for AHCILM503 Manage restoration of cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- incorporate the prior assessment of significance into an operational plan
- research traditional building techniques to carry out repairs and maintenance
- seek expert advice to meet special building and conservation requirements from the plan of management
- maintain the cultural and environmental integrity of the site and surrounds during and on completion of building
- supervise the work of others to ensure compliance with restoration plan and requirements
- apply work health and safety practices in the context of own work and the work of others
- apply environmentally sustainable practices in maintenance and restoration works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant concepts of the Burra Charter, heritage and building acts, and other relevant legislation
- conservation architecture techniques applicable to the restoration of cultural places
- interpretation of archaeological reports or assessments of Aboriginal cultural sites and artefacts
- traditional and current building practices
- project management processes
- building or maintenance requirements and specifications
- work health and safety requirements and risk management practices

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM504 Develop strategies for Indigenous land or sea management

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop strategies for contemporary land or sea management from an Indigenous perspective.

All work is undertaken according to Community guidelines and cultural protocols.

This unit applies to individuals who work autonomously and apply judgement and defined responsibility in known or changing contexts and within broad but established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research contemporary	1.1 Outline relevant contemporary Indigenous land and sea management practices

Element	Performance criteria
Indigenous land and sea management practices	1.2 Define relevant issues connected with this practice 1.3 Consult relevant and appropriate people 1.4 Identify associated issues related to contemporary Indigenous land and sea management practices 1.5 Document details of consultation and research
2. Develop management strategies for a specified area	2.1 Base strategies on contemporary Indigenous land and sea management practices, incorporating biosecurity measures, and environmentally sustainable practices 2.2 Identify priorities for management according to level of importance or threats to area 2.3 Develop new approaches to management to address priorities within the context of legislation, cultural protocols and Community needs 2.4 Develop timelines and steps for implementation of strategies 2.5 Define costs of resources, labour and materials required to action management strategies 2.6 Complete preliminary project design to identify project steps and funding requirements 2.7 Make arrangements for project implementation to enterprise requirements and legislation
3. Source and apply for funds	3.1 Identify appropriate funding sources 3.2 Make applications for funds according to legislative, Community and enterprise requirements 3.3 Ensure applications are endorsed by appropriate persons before submission
4. Consult with others on strategies, priorities and project work	4.1 Brief authorised persons on the strategies, priorities and actions planned 4.2 Train staff in new procedures developed to address strategies 4.3 Implement work health and safety policies and procedures to ensure the safety of self and staff 4.4 Develop project implementation plan in consultation with staff, appropriate persons and communities 4.5 Obtain endorsement from appropriate persons, groups and communities, and relevant government stakeholders before works start

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCILM504 Develop strategies for Indigenous land or sea management

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research contemporary Indigenous land and sea management practices
- develop management strategies for a specified area based on contemporary Indigenous land and sea management practices
- identify appropriate source of funds and apply for funds according to organisational requirements
- consult with others on strategies, priorities and project works
- develop plans to enterprise standards
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the management strategies
- apply appropriate sustainability practices in the management strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Indigenous land/sea management practices
- cultural customs and heritage
- components of State land acts/legislation relevant to Indigenous land or sea management
- relationship between natural and cultural management processes

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for basic electric fencing operations	1.1 Confirm work instructions with supervisor 1.2 Identify health and safety hazards and risks in the workplace and report to supervisor 1.3 Select tools and equipment appropriate to meet job requirements 1.4 Carry out routine pre-operational checks of tools 1.5 Identify faulty or unsafe tools and segregate for repair or replacement 1.6 Select, check and fit appropriate personal protective equipment
2. Perform basic electric fencing operations	2.1 Identify and recover re-useable electric fencing materials 2.2 Identify and carry out repair requirements according to instructions 2.3 Calculate electric fencing wire requirements 2.4 Erect electric fences to contour 2.5 Install electric fence components according to manufacturer instructions
3. Complete basic electric fencing operations	3.1 Fill post holes to remove potential hazards and minimise environmental impact according to workplace procedures 3.2 Clear and tidy work site and dispose of all non-reusable materials according to environmental procedures 3.3 Transport and store tools and re-usable materials 3.4 Report on further work or repair requirements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reads and interprets workplace instructions to formulate an understanding of expected requirements and activity
Numeracy	<ul style="list-style-type: none"> Determine fencing resources and measurements to construct

Skill	Description
	fencing
Oral Communication	<ul style="list-style-type: none"> Uses concepts and terminology appropriate for clarifying instructions and communicating with supervisor
Navigate the world of work	<ul style="list-style-type: none"> Complies with explicit policies and procedures. Seeks clarification or assistance when required
Get the work done	<ul style="list-style-type: none"> Plans and implements routine tasks and workload making limited decisions on sequencing and timing Responds to predictable routine problems and implements standard or logical solutions

Assessment Requirements for AHCINF201 Carry out basic electric fencing operations

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have carried out basic electric fencing operations, including:

- identified health and safety hazards and risks and reported to supervisor
- interpreted work plans and confirmed with supervisor
- selected electric fencing tools and equipment and carried out pre-operational checks and replaced or repaired identified faulty equipment
- selected, checked and correctly fitted personal protection equipment (PPE)
- calculated and measured electric fencing wire requirements
- identified and recovered useful electric fencing materials
- erected and repaired electric fencing according to instructions
- minimised environmental impact
- cleaned and tidied up work area, stored tools and equipment and disposed of waste according to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- uses and structures of electric fence types
- uses and types of standard fencing tools, materials and their maintenance and storage
- common electric fencing hazards and safety
- portable and mains power electric fences

- installation, construction and repair techniques for electric fences
- estimating and calculating electric fencing requirements
- relevant work health and safety and environmental code of practice for electric fencing
- health and safety in the workplace, including:
 - PPE required for working on electric fences
- environmental considerations when disposing of waste materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an outdoor environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - electric fencing materials, tools and equipment
 - PPE
- specifications:
 - workplace documents, including procedures, processes, instructions and job specifications
 - manufacturers' operating instructions for fencing equipment
 - legislation/codes of practice for fencing
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCINF202 Install, maintain and repair farm fencing

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to install, maintain and repair farm fencing using appropriate tools and techniques.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for farm fencing work	1.1 Confirm work instructions with supervisor 1.2 Identify health and safety hazards and risks in the workplace and report to supervisor 1.3 Select tools and equipment according to job requirements 1.4 Carry out routine pre-operational checks of tools 1.5 Identify faulty or unsafe tools and segregate for repair or replacement 1.6 Select, check and fit appropriate personal protective equipment (PPE) 1.7 Arrange transport of fencing materials, tools and equipment to worksite
2. Undertake farm fence installation	2.1 Install and secure posts and stays according to work instructions 2.2 String and tension wire according to job requirements and wire specifications 2.3 Attach wire netting or other fencing materials according to work instructions 2.4 Position and attach gates and check their operation according to manufacturers' instructions
3. Maintain and repair farm fencing	3.1 Identify faults or structural damage and carry out necessary repairs 3.2 Dismantle fences and recover re-useable materials 3.3 Identify and report further maintenance or repair works according to workplace procedures 3.4 Pack for reuse, or dispose of, used fencing material
4. Complete farm fencing work	4.1 Clear and tidy work area and dispose of all waste according to environmental procedures 4.2 Clean and store tools, PPE and re-useable materials according to workplace procedures 4.3 Complete records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reads and interprets workplace instructions to formulate an understanding of expected requirements and activity

Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have installed and maintained farm fencing, including:

- identified health and safety hazards and risks and reported to supervisor
- selected, checked and correctly fitted personal protective equipment (PPE)
- selected materials, tools and equipment and arranged for availability on site
- conducted pre-operational checks and repaired or replaced tools and equipment identified with faults
- assessed and confirmed farm fencing requirements and confirmed with supervisor
- dismantled and recovered usable materials from existing fence
- installed and repaired fence posts and stays, erected fences, installed and tensioned fencing wire and netting, installed and checked gates and components
- recorded work activities according to work instructions
- cleaned up the fencing site and removed and disposed of, or recycled, waste according to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- designs and purpose of a range of conventional fencing
- wire types, knots, tensions applications and limitations
- common hazards involved in fencing installation, maintenance and repair

- tools and equipment used for fencing and their safe operation, storage and maintenance
- fencing materials manufacturers specifications and guidelines
- health and safety in the workplace, including:
 - PPE required for working on farm fences
- environmental considerations when disposing of waste materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an outdoor environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fences, fencing tools, materials and equipment
 - PPE
- specifications:
 - workplace documents including procedures, instructions and wire specifications
 - manufacturers' operating instructions for fencing equipment
 - legislation/codes of practice for fencing
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCINF203 Maintain properties and structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and repair properties and structures in situations that don't require the specialist skills of another trade.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and confirm maintenance	1.1 Confirm work instructions with supervisor

Element	Performance criteria
requirements	1.2 Identify hazards and report to supervisor 1.3 Select and fit appropriate personal protective equipment 1.4 Inspect structures and facilities to locate and evaluate defects, deterioration and impending defects 1.5 Check property infrastructure and resources for correct operation, minor maintenance needs and damage 1.6 Confirm maintenance plan
2. Select and prepare tools, equipment and materials	2.1 Select and check tools, equipment and materials for serviceability 2.2 Identify and segregate for repair or replacement faulty or unsafe tools 2.3 Identify, assess and report existing and potential hazards to health and safety 2.4 Select and fit personal protective equipment
3. Carry out routine maintenance	3.1 Carry out routine maintenance to infrastructure, structures and facilities 3.2 Carry out minor repairs to building cladding and paint
4. Complete maintenance activities	4.1 Clean, maintain and store worksite, tools and materials 4.2 Collect, treat and dispose of or recycle unwanted materials and waste from maintenance activities 4.3 Complete workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCINF203A Maintain properties and structures.

Assessment Requirements for AHCINF203 Maintain properties and structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed and repairing properties and structures, in a situation that does not require the specialist skills of another trade.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- interpret and apply task instructions
- communicate with work team and supervisor
- select, prepare and safely use of a broad range of tools
- carry out routine maintenance to infrastructure, structures and facilities
- store or dispose of unused or waste materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics, capabilities and limitations of materials, equipment and tools
- operation of water taps and reticulation systems
- types of building cladding and finishes, purpose and use
- identification of defects and appropriate repair methods
- appropriate selection of repair materials
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice and procedures with regard to protection of the environment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCINF301 Implement property improvement, construction and repair

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- identify and report hazards and use safe work practices
- confirm work plan and priorities with enterprise supervisor or manager
- assess the nature of required repairs and maintenance
- read and interpret maps, plans, site drawings and simple technical drawings
- carry out building or construction work efficiently and safely
- confirm that the completed or repaired structure meets the standard specified
- operate a broad range of tools and equipment
- complete minor earthworks to specifications
- minimise environmental impacts and dispose of waste appropriately
- estimate and calculate volumes, usage and measurements
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- machinery and equipment required to carry out property improvements, construction and repairs
- types of building materials required to carry out property improvements, construction and repairs
- concreting procedures and techniques
- wood and steel fabrication procedures
- drainage requirements around structures, tracks and roads
- legislative requirements with regard to construction and structural improvements

- types of building cladding and finishes, purpose and use
- relevant Codes of Practice with regard to protection of the environment
- work health and safety and environmental legislative and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCINF302 Plan and construct an electric fence

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, construct and maintain an electric fence.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine electric	1.1 Access property maps and assess fencing requirements according

Element	Performance criteria
fencing requirements	to enterprise objectives and legislative requirements 1.2 Determine equipment, materials and labour requirements and ensure estimated costings are within budgetary constraints 1.3 Compare alternative electric fencing options to ensure cost-effectiveness 1.4 Prepare fencing plan giving consideration to siting fences in relation to natural features and proposed uses
2. Prepare for construction	2.1 Seek clarification of work plan 2.2 Organise and transport tools and equipment to the work site 2.3 Confirm and arrange labour requirements if required 2.4 Assess risk and minimise potential and existing hazards appropriately
3. Construct electric fence	3.1 Select, use and maintain suitable personal protective equipment 3.2 Construct electric fence according to work plan 3.3 Attach and position gates for correct operation and function 3.4 Install energiser according to manufacturer's specifications.
4. Complete fencing operations	4.1 Check fencing for correct installation and performance 4.2 Identify and fix electric fence faults 4.3 Clear and tidy work site and dispose of all waste in an environmentally responsible manner 4.4 Transport tools and fencing equipment from the work site and check and store 4.5 Record and maintain relevant information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCINF302A Plan and construct an electric fence.

Assessment Requirements for AHCINF302 Plan and construct an electric fence

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop an electric fencing plan for the enterprise
- identify hazards and implement safe operating procedures
- calculate and measure fencing requirements and calculate costings off the fencing plan
- read and interpret plans and site maps and mark out fence lines
- construct an electric fence that meets specifications and the needs of the enterprise
- operate fencing tools and construction equipment
- test and monitor the electric fence for earthing and current flow, resistance and leakage
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic operation of electric fences including earthing and current flow, resistance and leakage
- differences between portable and mains power
- issues affecting electric fencing in relation to the whole property plan
- range of electric fencing designs, construction methods and materials
- dangers posed by electricity to personnel and livestock
- conditions under which electric fences may cause fire
- safe methods for diagnosing routine faults
- common electric fencing hazards and safety precautions
- relevant State/Territory legislation and regulations regarding electric fences
- work health and safety legislative requirements

- relevant codes of practice with regard to protection of the environment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCINF303 Plan and construct conventional fencing

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- site the fence line according to property or land management plan
- estimate, cost and source fencing materials and arrange delivery
- identify hazards and implement safe work practices
- carry out fencing operations safely and efficiently
- construct a fence that meets specifications in plan or contract and is within tolerances for materials
- construct gate assemblies and swing gates
- string and strain wires to manufacturer's recommended tension
- use and maintain fencing machinery and equipment
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues affecting property fence planning and construction
- procedures for planning fencing in relation to the whole property plan
- range of fencing designs, construction methods and materials
- types of fencing construction tools and equipment
- fencing materials and costings
- common fencing hazards and safety precautions
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice with regard to the protection of the environment
- hazard identification, assessment and control

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCINF304 Install and terminate extra low voltage wiring systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install wiring enclosures, cable support systems, cables and accessories in electrical systems of 36 volts or less.

All work must be carried out to comply with workplace procedures, work health and safety requirements, relevant legislation and codes and manufacturer's specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan and prepare for installation of extra low voltage wiring	1.1 Plan and prepare installation to ensure policies and procedures are followed, and the work is appropriately sequenced according to requirements 1.2 Consult with appropriate personnel to ensure the work is co-ordinated effectively with others on the work site 1.3 Size cables and wires to suit calculated load 1.4 Check wiring system components against job requirements 1.5 Source accessories according to established procedures and to comply with organisational and task requirements 1.6 Determine location in which specific items of accessories, apparatus and circuits are to be installed from job requirements 1.7 Obtain materials necessary to complete the work according to established procedures and checked against the job requirement 1.8 Source tools, equipment and testing devices needed to carry out the installation work, checked for correct operation and safety 1.9 Check preparatory work to ensure that it complies with requirements and no unnecessary damage has occurred
2. Install wiring systems	2.1. Follow work health and safety policies and procedures for installing electrical wiring systems 2.2. Install wiring systems to meet requirements without damage or distortion to the surrounding environment or services 2.3. Terminate accessories and connect wire as required to solenoids and controllers, according to manufacturer and enterprise requirements 2.4. Respond to unplanned events or conditions using established procedures 2.5. Obtain approval from appropriate personnel according to established procedures before any contingencies are implemented 2.6. Undertake on-going checks of the quality of the work according to established procedures
3. Check and notify completion of work	3.1. Undertake final checks to ensure the installed wiring systems conform to requirements 3.2. Test system is to ensure that it works 3.3. Notify work completion according to established procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTEQ301A Install and terminate extra low voltage wiring systems.

Assessment Requirements for AHCINF304 Install and terminate extra low voltage wiring systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe systems of work
- read labels and signage to differentiate between extra low voltage and other electrical systems
- read and follow manufactures manuals and enterprise procedures for extra low voltage wiring
- size cables and wires to suit calculated load
- install wiring systems
- check and notify completed installation activities
- follow enterprise work health and safety procedures and safely work with extra low voltage systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic electricity and electrical principles relating to extra low voltage wiring
- applications, materials and techniques relevant to the industry sector
- isolation and tagging procedures
- computerised controller systems
- enterprise policies and procedures
- testing equipment and procedures
- relevant legislation and guidelines for installing extra low voltage wiring.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK101 Support extensive livestock work

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to analyse and interpret animal, crop and horticultural production data.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who take responsibility for their own work. They undertake a range of routine and non-routine activities and work in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials, tools and equipment for extensive livestock work	<p>1.1 Identify the required materials, tools and equipment using provided lists and supervisor's instructions</p> <p>1.2 Carry out checks on all materials, tools and equipment and report insufficient or faulty items to the supervisor</p> <p>1.3 Use safe manual handling techniques when loading and unloading materials and equipment</p> <p>1.4 Select and use suitable personal protective equipment (PPE) and check prior to use</p> <p>1.5 Identify hazards and report to supervisor</p>
2. Undertake extensive livestock work as directed	<p>2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary</p> <p>2.2 Carry out work in a safe and environmentally appropriate manner</p> <p>2.3 Interact with other staff and customers in a positive and professional manner</p> <p>2.4 Report problems or difficulties in completing work to required standards or timelines to supervisor</p> <p>2.5 Carry out livestock handling and husbandry activities in line with enterprise animal welfare policies</p>
3. Handle materials and equipment	<p>3.1 Store waste material produced during work in a designated area according to supervisor's instructions</p> <p>3.2 Handle and transport materials, equipment and machinery appropriately</p> <p>3.3 Maintain a clean and safe work site</p>
4. Clean up on completion of work	<p>4.1 Return materials to store or dispose of appropriately</p> <p>4.2 Clean, maintain and store tools and equipment</p> <p>4.3 Report work outcomes to supervisor</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels and work health and safety symbols
- use safe animal handling techniques
- use livestock handling tools and equipment
- assist in monitoring livestock health and welfare
- provide assistance to repair and maintain facilities
- follow work health and safety policies
- follow enterprise animal welfare and sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- safe work practices
- animal handling techniques including animal welfare requirements
- tools and equipment
- repair and maintenance of facilities
- work health and safety and environmental protection legislation and enterprise procedures.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK102 Support intensive livestock work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support to others undertaking intensive livestock production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy. They undertake defined routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for intensive livestock	1.1 Identify required materials, tools and equipment from lists and instructions provided by enterprise and supervisor

Element	Performance criteria
work	1.2 Carry out checks on all materials, tools and equipment and report insufficient or faulty items to the supervisor 1.3 Use safe manual handling techniques when loading and unloading materials and equipment 1.4 Select, check and use suitable personal protective equipment (PPE) 1.5 Identify work health and safety hazards and report to or seek support from supervisor
2. Undertake intensive livestock work as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Carry out work in a safe and environmentally appropriate manner 2.3 Carry out livestock work in line with enterprise animal welfare policies 2.4 Interact with other staff and customers in a positive and professional manner 2.5 Report problems or difficulties in completing work to required standards or timelines to supervisor
3. Handle materials and equipment	3.1 Store waste material produced during work in a designated area according to supervisor's instructions 3.2 Handle and transport materials, equipment and machinery appropriately 3.3 Maintain a clean and safe work site
4. Clean up on completion of work	4.1 Return materials to store or dispose of appropriately 4.2 Clean, maintain and store tools and equipment appropriately 4.3 Report work outcomes to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK102 Support intensive livestock work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow work health and safety procedures and instructions provided by enterprise and supervisor
- prepare materials, tools and equipment for intensive livestock work
- undertake intensive livestock work as directed
- handle materials and equipment appropriately
- clean up on completion of work appropriately
- follow enterprise environmental, animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare and biosecurity requirements and sustainability practices
- materials, tools and equipment used for intensive livestock work
- safe manual handling techniques for loading and unloading materials and equipment
- use, maintenance and storage of appropriate Personal Protective Equipment
- animal handling techniques including animal welfare
- positive and professional communication
- methods of waste storage
- handling and transportation of materials, equipment and machinery
- methods for maintenance of a clean and safe work site
- storage of materials
- cleaning, maintenance and storage of tools and equipment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK201 Assist with feeding in a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with the process of preparing and providing feed and water for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and distribute	1.1 Check requirements for the daily feeding program with supervisor

Element	Performance criteria
feed	1.2 Identify hazards and report to supervisor 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select and check tools, machinery and equipment for readiness 1.5 Provide assistance for weighing and measuring feed 1.6 Load feed into trolleys from silos or other storage bins and distribute feed 1.7 Check automatic or computerised feeders, where used, for blockages and correct functioning 1.8 Report abnormalities or irregularities with feed stocks to supervisor
2. Check watering systems	2.1 Adjust watering systems for height or position where appropriate 2.2 Check water level and flow and make adjustments accordingly 2.3 Empty and clean watering containers or lines where necessary
3. Keep workplace records	3.1 Keep basic feeding records and report to supervisor 3.2 Clean, maintain and store tools, machinery and equipment 3.3 Apply enterprise biosecurity and environmental policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK201 Assist with feeding in a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- identify a range of feed types and qualities
- identify feed contaminants
- prepare and distribute feed
- check watering systems
- recognise and rectify minor operational faults
- interpret and apply task instructions, communicate with work team and supervisor and record and report faults, workplace hazards and accidents
- complete records and documentation of feed use and volumes for the enterprise section
- use machinery and equipment associated with providing feed
- report on feeding to supervisors
- follow enterprise work health and safety policies
- follow enterprise biosecurity and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- silo operations, tractors and associated feeding machinery and equipment
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures
- common grains, meals, pelleted and liquid feeds
- evidence of spoilage and handling of spoilt feeds
- enterprise work health and safety, biosecurity and environmental policies

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK202 Care for health and welfare of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Discuss work requirements with supervisor and seek clarification where necessary 1.2 Identify work health and safety risks and inform supervisor 1.3 Prepare and use suitable personal protective equipment 1.4 Select and prepare appropriate tools and equipment
2. Monitor and assess livestock health and welfare	2.1 Check livestock regularly to assess health and welfare 2.2 Recognise and report symptoms of injuries, ill health or abnormal behaviour 2.3 Handle livestock in line with enterprise animal welfare policies
3. Implement livestock health and welfare procedures	3.1 Follow quarantine and biosecurity procedures as instructed to minimise the risk of disease 3.2 Maintain thorough personal hygiene practices in all activities associated with handling livestock to reduce risks from diseases that are transmissible to humans 3.3 Treat sick and injured livestock or make arrangements to humanely destroy livestock if necessary 3.4 Recognise environmental implications associated with livestock husbandry practices and follow relevant procedures 3.5 Follow the regulations and codes of practice appropriate for the industry 3.6 Follow enterprise animal welfare emergency procedures where required
4. Administer drenches, vaccines and prescribed treatments to livestock	4.1 Prepare livestock treatment site and facilities 4.2 Prepare livestock treatments 4.3 Move, yard and control livestock and inspect for treatment requirements 4.4 Use safe work practices with regard to livestock handling 4.5 Administer treatment if required as instructed or under supervision
5. Monitor treated livestock and maintain records	5.1 Monitor livestock post-treatment for signs of treatment effectiveness 5.2 Recognise and report livestock health and condition abnormalities 5.3 Record disease incidence, livestock losses, and treatments 5.4 Report post-treatment information to the supervisor so that prevention strategies can be planned and implemented

Element	Performance criteria
6. Complete work	6.1 Dispose of treatment materials appropriately 6.2 Clean, maintain and store equipment, materials and facilities 6.3 Dispose of livestock residues and waste in an environmentally responsible manner

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK202 Care for health and welfare of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle livestock safely and humanely
- monitor and assess livestock health and welfare
- select, use and maintain specialised animal health equipment
- prepare treatment site, facilities and equipment
- administer treatments to livestock
- monitor the effectiveness of treatments and report issues
- keep and maintain records
- dispose of unused treatments safely and in an environmentally correct manner
- recognise ill health and abnormal behaviour in livestock
- recognise fear and aggressive behaviour in livestock
- recognise heat stress
- follow enterprise animal welfare emergency procedures
- follow enterprise work health and safety policies
- follow enterprise biosecurity, animal welfare and sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water quality and animal requirements
- feed requirements and quality
- workplace biosecurity and euthanasia procedures
- safe handling of sick and dead livestock
- livestock handling principles and livestock behaviour

- signs of heat stress
- symptoms of ill-health in livestock
- the range of common diseases affecting livestock
- vaccination programs
- relevant legislation and regulations relating to waste and environment management, livestock health, stock medicines and animal welfare
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK204 Carry out regular livestock observation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out regular livestock observation.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with livestock	1.1 Discuss work to be undertaken with supervisor and seek clarification where necessary 1.2 Discuss tasks with other workers who may be affected to ensure continued smooth operation of the process 1.3 Select and check tools and equipment suitable for the work to be undertaken and maintain if necessary 1.4 Select, use and maintain suitable personal protective equipment in line with work health and safety policies 1.5 Identify hazards and report to supervisor
2. Carry out livestock checks	2.1 Check livestock for signs of illness, injuries and abnormalities and report to supervisor 2.2 Use safe handling techniques while handling livestock 2.3 Carry out all husbandry and handling activities in line with enterprise animal welfare policies
3. Deal with livestock emergencies	3.1 Follow enterprise biosecurity policies where required 3.2 Recognise common signs of livestock injury or life threatening conditions and report to supervisor 3.3 Use basic emergency and livestock first aid procedures until professional help arrives 3.4 Report serious cuts and abrasions to livestock to the supervisor or veterinarian
4. Provide veterinary procedure support	4.1 Treat cuts, abrasions and bruises under instruction from the veterinarian or supervisor 4.2 Examine animals for signs of distress, injury, illness and abnormal behaviours after completing procedures and report to supervisor 4.3 Apply appropriate treatment as instructed by a supervisor or veterinarian

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK204 Carry out regular livestock observation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe operating procedures
- check livestock regularly
- handle livestock safely and humanely
- identify signs of ill health, injury and abnormality
- identify symptoms of ill health or injury
- deal efficiently and calmly with livestock emergencies
- complete basic livestock first aid procedures
- record and report serious issues or injuries.
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- range of ailments that may occur or affect livestock
- application of a range of basic treatments under veterinary supervision
- behaviour of the relevant species
- environmental controls and codes of practice applicable to the enterprise
- organisations livestock production and management plans
- relevant work health and safety legislative requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK205 Handle livestock using basic techniques

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare handling areas, gates and access routes for livestock movement
- monitor and anticipate livestock behaviour
- recognise enterprise livestock identification systems
- identify and draft livestock during handling operations
- move and control livestock using low stress livestock handling techniques
- minimise undue stress and risk to livestock and handlers
- recognise livestock abnormalities
- assess, calculate and record livestock numbers
- control the environmental impacts associated with livestock production within the limitations of own responsibility
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production
- regulatory controls with regard to handling livestock on public roads where required
- common livestock breeds

- basic nutritional and welfare requirements
- range of common livestock abnormalities, illnesses and injuries and associated signs
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to identify and mark animals	1.1 Select and check appropriate equipment for correct operation, and maintain or replace as required 1.2 Select appropriate materials and ensure adequate quantities for required task 1.3 Identify, clean and prepare suitable marking sites and facilities 1.4 Prepare and ensure adequate quantities of animal preventative health treatments as instructed 1.5 Identify hazards, control risks as appropriate and report to supervisor 1.6 Select, use and maintain suitable personal protective equipment
2. Identify and mark animals	2.1 Muster animals and identify, draft and move young animals to marking site in readiness for identifying and marking 2.2 Carry out animal identifying and marking operations in line with enterprise animal welfare policies 2.3 Carry out contingency plans as instructed in the event of adverse weather conditions 2.4 Identify environmental implications associated with enterprise operations for identifying and marking animals and report to the supervisor
3. Complete identifying and marking operation	3.1 Keep tally or record animal numbers as required during operations and assist to conduct and record animal counts at completion of tasks 3.2 Prepare animals and move along a planned route without damage to person, livestock, property or environment 3.3 Clean, maintain and store equipment, materials and facilities 3.4 Report equipment faults or malfunctions 3.5 Dispose of animal residues and waste appropriately 3.6 Monitor livestock behaviour and wellbeing post-operations, and mother-up young animals if required 3.7 Apply enterprise biosecurity and environmental policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK206 Identify and mark livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, control risks and implement safe operating procedures
- prepare and maintain appropriate identifying and marking sites and facilities to industry standards
- handle animals in a safe and humane manner in line with enterprise and industry animal welfare policies
- operate and maintain equipment
- determine identifying and marking methods
- carry out identifying and marking operations
- monitor animal's behaviour post-marking for health and well-being, mother-up animals and their young if required
- apply contingency measures in the event of adverse weather conditions
- tally, count, calculate and record animal numbers during marking operations if required
- demonstrate safe and environmentally responsible workplace practices
- follow enterprise work health and safety policies
- follow enterprise biosecurity and environmental policies as required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- components and functions of animal handling equipment
- animal marking methods and identification systems
- animal preventative health requirements and procedures
- relevant livestock behaviour
- basic livestock health and nutritional requirements

- environmental codes of practice with regard to animal production
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK207 Load and unload livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to load and unload animals for transport.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check facilities and equipment for sound working conditions	1.1 Identify facilities and equipment required for the task and confirm with supervisor 1.2 Prepare loading facilities and equipment according to enterprise procedures 1.3 Check the work site, facilities and equipment for hazards and operation, control risks where appropriate and report safety concerns to supervisor 1.4 Carry out or organise repairs and maintenance of facilities and equipment required for loading or unloading livestock where necessary 1.5 Select appropriate personal protective equipment and ensure correct fit
2. Load animals	2.1 Identify, muster, yard or secure animals using safe working methods in line with enterprise animal welfare policies 2.2 Inspect animals for signs of ill health, injury or abnormal behaviours and separate animals unsuitable for transport 2.3 Prepare animals for transport 2.4 Record identification details of animals and fit individual animal tags as required 2.5 Count, record and load livestock safely and with minimal stress to ensure no injury to co-workers or animals in line with enterprise animal welfare policies 2.6 Complete vendor declarations and any other required documentation
3. Unload animals	3.1 Unload livestock in a safe manner to ensure no injury to other workers or animals 3.2 Record numbers and individual identification details of livestock 3.3 Inspect livestock for signs of ill health, injury or abnormal behaviours and report to appropriate persons 3.4 Check documentation and reach agreement on condition of animals with the receiving or dispatching party where required
4. Perform appropriate animal health procedure	4.1 Sort stock, and separate distressed, injured or ill livestock if required 4.2 Undertake animal health treatments off truck if required 4.3 Feed and water animals as instructed 4.4 Apply enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK207 Load and unload livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check loading facilities for correct operation and hazards to animals and workers
- sort livestock as required and separate unsuitable animals for transport
- load and unload livestock
- anticipate animal behaviour
- provide and maintain appropriate animal feed and water
- complete relevant documentation and affix individual tags if required
- monitor animal health and welfare
- read and interpret mustering, work and loading plans and maps
- calculate animal numbers to assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity policies as required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal handling and movement methods and techniques
- basic animal health and nutritional requirements
- animal herding and flocking behaviour
- techniques and uses of working dogs where appropriate
- types of animal health treatments that may be required
- common diseases and injuries in livestock
- common abnormal livestock behaviours

- causes of livestock being unfit for transport
- legislative documentation requirements for livestock transport
- relevant work health and safety, biosecurity and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor water supplies	1.1 Inspect water supplies routinely 1.2 Recognise high and low water levels and report to supervisor 1.3 Carry out treatment of water quality problems or pathogens according to enterprise procedures 1.4 Record and report information on water supplies
2. Inspect and clear intake and outlet points	2.1 Inspect intakes and outlets 2.2 Report potential blockages and clear actual blockages 2.3 Check and replace water filters as required 2.4 Reposition intake lines as necessary to ensure unobstructed suction 2.5 Clear strainers of debris and sludge
3. Operate water delivery equipment	3.1 Identify hazards and risks and report to supervisor 3.2 Prepare and check water delivery equipment 3.3 Operate water delivery equipment 3.4 Check outflow to ensure water delivery equipment is operating correctly 3.5 Shut down water delivery equipment as required 3.6 Report on activities and water delivery equipment

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety procedures
- record and report water supply information, activities and system performance
- read and follow manufacturers procedures
- problem solve to identify potential as well as actual blockages
- undertake basic poly pipe repairs
- check outflow rates
- clear blockages using safe working procedures
- check flow rates
- inspect and report on water supplies with only routine supervision
- follow work health and safety requirements.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water delivery systems and components and their operation
- common water quality problems
- enterprise procedures for carrying out inspections, recording and reporting water information and system performance
- environmental impacts and procedures for water supplies
- relevant work health and safety requirements.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK210 Muster and move livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to muster and move livestock as part of a team.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for muster	1.1 Identify mustering requirements and confirm with supervisor 1.2 Arrange transport requirements and check and confirm for operation 1.3 Identify and access additional information relevant to livestock movements 1.4 Identify hazards and safety concerns and report to the supervisor 1.5 Select and use personal protective equipment
2. Carry out muster	2.1 Locate livestock identified in the muster plan and aggregate in preparation for movement 2.2 Carry out muster processes in line with enterprise animal welfare policies
3. Move livestock	3.1 Carry out livestock movement with minimal stress to livestock and without damage to person, property or environment 3.2 Monitor and maintain livestock welfare during movement with adequate provision of rest, water and feeding points 3.3 Confine and pasture livestock at destination 3.4 Count and record numbers of livestock 3.5 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK210A Muster and move livestock

Assessment Requirements for AHCLSK210 Muster and move livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- read and interpret muster plans and maps
- prepare equipment and working dogs (when used) for handling livestock
- implement directions for mustering
- monitor livestock behaviour and recognise abnormalities
- muster and move livestock along prepared routes in a calm and controlled manner
- handle livestock safely and humanely, monitor welfare of mustered stock
- monitor and minimise impacts to the environment
- communicate effectively with the muster team
- calculate livestock numbers and assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements where required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mustering and movement methods and techniques
- livestock basic health and nutritional requirements
- livestock herding/flocking behaviour
- environmental codes of practice with regard to livestock production
- working dogs uses and techniques (where appropriate)
- legislative requirements for stock movement along public roads

- environmental impacts and procedures for livestock movements and musters
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK211 Provide feed for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and provide feed for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for feeding	1.1 Check and record condition and health status of livestock 1.2 Confirm feed and feed supplements and prepare in line with feeding plan 1.3 Check and maintain water supply, quality and quantity to meet livestock requirements 1.4 Identify hazards and report to the supervisor 1.5 Select and use suitable personal protective clothing and equipment
2. Feed livestock	2.1 Provide feed and feed supplements in line with feeding plan 2.2 Monitor feeding process to ensure livestock are feeding effectively 2.3 Safely handle livestock in line with enterprise animal welfare policies 2.4 Follow procedures to minimise feed wastage and spillage, and dispose of and recycle feed waste appropriately 2.5 Note variations to individual eating and drinking patterns and report
3. Complete the feeding process	3.1 Record feeding abnormalities and report to the supervisor 3.2 Maintain a clean and safe working area 3.3 Maintain records 3.4 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK211 Provide feed for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- monitor and record livestock condition
- provide feed and feed supplements in accordance with feeding plan
- monitor livestock health and condition, and recognise abnormalities
- employ safe and environmentally responsible systems and procedures with regard to the handling of livestock and feed
- read and interpret feeding plan, work plan and supervisors instructions
- communicate and report livestock feeding abnormalities and workplace hazards, and maintain livestock records
- assess and calculate herd/flock numbers, measure feed and rate and frequency of feeding
- safely handle livestock in line with enterprise animal welfare policies
- report feeding abnormalities and maintain records
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional requirements for livestock (including water)
- types of feed and feed supplements (including pastures and grazing)
- types of noxious and toxic plants relevant to feeding areas
- livestock health and behaviour
- livestock scoring and weighing methods

- environmental impact of livestock
- safe livestock handling techniques and procedures
- hazards associated with handling livestock and control measures
- personal protective clothing and equipment
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK213 Clean out production sheds

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to clean out sheds used for the production of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean shed	1.1 Confirm work to be undertaken with supervisor

Element	Performance criteria
	1.2 Identify work health and safety hazards and seek advice from supervisor for implementation of suitable risk controls 1.3 Select, maintain and use suitable personal protective equipment 1.4 Identify the potential environmental and biosecurity impacts of cleaning the shed and seek advice from supervisor for managing these impacts 1.5 Raise, dismantle or remove equipment from the shed for cleaning and clean equipment to appropriate industry standards 1.6 Cover or seal electrical switchboards and other equipment to prevent entry of water if appropriate
2. Clean shed and surrounds	2.1 Service and prepare machinery for cleaning operation 2.2 Remove and dispose of litter where these are used 2.3 Remove and dispose of manure appropriately 2.4 Remove dust and cobwebs from all surfaces 2.5 Service filters and flush drinker lines and tanks 2.6 Empty and clean silos where appropriate 2.7 Prepare and use cleaning agents in line with safe working procedures 2.8 Air shed to completely remove traces or vapours of the cleaning agent prior to re-entry of staff and re-installation of equipment 2.9 Handle chemical agents safely and use in accordance with relevant work health and safety and industry practices 2.10 Dry clean electrical equipment 2.11 Ensure run-off from cleaning activity complies with enterprise, industry and regulatory effluent and waste management procedures 2.12 Ensure all cleaning and hygiene processes are completed to industry standards
3. Complete cleaning operation	3.1 Clean and store equipment appropriately at end of operation 3.2 Dispose of containers, leftover fluids, waste and debris from the cleaning operations appropriately 3.3 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK213 Clean out production sheds

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, follow safe work practices and use personal protective equipment appropriately
- make appropriate preparations for cleaning out shed
- clean shed and surrounds
- complete cleaning operation
- complete records
- follow relevant environmental and biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of sheds and equipment found in sheds
- methods to handle and transport equipment found in sheds
- methods of sealing or covering shed equipment to prevent entry of water
- methods for dry cleaning electrical equipment
- environmental and biosecurity impacts of shed cleaning operation, and measures to mitigate these impacts
- equipment and machinery used for shed cleaning operation, and the maintenance, servicing and storage of such equipment and machinery
- environmental and biosecurity impacts and methods of disposal of effluent, bio-waste and waste generated by the cleaning operation
- cleaning, maintenance and servicing of filters, drinker lines, tanks and silos
- types, handling, use and disposal of cleaning agents, work health and safety and environmental practices for these agents

- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK214 Maintain production growing environments

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and follow safe work practices
- follow relevant biosecurity practices
- maintain environment systems
- observe and assess livestock health
- follow relevant animal welfare practices when handling or treating livestock

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant biosecurity requirements
- relevant animal welfare requirements
- relevant work health and safety requirements and sustainability practices
- shed heating, cooling and ventilations systems, their functions, maintenance and servicing, and impact of changes on livestock
- types of litter, functions and impact of litter changes on livestock
- impact of manure conditions on livestock
- lighting programs and impact of variations in lighting programs on livestock
- types of lighting, functions, maintenance and servicing
- feeding programs and impact of changes and malfunctions on livestock
- restricted feeding and impact of changes and malfunctions on livestock
- watering systems, functions, maintenance and servicing, and the impact of changes and malfunctions on livestock
- types of maintenance work that need to be carried out in a livestock production unit

- signs of health, anatomy, physiology and behaviour of the livestock species
- signs of ill health in the livestock species
- signs of injury, malformation and non-productiveness in livestock
- types of disease prevention strategies and their functions
- methods for handling livestock
- methods for counting and identifying livestock
- types of treatment in livestock and assessment of treatment effectiveness

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK215 Carry out alpaca handling and husbandry operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to move and control alpacas using basic handling methods and procedures.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to handle alpacas	1.1 Identify, prepare and maintain alpaca handling areas, gates and access routes 1.2 Locate and identify alpacas for handling according to supervisor instructions 1.3 Observe and anticipate behavioural characteristics of alpacas and select appropriate handling methods 1.4 Select, check for soundness and prepare handling equipment 1.5 Identify hazards and report to supervisor 1.6 Recognise hazards to animals and report to supervisor 1.7 Observe site quarantine and other biosecurity protocols 1.8 Select and use suitable personal protective equipment
2. Handle alpacas	2.1 Follow procedures to control and sort alpacas safely and in line with enterprise animal welfare policies 2.2 Classify alpacas according to age, sex and husbandry tasks to be performed 2.3 Carry out restraint procedures with minimum stress and discomfort to alpacas 2.4 Transport alpacas when required according to animal welfare requirements 2.5 Monitor and anticipate alpaca behaviour during moving and handling processes to ensure wellbeing of alpacas and safety of handlers 2.6 Conduct alpaca count record 2.7 Recognise environmental impacts of alpaca handling and husbandry tasks and report to supervisor
3. Carry out alpaca husbandry tasks	3.1 Carry out alpaca husbandry safely and in line with enterprise animal welfare policies 3.2 Identify unhealthy stock and abnormal conditions and behaviour and report 3.3 Provide adequate feed and clean water to stock 3.4 Recognise plants poisonous to alpacas and report to supervisor
4. Complete alpaca handling activities	4.1 Complete alpaca husbandry tasks as instructed, and prepare gates and access routes for alpacas' departure 4.2 Clean and maintain handling areas and equipment and store surplus materials 4.3 Report equipment faults or malfunctions

Element	Performance criteria
	4.4 Dispose of alpaca residues and waste appropriately 4.5 Record and report relevant information about particular animals and the husbandry tasks performed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK215A Carry out alpaca handling and husbandry operations

Assessment Requirements for AHCLSK215 Carry out alpaca handling and husbandry operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- assess and calculate alpaca numbers
- prepare handling areas, gates and access routes for alpaca movement
- monitor and anticipate alpaca behaviour in handling operations
- identify, sort, move and control alpacas for handling and husbandry operations
- use correct equipment, and calming and humane methods to minimise undue stress and risk to alpacas or handlers
- carry out typical basic alpaca husbandry tasks
- recognise and report signs of unusual behaviour, unhealthy animals or abnormal conditions
- control environmental impacts associated with alpaca handling and husbandry
- feed and provide adequate clean water to alpacas
- identify a range of plants poisonous to alpacas
- provide due care in the handling of alpacas
- read and comprehend oral and written information and instructions and maintaining alpaca handling records
- use enterprise alpaca identification systems
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alpaca behavioural characteristics and movement in handling areas
- classes of alpacas and their basic nutritional and welfare requirements
- components and functions of handling equipment
- enterprise identification systems for alpacas
- environmental codes of practice with regard to alpaca production
- correct handling techniques and restraint methods
- alpaca husbandry procedures and why they are carried out
- regulatory controls relating to the transport of animals on public roads
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK216 Clean and maintain livestock pens

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to clean and maintain livestock pens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean pens	1.1 Confirm work to be undertaken with supervisor 1.2 Identify work health and safety hazards and seek advice from supervisor for implementation of suitable risk controls 1.3 Select, maintain and use suitable personal protective equipment 1.4 Identify the potential environmental and biosecurity impacts of cleaning the pens and seek advice from supervisor for managing these impacts 1.5 Raise, dismantle or remove equipment from the pens for cleaning if required and clean equipment to appropriate industry standards
2. Clean pens	2.1 Service and prepare machinery and tools for cleaning operation 2.2 Remove and dispose of manure appropriately 2.3 Clean feeding and watering troughs or equipment appropriately 2.4 Ensure run-off from cleaning activity complies with enterprise, industry and regulatory effluent and waste management procedures 2.5 Ensure all cleaning and hygiene processes are completed to industry standards
3. Maintain pens	3.1 Repack worn and uneven pen surface appropriately 3.2 Repair damaged feed bunks and leaking water troughs as required 3.3 Repair pen fences, gates and shade structures as required
4. Complete cleaning and maintenance operation	4.1 Clean and store equipment appropriately at end of operation 4.2 Dispose of containers, leftover fluids, waste and debris from the cleaning operations appropriately 4.3 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

No equivalent unit.

Assessment Requirements for AHCLSK216 Clean and maintain livestock pens

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, follow safe work practices and use personal protective equipment appropriately
- make appropriate preparations for cleaning livestock pens
- clean and maintain pens
- complete cleaning and maintenance operation
- follow relevant environmental and biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements and methods of cleaning livestock pens
- environmental and biosecurity impacts of pen cleaning operation and measures to mitigate these impacts
- types and use of tools, equipment and machinery for pen cleaning operation and the maintenance, servicing and storage of such tools, equipment and machinery
- environmental and biosecurity impacts and methods of disposal of effluent, bio-waste and waste generated by the cleaning operation
- cleaning and maintenance of feeding and watering troughs or similar equipment
- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety, biosecurity and environmental management policies

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply animal welfare principles to the handling and husbandry of animals to ensure their welfare.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify animal welfare requirements	1.1 Identify legislative, regulatory and industry animal welfare requirements 1.2 Identify the principles of animal welfare
2. Comply with animal welfare requirements	2.1 Follow enterprise work health and safety policies 2.2 Carry out animal handling and husbandry activities in compliance with relevant animal welfare codes of practice and workplace requirements 2.3 Recognise animal welfare issues in the workplace and report to supervisor or management 2.4 Take appropriate corrective action as instructed by supervisor 2.5 Complete appropriate record keeping of workplace animal welfare concerns and actions taken as required
3. Participate in animal welfare process	3.1 Participate in workplace or industry animal welfare induction programs and training 3.2 Participate in workplace or industry animal welfare emergency training

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

No equivalent unit.

Assessment Requirements for AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow enterprise work health and safety policies
- identify animal welfare requirements in relevant legislation, regulations, codes of practice and workplace procedures
- apply animal welfare principles to animal handling and husbandry activities in compliance with relevant animal welfare codes of practice and workplace requirements
- recognise and report animal welfare issues to supervisor
- participate in workplace or industry animal welfare emergency training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations and codes of practice
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- workplace or industry animal welfare procedures and animal emergency procedures
- workplace or industry procedures for reporting and recording animal welfare concerns, non-conformance and malpractice in the workplace
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK218 Ride educated horses to carry out basic stock work

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	Initial release with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to handle and ride calm horses educated to muster and move livestock. It addresses the potential risks associated with working with and around horses and livestock.

The unit applies to individuals who have experience in riding horses assessed as calm, consistent and obedient. They work under general supervision, with some accountability for their own work, identifying and providing solutions to a limited range of predictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- ACMEQU202 Handle horses safely
- ACMEQU206 Perform horse riding skills at walk, trot and canter.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour
ACMEQU206 Perform horse riding skills at walk, trot and canter	ACMEQU202 Handle horses safely

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain horse health and condition	<p>1.1 Monitor horses for signs of ill health, injury, or poor condition as part of daily routines</p> <p>1.2 Report horse condition to supervisor</p> <p>1.3 Administer treatments for common ailments safely and humanely under supervision of veterinarian or supervisor</p> <p>1.4 Carry out hoof care and cleaning according to safe workplace practices</p> <p>1.5 Apply workplace biosecurity and sustainability policies and follow workplace procedures</p>
2. Prepare horses for work	<p>2.1 Assess work to be undertaken and confirm with supervisor</p> <p>2.2 Identify hazards, assess risks, and implement control measures for working safely with horses</p> <p>2.3 Select and check equipment suitable for the work to be undertaken</p> <p>2.4 Select and use appropriate personal protective equipment (PPE) during preparation activities</p> <p>2.5 Identify horses by sex, colour, markings, and brands</p> <p>2.6 Safely and humanely catch assigned horse, assess for health and soundness, and promptly report any issues to supervisor</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.7 Confirm with supervisor that the assigned horse is suitable for required work and own skill level</p> <p>2.8 Prepare horse for ridden work including a pre-exercise groom</p> <p>2.9 Fit and adjust, for individual horses, the appropriate working gear to manage and control horse for required work</p>
3. Ride horses for stock work	<p>3.1 Select and use equipment (PPE) for riding</p> <p>3.2 Lunge horse safely and humanely to check gear fit and horse behaviour</p> <p>3.3 Mount horse safely</p> <p>3.4 Safely control the horse at walk, trot, and canter prior to beginning stock work</p> <p>3.5 Practise appropriate safety drills and safely perform emergency manoeuvres including one-rein stops</p> <p>3.6 Using safe riding techniques, ride quiet, consistent and obedient horses to carry out basic stock work duties</p> <p>3.7 Work and safely control horse at a walk, trot, and canter as part of stock husbandry routines</p> <p>3.8 Safely dismount horse</p> <p>3.9 Report and record stock work activities</p>
4. Provide post ride care	<p>4.1 Remove gear and groom, wash, or clean horse, according to workplace policy</p> <p>4.2 Water and feed horse in line with workplace policy</p> <p>4.3 Release horse safely to appropriate enclosure, paddock, or yard</p> <p>4.4 Check, clean, maintain, and store working gear and PPE</p> <p>4.5 Report damaged or repair working gear as instructed</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Writing	<ul style="list-style-type: none"> Record data and observations about livestock in workplace forms accurately
Oral communication	<ul style="list-style-type: none"> Use active listening and questioning techniques to clarify and confirm instructions and report information
Navigate the world of work	<ul style="list-style-type: none"> Follow workplace procedures, including safe work and safe horse handling practices and animal welfare principles, in own role and work area
Get the work done	<ul style="list-style-type: none"> Plan and organise tasks and assemble equipment to complete basic livestock activities, taking safety and risk factors into consideration

Assessment Requirements for AHCLSK218 Ride educated horses to carry out basic stock work

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	Initial release with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has safely ridden at least two different calm, consistent and obedient horses educated for stock work to carry out at least three assigned jobs involving riding horses for basic stock work duties. For each job there must be evidence that the individual has:

- prepared for the job by:
 - recognising hazards and implementing required risk control measures
 - identifying relevant work health and safety requirements
 - selecting and using suitable personal protective equipment (PPE)
 - selecting suitable saddlery and equipment
 - identifying the assigned horse by gender, colour markings, and brands
 - catching assigned horse and assessing for health and soundness
 - communicating with supervisor to discuss concerns and suitability of horse for the assigned job
- handled horse safely and humanely during job including:
 - safely and correctly fitting, then checking and adjusting working gear to suit individual horse
 - mounting horse safely
 - riding and controlling horse, at a walk, trot, and canter, to perform basic stock work duties
 - adhering to animal welfare policies when working around horses and livestock
 - minimising stress of livestock when checking, mustering, and moving livestock
 - dismounting horse safely
- completed post-ride activities including:

- cleaning, feeding and watering horse
- checking, cleaning and maintaining tack
- completing records as required by workplace.

In addition, there must be evidence that the individual has monitored the condition of at least one horse (which may be one of the above-mentioned three horses), including:

- identifying signs of ill health, injury, or poor condition, and reporting to supervisor
- safely and humanely administering basic treatments under supervision
- carrying out basic hoof care and cleaning safely and humanely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key features of work health and safety, animal welfare codes of practice, biosecurity requirements, and sustainability practices in the context of own job role
- basic pre-activity risk assessment for basic stock work
- common horse gender, colours, markings, and other identifying features
- common basic features of horse behaviour and psychology
- the features of livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant workplace procedures, industry standards, and guidelines for horse riding and riding safety, including lungeing or riding in a yard before outside and one-rein stops
- basic care and husbandry, and procedures for horses
- the common signs of disease or injury in horses, basic anatomy and physiology of the horse
- the use of horses for workplace operations
- care and maintenance of working gear.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions, including livestock handling yards and paddocks
- resources, equipment and materials:
 - various live, calm, consistent and obedient horses educated for stock work and assessed as suitable for the experience and skill of the individual
 - livestock to muster, move, and check
 - appropriate tack for individual, horse and activity
 - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual

- specifications:
 - work instructions and procedures for carrying out basic stock work.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCLSK301 Administer medication to livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply preventative health treatments and other medications to livestock under professional supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Assessment Requirements for AHCLSK301 Administer medication to livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- prepare, clean and maintain treatment site, facilities and equipment to industry standards
- select and utilise equipment and materials appropriate for treating requirements and match to work tasks
- muster, move and handle livestock for health treatments
- administer preventative health treatments in accordance with work plan
- monitor effectiveness of treatments and provide follow up if required
- maintain records of treatments
- assess and calculate herd/flock numbers, measure dosage and quantities
- monitor livestock behaviour and recognise abnormalities
- apply contingency measures for administering treatments in the event of adverse weather conditions
- carry out animal husbandry procedures
- provide due care and handle livestock humanely
- communicate abnormalities, equipment faults and workplace hazards
- read and interpret manufacturers specifications, work and maintenance plans, veterinary chemical labels and Safety Data Sheets (SDS's)
- apply relevant work health and safety requirements
- apply relevant biosecurity requirements
- apply relevant animal welfare practices
- apply relevant environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment and materials for treating livestock, their components and functions
- livestock health treatments, procedures and methods
- livestock identification methods
- mustering and moving techniques
- withholding periods for residues in meat, milk or wool
- technique of disposing of livestock residues and waste appropriately
- hazards associated with handling livestock and veterinarian medicines and chemicals
- implications and management of veterinary medicine and/or chemical resistance
- personal protective clothing and equipment and when and how it should be used and maintained
- procedures for cleaning and maintaining treatment equipment and materials
- enterprise policies with regard to treating livestock, recording and reporting routines
- relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, biosecurity and the use and control of hazardous substances

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK303 Carry out feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out feedlot operations

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to corporate, small scale or opportunity lot feeding of cattle, sheep and goats.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with livestock feed	1.1 Check work to be undertaken from work program and confirm with supervisor where necessary. 1.2 Identify work health and safety hazards, assess risks and apply suitable control measures 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken 1.5 Identify environmental impacts of undertaking work, assess likely outcomes and, if necessary, take responsible action
2. Mix feed	2.1 Calibrate scales and containers to be used for measurements 2.2 Identify ingredients from instructions and obtain from storage locations 2.3 Measure ingredients in the specified ratios and quantities 2.4 Blend ingredients adequately and hygienically in the manner specified using appropriate equipment 2.5 Carry out grinding, where required, in the manner specified and using appropriate equipment
3. Feed livestock	3.1 Store feed appropriately 3.2 Check the physical quality, quantity and type of feed on their arrival to the shed 3.3 Feed livestock at scheduled time, rate and frequency 3.4 Maintain quality and hygiene of feed throughout the feeding process
4. Apply and maintain feedlot hygiene and biosecurity procedures	4.1 Examine livestock entering feedlot, check their documentation and quarantine them for specified period 4.2 Maintain cleanliness and hygiene by selecting and using appropriate cleaning methods 4.3 Maintain thorough personal hygiene practices in all activities associated with handling livestock, including reducing risks from diseases transmissible to humans (zoonotic diseases) 4.4 Dismantle and clean equipment and fittings and replace correctly 4.5 Place and dispose of waste and debris in allocated areas, and ensure run-off is managed according to the Feedlot Code of Practice, environmental legislation and public health standards 4.6 Check and sign in visitors to feedlot according to enterprise and industry procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK303 Carry out feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures
- prepare equipment and machinery mixing feed
- identify a range of grain and feed types and qualities
- mix livestock feed
- feed livestock
- follow relevant procedures for the safe and environmentally responsible disposal of waste
- apply and maintain relevant feedlot hygiene and biosecurity procedures
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant biosecurity requirements
- relevant animal welfare practices
- tools and equipment used for working with livestock feed, their functions and maintenance
- environmental impacts of working with livestock feed and mitigation methods
- measurement systems for livestock feed, and calibration and maintenance of measuring equipment
- types of grains and feed ingredients (grains, meals, vitamins, minerals and premix formulations) used for feeding livestock, their functions, characteristics and quality assessment methods

- methods and equipment for blending and grinding of feed
- methods of storage and handling of livestock feed and impact of feed quality changes on livestock
- livestock feeding programs and impact of program changes or variations on livestock
- impact of biosecurity practices on livestock in a feedlot
- cleaning methods, cleaning agents, their proper use and disposal, and relevant Work Health and Safety practices
- common zoonoses and their impacts on human and livestock health
- management and disposal of waste, debris and run-offs according to relevant biosecurity and environmental regulations, codes of practice, industry and enterprise standards
- management of and biosecurity requirements for visitors to the feedlot

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out post-mortem examination of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources

Individuals must comply with national and local regulations for disposal of the carcass.

Individuals must comply with regulations for sending of biological samples by post.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to conduct post-mortem / necropsy	1.1 Select site for post-mortem, ensuring compliance with biosecurity and environmental requirements 1.2 Prepare the site to be used for the post-mortem 1.3 Obtain and collate all relevant preliminary information about the carcass to be examined 1.4 Identify work health and safety and biosecurity hazards, assess risks and take appropriate action 1.5 Select and use personal protective equipment 1.6 Obtain and prepare required equipment and resources 1.7 Move the animal to be examined to the post mortem area using appropriate manual lifting techniques and equipment 1.8 Seek expert assistance if required
2. Carry out post-mortem examination	2.1 Carry out external assessment and note outward signs of disease or injury 2.2 Seek expert advice and assistance before proceeding where unusual symptoms are present 2.3 Perform post mortem of the carcass in a systematic and safe manner using appropriate techniques and equipment, without causing artificial damage to organs and tissues 2.4 Examine organs, tissues and joints 2.5 Take samples of organs and tissues where appropriate, and place in properly labelled containers to meet laboratory requirements 2.6 Record relevant data and details of the post mortem examination and suggest the cause of death where possible
3. Carry out post necropsy procedures	3.1 Dispose of carcass and biological materials using appropriate equipment and comply with biosecurity and environmental requirements, and national and local regulations for carcass disposal 3.2 Send labelled and packaged samples to the laboratory for analysis and comply with regulations for sending biological samples by post 3.3 Collate all information about the livestock examined and the records made during the post-mortem, and forward to supervisor or veterinarian for analysis and establishing a diagnosis 3.4 Clean and disinfect all equipment used and store appropriately 3.5 Clean and disinfect site used for the post-mortem 3.6 Disinfect disposable personal protective equipment before disposing them 3.7 Wash hands and exposed body areas thoroughly 3.8 Change clothing and place in appropriate bin for laundering and disinfect boots

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK304A Carry out post-mortem examination of livestock

Assessment Requirements for AHCLSK304 Carry out post-mortem examination of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for post mortem, ensuring appropriate handling and use of equipment, personal protective equipment and disinfectants
- identify work health and safety and biosecurity hazards and implement risk controls
- handle carcasses safely and appropriately
- perform external examination and post mortem examination of carcass
- dispose of carcass appropriately
- carry out post necropsy procedures of cleaning and disinfection of equipment, post mortem site and personal protective equipment
- prepare biological samples for sending to the laboratory where appropriate
- carry out procedures for personal hygiene
- apply relevant work health safety environmental and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sequence of actions in conducting a post mortem examination
- appropriate handling and use of post mortem equipment, personal protective equipment and disinfectants
- requirements for correct preparation, labelling and packaging of biological samples
- anatomy and physical features of the species being examined
- common causes of death for the species being examined
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species

- relevant work health and safety environmental and biosecurity requirements, and carcass disposal regulations

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a livestock carcass:

- carry out post mortem examination

Assessors must satisfy current standards for RTOs.

AHCLSK305 Maintain livestock water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain livestock water supplies.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify maintenance requirements	1.1 Check livestock water supplies for quality and inspect for signs of contamination or deterioration, and low or interrupted supply

Element	Performance criteria
	1.2 Check components of water supply systems for wear, deterioration or malfunctions 1.3 Check and confirm Identified maintenance requirements according to the maintenance plan
2. Prepare for maintenance	2.1 Select tools, equipment and materials appropriate to the job requirements and check for serviceability 2.2 Identify faulty or unsafe tools and segregate for repair or replacement 2.3 Identify hazards, assess risks and implement control measures 2.4 Select and use personal protective equipment
3. Carry out maintenance procedures	3.1 Maintain water systems and equipment to manufacturers specifications, livestock requirements and maintenance plan 3.2 Carry out maintenance and repair of motors where necessary, including fault finding 3.3 Report more complex faults and repair requirements to the supervisor
4. Complete maintenance activities	4.1 Clean worksite, tools and materials, return to operating order and store 4.2 Report malfunctions, faults, and wear or damage to tools for repair or replacement 4.3 Collect, treat and dispose of or recycle unwanted materials and waste from maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK305A Maintain livestock water supplies

Assessment Requirements for AHCLSK305 Maintain livestock water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- estimate water requirements based on average and peak demand for water
- test and monitor machinery and equipment for correct operation and recognise minor faults and report major faults
- identify the components of a range of water supply systems
- arrange water supply system components and materials
- use hand and power tools safely
- carry out routine servicing and minor repairs on a range of water supply systems and equipment
- work as part of a contract team as required
- demonstrate safe and positive environmental working practices
- test water quality as directed
- read and interpret a water supply plan
- measure and calculate lubrication requirements
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock requirements and average and peak demand for water
- operational principles of various pumps and pumping systems
- functions and components of a range of water supply systems
- operation and maintenance of diesel and petrol engines

- factors which affect water quality, various water contaminants and remedial action
- advantages and disadvantages of different types of water supply systems
- State and Territory work health and safety legislative requirements relevant to the job role
- relevant legislative requirements with regard to property water supply systems
- environmental code of practices associated with maintenance activities.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK306 Coordinate and monitor production performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate resources and monitor the work of others within an intensive production process.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work in the	1.1 Confirm work to be undertaken from work program where

Element	Performance criteria
production area	<p>necessary, and clarify with supervisor if required</p> <p>1.2 Identify hazards, assess risks and implement suitable controls</p> <p>1.3 Select and use suitable personal protective equipment</p> <p>1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken</p> <p>1.5 Communicate the personal protective equipment and other safety requirements to staff and contractors, and obtain confirmation of understanding</p>
2. Coordinate work activities	<p>2.1 Communicate the work required to staff and contractors clearly and unambiguously following the production plan and program</p> <p>2.2 Meet work schedules, plans and priorities according to the needs of the organisation or situation</p> <p>2.3 Ensure the allocation of work optimises resources and the existing competencies of staff</p> <p>2.4 Provide feedback to staff and management on request, or as necessary</p>
3. Monitor daily operations	<p>3.1 Assess manure and litter consistency and treat to prevent deterioration, where appropriate</p> <p>3.2 Implement the designated lighting and internal environment programs for the unit</p> <p>3.3 Check that effluent storage and disposal systems are operated according to the production program and manufacturer's instructions</p> <p>3.4 Ensure that all rubbish and used consumables are removed from production site according to the requirements of the production program</p> <p>3.5 Ensure work, health and safety requirements are being observed and followed</p> <p>3.6 Communicate with operational staff and any contractors regularly to ensure smooth operation and progress</p>
4. Monitor herd/flock health	<p>4.1 Observe herd/flock and shed conditions for signs of ill health, and record and report changes</p> <p>4.2 Examine livestock for evidence of disease through post-mortem techniques in line with individual unit standard and veterinary advice</p> <p>4.3 Identify disease status of unit stock and request serviceman or veterinary assistance when required</p> <p>4.4 Check components of quarantine/ biosecurity procedures for compliance</p> <p>4.5 Comply with enterprise animal welfare policies</p>

Element	Performance criteria
5. Complete records and documentation	5.1 Collate information gathered throughout production operations 5.2 Graph collated information where required, and prepare for presentation to supervisor or manager ensuring easy recognition and extraction of data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK306 Coordinate and monitor production performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain biosecurity procedures and report concerns immediately
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- read and interpret production and other information in a manner that is readily accessible for both management and operators
- monitor shed temperature and adjust as required
- read and interpret spreadsheet information using a software package
- discuss production performance, risk and hazard potential, quality of output, and methods of production with both management and operators
- read and interpret the activities contained in livestock production plans
- observe, identify and react appropriately to work health and safety hazards and environment risks
- recognise when performance standards are not met and investigate and report findings in written form
- provide supervision of staff including allocating duties and feedback on performance
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- prepare and present production and other information in a manner that is readily accessible for both management and operators
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- biosecurity procedures and codes of practice
- common livestock diseases and clinical signs
- relevant industry, environmental and quality standards (including ISO9002:1094)
- animal welfare codes of practice and procedures
- types of sheds and equipment
- raw data to determine issues and problems
- recording and reporting requirements
- fundamentals of quarantine and control methods
- common feed ingredients and additives
- water reticulation systems and quality
- State and Territory work health and safety legislation and codes of practice relevant to the sector

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK307 Euthanase livestock

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to euthanase livestock without distress or suffering prior to cessation of their vital life functions.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Individuals must hold firearms licenses if they are using firearms to euthanase livestock.

Individuals must comply with national and local regulations for disposal of the carcass.

Pre-requisite Unit

Nil

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for euthanasia	1.1 Confirm criteria for decision to destroy livestock conforms to workplace procedures and approval of supervisor where required 1.2 Confirm the method selected to destroy livestock is suitable for the species and meets animal welfare requirements, as outlined in the relevant codes of practice 1.3 Prepare equipment and materials required to complete the euthanasia 1.4 Identify hazards, assess risks and implement control measures 1.5 Identify environmental and public safety risks associated with the euthanasia 1.6 Obtain licences and permits required to complete euthanasia where necessary 1.7 Check and prepare equipment and materials for euthanasia 1.8 Select and use personal protective equipment
2. Carry out euthanasia of animal	2.1 Handle and transport equipment appropriately and safely 2.2 Restrain animal in a way that minimises pain and distress 2.3 Euthanase animal in a quick and painless way 2.4 Check animal to ensure it is dead 2.5 Destroy animals that have not been euthanased immediately, in a humane manner
3. Carry out post euthanasia procedures	3.1 Handle and prepare carcass to be used for research or commercial according to enterprise requirements 3.2 Dispose of carcass not to be used for research or commercial purposes in line with legislative and enterprise requirements 3.3 Clean and store equipment and materials 3.4 Report and record animal and euthanasia details as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant animal welfare requirements
- implement relevant work health and safety practices
- implement relevant biosecurity requirements
- prepare for euthanasia
- carry out euthanasia
- confirm signs of death in a euthanased animal
- handle, prepare or dispose of carcass in line with workplace procedures, national and local regulations
- clean and store equipment and materials
- record details of the euthanasia.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- their responsibilities with regard to animal welfare as outlined in the relevant animal welfare codes of practice
- relevant work health and safety and biosecurity requirements, explain the requirements of statutory legislation and codes of practice related to euthanasing livestock
- workplace procedures for euthanasia of livestock as required, describe animal handling, restraint and behaviour for carrying out euthanasia
- signs of death in an animal
- anatomy and physical features of the relevant livestock species

- methods of euthanasia suitable for the livestock species as outlined in the relevant codes of practice.
-

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK308 Identify and draft livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- handle and draft livestock in line enterprise animal welfare practices
- identify criteria for animal selection
- control and sort livestock
- select animals according to selection criteria
- safely and humanely apply identification devices
- appraise and grade animals
- recognise livestock abnormalities
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- handling techniques and restraint methods
- animal movement and drafting
- animal welfare principles
- livestock behaviour relevant to drafting
- selection criteria for breeding stock
- livestock identification systems and devices
- enterprise animal identification procedures
- State and Territory work health and safety and animal welfare legislative and enterprise requirements.

Assessment Requirements for AHCLSK309 Implement animal health control programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices for animal health treatment
- identify the symptoms of parasite infestation and other diseases
- monitor animal health status and refer to the production plan for intervention strategies
- select livestock prone to infection for culling
- accurately diagnose the type and severity of infection or parasite infestation
- arrange and co-ordinate equipment and resources
- read and interpret chemical and veterinary health labels, manufacturer's specifications and Safety Data Sheets (SDSs)
- calculate animal numbers and measure treatment dosage and rates
- select and administer treatments appropriate to treat infections and infestations and observe withholding periods
- drench and vaccinate livestock
- provide due care and humanely handle animals
- return animals to prepared and clean environments
- monitor animals for treatment effectiveness
- apply relevant work health and safety requirements
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of parasite infestation and their symptoms
- parasite resistance of different classes of livestock

- application procedures and effects of veterinary chemicals
- types of health preparation treatments
- enterprise vaccination program and procedures
- identification of and prescribed treatments for infections and infestations
- grazing management strategies used in internal parasite control
- drenching equipment, drenches and their efficiency
- relevant codes of practice with regard to the safe use and handling of hazardous substances
- withholding periods for treated animals
- animal handling and restraint techniques
- animal welfare principles
- relevant work health and safety and animal welfare legislative and enterprise requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK310 Implement feeding plans for intensive production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures and suitable risk controls
- assess livestock according to enterprise requirements
- prepare for feeding livestock
- carry out feeding and watering
- clean feeding equipment
- complete records and documentation
- follow relevant biosecurity requirements and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant animal welfare practices and biosecurity requirements
- environmental impacts of intensive livestock feeding
- methods of assessing livestock condition
- systems and stages of intensive livestock production
- feed distribution systems and feeders, their functions, maintenance and servicing
- methods of storage and handling of intensive livestock feed and impact of feed quality changes on livestock
- intensive livestock feeding programs and impact of program changes or variations on livestock
- watering systems and equipment, their functions, maintenance, servicing and impact of changes or variations on livestock

- methods of cleaning feed equipment, cleaning agents, their proper use and disposal, and relevant work health and safety practices
- type of information to be gathered, documentation and records which must be maintained

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK311 Implement feeding plans for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor available pasture for grazing and implementing a feeding plan.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Determine livestock condition and nutritional requirements	1.1 Monitor and report livestock condition 1.2 Identify livestock production status 1.3 Source livestock nutritional requirements and the nutritional value of feedstuffs from the feeding plan 1.4 Use feeding plans to determine adjustment in response to the monitoring of livestock condition and pasture growth 1.5 Report and separate animals that are in atypical condition, injured or diseased in line with enterprise biosecurity policies 1.6 Apply enterprise animal welfare policies to livestock handling and husbandry activities
2. Assess pasture feed	2.1 Assess quantity and quality of available pasture 2.2 Implement grazing management plans and monitor to ensure the sustainable stocking capacity of pasture 2.3 Monitor grazing behaviour of livestock and identify shy or problem feeders 2.4 Determine livestock feeding methods and level of supplementary feeding if required
3. Manage the feeding of livestock	3.1 Graze livestock on pasture according to the guidelines described in the feeding plan 3.2 Obtain required supplementary feed 3.3 Provide supplementary feed to livestock in the appropriate manner and times 3.4 Identify and assess indications of any negative environmental impacts and make amendments to the feeding method as required 3.5 Monitor and report condition and live weight response to feeding

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK311A Implement feeding plans for livestock

Assessment Requirements for AHCLSK311 Implement feeding plans for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor pasture health and condition
- assess herd/flock health and condition and live weight
- identify livestock nutritional requirements
- order feed if requested in line with feeding plan
- identify feeding problems and animals that require individual treatment
- handle livestock humanely and monitor animal welfare
- respond to or report negative environmental impacts of feeding
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutrient and feeding requirements of a range of livestock
- different types of agricultural feeds
- factors that affect feed supply and demand for a grazing operation
- grazing practices which maximise pasture growth and quality to best match herd/flock feed requirements
- purpose of feed conservation in relation to enterprise feed supply and livestock requirements
- different types of pasture grazing systems, including rotation, strip and set stocked grazing
- ways of determining a feed surplus
- role of spelling subdivision in effective pasture and animal management
- different supplementary feeding options for livestock

- environmental controls and codes of practice applicable to the enterprise
- nutrient values of pasture and supplementary feedstuffs
- codes of practice with regard to animal welfare and environmental protection
-

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK313 Monitor livestock production growing environments

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- monitor livestock health and welfare
- monitor the production environment
- monitor feed systems and water supplies
- perform routine maintenance checks
- complete monitoring activities
- follow relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- production parameters and production assessment systems of the livestock industry
- signs of health and methods of assessing livestock health
- relevant animal welfare requirements of the livestock industry and their impact on the enterprise
- housing, production and management systems of the livestock industry and equipment used in these systems
- relevant hygiene and biosecurity requirements of the livestock industry and their impact on the enterprise
- relevant waste disposal requirements of the livestock industry and their impact on the enterprise
- feed management and feeding programs of the livestock industry and their impact on the enterprise

- monitoring, maintenance and servicing of housing structures, production structures, environmental control equipment, watering equipment and feed delivery equipment
- type of information to be gathered, documentation and records which must be maintained
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK316 Prepare livestock for competition

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- plan for and provide livestock feed and water requirements
- maintain livestock facilities and handling equipment
- restrain, handle and groom livestock using safe and humane methods and procedures
- train livestock for showing
- comply with animal welfare requirements
- prepare livestock to competition standards
- parade and present livestock for show
- read and interpret written information, receive, comprehend and communicate oral information, write basic statements and maintain livestock records
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- competition requirements for grooming, handling and presentation
- components and functions of handling equipment
- handling techniques, restraint methods and when to use them
- livestock grooming and training techniques (to lead and stand correctly)
- livestock health and nutritional requirements
- preparation and maintenance requirements for livestock facilities and equipment
- livestock movement and behavioural characteristics in handling and confined areas

- work health and safety , animal welfare and livestock movement legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK317 Plan to exhibit livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select livestock for exhibition
- prepare animals for exhibition
- present livestock to best advantage
- promote the product to clients and pursue sales opportunities
- communicate with staff during preparations, exhibit officials and potential customers
- identify potential exhibits against selection criteria to accurately select livestock/fleeces
- train animals to be led and presented in competition
- organise entries, resources and facilities for showing
- arrange and prepare for transport
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria for competition judging
- preparation procedures
- requirements for entry of competitors
- transportation requirements
- feeding and nutrition requirements
- communication and supervision techniques
- observation methods

- relevant legislative work health and safety requirements, especially as they relate to livestock and fleece exhibitions, and animal transportation, animal welfare and safe livestock handling techniques
- enterprise and industry policies and codes of practice with regard to livestock exhibitions, sales, livestock transportation, and recording and reporting requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK318 Rear newborn and young livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- weigh and assess condition of newborn and young animals
- work within animal welfare legislative requirements and enterprise and industry guidelines
- identify abnormal conditions and report or react promptly
- safely and humanely handle and care for newborn and young animals
- recognise signs of stress or ill health in newborn and young animals
- communicate with other personnel
- provide support as needed to veterinarians attending to sick newborn and young animals
- collect samples
- identify the young and their parent
- use feed, shelter and ventilation equipment
- calculate feed and dose rates
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- newborn and young animals development and growth
- newborn and young animals feed, shelter and environmental requirements
- common deformities
- infection controls and treatment programs

- significance of colostrum to livestock
- feeding systems and weaning strategies
- husbandry procedures
- hygiene and cleanliness requirements
- enterprise requirements for rearing of newborn and young animals and recording and reporting requirements
- relevant legislative animal welfare health and work health and safety requirements especially as they relate to safe animal handling techniques, feeding, animal treatments, and rearing and caring for newborn and young animals

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK319 Slaughter livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to slaughter livestock humanely.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They work in a range of known contexts, use discretion and judgement in the selection and use of available resources and complete routine activities.

Individuals must hold firearms licences if they are using firearms to slaughter livestock.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for slaughter	1.1 Identify reasons for slaughter 1.2 Identify and prepare slaughter site

Element	Performance criteria
	1.3 Prepare equipment and transport equipment to slaughter site where required 1.4 Select and prepare livestock to be slaughtered in compliance with animal welfare requirements 1.5 Determine the slaughter method
2. Slaughter animal	2.1 Conduct slaughter humanely in compliance with work health and safety and animal welfare requirements 2.2 Bleed animal by severing the major blood vessels safely and hygienically 2.3 Dress, hang and protect carcase where appropriate 2.4 Comply with all relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements
3. Complete slaughter operations	3.1 Dispose of, or destroy offal and waste products in an environmentally responsible manner and according to State/Territory and local authority health standards 3.2 Clean and store equipment safely and appropriately 3.3 Clean slaughter site appropriately 3.4 Prepare meat for intended use where appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK319 Slaughter livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare site, equipment and livestock for slaughter safely and appropriately
- conduct the slaughter of livestock in compliance with relevant requirements and regulations
- complete slaughter operations
- dispose of, or destroy offal and waste products in an environmentally responsible manner and according to State/Territory and local authority health standards
- comply with all relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements
- preparation, selection and use of the site, equipment and livestock for the slaughter
- methods and procedures for the humane slaughter of livestock
- preparation, processing and disposal of the carcass and its parts after slaughter
- post-slaughter procedures for the site and equipment
- anatomy and physical features of the species being slaughtered
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species
- codes of practice for the welfare and husbandry of relevant livestock species

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a live animal:

- prepare for slaughter
- slaughter animal
- complete slaughter operations

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK320 Coordinate and monitor livestock transport

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- interpret transport plan requirements
- coordinate the transport of livestock
- safely, load livestock while maintaining load within specifications
- distribute animals on transport to prevent overcrowding and minimise risk of injury
- obtain relevant permits and comply with movement restrictions
- ensure documentation and livestock identification is in place
- ensure appropriate recording including use of technology where applicable
- safely unload livestock
- review health and condition of livestock after transit
- demonstrate safe and humane handling of livestock according to animal welfare codes of practice
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and legislative requirements for the transport of livestock
- model codes of practice for the welfare of animals Land transport (various species)

- animal welfare, biosecurity and work health and safety legislative requirements
- environmental codes of practice with regard to vehicle operation and livestock transport
- market requirements in relation to the quality and condition of livestock
- process of sourcing and costing transportation alternatives
- livestock transport recording and documentation requirements
- enterprise policies with regard to the use of vehicles and equipment
- relevant documentation requirements and procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK321 Service and repair bores and windmills

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to service and repair bores and windmills. This includes activities such as replacing parts, checking equipment for wear and tear, determining lime deposits, stripping, dismantling or reassembling bores and windmills.

These activities carry risk of falls due to working at heights, injury due to working with moving parts and machinery.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes of practice and manufacturer's specifications

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish bore history and enterprise policy	1.1 Review enterprise records and confirm bore history 1.2 Confirm enterprise bore and windmill service and repair policy with supervisor 1.3 Obtain any required specialist instructions and assistance as appropriate
2. Prepare to carry out service and repairs	2.1 Select and inspect tools, equipment and materials appropriate to job requirements 2.2 Carry out dismantling and stripping of windmill and bore installations appropriately 2.3 Identify hazards in the workplace, assess and control risks appropriately
3. Carry out service and repairs	3.1 Select, use and maintain personal protective equipment appropriately 3.2 Carry out service and repairs to bores, windmills, motors and pumps appropriately 3.3 Report complex faults and repairs and refer for specialist advice and remedial action appropriately 3.4 Retrieve lost equipment appropriately
4. Complete service and repair activities	4.1 Reassemble and test bore and windmill components appropriately for full function and flow 4.2 Clean work site, tools and equipment, return to operating order and store appropriately 4.3 Collect, treat, dispose of or recycle waste from service and repair activities appropriately 4.4 Document information appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK321A Service and repair bores and windmills

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK321 Service and repair bores and windmills

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- apply basic diagnostic techniques
- recognise faults and deterioration of components and carry out repairs to bore, mill heads and pumps to ensure the full function and flow of water supplies
- select and match tools and equipment with work requirements
- apply safe workplace and positive environmental procedures
- read and interpret enterprise policy, maintenance plans, manufacturer specifications and Safety Data Sheets (SDSs)
- effectively communicate with contractors and supervisor, record and report maintenance details and outcomes
- calculate volumes, and measure speed, flow rates and distance
- maintain all components of bores and windmills
- carry out testing procedures to determine correct operation
- refer to bore histories for troubleshooting
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- construction of bores and windmills and maintenance requirements
- diesel engine components, maintenance requirements and repair procedures
- working principles of diesel engines
- drive systems and components
- types and uses of lubricants and other servicing materials

- servicing characteristics of bores and windmills
- types, characteristics, uses and limitations of hand and power tools
- basic diagnostic processes and techniques
- environmental codes of practice with regard to maintenance activities
- work health and safety legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK322 Transport farm produce or bulk materials

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to transport farm produce or bulk materials.

All work must be carried out to comply with workplace procedures, work health and safety, biosecurity legislation and codes of practice.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

Note: relevant vehicles licences are required when farm produce or bulk materials are transported on public roads.

This unit does not apply to livestock transport

Relevant vehicles licences are required when farm produce or bulk materials are transported on public roads.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for the transport of farm produce	1.1 Receive, interpret and clarify briefing, hand-over details, authorisation and clearances appropriately 1.2 Confirm the transportation schedule and organise appropriate equipment and authorised personnel 1.3 Adhere to schedule specifications 1.4 Identify and manage hazards and risks 1.5 Conduct equipment pre-operational checks 1.6 Observe site environmental practices
2. Load, transport and unload farm produce	2.1 Conduct start-up, park and shutdown procedures for plant and equipment 2.2 Determine load appropriately and prevent damage to equipment or loss of load 2.3 Load and secure farm produce 2.4 Transport farm produce 2.5 Ensure vehicles follow approved transport routes and speed limits 2.6 Conduct transport of farm produce 2.7 Unload farm produce or bulk materials 2.8 Coordinate transport of farm produce with harvesting machinery, if required 2.9 Complete transport of farm produce to plan and within the operating capacity of the equipment 2.10 Dispatch produce retain documentation, including weigh bills
3. Protect farm produce quality and integrity	3.1 Maintain hygiene of all surfaces in contact with farm produce 3.2 Protect farm produce from loss, contamination, moisture and pests during transport 3.3 Store farm produce according to enterprise procedures 3.4 Clean and maintain storage and holding areas, keeping potentially hazardous substances at a safe distance 3.5 Monitor the transport environment using temperature data loggers, if applicable 3.6 Check quality of farm produce at unloading 3.7 Monitor batches of farm produce for isolation and product integrity, where applicable

Element	Performance criteria
4. Carry out equipment maintenance	4.1 Conduct visual inspection and fault finding 4.2 Conduct routine operational servicing

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK322A Transport farm produce or bulk materials

Assessment Requirements for AHCLSK322 Transport farm produce or bulk materials

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- manoeuvre transport machinery or truck in difficult sites and conditions
- drive truck safely using all available controls
- clean and store vehicles and equipment
- identify operational faults
- complete time sheets and other maintenance records as required
- use communication methods to advise and anticipate conditions
- interpret plans, reports, maps, specifications
- maintain and store records, reports, and log books
- select, fit, and use personal and protective equipment
- operate and load a truck in accordance with Road Traffic Regulations
- plan, load, unload and move a range of loads over a full range of road conditions in accordance with Road Traffic Regulations
- conduct pre-start and post-operational checks
- maintain the quality and integrity of transported produce
- apply relevant work health and safety requirements
- apply relevant biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturers and work site requirements including property conditions, and hazards on the property and on the open road

- road traffic laws and licensing requirements
- organisational procedures for use of vehicles and equipment
- relevant work health and safety requirements for storage of materials and equipment
- work health and safety legislation, codes of practice, procedures, and principles, including manual handling
- emergency procedures
- site safety requirements
- equipment safety requirements
- operational, start up, and shutdown procedures and checks
- hauling and towing procedures
- receipt and document requirements at both ends of the transport operation
- differences in handling and operation with bagged and bulk loads
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs to the Assessment Conditions.

AHCLSK323 Maintain and monitor feed stocks

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and monitor livestock feed stocks.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine quantities of stockfeed required	1.1 Undertake stocktake of stockfeed and update inventory 1.2 Check livestock feed plans and compare required quantities with

Element	Performance criteria
	quantities in stock
2. Place orders with suppliers	2.1 Place orders for stockfeed with suppliers 2.2 Ensure orders specify quantity, quality, delivery date, delivery site and any special instructions
3. Receive feed into store	3.1 Check delivery manifest and report discrepancies to supplier and supervisor 3.2 Check quality of stockfeed and report problems to supplier and supervisor 3.3 Transfer stockfeed into appropriate storage containers 3.4 Update and file records and labels
4. Prepare and maintain feed storage area and containers	4.1 Identify work health and safety hazards and take action to minimise risk 4.2 Clean feed storage area and containers according to enterprise cleaning schedule 4.3 Organise stocks of stockfeed according to enterprise inventory management policy 4.4 Label stockfeed correctly 4.5 Clean feed storage containers before refilling 4.6 Check feed storage area and containers regularly for signs of pest infestation 4.7 Identify problems with feed storage facilities and resolve or report to supervisor for resolution 4.8 Dispose of stockfeed that does not meet quality standards

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK323 Maintain and monitor feed stocks

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake feed stocktake and update inventory
- determine quantities of stockfeed required
- place stockfeed orders with suppliers
- receive feed into feed store
- prepare and maintain feed storage areas and containers
- dispose of spoiled feeds
- implement relevant work health and safety and biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- stocktaking and inventory for stockfeeds
- enterprise livestock feeding plans and determination of stockfeed quantities and qualities
- procedures for ordering stockfeeds
- procedures for taking, checking and handling stockfeeds during delivery
- post-delivery handling and storage of stockfeeds
- quality parameters of stockfeeds and feed ingredients
- documentation and record keeping requirements for stockfeeds
- procedures for cleaning feed storage areas and containers
- pest management of feed storage areas and containers
- monitoring, maintenance and servicing of feed storage facilities
- feed disposal methods and management
- relevant work health and safety and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK324 Care for and train working dogs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, train and care for working dogs in the rural industry.

This unit applies to farm workers who use dogs to handle livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. Individuals must be aware of state/territory regulations and licensing requirements for keeping working dogs.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify workplace requirement and select working dog	1.1 Identify and confirm working dog requirements for the workplace 1.2 Research suitable working dog breeds and determine availability 1.3 Inspect dogs for suitability and make selection according to workplace criteria
2. Develop and implement training program for working dog	2.1 Teach commands for working tasks 2.2 Introduce the dog to a small flock in a confined area 2.3 Train the dog to handle larger numbers in more open areas 2.4 Train the dog on specialist skills such as backing and forcing 2.5 Assess existing and potential hazards associated with handling livestock in the workplace and implement measures to control risks 2.6 Comply with animal welfare codes of practice
3. Maintain health and welfare of working dog	3.1 Monitor and maintain health and condition of the working dogs 3.2 Provide an adequate and balanced diet to meet nutritional requirements of the working dogs taking into account work load/training program 3.3 Seek veterinary advice and arrange for or administer preventative health treatments 3.4 Provide and maintain appropriate housing facilities and equipment in line with animal welfare requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK324 Care for and train working dogs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the workplace need for working dogs
- select working dog to meet workplace requirements
- develop working dog training programs and apply effective training methods
- maintain health and welfare of the working dog
- follow relevant work health and safety and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- working dog breeds and behaviour
- use of working dogs in the workplace
- effective working dog training systems and procedures
- livestock handling methods and techniques
- care, husbandry and management procedures for working dogs
- signs of health, anatomy and physiology of working dogs
- common illnesses of working dogs and preventative health strategies
- relevant State/Territory legislative and regulatory requirements with regard to work health and safety, animal welfare, biosecurity and the registration and care of domestic dogs

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- develop and implement training program for working dog

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK325 Castrate livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe operating procedures
- handle animals humanely and with minimal stress in line with animal welfare legislation codes of practice
- perform a recommended method of castration with attention to hygiene
- administer pre or post operative treatments
- monitor castrated animals
- carry out animal husbandry tasks in hygienic manner
- record the number and health of animals post castration
- work effectively as a part of a team and communicate with supervisors
- apply relevant work health and safety requirements
- apply relevant animal welfare and environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- male anatomy as it relates to castration
- castration methods for various species of livestock
- organisation castration, hygiene and animal welfare procedures and policies
- industry standards for the care and husbandry of animals
- industry and enterprise requirements for debris, waste material and animal residues disposal
- relevant work health and safety legislation, codes of practice and industry and enterprise requirements
- relevant animal welfare legislation, codes of practice and industry and enterprise requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK326 Mix and mill standard stockfeed

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable control measures
- follow enterprise mill and mix stockfeed work program
- order and store feeds and ingredients
- identify feed ingredients and obtain from storage locations
- measure ingredients in the specified ratios and quantities
- mix feeds and ingredients in line with industry quality standards and requirements
- recognise and rectify minor operational faults and perform routine maintenance
- complete records and documentation of feed use and volumes for the shed
- conduct post-procedural hygiene and administration activities
- implement relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise requirements for mixing and milling feeds
- relevant work health and safety requirements
- tools and equipment machinery used for mixing and milling feeds, and the cleaning, maintenance, servicing and storage of such tools and equipment
- environmental impacts of mixing and milling feeds and strategies to mitigate such impacts
- type of feed ingredients and procedures for ordering, handling and storage of feed ingredients

- the impact of seed, chemical, insect and fungal contamination of grain. This includes an awareness of the industry process in place to monitor these contaminants - the National Residue Survey (NRS), the National Antibiotic Residue Minimisation (NARM) and programmed basket surveys
- measurement equipment for feed ingredients, and their calibration and maintenance
- procedures for mixing, blending and milling feed ingredients and feeds
- documentation and record keeping requirements for mixing and milling feed
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK327 Collect, store and administer colostrum

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain colostrum from suitable donor animals and select suitable frozen colostrum
- handle and feed new born animals appropriately
- handle frozen colostrum according to enterprise and health and safety procedures
- store colostrum for future use
- follow relevant work health and safety and animal welfare requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional needs of newborn animals and the need for feeding colostrum to newborn animals
- selection of suitable donor animals
- methods and equipment used to collect colostrum
- care, husbandry and management of newborn animals
- handling of frozen colostrum
- administration of colostrum to newborn animals and their post-administration care
- storage procedures of colostrum
- relevant work health and safety and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- obtain colostrum
- administer colostrum to newborn animals

Assessors must satisfy current standards for RTOs.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with effluent disposal equipment	1.1 Interpret work to be undertaken from work program where necessary, and confirm with management 1.2 Hold discussions with other workers who may be affected by the maintenance activities to ensure continued smooth operation of the production process 1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment (PPE) 1.5 Select, check and maintain tools and equipment suitable for the work to be undertaken
2. Maintain and operate effluent storage and disposal system	2.1 Observe and follow regulatory and industry requirements and standards for effluent operations 2.2 Service and maintain effluent removal and disposal equipment 2.3 Use effluent disposal systems according to system design in compliance with approval granted by local government and state environment protection authority 2.4 Carry out techniques for irrigation compliance with relevant regulatory and industry standards when using liquid effluent storages 2.5 Flush and drain in-shed effluent pits as required 2.6 Turn composted effluent in compliance with relevant regulatory and industry standards
3. Monitor effluent disposal system	3.1 Check flow rates, pit levels, compost temperatures and equipment regularly to maintain effective operation of the system 3.2 Carry out cleaning procedures and hygiene practices 3.3 Identify environmental impacts of effluent disposal and reuse, assess likely outcomes and if necessary, take responsive action
4. Conduct hygiene and administration activities	4.1 Clean equipment according to manufacturer specifications 4.2 Clean and store attachments and other ancillary equipment according to manufacturer specifications 4.3 Dispose of all containers, leftover fluids, waste and debris from the operations safely and appropriately 4.4 Complete all required records and documentation accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK328A Remove and facilitate reuse of effluent and manure from an intensive production system

Assessment Requirements for AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable controls
- make preparations to work with effluent disposal equipment
- maintain and operate effluent storage and disposal system in compliance with approval granted by local government and state environment protection authority
- monitor effluent disposal system
- conduct cleaning and hygiene practices associated with effluent operations
- implement relevant environmental practices
- complete organisational records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- an enterprise work program and program requirements for effluent operations
- relevant work health and safety requirements
- tools, equipment and systems used for effluent operations (effluent handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for effluent operations
- environmental impacts of effluent operations and liquid effluent irrigation, and strategies to mitigate such impacts
- irrigation techniques for liquid effluent
- functions, maintenance and service of effluent pits
- methods and maintenance of effluent composting

- methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
- documentation and type of records that need to be completed for effluent operations
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK331 Comply with industry animal welfare requirements

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to comply with industry animal welfare requirements in the production of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts, and use discretion and judgement in the selection and use of available resources. They provide and communicate solutions to a range of predictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine and identify animal welfare requirements	1.1 Determine legislative, regulatory and industry and enterprise animal welfare requirements 1.2 Identify workplace animal welfare concerns 1.3 Propose actions that can be taken to address identified workplace animal welfare concerns
2. Comply with animal welfare requirements	2.1 Carry out workplace animal welfare procedures and requirements consistently 2.2 Report non-conformance to supervisor 2.3 Take appropriate corrective action as advised by supervisor and in compliance with workplace procedures 2.4 Complete appropriate record keeping of workplace animal welfare concerns and actions taken
3. Participate in animal welfare process	3.1 Recognise animal welfare issues in the workplace, report to supervisor or management and take appropriate corrective action as required 3.2 Participate in workplace and/or industry animal welfare induction, training and programs 3.3 Participate in workplace and/or industry animal welfare emergency training

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK331A Comply with industry animal welfare requirements

Assessment Requirements for AHCLSK331 Comply with industry animal welfare requirements

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine and identify animal welfare requirements of relevant legislations, regulations, codes of practice and industry and workplace procedures
- comply with animal welfare requirements by carrying out workplace procedures, reporting non-conformance, taking appropriate corrective actions and completing record keeping
- participate in workplace animal welfare processes by reporting animal welfare issues and taking part in animal welfare induction, training and programs
- participate in workplace and/or industry animal emergency training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations and codes of practice
- basic requirements for ensuring the welfare of livestock described in the relevant Codes of Practice
- workplace and/or industry animal welfare procedures and animal emergency procedures
- workplace and/or industry procedures for reporting and recording animal welfare concerns, non-conformance and malpractice in the workplace

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCLSK332 Monitor animals in intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor livestock in an intensive production system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to beef cattle, dairy cattle, sheep, goats and pigs.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor animal health status	1.1 Source information on animal health programs from the livestock production plans 1.2 Assess animal health status by routinely inspecting each animal from induction to despatch by having unimpeded access and opportunity to observe behavioural characteristics, signs of ill-health and freedom of movement 1.3 Source information on past treatment(s) from the individual animal's identification tag or identification marking and enterprise records 1.4 Identify husbandry practices appropriate for the health status of the individual animal: follow-up observation, isolation from other livestock and/ or treatment
2. Identify animals requiring treatment	2.1 Identify individual animals with potential health issues or in ill health 2.2 Determine the type and severity of infection or injury and identify and/or isolate affected animals requiring treatment
3. Determine the type and scope of treatment	3.1 Determine the need for, type and scope of treatment by seeking expert or veterinary advice 3.2 Prepare equipment, materials and treatment site 3.4 Identify work health and safety hazards, assess risks and implement control measures in relation to the treatment 3.5 Record withholding periods and other details of treatment
4. Administer treatment	4.1 Check, select and use suitable personal protective equipment (PPE) 4.1 Handle and restrain animals safely and humanely 4.2 Administer treatment appropriately according to chemical label or veterinary advice 4.3 Identify treated animals from non-treated animals to ensure compliance with the required Withholding Period (WHP) 4.4 Prepare and move treated animals as planned
5. Carry out post-treatment procedures	5.1 Monitor animal health and condition post-treatment and report on animal's progress 5.2 Identify, environmental impacts associated with the administration of treatment, assess likely outcomes and take responsive action 5.3 Clean equipment and worksite, and dispose of organic and

Element	Performance criteria
	non-organic waste appropriately 5.4 Store unused medications appropriately 5.5 Complete documentation and records accurately and promptly 5.6 Comply with enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK332 Monitor animals in intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor animal health status
- identify animals requiring treatment
- determine the type and scope of treatment
- identify work health and safety hazards, assess risks and implement control measures associated with administering treatments to animals
- handle, restrain and treat animals without compromising animal welfare
- monitor animals post treatment and complete workplace recording requirements
- implement relevant animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information to be gathered from livestock production plans, animal health plans and individual animal records
- signs of health, signs of ill health and methods of assessing livestock health
- biosecurity requirements, husbandry and management strategies and procedures for ill or injured animals
- methods for humane and safe handling and restrain of animals
- common diseases of the livestock species, and strategies for treatment and management of such diseases
- typical and common medications, vaccines, the routes of administration in animals and keeping/storage of such medications
- work health and safety requirements associated with administering treatments to animals

- principles and regulations for veterinary medicines treatment and Withholding Periods in animals
- environmental impacts of administering treatments to animals and strategies to mitigate these impacts
- enterprise heat load management plans
- types of and disposal methods for organic and non-organic waste
- documentation and type of records that need to be completed for animal treatments

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK333 Monitor pen condition and ration suitability

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor ration and water levels and respond to issues as required
- inspect pen status and condition and respond to issues as required
- assess manure condition and respond as required
- check pen hygiene and respond to issues as required
- report and record incidents
- communicate with work team and supervisors
- implement relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information on rations, water, housing infrastructure and feeding infrastructure that can be gathered from livestock production and feeding plans
- principles and elements of nutrition and the impact of nutrition on livestock production
- nutritional requirements of different livestock species, classes and life stages
- impacts of poor nutrition and unsuitable rations on livestock production, and strategies to mitigate these impacts
- how rations can be adjusted or modified to benefit sick animals
- housing requirements and housing management of different livestock species, classes and life stages
- feeding and water requirements, and feeding and water management of different livestock species, classes and life stages

- impacts of unsuitable housing, feeding and watering infrastructure on livestock and strategies to mitigate these impacts
- effects of weather on housing and feeding infrastructure and strategies to mitigate such effects
- methods for using manure as assessment of livestock health
- methods for maintaining, cleaning and removing waste from housing and feeding infrastructure
- documentation, record keeping and methods for monitoring effectiveness of adopted strategies
- relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK334 Plan, prepare and conduct mulesing procedures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct the most efficient and humane mulesing procedure in circumstances where all alternative methods of breech flystrike prevention have been evaluated and mulesing is considered the most appropriate of these for the long-term welfare of the sheep.

This unit applies to sheep farmers and contractors in the livestock industry who normally operate under limited supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct pre-mulesing evaluations	1.1 Identify and comply with relevant State/Territory legislation, regulations and animal welfare standards and guidelines 1.2 Identify industry standards and guidelines 1.3 Seek expert advice and discuss alternative strategies to manage flystrike susceptibility prior to undertaking mulesing procedures 1.4 Confirm workplace requirements for use of mulesing 1.5 Conduct pre-operative evaluation of sheep 1.6 Assess risks associated with mulesing procedure and implement measures to control the risks such as using appropriate Personal Protective Equipment
2. Prepare for mulesing operations	2.1 Identify and order all required supplies and equipment in advance 2.2 Monitor weather conditions to determine optimal conditions for operation and recovery of sheep from the procedure 2.3 Select suitable time of day for operation to minimise the separation time of lambs and ewes 2.4 Engage adequate number of skilled workers 2.5 Select appropriate yards, paddocks and pastures for each mob and each day to allow adequate time for mothering up of lambs after separation from the ewes 2.6 Use appropriate procedures for mustering, movement and handling so that stress to sheep is kept to a minimum 2.7 Allow lambs to settle and cool after yarding
3. Select, maintain and use appropriate equipment	3.1 Maintain all equipment in clean, hygienic and working conditions to reduce the risk of infection and cross-infection in sheep 3.2 Maintain cradles to be used for mulesing in good working condition and can be operated to ensure minimal risk to the operator or lamb, especially when loading and unloading 3.3 Set, grind and sharpen mulesing shears to working standards 3.4 Disinfect mulesing shears after sharpening, before use and between each animal 3.5 Prepare wash-down, soaking and disinfecting containers for use 3.6 Prepare and test chemical application equipment to check for operational efficiency 3.7 Clean and disinfect all equipment at the end of operation and store appropriately to minimise contamination

Element	Performance criteria
4. Conduct mulesing procedures	4.1 Conduct all procedures in accordance with work health and safety, animal welfare and biosecurity requirements 4.2 Maintain a high standard of hygiene throughout the operation in relation to facilities, operators' hands, handling and equipment 4.3 Handle lambs calmly and use appropriate restraints such as cradles 4.4 Perform mulesing procedure in accordance with model code of practice and industry standards 4.5 Apply pain relief to the wound immediately after the procedure in accordance with industry standards and legislative requirements, and following label and Safety Data Sheet (SDS) instructions 4.6 Apply insecticide dressing to the surrounding intact wool bearing skin (not the wound) immediately after the procedure in accordance with industry standards and following label and SDS instructions 4.7 Continually evaluate wound symmetry, size and position, and breaks in selvage (muscle fascia) 4.8 Remove lambs from cradles so they land gently on all four feet
5. Conduct post-mulesing management procedures	5.1 Allow lambs, following release, to 'mother-up' to ewes as soon as possible 5.2 Provide immediate treatment for lambs that are abandoned or unable to stand or walk 5.3 Monitor lambs for abnormal signs such as infection and septicaemia 5.4 Maintain and update required documentation and records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK334A Plan, prepare and conduct mulesing procedures

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK334 Plan, prepare and conduct mulesing procedures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of mulesing
- identify optimal conditions for carrying out mulesing procedures
- conduct pre-operative evaluation of lambs submitted for mulesing procedures and risk assessment in consultation with sheep manager
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with industry best standards and legislative requirements
- follow low stress stock mustering, movement and handling procedures
- carry out mulesing operations in accordance with industry recognised best practice mulesing techniques and hygiene standards
- follow appropriate procedures and label directions to provide pain relief plus insecticide dressing as required
- monitor animals' behaviour post-mulesing for health and well-being including the ability to recognise signs of post-mulesing complications
- communicate post-mulesing management requirements to sheep manager
- accurately document and maintain appropriate records
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare and biosecurity requirements
- relevant codes of practice and industry standards for mulesing

- reasons and requirements for mulesing in sheep
- body condition scoring (BCS), breech wrinkle scoring (BRWR) and breech cover scoring (BCOV) in lambs and adult sheep
- methods and strategies of flystrike control
- effects of weather, environmental, facility, flock, individual animal and human factors on mulesing operations
- use and maintenance of materials and equipment for mulesing
- principles and maintenance of hygiene in mulesing operations
- methods and techniques for handling and restraint of adult sheep and lambs
- use of pain relief and insecticide treatment in mulesing procedures
- anatomy and external features of sheep
- health and animal welfare implications of post mulesing complications in sheep
- signs of ill health and related management strategies in sheep
- use of and regulatory considerations for the use of disinfectants
- relevant care, husbandry and management strategies for sheep flocks
- relevant legislation, regulations and codes of practice, including those relating to work health and safety, animal welfare, veterinary practitioner/surgeons' Acts, stock diseases and waste disposal, agricultural and veterinary chemical use

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- conduct mulesing procedures

Assessors must satisfy current standards for RTOs.

AHCLSK337 Train, care for and ride horses for stock work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Application

This unit of competency describes the skills and knowledge required to handle, ride and train horses to muster, move and separate livestock. It covers caring for horses and equipment, and addresses the potential risks associated with working with and around horses and livestock.

This unit applies to individuals who have experience working in the livestock industry and in riding educated, compliant and manageable horses to muster and check stock on grazing properties. Work is normally carried out independently, under broad direction according to workplace procedures.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- AHCLSK218 Ride educated horses to carry out basic stock work

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
AHCLSK218 Ride educated horses to carry out basic	ACMEQU202 Handle horses safely

stock work	ACMEQU206 Perform horse riding skills at walk, trot and canter
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour
ACMEQU206 Perform horse riding skills at walk, trot and canter	ACMEQU202 Handle horses safely

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare horses for work	1.1 Select, use and maintain appropriate personal protective equipment (PPE) 1.2 Select, muster, or bring from paddock, and assess the suitability of the horse for the task 1.3 Catch and handle horses safely and humanely 1.4 Check horse health, soundness, and fitness level to ensure it is capable to complete the work required 1.5 Select, check, and maintain working equipment, according to instructions 1.6 Groom horse prior to exercise or work 1.7 Fit working gear to individual horse
2. Train horses for stock work	2.1 Identify and assess risks, and implement risk controls associated with horse riding and horse training 2.2 Assess current level of education of the horse 2.3 Train horse to calmly carry out required movements for working stock, including stops, turns and rollbacks 2.4 Train horse to work and control a mob of livestock as a whole 2.5 Train horse to safely handle a single beast and to return it to the

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	mob safely according to industry practices 2.6 Train horse to separate a beast from a mob as instructed and according to industry practices 2.7 Train horse to calmly accept a stock whip being used by the rider, if required by the workplace, according to industry practices 2.8 Train horse to work with working dogs where required by workplace 2.9 Utilise agreed emergency procedures when training horses in required safety movements, including one-rein stops
3. Ride horses to carry out stock work	3.1 Interpret work program to determine work to be undertaken, and confirm with management 3.2 Select horses for the task, taking into consideration task requirements and own skill level 3.3 Catch and handle horses safely and humanely 3.4 Practise and reinforce training of horse while carrying out routine stock work 3.5 Take corrective action to re-train horse where necessary
4. Provide post ride care and maintain saddlery and equipment	4.1 Remove gear, and groom, wash and/or clean horse according to industry practices 4.2 Water and feed horse in line with workplace procedures and safe work practices 4.3 Release horse safely to appropriate enclosure, paddock or yard 4.4 Check, clean, maintain and store working gear 4.5 Repair working gear according to industry practices 4.6 Apply the workplace's biosecurity and sustainability policies
5. Maintain horse health and condition	5.1 Monitor horses as a part of daily routines to identify signs of ill health, injury and poor condition 5.2 Muster or catch horses in need of attention, and report and record condition in line with workplace procedures 5.3 Administer prescribed treatments for common ailments, under supervision of the veterinarian or manager 5.4 Safely check horse legs and feet, safely clean out feet, and correctly identify lameness and potential causes for lameness

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.5 Organise shoeing according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Comprehend information in workplace documentation
Writing	<ul style="list-style-type: none"> Record data and observations about horses in workplace forms accurately
Navigate the world of work	<ul style="list-style-type: none"> Follow industry guidelines and workplace procedures, including safe work and safe horse handling practices and animal welfare principles, relevant to own role
Interact with others	<ul style="list-style-type: none"> Follow accepted communication practices and protocols for reporting issues to management using accurate industry terminology
Get the work done	<ul style="list-style-type: none"> Plan, sequence and prioritise multiple tasks, and assemble equipment to complete activities, taking safety and risk factors into consideration

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has cared for, ridden and trained at least two different horses for stock work. The following points must be demonstrated for each horse:

- identifying work health and safety hazards and implementing safe work procedures
- selecting and maintaining saddlery and equipment
- handling and preparing horses for riding and livestock work
- using calm and humane handling methods to minimise undue stress and risk to horses, handlers, and livestock according to animal welfare requirements
- developing a working relationship with the horse or horses in own care
- monitoring health and condition of horses, including carrying out basic hoof care and cleaning
- identifying signs of ill health, injury, or poor condition and administering basic treatments
- training horses to:
 - calmly carry out required movements for working stock, including safety movements, stops, turns and rollbacks
 - work and control a mob of livestock as a whole
- riding, controlling and stopping the horse to carry out checking, mustering and moving livestock as part of property operations
- assessing and monitoring horse behaviour during riding activities and taking corrective action if required
- completing post-ride activities including:
 - cleaning, feeding and watering horse
 - checking and maintaining tack
 - completing records as required by workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common horse colours and markings, gender and other identifying features
- horse movement and behavioural characteristics, and learning theories relevant to stock work
- livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant industry standards and practices, and workplace procedures and guidelines for horse riding and riding safety, including lungeing, riding in a yard before riding outside, and one-rein stops
- approaches to horse education for stock work and associated learning theories
- basic care husbandry and management procedures for horses
- common signs of unsoundness, including injury, disease, work stress or other disorders in horses
- basic anatomy and physiology of the horse
- use of horses for workplace operations
- care and maintenance of working gear
- horse conformation and work readiness or level of education
- horse handling and riding techniques
- key requirements of work health and safety and animal welfare regulations, and codes of practice relevant to working and interacting with horses.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions containing livestock handling facilities
- resources, equipment and materials:
 - various live, suitably educated, compliant and manageable horses to be trained for stock work and assessed as suitable for the experience and skill of the individual
 - livestock to use in training horses
 - appropriate tack for individual, horse and stock work activity
 - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
- specifications:
 - work instructions and workplace procedures for training, caring for and riding horses for stock work.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCLSK401 Develop feeding plans for a production system

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop feeding plans for a production system.

This unit applies to supervisors and unit managers who are responsible for nutrition and feeding in an intensive livestock production facility.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
---------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select ingredients for feed	<p>1.1 Identify nutritional needs of livestock from information available and class of livestock</p> <p>1.2 Source nutritional advice from the appropriate industry or organisational sources</p> <p>1.3 Select ingredients that provide for the identified nutritional need of livestock</p> <p>1.4 Select suppliers of ingredients on the basis of quality and cost of feed</p> <p>1.5 Determine quantities of individual ingredients required, in conjunction with advice from other available information and expert/supplier advice</p>
2. Determine feed rations and schedules	<p>2.1 Determine quantities of total feeds required for livestock from the production program, in conjunction with advice from other available information and expert advice</p> <p>2.2 Take into consideration the results of any available laboratory testing when determining the quantities of each ingredient used</p> <p>2.3 Schedule feeding and allocate responsibility for feeding in line with the production program and other operations occurring within the site</p> <p>2.4 Identify the method(s) of providing feed to livestock identified in the production plan and confirm with supplier of ingredients and other expert advice</p>
3. Supervise mixing and storage of feed	<p>3.1 Organise secure and hygienic storage of feed and ingredients to eliminate contamination and infestation</p> <p>3.2 Select storage location to ensure safe access</p> <p>3.3 Organise rotation of feedstocks and replacements to arrive at the appropriate time to ensure optimum freshness</p> <p>3.4 Organise mixing of feed to suit the needs of the livestock, the identified nutritional requirements and the equipment available within the organisation</p> <p>3.5 Add medications to feeds according to enterprise procedures if required</p> <p>3.6 Take, package and label samples of feed and forward them to the laboratory for testing according to the schedules described in the production program</p> <p>3.7 Check calibration of measuring equipment and calculation of quantities at regular intervals</p>

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.8 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls for feed preparation and feeding operations</p> <p>3.9 Comply with enterprise biosecurity policies</p>
4. Supervise feeding	<p>4.1 Supply rations to the livestock according to the production program and schedules devised</p> <p>4.2 Make potable water available continuously to the livestock</p> <p>4.3 Monitor the health and wellbeing of the livestock in line with enterprise requirements and animal welfare policies</p> <p>4.4 Monitor and report any change in production levels as a direct result of changes to feed types, ingredients or schedules</p> <p>4.5 Give advice to operational staff during the feeding operation when requested, or when the need is observed</p> <p>4.6 Remove all waste materials and substances from the site and store, or disposed of, according to legislation, environmental policies and enterprise procedures</p> <p>4.7 Collate and store documentation according to the requirements of the organisation</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- discuss feed and nutritional content with nutritionist and managers
- identify a range of raw ingredients
- operate a range of feeding equipment
- perform basic trouble shooting of the feeding operation
- monitor animal intake and performance
- read and interpret manufacturers' specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- interpret and apply task instructions, communicate with work team and supervisor, and record and report faults, workplace hazards and accidents
- accurately measure and calculate volumes, consumption and storage requirements
- complete the required records of feed use and livestock performance
- comply with enterprise biosecurity, environmental and animal welfare procedures and policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- control of common livestock diseases and preventative measures including the placement of medications in feed
- growth and development in livestock
- milling systems

- dietary needs and analysis of feed samples
- organisations sampling requirements and techniques
- where to access appropriate legislative requirements, manufacturer's instructions and enterprise procedures/instructions
- silo operations and configuration, machinery and operating practices
- codes of practice and enterprise policies with regard to work health and safety, biosecurity, environment and animal welfare
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures.

Assessment Conditions

Competency is to be assessed in the workplace, OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK402 Develop livestock feeding plans

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop livestock feeding plans.

This unit applies to managers of grazing operations who design and develop feeding plans for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine nutritional requirements for livestock	1.1 Determine nutritional value of pasture and feedstuffs 1.2 Identify and assess livestock production status according to enterprise requirements 1.3 Determine essential requirements for livestock nutrition according to assessed livestock condition
2. Assess pasture feed	2.1 Determine grazing management strategy to ensure the sustainable stocking capacity of pasture 2.2 Monitor pasture for quantity and quality to ensure continual and consistent supply of nutrients to livestock 2.3 Monitor and assess pasture intake according to identified nutritional requirements of livestock
3. Determine supplementary feeding program	3.1 Determine economic basis to supplementary feeding according to enterprise requirements 3.2 Identify and determine types of supplementary feed for all classes of livestock 3.3 Determine supplementary feeding program to fill the pasture shortfall for predicted pasture growth
4. Develop livestock feeding plan	4.1 Develop and review feeding plan to ensure it remains responsive to changing conditions 4.2 Identify and carry out suitable feed conservation methods or fodder sources in preparation for abnormal conditions 4.3 Select a system of feeding that supplies the appropriate amount of feed to the herd/flock to meet condition and growth needs, and that meets production requirements of the business 4.4 Prepare a feed budget according to the selected system of feeding 4.5 Document data for continual assessment and effective management planning

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCLSK402 Develop livestock feeding plans

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research predicted seasonal pasture production for the area
- estimate the feed value of a standing pasture at different times of the year
- calculate the feed demand for different types of livestock and production phases
- match feed supply and demand
- assess feeding plan alternatives
- develop and document a feeding plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional and daily energy requirements of livestock
- water quality and livestock tolerances
- nutritional value of different feedstuffs
- assessment procedures to ascertain livestock condition
- methods of assessing pastures quality and quantity
- pasture livestock carrying capacity
- supplementary feeding strategies
- change in nutritional requirements during late pregnancy and lactation

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Provide information about animal welfare to the team	1.1 Explain the relevant provisions of animal welfare regulations and codes of practice to the work group 1.2 Provide information on workplace animal welfare policies, procedures and programs in a readily accessible manner 1.3 Provide information about identified animal welfare requirements to the group and individuals in a broad workplace context and in the context of the individuals' job roles
2. Facilitate the participation of workers in animal welfare compliance	2.1 Implement and monitor workplace procedures for compliance with animal welfare procedures 2.2 Explain procedures for reporting animal welfare concerns, grievances and complaints to workers, and action that will be taken to address these concerns, grievances and complaints 2.3 Manage and resolve animal welfare concerns, grievances and complaints according to workplace procedures, or refer to the appropriate personnel where necessary
3. Implement and monitor workplace animal welfare procedures	3.1 Report existing and potential animal welfare concerns, and take action to address these concerns according to workplace procedures 3.2 Maintain detailed records of animal welfare concerns, grievances and complaints, and actions taken 3.3 Monitor implementation of workplace animal welfare procedures to ensure ongoing adherence to and effectiveness of these procedures
4. Implement workplace procedures for dealing with animal welfare emergencies	4.1 Implement workplace procedures for dealing with animal welfare emergencies 4.2 Record and report animal welfare emergencies to workplace management or relevant authorities 4.3 Implement measures to prevent recurrence and minimise risk of animal welfare emergencies
5. Implement and monitor workplace procedures for providing animal welfare training	5.1 Identify animal welfare induction and training needs 5.2 Implement both on and off-the-job animal welfare induction and training for work group

Element	Performance criteria
6. Implement and monitor workplace procedures for maintaining animal welfare records	6.1 Implement and monitor procedures to maintain animal welfare records 6.2 Use aggregate information from animal welfare records to implement animal welfare programs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK404A Implement and monitor animal welfare programs

Assessment Requirements for AHCLSK404 Implement and monitor animal welfare programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- provide information about animal welfare to the work group and individuals in the workplace
- facilitate the participation of workers in animal welfare compliance
- implement and monitor workplace procedures for animal welfare
- implement workplace procedures for animal welfare emergencies
- implement and monitor staff training in animal welfare
- maintain animal welfare records
- implement relevant work health safety animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations, codes of practice and guidelines including:
 - Australian Animal Welfare Strategy
 - Animal Welfare Act or Prevention of Cruelty to Animals Act or equivalent specific to the State or Territory
 - Australian Standards and Model Codes of Practice specific to the livestock or industry sector
 - industry requirements and standards for animal welfare for the animal species
- animal welfare emergencies procedures for:
 - animal disease or injury
 - damage to facilities where animals are housed

- animals which have escaped from the normal control of the workplace
- road accidents when moving and transporting animals
- inclement weather - flooding, strong wind, lightning, storm, extreme temperatures
- fire
- power failure
- water or feed failure or contamination
- need for animal welfare in the workplace
- requirements for ensuring the welfare of livestock described in the relevant codes of practice
- workplace policies, procedures, guidelines and standard operating procedures relating to animal welfare
- relevant work health safety animal welfare and biosecurity requirements and practices in the context of animal welfare

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK405 Implement intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine measurable indicators, specifications and targets for the intensive enterprise assess the resources required for unit operations
- establish processes/strategies, procedure and controls to meet quality assurance requirements and production targets
- communicate production program to relevant personnel and complete administration activities
- manage livestock and the production environment
- implement quarantine procedures and monitor disease status of stock
- manage effluent and waste generated by production operations
- monitor and adjust production system for output, QA compliance, costs and profitability.
- prepare recommendations for future production programs based on the conduct of the operations, the data collected and the discussions with enterprise staff and contractors
- implement relevant work health and safety, biosecurity, animal welfare and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type and use of information that can be gathered from enterprise programs, documents and records
- types of resources required, types of products, methods for assessing and calculating resources and products by using information from enterprise programs, documents and records

- type of measurable indicators, specifications and targets for the production system using information from enterprise programs, documents and records
- functions, parameters and scope of enterprise production programs and production plans
- relevant regulatory, industry and enterprise approvals, licences, authorities, documentation, records and reporting requirements for enterprise production operations
- manpower, materials and equipment requirements for carrying out effective and efficient enterprise production operations
- relevant work health and safety requirements
- signs of health, signs of ill health and methods of assessing livestock health
- types and functions of housing and feeding infrastructure relevant to the enterprise production operations and methods for assessing damage, wear and tear to infrastructure
- techniques, procedures and requirements for post-mortem examination of livestock carcasses
- common diseases of livestock, and methods for assessing and evaluating disease status
- relevant biosecurity requirements, quarantine requirements, functions, components and facilities required of an enterprise quarantine system
- regulatory and industry requirements for effluent storage and disposal, types and functions of effluent storage and disposal systems, and methods for assessing and calculating effluent production
- regulatory and industry requirements, methods and systems for waste and debris storage and disposal
- relevant environment requirements and sustainability practices
- functions and aspects of production environment maintenance programs
- relevant animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor of safe operating procedures
- plan, cost and schedule resource requirements
- prepare and implement a work plan for marking
- prioritise and schedule marking operations
- determine and allocate staff roles and responsibilities
- monitor the health and well-being of animals during and after marking
- manage staff and operations and establish and monitor performance targets
- document and prepare plans and reports for the understanding of staff and management
- implement and monitor relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- management processes and procedures
- cost analysis techniques
- procedures for planning and developing marking plans
- marking and production plans
- codes of practice with regard to animal marking and animal health and welfare
- use of veterinary medicines and their administration
- animal marking methods and procedures
- work health and safety and animal welfare legislation, codes of practice and enterprise requirements
- animal behaviour and nutritional requirements

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1. Source information for	1.1 Consult livestock production plan for details of current period

Element	Performance criteria
input to production system planning	planning, enterprise requirements and market expectations 1.2 Analyse key production data to establish unit performance 1.3 Access and analyse information regarding the characteristics of the herd/flock under production 1.4 Access and analyse regulatory, industry and enterprise requirements that impact on the production system 1.5 Access and analyse market information regarding quality, standards and trends for input to the planning process
2. Plan for production	2.1 Determine target unit performance through a comparison with industry and enterprise standards 2.2 Establish and confirm production targets using data and information from unit's livestock production 2.3 Determine resources required to achieve production targets in terms of personnel, equipment and materials 2.4 Organise and engage staff and contractors to suit the production plan and its targets 2.5 Select and order other resources according to enterprise guidelines
3. Plan for animals' needs, environmental and effluent management to ensure welfare of animals and achieve production targets	3.1 Assess and calculate housing, effluent management, environmental management and biosecurity requirements from livestock numbers, market requirements and regulatory requirements 3.2 Evaluate construction and equipment system options and select the best option 3.3 Select materials chosen for construction according to animal welfare needs, cost and efficiency 3.4 Determine aspects of the production environment according to animals' welfare needs, efficiency of systems and market expectations 3.5 Select animal feed based on animal production, the size of the herd/flock, and the suitability of available feed products
4. Determine scheduling and key responsibilities	4.1 Determine scheduling for the production plan taking the range of seasonal, geographic and resourcing factors into consideration 4.2 Determine key responsibilities for specific implementation processes 4.3 Determine documentation and record keeping requirements and put procedures in place to ensure compliance with the range of applicable regulations 4.4 Ensure the production plan, including scheduling and key responsibilities, is clearly documented 4.5 Ensure the production plan includes the type, format, frequency

Element	Performance criteria
	and detail of all reporting requirements by managers and operators
5. Monitor and adjust production plan strategies	5.1 Evaluate the effectiveness of the production plan at key points and make adjustments as necessary 5.2 Identify, monitor and assess environmental impacts and work health and safety hazards relating to the production plan throughout the implementation process 5.3 Make modifications to the production plan as and when necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK407A Plan and monitor intensive production systems

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK407 Plan and monitor intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse key production data, herd/flock information and market requirements
- set production targets and identify resources needed to achieve them
- plan accommodation that meets animal welfare and production requirements
- develop feeding plans and evaluate alternatives for feed purchasing, milling and distribution
- determine work responsibilities and staffing requirements
- handle waste and effluent in line with environmental requirements and legislation
- monitor, review and adjust intensive production plans
- implement relevant work health and safety requirements
- implement relevant biosecurity, animal welfare and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- functions, parameters and scope of production plans
- type and use of information from enterprise production plans and enterprise production data that can be used to formulate production system planning and production unit performance targets
- type and use of information on herd/flock characteristics; regulatory, industry and enterprise requirements; industry and enterprise standards and benchmarks; market specifications for product qualities, product standards and market trends; production unit's history and data, for the formulation of the production system plan and performance targets

- types, quantities, assessment and calculation, procurement and selection of manpower, material, equipment and other resources required for the production plan
- types and functions of, and methods for assessing and calculating requirements of, housing, effluent management and environmental management infrastructure
- efficiency and cost benefit ratios of different types of housing, effluent management and environmental effluent infrastructure and systems, taking into account animal welfare requirements and enterprise production targets
- types, functions and cost benefit ratios of livestock feeds
- relevant aspects and impacts of production cycles and staff job roles on production planning
- relevant regulatory, industry and enterprise documentation, records and reporting requirements for implementation of production plans
- methods for assessing and evaluating production plans
- relevant work health and safety requirements
- relevant environmental requirements and sustainability practices
- relevant biosecurity requirements
- relevant animal welfare practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK409 Supervise animal health programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise animal health programs.

This unit applies to managers of animal production enterprises and covers the process of implementing and monitoring animal health programs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor and assess animal health	1.1 Conduct regular observations to assess animals' health 1.2 Recognise and report symptoms of ill health and common diseases or parasite infestations 1.3 Carry out sampling and arrange testing for internal parasites or diseases where required 1.4 Refer unusual or suspected exotic disease outbreaks for veterinary advice in line with biosecurity legislation and enterprise policies 1.5 Report notifiable diseases and comply with all restrictions and treatment requirements 1.6 Record animal health status 1.7 Identify work health and safety hazards, assess risks and implement and monitor suitable controls 1.8 Select, use and maintain appropriate hygiene measures and suitable personal protective equipment (PPE) 1.9 Monitor and record animal welfare status in line with enterprise and legislative requirements 1.10 Dispose of deceased animals according to environmental policies
2. Implement preventative health strategies	2.1 Identify risks to animal health, and source strategies, from the production plan, relevant expert or specialist consultant where applicable 2.2 Develop and implement a vaccination program to control clostridial and other diseases 2.3 Identify livestock prone to internal parasite build up and plan out the timing of treatments 2.4 Implement or research pest and disease control strategies based around pasture spelling and rotations of different classes of livestock 2.5 Plan the health treatments for animals using an integrated approach 2.6 Use drenches, vaccines and other stock medications according to manufacturer instructions and comply with withholding periods 2.7 Rotate drench groups to minimise the risk of parasite resistance
3. Record and review the animal health program	3.1 Record all treatments and maintain an inventory of stock medicines 3.2 Record health issues and record the results of tissue, organ and blood samples if applicable

Element	Performance criteria
	3.3 Use records of health tests and animal health treatments, including animal production records, to review the animal health plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK409A Supervise animal health programs

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK409 Supervise animal health programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor safe work practices and appropriate hygiene procedures
- monitor the health and wellbeing of animals
- detect possibility of disease through parameters such as loss of bodyweight behaviour or length of time required to eat food
- recognise clinical symptoms (normal vs. abnormal)
- recognise abnormal physiological and behavioural signs in livestock
- collect samples for testing for internal parasites and diseases
- implement preventative health strategies
- administer vaccines and medications to animals
- maintain records associated with animal health programs
- implement relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- symptoms of common livestock diseases and parasite infestations
- storage conditions for a range of chemicals, including veterinary chemicals
- types of vaccines and how they work
- zoonotic diseases and their mode of transmission
- animal anatomy and physiology relevant to the collection of tissue, organ, blood and other biological samples in live and dead animals and the conduct of post-mortems
- relevant biosecurity requirements

- management practices and processes to minimise noise, odours, and debris from the livestock operations
- relevant legislation, regulations and codes of practice relating to the use of veterinary medicines, animal diseases, animal welfare and waste and environmental management,
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK410 Supervise feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise feedlot operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Select feedlot livestock	1.1 Consult enterprise plans and management regarding the breeds, classes and numbers of livestock to be obtained for feedlotting 1.2 Select and purchase livestock for feedlotting 1.3 Inspect purchased livestock on delivery for satisfactory health and condition 1.4 Complete required documentation and records accurately and promptly, and store these appropriately
2. Oversee the preparation of rations for feedlot livestock	2.1 Identify nutritional needs of livestock from information available and enterprise production targets 2.2 Gather expert advice on livestock nutrition from the appropriate government, industry or enterprise sources 2.3 Select feed ingredients that meet the identified nutritional needs of livestock 2.4 Select suppliers of feed ingredients based on quality and cost benefit ratios 2.5 Determine quantities of feed ingredients required based on available information and advice 2.6 Formulate feeding schedule and allocate responsibility for feeding livestock to appropriate personnel 2.7 Assess and identify method(s) of feeding livestock based on available information and advice
3. Supervise feeding of feedlot livestock	3.1 Organise mixing of feed to suit the needs of the livestock, the identified nutritional requirements, and the equipment available within the enterprise 3.2 Supervise calibration of measuring equipment and calculation of feed ingredient quantities 3.3 Supervise the selection, maintenance and use of suitable personal protective equipment 3.4 Identify work health and safety hazards, assess risks and implement control measures 3.5 Supervise the feeding of livestock according to production program
4. Monitor performance of feedlot livestock	4.1 Monitor the health and condition of livestock and their production levels; record and report any reaction or change to a change in feed types, ingredients or schedules 4.2 Provide advice to enterprise staff on the feeding of livestock when requested, or when the need arises 4.3 Supervise the storage, removal and disposal of all feed wastes and debris from the production environment 4.4 Supervise the dispatch of livestock for slaughter with required identification and documentation

Element	Performance criteria
	4.5 Collate and analyse feedback from slaughter point and downstream customers 4.6 Maintain and store documentation and records appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK410 Supervise feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select, purchase and induct livestock for feedlotting according to enterprise requirements
- source advice on feed and feeding regime with nutritionist and managers
- oversee the preparation of rations for feedlot livestock
- supervise feeding of feedlot livestock and provide advice to staff where required
- monitor livestock performance on weight gains and meeting carcass criteria and diagnose feeding problems and remove animals for treatment
- review procedures in response to feedback from slaughter point and customers
- complete the required records of feed use and livestock performance
- implement relevant work health and safety, animal welfare, biosecurity and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types and use of information to be gathered from enterprise plans and management for the determination of suitable feedlot livestock to be procured
- breeds, classes and characteristics of feedlot livestock
- criteria for assessment and selection of feedlot livestock
- regulatory, industry and enterprise requirements and procedures for purchase, delivery and movement of feedlot livestock.
- principles of nutrition, feeding strategies and feeding management of feedlot livestock
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of feedlot livestock
- types, forms and characteristics of livestock feeds

- process and requirements of a cost benefit analysis
- procedures and resource requirements for mixing, blending and milling feed ingredients and feeds
- relevant work health and safety requirements
- signs of health, ill health, good condition and poor condition in livestock, and methods for assessing livestock health and condition in relation to nutrition and feeding
- possible production changes in relation to changes in nutrition, feeds and feeding strategies
- types of and disposal methods for organic and non-organic waste
- relevant environmental requirements and sustainability practices
- regulatory, industry and enterprise requirements for selection, movement and dispatch of livestock for slaughter
- types and use of information that can be gathered from slaughter facilities and downstream customers to formulate, improve or adjust nutritional and feeding strategies for feedlot livestock
- relevant animal welfare and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK412 Arrange livestock purchases

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research livestock price trends and budgeted returns
- organise transport
- negotiate on price and terms
- assess livestock and condition
- arrange transport and insurance
- check on health status and condition of livestock
- complete records associated with livestock transport
- implement relevant quarantine/biosecurity practices where required
- implement relevant work health and safety requirements
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock assessment for relevant features / traits
- livestock selling procedures
- matching livestock to feed available
- livestock transportation
- animal health procedures
- livestock insurance
- relevant legislative work health and safety requirements especially as they relate to livestock sales, livestock products, animal welfare, animal transportation for local and export markets, and safe livestock handling techniques

- enterprise and industry policies and codes of practice with regard to livestock sales, livestock transportation, and recording and reporting requirements (NLIS)

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine requirements	1.1 Assess and clarify requirements for livestock handling facilities 1.2 Negotiate and confirm cost structures and timelines within enterprise budgetary constraints 1.3 Obtain and assess plans for livestock handling facilities from a variety of sources
2. Undertake a site analysis	2.1 Inspect location of new or existing site and record physical elements and features of the site for assessment of suitability 2.2 Specify surveys to be undertaken and determine tolerances according to enterprise requirements 2.3 Assess and determine site preparation requirements according to enterprise policies and site parameters
3. Prepare a design brief	3.1 Modify plans appropriate to the individual site and enterprise objectives 3.2 Assess options to modify existing facilities or establish alternative handling operations and obtain quotes 3.3 Identify relevant work health and safety, animal welfare, biosecurity and environment sustainability requirements, codes of practice, enterprise quality assurance requirements and incorporate them into the plan 3.4 Identify legal requirements and constraints on development processes 3.5 Prepare design brief and undertake consultation to establish agreement on options and approaches for development
4. Develop a final plan	4.1 Prepare recommendations based on the analysis of data and enterprise instructions 4.2 Obtain authorisations and approvals required for implementation of the plan 4.3 Produce detailed plan with considerations for work health and safety, animal welfare, biosecurity and environmental implications and enterprise objectives

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK413 Design livestock handling facilities

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the need for livestock handling facilities
- evaluate and recommend alternative options
- determine the site and design the handling facility for the site
- incorporate work health and safety and animal welfare requirements, potential environmental impacts and enterprise operational principles for livestock handling and movement into design
- estimate cost of building the designed facilities
- develop a detailed plan for livestock handling facility

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behaviour and design interactions
- enterprise livestock handling facility requirements
- requirements of transportation vehicles and loading areas
- costing methodologies
- livestock handling options and accommodation facilities and their uses
- site constraints in relation to livestock handling facilities
- industry and legislative requirements for the planning and establishment of livestock handling facilities
- relevant work health and safety legislative requirements
- codes of practice with regard to environmental protection and animal welfare

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK418 Escort livestock during export

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to escort livestock during export.

This unit applies to animal attendants who escort livestock on sea voyages.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They may provide direction to others, and use discretion and judgement in the selection, allocation and use of available resources. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCLSK331 Comply with industry animal welfare requirements

AHCLSK307 Euthanase livestock

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out administration requirements	1.1 Obtain and clarify details of the livestock to be exported from the exporter or producer 1.2 Establish effective communication links between all parties to the consignment and any relevant organisations or agencies 1.3 Investigate and verify specific details of the vessel/plane to facilitate loading and transit operations 1.4 Complete required certification, permit and invoicing arrangements according to exporter requirements and relevant legislation 1.5 Estimate nutritional and veterinary requirements and order required quantities according to exporter directions, established industry standards and load specifications
2. Prepare for livestock to be loaded	2.1 Comply with work health and safety policies and procedures, including selection of appropriate Personal Protective Equipment (PPE) 2.2 Ensure that animal welfare and biosecurity requirements are met 2.3 Establish communication lines with all shipboard personnel for the voyage 2.4 Review exporter instructions according to loading criteria 2.5 Identify appropriate infrastructure for loading 2.6 Perform basic risk analysis for loading and recommend preventative measures 2.7 Identify appropriate on-board loading resources including personnel requirements 2.8 Check and ensure all on-board equipment is in working condition, including the veterinary kit and euthanasia equipment
3. Load and accompany livestock on transport	3.1 Observe and follow work health and safety policies and procedures, animal welfare, biosecurity and environmental requirements 3.2 Load and secure prepared livestock safely and humanely according to animal welfare, biosecurity, work health and safety and exporter requirements 3.3 Check and verify loading densities and conditions in accordance with the loading plan and regulatory requirements 3.4 Monitor and record water and feed provision to livestock and report any abnormalities or variance from feed budgets to the appropriate party

Element	Performance criteria
	<p>3.5 Carry out regular observation of all livestock to ensure timely and appropriate responses to changes in condition, feed and water intake, or incidence of disease</p> <p>3.6 Deal humanely with injured or diseased livestock in accordance with relevant animal welfare, biosecurity, health and environmental considerations and in consideration of customer requirements</p> <p>3.7 Complete reports according to shipping company policy and in accurate observation of shipping conditions</p>
4. Complete post-shipment procedures	<p>4.1 Establish unloading strategies including timing, health checks and documentation in consultation with the carrier's Chief Officer or Master</p> <p>4.2 Complete pen cleaning and other established pre-unloading procedures prior to entering port</p> <p>4.3 Unload animals safely and humanely using appropriate equipment and facilities in line with work health and safety, animal welfare, biosecurity and exporter requirements</p> <p>4.4 Identify specific animal requirements at unloading and obtain supplies to meet consignment needs</p> <p>4.5 Complete end of voyage reports and required documentation in accordance with exporter requirements, shipping company policy, government legislation, and customer requirements</p> <p>4.6 Undertake post-transport checks according to exporter and customer requirements, and shipping company policy</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK418A Escort livestock during export

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK418 Escort livestock during export

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out pre-shipping and consignment administration procedures
- make preparations for loading of livestock
- load livestock onto the carrier
- handle, treat and feed livestock in accordance with relevant animal welfare, biosecurity, health and environmental legislation and codes of practice and in consideration of customer requirements
- identify signs of ill health and injury, or signs of abnormal or depressed appetite
- handle and restrain livestock for observation and treatment as required
- oversee the care of livestock in transit
- communicate effectively with exporting agents and related agencies, as well as the Master/Captain, officers and seamen on board
- complete export documentation including daily records of animal observations and conditions
- communicate effectively with exporting agents and related agencies, as well as transportation officers and staff
- implement relevant work health and safety, animal welfare, biosecurity and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare, biosecurity and quarantine, and environmental legislation and codes of practice

- regulatory requirements and industry standards for the transport of livestock using sea carriers
- typical exporter and shipping company requirements, policies and procedures
- how conflicts should be handled between regulatory requirements and requirements of exporters or shipping companies
- working culture and specifications for imported livestock of common importing countries
- care, husbandry and management procedures for health and welfare of all classes of livestock - including pregnant livestock - in transit
- methods and techniques for handling and restraint of all classes of livestock
- methods and techniques for loading and unloading of livestock
- signs of health, anatomy and physiology of the livestock species
- zoonoses of livestock and preventative health strategies for humans and livestock
- common diseases of the livestock species and preventative health strategies
- signs of ill health and related management strategies in the livestock species
- methods and techniques of euthanasia
- disposal of animal carcasses on-board sea carriers
- on-board procedures and responsibilities
- use and maintenance of personal protective equipment, veterinary, euthanasia and disinfectant materials and equipment
- invoice, receipt and document requirements at both ends of the transport operation
- strategies for effective communication between all parties to the consignment, relevant organisations and agencies, and on-board carrier personnel

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- load and transport livestock

Competency for the unit can be determined in a single species.

Assessors must satisfy current standards for RTOs

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCLSK419 Manage horses for stock work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Application

This unit of competency describes the skills and knowledge required to manage horses for stock work, including coordinating specialist services from veterinarians and farriers.

The unit applies to individuals, experienced in riding horses for stock work, who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources, and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage horse condition and health	<p>1.1 Develop and implement workplace procedures for maintaining health and welfare of horses in consultation with workplace staff</p> <p>1.2 Assess, report and document soundness and working condition of horses in the workplace</p> <p>1.3 Ensure proper selection, use and maintenance of appropriate personal protective equipment (PPE)</p> <p>1.4 Identify unsound or unhealthy horses and diagnose or establish reasons for their condition, such as seeking veterinary advice where required</p> <p>1.5 Administer treatment and implement management plan for unsound or unhealthy horses under supervisor or veterinary supervision, according to plan</p> <p>1.6 Keep accurate records of horse identification, treatments administered and management plans</p>
2. Manage nutritional requirements of horses	<p>2.1 Develop and implement feeding plans for horses in the workplace, taking into account daily and seasonal factors affecting nutritional requirements</p> <p>2.2 Provide supplementary feeding programs to workplace horses to ensure they are in optimum physical condition and health for stock work</p> <p>2.3 Identify potential nutritional problems and take preventative or corrective action through the use or withdrawal of supplementary feeding</p> <p>2.4 Develop and implement work programs for horses according to their condition and nutritional status</p>
3. Supervise activities and tasks requiring the use of horses for workplace personnel	<p>3.1 Conduct risk assessments for activities and tasks requiring the use of horses, and implement and monitor the measures to control these risks</p> <p>3.2 Match horses in workplace to personnel by rider ability and suitability for tasks</p> <p>3.3 Schedule tasks requiring the use of horses, and communicate details to appropriate staff</p> <p>3.4 Coordinate tasks requiring the use of horses, and provide supervision to ensure that horses and personnel work within industry and workplace requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.5 Coordinate breaking-in of horses by contractors or staff, and provide supervision to ensure that horses and personnel work within industry and workplace requirements</p> <p>3.6 Provide inexperienced horses with stock training by experienced riders</p> <p>3.7 Maintain regular communication with workplace staff and contractors to ensure smooth operation</p> <p>3.8 Monitor outcomes of activities and tasks requiring the use of horses, and record in line with workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret and check accuracy of textual and numerical information from a range of sources to determine and confirm work requirements
Writing	<ul style="list-style-type: none"> Record and report specific information using workplace formats, and revise and update documentation based on outcomes of action
Numeracy	<ul style="list-style-type: none"> Calculate quantities of resources and costs associated with horse health and feed programs
Oral communication	<ul style="list-style-type: none"> Provide clear, sequenced instructions and respond to queries using terminology and concepts appropriate for the audience
Navigate the world of work	<ul style="list-style-type: none"> Work independently and collectively within broad parameters, taking responsibility for plans, decisions and outcomes relating to work area Know own obligations and responsibilities relating to regulatory and industry requirements for due diligence and safety of staff and horses
Interact with others	<ul style="list-style-type: none"> Follow accepted industry practices and protocols for working collaboratively with management and organising specialist services from veterinarians and farriers

Skill	Description
Get the work done	<ul style="list-style-type: none"> Plan, implement and coordinate multiple work tasks to achieve effective and efficient management of horses for stock work

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK419 Manage horses for stock work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has demonstrated management of at least two horses and two workers undertaking stock work on a property, including:

- developing and implementing management plans for the condition and health of horses in the workplace
- monitoring and managing the health and welfare of horses and developing feeding plans for horses in the workplace
- developing work programs for horses in the workplace
- matching horse type and experience to rider and task
- supervising and coordinating activities and tasks requiring the use of horses in the workplace, and monitoring the outcomes
- managing the provision of training for inexperienced horses
- identifying and treating ill or injured horses and consulting with veterinarians
- coordinating the horse work of other property personnel such as horse breakers, veterinarians, farriers and other farm staff
- communicating task requirements to staff and arrangements for breaking-in of horses to staff and contractors
- observing, identifying and reacting appropriately to environmental implications and work health and safety hazards
- applying relevant animal welfare and biosecurity requirements to managing horses.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of work health and safety and animal welfare regulations and codes of practice relevant to working and interacting with horses

- key requirements of biosecurity and environment sustainability requirements relevant to working and managing horses
- industry and workplace policies, procedures and guidelines relevant to the job role
- feeding plan and work program for individual horses in the workplace
- care, husbandry and management procedures for horses
- signs of health, anatomy, physiology and behaviour of the horse
- signs of ill health in horses and management strategies for common illnesses
- strategies for and management of breaking in of horses and training inexperienced horses
- use of horses for workplace operations
- strategies for effective communication in the workplace
- strategies for effective supervision and management of staff in the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - various horses used in livestock work assessed as suitable for the experience and skill of the individual
 - appropriate tack for individual, horse and stock work activity
 - personal protective equipment (PPE) correctly fitted and applicable to activity for individual
- specifications:
 - work instructions and workplace procedures relating to managing horses
 - access to legislation and industry information related to managing horses
- relationships with others:
 - management and specialists to interact with regarding the management of horses
 - staff to coordinate and match to horse suitability.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCLSK501 Manage livestock production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan for livestock production and manage the implementation of such a plan.

This unit applies to farm managers with extensive or intensive livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Plan for production	<p>1.1 Assess the capability of land resources for grazing and determine stock, pasture and land management strategies for each land capability class</p> <p>1.2 Assess the suitability and sustainability of water resources</p> <p>1.3 Establish livestock production targets for each enterprise for the short and long term according to the farms marketing and business plans</p> <p>1.4 Establish production targets, taking into consideration enterprise short and long term livestock production goals, herd/flock breeding improvements and relevant risk control strategies</p> <p>1.5 Select genetics and breeding programs based on the production targets and the marketing requirements for the enterprise</p> <p>1.6 Select and design production facilities in a way that deals sensitively with identified waste products</p> <p>1.7 Establish and specifically include environmental controls in the production plan</p> <p>1.8 Identify work health and safety hazards, assess risks and incorporate suitable controls into the production plan</p> <p>1.9 Prepare a plan that documents the decisions taken, the assessments made, the targets established, and any specific issues that relate to work health and safety, animal welfare, biosecurity and environmental risks</p> <p>1.10 Ensure plan includes the type, format, frequency and detail of any reporting required by both manager(s) and operators</p>
2. Plan for livestock needs	<p>2.1 Determine feed requirements for each age/sex category of herds and/or flocks</p> <p>2.2 Determine most appropriate feeding plan for each livestock category based on a cost benefit analysis</p> <p>2.3 Research and implement most appropriate health strategies to prevent and control disease in each herd and/or flock on the basis of a cost benefit analysis</p> <p>2.4 Prepare schedules for purchasing and using the products and services used in livestock production</p> <p>2.5 Research and implement most appropriate livestock production, harvesting, handling and transportation methods and animal welfare requirements from a cost benefit analysis</p> <p>2.6 Prepare a livestock production plan that incorporates the calendar of operations for each enterprise production cycle, and the management of any specific animal welfare issues</p> <p>2.7 Ensure plan includes the type, format, frequency and detail of any</p>

Element	Performance criteria
	reporting required by both manager(s) and operators
3. Seek information on innovations for existing or potential enterprises and farm activities	<p>3.1 Identify and access sources of information on innovations relevant to the enterprise and livestock species</p> <p>3.2 Assess information on innovations to determine whether or not such innovations could be used in the present enterprise, or in a potential future enterprise</p> <p>3.3 Amend prepared production plans to include innovations deemed suitable for use in the enterprise</p>
4. Test and adopt relevant innovations	<p>4.1 Consult any people who may be involved in implementing the innovation or in planning for it and discuss the change with them</p> <p>4.2 Test innovations on the farm to determine whether or not they are suitable, and whether they may be readily adapted to suit the circumstances of the business</p> <p>4.3 Identify any work health and safety hazards, animal welfare, biosecurity or environmental risks that present during the trial phase, assess them and take responsible action</p> <p>4.4 Make a decision about whether or not to adopt the innovation, based on its costs and benefits and any implementation issues, including work health and safety, animal welfare, biosecurity and environmental considerations</p>
5. Implement, monitor and evaluate livestock production plans	<p>5.1 Implement and monitor production plans according to the calendar of operations</p> <p>5.2 Site, erect or install production facilities in a way that deals sensitively with identified waste products</p> <p>5.3 Evaluate livestock growth/maturity or production according to the planned targets and the marketing requirements</p> <p>5.4 Monitor flock/herd health, and control and prevent parasite and disease outbreaks quickly and effectively</p> <p>5.5 Assess feed supplies, monitor pasture or landscape condition and species composition, and vary stocking rates to maintain optimum pasture and livestock health</p> <p>5.6 Identify, monitor and manage work health and safety hazards, animal welfare, biosecurity or environmental impacts relating to livestock production in the business to promote optimum pasture, livestock, and employee health</p> <p>5.7 Analyse physical and financial records and extractions taken from them to assess production performance, and to provide information for business and taxation purposes</p> <p>5.8 Evaluate the production performance of each enterprise to determine whether or not they are sustainable and profitable, and to use in reviewing and revising production plans</p>
6. Comply with legal	6.1 Obtain information about the legal requirements and regulations

Element	Performance criteria
requirements and regulations	<p>that affect farm land ownership/possession and livestock production</p> <p>6.2 Determine record keeping requirements, and put in place procedures to ensure compliance with the range of applicable regulations including taxation legislation</p> <p>6.3 Obtain permits from the relevant authorities for the transport and movement of livestock and equipment</p>

Assessment Requirements for AHCLSK501 Manage livestock production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop livestock production plans
- manage all resources for a grazing enterprise
- implement grazing strategies that match livestock needs and optimise pasture growth
- maintain the farm natural resource base through sustainable practice
- plan and monitor the finances of the production unit
- observe, identify and react appropriately to animal welfare, biosecurity and environmental implications and work health and safety hazards
- monitor and manage animal health, welfare and nutrition
- supervise livestock husbandry operations
- analyse and assess the economic impact of specific situations
- establish processes/strategies, procedures and controls for livestock production
- assess land capability
- comply with legal and taxation requirements
- maintain records of production.
- assess, and then adopt profitable innovations
- implement and monitor relevant work health and safety, animal welfare, biosecurity and environmental requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock nutrition
- health and welfare of animals within the production system.

- key considerations in a livestock breeding operation
- livestock husbandry and management practices
- land capability and its relevance to planning livestock production in the context of the whole farm
- sustainable land use principles and practices applicable in the region
- environmental controls and codes of practice applicable to the enterprise
- budgeting and financing for an enterprise
- cost benefit analysis,
- management practices and processes to minimise noise, odours and debris from the livestock operations
- relevant legislation and regulations relating to soil and water degradation issues, animal health and welfare, biosecurity and chemical use
- relevant work health and safety legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK502 Arrange marketing of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate markets and sales opportunities
- calculate cost of production and target sale price
- select sales outlets
- select selling method and negotiate with brokers, sellers and agents
- prepare and implement marketing plan
- ensure that the product meets legislative and industry requirements for fitness for sale
- coordinate sales and transport logistics for livestock products
- analyse sales data and trends to maximise future profit margins

Knowledge Evidence

The candidate must demonstrate knowledge of:

- market specifications for the products produced
- quality assurance procedures and their implementation
- sales outlets
- current and alternate sale methods
- preparation of livestock and transportation systems
- price risk and sales strategies
- sales analysis
- enterprise and industry policies and codes of practice with regard to livestock sales transportation, recording and reporting requirements
- market access requirements -Minimum Residue Levels (MRLs) and the variance between countries, withholding periods after treatment

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the effectiveness of a range of effluent management systems to meet the requirements of statutory, local government and environment authorities for effluent disposal
- conduct cost benefit analysis of livestock effluent management systems to select a suitable effluent management system
- design and plan the layout of an effluent system that meets environmental standards and enterprise requirements
- design an effluent management system
- incorporate the enterprise work health and safety and environmental management policies into the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, characteristics, disadvantages and advantages of effluent management systems (including storage, recycling, processing and disposal)
- regulatory requirements, including environmental, sustainability work health and safety and biosecurity requirements, industry standards, industry and enterprise production parameters, data and information for the design and planning of effluent management systems
- uses and processes for cost benefit analyses, and their applications in relation to livestock production and effluent management
- types and use of information required, and methods for the assessment and determination of effluent production, output and volume for livestock enterprises

- effects and impacts of different livestock production systems on the design and planning of effluent management systems
- types and use of information and advice from other professions or industry sectors that are relevant to livestock enterprises in the design of effluent management systems, including engineering and financial professions

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCMER301 Process customer complaints

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle formal and informal feedback and complaints from customers.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Respond to customer complaints	1.1 Process complaints as per organisational policies and procedures 1.2 Obtain, document and review reports relating to the complaints

Element	Performance criteria
	1.3 Make decisions taking into account applicable law, company policies and codes 1.4 Negotiate resolution of the complaint and seek agreement where possible 1.5 Maintain a register of complaints and disputes 1.6 Inform customer of outcome of investigation
2. Refer complaints	2.1 Identify complaints that require referral to other personnel or external bodies 2.2 Make referrals to appropriate personnel for follow up 2.3 Forward all documents and investigation reports 2.4 Ensure appropriate personnel are followed up to gain prompt decisions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMER301A Process customer complaints.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCMER301 Process customer complaints

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply organisational or industry procedures for customer complaints
- investigate the details of and background to the complaint and refer to other parties if required
- negotiate an outcome with the customer if appropriate
- process the complaint according to enterprise policy
- recommend appropriate action arising from the complaint

Knowledge Evidence

The candidate must demonstrate knowledge of:

- State/Territory/Commonwealth legislation, regulations, industry codes of practice, standards and guidelines
- organisational policy and procedures for dealing with complaints
- strategies for dealing with customer complaints
- negotiation and communication strategies
- the individual's role in processing customer complaints

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMKH401 Carry out cleaning-time tests of milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out cleaning time tests of milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for cleaning-time testing	1.1 Implement enterprise work health and safety policies 1.2 Establish protocols for the conduct of cleaning-time tests based

Element	Performance criteria
	<p>on previous testing outcomes</p> <p>1.3 Assess and record quality of water used for the cleaning process from on-site, facility or laboratory tests</p> <p>1.4 Determine the suitability and recommended concentrations of cleaning chemicals in line with prevailing water quality, facility requirements and equipment manufacturer recommendations</p> <p>1.5 Establish bacteriology of the specific facility from relevant records</p>
2. Carry out cleaning-time tests of milking equipment	<p>2.1 Identify and record details of normal cleaning routines and procedures while testing is carried out</p> <p>2.2 Install testing equipment to measure water or airflow velocities</p> <p>2.3 Carry out cleaning-time tests before or during the cleaning of the milking machines or bulk milk tank</p>
3. Report on cleaning-time test result	<p>3.1 Record and collate test results</p> <p>3.2 Interpret test report results in line with industry standards and manufacturer recommendations</p> <p>3.3 Report test results to the enterprise</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH401A Carry out cleaning-time tests of milking machines.

Links

Assessment Requirements for AHCMKH401 Carry out cleaning-time tests of milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations for cleaning-time testing
- carry out cleaning-time tests of milking equipment
- report on cleaning-time test result
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking machines and all components
- criteria and methods for assessing optimal performance of milking machines and their components
- requirements, procedures and assessment criteria for mechanical testing of milking machines and all components
- requirements, criteria and assessment methods for determining water quality and the impacts of water quality on maintenance and performance of milking machines
- requirements, criteria and assessment methods for determining bacteriology and the impacts of bacteriology on maintenance and performance of milking machines
- possible faults, problems and poor performance with milking machines and their components, impacts on milking operations and corrective actions for these faults and problems
- requirements, criteria, procedures, routines and assessment methods for optimal cleaning and hygiene of milking machines and their components

- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
- requirements, procedures and assessment criteria of cleaning-time tests and the impacts of cleaning-times on maintenance and performance of milking machines
- key aspects and components of collating, interpreting and reporting on test results to an enterprise
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMKH402 Design and fabricate milking equipment installations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and fabricate milking equipment installations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare design and	1.1 Determine facility design and installation estimates to suit the

Element	Performance criteria
installation estimates	application 1.2 Document financial and physical resources that impact on the proposed works 1.3 Identify work health and safety issues that impact on the design and construction of the facility and installation, and incorporate risk controls in the design and construction planning 1.4 Determine manpower and other resources required and submit the tender
2. Plan installation	2.1 Complete contract for work including verification of material estimates and costings 2.2 Obtain relevant building and planning permits 2.3 Ensure site planning includes consideration of environmental issues, service connections and alternative power supplies 2.4 Plan required components to match the proposed installation and source from the original equipment manufacturer 2.5 Plan the installation to eliminate hazards to people and animals during milking, cleaning or service operations
3. Facilitate the completion of the installation	3.1 Carry out job scheduling with all relevant parties 3.2 Order and take delivery of physical and material resources 3.3 Coordinate the implementation of the milking machine installation 3.4 Establish areas of responsibility for all the project participants and provide full notification

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH402A Design and fabricate milking equipment installations.

AHCMKH403 Design and install enterprise milk cooling and storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and install on-farm milk cooling and storage systems.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine cooling and	1.1 Determine available cooling water supply quantity and test the

Element	Performance criteria
storage system requirements	quality of the water supply 1.2 Ensure the planned milk cooling and storage systems meet industry standards and match enterprise and herd needs 1.3 Determine and record design considerations including appropriate siting of components 1.4 Determine work health and safety hazards, assess risks, implement controls and report as required
2. Determine milk pre-cooling requirements	2.1 Measure and record maximum peak flow of milk delivery 2.2 Check cooling water temperatures and quality against design specifications 2.3 Compare available milk cooling equipment with design requirements and select suitable equipment 2.4 Determine work health and safety and human health regulatory requirements and establish compliance targets 2.5 Determine water cooling system requirements in line with planned equipment and available resources
3. Determine milk storage requirements	3.1 Determine enterprise milk production levels and projected production increases 3.2 Establish milk entry temperature and other critical design considerations in consultation with the enterprise and from available data 3.3 Select a suitable milk vat to meet shed production requirements and bulk milk collection routines
4. Install milk cooling and storage equipment	4.1 Install plate cooler and other components of the pre-cooling system in line with established system design and industry standards 4.2 Install vat and refrigeration equipment to meet design specifications 4.3 Complete commissioning tests to ensure the operation of all elements of the cooling and storage systems comply with performance targets and milk supply quality standards
5. Operate and maintain milk cooling and storage equipment	5.1 Complete routine maintenance program requirements in line with manufacturers' recommendations 5.2 Determine repair and service requirements, including rectification of operational faults, as part of maintenance routines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH403A Design and install on-farm milk cooling and storage.

Assessment Requirements for AHCMKH403 Design and install enterprise milk cooling and storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine cooling and storage system requirements
- determine milk pre-cooling requirements
- determine milk storage requirements
- install milk cooling and storage equipment
- operate and maintain milk cooling and storage equipment
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant requirements and industry standards for design, planning, installing and operating milk cooling and milk storage systems
- types, functions, cleaning, operating, monitoring and maintenance of milk cooling and milk storage systems and all components
- requirements, components and considerations for designing, planning, siting and installing milk cooling and milk storage systems and their components, and to meet the needs of the enterprise
- requirements, criteria and assessment methods for determining water quality and the impacts of water quality on maintenance and performance of milk cooling and milk storage systems
- possible faults, problems and poor performance with milk cooling and milk storage systems and their components, impacts on enterprise operations and corrective actions for these faults and problems

- criteria and methods for assessing performance of milk cooling and milk storage systems and their components
- requirements and assessment methods for determining enterprise milk production levels
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMKH404 Install milking equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install milking equipment.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Order installation components	1.1 Complete contract for work with customer 1.2 Order specified tinware as per planned installation

Element	Performance criteria
	1.3 Ensure bending and rolling of pipe work meet specifications 1.4 Assemble components in transportable sections for transfer to site 1.5 Seek specialist advice for non-standard installations
2. Inspect and prepare installation site	2.1 Check site location, dimensions and levels 2.2 Determine work health and safety hazards, assess risks, implement controls and complete records 2.3 Report non-compliance and make alterations and corrections in consultation with the appropriate authorities 2.4 Measure installation and mark layout as per contract plans
3. Manufacture components in the workshop	3.1 Ensure vacuum pump guards and stands are made according to specifications 3.2 Ensure pipelines and vessels are manufactured and assembled according to installation design 3.3 Pre-wire electrical components 3.4 Complete non-milking systems as per dairy plan 3.5 Determine work health and safety hazards, assess risks and implement safe systems of manufacture
4. Install machine/equipment	4.1 Prepare machine/equipment components for sequential installation 4.2 Install machine/ equipment as per specifications and in co-operation with the enterprise and trade and building personnel 4.3 Carry out all work as per regulatory requirements and in compliance with the Australian Standards for Milking Equipment Installation and Performance 4.4 Determine work health and safety hazards, assess risks and implement safe systems of installation 4.5 Make modifications to standard operating procedures as required 4.6 Level, align, couple and connect machine/ equipment as per specifications, excluding electrical components
5. Commission test installed machine/equipment	5.1 Complete mechanical testing of machine/ equipment to ensure conformance to specifications, performance standards and other requirements such as work health and safety 5.2 Take corrective actions for machine/equipment performing below standards and manufacturer's specifications 5.3 Ensure final work quality and finish comply with established industry standards 5.4 Clean site, remove all leftover materials and waste, and ensure that site is safe 5.5 Record and report all alterations/modifications to machine/equipment to the appropriate authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCMKH405 Performance test milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to performance test milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit may apply to partnerships between milking machine technicians, veterinarians, dairy factory field officers, herd test personnel, detergent and chemical company representatives, original equipment manufacturer representatives, regulatory authority personnel and enterprise.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Wet test milking machine/equipment	1.1 Apply enterprise work health and safety policies 1.2 Collate relevant mechanical testing reports and outcomes as the basis for additional tests 1.3 Establish protocols for wet testing to suit individual installation requirements 1.4 Install test equipment at specific locations to complete tests 1.5 Measure and record vacuum levels and vacuum drop and identify abnormalities
2. Carry out milking-time tests of milking machine/equipment	2.1 Establish protocols for milking-time tests based on consideration of previous dry or wet testing outcomes 2.2 Install testing equipment to complete agreed tests during milking 2.3 Complete milking-time tests and record results 2.4 Submit written assessment and recommendations to the enterprise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH405A Performance test milking machines.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to assist with routine maintenance tasks for small engine machinery and associated equipment.

The unit applies to individuals who assist with routine maintenance tasks while working alongside a supervisor exercising limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for basic routine maintenance	<p>1.1 Read or listen to work instructions from supervisor and clarify where necessary</p> <p>1.2 Select tools and supplies required to carry out basic routine maintenance tasks according to job requirements</p> <p>1.3 Select, fit and use personal protective equipment applicable to job requirements</p> <p>1.4 Carry out routine pre-operational checks of machinery and equipment according to operation and maintenance manual and make adjustments where required</p> <p>1.5 Identify and segregate faulty or unsafe machinery and equipment for repair or replacement</p> <p>1.6 Identify health and safety hazards in the workplace and report safety concerns to supervisor</p>
2. Carry out basic routine maintenance	<p>2.1 Carry out greasing, lubrication and other basic servicing of machinery and equipment</p> <p>2.2 Make routine adjustments and repairs to machinery and equipment</p> <p>2.3 Use safe workplace practices and methods when undertaking basic routine maintenance tasks</p>
3. Complete basic routine maintenance activities	<p>3.1 Clean and store tools according to workplace procedures</p> <p>3.2 Clean and maintain work areas and return to operating condition</p> <p>3.3 Collect, treat and dispose or recycle waste from maintenance activities according to workplace procedures</p> <p>3.4 Report malfunctions, faults, wear or damage of tools to supervisor</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> • Use clear language to report malfunctions, faults, wear or damage to tools • Participate in verbal exchanges to respond to questions and clarify

Skill	Description
	information
Numeracy	<ul style="list-style-type: none"> Interpret machinery and equipment fluid levels including grease, oil and fuel
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> machinery and equipment damage and serviceability checking for missing parts fluid leaks and levels fuel level.
Machinery and equipment must include at least two of the following:	<ul style="list-style-type: none"> hydraulic equipment hydroplats stationary engines pumps irrigation equipment seeders harvesters balers spraying equipment hedging machines solar and wind powered equipment.

Assessment Requirements for AHCMOM101 Assist with routine maintenance of machinery and equipment

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assisted with routine maintenance tasks for at least two different types of small engine machinery and associated equipment and has:

- identified hazards and reported to supervisor
- tested machinery and equipment to identify maintenance requirements
- carried out routine repairs and adjustments required for maintenance of machinery and equipment
- cleaned and maintained work area and returned to operating condition
- applied safe and environmentally responsible workplace practices
- used oral communication skills and language competence to communicate effectively with others
- followed workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, characteristics and functions of machinery and equipment
- types, characteristics and functions of tools used in maintenance of machinery and equipment
- machinery and equipment operation and maintenance manual

- environmental impacts of machinery servicing and disposal methods for fuels, oils and other wastes
- workplace procedures applicable to health and safety in the workplace and machinery maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - maintenance tools and equipment
 - personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- relationships:
 - supervisors
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to undertake pre-start checks, operate and shut down two wheel motorbikes.

The unit applies to individuals who operate two wheel motorbikes to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare a two wheel motorbike for operation	1.1 Confirm with supervisor activity to be undertaken and that the vehicle is fit for purpose 1.2 Identify potential hazards and risks to self and implement safe

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>working practices to manage risks</p> <p>1.3 Conduct routine pre-operational checks on two wheel motorbike according to operators manual and report faults or malfunctions to supervisor for repair</p> <p>1.4 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.5 Use and fit personal protective equipment, including helmet that is fit for purpose</p> <p>1.6 Select two wheel motorbike according to rider's size, skill level and task to be completed</p> <p>1.7 Ensure any items that are to be transported on the two wheel motorbike are safely secured</p> <p>1.8 Identify and confirm areas and applications excluded to two wheel motorbike operation on the workplace safety plan</p>
2. Operate a two wheel motorbike	<p>2.1 Start up, steer, manoeuvre, position and stop two wheel motorbike in a controlled manner</p> <p>2.2 Comply with legislation and workplace safety plan in regard to carrying passengers</p> <p>2.3 Identify environmental and biosecurity implications associated with two wheel motorbike operation and minimise impact</p> <p>2.4 Identify situations where two wheel motorbike good riding techniques are required</p> <p>2.5 Apply two wheel motorbike good riding techniques to pre-position the body to assist bike stability</p> <p>2.6 Identify and avoid riding surfaces, terrain and slopes that are dangerous to safe operation</p> <p>2.7 Operate and manoeuvre over a variety of surfaces, slopes and terrain to minimise risk to safety</p> <p>2.8 Modify two wheel motorbike operation according to local weather conditions</p>
3. Conduct shut down procedures	<p>3.1 Shut down two wheel motorbike</p> <p>3.2 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.3 Store and secure two wheel motorbike</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.4 Remove and store keys in the required location 3.5 Unload, load and secure motorbike safely

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults and irregular performance or damage Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including oil and fuel Identify correct tyre pressures
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> vehicle damage and serviceability engine oil fuel brakes tyres, including pressure and condition vehicle controls.
Biosecurity implications	<ul style="list-style-type: none"> control of cross site contamination.

must include:	
Two wheel motorbike good riding techniques must include:	<ul style="list-style-type: none"> • pre-positioning and adjustment of body weight when going uphill, including standing up and body forward • pre-positioning and adjustment of body weight when going downhill, including standing up and body rearward • leaning the two wheel motorbike towards the slope and pressing hard on the outside (downhill) footrest, keeping the body weight on top of the tyre tread when riding across slopes • standing up to improve situational awareness, when operating in restricted visibility situations, rough terrains and crossing obstacles.
Unload, load and secure motorbike must include at least one of the following:	<ul style="list-style-type: none"> • trailer • transportation device • on site vehicle storage.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a two wheel motorbike on at least two different riding surface conditions and on an even, uneven and sloping terrain and has:

- operated a two wheel motorbike without a passenger
- identified hazards and risks associated with two wheel motorbike areas of operation
- identified and avoided riding surfaces, terrains and slopes that are dangerous to safe operation of two wheel motorbikes
- complied with legislation and workplace safety plan in regard to carrying passengers
- selected and worn two wheel motorbike helmet that was fit for purpose
- selected, correctly fitted, used and maintained personal protective equipment
- started, steered, manoeuvred, positioned and stopped a two wheel motorbike in a controlled manner
- applied two wheel motorbike good riding techniques to pre-position the body to assist bike stability
- unloaded, loaded and secured two wheel motorbike safely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with two wheel motorbike areas of operation
- components, controls and features of two wheel motorbikes and their functions
- two wheel motorbike functional applications
- operating principles and operating methods of two wheel motorbikes

- two wheel motorbike good riding techniques, including requirements to pre-position and adjust body weight for riding uphill, downhill and on uneven terrain
- workplace safety plan and operators manual
- impacts and consequences of substandard environmental and biosecurity practices
- load limits and two wheel motorbike capabilities and the effects to dynamic stability on the two wheel motorbike including:
 - passengers
 - weight distribution
 - load security
 - liquid or shifting loads
 - effect of load when operating on uneven or sloping terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
 - tie down devices
 - vehicle ramps
 - loading surfaces and angle
- effects of different riding surfaces and terrain conditions on the operation of two wheel motorbikes
- variations in state/territory regulations, legislation and licensing requirements in regard to two wheel motorbike use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - no riders under 16 years of age on adult sized two wheel motorbikes
 - no towing
 - helmets must be worn whilst operating two wheel motorbikes
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
 - two wheel motorbike
 - vehicle fuel
 - two wheel motorbike helmet
 - enclosed shoes
- specifications:
 - two wheel motorbike manufacturer specifications and operator manuals
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM202 Operate tractors

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and complete tractor operations under general supervision in the agriculture, horticulture and land management sectors.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare tractor for operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Source and interpret machinery operation and maintenance manual and manufacturer instructions for tractor operation 1.3 Select and maintain personal protective equipment and safety equipment according to workplace safety requirements 1.4 Fit and use personal protective equipment according to job requirements and task to be undertaken 1.5 Select and attach equipment as directed by supervisor 1.6 Conduct tractor routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor
2. Operate tractor	2.1 Carry out pre-start and start up procedures required for tractor operation 2.2 Drive and operate tractor in a smooth and controlled manner 2.3 Apply workplace environmental and biosecurity procedures associated with tractor operation and minimise impact 2.4 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.5 Complete work according to agreed plan as directed by supervisor 2.6 Report abnormal monitoring system indicators and alarms to supervisor
3. Complete tractor operation	3.1 Park tractor and conduct shut down procedures 3.2 Perform routine operational servicing according to the operation and maintenance manual 3.3 Report malfunctions, faults, irregular performance or damage to supervisor 3.4 Clean, decontaminate, secure and store tractor and attached equipment 3.5 Remove and store keys in the required location 3.6 Maintain tractor and equipment use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document tractor and equipment use
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage Participate in verbal exchanges to respond to questions and clarify instructions
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including fuel Identify correct tyre pressure or track tension
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> maintenance interval schedule daily check machine damage and serviceability guards are in place and undamaged checking for missing parts fluid leaks and levels fuel level brakes and clutch operation condition of tyres or tracks machine controls.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, safely operated and completed tractor operations under general supervision at least once and has:

- identified and reported hazards and implemented safe operating procedures
- carried out tractor pre-operational checks and reported faults to supervisor
- driven and operated a tractor safely, in a smooth and controlled manner
- operated tractors in even and uneven terrain conditions
- carried out tractor shut down procedures
- maintained tractor use records and reported faults or malfunctions
- minimised environmental impacts associated with tractor operation
- followed workplace health and safety procedures for safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor operation and maintenance manuals
- tractor steering systems and features
- features, operational functions and procedures for attached equipment
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities

- effects of various surface and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of vehicles
- health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - tractors
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - tractor operation and maintenance manual
 - industry and workplace biosecurity procedures applicable to tractor operation
 - legislation relevant to tractor operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken pre start checks, operated, maintained and shut down at least two types of basic machinery and equipment used in the agriculture, horticulture or land management sectors.

For each type, the individual must have demonstrated the following:

- identified and reported hazards and implemented safe working practices
- carried out basic machinery and equipment pre-operational checks including basic servicing and maintenance according to operation and maintenance manual
- operated basic machinery and equipment in a safe and controlled manner consistent with operation and maintenance manual and manufacturer specifications
- carried out safe shut down and storage procedures for basic machinery and equipment
- followed workplace health and safety procedures during the operation and use of basic machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with basic machinery and equipment operation
- pre-operational and safety checks for basic machinery and equipment
- operating principles and operating methods for basic machinery and equipment
- procedures for cleaning, securing and storing basic machinery and equipment
- risks associated with the operation of machinery and equipment in different types of weather and terrain conditions
- duty of care to self, others and the environment when using and operating basic machinery and equipment

- workplace procedures applicable to work health and safety requirements to operate basic machinery and equipment safely.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - a range of basic machinery and equipment
 - enclosed toe shoes
 - safety equipment and personal protective equipment applicable to the machinery and equipment being used and the task being undertaken
- specifications:
 - basic machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to basic machinery and equipment operation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM204 Undertake operational maintenance of machinery

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and completed operational maintenance of at least two types of machinery used in the agriculture, horticulture or land management sectors. For each machinery type, the individual must have demonstrated the following:

- identified and reported hazards and implemented safe working practices
- selected and prepared tools and equipment required for machinery maintenance
- carried out lubrication and operational servicing of machinery
- conducted basic diagnostic tests required for maintenance of machinery
- checked machinery components for wear and tear, replaced parts, tagged and reported defects
- collected, removed and recycled or disposed of wastes according workplace environmental procedures
- followed workplace health and safety procedures when undertaking operational maintenance of machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and uses of lubricants and other commonly used servicing materials
- operating principles of machinery including mechanical and auto-electrical systems
- servicing characteristics of plant and equipment
- types, characteristics, uses and limitations of hand power tools
- functions of components of common mechanical and hydraulic systems
- different working principles of two stroke, four stroke, petrol and diesel engines

- set-up requirements of plant and equipment, and principles of calibration
- basic diagnostic processes and techniques used to identify faults
- sourcing machinery and equipment operation and maintenance manuals
- environmental impacts of machinery maintenance and disposal of fuels, oils and other wastes
- procedures applicable to health and safety in the workplace requirements to maintain machinery safely.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery
 - maintenance tools and equipment
 - personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to machinery maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

2. Drive vehicle	<p>2.1 Carry out pre-start, and start up procedures according to workplace health and safety guidelines</p> <p>2.2 Drive vehicle in a safe and controlled manner</p> <p>2.3 Identify and anticipate driving hazards during vehicle operation</p> <p>2.4 Apply safe and defensive driving techniques for controlling hazards</p> <p>2.5 Identify environmental and biosecurity implications associated with vehicle operation and minimise impact</p>
3. Complete vehicle operation	<p>3.1 Park vehicle and conduct shut down according to workplace procedures</p> <p>3.2 Perform routine operational servicing and minor maintenance according to vehicle operation and maintenance manual</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.4 Clean, decontaminate, secure and store vehicle</p> <p>3.5 Remove and store keys according to workplace procedures</p> <p>3.6 Maintain vehicle use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about vehicle operation
Writing	<ul style="list-style-type: none"> Document vehicle usage including mileage, dates and times
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including fuel Identify correct tyre pressure
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Vehicle must include at least one of the following:	<ul style="list-style-type: none"> utilities four wheel drive vehicles light trucks.
Pre-operational checks must include:	<ul style="list-style-type: none"> vehicle damage and serviceability checking for missing parts fluid leaks and levels fuel level brakes and clutch operation condition of tyres vehicle controls.
Biosecurity implications must include:	<ul style="list-style-type: none"> control of cross-site contamination.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken pre-start checks, operated and shut down vehicles used in the agriculture, horticulture and land management sectors on at least one occasion and has:

- identified and reported hazards and implemented safe operating procedures for vehicle operation
- prepared the vehicle for use by undertaking routine pre-operational checks and maintenance tasks
- safely secured loads prior to vehicle operation
- driven the vehicle in a safe and controlled manner
- carried out vehicle shut down procedures including securing of vehicle and safe storage
- minimised environmental impacts associated with vehicle usage and operation
- followed workplace health and safety procedures during preparing vehicle for use, operation and shut down
- followed industry and workplace biosecurity procedures
- completed required documentation for vehicle use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with vehicle operations
- safety requirements for vehicle use and operation
- vehicle operation and maintenance manual
- vehicle components, controls, features, technical capabilities and limitations
- vehicle operating principles and operating methods

- load limits and the principles of weight distribution with regard to load shifting and vehicle movement
- effects of adverse surface and terrain conditions on the operation of vehicles
- duty of care to self, others and the environment when operating vehicles
- relevant legislation with regard to vehicle operation and licensing requirements
- environmental impacts relevant to operation of vehicles
- workplace procedures applicable to workplace health and safety requirements to operate a vehicle safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating vehicles
- resources, equipment and materials:
 - a range of vehicles
 - vehicle loads
 - tie down devices
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - vehicle operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to vehicle operation
 - legislation relevant to vehicle operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down dozer operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for dozer operations
- carried out dozer pre-operational checks for safe dozer operation
- driven and operated a dozer safely including modifying operating technique to meet changing work conditions
- carried out dozer shut down procedures including securing and storage of dozer
- minimised environmental impacts associated with dozer operation
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the dozer
- followed industry and workplace biosecurity procedures
- completed required documentation for loader use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with dozer operations
- dozer and site safety requirements
- dozer components, controls, features, technical capabilities and limitations
- dozer operation and maintenance manual
- duty of care to self, others and the environment
- relevant legislation with regard to dozer operation and licensing requirements
- environmental impacts relevant to the operation of dozers

- workplace procedures applicable to health and safety in the workplace requirements to operate dozer safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - dozers
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - dozer operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to dozer operation
 - legislation relevant to dozer operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM210 Conduct scraper operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and shut down scraper operations used for earthworks in an agricultural environment.

The unit applies to individuals who conduct scraper operations to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for scraper operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Source and interpret scraper operation and maintenance manual and observe manufacturer instructions</p> <p>1.3 Assess the work site and confirm the suitability of the machinery for the task</p> <p>1.4 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.5 Fit and use personal protective equipment and confirm safety equipment applicable to the task being undertaken</p> <p>1.6 Conduct scraper routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor for repair</p> <p>1.7 Observe safety rules and regulations, including site rules and legislation and site specific instructions</p>
2. Operate scraper	<p>2.1 Carry out pre-start, and start up procedures according to health and safety in the workplace guidelines</p> <p>2.2 Drive and operate scraper, and modify the operating technique to meet changing work conditions</p> <p>2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.4 Identify environmental and biosecurity implications associated with scraper operation and minimise impact</p> <p>2.5 Complete work according to the agreed plan and within the operating capacity of the equipment and operator</p>
3. Complete scraper operation	<p>3.1 Park scraper and conduct shut down procedures</p> <p>3.2 Perform routine operational servicing and minor maintenance according to scraper operation and maintenance manual</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.4 Clean, secure and store scraper in line with workplace practices</p> <p>3.5 Remove and store keys in the required location</p> <p>3.6 Maintain scraper use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

AHCMOM213 Operate and maintain chainsaws

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to safely operate a hand-held chainsaw and maintain it in working condition.

This unit applies to cross-cutting fallen timber using safe cutting techniques.

The unit applies to individuals who apply low risk work procedures and comply with worksite health and safety requirements when operating hand-held chainsaws to carry out routine work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assist in preparation of work-site	1.1 Identify location of worksite and fallen timber from scope of works and confirm with supervisor 1.2 Identify site hazards, assess risks and report to supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Confirm first aid and emergency personnel, equipment and procedures</p> <p>1.4 Document and implement site health and safety in the workplace, environmental and traffic control measures according to workplace procedures</p>
2. Recognise and apply workplace safety procedures	<p>2.1 Identify hazards and risks relevant to the maintenance and operation of chainsaws and implement safe working practices to manage risks</p> <p>2.2 Select, fit and use personal protective equipment according to workplace safety procedures</p> <p>2.3 Confirm with supervisor relevant licensing and legislative requirements with regard to the operation of chainsaws</p> <p>2.4 Transport chainsaw safely according to operation and maintenance manual</p>
3. Check and prepare chainsaw for use	<p>3.1 Select tools and materials required for maintenance</p> <p>3.2 Conduct routine checks and maintenance prior to operation, according to chainsaw operation and maintenance manual</p> <p>3.3 Calculate required fuel oil ratios prior to mixing</p> <p>3.4 Mix fuel and fuel chainsaw according to operation and maintenance manual</p> <p>3.5 Identify, tag, record and report chainsaw faults or malfunctions to supervisor</p>
4. Operate chainsaw	<p>4.1 Communicate with work team during operations using voice, hand or whistle signals</p> <p>4.2 Place supports to ensure a stable base for cutting</p> <p>4.3 Identify materials to be cut and position them for operation</p> <p>4.4 Visually assess material to be cut for defects and embedded hazards</p> <p>4.5 Determine cutting methods appropriate to material type and implement risk controls</p> <p>4.6 Select and use tools associated with chainsaw use</p> <p>4.7 Operate chainsaw to cross-cut timber using documented low risk work methods</p> <p>4.8 Identify and report work-site communication issues to supervisor</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.9 Identify and report environmental impacts of chainsaw operation to supervisor
5. Complete and check chainsaw operation	5.1 Record and report chainsaw damage, malfunction and irregular performance according to workplace procedures 5.2 Clean and store chainsaw according to workplace procedures and operation and maintenance manual 5.3 Dispose of debris from operation in accordance with environmental requirements 5.4 Maintain workplace documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document site health and safety in the workplace, environmental and traffic control measures
Oral communication	<ul style="list-style-type: none"> Use clear language to report hazards and risks and to confirm work site, first aid and emergency personnel, equipment and procedures Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate fuel oil ratios and fuel quantities
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Interact with others	<ul style="list-style-type: none"> Use verbal and non-verbal communications with work team during operations using voice, hand and whistle signals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	<ul style="list-style-type: none"> • safety helmet • mesh visor • gloves • hearing protection • safety glasses or goggles • safety boots.
Routine checks and maintenance must include at least two of the following:	<ul style="list-style-type: none"> • checking and adjusting bar • cleaning air filter • cleaning and/or replacing spark plug • sharpening chain.
Supports must include at least one of the following:	<ul style="list-style-type: none"> • fallen timber • saw horse trestle • v-shaped supports.
Cutting methods must include:	<ul style="list-style-type: none"> • pulling chains cuts (bottom of bar) • pushing chainsaw cuts (top of bar) • bore / plunge cuts (tip of bar).
Tools must include:	<ul style="list-style-type: none"> • bars • chains • files • plug spanner.

Assessment Requirements for AHCMOM213 Operate and maintain chainsaws

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a hand-held chainsaw at least once, maintained it in working condition and demonstrated the following:

- determined site location for work and work details and clarified with supervisor
- identified site hazards, assessed risks and reported to supervisor
- confirmed work zone with work crew and monitored site
- confirmed first aid and emergency personnel, equipment and procedures
- applied hazard and risk assessment and implemented controls for chainsaw use
- performed routine checks and maintenance for chainsaw usage according to operation and maintenance manual
- identified, tagged and reported chainsaw faults and malfunctions
- recorded and implemented site health and safety in the workplace, environmental and traffic control measures
- used personal protective equipment that complies with Australian Standards
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- used appropriate tools and materials to maintain chainsaw
- applied environmentally responsible workplace practices
- applied low risk work practices including stopping, disengaging quickly and dealing with foreign matter
- cleaned and stored chainsaw
- followed workplace procedures relevant to safely operating a chainsaw.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles and practice for operating chainsaws
- chainsaw routine checks and maintenance according to operation and maintenance manual, including:
 - checking and adjusting bar
 - cleaning air filter
 - cleaning and replacing spark plug
 - sharpening chain
- workplace safe operating procedures
- hazards and risks when operating a chainsaw
- relevant Australian Standards concerning chainsaw operation including use of personal protective equipment
- components of chainsaws and their respective functions
- common defects in woody materials
- cutting methods and techniques, patterns and sequence of cuts
- health and safety in the workplace requirements for the operation of a chainsaw including caution and hazard signs and symbols
- environmental impacts associated with operating chainsaws.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - personal protective equipment must be worn whilst operating chainsaw
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
 - chainsaws
 - chainsaw tools
 - wood
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - chainsaw manufacturer specifications and operator manuals
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM214 Operate cane haulage vehicle

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated a cane haulage vehicle to haul a load of cane safely and efficiently at least once and has demonstrated the following:

- identified hazards and risks associated with cane haulage vehicle operation implemented safe work practices
- carried out cane haulage vehicle pre-operational checks
- checked haulage equipment prior to use
- driven and operated a cane haulage vehicle safely including modifying operating technique to meet changing work conditions
- operated cane haulage vehicle features and attachments consistent with operation and maintenance manual and manufacturer specifications
- used safe pushing and towing practices to haul cane safely and efficiently
- carried out cane haulage vehicle shut down procedures
- minimised environmental impacts associated with cane haulage vehicle operation
- followed workplace health and safety procedures
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with cane haulage vehicle operations
- site safety requirements for cane haulage operations
- cane haulage vehicle components, controls, features, technical capabilities and limitations
- operating methods of cane haulage vehicles including pushing and towing

- principles of weight distribution with regard to load shifting and vehicle movement
- risks associated with the operation of cane haulage vehicles in different weather and terrain conditions
- cane haulage processes and spillage minimisation techniques
- cane harvesting processes as they relate to collection and haulage of harvests
- duty of care to self, others and the environment including environmental impacts relevant to the operation of cane haulage vehicles
- relevant legislation with regard to cane haulage vehicle operation and licensing requirements
- environmental impacts associated with operating a cane haulage vehicle
- workplace procedures applicable to health and safety in the workplace requirements to operate a cane haulage vehicle safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - cane haulage vehicles
 - cane
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - cane haulage vehicle operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to cane haulage vehicle operation
 - legislation relevant to cane haulage vehicle operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM215 Operate commercial lawnmowers

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to operate commercial lawnmowers to mow a lawn surface including preparation of site and equipment requirements, shutdown procedures and routine maintenance.

The unit applies to individuals who operate commercial lawnmowers to undertake routine work under general supervision with limited autonomy and accountability.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare site to be mown	1.1 Confirm site to be mown and identify potential hazards and risks including obstacles and fixtures 1.2 Implement safe working practices to manage risks including removal and replacement obstacles before and after mowing 1.3 Report abnormal conditions or changes in the appearance of the site and existing grass surface

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare equipment for mowing	<p>2.1 Select appropriate tools, equipment and machinery for site to be mown</p> <p>2.2 Calibrate lawnmower and adjust to height according to manufacturer guidelines</p> <p>2.3 Complete pre-operational checks of tools, equipment and machinery</p> <p>2.4 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>2.5 Fit and use personal protective equipment according to job requirements</p> <p>2.6 Erect safety warning notices during work periods</p>
3. Mow site surface	<p>3.1 Assess grass appearance and changes during mowing operations in line with requirements for the site</p> <p>3.2 Match implements to the lawnmower according to manufacturers' specifications</p> <p>3.3 Maintain continuous oversight of mowing activities including monitoring of hazards and risks</p> <p>3.4 Identify environmental impacts associated with operation of equipment and minimise where possible</p>
4. Complete mowing and check lawnmower operation	<p>4.1 Conduct shut down procedures in line with workplace practices</p> <p>4.2 Perform routine operational servicing and minor maintenance</p> <p>4.3 Identify and report malfunctions, faults, irregular performance or damage in required format</p> <p>4.4 Clean and store lawnmower and associated equipment in the required location</p> <p>4.5 Maintain lawnmower use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations and products
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare lawnmower use records
Numeracy	<ul style="list-style-type: none"> Calculate quantities of lawn mower fluids including oil and fuel
Oral Communication	<ul style="list-style-type: none"> Use clear language to report abnormal conditions, changes to site appearance, malfunctions, faults, irregular performance or damage
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Get the work done	<ul style="list-style-type: none"> Take responsibility for routine decisions about operating commercial lawnmowers and reflect on outcomes to identify effectiveness of decisions

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	<ul style="list-style-type: none"> hearing protection eye protection gloves safety footwear long trousers.
Routine operational servicing and minor maintenance must include:	<ul style="list-style-type: none"> engine oil fuel cutting blades.

Assessment Requirements for AHCMOM215 Operate commercial lawnmowers

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has mown a commercial site using a commercial lawnmower at least once and has:

- determined the condition of the existing grass surface and sought advice for subsequent routine preparations and treatments
- prepared site and equipment used for mowing
- used lawnmower, equipment, machinery and implements according to manufacturer specifications
- operated a commercial mower safely including making adjustments for attached implements and modifying techniques to meeting changed conditions
- minimised environmental impacts associated with lawnmower operation
- implemented lawnmower shut down procedures
- carried out routine servicing and maintenance and recorded malfunctions, faults or irregular performance
- cleaned and stored mower according to workplace guidelines
- followed workplace health and safety procedures for safe use and operation of commercial lawnmowers.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of grass preparation
- preparation methods and treatments required for optimal maintenance of grass surfaces
- effect of adverse outdoor climatic conditions on commercial lawnmower operations
- use of lawnmower, equipment, machinery and implements according to manufacturer specifications
- commercial lawnmower operation and maintenance requirements
- hazards and risks associated with commercial lawnmower operation

- environmental impacts relevant to the operation of commercial lawnmowers
- workplace procedures applicable to health and safety in the workplace requirements to operate a commercial lawnmower safely.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - commercial lawn mower
 - lawnmower implements
 - personal protective equipment specific to lawnmower operation
- specifications:
 - lawn mower manufacturer specifications and manufacturer guidelines
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM216 Operate side by side utility vehicles

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely operate a side by side utility vehicle including undertaking pre-start checks and shut down procedures.

The unit applies to individuals who operate side by side utility vehicles to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1.Prepare side by side utility vehicle for use	<p>1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks</p> <p>1.2 Conduct routine pre-operational checks on the vehicle according to operators manual and report faults or malfunctions for repair</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Use, wear and correctly fit personal protective equipment including helmets that are fit for purpose according to operators manual</p> <p>1.5 Attach equipment and loads that do not exceed the weight limitations of the vehicle</p> <p>1.6 Secure loads to ensure safe transport</p>
2. Operate side by side utility vehicle	<p>2.1 Start up, steer, manoeuvre, position and stop side by side utility vehicle in a controlled manner</p> <p>2.2 Identify environmental and biosecurity implications associated with side by side utility vehicle operation and minimise impact of vehicle use</p> <p>2.3 Apply side by side utility vehicle driver skills</p> <p>2.4 Operate side by side utility vehicles in accordance with task requirements, conditions and operators manual</p> <p>2.5 Identify and avoid riding surfaces, terrains and slopes that are dangerous to safe operation</p> <p>2.6 Operate and manoeuvre over a variety of surfaces, slopes and terrain to minimise risk to safety</p> <p>2.7 Modify side by side utility vehicle operation according to local weather conditions</p> <p>2.8 Ensure that vehicle seat belts and other safety features are functional and correctly fitted</p>
3. Complete side by side utility vehicle operation	<p>3.1 Shut down side by side utility vehicle</p> <p>3.2 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.3 Park and secure side by side utility vehicle</p> <p>3.4 Remove and store keys in the required location</p> <p>3.5 Unload, load and secure side by side utility vehicle safely</p> <p>3.6 Maintain vehicle use records for servicing purposes in line with workplace practices</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults and irregular performance or damage Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including oil and fuel Calculate load volumes and weights Identify correct tyre pressure
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> vehicle damage and serviceability fuel brakes tyres including pressure and condition vehicle controls.
Personal protective equipment must include:	<ul style="list-style-type: none"> a suitable helmet according to operators manual enclosed toe shoes
Side by side utility vehicle driver skills must include:	<ul style="list-style-type: none"> parking across the slope when parking on a hill or gradient on-board weight distribution load security crossing obstacles avoiding hazards.
Safety features must include at least three of	<ul style="list-style-type: none"> roll-over protective structure seat belts

the following:	<ul style="list-style-type: none"> • side nets • doors • occupant hand holds • tyre selection and inflation pressure.
Unload, load and secure side by side utility vehicle must include at least one of the following:	<ul style="list-style-type: none"> • trailer • transportation device • on site vehicle storage.

Assessment Requirements for AHCMOM216 Operate side by side utility vehicles

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a side by side utility vehicle on at least two riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with side by side utility vehicle use
- identified and avoided driving surfaces, terrains and slopes that are dangerous to safe operation of side by side utility vehicles
- selected and worn side by side utility vehicle helmet that is fit for purpose according to operators manual
- selected, fitted and used other personal protective equipment that is required for the task
- maintained personal protective equipment in suitable condition for use
- unloaded the side by side utility vehicle safely and checked it is safe to use
- operated and manoeuvred side by side utility vehicles in different surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a side by side utility vehicle in a controlled manner
- selected appropriate modes of operation and applied side by side utility vehicle driver skills to assist vehicle stability
- parked the side by side utility vehicle safely and checked for any damage, malfunctions or faults
- loaded and secured side by side utility vehicle safely
- minimised environmental impacts associated with side by side utility vehicle operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with side by side utility vehicle areas of operation

- components, controls, modes and features of side by side utility vehicles and their functions
- side by side utility vehicle functional applications, including:
 - occupant hand holds, correct use, importance of reach and keeping body parts inside vehicle
 - roll-over protective structure
 - tyre selection and inflation pressure
 - side nets and doors
- operating principles and operating methods of side by side utility vehicles
- workplace safety plan for operating and maintaining side by side utility vehicles
- side by side utility vehicle operator's manual
- side by side utility vehicle driver skills, including higher level two foot pedal operation skills, for technical applications
- effects of different surfaces and terrain conditions on the operation of side by side utility vehicle
- load limits and attachments specific to side by side utility vehicle capabilities and the effects to dynamic stability of the side by side utility vehicle including:
 - weight distribution
 - load security
 - liquid or shifting loads
 - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
 - tie down devices
 - vehicle ramps
 - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to side by side utility vehicle use
- environmental impacts associated with operating side by side utility vehicles and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - helmets must be worn whilst operating side by side utility vehicles according to operators manual
- resources, equipment and materials:
 - side by side utility vehicle
 - vehicle fuel

- side by side utility vehicle helmet as identified by operator manual
- enclosed toe shoes
- specifications:
 - side by side utility vehicle manufacturer specifications and operator manuals
 - industry and workplace biosecurity procedures applicable to side by side utility vehicle operation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM217 Operate quad bikes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a quad bike on at least two different riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with quad bike areas of operation
- identified and avoided riding surfaces, terrains and slopes that are dangerous to safe operation of quad bikes
- identified and confirmed quad bike no go areas
- selected, fitted and used quad bike helmet and other personal protective equipment that was fit for purpose
- maintained personal protective equipment in suitable condition for use
- unloaded the quad bike safely and checked it is safe to use
- operated and manoeuvred quad bikes in different riding surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a quad bike in a controlled manner
- applied quad bike active riding techniques to reposition operator body weight to assist bike stability
- parked the quad bike safely and checked for any damage, malfunctions and faults
- loaded and secured the quad bike safely
- minimised environmental impacts associated with quad bike operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with quad bike areas of operation including quad bike no go areas
- components, controls and features of quad bikes and their functions
- quad bike functional applications, including appropriate selection of machine for task

- workplace safety plan for operating and maintaining quad bikes
- quad bike operator's manual
- operating principles and operating methods of quad bikes
- circumstances when quad bike active riding techniques should be applied
- quad bike active riding techniques, including both when and when not to apply quad bike active riding techniques
- effects of different riding surfaces and terrain conditions on the operation of quad bikes
- load limits and attachments specific to quad bike capabilities and the effects to dynamic stability of the quad bike, including:
 - weight distribution
 - load security
 - liquid or shifting loads
 - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
 - tie down devices
 - vehicle ramps
 - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to quad bike use
- environmental impacts associated with operating quad bikes and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - no passengers on single seat quad bikes
 - no riders under 16 years of age on adult sized quad bikes
 - no towing
 - helmets must be worn whilst operating quad bikes
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
 - quad bike
 - vehicle fuel
 - a suitable quad bike helmet
 - enclosed toe shoes

- specifications:
 - quad bike operation and maintenance manual
 - industry and workplace biosecurity procedures applicable to quad bike operation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has coordinated maintenance and repair of machinery and equipment for a small enterprise and has:

- identified workplace hazards, assessed risks and implemented safe workplace procedures
- interpreted documentation associated with work site activities
- sought specialist advice on repairs requiring specialist attention
- established priorities for repair and maintenance work to be carried out
- co-ordinated staff and resources to achieve work priorities
- minimised environmental impacts of machinery and equipment maintenance and repair activities
- responded to contingencies and taken corrective actions where necessary
- documented activities, timelines and material usage
- applied workplace health and safety procedures when organising and conducting maintenance and repair activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery required for the project
- environmental impacts of machinery and equipment maintenance and repair work and disposal of fuels, oils and other wastes

- workplace procedures applicable to health and safety in the workplace, and machinery and equipment maintenance and repair.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - maintenance tools and equipment
 - material resources
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken maintenance of machinery that is used principally in agriculture, horticulture or conservation and land management work at least once and has:

- identified workplace hazards, assessed risks and implemented safe workplace procedures
- carried out engine and equipment inspection and maintenance
- carried out transmission inspection and maintenance
- carried out lubrication and replacement of oils and filters
- checked machinery and equipment components for wear and tear, replaced parts, tagged and reported defects
- minimised environmental impacts associated with undertaking machinery maintenance
- maintained machinery and equipment components
- recorded details of maintenance and monitoring
- applied workplace health and safety procedures when undertaking machinery maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- engine function principles
- turbo charging and after cooling
- assessing engine specifications in line with power requirements
- engine electric and hydraulic indicators and gauges
- transmission and drive systems
- machinery and equipment operation and maintenance manual

- environmental impacts of machinery servicing and disposal of fuels, oils and other wastes
- workplace procedures applicable to health and safety in the workplace and machinery maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - maintenance tools and equipment
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated agricultural or horticultural machinery and equipment at least once and has:

- identified and reported workplace hazards and implemented safe operating procedures
- carried out machinery and equipment pre-operational checks including basic servicing and maintenance according to operation and maintenance manual
- operated machinery and equipment in a safe and controlled manner consistent with task requirements, conditions, operation and maintenance manual and manufacturer specifications
- attached ancillary equipment and checked for correct operation
- carried out machinery shut down procedures
- recognised, reported and documented defects in equipment and machinery and operational capacity
- cleaned, secured and stored machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with machinery and equipment operation
- pre-operational and safety checks for machinery and equipment according to operation and maintenance manual
- operating principles and operating methods for machinery and equipment
- procedures for cleaning, securing and storing machinery, equipment and materials
- risks associated with the operation of machinery and equipment in different weather conditions and difficult terrain conditions

- duty of care to self, others and the environment
- workplace procedures applicable to health and safety in the workplace requirements for operating machinery and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating machinery and equipment
- resources, equipment and materials:
 - a range of machinery and equipment
 - enclosed toe shoes
 - safety equipment and personal protective equipment applicable to the machinery and equipment being used and the task being undertaken
- specifications:
 - machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to machinery and equipment operation
 - records must include details of the machinery and equipment that the individual was assessed on
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM306 Ground spread fertiliser and soil ameliorant

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare and undertake activities required to ground spread fertiliser and soil ameliorants.

This unit applies to individuals who apply industry codes of practice and operating principles to ground spread fertiliser and soil ameliorants under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, manufacturer specifications, sustainability and biosecurity practices.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm customer	1.1 Confirm with customer that fertiliser or soil ameliorant products to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	<p>be spread are consistent with customer order</p> <p>1.2 Verify with customer that technical specification of products are acceptable for job</p> <p>1.3 Confirm fertiliser order documentation with customer to enable depot and factory traceability</p> <p>1.4 Document spreading services agreement according to workplace requirements and industry code of practice</p>
2. Identify features of target area	<p>2.1 Identify and agree with customer on the location and boundaries of area to be treated and document according to workplace requirements and industry code of practice</p> <p>2.2 Visually assess soil type and condition or seek advice from customer</p> <p>2.3 Identify environmentally sensitive areas and plan operations to ensure minimum adverse impact and compliance with required buffer zones</p> <p>2.4 Inspect and identify features that present a hazard to the operation, consult with customer and take appropriate action to minimise risks</p> <p>2.5 Identify the location of services and utilities in consultation with customer and adjust proposed spreading operation</p> <p>2.6 Identify local weather and climate conditions and take into account potential impacts when preparing for operation</p>
3. Perform pre-spreading checks	<p>3.1 Determine rate of spreading and calculate buffer zone allowance</p> <p>3.2 Ensure machinery and equipment are clean of soil and/or plant material before it is moved onto site</p> <p>3.3 Prepare, set up, calibrate and confirm serviceability of machinery and equipment according to workplace procedures and manufacturer instructions</p>
4. Spread products	<p>4.1 Select and maintain personal protective equipment to be used by operator and all personnel involved in spreading tasks</p> <p>4.2 Fit and use personal protective equipment according to job requirements and task to be completed</p> <p>4.3 Apply fertiliser or soil ameliorant in a manner that complies with guidelines on buffer zones and minimises run off into waterways and drains</p> <p>4.4 Monitor meteorological conditions before and during application</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>and modify operations as required</p> <p>4.5 Identify environmental and biosecurity implications associated with fertiliser or ameliorant application and minimise impact</p> <p>4.6 Follow any existing site quarantine or biosecurity protocols</p> <p>4.7 Continually monitor workplace hazards and risks, and ensure safety of self, other personnel and equipment</p>
5. Shut down equipment and undertake maintenance requirements	<p>5.1 Conduct shut down procedures required for ground spread of fertiliser and ameliorant equipment</p> <p>5.2 Clean and check serviceability of machinery, equipment and hand tools</p> <p>5.3 Perform basic preventative maintenance</p> <p>5.4 Record faults for remedial action according to workplace procedures</p> <p>5.5 Return machinery, equipment and hand tools to depot or storage area according to workplace procedures</p> <p>5.6 Complete operational records according to workplace procedures and industry code of practice</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information, including maps to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document fertiliser and soil ameliorant order and spreading services agreement Complete operational records
Oral communication	<ul style="list-style-type: none"> Use clear language to confirm with customer fertiliser or soil ameliorant products for spreading prior to use Participate in verbal exchanges to respond to questions and clarify information

Skill	Description
Numeracy	<ul style="list-style-type: none"> Record quantities of fertiliser and soil ameliorant
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Interact with others	<ul style="list-style-type: none"> Use appropriate language and communication skills to disseminate information to operator and personnel involved in spreading tasks about location of spreading services, buffer zones and personal protective equipment for operators and other personnel

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Machinery must include at least one of the following:	<ul style="list-style-type: none"> tractors other drive equipment.
Personal protective clothing and equipment must include:	<ul style="list-style-type: none"> protective clothing respirators protective eyewear unlined rubber or plastic gloves neoprene or nitrile boots.
Biosecurity implications must include:	<ul style="list-style-type: none"> control of cross-site contamination.

Assessment Requirements for AHCMOM306 Ground spread fertiliser and soil ameliorant

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated fertiliser and soil ameliorant spreading equipment and machinery at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- assessed environmental and physical hazards that may be encountered when undertaking ground spreading operations and taken appropriate action to minimise risks
- communicated with clients to ensure a common understanding and agreement of task to be undertaken
- used maps and interpreted written instructions regarding areas to be spread including types of products and application rates
- maintained, calibrated and operated ground spreading equipment according to operation and maintenance manual, manufacturer specifications and in line with industry standards for uniformity of application
- monitored weather conditions during ground spreading operations and adjusted operations to minimise risk to local environment and personnel in the vicinity
- minimised environmental impacts associated with fertiliser and soil ameliorant application including attention to buffer zones and run-off
- applied fertiliser or soil ameliorants at rate agreed by customer to specified land area
- implemented shut down procedures including cleaning, securing, and safe storage of machinery
- completed operational and equipment maintenance records according to workplace procedures
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with fertiliser and soil ameliorant application, and machinery and equipment operation
- fertiliser and soil ameliorant machinery and equipment operating components, controls, features, technical capabilities and limitations
- operational limits of equipment with regard to uniformity of application and potential health and safety implications
- spreading characteristics of different fertiliser and soil ameliorant products
- environmental impacts associated with fertiliser spreading including hazards to waterways
- purpose of buffer zones
- methods of monitoring local weather conditions and the effects of changes on ground spreading activities
- operating principles and operating methods of fertiliser and soil ameliorant machinery and equipment
- procedures for cleaning, securing and storing fertiliser and soil ameliorant machinery, equipment and tools
- workplace procedures applicable to fertiliser and soil ameliorant application
- workplace procedures applicable to health and safety in the workplace and fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating fertiliser and soil ameliorant machinery
- resources, equipment and materials:
 - fertiliser and soil ameliorant machinery, equipment and tools
 - fertiliser or soil ameliorant products
 - protective clothing
 - respirators
 - protective eyewear
 - unlined rubber or plastic gloves
 - neoprene or nitrile boots

- safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - fertiliser and soil ameliorant machinery and equipment operation and maintenance manuals and manufacturer specifications
 - industry code of practice applicable to fertiliser and soil ameliorant application
 - industry and workplace biosecurity procedures applicable to fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOMB07 Operate a cane harvester

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and complete cane harvester operations in the sugar cane production industry.

The unit applies to individuals who operate cane harvesters under broad direction, and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare cane harvesting equipment for use	1.1 Confirm work activity to be undertaken, including identifying potential hazards and risks implementing safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Source and interpret relevant cane harvester operation and maintenance manual and manufacturer instructions</p> <p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Fit and use personal protective equipment according to job requirements and applicable to task to be undertaken</p> <p>1.5 Conduct cane harvester routine pre-operational checks</p> <p>1.6 Document damaged or worn components and organise for replacement according to workplace procedures</p> <p>1.7 Conduct cabin drill according to workplace procedures</p> <p>1.8 Locate and select crop class, variety and field for harvest</p>
2. Carry out cane harvesting	<p>2.1 Carry out pre-start, and start up procedures</p> <p>2.2 Set and operate cane harvester in a safe, controlled and correct manner and monitor for performance and efficiency</p> <p>2.3 Operate cane harvester in co-ordination with cane haulage vehicles and other associated harvesting equipment</p> <p>2.4 Harvest cane in a productive, safe and controlled manner and consign according to workplace procedures</p> <p>2.5 Identify environmental and biosecurity implications associated with cane harvesting and undertake activities to minimise impact</p> <p>2.6 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p>
3. Complete cane harvesting operations	<p>3.1 Park cane harvester and conduct shut down procedures according to workplace practices</p> <p>3.2 Perform routine operational servicing and minor maintenance</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures</p> <p>3.4 Clean and sterilise cane harvester to prevent cross-site contamination</p> <p>3.5 Store and secure cane harvester</p> <p>3.6 Remove and store keys in the required location</p> <p>3.7 Maintain cane harvester use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a cane harvester to harvest a commercial crop of cane at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out cane harvester pre-operational checks according to operation and maintenance manual
- checked cane harvester equipment prior to use
- familiarised self with field and local conditions for harvest
- set and operated a cane harvester in a safe, controlled and correct manner and monitored for performance and efficiency
- operated cane harvester consistent with operation and maintenance manual and manufacturer specifications
- recognised and reported defects in cane harvester equipment and operational capacity
- communicated and co-operated with relevant personnel including haul-out drivers
- controlled and minimised cane spillage
- carried out cane harvester shut-down procedures
- cleaned and sterilised the harvester to prevent cross-site contamination
- minimised environmental impacts associated with cane harvester operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with cane harvester operations

- cane harvester and site safety requirements
- cane harvester components, controls, features, technical capabilities and limitations
- operating principles and operating methods for cane harvesters
- cane harvester processes and spillage minimisation techniques
- harvest and haulage processes as they relate to collection and haulage of harvests
- principles of the safe removal of obstacles from harvesters and adjustment of harvester settings
- duty of care to self, others and the environment
- relevant legislation with regard to cane harvester operation and licensing requirements
- environmental impacts associated with operating cane harvesters
- workplace procedures applicable to health and safety in the workplace and operating a cane harvester safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - in a range of weather and surface conditions and on a range of different terrains
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating cane harvester
- resources, equipment and materials:
 - cane harvester
 - cane
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - cane harvester operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to cane harvesting
 - legislation relevant to cane harvester operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM308 Operate broadacre and row crop harvest machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to operate harvest machinery and equipment used for broadacre and row crop harvesting in the agriculture and horticulture sectors.

This unit applies to individuals who operate broadacre or row crop harvesting machinery and equipment under broad direction, and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

AHCMOMB311 Operate precision control technology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to operate precision technology used for the control of specialised machinery and equipment and to optimise specialised machinery performance.

The unit applies to individuals who operate precision control technology under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare precision technology for use	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Source and interpret relevant precision control technology

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	operation and maintenance manual and manufacturer instructions 1.3 Conduct precision control technology routine pre-operational checks according to workplace practices 1.4 Record minor routine servicing and housekeeping tasks in line with workplace processes 1.5 Check ancillary equipment for correct operation 1.6 Check that data complies with job specifications
2. Operate precision technology	2.1 Operate precision control technology according to operation and maintenance manual, manufacturer specifications, task requirements and conditions 2.2 Monitor activities to ensure that machinery is operating in an efficient and controlled manner and make adjustments as required 2.3 Monitor and assess hazards and risks, and ensure safety of self, other personnel and associated equipment 2.4 Identify and assess impacts on the environment of precision control equipment operation and undertake activities to minimise
3. Complete work	3.1 Conduct shut down procedures for precision control equipment according to workplace practices 3.2 Download data and complete operational records 3.3 Perform basic diagnostic procedures as required according to job specifications 3.4 Identify and report malfunctions, faults and irregular performance or damage according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations

Skill	Description
Writing	<ul style="list-style-type: none"> Complete operational records
Numeracy	<ul style="list-style-type: none"> Check and compare precision control technology data against job specifications Download and interpret precision control technology data and record in operational records
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Precision control technology must include at least one of the following:	<ul style="list-style-type: none"> on-board Global Positioning System (GPS), Global Navigation Satellite System (GNSS) or Differential Global Positioning System (DGPS) precision control equipment fixed GPS, GNSS or DGPS precision control equipment.
Pre-operational checks must include at least one of the following:	<ul style="list-style-type: none"> precision control technology equipment damage and serviceability Automatic Section Control measurement check equipment dimension check GPS offset setting.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has used precision control technology in the operation of agricultural or horticultural machinery at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out precision control technology pre-operational checks according to operation and maintenance manual
- used technology to operate machinery in an efficient and controlled manner
- minimised environmental impacts associated with use of precision control technology to operate machinery
- performed routine maintenance tasks
- performed basic diagnostic procedures
- downloaded and uploaded data for the task
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- manufacturer specifications and requirements for:
 - precision control technology pre-operational checks
 - precision instrument controls, feature and functions
 - minor servicing requirements
- uploading and downloading of data produced during the operation of precision control machinery and associated equipment
- components and controls features and functions of equipment
- diagnostic techniques for operational performance

- characteristics, technical capabilities and limitations of associated machinery and equipment
- environmental impacts of using precision control technology to operate machinery.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating precision control technology equipment
- resources, equipment and materials:
 - precision control technology equipment
- specifications:
 - precision control technology equipment operation and maintenance manuals
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM312 Operate row crop planting and seeding machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to operate machinery and equipment required for row crop planting and seeding in agriculture and horticulture sectors.

The unit applies to individuals who operate row crop planting and seeding machinery and equipment under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare row crop planting and seeding machinery for use	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Source and interpret relevant planting and seeding machinery and equipment operation and maintenance manual and manufacturer instructions</p> <p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Fit and use personal protective equipment according to job requirements and applicable to task to be undertaken</p> <p>1.5 Conduct planting and seeding machinery and equipment routine pre-operational checks</p> <p>1.6 Document damaged or worn components and organise for replacement according to workplace procedures</p> <p>1.7 Attach ancillary equipment and check for correct operation</p>
2. Operate row crop planting and seeding machinery and equipment	<p>2.1 Carry out machinery pre-start, and start up procedures according to workplace practices</p> <p>2.2 Operate planting and seeding machinery in a safe, controlled and efficient manner and monitor for performance and efficiency</p> <p>2.3 Operate planting and seeding machinery according to operation and maintenance manual, manufacturer specifications, task requirements and conditions</p> <p>2.4 Identify environmental and biosecurity implications associated with row crop planting and seeding machinery usage and undertake activities to minimise impact</p> <p>2.5 Continually monitor hazards and risks, and ensure safety of self, other personnel and equipment</p>
3. Complete work	<p>3.1 Conduct shut down procedures for row crop planting and seeding machinery and equipment according to workplace requirements and manufacturers' specifications</p> <p>3.2 Perform routine operational servicing and minor maintenance</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures</p> <p>3.4 Clean, store and secure planting and seeding machinery and equipment</p> <p>3.5 Maintain planting and seeding machinery use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document planting and seeding machinery use
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage
Numeracy	<ul style="list-style-type: none"> Identify correct tyre pressure
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> machine damage and serviceability checking for missing parts condition of tyres.
Biosecurity implications must include:	<ul style="list-style-type: none"> control of cross-site contamination.

Assessment Requirements for AHCMOMB12 Operate row crop planting and seeding machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated row crop planting and seeding machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out planting and seeding machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in row crop planting machinery and equipment and operational capacity
- attached and detached ancillary equipment
- operated planting and seeding machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and conditions
- followed planting requirements
- minimised environmental impacts associated with row crop planting and seeding machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with row crop planting and seeding machinery and equipment operations
- planting and seeding machinery and equipment components, controls, features, technical capabilities and limitations

- manufacturer requirements and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - planned and emergency shut down procedures
- environmental impacts associated with operating machinery and equipment used for row crop planting and seeding
- workplace procedures applicable to health and safety in the workplace for row crop planting and seeding machinery and equipment operation
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - in a range of weather and surface conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating row crop planting and seeding machinery
- resources, equipment and materials:
 - row crop planting and seeding machinery and equipment
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - row crop planting and seeding machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to row crop planting and seeding
- relationships:
 - supervisors
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM313 Operate mobile irrigation machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated either lateral or centre pivot mobile irrigation machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out mobile irrigation machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in mobile irrigation machinery and equipment and operational capacity
- attached and detached ancillary equipment
- operated mobile irrigation machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and conditions
- shut down machinery and equipment and recorded usage
- minimised environmental impacts associated with mobile irrigation machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with mobile irrigation machinery and equipment operations
- mobile irrigation machinery and equipment components, controls, features, technical capabilities and limitations
- manufacturer requirements and workplace requirements for:

- pre-operational checks
- machinery operation techniques
- operator level servicing
- planned and emergency shut down procedures
- health and safety in the workplace procedures applicable to mobile irrigation machinery and equipment operation
- environmental impacts associated with operating machinery and equipment used for mobile irrigation
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating mobile irrigation machinery
- resources, equipment and materials:
 - mobile irrigation machinery and equipment
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - mobile irrigation machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to mobile irrigation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOMB314 Transport machinery

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to load, transport and unload machinery used for earth-moving and agricultural operations.

The unit applies to individuals who transport machinery under broad direction, and take responsibility for their own work.

Vehicles must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Load machines	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe workplace procedures for transporting machinery and managing risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Prepare trailer, low loader or float for loading according to contractor policy 1.3 Load machine according to safe operating procedures and workplace procedures 1.4 Complete tie down procedures according to industry practice 1.5 Secure machine to prevent movement in transport according to industry practice 1.6 Display signs indicating oversized loads according to legislative requirements 1.7 Arrange permits, clearances and escorts for transporting oversized loads
2. Transport machines	2.1 Plan transport route ensuring compliance with oversized loads, permits, clearances and relevant legislation 2.2 Drive machines on or off road in compliance with relevant licensing requirements and regulations 2.3 Transport machinery safely to destination according to licensing requirements and regulations
3. Unload machines	3.1 Complete untie procedures according to industry practice 3.2 Unload machines according to safe operating procedures and workplace procedures 3.3 Complete workplace documentation in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Load must include at least one of the following:	<ul style="list-style-type: none"> • side loaded • rear loaded.
Tie down must include at least one of the following:	<ul style="list-style-type: none"> • webbing straps • chains • wire rope • polypropylene or nylon filament rope • clevis claw hook • grab hook • ratchet hook.

Assessment Requirements for AHCMOM314 Transport machinery

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has loaded, transported and unloaded large machinery used for earthmoving or agricultural operations at least once and has:

- identified hazards and risks and implemented safe work practices and procedures
- safely loaded and unloaded large earthmoving or agricultural machinery
- secured machinery as a transport load
- provided an escort for wide loads
- arranged permits and escorts as required by legislation
- driven machinery to destination, complying with requirements for moving wide loads
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation pertaining to transport of heavy vehicles and machinery
- machinery operating principles and operating methods used for earth moving and agricultural operations
- tying down procedures for large machinery
- relevant legislation with regard to vehicle operation and licensing requirements
- workplace procedures relevant to health and safety in the workplace requirements to transport machinery safely
- industry practice and workplace procedures relevant to transport of machinery.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating machinery
- resources, equipment and materials:
 - a range of machinery
 - tie down devices
- specifications:
 - machinery operation and maintenance manuals
 - legislation relevant to vehicle operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM315 Operate chemical application machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that, on at least one occasion, the individual has calibrated, operated and cleaned specialised liquid or granular chemical application machinery and equipment and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out chemical application machinery and equipment pre-operational checks according to operation and maintenance manual
- sourced and interpreted relevant Safety Data Sheets (SDS)
- performed minor maintenance
- recognised and documented defects in chemical application machinery and equipment and operational capacity
- attached and detached ancillary equipment
- calibrated and set up application components
- operated chemical application machinery according to operation and maintenance manual, manufacturer specifications, task requirements and regulatory requirements
- assessed and minimised spray drift risk
- completed operational records according to legislative and regulatory requirements
- minimised environmental impacts associated with chemical application machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with chemical application machinery and equipment operations
- categories of information contained in SDS
- chemical application machinery and equipment components, controls, features, technical capabilities and limitations
- manufacturer requirements and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - planned and emergency shut down procedures
- features and functions of chemical application equipment components, including:
 - liquid spray; nozzles, tanks, agitation systems, pumps, filters, pressure regulation valves
 - granular applicators/dusters; hoppers, flow control valves
- effects of meteorological conditions on chemical application
- legislative and regulatory requirements applicable to chemical application
- workplace procedures applicable to health and safety in the workplace for chemical application machinery and equipment operation
- environmental impacts associated with operating chemical application machinery and equipment including spray drift
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating chemical application machinery
- resources, equipment and materials:
 - chemical application machinery and equipment
 - protective clothing
 - respirators
 - protective eyewear
 - unlined rubber or plastic gloves
 - neoprene or nitrile boots
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:

- chemical application machinery and equipment operation and maintenance manuals and manufacturer specifications
- legislative and regulatory requirements applicable to chemical application
- industry and workplace biosecurity procedures applicable to chemical application
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM316 Refuel machinery or vehicle

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to receive and store bulk fuel, prepare for refuelling, refuel machinery or vehicle and complete refuelling.

The unit applies to individuals who refuel machinery or vehicles under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Receive and store bulk fuel	1.1 Identify regulatory and industry requirements for the receipt and storage of bulk fuel, and refuelling operations 1.2 Identify health and safety hazards in the workplace, assess risks and implement suitable controls

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify dangers of volatile fuel liquids and vapours</p> <p>1.4 Locate and check firefighting and spill response equipment, and replace faulty equipment according to manufacturer specification</p> <p>1.5 Ensure facilities for storage of bulk fuel meet national standards</p> <p>1.6 Check bulk fuel storage facilities to ensure fuel quality is maintained during storage</p> <p>1.7 Check storage facilities and refuelling equipment for leaks</p> <p>1.8 Receive bulk fuel into storage according to regulatory requirements and workplace procedures</p> <p>1.9 Complete documentation for receipt of bulk fuel according to workplace procedures</p> <p>1.10 Monitor bulk fuel during storage to maintain fuel quality and usage</p>
2. Assessment Requirements for AHCMOM316 Refuel machinery or vehicle

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has received and stored bulk fuel and has refuelled machinery or a vehicle on at least one occasion and has demonstrated the following:

- identified health and safety hazards in the workplace, assessed risks and implemented suitable controls
- received and stored bulk fuel according to workplace and regulatory requirements
- prepared for refuelling of machinery or a vehicle from fixed storage and from a portable container
- refuelled machinery or vehicle from fixed storage
- refuelled machinery or vehicle from portable containers
- completed refuelling according to workplace procedures
- completed required documentation
- minimised environmental impacts associated with machinery and vehicle refuelling
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulatory and industry requirements for the receipt and storage of bulk fuel, and refuelling operations
- health and safety in the workplace procedures relevant to machinery and vehicle refuelling
- types, use and maintenance of personal protective equipment
- types, features and use of fuels for machinery and vehicles
- requirements, types, features and facilities used to store and receive fuel

- workplace procedures for checking fuel storage facilities, refuelling equipment and fuel transfer equipment for leaks
- types, features, use, maintenance and storage of fuel transfer and refuelling equipment
- risks and dangers associated with volatile fuel liquids and vapours, and mitigation and protection measures
- procedures for emptying fuel transfer equipment and checking that they are empty of residual fuel
- methods and procedures for securing portable fuel containers during transport
- environmental impacts of fuel leaks and spills
- types, features, use and maintenance of firefighting and spill response equipment
- legislation and workplace procedures relevant to containment methods and equipment for fuel spills
- workplace procedures applicable to environmental protection and sustainability procedures for mitigation and protection measures for fuel spills.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when refuelling machinery or vehicles
- resources, equipment and materials:
 - a range of machinery or vehicles
 - refuelling equipment
 - fuel
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery or vehicle operation and maintenance manuals
 - regulations, legislation, industry requirements, manufacturer specifications and workplace procedures relevant to machinery and vehicle refuelling and fuel storage requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOMB317 Operate tractors with attachments

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and maintain tractor operations with attached equipment.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors with attachments under broad direction and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare tractor for operation	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>risks</p> <p>1.2 Source and interpret relevant machinery operation and maintenance manual and manufacturer instructions</p> <p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Fit and use personal protective equipment required for safe tractor operation and task to be undertaken</p> <p>1.5 Conduct tractor routine pre-operational checks according to operation and maintenance manual</p> <p>1.6 Inspect for missing parts, damage, faults, or malfunctions and report and tag defects</p>
2. Select, remove and fit attachments	<p>2.1 Select attachment for the task</p> <p>2.2 Safely fit attachment according to manufacturer instructions and local conditions for use</p> <p>2.3 Test attachment to ensure correct fitting and safe operation</p> <p>2.4 Use attachment in accordance with recommendations and design limits</p>
3. Operate tractor	<p>3.1 Carry out pre-start and start up equipment procedures</p> <p>3.2 Drive and operate tractor, and modify the operating technique to meet changing work conditions</p> <p>3.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>3.4 Identify environmental and biosecurity implications associated with tractor operation and minimise impact</p> <p>3.5 Complete work according to agreed plan and within the operating capacity of the equipment and operator</p> <p>3.6 Act on or report abnormal monitoring system indicators and alarms</p>
4. Complete and check tractor operation	<p>4.1 Park tractor and conduct shut down procedures according to workplace practices</p> <p>4.2 Perform routine operational servicing and minor maintenance according to the operation and maintenance manual</p> <p>4.3 Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.4 Safely remove attachments according to manufacturer instructions 4.5 Clean and store removed attachments in designated location 4.6 Clean, decontaminate, secure and store tractor in designated location 4.7 Remove and store keys in the required location 4.8 Maintain tractor and equipment use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document tractor and equipment use
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including fuel Identify correct tyre pressure or track tension
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> maintenance interval schedule daily check machine damage and serviceability guards are in place and undamaged checking for missing parts fluid leaks and levels
--------------------------------------	---

	<ul style="list-style-type: none"> • fuel level • brakes and clutch operation • condition of tyres or tracks • machine controls.
Attachment must include one three point linkage, one Power Take Off (PTO) driven and one trailed implement from the following tractor attachments and implements:	<ul style="list-style-type: none"> • three point linkage implement linkage adjustment • three point linkage PTO driven • three point linkage hydraulic operated • tractor mounted implement direct drive • tractor mounted implement hydraulic operated • tractor mounted implement PTO operated • trailed implement manual adjustment • trailed implement mechanical adjustment • trailed implement PTO operated • trailed implement hydraulic operated.
Biosecurity implications must include:	<ul style="list-style-type: none"> • control of cross-site contamination.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has used safe working practices when operating tractors and fitting and using attachments on at least one occasion and has:

- identified hazards and risks associated with operating tractors and using attachments
- implemented safe working practices to minimise risks when fitting and using attachments
- carried out tractor pre-operational checks and maintenance including tagging defects
- driven and operated a tractor safely, including modifying operating technique to meet changing work conditions
- selected and safely attached, removed, tested and used one three point linkage, one power take off driven and one trailed implement according to manufacturer specifications and weather conditions
- used safe towing practices
- operated tractors on an incline and an off-road surface with and without attachments and implements
- carried out tractor shut down procedures
- minimised environmental impacts associated with tractor operation
- applied workplace health and safety procedures or safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor steering systems and features
- tractor operation and maintenance manuals
- features, operational functions and procedures for safe fitting and use of attachments and implements

- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities
- effects of various surface and difficult terrain conditions on tractor operation and use of attachments
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of tractors with attachments
- common injuries, causes and implications of using unsafe practices when operating tractors and fitting attachments
- workplace procedures relevant to health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - tractors
 - attachments
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - tractor operation and maintenance manual
 - industry and workplace biosecurity procedures applicable to tractor operation
 - legislation relevant to tractor operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM401 Conduct major repair and overhaul of machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and complete major repair and overhaul of machinery and equipment.

The unit applies to individuals who apply specialised skills and knowledge to ensure that workplace machinery and equipment is repaired or overhauled in a way that enables minimal disruption to workplace operations. They have responsibility for their own work and for the quality of the work of others within known parameters. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that, on at least one occasion, the individual has undertaken major repair and overhaul of machinery and equipment in a manner that allows the core business of the enterprise to continue with minimal disruption and has:

- identified potential workplace hazards and implemented control measures
- diagnosed faults and identified the most effective and economic option in the replacement, repair and overhaul of components
- selected and used tools and materials appropriate to the task
- recognised and replaced deteriorated or worn parts
- disassembled and reassembled parts and components of machinery and equipment according to operation and maintenance manual and manufacturer specifications
- used and operated welding and thermal cutting equipment safely and effectively
- determined appropriate cutting and welding techniques
- disposed of wastes to minimise environmental impact
- recorded details of breakdowns, major repairs, overhauls and incidents in workshop record.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- assemblies and components of drive, electrical and hydraulic systems
- operational requirements of machinery and equipment
- detailed knowledge of mechanics and equipment operating systems
- use and storage of welding equipment

- maintenance manuals and manufacturer specifications for machinery and equipment operation relevant to repair tasks
- environmental impacts of machinery and equipment major repair and disposal of fuels, oils and other wastes
- workplace procedures applicable to health and safety in the workplace for major repair of machinery and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - repair and overhaul tools and equipment
 - welding equipment
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- relationships:
 - team members and supervisors
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has implemented and supervised the range of maintenance programs covering property, machinery and equipment that are required to be performed in an agriculture/horticulture industry enterprise, and has demonstrated the following on at least one occasion:

- identified potential workplace hazards and implemented control measures
- planned, costed and scheduled maintenance requirements
- allocated resources
- monitored and controlled costs within workplace budget requirements
- dealt with contingencies and rescheduled maintenance where necessary
- established and monitored performance targets for maintenance team
- monitored and reported on performance of maintenance activities
- ensured property, machinery and equipment are maintained in clean and safe operational condition
- communicated effectively with work team, contractors and management
- monitored health and safety in the workplace and adherence to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of maintenance requirements with regard to property, machinery and equipment
- maintenance and servicing cycles for property, machinery and equipment
- maintenance planning, scheduling and budgeting
- warranty, insurance agreements and indemnity provisions applicable to property, machinery and equipment maintenance

- workplace procedures applicable to health and safety in the workplace and property, machinery and equipment maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - warranties, insurance agreements, and indemnity provisions
 - property, machinery and equipment maintenance plans and schedules
 - property, machinery and equipment budgets
- specifications:
 - property maintenance schedule
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures applicable to health and safety in the workplace and property, machinery and equipment maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that individual has coordinated, monitored and reviewed the operation and maintenance of machinery and equipment for an enterprise and has demonstrated the following on at least one occasion:

- identified potential workplace hazards and implemented safe working systems for machinery and equipment operation
- monitored machinery and equipment operations for a workplace
- evaluated machinery and equipment requirements for a workplace
- developed machinery and equipment operation and maintenance procedures according to health and safety guidelines, manufacturer specifications, workplace procedures and hazardous substances legislation
- scheduled, supervised and recorded the service and maintenance of machinery and equipment
- monitored machinery and equipment operations and maintenance requirements, and reviewed risk assessments periodically to ensure a safe operating environment
- communicated effectively with staff
- assessed staff capability in machinery maintenance and operation, and provided supervision and mentoring.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- servicing and maintaining machinery and equipment within area of responsibility
- methods of calculating the cost of machines and their contribution
- training and instruction techniques for directing the learning of staff

- hazard identification, risk assessment and procedures for developing risk controls
- workplace procedures, legislation and regulation requirements applicable to machinery and equipment maintenance and management
- environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
- workplace procedures applicable to health and safety in the workplace and machinery and equipment management.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment maintenance plans and schedules
 - machinery and equipment budgets
- specifications:
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures and health and safety in the workplace procedures, legislation and regulation applicable to machinery and equipment maintenance and management
 - legislation and regulation requirements applicable to machinery and equipment management
 - environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
- relationships:
 - team members
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM502 Implement a machinery management system

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to coordinate and manage services, maintenance and operational requirements of machinery and equipment to implement a machinery management system for an enterprise.

This unit applies to individuals who apply specialised skills and knowledge to implementing a machinery management system, who take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish machinery and equipment	1.1 Identify machinery and equipment requirements of the workplace 1.2 Evaluate applicability of alternative options to machinery

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	<p>ownership</p> <p>1.3 Identify and address storage and housing requirements for machinery and equipment</p> <p>1.4 Monitor and assess machinery innovations for applicability to workplace requirements, safety and functions</p> <p>1.5 Maintain inventory of machinery and equipment according to workplace procedures</p>
2. Select and manage machinery services provided by off-property suppliers	<p>2.1 Identify services to be provided by off-property suppliers</p> <p>2.2 Develop criteria to select and monitor the provision of services according to workplace safety, operational and financial requirements</p> <p>2.3 Record and monitor agreements and transactions related to service provision for machinery operating requirements</p>
3. Manage machinery maintenance	<p>3.1 Determine machinery and equipment maintenance requirements from operation and maintenance manuals and manufacturer specifications</p> <p>3.2 Establish maintenance schedules and systems for recording machinery use and maintenance</p> <p>3.3 Monitor machinery maintenance to ensure adherence to schedules, operation and maintenance manuals, and manufacturer instructions</p>
4. Manage machinery and equipment operation	<p>4.1 Monitor and record machinery and equipment use according to workplace procedures</p> <p>4.2 Monitor machinery operation to ensure compliance with manufacturer instructions</p> <p>4.3 Determine procedures for operation of machinery and monitor to ensure adherence to safe procedures</p> <p>4.4 Develop and implement staff training program in the safe operation of machinery and procedures for machinery maintenance</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding maintenance requirements for machinery and equipment Interpret information related to management of machinery and equipment
Writing	<ul style="list-style-type: none"> Develop documentation to record machinery purchase, maintenance and replacement plans
Oral communication	<ul style="list-style-type: none"> Initiate discussions with staff, contractors and suppliers, using clear language to communicate machinery management system, machinery and equipment maintenance schedules and workplace procedures Use clear communications with management to discuss machinery purchase, running costs, servicing costs and budget
Numeracy	<ul style="list-style-type: none"> Compare costs of services provided by off-property suppliers Apply comparative analysis of machinery purchase and running costs
Navigate the world of work	<ul style="list-style-type: none"> Identify and describe own workplace requirements associated with own role and area of responsibility Monitor self and others adherence to workplace requirements including safety requirements
Interact with others	<ul style="list-style-type: none"> Use appropriate language and communication skills to disseminate information within work team

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Machinery and equipment must include:	<ul style="list-style-type: none"> vehicles and attachments stationary and mobile plant used in the workplace.
Services must include:	<ul style="list-style-type: none"> machinery repair machinery overhaul parts supply.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has established and managed a machinery management system for an enterprise and has demonstrated the following on at least one occasion:

- identified machinery and equipment requirements for a workplace
- identified potential workplace hazards and implemented safe working systems for machinery and equipment operation
- sourced, selected and managed machinery services provided by off-property suppliers
- managed machinery and equipment operation for a workplace
- managed machinery maintenance schedules for a workplace
- documented procedures for machinery and equipment operation and maintenance used in the workplace
- communicated effectively with staff
- identified staff training requirements for the safe operation of machinery and maintenance procedures
- developed and implemented training plans related to operation and maintenance of machinery in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- total costs associated with the use of machinery
- maintenance requirements of machinery and equipment
- storage and housing requirements for machinery
- safe operating procedures for machinery

- systems for monitoring machinery maintenance and operation
- licensing requirements for the operation of machinery
- workplace procedures applicable to health and safety in the workplace and environmental legislation and machinery management systems
- principles of staff learning, development and training.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment maintenance schedules
 - machinery and equipment budgets
- specifications:
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures and health and safety in the workplace procedures, legislation and regulation applicable to machinery and equipment management
 - licensing and legislation applicable to machinery operation
 - environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to calculate, review and analyse machinery options within an agricultural, horticultural or land management enterprise.

This unit applies to individuals who apply advanced skills and knowledge to analysing machinery options and take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities. They work in contexts that are subject to change and adapt a range of fundamental principles accordingly.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has analysed machinery options for a workplace, including the associated costs and potential returns on capital investments, and has demonstrated the following on at least one occasion:

- compared the productivity and suitability of different types and brands of machinery
- identified and calculated total costs associated with machinery operations
- reviewed machinery requirements for a workplace and evaluated costed alternative options
- analysed the financial costs, tax impacts and investment risks for different types of machinery
- budgeted and incorporated benchmarks of energy efficiency for total running costs of machinery
- calculated potential returns from major capital investments in machinery over designated timeframes
- documented machinery usage analysis and preferred options
- reviewed the machinery options plan and analysis of options.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- benchmarking practices and procedures for determining machinery requirements, including energy efficiency, carbon footprint and water use efficiency
- capital budgeting techniques
- relevant taxation provisions relating to investment in machinery types including related technology and equipment

- risks associated with machinery investments
- analysis and planning processes required for machinery operation and location.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery requirements and machinery options plan
 - machinery costs benchmark data
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM301 Establish an Australian native stingless bee colony

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to identify, procure, establish and maintain a colony of Australian native stingless bees (ANSBs) suitable for establishing in a specific location for a defined purpose.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Elements	Performance Criteria

Assessment Requirements for AHCNRM301 Establish an Australian native stingless bee colony

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, established an Australian native bee colony, including:

- recognised and selected appropriate Australian native stingless bees (ANSBs) for domestication, and prepared a strategy for managing the colony for a defined purpose
- identified a suitable structure to house an ANSB colony, and acquired components
- used tools and equipment, including personal protective equipment (PPE), to safely prepare a structure to house an ANSB colony
- procured a population of ANSBs and established and located the colony in a suitable environment
- monitored the colony conditions, pests, diseases and disorders during establishment according to colony workplace and biosecurity procedures
- monitored, manipulated and assessed the colony to achieve strategic outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of Australian native bees and their basic biology and nesting habits for a given locality, including:
 - stinging
 - stingless
 - social
 - solitary
- ANSBs and their attributes suitable for 'domestication', including:

- colony forming
- health and safety risks
- suitable environmental conditions
- role in pollination
- commercial and non-commercial outcomes for keeping ANSBs, including:
 - pollination and pollination services
 - honey production
 - education
 - conservation
 - pets
- developing, monitoring and assessing basic strategies for keeping ANSBs
- equipment and resources required for keeping ANSBs, including beekeeping tools, use and maintenance
- structures to house Australian native stingless bees, including:
 - natural habitats
 - hives and hive designs
- health, hygiene and biosecurity considerations
- health and safety hazards and risks associated with handling and working with ANSBs, including:
 - PPE
 - public safety
 - lifting and handling
 - safe use of tools
- methods used for procuring and establishing ANSBs, including:
 - legislative requirements when collecting wild populations
 - transfer techniques for wild colony
 - budding
 - splitting
 - trapping
 - purchasing established colony
- locating colonies and establishing native bee meliponary, including:
 - locality/location/region
 - weather and temperature
 - orientation
 - access to food and water
 - proximity of colonies to each other and competition
- pests, diseases and disorders of Australian native stingless bees, and their control, including biosecurity
- monitoring procedures and signs of health or declining population
- ANSB manipulation techniques, including:

- inspections
- accessing honey
- splitting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - Australian native stingless bee colony
 - tools and equipment for assembling and working with Australian native stingless bee colonies
 - PPE
- specifications:
 - workplace procedures and specifications related to establishing Australian native stingless bee colonies
 - manufacturer instructions for equipment and machinery to maintain structures to house bee colonies
 - access to legislation and codes of practice related to Australian native stingless bee colonies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm arrangements for waterways planning and management within a catchment area	1.1 Identify the roles and responsibilities of key stakeholders 1.2 Review the purpose, scope and impact of legislation and regulations on waterways management 1.3 Review waterways planning and management arrangements and current trends 1.4 Review government policies and plans on waterways planning and management
2. Prioritise plans for waterways improvement	2.1 Review and compare catchment plans with legislation and policies, management targets and priorities 2.2 Collect and assess information on the specific needs of waterways 2.3 Establish priorities, targets and funding requirements through consultation with stakeholders 2.4 Determine funding opportunities for projects 2.5 Assess strategies and programs for relevance to achievement of priorities and targets
3. Facilitate stakeholder participation	3.1 Communicate priorities and targets to stakeholders 3.2 Communicate funding and other opportunities that support strategies for action to stakeholders 3.3 Support the development of plans or submissions 3.4 Facilitate cooperation and partnerships between stakeholders
4. Advise and support stakeholders	4.1 Document and report findings for use in future planning 4.2 Provide support to ensure that legislative requirements are met 4.3 Notify stakeholders of variations to planned approaches 4.4 Meet stakeholder needs with timely and appropriate support 4.5 Use communication and negotiation skills to resolve conflicts
5. Evaluate the achievement of priorities and targets	5.1 Use appropriate monitoring strategies 5.2 Collect and analyse monitoring information against priorities and targets 5.3 Evaluate progress towards achievement of priorities and targets 5.4 Communicate findings to stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, assess and critique data and information from planning documents, management plans, maps, images, legislation and regulations for incorporation into waterways strategies
Writing	<ul style="list-style-type: none"> Select appropriate conventions and stylistic devices to express precise meaning in documented plans and strategies for specified stakeholders
Oral Communication	<ul style="list-style-type: none"> Establish and maintain complex and effective communications when negotiating and consulting with stakeholders on waterways strategies

Assessment Requirements for AHCNRM503 Support the implementation of waterways strategies

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has communicated with stakeholders, identified a diverse range of strategies and supported the implementation of waterways strategies.

There must also be evidence that the individual has:

- applied appropriate communication techniques in order to:
 - collect information on needs
 - inform funding opportunities
 - develop plans and submissions
 - educate and resolve conflict
- identified and applied strategies to achieve priorities and related targets from catchment plans
- evaluated progress towards achievement of priorities and targets
- prioritised projects based on regional targets and funding provisions
- determined funding requirements and identified funding mechanisms
- supported the development of plans, which must include:
 - priorities and targets
 - strategies and program outcomes
 - steps and sequence of implementation
 - monitoring and evaluation requirements and procedures
 - reporting methodology
 - communication strategy and procedures

- developed reports for stakeholders and future planning purposes according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- identifying and working with stakeholders, and their importance in building relationships for consultation and formulating strategies, including:
 - waterways agencies and managing authorities
 - Indigenous land rights and ownership
 - special interest groups engaged in water-based activities
 - property owners impacted by waterways strategies and their obligations
 - education and training
- environmental legislation
- contemporary regional catchment management strategies
- ecology of aquatic environments and waterways management
- principles of community capacity building and engagement
- relevant policies across all levels of government and within the specific region, including those under catchment plans
- waterways management and improvement techniques, including:
 - fencing
 - revegetation
 - habitat restoration
 - pest plant control.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- specifications:
 - workplace policies, procedures and processes for implementing waterways strategies
 - waterways strategies for implementation
 - legislation and regulations for waterways management
- relationships:
 - stakeholders
- timeframes:
 - according to stakeholder needs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM504 Interpret and report on catchment hydrology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to interpret catchment hydrology to report on water quantity and quality within a catchment.

The unit applies to individuals employed in a technical capacity to collect, collate, analyse and report on hydrological data for use in floodplain management, asset protection and water allocation. This person will analyse information and exercise judgement to complete a range of skilled activities. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collate and evaluate catchment information	1.1 Determine data collection priorities in consultation with supervisor or team

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Access and collate catchment information 1.3 Determine the requirements for accuracy and currency of information and identify additional data requirements 1.4 Identify land uses within the catchment 1.5 Determine management units within the catchment
2. Analyse hydrological processes of a catchment using available data	2.1 Analyse natural ground and surface water processes 2.2 Identify man-made ground and surface water movement 2.3 Determine and analyse man-made impacts on water quantity 2.4 Determine the need for, and identify appropriate representative sites for, collection of additional data 2.5 Apply work health and safety policies and procedures, environmentally sustainable practices and biosecurity measures when analysing hydrological processes
3. Design and implement field surveys and assess findings	3.1 Determine objectives, locations and resource requirements for site assessments in consultation with supervisor or team 3.2 Assess physical entities, processes and threats within representative management units 3.3 Collect site data according to enterprise policies, procedures and guidelines
4. Report on catchment hydrology	4.1 Prepare a written overview on catchment hydrological behaviour 4.2 Present a visual overview of catchment hydrological behaviour to stakeholders 4.3 Provide advice and guidance on remediation measures consistent with catchment management objectives

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Numeracy	<ul style="list-style-type: none"> Analyse and synthesise mathematical information from a range of hydrological datasets, and compile and evaluate the information to draw conclusions and prepare reports

Assessment Requirements for AHCNRM504 Interpret and report on catchment hydrology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has accessed and collated a wide range of hydrological information and data, and interpreted and reported outcomes to stakeholders.

There must also be evidence that the individual has:

- determined the movement of water within a catchment
- assessed processes within catchment to evaluate non-sustainable practices
- reported on catchment hydrological behaviour to workplace requirements
- applied work health and safety practices and biosecurity awareness to the collection and testing of water.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hydrological cycles
- chemical and physical properties of water
- rock and soil types, including weathering processes
- fluvial geomorphology, including:
 - drainage basin function
 - factors influencing stream flow rates
 - interactions between ground and surface water
 - stream hierarchy and ordering
 - human impacts on surface water quality and quantity

- hydrogeology, including:
 - aquifer types and properties
 - aquifer discharge and recharge
 - rates of water movement through aquifers
 - human impacts on groundwater quality and quantity
- sustainable use of ground and surface water, including:
 - uses of water in catchments
 - water allocation
 - policies and strategies determining water use.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for report writing and statistical analysis
- specifications:
 - workplace policies, procedures and processes for accessing, collating and manipulating hydrological data
 - site-related hydrological data sets
- relationships:
 - work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM505 Provide technical advice on sustainable catchment management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to provide technical advice on sustainable catchment management to land managers in a catchment area or region.

The unit applies to individuals in a catchment management role who are responsible for identifying and managing land degradation, as well as providing advice and information on programs and funding for the sustainable management of farms, small properties, recreational land and land used for commercial activities. The person will analyse information and exercise judgement to complete a range of skilled activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Respond to requests	1.1 Respond to requests for advice from land managers

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
for advice on sustainable catchment management	<p>1.2 Seek information on location, land management or production objectives and land management concerns</p> <p>1.3 Review state and regional legislation, regulations and strategies relevant to the region in relation to potential constraints</p> <p>1.4 Confirm options and processes for provision of advice with land managers</p>
2. Identify and analyse land management issues	<p>2.1 Conduct a site assessment to collect information on geological characteristics, ecological processes and biodiversity</p> <p>2.2 Apply workplace health and safety policies and procedures, environmentally sustainable practices and biosecurity measures when conducting site assessments</p> <p>2.3 Collect information on land uses and land management techniques</p> <p>2.4 Interpret and communicate site information for land managers and other stakeholders using supportive and non-threatening communication</p> <p>2.5 Evaluate the type and extent of land degradation in a site assessment</p>
3. Provide advice on sustainable land and catchment management	<p>3.1 Provide advice according to state and regional legislation, regulations and strategies</p> <p>3.2 Propose options for changing land management practices according to economic, technical, practical, social and environmental standards</p> <p>3.3 Advise land manager on outcomes of analysis, land management techniques, planning outcomes and remediation measures</p> <p>3.4 Provide resource materials and information for supporting programs and accessing funding</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, assess and review information from stakeholders, land managers and legislation and regulations, and consolidate and rationalise for communicating to stakeholders
Oral communication	<ul style="list-style-type: none"> Establish and maintain effective communications when discussing, consulting and advising stakeholders

Assessment Requirements for AHCNRM505 Provide technical advice on sustainable catchment management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has provided technical advice on sustainable catchment management to land managers in a catchment area or region, according to state and regional legislation, regulations and strategies and stakeholder requirements.

There must also be evidence that the individual has:

- reviewed state and regional legislation, regulations and strategies for relevance to responsibilities of land managers
- analysed issues, processes and techniques in sustainable land management
- assessed land management practices in complying with long-term objectives of a catchment or region
- sourced and communicated advice on sustainable land management practices to a variety of land managers in a knowledgeable and non-threatening manner.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- geological processes and influences on land management, including:
 - rock types and weathering
 - soil formation and soil types
- ecological processes, including:
 - energy flow through ecological systems
 - matter flow through ecological systems

- nutrient cycling
- land degradation processes and impacts, including:
 - soil compaction
 - erosion
 - tree decline
 - pest plant and animal infestations
 - eutrophication
 - acidification
 - salinity
 - fertility decline
- catchment management principles, including:
 - catchment planning priorities and programs
 - roles and responsibilities of land users in catchments
- biodiversity, including:
 - basic plant identification techniques
 - animal identification
 - ecological vegetation communities
- whole property planning principles:
 - energy flows
 - sustainable water management
 - land capability.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- specifications:
 - workplace policies, procedures and processes for catchment management
 - catchment management plans
 - legislation and regulations for catchment management
- relationships:
 - land managers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM603 Implement a monitoring, evaluation and reporting program

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to implement a monitoring, evaluation and reporting program for an organisation to measure progress against targets and reporting responsibilities. It includes implementation of evaluation strategies developed to inform a natural resource management Monitoring, Evaluation, Reporting and Improvement (MERI) framework used to manage human, social, natural, physical and financial assets.

The unit applies to individuals who are in senior land management roles and who apply knowledge and skills in land management with autonomy and judgement, and analyse information to complete activities, interpret and transmit solutions to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement a monitoring and	1.1 Collect relevant baseline data according to MERI plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
evaluation strategy	1.2 Consult with stakeholders 1.3 Brief stakeholders implementing program on the monitoring and evaluation methods to be used 1.4 Implement selected monitoring and evaluation methods according to defined strategy 1.5 Access and use standard procedures and recording templates 1.6 Communicate and monitor program timelines to stakeholders
2. Collect and analyse data	2.1 Verify data and information is collected according to workplace and industry standards and formats 2.2 Corroborate collected data addresses key evaluation questions, and rectify design where unsuitable 2.3 Verify data security, storage and access complies with workplace policies and procedures 2.4 Coordinate all stakeholders involved in monitoring and evaluation process 2.5 Evaluate effectiveness, efficiencies and financial objectives and priorities have been achieved according to evaluation design
3. Prepare reports and information products	3.1 Assess and report on achievement of milestones and outputs 3.2 Produce information products to inform and engage stakeholders 3.3 Communicate findings and activities to stakeholder groups according to program schedule 3.4 Negotiate changes to projects and programs with stakeholders according to MERI findings 3.5 Apply findings to improve delivery and alignment of projects and policy decisions with organisational targets and mission 3.6 Use a style of reporting that reflects audience and information use
4. Review the monitoring and evaluation process	4.1 Encourage ongoing participation, consultation and communication of stakeholders by fostering a culture of self-evaluation and learning 4.2 Review evaluation strategy and processes, and provide feedback on implementation and evaluation design to stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Access, collate and analyse complex data and information from baseline reports and MERI activities, and use to implement changes and report on progress of MERI activity
Writing	<ul style="list-style-type: none"> Demonstrate sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning and understanding when reporting on MERI activities

Assessment Requirements for AHCNRM603 Implement a monitoring, evaluation and reporting program

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has implemented a monitoring and evaluation and reporting strategy, and has:

- applied monitoring and evaluation methods ensuring integrity and validity of data
- collected and managed data related to the monitoring program according to workplace procedures
- analysed complex information related to the monitoring program according to enterprise requirements
- prepared reports and information products for stakeholder use according to workplace standards
- reviewed the monitoring and evaluation process for continuous improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quantitative and qualitative methods for monitoring and evaluation
- data management processes and systems
- policy and program management processes
- adaptive management and review cycles
- Monitoring, Evaluation, Reporting and Improvement (MERI) framework
- national standards for the practice of ecological restoration.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- specifications:
 - workplace policies, procedures and processes for formatting and documenting reports and data sets
 - data sets from a MERI project
 - legislation and codes of practice and standards for conducting MERI projects
- relationships:
 - stakeholders and stakeholder groups.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCORG101 Support organic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support livestock and plant based organic production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under close supervision. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for organic production	1.1 Identify required materials, tools and equipment according to supervisor instructions

Element	Performance criteria
work	1.2 Conduct checks for serviceability on all materials, tools and equipment and report insufficient or faulty items 1.3 Demonstrate correct manual handling techniques when loading and unloading materials and minimise damage to self, load and vehicle 1.4 Select, check and fit suitable personal protective clothing and equipment before work 1.5 Identify and report work health and safety hazards
2. Undertake organic production work as directed	2.1 Follow instructions and directions and seek clarification when necessary 2.2 Undertake work in an environmentally appropriate manner and according to workplace information and principles of organic agriculture 2.3 Follow site quarantine, biosecurity protocols and farm and personal hygiene requirements as required by enterprise guidelines 2.4 Meet enterprise's food safety requirements where appropriate 2.5 Interact with other staff and customers in a positive and professional manner 2.6 Follow enterprise policies and procedures for workplace practices and handling and disposal of materials 2.7 Report problems or difficulties in completing work to required standards or timelines 2.8 Maintain a clean and safe work site while working
3. Handle materials and equipment	3.1 Store waste material produced during work in a designated area according to supervisor instructions 3.2 Handle and transport materials, tools and equipment according to supervisor instructions and enterprise guidelines
4. Clean up on completion of work	4.1 Return materials to store or dispose of 4.2 Clean, maintain and store tools and equipment 4.3 Report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency

Assessment Requirements for AHCORG101 Support organic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply principles of organic agriculture to daily work routines
- follow supervisor instructions
- follow work health and safety procedures and where appropriate, food safety procedures
- report any variations from required standards or procedures to supervisor
- apply enterprise quarantine and biosecurity protocols

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of organic production
- organic procedures and recording requirements
- safe work practices relevant to the tasks being undertaken, including safe use of tools and equipment
- food safety requirements for enterprise's activities where appropriate
- work health and safety, biosecurity and environmental protection legislation and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG401 Manage biodynamic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a farming system according to the principles of, and using the practices of, biodynamic agriculture.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farmers who manage according to the principles of biodynamic agriculture. Work is likely to be done independently and according to the requirements of the National Standard for Organic and Biodynamic Produce.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a plan for a biodynamic farming enterprise	1.1 Work in an environmentally appropriate manner and according to work health and safety requirements and enterprise guidelines 1.2 Identify requirements for biodynamic certification 1.3 Incorporate personal, ecological and financial goals for a biodynamic enterprise into an enterprise plan 1.4 Develop marketing plan for biodynamic produce which maintains product quality and integrity 1.5 Trial research findings for biodynamic agriculture and incorporate into plans 1.6 Develop and implement biodynamic production plan based on biodynamic principles and farm strategies
2. Make and apply biodynamic field spray preparations	2.1 Make and store horn manure (500), horn silica (501) and horn clay preparations 2.2 Stir preparations by creating vortex and chaos 2.3 Select equipment for application of biodynamic preparations 2.4 Calibrate and adjust equipment for suitable application rate 2.5 Apply preparations according to biodynamic principles
3. Use biodynamic compost preparations, composts and liquid brews	3.1 Use and store biodynamic compost preparations according to biodynamic principles 3.2 Identify materials and mineral inputs for compost from farm production plan and soil analysis 3.3 Build compost heap 3.4 Apply biodynamic preparations to compost according to biodynamic principles 3.5 Monitor aeration, moisture and temperature of compost heap 3.6 Apply compost to enhance natural cycles
4. Apply biodynamic principles and techniques to enhance soil and plant health	4.1 Plan planting, harvest and pruning times according to moon rhythms and planetary patterns 4.2 Optimise soil and plant health using biodynamic preparations, cover crops, crop rotation, mulching and composting and through application of farm-based fertility products 4.3 Identify weeds and insect pests in enterprise 4.4 Evaluate options for managing weeds and insects that consider natural predators, life cycles, cultural practices, soil health and the plant community

Element	Performance criteria
	4.5 Develop and implement plan for managing pests and weeds
5. Manage animals within a biodynamic production system	5.1 Optimise soil and plant health to provide a nutrient-dense and balanced diet 5.2 Develop and incorporate grazing and feeding strategies into the biodynamic system 5.3 Incorporate homeopathic remedies and allowable treatments into animal health strategies 5.4 Implement enterprise animal welfare policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG401A Manage biodynamic production.

Assessment Requirements for AHCORG401 Manage biodynamic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply biodynamic principles
- develop and implement biodynamic production plan
- make and apply biodynamic preparations and compost
- enhance soil and plant health
- integrate and manage animals in a biodynamic enterprise
- apply enterprise work health and safety policies and guidelines
- implement enterprise animal welfare policies
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal health
- biodynamic preparations and their role in soil food web and atmosphere
- biodiversity, shelter belts, birds and native bush on biodynamic farm
- calcium-clay-silica polarities
- crop and animal rotation systems
- cultivation methods
- etheric and astral forces and how they relate to biodynamics
- experiments and testing methods such as chromatography and sensitive crystallisation
- green manuring
- management of insects and birds

- paradigms of various farming systems: biodynamics, organics and permaculture, and holistic management
- peppering for animals and insects
- planting calendar
- purpose of various herbs and organs used for making biodynamic preparations
- relationship between soil, plant, animal and human health
- research in biodynamics principles and practices
- rhythms and cycles of planets and moon
- role of the biodynamic preparations 500-508
- role of bacteria and fungi
- role of humus
- soil: food web information, how it is made, its structure and feeding cycle
- water retention
- weed management
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG402 Manage organic livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to integrate livestock production into an organic production system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farmers who work according to the principles of organic and ecological agriculture.

Work is likely to be done independently and according to the requirements of the National Standard for Organic and Biodynamic Produce and agro-ecological principles. This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage animal health and welfare	1.1 Consider natural behaviours of animals and requirements of animal welfare codes of practice in planning for organic livestock production 1.2 Select and use varieties/genetics for the enterprise that match environmental conditions and optimise animal health 1.3 Monitor livestock constantly for health and welfare and keep records 1.4 Develop animal health preventative strategies, communicate to others working on farm and implement 1.5 Identify and use animal health inputs suitable for organic systems where required 1.6 Follow restrictions and prohibited/restricted inputs for certified organic systems and quarantine if applicable 1.7 Conduct animal husbandry and transport in compliance with animal welfare principles and organic certification requirements 1.8 Maintain livestock records required for organic certification
2. Develop and implement supplementary feed requirements	2.1 Identify feed gaps and requirements for supplementary feed taking into account seasonal conditions and drought 2.2 Incorporate on-farm supplementary feed strategies including fodder crops, agroforestry or standing hay paddocks into the annual program for animal feed and on-farm sustainability 2.3 Implement good storage practises for feed inputs to ensure quality is maintained 2.4 Purchase and use nutritional inputs in the feed program that meet relevant Organic Standards and/or agro-ecological principles where applicable
3. Develop and implement a sustainable grazing strategy	3.1 Determine feed requirements, sustainable carrying capacity and a sustainable stocking rate for the enterprise that takes into account seasonal variability and livestock needs 3.2 Determine indicators and benchmarks for sustainable pasture, land and soil use for the property 3.3 Identify grazing infrastructure required for a planned grazing strategy and incorporate into a property improvement program 3.4 Develop and implement a planned grazing system that ensures optimal livestock health and productivity at all times 3.5 Develop and implement a planned grazing system that matches

Element	Performance criteria
	<p>stocking rate to carrying capacity and ensure sustainable pasture, land and soil condition at all times</p> <p>3.6 Optimise soil and plant health to provide a nutrient-dense and balanced diet for livestock</p> <p>3.7 Monitor the grazing system to ensure productivity and sustainability on an on-going basis</p> <p>3.8 Implement strategies for controlling weeds in pastures based on Organic Standards and/or agro-ecological principles where applicable</p> <p>3.9 Keep grazing and feed records for enterprise management and to ensure compliance to Organic Standards where applicable</p>
4. Manage farm fertility for the livestock enterprise	<p>4.1 Estimate level of nutrients exported from farm</p> <p>4.2 Implement a fertility monitoring program such as soil-testing, plant testing or observation of pasture species to monitor pasture and soil fertility</p> <p>4.3 Maintain soil nutrient levels and balance through recycling, optimising nutrient availability in soil and/or sourcing fertility inputs that meet Organic Standards and/or agro-ecological principles where applicable</p> <p>4.4 Eliminate the risk of weed and chemical contamination to the farm by following Organic Standards and/or agro-ecological principles</p> <p>4.5 Keep fertility input records for enterprise management and to ensure compliance to Organic Standards where applicable</p>

Assessment Requirements for AHCORG402 Manage organic livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and maintain animals in an organic production system
- provide a suitable diet and living environment for animals based on the National Organic Standards for Organic Livestock Production and/or agro-ecological principles
- integrate animals into an organic production system
- manage animal health and welfare using Organic Standards and/or agro-ecological principles
- manage grazing of animals and allowable inputs to enhance soil health and fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise animal welfare policies
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant organic certification requirements
- organic agriculture and agro-ecological principles
- animal health, pests, parasites and diseases
- relevant animal welfare code of practice
- grazing management, including pasture identification and assessment, feed budgeting and planned grazing strategies
- carrying capacity and sustainable pasture utilisation
- pasture, land and soil condition and indicators
- management options for animal health based on an understanding of pest life cycles, genetic selection and acquired immunity

- permitted, restricted and prohibited inputs and activities as described in the National Organic Standards for Organic Livestock Production relationship between soil, plant and animal health
- work health and safety and animal welfare legislation and codes of practice.
- record keeping
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG403 Manage organic soil improvement

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage organic soil improvement.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to managers on farms that are managed according to the principles of organic agriculture. Work is likely to be done independently and according to the requirements of the National Standard for Organic and Biodynamic Produce.

All work is done in an environmentally appropriate manner and according to workplace information, principles of organic agriculture and/or agro-ecology, work health and safety requirements and enterprise guidelines.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor indicators of soil fertility	1.1 Undertake work in an environmentally appropriate manner and according to the principles of organic agriculture, work health and safety requirements and enterprise guidelines 1.2 Sample and test soil at reference sites according to organic industry standards to develop baseline data to monitor soil health and fertility 1.3 Assess and record soil pH, mineral balances, and organic matter levels 1.4 Assess and record soil texture, structure, salinity and sodicity 1.5 Assess and record soil biological activity 1.6 Assess soil condition for drainage, compaction, aeration and water infiltration in relation to requirements for desired plant growth for selected species 1.7 Analyse results to identify trends in soil health and fertility and areas for improvement
2. Assess soil-related factors for selected plants	2.1 Identify nutritional requirements of selected plant species 2.2 Select soil analyses to be conducted using a suitable lab facility 2.3 Conduct plant tissue sample collection according to requirements of testing facility if applicable 2.4 Combine results of soil or tissue testing with observations of plant vigour and productivity to determine management and input requirements of the farming system
3. Select, design and implement allowable systems, techniques and inputs to optimise soil fertility	3.1 Identify range of allowable inputs according to requirements of the National Standard for Organic and Biodynamic Produce 3.2 Identify and implement cultural practices to enhance soil fertility, function and health 3.3 Calculate appropriate inputs based on soil/plant analyses, crop removal and plant/animal observations 3.4 Select and manage cover crop and pasture systems where applicable 3.5 Develop, apply and monitor mulching and composting systems where required 3.6 Design and implement crop rotations and grazing management systems to optimise soil fertility where appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG403A Manage organic soil improvement.

Assessment Requirements for AHCORG403 Manage organic soil improvement

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement principles of organic agriculture and agroecology
- implement knowledge of interrelationships between soil fertility, animals, plants, pests and diseases
- devise and implement a soil improvement plan to correct imbalances and maintain soil fertility
- sample soils and analyse soil test results for a range of indicators of soil fertility
- work with natural processes and allowable inputs to improve and maintain soil fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- availability, use and definition of organic fertilisers
- structural properties of soils
- factors contributing to soil acidity, sodicity and salinity
- factors promoting soil and plant water-holding capacity
- importance of soil biological activity
- major nutrient elements and their role in plant growth
- methods and inputs that can be used to correct imbalances and maintain soil fertility
- principles of organic agriculture
- processes and practices that impact on soil structure, biological activity, water-holding capacity and weed patterns

- processes of aggregate and colloid formation
- range of soil analyses available and principles of each
- relationship between soil structure, water holding capacity and nutrient availability
- role of organic matter, humus and micro-organisms
- role of livestock in enhancing soil fertility
- role of macro and micro-elements in soil and plants
- role of weeds
- significance of levels and balance of soil fertility indicators
- soil food chains and food webs
- soil textural types and determinants
- when and how to take soil samples to test for indicators of soil fertility
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG404 Arrange selling through community based marketing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to arrange selling through community based marketing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and evaluate selling options	1.1 Identify the various types of community based selling schemes 1.2 Identify characteristics of the farm business produce 1.3 Identify and document the potential customer base 1.4 Evaluate and document selling options

Element	Performance criteria
2. Comply with the requirements of the selected community marketing scheme	2.1 Identify and comply with market requirements 2.2 Comply with legislative requirements in each step of the supply chain 2.3 Keep records to verify compliance with the community marketing scheme, food safety and organic certification where applicable
3. Develop and maintain a relationship with customers	3.1 Investigate characteristics of the community customers 3.2 Identify potential links between the community and the farm system 3.3 Develop the connections between individuals and the farm production system 3.4 Develop a 'farm story' and communicate the uniqueness of the enterprise to the community using appropriate communication channels 3.5 Monitor community satisfaction levels through customer feedback and address valid concerns
4. Organise transport	4.1 Identify transport requirements and engage carriers as required 4.2 Arrange transport timing and delivery of product with carrier, processing and or selling facility and, where appropriate, agent 4.3 Comply with any special requirements to ensure appropriate transport 4.4 Comply with all relevant legislative requirements including food safety and organic certification
5. Keep records	5.1 Complete pre and post sale documentation 5.2 Record transactions to ensure traceability and reconciliation can be effected and business performance criteria can be assessed 5.3 Document customer feedback and identify and record potential improvements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG404A Arrange selling through community based marketing.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCORG404 Arrange selling through community based marketing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify farm produce selling options
- identify and comply with requirements of a community marketing scheme and its characteristics
- establish relationships with community stakeholders and customers
- monitor and record community satisfaction levels and customer feedback and address concerns
- communicate the 'farm story' and the uniqueness of the enterprise to the community
- arrange timely transport and delivery of produce and address any special transport requirements
- comply with transport legislative requirements
- accurately record pre and post sale documentation and transactions
- identify and record potential improvements
- work with natural processes and allowable inputs to improve and maintain soil fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in selling produce through community based markets
- relevant legislation and regulations relating to work health and safety
- organic certification systems and standards

- organisation policies and procedures related to supply chain management, purchasing, and contracting and tendering
- characteristics and composition of farm business marketing plans
- characteristics of community marketing schemes and the steps within a farm produce supply chain
- product knowledge related to goods and services required by the organisation
- ways to build trust and collaboration as opposed to competition
- business terms and conditions for purchasing, tendering and contracting
- ethical behaviour
- established communication channels and protocols
- procedures for operating electronic communications equipment
- procedures for recording and reporting workplace information and completing relevant documentation

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG405 Implement sustainable practices in the organic farm based business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the establishment and implementation of sustainable work practices in organic farming enterprises of all sizes and in a variety of work settings.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to production managers and workplace supervisors in an organic farming enterprise that are responsible for identifying selling options, developing a relationship with community groups, complying with community based marketing scheme requirements, organising appropriate transport and keeping sale records.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Access the farm businesses guidelines and principles for social, financial and environmental sustainability	1.1 Identify environmental regulations, organic farming requirements and the organic farm plan which apply to the farming enterprise 1.2 Source and interpret environmental and sustainable organic farming information and current best practice guidelines and underlying organic principles 1.3 Identify the impact of best practice guidelines and using organic principles on day to day farm operations and management 1.4 Identify key sustainability practices for an organic farming enterprise 1.5 Access business guidelines and farm practices which comply with sustainable organic farming guidelines and principles
2. Implement established farm business guidelines and principles	2.1 Implement strategies to effectively integrate sustainability principles and practices into the organic farm system 2.2 Identify continuous improvement opportunities and document identified changes to businesses guidelines and principles 2.3 Implement agreed improvements to the farm businesses guidelines and principles
3. Monitor farm business sustainability initiatives for effectiveness and compliance	3.1 Monitor and evaluate the effectiveness and compliance of organic and sustainability practices in terms of environmental, social and financial goals 3.2 Evaluate and report changing trends and techniques relevant to sustainable organic farming for continuous improvement
4. Engage farm business stakeholders in sustainability practices	4.1 Communicate sustainability strategies to stakeholders and relevant staff 4.2 Monitor stakeholder compliance with organic sustainability strategies along the entire supply chain 4.3 Identify and document identified continuous improvement initiatives 4.4 Encourage and assist stakeholders to implement improvements to the system
5. Determine Social Capital benefits from Community engagement with the farm enterprise	5.1 Identify food security and food sovereignty issues addressed by farm business practices 5.2 Monitor compliance with regulatory and legislative requirements in relation to labour management where applicable 5.3 Determine level of engagement with community engagement with local networks and community groups, regional food networks and regional bodies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG405A Implement sustainable practices in the organic farm based business.

Assessment Requirements for AHCORG405 Implement sustainable practices in the organic farm based business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify businesses guidelines and principles for social, financial and environmental sustainability
- identify and interpret environmental regulations, sustainable organic farming requirements, farm plan and current best practice guidelines and principles
- implement strategies to integrate sustainability principles and practices into the farm system and identify continuous improvement opportunities
- monitor farm business sustainability initiatives for effectiveness and compliance
- adopt and document continuous improvement initiatives
- encourage staff and farm business stakeholders to embrace sustainability practices
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- best practice guidelines
- principles and processes relevant to sustainable organic farming
- compliance requirements for all relevant environmental/sustainability legislation, regulations and codes of practice including resource hazards/risks associated with work area, job specifications and procedures
- sustainability issues including environmental and social issues that relate to an organic farm
- external benchmarks used within an organic farming enterprise, including approaches to improving techniques used and expected outcomes

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG406 Oversee compliance with an organic certification scheme

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to oversee continued compliance with an organic certification scheme.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to production managers and workplace supervisors in an organic farming enterprise that are responsible for ensuring compliance within the scope of the selected organic certification scheme.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify compliance requirements of the selected organic standard relating to the farm system	1.1 Access the selected organic certification scheme relevant to the operation and management of the organic farming enterprise 1.2 Identify and interpret key clauses and requirements of the organic standard that relate to the existing farm system enterprise mix 1.3 Identify and document compliance of the farm system with the requirements of the selected organic certification scheme 1.4 Identify and document key farm operations that are impacted by the organic standards
2. Keep records to comply with organic certification requirements	2.1 Identify the records and detail required for compliance with the organic certification scheme 2.2 Complete and maintain clear and accurate records to an approved industry standard 2.3 Communicate recording requirements to appropriate stakeholders and key personnel 2.4 Monitor the record keeping process and maintain records as required by the National Organic Standard
3. Support compliance with organic standards by staff in the farm business	3.1 Identify all steps within the production system that require compliance with the selected organic standards 3.2 Support and train staff and key personnel to implement and foster a compliant organic supply chain culture 3.3 Keep accurate records at all key supply chain steps to verify and maintain compliance, and to allow reconciliation and traceability 3.4 Describe certification compliance requirements of staff in Job Descriptions and Key Performance Indicators
4. Meet annual audit requirements of the selected organic certification scheme	4.1 Comply with the specific certification requirements 4.2 Prepare the farm and organic records and documents for audit and ensure accessibility 4.3 Conduct an internal organic audit of the farm system and complete associated records and documents 4.4 Take corrective actions to comply with the specific certification requirements 4.5 Participate in an annual organic audit 4.6 Comply with and close any corrective actions requested
5. Comply with food safety requirements	5.1 Identify food safety requirements that must be satisfied by the farm system to comply with industry regulations and standards 5.2 Communicate food safety requirements to all staff

Element	Performance criteria
	5.3 Keep records to demonstrate compliance with food safety requirements to industry regulations and standards 5.4 Correct any non-conformance issues identified by internal audit or industry compliance audit

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG406A Oversee compliance with an organic certification scheme.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCORG406 Oversee compliance with an organic certification scheme

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and document compliance requirements of the selected organic standard relating to the farm system
- identify and document key farm operations impacted by the organic standards
- support and train key personnel and staff to implement and foster a compliant organic supply chain culture
- keep accurate records at all key supply chain steps to verify and maintain organic compliance
- conduct an internal organic audit of the farm system and accurately complete associated records and documents
- participate in an annual organic audit and successfully close any identified corrective actions
- identify food safety requirements and ensure compliance of the farm system with industry standards
- ensure all farm records, traceability and production data is kept, monitored and maintained in compliance with National Organic Standard requirements
- comply with requirements of relevant organic standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- organic standards, compliance requirements and industry specifications
- applicable food safety and licensing requirements
- farm supply chain market requirements for product
- organic quality specifications for product

- enterprise and industry quality assurance systems
- strategies for control of hazards to organic compliance
- document control protocols

Assessment Conditions

Assessment may take place in a simulated or real workplace, however all evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG408 Manage on farm composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage on farm composting.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farm managers who work according to the principles of sustainable, organic and ecological agriculture. Work is likely to be done independently and according to the requirements of State regulations, Australian Standards, the National Standard for Organic and Biodynamic Produce or agro-ecological principles

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for composting	1.1 Confirm composting technology, recipe and method to be used are as appropriate to raw material types and farm enterprise needs 1.2 Define compost quality requirements for end product 1.3 Identify composting site requirements and prepare the composting area 1.4 Identify and implement measures are to manage drainage, dust, noise and odours 1.5 Select and check for serviceability and safe operation machinery, equipment and materials appropriate to the job 1.6 Identify and assess potential work health and safety hazards and take action to minimise risk to self and others 1.7 Select, fit, use, suitable personal protective equipment (PPE) 1.8 Maintain and store according to work requirements, manufacturer specifications and enterprise procedures 1.9 Comply with enterprise work health and safety guidelines
2. Prepare raw materials and compost on farm	2.1 Identify and collected raw materials and additives for composting, check to ensure compliance with enterprise procedures or organic standards if applicable; including assessment of physical or chemical contamination 2.2 Pre-process raw materials into suitable forms for composting if required 2.3 Mix raw materials are into suitable compost mixtures for composting according to documented recipes 2.4 Handle feedstock mixtures for composting according to technology, appropriate method, and industry best practice and enterprise procedures 2.5 Assign batch numbers or codes, and create batch documentation to enable tracking of batch through compost production cycle if required
3. Manage and monitor the composting process	3.1 Manage compost batches as required through the composting cycle 3.2 Monitor composting batch by observation or by use of field testing equipment to maintain effective composting process through the compost cycle 3.3 Maintain records for process control indicators through the compost production cycle 3.4 Identify problems observed at any stage of the composting

Element	Performance criteria
	<p>process are and take remedial action to maintain effective and consistent compost production</p> <p>3.5 Follow site quarantine, biosecurity protocols and farm and personal hygiene requirements are as required by enterprise guidelines</p>
4. Inspect compost quality and maintain site	<p>4.1 Inspect and assess finished compost is to determine if quality indicators have been met</p> <p>4.2 Maintain and clean loading-shifting machinery and other processing equipment as required to avoid contamination between batches</p> <p>4.3 Store raw materials and finished compost products in designated areas and kept processing site clean</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCORG408 Manage on farm composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement and manage an on farm compost system
- manage composting processes
- manage a composting site
- evaluate compost quality and implement remedial actions if required
- implement enterprise work health and safety policies
- follow site quarantine and biosecurity protocols

Knowledge Evidence

The candidate must demonstrate knowledge of:

- compost quality standards
- basic principles of composting
- different methods of composting
- characteristics of a range of raw materials
- fundamental characteristics of compost quality
- steps in pre-processing compost materials
- batch documentation techniques
- site and equipment requirements for on farm composting
- key process control stages critical to consistent compost production
- overview of systems and technologies used in compost production, particularly as relevant to farm
- characteristics and categories of a range of compost products.
- relevant environmental, work health and safety legislation and regulations

- record keeping requirements
- site quarantine and biosecurity protocols
- agro-ecological principles
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce if applicable

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG503 Design and document an organic farm landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and document an organic farm landscape that will be used as the basis for an organic farm enterprise.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source legislative requirements which	1.1 Identify and access applicable legislative documents and codes of practice relevant to the design and planning of an organic farming

Element	Performance criteria
impact on the management of an organic farm	enterprise 1.2 Investigate work practices and procedures which follow industry standards 1.3 Identify and interpret key clauses and requirements which apply to organic production and marketing 1.4 Identify relevant work practices and procedures which comply with regulatory requirements and codes of practice
2. Audit the natural resources and infrastructure of the property	2.1 Identify and record property physical and biological characteristics and landscape features 2.2 Develop a farm soil map 2.3 Determine land capability 2.4 Conduct a risk analysis of the farm and adjoining land-use to determine potential compliance issues with organic standards, legislative and environmental requirements
3. Develop an organic landscape plan	3.1 Identify key design parameters to meet financial, social and sustainability goals 3.2 Develop and document key farm rules 3.3 Investigate short term and long term uncertainties for the farm system 3.4 Investigate design options which impact on these long term changes 3.5 Identify and use appropriate design tools 3.6 Develop a concept framework
4. Document the organic landscape plan	4.1 Review the draft plan against the financial, social and sustainability goals 4.2 Document the plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG503A Design and document an organic farm landscape.

Assessment Requirements for AHCORG503 Design and document an organic farm landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source and interpret legislative requirements industry standards and codes of practice
- identify compliant work practices and procedures
- conduct an audit of the natural resources and infrastructure of the property
- identify physical and biological characteristics and landscape features of the property
- develop farm soil map and determine land capability
- develop an organic landscape plan using appropriate development tools
- revise a draft plan and document the final organic landscape plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable legislative documents and codes of practice relevant to farm landscape planning
- landscape types
- habitat and plant communities on farm
- relationship between land shape and soil type
- soil types
- different categories of cultural sites
- organic certification requirements
- landscape hydrology
- landscapes for agro-ecosystems
- native habitat requirements
- the requirements of the organic standard and agro-ecological principles

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and manage a community based marketing supply chain.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to rural enterprise managers who develop and manage marketing strategies and systems within a community based marketing scheme to meet desired production and business outcomes.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Evaluate the suitability of different community marketing options for farm products	1.1 Research and document non traditional selling options 1.2 Identify different community marketing models applicable to the farm system 1.3 Identify key input supply chain steps and stakeholders and relevant certification requirements 1.4 Evaluate different options
2. Determine the marketing chain processes to participate in the selected community marketing schemes	2.1 Research and identify applicable legislative, environmental, and certification requirements relevant to managing a community based marketing chain 2.2 Document specifications for the various components of the marketing chain management system in line with organisational and legislative requirements 2.3 Document traceability requirements of the marketing chain
3. Determine appropriate community marketing strategies for farm products	3.1 Identify communities that have a potential relationship with the farm system 3.2 Document the characteristics and values of the identified communities 3.3 Match community characteristics and values to farm system 3.4 Establish and document market specifications to meet community expectations 3.5 Identify and document appropriate community marketing strategies 3.6 Identify and assess risks in strategy
4. Establish product marketing chain requirements to meet marketing options	4.1 Map required steps in marketing chains to supply identified market 4.2 Establish farm business requirements for each step in marketing chain 4.3 Establish compliance requirements at each step in marketing chain 4.4 Develop record keeping requirements for each step in marketing chain
5. Develop and document a community based marketing plan	5.1 Document required processes for the chosen enterprises and production systems 5.2 Identify and document marketing targets 5.3 Identify the key factors that differentiate product 5.4 Develop and document a promotion plan

Element	Performance criteria
	5.5 Collate customer feedback and use to improve market outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG504A Develop and manage a community based marketing supply chain.

Assessment Requirements for AHCORG504 Develop and manage a community based marketing supply chain

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research and evaluate the suitability of different community marketing options for farm products
- research and identify applicable legislative, environmental, and certification requirements relevant to managing a community based marketing chain
- document specifications for the various components of the marketing chain management system in line with organisational and legislative requirements
- establish and document market specifications meet community expectations
- establish product marketing chain to meet marketing options
- establish farm business requirements for each step in the marketing chain
- establish compliance requirements at each step in the marketing chain
- conduct record keeping requirements for each step in the marketing chain
- develop and document a community based marketing plan
- develop and document a promotion plan
- collate customer feedback and use to improve market outcomes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in selling produce through community based markets
- relevant legislation and regulations relating to work health and safety
- organic certification systems and standards
- rural produce marketing and presentation

- organisation policies and procedures related to supply chain management, purchasing, and contracting and tendering
- characteristics and composition of farm business marketing plans
- characteristics of community marketing schemes and the steps within a farm produce supply chain
- product knowledge related to goods and services required by the organisation
- ways to build trust and collaboration as opposed to competition
- business terms and conditions for purchasing, tendering and contracting
- ethical behaviour
- established communication channels and protocols
- procedures for operating electronic communications equipment
- procedures for recording and reporting workplace information and completing relevant documentation

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG505 Develop and monitor a sustainable production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and monitor a sustainable production plan for an organic and/or agro-ecological farming system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify personal and	1.1 Identify and record personal goals

Element	Performance criteria
enterprise goals	1.2 Identify and document physical, biological, social and financial resources under management 1.3 Identify and analyse the values, expectations and personal goals of customers, stakeholders and employees 1.4 Identify and document sustainability goals using current and historical industry data and organisational records
2. Research and evaluate available sustainable production systems	2.1 Identify and document potential enterprises and evaluate against identified goals and resources 2.2 Research and evaluate applicable sustainable production systems information from a range of sources for identified enterprises 2.3 Identify and document a selected production system that meets sustainability and enterprise management goals of the farm 2.4 Compare the elements of the selected system with the systems and production processes that currently exist on the farm 2.5 Assess the selected system against enterprise goals and sustainability principles and record the findings
3. Develop a sustainable production plan	3.1 Document required modifications to existing farm system processes and infrastructure for the chosen enterprises and production systems 3.2 Identify and document optimal production targets 3.3 Identify inputs and system design elements required to achieve the production targets 3.4 Establish risk management strategies 3.5 Identify record keeping requirements 3.6 Develop and document a sustainable production plan for the selected enterprises and production systems
4. Monitor and evaluate effectiveness of the sustainable production systems	4.1 Establish farm system monitoring procedures and performance indicators 4.2 Monitor performance indicators and against production and sustainability targets 4.3 Evaluate production and sustainability data against the sustainable production plan goals 4.4 Modify the enterprise mix or production system where differences between the sustainable production plan and actual results are identified 4.5 Identify, monitor and assess environmental impacts and work health and safety hazards relating to the production processes throughout the production cycle
5. Record and manage information and data	5.1 Create and maintain records and documents in line with the production plan, the work health and safety requirements, and machinery and equipment management programs

Element	Performance criteria
	5.2 Maintain record keeping systems and data to enterprise and industry standards and requirements 5.3 Prepare and assess recommendations for future sustainable production plans 5.4 Document revised plans and note changes in organic management plan (OMP), if applicable

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG505A Develop and monitor a sustainable production plan.

Assessment Requirements for AHCORG505 Develop and monitor a sustainable production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify personal and enterprise goals
- identify and document physical, biological, social and financial resources under management
- research and evaluate sustainable production systems and select and document a production system that meets sustainability and enterprise management goals
- develop a sustainable production plan
- match land capacity with production system design
- monitor and evaluate effectiveness of the sustainable production system
- modify the enterprise mix or production system where differences between the sustainable production plan and actual results are identified
- record and manage farm system information and data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in developing and monitoring a sustainable production plan
- relevant legislation and regulations relating to work health and safety, contractor engagement, animal health and welfare, chemical use and application, vehicle and plant use and soil and water degradation issues
- environmental protection requirements and codes of practice, including the safe disposal of products and waste material, available to the organisation

- organisational policies and procedures, standards and site requirements for risk management and hazard identification
- sustainable land use principles and practices applicable in the region
- farm planning processes

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG506 Manage an agroecology production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use agroecology principles in managing all elements of a farm ecosystem including the soil ecosystem, vegetation, animals, pests and diseases to achieve and maintain overall ecological and economic health of the farm ecosystem and farm production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify the farm agroecosystem functions at a systems level	1.1 Identify and map energy flows through a farm agroecosystem 1.2 Identify and map nutrient cycles through different parts of a farm ecosystem 1.3 Identify disturbance points in the farm ecosystem succession 1.4 Develop a model of the farm ecosystem and its elements 1.5 Identify areas of complexity and simplicity within the farm ecosystem 1.6 Identify ecosystem functions that can be used to replace the use of external inputs in the farm production systems 1.7 Identify interactions between elements of farm ecosystem 1.8 Assess health of existing farm ecosystems
2. Develop plans to enhance farm agroecosystem	2.1 Identify areas within the agroecosystem that require enhancement 2.2 Identify methods that encourage niche development, increase complexity in the farm agroecosystem and improve interactions between different components of farm agroecosystem 2.3 Document the implementation plan
3. Manage Farm Agroecosystems	3.1 Identify and monitor appropriate parts of the ecosystem 3.2 Set up monitoring system 3.3 Comply with requirements for monitoring determined by organic standards and legislative requirements 3.4 Review measured ecosystem and farm production performance with expected performance and adjust plan in response to differences

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG506A Manage an agro-ecology production system.

Assessment Requirements for AHCORG506 Manage an agroecology production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the farm agro ecosystem functions at a systems level
- assess the health of existing farm ecosystems
- develop plans to enhance farm agroecosystem
- manage and monitor the development of a farm ecosystem
- review ecosystem and farm production performance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- advantages of ecological agriculture
- ecosystem processes, energy flows, nutrient cycles, biological succession, predator and prey relationships, ecological niche
- relationships between ecosystems and agricultural production
- application of ecosystem processes to a production system

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPCM202 Collect, prepare and preserve plant specimens

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to collect, prepare and preserve plant specimens for recording or identification purposes.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect plant specimens	1.1 Collect plant specimen according to workplace requirements 1.2 Ensure the sample includes sufficient plant parts required for positive identification

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Observe plant characteristics and record observations according to workplace procedures 1.4 Ensure congruence of specimens and observations by accurate labelling according to workplace procedures
2. Preserve plant specimens	2.1 Store collected plant specimens to prevent degradation until they can be preserved according to workplace procedures 2.2 Identify and select an appropriate preservation technique according to workplace requirements 2.3 Prepare and arrange specimens for preserving according to preservation technique and workplace procedures 2.4 Preserve the specimen according to selected preservation technique 2.5 Arrange and mount the preserved specimen and observation records according to workplace procedures 2.6 Package the specimens and submit for identification according to workplace procedures
3. Record and catalogue specimen	3.1 Record and catalogue specimen information according to workplace procedures 3.2 File records appropriately according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Uses clear and appropriate language and terminology to ensure clarity of meaning when recording data and characteristics of plant specimens
Navigate the world of work	<ul style="list-style-type: none"> Complies with explicit policies and procedures.
Get the work done	<ul style="list-style-type: none"> Plans and implements routine tasks and workload seeks assistance in setting priorities

Skill	Description

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have collected and preserved plant specimens for identification, including:

- collected representative parts of plant specimens and recorded and labelled specimens with characteristic data for identification purposes
- stored labelled plant specimens ready for preservation
- determined a plant preservation technique
- arranged and preserved plant specimens according to procedures
- arranged and mounted preserved specimens with observation records ready for identification
- packaged specimens with observation data and submitted for identification
- recorded and catalogued specimen information according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic botanical requirements for plant identification purposes
- principles and practices of collecting plant materials
- characteristics of plants to be collected and recognising suitable specimens for collection
- storing plant specimens before preservation to maintain specimen integrity
- plant preservation techniques and the agencies and organisations that use them
- records and recording systems for plant collections and plant data.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live plant materials to be collected from the field
 - equipment and materials required for preserving and mounting plant specimens
 - records and recording systems for plants
- specifications:
 - workplace procedures and processes for preserving plants
 - workplace instructions and specifications for preserved plants.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have identified plant specimens, including:

- identified and recorded key characteristics of plant morphology and identified to division level
- determined plant health and assessed effect on characteristics indicative to identification
- used reference materials to compare characteristics to taxonomic classification
- identified plant specimen to lowest level of taxonomic level (category)
- compiled identification data and recorded the identification and process according to workplace procedures
- reported outcomes to client according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant identification, including:
 - plant health problems indicative of plant species
 - basic physiology and life cycle of pests and diseases
 - botanical terms for plant morphology, physiology
- symptoms of plant pests and diseases that mask characteristics for identification
- methods of data capture
- plant identification techniques
- problem-solving techniques
- soil characteristics particularly in relation to the local region

- plant characteristics including tactile and sensory
- levels (categories) of taxonomic classification.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live plant specimens
 - tools and equipment necessary for plant observations
 - botanical reference materials, plant data bases, plant keys
- specifications:
 - workplace documents including procedures and processes for recording data and preparing reports
 - workplace instructions, specifications or client briefs
- relationships:
 - real clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPER101 Observe permaculture principles and work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to follow workplace directions and instructions while observing permaculture principles and practices.

Permaculture work can be carried out in the community, home, school and permaculture or community gardens and farms.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work in a permaculture environment	1.1 Meet with supervisor, observe conditions and receive work tasks for the day 1.2 Identify required materials, tools and equipment 1.3 Check materials, tools and equipment and tell supervisor if there are insufficient or faulty items 1.4 Use correct manual handling techniques when loading and unloading materials 1.5 Identify hazards and tell supervisor 1.6 Use suitable personal protective equipment (PPE) and ensure correct fit
2. Identify permaculture work practices	2.1 Identify good environmentally sustainable practices, and seek clarification when necessary 2.2 Adopt work practices which maximise productivity and time efficiency and minimise waste and resource use 2.3 Follow instructions and directions and ask for clarification when necessary
3. Contribute to improved permaculture practices	3.1 Gather information about permaculture and support the development of improved permaculture practices 3.2 Discuss environmental issues, community issues and their relationship to permaculture practices with supervisor and colleagues 3.3 Contribute to the review of permaculture practices in a permaculture environment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD841PPP01B.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPER101 Observe permaculture principles and work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with supervisors and workplace colleagues
- recognise basic environmental influences
- contribute to improved permaculture work practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture
 - ethics – earth care, people care, fair share
 - principles – at this level, limited to the trainer/supervisor’s interpretation and simplification of those contained in the two seminal permaculture text books (Mollison 1988 and Holmgren 2002)
- good practice approaches to minimising environmental hazards and risks
 - producing no waste
 - thinking globally and acting locally
 - observing nature and learning from her patterns
 - responding to change creatively and with consideration for the needs of all users of and/or elements in the system
 - learning from mistakes and developing successes
- factors to improve environmental performance in regard to water catchments, ecosystems, habitat, efficient use of resources, sustainability and waste minimisation
- factors to improve community issues, especially in regard to caring for people, sharing surpluses and setting limits to growth

- environmental issues and their potential impacts
 - sustainability of land use and agricultural work practices
 - reduction and disposal of waste
 - improvements to water quality
 - improvements to air quality
 - energy efficiency
 - biodiversity and habitat protection
 - conservation of natural resources
 - wild-fire management and mitigation
 - food, water and energy security
 - human rights and right livelihood

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- cooperate with team members
- store and stockpile materials
- clean up on completion of work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- tools and equipment used
- principles of resource conservation including:
 - reduce, reuse, recycle, repair, repurpose, restore
 - minimal impact living
 - sustainable food production
 - energy efficiency
 - the following types of appropriate energy: solar and wind power
 - the following types of appropriate technology: composting toilets, grey water re-use
 - water catchment, storage and re-use
 - seed collection and seed banking
 - mulching and soil conservation
 - revegetation
- community and social interaction and support, such as:
 - resource banking

- seed banking
- co-operatives
- Local Energy Trading Systems (LETS)
- Skill-Share
- techniques used in resource conservation, such as:
 - stock piling resources
 - the following types of processing requirements for resources which cannot be stock-piled: composting, fermentation, drying
 - water storage and treatment
 - capture and storage of energy (heat capture in mass, basic turbine function)
- making connections between everyday living and sustainable use of resources

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER103 Support plant care in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support plant care in a permaculture system.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify common features of Zone 1 permaculture gardens	1.1 Identify key characteristics of a Zone 1 permaculture garden 1.2 Compare and contrast common features of Zone 1 permaculture gardens with traditional home gardens 1.3 Identify functions and yields of plants in a Zone 1 permaculture garden

Element	Performance criteria
2. Demonstrate safe and efficient work practices	2.1 Identify and check the required materials, tools and equipment and prepare according to lists provided and/or supervisor's instructions 2.2 Adopt work practices which maximise productivity and time efficiency and minimise waste and resource use 2.3 Follow plant care instructions and directions provided by supervisor and seek clarification when necessary
3. Undertake bed preparation and planting activities	3.1 Prepare beds for planting of plants, seeds or seedlings 3.2 Plant the plants, seeds or seedlings 3.3 Follow instructions in relation to workplace practices, handling and disposal of materials 3.4 Report problems or difficulties in completing work to required standards or timelines to supervisor
4. Maintain plants	4.1 Determine watering regime for different plants in conjunction with supervisor 4.2 Determine nutrient requirements for plants in conjunction with supervisor 4.3 Clarify additional requirements of different plants in conjunction with supervisor
5. Harvest plants and plant yields	5.1 Identify potential yields from different species to be harvested 5.2 Harvest plants and plant yields 5.3 Store plants and plant yields 5.4 Complete any reporting requirements at the end of the job

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD841IPA03B.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPER103 Support plant care in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Identify common features of permaculture Zone 1 gardens
- identify and check the required materials, tools and equipment
- prepare a garden area for planting plants, seeds or seedlings
- determine the appropriate watering regime and nutrient requirements for the plantings
- harvest plant yields
- store the plant yields

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the characteristics of permaculture Zone 1 gardens
 - how permaculture gardens differ from conventional gardens
 - functions and yields of plants in a Zone 1 garden
 - observing nature and learning from it
- principles of planting in permaculture systems, such as:
 - aspect
 - planting patterns
 - companion planting
 - the soil-water-plant relationship
- plant care techniques and plant nutrition, such as:
 - the role of composts, worm castings, green manures, animal manures and support species in permaculture plant care
 - when to leave weeds, chop-and-drop and mulching

- simple pest protection (cages, rings, stakes and nets)
- simple climate protection (sun/frost/wind)
- how to reuse and recycle excess products of plant care

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III qualification (or higher) in Permaculture and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER201 Work effectively in permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to work effectively on an individual basis and with others in permaculture.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain information about permaculture	1.1 Identify and access sources of information about permaculture 1.2 Collect information to assist effective and safe work performance within a permaculture work site 1.3 Identify workplace terms and conditions 1.4 Identify work and career options for permaculture practice

Element	Performance criteria
2. Observe requirements of a permaculture workplace	2.1 Ensure work practices comply with enterprise work requirements 2.2 Recognise faults and abnormalities in workplace practices and take remedial action 2.3 Observe punctuality in work attendance 2.4 Complete work routines and specific instructions to meet workplace expectations
3. Work effectively in a permaculture workplace	3.1 Plan work tasks in consultation with team members and supervisor 3.2 Follow instructions from supervisor 3.3 Cooperate with others as part of a team with consideration of special needs of co-workers and others 3.4 Accept responsibility for quality of own work
4. Contribute to a productive permaculture workplace	4.1 Fulfil commitments to undertake work or assist co-workers 4.2 Share knowledge and skills with co-workers through conversations and demonstrations 4.3 Recognise and seek out contributions from individuals of different gender and social and cultural backgrounds, if appropriate 4.4 Ensure work is consistent with workplace standards relating to anti-discrimination and workplace harassment 4.5 Recognise and resolve conflict through personal communication if possible and reference to supervisor for support 4.6 Undertake responsibilities and duties so as to promote cooperation and good workplace relationships

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842PPP01B.

Assessment Requirements for AHCPER201 Work effectively in permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and collect information about permaculture
- interpret workplace schedules
- accept responsibility for own work
- promote workplace cooperation
- contribute to a productive workplace environment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture
 - different sectors within a permaculture system
 - relationships between sectors and the whole
 - permaculture services available in the area as listed in available references including:
 - media reports
 - reference books
 - industry journals
 - internet sites
 - libraries
 - observation of nature
 - personal observation and experience
 - relationships between the permaculture enterprise and other industries
 - legislation that affects permaculture enterprises

- unions and industry associations
- career opportunities within permaculture
- work ethic required to work in permaculture enterprises
- ethics of permaculture
 - care for the earth
 - care for all people
 - sharing the surplus
 - setting limits to growth
- permaculture practices and procedures, such as:
 - cooperation over competition
 - respecting and celebrating all ethnicities, religions, ages, genders and abilities
- wwoofing and other labour exchange programs
- lifestyle as a conserver
- workplace expectations and communication channels

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER202 Harvest, treat and store seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to harvest, treat and store seed.

All work is carried out to comply with workplace requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for harvesting of seed	1.1 Discuss work requirements with supervisor and seek clarification where necessary

Element	Performance criteria
	1.2 Clean seed harvesting and handling equipment and transport to seed collecting site 1.3 Determine seed that is to be collected 1.4 Prepare locations for treatment and storage of seed
2. Harvest seed	2.1 Collect seed using selected method complying with any conditions of permit or agreements with land holders, if applicable 2.2 Protect the health of parent plants during seed collection, if required 2.3 Place seed in clean containers and label
3. Treat and store seed	3.1 Separate seeds from other materials using available separation methods 3.2 Treat seeds, if required, according to harvesting plan 3.3 Record all appropriate data regarding collected seed on the seed container according to the harvesting plan 3.4 Pack and store seeds

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842RES02B.

Assessment Requirements for AHCPER202 Harvest, treat and store seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare to harvest seed
- harvest seed
- treat and store seed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- seed harvesting techniques
- characteristics of mature healthy seed
- diseases and pests likely to affect the seed
- the following types of seed extraction:
 - hand selection
 - winnowing
 - sieving
 - vibration
 - flotation and fermentation
 - drying
 - heat-assisted dehiscing
 - crumbling of husks
- the following permaculture practices relating to seed harvesting and storage:
 - appropriate containers including re-used jars, boxes and packets
 - cool, dry location

- freezer or refrigerator
- pest deterrent mechanisms
- light exclusion mechanisms
- non-chemical protection against pathogens
- the following data included in seed saving:
 - genus, species, family, variety and cultivar information
 - provenance – where the seed came from
 - weight or number
 - date collected
 - place collected
 - collector
 - cultural advice or growing conditions
 - seed pre-treatment advice
 - longevity information
 - growing-out trial information
 - storage location information or record locator

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER203 Record information about the local bioregion

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to record information about the local bioregion.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Discuss work requirements with supervisor and seek clarification where necessary 1.2 Identify materials required for the work and collect and prepare them
2. Collect information	2.1 Determine the boundaries and extent of bioregion according to

Element	Performance criteria
	community and geophysical and biological guidelines 2.2 Identify key plant and animal species of the ecosystem by local or common name 2.3 Identify special features and sites of the bioregion and relate to ecological information 2.4 Investigate knowledge on plants and animals relationships from a permaculture perspective 2.5 Investigate information on land uses and land management practices in the bioregion 2.6 Outline the history of bioregion from community sources and available literature 2.7 Define simple food chains and energy flows relevant to the local bioregion
3. Review changes	3.1 Identify environmental changes from land use and the impacts of these changes on current and future land uses 3.2 Document environmental trends and their potential impacts on the bioregion 3.3 Record land and water management practices that can repair environmental changes
4. Document information	4.1 Document information about the local bioregion 4.2 Recognise and record ownership of information used in an appropriate manner 4.3 Document any conditions and parameters defining use of information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842BIO03B.

Assessment Requirements for AHCPER203 Record information about the local bioregion

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect information about the local bioregion
- review the information
- document the information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- designated areas and features of a bioregion, such as:
 - a bioregion, as a land and water territory whose limits are defined not by political boundaries, but by the geographical limits of human communities and ecological systems.
 - water catchment, as one of the key identifiers of the bioregion
 - the vegetation on the catchment, as also an essential feature of a bioregion
- local and common names for plants and animals
- ecological concepts, such as:
 - niche
 - habitat
 - community
 - ecosystem
 - energy flows
 - food webs/chains
 - water cycles
 - species and species relationships

- plant and animal succession
- Permaculture perspectives, such as:
 - seeing connections between elements in a system
 - supporting ecological and community co-existence
 - valuing renewable resources and energy
- alternative strategies of trade such as barter and local exchange trading systems (LETS)
- community resources including local skills, public transport options, contractors and facilities

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER204 Check and operate permaculture water systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare to set up a permaculture water system
- set up water systems
- monitor water flows
- place system components in a way that gives most effect and greatest yield
- inspect earthworks for passive water catchment, storage and movement

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices in relation to water systems
- behaviour of water in the natural environment
- reading natural water flows
- operation of permaculture water systems, such as:
 - irrigation systems
 - water collection and storage containers (tanks, dams)
 - recycling
 - waste-water systems
 - water conservation approaches
 - swales
 - contour banks
 - mulch pit and path systems
 - dams

- chinampas
- free-flowing water (streams, rivers)
- aquaculture systems
- aquaponics systems
- productive water bodies (lakes, the sea)
- earthworks for passive water catchment, storage and yield
- components of a water system and their cleaning and storage requirements
- water conservation and management principles and practices including working with passive systems, swales, terraces, dams and other earthworks
- passive harvesting, movement and nutrient adding systems including appropriate earthworks
- biological filtering of water into and out of a permaculture water system

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER205 Prepare and store permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle products and their containers safely
- maintain containers in good condition
- maintain product storage areas and containers
- grade and label products
- pack and store products
- check stored products for damage, repacking or other treatments

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices in relation to product preparation and storage, such as:
 - the range of products produced by permaculture enterprises and their yields
 - parts of products stored
 - preserving the harvest
- correct handling, preparation and treatment techniques for a range of products, such as:
 - observation and identification of harvest readiness
 - storage methods for different products
 - pests and diseases likely to affect storage
 - hygiene issues in the handling and storage of permaculture products

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER206 Plant and maintain permaculture crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plant and maintain plants in a permaculture cropping system under routine supervision and involves a range of planting tasks, including site preparation, the handling and planting of a range of planting materials, and the maintenance of crops in the field.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to plant permaculture crops	1.1 Confirm instructions about planting with supervisor 1.2 Select and prepare tools and equipment 1.3 Identify plant materials to be planted 1.4 Select, use and maintain personal protective equipment
2. Prepare the site for planting	2.1 Remove or slash old plants, weeds and other residual materials if required 2.2 Apply soil treatments or amendments according to supervisor's instructions 2.3 Implement plant protection 2.4 Follow the permaculture planting plan and mark out the planting pattern
3. Carry out planting operations	3.1 Select appropriate planting material 3.2 Maintain planting material under conditions that ensure maximum viability 3.3 Handle and transport planting material to the site 3.4 Carry out planting according to permaculture planting plan
4. Maintain plants	4.1 Apply treatments to plantings according to the permaculture plan 4.2 Water plantings according to the irrigation schedule 4.3 Train and protect plants according to the permaculture plan

Foundation Skills

Assessment Requirements for AHCPER206 Plant and maintain permaculture crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select plant material, tools and equipment for planting
- prepare site for planting
- plant according to permaculture planting plan or pattern
- support, train, guard or protect plants
- follow plans and schedules
- water plantings
- apply treatments to soil

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to planting operations, such as:
 - planting in natural groupings or guilds
 - utilising plant partnerships such as vines on corn crops
 - planting mixed species and interplanting with companion species
 - avoiding soil compaction or disturbance
 - utilising chickens to plough and prepare ground for planting
 - avoiding water, seed or weed leakages from the system
- principles of sustainable horticultural practices
- planting techniques
- basic plant nutrition
- soil improvement and nutrient maintenance, such as:
 - minerals, including rock dusts

- organic matter
- manures, appropriate fertilisers and composts
- foliar feeds or fertigation
- vermicompost and worm castings
- planting of a temporary green manure or cover crop
- legume plantings or interplantings
- sheet mulches
- companion planting
- plant growth and development
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER207 Care for animals in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of animals in a permaculture system through providing the optimal environment for them, caring for animals common in permaculture systems, animal behaviour and handling and maintaining basic records. This unit is applicable to both farm animals and companion animals.

All work is carried out to comply with workplace procedures, including animal welfare, quarantine and work health and safety policies and procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCPER207 Care for animals in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess animal health and welfare
- provide an optimal environment for animals
- feed and water animals
- handle animals safely and humanely
- move animals to different housing or pastures when necessary
- implement and record animal health and welfare control strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to animal care in a permaculture system
- animals common to permaculture systems in a given region or system
- role or niche of animals in system and interrelationship with other animals, plants or systems
- principles of animal feeding and nutrition
- principles of animal health, welfare and care
- symptoms of ill-health in animals
- legislation and regulations relating to animal health and welfare
- signs of animal fear, aggression and stress
- handling of animals
- safe handling of sick and dead animals

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER208 Harvest permaculture crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit provides the skills and knowledge required to harvest permaculture crops. It requires knowledge of common crops used in permaculture systems, recognition of the maturity parameters of crops, grading characteristics, maintaining quality of produce, and the effect of adverse weather conditions.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess plants for harvest	1.1 Identify crops to be harvested according to the harvesting plan 1.2 Determine crop maturity 1.3 Confirm conditions are right for harvesting
2. Prepare equipment for harvesting	2.1 Select tools, equipment and machinery appropriate to the task being undertaken 2.2 Carry out pre-operational and safety checks on tools, equipment and machinery according to manufacturer specifications 2.3 Select, use and maintain suitable personal protective equipment (PPE)
3. Harvest the crop	3.1 Harvest the crop carefully and safely 3.2 Sort and grade the crop as needed 3.3 Clean and maintain harvesting tools, equipment and machinery
4. Complete crop harvesting work	4.1 Employ safe manual handling techniques when handling containers 4.2 Move and stack containers in such a way as to minimise damage to the crop 4.3 Maintain temperature of the crop at the levels set by the harvesting plan 4.4 Transport crop from the field to the processing or storage area 4.5 Maintain containers in good working order

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER208 Harvest permaculture crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess plants for harvest
- prepare for harvest
- carry out harvest operations
- maintain harvesting equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles related to harvesting
- principles of sustainable horticultural practices
- crops common in permaculture systems
- harvesting techniques, such as:
 - selective picking or hand picking ripe from unripe
 - tree shaking
 - picking leaves rather than whole plants
 - cutting plants and allowing to regrow (eg leeks, spring onions)
 - thinning or removing weak or diseased plants from among healthy ones
 - end of season crop extension harvesting (such as hanging tomato plants to ripen indoors)
- equipment and machinery used in harvesting
- sorting and grading, such as:
 - removing out-of-type plants
 - removing physically damaged, unhealthy, rotten or immature fruit and vegetables

- grading of the crop according to variety, size, length, colour, maturity, blemishes, bud count and quality, being subject to seasonal and market forces
- storage, transportation and grading of crops
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER209 Recognise characteristics of integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- recognise animals and plants
- name animals and plants by common name
- read a permaculture plan
- identify plants and animals commonly encountered in a permaculture system
- identify plants with useful properties (food, fuel, fibre, medicinal, dyes, shade, habitat etc)
- describe animals with functions in the system
- produce a simple report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to integrated plant and animal systems, such as:
 - practices which conserve energy and resources
 - protecting water, soil and other resources
 - obtaining a yield
 - preserving heritage or heirloom varieties (biodiversity)
 - re-using or adapting materials for other functions
 - making use of vertical space
 - creating multiple functions for the same thing
 - using nature as the model
 - seed-saving
- animals and plants common to permaculture systems in a given region or bioregion

- the role or niche of animals in system and interrelationship with other animals, plants or systems, such as:
 - native or wild animals and plants
 - pest and feral plants and animals
 - insects, fish, birds and reptiles, both friend and foe
- principles relating to integrated plant and animal systems

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER214 Propagate plants for a permaculture garden system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to propagate plants for a permaculture garden system including small scale nurseries, school nurseries and systems where sales and profit are not the main drivers. It requires knowledge of propagation techniques, basic plant nutrition and potting media suitable for the home propagation system.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to propagate plants	1.1 Collect and wash containers and trays 1.2 Prepare containers with suitable potting mix for the propagation process being undertaken 1.3 Have tools, water and labelling materials on hand
2. Propagate plants using garden techniques	2.1 Take cuttings, sow seed or divide plants as required 2.2 Place new plants into prepared containers to required level and give water, cutting treatment or fertiliser as needed 2.3 Label the new plant accurately 2.4 Place containers in trays or in propagation area to grow on
3. Maintain health of plants during propagation	3.1 Monitor new plants and take remedial action as needed 3.2 Check for disease or pests and treat according to permaculture principles 3.3 Check for root growth and pot into larger container if required 3.4 Water, shelter or shade depending on prevailing weather conditions, size of container and needs of species 3.5 Harden off in a sheltered area before planting out
4. Maintain garden propagation system year round	4.1 Check propagation area between seasonal propagation activities and clean or tidy to avoid disease 4.2 Maintain health of mother plants for propagation purposes 4.3 Maintain stocks of containers, labels, stakes and ties for future use 4.4 Maintain stocks of potting materials and nutrient additives 4.5 Keep propagation system clean and weed free at all times

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER214 Propagate plants for a permaculture garden system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for plant propagation
- propagate plants using garden techniques
- maintain healthy new plants and mother plants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to propagation, such as:
 - using reclaimed or reused containers (suitably cleaned to avoid cross-contamination)
 - labelling systems using reclaimed materials
 - maintaining rare and unusual varieties
 - using edges and valuing marginal or unusual plants in micro-climates
 - sharing and swapping to increase biodiversity and mutual wellbeing
 - preserving provenance of locally indigenous species
 - testing and trialling for new plants or resistant varieties
 - global food plant preservation including seed saving
- principles of sustainable horticultural practices
- propagation techniques, such as:
 - soft wood cuttings
 - hard wood cuttings
 - tip and root cuttings
 - layering and division

- grafting (whip and tongue, saddle and wedge)
- seed sowing
- basic plant nutrition
- potting mixes suitable for propagation in a garden setting, such as:
 - compost and worm casting mixes
 - sieved and graded sands
 - blends used for different purposes or different times of year
 - sphagnum moss
- basic plant growth and development
- small-scale glass, shade or poly house structures
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER215 Assist with garden soil health and plant nutrition

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with garden soil health and plant nutrition using simple methods and without costly equipment. It requires knowledge of simple soil testing techniques and how to improve soil health and plant nutrition organically.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Undertake simple soil assessment tests	1.1 Prepare soil samples for testing 1.2 Use simple techniques to check the texture, pH, organic matter and soil life in the soil samples 1.3 Use simple techniques to read the probable soil condition using plant growth and insect or animal activity
2. Add organic or allowable nutrients to improve soil	2.1 Determine needs of soil for improvement 2.2 Add allowable additives such as compost, rock dust, manure and compost tea to improve soil 2.3 Use planting techniques such as green manures, companions, guilds and nurse plants to improve soils and plant nutrition 2.4 Protect the soil with mulch to maintain moisture and discourage unwanted growth
3. Monitor soil health	3.1 Monitor the health of the soil through the seasons 3.2 Ensure soils are not over dry or over wet 3.3 Avoid salting or greywater sodicity if watering with reused water 3.4 Regularly check for health of soil organisms, nutrient deficiency in leaves, and signs of pathogen fungal, bacterial or viral action on plants 3.5 Monitor soil improvement and plant nutrition over time

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER215 Assist with garden soil health and plant nutrition

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake simple soil assessment tests
- add organic or allowable nutrients to improve soil
- Protect soil to maintain moisture and overall soil health

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to soil health and plant nutrition, such as:
 - working with natural soils rather than importing soil
 - soil as an ecosystem
 - soil as biomass and carbon capture and storage
- principles of sustainable horticultural practices
- soil testing techniques, such as:
 - jar test for texture
 - ribbon test and ball test
 - pH testing
 - surface evaporation test
 - worm count
- basic plant nutrition
- allowable additives to improve soils, such as:
 - compost and worm castings
 - compost teas

- rock dust
- gypsum
- green manures
- manures/animal bedding materials
- leaf mould
- plantings – green manures, nurse plants
- companion planting
- dynamic accumulators
- chop and drop
- nutrient trapping systems
- greywater use
- organically certified products
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER301 Research and communicate information on permaculture principles and practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research general information on permaculture
- identify differences between permaculture and other land management or land use practices
- share general information with others on permaculture

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- similarities and differences between other land use and management practices and permaculture, such as:
 - conventional broad-acre farming
 - battery chicken farms
 - intensive meat production facilities (e.g. feedlots, piggeries)
 - fish farming
 - biodynamic agriculture
 - organic mixed farms
- culturally appropriate speech and behaviour
- basic research techniques
- using primary data sources, such as:
 - original data gathered by the researcher
 - measurements

- photographs
- maps or sketches
- soil tests
- observations of light, shade, sun angle
- flora and fauna present at the site
- slope and contour information
- observation of site and adjoining landscape features (e.g. sector analysis)
- weather observations
- using secondary data sources, such as:
 - data provided by government departments and agencies, local groups (such as Landcare) or individuals (such as neighbours)
 - survey documents, maps and plans
 - official weather data
 - photographs, such as Google Earth
- communication techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER302 Develop recommendations for integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify client needs and the nature of the job
- determine options for developing an integrated plant and animal system
- communicate with clients, work team members, supervisors, suppliers, contractors and consultants
- identify plants
- provide information on the characteristics, needs and functions of plants and animals in integrated systems
- interpret site designs, maps, ground plans and specifications
- prepare drawings and tables showing how the systems integrate

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles related to integrated plant and animal systems
- permaculture practices, such as:
 - minimising effort for maximum effect
 - multiple uses for each element in the system
 - more than one way of providing important functions
 - re-using and valuing resources and energy
 - encouraging productivity of the system
 - seeing solutions not problems
 - using vertical space and other edges and connections
 - preventing waste and loss of resources from the system

- methods of design, such as planning spatially and allowing for overhead and underground structures, shadow, slope and sun angle
- an understanding of the place of permaculture topics sometimes relevant to integrated plant and animal systems, such as:
 - pattern understanding
 - ecological principles
 - climate and weather
 - water
 - soils
 - earthworks
 - aquaculture
 - species identification and selection information
 - plants in integrated systems
 - animals in integrated systems
- local plant suppliers, animal suppliers, consultants, services, products and contractors and availability of local resources
- patterns in permaculture design, such as:
 - patterns in space, such as planting patterns, naturally occurring patterns in nature (radial and bilateral symmetry, spirals, circles, dendritic and mandala patterns)
 - patterns in time, such as succession planting, breeding cycles, seasonality
 - patterns in human culture, such as gardening systems
 - nature as the model for design, such as stacking or layering as with a natural forest
 - gravity as a force for design, such as using contours in design
 - nutrient, water and energy capture, storage and re-use according to the inputs, outputs and intrinsic features of the system

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER303 Maintain integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain integrated plant and animal systems, undertake maintenance, and maintain records of activities. Maintaining integrated plant and animal systems requires a knowledge of permaculture activities appropriate to climate and soil types, plants and animals commonly found on permaculture properties, permaculture principles and practices and typical permaculture solutions for water catchment and storage and soil maintenance and improvement for plant and animal systems.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan maintenance of integrated plant and animal systems	1.1 Assess maintenance requirements for the integrated plant and animal system 1.2 Consult stakeholders about maintenance activities where required 1.3 Determine and source the required equipment, machinery and materials for maintenance activities 1.4 Read and interpret permaculture design specifications for the property and follow any specific directions on maintenance approaches and strategies 1.5 Plan movement through production areas to minimise disturbance and degradation during maintenance activities
2. Undertake maintenance activities	2.1 Maintain a clean and safe work area 2.2 Take appropriate measures to avoid degradation and disturbance to soil, plants, animals, waterways and other parts of the ecosystem 2.3 Monitor activities of personnel and visitors to reduce risks to the productive systems undergoing maintenance
3. Complete maintenance activities	3.1 Make site good on completion of maintenance activities 3.2 Clean and store equipment and machinery appropriately on completion of maintenance activities 3.3 Remove or store excess materials 3.4 Maintain records of maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD843IPA03B.

Assessment Requirements for AHCPER303 Maintain integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan maintenance activities for integrated plant and animal systems
- undertake maintenance
- record and report on completion of activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Integrated plant and animal systems, such as:
 - gardens, orchards, organic farms, woodlots and forests that include animals in free range or rotational systems
 - balanced ecosystems where the needs of all species are met
 - systems where poultry provide fertility, pest control and other services to plants, such as:
 - chicken-orchard systems
 - duck-rice systems
 - poultry used as tractor
 - frogs, birds and other wild creatures attracted to the garden to maintain ecological balance
 - patterns seen in nature, such as stacking and layering of plants in a forest, used in deliberate design
- plants and animals commonly found on permaculture properties
- plant groups and vegetation structures
- permaculture practices, such as:

- composting of weeds
- chop and drop practices
- feeding weeds to animals
- soil support and enhancement strategies
- animal husbandry strategies
- permaculture design information, such as:
 - permaculture site plan
 - components of integrated plant and animal systems
- the role of animals in improving soil, recycling nutrients, managing ‘weedy’ plants and controlling pests and diseases
- plants as indicators and improvers
- typical permaculture solutions to water catchment and storage for integrated plant and animal systems
- recycling of materials and waste

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is NOT sufficient at this level.

AHCPER305 Implement crop maintenance and harvesting programs for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement crop maintenance and harvesting programs for permaculture systems. Crop maintenance methods may include, thinning, spacing, selective harvesting, training, summer and winter pruning, hedging, skirting, topping and trimming. Crop harvesting methods may include manual and machine-assisted harvesting.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Assessment Requirements for AHCPER305 Implement crop maintenance and harvesting programs for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and crop maintenance and harvesting schedules
- harvest or maintain crops correctly and without damaging produce
- coordinate work group, contractors and own activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to obtaining a yield
- principles of maintaining crops and the methods used to maximise crop yields
- maintenance techniques for a range of crops, such as:
 - manual thinning
 - selective harvesting
 - training
 - summer and winter pruning
 - hedging
 - skirting
 - topping
 - trimming
 - picking
 - bagging
 - trellising
- maturity or ripeness properties of crops when ready for harvest

- effects of maintenance operations on plant growth, habit and production levels of maintenance operations
- maintenance of soil health and impact on production
- enterprise quality procedures and characteristics of a crop relative to varying market requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER306 Use weedy plants in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to control and make use of weedy plants in a permaculture system. It also includes permaculture practices, such as use of succession in a permaculture system and the use of harvest as a means of control.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the implications of weedy plants in the	1.1 Assess the scope and size of the weedy plant population

Element	Performance criteria
system	1.2 Investigate the soil properties, water availability and terrain of the affected areas 1.3 Investigate the history of the previous land use and management strategies of the site 1.4 Identify weedy plants and associated organisms and record in field notes 1.5 Identify weedy plant populations tolerated by the client, market or environment according to the permaculture management plan 1.6 Identify weedy plant population levels above which plant health or growth objectives are compromised 1.7 Obtain professional advice as required according to permaculture management plan
2. Plan the implementation of permaculture weedy plant management plan	2.1 Identify uses for weedy plants, waste materials and debris for fodder, mulching or composting 2.2 Select tools, equipment, machinery, and other control measures for each part of the weedy plant management work, according to the permaculture management plan 2.3 Select, use and maintain suitable safety equipment and personal protective equipment (PPE)
3. Implement the permaculture weedy plant management plan	3.1 Coordinate the enterprise work team, contractors and/or control animals in a sequential manner according to the permaculture weedy plant management plan 3.2 Implement the permaculture weedy plant management plan 3.3 Maintain records appropriately
4. Monitor the permaculture weedy plant management plan	4.1 Monitor progress of the permaculture weedy plant management plan to identify side effects to other plants, animals or the environment 4.2 Assess effectiveness of the permaculture weedy plant management plan 4.3 Adjust the permaculture weedy plant management plan where necessary to meet expectations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER306 Use weedy plants in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- recognise a range of weedy plants and associated organisms within a particular permaculture enterprise
- identify uses of weedy plants in a permaculture system
- identify control methods used in permaculture weedy plant management plan
- implement a permaculture weedy plant management plan
- assess progress and effectiveness of the permaculture weedy plant management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices in relation to the management of weedy plants
- weedy plant recognition
- strategies used in weedy plant management plans, such as:
 - organic chemical, biological and cultural control methods and treatments available to the enterprise within the parameters of a permaculture weedy plant management plan
 - range and use of tools, equipment and machinery available to the enterprise for implementing a permaculture weedy plant management plan
 - animal systems to use the weedy plant as a food source
 - plants and planting strategies to out-compete weedy plants or to be used as a follow up to successful treatment
- site monitoring and analysis techniques that may be used to implement a permaculture weedy plant management plan
- roles that weeds play within an ecological system, such as:

- soil stabilisers
- fodder for wild and domestic animals
- nutrient traps
- nutrient mining from subsoil
- identification of a range of edible weedy plants
- uses for weedy plants including commercial uses, such as:
 - animal fodder
 - basket making
 - compost teas
 - food and medicinal products, such as nettles as cheese wraps or herbal teas

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Certificate is not sufficient at this level.

AHCPER307 Establish a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish a rural permaculture system from a permaculture design, as well as knowledge of a broad range of integrated plant and animal systems, earth shaping skills, soil improvement, water harvesting and work site coordination skills.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to establish a rural permaculture system	1.1 Read and interpret the design for the permaculture system 1.2 Identify the site, planting methods and system features 1.3 Select materials, tools, equipment and machinery
2. Coordinate establishment of the rural permaculture system	2.1 Coordinate work tasks in a sequential, timely and effective manner 2.2 Establish the permaculture system according to work health and safety requirements and with due consideration for environmental implications 2.3 Maintain a clean and safe work area throughout
3. Prepare the area	3.1 Undertake earthworks if required 3.2 Select and apply additives to the soil as required 3.3 Mark out patterns or positions of elements on site according to permaculture design
4. Undertake positioning of elements in the rural permaculture system	4.1 Inspect elements prior to planting, introduction or installation and remove elements with major defects 4.2 Trim or treat plants with minor defects to maintain health and vigour 4.3 Position elements to enable them to develop their full potential according to zone and sector analysis, pattern understanding and the permaculture design 4.4 Provide elements with post-installation care
5. Monitor establishment of the rural permaculture system	5.1 Monitor the system and take corrective action as needed 5.2 Identify situations which will prevent elements from reaching their full potential 5.3 Complete works for the permaculture design
6. Complete establishment of the rural permaculture system	6.1 Remove or dispose of waste material from the site 6.2 Clean, maintain and store tools, equipment and machinery 6.3 Report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPER307 Establish a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with work team members, supervisors, contractors and consultants
- utilise recording, reporting, analysis and work procedure documents
- read and interpret the permaculture design
- prepare the area for installation of elements of design
- install elements progressively over an appropriate period of time to establish the rural permaculture system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of permaculture and practices in a rural context
 - rural permaculture system design for a farm or small holding where permaculture is practiced
- zone and sector analysis, for example:
 - consideration of the frequency of use and intensity of need of elements in the system
 - consideration of the spatial requirements of elements in the system
 - mutual benefit and connections between zones
 - consideration of the specific needs of the location of the system in terms of climate, access, slope, potential for wild fire, flood, tsunami or other catastrophic force
 - Consideration of the neighbouring or local environment, its need, products and intrinsic features
- Establishment of permaculture elements:
 - Elements which together form a system

- species chosen for their functions in the overall system including plants, animals and objects
- elements chosen for mutual benefit
- elements which address important functions such as energy, water, food and fuel
- elements which support the needs of the system within the overall design
- the objectives of the plant system establishment program, including finished plant system forms, site appearance, end use and time constraints
- the interactions between plants and animals and how to maximise the benefits
- cultural requirements, planting procedures and follow-up care for plants
- environment and habitat requirements of animal species
- the identification of pests, diseases, parasites, and deficiencies that are likely to affect plants and animals and the use of appropriate treatments
- soils and appropriate soil amelioration techniques
- the ecology of the native species, and their value in a permaculture system

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER308 Establish an urban permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Communicate with work team members, supervisors, contractors and consultants
- utilise recording, reporting, analysis and work procedure documents
- interpret the permaculture design
- install elements progressively to establish the urban permaculture system (over an appropriate period of time)

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of permaculture and practices in an urban context
- Urban permaculture systems, such as:
 - houses and gardens where permaculture is practiced, or a productive section of it
 - community gardens or city farms where permaculture is practised
 - school gardens where permaculture is practised, or productive sections of them
 - Chicken, rabbit, guinea pig or other tractor systems
 - continuous worm farm systems
 - chicken dome pattern systems
 - tyre pond and mandala aquaculture systems appropriate to an urban permaculture system
 - aquaponics systems
 - duck and rice systems and other integrated systems appropriate to an urban permaculture system which utilise an animal, fish or bird species to generate a yield in association with plant species

- Zone and sector analysis
 - Consideration of the frequency of use and intensity of need of elements in the system
 - Consideration of the spatial requirements of elements in the system
 - Mutual benefit and connections between zones
 - Consideration of the specific needs of the location of the system in terms of climate, access, slope, potential for wild fire, flood, tsunami or other catastrophic force
 - Consideration of the neighbouring or local environment, its needs, products and intrinsic features
- Elements in permaculture elements
 - Elements which together form a system
 - species chosen for their functions in the system, including plants, animals and objects (built or existing)
 - elements which are chosen for mutual benefit
 - each important function (energy, water, food, fuel etc.) is supported by many elements
 - elements support the needs of the system within the overall design
- the interactions between plants and animals and how to maximise the benefits
- plant and animal species and their cultivars or breeds and what they contribute to the system
- cultural requirements, planting procedures and follow-up care for plants
- environment and habitat requirements of animal species
- the identification of pests, diseases, parasites, and deficiencies that are likely to affect plants and animals and the use of appropriate treatments
- soils and appropriate soil amelioration techniques
- the ecology of the native species, and their value in a permaculture system
- site retrofitting for urban permaculture systems:
 - constructing soil retainers
 - installing irrigation and drainage systems including swales, diversion drains, mulch-pit paths
 - establishing integrated plant and animal systems
 - collection and storage of nutrients or water
 - solar passive modifications to structures

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER309 Install and maintain permaculture water systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise resources for installation work
- set out and prepare site
- install permaculture water systems materials and components, excluding works requiring a licensed plumber.
- commission a permaculture water system
- monitor and maintain permaculture water systems
- communicate with work team members, supervisors, contractors and consultants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture practices regarding water including natural flows, rainwater and wastewater, storage, movement and retention of water in the system
- permaculture water systems, such as:
 - swales
 - contour banks
 - terraces
 - mulch-pit paths
 - diversion channels and other passive installations
 - mains pressure systems
 - low pressure or gravity systems
 - below-ground systems
 - above-ground systems

- spray, dripper and capillary irrigation systems
- water tanks
- guttering and first-flush diversion system
- water supply components, such as:
 - mains
 - dam
 - bore
 - windmill
 - tank
 - channel
- understanding of contours
- installation methods and techniques for permaculture water systems
- components of permaculture water systems
- characteristics and operation of joints, valves and sprinkler components
- operation of pumps and water flow rates
- behaviour of water on varying terrain and soil types
- soil water retention testing techniques
- water quality and water filtration techniques
- calculations for installing permaculture water systems
- soil characteristics
- regulations and legislative requirements, such as:
 - permits for pruning or removal of large trees
 - connecting to water systems
 - licences for operating specialised machinery, such as chainsaws, skid steer loaders and forklifts
 - setting up traffic and pedestrian barriers
 - digging near services (phone, gas, power, water, sewerage and drains)
 - installing dams or diverting water in catchments
 - installing tanks
 - planning acts and codes
 - earth movement and digging guidelines and legislation
 - environmental legislation
 - land restoration codes
 - water conservation guidelines and legislation
 - soil movement regulations
 - habitat and wildlife protection legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER310 Install structures for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install permaculture structures and features. These structures and features may include fences, trellises, animal housing, sheds, pergolas, appropriate technologies and other constructed features.

All work is carried out to comply with workplace procedures. Manufacturer's specifications are observed and operating instructions are followed when using tools and equipment.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for	1.1 Interpret plans and clarify specifications with the manager,

Element	Performance criteria
structural work	client or owner 1.2 Check the quantity and quality of materials to ensure they conform to permaculture design drawings and specifications 1.3 Select and check tools and equipment 1.4 Identify work health and safety hazards, assess risks, implement controls and take appropriate action 1.5 Identify environmental implications of installing permaculture structures
2. Set out the site for the structure	2.1 Determine the location of services from site plans and from local knowledge 2.2 Mark out the position of the structure or feature using permaculture design drawings and specifications 2.3 Excavate and prepare any footings or post holes appropriate to the type of structure to be installed
3. Prepare and cut materials	3.1 Lay out materials ready for assembly 3.2 Mark out the length of materials and the positions of joints according to designated specifications in the permaculture design drawings 3.3 Select, use and maintain cutting and other tools 3.4 Cut and join materials in preparation for assembly
4. Assemble and erect structure	4.1 Assemble materials into position and fix into place 4.2 Finish structure to ensure all materials are secure and complete 4.3 Apply any required coatings
5. Check quality of work and clean-up site	5.1 Inspect quality of finished works and ensure the standard of the finished structure or feature is appropriate to the permaculture design drawings and specifications 5.2 Clean up debris from structure and site 5.3 Dispose of waste material 5.4 Store or recycle unused materials for future re-use 5.5 Clean and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER310 Install structures for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret permaculture design drawings and specifications
- measure and mark lengths of materials accurately
- join and cut materials using different techniques and methods
- install and check permaculture structure

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles regarding structures and the built environment
- Permaculture design drawings and specifications, such as:
 - Permaculture design including construction detail drawings
 - measured drawing of structure in accordance with permaculture principles
- measuring principles and techniques
- typical permaculture structures, such as:
 - garden structures and features
 - fences and trellising
 - animal housing and shelters
 - netting structures and protective devices for plants
 - paving and landscaping
 - composting and worm-farming structures
 - retaining walls, observing relevant regulatory conditions
 - sheds or small outbuildings, observing relevant regulatory conditions)

- components of houses or other buildings, observing relevant regulatory conditions
- the correct use of hand and power tools and other work health and safety requirements associated with installing structures and features
- comparative environmental implications associated with excavation and construction activity
- safe lifting and transporting techniques
- appropriate use of personal protective clothing and equipment (PPE)
- appropriate use and installation of safety signs and barriers
- site access points
- implication of alteration to water flow during and after construction

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER312 Plan organic garden and orchard systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan organic garden and orchard systems. It requires the application of horticultural and permaculture knowledge including permaculture principles, plant types, conditions and requirements to establish orchards for optimum production.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess site for organic garden and orchard system	1.1 Inspect the site for environmental and physical attributes 1.2 Research site characteristics, using a range of information sources 1.3 Test soil and analyse the results 1.4 Identify site constraints and opportunities 1.5 Define location of existing structures and services 1.6 Prepare site plan and zone and sector plan of site, based on information collected
2. Select plants for organic garden and orchard system	2.1 Select suitable plant varieties and types 2.2 Determine preferred type of plant materials for planting 2.3 Determine number and size of plants and plant materials
3. Develop planting plan for organic garden and orchard system	3.1 Identify zone and sector details from the site plan 3.2 Identify and place plants to be installed 3.3 Record required actions, timelines and specific information on the plan 3.4 Investigate availability of plants, materials and services for the system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER312 Plan organic garden and orchard systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess site for planting
- test soil and analyse the results
- select plants
- identify zones and sectors of site to ascertain best planting locations
- identify structures and services and how these may impact on the plan
- develop planting plan to include at least 5 fruit trees or shrubs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- permaculture site planning
 - boundaries of sites drawn at an appropriate scale
 - direction of North (or sunward)
 - location of plants
 - other information relevant to a permaculture garden and orchard system drawn in clear and accurate graphic style
 - planting schedules and timelines, including Gantt charts
- zone and sector planning, such as:
 - zones for garden and orchard systems (Zones 1 and 2)
 - sector information such as prevailing winds, fire aspect, winter and summer sun angles, best locations for sun-loving and shade-tolerant species
 - microclimate information

- zone and sector plans drawn as overlays to a site plan
- garden and orchard systems, such as:
 - an orchard with 5 to 10 or more assorted fruit trees or shrubs
 - integrated plant and animal systems
 - consideration of and design for plant ecosystem relationships
- soil structure, types and function, including soil tests for agricultural purposes
- soil maintenance and improvement techniques
- aims and purposes of building organic garden and orchard systems
- design principles for organic garden and orchard systems
- features and characteristics of plants used in organic garden and orchard systems
- growing requirements of plants used in organic garden and orchard systems
- biosecurity policies and principles

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER313 Coordinate preparation and storage of permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan for preparation of permaculture products
- process and preserve permaculture products
- pack, present and store permaculture products
- coordinate the work of others in the preparation and storage process

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles related to product preservation and storage
- seasonal availability cycles
- products suitable for storage
- the following plant products:
 - fruits
 - vegetables
 - seeds
 - herbs
 - flowers
 - foliage
 - grains
 - bulbs
 - tubers
 - nuts

- mushrooms
- wild harvest plants
- oils
- firewood
- bamboo
- timber
- legumes and pulses
- mulch
- straw
- hay
- sawdust
- sap
- the following animal products:
 - meat
 - eggs
 - milk and dairy products
 - honey and bee products
 - young animals
 - fish fingerlings
 - feathers
 - wool
 - manure
 - bones
- storage methods appropriate to particular products
- treatment methods appropriate to particular products,:
 - removal of dirt and foreign material
 - stripping excess leaves and/or trimming
 - brushing
 - washing/hydration
 - drying
 - applying preservatives
 - dipping
 - observing quarantine requirements
 - storing in a controlled environment
 - comply with organic standards, if appropriate
- the importance of maintaining the quality of products including handling and storage requirements
- correct storage conditions for products:
 - specifications for storage facilities
 - environmental conditions such as temperature, humidity and light

- length of storage
- position in the storage facility: shed, cellar, root cellar, pantry, barn, refrigerator, freezer, drying room
- cleaning processes to ensure a level of hygiene that protects the quality and health status of the stored products
- hygiene issues in the handling and storage of biological products

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER314 Read and interpret property maps and plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define maps and plans
- determine distances and areas
- identify topographical features
- identify site boundaries and site structures
- use maps to take-off information
- use maps in field situations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maps and plans
 - paper
 - electronic
 - 3D models of sites, including sand-box models
 - contour models
 - elevations and cross-sections
 - aerial photographs
- the following mapping conventions: symbols, distance and scale, direction, coordinate systems, line and area symbols, true North, grid North and magnetic North
- land survey systems, map projections, colour and symbol systems
- contours, slopes and slope profiles
- keyline and key point locations, as described in *Water for Every Farm* by P.J. Yeomans
- topographic features

- curved planes on flat surface distortions
- means of locating current position in the field, such as:
 - GPS
 - other positioning systems such as the sun, moon and stars
 - compass bearings

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER315 Coordinate community projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpret documentation associated with community projects
- organise field staff and volunteers
- represent and support community organisations
- calculate material and resource requirements
- coordinate project activities
- document and report results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- community projects, such as:
 - small or short-term projects
 - projects that form part of larger projects
 - arranging social events
 - carrying out fundraising and sponsorship
 - representing a community group or project
- environmental awareness associated with undertaking project works to ensure minimal impact on the environment
- work schedule programming
- hiring and subcontracting of labour
- attracting volunteers
- possible causes of disruption to work activities and contingency situations, such as:
 - delay in delivery and/or breakdowns with equipment and machinery

- poor weather conditions
- poor quality materials
- unforeseen problems
- provision for providing other work on the site or away from the site while problems are fixed
- delaying a project if possible and necessary
- responsibilities and requirements for obtaining external agency permits as necessary
- the range, use and availability of materials, equipment and resources required for a project
- work health and safety issues, legislative requirements and Codes of Practice
- community consultation
- project coordination principles
- meeting and committee protocols
- project reporting
 - the project name
 - author name and date
 - project description
 - progress of activities
 - promotions and publicity
 - OHS issues
 - expenditure
 - future project-related activities that require planning

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER316 Select plant and animal species for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess permaculture system needs
- research plants and animals to inform the new permaculture system design
- select plant and animal species for a permaculture system
- monitor plant and animal systems during the establishment phase

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to species selection
- permaculture needs analysis
- bioregional analysis
- plant and animal species and their interactions and interrelationships, such as:
 - permaculture combinations – guilds, companions, nurse plants and animal companions
 - EVCs (Ecological Vegetation Classes)
 - indigenous animals and plants
 - what grows or thrives locally – plants, animals, birds, insects, fish, frogs, reptiles
 - food, fodder and medicinal plant species suitable for chosen animals
 - integrated plant and animal systems such as chicken tractors, cell grazing, aquaculture systems
- basic research techniques
- using primary data sources, such as:
 - original data gathered by the researcher
 - local wisdom

- weather observations
- flora and fauna observations
- using secondary data sources, such as:
 - data provided by government departments and agencies
 - publications
 - reference books, websites and journals
 - official weather data
- communication techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER318 Plan propagation activities for a permaculture system

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to plan propagation activities for a permaculture system. It requires the application of permaculture principles, seasonal propagation opportunities, organic principles and plant growth science.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research propagation requirements for the permaculture system
- develop a propagation plan
- implement a propagation plan
- maintain propagated plants to maturity or end use.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to propagation:
 - using reclaimed or reused containers (suitably cleaned to avoid cross-contamination)
 - labelling systems using reclaimed materials
 - maintaining rare and unusual varieties
 - using edges and valuing the marginal – unusual plants in micro-climates
 - sharing and swapping to increase biodiversity and mutual wellbeing
 - preserving provenance of locally indigenous species
 - testing and trialling for new plants or resistant varieties
 - global food plant preservation, including seed saving
- propagation plan including such considerations as:
 - seasonal activities
 - seed saving

- needs of the system for plants
- mother plant location and frequency of use
- schedules and timelines
- principles of sustainable horticultural practices
- propagation techniques, such as:
 - cuttings – softwood, hardwood, semi-hardwood, root and tip
 - layering – stool, aerial and runner
 - division
 - grafting – whip and tongue, saddle, wedge, approach and bench
 - budding – shield and patch
 - seed sowing
- potting media suitable for propagation in a garden setting, such as:
 - compost and worm casting mixes
 - sieved and graded sands
 - blends used for different purposes or different times of the year
 - sphagnum moss
 - water (hydroponics or aquaponics)
- plant growth, development and nutrition
- botany and physiology
- maintaining moisture levels in simple systems without causing disease
- systems for protecting new plants and seedlings, such as:
 - polyhouse or shade-house systems, including hoop systems on garden beds
 - systems using reclaimed materials, such as bag-and-frame cloches, bottle protectors for seedlings, tyre stacks, birdcages and wire baskets
 - glass houses
 - shade houses
 - naturally occurring or planned microclimates
- minimal environmental impact waste disposal and composting systems which destroy pathogens.

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER319 Test, improve and maintain healthy soil in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test, improve and maintain healthy soil in a permaculture system. It requires knowledge of soils and their components, testing methods, nutrient action and soil improvement systems.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Take soil samples from a number of places in the permaculture system	1.1 Obtain samples from several places over a site 1.2 Prepare the samples for testing 1.3 Label containers accurately with location identifier, date, soil test and tester
2. Test soil for range of plant and structural needs	2.1 Carry out soil tests for texture, organic matter, structure, pH, water infiltration and compaction 2.2 Have samples tested by a laboratory for nutrient levels and deficiencies if concerned or if particular requirements exist for the crops and livestock in the permaculture system 2.3 Re-test in a different season or soil temperature
3. Analyse soil improvement requirements	3.1 Determine requirements for soil improvement from tests carried out 3.2 Determine requirements for soil improvement from the laboratory test results, if taken 3.3 Identify soil biota in soil and ascertain how to optimise biodiversity 3.4 Research soil improvement options, including discussing with neighbours and experienced practitioners appropriate options for soil improvement
4. Implementing soil improvement plan	4.1 Develop a plan for soil improvement over time and vary it depending on the location on the site and the crop or livestock being grown 4.2 Calculate required quantities of allowable additives and supplements to improve soil health 4.3 Use products at recommended rates and according to any existing certification system applying to the land 4.4 Protect soil biota present in soil, including using appropriate mulches for perennial and annual plants
5. Maintain health of soil according to organic guidelines	5.1 Observe changes over time and record using tables and photographic records 5.2 Avoid practices that can cause deterioration in soil health such as over- or under- watering, over-grazing, over-cultivating and off-contour ploughing 5.3 Follow organic and permaculture guidelines to increase soil carbon

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER319 Test, improve and maintain healthy soil in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- take soil samples
- test soils
- analyse soil improvement requirements
- implement soil improvement plan according to permaculture guidelines
- maintain soil health

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to soil health and plant nutrition
 - working with natural soils rather than importing soil
 - soil as an ecosystem
 - soil as biomass and carbon capture and storage
- principles of sustainable horticultural practices
- how to read a laboratory soil test
- soil testing techniques, such as:
 - jar test for soil structure
 - ribbon test and ball test for soil texture
 - infiltration or permeability test
 - pH testing
 - compaction test
 - non-wetting soil test

- air-filled porosity test
- worm count
- microscopic biota in soils
- plant nutrient uptake and mineral action
- soil chemistry
- science of composting
- fungal and bacterial action and mulches appropriate to different plants
- additives to improve soils, such as
 - compost and worm castings compost teas
 - biochar
 - green manures
 - organic mulch
 - manures/animal bedding materials
 - leaf mould
 - plantings – green manures, nurse plants
 - companion planting
 - chop and drop
 - nutrient trapping systems
 - greywater use
 - organically certified products
 - amendments that may include rock dust, gypsum, dolomite, lime, zircon, sulphur and other minerals
- plant growth and development
- soil life, including microscopic life
- methods of waste disposal causing minimal impact on the environment
- the effects of conventional agricultural chemicals on soils and soil ecosystems

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER320 Manage plant pests, diseases and disorders in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage plant pests, diseases and disorders in a permaculture system. It requires knowledge of healthy permaculture systems and the pests, diseases and disorders that might need management. It includes focussing on solutions in an integrated design, rather than reacting to infestations.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify existing and potential pests, diseases and disorders in the permaculture system	1.1 Using observation of plants in the permaculture system, identify existing or potential for pest attack, disease or disorders 1.2 Using climatic data and weather observations, identify existing or potential for pest attack, disease or disorders 1.3 Monitor balances within the system such as pest and predator balances 1.4 Maintain a record of observations
2. Research pest, disease and disorder prevention methods	2.1 Research pests, diseases and disorders using both primary and secondary sources 2.2 Consult widely and use both electronic and conventional reference material 2.3 Establish prevention methods for maintaining a healthy balance 2.4 Research possible negative effects of treatments on other elements of the permaculture system
3. Develop a pest and disease management program	3.1 Develop a plan based on the research conducted and the observations made 3.2 Include information about weather conditions, time of year, cycle of pests or disease vectors in the management program
4. Implement the pest and disease management program	4.1 Provide solutions that address the interactions of many elements in the system rather than spot treating outbreaks 4.2 Avoid practices that spread disease, such as propagating using diseased plants, or using un-sanitised tools when pruning orchard trees 4.3 Provide habitat and microclimate conditions for useful insects, plants, birds and animals 4.4 Carry out permaculture practices that minimise the risk of pest and disease problems 4.5 Update the management program regularly so that it is active and useful to the permaculture system
5. Monitor and record the management of plant pests, diseases and disorders over time	5.1 Keep records of pest and disease control operations, noting weather conditions and times of year 5.2 Use records to enable predictions of or responses to possible disease and pest recurrences in similar weather or times of the year 5.3 Maintain records over time to build a history of the permaculture system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER320 Manage plant pests, diseases and disorders in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify existing and potential pests, diseases and disorders in the system
- research methods of managing pests, diseases and disorders in a permaculture system
- develop a pest and disease management plan
- implement a pest and disease management plan
- monitor pest and disease managements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to managing plant pests, diseases and disorders
- principles of maintaining healthy permaculture crops, such as:
 - companion planting
 - increasing diversity
 - providing habitat and food for pests' natural predators
 - healthy, balanced soil
 - minimal use of soluble fertilisers
- allowable control methods in organic systems, such as
 - deterrent organic sprays
 - pheromone traps and lures
 - predatory and/or parasitic insects, mites and other organisms as part of biological control
 - nutrient additives

- crop rotation
- covers and netting
- BT (*Bacillus thuringiensis*) and other action-specific micro-organisms
- symptoms of disease and disorders in plants
- care needed to avoid transferring infections (such as through grafting and pruning practices)
- stages of development of pest organisms and signs of pest presence on plants and animals
- planting for insectivorous birds, lizards, frogs and microbats
- fungal, bacterial and viral infestations and their symptoms
- disease vectors and plants that harbor them
- companion planting
- succession planting

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER321 Demonstrate permaculture practices to small groups of learners

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to demonstrate permaculture practices to small groups of learners. Demonstration of techniques related to animals, plants, structures, energy, resources and community development are covered in a non-threatening and experiential setting. It is intended for school teachers and those who demonstrate permaculture skills to small groups of learners in different situations and contexts.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify audience for demonstration	1.1 Identify characteristics of audience to cater to their needs 1.2 Confirm numbers and, if possible, names of individuals 1.3 Identify time allowed for demonstration 1.4 Identify location and facilities where demonstration will take place
2. Identify topic for demonstration	2.1 Identify topic/s for demonstration 2.2 Research topic/s and clarify best demonstration location and facilities 2.3 Develop order of demonstration, from patterns to details
3. Develop demonstration methods and resources	3.1 Develop participatory planning activities for the sessions 3.2 Develop participatory learning activities for each topic 3.3 Prepare materials and equipment, including enough of everything for the audience size 3.4 Develop review and revision activities for longer sessions 3.5 Confirm all materials, tools and equipment is present and in working order, including safety equipment for the demonstration
4. Conduct demonstration	4.1 Conduct a site and safety briefing 4.2 Conduct a group introduction session for names and stories of participants 4.3 Clarify the planning of sessions for the participants 4.4 Clarify each learning activity and then conduct it 4.5 Conduct review and revision activities as required 4.6 Close the session and clean up in a participatory way that includes session participants
5. Take feed-back from audience	5.1 Conduct a review of the demonstration/s 5.2 Collect feed-back information and address any issues identified 5.3 Use feed-back in future demonstration planning

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER321 Demonstrate permaculture practices to small groups of learners

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify audience for demonstration
- identify topic/s for demonstration
- prepare resources for demonstration
- conduct demonstration
- collect and use feed-back to address immediate issues or for future demonstration planning

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- Permaculture practices, such as:
 - minimising effort for maximum effect
 - multiple uses for each element in the system
 - using more than one way to provide important functions
 - re-using and valuing resources and energy
 - encouraging productivity of a permaculture system
 - seeing solutions, not problems
 - using vertical space and other edges and connections
 - preventing waste and loss of resources from a permaculture system
- participatory planning and learning activities for topics such as:
 - methods of design
 - pattern understanding and integrated systems

- animal and plant species selection methods
- ecological principles
- climatic and geological influences
- water in the system
- soils
- earthworks for capturing nutrients
- permaculture structures and features
- different appropriate technologies that can be used
- resource use and reuse
- energy

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER401 Provide advice on permaculture principles and practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide advice on permaculture principles and practices. It requires knowledge of permaculture principles and practices. It also requires skills in identifying client needs and requirements, providing advice on permaculture practices and in researching and relating detailed permaculture information and advice to clients.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCPER401 Provide advice on permaculture principles and practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify client needs and requirements for information and advice
- propose a selection of permaculture practices and strategies that best suit the needs and resources of the client and the potential of the site
- provide information on permaculture principles
- provide advice on permaculture practices and strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of permaculture based on 12 principles in David Holmgren *Principles and Pathways Beyond Sustainability* and the work of Mollison and Slay
- ethics of permaculture: care for the earth, care for all people, fair share of surpluses, setting limits to biophysical growth (population, resource use and waste)
- permaculture practices and strategies, such as
 - personal, household, community and bioregional strategies
 - sustainable agriculture, horticulture, aquaculture and organic gardening
 - economic alternatives that support sustainable living
 - low energy and low embodied energy building and manufacturing
 - appropriate technology
 - restoration ecology and maintenance of biodiversity
 - sustainable community development, bioregional development and relocalisation
 - Reuse and return of products in manufacturing cycle and waste utilisation, waste water, grey water, sewage and resource treatment for re-use and recycling

- Sustainability education
- elements of permaculture systems
- functions of permaculture systems
- permaculture design techniques
- innovation in plant, animal and technology selection, use and performance
- recent practice in bioregional community development and local energy descent planning
- client communication techniques, record keeping and listening techniques
- preparation of reports and presentations for clients
- uses of Statements of Limitation in the giving of advice

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER402 Design a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design a rural permaculture system. It requires the ability to negotiate with clients to develop a permaculture design brief, undertake a site analysis, develop design concepts and produce final design documentation.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPER402 Design a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a design brief for a rural permaculture system
- draw permaculture and landscape plans
- identify rural permaculture design solutions
- develop permaculture system concepts
- develop planting schedules, budget and bills of quantity
- develop a final design
- present design to client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- elements of rural permaculture design
 - representation of up to 5 zones
 - detailed representation of Zones 1 to 3
 - sector analysis
 - bioregional analysis
 - superimposing of design over commercial aerial photograph or other geospatial representation
- principles of permaculture
- strategies in rural permaculture design, such as:
 - land shaping including contour ploughing, swaling, keyline dam systems, berms and terraces
 - integrated plant and animal systems that suit the bioregion and the land

- natural system preservation and incorporation into overall design
- soil and water preservation
- forest ecology and recharge plantings for maximum water and nutrient cycling
- innovative agricultural systems such as cell grazing, inter-cropping, commons and food forests
- preservation of old and rare breeds of animals
- biodiversity and habitat preservation and enhancement strategies
- design brief
 - statement of scope of design
 - statement of client needs and requirements
 - listing of project elements
 - listing of assessable tasks
 - options for dealing with client needs and requirements
- design analysis and research
 - investigation of permaculture books and publications, online material, audio and video material, maps, plans, charts and tables
 - searches in libraries and databases
 - viewing maps
 - searching geospatial data
 - talking to people in the local area or neighbours
- plan interpretation and map reading
- site analysis
 - initial on-site estimations of soil type, pH, texture
 - topography
 - aspect
 - zone and sectors planning
 - existing vegetation
 - climatic factors
 - indicator species or other landscape-reading notes
- site surveying methods and tools
 - surveying instruments for taking vertical measurements on site
 - surveying instruments for measuring angles on site
 - surveying instruments for measuring distance and horizontal measurements on site
- design concept, such as:
 - preliminary conceptual sketches
 - bubble diagrams
 - preliminary plan, section and elevation design drawings
 - use of design drawing and drafting conventions
 - presentable and legible design drawings for client use
- rural permaculture design

- integration of brief requirements, analytical information and conceptual planning
- rational justification for placement of design elements
- integration of elements to produce an efficient and functional rural permaculture system
- conventional design symbols and those to convey permaculture elements
- design drafting and drawing conventions
- plant and animal selection
- final design
 - rendered plan, elevation and section drawings to scale
 - use of design drawing and drafting conventions
 - use of consistent graphic style
 - supporting legends and keys of elements
 - supporting materials lists, tables, bills of quantity, timelines, installation plans and management plans
 - construction detail drawings
- methods of design
 - zone and sector planning
 - slope planning
 - patterns in space and time

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER403 Design an urban permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design an urban system. It requires the ability to negotiate with clients to develop a permaculture design brief, undertake site analysis, develop design concepts and produce final design documentation.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Develop a design brief for an urban permaculture system	1.1 Initiate or respond to contact with the client when appropriate 1.2 Consult with the client to establish purpose, needs and requirements of design 1.3 Develop a design brief for an urban permaculture system in consultation with the client 1.4 Negotiate cost structures and timelines with the client
2. Undertake design analysis	2.1 Obtain existing maps, geospatial data and aerial photographs of property 2.2 Survey area included in Zones 1 and (if present) 2 to provide information not on existing maps using suitable survey tools and equipment 2.3 Prepare a site plan 2.4 Record site assessment on the site plan 2.5 Undertake bioregional analysis of the site 2.6 Undertake research of potential permaculture design elements 2.7 Choose appropriate permaculture design elements 2.8 Revise brief with client using completed research and analysis
3. Prepare a design concept	3.1 Determine an appropriate permaculture system concept 3.2 Prepare conceptual design drawings to illustrate conceptual themes and patterns informing the location and layout of proposed design elements 3.3 Compile a bill of quantities 3.4 Prepare a list of plant and animal species and varieties suitable for the chosen concept 3.5 Prepare a preliminary budget for conceptual design 3.6 Present the concept plan in a consistent graphic style 3.7 Consult the client and agree on options and approaches for design development 3.8 Review and revise concepts, elements and the design brief after taking feedback from client
4. Produce final design	4.1 Design an urban permaculture system based on the design brief, research, analysis, chosen elements and concepts 4.2 Produce detailed urban permaculture design documents 4.3 Present design plans, drawings and documents to the client 4.4 Take feedback from the client and revise or modify design as required

Foundation Skills

Assessment Requirements for AHCPER403 Design an urban permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- draw permaculture and landscape plans
- identify urban permaculture design solutions
- analyse zones and sectors of site
- develop design concepts
- develop detail and construction drawings
- develop planting schedules, budget and bill of quantities
- develop a final design
- present a design to a client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- elements of urban permaculture design
 - Zones 1 and 2, as the furthest areas represented on the plan (otherwise it is a rural design)
 - needs supplied by other zones, even if they are supplied off site
 - sector analysis
 - bioregional analysis
 - design which may utilise existing architects' drawings or local maps and plans
- principles of permaculture
- strategies in urban permaculture design
- edible landscapes and aesthetics in design
- public landscapes and community garden design

- design brief
 - statement of scope of design
 - statement of client needs and requirements
 - list of project elements
 - list of assessable tasks
 - options for dealing with client needs and requirements
- design analysis and research techniques
- plan interpretation and map reading
- site analysis
 - onsite measurement of site boundaries
 - mapping of boundaries to scale to a plan drawing
 - mapping of contour lines to a scale plan drawing
 - measurement and location of existing infrastructure and features on site
 - mapping of existing infrastructure and features to a scale plan drawing
 - measuring and plotting location of services (power, water, sewer, gas)
 - measuring and plotting location of meters or access points
- site surveying methods and tools
 - surveying instruments for taking vertical measurements on site
 - surveying instruments for measuring angles on site
 - surveying instruments for measuring distance and horizontal measurements on site
- design concepts
 - preliminary conceptual sketches
 - bubble diagrams
 - preliminary plans, sections and elevation design drawings
 - use of design drawing and drafting conventions
- presentable and legible design drawings for client use, such as:
 - domestic systems for urban and suburban properties
 - rooftop, balcony and courtyard gardens
 - public landscapes such as streets, parks, car parks, commercial premises, industrial estates and community centres
 - school gardens and learnscapes
 - community gardens and city farms
 - Community Supported Agriculture systems, urban market gardens and peri-urban small holdings
 - urban forestry
- conventional design symbols and those to convey permaculture elements
- design drafting and drawing conventions
- plant and animal selection
- final design
 - rendered plan, elevation and section drawings to scale

- use of design drawing and drafting conventions
- use of consistent graphic style
- supporting legends and keys of elements
- supporting materials lists, tables, bills of quantity, timelines, installation plans and management plans
- construction detail drawing
- methods of design
 - zone and sector planning
 - slope planning
 - patterns in space and time

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER404 Plan and implement permaculture works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement permaculture works through preliminary planning, scope of works, work health and safety policies and procedures, equipment and materials, works schedules, specifications and environmental impacts. Activities also include organising and directing works implementation.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to

Assessment Requirements for AHCPER404 Plan and implement permaculture works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- write reports for supervisors, clients and contractors
- assess a site for opportunities and constraints associated with implementation of permaculture works
- implement a staged permaculture works plan
- determine tools and equipment required
- calculate amounts of materials required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- permaculture works, such as
 - implementing permaculture designs
 - following a permaculture works plan as part of a permaculture project
 - constructing permaculture structures and features
 - implementing permaculture earthworks
- practical understanding of the environmental issues associated with undertaking permaculture works, such as:
 - use of materials that come from sustainable sources
 - duty of care in conserving site's natural values
 - work practices
 - the use and movement of machinery, storage of materials, removal of weeds and movement of soil and other materials into, across and beyond the site

- principles of ecology, including specific plant and animal relationships and habitat requirements
- statutory compliance and obligations, such as:
 - compliance with legislation, ordinances, regulations or bylaws relating to the works or the work site
 - Site responsibilities include OHS, industrial relations and equal opportunity and employment
- site evaluation techniques including methods of analysing soils, waterways and their condition
- practical understanding of the advantages and disadvantages of a range of permaculture procedures
- selection and use of appropriate combinations of machinery and tools
- work health and safety hazards associated with undertaking permaculture works and the controls necessary to remove or minimise risks associated with them
- contract documentation including specifications, plans of permaculture works, services, supplies and surveyors documents
- scope of works determination
- works' breakdown into tasks
- scheduling and time line generation
- task specifications and evaluation

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER405 Select appropriate technology for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select appropriate technologies for permaculture systems. It includes identification, research, evaluation, selection and communication of sustainable technology for permaculture applications.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Investigate appropriate technology for permaculture systems	1.1 Review design needs and requirements for potential applications of appropriate technology 1.2 Identify relevant sources and locations of information on appropriate technology 1.3 Determine required scale of appropriate technology 1.4 Identify permaculture principles and practices relevant to the appropriate technology
2. Research appropriate technology for permaculture systems	2.1 Research potential appropriate technology options for the project 2.2 Determine unique characteristics of different appropriate technology options 2.3 Research applications of alternative technologies 2.4 Research requirements for integrating new technology with existing permaculture systems 2.5 Determine capital cost of installation 2.6 Determine training and maintenance required for operation of the different options
3. Evaluate appropriate technology for permaculture systems	3.1 Evaluate potential for integrating new appropriate technologies in the permaculture system design 3.2 Compare potential alternative technologies against cost and efficiency criteria 3.3 Evaluate risks and obstacles of potential appropriate technology options
4. Select appropriate technology for permaculture systems	4.1 Select suitable appropriate technology for the design use 4.2 Determine availability of appropriate technology 4.3 Confirm cost and mode of delivery
5. Communicate appropriate technology for permaculture systems	5.1 Report on research, evaluation and selection of appropriate technology 5.2 Communicate location and detail of selected appropriate technology option on the permaculture design using appropriate drafting and drawing techniques 5.3 Explain appropriate technology and reason for selection to client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER405 Select appropriate technology for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate appropriate technologies for permaculture systems
- evaluate permaculture systems capabilities in relation to the use of new technologies
- evaluate suitability of new technology solutions to the permaculture application
- communicate information and options

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- appropriate technologies, such as:
 - technologies involving solar, wind, wood, biomass and water driven equipment for generating power, performing pumping duties, heating hot water and biochar production
 - alternative and resource conserving technologies such as rainwater collection, waste water treatment, composting toilets, cooking stoves, cob ovens, space heating and cooling, household appliances, pedal-powered appliances, enterprise plant and equipment
 - building technology such as natural and resource conserving building materials and techniques including passive solar design strategies and features
 - tools and implements employed in gardening and farming operations such as electric fencing, hand vs. power tools, shredders, mulching machines and use of animal power
 - lifestyle choices and behavioural adjustments to conserve energy and resources to meet sustainability objectives

- smaller scale and lower cost solutions such as maintaining and riding a bicycle, using a refillable pen, using a razor with replaceable blades and substituting other non-disposable items where disposables are normally used
- low energy devices
- ingenuity applied to complex problems to develop simple solutions such as solar powered street lighting
- criteria for determining appropriateness of energy and resource conservation technologies
- principles of passive solar design, embodied energy and carbon emission reduction
- innovations in energy and resource conservation technologies
- role of appropriate technology in energy descent planning and greenhouse gas emission reduction
- types of appropriate technology systems commonly available and applied to the design of energy and resource conscious houses, farms, offices and community projects
- the benefits from combining a number of different appropriate technologies and the limitations of each different technology
- design of systems integrating appropriate technologies

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER406 Identify and analyse bioregional characteristics and resources

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to research, extract and provide information on bioregional characteristics and resources. It requires the ability to process a request for information on bioregional characteristics and resources, identify information sources, organise self and others, ensure information meets request, prepare and finalise reports.

For indigenous contexts, the delivery and assessment against this competency standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify sources of information on bioregional characteristics and resources	1.1 Identify the need, or respond to a request, for bioregional analysis 1.2 Research relevant sources and locations of information about the bioregion 1.3 Access identified sources and information
2. Organise self or others to obtain information on bioregional characteristics and resources	2.1 Locate information relevant to the particular request 2.2 Coordinate and monitor team work to obtain required information 2.3 Discuss resolutions to problems accessing information with designated person and implement where appropriate
3. Ensure information meets request	3.1 Assess information for its validity and reliability 3.2 Seek clarification and assistance from client group or individual where information is unclear or difficult to understand 3.3 Obtain additional information where available information is inadequate 3.4 Combine different types of information where appropriate, to provide a response to the request
4. Report on bioregional analysis	4.1 Develop a report format, plan and structure 4.2 Compile report using clear and concise language, and edit as appropriate 4.3 Produce report in format required by client
5. Finalise reporting process	5.1 Arrange to review and sign off on report with designated person where required 5.2 Present report to community group or client 5.3 Make a record of report

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD124BIO06C.

Assessment Requirements for AHCPER406 Identify and analyse bioregional characteristics and resources

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify sources of information on bioregional characteristics and resources
- organise self or others to extract information on bioregional characteristics and resources
- ensure information meets requests
- employ appropriate media to present a report
- prepare, finalise and present a report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- bioregional characteristics and resources, such as:
 - a bioregion as a land and water territory whose limits are defined not by political boundaries, but by the geographical limits of human communities and ecological systems
 - a town or a segment of a city as typical as the main node of a bioregion, as was the pattern of most settlement and economic development until the 20th century
 - water catchment as one of the key identifiers of the bioregion, with the water catchment, storage, use/treatment of effluent and the water quality of rivers and creeks as essential to permaculture design
 - The Ecological Vegetation Class (EVC) of the area or the population of endemic species, as well as the suitability of any other species to grow or breed in the area
 - history, social make-up, land use and population information that go towards understanding an area

- bioregional resources, including the human and social capital or culture of an area, its capacity to produce its own needs and supply surplus to others and its resilience in responding to change or catastrophe
- the natural (biophysical), built, social and cultural elements of the area, including water supply and catchment management systems, transport systems, local exchange trading systems (LETS) and cooperatives, food supply systems, fuel and fibre supply systems
- data held by local councils, community groups, historical societies, individuals and organisations that adds value to a study of the bioregion
- the following bioregional issues: transition initiatives, local food and water security and bioregional self-reliance regarding other components of daily life from local sources as opposed to importing basic needs from long distances at a high cost to the environment
- embodied energy, including how to measure it and compare it with energy output over the life of the item, and consideration of the waste disposal of an item as part of its energy 'cost'
- types of information sources
- methods and means of accessing data
- methods of presenting and formatting information
- means of validating information

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER407 Design harvesting and storage systems for permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design harvesting and storage systems for products to meet year round supply of fresh and stored produce. It requires the ability to determine harvesting and storage system requirements, identify requirements for maintaining optimum condition of permaculture products and preparing a harvesting and storage plan.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCPER407 Design harvesting and storage systems for permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine harvesting, post-harvest and storage system requirements
- identify requirements for maintaining optimum condition of products from a permaculture system
- prepare a harvesting and storage plan
- communicate harvesting and storage plan to clients and others

Knowledge Evidence

The candidate must demonstrate knowledge of:

- products from a permaculture system commonly harvested and stored, such as:
 - vegetables where the whole plant is harvested
 - vegetables where part of the plant is harvested
 - perennial plants where fruit/nuts are harvested
 - forests where timber, fuel and fibre crops are selectively removed
 - forests where a range of other medicinal and craft crops are harvested
 - harvest from wild systems (e.g. fruit, nuts, fungi and seeds), where a clear abundance of product has been identified
 - animal products such as eggs, feathers, hides, bone, milk and meat
 - Products may also include those derived from insects (such as honey)
 - fish (such as roe), and other organisms, such as fungi, algae and moss
- design systems for meeting year-round supplies of fresh and stored produce, such as:
 - growing requirements and crop regulation strategies calendar or seasonal chart with planting times of crops

- selection of early, mid- and late season varieties to extend harvest
- number of plants and area to be planted
- crop regulation and maintenance program involving tipping, mounding, thinning, staking
- sequential planting and/or harvesting schedules
- climatic conditions for harvesting crop such as appropriate time of day
- harvest and post-harvest factors influencing plant metabolism and quality
- post-harvest treatment and preparation techniques, such as:
 - flow chart of harvest, treatment, preservation and storage process
 - harvest and post-harvest treatment timelines and schedules
 - design or plans of processing and storage area
 - design of processing technology or equipment such as solar food dryer
 - lists of materials, tools, equipment and ingredients
 - manuals and operating instructions for equipment
 - recipes and instructions
 - anticipated shelf-life of product
 - labelling and recording systems
 - work health and safety, food safety, hygiene and other relevant enterprise and work practices
- preservation methods and processes for products from a permaculture system, such as:
 - drying and dehydrating
 - bottling
 - cheese-making
 - extraction (honey, cold-pressed and distilled oils)
 - culturing or fermenting
 - preserving with vinegar, oil, brine, sugar, salt and other natural agents
 - air exclusion (sealing with fats, wax, vacuum seal)
 - cellaring and root-cellaring
 - other processes that use minimal fossil fuel energy while maintaining the integrity of the harvested crop
- technologies used in crop processing, treatment, preservation and storage systems
- design of storage areas, such as:
 - buildings such as sheds
 - cupboards
 - shelving and racks
 - work benches
 - store rooms
 - pantry
 - cool store
 - cellar

- root cellar
- bins and containers
- developing planting and harvesting schedules for products from a permaculture system
- identifying training needs for harvest and storage workers, such as:
 - work health and safety, and other relevant enterprise and work practices
 - food safety and hygiene standards
 - appropriate clothing and personal protective equipment (PPE)
 - harvest and post-harvest handling, processing and storage practices
 - food preserving techniques
 - operation and maintenance of tools and equipment
 - reporting, recording and labelling procedures
- preparing plans and reports
- food safety, health and hygiene requirements for preservation and storage of products for human consumption

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit provides the skills and knowledge to implement and monitor animal health and welfare programs for a permaculture system. It requires the ability to provide information to clients and animal owners about animal welfare, facilitate the participation of others in complying with animal health and welfare guidelines, implement and monitor enterprise programs for animal care, deal with animal emergencies and maintain animal health records.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide information about animal care in a permaculture system	1.1 Accurately and clearly explain to the client relevant permaculture practices towards animal health and welfare 1.2 Provide readily accessible information on animal care and maintenance and accurately and clearly explain this to clients and animal owners 1.3 Regularly provide information about identified animal health and welfare requirements and accurately and clearly explain this to clients and animal owners
2. Facilitate the participation of workers in animal care and maintenance in a permaculture system	2.1 Follow the permaculture plan for animal care and maintenance 2.2 Monitor animal health and welfare compliance with workers and others 2.3 Ensure adequate resource allocation and monitor to ensure effective animal health and welfare programs continue
3. Implement and monitor animal health and welfare procedures in a permaculture system	3.1 Identify and report existing and potential hazards to animal health and welfare so that effective remedial measures are implemented 3.2 Carry out animal health and welfare induction and training for workers and others 3.3 Establish strategies to maintain routines for animal health and welfare in the permaculture system 3.4 Monitor the procedures for animal health and welfare implemented by workers and others, to ensure consistency and adherence to the permaculture plan
4. Implement workplace procedures for dealing with animal health and welfare emergencies	4.1 Implement workplace procedures for dealing with animal health and welfare emergencies where necessary to ensure that prompt and effective control action is taken 4.2 Report animal health and welfare emergencies in accordance with established procedures 4.3 Implement measures to prevent recurrence and minimise risk of animal health and welfare emergencies
5. Implement and monitor enterprise procedures for maintaining animal health and welfare records	5.1 Complete animal health and welfare records accurately and legibly in accordance with permaculture procedures and legislative requirements 5.2 Identify potential hazards to animal health and welfare by using aggregate information from animal health and welfare records 5.3 Provide regular training to workers and others so that records are understood and used for the health and welfare of animals

Assessment Requirements for AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- provide information to clients, workers or animal owners about animal health and welfare
- implement animal health and welfare procedures
- monitor animal health and welfare procedures performed by others
- maintain animal health and welfare records
- provide training in understanding and using records for the health and welfare of animals in a permaculture system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices relating to integrated animal systems, such as:
 - minimising effort for maximum effect
 - multiple uses for each element in the system
 - using more than one way to provide important functions
 - re-using and valuing resources and energy
 - animal welfare and freedom from cruelty as part of care for the earth
 - encouraging productivity of the system
 - seeing solutions not problems
 - preventing waste and loss of resources from the system
- animal health and welfare requirements, practices and procedures, such as:
 - maintenance of animal housing, enclosures and fencing, covering hygiene and welfare

- ensuring availability of suitable forage, fodder and supplementary feedstuffs, and adjusting stocking rates, ranging and rotation schedules to suit
- Coordinating the following integration of animal ranging and maintenance with plant production systems: ranging in orchard to manure trees, reducing weeds, controlling pests, eating windfall fruit, tractor systems, composting manures and housing litter and maintaining firebreaks
- researching, assessing, implementing and monitoring supplementary stock feed requirements, feeding quantities and schedules
- researching and applying organic alternatives for treating stock in compliance with organic certification authorities, which may include herbal and homoeopathic treatments, mineral and vitamin supplements and permitted medications
- developing appropriate handling procedures to reduce stress
- harvesting, sourcing and handling the following useable products: milking, collecting eggs
- providing range areas for shade and shelter from climatic extremes through appropriate planting, including forage and fodder plants.
- equipment, including feeders and waterers, and back-up systems and alarms in case of equipment failure.
- lighting
- ventilation including fresh air, dust filters, humidity, and noxious gases.
- temperature, including cooling and heating, extreme weather conditions
- protection from predators, vermin, fires and floods.
- food with diet containing adequate nutrients
- water, including sufficient drinkable water to meet livestock requirements and monitoring water quality.
- health and distress, with signs of ill-health or distress in animals (as evidenced by behavioural changes) including reduced food and water intake, reduced production, changes in the nature and level of their activity, abnormal condition or changed physical features.
- prevention of infectious disease and internal and external parasitism.
- transport of growing and adult livestock
- animal physiology
- animal emergencies, such as:
 - injury
 - disease
 - failure of feeding or watering systems
 - poisoning
 - tick fever
 - birthing difficulties
 - escapement from housing or enclosures
 - predator attack
 - natural disasters such as bushfire, flooding, severe storm, other extreme weather event

- relevant animal welfare legislation and codes of practice
- animal health and welfare records, such as:
 - farm livestock records
 - daily harvest/yield records (eggs, milk)
 - feeding schedules and rosters
 - rotation schedules and successional grazing regimes
 - accident and emergency reports
 - entries into data base or other management software
 - worker records and reports
 - emergency reports
 - animal morbidity
 - work procedures and practices
 - seasonal factors and weather records
 - questioning client and/or workers
 - observations from inspecting animal systems
 - operational practices such as bedding change rotation, cell grazing, alternating flocks
- industry animal health requirements
- legislative requirements, such as:
 - compliance with council ordinances
 - planning approval
 - licence from government agency
 - animal welfare legislation
 - workplace legislation and awards

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER409 Manage a permaculture seed bank

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a permaculture seed bank. It requires the ability to plan seed collection, implement seed collection and maintain a seed collection in storage. Managing a permaculture seed bank requires knowledge of plant biology, handling and extraction of seed, treatment and documentation, collecting ethics, protocols and legislative parameters and storage techniques.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

essential outcomes.	demonstrate achievement of the element.
1. Plan seed collection for a permaculture seed bank	1.1 Analyse requirements for seed collecting, and interpret them for required seed characteristics and implementation issues 1.2 Identify opportunities for seed collection from field observation and liaison with other specialists in this field 1.3 Identify and mark on a plan suitable areas and plants for seed collection 1.4 Select method of seed collection appropriate to the geography of the local area, size and type of plants and available resources 1.5 Determine and document quantity of seed to be collected from each provenance 1.6 Liaise with relevant authorities or owners and seek approvals where required
2. Implement seed collection program	2.1 Coordinate and schedule people, materials and equipment required by the seed collection program 2.2 Identify and obtain any permits and approvals required for the seed collection 2.3 Identify the seed and complete the required documentation
3. Maintain a seed collection	3.1 Check the quantity, quality and provenances of the collected seed 3.2 Check and monitor the health of seed collected and take remedial action where required 3.3 Control pests and conditions detrimental to seed health 3.4 Dispose appropriately of seeds that are non-viable owing to age or pest attack 3.5 Supply true to type and appropriately labelled seed to others 3.6 Record up to date details of seeds held in storage

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER409 Manage a permaculture seed bank

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan seed collection
- implement a seed collection program
- maintain a seed collection

Knowledge Evidence

The candidate must demonstrate knowledge of:

- flowering biology of the target species
- biological signs which indicate that the seed crop is ready to be collected
- seed banks, such as:
 - community seed banks and networks
 - private seed collections
 - organic food production enterprises such as market gardens
 - community supported agriculture seed sources
 - community garden and city farm seed banks
 - supply of vegetative propagation for perennial plants
 - heritage and non-hybrid seed distributors
 - heritage and non-hybrid seed producers
 - permaculture plant and seed nurseries
 - community seed swaps
- methods of seed collection, such as:
 - hand-picking seeds or seed capsules

- harvesting whole plant
- collecting and ripening fruit
- collecting after felling
- using ladders
- climbing
- shaking
- high-powered rifles (licensed operators only)
- elevated platforms
- extraction of the seed from the collected material
- handling of the seed crop after picking
- storage of seed, such as:
 - bags or envelopes
 - appropriate containers
 - cool, dry location
 - dehumidifying agents (silica gel, wood ash)
 - oxygen exclusion techniques
 - freezer or refrigerator
 - pest deterrent mechanisms
 - light exclusion mechanisms
- documentation of the extracted seed, such as:
 - information on provenance
 - botanical name: family, genus, species, variety and/or cultivar
 - common names
 - brief plant description
 - identity of collector
 - date collected or use by date
 - quantity (by weight or number of seeds)
 - viability test results
 - organic certification of grower
 - growing instructions such as recommended season and spacing
- provenances of seed, such as:
 - location and growing conditions of parent plant
 - sub-catchment identification of seed from endemic native plant populations
 - species and/or varieties adapted to local conditions
- collecting ethics, protocols and legislative parameters, such as:
 - limits on quantity allowed for collection
 - limits on time period for collection
 - particular use or destination for seed
 - indigenous plant regulatory conditions

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER410 Recommend approaches for sustainable community and bioregional development

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recommend approaches for sustainable community and bioregional development. It requires the ability to identify the potential for sustainable community and bioregional development, develop processes to consult and to communicate with stakeholders.

For indigenous contexts, the delivery and assessment against this competency standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify potential for sustainable community and bioregional development	1.1 Broadly scope opportunities and constraints for sustainable community and bioregional development 1.2 Identify potential involvement of individual and group stakeholders 1.3 Source information on the community and bioregion
2. Develop processes to consult stakeholders	2.1 Identify cultural protocols to ensure contacts with individuals and communities are successful 2.2 Identify key people who may influence relationships 2.3 Formulate steps to develop and maintain contacts with community groups 2.4 Develop processes that are inclusive of an equitable involvement of various sections of the community and their perspectives 2.5 Adjust processes and communication modes for culturally diverse groups
3. Communicate potential and support for sustainable community and bioregional development	3.1 Consult with community groups and individuals in development of options 3.2 Discuss and evaluate options in consultation with community using agreed parameters 3.3 Develop preferred option and communicate its implications to community stakeholders 3.4 Facilitate links between individuals and community groups to ensure good community relationships and development of the program

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER410 Recommend approaches for sustainable community and bioregional development

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and modify procedures and processes
- write materials appropriate to audience
- identify cultural protocols
- consult with community groups

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sustainable community and bioregional development, such as:
 - local food security initiatives
 - community gardens and city farms
 - climate action and energy descent initiatives
 - transition towns programs
 - community education and outreach
 - local economy and trade including complementary currencies
 - sustainable enterprise and business development
 - social wellbeing and welfare services
 - renewable energy production
 - landcare and environment programs
 - sustainable agriculture and land use
 - sustainable forestry and reforestation

- catchment and water resources management
- sustainable development and housing
- waste reduction and recycling
- principles governing sustainable community and bioregional development
- sources of relevant materials and verbal information
- cultural protocols and perspectives, such as:
 - beliefs, religion & taboos
 - world views (mythological, political, social, biological)
 - acceptable modes of communication/language
 - body language
 - concepts of family and community
 - community leadership
 - relationships between community members, ages and sexes
 - acceptable modes of dress
- relevant legislation and guidelines
- principles of equal opportunity and affirmative action
- community governance, financial systems, legal and health systems
- current relationships between culturally diverse groups in the area
- understanding of the role of various sections of the community in historical and relationship terms

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER411 Operate within a sustainable community and bioregional development program

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to operate within a sustainable community and bioregional development program. It requires knowledge of community energy descent planning, group dynamics, community and bioregional issues. It requires the ability to communicate with a diverse group of people and to think sympathetically and laterally to support change in the community.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research a community and a bioregion
- work within an existing sustainable community or bioregional development program
- participate in ongoing development of the sustainable community or bioregional development program.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to sustainable community and bioregional development
- sustainable community and bioregional development programs, including:
 - Transition Towns group activities or programs
 - climate change programs
 - peak oil or peak resource programs
 - alternative economic systems, such as local exchange trading systems
 - environmental, water catchment and natural resource conservation projects
 - social and cultural programs
 - housing and community development programs
 - community supported agriculture, organic and sustainable primary production and consumer networks and programs
 - energy descent action planning

- local food and water security projects
- renewable energy and appropriate technology projects
- greenhouse emission reduction and sequestration projects
- community profile development
- community consultation and facilitation methodologies, including:
 - team and community building activities
 - community forums and discussion
 - open space events
 - cultural mapping processes
 - creative problem solving processes
 - visualisation and experiential processes
 - information gathering processes
- group dynamics and conflict resolution strategies.

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

Assessment Requirements for AHCPER501 Carry out permaculture field research

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- formulate and justify research questions
- design a field research plan
- conduct research and evaluate information
- enter, analyse and organise data quantitatively and qualitatively in charts, tables and graphs
- produce written reports on research outcomes and provide conclusions based on appropriate evidence and reasoned arguments

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, practices and ethics, such as:
 - topics for field research
 - people or groups of people participating in or related to permaculture projects
 - people or groups of people participating in or related to other topics which themselves relate to permaculture
 - systems and/or technical elements of permaculture systems
 - animals-related studies (including insects, reptiles, birds and fish)
 - plant-related studies
 - studies of integrated plant and animal systems
 - appropriate technologies or technological solutions
 - appropriate energy generation, storage and capture
 - water treatment, catchment and storage systems

- natural systems
- environmental issues
- product comparisons
- field research methods, such as:
 - group and individual interviews
 - dialogue and storytelling
 - use of communications technology
 - records and testimonials
 - electronic recordings
 - questionnaires
 - statistical sampling
 - observation
 - surveys
- research methodologies, such as:
 - action research
 - needs studies
 - case studies
 - statistical sampling
- field research plan design – a staged sequence of steps and accompanying methodologies for obtaining answers to research questions
- permaculture systems implementation and management techniques and practices
- growth habits, physiological properties and taxonomic specification of animals and plants involved in permaculture
- participants and stakeholders of permaculture systems and projects, such as:
 - those who will use the research to influence decision making and policy
 - those who will benefit from the research
 - the researchers
 - ethics committees
 - anyone who is researched
- scientific and mathematical research approaches, data collection, processing and analytical techniques and procedures
- auditing and reporting procedures
- research planning and budgeting

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER502 Design an integrated permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design integrated permaculture systems in a range of contexts including developing a design brief, undertaking a site analysis, developing conceptual designs and producing a final design. It includes knowledge of landscape, building and settlement design and working with specialists and professionals. It includes drawing plans and projections by hand as well as using computer aided drafting and design.

The preparation of an integrated permaculture system design requires detailed knowledge of permaculture design principles, the ability to transfer concepts to novel permaculture situations, strong evaluation and planning skills, landscape design skills and research capacities.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a design brief	1.1 Initiate contact with the client when appropriate 1.2 Establish purpose, needs and requirements of design by consulting with client 1.3 Evaluate integrated permaculture design context and consider impacts of design stages, elements, functions and relationships 1.4 Develop a design brief in consultation with the client 1.5 Negotiate cost structures and timelines with the client 1.6 Evaluate and document cost structures and plan for budgeting limits and possibilities
2. Undertake design analysis and base plan	2.1 Obtain existing maps, geospatial data and aerial photographs of site 2.2 Survey and obtain social research data relevant to integrated permaculture design 2.3 Undertake field research supporting integrated permaculture design contexts and specific fields of inquiry, where required 2.4 Include Zones 1, 2, 3, 4 and 5 in the survey area using survey tools and equipment 2.5 Prepare a base plan 2.6 Record site assessment factors on the base plan 2.7 Carry out analysis of the site and bioregional analysis of the local area
3. Interpret site in permaculture terms	3.1 Carry out research of potential permaculture design elements to assess their suitability for the site 3.2 Identify functional interconnections between elements to increase yield and minimise resource use 3.3 Choose permaculture design elements on the basis of research 3.4 Work with architects, builders and planners or other contractors who may be involved in the project 3.5 Revise brief with client in relation to research and analysis
4. Prepare design concepts	4.1 Determine appropriate concepts 4.2 Prepare concept design drawings to illustrate conceptual themes and patterns informing the location and layout of proposed design elements 4.3 Present chosen concepts in a consistent graphic style 4.4 Compile lists of materials and quantities 4.5 Prepare a list of plant and animal species and varieties suitable

Element	Performance criteria
	for chosen concepts 4.6 Prepare a preliminary budget for conceptual design
5. Review the design concepts	5.1 Review the concepts against permaculture principles and ethics 5.2 Prepare presentations of draft design concept options for the client 5.3 Undertake consultation with the client to agree on options and approaches for design development 5.4 Review and revise concepts, elements, budget and the design brief after taking feedback from the client
6. Produce final design and integrated permaculture report	6.1 Design integrated permaculture system appropriate to the design brief, available budget, research, analysis, chosen elements and concepts 6.2 Produce detailed permaculture design documents 6.3 Present design plans, drawings and permaculture design report documents to the client 6.4 Obtain feedback from the client and revise design as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD125DES02C.

Assessment Requirements for AHCPER502 Design an integrated permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- demonstrate drafting and drawing techniques
- negotiate with clients
- undertake a site analysis and site survey
- provide urban and rural permaculture design solutions
- analyse zones and sectors of a site
- develop concepts
- develop planting schedules and bills of quantity
- develop a design budget
- develop final design drawings including elevations and projections
- design presentations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- elements of integrated permaculture design
- principles of integrated permaculture design
- strategies for urban and rural permaculture design
- strategies for building design and working with builders and architects
- strategies for settlement design and working with planning authorities
- design brief elements
 - statement of scope of design
 - statement of client needs and requirements
 - food production

- system efficiency
- system production
- fibre, energy and building material production
- water harvesting
- waste treatment
- energy planning and design
- biodiversity habitat
- soil carbon building
- soil fertility
- establishment of financial budget
- establishment of time budget
- maintenance of financial budget
- maintenance of time budget
- design of establishment documents
- maintenance planning
- sustainable commercial enterprises
- social amenities
- cultural considerations
- list of project elements
- list of assessable tasks
- design analysis and research techniques
- plan interpretation and map reading
- site surveying methods and tools
 - onsite measurement of site boundaries
 - mapping of boundaries to scale to a plan drawing
 - onsite layout of 1m contour
 - mapping of contour lines to a scale plan drawing
 - measurement and location of existing infrastructure and natural features on site
 - mapping of existing infrastructure and natural features to a scale plan drawing
 - dumpy level or equivalent surveying instrument for taking vertical measurements on site
 - dumpy level or equivalent surveying instrument for measuring angles on site
 - GPS, satnav
 - measuring tapes for measuring distance on site.
- design concepts and detailed design drawings
 - property boundaries, scale and north point
 - authors of plans, contact details
 - address of site
 - date plan drawn
 - existing infrastructure and natural features

- drawing to scale
- relevant overlays and drawing numbers
- large format planning (at least A1 or A2)
- overlays such as fire, flora and fauna, soil and geology, local planning ordinances, buffer and riparian zones, use zones
- contour lines or other appropriate indication of slope direction and gradients
- drainage features
- Lot, DP, landowner address and contact details
- permaculture design methods
- conventional design symbols
- design drafting and drawing conventions
- computer-aided drafting and design
- plant and animal selection

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is NOT sufficient at this level.

AHCPER503 Develop a strategic plan for a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a strategic plan for a permaculture project or enterprise. It requires the ability to prepare a strategic plan brief, research and analyse planning information, develop strategic plan stages, document a strategic plan, and review a strategic plan against desired outcomes. Developing a strategic plan for a permaculture project requires knowledge of permaculture principles and practices, climate change and peak oil impacts, sustainable community development practices, research methods and strategic planning methodologies.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a strategic plan brief for a permaculture project or enterprise	1.1 Evaluate the current context of the permaculture project or enterprise 1.2 Determine core values of the project or enterprise 1.3 Define project vision statement, aims and objectives 1.4 Establish project or enterprise goals in consultation with stakeholders 1.5 Evaluate strategic plan values, goals and vision statement with respect to permaculture principles and ethics 1.6 Document strategic planning brief 1.7 Develop protocols on cultural respect and sensitivity 1.8 Review and revise strategic plan brief at appropriate project development intervals
2. Research and analyse strategic planning information	2.1 Determine information needed for strategic plan with reference to plan brief 2.2 Identify key elements and themes 2.3 Determine research subjects 2.4 Compose research plan and methodologies 2.5 Review local, state and national government legal and planning acts and codes relevant to project or enterprise 2.6 Review and revise strategic plan brief in relation to research findings
3. Identify strategic planning stages	3.1 Identify strategies required to achieve planning goals in consultation with relevant parties 3.2 Determine action plans required to execute strategies 3.3 Order strategies and action plans into a series of strategic planning stages 3.4 Determine planning benchmarks for future stage completion review 3.5 Review and revise plan brief with reference to strategic planning stages
4. Document and distribute strategic plan	4.1 Produce a clear, concise and consistently formatted written strategic planning document 4.2 Distribute strategic plan to all relevant parties to ensure effective communication of project or enterprise planning 4.3 Take feedback on plan documentation and review and revise documentation as required

Element	Performance criteria
5. Review strategic plan	5.1 Determine mechanism for evaluation of strategic plan 5.2 Determine timeframes for evaluation 5.3 Evaluate with reference to permaculture principles and practices 5.4 Evaluate feedback from all relevant parties on implementation issues and outcomes 5.5 Identify problems and revise as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD125PLA03C.

Assessment Requirements for AHCPER503 Develop a strategic plan for a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a strategic plan brief
- acquire project resources
- undertake stakeholder consultation
- document a strategic plan
- evaluate the vision statement
- interpret feedback on the strategic plan
- demonstrate group leadership

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices
 - The two main summaries of permaculture principles are found in Bill Mollison and Reny Mia Slay *Introduction to Permaculture* (1991) and David Holmgren *Permaculture: Principles & Pathways Beyond Sustainability* (2002)
 - sustainable agriculture
 - garden agriculture
 - sustainable horticulture
 - sustainable aquaculture
 - soil restoration
 - bush regeneration
 - biodiversity regeneration
 - sustainable community development

- sustainable project and enterprise development
- bioregional development
- relocalisation
- sustainable design
- sustainability education
- earth care
- people care
- return of surpluses and setting limits to growth
- permaculture values
 - environmental restoration
 - sustainable food production
 - sustainability education
 - environmentally sustainable human habitation
 - sustainable community development
 - sustainable community transition
 - right livelihood
 - social justice
 - ecological economics
 - universal human rights
 - cultural recognition
- permaculture projects or enterprises
 - community gardens
 - permaculture workshops, training and education
 - sustainable agricultural systems
 - urban permaculture systems
 - community sustainable transition initiatives
 - climate change initiatives
 - conservation organisations
 - sustainability not-for-profits, NGOs, businesses, companies, trusts and incorporated community associations
 - permaculture design consultancies
 - permaculture system implementation services
 - alternative community finance and economic systems
 - permaculture information and communication services
- strategic planning
 - vision statement
 - statements of where project or enterprise would like to be in future
 - imagined futures
 - statements of possible futures for world outside of project
 - project or enterprise goals

- environmental targets
- community development targets
- food production
- design criteria
- happiness indicators
- sustainability indicators
- strategies
 - human resource management
 - financial planning
 - purchases and acquisitions
 - cost cutting
 - income generation
 - promotion and marketing
 - organisational restructuring
 - project or enterprise start up
 - mentoring and education
 - new project or enterprise initiatives
 - political lobbying
 - grant applications
 - community consultation
 - research and development
- action plans - sequences of smaller steps necessary to achieve strategies
- timelines
- benchmarks, such as
 - verifiable stage completion criteria
 - numerical indicators
 - qualitative indicators
 - observable outcomes
- community development
- project management
- feasibility study methodology
- contract law
- budgetary frameworks

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER504 Manage a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a permaculture project or enterprise. It requires the ability to initiate, plan, manage, monitor and complete a permaculture project or enterprise. Managing a permaculture project or enterprise requires knowledge of permaculture principles and practices, permaculture design, bioregional and community development, community sustainable transition strategies, ecological agriculture, costing and pricing, and project management.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Initiate permaculture project or enterprise	1.1 Undertake strategic planning assessment of permaculture project or permaculture enterprise 1.2 Initiate community and bioregional assessment of project or enterprise 1.3 Determine the scope of the project or enterprise 1.4 Determine feasibility of project or enterprise 1.5 Determine stakeholders in project or enterprise
2. Cost and quote for permaculture project or enterprise start up	2.1 Prepare costings and quotations using realistic price structure 2.2 Include a contingency amount in case of need 2.3 Include allowances for work in kind and volunteers, ensuring that the right livelihood of all is considered 2.4 Prepare a detailed budget with stages of implementation 2.5 Submit quotation and cost outline to client and be prepared to justify costs
3. Manage permaculture project or enterprise	3.1 Secure human and material resources required to achieve strategies 3.2 Execute action plans to achieve strategic ends 3.3 Follow budget and project stages 3.4 Direct process outlined in action plans and timelines 3.5 Integrate project human and material resources to achieve planned project outcomes 3.6 Establish communication process including responsibilities for conflict resolution 3.7 Take feedback on management practices and processes
4. Monitor permaculture project or enterprise	4.1 Observe execution of project or enterprise action plan processes 4.2 Review and correct problematic planning processes 4.3 Measure project or enterprise activities 4.4 Measure costs against budget and communicate with client regarding any over-runs 4.5 Monitor project or enterprise variables
5. Undertake permaculture project or enterprise	5.1 Confirm completion of action plan processes 5.2 Determine success of project or enterprise strategies in relation to stage benchmarks, budget and timelines 5.3 Document permaculture project or enterprise management initiation, planning, execution, monitoring and completion or

Element	Performance criteria
	ongoing progress 5.4 Conclude permaculture project or continue to manage and monitor permaculture enterprise

Foundation Skills

Assessment Requirements for AHCPER504 Manage a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out strategic planning assessment of a permaculture project or enterprise
- acquire project resources
- develop project pricing and costing
- consult with stakeholders
- manage project activities
- evaluate and report on project
- manage human resources
- demonstrate group leadership

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices
- permaculture projects
 - initiatives with a defined sustainability purpose and time horizon
 - sustainable community development projects
 - bioregional initiatives
 - not-for-profit projects
 - projects on public land
 - community gardens
 - community supported agriculture systems
 - land restoration and conservation works
 - alternative technology programs

- sustainability education
- social and economic development activities
- community carbon reduction and sequestration strategies
- energy descent or transition projects
- disaster preparedness, response and recovery
- permaculture enterprises
 - ethical for-profit businesses where surpluses are returned to earth care and people care
 - initiatives with a focus on right livelihood with plans for ongoing operation and/or growth
 - sustainable farming
 - community food distribution businesses
 - permaculture design and consultancies
 - energy descent planning services
 - climate change planning services
 - permaculture works implementation businesses
 - community and bioregional sustainability planning services
 - community economic and enterprise systems
 - integrated social, housing and community development programs
 - community supported agriculture
 - organic and sustainable primary production
 - local food and water security enterprises
 - greenhouse emission reduction and sequestration enterprises
 - sustainable regional transport networks and systems
- strategic planning
- project management
 - human resource management
 - financial planning
 - purchases and acquisitions
 - costing and pricing
 - income generation including issues of right livelihood
 - promotion and marketing
 - organisational restructuring
 - project or enterprise start up
 - mentoring and education
 - new project or enterprise initiatives
 - political lobbying
 - grant applications
 - community consultation
- research and development
- community development

- feasibility study methods
 - economic and financial assessment
 - legal and planning issues
 - market opportunities and challenges
 - community and cultural acceptance
 - bioregional suitability
 - operational considerations
 - resource availability
 - sustainability criteria
 - energy descent/transition strategies
 - climate change strategies
 - environmental, water catchment and natural resource conservation issues
- contract law
- budgetary frameworks
- benchmarking

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER505 Plan and supervise the implementation of permaculture project works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and supervise the implementation of permaculture project works through preliminary planning, scope of works, work health and safety procedures, equipment and materials, works schedules, specifications and environmental impacts, organising and supervising project works implementation.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They take accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPER505 Plan and supervise the implementation of permaculture project works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine and review project scope of work
- assess a site for opportunities and constraints associated with implementation of permaculture works
- prepare schedules for implementation of permaculture works
- prepare a staged permaculture works plan
- complete a work health and safety briefing
- prepare a Statement of Environmental Effects
- supervise permaculture project works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- Permaculture project works, such as:
 - food gardens
 - community gardens
 - urban permaculture systems
 - rural permaculture systems
 - aquaculture systems
 - horticultural systems
 - forest systems
 - grazing and pasture systems
 - animal systems and tractors

- integrated food, fibre and energy systems
- permaculture structures
- soil treatments
- preparation of soil surfaces
- installation of irrigation and/or drainage systems including earthworks
- planting methods such as hand sowing, direct seeding, tube planting, hand or machine assisted planting of seedlings, planting of divisions and transplanting
- natural area regeneration
- fencing of stock and pest animals
- the cultural or biological control of weeds and feral animals
- protection of plants by staking, tying and guarding
- permaculture design techniques including zone and sector planning
- biophysical factors of a site, such as:
 - location of the site
 - site boundaries
 - environmental considerations
 - access issues
 - potential hazards
 - utility service
 - availability and locations
 - adjacent landholder considerations
 - security issues
 - aspect of the site
 - rainfall
 - humidity
 - wind and sunlight intensity
 - soil types
 - nutrients and deficiencies
 - slope
 - natural and artificial watercourses
 - outcrops of rock
 - presence of indigenous or other significant vegetation, indigenous or otherwise
 - plants that may become a weed problem
 - animals that may become a management issue, feral species or otherwise
- practical understanding of the environmental issues associated with undertaking permaculture works, such as:
 - use of materials that come from sustainable sources
 - duty of care in conserving sites natural values
 - work practices

- the use and movement of machinery, storage of materials, removal of weeds and movement of soil and other materials into, across and beyond the site
- principles of ecology including specific plant and animal relationships and habitat requirements
- statutory compliance and obligations, such as
 - compliance with legislation, ordinances, regulations or by laws relating to the works or the work site
 - site responsibilities, including OHS, industrial relations and equal opportunity and employment
- site evaluation techniques including methods of analysing soils, waterways and their condition
- control techniques against unwanted plant and animal species
- soil conservation, erosion control and enhancement techniques and their advantages and disadvantages in reference to specific sites and habitats
- selection and use of appropriate combinations of machinery and tools
- work health and safety hazards and the controls necessary to remove or minimise risks associated with them
- contract documentation including specifications, plans of permaculture works, services, supplies and surveyors documents
- scope of works determination
- works breakdown into tasks
- scheduling and time line generation
- task specifications and evaluation

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER507 Research and interpret requirements for a permaculture project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to gather and validate information in order to advise on planned permaculture projects. Researching and interpreting requirements for a permaculture project requires knowledge of permaculture principles and practices, research methodologies, consultation models, feasibility studies, information systems, report presentation, cultural analysis of information, cultural implications of research methods and legislative requirements.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select appropriate research strategies	1.1 Select and justify appropriate research methods for the requirements of the permaculture project and the available resources 1.2 Develop and justify a research question or hypothesis 1.3 Select a combination of research methods to promote the validity of the outcomes 1.4 Negotiate the selection of research strategies with key people
2. Gather information	2.1 Identify relevant information sources and review relevant and credible literature related to the research topic 2.2 Assess and analyse legislative requirements impacting on the project 2.3 Identify government departments and agencies with a potential interest in the permaculture project 2.4 Collect and catalogue information from a wide range of sources
3. Consult with key people	3.1 Identify and consult a representative range of people and groups with an interest in the issues relating to the permaculture project 3.2 Review information, check for accuracy and identify the need for further information and follow-up 3.3 Liaise with key people, where required 3.4 Undertake community consultations following agreed practices and protocols
4. Organise and analyse information	4.1 Organise data generated by the research 4.2 Check the results against other available research 4.3 Look for patterns, observations and explanations and interpret them against the context 4.4 Clearly explain the concepts being analysed to key people and continue with community consultations
5. Report the findings of the research	5.1 Report complete and accurate details of the research methodology, information and analysis 5.2 Provide opportunities for the validation of the research findings using a range of different processes 5.3 Report the research findings in an accessible and useable style and format 5.4 Make the research available to all key people and those who have an interest in the project

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER507 Research and interpret requirements for a permaculture project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and justify appropriate research strategies
- gather information
- assess practical from impractical solutions
- consult with key people with an interest in the issues relating to the permaculture project
- organise and analyse information
- report the findings of the research

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices and their role in sustainable development and design
- climate change science and mitigation strategies
- research methods, such as:
 - group and individual interviews
 - dialogue and storytelling
 - libraries – digital and conventional
 - electronic recordings
 - questionnaires
 - statistical sampling
 - observation
 - surveys
- research methodologies, such as:

- action research
- needs studies
- literature searches and correct referencing
- case studies
- consultation models
- feasibility study methodologies
- information systems (conventional and electronic)
- report presentation
- cultural analysis of information
- cultural implications of research methods

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER508 Manage a permaculture aid and development project

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to manage a permaculture aid and development project in a remote community. It requires good management, communication and financial management skills. It requires knowledge of the aid and development industry, organisational structures, government and non-government functions, legal issues covering charities and working with vulnerable communities, disaster planning, relief and response issues.

For indigenous contexts, the delivery and assessment against this competency standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Obtain information on the aid project	1.1 Contact the peak aid organisation or government department to obtain information about aid projects 1.2 Research similar projects and their outcomes 1.3 Research the remote community or location to start fully informed about cultural protocols and issues
2. Develop a plan for the project in consultation with others	2.1 Ascertain the nature of the project, the issues and the key personnel at the remote location 2.2 Work with other organisations involved in the aid project and clarify chain of command 2.3 Establish clear communication channels as early as possible 2.4 Confirm budget allocations and allowances attached to the project 2.5 Document the permaculture aid and development project as a strategic plan 2.6 Distribute the strategic plan as required
3. Obtain resources and confirm logistics for transportation to remote location	3.1 Negotiate material resources, equipment and other needs with the remote community 3.2 Communicate in a culturally sensitive manner at all times and maintain correct communication sequence 3.3 Arrange transportation to remote location with full documentation, procedures and cultural protocols in place 3.4 Monitor transportation phase closely
4. Organise human resources and confirm transit and living arrangements, food and supplies for staff	4.1 Interview and engage personnel 4.2 Confirm living arrangements with contact at remote community 4.3 Confirm food and supply lines for personnel separately from aid arrangements 4.4 Document and communicate these arrangements 4.5 Brief personnel on arrangements and project ahead of departure
5. Document the emergency plan	5.1 Write up the emergency plan with the aims and objectives of the project 5.2 List strategies for achieving the aims

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Allocate personnel and resources to the strategic actions 5.4 Include benchmarks and timeline for operations 5.5 Include processes, procedures and communication lines for adoption by personnel on the ground
6. Manage the permaculture aid and development project	6.1 Maintain regular communication with the team on the ground 6.2 Troubleshoot any issues that arise 6.3 Document the roll out of the plan and address any gaps or misunderstandings immediately 6.4 Reduce paperwork and stress for operatives on the ground by simplifying reporting procedures and actioning requests quickly 6.5 De-brief personnel on return, and maintain detailed records of the project

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER508 Manage a permaculture aid and development project

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain information about the permaculture aid and development project
- develop a plan for project consultation
- obtain resources for the permaculture project
- obtain human resources for the permaculture project
- document the emergency plan.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices related to aid and development in remote communities and overseas
- permaculture aid and development projects, such as:
 - disaster response and recovery
 - disaster planning
 - community projects in remote communities
 - social and economic development projects
 - educational projects in remote communities
 - health and wellbeing projects in remote communities
 - resource management project for remote communities
 - sustainable farming projects
 - regional autonomy projects

- strategic planning
- project management, such as:
 - human resource management
 - financial planning
 - purchases and acquisitions
 - organisational structure
 - mentoring
 - training
 - new project or enterprise initiatives
 - grant applications
 - community consultation
- research and development
- community development
- cultural protocols and taboos
- religious practices and sensitivities
- engineering issues associated with remote area power supply, water supply, sewerage and waste treatment, erosion and sediment control, structural support and emergency housing
- feasibility study methods, such as:
 - economic and financial assessment
 - legal and planning issues
 - market opportunities and challenges
 - community and cultural acceptance
 - bioregional suitability
 - operational considerations
 - resource availability
 - sustainability criteria
 - energy descent/transition strategies
 - climate change strategies
 - environmental, water catchment and natural resource conservation issues
- contract law
- budgetary frameworks
- benchmarking.

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER509 Design permaculture structures and features

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design permaculture structures and features. It requires the ability to develop a design brief, undertake a site analysis, develop a concept design, produce a final plan and prepare bill of quantities and estimates. Designing permaculture structures and features requires knowledge of permaculture design process, construction and engineering principles, drafting techniques, cost estimating, and calculations of materials, labour, machinery and equipment.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a design brief	1.1 Consult client to establish the purpose and requirements of design 1.2 Develop design brief in agreement with the client 1.3 Negotiate cost structures and timelines with the client 1.4 Clarify and negotiate use of consultants and sub-contractors with client
2. Undertake a site analysis	2.1 Inspect site where the permaculture structure or feature is to be located 2.2 Record the physical elements and features of the site 2.3 Analyse and record assessment of soil, topography, aspect, existing vegetation and climatic factors 2.4 Assess and record other relevant information 2.5 Assess legal requirements and constraints on development
3. Develop a concept design	3.1 Prepare concept plan to illustrate location and layout of proposed structure or feature according to the design brief 3.2 Undertake consultation with the client to establish agreement on options and approaches for development 3.3 Present the concept plan in a consistent graphic style
4. Produce a final plan	4.1 Produce a detailed final plan according to the design brief 4.2 Prepare design to scale 4.3 Provide information on the plan that is relevant and precise and clearly communicates development works to be undertaken 4.4 Include notes and specifications on the plan to assist in plan interpretation 4.5 Apply appropriate construction and engineering principles to permaculture plan
5. Prepare documentation	5.1 Prepare bill of quantities listing scope and extent of works 5.2 Prepare cost estimate for the client covering items in bill of quantities, labour and machinery and equipment costs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCPER511 Facilitate participatory planning and learning activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to facilitate participatory planning and learning activities. It requires the ability to devise strategies for facilitating participatory planning and learning and to carry out, report on and review participatory planning and learning. Facilitating participatory planning and learning activities requires knowledge of permaculture principles and practices, a range of participatory planning and learning activities, codes of conduct and ethical behaviour and group presentation methodology.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCPER511 Facilitate participatory planning and learning activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- devise strategies for facilitating participatory planning and learning
- facilitate group processes in an engaging and inclusive way
- conduct participatory planning and learning activities
- communicate with people of a wide diversity of ages and socio-economic or cultural groups
- review and report-on participatory planning and learning
- coordinate and brief team members
- problem-solve and build group dynamics

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- learning styles and methodologies, including accelerated and experiential learning
- strategies for facilitation of participatory planning and learning
- participatory planning and learning activities and processes, such as:
 - team building – ice breakers, trust games, creative and social activities, goal-setting, celebration and cultural activities
 - creative expression – wild design, mime, performing and visual arts, story telling
 - problem solving – brainstorming, mind mapping, random-input processes, PMI, SWOT, Six Thinking Hats, theming and chunking, affinity matrix, modelling
 - experiential – visualisation, affirmation, role play, cultural mapping, 6 senses, modelling, simulations, educational and experiential games

- information gathering – group and individual research and observation activities, sharing information, questioning, resource and skills mapping, surveys, field trips
- Negotiation – open forum, active listening, prioritisation, consensus building, win-win.
- *Dynamic Groups, Dynamic Learning*TM facilitation skills and methodology (Robin Clayfield)
- conflict resolution and strategies to deal with strong personalities
- codes of conduct and ethical behaviour
- group presentation methodology

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER512 Plan community governance and decision-making processes

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to plan community governance and decision-making processes. It requires the ability to assess future needs and, for existing groups, current community governance and decision-making processes. It requires the ability to develop options for community governance and decision-making frameworks and processes and report on preferred options for implementation. Planning community governance and decision-making processes requires knowledge of strategic planning, legal frameworks, advanced negotiation techniques, organisational change and development, group and individual goal setting techniques, risk management processes and techniques, action planning methods and information technology.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess current community governance and decision-making processes	1.1 Identify responsibilities and duties of individuals and community groups 1.2 Investigate and define proposed or existing community governance and decision-making processes 1.3 Collate information on proposed or existing governance issues and arrangements
2. Develop options for community governance and decision-making processes	2.1 Identify opportunities and constraints for development of community governance and decision-making process options 2.2 Consult with community on options for community governance and decision-making processes 2.3 Evaluate options in consultation with community through detailing advantages and disadvantages for each
3. Report on preferred options for implementation	3.1 Select preferred options for implementation based on comparative advantages 3.2 Base options for community governance and decision-making processes on sufficient, valid and reliable information and analysis 3.3 Ensure options for community governance and decision-making processes are consistent with legal frameworks and community and group values, policies, needs, guidelines and procedures 3.4 Implement options for community governance and decision-making processes, and provide for decisions to be made in and actioned in the appropriate timeframe

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER512 Plan community governance and decision-making processes

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess current community governance and decision-making processes
- assess community needs and plan around these needs
- demonstrate high level communication skills
- develop options for community governance and decision-making processes
- report on preferred options for implementation.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- community governance and decision-making processes, such as:
 - governance of community resources, enterprises and activities
 - meeting facilitation, negotiation and mediation
 - conflict resolution procedures
 - decision-making methodologies
 - consensus processes
 - qualified decision-making processes
 - protocols
 - codes of conduct
 - recording and sorting decisions, such as *Many Baskets process* (Robin Clayfield)

- strategic planning
- community needs analysis techniques, such as:
 - SWOT analysis
 - 6 thinking hats (de Bono)
 - PMI (de Bono)
 - T.O.A.S.T. processes (Robin Clayfield)
 - L.O.V.E. processes (Robin Clayfield)
- opportunities and constraints for community development, such as:
 - seeing solutions rather than problems
 - viewing the negative in a positive light
 - modifications or extensions of existing systems to solve inherent problems
 - applying old or simple technology to new or complex problems
 - behaviour change, including organisational change and transformation
 - willingness or unwillingness to participate
 - legal framework requirements
 - vested interests and hidden agendas
- advanced negotiation techniques
- organisational change and development
- group and individual goal setting techniques
- risk management processes and techniques
- action planning methods
- information technology
- legal frameworks obligations and responsibilities.

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPGD205 Prepare a grave site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a gravesite.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare site for excavation	1.1 Identify work health and safety hazards, assess risks and report to the supervisor 1.2 Select and use personal protective clothing (PPE) and equipment 1.3 Select, prepare and use tools, equipment and machinery 1.4 Inspect surrounding monuments, masonry or headstones that threaten the stability of the new gravesite and remove if

Element	Performance criteria
	<p>necessary, after consultation with supervisor</p> <p>1.5 Use sludge pump to remove excess water if required</p> <p>1.6 Mark gravesite out to suit coffin dimensions</p>
2. Assist with the excavation	<p>2.1 Assist with excavation of grave</p> <p>2.2 Shore sides of grave where depth of grave exceeds 1.5 metres or as instructed</p> <p>2.3 Cover surface area for 400 mm from the edge of the excavation with an approved material to ensure the integrity and stability of the soil</p> <p>2.4 Secure gravesite with protective restraints to limit access to the site while being established and when left unattended</p>
3. Backfill and enhance the gravesite following burial	<p>3.1 Back-fill grave with soil free from large lumps, plant debris or waste material</p> <p>3.2 Use backfilling techniques to consolidate the soil, to minimise cavities and to restore the ground to its original level</p> <p>3.3 Replace surrounding monuments, masonry or headstones as necessary</p> <p>3.4 Dispose of waste material and plant debris removed from the gravesite in an environmentally safe manner</p> <p>3.5 Enhance gravesite as instructed</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPGD205 Prepare a grave site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare site for excavation
- assist with the site excavation
- shore up sides of grave as required
- backfill and enhance the gravesite following burial

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grave site preparation
 - safe work practices working in and around confined spaces
 - the environmental implications of pumping sludge water from an excavation site and the effects it may have on surrounding gravesites
 - work health and safety responsibilities of employees

Assessment Conditions

Assessors must satisfy current standards for RTO's.

AHCPLY201 Collect store and handle eggs from breeder flocks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect, store and handle fertile eggs from breeder flocks.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to handle eggs	1.1 Follow biosecurity procedures

Element	Performance criteria
	1.2 Follow personal hygiene requirements including washing and sanitising hands 1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment and clothing 1.5 Check work area is clean 1.6 Check equipment is clean and working correctly
2. Collect and sort eggs	2.1 Ensure that nests and egg belts are free of sick or injured birds, carcasses and other obstructions in line with enterprise animal welfare procedures 2.2 Collect eggs from nesting system 2.3 Collect floor eggs and keep separate 2.4 Ensure that procedures are implemented to minimise floor eggs 2.5 Control flow of eggs to match handling rate 2.6 Remove very dirty, cracked, leakers or weak shelled eggs 2.7 Wash eggs as required using approved sanitisers and temperatures 2.8 Operate egg handling equipment appropriately 2.9 Sort eggs into settable and non-settable and categories within each
3. Pack and store eggs	3.1 Place eggs on appropriate trays with pointed end down 3.2 Assemble and stack trays in categories and label clearly and accurately 3.3 Transfer eggs to storage in order of age, category or dispatch order 3.4 Operate egg storage facilities/ cool rooms according to enterprise procedures 3.5 Fumigate eggs if required
4. Complete hygiene and administration activities	4.1 Clean and disinfect or sanitise egg belts/conveyors, equipment and work area 4.2 Clean, sanitise and check cool room and equipment 4.3 Safely handle and measure chemicals used in the cleaning process 4.4 Take and prepare samples for testing as required 4.5 Dispose of non settable eggs and waste in line with enterprise environmental policies 4.6 Monitor pest and vermin presence and implement control measures in line with enterprise procedures 4.7 Record and report all required information and issues 4.8 Follow industry standards and enterprise procedures for excess

Element	Performance criteria
	eggs which are destined for human consumption

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY201A Collect store and handle eggs from breeder flocks.

Assessment Requirements for AHCPLY201 Collect store and handle eggs from breeder flocks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow personal hygiene requirements
- check nest boxes and egg belts are free of obstructions
- match egg collection equipment flow rate to handling rate
- collect nest and floor eggs and keep separate
- ensure that practices to minimise floor eggs are implemented
- assess and sort eggs into settable and non settable and categories within each
- place eggs on trays pointed end down
- pack, label and store eggs correctly
- complete hygiene and administration activities
- operate egg washing equipment at correct temperature and sanitiser/detergent levels
- clean and sanitise equipment, egg washing equipment, cool rooms and work areas
- monitor pest and vermin presence and implement control measures
- identify work health and safety hazards, assess risks and implement suitable controls
- follow biosecurity requirements
- follow enterprise animal welfare procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry standards, codes of practice, and enterprise procedures for collecting, handling, sorting, packing and storing settable eggs
- commonly used methods of pest and vermin control
- types, uses, cleaning and maintenance of machinery and equipment

- relevant documentation, records and reports that are required
- criteria for sorting and determining eggs that are unfit for setting and disposal methods
- procedures for egg handling, collection, washing, sorting, packing, labelling, storage and fumigation
- temperature, humidity, cleaning and operation for cool rooms and egg washing machines
- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- procedures for taking and handling samples for testing
- enterprise environmental and sustainability requirements, and procedures for disposal and management of wastes, debris and run-offs
- enterprise work health and safety, biosecurity and animal welfare policies and procedures

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor and assess poultry health and	1.1 Maintain biosecurity protocols and quarantine procedures at all

Element	Performance criteria
welfare	times 1.2 Follow enterprise work health and safety policies 1.3 Check poultry health and welfare regularly 1.4 Recognise and report signs of ill health, common diseases, parasite infestations and physical abnormalities 1.5 Identify cull birds using criteria established by the enterprise or industry quality assurance program 1.6 Record flock health status
2. Provide an optimal environment for poultry	2.1 Check bird housing conditions to ensure that protection is provided from external factors that compromise poultry health and welfare 2.2 Monitor, maintain and operate temperature and humidity control equipment 2.3 Install equipment and housing infrastructure appropriately 2.4 Monitor welfare of poultry and report non-compliance with animal welfare codes promptly 2.5 Record information which is relevant to the welfare and health of stock
3. Administer medicines or other chemicals	3.1 Store labelled veterinary chemicals or other medicines appropriately 3.2 Carry out routine prevention procedures for disease agents and parasites 3.3 Handle and measure medicines and chemicals safely and appropriately for administration 3.4 Medicate poultry appropriately as instructed or under supervision where required 3.5 Complete required documentation and records for administration of medicines and chemicals
4. Collect samples for analysis	4.1 Take swabs from surfaces and work areas regularly and prepare swabs for laboratory testing 4.2 Label and pack swabs and samples for dispatch appropriately
5. Remove non-viable poultry	5.1 Identify and remove sick, injured or unthrifty poultry in line with enterprise animal welfare policies 5.2 Treat sick poultry 5.3 Provide post-mortem assistance where necessary
6. Report and complete records	6.1 Report individual bird and flock health status promptly so that prevention strategies can be planned and implemented 6.2 Complete all required documentation and records clearly, promptly and accurately, and store appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY202A Maintain health and welfare of poultry.

Assessment Requirements for AHCPLY202 Maintain health and welfare of poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and assess poultry health and welfare
- provide an optimal environment for poultry
- administer medicines or other chemicals
- collect samples for analysis
- remove non-viable poultry
- report and complete records
- follow enterprise work health and safety policies
- follow biosecurity protocols
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity and quarantine
- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for animal welfare of poultry
- signs of health, signs of ill health, and methods for assessing poultry health and welfare
- common diseases of poultry, treatment regimes, prevention and management strategies
- criteria for determining birds to be culled
- relevant documentation, records and reports that are required
- types, functions and characteristics of housing, housing infrastructure and housing equipment for poultry, and the criteria and methods for determining that they are in working condition

- types, uses, handling, storage and routes of administration of commonly used veterinary medicines and chemicals
- procedures for taking, handling, labelling, packing and transporting swab samples
- procedures for assisting a post-mortem examination
- effects and impacts of individual bird health and welfare on flock health status and vice versa
- relevant work health and safety requirements and environmental policies

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY203 Set up shed for placement of day-old chickens

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to set up shed for placement of day-old chickens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work in poultry shed	1.1 Follow biosecurity procedures 1.2 Confirm work to be undertaken from work program and

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	management 1.3 Follow enterprise work health and safety policies 1.4 Select, use and maintain suitable personal protective equipment 1.5 Select, check and maintain tools and equipment
2. Check and maintain shed and equipment	2.1 Check biosecurity procedures are in place to prevent entry of pathogens on personnel and equipment 2.2 Check shed and all equipment are clean, sanitised to required standards and maintained in working condition 2.3 Check that pest and vermin controls are in place, and maintain if required 2.4 Ensure that rodent barriers are in place and working 2.5 Operate and check lights, time switches and shed equipment
3. Prepare shed	3.1 Spread or place litter/paper as per enterprise procedures 3.2 Ensure litter/paper is clean & dry 3.3 Setup feeders, drinkers, heaters and other equipment in shed 3.4 Ensure that bird wires are in place and working 3.5 Install brooder curtains if required 3.6 Test watering, feeding, ventilation and cooling systems 3.7 Check and adjust lighting levels for day old chicks 3.8 Reset or adjust shed climate management system if required 3.9 Test alarm systems and time switches 3.10 Test brooders for proper operation and temperature control 3.11 Adjust time clocks 3.12 Install additional drinkers if required 3.13 Install additional feeders or lay paper & spread feed on it as required 3.14 Start heaters prior to chick placement to ensure brooding section is at required temperature for chick placement
4. Place chicks	4.1 Check that feed, water and shed conditions are adequate 4.2 Check shed and litter are at required temperatures 4.3 Carry chick containers safely and gently remove chickens from

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	boxes and place on litter or paper 4.4 Check chick behaviour and health regularly after placement in line with enterprise animal welfare policies
5. Complete hygiene and administration activities	5.1 Clean and sanitise containers and equipment as required 5.2 Dispose of waste in line with enterprise environmental policies 5.3 Complete required records and documentation promptly and accurately

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPLY203 Set up shed for placement of day-old chickens

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations to work in poultry sheds
- check cleanliness of shed and equipment
- check and maintain shed and equipment
- check pest and vermin controls are in place
- prepare shed (spread litter or place paper, setup feeders, drinkers, adjust time clocks)
- place day old chicks
- check chick behaviour
- complete hygiene and administration activities
- follow enterprise work health and safety policies
- follow biosecurity procedures
- follow enterprise animal welfare and environmental policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity
- relevant animal welfare requirements and practices for poultry and day old chicks
- types, uses, cleaning and maintenance of suitable equipment, tools, machinery and personal protective equipment
- types, characteristics, cleaning and maintenance of poultry sheds

- commonly used methods of pest and vermin control
- types, characteristics and maintenance of bird wires and rodent barriers
- lighting systems, time switches, alarm systems, brooders, watering systems, feeding systems, ventilation systems and fogging systems, and methods for determining that they are in working condition
- requirements of day old chicks to ensure their health and welfare
- behavioural signs of health and methods for assessing health and welfare in day old chicks
- types, characteristics, uses and maintenance of litter for poultry
- biosecurity requirements for brooding and rearing chickens
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes
- relevant documentation and records that are required
- relevant work health and safety requirements.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY204 Collect and pack eggs for human consumption

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect and pack eggs intended for human consumption *to be* ready for transfer to the grading and packing floor.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Follow biosecurity requirements

Element	Performance criteria
	1.2 Follow personal hygiene requirements such as washing and sanitising hands 1.3 Follow enterprise work health and safety policies 1.4 Select, use and maintain appropriate personal protective equipment and clothing 1.5 Check & clean work area 1.6 Check equipment is clean and working correctly
2. Collect eggs	2.1 Ensure that nests and egg belts are free of sick or injured birds, carcasses and other obstructions in line with enterprise animal welfare policies 2.2 Control flow of eggs to match handling rate 2.3 Remove heavily marked, dirty, cracked, leakers or weak shelled eggs and useless eggs 2.4 Collect eggs by placing eggs onto trays or into baskets
3. Pack and store eggs	3.1 Pack eggs, keeping production categories separate and wrap pallets as required ready for transport 3.2 Label packed eggs, pallets and all packing requirements correctly 3.3 Check cool room temperature and humidity 3.4 Transfer eggs to cool room or grading floor
4. Clean and sanitise equipment and sites	4.1 Clean and sanitise egg belts/conveyors and all equipment and work areas 4.2 Clean and sanitise cool room and equipment 4.3 Control pests in egg collection, packing and storage areas 4.4 Handle and measure chemicals used in the washing and cleaning equipment safely 4.5 Take samples for testing if required 4.6 Dispose of non-conforming eggs and waste according to enterprise environmental management requirements 4.7 Complete records clearly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCPLY204A Collect and pack eggs for human consumption.
No unit equivalent.

Assessment Requirements for AHCPLY204 Collect and pack eggs for human consumption

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply personal hygiene requirements
- check nest boxes and egg belts are free of obstructions
- match egg collection equipment flow rate to handling rate
- collect eggs
- assess and sort eggs
- pack and store eggs
- clean and sanitise equipment, cool rooms and work area
- check equipment is working correctly
- follow enterprise work health and safety policies
- follow biosecurity requirements
- follow animal welfare policies
- follow enterprise environmental management requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry standards, codes of practice, and enterprise procedures for collecting, handling, sorting, packing and storing eggs
- commonly used methods of pest and vermin control
- relevant documentation and records that are required
- types, uses, cleaning, maintenance and servicing of equipment and machines
- criteria for sorting and determining eggs that are unfit for sale and disposal methods
- temperature, humidity, cleaning and operation for cool rooms

- procedures for taking and handling egg samples for testing
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes, debris and run-offs
- relevant work health and safety, biosecurity and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY205 Grade and pack eggs for human consumption

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to grade and pack eggs for human consumption.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Follow enterprise biosecurity requirements

Element	Performance criteria
	1.2 Follow enterprise personal hygiene requirements such as washing and sanitising hands 1.3 Select, use and maintain appropriate personal protective equipment and clothing 1.4 Check & clean work area 1.5 Check equipment is working correctly 1.6 Follow enterprise work health and safety policies
2. Assess and grade eggs	2.1 Load eggs onto grader 2.2 Control flow of eggs to match grader flow rate 2.3 Remove very dirty, cracked and leaking eggs 2.4 Candle eggs accurately 2.5 Grade eggs into appropriate weight and quality grades 2.6 Stamp eggs 2.7 Wash eggs using approved sanitisers and equipment as required 2.8 Check wash and rinse water temperature 2.9 Check egg washer sanitiser level and application rate 2.10 Oil eggs when required 2.11 Check oil type and application rate 2.12 Take and prepare samples for testing if required
3. Pack and store eggs	3.1 Pack eggs into cartons or trays and into boxes and assemble as required onto pallets and wrap pallets 3.2 Ensure eggs, trays, cartons, boxes and pallets are stamped and labelled correctly 3.3 Ensure correct separation of non-conforming products and saleable products 3.4 Check cool room temperature and humidity 3.5 Transfer eggs to cool room
4. Clean and sanitise equipment and sites	4.1 Report problems and abnormal equipment operations such as noises to supervisor 4.2 Clean and sanitise egg conveyors, cool room, all equipment and work areas 4.3 Monitor and report sightings or activities of pests in egg collection, grading, and storage areas 4.4 Handle and measure chemicals used in the egg washing and cleaning process safely 4.5 Dispose of useless eggs and waste according to enterprise environmental policies 4.6 Complete records clearly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCPLY206 Catch and load poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to catch, handle and load poultry for transfer to new facilities or processing plant. Poultry can be meat chickens, layer or breeder pullets or spent hens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to catch or pick up poultry	1.1 Follow biosecurity procedures 1.2 Confirm and identify sheds, flocks and bird numbers to be caught and loaded 1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment 1.5 Dim lights and set ventilation and cooling appropriately 1.6 Raise feeders, drinkers, nests and perches as required 1.7 Check and ensure that catching, movement path and vehicle loading area is clear of all obstacles 1.8 Set up catching equipment according to age, stock type and production system 1.9 Select, use and maintain tools and equipment 1.10 Follow relevant work health and safety and animal welfare procedures
2. Catch or pick up poultry	2.1 Quietly and calmly move birds into catching area 2.2 Catch and handle birds gently and calmly 2.3 Place birds in crates/modules according to space or weight requirements 2.4 Check birds regularly for overheating and smothering 2.5 Move crates/modules and load onto vehicle gently and calmly
3. Complete hygiene and administration activities	3.1 Clean, sanitise, maintain and appropriately store equipment and tools 3.2 Dispose of waste and debris in line with enterprise environmental procedures 3.3 Complete required records and documentation promptly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPLY206 Catch and load poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow biosecurity requirements
- identify flocks or shed to be caught
- make preparations for catching
- set up shed and catching area
- catch and handle poultry gently, quietly and calmly
- load birds into crates/modules according to space or weight requirements
- complete hygiene and administration requirements
- follow work health and safety procedures
- follow biosecurity procedures
- follow animal welfare procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant biosecurity requirements
- relevant animal welfare requirements and practices
- types, uses, cleaning and maintenance of equipment, tools, machinery and personal protective equipment required
- techniques and methods for handling, catching, placing into containers and loading poultry
- how to assess poultry condition and welfare including overheating and smothering

- relevant environmental requirements, and procedures for disposal and management of wastes, debris and fluids
- relevant documentation and records that are required

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY302 Brood poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to brood poultry.

This unit applies to all poultry species and breeds.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for brooding	1.1 Confirm work to be undertaken from work program and

Element	Performance criteria
	management 1.2 Follow biosecurity procedures 1.3 Hold discussions with other workers who may be affected by the brooding operations to ensure smooth operation of enterprise production processes 1.4 Select, check and maintain tools and equipment 1.5 Identify work health and safety hazards, assess risks and implement suitable controls 1.6 Select, use and maintain suitable personal protective equipment
2. Place hatchlings	2.1 Check shed and equipment has been set up correctly for placement of chickens and for brooding 2.2 Start heaters prior to chick placement to ensure brooding section is at required temperature for chick placement 2.3 Check feed, water and shed conditions are adequate 2.4 Check shed and litter are at required temperatures 2.5 Carry chick containers safely and gently remove chickens from boxes and place on litter, paper or matting 2.6 Check chick behaviour regularly after placement 2.7 Follow enterprise animal welfare policies
3. Carry out brooding operations	3.1 Observe chick behaviour regularly 3.2 Check temperature regularly and adjust according to chicks requirements 3.3 Pick up dead birds and dispose of carcasses 3.4 Identify and remove sick, injured or unthrifty birds 3.5 Remove paper or matting at appropriate time 3.6 Extend brooding area as young birds grow 3.7 Check equipment, shed climate, litter condition and ventilation regularly, and adjust as necessary 3.8 Clean drinkers and equipment regularly 3.9 Remove wet litter and replace where appropriate 3.10 Adjust lighting program as chickens grow 3.11 Carry out black-out training where required 3.12 Monitor beak tipping at appropriate times 3.13 Monitor body weight regularly 3.14 Monitor feed and water intake
4. Complete cleaning, maintenance and administration activities	4.1 Dispose of waste in line with enterprise environmental policies 4.2 Clean, maintain and store tools, machinery and equipment appropriately 4.3 Clean and maintain work areas

Element	Performance criteria
	4.4 Complete records promptly and accurately and report to management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY302A Brood poultry.

Assessment Requirements for AHPLY302 Brood poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check and confirm that shed or section is ready for brooding
- place hatchlings
- carry out brooding operations
- monitor chick behaviour and sensors and adjust temperature and ventilation appropriately
- monitor body weight and beak tipping where applied regularly
- complete cleaning, maintenance and administration activities
- implement work health and safety policies
- follow biosecurity procedures
- follow enterprise animal welfare policies
- apply enterprise environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the effects and impacts of brooding operations on enterprise production processes
- the types, uses, maintenance and storage of relevant tools, machinery and equipment
- relevant work health and safety requirements
- the requirements, industry standards, codes of practice and procedures for welfare and health of poultry during brooding
- the effects and impacts of temperature and shed climate on chick behaviour and how temperature and shed conditions are checked
- the range, effects and impacts of stocking density and overcrowding on poultry behaviour, health and welfare
- the relevant lighting and lighting programs for chickens and pullets and effects on welfare and performance

- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes
- the requirements and procedures for cleaning and maintaining work areas
- relevant records and reports that are required
- describe relevant animal welfare and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY304 Incubate eggs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to incubate eggs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Candidates should confirm the regulatory requirements in regard to the use of fumigants that apply in their relevant State or Territory before undertaking this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Receive and store eggs	1.1 Implement enterprise work health and safety policies 1.2 Implement enterprise biosecurity procedures 1.3 Unload eggs and record required information 1.4 Transfer eggs from delivery dollies/trolleys to setter dollies/trolleys 1.5 Store eggs with regard to position, temperature, humidity and period of storage 1.6 Attach eggs to turning machine to ensure maximum viability is maintained 1.7 Manage egg stock to minimise egg age on setting 1.8 Monitor temperature, humidity and airflow to maintain required settings
2. Monitor and operate setter	2.1 Take and record setter readings 2.2 Recognise alarms and carry out specified sequence of operations during a breakdown 2.3 Operate, repair and maintain setter 2.4 Calibrate temperature probes with known standards
3. Transfer eggs to hatcher	3.1 Move dollies to the egg handling and transfer area in the sequence required by the organisation 3.2 Check temperature, humidity and airflow 3.3 Transfer eggs to hatching trays in sequence

Element	Performance criteria
4. Fumigate setter or hatcher	4.1 Determine need for fumigation from supervisor's instructions 4.2 Prepare fumigant and apparatus 4.3 Seal and fumigate setter or hatcher 4.4 Air room or chamber to completely remove traces or vapours of the fumigant prior to re-entry of staff, re-installation of equipment and placement of eggs
5. Monitor and operate hatcher	5.1 Take and record readings 5.2 Carry out adjustments to temperature, humidity and airflow when instructed 5.3 Recognise alarms and carry out correct sequence of operations during a breakdown as set out by employer
6. Complete hygiene and administration activities	6.1 Dispose of waste and debris from the work areas in line with enterprise environmental policies 6.2 Clean, maintain and store tools, equipment and machinery 6.3 Clean and maintain safe work areas 6.4 Complete documentation, records and reports promptly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY304A Incubate eggs.

- implement enterprise biosecurity procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements, methods and procedures for handling, unloading, storing, transferring and turning eggs
- types, uses, cleaning, maintenance and storage of machinery, equipment and tools used in incubating operations
- range, effects and impacts of environmental parameters on incubating eggs
- types, handling, use and disposal of fumigating agents, work health and safety and environmental practices for these agents
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas
- relevant documentation and records that are required
- enterprise work health and safety policies
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY306 Clean and disinfect poultry production sheds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to wet or dry clean and disinfect (sanitise, disinfect or fumigate) sheds used for poultry production. The standard of cleaning and disinfection applied depends in the type of stock, enterprise disease status and disease risk.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Candidates should confirm the regulatory requirements in regard to the use of fumigants that apply in their relevant State or Territory before undertaking this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean sheds	1.1 Confirm work requirements 1.2 Confirm standard of cleaning (wet or dry), sanitation, disinfection or fumigation required 1.3 Identify work health and safety hazards, and assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment 1.5 Identify environmental impacts of cleaning the shed, assess likely outcomes and take responsive action 1.6 Raise, dismantle or remove equipment for cleaning 1.7 Raise or remove feed and watering equipment, and clean to industry standards 1.8 Cover or seal electrical switchboards and other equipment to prevent entry of water
2. Clean sheds and surrounds	2.1 Apply insecticides for initial knock down if required 2.2 Remove and dispose of litter or manure and sweep floors 2.3 Service filters and flush drinker lines and tanks 2.4 Clean shed, feeders, drinkers and equipment 2.5 Empty and clean silos 2.6 Mix chemicals, detergents and disinfectants appropriately 2.7 Dry clean electrical equipment 2.8 Manage waste, effluent and run-offs from cleaning activity appropriately 2.9 Maintain all shedding, equipment and machinery
3. Sanitise, disinfect or fumigate sheds	3.1 Prepare equipment (including safety equipment) and chemicals for application of sanitiser, disinfectant or fumigant 3.2 Prepare shed for sanitisation, disinfection or fumigation by sealing sensitive and or electrical equipment 3.3 Seal shed to minimise escape of disinfectant to the outside 3.4 Carry out disinfection of shed according to legislative, enterprise and manufacturers requirements 3.5 Air shed to completely remove traces or vapours of the disinfectant prior to re-entry of staff, re-installation of equipment and placement of eggs 3.6 Apply insecticides if required
4. Complete hygiene and	4.1 Check cleaning and disinfection is done correctly

Element	Performance criteria
administration tasks	4.2 Apply biosecurity requirements 4.3 Clean and maintain cleaning and disinfection equipment, disinfect and store 4.4 Dispose of leftover fluids, containers and waste in line with enterprise environmental policies 4.5 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY306A Clean and fumigate intensive production sheds.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPLY306 Clean and disinfect poultry production sheds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations to clean sheds
- raise or remove equipment including feeders and drinkers
- clean equipment, sheds and surrounds
- maintain sheds, silos, feeders, drinkers and all equipment
- clean silos safely
- prepare sheds and equipment for cleaning
- sanitise, disinfect or fumigate sheds and equipment safely and in line with legislative requirements
- apply insecticide both in and outside shed
- dry clean and effectively cover electrical equipment
- complete hygiene and administration tasks
- implement enterprise work health and safety procedures
- apply biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of sheds, machinery and equipment found in sheds
- how to handle, raise or remove equipment in sheds
- methods of sealing or covering electrical or sensitive equipment to prevent entry of water
- methods for litter and manure removal
- methods for dry cleaning electrical equipment
- procedure for dry or wet cleaning sheds and equipment

- environmental impacts of shed cleaning operation, and measures to mitigate these impacts
- equipment and machinery used for shed cleaning and disinfection, its operation, maintenance and storage
- methods of disposal of effluent and waste
- cleaning, maintenance and servicing of filters, drinker lines, tanks and silos
- handling and application of insecticides, sanitisers, disinfectants and fumigants and the relevant legislative requirements
- types, handling, use and disposal of cleaning agents
- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety requirements
- relevant biosecurity requirements
- environmental impacts and controls of cleaning and fumigating sheds
- chemical spillage management and safety equipment and clothing

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY307 Implement and monitor biosecurity measures in poultry production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement and monitor biosecurity measures for poultry enterprises.

All work must be carried out to comply with workplace procedures, legislation, codes of practice, and guidelines relating to work health and safety, biosecurity, animal welfare, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems in relation to biosecurity.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Note:

Pest is a bird or animal or insect which can be a carrier of infectious disease or which can cause stock losses or loss of productivity through predation.

Weed is a poisonous plant or one declared as a noxious weed (free range runs).

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply biosecurity procedures for site entry	1.1 Identify potential biosecurity threats to the enterprise 1.2 Identify potential sources of disease, pest or weed contamination being carried between sites 1.3 Consult with supervisor and management on the requirements for maintaining the enterprise as a biosecure zone as appropriate, in compliance with relevant legislation, Codes of Practice, industry guidelines and enterprise procedures 1.4 Maintain the integrity of enterprise as a biosecure zone 1.5 Maintain personal sanitation and hygiene on entry to enterprise 1.6 Complete sign in procedures 1.7 Ensure contractors and visitors are signed in, checked for risk profile and instructed in biosecurity requirements 1.8 Ensure all equipment, machinery or vehicles prior to entry onto the site are cleaned and disinfected 1.9 Check poultry, feed and feed ingredients to be introduced to the enterprise for health, pest and contamination status and isolate them from other poultry and feedstock where necessary 1.10 Implement enterprise work health and safety policies 1.11 Use and maintain appropriate personal protective equipment
2. Implement biosecurity procedures to minimise spread of disease, pest or weed where relevant within the enterprise	2.1 Implement procedures for entering production areas or facilities or moving from one site to another 2.2 Implement enterprise requirements, order of priority and prescribed routes for specified movements of personnel, vehicles, equipment, feedstuffs and poultry 2.3 Ensure all surface water used for drinking, cooling and washing down is sanitised 2.4 Implement appropriate personal sanitation and equipment cleaning procedures for movement between sites 2.5 Implement a health control program including vaccination 2.6 Keep enterprise areas clear of debris 2.7 Implement biosecure procedures for carcass, effluent, organic waste and inorganic waste removal and disposal
3. Implement biosecurity procedures on detection of disease, pest or weed where	3.1 Identify signs of disease, pest or weed incursion, or unusual signs in the poultry flocks 3.2 Follow enterprise animal welfare policies

Element	Performance criteria
relevant	3.3 Assess severity and extent of disease or incursion 3.4 Seek immediate advice from supervisors, professionals or appropriate authorities where signs indicate an unusual disease or pest presence 3.5 Immediately report signs of unusual disease or pest to management or appropriate authorities 3.6 Implement instructions from supervisors, enterprise and appropriate authorities for additional biosecurity measures
4. Apply enterprise sanitation and disinfection practices to reduce the risk of disease, pest or weed	4.1 Ensure all used bedding, organic and inorganic waste are removed from facilities or sites and disposed of in line with enterprise environmental policies 4.2 Remove dust from surfaces 4.3 Clean production areas, facilities or sites using pressure cleaning, water or dry cleaning method where appropriate 4.4 Clean feeding and watering equipment using an appropriate method 4.5 Sanitise or disinfect facilities, sites and equipment appropriately
5. Implement pest control	5.1 Identify pests that can introduce or spread high risk pathogens 5.2 Exclude wild birds from the poultry housing and other pests from the facilities by effective physical barriers 5.3 Monitor wild bird and pest numbers 5.4 Carry out procedures to discourage wild birds and to control pests
6. Monitor, record and report	6.1 Monitor effectiveness and progress of control activities and compare with enterprise requirements 6.2 Monitor production areas, facilities or sites as part of work duties to ensure work practices and procedures are applied 6.3 Complete records accurately and timely 6.4 Report issues and concerns with biosecurity to management 6.5 Work with management to review procedures, activities and communicate revisions to other staff

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPLY307 Implement and monitor biosecurity measures in poultry production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply biosecurity procedures for site entry and between sections
- implement biosecurity procedures
- implement biosecurity procedures as instructed on detection of disease, pest or weed where relevant
- identify abnormal signs in a flock
- implement wild bird, pest and weed control measures
- monitor application of biosecurity procedures
- implement enterprise work health and safety policies
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant statutory requirements, codes of practice, industry standards and procedures for biosecurity
- types, characteristics, methods of spread, signs, prevention, control and treatment of diseases, pests or weeds relevant to the enterprise
- requirements for maintaining an enterprise as a biosecure zone including perimeter fencing, lockable gates, vehicle access, enterprise boundaries, production area boundaries, dirty and clean production areas, poultry housing and pasture boundaries and appropriate signage
- specific biosecurity procedures applicable to an enterprise and enterprise work routines, including personnel, visitors, vehicles, equipment, machinery, introduced poultry, pests, wild birds and health program

- requirements, procedures and resources for entry to enterprise, production areas, facilities or sites
- normal signs of a healthy flock
- relevant work health and safety requirements
- methods and procedures for cleaning and disinfection of facilities, sheds, feeding and watering equipment and other shed equipment
- requirements, methods and procedures for treatment and sanitisation of drinking, cooling and washing down water supplies as appropriate to an enterprise
- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- relevant environmental and sustainability requirements, methods and procedures for disposal and management of effluent, organic and inorganic waste and debris
- essential principles and key aspects of Commonwealth and State disease control emergency plans, including AUSVETPLAN
- types and maintenance of relevant documentation and records
- requirements and methods for reporting, reviewing, revising and communicating biosecurity procedures

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPMG201 Treat weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to recognise common weed species and apply a range of weed treatments and control options.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to treat weeds	1.1 Identify and record details of target weeds and confirm with supervisor according to workplace procedures 1.2 Discuss and select appropriate control technique with supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Perform calculations according to control option and treatment requirements and confirm with supervisor</p> <p>1.4 Select and prepare equipment for use according to enterprise guidelines, supervisor's direction and manufacturer's specifications</p> <p>1.5 Secure the treatment area according to workplace procedures and supervisors instructions</p> <p>1.6 Identify health and safety hazards and risks in the workplace and apply appropriate controls according to supervisor instructions</p>
2. Conduct weed treatment	<p>2.1 Identify, select, fit and use personal protective equipment according to workplace procedures and manufacturer instructions</p> <p>2.2 Prepare treatments according to supervisor's instructions, manufacturer guidelines, label directions and safety data sheets</p> <p>2.3 Apply treatments to minimise damage to off-target species according to workplace procedures, health and safety in the workplace and environmental legislative and regulatory requirements</p>
3. Carry out post treatment operation	<p>3.1 Clean and store personal protective equipment and application equipment according to workplace and environmental procedures</p> <p>3.2 Dispose of treatment waste according to environmental procedures</p> <p>3.3 Maintain records according to workplace procedures and legislative and regulatory requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information to operate equipment, determine methods and rates for treatments
Writing	<ul style="list-style-type: none"> Prepare treatment records using clear and accurate language and terminology
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations to determine rates of application relevant to treatment option

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Use clear language and concepts, and tone and pace appropriate when communicating with supervisor
Navigate the world of work	<ul style="list-style-type: none"> Recognise organisational expectations and follow explicit work procedures and protocols
Get the work done	<ul style="list-style-type: none"> Follow clearly defined instructions and sequencing, and monitor own progress for the task, seeking assistance when necessary

Assessment Requirements for AHCPMG201 Treat weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that they have treated weeds using at least two different techniques, including:

- recognised and recorded target weeds and confirmed with supervisor
- discussed and selected control options with supervisor
- prepared control options and treatments following required procedures
- identified health, safety and environmental hazards and risks and applied controls according to workplace procedures
- identified, selected, fitted and used personal protective equipment
- applied treatments safely ensuring off-target species were unaffected
- shut down, cleaned and stored personal protective equipment and application equipment according to environmental procedures
- disposed of waste according to workplace procedures and environmental procedures
- maintained records according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common weeds identification and naming conventions
- weeds and dispersal methods common to work area
- common weed treatment options, including:
 - cultural
 - chemical
 - mechanical
 - biological

- Integrated Pest Management
- basic environmental considerations when using chemicals for treating weeds, including:
 - spray drift and off target damage
 - inversion
 - re-entry period
 - residues
 - chemical handling
- regulatory requirements and responsibilities when applying weed treatments
- weed control equipment, capabilities and limitations
- health and safety in the workplace including personal protective equipment required for controlling weeds
- principles and methods for securing treatment sites including, caution or hazard signs and signals
- purpose and use of chemical labels and safety data sheets (SDS)
- environmental considerations when controlling and disposing of weeds and waste materials
- record keeping methods and requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site with weed infestation or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - weeds to be identified and controlled
 - tools and equipment suitable for control options and treatments
 - personal protective equipment
 - treatment materials
- specifications:
 - workplace documents including treatment and control procedures and processes and forms for recording treatments
 - use of manufacturers' operating instructions for specific equipment, machinery used for weed control
 - SDS for treatment materials
 - specific regulations
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have treated plant pests and diseases, including:

- recognised and recorded target pests, diseases and disorders and confirmed with supervisor
- discussed and selected control options with supervisor
- prepared control options and treatments following required procedures
- identified health and safety in the workplace and environmental hazards and risks and applied controls according to workplace procedures
- identified, selected, fitted and used personal protective equipment
- applied treatments safely ensuring off-target species were unaffected
- shut down, cleaned and stored personal protective equipment and application equipment according to environmental procedures
- disposed of waste according to workplace procedures and environmental procedures
- updated records according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common pests, diseases and disorders identification
- pests, diseases and disorders and dissemination method common to work area
- pests, diseases and disorders treatment options, including:
 - cultural
 - chemical

- mechanical
- biological
- Integrated Pest Management
- basic environmental considerations when using chemicals for treating pests, diseases and disorders, including:
 - spray drift and off target damage
 - inversion
 - re-entry period
 - residues

Assessment Requirements for AHCPMG203 Work effectively in a pest management environment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can work effectively in a pest management environment, including:

- recognised common pests and identified the characteristics and impact on community
- identified and monitored effectiveness of pest management plans for pests recognised for impact on workplace performance
- identified, selected and safely used equipment required to implement pest management program
- identified and took corrective action for equipment faults
- recognised and implemented workplace strategies for controlling pests
- applied health and safety in the workplace and environmental practices and procedures ethically according to legislative requirements
- identified permissions, licences and necessary permits required prior to entering properties
- followed safe waste disposal procedures
- prepared and used communication and navigational equipment relevant to workplace requirements
- assisted with identifying key stakeholders and contributed to stakeholder engagement
- used communication strategies to engage with supervisor and stakeholders
- complied with designated timelines
- maintained pest management records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common pest management methods, strategies and monitoring techniques for specific pest species
- standard operating procedures and codes of practice applicable to pest control
- invasive pest species common to field of work and their harmful impact, including:
 - signs and symptoms of active pests
 - effect of pests on work environment
- basic environmental considerations when controlling pests, including:
 - spray drift and off target damage
 - inversion
 - re-entry period
 - residues
 - chemical handling
- pest control strategies, including:
 - cultural
 - chemical
 - mechanical
 - biological
 - Integrated Pest Management
- risk factors, including human, health and environmental associated with the pest management activity
- record keeping and reporting processes and procedures, including:
 - databases
 - paper based
 - mandatory reporting
- licenses, permits and permissions when entering properties
- common equipment used for, controlling pests, navigating and communicating on properties, including:
 - calibration requirements
 - basic operation principles
 - maintenance and repairs
- health and safety in the workplace procedures and legislative requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests for identification and control
 - tools and equipment for pest control, navigation and communications

- personal protective equipment
- specifications:
 - workplace documents including policies, procedures, processes, instructions, records and forms
 - manufacturers' operating instructions for specific equipment, machinery
 - relevant legislation, regulations and codes of practice
- relationships:
 - industry stakeholders
 - supervisor
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG301 Control weeds

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to plan and coordinate weed control activities using appropriate strategies to provide effective, economic control while minimising environmental damage.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess weed infestation	<p>1.1 Identify and record weeds and potential weeds for target area</p> <p>1.2 Identify the scope, stage and size of the weed infestation impacting on target area</p> <p>1.3 Assess effect of weed infestation on target area</p> <p>1.4 Identify tolerable levels of infestation according to workplace requirements</p> <p>1.5 Investigate approaches to control weed infestation</p> <p>1.6 Identify non-target plant and animal species present in the area</p> <p>1.7 Assess the site for suitability of control measures according to health and safety in the workplace and environmental requirements</p>
2. Plan weed control measures	<p>2.1 Determine suitable control options according to workplace requirements and legislative and regulatory requirements</p> <p>2.2 Identify and assess hazards, risks and controls according to workplace procedures and regulations</p> <p>2.3 Identify appropriate resources for control options</p> <p>2.4 Identify, fit and use personal protective equipment in accordance with health and safety in the workplace procedures</p> <p>2.5 Select and prepare a plan for control measures according to workplace strategy and environmental legislative and regulatory requirements</p> <p>2.6 Document control measures according to workplace and legislative requirements</p>
3. Implement weed control	<p>3.1 Assess conditions for implementation of control plan and adjust plan according to conditions</p> <p>3.2 Implement control measures in accordance with workplace pest management plan and industry best practice</p> <p>3.3 Ensure that control measures minimise effect on non-target species and environmental damage</p> <p>3.4 Maintain records of the control measure according workplace procedures and regulatory requirements</p>
4. Monitor weed control measures	<p>4.1 Monitor weed control measures and identify adverse impact on non-target entities</p> <p>4.2 Assess effectiveness of weed control measures in accordance with</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace procedures 4.3 Report results of assessment according to client or workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret plans, regulations, and other documentation and consolidate information to determine control plans and implement control measures
Writing	<ul style="list-style-type: none"> Accurately complete organisational records, plans and reports using clear language and industry terminology
Numeracy	<ul style="list-style-type: none"> Perform calculations for volumes, weights and measures for application rates of chemicals and materials
Oral Communication	<ul style="list-style-type: none"> Effectively participate in verbal exchanges using collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit policies, procedures, codes of practice and legislative requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload Make routine decisions and implements standard procedures for routine tasks, using formal decision making processes

Assessment Requirements for AHCPMG301 Control weeds

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated on at least one occasion that they have controlled weeds, including:

- identified, recorded and assessed weeds and their impact on the target area
- investigated the suitability of weed control approaches and effect on site environment and non-target entities
- planned and coordinate weed control activities
- identified tolerable levels of weed infestation for the target site
- conducted a site hazard, risk assessment and identified controls for weed control
- ensured personal safety by using appropriate personal protective equipment
- selected and applied weed management methods appropriate to the target site
- maintained records of weed management activities
- monitored, recorded and reported the effectiveness of methods
- ensured control measures had minimal effect on non-target species and environment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- weeds and their tolerable levels and impact on target area, including:
 - economic, aesthetic, health, fire hazard and environmental thresholds of common weeds
 - non-target entities common to the area
 - effect of weed infestation on required plant health and growth

- basic weed biology, including:
 - lifecycle and ecology of a range of weeds
 - cyclical nature of weeds and control programs
 - weed characteristics, morphology and dispersal
- weed management strategies and their selection criteria, including:
 - cultural
 - chemical
 - mechanical
 - biological
 - Integrated Pest Management
- risk factors including human, animal health and environmental associated with control measures
- factors that affect the efficacy of weed management strategies, including:
 - prevailing weather and atmospheric conditions
 - impact of off target damage on non-target entities
 - residues and maximum residue levels
- weed control activities and disturbance to other plant or animal species
- signs of adverse impact of control measures and ways to minimise their effect on non-target entities, including:
 - humans
 - animals
 - non-target plants
 - environment
- site-monitoring techniques that may be used to implement the weed control plan
- hazard and risks assessment and control methodologies
- equipment including personal protective equipment appropriate to control measure
- health and safety in the workplace requirements
- pest management planning and survey strategies
- legislative requirements relevant to weed control.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live weeds
 - tools and equipment used for weed control program
 - personal protective equipment
- specifications:

- workplace documents including policies, procedures, processes and forms for record keeping
- manufacturers' operating instructions for specific equipment and machinery
- safety data sheets
- workplace instructions and client briefs
- specific regulations and codes of practice
- relationships:
 - clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPMG302 Control plant pests, diseases and disorders

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that on at least one occasion they can control pests, disease and disorders, including:

- identified and recorded pests, diseases and disorders, beneficial organisms on host plants in target area
- assessed damage, threat and threshold of pests diseases or disorders on host plants according to client, market or environment requirements
- selected and implemented pest, disease and disorder control measures according to workplace, environmental and safe work practices
- identified and selected tools equipment and resources necessary to implement the control measure
- identified and assessed health and safety hazards and risks and incorporate and implemented in controls strategies according to health and safety procedures
- identified, fitted and used personal protective equipment according to workplace procedures
- monitored the effectiveness of pest and disease control
- adjusted control measure on crop and off-target entities where outcomes were below expectation
- maintained records of pest and disease control activities according to regulatory and workplace requirements
- coordinated the control strategy with others according planned outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest, disease and disorder and symptom recognition of host stress
- economic, aesthetic or environmental thresholds for a range of plant pests, diseases and disorders
- control strategies for pests diseases and disorders, including:
 - chemical
 - biological
 - cultural methods
 - treatments available
 - Integrated Pest Management
 - industry best practice
- tools, equipment and machinery for implementing the control strategies and the importance of calibration
- site monitoring and analysis techniques used to implement a control strategy
- implications of control strategies for:
 - target and off-target
 - site limitations
 - environmental implications
 - end market and production
 - environmental objectives
- health and safety in the workplace responsibilities for employees and employers
- correct use, maintenance and storage of personal protective equipment
- health and safety in the workplace and environmental regulatory requirements including hazardous substances regulations
- basic communications skills
- workplace and mandatory record keeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pests, diseases and disorders
 - tools and equipment for control program
 - personal protective equipment
- specifications:

- workplace documents including policies, procedures, processes and forms for record keeping
- manufacturers' operating instructions for specific equipment and machinery
- safety data sheets
- workplace instructions and client briefs
- specific legislation/codes of practice
- relationships:
 - clients
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG304 Use firearms to humanely destroy animals

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to euthanise animals using firearms and techniques appropriate for the type and mobility of the animal.

The unit applies to individuals who hold a valid firearms license and work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions. Destruction of pest animals must comply with state animal cruelty legislation.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for the shooting activity	1.1 Map location and boundaries for the shoot in accordance with the pest management plan and monitoring program 1.2 Confirm location of habitats, habits and range of movement of target animal

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Determine timing of the shoot based on the activity patterns of the target animal and estimate time required to complete the shoot</p> <p>1.4 Identify hazards and risks and apply control measures associated with the shoot according to workplace safety procedures</p> <p>1.5 Identify environmental and personal and public safety risks associated with the shoot</p> <p>1.6 Identify, fit and use suitable personal protective equipment and warning signs required for the activity</p>
2. Prepare for the shooting activity	<p>2.1 Confirm anatomy and physical features identifying location of vulnerable organs of target animal</p> <p>2.2 Take precautions to minimise hazards and environmental risks associated with the shoot</p> <p>2.3 Select vehicles, equipment and materials intended for use and check for serviceability</p> <p>2.4 Ensure firearm licences and permits are current and applicable to purpose</p> <p>2.5 Select firearm and ammunition types to comply with recommendations and workplace procedures for target animal</p> <p>2.6 Ensure firearms, ammunition, and stowage for transportation meets licensing requirements</p> <p>2.7 Check and prepare firearm and ammunition</p> <p>2.8 Zero and test firearm according to workplace procedures</p> <p>2.9 Stow firearm for transport according to legislative and regulatory requirements and workplace procedures</p>
3. Shoot animals	<p>3.1 Carry firearm safely with muzzle pointing in safe direction at all times according to industry best practice and workplace procedures</p> <p>3.2 Load, discharge and unload firearm according to safety procedures</p> <p>3.3 Aim firearm at vulnerable organ on the target animal and discharge firearm to kill using a single shot</p> <p>3.4 Check each target animal to ensure it is dead prior to selecting the next target animal</p> <p>3.5 Euthanise target animals that have not been killed cleanly</p> <p>3.6 Handle carcasses required for research or commercial use to minimise personal health and safety and biosecurity risks</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Dispose of animal carcasses not required for research or other purposes according to enterprise procedures to minimise biosecurity or public safety and health risks
4. Clean and store equipment and material	4.1 Clean and store carcasses for research or commercial use 4.2 Clean and store equipment and materials according to workplace practices 4.3 Clean, maintain and store firearms in line with regulatory standards 4.4 Store ammunition safely 4.5 Report or record activity completion according to workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately completes organisational records and reports using clear language and industry terminology
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for following explicit and implicit licencing requirements, policies, procedures, codes of practice and legislative requirements Be up to date with state or territory and federal legislation related to the use of firearms licensing
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and workload Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes

Assessment Requirements for AHCPMG304 Use firearms to humanely destroy animals

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated the skills to use a firearm to euthanise animals, including:

- planned the shoot within the boundaries and location of the target animal its range and habitat according to the timeframe, pest management plan and monitoring program
- ensured licences and permits were valid and applicable and environmental and public safety risks were mitigated
- identified target animal and its anatomical vulnerabilities for a clean kill
- operated a firearm safely in accordance with statutory requirements
- zeroed and test fired the firearm safely at a range under supervision at a distance that is commensurate with the target animals to be destroyed
- selected and checked serviceability of transport, equipment, firearms and ammunition, and stowed the firearm and ammunition safely for transport
- cleaned, maintained and stored equipment, firearms and ammunition safely and in accordance with statutory requirements
- checked target animal was dead, and euthanised immediately, if signs of life, according to relevant animal welfare codes of practice
- used personal protective equipment (PPE) to handle carcasses to ensure health and safety in the workplace
- identified health and safety in the workplace hazards and risks and applied control measures and used PPE according to health and safety in the workplace procedures
- applied biosecurity measures when handling, transporting or disposing of carcasses
- maintained records and reporting procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest management plan and their purpose
- environmental hazards and risks associated with the use of firearms
- safety hazards and risk management strategies associated with shooting
- checking and preparing a firearm and ammunition
- checking target animal for life after discharging the firearm
- anatomy and physical features and vulnerable organs, or humane points on target animals
- procedures for the safe handling of carcasses required for research or commercial use
- procedures for the safe disposal of animal carcasses not required for other purposes
- reporting and recording procedures required by the pest management plan
- location and boundaries for the shoot
- habitats, habits and range of movement of target animals
- PPE required for the shoot
- firearm's licensing requirements
- firearm and ammunition types recommended for the target animal
- State and territory gun control laws, acts and regulatory requirements including firearms agreements and codes of practice, relating to the use of firearms for euthanising animals
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- prevention of cruelty to animals legislation applicable to destruction of animals
- basic requirements for biosecurity in the context of destruction of animals.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an outdoor field environment with pest animals or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pest animals, carcasses or targets
 - firearms
 - PPE
- specifications:
 - workplace documents including procedures for firearm use
 - operating instructions for firearms
 - licences and permissions to discharge firearms
 - specific legislation and codes of practice for firearm use and animal welfare
- timeframes:
 - checked animal for signs of life after discharge of firearm.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

AHCPMG305 Survey pests

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to survey pest abundance for plants, vertebrate or invertebrate animals. This will be carried out using a range of observation techniques in conjunction with workplace pest management plan, survey strategy and a monitoring program according to established standards and protocols.

The unit applies to individuals who work under broad direction and take responsibility for their own work use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to conduct survey	1.1 Access and interpret pest management plan, survey strategy and monitoring program documents according to workplace procedures 1.2 Map location and boundaries for the count and obtain required

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>permits</p> <p>1.3 Work with key stakeholders to develop trust and effective working relationships</p> <p>1.4 Identify natural areas and features</p> <p>1.5 Confirm location of habitats and the range of movement of the target pest</p> <p>1.6 Determine items of direct evidence of the pest to be counted and survey method</p> <p>1.7 Determine time and duration of the count and notify relevant personnel</p> <p>1.8 Identify safety hazards and take precautions to minimise risks associated with the selected survey method</p> <p>1.9 Identify environmental risks and take precautions to minimise risks associated with the count</p> <p>1.10 Check serviceability of resources required to complete the count</p>
2. Conduct survey and record observations	<p>2.1 Operate equipment according to workplace procedures and operator instructions</p> <p>2.2 Conduct count within boundaries of specified location</p> <p>2.3 Record observations of direct evidence of the target pest and report to supervisor</p> <p>2.4 Clean and store equipment and materials according to workplace practices</p> <p>2.5 Apply animal welfare policies and procedures when conducting survey</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret plans, strategies and other documentation and consolidates information to determine and implement surveys

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately complete organisational records of observations using clear language and industry terminology
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations to determine counts and preparing reports and records
Navigate the world of work	<ul style="list-style-type: none"> Take personal responsibility for following explicit and implicit policies, procedures and permit requirements
Interact with others	<ul style="list-style-type: none"> Select and use appropriate conventions and protocols when communicating with key stakeholders

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have surveyed pests, including:

- organised and completed a pest survey according to the organisation's pest management plan and survey strategy
- recognised signs or evidence of common pests
- counted, calculated and recorded observations
- operated equipment safely and according to workplace and environmental procedures
- cleaned and stored the equipment at the conclusion of the job
- took appropriate safety and environmental precautions for all pest survey activities
- applied appropriate animal welfare practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- survey techniques and equipment appropriate to the geography and type of pest being surveyed
- health and safety considerations with survey techniques including aerial observation
- the basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- relevant parts of the organisation's pest management plan and survey strategy
- permits and permissions required for survey work
- pest survey plans and their application
- pest behaviour and habitats including areas that have a high probability of infestation
- direct evidence requirements of range of pests included in pest management plan
- survey recording methods and procedures

- map reading techniques for survey work.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site with pests to be surveyed or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests to be surveyed
 - survey tools and equipment
 - personal protective equipment
- specifications:
 - workplace documents including survey plans, procedures, survey records and forms
 - manufacturers' operating instructions for specific equipment
 - workplace instructions or briefs]
 - specific animal welfare codes of practice
- relationships:
 - team member, supervisor or key stakeholder.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG306 Determine pest control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to select a pest control technique for a strategic approach to pest management.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess targeted pest	1.1 Identify the biology and characteristics of the target pest 1.2 Observe and confirm the location and extent of the pest problem 1.3 Observe and confirm target pest behaviour and movement patterns

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Assess the impact of the pest on assets
2. Assess pest control techniques	<p>2.1 Identify purpose of control program and determine desired outcomes</p> <p>2.2 Discuss suitable pest control strategy with supervisor according to planned outcomes</p> <p>2.3 Identify biosecurity risks associated with control methods</p> <p>2.4 Determine legislative, economic or social constraints on pest control techniques</p> <p>2.5 Identify non-target species and constraints that they may impose</p> <p>2.6 Assess the impact that urban areas will have on the planning of pest control techniques</p>
3. Plan the pest control	<p>3.1 Source information on techniques applicable to the type of pest</p> <p>3.2 Identify permits, licenses or clearances required to carry out pest control activities</p> <p>3.3 Assess the relative humaneness of pest control techniques, where target pests include animals</p> <p>3.4 Determine control measures to address identified constraints</p> <p>3.5 Identify safety hazards associated with control measures and apply relevant health and safety in the workplace policies and procedures to manage risks</p> <p>3.6 Discuss and confirm the most appropriate technique for the situation with the stakeholder, and the desired outcome</p> <p>3.7 Determine monitoring techniques according to workplace practices</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyse and consolidate technical information and data against defined criteria to determine planned outcomes

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Effectively participate in verbal exchanges including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit policies, procedures and for licencing and permit requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective outcomes Make routine decisions and implements procedures for routine tasks, using formal decision-making processes for more complex situations

Assessment Requirements for AHCPMG306 Determine pest control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have determined pest control techniques, including:

- assessed the impact of pests on assets
- identified the target pest and its characteristics
- determined the desired outcomes, constraints and measures for pest control techniques
- planned and discussed appropriate humane pest control techniques with supervisor and stakeholder
- used a variety of monitoring techniques to determine pest numbers
- identified non-target species and biosecurity risks affected during a control program
- identified pest control permissions and licences required for pest control techniques
- determined the legal, economic and social constraints affecting pest control techniques
- included health and safety in the workplace policies and procedures when planning pest control techniques.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest lifecycles and behaviours, including modes of dispersal, biology and reproduction
- features of target and non-target species
- habitats of target and non-target pest animals
- impacts pest control activities can have on native species
- licenses, permits and clearances that may need to be obtained
- the impact pest control can have on nearby urban areas and off target species
- pest control techniques appropriate for different contexts

- key conditions for the survival of pests and methods for eliminating or controlling those conditions
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice, where target pests are vertebrate animals
- pests and their impact on assets, including the environment and their acceptable population densities
- types of constraints that apply to pest control techniques
- legislation applicable to pest control including declared species.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests
- specifications:
 - workplace documents including survey plans, procedures, records and forms
 - workplace instructions or briefs
 - specific animal welfare codes of practice
 - technical information and resources applicable to pest.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG307 Apply animal trapping techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to trap and hold live animals for release, transportation or destruction. Trapped animals can be native animals, domestic animals, animals determined to be pests or feral animals.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for trapping	1.1 Identify purpose of animal capture and set objectives 1.2 Confirm the location and size of the area designated for trapping activities

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Confirm target animal movement patterns, behaviour and lifecycles to determine trapping location and placement of equipment and appropriate timing of trapping activity</p> <p>1.4 Identify potential non-target animals</p> <p>1.5 Estimate time required to complete trapping activities</p> <p>1.6 Identify and check method of transport, materials and equipment required for trapping</p> <p>1.7 Select appropriate traps for target animal and the environment</p> <p>1.8 Clean, maintain and prepare trapping equipment according to manufacturer specifications</p> <p>1.9 Identify hazards, risks and controls for trapping and select appropriate personal protective equipment</p> <p>1.10 Identify and manage environmental risks associated with trapping animals</p> <p>1.11 Obtain relevant approvals, permits and permission to carry out trapping activities</p> <p>1.12 Determine precautions for minimising trapping of non-target animals</p>
2. Place and set traps	<p>2.1 Undertake site surveillance prior to setting traps</p> <p>2.2 Select and prepare site to maximise opportunity for trapping target animals and minimise the chance of trapping non-target animals</p> <p>2.3 Position, set and calibrate trapping equipment and check it for operation and safety</p> <p>2.4 Apply lures, decoys, baits or toxins according to workplace procedures and permits</p> <p>2.5 Camouflage traps according to workplace procedures</p> <p>2.6 Apply precautions to prevent trapping of non-target animals</p> <p>2.7 Set traps according to legislative requirements and animal welfare codes of practice</p>
3. Check and remove traps	<p>3.1 Inspect traps at the required frequency</p> <p>3.2 Identify trapped animals then release, humanely destroy or prepare for transport according to trapping objectives and permits</p> <p>3.3 Handle captured animals humanely according to animal welfare codes of practice</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.4 Transport animals from site according to trapping objectives and animal welfare codes of practice 3.5 Observe health and safety in the workplace procedures and public safety requirements during trapping activities 3.6 Operate trap release mechanism safely and remove trap 3.7 Restore trap-site to its prior condition
4. Record data	4.1 Use global positioning system (GPS) loggers to record locations of trapped animals 4.2 Use recording instruments to record details of trapping activities according to trapping plan and workplace procedures
5. Clean and store equipment and material	5.1 Clean and store carcasses for research or other purposes 5.2 Clean and store equipment and materials according to safety data sheets, workplace and biosecurity procedures 5.3 Record target and non-target kills
6. Report completion of work	6.1 Report results of trapping activities and incidents according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational documentation using clear language, and terminology when reporting and maintaining animal trapping records
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations to determine and record trapping data and GPS locations
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective trapping outcomes

Assessment Requirements for AHCPMG307 Apply animal trapping techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have applied animal trapping techniques, including:

- determined objectives for trapping and confirmed target animal characteristics and trapping location and size
- estimated trapping period and identified, selected and prepared baits, equipment, traps and transport for trapping activities
- set and trapped animals humanely and released or destroyed animals according to workplace procedures and animal welfare code of practice
- identified presence of target and non-target animals
- identified environmental, health and safety in the workplace hazards, risks and applied controls according to workplace and environmental procedures
- checked method of transport, equipment and materials for serviceability and cleaned equipment before and after trapping activities
- selected, prepared and restored trapping site during trapping activities
- positioned, set, calibrated and checking trapping equipment according to workplace procedures
- applied lures or baits according to trapping plan
- selected, used and stored baits or toxins according to workplace procedures
- inspected traps in a timely manner and handled and euthanised captured animals in accordance with workplace procedures and animal welfare practices
- maintained records using global positioning system data
- summarised and presented trapping data and reports according to workplace procedures
- cleaned and stored equipment and carcasses using approved chemicals according to safety data sheets (SDS) and workplace procedures to minimise biosecurity risks.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- purpose for trapping the animal
- target animals and non-target animals
- target animal's range, movement patterns and behaviour and how to apply knowledge of these to selecting trapping location and equipment
- reproductive cycle of the target animal to determine appropriate timing of trapping activities
- food preferences, both general and local, of target animals
- capture and kill points for target animals
- traps and techniques for target animals
- permissions that may be required to undertake trapping
- principles relating to property, stock and duty of care when trapping
- precautions that need to be taken to minimise trapping of non-target animals
- trap camouflage materials and techniques
- trap types, setting and operating release to render them inactive
- health and safety in the workplace procedures that relate to trapping animals
- recording and reporting requirements
- use of decoys and lures
- baits or toxins types and preparation
- applicable state or territory legislation on the use and storage of baits or toxins
- applicable legislation on the capture and handling of animals
- suitable personal protective equipment
- transportation methods for captured animals.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live animals in the field
 - traps appropriate to trapping technique required
 - baits, lures or poisons relevant to trapping context
 - methods of transport relevant to trapping context
 - cleaning products
- specifications:

- workplace documents including plans, procedures, records and forms
- workplace instructions or briefs
- specific regulations and animal welfare codes of practice
- technical information and resources applicable to pest
- specific SDS
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit if firearms are used to destroy animals:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

Assessment Requirements for AHCPMG308 Implement pest management strategies

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that they have implemented a pest management strategy, including:

- accessed and interpreted pest management plan and discussed requirements
- identified declared species
- identified stakeholders, resources, health and safety in the workplace requirements and budgetary constraints of pest management plan
- assessed the target pest status, control technique and impact
- implemented the pest management plan using appropriate techniques ensuring safety of non-target species and environment
- applied the techniques to achieve long term outcomes
- applied standard monitoring techniques
- reviewed pest management plan and presented recommendations on improvements
- disposed of waste and cleaned, stored and maintained equipment according to workplace and legislative requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- appropriate legislative requirements with regards to declared species
- basic sustainability principles, including the ecological role provided by some pests
- federal and state legislation relating to property, animal welfare and duty of care
- risk management approaches
- stakeholder engagement and consultation strategies

- pest physiological and biological characteristics that influence on pest management, particularly with regard to pest populations and the ability of pests to rapidly recolonise
- pest management control methods and techniques and how they fit into an integrated pest management strategy
- standard monitoring techniques
- pest status in the context of location, land use, benefits and damage caused
- types of follow up techniques that may be required to minimise the possibility of reinfestation
- information sources used for identifying and managing pests
- animal welfare requirements for vertebrate pest control
- legislative requirements for the destruction, movement and propagation of a declared species
- biosecurity principles, including prevention of pest spread
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- conflicting and cross purpose land use resolution processes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests
 - vehicle, tools and equipment and resources appropriate to the control methods
 - personal protective equipment
- specifications:
 - workplace documents including procedures, processes, forms
 - manufacturers' operating instructions for specific equipment and machinery
 - safety data sheets where chemicals have been used
 - workplace instructions, job specifications or client briefs
 - specific legislation/codes of practice
 - financial budget for project
- relationships:
 - clients
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG309 Apply pest animal control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to apply control techniques for pest animals, in compliance with a pest management plan. This includes involving the use of vertebrate pesticides, traps (except leg hold traps), cages, lures and firearms with the animal humanely destroyed according to industry guidelines or protocols.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Assessment Requirements for AHCPMG309 Apply pest animal control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have applied a pest animal control technique, including:

- identified the control techniques and selected equipment and resources required
- Identified hazards and risks and controls measure
- identified target and non-target animals
- obtained permits and licences and notified stakeholders of intended works
- checked vehicles, selected equipment and materials for serviceability and cleaned equipment before and after implementation
- prepared timeline and selected and prepared the site for control activity and restored it on completion
- prepared, installed and checked, safety warning signs, control equipment, materials according to plan
- applied controls according to timelines and control plan
- reconciled controls against plan within specified timeframes
- recorded details of control activities to comply with enterprise and legislative requirements
- reported results of control
- reconciled, cleaned and maintained equipment and disposed of waste according to workplace and environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements for ensuring the welfare of animals described in the relevant Codes of Practice and standard operating procedures
- the purpose and scope of the animal control program
- suitable control techniques and timing of control activities based on:
 - the target animal's range, movement patterns, behaviour and habitats
 - the reproductive cycle of the target animal
 - target animal behaviours and biology relevant to control technique
 - food preferences, both general and local, of target animals
 - scent station and other animal tracks and traces
 - target pests and non-target native animals found in the area
 - the environment and terrain of the target area
- appropriate calibre of firearm required to euthanise animals
- euthanasia procedures, including capture and kill points for animals
- licencing, permissions and notification protocols
- precautions that need to be taken to minimise harm to non-target animals
- health and safety in the workplace procedures that relate to animal control activities including personal protective equipment
- recording and reporting requirements
- procedures for using, recording and reconciling baits and poisons
- relevant legislation for pest animal control activities
- transportation methods for captured animals or carcasses
- land reparation works, waste disposal and the environment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pest animals
 - tools and equipment used for pest animal control program
 - personal protective equipment
- specifications:
 - workplace documents including policies, procedures, processes and forms for record keeping
 - use of manufacturers' operating instructions for specific equipment, machinery
 - safety data sheets
 - workplace instructions and client briefs
 - specific legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit if firearms are used to destroy animals:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to conduct pest control activities from the air using firearms.

The unit applies to individuals who hold a valid firearms license and work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Undertake pre-flight procedures	1.1 Confirm location and boundaries for the activities with pilot 1.2 Obtain appropriate approvals and permits to conduct pest control activity according to regulations and the Civil Aviation Safety

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	Authority (CASA) 1.3 Check time and duration of flight and notify relevant personnel 1.4 Confirm flight plans and search and rescue operations with the pilot and ground crew 1.5 Check on-board emergency equipment with pilot 1.6 Check emergency landing procedures with pilot 1.7 Check landing-site requirements 1.8 Confirm intent to approach or leave the aircraft with pilot 1.9 Approach aircraft according to aircraft and workplace health and safety procedures
2. Prepare activity related to the use of a firearm	2.1 Carry current firearm's license according to regulations 2.2 Ensure the prescribed firearm is functioning correctly and sighted according to operation procedures 2.3 Check the firearm to ensure it meets appropriate regulatory standards
3. Use firearm from aircraft	3.1 Stow equipment safely on aircraft according to health and safety in the workplace procedures and legislative and regulatory requirements 3.2 Wear harnesses and helmet during pest control activities according to health and safety in the workplace procedures 3.3 Plot route and location of activities on map 3.4 Carry out pest control activity safely according to legislative and regulatory requirements, workplace procedures and instructions 3.5 Ensure animal is humanely destroyed 3.6 Observe and record pest numbers according to workplace procedures
4. Complete work relating to the use of firearms for pest control	4.1 Clean and store equipment and materials according to workplace procedures 4.2 Dispose of waste and debris according to workplace procedures 4.3 Document and report activities according to workplace instructions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret plans, permits and conditions to ensure compliance with regulatory requirements
Writing	<ul style="list-style-type: none"> Accurately complete organisational records and reports using clear language and industry terminology
Oral Communication	<ul style="list-style-type: none"> Use clear language and concepts, and tone and pace appropriate when communicating with pilot
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit licencing requirements, policies, procedures, codes of practice and legislative requirements Be up to date with state or territory and federal legislation related to the use of firearms licensing
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload

Assessment Requirements for AHCPMG311 Use firearms for pest control activities from aircraft

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have used a firearm to control pest animals from an aircraft, including:

- obtained and complied with approvals, permits and conditions for planned activity
- confirmed flight plan, emergency procedures and search and rescue operations with pilot
- checked, sighted and used a firearm safety to shoot pest animal targets from an aircraft
- applied air safety practices when entering and occupying aircraft
- stored firearms safely in an aircraft
- applied health and safety in the workplace practices
- checked accurate location, carried out pest control and ensured all animals were humanely destroyed according to animal welfare codes of practice and workplace procedures
- cleaned maintained and stored firearms and equipment and disposed of waste according to workplace procedures
- maintained records of pest numbers and reported outcomes according to workplace procedures.

Knowledge Evidence

- An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
- requirements for ensuring the welfare of animals described in relevant codes of practice and workplace procedures
- map reading and plotting position
- air safety principles and emergency procedures appropriate to firearms
- approvals required for carrying firearms airside
- firearms' licensing requirements

- health and safety in the workplace procedures
- environmental, animal welfare, prevention of cruelty to animals, and pest control legislation
- appropriate personal protective equipment (PPE)
- principles and methods of using firearms from an aircraft.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an aircraft suitable for pest animal control activities or an environment that accurately represents these conditions
- resources, equipment and materials:
 - live pest animals
 - appropriate firearms for pest animal management
 - suitable PPE for the individuals task
- specifications:
 - workplace and Civil Aviation Safety Authority documents such as policies, procedures, processes, forms and instructions
 - operating instructions for firearms
 - licences and permissions to discharge firearms from an aircraft
 - legislation, regulations and codes of practice for animal welfare and firearm use from aircraft
- relationships:
 - pilot and supervisors
- timeframes:
 - according to the specified flight plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit:

- the assessment team must include assessors with firearms licences and appropriate experience in using firearms from aircraft for pest control.

AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental landscapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare pest animal baiting programs. This includes the safe preparation and distribution of poison baits for the control of vertebrate pest animals affecting the rural and natural environment according to legislative and regulatory requirements.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify vertebrate pests' species and prepare a poison baiting program	1.1 Identify the pest animal species and abundance in target area 1.2 Assess the type, availability and mode of action of poison for control of pest animal species in target area

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify key aspects of pest animal species ecology, habitat use and control program objectives to determine the timing and extent of baiting program</p> <p>1.4 Assess public health, safety hazards, risks and regulatory restrictions for control options</p> <p>1.5 Assess environmental conditions and off target risk for control options</p> <p>1.6 Select appropriate control option, baiting technique, poison and delivery method appropriate for target pest species, location and landscape</p> <p>1.7 Prepare baiting program to maximise pest animal control objectives according to legislative and regulatory requirements</p> <p>1.8 Determine monitoring and reporting protocols to evaluate effectiveness of baiting program according to legislative and regulatory requirements</p>
2. Obtain and confirm approvals for accessing and using poison baits	<p>2.1 Identify necessary approvals and notification requirements for the location of the baiting program and poison use according to legislative and regulatory requirements and toxin/poison label requirements</p> <p>2.2 Access and complete documentation to gain approvals for use of poisons and baits according to workplace procedures and legislative and regulatory requirements</p> <p>2.3 Ensure approvals have been granted, received and filed according to workplace procedures and legislative and regulatory requirements</p> <p>2.4 Notify stakeholders of intended baiting program according to workplace procedures and legislative and regulatory requirements</p>
3. Prepare, transport and store baits	<p>3.1 Determine the type of bait, quantity and dose rate of poison for the pest control program according to poison label and legislative and regulatory requirements</p> <p>3.2 Select, ensure serviceability, fit and use personal protective equipment for baits according to chemical label and safety data sheets (SDS)</p> <p>3.3 Select suitable location to prepare poison bait according to workplace procedures and legislative and regulatory requirements, codes of practice or guidelines</p> <p>3.4 Prepare bait for the target species, bait substrate/material and poison according to label and legislative and regulatory requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.5 Transport poisons and prepared baits according to legislative and regulatory requirements</p> <p>3.6 Prepare baits for storage according to baiting program requirements, type of bait and legislative and regulatory requirements</p> <p>3.7 Store the treated baits safely according to workplace procedures, legislative and regulatory requirements and poison label directions</p> <p>3.8 Clean and decontaminate bait preparation and distribution equipment according to operator instructions, SDS and legislative and regulatory requirements</p>
4. Distribute and monitor baits in target area	<p>4.1 Monitor and assess weather conditions and forecasts to ensure effective conditions for baiting to proceed</p> <p>4.2 Ensure notifications have been communicated and signage installed prior to baiting program according to legislative and regulatory requirements</p> <p>4.3 Identify health and safety hazards and risks and implement controls when handling and distributing baits according to workplace procedures, poison label directions and SDS</p> <p>4.4 Distribute baits in target area to maximise target pest access and minimise off target risk according to label directions and baiting program</p> <p>4.5 Monitor bait uptake and control outcomes in a timely manner according to baiting program requirements, poison label directions and legislative and regulatory requirements</p> <p>4.6 Clean up and dispose of baits according to poison label instructions, workplace procedures and legislative and regulatory requirements</p>
5. Recording and reporting on outcomes of baiting program	<p>5.1 Record and report safety and environmental incidents according to workplace procedures and legislative and regulatory requirements</p> <p>5.2 Record details of poison bait application and outcomes according to workplace procedures and legislative and regulatory requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret SDS, poison labels, operating instruction, applicable legislation and regulations and other documentation and consolidates information to determine baiting requirements
Writing	<ul style="list-style-type: none"> Complete regulatory applications and forms for permissions according to legislation and regulations Accurately record and complete organisational and legislative records using clear language and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine bait size and quantity relevant to the vertebrate animal population and scale of the program
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following policies, procedures and regulations Identify and implement poison label requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for baiting activities

Assessment Requirements for AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental landscapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to apply poison baits for vertebrate pest animals in a rural or natural environmental landscape ensuring they have:

- identified pest animal species and abundance
- identified and assessed the availability, mode of action of poison and their application for control of vertebrate pest animal species
- identified and selected the poison and baits required for the target pest and calculated the requirements for bait size according to poison label and regulatory requirements
- determined the timing for undertaking a baiting program in consideration of target animal ecology, behaviour, location and landscape
- identified the various approaches to baiting for pest animal species and selects most appropriate form of baiting for target pest animal species and environment
- assessed environmental and off target hazards and risks
- developed a poison baiting program and monitoring protocol suitable for pest control objectives for target vertebrate pest and location
- identified and accessed legislative and regulatory forms and made application for approvals to access and implement a poison baiting program
- confirmed approvals and notified stakeholders of poison baiting program
- assessed health and safety in the workplace hazards, risks and implemented control procedures for applying and handling poison baits according to poison label, safety data sheets (SDS), legislative and regulatory requirements, and workplace procedures
- used personal protective equipment for all poison bait activities
- prepared baits for target species in a suitable location
- prepared bait for storage and stored the bait safely ready for distribution according to poison label and workplace procedures
- monitored and assessed weather to ensure effective baiting conditions according to workplace procedures and poison label
- transported baits according to legislative requirements

- installed signage and distributed baits ensuring effective target access and minimising off target risks according to baiting program
- monitored bait stations in a timely manner according to poison label and baiting program
- cleaned equipment, spills, and disposed of waste and baits according to workplace and environmental procedures, SDS and poison labels
- maintained records and reported incidents according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- vertebrate pests and their impact on the rural and environmental landscape
- vertebrate pesticides, toxins or poisons to control and manage pest animal species, including:
 - types
 - origin
 - mode of action
 - application
- application and use of pesticides in vertebrate animal baiting program
- baiting techniques for the delivery of vertebrate pesticide toxins or poisons to target species in a baiting program
- regulatory conditions for the use of vertebrate pesticides in pest animal baiting programs, including:
 - legal implications
 - requirements of poisons labels
 - role of SDS
 - regulated poisons including Schedule 7
- federal, state or territory guidelines and codes of practice for the preparation and use of poison baits for pest animals
- types and characteristics of vertebrate pests and their impact on the human and natural environment, including:
 - life cycle
 - effect on farms and farmland
 - effect on natural ecosystem and landscape
 - effect on the urban environment
- options for controlling vertebrate pests for a control program, including:
 - poison baiting
 - fumigation
 - habitat destruction
 - concussive (explosive) force
 - trapping

- shooting
- fencing
- Integrated Pest Management
- guard animals
- aversions
- bait techniques and technologies, including:
 - grains
 - meat
 - fruits and vegetables
 - bait stations
 - baiting trails
 - replacement baiting programs
 - canid pest ejectors
 - aerial baiting
- legislation, regulations and licensing requirements in relation to access and use of poisons and poison baits, including:
 - application process for permits and licencing
 - roles and responsibilities of land owners, pest controllers and government agencies for using poison baits
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- bait distribution techniques and considerations, including:
 - impact of weather
 - pest species and their habits
 - breeding cycle
 - feeding and caching (storing) behaviours
 - watering behaviours
- predation risk to rural and environmental assets being protected
- building baiting program into farm or park management activities
- factors that contribute to off target risks, including:
 - proximity to urban and peri urban environment
 - domestic animal behaviours
 - pest animal interactions
 - native birds and animal activities
- hazards of poisons and their application, including:
 - human and animal health
 - environmental contamination
 - residues in environment, plants and animals
 - timing for checking bait stations/sites
- safety requirements when handling, treating and distributing poisonous baits, including:

- procedures
- personal protective equipment
- signage
- preparing poisonous baits, including:
 - bait types
 - sizes
 - preparation before and after treatment
 - equipment and methods of treating baits
- safe handling, transport and storage of treated baits and poison concentrates
- requirements for disposal of waste poison and baits, clearing spillages and equipment clean up.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - poison baits
 - personal protective equipment
- specifications:
 - workplace documents including work instructions and procedures for bait distribution and planning
 - poison labels and SDS
 - legislation and regulations relevant to the use of poisons and poison baits
 - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG313 Prepare, monitor and maintain biological agents for weeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare, monitor and maintain biological control agents for weed control prior to release in an experimental or field situation. Biological agents must be maintained and stored in an effective way to optimise their potency on targeted weed species.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPMG313 Prepare, monitor and maintain biological agents for weeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have prepared, monitored and maintained biological agents for weed control, including:

- prepared and propagated biological agents according to laboratory policies and procedures
- procured and transferred cultures to growing environment according to laboratory policies and procedures
- maintained, harvested and stored biological agents according to laboratory policies and procedures
- monitored and kept records of observations and details of any abnormalities according to laboratory policies and procedures.
- applied health and safety in the workplace procedures, environmental sustainability and biosecurity practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- context of biological agents used for weed control
- laboratory procedures for biological agents
- media available for culture maintenance
- culture and media preparation techniques
- available biological control agents and their use
- the range of pest species that are to be targeted with biological agents
- biosecurity and quarantine requirements
- health and safety in the workplace for laboratories and biological agents, including:
 - use of personal protection equipment (PPE)
- environmental sustainability and biosecurity practices when using biological agents.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a laboratory suitable for handling biological agents or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live biological agents
 - laboratory tools, equipment and materials to produce and store media
 - PPE
- specifications:
 - workplace and laboratory policies, procedures and processes
 - safety data sheets
 - workplace instructions and specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can implement a pest management plan, including:

- determined all operational parameters and objectives and identified the budgetary allocations, health and safety in the workplace, biosecurity, human and operational resources required for the pest management plan
- supervised others to meet health and safety in the workplace, legislative and regulatory requirements in their work
- procured and ensured machinery, equipment tools and materials met operational and statutory requirements
- communicated with stakeholders and personnel on pest management activities
- supervised others to carry out pest management work according to the pest management plan and provided feedback, advice and coaching
- informed and advise personnel on duties and expected standards
- reviewed and rescheduled works and notified stakeholders of changed schedules
- reviewed and compiled outcomes of pest management plan and prepared reports to stakeholders on progress.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest management plans their structure and implementation
- factors affecting the selection of pest control methods and techniques, including:
 - pest biology and lifecycle
 - potential diseases and toxicity

- principles of sustainability
- herbicide resistance and the alternatives that are available
- pest status in the context of location, land use, benefits and damage caused
- pest management control programs and how to use them in an integrated manner, including:
 - key concepts of integrated pest management as a strategy
- contingency management principles
- risk assessment and management processes
- legal responsibilities of stakeholders including landowners
- local, regional, state and national pest management strategies
- federal, state or territory legislation and regulations relating to pest management activities
- the basic concepts and underpinning principles of the strategic approach to invasive pest management and how to manage damage caused by pests
- the basic principles and importance of monitoring and evaluating the effectiveness of invasive pest management and how to plan and implement an appropriate monitoring program for a pest management plan
- common causes of failure in pest management
- requirements for ensuring the welfare of animals described in relevant codes of practice
- relevant environmental and pesticides legislation as they apply to the workplace
- developing operational parameters and objectives, timelines and milestones
- reporting and recording requirements for the various stakeholders
- scheduling workload and developing work plans.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pest animals
 - tools and equipment required to implement the plan
 - personal protective equipment
 - baits and poisons
- specifications:
 - workplace documents including policies, procedures, processes
 - pest management plan
 - manufacturers' operating instructions for specific equipment and machinery
 - specific safety data sheets
 - workplace instructions and job specifications
 - specific legislation/codes of practice
- relationships:

- clients
- team member(s)/work crew
- supervisors/management
- timeframes:
 - schedules and planned completion dates for a pest management plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG412 Develop a pest management plan

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop a pest management plan for the management of pests, in the broader context of weeds, vertebrate or invertebrate pests and diseases. This includes identifying the activities required to meet objectives of the organisation through the coordination of human and physical resource requirements.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed a pest management plan, including:

- developed the scope, goals and time frames for a pest management plan
- consulted with stakeholders in the development of the plan
- defined and documented the objectives, roles and responsibilities for the plan
- identified and documented the activities and developed a schedule of critical control points
- conducted a risk assessment for management of community, environment production and health and safety in the workplace and developed contingency plans
- determined and developed operational procedures and methods for monitoring the plan, control methods to be used, site clean-up strategy, and biosecurity
- identified resources and estimated cost of pest management plan
- prioritised activities according to budgetary constraints
- incorporated health and safety in the workplace, environmental and biosecurity procedures and regulations into pest management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- project planning and management processes
- factors that impact on selection of pest management activities, including:
 - pests in the context of weeds, vertebrate and invertebrate animals and diseases
 - pest behaviour
 - pest population dynamics and economic and environmental thresholds

- target pest biology and lifecycles
- potential diseases or toxicity risks
- relevant local, regional, state or territory and national pest management strategies
- the principles that underpin the strategic approach to managing pests
- land management and production processes of targeted area
- Federal, state or territory legislation and regulations relating to pest management activities including animal welfare
- chemical, biological, physical and habitat control techniques for pest management
- pest control methods and techniques
- critical control points in the target pests' life cycle, land management and production activity cycles
- develop objectives for specific, measurable, achievable, realistic and time-based outcomes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - technology and resources for documenting plans
- specifications:
 - workplace documents including policies, procedures, processes
 - pest management planning tools
 - workplace instructions and job specifications
 - specific legislation and codes of practice
- relationships:
 - clients
 - team member(s)/work crew
 - supervisors/management.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have produced a written report that details the pest problem in a target area, including:

- identified and consulted with stakeholders
- collected information on pest impact and defined the pest problem in consultation with stakeholders
- determined the target pest population and distribution and factors impacting population and distribution
- determined non-target species populations and distribution in area
- accessed and analysed information to validate pest impact
- identified appropriate times for pest control activities and identified and documented pests' characteristics that impact on program effectiveness
- conducted a cost-benefit analysis for managing target pest
- prepared a report and assessed the viability for a pest management plan for pest population
- identified environmental impact of pest presence and pest management activity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- impact of pests on environment, land use, land management and production processes
- behaviour of target pests, particularly those behaviours that impact pest susceptibility to being effectively managed
- animal welfare and related codes of practice and workplace procedures

- pest biology and lifecycles of target pests
- principles that underpin the strategic approach to managing pests
- land management and production processes of targeted area
- ecology of targeted area
- performance criteria for measuring land management and production outcomes
- techniques used to validate the target pest population and distribution data supplied by stakeholders and sources of relevant data
- measuring or estimating economic implication and environmental impacts of pests
- potential ecological role some pests provide
- potential disease or toxicity risks
- relevant parts of local, regional, state or territory and national pest management strategies
- factors that influence pest population and distribution
- periods of vulnerability in the lifecycle of pests
- critical control points for management of pest problem
- range of pests, non-target species, plant pests and diseases.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site with pests to evaluate
 - technology and resources for documenting reports and cost benefit analysis
- specifications:
 - workplace documents including policies, procedures, processes
 - research materials and data for pests
 - workplace instructions and job specifications
 - specific legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG506 Manage the implementation of legislation

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to manage the implementation of legislation and develop procedures to support and advise landholders to ensure compliance within organisational guidelines or legislative requirements relating to the management of pests, including weeds, vertebrate and/or invertebrate pests.

The unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse information and exercise judgement to complete a range of advanced skilled activities. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

Pest control legislation and regulations apply in all states and territories and must be adhered to. User are advised to check details with the relevant regulatory authority.

Assessment Requirements for AHCPMG506 Manage the implementation of legislation

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, developed procedures to identify infestations in accordance with pest management legislation.

There must also be evidence that the individual has:

- interacted with landholders according to workplace requirements and legislative requirements to:
 - explain the ramifications of legislation
 - provide pest management advice
- explained policies for right of entry to work team
- prepared and served penalty notices to landholders who are in contravention of legislation
- collated evidence and findings for presentation in a court or to legal team
- prepared a ministerial brief.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant Commonwealth and state/territory legislation and regulations relevant to pest management, including:
 - identification, destruction, movement and propagation of declared species
 - gathering and presenting evidence
- appropriate record-keeping systems
- environmental protection legislation and compliance in land and water management
- land management and production principles

- techniques used in the development of policies and procedures
- how to present evidence for court proceedings
- principles that underpin a strategic approach to managing pests
- pest control treatments relating to pests dealt with under legislation
- monitoring points in the pest management plan and evidence of infestations
- biosecurity implications of pest management strategies
- chemicals and toxins used in pest control and environmental protection
- relevant local, regional, state/territory and national pest management strategies.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an agency environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for reviewing legislation and preparing written documentation
- specifications:
 - workplace policies and procedures for preparing and processing pest management documents
 - legislation and regulations for pest management
- relationships:
 - landowners
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed at least one pest monitoring and evaluation program, according to local, regional, state or territory and national pest management strategies.

There must also be evidence that the individual has:

- consulted with stakeholders
- investigated and determined the objectives of the pest management monitoring plan
- identified required operational and performance standards for monitoring, which must include:
 - sample timing, observation systems, level of accuracy required and sample size
 - economic and environmental impact
 - triggers for emergency response
- developed procedures for monitoring and evaluation of pest management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- monitoring and evaluation principles and how they should be included in the management program
- pest biology, behaviour and lifecycles and how they influence monitoring procedures
- pest population dynamics and economic and environmental thresholds
- relevant local, regional, state, territory and national pest management strategies

- Commonwealth, state or territory legislation and regulations relating to pest management activities
- key concepts in the integrated pest management strategy
- data and information management, including formatting and complexity considerations for target stakeholders
- monitoring points for target pests
- non-target species in the area and their impact on pest management
- potential economic and environmental impacts of pest population
- trigger points to initiate an emergency response
- aims, objectives and milestones in the pest management plan
- requirements for ensuring the welfare of animals described in the relevant codes of practice, where monitoring plan involves pest animals
- potential diseases and toxicity relevant to the area and pests.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for research and creating documents
- specifications:
 - legislation, regulations and industry codes of practice for pest management
- relationships:
 - stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG510 Develop a pest survey strategy

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop a plant pest survey strategy to determine the presence, distribution and prevalence of pest plants, vertebrates and/or invertebrates. The work may be conducted as part of an emergency response to an incursion or as part of routine surveillance and must be conducted in accordance with established standards and protocols.

The unit applies to individuals who undertake a role within a pest incursion response and take personal responsibility and exercise autonomy in undertaking complex work. They are accountable for the work of others within broad parameters and analyse information and exercise judgement to complete a range of advanced skilled activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCPMG510 Develop a pest survey strategy

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has produced at least one pest survey strategy according to local, regional, state/territory and national pest management strategies.

There must also be evidence that the individual has:

- analysed biological information for the characteristics, distribution and dispersal of pest
- developed survey methodology for target pest, environment and terrain
- prepared plans to workplace and authority standards
- developed review processes according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- biometric principles of biological survey design
- biology of pests relevant to the region
- types and distribution of hosts relevant to the region
- requirements for ensuring the welfare of animals described in the relevant codes of practice
- legislation, regulations, codes of practice and industry standards relevant to surveying pests
- pest biology, behaviour and lifecycles

- diagnostic tests for use in confirming pest presence in samples
- resources required for survey activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field for a possible pest incursion, or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for researching pest biological information and preparing documentation
- specifications:
 - legislation, regulations and industry codes of practice for pest management
- relationships:
 - stakeholders
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPRK201 Care for health and welfare of pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of pigs. This unit applies to workers in pork production enterprises operating under routine supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Check and assess pig health and welfare	1.1 Check pig health and welfare regularly 1.2 Recognise and report signs of ill health, diseases, parasite infestations and physical abnormalities 1.3 Record pig health and welfare status 1.4 Seek immediate advice where signs indicate an unusual disease
2. Provide an optimal environment for pigs	2.1 Operate and check temperature and other environment control equipment where appropriate 2.2 Record relevant information on shed environmental conditions
3. Establish and maintain hygiene	3.1 Use and maintain personal protective equipment, and follow work health and safety procedures 3.2 Follow biosecurity procedures 3.3 Follow personal hygiene practices 3.4 Clean work areas, machines and surfaces appropriately 3.5 Remove and dispose of all waste and debris appropriately in line with enterprise environmental policies
4. Administer medication to pigs	4.1 Store labelled vaccines, veterinary medicines and other chemicals appropriately as directed 4.2 Carry out routine disease or parasite prevention procedures 4.3 Measure and administer medication under supervision 4.4 Administer vaccines as required, and identify pigs that have been vaccinated 4.5 Complete required documentation and records for administration of vaccines, medicines and chemicals
5. Remove dead or non-viable pigs	5.1 Dispose of dead pigs appropriately 5.2 Recognise, report and carry out appropriate procedures for unhealthy or non-viable pigs 5.3 Provide post-mortem assistance where necessary
6. Report and complete records	6.1 Complete all required documentation and records of diseases, pig losses and treatments clearly, promptly and accurately 6.2 Report to enterprise where relevant so that prevention strategies can be planned and implemented

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK201A Care for health and welfare of pigs.

Assessment Requirements for AHCPRK201 Care for health and welfare of pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check and assess pig health and welfare
- provide an optimal environment for pigs
- establish and maintain hygiene
- administer medication to pigs
- remove dead or non-viable pigs
- report and complete records
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity
- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for animal welfare of pigs
- signs of health, signs of ill health, and methods for assessing pig health and welfare
- techniques and methods for humane handling and restraint of pigs
- common diseases of pigs, treatment regimes, prevention and management strategies
- criteria for handling compromised pigs
- relevant documentation, records and reports that are required

- types, functions and characteristics of housing, housing infrastructure and housing equipment for pigs, and the criteria and methods for determining that they are in working condition
- types, uses, handling, storage and routes of administration of commonly used vaccines, veterinary medicines and chemicals
- requirements, methods and procedures for removing and disposing of waste and debris
- procedures for conducting post-mortem examinations
- effects and impacts of individual pig health and welfare on herd health status and vice versa
- relevant work health and safety requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK203 Move and handle pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to move and handle pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to workers in pork production enterprises operating under routine supervision within organisational guidelines.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Control and move pigs	1.1 Conduct moving, manual handling, lifting and restraining of pigs in a safe and appropriate manner in compliance with relevant work health and safety requirements

Element	Performance criteria
	1.2 Move and handle pigs either singly or in groups safely and humanely, using appropriate positive behavioural methods 1.3 Monitor pigs constantly for signs of distress and take appropriate action 1.4 Record as required
2. Restrain pigs	2.1 Restrain pigs safely and humanely in line with enterprise animal welfare policies
3. Weigh or condition score pigs	3.1 Weigh individual pigs and groups of pigs as required, in line with enterprise biosecurity policies 3.2 Read ear tag, ear notch or pen number to identify pigs
4. Return pigs to housing	4.1 Return pigs to their housing or secure pigs at their final destinations as appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK203A Move and handle pigs.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPRK203 Move and handle pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- control and move pigs
- restrain pigs
- weigh and condition score pigs
- return pigs to housing
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- techniques and methods for humane handling and restraint of pigs
- relevant regulatory requirements, industry standards and codes of practice for ensuring animal welfare of pigs
- signs of health, signs of ill health, signs of distress and methods for assessing pig health, welfare and behaviour
- requirements, methods and procedures for weighing pigs
- types and methods of identifying pigs
- relevant work health and safety and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK204 Care for weaner pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for weaner pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare accommodation for	1.1 Clean, disinfect and prepare appropriate accommodation for all classes of weaned pigs according to enterprise procedures and

Element	Performance criteria
weaners	instructions 1.2 Check and adjust housing environment and conditions as required to ensure appropriate ventilation, temperature and humidity 1.3 Fill or prepare feeders and drinkers according to supervisor's instructions 1.4 Identify problems with accommodation or environmental controls and report to the supervisor for appropriate action 1.5 Conduct all work according to enterprise requirements, work health and safety, biosecurity, animal welfare and industry regulations
2. Carry out weaner pig operations	2.1 Group pigs from different litters to form viable groups based on body weight and sex at stocking densities to achieve optimal productivity 2.2 Monitor behaviour, health and condition of weaners regularly and take appropriate actions 2.3 Provide weaners with water and appropriate feed according to the established feed schedule to meet nutritional and growth requirements 2.4 Record or report weaner mortalities to the supervisor and remove deceased stock according to enterprise policy 2.5 Administer preventative treatments according to enterprise schedules and the supervisor's instructions
3. Transition weaners to grower facility	3.1 Identify pigs for transition to grower facilities 3.2 Separate pigs not fit to load and take appropriate actions according to company policy 3.3 Identify pigs that have been treated and record withholding periods (WHP) for grower facility 3.4 Complete documentation clearly, accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPRK204 Care for weaner pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare accommodation for weaners
- carry out weaner pig operations
- transition weaners to grower facility
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, characteristics, requirements and care of weaner pigs
- types, functions, characteristics, cleaning and maintenance of relevant pig accommodation and production installations and equipment, such as feeders and drinkers
- range, effects and impacts of ventilation, temperature, humidity and other environmental parameters on weaner pig health and welfare
- optimal range of values for ventilation, temperature, humidity and other environmental parameters for weaner pigs and methods for measuring these values
- requirements and components of enterprise work routines for weaner pigs
- techniques and methods for humane handling and restraint of pigs
- requirements, methods and procedures for weaning piglets
- requirements, methods and procedures for formation of viable weaner groups, and the impacts of a viable group on individual pig health and production
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour

- nutritional requirements and methods and procedures for feeding and watering weaner pigs
- criteria and methods of assessing optimal stocking densities of weaner pigs
- criteria for assessing suitability of weaner pigs for transition to grower facilities
- requirements, methods and procedures for removal and disposal of pig carcasses
- types, uses and procedures of relevant veterinary and preventive treatments of weaner pigs
- withholding periods of veterinary chemicals and medicines and rationale for withholding periods
- types, handling, use and disposal of cleaning agents and disinfectants, work health and safety and environmental practices for these chemicals
- types of documentation and records that are required for weaner pig operations
- relevant work health and safety and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK302 Treat rectal prolapse in pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to treat rectal prolapse in pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Respond to signs of rectal prolapse	1.1 Recognise signs of rectal prolapse 1.2 Remove pig from pen

Element	Performance criteria
	1.3 Determine treatment based on severity of injury and animal's health and condition 1.4 Seek supervisor's, veterinary or other expert advice where required 1.5 Prepare work site, required resources and materials for treatment 1.6 Isolate pig in hospital pen where required 1.7 Follow enterprise animal welfare and biosecurity policies 1.8 Recognise outbreaks of rectal prolapse in a herd and notify management
2. Treat rectal prolapse	2.1 Select, use and maintain appropriate personal protective equipment 2.2 Apply knowledge of relevant animal anatomy and physiology 2.3 Clean prolapses appropriately 2.4 Treat as prescribed by veterinary advice 2.5 Recognise and treat rectal strictures where appropriate 2.6 Administer antibiotics to pigs with rectal prolapse where required
3. Report and reduce incidence of rectal prolapse	3.1 Report incidents and treatments to supervisor or management 3.2 Identify possible causes of prolapse 3.2 Implement changes to pig management to reduce incidence of rectal prolapse

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK302A Treat rectal prolapse in pigs.

Links

Assessment Requirements for AHCPRK302 Treat rectal prolapse in pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- respond to signs of rectal prolapse
- treat rectal prolapse
- report and reduce incidence of rectal prolapse
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- signs, causes, treatment, management and prevention of rectal prolapse
- anatomy and physiology of relevant organs and tissues
- techniques and methods for humane handling and restraint of pigs for rectal prolapse
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour
- work site requirements, resources and materials for treatment of rectal prolapse
- characteristics, signs, management and control of rectal prolapse outbreaks
- relevant work health and safety requirements for treatment of rectal prolapse
- signs, causes, treatment, management and prevention of rectal strictures
- requirements, functions and procedures for setting up hospital pens
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK305 Care for grower and finisher pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for grower pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare accommodation for	1.1 Clean and prepare accommodation for new grower stock according to enterprise procedures

Element	Performance criteria
growers	1.2 Follow enterprise work health and safety policies 1.3 Control and monitor environment in line with established enterprise biosecurity and environmental policies 1.4 Fill or prepare feeders and drinkers according to instructions 1.5 Identify problems with accommodation and/or environmental controls and report to supervisor for appropriate action
2. Carry out grower and finisher pig operations	2.1 Monitor pig condition and health regularly as an integral part of daily routines 2.2 Check feeders and drinkers regularly as part of daily routines 2.3 Move pig groups as required in line with growth, condition and stocking density 2.4 Remove poor performing pigs from groups and reassign in line with enterprise policy 2.5 Isolate sick, injured or unhealthy pigs in a quarantine area or identify for euthanasia according to enterprise animal welfare policies 2.6 Apply health treatments when required and according to supervisor's instructions and enterprise policy 2.7 Record or report grower mortalities to the supervisor and remove deceased stock according to enterprise policy.
3. Identify and select sale pigs	3.1 Identify pig according to enterprise market requirements 3.2 Assess pigs for transportation prior to loading 3.3 Complete or verify property banding for every sale animal 3.4 Separate pigs not fit to load and take appropriate action according to enterprise policy 3.5 Complete pig pass and other documentation for accurately and consistently

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPRK305 Care for grower and finisher pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare accommodation for growers
- carry out grower and finisher pig operations
- identify and select sale pigs
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, characteristics, requirements and care of grower and finisher pigs
- types, functions, characteristics, cleaning and maintenance of relevant pig accommodation and production installations and equipment, such as feeders and drinkers
- range, effects and impacts of ventilation, temperature, humidity and other environmental parameters on grower pig health and welfare
- optimal range of values for ventilation, temperature, humidity and other environmental parameters for grower pigs and methods for measuring these values
- requirements and components of enterprise work routines for grower pigs
- techniques and methods for humane handling and restraint of pigs
- requirements, methods and procedures for formation of viable grower groups, and the impacts of a viable group on individual pig health and production
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour

- nutritional requirements and methods and procedures for feeding and watering grower pigs
- criteria and methods of assessing optimal stocking densities of grower pigs
- requirements, methods and procedures for removal and disposal of pig carcasses
- types, uses and procedures of relevant veterinary and preventive treatments of grower pigs
- types, handling, use and disposal of cleaning agents and disinfectants, work health and safety and environmental practices for these chemicals
- types of documentation and records that are required
- criteria, methods and procedures for assessing suitability of pigs for transport and loading
- features and requirements of property banding and PigPass
- relevant work health and safety and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK306 Monitor and maintain outdoor pig production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and maintain outdoor pig production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work in the production area	1.1 Confirm work to be undertaken from work program where necessary, and clarify with supervisor if required

Element	Performance criteria
	<p>1.2 Identify work health and safety hazards, assess risks and implement suitable controls</p> <p>1.3 Select and use suitable personal protective equipment</p> <p>1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken</p> <p>1.5 Communicate the personal protective equipment and other safety requirements to staff and contractors, and obtain confirmation of understanding</p> <p>1.6 Monitor weather and carry out preparations or adjustments to work program as required</p>
2. Coordinate work activities and monitor progress	<p>2.1 Communicate the work required to staff and contractors clearly and unambiguously following the production plan and program</p> <p>2.2 Meet work schedules, plans and priorities according to the needs of the organisation or situation</p> <p>2.3 Ensure the allocation of work optimises resources and the existing competencies of staff</p> <p>2.4 Communicate with operational staff and any contractors regularly to ensure smooth operation and progress</p> <p>2.5 Provide feedback to staff and management on request, or as necessary</p>
3. Monitor pig health	<p>3.1 Observe pigs for signs of ill health, and record and report changes</p> <p>3.2 Observe and monitor pig behaviour, and record and report abnormalities</p> <p>3.3 Ensure that welfare and care needs of pigs are adequately provided</p> <p>3.4 Ensure that pigs have access to clean and adequate water supply</p> <p>3.5 Examine dead pigs for evidence of disease through post-mortem techniques in line with regulatory and industry standards and veterinary advice</p> <p>3.6 Identify disease status of herd and request staff or veterinary assistance when required</p> <p>3.7 Check components of biosecurity procedures for compliance</p>
4. Monitor pig housing, sheds, shelters and infrastructure	<p>4.1 Monitor outdoor pig housing, sheds or shelters for wear and tear, and carry out maintenance and repair as required</p> <p>4.2 Monitor outdoor facilities and infrastructure such as fencing, feeders and drinkers, and carry out maintenance or repair as required</p>
5. Monitor effluent and waste removal, storage and treatment	<p>5.1 Remove manure and litter if required, and store or treat appropriately</p> <p>5.2 Remove, store and treat liquid effluent appropriately and as</p>

Element	Performance criteria
	<p>required</p> <p>5.3 Check that manure and effluent storage and treatment systems are operated according to the production program and manufacturer's instructions</p> <p>5.4 Ensure that all waste and used consumables are removed from production site and disposed of in line with enterprise environmental policies</p> <p>5.6 Ensure work, health and safety requirements are being observed and followed</p>
6. Monitor and maintain production environment	<p>6.1 Identify and monitor production environment components</p> <p>6.2 Observe production environment for signs of deterioration, and record and report to management</p> <p>6.3 Monitor nutrient, soil and water conditions of production environment, report and carry out maintenance as required</p> <p>6.4 Coordinate or carry out maintenance of production environment as required.</p>
7. Complete records and documentation	<p>7.1 Collate information gathered throughout production operations</p> <p>7.2 Document collated information where required, and prepare for reporting to supervisor or manager</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPRK306 Monitor and maintain outdoor pig production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for work in the production area
- coordinate work activities
- monitor daily operations
- monitor herd health
- monitor production environment
- complete records and documentation
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation, codes of practice, industry standards and guidelines for outdoor pig production
- features and uses of enterprise production plans, enterprise work programs, environmental management plan and nutrient management plan
- requirements, maintenance, mitigation and protection measures for nutrients, soils, ground and surface water
- significance, effects and control measures for chemicals, gaseous emissions and odours that impact on the production environment and surrounding community
- relevant regulatory, industry and enterprise work health and safety requirements, codes of practice and standards

- use and maintenance of personal protective equipment
- types, functions, cleaning and maintenance of relevant tools and equipment
- types, requirements for and methods for determining allocation of enterprise resources
- strategies for communicating with and providing feedback to staff, contractors and management
- effects and impacts of weather elements on enterprise work programs and outdoor production environments, and preparations and adjustments to mitigate such impacts
- types, functions, characteristics, cleaning and maintenance of relevant outdoor pig housing and production installations and equipment, such as fencing, feeders and drinkers
- requirements, methods and procedures for manure and litter removal and treatment
- types, characteristics, functions, operation and maintenance of effluent storage and treatment systems
- requirements, methods and procedures for waste removal and disposal
- common diseases signs of health, signs of ill health, and methods for assessing individual pig and herd health and condition
- requirements, methods and procedures for conducting post mortem examination of pigs
- relevant regulatory, industry and enterprise biosecurity requirements, codes of practice and standards
- relevant regulatory, industry and enterprise environmental and sustainability requirements, codes of practice and standards
- criteria, methods and procedures for monitoring environmental health and condition
- relevant documentation, records and reports that are required
- relevant animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a feeding strategy for pig production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine feed rations and schedules	1.1 Determine feed quantities required from the production program 1.2 Use relevant laboratory results when determining quantities and

Element	Performance criteria
	ration formulation of stockfeed 1.3 Schedule and allocate responsibility for feeding in line with the production program and other operations in the facilities 1.4 Determine methods of providing feed to livestock
2. Manage storage of feed	2.1 Develop a plan for secure and hygienic storage of feed in line with enterprise biosecurity policies 2.2 Select storage location with safe access 2.3 Organise rotation and replenishment of feedstock supplies to ensure freshness 2.4 Formulate feeding plan to suit the needs of livestock, their nutritional requirements and the equipment available in the organisation 2.5 Collect and prepare samples of feed for testing according to the production program 2.6 Supervise calibration of measuring equipment and calculation of quantities regularly 2.7 Check that suitable personal protective equipment are appropriately used and maintained, and enterprise work health and safety policies are followed
3. Supervise feeding	3.1 Ensure that rations are supplied according to the production program and feeding plan. 3.2 Ensure continuous supplies of potable water are available to livestock 3.3 Monitor the health and condition of livestock and their production levels; and report any reaction or change to a change in feed types, ingredients or schedules 3.4 Provide advice to enterprise staff on the feeding of livestock when requested, or when the need arises 3.5 Remove and dispose of all waste and debris from the facilities appropriately in line with enterprise environmental policies 3.6 Complete required documentation and records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK401A Implement a feeding strategy for pig production.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPRK401 Implement a feeding strategy for pig production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine feed rations and schedules
- manage storage of feed
- supervise feeding
- implement work health and safety policies
- implement biosecurity policies
- implement animal welfare policies
- implement environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of nutrition, feeding strategies and feeding management of pigs
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of pigs
- types, forms and characteristics of pig feeds
- correlation and application of nutritional test results in formulating feeding strategies and feeding plans
- criteria, requirements, types of and principal considerations for feed storage
- features, criteria and requirements for formulating a feeding plan
- requirements, methods and procedures for collecting, preparing and transporting feed samples for testing
- types, calibration and use of measuring equipment
- relevant work health and safety requirements and selection, use and maintenance of personal protective equipment

- requirements, types and maintenance of potable water supplies to pigs
- signs of health, ill health, good condition and poor condition in livestock, and methods for assessing pig health and condition in relation to nutrition and feeding
- possible production changes in relation to changes in nutrition, feeds and feeding strategies
- types of and disposal methods for organic and non-organic waste
- relevant documentation and records that are required
- relevant animal welfare and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSAW503 Plan conservation earthworks

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to develop a conservation earthworks plan to control runoff to prevent soil erosion, safely store and distribute water, and rehabilitate eroded or disturbed areas.

The unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. This includes analysing, designing and communicating solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish client needs	1.1 Consult with landholder on proposed land use 1.2 Review and discuss the catchment characteristics for proposed land use 1.3 Explain to landholder impact of legislation and policies on project 1.4 Determine budget constraints for project

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Discuss possible strategies with landholder 1.6 Seek agreement for proposed land use and strategy from landholder according to workplace procedures
2. Develop the strategy to utilise earthworks	2.1 Check titles and maps to confirm property ownership 2.2 Determine profile of catchment from survey and aerial photographs 2.3 Develop earthworks concept consistent with industry principles and selection criteria 2.4 Establish final water disposal points according to proposed strategy 2.5 Survey location of proposed earthworks and structures on site, and discuss with landholder 2.6 Document preferred strategy for future reference
3. Prepare a detailed works plan	3.1 Assess and select earthworks, structures or measures according to proposed land use and industry standards 3.2 Cost project and develop schedule for plan 3.3 Communicate design of structures and specifications to qualified designer 3.4 Prepare and present a conservation earthworks plan and documentation according to workplace procedures and industry standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, evaluate and analyse ideas and information from land use documents, catchment characteristics, titles and maps to determine requirements and ensure compliance with legislation and industry standards
Writing	<ul style="list-style-type: none"> Demonstrate sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning in

Skill	Description
	<p>plans and strategies</p> <ul style="list-style-type: none"> Prepare documentation and specifications for plans and designs, expressing ideas, exploring complex design issues and constructing the documents accurately and succinctly to industry standards
Numeracy	<ul style="list-style-type: none"> Use highly developed numeracy skills to interpret complex design ideas, and perform calculations with precision and accuracy for inclusion in conservation earthworks plans

Assessment Requirements for AHCSAW503 Plan conservation earthworks

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced at least one plan of conservation earthworks that conforms with the following:

- meets client needs
- conforms to industry standards
- complies with legislation and policy requirements.

There must also be evidence that the individual has:

- consulted and negotiated with client for needs, agreements and approvals
- investigated site using:
 - surveys
 - aerial photographs
 - maps
- explained to landholder the impact of legislation and policies on project
- developed a strategy to protect natural areas and utilise earthworks according to industry principles and regulatory requirements
- prepared detailed project costing according to client budget
- prepared detailed works plans and communicated design requirements to designer.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental, planning, groundwater, heritage and cultural legislation, and the impact on development sites and conservation earthworks planning
- environmental, planning and earthwork construction standards and codes of practice relevant to planning conservation earthworks projects

- earthwork structures used for managing the movement of water
- principles of erosion control and design for conservation earthworks
- ecology protection and principles of rehabilitation on conservation sites
- soils and soil formation and the properties of soils for earthworks and erosion control
- determining levels and levelling on sites
- accessing plans and checking titles
- principles of earthmoving to manage water flow, and the equipment used to achieve it
- total catchment issues related to erosion and land degradation
- land use practices that contribute to erosion, and land development strategies to help mitigate erosion
- earthworks and erosion control and their potential impact on environment
- estimating and calculating peak water flows and methods to manage peak flows
- sub-surface and surface water interactions and the drainage principles and systems used in design
- simulation systems and techniques for demonstrating design outcomes and their limitations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a landholder site or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology with planning and design tools and resources
- specifications:
 - workplace policies, procedures and processes for planning and design
 - site land use, maps, plans and titles
 - legislation, regulations and industry codes of practice for addressing land degradation
- relationships:
 - landholder.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSHG201 Crutch sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to crutch a sheep.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crutching operations	1.1 Check crutching equipment for correct operation prior to commencing work 1.2 Identify potential and existing hazards in the workplace and

Element	Performance criteria
	report to the supervisor 1.3 Select, use and maintain suitable personal protective equipment and ensure correct fit 1.4 Identify, catch and move sheep to be crutched in line with work health and safety, industry and animal welfare standards 1.5 Position sheep for crutching
2. Perform crutching operations	2.1 Activate handpiece and position in readiness for crutching 2.2 Shear wool from face, crutch or belly as instructed 2.3 Use crutching methods to ensure that injury to the sheep and damage to the fleece is avoided 2.4 Use safe handling techniques at all times
3. Respond to complications	3.1 Identify contamination during crutching and report to wool handlers 3.2 Treat cuts as required 3.3 Identify and report flyblown sheep 3.4 Identify and report problem sheep
4. Complete crutching operations	4.1 Place wool appropriately to avoid contamination and for wool handlers to collect 4.2 Switch off handpiece and re-position to non-operational position 4.3 Release sheep safely from the board into the count out pens 4.4 Report crutching grievances and difficulties 4.5 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCSHG201 Crutch sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify potential and existing hazards to the supervisor
- select and use equipment and materials appropriate for crutching sheep
- avoid contamination, second cuts and damage to wool, animals and people
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain crutching equipment, site and facilities
- communicate problems, faults and workplace hazards to the owner or overseer
- tally crutched sheep count
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool.
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- personal protective clothing and equipment, and when and how it should be used

- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG203 Shear sheep to novice level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 40 adult merino sheep or 50 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- follow safe work practices
- select and use equipment and materials appropriate for shearing sheep
- load a handpiece correctly
- avoid contamination, second cuts
- shear sufficient sheep within eight hours to match novice skill level
- use appropriate suturing for cuts to sheep
- catch and release sheep safely
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards to the owner or overseer
- tally shorn sheep count
- apply work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing

- safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG204 Shear sheep to improve r level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, handle and shear sheep under supervision to improve r level.

Improver level is defined as shearing a minimum of 80 adult merino sheep or 100 adult crossbred sheep per day to industry standards.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad supervision and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- determine need for sharpening combs and cutters
- prepare grinder and pendulum for use
- carry out grinding to industry standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of combs and cutters
- terminology, techniques and procedures for grinding combs and cutters
- setting of, storage and caring for grinding papers
- tools and equipment used in grinding combs and cutters
- work health and safety legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG206 Prepare handpiece and downtube for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare handpieces and downtubes for machine shearing.

All work must be carried out to comply with workplace procedures, work health and safety, biosecurity requirements and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare combs and	1.1 Select combs and cutters to suit fleece type and shearing

Element	Performance criteria
cutters for shearing	conditions 1.2 Check combs and cutters for serviceability and prepare 1.3 Identify comb and cutter faults or malfunctions and report for repair or replacement 1.4 Clean combs and cutters prior to sharpening 1.5 Change combs and cutters during the shearing operations to suit shearing conditions 1.6 Identify potential and existing hazards and report to supervisor
2. Prepare handpiece for shearing	2.1 Secure comb and cutter for shearing 2.2 Lubricate handpiece prior to shearing 2.3 Adjust tension to suit shearing conditions and preference of the shearer 2.4 Check handpiece for serviceability and prepare 2.5 Identify handpiece faults or malfunctions and report for repair or replacement
3. Prepare downtube for shearing	3.1 Check downtube is checked for serviceability and prepare 3.2. Identify downtube faults or malfunctions and report for repair or replacement 3.3 Adjust safety clutch 3.4 Adjust downtube 3.5 Lubricate downtube prior to shearing

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG206A Prepare handpiece and downtube for machine shearing

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSHG206 Prepare handpiece and downtube for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- select and load comb and cutter for shearing
- prepare combs, cutters, handpieces and downtubes for shearing
- lubricate and maintain handpiece and downtube
- carry out minor maintenance and repairs
- recognise and clearly report any work health and safety hazards to the appropriate person

Knowledge Evidence

The candidate must demonstrate knowledge of:

- components of a shearing handpiece
- components of a downtube
- terminology for handpieces and downtubes
- maintenance and lubrication procedures for shearing equipment and handpieces
- types of combs and cutters to use under different conditions
- work health and safety legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG210 Undertake basic shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required for basic wool removal as part of a shearing and crutching operation.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Set-up shearing handpiece as directed	1.1 Identify potential and existing hazards in the workplace and report to supervisor

Element	Performance criteria
	1.2 Check shearing equipment for correct operation 1.3 Assemble comb and cutter on handpiece 1.4 Set lead and throw 1.5 Set tension to enable comb and cutter to cut wool cleanly with minimum friction 1.6 Lubricate working surfaces and moving parts
2. Follow health and fitness procedures	2.1 Prepare for exercises to warm-up the body 2.2 Perform back, shoulder, leg, arm, and abdomen stretches 2.3 Recognise the necessities of hydration, nutrition and rest periods 2.4 Select suitable personal protective equipment and ensure correct fit
3. Catch sheep for shearing	3.1 Catch and move sheep in line with organisational, work health and safety, industry and animal welfare standards 3.2 Move sheep from the catching pen to the shearing board using safe manual handling techniques 3.3 Position sheep for shearing and crutching
4. Remove wool	4.1 Activate handpiece and position in readiness for shearing and crutching operations 4.2 Shear and crutch section of sheep as directed 4.3 Release sheep safely from the board into the count-out pens

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG101A Undertake basic shearing and crutching

Assessment Requirements for AHCSHG210 Undertake basic shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safety directions
- select, prepare and use tools equipment and materials appropriate for shearing sheep work
- ensure health and fitness for shearing
- avoid contamination, second cuts and damage to wool, sheep and people
- catch and shear a sheep in line with organisational, animal welfare and work health safety standards
- demonstrate safe and responsible workplace practices
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing and crutching techniques, and positions and method of shearing
- features of safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe, humane removal of wool.
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep

- animal welfare requirements in relation to sheep
- personal protective clothing and equipment and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- work health and safety legislation and codes of practice apply to the job role
- animal welfare legislation and codes of practice apply to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG301 Prepare livestock for shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to sort and prepare livestock for shearing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Sort livestock for	1.1 Locate, identify and confirm livestock with as specified in

Element	Performance criteria
shearing	shearing plan 1.2 Muster livestock and move to shearing facilities, sort, count and yard livestock 1.3 Identify livestock with pigmented fleece and cull for separate shearing operations 1.4 Identify potential and existing hazards, assess risks and implement control measures in line with enterprise work health and safety policies 1.5 Select, use and maintain suitable personal protective equipment 1.6 Comply with animal welfare codes of practice
2. Prepare livestock for shearing	2.1 Check shearing, cleaning and drenching equipment for correct operation 2.2 Crutch livestock as required 2.3 Remove contaminated and stained wool and dispose of appropriately 2.4 Take livestock off feed to allow emptying out before shearing
3. Monitor livestock	3.1 Provide and maintain feed and water supplies for livestock 3.2 Provide and maintain suitable shelter for livestock 3.3 Monitor livestock condition and health status for evidence of sickness, and record or report as required 3.4 Monitor and control environmental implications associated with shearing activities 3.5 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG301A Prepare livestock for shearing

Assessment Requirements for AHCSHG301 Prepare livestock for shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed preparing livestock for shearing.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- select equipment appropriate to crutching and shearing tasks
- organise crutching and shearing operations
- muster, move, draft and handle livestock in compliance with animal welfare requirements
- observe and monitor livestock health and condition and detect disease or nutritional disorders and treat appropriately
- organise feed and water supplies
- avoid and remove contamination of fleece
- demonstrate safe and environmentally responsible workplace practices
- communicate verbally with work team and manager
- calculate livestock numbers, keep mobs separate
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types and purposes of shearing boards, yards and catching pens
- components and functions of shearing, cleaning and drenching equipment
- handling, mustering and movement techniques

- livestock breeds, nutritional and hygiene requirements
- possible fleece contaminants and types of pigmentation faults
- biosecurity legislation and codes of practice applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG304 Shear sheep to professional level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 120 adult merino sheep or 140 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- identify hazards and work safely
- avoid contamination, second cuts and injury to animals
- shear sufficient sheep within eight hours to match skill level of a professional shearer
- analyse and increase on improver shearer level
- shear with the industry accepted pattern
- use appropriate suturing for cuts to sheep
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- apply enterprise workplace health and safety policies in the context of own work
- apply enterprise biosecurity policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep

- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG305 Maintain consistent shearing performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed maintaining shearing control, coordination and rhythm over a working day.

The candidate must provide evidence that they can:

- identify hazards and implement risk controls
- maintain optimum shearing output by correct preparation and set up of equipment
- maintain application of improved techniques
- maintain speed and accuracy
- assess and monitor the shearing conditions and environment to maintain shearing performance
- maintain control, coordination, rhythm and output during shearing

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- aspects of safe handling techniques for catching, dragging, shearing and releasing sheep.
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool.
- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep

- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG306 Carry out post-shearing procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed caring for shorn livestock.

The candidate must provide evidence that they can:

- identify existing and potential hazards implement control measures
- relate weather conditions to livestock requirements
- prepare contingency plan and anticipate emergency action
- handle livestock with due care
- weigh livestock and assess condition
- observe and monitor livestock behaviour, health and condition
- read and interpret weather information
- provide feed and water based on livestock numbers
- rug animals where required
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare and biosecurity policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- impacts of adverse weather conditions on shorn livestock
- physiological conditions brought on by stress post shearing, and treatment of same
- types and constructs of livestock shelter
- livestock handling techniques in response to adverse weather
- condition scoring
- appropriate types of feed for stressed livestock

- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG402 Conduct equipment experting for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a comb for shearing, or experting the comb.

All work must be carried out to comply with workplace procedures and work health and safety policies.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Trim and finish combs	1.1 Identify signs of non-optimal equipment performance and remedy 1.2 Identify potential and existing work health and safety hazards and

Element	Performance criteria
	implement control measures 1.3 Confirm that the trim and finish meet the requirements of the current shearing task 1.4 Maintain control of comb and tools throughout the experting process 1.5 Adapt the comb in a form that meets individual shearing style
2. Scallop comb	2.1 Recognise and apply the principles and method of scalloping 2.2 Determine the interrelationship between correctly scalloped combs and shearing performance in terms of density of wool, time of year, and breed 2.3 Scallop combs to meet the shearing style of individual shearers

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG402A Conduct equipment experting for machine shearing

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSHG402 Conduct equipment experting for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed conducting equipment experting for machine shearing.

The candidate must provide evidence that they can:

- trim and finish combs
- scallop combs
- identify work health and safety hazards and implement safe work practice

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types of combs and cutters
- trimming and finishing techniques
- tools and equipment used in experting
- scalloping techniques
- the relationship of comb preparation to shearing performance.
- work health and safety legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG405 Arrange employment for shearing operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to arrange employment for shearing operations.

All work must be carried out to comply with workplace procedures and legislative requirements.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine staffing requirements	1.1 Assess the numbers and types of staff required for wool harvesting

Element	Performance criteria
	1.2 Prepare a list of duties for additional staff 1.3 Define the required capabilities of staff prior to selection
2. Seek applicants	2.1 Make informal enquiries and advertise vacancies 2.2 Follow up possible staff by telephone and in person
3. Select staff	3.1 Interview potential staff against selection criteria 3.2 Select staff with due regard to equal employment opportunity
4. Induct staff	4.1 Brief new staff on relevant awards, enterprise agreements, pay rates and related administration 4.2 Advise new staff of terms and conditions and sign on 4.3 Familiarise new staff with the workplace and colleagues 4.4 Outline work health and safety and animal welfare requirements in detail to staff

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCSHG405 Arrange employment for shearing operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine staff needs
- advertise vacancies and recruit staff
- select and induct staff into shearing team
- carry out induction processes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry awards and conditions
- duty statements for each category of wool harvesting staff
- interviewing techniques
- advertising mechanisms for staff vacancies
- telephone techniques
- equal employment opportunity legislation
- staff selection process
- induction procedures.
- work health and safety legislation and animal welfare legislation and codes of practice applying to the job roles

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWHS101 Work safely

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to work safely. It applies to new employees working under supervision, within established and well-known parameters and with limited autonomy.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify safety issues at work	1.1 Identify and explain employee and employer duty of care requirements

Element	Performance criteria
	1.2 Identify and explain own responsibilities to comply with safe work practices
2. Observe safe work practices	2.1 Read, follow and observe instructions, notices and workplace safety signs 2.2 Use protective clothing and equipment when completing work tasks 2.3 Check safety of machines, tools and equipment before use 2.4 Operate machines, tools and equipment safely 2.5 Use correct manual handling techniques
3. Participate in workplace safety meetings	3.1 Report work health and safety hazards to supervisor 3.2 Participate in workplace safety meetings
4. Follow incident and emergency response procedures	4.1 Follow workplace procedures for dealing with accidents, fire and emergencies 4.2 Follow enterprise procedures for the provision of first aid

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCOHS101A Work safely

Assessment Requirements for AHCWHS101 Work safely

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- comply with their responsibilities to work safely
- following workplace procedures for hazard identification
- read and follow safety warning signs, symbols and work instructions
- safely operate machines, tools and equipment
- report workplace safety hazards
- participate in workplace safety meetings
- follow enterprise incident and emergency response procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- employee and employer work health and safety duty of care responsibilities
- enterprise procedures relating to hazards, fires, emergencies, accidents and risk control
- hazards and risks in the industry sector
- relevant machinery and equipment operator manuals
- relevant work health and safety legislation, codes of practice and enterprise workplace policies
- work health and safety signs and symbols relevant to area of work

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWHS201 Participate in work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise and report hazards in the workplace. It also describes the skills and knowledge required to follow workplace safety procedures and directions.

This unit is applicable to supervised workers who are required to follow work health and safety policies and procedures.

All work must be carried out in accordance with enterprise procedures, recommended safe practices and the relevant legislation.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Follow workplace procedures for hazard identification and risk control	1.1 Recognise hazards in the workplace and report them to designated personnel 1.2 Assess risks associated with identified hazards 1.3 Follow workplace procedures and work instructions to control risks 1.4 Follow workplace procedures for dealing with accidents, fire and emergencies within the scope of responsibilities and competencies 1.5 Recognise risks to fellow workers, other people and animals and take action to eliminate or reduce them 1.6 Recognise and carry out employee responsibilities prescribed in work health and safety legislation 1.7 Undertake safety training as directed
2. Observe safe practices during work operations	2.1 Identify, use, maintain and store personal protective equipment (PPE) 2.2 Undertake safety checks on all machinery and equipment before operation 2.3 Identify and report hazards associated with handling hazardous substances and assess risk 2.4 Identify noise hazards, notify relevant personnel and assess associated risks 2.5 Assess risks associated with manual handling jobs prior to commencing activity or carrying out work 2.6 Access information on work health and safety as required
3. Participate in arrangements for maintaining the health and safety of all people in the workplace	3.1 Raise work health and safety issues with designated personnel 3.2 Make contributions to participative arrangements in the workplace within the scope of own responsibilities and competencies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCWHS301 Contribute to work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out enterprise work health and safety policies and procedures.

This unit is applicable to individuals. They typically work within clear reporting lines and procedures.

All work must be carried out to comply with workplace procedures and work health and safety and other relevant legislation and codes.

This unit applies to individuals who actively participate in the workplace safety system and work under broad direction and take responsibility for their own work. They work in a range of known contexts and complete routine activities.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply work health and safety policies and procedures	1.1 Make information regarding organisation work health and safety policies and procedures readily accessible to all employees 1.2 Identify and carry out employee responsibilities prescribed in work health and safety legislation, codes of practice and national standards 1.3 Identify and carry out employee responsibilities prescribed in enterprise work health and safety policies, including emergency procedures
2. Assist in workplace hazard identification and risk control	2.1 Provide and explain information regarding hazard identification and risk control regularly 2.2 Recognise hazards in the workplace and report them to designated personnel 2.3 Assess risks associated with identified hazards 2.4 Follow workplace procedures, safety signs and work instructions for controlling risks accurately 2.5 Recognise risks to fellow workers, other people and animals and take action to eliminate or reduce them 2.6 Undertake or provide safety training where required
3. Observe safe practices during work operations	3.1 Identify, use, maintain and store Personal Protective Equipment (PPE) required for work 3.2 Read and follow safety warning signs 3.3 Undertake basic safety checks on all machinery and equipment before operation 3.4 Identify hazards associated with handling hazardous substances, assess risks and implement risk controls in accordance with enterprise procedures and work health and safety requirements 3.5 Identify noise hazards, notify relevant personnel, assess associated risks and implement controls in accordance with work health and safety requirements 3.6 Assess manual handling risks prior to commencing activity and use safe lifting practices 3.7 Access information on work health and safety for specific work operations

Element	Performance criteria
4. Participate in arrangements for maintaining the health and safety of all people in the workplace	4.1 Contribute to ongoing monitoring and reporting of all aspects of workplace safety 4.2 Raise work health and safety issues with designated personnel in accordance with enterprise procedures and relevant work health and safety legislation 4.3 Make contributions to participative arrangements in the workplace within the scope of responsibilities and competencies 4.4 Make suggestions to assist the development of effective solutions and control the level of risk associated with enterprise activities

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide information about work health and safety	1.1 Explain, with accuracy and clarity, relevant provisions of work health and safety legislation and Codes of Practice to the work group 1.2 Provide information on enterprise work health and safety policies, procedures and programs in a readily accessible manner, and accurately and clearly explain the information to the work group 1.3 Regularly provide, and accurately and clearly explain, information about identified hazards, the outcomes of risk assessment and control procedures
2. Facilitate the participation of workers in work health and safety observance and decision-making	2.1 Implement and monitor enterprise procedures for consultation on work health and safety issues to ensure that all members of the work group have the opportunity to contribute 2.2 Describe, with clarity, procedures used by workers to report work health and safety hazards, assess risks, and take action to control risks, to the work group 2.3 Deal with and resolve issues raised through consultation or refer them to the appropriate personnel 2.4 Communicate, with promptness, the outcomes of consultation over work health and safety issues to the work group
3. Implement procedures for identifying hazards and assessing and controlling risks	3.1 Identify existing and potential hazards and report them to ensure the implementation of adequate risk assessment and effective control measures 3.2 Check that the work group implements procedures to control work health and safety risks and undertakes regular monitoring to ensure ongoing adherence and effectiveness of risk control 3.3 Identify inadequacies in existing risk control measures in accordance with the hierarchy of control and report inadequacies to designated personnel 3.4 Identify and report inadequacies in allocation of resources to management to ensure safe work practice 3.5 Monitor and regularly report existing risk control measures in accordance with workplace procedures
4. Implement workplace procedures for dealing with emergencies and hazardous events	4.1 Implement workplace procedures for dealing with work health and safety emergencies, where necessary, to ensure prompt and effective control action 4.2 Report work health and safety emergencies in accordance with established enterprise procedures 4.3 Implement control measures based on the hierarchy of control to

Element	Performance criteria
	prevent recurrence and minimise the risk of emergencies and hazardous events, or alternatively, refer measures to designated personnel for implementation
5. Implement and monitor enterprise procedures for providing work health and safety training	5.1 Identify work health and safety induction and training needs accurately, specifying the gaps between the required work health and safety competencies and those held by the work group 5.2 Make arrangements for meeting identified work health and safety training needs in both on and off-the-job training programs in consultation with relevant parties
6. Implement and monitor enterprise procedures for maintaining work health and safety records	6.1 Accurately and legibly complete work health and safety records for work area 6.2 Use aggregate information from work health and safety records to identify hazards and monitor risk control procedures within the work area in accordance with own responsibilities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWHS401 Maintain work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- facilitate the participation of workers in work health and safety observance and decision-making
- establish procedures to document the identification of hazards and assessment of risk covering the operations of the enterprise
- identify work health and safety hazards and conducting the risk assessment process
- implement enterprise emergency procedures and organise safety drills
- provide staff with work health and safety training in risk assessment, and other areas nominated by risk controls
- respond to emergencies and work health and safety issues in an appropriate and timely manner
- facilitate meetings and document actions to consider work health and safety issues in the workplace
- distribute information concerning work health and safety processes and requirements to staff
- maintain work health and safety records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hazards in the workplace
- relevant work health and safety legislation and Codes of Practice
- hazard identification and risk control processes
- the hierarchy of work health and safety risk control and its implementation for hazards in land-based industries

- work health and safety training
- communication and engagement strategies with workers
- relevant enterprise management systems and procedures
- accident and incident investigation
- enterprise emergency procedures
- participative work practices

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL101 Support woolshed activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support to others during shearing and wool preparation operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for	1.1 Identify the required materials, tools and equipment from provided lists and supervisor's instructions

Element	Performance criteria
woolshed activities	1.2 Check all materials, tools and equipment and inform supervisor if there are insufficient or faulty items 1.3 Use techniques when loading and unloading materials that demonstrate correct manual handling and minimise damage to the load and the vehicle 1.4 Select and use suitable personal protective equipment 1.5 Identify work health and safety hazards and inform supervisor
2. Undertake woolshed activities as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Undertake work in a safe and environmentally appropriate manner 2.3 Carry out interactions with other workers and owners and classers in a positive and professional manner 2.4 Move animals humanely into pens as directed 2.5 Undertake board duties as directed 2.6 Provide support to shearing as directed 2.7 Provide support to wool sorting, replacing butts and wool pressing as directed 2.8 Inform supervisor if there are problems or difficulties in completing work to required standards or timelines
3. Handle materials and equipment	3.1 Store waste material produced during woolshed activities in a designated area as directed by supervisor 3.2 Handle and transport materials, equipment and machinery as instructed 3.3 Maintain a clean and safe work site while completing woolshed activities
4. Clean up on completion of woolshed activities	4.1 Return materials are returned to store or dispose of appropriately 4.2 Clean, store and maintain tools and equipment 4.3 Inform supervisor of the work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWOL101 Support woolshed activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use safe work procedures
- prepare materials, tools and equipment for woolshed activities
- provide support to shearing and crutching
- move and pen animals
- assist with wool handling
- undertake woolshed activities as directed
- handle materials and equipment
- clean up on completion of woolshed activities
- communicate with supervisor and team members using industry standard terminology
- apply work health and safety procedures in the context of own work
- apply enterprise animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of safe work practices
- characteristics of wool types and sheep breeds that relate to sorting wool
- features of shearing and wool preparation tools and equipment
- basic wool handling practices
- relevant sections of federal, state and territory industrial awards that relate to working conditions in the woolshed
- enterprise work health and safety, environmental protection and animal welfare policies and procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide continuous supply of sheep to	1.1 Identify work health and safety hazards and report to the

Element	Performance criteria
shearers	supervisor 1.2 Select and use suitable personal protective equipment 1.3 Apply animal welfare principles to the movement and penning of sheep 1.4 Pen sheep in their separate mobs as instructed 1.5 Secure gates to prevent sheep escaping on to the board 1.6 Monitor the speed of shearers and arrange numbers of sheep in catching pens so that shearers all complete shearing at or near mob cutout 1.7 Monitor sheep numbers in catching pens and fill pens as they empty to ensure continuous supply to shearers 1.8 Refill other pens as required
2. Keep mobs separate	2.1 Secure gates to prevent mixing of mobs 2.2 Fill pens with sheep from only one mob at any given time to avoid mixing mobs and wool types 2.3 Inform supervisor of mob cutout 2.4 Move sheep to other catching pens to ensure that mob cutout is simultaneous 2.5 Use safe workplace practices and observe animal welfare requirements with regard to livestock handling
3. Prevent contamination of wool	3.1 Arrange pen density at optimum numbers 3.2 Monitor pens to maintain sheep in standing position to avoid crushing, trampling or soiling of wool 3.3 Minimise and remove potential contaminants within pens 3.4 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL201A Pen sheep

Assessment Requirements for AHCWOL201 Pen sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards minimise risks and use safe work procedures
- accept and interpret advice from the shed supervisor
- observe differences between mobs of sheep
- monitor shearers workflow and estimate rates for refilling the catching pens and for mob cutout
- move sheep in a shed and pen them up
- use the accepted communications signals in the shed when shearing and sheep movement is in full force
- apply work health and safety in the context of own work
- follow enterprise biosecurity policies where required
- apply animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- types of gates and catches in shearing sheds
- safe handling techniques for catching, dragging, and releasing sheep
- animal welfare requirements in relation to sheep
- features of sheep behaviour in the shearing sheds and yards
- hazards associated with handling livestock
- safety features of personal protective equipment and clothing, and when and how it should be used
- relevant industry awards and conditions that relate to working conditions in the wool industry

- relevant sections of State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, and biosecurity as applied to working in the wool industry

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCWOL202 Perform board duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle wool from the board, throw fleeces and place wool into bins or press as directed.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Remove contamination	1.1 Identify work health and safety hazards and report to the

Element	Performance criteria
from the fleece	supervisor 1.2 Select and use suitable personal protective equipment 1.3 Remove stained wool, black/coloured wool and contamination on the shearing board as instructed 1.4 Apply safe working practices and using the available safety equipment
2. Remove fleeces and component parts from the shearing board	2.1 Pick wool up after the shearing handpiece has been disengaged and not before 2.2 Identify wet wool and remove for drying 2.3 Pick belly wool up and remove stained wool 2.4 Remove crutch wool and reposition the hind leg if necessary 2.5 Arrange the hind legs of the fleece to allow for the fleece to be picked up efficiently 2.6 Pick fleece up in a controlled bundle and remove from shearing stand as soon as sheep is shorn 2.7 Carry fleece to the wool table and throw to land flat and spread out ready for skirting 2.8 Collect loose wool remaining in the let-out chute 2.9 Place all wool removed from the fleece and from the shearing board in the correct bins or on the correct table
3. Handle non-fleece wool	3.1 Sweep up locks and place in correct bins 3.2 Separate board and table locks where directed 3.3 Remove shanks and jowls if directed and placed in appropriate bin 3.4 Remove pizzle stain from bellies and place in stains line 3.5 Remove brisket wool if directed by the wool classer 3.6 Sweep crutchings clear of the board, remove stain and dags and place in appropriate bins 3.7 Carry lambs wool and prematurely shorn wools to the wool table using boards or paddles, if required 3.8 Place lambs wool on tables for sorting
4. Skirt fleeces under supervision	4.1 Seek information on wool classer requirements for mob 4.2 Remove ribs and sweats and place in appropriate bins 4.3 Remove short crutch wool and wiggings and place with locks 4.4 Remove wool carrying vegetable matter under wool classer supervision 4.5 Seek feedback on accuracy of skirting and fleece to skirtings ratio 4.6 Assist wool classer or wool roller in separating fleece wool, which has been identified as defective or lacking uniformity

Element	Performance criteria
5. Sweep the board and wool room	5.1 Sweep shearing boards, wool room and area beneath the wool table regularly and when necessary during the shearing operation 5.2 Keep the shearing boards and the wool room free of potential contamination 5.3 Remove waste and place appropriately in full consideration of environmental implications
6. Empty bins and other wool containers	6.1 Empty bins and other wool containers as necessary, and replace as directed
7. Perform cut-out duties	7.1 Empty all butts and bins and press wool 7.2 Stack bales 7.3 Sweep wool working area 7.4 Store equipment 7.5 Wash board down and disinfect

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL202 Perform board duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely onto wool table
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stains
- use correct technique for skirting and rolling fleece
- check quantities in bins
- sweep floors and remove contamination
- work rapidly within specified timeframes
- communicate with supervisor, the wool classer and the shearers
- apply work health and safety practices in the context of own work
- apply enterprise environmental sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of a fleece
- types of shearing shed layouts
- duties and responsibilities of a board person
- types and sources of contamination of the fleece and be able to explain the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to the preparation of skirtings and oddments

- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Assessment Requirements for AHCWOL203 Carry out wool pressing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and report on work health and safety hazards and risks
- apply standard operating procedures for the press and equipment
- operate different types of wool presses under supervision
- operate the various types of scales and manual handling devices and supervision
- maintain uniform bale weights for each line
- brand bales clearly and accurately
- handle and stack wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer/supervisor
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of the fleece
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- methods of handling fleece and bales that minimise risk to own health, including safe lifting and bending techniques
- features of industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding
- features of the recording system for bale details in use in the organisation

- enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCWOL301 Appraise wool using industry descriptions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to appraise wool by applying the industry description system (AWEX-ID) to classed lines of wool.

All work is carried out to industry standards using the AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID) and Code of Practice for the Preparation of Australian Wool Clips.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source and prepare information on wool to	1.1 Identify and access sources of information on wool appraisal

Element	Performance criteria
be appraised	1.2 Describe the features of AWEX - ID the system for the appraisal and description of non-measured characteristics of greasy wool 1.3 Identify and classify the visual characteristics to be appraised using the relevant descriptors
2. Apply the industry description to lines in a clip	2.1 Check wool clip classing lines for compliance with the Code of Practice 2.2 Appraise wool clip classing lines and record the AWEX-ID 2.3 Evaluate the consistency of appraisal across a wool clip against appraisals for the clip in the sale catalogue
3. Use the industry description to establish a market value for lines made	3.1 Access market information 3.2 Identify premiums and discounts for wool characteristics 3.3 Determine a value for each line made
4. Review clip preparation strategies using an industry description	4.1 Check clip preparation strategies and revise using the AWEX-ID descriptors, and the market value applied to the lines made 4.2 Provide feedback on market information, the effect of management on the wool clip and possible future selection strategies to the woolgrower using the AWEX-ID descriptors applied to the lines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Wool appraised must include wool from Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL301A Appraise wool using industry descriptions

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL301 Appraise wool using industry descriptions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source and prepare information on wool to be appraised for industry description (AWEX-ID)
- apply an industry description (AWEX-ID) to lines in a clip and record appraisal result
- use an industry description (AWEX-ID) to establish a market value for lines made
- review clip preparation strategies using industry standard terminology to communicate feedback to the grower

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of Code of Practice for the Preparation of Australian Wool Clips
- features of AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID)
- features of the Australian Wool Exchange Wool Selling Rules
- interpretation of the wool sale catalogue
- interpretation of wool testing data
- relevant sources of wool sale lot information
- features of subjective assessment of style, colour, type of vegetable matter fault, degree of stain and faults, and defects.

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL303 Prepare wool based on its characteristics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare wool based on its characteristics.

All work must be carried out to comply with the requirements of Code of Practice for the Preparation of Australian Wool Clips, workplace procedures, work health and safety and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Separate wools with characteristics outside	1.1 Make assessment of sheep breed and wool type

Element	Performance criteria
the uniformity requirements of the Code of Practice.	1.2 Separate wools into different lines based on fibre diameter, length and strength, colour and character and handle and style 1.3 Check staple formation and tip 1.4 Separate pigmented wool and wool which includes medulated fibres
2. Separate wool showing faults that impact on processing or fabric quality.	2.1 Separate wool for dogginess that will impact on fabric quality 2.2 Separate cotted wool that will require extra processing 2.3 Identify and remove skin pieces 2.4 Check wool for dermatitis and kept separate 2.5 Identify and separate wool based on the level and type of vegetable matter contamination where it requires different processing 2.6 Identify mobs with high pigmented fibre risk and keep their wool completely separate from low risk wool 2.7 Identify wool from sheep with shedding characteristics and keep completely separate from non-shedding white woolled sheep, record risk of exposure to shedding breeds on the classer's report 2.8 Keep fleeces containing pigmented fibre in a white woolled flock separate 2.9 Keep wool containing stain separate
3. Recognise impurities of greasy wool and their effect on processing and yield.	3.1 Examine wool for natural impurities 3.2 Identify applied impurities and assess their effect on processing 3.3 Identify acquired impurities and assess their effect on processing and yield of clean fibre

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Preparation must include wool from Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL303A Prepare wool based on its characteristics

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCWOL303 Prepare wool based on its characteristics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess key wool characteristics
- identify and separate wool faults
- identify and separate wool with impurities
- separate wool that does not meet Code of Practice requirements for uniform, predictable low risk lines of wool
- identify and separate wool from shedding sheep breeds
- identify and separate wools with a high pigmented fibre risk

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics of the breeds of sheep
- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on processing and final wool product
- features of impurities in wool and explain their impact on processing and yield of clean fibre after processing
- types and sources of contamination and explain their impact on processing and final wool product
- features of the main wool faults and explain their impacts on processing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, stages of processing
- wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics

- requirements for handling shedding and pigmented fibres
- relevant aspects of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards that related to preparing wool.

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL304 Prepare fleece wool for classing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare fleece wool for classing to comply with the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction of the wool classer and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify characteristics	1.1 Identify characteristics of wool important in processing and assess

Element	Performance criteria
of greasy wool and relate to processor requirements	uniformity within the fleece 1.2 Determine the portion of fleece to be removed to ensure uniformity of the fleece with the other fleeces from the mob
2. Check fleeces for impurities	2.1 Identify natural impurities of the wool and determine the portion of fleece to be removed 2.2 Identify vegetable matter types and determine the portion of fleece to be removed 2.3 Identify mineral impurities and relate to yield potential and determine the portion of fleece to be removed 2.4 Identify and remove any contamination from the fleece 2.5 Check work regularly with the wool classer and adjust procedures if required
3. Check fleeces for presence of wool faults	3.1 Identify hairy breeches and cotted wool and determine the portion of fleece to be removed 3.2 Identify unscourable colour, water stain and dermatitis and handled as directed 3.3 Remove skin pieces and place where directed 3.4 Carry out work safely and at a rate appropriate to the enterprise
4. Skirt and roll fleeces	4.1 Skirt fleeces to remove those portions determined above that adversely affect the uniformity and value of the remaining fleece 4.2 Double skirt fleeces containing clumpy vegetable matter or prepared as directed 4.3 Assess necks and backs for soundness, dust and VM levels, and handled as directed 4.4 Roll fleeces and present to classer 4.5 Place skirtings in the nominated bins 4.6 Remove waste and dispose of appropriately taking into account environmental implications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Classing must include the preparation of Fine/Superfine Merino, Medium/Strong Merino and Crossbred fleece wools

Unit Mapping Information

This unit is equivalent to AHCWOL304A Prepare fleece wool for classing

Assessment Requirements for AHCWOL304 Prepare fleece wool for classing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess fleece characteristics and prepare fleeces as directed by wool classer
- assess levels of vegetable matter and other impurities
- accurately skirt fleeces at commercial pace
- roll fleeces in preparation for classing
- communicate with wool classer and other team members using industry standard terminology
- follow enterprise work health and safety procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics wool and their impacts on processing
- principles and requirements of wool processing methods-woollen and worsted
- features of wool growth
- features of the parts of a fleece
- features of wool faults and impurities
- enterprise the work health and safety procedures
- requirements of Code of Practice for the Preparation of Australian Wool Clips as they relates to the preparation of fleece wool

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWOL305 Prepare skirtings and oddments

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- accurately skirt fleeces at commercial rates
- recognise and remove contamination
- recognise wool faults
- identify impurities in wool
- identify and remove stain
- identify oddments
- prepare skirtings and oddments
- communicate with team members, wool classer and the shearer

Knowledge Evidence

The candidate must demonstrate knowledge of:

- processing methods - woollen and worsted and stages of processing
- features of wool growth, skin and fibre biology
- features of fleece parts, skirtings, locks, crutchings, wool faults, impurities, contamination and stain and their impact on processing
- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques
- requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to the preparation of skirtings and oddments

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs.

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Explain organisation requirements for clip	1.1 Explain the organisation's requirements for quality and standard of wool clip preparation to the wool handlers

Element	Performance criteria
preparation	1.2 Explain the organisation's procedures for operating safely and for the use of personal protective equipment to the wool handlers 1.3 Explain the impact of contamination in the wool to the wool handlers 1.4 Introduce or indicate the key personnel in the wool shed or room to the wool handlers 1.5 Allocate and explain responsibilities for specific functions or procedures are to wool handlers 1.6 Identify work health and safety hazards, assess risks and implement suitable controls 1.7 Confirm that all personal protective equipment and clothing is selected, used and maintained appropriately by wool handlers
2. Supervise shed hands	2.1 Monitor board persons performance including picking up and throwing fleece, sweeping board and preparing non fleece wools 2.2 Monitor wool handlers performance to ensure they follow the set procedures for each of the clip preparation tasks 2.3 Monitor penner up performance to ensure mobs are handled humanely in line with animal welfare policies and kept separate, and catching pens are monitored and filled as required 2.4 Monitor wool pressers' activities including keeping wool press area clean, pressing, branding, weighing and recording bale details in the wool book
3. Oversee preparation of wool	3.1 Supervise shed staff to maintain a clear board and ensure fleeces are thrown correctly 3.2 Supervise shed staff in the removal and preparation of fleece wool

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCWOL306A Supervise clip preparation

Assessment Requirements for AHCWOL306 Supervise clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- explain clip preparation requirements to shed staff and monitor their performance
- oversee shed staff to ensure quality clip preparation
- communicate preparation requirements with shed staff
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of fleece
- procedures for handling skirtings, bellies, lambs wool, premature shorn wool, locks and crutchings, and stained wool and oddments
- responsibilities of board and table staff
- characteristics of different wool types and parts of the fleece
- premiums and discounts for wool characteristics
- pressing and branding requirements
- skirting technique and appropriate skirting ratios for different clip types
- personal protective clothing and equipment requirements for shed staff
- on job training techniques
- principles of staff supervision
- requirements of work health and safety legislation and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL307 Document a wool clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare the documentation for a wool clip to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise.

It includes instructing others in the use of the system, maintaining the records and advising the owner or manager of issues where appropriate.

The documentation of a wool clip contributes to the wool harvesting operation by optimising efficiency for the grower.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish recording system and documentation	1.1 Select documentation that complies with the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise 1.2 Establish guidelines for the use of the recording system including the type, frequency and format of recording 1.3 Inform those who are to use the recording system of their obligations and any specific instructions that are necessary 1.4 Check documentation regularly to confirm that it is accurately completed and updated at the proper times
2. Complete records for wool classing	2.1 Complete documents and records required by the organisation and the market 2.2 Complete wool clip specification prior to consignment, to ensure that the correct lotting advice is provided to the selling broker or buyer 2.3 Make any additional notes or give advice necessary on the documents so that they are clearly understood 2.4 Obtain all signatures and registrations that are required and include on documentation 2.5 Prepare wages statements for contractors according to the agreements reached in employment conditions
3. Provide information and advice to the woolgrower	3.1 Make suggestions for improved safety and fleece quality that are derived from observations, smoothness of workflow, and discussions with operators within the wool shed 3.2 Communicate the wool clip specification to the appropriate authority at shed cutout

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCWOL307 Document a wool clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop the recording system for wool clips and bales
- communicate recording requirements clearly to wool handlers and pressers
- prepare and maintain records as required by the Code of Practice for the Preparation of Australian Wool Clips, legislation or enterprise
- observe, identify and react appropriately to work health and safety hazards
- observe the work and identify areas of the work or the facilities that could be improved
- communicate information and advice to the woolgrower on improvements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- features of quality assurance schemes used in the organisation and in the industry, and their documentation requirements
- requirements for the completion of a clip specification
- employment conditions and agreements for a range of workers in a wool harvesting and preparation team
- documentation requirements for wool clip preparation and shearing operations

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Assessment Requirements for AHCWOL308 Prepare facilities for shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- maintain contamination and hazard-free environment for shearing and wool handling
- recognise and remedy health and safety hazards
- carry out minor maintenance and repairs to equipment and facilities
- disposal of waste in an environmentally responsible manner
- pen sheep humanely in line with enterprise animal welfare policies
- communicate with shed staff and direct operations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- sources and types of contamination
- principles of moving and penning animals
- shearing requirements
- features of efficient shed and board layouts
- requirements of work health and safety legislation and animal welfare codes of practice as they relate to the shearing and wool preparation sector

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL310 Press wool for a clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to press wool into bales and carry out related tasks such as branding the bales, recording bale weights and numbers, and subsequently storing the wool bales.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to wool pressers who work in close cooperation with the wool classer and maintain a rate of pressing that ensures wool flow can be maintained. The work is carried out within established routines, methods and procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for wool pressing	1.1 Identify the lines of wool and confirm with the wool classer 1.2 Check the wool press for safe operation, and lubricate and maintain it as required 1.3 Inspect the work area to confirm it is free of all contaminants in readiness for pressing 1.4 Confirm that supplies of wool packs, bale fasteners and hooks, stencils and bale-branding inks are located in appropriate place 1.5 Identify the appropriate recording system 1.6 Check the scales to be used for accuracy and calibrate if necessary 1.7 Check the press and its location for safety 1.8 Identify any defective equipment and report to the appropriate person
2. Press wool	2.1 Consult the wool classer to determine mob cut-outs and pressing requirements 2.2 Apply safe work practices at all times and use available safety equipment in line with work health and safety policies 2.3 Remove contamination from the woolpack and place in the appropriate location 2.4 Check woolpacks for conformity 2.5 Seek directions for order of pressing and any special requirements from the wool classer 2.6 Place all wool correctly and evenly in the press to produce even density bales
3. Carry out the role and responsibilities of the wool presser	3.1 Press bales to optimal weights to reduce selling costs and within specified weight and length dimensions in compliance with Code of Practice 3.2 Press lines to avoid mixed bales 3.3 Monitor wool flow and build-up in bins 3.4 Maintain work area in a condition that avoids contamination of wool 3.5 Carry out pressing within time restrictions and workflow of the wool room
4. Close and store bales	4.1 Use approved bale dividers as instructed, and fasten flaps correctly 4.2 Identify bales for branding before removing them from the press 4.3 Store bales safely, avoiding injury to presser, risk to other workers, and damage to bales and equipment 4.4 Store bales to maximise shed space and to avoid weather damage
5. Complete recording	5.1 Brand bales appropriately

Element	Performance criteria
requirements	5.2 Weigh bales appropriately 5.3 Record bale weights, numbers and descriptions clearly using the appropriate recording system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWOL310 Press wool for a clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- operate different types of wool presses and carry out basic lubrication and maintenance according to manufacturer instructions
- operate the various types of scales and manual handling devices
- check woolpacks and wool to ensure freedom from contamination
- assess and monitor wool-flow and build-up in bins
- maintain uniform bale weights for each line
- brand bales clearly and accurately to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips
- handle and store wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer
- work safely in compliance with enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of wool
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- operating requirements for different types of wool presses
- methods of handling wool and bales that minimise risk to own health, including safe lifting and bending techniques
- industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding

- features of the recording system for bale details in use in the organisation
- enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL311 Perform shed duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform shed duties covering the board and table and to provide mentoring to less experienced staff.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Perform board duties	1.1 Remove stained wool, black wool, and contamination on the shearing board

Element	Performance criteria
	<p>1.2 Pick up belly wool and remove stained wool</p> <p>1.3 Remove crutch wool and reposition the hind leg if necessary</p> <p>1.4 Pick up fleece and throw or park and retrieve later if wool table is not clear</p> <p>1.5 Monitor removal of wool and maintenance of the board and provide extra support when needed</p> <p>1.6 Provide mentoring and demonstration of work skills to inexperienced board staff as required</p> <p>1.7 Apply safe work practices at all times and use available safety equipment</p> <p>1.8 Comply with enterprise animal welfare and biosecurity policies and procedures</p>
2. Prepare wool	<p>2.1 Sweep up locks and keep board and table locks separate where directed</p> <p>2.2 Remove shanks and jowls if directed and place in correct bin</p> <p>2.3 Remove pizzle stain from bellies and placed in stains line</p> <p>2.4 Remove brisket wool if directed by the wool classer</p> <p>2.5 Sweep crutchings clear of the board, remove stain and dags and place in correct bins</p> <p>2.6 Carry lambs wool and prematurely shorn wools to the wool table using boards or paddles if required</p> <p>2.7 Provide mentoring and support in wool handling to inexperienced staff as part of the work team role</p>
3. Skirt fleeces	<p>3.1 Seek information on wool classer requirements for mob</p> <p>3.2 Remove fribs and sweats and place in appropriate bins</p> <p>3.3 Remove short crutch wool and wiggings and place with locks</p> <p>3.4 Remove wool carrying clumpy vegetable matter if directed by the wool classer</p> <p>3.5 Seek feedback on accuracy of skirting and fleece to skirtings ratio</p> <p>3.6 Remove fleece wool which is defective or lacks uniformity if directed by the wool classer</p>
4. Maintain wool flow and minimise contamination risk	<p>4.1 Sweep the immediate shearing area after each sheep is shorn</p> <p>4.2 Sweep shearing boards, wool room, and area beneath the wool table as regularly as necessary during the shearing operation</p> <p>4.3 Keep the shearing boards and the wool room free of potential contamination</p> <p>4.4 Remove waste and place appropriately in full consideration of environmental implications</p> <p>4.5 Minimise the risk of mixing wool between lines through regular sweeping and maintenance of bins, other containers and the wool</p>

Element	Performance criteria
	area 4.6 Complete all tasks and cover contingencies through a professional, team-based approach
5. Carry out tasks to support the shearing operation	5.1 Observe the rate of shearing and estimate the frequency of refilling the catching pens and for mob cutout 5.2 Keep different mobs of sheep separate 5.3 Implement directions from the wool classer and provide feedback on sheep supply and wool flow 5.4 Empty all butts and bins and press wool 5.5 Store bales as directed 5.6 Sweep wool working area clean 5.7 Store equipment at the end of shearing 5.8 Wash board down and disinfect after shearing cutout

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCWOL311 Perform shed duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stain
- use correct technique for skirting and rolling fleece
- sweep floors and remove contamination
- work rapidly within specified timeframes
- interpret verbal and visual communication signals within the wool shed given by the supervisor, the wool classer and the shearers
- monitor sheep supply in pens and fill as necessary
- monitor wool flow and the wool working area to ensure risk of mixing between lines is minimised
- provide mentoring to less experienced staff
- deal with contingencies by supporting other staff in tasks as required
- observe and report on adverse environmental impacts
- apply work health and safety requirements in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- types of contamination and their sources
- properties of the parts of a fleece

- principles of moving and penning animals
- shearing requirements
- shearing shed and board layouts
- environmental codes of practice with regard to shearing
- relevant work health and safety and animal welfare legislation, codes of practice and enterprise requirements that apply to wool harvesting and pressing

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWOL401 Determine wool classing strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a classing strategy based on owners enterprise goals, research of past performance of the clip, current management, growing season, market and processor requirements which conforms with the Code of Practice for the Preparation of Australian Wool Clips
- establish and maintain consistent methods of clip preparation
- analyse classed clips and test alternative classing strategies for profitability
- review classing strategies based on broker and buyer feedback
- adapt classing strategies for buyer requirements, marketing systems and owner manager
- value lines of wool using industry descriptions and test results
- incorporate review of classing strategies into instructions for shed staff
- discuss clip test results, prices and alternative classing strategies with owner/shed manager
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- provide feedback to grower/manager on performance of clip preparation strategy adopted.
- communicate classing strategy to shed staff and owner/manager
- implement work health and safety policies and procedures into classing strategy
- implement animal welfare practices into classing strategy

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the industry description system (AWEX-ID)
- requirements of the organisation's wool marketing and production plans
- implications of wool testing, broking and export organisations on clip preparation

- clip preparation and analysis processes for the major wool types
- requirements and standards of the national wool processing industry
- methods used for processing wool and their impact on clip preparation and marketing
- marketing alternatives and their implications for classing
- wool brokering services
- features of efficient wool room layout
- sale catalogue and market reports
- specifications for classers
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Gather objectively measured data.	1.1 Arrange shed or wool room layout for efficient sampling operation where required 1.2 Identify potential and existing work health and safety hazards, assess risks and implement control measures 1.3 Collate available information 1.4 Assess tested sample to determine its appropriateness as a representative sample 1.5 Determine the requirements for additional information needed to validate measurements
2. Analyse collected data	2.1 Review and evaluate available data to determine possible lines 2.2 Make comparisons with previous measurements if available
3. Analyse market trends	3.1 Review information produced by industry to determine market trends 3.2 Evaluate the potential for movement in prices against available data 3.3 Determine the extent to which discounts are applied
4. Prepare wool to meet requirements of the market	4.1 Analyse the impact on the market of variable quantities 4.2 Use available information to prepare the wool to best advantage 4.3 Package wool in the most appropriate manner

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL402A Use individual fleece measurements to prepare wool for sale

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL402 Use individual fleece measurements to prepare wool for sale

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange shed or wool room layout for sampling efficient operation where required
- understand and interpret the individual fleece measurements
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips, or as required by the enterprise classing strategy and marketing plan
- communicate specific and detailed requirements for wool preparation and classing to wool handling staff
- identify wool of higher and lower market value and make lines which maximise return to woolgrower
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of wool room layouts which promote efficient wool flow and handling
- characteristics different breeds of sheep
- inherent wool characteristics , including fibre diameter, staple length and strength, colour, yield, VM type, curvature, comfort factor
- fleece measurement criteria - techniques used to measure wool characteristics
- interpretation of test results
- principles of classing , including mob/flock concept, variability for fibre diameter and staple length, soundness, defects
- classing scenarios requiring detail of clip break-ups
- clip analysis reports and comparisons

- clips and other relevant quality standards
- requirements of work health and safety legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL403 Plan, implement and review wool harvesting and clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare for, implement and review wool harvesting, clip preparation and classing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan and implement wool harvesting and preparation operations	1.1 Consult the flock owner or manager about their requirements and inform them of any planning issues taking into account weather and environmental issues 1.2 Determine the order of mobs for wool harvesting and preparation 1.3 Determine staffing needs by negotiation with owner or manager according to clip type, enterprise requirements, legislative requirements, employment agreements and awards 1.4 Allocate staff duties and give staff directions where necessary 1.5 Arrange the shed equipment and materials in line with shearing plan, work health and safety requirements and the quality management system 1.6 Implement the wool harvesting and preparation plan and adjust as required
2. Implement plan and monitor work flows	2.1 Monitor sheep numbers, mob cut outs and shearing speeds to match wool preparation capacity 2.2 Supervise shed staff to maintain a clear board and ensure fleeces are thrown correctly 2.3 Direct shed staff to use appropriate skirting strategies and monitor fleece to skirting ratios 2.4 Direct staff to close off bins and lines for mob cut outs 2.5 Manage wool harvesting and preparation team to comply with quality management system requirements 2.6 Monitor compliance with enterprise and legislative requirements including work health and safety, animal welfare, biosecurity, industrial, and environmental practices 2.7 Manage staff performance and provide direction where necessary
3. Supervise wool pressing	3.1 Instruct presser on pressing strategies to reduce mixed bales while meeting code of practice requirements for uniformity in bales 3.2 Inform presser of order for pressing and procedures to minimize contamination 3.3 Monitor rate of build up in lines by consulting with wool presser 3.4 Monitor bale weights to ensure efficiencies are achieved for the grower without creating overweight bales 3.5 Brand bales appropriately 3.6 Monitor wool book to ensure it is up to date, accurate and legible
4. Provide feedback to grower on classing strategies, clip performance and wool harvesting and preparation operations	4.1 Review staff performance in clip preparation 4.2 Provide feedback on classing strategies, clip preparation in relation to mob characteristics, skirting ratios, bale weights and any workflow issues 4.3 Provide feedback on possible improvements to wool handling

Element	Performance criteria
	facilities 4.4 Report on equipment effectiveness and maintenance requirements 4.5 Explain lines made and bale details in relation to mob characteristics 4.6 Provide feedback on lotting advice 4.7 Complete wool clip documentation and present to owner or manager for signature

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Unit is equivalent to AHCWOL403A Prepare for, implement and review wool harvesting, clip preparation and classing

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL403 Plan, implement and review wool harvesting and clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and implement wool harvesting and preparation operations
- organise and schedule staff and work tasks
- supervise staff and monitor productivity
- implement risk management strategies
- monitor environmental impacts and implement control measures
- implement relevant legislative requirements associated with the shearing industry including employment agreements and awards
- communicate using industry standard terminology written and oral information to team members and management
- review and evaluate operational performance and clip preparation standards
- provide feedback to grower on the shearing operation and the preparation and classing of the clip
- calculate resources and bale weights for mob cut outs
- implement and monitor work health and safety requirements for work team
- implement relevant enterprise biosecurity policies and procedures
- implement animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- supervisory procedures with regard to operations and personnel
- principles staff management including team building and conflict resolution
- wool industry codes of practice and quality systems

- industry requirements with regard to hygiene and safety for wool harvesting and preparation facilities and equipment
- how weather conditions can impact on wool harvesting programs
- features of workplace documentation required for wool harvesting and preparation
- employment agreements, industrial awards, relevant to the wool harvesting sector
- the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation, biosecurity and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL404 Establish work routines and manage wool harvesting and preparation staff

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish work routines and manage wool harvesting and preparation staff.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Define work roles for shed staff	1.1 Define the roles and responsibilities of shed staff 1.2 Identify the skills of shed staff and match with available tasks and duties 1.3 Identify the requirements of job duties and Code of Practice and communicate to shed staff 1.4 Explain work health and safety policy and procedures to staff and monitor implementation 1.5 Explain animal welfare and biosecurity policies to staff and monitor implementation
2. Induct shed staff	2.1 Identify work health and safety hazards, assess risks and implement suitable controls 2.2 Communicate the details of shearing, including flock and mob details to staff 2.3 Brief new staff on relevant awards, enterprise agreements, pay rates and related administration 2.4 Advise new staff of terms and conditions and sign on 2.5 Familiarise new staff with the workplace and colleagues 2.6 Explain the enterprise's environmental policy and procedures and monitor implementation
3. Support on-the-job training	3.1 Encourage individuals to self-evaluate performance and identify areas for improvement 3.2 Determine training needs through appraisal of staff and monitoring of work performance 3.3 Analyse practical skills and then explained and demonstrated as required 3.4 Provide workplace learning opportunities with coaching and mentoring to support learning 3.5 Adjust staff responsibilities to allow for practice and skills development where required
4. Performance manage shed staff	4.1 Establish performance standards for clip preparation and communicate to individuals and the team 4.2 Explain skirting requirements and monitor skirtings ratio 4.3 Describe the requirements for separating specific parts of the fleece to wool handlers using the Code of Practice and processor requirements 4.4 Use motivation strategies for shed staff to maintain a consistent focus on clip preparation standards and timing of operations
5. Maintain effective working relations with the team	5.1 Recognise problems and address through discussion with work group 5.2 Seek assistance from work group members when difficulties arise

Element	Performance criteria
	in achieving allocated tasks 5.3 Use discussion and information sharing to communicate requirements of work activities through a participative approach 5.4 Manage disagreements and conflicts constructively using appropriate conflict management strategies
6. Provide feedback to shed staff	6.1 Provide confirmatory feedback to emphasise good performance and technique and its importance for clip quality 6.2 Provide corrective feedback in a constructive way, including an explanation of the effects of poor performance or incorrect technique and strategies for improvement 6.3 Address under performance both on an individual and team basis 6.4 Use clip data to share feedback on clips prepared with team members

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCWOL404 Establish work routines and manage wool harvesting and preparation staff

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- identify staff training needs and provide on job training, mentoring and coaching as required
- implement effective time management
- use problem solving techniques to address staffing and resource issues motivate and performance manage work team
- manage conflicts within work team
- communicate with team members
- implement and monitor work health and safety policies and procedures
- implement enterprise biosecurity policies and procedures
- implement and monitor enterprise animal welfare policies and procedures
- implement enterprise environmental policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shearing industry awards, agreements and personnel processes
- principles of team work, negotiation and time management
- principles of workplace instruction/training and coaching techniques
- principles of conflict management
- features of effective communication for feedback and motivation
- principles of staff performance management

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL405 Class fleece wool

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to class fleece wool from merino and crossbred sheep into lines that meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

The unit applies to wool classers who class wool as a professional service after consultation with the grower or shed manager.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for wool classing	1.1 Arrange the layout of the shed, equipment and facilities according to the determined classing strategy for efficient wool flow, quality management and pressing 1.2 Identify potential and existing work health and safety hazards, assess risks and implement control measures 1.3 Place clearly labelled bins and containers in line with the classing strategy, quality management system and enterprise requirements 1.4 Establish and maintain sufficient staffing ratio
2. Carry out classing of fleece wool	2.1 Identify hazards, apply safe working practices and use available safety equipment 2.2 Handle and skirt fleece wool to the required standards 2.3 Check wool to ensure freedom from contamination and stain 2.4 Check wool to ensure adequate and optimum skirting 2.5 Assess pigmented fibre risk and keep wool separate as required 2.6 Identify wet wool, stained, cotted and coloured wool and keep separate 2.7 Appraise wool for its characteristics 2.8 Class wool to standards of the enterprise classing strategy, the Code of Practice and as required by alternative selling methods 2.9 Identify wool of higher and lower market value and processing requirements and make lines to maximise return to the wool owner
3. Place wool in bins for pressing	3.1 Place wool in the correct bins ready for pressing and ensure that cross contamination does not occur 3.2 Check wool flow into bins and communicate with wool presser

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Classing must include the classing of Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL405A Class fleece wool

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCWOL405 Class fleece wool

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work procedures
- arrange layout of bins and wool table for optimum efficient wool flow and pressing in a variety of sheds
- label bins and containers correctly
- monitor clip preparation and skirting
- assess pigmented fibre risk and separate wool as required
- identify and appraise wool characteristics
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips or as required by alternative selling methods
- identify wool of higher and lower market value and lines made which maximise return to grower.
- separate wools of different processing or end user requirements
- identify and keep separate wet wool, stained, cotted and coloured wool and contamination
- communicate with team members in completing tasks associated with classing fleece wool.
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shed layouts which promote safe, efficient wool flow and classing
- characteristics of the breeds of sheep
- types and sources of contamination
- impact of the wool production areas of Australia on clip characteristics

- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on classing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, and stages of processing
- effect of raw wool characteristics on wool processing and final product
- features of wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics
- requirements for handling shedding and pigmented fibres
- interpretation of test results, clip feedback and reports
- principles of classing (mob/flock concept, variability for fibre diameter and staple length, soundness, defects)
- documentation requirements for wool clips
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation in a wool preparation workplace

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWRK101 Maintain the workplace

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain a range of work areas.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and use tools, equipment and machinery	1.1 Identify required materials, tools and equipment according to lists provided and supervisor's instructions 1.2 Check all materials, tools and equipment and inform supervisor of

Element	Performance criteria
	insufficient or faulty items 1.3 Use correct manual handling techniques at all times 1.4 Use suitable personal protective equipment selected as directed by supervisor and ensure correct fit 1.5 Inform supervisor if any risks are identified 1.6 Clarify channels for communicating with workers
2. Maintain a clean and safe workplace	2.1 Locate services using site plans and clarify with the supervisor 2.2 Sweep, wash and treat floors, benches and other flat work surfaces to minimise nuisance level environmental disturbance 2.3 Store tools, equipment and materials not in use neatly and remove waste and used materials and place in disposal containers as instructed 2.4 Identify potential hazards, assess risks and implement control measures 2.5 Apply sustainability practices relative to workplace and activity
3. Maintain structures and workplace surroundings	3.1 Identify maintenance requirements of structures and workplace surroundings and clarify with supervisor 3.2 Maintain structures and workplace surroundings as instructed 3.3 Identify structural damage and deterioration in the workplace and inform supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK101A Maintain the workplace.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWRK101 Maintain the workplace

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels, site plan measurements and work health and safety symbols
- communicate effectively with team members and supervisor
- tally work hours, calibrating tools and equipment, measuring volumes to apply cleaning agents, measuring quantities of materials and estimating areas
- minimise noise, dust and water run-off to prevent nuisance-level environmental disturbance
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise standards for presentation of buildings, structures and surroundings
- the effect of outdoor climatic conditions (including rain, hail, extreme heat and wind, and very high ultraviolet radiation), which may prevent or impede maintenance activities, or influence the selection of tools, equipment and safety equipment to minimise the hazards presented
- the relationship between specific maintenance activities and the external environment, and reasons for procedures that help to minimise the impact that these activities may have on the environment
- workplace hazards and work health and safety symbols, signs and practices in the context of own work

- sustainability practices in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK201 Observe and report on weather

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe and contribute to positive environmental work practices.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Clarify work instructions with supervisor 1.2 Select and use tools and equipment and carry out pre-operational

Element	Performance criteria
	safety checks 1.3 Select and use personal protective equipment 1.4 Identify hazards and inform supervisor 1.5 Identify and action work health and safety policies and procedures and legislative requirements
2. Check weather and climate information	2.1 Check weather and climate information to determine likely conditions 2.2 Recognise changed weather and climate situations 2.3 Anticipate likely impact of changes in weather and climate in respect to work tasks, safety of others, property, natural resources and local environment 2.4 Report anticipated impact of weather and climate to supervisor
3. Carry out preventative action	3.1 Disseminate information and advice to relevant personnel 3.2 Determine the preventative action required according to the known effects on livestock, crops and work tasks 3.3 Implement actions to minimise loss and damage 3.4 Adjust livestock, horticultural or crop management program or schedule of work tasks according to weather and climatic changes
4. Monitor weather and climate	4.1 Access regular updates to determine ongoing suitability of current programs 4.2 Review the viability of livestock, horticultural or crop management practices to ensure suitability within meteorological conditions 4.3 Research forecasting techniques to maintain currency of information 4.4 Document relevant information

Foundation Skills

This unit of competency describes the skills and knowledge required to observe and contribute to positive environmental work practices.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Range of Conditions

Assessment Requirements for AHCWRK201 Observe and report on weather

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor physical signs of weather in the context of available information
- relate forecasts to impact on current operations and activities
- communicate information on weather and situations that may be impacted
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of wind and rain on wind chill
- effects of wind shear and wind chill exposure
- enterprise and industry policies for monitoring weather and climate conditions, and recording and reporting weather and climate conditions
- weather and climate conditions impact upon farming and grazing activities
- effects of wind chill on metabolism of animals
- effects of prolonged dry periods on pastures and animal production, and natural resources
- effects of extreme heat on animals, including during birthing, and effects of heat stress on neonates
- work health and safety requirements and practices, especially as they relate to weather and climate monitoring and preparations for hazardous weather
- sustainability practices in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs

Assessment Requirements for AHCWRK202 Observe environmental work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with supervisors and workplace colleagues
- recognise basic environmental hazards and threats
- follow workplace directions and instructions related to environment
- keep simple environmental records
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation from all levels of government on environmental issues
- relevant environmental policies and workplace and industry practices and procedures
- good practice approaches relevant to work area particularly in regard to minimising environment hazards and risks, and improving environmental performance
- environmental issues, especially in regard to water catchments, air, noise, ecosystems, habitat, efficient use of resources, sustainability and waste minimisation
- potential environmental threats and problems relevant to a given region and occupation
- general work place practices and their potential impact on the environment
- work health and safety in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain information about the industry	1.1 Identify and access sources of information about the industry 1.2 Collect information to assist effective and safe work performance

Element	Performance criteria
	<p>within the industry</p> <p>1.3 Obtain and update specific information on sector of work</p> <p>1.4 Apply industry and work health and safety information to day-to-day work activities</p> <p>1.5 Identify employment terms and conditions</p> <p>1.6 Identify career pathways within the industry</p> <p>1.7 Maintain biosecurity protocols and procedures at all times</p>
2. Observe employment requirements	<p>2.1 Use industry developments in the workplace context to improve quality, productivity and conditions</p> <p>2.2 Confirm that work practices comply with Codes of Practice and workplace expectations</p> <p>2.3 Recognise faults and abnormalities in workplace practices and take remedial action as required</p> <p>2.4 Ensure that dress and personal requirements comply with workplace standards</p> <p>2.5 Observe punctuality in work attendance</p> <p>2.6 Meet employer's expectations through completion of workplace routines and specific instructions within enterprise policies and procedures</p>
3. Accept responsibility for quality of own work	<p>3.1 Keep personal work space in a well organised and safe condition, and meets relevant standards and policies</p> <p>3.2 Adhere to the workplace code of conduct</p> <p>3.3 Detect variations in the quality of service or products from required standards and report as required</p>
4. Plan and conduct own work	<p>4.1 Interpret and follow instructions</p> <p>4.2 Identify factors affecting work requirements and take appropriate action</p> <p>4.3 Assess work load and prioritise within allocated timeframes</p> <p>4.4 Communicate the need for assistance to improve performance clearly to the appropriate person</p>
5. Promote workplace cooperation	<p>5.1 Undertake responsibilities and duties in a positive manner to promote co-operation and good relationships</p> <p>5.2 Conduct co-operation with others in a courteous manner and is appropriate to culture, special needs and linguistic background and position in the organisation</p> <p>5.3 Recognise problems and conflict and resolve, where possible, through personal communication or refer to a supervisor, manager or employer for resolution</p>
6. Contribute to a productive work	<p>6.1 Fulfil commitments to undertake work or assist co-workers</p> <p>6.2 Share information relevant to work with co-workers to ensure</p>

Element	Performance criteria
environment	<p>designated work goals are met</p> <p>6.3 Share knowledge and skills co-workers through conversations and meetings</p> <p>6.4 Recognise and seek contributions of individuals of different gender and social and cultural backgrounds</p> <p>6.5 Observe and implement the principles of equal employment opportunity</p> <p>6.6 Ensure work is consistent with workplace standards relating to anti-discrimination and workplace harassment</p>
7. Undertake an activity to workplace requirements	<p>7.1 Interpret work schedules with the schedule and tasks defined</p> <p>7.2 Discuss knowledge and skills required for task with supervisors and co-workers</p> <p>7.3 Check the availability of materials and equipment to ensure they are consistent with work schedules and the requirements of the tasks</p> <p>7.4 Create a daily schedule for completing workplace activities and allocated tasks including priorities, allocated start times, estimation of completion times and materials, equipment and assistance required for completion is decided upon</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK204A Work effectively in the industry.

Assessment Requirements for AHCWRK204 Work effectively in the industry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect information on the industry
- observe employment requirements
- accept responsibility for quality of own work
- manage own work
- maintain the safety of others
- contribute to a productive work environment
- interpret work schedules
- meet the industry standard for dress and work practices
- communicate effectively with team members and supervisors
- use industry standard terminology

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and workplace awards and conditions
- employer's expectations
- relevant legislation and Codes of Practice applying to the industry
- workplace policies and procedures including those relating to quality systems
- emergency procedures
- organisational structure
- workplace communication channels
- awareness of workplace health and safety in the context of own work
- biosecurity in the context of own work

- animal welfare practices in the context of own work where applicable
- sustainability practices in the context of own work

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK205 Participate in workplace communications

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to participate in workplace communications.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

The unit applies to individuals who work at various levels and should be contextualised to accommodate the responsibility of the individual.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Follow routine spoken messages	1.1 Gather required information by listening and interpret information

Element	Performance criteria
	1.2 Follow instructions and procedures in an appropriate sequence for the task and in accordance with the information received 1.3 Seek clarification from the workplace supervisor on all occasions when any instruction or procedure is not understood
2. Perform workplace duties following routine written notices	2.1 Read and interpret written notices and instructions 2.2 Follow routine written instructions and procedures in sequence 2.3 Seek clarification from the workplace supervisor on all occasions when any instruction or procedure is not understood 2.4 Follow enterprise work health and safety policies
3. Obtain and provide information in response to workplace requirements	3.1 Obtain and interpret specific, relevant information 3.2 Write any required information completely, accurately and legibly 3.3 Identify sources of required information and establish appropriate contact 3.4 Ensure personal interaction is courteous and make enquiries clearly and concisely 3.5 Use defined procedures for the location and storage of information
4. Complete relevant work-related documents	4.1 Complete a range of forms relating to conditions of employment accurately and legibly 4.2 Record workplace data manually or electronically using standard workplace forms and documents 4.3 Use basic mathematical processes for routine calculations 4.4 Identify and rectify errors in recording information on forms and documents 4.5 Complete reporting requirements to supervisor as required by workplace procedures
5. Participate in workplace meetings and discussion	5.1 Attend team meetings on time 5.2 Express own opinions clearly and listen to those of others without interruption 5.3 Make contributions to meetings that are consistent with the meeting purpose and established protocols 5.4 Ask and respond to questions about routine workplace procedures and matters concerning conditions of employment 5.5 Interpret and implement meeting outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK205A Participate in workplace communications.

Assessment Requirements for AHCWRK205 Participate in workplace communications

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- following simple spoken messages
- performing routine workplace duties following simple written instructions
- gathering and providing information in response to workplace requirements
- completing relevant work-related documents
- estimating, calculating and recording routine workplace measures
- using basic mathematical processes of addition, subtraction, division, multiplication, percentages, decimal points and ratios
- participating in workplace meetings and discussions
- use of industry standard terminology
- awareness of work health and safety in the context of own work
- appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effective communication, including the role of body language
- different modes of communication (e.g. written and non-verbal)
- effective communication in a work team
- communication procedures and systems, and technology relevant to the organisation and the individual's work responsibilities.

Assessment Conditions

Assessors must satisfy current standards for RTOs

AHCWRK206 Observe enterprise quality assurance procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe enterprise quality assurance procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply basic quality assurance practices	1.1 Recognise elements of the enterprise's quality assurance system 1.2 Identify hazards to quality in work area 1.3 Identify critical control points for immediate work area 1.4 Complete basic record-keeping as required by quality process
2. Follow work	2.1 Follow work instructions for quality control for work area

Element	Performance criteria
instructions	2.2 Complete quality documentation
3. Check quality of product	3.1 Check the quality of the product or service as prescribed in work instructions 3.2 Inform supervisor of problems that affect or could potentially affect quality 3.3 Take action to correct the problem under supervision

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

AHCWRK207 Collect and record production data

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect and record production data obtained from a variety of sources.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify data to be collected	1.1 Determine the specific requirements of the data to be collected by discussion with the supervisor or by reading work instructions 1.2 Select materials or tools required for data collected and calibrate where necessary 1.3 Identify difficulties that may be encountered in collecting the data and seek advice from the supervisor if needed

Element	Performance criteria
	1.4 Communicate advice about the proposed data collection to others as required 1.5 Select and use suitable personal protective equipment 1.6 Determine whether notices relating to site quarantine are in effect and, where required, follow site quarantine procedures
2. Record production data	2.1 Record production data in the correct format and to meet specific requirements
3. Present and store production data	3.1 Present production data in the correct format and to meet specific requirements 3.2 Store production data sheets appropriately 3.3 Download or enter production data into a computer where required, using specified formats and applications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK208 Provide information on products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- respond to customer requests for information
- use questioning to identify customer requirements
- refer or seek advice from supervisor when required
- engage customer, especially in relation to giving and receiving information
- assess initial customer needs
- access and research product information
- seek assistance as required
- recommend products
- encourage repeat business
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- customer service techniques
- how to effectively engage and communicate with a range of customers
- customer requirements in various rural and horticultural settings
- the enterprise's business values, structure, products and services
- work health and safety in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK209 Participate in environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to follow workplace procedures and instructions and to participate in environmentally sustainable work practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify current resource use	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Document and measure current usage of resources using appropriate techniques

Element	Performance criteria
	1.4 Record and file documentation measuring current usage, using technology (such as software systems) where applicable 1.5 Identify and report workplace environmental hazards to supervisor
2. Comply with environmental regulations	2.1 Follow workplace procedures to ensure compliance 2.2 Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1 Follow organisational plans to improve environmental practices and resource efficiency 3.2 Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.2 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK209A Participate in environmentally sustainable work practices

Assessment Requirements for AHCWRK209 Participate in environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify workplace environmental and resource efficiency issues
- identify and measure resources used in own work role
- record measurements of current usage and filing documentation using appropriate technology
- identify and report workplace environmental hazards to supervisor
- follow workplace procedures to ensure compliance
- report breaches or potential breaches to supervisor
- follow organisational plans to improve environmental practices and resource efficiency
- work as part of a team to identify possible areas for improvements
- use industry standard terminology
- apply work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental and resource hazards and risks
- environmental or sustainability legislation, regulations and codes of practice applicable to own work role
- work health and safety issues and requirements applicable to own role
- organisational structure, and reporting channels and procedures
- relevant environmental and resource efficiency systems and procedures
- sustainability in the workplace

- terms and conditions of employment including policies and procedures, such as daily tasks, employee and employer rights, equal opportunity.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK301 Collect samples for a rural production or horticulture monitoring program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect samples as part of a rural production or horticulture monitoring program or while conducting post-mortem examination of livestock or other animals.

Samples collected will usually be analysed by laboratory staff, although collection staff may undertake some testing.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan for collection of samples	1.1 Confirm the purpose and scope of sample collection activity from discussion with supervisor or work instructions 1.2 Confirm the sample collection schedule with supervisor 1.3 Confirm the sampling site location and gain approval for site access where required 1.4 Identify the samples to be collected and preserved with supervisor 1.5 Assess the range of likely operating conditions, hazards and difficult or sensitive environments for impact on sampling and testing
2. Prepare equipment and resources	2.1 Source equipment required for sampling and preserving as outlined in sampling procedures 2.2 Check equipment for availability and serviceability 2.3 Select and use appropriate personal protective equipment 2.4 Collect data or record sheets or books for use 2.5 Move equipment, data sheets and personnel to sampling sites and prepare for use 2.6 Apply safe work practices at all times
3. Carry out sampling and preserving procedures	3.1 Collect samples as outlined in sampling plan 3.2 Preserve and record samples 3.3 Prepare and package samples for external analysis in line with laboratory standards and send to laboratory 3.4 Package and transport hazardous materials appropriately 3.5 Make observations including information on the surrounding area and environmental conditions 3.6 Report and deliver collection outcomes including presentation of samples
4. Complete sample collection activities	4.1 Clean, sanitise and store equipment and clothing 4.2 Repair damaged or malfunctioning equipment on site or sent to manufacturer or specialist 4.3 Record sampling results and observations on data sheets and forward to appropriate person 4.4 Advise supervisor of changes in field conditions and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK301 Collect samples for a rural production or horticulture monitoring program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan for collection of samples and moving equipment to the site
- collect and preserve samples for a given site
- record sampling results and observations on data sheets
- carry out sampling procedures
- distinguish atypical circumstances
- prepare samples
- package samples for transport to laboratory
- use and operate relevant tools and equipment
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hydrological cycle
- field procedures for sampling and preservation
- collecting equipment and methods
- preservation equipment and processes
- basic habitat assessment
- water quality issues
- fauna and flora recognition relevant to sampling activities
- topographical, climatic or environmental influence on material or sampling procedure.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret weather and climate information	1.1 Monitor weather and climate information and warnings to determine likely conditions according to workplace procedures 1.2 Anticipate and assess potential variations in weather and climate conditions according to warnings, weather patterns and historical

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>experience</p> <p>1.3 Identify the possible impacts of weather and climate on workplace activity</p> <p>1.4 Identify and review options for appropriate preventative actions</p>
2. Carry out preventative actions within the workplace	<p>2.1 Disseminate information and advice according to workplace procedures</p> <p>2.2 Plan preventative action according to the known effects on workplace activities</p> <p>2.3 Implement actions to minimise adverse effects on workplace activities according to workplace procedures</p> <p>2.4 Adjust and revise workplace activities and schedules according to weather conditions</p>
3. Monitor weather and climate	<p>3.1 Access regular weather updates to determine the ongoing suitability of current programs</p> <p>3.2 Review the viability of management practices and scheduling of work tasks to ensure suitability within weather conditions</p> <p>3.3 Maintain currency of forecasting skills according to workplace procedures and personal requirements</p> <p>3.4 Record weather information according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses and consolidates weather reports, warning and data from a range of sources to interpret for actions
Writing	<ul style="list-style-type: none"> Accurately documents weather warning for dissemination and records weather and climate data according to workplace procedures using appropriate language, grammar and terminology
Numeracy	<ul style="list-style-type: none"> Performs mathematical calculations to interpret and compare weather data

Skill	Description
Learning	<ul style="list-style-type: none"> Plans and implements professional development to maintain weather interpretation and forecasting skills
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for following explicit and implicit policies, procedures
Interact with others	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when disseminating weather warning to co-workers in a range of work contexts
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and workload Uses familiar digital technologies and systems to access weather information Makes routine decisions and implements standard procedures for tasks

Assessment Requirements for AHCWRK302 Monitor weather conditions

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have monitored weather conditions, including:

- monitored and interpreted weather and climate information and considered the impact on work activities and current operations
- interpreted weather and climate conditions to determine preventative actions
- communicated warnings and concerns to others according to workplace procedures
- determined and implemented preventative actions to minimise impact of adverse weather conditions on workplace activities
- monitored ongoing changes to weather conditions and reviewed prevention actions
- reviewed personal currency of skills in weather forecasting and implemented a personal development plan
- recorded weather information according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- weather and climate conditions and its impact upon agriculture, horticulture and conservation activities, including:
 - humidity
 - temperature
 - sunlight light
 - delta T (ΔT)
 - frosts
 - inversions

- dew point
- wind - force and direction
- rainfall - precipitation rate and frequency
- effect of adverse weather conditions on agriculture, horticulture and conservation activities
- strategies to mitigate effects of adverse weather and climatic conditions on agriculture, horticulture and conservation activities
- methods of monitoring and interpreting weather and climatic conditions, including:
 - bureau of meteorology
 - local weather stations
 - weather meters
- enterprise and industry procedures for monitoring weather and climate conditions and recording and reporting
- strategies for maintaining personal development in weather monitoring and forecasting skills.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an agriculture or horticulture or conservation environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - weather stations or weather meter relevant to workplace
 - computer or similar technologies to access weather data
- specifications:
 - workplace procedures, instructions or job specifications relevant to assessing the effects of weather conditions
 - weather reports, warnings and climate data relevant to workplace
- relationships:
 - team members for dissemination of weather warning information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK303 Respond to emergencies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise and respond to workplace emergencies.

Workplace emergencies may include such incidents as a small fire that can be controlled using a nearby fire extinguisher; or a chemical spill that can be controlled using personal protective clothing and equipment, and a small spill kit; or other workplace accident where there is no significant injury or damage.

Responding to emergencies may also include application of basic first aid to injured persons. A first aid certificate will be required.

All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures, and accepted safe practices

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for emergency situations	1.1 Identify potential workplace emergency situations and appropriate responses, within the range of current skills and relevant workplace emergency procedures 1.2 Identify relevant emergency resources and their location in the work area 1.3 Carry out regular checks of the workplace to minimise potential hazards and report any issues 1.4 Select, use and maintain personal protective equipment, safety equipment and other aids as required for emergencies and store properly after use 1.5 Identify problems with the serviceability of the emergency resources and report to relevant people
2. Identify and evaluate the emergency	2.1 Recognise and assess the identified or potential emergency situation and evaluate the risks and effectiveness of initial response actions 2.2 Seek advice in evaluating the emergency with appropriate personnel 2.3 Determine emergency needs and priority, including any assistance that may be required 2.4 Evaluate the potential for further development of the emergency and assess any hazards or risks to staff, clients or animals 2.5 Maintain high standards of hygiene and infection control to reduce the risk of infection or cross infection where necessary
3. Implement fire protection and control procedures	3.1 Minimise the risk of fire hazards and any hazardous fuelling procedures in the workplace 3.2 Use fire extinguishers and equipment appropriate to the fire situation and notify authorities 3.3 Follow procedures for evacuation to nominated assembly points 3.4 Carry out safety procedures for the handling and use of industrial gases
4. Safely confine the emergency where possible	4.1 Confine emergency to the immediate area using available resources within current skill limits 4.2 Carry out emergency procedures and operate equipment using safe practices and as trained 4.3 Coordinate use of equipment with other emergency actions 4.4 Implement strategies for group control, including removal of staff, clients and animals from danger and monitor ongoing

Element	Performance criteria
	condition 4.5 Acquire and document information required to assist emergency services and notify as appropriate 4.6 Amend plan of action to accommodate changes in situational variables
5. Manage the emergency situation	5.1 Evacuate casualties using established emergency procedures 5.2 Minimise the risk to self and casualty's health by isolating the hazard if possible 5.3 Assess vital signs and reassure casualty in a calm and caring manner using available resources 5.4 Provide first aid in accordance with established first aid procedures 5.5 Seek first aid assistance and advice from others where necessary 5.6 Implement organisational procedures and policies in the event of a near miss, major injury or death

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCWRK303 Respond to emergencies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate the emergency
- avoid and controlling escalation of the emergency
- develop a plan of action decisively
- implement a plan of action
- render first aid care
- deal with contingencies
- operate emergency equipment according to manufacturer's specifications and training
- use appropriate fire protection and control techniques relevant to the organisation and industry
- apply basic first aid to individuals across a range of incident situations applicable to the job role, organisation or sector
- use industry standard terminology
- apply work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the use of safe working practices
- the emergency network and contacts
- enterprise plan and evacuation procedures
- work health and safety legislative requirements and Codes of Practice
- legal responsibilities and duty of care
- use of communications equipment

- organisational and legal policies and procedures in the event of an accident/incident
- local call out procedures to access emergency services personnel
- practical first aid skills using prepared and improvised materials
- the emergency evacuation procedure and assembly point/s
- techniques to emergency response network and procedures to access relevant emergency personnel
- legal responsibilities and duty of care for persons and animals as appropriate to industry and emergency situation
- the proper use and technique for handling industrial gases
- hazard identification and risk assessment techniques and tools relevant to the organisation and industry
- use of communications equipment and protocols in the event of an emergency
- procedures to minimise infection and cross infection
- procedures for dealing with major injury or death prepare for, evaluate and act appropriately in emergency situations.

Assessment Conditions

Assessors must satisfy current standards for RTOs.
