AHC Agriculture, Horticulture and Conservation and Land Management Training Package

Release: 7.1

CONTENTS

AHC Agriculture, Horticulture and Conservation and Land Management Training Package.....	72
AHC10120 Certificate I in Conservation and Ecosystem Management	73
AHC10216 Certificate I in AgriFood Operations.....	76
AHC10316 Certificate I in Horticulture	80
AHC10416 Certificate I in Permaculture.....	83
AHC20116 Certificate II in Agriculture	86
AHC20320 Certificate II in Production Horticulture.....	93
AHC20416 Certificate II in Horticulture	101
AHC20520 Certificate II in Arboriculture.....	106
AHC20621 Certificate II in Parks and Gardens	108
AHC20720 Certificate II in Nursery Operations	111
AHC20919 Certificate II in Sports Turf Management.....	116
AHC21020 Certificate II in Conservation and Ecosystem Management	119
AHC21119 Certificate II in Irrigation	124
AHC21216 Certificate II in Rural Operations	127
AHC21316 Certificate II in Shearing.....	129
AHC21416 Certificate II in Wool Handling.....	131
AHC21621 Certificate II in Landscaping.....	133
AHC21716 Certificate II in Permaculture	138
AHC21819 Certificate II in Protected Horticulture	141
AHC30116 Certificate III in Agriculture	146
AHC30221 Certificate III in Dairy Production.....	158
AHC30318 Certificate III in Rural and Environmental Pest Management.....	162
AHC30416 Certificate III in Pork Production.....	167
AHC30516 Certificate III in Poultry Production.....	171
AHC30620 Certificate III in Production Horticulture	175
AHC30716 Certificate III in Horticulture.....	181
AHC30820 Certificate III in Arboriculture	185
AHC30921 Certificate III in Landscape Construction.....	191
AHC31021 Certificate III in Parks and Gardens.....	195
AHC31120 Certificate III in Nursery Operations	199
AHC31319 Certificate III in Sports Turf Management	204
AHC31421 Certificate III in Conservation and Ecosystem Management.....	207
AHC31516 Certificate III in Indigenous Land Management.....	219
AHC31818 Certificate III in Beekeeping	225
AHC32216 Certificate III in Commercial Composting	228
AHC32419 Certificate III in Irrigation Technology.....	231
AHC32516 Certificate III in Aboriginal Sites Work	236
AHC32720 Certificate III in Rural Merchandising.....	242
AHC32816 Certificate III in Rural Operations.....	246
AHC32916 Certificate III in Shearing	248
AHC33016 Certificate III in Wool Clip Preparation	251
AHC33116 Certificate III in Advanced Wool Handling.....	253
AHC33316 Certificate III in Feedlot Operations	256
AHC33719 Certificate III in Protected Horticulture.....	263
AHC33816 Certificate III in Permaculture.....	269
AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production.....	273
AHC40116 Certificate IV in Agriculture	277

AHC40219 Certificate IV in Protected Horticulture	284
AHC40320 Certificate IV in Production Horticulture	288
AHC40416 Certificate IV in Horticulture	292
AHC40620 Certificate IV in Nursery Operations	296
AHC40920 Certificate IV in Conservation and Ecosystem Management.....	301
AHC41019 Certificate IV in Agribusiness	308
AHC41119 Certificate IV in Irrigation Management.....	312
AHC41316 Certificate IV in Wool Classing	316
AHC41616 Certificate IV in Organic Farming	318
AHC41720 Certificate IV in Pest Management.....	323
AHC42021 Certificate IV in Landscape Construction Management.....	327
AHC42116 Certificate IV in Permaculture	332
AHC42320 Certificate IV in Medicinal Cannabis Cultivation and Production.....	336
AHC42421 Certificate IV in Landscape Design.....	340
AHC50116 Diploma of Agriculture	343
AHC50320 Diploma of Production Horticulture.....	350
AHC50416 Diploma of Horticulture	354
AHC50520 Diploma of Arboriculture	359
AHC50621 Diploma of Landscape Design	362
AHC50820 Diploma of Nursery Management	365
AHC51019 Diploma of Sports Turf Management.....	369
AHC51120 Diploma of Conservation and Ecosystem Management.....	372
AHC51216 Diploma of Community Coordination and Facilitation	378
AHC51316 Diploma of Pest Management.....	383
AHC51419 Diploma of Agribusiness Management	388
AHC51519 Diploma of Viticulture.....	392
AHC51619 Diploma of Irrigation Design.....	395
AHC51816 Diploma of Organic Farming	398
AHC51920 Diploma of Applied Agronomy.....	403
AHC52021 Diploma of Landscape Construction Management.....	406
AHC52116 Diploma of Permaculture	409
AHC60216 Advanced Diploma of Horticulture	413
AHC60319 Advanced Diploma of Agribusiness Management.....	416
AHC60415 Advanced Diploma of Conservation and Land Management.....	419
AHC60520 Advanced Diploma of Arboriculture	422
AHC80120 Graduate Diploma of Arboriculture	425
AHCAGB302 Keep production records for a primary production business	428
Assessment Requirements for AHCAGB302 Keep production records for a primary production business	431
AHCAGB404 Plan and implement infrastructure improvements.....	433
Assessment Requirements for AHCAGB404 Plan and implement infrastructure improvements	436
AHCAGB405 Analyse and interpret production data.....	438
Assessment Requirements for AHCAGB405 Analyse and interpret production data	441
AHCAGB406 Keep financial records for primary production business.....	443
Assessment Requirements for AHCAGB406 Keep financial records for primary production business	446
AHCAGB501 Develop climate risk management strategies	448
Assessment Requirements for AHCAGB501 Develop climate risk management strategies	451
AHCAGB504 Plan production for the whole business.....	453
Assessment Requirements for AHCAGB504 Plan production for the whole business.....	457
AHCAGB512 Plan and manage infrastructure.....	459
Assessment Requirements for AHCAGB512 Plan and manage infrastructure	463

AHCAGB513 Develop a farm plan	465
Assessment Requirements for AHCAGB513 Develop a farm plan	469
AHCAGB514 Manage application of agents to crops or pastures	471
Assessment Requirements for AHCAGB514 Manage application of agents to crops or pastures	475
AHCAGB515 Develop sustainable agricultural practices that utilise renewable energy and recycling systems	477
Assessment Requirements for AHCAGB515 Develop sustainable agricultural practices that utilise renewable energy and recycling systems.....	481
AHCAGB516 Select and implement a GIS for sustainable agricultural systems.....	483
Assessment Requirements for AHCAGB516 Select and implement a GIS for sustainable agricultural systems	486
AHCAGB517 Develop and manage a plan for sustainable production	488
Assessment Requirements for AHCAGB517 Develop and manage a plan for sustainable production	492
AHCAGB518 Develop climate risk management strategies	494
Assessment Requirements for AHCAGB518 Develop climate risk management strategies.....	497
AHCAGB519 Plan and monitor production processes.....	499
Assessment Requirements for AHCAGB519 Plan and monitor production processes	503
AHCAGB520 Plan production for the whole business	505
Assessment Requirements for AHCAGB520 Plan production for the whole business.....	509
AHCAGB521 Select and use agricultural technology	511
Assessment Requirements for AHCAGB521 Select and use agricultural technology	514
AHCAGB522 Implement the introduction of biotechnology into the production system	516
Assessment Requirements for AHCAGB522 Implement the introduction of biotechnology into the production system.....	520
AHCAGB523 Interpret and use agricultural data	522
Assessment Requirements for AHCAGB523 Interpret and use agricultural data.....	526
AHCAGB607 Manage succession planning	529
Assessment Requirements for AHCAGB607 Manage succession planning	532
AHCAGB608 Manage financial resources.....	534
Assessment Requirements for AHCAGB608 Manage financial resources	537
AHCAGB609 Develop export markets for produce	539
Assessment Requirements for AHCAGB609 Develop export markets for produce.....	542
AHCAGB610 Manage the production system.....	544
Assessment Requirements for AHCAGB610 Manage the production system	547
AHCAGB611 Analyse business performance	549
Assessment Requirements for AHCAGB611 Analyse business performance	552
AHCAGB612 Manage price risk through trading strategy.....	554
Assessment Requirements for AHCAGB612 Manage price risk through trading strategy.....	557
AHCAIS202 Assist with artificial insemination procedures.....	559
Assessment Requirements for AHCAIS202 Assist with artificial insemination procedures.....	562
AHCAIS301 Collect semen.....	564
Assessment Requirements for AHCAIS301 Collect semen.....	566
AHCAIS304 Artificially inseminate livestock	568
Assessment Requirements for AHCAIS304 Artificially inseminate livestock.....	571
AHCAIS402 Supervise artificial breeding and embryo transfer programs.....	574
Assessment Requirements for AHCAIS402 Supervise artificial breeding and embryo transfer programs	577
AHCARB201 Apply a range of treatments to trees.....	580
Assessment Requirements for AHCARB201 Apply a range of treatments to trees	583
AHCARB206 Operate and maintain stump grinding machines.....	586

Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines.....	590
AHCARB211 Apply treatments to trees	595
Assessment Requirements for AHCARB211 Apply treatments to trees.....	598
AHCARB212 Operate and maintain stump grinding machines.....	601
Assessment Requirements for AHCARB212 Operate and maintain stump grinding machines.....	605
AHCARB213 Perform ground-based rigging.....	608
Assessment Requirements for AHCARB213 Perform ground-based rigging.....	611
AHCARB214 Recognise trees.....	615
Assessment Requirements for AHCARB214 Recognise trees.....	618
AHCARB301 Implement a tree maintenance program.....	621
Assessment Requirements for AHCARB301 Implement a tree maintenance program ...	624
AHCARB303 Perform pruning operations	627
Assessment Requirements for AHCARB303 Perform pruning operations	631
AHCARB305 Dismantle trees.....	635
Assessment Requirements for AHCARB305 Dismantle trees	639
AHCARB306 Undertake aerial rescue.....	643
Assessment Requirements for AHCARB306 Undertake aerial rescue	647
AHCARB307 Use advanced climbing techniques	651
Assessment Requirements for AHCARB307 Use advanced climbing techniques	654
AHCARB308 Install cable and bracing	658
Assessment Requirements for AHCARB308 Install cable and bracing.....	661
AHCARB309 Implement a tree protection program	664
Assessment Requirements for AHCARB309 Implement a tree protection program	667
AHCARB311 Tie, dress, set and finish arborist knots	670
Assessment Requirements for AHCARB311 Tie, dress, set and finish arborist knots	674
AHCARB312 Use standard climbing techniques to access trees	677
Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees.....	680
AHCARB314 Implement a tree maintenance program.....	684
Assessment Requirements for AHCARB314 Implement a tree maintenance program ...	687
AHCARB315 Inspect trees for access and work	691
Assessment Requirements for AHCARB315 Inspect trees for access and work.....	694
AHCARB316 Perform pruning operations.....	698
Assessment Requirements for AHCARB316 Perform pruning operations	702
AHCARB317 Dismantle trees.....	706
Assessment Requirements for AHCARB317 Dismantle trees	710
AHCARB318 Undertake aerial rescue.....	716
Assessment Requirements for AHCARB318 Undertake aerial rescue	720
AHCARB319 Use arborist climbing techniques.....	724
Assessment Requirements for AHCARB319 Use arborist climbing techniques	728
AHCARB320 Install tree support systems	734
Assessment Requirements for AHCARB320 Install tree support systems.....	738
AHCARB321 Implement a tree protection program	741
Assessment Requirements for AHCARB321 Implement a tree protection program	744
AHCARB322 Access trees for inspection.....	747
Assessment Requirements for AHCARB322 Access trees for inspection	750
AHCARB323 Identify trees.....	754
Assessment Requirements for AHCARB323 Identify trees.....	757
AHCARB324 Use cranes to access and dismantle trees	760
Assessment Requirements for AHCARB324 Use cranes to access and dismantle trees...764	
AHCARB325 Manage trees to create and maintain habitat refuges	769

Assessment Requirements for AHCARB325 Manage trees to create and maintain habitat refuges773

AHCARB406 Verify pruning specifications.....779

Assessment Re quirements for AHCARB406 Verify pruning specifications782

AHCARB407 Supervise and audit tree operations785

Assessment Re quirements for AHCARB407 Supervise and audit tree operations789

AHCARB408 Perform a ground-based tree defect evaluation.....792

Assessment Re quirements for AHCARB408 Perform a ground-based tree defect evaluation796

AHCARB409 Conduct a safety audit.....800

Assessment Re quirements for AHCARB409 Conduct a safety audit804

AHCARB508 Identify, select and specify trees808

Assessment Re quirements for AHCARB508 Identify, select and specify trees.....812

AHCARB509 Develop an arboricultural impact assessment report.....817

Assessment Re quirements for AHCARB509 Develop an arboricultural impact assessment report.....822

AHCARB510 Specify and audit tree work.....826

Assessment Re quirements for AHCARB510 Specify and audit tree work830

AHCARB511 Prepare arborist reports.....834

Assessment Re quirements for AHCARB511 Prepare arborist reports838

AHCARB512 Generate tree plans using computer-aided design software842

Assessment Re quirements for AHCARB512 Generate tree plans using computer-aided design software846

AHCARB513 Examine and assess trees.....850

Assessment Re quirements for AHCARB513 Examine and assess trees854

AHCARB514 Diagnose tree diseases858

Assessment Re quirements for AHCARB514 Diagnose tree diseases862

AHCARB608 Interpret diagnostic test results866

Assessment Re quirements for AHCARB608 Interpret diagnostic test results.....869

AHCARB609 Measure and improve the performance of urban forests872

Assessment Re quirements for AHCARB609 Measure and improve the performance of urban forests.....875

AHCARB610 Provide consultation in a legal frame work878

Assessment Re quirements for AHCARB610 Provide consultation in a legal frame work 882

AHCARB611 Develop an operational tree management plan.....885

Assessment Re quirements for AHCARB611 Develop an operational tree management plan.....889

AHCARB612 Review and develop strategic tree policy893

Assessment Re quirements for AHCARB612 Review and develop strategic tree policy...897

AHCARB804 Analyse tree structure and biomechanics901

Assessment Re quirements for AHCARB804 Analyse tree structure and biomechanics ..905

AHCARB805 Perform mycology assays909

Assessment Re quirements for AHCARB805 Perform mycology assays913

AHCARB806 Research urban forest performance918

Assessment Re quirements for AHCARB806 Research urban forest performance922

AHCARB807 Conduct an entomology research project925

Assessment Re quirements for AHCARB807 Conduct an entomology research project ..929

AHCARB808 Contextualise diagnostic tests933

Assessment Re quirements for AHCARB808 Contextualise diagnostic tests936

AHCARB809 Develop an urban forest management frame work.....939

Assessment Re quirements for AHCARB809 Develop an urban forest management frame work942

AHCARB810 Analyse edaphic interactions of trees and structures945

Assessment Requirements for AHCARB810 Analyse edaphic interactions of trees and structures.....	951
AHCBAC102 Support agricultural crop work	956
Assessment Requirements for AHCBAC102 Support agricultural crop work	959
AHCBAC202 Assist agricultural crop maintenance	961
Assessment Requirements for AHCBAC202 Assist agricultural crop maintenance	963
AHCBAC204 Prepare grain storages	965
Assessment Requirements for AHCBAC204 Prepare grain storages	968
AHCBAC205 Assist agricultural crop establishment.....	970
Assessment Requirements for AHCBAC205 Assist agricultural crop establishment	973
AHCBAC206 Assist agricultural crop maintenance	976
Assessment Requirements for AHCBAC206 Assist agricultural crop maintenance	979
AHCBAC207 Assist agricultural crop harvesting.....	982
Assessment Requirements for AHCBAC207 Assist agricultural crop harvesting	985
AHCBAC208 Prepare grain storages	988
Assessment Requirements for AHCBAC208 Prepare grain storages	991
AHCBAC303 Prepare to receive grains and seeds	994
Assessment Requirements for AHCBAC303 Prepare to receive grains and seeds.....	997
AHCBAC309 Undertake preparation of land for agricultural crop production	999
Assessment Requirements for AHCBAC309 Undertake preparation of land for agricultural crop production.....	1002
AHCBAC310 Maintain pastures and crops for livestock production.....	1005
Assessment Requirements for AHCBAC310 Maintain pastures and crops for livestock production	1008
AHCBAC311 Conserve forage	1010
Assessment Requirements for AHCBAC311 Conserve forage	1014
AHCBAC312 Test and grade grains and seeds on receipt.....	1017
Assessment Requirements for AHCBAC312 Test and grade grains and seeds on receipt.....	1021
AHCBAC313 Establish pastures and crops for livestock production.....	1024
Assessment Requirements for AHCBAC313 Establish pastures and crops for livestock production	1027
AHCBAC314 Prepare to receive grains and seeds	1030
Assessment Requirements for AHCBAC314 Prepare to receive grains and seeds.....	1033
AHCBAC315 Establish agricultural crops	1036
Assessment Requirements for AHCBAC315 Establish agricultural crops	1039
AHCBAC316 Maintain agricultural crops	1042
Assessment Requirements for AHCBAC316 Maintain agricultural crops	1045
AHCBAC317 Undertake agricultural crop harvesting activities	1048
Assessment Requirements for AHCBAC317 Undertake agricultural crop harvesting activities.....	1051
AHCBAC401 Manage pastures for livestock production.....	1054
Assessment Requirements for AHCBAC401 Manage pastures for livestock production.....	1057
AHCBAC402 Plan a pasture establishment program	1059
Assessment Requirements for AHCBAC402 Plan a pasture establishment program....	1062
AHCBAC403 Supervise agricultural crop establishment.....	1064
Assessment Requirements for AHCBAC403 Supervise agricultural crop establishment.....	1067
AHCBAC404 Plan and implement agricultural crop maintenance	1069
Assessment Requirements for AHCBAC404 Plan and implement agricultural crop maintenance.....	1072
AHCBAC405 Supervise agricultural crop harvesting.....	1074
Assessment Requirements for AHCBAC405 Supervise agricultural crop harvesting	1077
AHCBAC408 Manage agricultural crop production	1079
Assessment Requirements for AHCBAC408 Manage agricultural crop production	1082

AHCBA409 Provide advice on agronomic products.....	1084
Assessment Requirements for AHCBA409 Provide advice on agronomic products ...	1087
AHCBA410 Plan and implement a pasture establishment program.....	1089
Assessment Requirements for AHCBA410 Plan and implement a pasture establishment program.....	1093
AHCBA411 Manage pastures for livestock production.....	1096
Assessment Requirements for AHCBA411 Manage pastures for livestock production	1100
AHCBA412 Supervise agricultural crop establishment.....	1104
Assessment Requirements for AHCBA412 Supervise agricultural crop establishment	1108
AHCBA413 Plan and implement agricultural crop maintenance	1111
Assessment Requirements for AHCBA413 Plan and implement agricultural crop maintenance.....	1114
AHCBA414 Supervise agricultural crop harvesting.....	1117
Assessment Requirements for AHCBA414 Supervise agricultural crop harvesting ...	1121
AHCBA415 Maintain grain quality in storage	1125
Assessment Requirements for AHCBA415 Maintain grain quality in storage.....	1129
AHCBA416 Save, prepare and store agricultural seed.....	1132
Assessment Requirements for AHCBA416 Save, prepare and store agricultural seed	1136
AHCBA417 Manage agricultural crop production	1139
Assessment Requirements for AHCBA417 Manage agricultural crop production	1143
AHCBA503 Manage integrated crop and pasture production.....	1146
Assessment Requirements for AHCBA503 Manage integrated crop and pasture production	1149
AHCBA506 Manage the harvest of crops.....	1151
Assessment Requirements for AHCBA506 Manage the harvest of crops	1155
AHCBA507 Develop production plans for crops	1157
Assessment Requirements for AHCBA507 Develop production plans for crops	1160
AHCBA509 Plan and manage long-term weed, pest and disease control in crops	1162
Assessment Requirements for AHCBA509 Plan and manage long-term weed, pest and disease control in crops	1166
AHCBA510 Manage integrated crop and pasture production.....	1169
Assessment Requirements for AHCBA510 Manage integrated crop and pasture production	1173
AHCBA511 Plan and manage a stored grain program	1175
Assessment Requirements for AHCBA511 Plan and manage a stored grain program	1179
AHCBA512 Develop production plans for crops or pastures	1182
Assessment Requirements for AHCBA512 Develop production plans for crops or pastures	1186
AHCBA513 Apply plant biology to agronomic practices	1188
Assessment Requirements for AHCBA513 Apply plant biology to agronomic practices	1191
AHCBA514 Design and manage a crop or pasture nutrition program.....	1193
Assessment Requirements for AHCBA514 Design and manage a crop or pasture nutrition program.....	1197
AHCBA515 Manage forage conservation.....	1200
Assessment Requirements for AHCBA515 Manage forage conservation	1204
AHCBA516 Manage the harvest of crops.....	1207
Assessment Requirements for AHCBA516 Manage the harvest of crops	1212
AHCBER301 Work effectively in an emergency disease or plant pest response.....	1215
Assessment Requirements for AHCBER301 Work effectively in an emergency disease or plant pest response.....	1218
AHCBER302 Work effectively in a biosecurity emergency response	1220
Assessment Requirements for AHCBER302 Work effectively in a biosecurity emergency response	1223

AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises.....	1226
Assessment Requirements for AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises.....	1229
AHCBER304 Carry out movement and security procedures.....	1231
Assessment Requirements for AHCBER304 Carry out movement and security procedures.....	1234
AHCBER305 Carry out emergency disease or pest control procedures on infected premises.....	1236
Assessment Requirements for AHCBER305 Carry out emergency disease or pest control procedures on infected premises.....	1239
AHCBER306 Carry out movement and security procedures.....	1241
Assessment Requirements for AHCBER306 Carry out movement and security procedures.....	1244
AHCBER403 Plan and supervise control activities on infected premises.....	1246
Assessment Requirements for AHCBER403 Plan and supervise control activities on infected premises.....	1249
AHCBER404 Conduct field surveillance for a biosecurity emergency response.....	1252
Assessment Requirements for AHCBER404 Conduct field surveillance for a biosecurity emergency response.....	1255
AHCBER501 Manage active operational emergency disease or plant pest sites.....	1258
Assessment Requirements for AHCBER501 Manage active operational emergency disease or plant pest sites.....	1261
AHCBER503 Manage active operational emergency disease or pest sites.....	1263
Assessment Requirements for AHCBER503 Manage active operational emergency disease or pest sites.....	1266
AHCBER504 Manage the implementation of a biosecurity emergency control program.....	1269
Assessment Requirements for AHCBER504 Manage the implementation of a biosecurity emergency control program.....	1272
AHCBER602 Plan and oversee a biosecurity emergency incident.....	1274
Assessment Requirements for AHCBER602 Plan and oversee a biosecurity emergency incident.....	1277
AHCBIO201 Inspect and clean machinery for plant, animal and soil material.....	1280
Assessment Requirements for AHCBIO201 Inspect and clean machinery for plant, animal and soil material.....	1283
AHCBIO202 Follow site quarantine procedures.....	1285
Assessment Requirements for AHCBIO202 Follow site quarantine procedures.....	1288
AHCBIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity.....	1290
Assessment Requirements for AHCBIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity.....	1293
AHCBIO204 Follow site biosecurity procedures.....	1295
Assessment Requirements for AHCBIO204 Follow site biosecurity procedures.....	1299
AHCBIO301 Identify and report signs of unusual disease or pest.....	1302
Assessment Requirements for AHCBIO301 Identify and report signs of unusual disease or pest.....	1305
AHCBIO302 Identify and report unusual disease or plant pest signs.....	1307
Assessment Requirements for AHCBIO302 Identify and report unusual disease or plant pest signs.....	1309
AHCBIO303 Apply biosecurity measures.....	1311
Assessment Requirements for AHCBIO303 Apply biosecurity measures.....	1314
AHCBIO305 Apply biosecurity measures.....	1317
Assessment Requirements for AHCBIO305 Apply biosecurity measures.....	1320
AHCBIO401 Plan and implement a biosecurity program.....	1323
Assessment Requirements for AHCBIO401 Plan and implement a biosecurity program.....	1327
AHCBIO403 Plan and implement a farm or enterprise biosecurity plan.....	1330

Assessment Requirements for AHC BIO403 Plan and implement a farm or enterprise biosecurity plan	1333
AHCBUS406 Administer finance, insurance and legal requirements.....	1337
Assessment Requirements for AHCBUS406 Administer finance, insurance and legal requirements.....	1340
AHCBUS407 Cost a project.....	1342
Assessment Requirements for AHCBUS407 Cost a project	1345
AHCBUS408 Operate within a budget framework	1347
Assessment Requirements for AHCBUS408 Operate within a budget framework.....	1350
AHCBUS409 Participate in an e-business supply chain.....	1352
Assessment Requirements for AHCBUS409 Participate in an e-business supply chain.....	1355
AHCBUS511 Manage enterprise staff requirements	1357
Assessment Requirements for AHCBUS511 Manage enterprise staff requirements	1360
AHCBUS512 Develop and implement family business structures and relationships	1362
Assessment Requirements for AHCBUS512 Develop and implement family business structures and relationships	1365
AHCBUS513 Market products and services	1367
Assessment Requirements for AHCBUS513 Market products and services.....	1371
AHCBUS514 Negotiate and monitor contracts	1373
Assessment Requirements for AHCBUS514 Negotiate and monitor contracts.....	1376
AHCBUS515 Prepare estimates, quotes and tenders	1378
Assessment Requirements for AHCBUS515 Prepare estimates, quotes and tenders	1381
AHCBUS516 Develop and review a business plan	1383
Assessment Requirements for AHCBUS516 Develop and review a business plan	1386
AHCBUS517 Monitor and review business performance	1388
Assessment Requirements for AHCBUS517 Monitor and review business performance	1391
AHCBUS518 Prepare and monitor budgets and financial reports	1393
Assessment Requirements for AHCBUS518 Prepare and monitor budgets and financial reports	1396
AHCBUS609 Develop and review an enterprise strategic plan	1398
Assessment Requirements for AHCBUS609 Develop and review an enterprise strategic plan.....	1401
AHCBUS610 Manage agribusiness risk.....	1403
Assessment Requirements for AHCBUS610 Manage agribusiness risk	1406
AHCBUS611 Manage capital works.....	1408
Assessment Requirements for AHCBUS611 Manage capital works.....	1411
AHCBUS612 Review land management plans and strategies	1413
Assessment Requirements for AHCBUS612 Review land management plans and strategies.....	1416
AHCBUS613 Manage human resources	1418
Assessment Requirements for AHCBUS613 Manage human resources	1422
AHCBUS614 Develop a monitoring, evaluation and reporting program	1424
Assessment Requirements for AHCBUS614 Develop a monitoring, evaluation and reporting program.....	1427
AHCBUS615 Implement a monitoring, evaluation and reporting program.....	1429
Assessment Requirements for AHCBUS615 Implement a monitoring, evaluation and reporting program.....	1432
AHCCFP301 Identify the effects of climate change as a factor in land management	1434
Assessment Requirements for AHCCFP301 Identify the effects of climate change as a factor in land management	1437
AHCCFP401 Increase soil organic carbon using land management practices	1439
Assessment Requirements for AHCCFP401 Increase soil organic carbon using land management practices	1442

AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods.....1444
Assessment Requirements for AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods.....1447
AHCCFP403 Identify opportunities and risks in carbon farming projects1449
Assessment Requirements for AHCCFP403 Identify opportunities and risks in carbon farming projects1452
AHCCFP404 Plan a land-based carbon farming project.....1454
Assessment Requirements for AHCCFP404 Plan a land-based carbon farming project1457
AHCCFP405 Increase carbon using vegetation and/or agricultural methods1459
Assessment Requirements for AHCCFP405 Increase carbon using vegetation and/or agricultural methods.....1462
AHCCFP501 Advise on carbon farming project planning and implementation1464
Assessment Requirements for AHCCFP501 Advise on carbon farming project planning and implementation.....1468
AHCCHM303 Prepare and apply chemicals1470
Assessment Requirements for AHCCHM303 Prepare and apply chemicals1474
AHCCHM306 Prepare and apply chemicals for hand held application equipment1476
Assessment Requirements for AHCCHM306 Prepare and apply chemicals for hand held application equipment1480
AHCCHM406 Provide advice and sell farm chemicals1483
Assessment Requirements for AHCCHM406 Provide advice and sell farm chemicals..1486
AHCCMN102 Apply effective work practices1488
Assessment Requirements for AHCCMN102 Apply effective work practices1491
AHCCMN201 Contribute to animal care through work activities1493
Assessment Requirements for AHCCMN201 Contribute to animal care through work activities.....1496
AHCCMN202 Contribute to work activities to produce food1498
Assessment Requirements for AHCCMN202 Contribute to work activities to produce food1501
AHCDES401 Apply construction techniques to landscape design.....1504
Assessment Requirements for AHCDES401 Apply construction techniques to landscape design.....1507
AHCDES402 Apply sustainability principles to landscape design1509
Assessment Requirements for AHCDES402 Apply sustainability principles to landscape design.....1512
AHCDES403 Develop landscape designs1514
Assessment Requirements for AHCDES403 Develop landscape designs1517
AHCDES404 Prepare simple landscape drawings1520
Assessment Requirements for AHCDES404 Prepare simple landscape drawings1523
AHCDES405 Produce 2-D landscape drawings using CAD software1525
Assessment Requirements for AHCDES405 Produce 2-D landscape drawings using CAD software1528
AHCDES505 Prepare a landscape design.....1530
Assessment Requirements for AHCDES505 Prepare a landscape design.....1534
AHCDES506 Design for construction of landscape features1537
Assessment Requirements for AHCDES506 Design for construction of landscape features1540
AHCDES507 Produce drawings for landscape design projects using CAD software1542
Assessment Requirements for AHCDES507 Produce drawings for landscape design projects using CAD software1546
AHCDES508 Design sustainable landscapes.....1548
Assessment Requirements for AHCDES508 Design sustainable landscapes1552
AHCDES509 Assess landscape sites.....1555
Assessment Requirements for AHCDES509 Assess landscape sites1559

AHCDRG202 Maintain drainage systems	1562
Assessment Requirements for AHCDRG202 Maintain drainage systems	1565
AHCDRG305 Install drainage systems	1567
Assessment Requirements for AHCDRG305 Install drainage systems.....	1570
AHCDRG306 Measure drainage system performance.....	1572
Assessment Requirements for AHCDRG306 Measure drainage system performance ..	1575
AHCDRG307 Troubleshoot drainage systems	1577
Assessment Requirements for AHCDRG307 Troubleshoot drainage systems.....	1580
AHCDRG308 Maintain and repair irrigation drainage systems.....	1582
Assessment Requirements for AHCDRG308 Maintain and repair irrigation drainage systems.....	1585
AHCDRG403 Coordinate and supervise installation of an irrigation drainage system.	1587
Assessment Requirements for AHCDRG403 Coordinate and supervise installation of an irrigation drainage system	1591
AHCDRG404 Monitor and control irrigation drainage systems	1593
Assessment Requirements for AHCDRG404 Monitor and control irrigation drainage systems.....	1597
AHCDRG502 Design drainage systems	1599
Assessment Requirements for AHCDRG502 Design drainage systems	1603
AHCDRY202 Milk livestock.....	1605
Assessment Requirements for AHCDRY202 Milk livestock	1609
AHCDRY303 Coordinate and monitor milking operations	1611
Assessment Requirements for AHCDRY303 Coordinate and monitor milking operations	1615
AHCDRY304 Carry out routine service of milking equipment.....	1617
Assessment Requirements for AHCDRY304 Carry out routine service of milking equipment.....	1620
AHCDRY305 Conduct mechanical tests on milking machines.....	1622
Assessment Requirements for AHCDRY305 Conduct mechanical tests on milking machines.....	1625
AHCDRY306 Operate a dairy waste utilisation system.....	1627
Assessment Requirements for AHCDRY306 Operate a dairy waste utilisation system.	1630
AHCDRY402 Manage milking shed operations	1632
Assessment Requirements for AHCDRY402 Manage milking shed operations	1636
AHCECR101 Support ecological restoration.....	1638
Assessment Requirements for AHCECR101 Support ecological restoration	1641
AHCECR102 Support native seed collection	1643
Assessment Requirements for AHCECR102 Support native seed collection.....	1646
AHCECR201 Capture digital media for fieldwork	1649
Assessment Requirements for AHCECR201 Capture digital media for fieldwork.....	1652
AHCECR202 Maintain wildlife habitat refuges.....	1655
Assessment Requirements for AHCECR202 Maintain wildlife habitat refuges	1658
AHCECR203 Perform basic ecological restoration works.....	1661
Assessment Requirements for AHCECR203 Perform basic ecological restoration works	1664
AHCECR301 Maintain native ecosystem areas	1667
Assessment Requirements for AHCECR301 Maintain native ecosystem areas	1670
AHCECR302 Collect and preserve biological samples.....	1673
Assessment Requirements for AHCECR302 Collect and preserve biological samples ..	1676
AHCECR303 Implement biological reintroduction works.....	1679
Assessment Requirements for AHCECR303 Implement biological reintroduction works	1683
AHCECR304 Undertake direct seeding.....	1686
Assessment Requirements for AHCECR304 Undertake direct seeding	1689
AHCECR305 Collect native seed.....	1692
Assessment Requirements for AHCECR305 Collect native seed.....	1695

AHCECR306 Conduct photography for fieldwork.....	1698
Assessment Requirements for AHCECR306 Conduct photography for fieldwork.....	1701
AHCECR307 Read and interpret maps.....	1703
Assessment Requirements for AHCECR307 Read and interpret maps	1706
AHCECR308 Conduct a site inspection for ecological restoration.....	1708
Assessment Requirements for AHCECR308 Conduct a site inspection for ecological restoration	1712
AHCECR309 Conduct an ecological and cultural site inspection prior to works.....	1715
Assessment Requirements for AHCECR309 Conduct an ecological and cultural site inspection prior to works	1718
AHCECR310 Implement assisted regeneration works.....	1721
Assessment Requirements for AHCECR310 Implement assisted regeneration works ..	1724
AHCECR311 Implement ecosystem reconstruction works	1727
Assessment Requirements for AHCECR311 Implement ecosystem reconstruction works	1731
AHCECR401 Supervise ecological restoration works	1734
Assessment Requirements for AHCECR401 Supervise ecological restoration works ...	1738
AHCECR402 Plan the implementation of revegetation works.....	1741
Assessment Requirements for AHCECR402 Plan the implementation of revegetation works	1744
AHCECR501 Manage natural areas on a rural property	1747
Assessment Requirements for AHCECR501 Manage natural areas on a rural property	1750
AHCECR502 Conduct biological surveys	1753
Assessment Requirements for AHCECR502 Conduct biological surveys	1756
AHCECR503 Design an ecological restoration project.....	1759
Assessment Requirements for AHCECR503 Design an ecological restoration project..	1763
AHCECR504 Manage implementation of ecological restoration programs	1766
Assessment Requirements for AHCECR504 Manage implementation of ecological restoration programs	1770
AHCECR505 Plan river restoration works.....	1773
Assessment Requirements for AHCECR505 Plan river restoration works	1776
AHCECR506 Develop and implement sustainable land use strategies.....	1778
Assessment Requirements for AHCECR506 Develop and implement sustainable land use strategies.....	1781
AHCEXP301 Handle and store explosives	1783
Assessment Requirements for AHCEXP301 Handle and store explosives.....	1786
AHCEXP303 Prepare and use explosives	1788
Assessment Requirements for AHCEXP303 Prepare and use explosives	1792
AHCEXP304 Identify and select explosive products.....	1794
Assessment Requirements for AHCEXP304 Identify and select explosive products	1797
AHCFAU201 Recognise fauna.....	1800
Assessment Requirements for AHCFAU201 Recognise fauna	1803
AHCFAU202 Recognise fauna.....	1805
Assessment Requirements for AHCFAU202 Recognise fauna	1808
AHCFAU301 Respond to wildlife emergencies	1810
Assessment Requirements for AHCFAU301 Respond to wildlife emergencies.....	1813
AHCFAU302 Identify fauna in the field	1815
Assessment Requirements for AHCFAU302 Identify fauna in the field.....	1818
AHCFAU303 Respond to wildlife emergencies	1821
Assessment Requirements for AHCFAU303 Respond to wildlife emergencies.....	1825
AHCFIR202 Assist with planned burning	1828
Assessment Requirements for AHCFIR202 Assist with planned burning.....	1831
AHCFIR301 Undertake burning for fuel, ecological and cultural resource management	1833

Assessment Requirements for AHC FIR301 Undertake burning for fuel, ecological and cultural resource management.....1837

AHC FIR503 Plan and evaluate burning for fuel, ecological and cultural resource management1840

Assessment Requirements for AHC FIR503 Plan and evaluate burning for fuel, ecological and cultural resource management.....1844

AHC FIR504 Manage wildfire hazard reduction programs.....1847

Assessment Requirements for AHC FIR504 Manage wildfire hazard reduction programs 1850

AHC GRI301 Maintain roof gardens, vertical gardens and green facades.....1853

Assessment Requirements for AHC GRI301 Maintain roof gardens, vertical gardens and green facades1856

AHC GRI401 Construct roof gardens1858

Assessment Requirements for AHC GRI401 Construct roof gardens1862

AHC GRI402 Construct vertical gardens and green facades.....1864

Assessment Requirements for AHC GRI402 Construct vertical gardens and green facades 1868

AHC GRI501 Design roof gardens1871

Assessment Requirements for AHC GRI501 Design roof gardens1875

AHC GRI502 Design vertical gardens and green facades1878

Assessment Requirements for AHC GRI502 Design vertical gardens and green facades 1882

AH CHYD401 Establish and monitor hydroponic crops1885

Assessment Requirements for AH CHYD401 Establish and monitor hydroponic crops 1888

AHC IRG102 Support irrigation work.....1891

Assessment Requirements for AHC IRG102 Support irrigation work.....1894

AHC IRG215 Assist with low volume irrigation operations.....1896

Assessment Requirements for AHC IRG215 Assist with low volume irrigation operations 1899

AHC IRG217 Assist with pressurised irrigation operations.....1901

Assessment Requirements for AHC IRG217 Assist with pressurised irrigation operations 1904

AHC IRG219 Assist with low volume irrigation operations.....1906

Assessment Requirements for AHC IRG219 Assist with low volume irrigation operations 1909

AHC IRG220 Assist with surface irrigation operations1911

Assessment Requirements for AHC IRG220 Assist with surface irrigation operations ..1914

AHC IRG221 Assist with pressurised irrigation operations.....1916

Assessment Requirements for AHC IRG221 Assist with pressurised irrigation operations 1919

AHC IRG222 Assist with pump and flow control device operations1921

Assessment Requirements for AHC IRG222 Assist with pump and flow control device operations1924

AHC IRG301 Install gravity fed irrigation systems1926

Assessment Requirements for AHC IRG301 Install gravity fed irrigation systems.....1929

AHC IRG303 Measure irrigation delivery system performance1931

Assessment Requirements for AHC IRG303 Measure irrigation delivery system performance1933

AHC IRG306 Troubleshoot irrigation systems1935

Assessment Requirements for AHC IRG306 Troubleshoot irrigation systems.....1937

AHC IRG328 Operate irrigation controller and sensor technology1938

Assessment Requirements for AHC IRG328 Operate irrigation controller and sensor technology.....1941

AHC IRG331 Install pressurised irrigation systems1943

Assessment Requirements for AHC IRG331 Install pressurised irrigation systems.....1946

AHC IRG332 Operate pressurised irrigation systems1948

Assessment Requirements for AHC IRG332 Operate pressurised irrigation systems1950

AHC IRG333 Maintain pressurised irrigation systems.....1952

Assessment Requirements for AHC IRG333 Maintain pressurised irrigation systems ..1955

AHC IRG336 Operate and maintain gravity fed irrigation systems1957

Assessment Requirements for AHCIRG336 Operate and maintain gravity fed irrigation systems.....1960

AHCIRG337 Measure irrigation delivery system performance1962

Assessment Requirements for AHCIRG337 Measure irrigation delivery system performance1965

AHCIRG338 Troubleshoot irrigation systems1967

Assessment Requirements for AHCIRG338 Troubleshoot irrigation systems.....1970

AHCIRG339 Monitor soils under irrigation.....1972

Assessment Requirements for AHCIRG339 Monitor soils under irrigation.....1975

AHCIRG340 Install irrigation pumps1977

Assessment Requirements for AHCIRG340 Install irrigation pumps1980

AHCIRG341 Operate and maintain irrigation pumping systems1982

Assessment Requirements for AHCIRG341 Operate and maintain irrigation pumping systems.....1986

AHCIRG342 Interpret irrigation plans and drawings1989

Assessment Requirements for AHCIRG342 Interpret irrigation plans and drawings...1992

AHCIRG343 Operate irrigation injection equipment.....1994

Assessment Requirements for AHCIRG343 Operate irrigation injection equipment ...1997

AHCIRG344 Implement an irrigation schedule.....2000

Assessment Requirements for AHCIRG344 Implement an irrigation schedule2003

AHCIRG345 Install pressurised irrigation systems2006

Assessment Requirements for AHCIRG345 Install pressurised irrigation systems.....2010

AHCIRG346 Operate pressurised irrigation systems2012

Assessment Requirements for AHCIRG346 Operate pressurised irrigation systems2015

AHCIRG347 Maintain pressurised irrigation systems.....2018

Assessment Requirements for AHCIRG347 Maintain pressurised irrigation systems ..2021

AHCIRG348 Operate and maintain moving irrigation system.....2023

Assessment Requirements for AHCIRG348 Operate and maintain moving irrigation system.....2027

AHCIRG349 Recommend irrigation products and services.....2029

Assessment Requirements for AHCIRG349 Recommend irrigation products and services2033

AHCIRG435 Determine hydraulic parameters for an irrigation system.....2035

Assessment Requirements for AHCIRG435 Determine hydraulic parameters for an irrigation system.....2038

AHCIRG436 Implement an irrigation-related environmental protection program2040

Assessment Requirements for AHCIRG436 Implement an irrigation-related environmental protection program2043

AHCIRG437 Schedule irrigations2045

Assessment Requirements for AHCIRG437 Schedule irrigations2048

AHCIRG438 Select and manage pumping systems for irrigation2050

Assessment Requirements for AHCIRG438 Select and manage pumping systems for irrigation.....2054

AHCIRG439 Interpret and apply irrigation designs.....2057

Assessment Requirements for AHCIRG439 Interpret and apply irrigation designs2061

AHCIRG440 Manage a moving sprinkler irrigation system.....2063

Assessment Requirements for AHCIRG440 Manage a moving sprinkler irrigation system2066

AHCIRG441 Evaluate water supply for irrigation2069

Assessment Requirements for AHCIRG441 Evaluate water supply for irrigation.....2072

AHCIRG442 Supervise irrigation system installation.....2074

Assessment Requirements for AHCIRG442 Supervise irrigation system installation ...2078

AHCIRG443 Supervise irrigation system maintenance2080

Assessment Requirements for AHCIRG443 Supervise irrigation system maintenance .2083

AHCIRG444 Manage irrigation systems2085

Assessment Requirements for AHCIRG444 Manage irrigation systems2088

AHCIRG445 Manage surface irrigation systems2090

Assessment Requirements for AHCIRG445 Manage surface irrigation systems2093

AHCIRG446 Provide irrigation sales and service2095

Assessment Requirements for AHCIRG446 Provide irrigation sales and service2098

AHCIRG506 Design irrigation systems2100

Assessment Requirements for AHCIRG506 Design irrigation systems2104

AHCIRG507 Audit irrigation systems2106

Assessment Requirements for AHCIRG507 Audit irrigation systems2109

AHCIRG508 Design irrigation system maintenance and monitoring programs2111

Assessment Requirements for AHCIRG508 Design irrigation system maintenance and monitoring programs2114

AHCIRG509 Develop an irrigation and drainage management plan2116

Assessment Requirements for AHCIRG509 Develop an irrigation and drainage management plan2120

AHCIRG510 Establish and maintain an irrigation-related environmental protection program2122

Assessment Requirements for AHCIRG510 Establish and maintain an irrigation-related environmental protection program2126

AHCLPW201 Operate a handheld GPS device2128

Assessment Requirements for AHCLPW201 Operate a handheld GPS device2131

AHCLPW301 Supervise park visitor activities2133

Assessment Requirements for AHCLPW301 Supervise park visitor activities2135

AHCLPW302 Implement a biodiversity monitoring plan2137

Assessment Requirements for AHCLPW302 Implement a biodiversity monitoring plan2140

AHCLPW303 Construct access tracks2142

Assessment Requirements for AHCLPW303 Construct access tracks2145

AHCLPW304 Carry out inspection of designated area2147

Assessment Requirements for AHCLPW304 Carry out inspection of designated area2150

AHCLPW305 Perform diving for scientific purposes2152

Assessment Requirements for AHCLPW305 Perform diving for scientific purposes2155

AHCLPW306 Undertake sampling and testing of water2157

Assessment Requirements for AHCLPW306 Undertake sampling and testing of water2160

AHCLPW307 Perform restricted diving for scientific purposes2162

Assessment Requirements for AHCLPW307 Perform restricted diving for scientific purposes2167

AHCLPW308 Coordinate and report on data collection2174

Assessment Requirements for AHCLPW308 Coordinate and report on data collection2177

AHCLPW309 Operate remotely piloted system for conservation work2179

Assessment Requirements for AHCLPW309 Operate remotely piloted system for conservation work2182

AHCLPW310 Supervise park visitor activities2185

Assessment Requirements for AHCLPW310 Supervise park visitor activities2188

AHCLPW311 Construct access tracks2190

Assessment Requirements for AHCLPW311 Construct access tracks2193

AHCLPW312 Carry out inspection of designated area2196

Assessment Requirements for AHCLPW312 Carry out inspection of designated area2200

AHCLPW313 Undertake sampling and testing of water2202

Assessment Requirements for AHCLPW313 Undertake sampling and testing of water2205

AHCLPW406 Supervise the monitoring of biodiversity2208

Assessment Requirements for AHCLPW406 Supervise the monitoring of biodiversity2211

AHCLPW407 Process applications for changes in land use2213

Assessment Requirements for AHCLPW407 Process applications for changes in land use2216

AHCLPW408 Implement land and sea management practices.....2218
Assessment Requirements for AHCLPW408 Implement land and sea management practices.....2221
AHCLPW409 Inspect and monitor culturally significant places.....2223
Assessment Requirements for AHCLPW409 Inspect and monitor culturally significant places.....2227
AHCLPW410 Produce maps for land management purposes.....2230
Assessment Requirements for AHCLPW410 Produce maps for land management purposes.....2233
AHCLPW504 Assess land use applications for legislative compliance2236
Assessment Requirements for AHCLPW504 Assess land use applications for legislative compliance2239
AHCLPW506 Develop a management plan for a designated area2242
Assessment Requirements for AHCLPW506 Develop a management plan for a designated area.....2246
AHCLPW507 Implement natural and cultural resource management plans.....2249
Assessment Requirements for AHCLPW507 Implement natural and cultural resource management plans2252
AHCLPW602 Coordinate the preparation of a regional resource management plan ...2255
Assessment Requirements for AHCLPW602 Coordinate the preparation of a regional resource management plan2259
AHCLSC101 Support landscape work2261
Assessment Requirements for AHCLSC101 Support landscape work.....2263
AHCLSC102 Support landscape work2265
Assessment Requirements for AHCLSC102 Support landscape work.....2268
AHCLSC201 Assist with landscape construction work.....2270
Assessment Requirements for AHCLSC201 Assist with landscape construction work .2272
AHCLSC202 Construct low-profile timber or modular retaining walls.....2274
Assessment Requirements for AHCLSC202 Construct low-profile timber or modular retaining walls2277
AHCLSC203 Install aggregate paths2279
Assessment Requirements for AHCLSC203 Install aggregate paths.....2282
AHCLSC204 Lay paving2284
Assessment Requirements for AHCLSC204 Lay paving.....2287
AHCLSC205 Install tree protection devices.....2289
Assessment Requirements for AHCLSC205 Install tree protection devices.....2291
AHCLSC206 Assist with landscape construction work.....2293
Assessment Requirements for AHCLSC206 Assist with landscape construction work .2296
AHCLSC207 Construct low-profile timber or modular retaining walls.....2298
Assessment Requirements for AHCLSC207 Construct low-profile timber or modular retaining walls2302
AHCLSC208 Install aggregate paths2304
Assessment Requirements for AHCLSC208 Install aggregate paths.....2307
AHCLSC209 Lay paving2309
Assessment Requirements for AHCLSC209 Lay paving.....2312
AHCLSC210 Install tree protection devices.....2314
Assessment Requirements for AHCLSC210 Install tree protection devices2317
AHCLSC301 Set out site for construction works2319
Assessment Requirements for AHCLSC301 Set out site for construction works.....2321
AHCLSC302 Construct landscape features using concrete.....2322
Assessment Requirements for AHCLSC302 Construct landscape features using concrete 2325
AHCLSC303 Construct brick and block structures and features2327

Assessment Requirements for AHCLSC303 Construct brick and block structures and features.....2330

AHCLSC304 Erect timber structures and features2331

Assessment Re quire ments for AHCLSC304 Ere ct timber structures and features2334

AHCLSC305 Construct stone structures and features.....2336

Assessment Re quire ments for AHCLSC305 Construct stone structures and features ..2339

AHCLSC306 Implement a paving project.....2341

Assessment Re quire ments for AHCLSC306 Implement a paving project.....2344

AHCLSC307 Implement a retaining wall project.....2346

Assessment Re quire ments for AHCLSC307 Implement a retaining wall project.....2349

AHCLSC308 Install metal structures and features.....2351

Assessment Re quire ments for AHCLSC308 Install metal structures and features2354

AHCLSC309 Install water features2356

Assessment Re quire ments for AHCLSC309 Install water features2359

AHCLSC310 Implement a tree transplanting program.....2360

Assessment Re quire ments for AHCLSC310 Implement a tree transplanting program.2363

AHCLSC311 Set out site for construction works2365

Assessment Re quire ments for AHCLSC311 Set out site for construction works.....2368

AHCLSC312 Construct brick and block structures and features2370

Assessment Re quire ments for AHCLSC312 Construct brick and block structures and features.....2373

AHCLSC313 Construct stone structures and features, and install stone cladding2376

Assessment Re quire ments for AHCLSC313 Construct stone structures and features, and install stone cladding.....2380

AHCLSC314 Implement a tree transplanting program.....2382

Assessment Re quire ments for AHCLSC314 Implement a tree transplanting program.2386

AHCLSC315 Implement an outdoor tiling project.....2388

Assessment Re quire ments for AHCLSC315 Implement an outdoor tiling project.....2391

AHCLSC316 Implement a paving project.....2393

Assessment Re quire ments for AHCLSC316 Implement a paving project.....2396

AHCLSC317 Construct landscape features using concrete.....2398

Assessment Re quire ments for AHCLSC317 Construct landscape features using concrete2402

AHCLSC318 Erect timber structures and features2404

Assessment Re quire ments for AHCLSC318 Ere ct timber structures and features2407

AHCLSC319 Implement a retaining wall project.....2409

Assessment Re quire ments for AHCLSC319 Implement a retaining wall project.....2412

AHCLSC320 Install water features2414

Assessment Re quire ments for AHCLSC320 Install water features2417

AHCLSC321 Install metal structures and features.....2419

Assessment Re quire ments for AHCLSC321 Install metal structures and features2422

AHCLSC401 Supervise landscape project works2424

Assessment Re quire ments for AHCLSC401 Supervise landscape project works2427

AHCLSC402 Apply building codes and standards to the construction process for Class 10 buildings2429

Assessment Re quire ments for AHCLSC402 Apply building codes and standards to the construction process for Class 10 buildings.....2432

AHCLSC403 Apply structural principles to Class 10 buildings.....2435

Assessment Re quire ments for AHCLSC403 Apply structural principles to Class 10 buildings2439

AHCLSC404 Supervise landscape project works2443

Assessment Re quire ments for AHCLSC404 Supervise landscape project works2446

AHCLSC504 Survey and establish site levels.....2448

AHCLSK411 Supervise natural mating of livestock	2516
Assessment Requirements for AHCLSK411 Supervise natural mating of livestock.....	2519
AHCLSK416 Identify and select animals for breeding	2521
Assessment Requirements for AHCLSK416 Identify and select animals for breeding.....	2523
AHCLSK420 Provide advice on livestock products	2525
Assessment Requirements for AHCLSK420 Provide advice on livestock products.....	2528
AHCLSK421 Supervise natural mating of livestock	2530
Assessment Requirements for AHCLSK421 Supervise natural mating of livestock.....	2533
AHCLSK422 Identify and select animals for breeding	2535
Assessment Requirements for AHCLSK422 Identify and select animals for breeding.....	2538
AHCLSK503 Develop and implement a breeding strategy	2540
Assessment Requirements for AHCLSK503 Develop and implement a breeding strategy.....	2544
AHCLSK505 Develop production plans for livestock	2546
Assessment Requirements for AHCLSK505 Develop production plans for livestock	2549
AHCLSK508 Plan, monitor and evaluate strategies to improve livestock through genetics.....	2551
Assessment Requirements for AHCLSK508 Plan, monitor and evaluate strategies to improve livestock through genetics	2554
AHCLSK509 Develop and implement a breeding strategy	2557
Assessment Requirements for AHCLSK509 Develop and implement a breeding strategy.....	2561
AHCLSK510 Develop production plans for livestock	2563
Assessment Requirements for AHCLSK510 Develop production plans for livestock	2566
AHCMAR301 Conduct a subtidal marine monitoring operation from a vessel or platform.....	2568
Assessment Requirements for AHCMAR301 Conduct a subtidal marine monitoring operation from a vessel or platform	2571
AHCMAR302 Conduct intertidal marine monitoring	2574
Assessment Requirements for AHCMAR302 Conduct intertidal marine monitoring	2577
AHCMAR303 Coordinate marine conservation activities on small vessels	2580

Assessment Requirements for AHC MAR303 Coordinate marine conservation activities on small vessels2584

AHC MAR304 Identify and collect marine life2587

Assessment Requirements for AHC MAR304 Identify and collect marine life2590

AHC MAR305 Monitor ocean conditions and marine environmental quality2593

Assessment Requirements for AHC MAR305 Monitor ocean conditions and marine environmental quality2596

AHC MAR306 Operate mobile underwater vehicles2599

Assessment Requirements for AHC MAR306 Operate mobile underwater vehicles2602

AHC MDC201 Assist with propagation of medicinal cannabis2605

Assessment Requirements for AHC MDC201 Assist with propagation of medicinal cannabis2609

AHC MDC202 Assist with care and maintenance of medicinal cannabis2612

Assessment Requirements for AHC MDC202 Assist with care and maintenance of medicinal cannabis2616

AHC MDC203 Assist with harvest and pre-processing of medicinal cannabis2619

Assessment Requirements for AHC MDC203 Assist with harvest and pre-processing of medicinal cannabis2623

AHC MDC301 Apply security regulatory requirements to work in the medicinal cannabis industry2626

Assessment Requirements for AHC MDC301 Apply security regulatory requirements to work in the medicinal cannabis industry2629

AHC MDC302 Apply regulatory and quality requirements to the production of medicinal cannabis2631

Assessment Requirements for AHC MDC302 Apply regulatory and quality requirements to the production of medicinal cannabis2634

AHC MDC303 Undertake propagation of medicinal cannabis2636

Assessment Requirements for AHC MDC303 Undertake propagation of medicinal cannabis2640

AHC MDC304 Undertake care and maintenance of medicinal cannabis2643

Assessment Requirements for AHC MDC304 Undertake care and maintenance of medicinal cannabis2647

AHC MDC305 Undertake harvest and pre-processing of medicinal cannabis2650

Assessment Requirements for AHC MDC305 Undertake harvest and pre-processing of medicinal cannabis2654

AHC MDC401 Apply security measures for medicinal cannabis2657

Assessment Requirements for AHC MDC401 Apply security measures for medicinal cannabis2660

AHC MDC402 Monitor medicinal cannabis production for compliance and quality2662

Assessment Requirements for AHC MDC402 Monitor medicinal cannabis production for compliance and quality2665

AHC MDC403 Plan and implement a propagation program for medicinal cannabis2667

Assessment Requirements for AHC MDC403 Plan and implement a propagation program for medicinal cannabis2670

AHC MDC404 Plan and implement a care and maintenance program for medicinal cannabis2673

Assessment Requirements for AHC MDC404 Plan and implement a care and maintenance program for medicinal cannabis2676

AHC MDC405 Plan and implement a harvest and pre-processing program for medicinal cannabis2679

Assessment Requirements for AHC MDC405 Plan and implement a harvest and pre-processing program for medicinal cannabis2682

AHC MER303 Sell products and services2685

Assessment Requirements for AHCMER303 Sell products and services2687

AHCMER304 Recommend irrigation products and services.....2689

Assessment Requirements for AHCMER304 Recommend irrigation products and services2692

AHCMER305 Provide information on hardware products.....2694

Assessment Requirements for AHCMER305 Provide information on hardware products2697

AHCMER306 Sell products and services.....2699

Assessment Requirements for AHCMER306 Sell products and services2702

AHCMER401 Coordinate customer service and networking activities2704

Assessment Requirements for AHCMER401 Coordinate customer service and networking activities.....2707

AHCMER404 Provide advice on agronomic products2709

Assessment Requirements for AHCMER404 Provide advice on agronomic products...2711

AHCMER407 Provide irrigation sales and service2713

Assessment Requirements for AHCMER407 Provide irrigation sales and service2716

AHCMER408 Coordinate customer service and networking activities2718

Assessment Requirements for AHCMER408 Coordinate customer service and networking activities.....2721

AHCMER501 Develop a sales strategy for rural products.....2723

Assessment Requirements for AHCMER501 Develop a sales strategy for rural products2725

AHCMER502 Develop a sales strategy for rural products.....2727

Assessment Requirements for AHCMER502 Develop a sales strategy for rural products2730

AHCMOM211 Operate side by side utility vehicles.....2732

Assessment Requirements for AHCMOM211 Operate side by side utility vehicles.....2735

AHCMOM212 Operate quad bikes2737

Assessment Requirements for AHCMOM212 Operate quad bikes.....2740

AHCMOM403 Provide advice and sell machinery2742

Assessment Requirements for AHCMOM403 Provide advice and sell machinery2745

AHCNAR201 Carry out natural area restoration works2747

Assessment Requirements for AHCNAR201 Carry out natural area restoration works2750

AHCNAR202 Maintain wildlife habitat refuges2752

Assessment Requirements for AHCNAR202 Maintain wildlife habitat refuges2755

AHCNAR301 Maintain natural areas.....2757

Assessment Requirements for AHCNAR301 Maintain natural areas2760

AHCNAR303 Implement revegetation works2762

Assessment Requirements for AHCNAR303 Implement revegetation works.....2765

AHCNAR305 Collect native seed.....2767

Assessment Requirements for AHCNAR305 Collect native seed2769

AHCNAR306 Conduct photography for fieldwork.....2771

Assessment Requirements for AHCNAR306 Conduct photography for fieldwork2774

AHCNAR307 Read and interpret maps.....2776

Assessment Requirements for AHCNAR307 Read and interpret maps2779

AHCNAR401 Supervise natural area restoration works2781

Assessment Requirements for AHCNAR401 Supervise natural area restoration works2784

AHCNAR402 Plan the implementation of revegetation works.....2786

Assessment Requirements for AHCNAR402 Plan the implementation of revegetation works2788

AHCNAR506 Develop and implement sustainable land use strategies.....2790

Assessment Requirements for AHCNAR506 Develop and implement sustainable land use strategies.....2793

AHCNRM507 Manipulate and analyse data within geographic information systems ...2795

Assessment Requirements for AHCNRM507 Manipulate and analyse data within geographic information systems.....2797

AHCNRM509 Develop a coastal rehabilitation strategy2799

Assessment Requirements for AHCNRM509 Develop a coastal rehabilitation strategy 2803
 AHCNRM510 Develop a water quality monitoring program.....2806
 Assessment Requirements for AHCNRM510 Develop a water quality monitoring program 2810
 AHCNRM511 Plan and monitor works projects in catchments and waterways2813
 Assessment Requirements for AHCNRM511 Plan and monitor works projects in
 catchments and waterways2816
 AHCNRM512 Investigate suspected breaches of natural resource management legislation 2819
 Assessment Requirements for AHCNRM512 Investigate suspected breaches of natural
 resource management legislation2822
 AHCNRM604 Review ecological management plans and strategies2825
 Assessment Requirements for AHCNRM604 Review ecological management plans and
 strategies.....2829
 AHCNRM605 Develop a monitoring, evaluation and reporting program.....2832
 Assessment Requirements for AHCNRM605 Develop a monitoring, evaluation and
 reporting program.....2835
 AHCNSY102 Support nursery work2838
 Assessment Requirements for AHCNSY102 Support nursery work2841
 AHCNSY201 Pot up plants.....2843
 Assessment Requirements for AHCNSY201 Pot up plants2845
 AHCNSY202 Care for nursery plants2847
 Assessment Requirements for AHCNSY202 Care for nursery plants2849
 AHCNSY203 Undertake propagation activities.....2851
 Assessment Requirements for AHCNSY203 Undertake propagation activities.....2853
 AHCNSY204 Maintain indoor plants2855
 Assessment Requirements for AHCNSY204 Maintain indoor plants2858
 AHCNSY205 Pot up plants.....2860
 Assessment Requirements for AHCNSY205 Pot up plants2863
 AHCNSY206 Care for nursery plants2865
 Assessment Requirements for AHCNSY206 Care for nursery plants2868
 AHCNSY207 Undertake propagation activities.....2870
 Assessment Requirements for AHCNSY207 Undertake propagation activities.....2873
 AHCNSY208 Maintain indoor plants2875
 Assessment Requirements for AHCNSY208 Maintain indoor plants2878
 AHCNSY301 Maintain nursery plants2880
 Assessment Requirements for AHCNSY301 Maintain nursery plants2882
 AHCNSY302 Receive and dispatch nursery products.....2884
 Assessment Requirements for AHCNSY302 Receive and dispatch nursery products ...2887
 AHCNSY303 Install and maintain plant displays2889
 Assessment Requirements for AHCNSY303 Install and maintain plant displays.....2892
 AHCNSY304 Deliver and promote sales of plants2894
 Assessment Requirements for AHCNSY304 Deliver and promote sales of plants2897
 AHCNSY305 Prepare specialised plants.....2899
 Assessment Requirements for AHCNSY305 Prepare specialised plants2901
 AHCNSY306 Implement a propagation plan.....2903
 Assessment Requirements for AHCNSY306 Implement a propagation plan2906
 AHCNSY307 Operate fertigation equipment.....2908
 Assessment Requirements for AHCNSY307 Operate fertigation equipment2910
 AHCNSY308 Maintain nursery plants2912
 Assessment Requirements for AHCNSY308 Maintain nursery plants2915
 AHCNSY309 Receive and dispatch nursery products.....2917
 Assessment Requirements for AHCNSY309 Receive and dispatch nursery products ...2920
 AHCNSY310 Install and maintain plant displays2922
 Assessment Requirements for AHCNSY310 Install and maintain plant displays.....2925

AHCNSY311 Promote sales of plants	2927
Assessment Requirements for AHCNSY311 Promote sales of plants	2930
AHCNSY312 Prepare specialised plants.....	2932
Assessment Requirements for AHCNSY312 Prepare specialised plants	2935
AHCNSY313 Implement a propagation plan.....	2937
Assessment Requirements for AHCNSY313 Implement a propagation plan	2940
AHCNSY314 Operate fertigation equipment.....	2943
Assessment Requirements for AHCNSY314 Operate fertigation equipment	2946
AHCNSY401 Plan a growing-on program.....	2949
Assessment Requirements for AHCNSY401 Plan a growing-on program.....	2952
AHCNSY402 Plan a propagation program.....	2954
Assessment Requirements for AHCNSY402 Plan a propagation program	2956
AHCNSY403 Plan a growing-on program.....	2958
Assessment Requirements for AHCNSY403 Plan a growing-on program.....	2961
AHCNSY404 Plan a propagation program.....	2963
Assessment Requirements for AHCNSY404 Plan a propagation program	2966
AHCORG501 Develop an organic management plan	2968
Assessment Requirements for AHCORG501 Develop an organic management plan	2972
AHCORG502 Prepare the enterprise for organic certification	2974
Assessment Requirements for AHCORG502 Prepare the enterprise for organic certification.....	2977
AHCORG507 Develop an organic or biodynamic management plan.....	2979
Assessment Requirements for AHCORG507 Develop an organic or biodynamic management plan.....	2984
AHCORG508 Prepare the enterprise for organic or biodynamic certification	2986
Assessment Requirements for AHCORG508 Prepare the enterprise for organic or biodynamic certification	2989
AHCPCM201 Recognise plants	2991
Assessment Requirements for AHCPCM201 Recognise plants	2993
AHCPCM203 Fell small trees.....	2995
Assessment Requirements for AHCPCM203 Fell small trees	2998
AHCPCM204 Recognise plants	3000
Assessment Requirements for AHCPCM204 Recognise plants	3003
AHCPCM205 Fell small trees.....	3005
Assessment Requirements for AHCPCM205 Fell small trees	3009
AHCPCM301 Implement a plant nutrition program.....	3012
Assessment Requirements for AHCPCM301 Implement a plant nutrition program	3015
AHCPCM302 Provide information on plants and their culture	3017
Assessment Requirements for AHCPCM302 Provide information on plants and their culture	3019
AHCPCM304 Report on health and condition of trees.....	3021
Assessment Requirements for AHCPCM304 Report on health and condition of trees..	3023
AHCPCM305 Implement a plant nutrition program.....	3025
Assessment Requirements for AHCPCM305 Implement a plant nutrition program	3029
AHCPCM306 Provide information on plants and their culture	3032
Assessment Requirements for AHCPCM306 Provide information on plants and their culture	3035
AHCPCM307 Report on health and condition of trees	3037
Assessment Requirements for AHCPCM307 Report on health and condition of trees..	3040
AHCPCM401 Recommend plants and cultural practices	3042
Assessment Requirements for AHCPCM401 Recommend plants and cultural practices	3044
AHCPCM402 Develop a soil health and plant nutrition program	3046

Assessment Requirements for AHCPM402 Develop a soil health and plant nutrition program.....3049

AHCPM404 Recommend plants and cultural practices3051

Assessment Re quirements for AHCPM404 Recommend plants and cultural practices3054

AHCPM405 Implement an integrated pest management program3056

Assessment Requirements for AHCPM405 Implement an integrated pest management program.....3059

AHCPM406 Develop a soil health and plant nutrition program3061

Assessment Requirements for AHCPM406 Develop a soil health and plant nutrition program.....3065

AHCPM501 Diagnose plant health problems.....3068

Assessment Re quirements for AHCPM501 Diagnose plant health problems3071

AHCPM507 Diagnose plant health problems.....3073

Assessment Re quirements for AHCPM507 Diagnose plant health problems3077

AHCPM508 Develop an integrated pest management program.....3079

Assessment Requirements for AHCPM508 Develop an integrated pest management program.....3082

AHCPM509 Apply knowledge of plant physiology to horticultural practices.....3084

Assessment Requirements for AHCPM509 Apply knowledge of plant physiology to horticultural practices3087

AHCPM510 Collect and classify plants.....3091

Assessment Re quirements for AHCPM510 Collect and classify plants3094

AHCPM511 Specify plants for landscapes3096

Assessment Re quirements for AHCPM511 Specify plants for landscapes.....3099

AHCPM512 Design specialised landscape3101

Assessment Re quirements for AHCPM512 Design specialised landscape3104

AHCPM513 Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs.....3106

Assessment Requirements for AHCPM513 Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs3110

AHCPM601 Develop and implement a plant health management strategy3113

Assessment Requirements for AHCPM601 Develop and imple ment a plant health management strategy.....3117

AHCPM602 Develop and imple ment a plant health management strategy3119

Assessment Requirements for AHCPM602 Develop and imple ment a plant health management strategy.....3123

AHCPER212 Use and maintain garden hand tools and equipment3125

Assessment Requirements for AHCPER212 Use and maintain garden hand tools and equipment.....3127

AHCPGD101 Support gardening work3129

Assessment Re quirements for AHCPGD101 Support gardening work3132

AHCPGD102 Support gardening work3134

Assessment Re quirements for AHCPGD102 Support gardening work.....3137

AHCPGD201 Plant trees and shrubs.....3139

Assessment Re quirements for AHCPGD201 Plant trees and shrubs.....3141

AHCPGD202 Prepare and maintain plant displays3143

Assessment Re quirements for AHCPGD202 Prepare and maintain plant displays.....3145

AHCPGD203 Prune shrubs and small trees3146

Assessment Re quirements for AHCPGD203 Prune shrubs and small trees3148

AHCPGD204 Transplant small trees.....3150

Assessment Re quirements for AHCPGD204 Transplant small trees3153

AHCPGD206 Conduct visual inspection of park facilities3155

Assessment Re quirements for AHCPGD206 Conduct visual inspection of park facilities3157

AHCPGD207 Plant trees and shrubs.....3159
 Assessment Requirements for AHCPGD207 Plant trees and shrubs.....3162
 AHCPGD208 Prepare and maintain plant displays3164
 Assessment Requirements for AHCPGD208 Prepare and maintain plant displays.....3167
 AHCPGD209 Prune shrubs and small trees3169
 Assessment Requirements for AHCPGD209 Prune shrubs and small trees3172
 AHCPGD210 Transplant shrubs and small trees3174
 Assessment Requirements for AHCPGD210 Transplant shrubs and small trees3177
 AHCPGD212 Conduct visual inspection of park facilities3179
 Assessment Requirements for AHCPGD212 Conduct visual inspection of park facilities 3182
 AHCPGD301 Implement a plant establishment program.....3184
 Assessment Requirements for AHCPGD301 Implement a plant establishment program 3187
 AHCPGD302 Plan and maintain plant displays3189
 Assessment Requirements for AHCPGD302 Plan and maintain plant displays3192
 AHCPGD303 Perform specialist amenity pruning.....3194
 Assessment Requirements for AHCPGD303 Perform specialist amenity pruning3196
 AHCPGD304 Implement a landscape maintenance program3198
 Assessment Requirements for AHCPGD304 Implement a landscape maintenance program 3201
 AHCPGD305 Conduct operational inspection of park facilities.....3203
 Assessment Requirements for AHCPGD305 Conduct operational inspection of park facilities.....3205
 AHCPGD306 Implement a maintenance program for an aquatic environment.....3207
 Assessment Requirements for AHCPGD306 Implement a maintenance program for an aquatic environment3210
 AHCPGD307 Implement a plant establishment program.....3212
 Assessment Requirements for AHCPGD307 Implement a plant establishment program 3216
 AHCPGD308 Plan and maintain plant displays3218
 Assessment Requirements for AHCPGD308 Plan and maintain plant displays3221
 AHCPGD309 Perform specialist amenity pruning.....3223
 Assessment Requirements for AHCPGD309 Perform specialist amenity pruning3226
 AHCPGD310 Implement a landscape maintenance program3229
 Assessment Requirements for AHCPGD310 Implement a landscape maintenance program 3232
 AHCPGD311 Conduct operational inspection of park facilities.....3234
 Assessment Requirements for AHCPGD311 Conduct operational inspection of park facilities.....3237
 AHCPGD312 Implement a maintenance program for an aquatic environment.....3240
 Assessment Requirements for AHCPGD312 Implement a maintenance program for an aquatic environment3243
 AHCPGD401 Design plant displays3245
 Assessment Requirements for AHCPGD401 Design plant displays3247
 AHCPGD402 Plan a plant establishment program.....3249
 Assessment Requirements for AHCPGD402 Plan a plant establishment program3252
 AHCPGD403 Design plant displays3254
 Assessment Requirements for AHCPGD403 Design plant displays3257
 AHCPGD404 Plan a plant establishment program.....3259
 Assessment Requirements for AHCPGD404 Plan a plant establishment program3262
 AHCPGD503 Manage parks and reserves3264
 Assessment Requirements for AHCPGD503 Manage parks and reserves.....3268
 AHCPGD504 Develop and implement a streetscape management plan3270
 Assessment Requirements for AHCPGD504 Develop and implement a streetscape management plan.....3273
 AHCPGD505 Conduct comprehensive inspection of park facilities3275

Assessment Requirements for AHCPGD505 Conduct comprehensive inspection of park facilities.....	3278
AHCPGD506 Manage parks and reserves.....	3280
Assessment Requirements for AHCPGD506 Manage parks and reserves.....	3283
AHCPGD507 Manage plant cultural practices.....	3286
Assessment Requirements for AHCPGD507 Manage plant cultural practices.....	3290
AHCPGD508 Plan the restoration of parks and gardens.....	3292
Assessment Requirements for AHCPGD508 Plan the restoration of parks and gardens.....	3296
AHCPGD509 Develop and implement a streetscape management plan.....	3298
Assessment Requirements for AHCPGD509 Develop and implement a streetscape management plan.....	3302
AHCPGD510 Conduct comprehensive inspection of park facilities.....	3304
Assessment Requirements for AHCPGD510 Conduct comprehensive inspection of park facilities.....	3307
AHCPHT102 Support horticultural production.....	3310
Assessment Requirements for AHCPHT102 Support horticultural production.....	3313
AHCPHT204 Undertake field budding and grafting.....	3315
Assessment Requirements for AHCPHT204 Undertake field budding and grafting.....	3317
AHCPHT210 Assist with protected cropping water sampling and testing.....	3319
Assessment Requirements for AHCPHT210 Assist with protected cropping water sampling and testing.....	3322
AHCPHT211 Maintain crop.....	3324
Assessment Requirements for AHCPHT211 Maintain crop.....	3327
AHCPHT212 Perform manual pollination of crops.....	3329
Assessment Requirements for AHCPHT212 Perform manual pollination of crops.....	3332
AHCPHT213 Perform plant blocking on.....	3334
Assessment Requirements for AHCPHT213 Perform plant blocking on.....	3337
AHCPHT214 Support horticultural crop harvesting.....	3339
Assessment Requirements for AHCPHT214 Support horticultural crop harvesting.....	3342
AHCPHT215 Plant horticultural crops.....	3344
Assessment Requirements for AHCPHT215 Plant horticultural crops.....	3347
AHCPHT216 Carry out canopy maintenance.....	3349
Assessment Requirements for AHCPHT216 Carry out canopy maintenance.....	3352
AHCPHT217 Undertake field budding and grafting.....	3354
Assessment Requirements for AHCPHT217 Undertake field budding and grafting.....	3357
AHCPHT218 Carry out post-harvest operations.....	3359
Assessment Requirements for AHCPHT218 Carry out post-harvest operations.....	3362
AHCPHT219 Handle and move mushroom boxes.....	3364
Assessment Requirements for AHCPHT219 Handle and move mushroom boxes.....	3367
AHCPHT220 Perform mushroom substrate process tasks.....	3369
Assessment Requirements for AHCPHT220 Perform mushroom substrate process tasks.....	3373
AHCPHT221 Water mushroom crops.....	3375
Assessment Requirements for AHCPHT221 Water mushroom crops.....	3378
AHCPHT222 Produce trellis dried grapes.....	3380
Assessment Requirements for AHCPHT222 Produce trellis dried grapes.....	3383
AHCPHT301 Carry out a crop regulation program.....	3385
Assessment Requirements for AHCPHT301 Carry out a crop regulation program.....	3387
AHCPHT302 Prepare raw materials and compost feedstock.....	3389
Assessment Requirements for AHCPHT302 Prepare raw materials and compost feedstock.....	3392
AHCPHT305 Regulate crops.....	3394
Assessment Requirements for AHCPHT305 Regulate crops.....	3396
AHCPHT306 Establish horticultural crops.....	3398
Assessment Requirements for AHCPHT306 Establish horticultural crops.....	3400

AHCPHT307 Prepare raw materials and compost feedstock.....	3402
Assessment Requirements for AHCPHT307 Prepare raw materials and compost feedstock	3405
AHCPHT310 Coordinate horticultural crop harvesting.....	3407
Assessment Requirements for AHCPHT310 Coordinate horticultural crop harvesting	3410
AHCPHT311 Install and maintain vertical hanging trellis	3412
Assessment Requirements for AHCPHT311 Install and maintain vertical hanging trellis	3415
AHCPHT312 Implement a crop regulation program.....	3417
Assessment Requirements for AHCPHT312 Implement a crop regulation program	3420
AHCPHT313 Implement a post-harvest program	3422
Assessment Requirements for AHCPHT313 Implement a post-harvest program.....	3425
AHCPHT314 Harvest horticultural crops mechanically.....	3427
Assessment Requirements for AHCPHT314 Harvest horticultural crops mechanically	3430
AHCPHT315 Establish horticultural crops	3433
Assessment Requirements for AHCPHT315 Establish horticultural crops	3436
AHCPHT316 Supervise mushroom substrate preparation	3439
Assessment Requirements for AHCPHT316 Supervise mushroom substrate preparation	3442
AHCPHT317 Coordinate horticultural crop harvesting.....	3444
Assessment Requirements for AHCPHT317 Coordinate horticultural crop harvesting	3447
AHCPHT318 Prepare value added compost-based products.....	3449
Assessment Requirements for AHCPHT318 Prepare value added compost-based products	3452
AHCPHT402 Develop a crop regulation program	3454
Assessment Requirements for AHCPHT402 Develop a crop regulation program.....	3457
AHCPHT404 Implement and monitor a horticultural crop harvesting program.....	3459
Assessment Requirements for AHCPHT404 Implement and monitor a horticultural crop harvesting program	3461
AHCPHT409 Develop a crop regulation program	3463
Assessment Requirements for AHCPHT409 Develop a crop regulation program.....	3466
AHCPHT410 Develop harvesting and processing specifications to produce an olive oil	3468
Assessment Requirements for AHCPHT410 Develop harvesting and processing specifications to produce an olive oil.....	3471
AHCPHT411 Implement and monitor a horticultural crop harvesting program.....	3473
Assessment Requirements for AHCPHT411 Implement and monitor a horticultural crop harvesting program	3476
AHCPHT412 Manage mushroom substrate preparation.....	3478
Assessment Requirements for AHCPHT412 Manage mushroom substrate preparation	3481
AHCPHT413 Oversee vineyard practices	3483
Assessment Requirements for AHCPHT413 Oversee vineyard practices.....	3486
AHCPHT414 Assess olive oil for style and quality	3488
Assessment Requirements for AHCPHT414 Assess olive oil for style and quality	3491
AHCPHT415 Control Phase II mushroom substrate process	3493
Assessment Requirements for AHCPHT415 Control Phase II mushroom substrate process	3496
AHCPHT416 Manage mushroom crop development.....	3498
Assessment Requirements for AHCPHT416 Manage mushroom crop development	3502
AHCPHT502 Develop a horticultural production plan.....	3504
Assessment Requirements for AHCPHT502 Develop a horticultural production plan .	3507
AHCPHT503 Manage a controlled growing environment	3509
Assessment Requirements for AHCPHT503 Manage a controlled growing environment	3512
AHCPHT507 Evaluate grapes for production	3514
Assessment Requirements for AHCPHT507 Evaluate grapes for production.....	3518
AHCPHT508 Develop a grape production plan.....	3521
Assessment Requirements for AHCPHT508 Develop a grape production plan.....	3525
AHCPHT509 Evaluate wine	3527
Assessment Requirements for AHCPHT509 Evaluate wine	3531

AHCPHT510 Manage a wine making process3533
 Assessment Requirements for AHCPHT510 Manage a wine making process.....3536
 AHCPHT511 Develop a horticultural production plan.....3538
 Assessment Requirements for AHCPHT511 Develop a horticultural production plan .3542
 AHCPHT512 Manage a controlled growing environment3544
 Assessment Requirements for AHCPHT512 Manage a controlled growing environment3547
 AHCPMG401 Implement the pest monitoring and evaluation plan.....3549
 Assessment Requirements for AHCPMG401 Implement the pest monitoring and
 evaluation plan3552
 AHCPMG402 Ensure compliance with pest legislation3554
 Assessment Requirements for AHCPMG402 Ensure compliance with pest legislation .3557
 AHCPMG403 Apply predator trapping techniques.....3559
 Assessment Requirements for AHCPMG403 Apply predator trapping techniques3563
 AHCPMG410 Implement the pest monitoring and evaluation plan.....3566
 Assessment Requirements for AHCPMG410 Implement the pest monitoring and
 evaluation plan3569
 AHCPMG411 Ensure compliance with pest legislation3571
 Assessment Requirements for AHCPMG411 Ensure compliance with pest legislation .3573
 AHCPMG501 Develop a regional pest management plan.....3575
 Assessment Requirements for AHCPMG501 Develop a regional pest management plan3578
 AHCPMG502 Investigate a pest control failure3581
 Assessment Requirements for AHCPMG502 Investigate a pest control failure3584
 AHCPMG507 Develop a regional pest management plan.....3586
 Assessment Requirements for AHCPMG507 Develop a regional pest management plan3589
 AHCPMG509 Investigate a pest control failure3591
 Assessment Requirements for AHCPMG509 Investigate a pest control failure3594
 AHCPRK307 Mate pigs naturally3596
 Assessment Requirements for AHCPRK307 Mate pigs naturally3599
 AHCPRK308 Monitor dry sow performance.....3601
 Assessment Requirements for AHCPRK308 Monitor dry sow performance3604
 AHCPRK309 Pregnancy test pigs.....3606
 Assessment Requirements for AHCPRK309 Pregnancy test pigs3609
 AHCPRK310 Artificially inseminate pigs.....3611
 Assessment Requirements for AHCPRK310 Artificially inseminate pigs3614
 AHCSAW202 Recognise landforms and soil types.....3616
 Assessment Requirements for AHCSAW202 Recognise landforms and soil types3619
 AHCSAW203 Conduct erosion and sediment control activities3621
 Assessment Requirements for AHCSAW203 Conduct erosion and sediment control
 activities.....3624
 AHCSAW303 Construct conservation earthworks3626
 Assessment Requirements for AHCSAW303 Construct conservation earthworks.....3629
 AHCSAW304 Implement erosion and sediment control measures3632
 Assessment Requirements for AHCSAW304 Implement erosion and sediment control
 measures3635
 AHCSAW401 Set out conservation earthworks3637
 Assessment Requirements for AHCSAW401 Set out conservation earthworks3639
 AHCSAW402 Set out conservation earthworks3641
 Assessment Requirements for AHCSAW402 Set out conservation earthworks3644
 AHCSAW404 Supervise implementation of conservation earthworks plans.....3646
 Assessment Requirements for AHCSAW404 Supervise implementation of conservation
 earthworks plans3650
 AHCSAW504 Design control measures and structures3653
 Assessment Requirements for AHCSAW504 Design control measures and structures .3656

AHCSAW505 Plan erosion and sediment control measures3658
Assessment Requirements for AHCSAW505 Plan erosion and sediment control measures 3661
AHCSDT302 Identify seeds3663
Assessment Requirements for AHCSDT302 Identify seeds.....3665
AHCSDT306 Perform a seed germination test.....3666
Assessment Requirements for AHCSDT306 Perform a seed germination test3668
AHCSDT308 Perform tests for quality on seeds3670
Assessment Requirements for AHCSDT308 Perform tests for quality on seeds.....3675
AHCSDT309 Prepare a working sample3678
Assessment Requirements for AHCSDT309 Prepare a working sample3681
AHCSDT310 Identify seeds3683
Assessment Requirements for AHCSDT310 Identify seeds.....3686
AHCSDT412 Perform advanced tests on seeds3688
Assessment Requirements for AHCSDT412 Perform advanced tests on seeds.....3694
AHCSDT413 Handle and store seed subject to quarantine regulations3697
Assessment Requirements for AHCSDT413 Handle and store seed subject to quarantine regulations3700
AHCSDT414 Maintain a quarantine approved laboratory3702
Assessment Requirements for AHCSDT414 Maintain a quarantine approved laboratory 3705
AHCSHG407 Prepare shearing team wages3707
Assessment Requirements for AHCSHG407 Prepare shearing team wages.....3710
AHCSOL202 Assist with soil or growing media sampling and testing3712
Assessment Requirements for AHCSOL202 Assist with soil or growing media sampling and testing3714
AHCSOL203 Assist with soil or growing media sampling and testing3716
Assessment Requirements for AHCSOL203 Assist with soil or growing media sampling and testing3719
AHCSOL301 Prepare growing media.....3721
Assessment Requirements for AHCSOL301 Prepare growing media3723
AHCSOL303 Implement soil improvements for garden and turf areas3725
Assessment Requirements for AHCSOL303 Implement soil improvements for garden and turf areas3728
AHCSOL304 Implement soil improvements for garden and turf areas3730
Assessment Requirements for AHCSOL304 Implement soil improvements for garden and turf areas3733
AHCSOL305 Prepare growing media.....3736
Assessment Requirements for AHCSOL305 Prepare growing media3739
AHCSOL401 Sample soils and interpret results3741
Assessment Requirements for AHCSOL401 Sample soils and interpret results.....3744
AHCSOL402 Develop a soil use map for a property3746
Assessment Requirements for AHCSOL402 Develop a soil use map for a property3749
AHCSOL403 Prepare acid sulphate soil management plans.....3751
Assessment Requirements for AHCSOL403 Prepare acid sulphate soil management plans 3754
AHCSOL405 Provide information on fertilisers and soil ameliorants3756
Assessment Requirements for AHCSOL405 Provide information on fertilisers and soil ameliorants3759
AHCSOL406 Sample soils and interpret results3762
Assessment Requirements for AHCSOL406 Sample soils and interpret results.....3765
AHCSOL407 Develop a soil use map for a property3767
Assessment Requirements for AHCSOL407 Develop a soil use map for a property3770
AHCSOL409 Supervise acid sulphate soil remediation and management projects3772
Assessment Requirements for AHCSOL409 Supervise acid sulphate soil remediation and management projects3775

AHCSOL505 Monitor and manage soils for production.....3777
Assessment Requirements for AHCSOL505 Monitor and manage soils for production3780
AHCSOL506 Manage erosion and sediment control.....3782
Assessment Requirements for AHCSOL506 Manage erosion and sediment control3786
AHCSOL507 Develop and manage a plan to reclaim land affected by salinity3788
Assessment Requirements for AHCSOL507 Develop and manage a plan to reclaim land
affected by salinity3791
AHCSOL508 Manage soils to enhance sustainability.....3793
Assessment Requirements for AHCSOL508 Manage soils to enhance sustainability3797
AHCSPO309 Process planting seed.....3800
Assessment Requirements for AHCSPO309 Process planting seed.....3805
AHCSPO310 Treat planting seed3808
Assessment Requirements for AHCSPO310 Treat planting seed.....3812
AHCSPO311 Handle, package and store commercial quantities of seed.....3814
Assessment Requirements for AHCSPO311 Handle, package and store commercial
quantities of seed.....3817
AHCSPO312 Sample seed before and after processing.....3820
Assessment Requirements for AHCSPO312 Sample seed before and after processing .3823
AHCTHH401 Develop a therapeutic horticulture design brief.....3826
Assessment Requirements for AHCTHH401 Develop a therapeutic horticulture design
brief.....3829
AHCTRF102 Support turf work.....3831
Assessment Requirements for AHCTRF102 Support turf work3834
AHCTRF201 Assist with turf construction.....3836
Assessment Requirements for AHCTRF201 Assist with turf construction.....3838
AHCTRF202 Prepare turf surfaces for play3840
Assessment Requirements for AHCTRF202 Prepare turf surfaces for play3842
AHCTRF203 Renovate grassed areas3844
Assessment Requirements for AHCTRF203 Renovate grassed areas3846
AHCTRF204 Support turf establishment3848
Assessment Requirements for AHCTRF204 Support turf establishment.....3851
AHCTRF205 Assist in the preparation of turf surfaces for play3852
Assessment Requirements for AHCTRF205 Assist in the preparation of turf surfaces for
play3855
AHCTRF206 Assist with turf construction.....3859
Assessment Requirements for AHCTRF206 Assist with turf construction.....3862
AHCTRF207 Renovate grassed areas3865
Assessment Requirements for AHCTRF207 Renovate grassed areas3868
AHCTRF208 Support turf establishment3871
Assessment Requirements for AHCTRF208 Support turf establishment.....3874
AHCTRF301 Construct turf playing surfaces3877
Assessment Requirements for AHCTRF301 Construct turf playing surfaces3880
AHCTRF302 Establish turf.....3882
Assessment Requirements for AHCTRF302 Establish turf.....3884
AHCTRF303 Implement a grassed area maintenance program3886
Assessment Requirements for AHCTRF303 Implement a grassed area maintenance
program.....3888
AHCTRF304 Monitor turf health.....3890
Assessment Requirements for AHCTRF304 Monitor turf health3892
AHCTRF305 Renovate sports turf3894
Assessment Requirements for AHCTRF305 Renovate sports turf.....3896
AHCTRF306 Prepare sports turf surfaces for play3898
Assessment Requirements for AHCTRF306 Prepare sports turf surfaces for play3901

AHCTRF307 Construct turf playing surfaces3905
Assessment Requirements for AHCTRF307 Construct turf playing surfaces3909
AHCTRF308 Establish turf.....3913
Assessment Requirements for AHCTRF308 Establish turf.....3917
AHCTRF309 Implement a grassed area maintenance program3920
Assessment Requirements for AHCTRF309 Implement a grassed area maintenance program.....3923
AHCTRF310 Monitor turf health.....3926
Assessment Requirements for AHCTRF310 Monitor turf health3929
AHCTRF311 Renovate sports turf3932
Assessment Requirements for AHCTRF311 Renovate sports turf.....3935
AHCTRF403 Develop a sports turf maintenance program.....3939
Assessment Requirements for AHCTRF403 Develop a sports turf maintenance program.....3942
AHCTRF404 Plan and implement sports turf renovation.....3946
Assessment Requirements for AHCTRF404 Plan and implement sports turf renovation.....3949
AHCTRF505 Plan the establishment of sports turf playing surfaces3952
Assessment Requirements for AHCTRF505 Plan the establishment of sports turf playing surfaces.....3956
AHCTRF506 Manage sports turf renovation programs3961
Assessment Requirements for AHCTRF506 Manage sports turf renovation programs3964
AHCTRF507 Develop sports turf management programs3968
Assessment Requirements for AHCTRF507 Develop sports turf management programs.....3971
AHCTRF508 Manage sports turf facility assets.....3974
Assessment Requirements for AHCTRF508 Manage sports turf facility assets3977
AHCWAT201 Set up, operate and maintain water delivery systems for compost.....3979
Assessment Requirements for AHCWAT201 Set up, operate and maintain water delivery systems for compost.....3981
AHCWAT301 Monitor and operate water treatment processes.....3983
Assessment Requirements for AHCWAT301 Monitor and operate water treatment processes.....3985
AHCWAT302 Monitor and operate water treatment processes.....3987
Assessment Requirements for AHCWAT302 Monitor and operate water treatment processes.....3990
AHCWAT503 Manage water systems.....3992
Assessment Requirements for AHCWAT503 Manage water systems3996
AHCWAT504 Design water treatment systems3998
Assessment Requirements for AHCWAT504 Design water treatment systems4002
AHCWHS502 Manage work health and safety processes4004
Assessment Requirements for AHCWHS502 Manage work health and safety processes.....4008
AHCWRK203 Operate in isolated and remote situations4010
Assessment Requirements for AHCWRK203 Operate in isolated and remote situations.....4013
AHCWRK503 Prepare reports.....4015
Assessment Requirements for AHCWRK503 Prepare reports4018
AHCWRK505 Manage trial and research material.....4020
Assessment Requirements for AHCWRK505 Manage trial and research material.....4022
AHCWRK512 Plan, implement and review a quality assurance program.....4024
Assessment Requirements for AHCWRK512 Plan, implement and review a quality assurance program4027
AHCWRK513 Write and present reports.....4029
Assessment Requirements for AHCWRK513 Write and present reports4032
AHCWRK514 Manage trial and research material.....4034
Assessment Requirements for AHCWRK514 Manage trial and research material.....4037
ACMEQU202 Handle horses safely4039

Assessment Requirements for ACMEQU202 Handle horses safely.....	4043
ACMEQU205 Apply knowledge of horse behaviour.....	4045
Assessment Requirements for ACMEQU205 Apply knowledge of horse behaviour	4048
ACMEQU206 Perform horse riding skills at walk, trot and canter	4050
Assessment Requirements for ACMEQU206 Perform horse riding skills at walk, trot and canter.....	4054
ACMGAS305 Rescue animals and apply basic first aid.....	4057
Assessment Requirements for ACMGAS305 Rescue animals and apply basic first aid	4060
ACMGAS308 Communicate effectively with clients and team members	4062
Assessment Requirements for ACMGAS308 Communicate effectively with clients and team members.....	4065
ACMGEN309 Provide basic animal first aid	4067
Assessment Requirements for ACMGEN309 Provide basic animal first aid	4070
ACMGEN311 Maintain and monitor animal health and wellbeing	4072
Assessment Requirements for ACMGEN311 Maintain and monitor animal health and wellbeing.....	4076
ACMGEN312 Provide nutritional requirements for animals.....	4079
Assessment Requirements for ACMGEN312 Provide nutritional requirements for animals.....	4083
AHCAIS302 Process and store semen.....	4085
Assessment Requirements for AHCAIS302 Process and store semen	4088
AHCASW301 Protect places of Aboriginal cultural significance	4090
Assessment Requirements for AHCASW301 Protect places of Aboriginal cultural significance	4093
AHCASW302 Relate Aboriginal culture to sites work.....	4095
Assessment Requirements for AHCASW302 Relate Aboriginal culture to sites work	4098
AHCASW303 Identify and record Aboriginal sites, objects and cultural landscapes....	4100
Assessment Requirements for AHCASW303 Identify and record Aboriginal sites, objects and cultural landscapes.....	4103
AHCASW304 Identify Indigenous culturally significant plants	4105
Assessment Requirements for AHCASW304 Identify Indigenous culturally significant plants	4108
AHCASW305 Work with Aboriginal ceremonial secret sacred materials.....	4110
Assessment Requirements for AHCASW305 Work with Aboriginal ceremonial secret sacred materials	4113
AHCASW306 Use technology in Aboriginal sites work	4115
Assessment Requirements for AHCASW306 Use technology in Aboriginal sites work	4118
AHCASW307 Support the documentation of Aboriginal cultural landscapes	4120
Assessment Requirements for AHCASW307 Support the documentation of Aboriginal cultural landscapes	4123
AHCASW308 Apply cultural significance to Aboriginal sites and landscapes	4125
Assessment Requirements for AHCASW308 Apply cultural significance to Aboriginal sites and landscapes	4128
AHCASW309 Interpret Aboriginal cultural landscape	4130
Assessment Requirements for AHCASW309 Interpret Aboriginal cultural landscape	4133
AHCASW310 Move and store Aboriginal cultural material.....	4135
Assessment Requirements for AHCASW310 Move and store Aboriginal cultural material.....	4138
AHCASW312 Maintain an Aboriginal cultural site.....	4140
Assessment Requirements for AHCASW312 Maintain an Aboriginal cultural site	4143
AHCASW313 Apply knowledge of relevant legislation to Aboriginal sites work	4145
Assessment Requirements for AHCASW313 Apply knowledge of relevant legislation to Aboriginal sites work.....	4148
AHCASW501 Survey and report on Aboriginal cultural sites	4150

Assessment Requirements for AHCASW501 Survey and report on Aboriginal cultural sites.....	4154
AHCBEK203 Open and reassemble a beehive.....	4156
Assessment Requirements for AHCBEK203 Open and reassemble a beehive.....	4159
AHCBEK205 Prepare and use a bee smoker.....	4161
Assessment Requirements for AHCBEK205 Prepare and use a bee smoker.....	4164
AHCBEK206 Assemble and maintain beekeeping components.....	4166
Assessment Requirements for AHCBEK206 Assemble and maintain beekeeping components.....	4169
AHCBEK301 Manage honey bee swarms.....	4172
Assessment Requirements for AHCBEK301 Manage honey bee swarms.....	4175
AHCBEK302 Manipulate honey bee brood.....	4177
Assessment Requirements for AHCBEK302 Manipulate honey bee brood.....	4180
AHCBEK303 Re-queen a honey bee colony.....	4182
Assessment Requirements for AHCBEK303 Re-queen a honey bee colony.....	4185
AHCBEK304 Remove a honey crop from a hive.....	4188
Assessment Requirements for AHCBEK304 Remove a honey crop from a hive.....	4191
AHCBEK307 Collect and store propolis.....	4194
Assessment Requirements for AHCBEK307 Collect and store propolis.....	4197
AHCBEK308 Produce and harvest royal jelly.....	4199
Assessment Requirements for AHCBEK308 Produce and harvest royal jelly.....	4202
AHCBEK309 Trap and store pollen.....	4204
Assessment Requirements for AHCBEK309 Trap and store pollen.....	4207
AHCBEK310 Process raw wax into moulds.....	4209
Assessment Requirements for AHCBEK310 Process raw wax into moulds.....	4213
AHCBEK311 Transport bee hives by road to new apiary site.....	4216
Assessment Requirements for AHCBEK311 Transport bee hives by road to new apiary site.....	4220
AHCBEK312 Extract honey.....	4224
Assessment Requirements for AHCBEK312 Extract honey.....	4228
AHCBEK313 Manage pests and disease within a honey bee colony.....	4231
Assessment Requirements for AHCBEK313 Manage pests and disease within a honey bee colony.....	4234
AHCBEK402 Perform queen bee artificial insemination.....	4237
Assessment Requirements for AHCBEK402 Perform queen bee artificial insemination.....	4240
AHCBEK405 Select and establish an apiary site.....	4242
Assessment Requirements for AHCBEK405 Select and establish an apiary site.....	4245
AHCBEK408 Provide bee pollination services.....	4248
Assessment Requirements for AHCBEK408 Provide bee pollination services.....	4251
AHCBEK409 Rear queen bees.....	4253
Assessment Requirements for AHCBEK409 Rear queen bees.....	4256
AHCBUS301 Use hand held e-business tools.....	4258
Assessment Requirements for AHCBUS301 Use hand held e-business tools.....	4260
AHCCCF401 Prepare project acquittal.....	4262
Assessment Requirements for AHCCCF401 Prepare project acquittal.....	4264
AHCCCF402 Report on project.....	4265
Assessment Requirements for AHCCCF402 Report on project.....	4267
AHCCCF403 Obtain and manage sponsorship.....	4269
Assessment Requirements for AHCCCF403 Obtain and manage sponsorship.....	4272
AHCCCF404 Contribute to association governance.....	4274
Assessment Requirements for AHCCCF404 Contribute to association governance.....	4276
AHCCCF405 Develop community networks.....	4278
Assessment Requirements for AHCCCF405 Develop community networks.....	4281

AHCCCF406 Facilitate ongoing group development.....4283
Assessment Requirements for AHCCCF406 Facilitate ongoing group development.....4285
AHCCCF407 Obtain resources from community and groups.....4287
Assessment Requirements for AHCCCF407 Obtain resources from community and groups.....4289
AHCCCF408 Promote community programs.....4291
Assessment Requirements for AHCCCF408 Promote community programs.....4294
AHCCCF409 Participate in assessments of project submissions.....4296
Assessment Requirements for AHCCCF409 Participate in assessments of project submissions.....4298
AHCCCF410 Support individuals in resource management change processes.....4300
Assessment Requirements for AHCCCF410 Support individuals in resource management change processes.....4302
AHCCCF411 Develop approaches to include cultural and human diversity.....4304
Assessment Requirements for AHCCCF411 Develop approaches to include cultural and human diversity.....4307
AHCCCF415 Coordinate social events to support group purposes.....4309
Assessment Requirements for AHCCCF415 Coordinate social events to support group purposes.....4311
AHCCCF416 Present proposed courses of action to meeting.....4313
Assessment Requirements for AHCCCF416 Present proposed courses of action to meeting.....4315
AHCCCF501 Evaluate project submissions.....4316
Assessment Requirements for AHCCCF501 Evaluate project submissions.....4319
AHCCCF502 Facilitate development of group goals and projects.....4321
Assessment Requirements for AHCCCF502 Facilitate development of group goals and projects.....4324
AHCCCF503 Promote group formation and development.....4326
Assessment Requirements for AHCCCF503 Promote group formation and development.....4329
AHCCCF504 Support group and community changes in resource management.....4331
Assessment Requirements for AHCCCF504 Support group and community changes in resource management.....4333
AHCCCF505 Contribute to regional planning process.....4334
Assessment Requirements for AHCCCF505 Contribute to regional planning process.....4336
AHCCCF506 Manage the incorporation of a group.....4338
Assessment Requirements for AHCCCF506 Manage the incorporation of a group.....4340
AHCCCF601 Coordinate the development of regional plans.....4342
Assessment Requirements for AHCCCF601 Coordinate the development of regional plans.....4345
AHCCHM101 Follow basic chemical safety rules.....4347
Assessment Requirements for AHCCHM101 Follow basic chemical safety rules.....4350
AHCCHM201 Apply chemicals under supervision.....4352
Assessment Requirements for AHCCHM201 Apply chemicals under supervision.....4356
AHCCHM304 Transport and store chemicals.....4359
Assessment Requirements for AHCCHM304 Transport and store chemicals.....4363
AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases.....4366
Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases.....4370
AHCCHM308 Use application equipment to apply fumigant in confined spaces.....4374
Assessment Requirements for AHCCHM308 Use application equipment to apply fumigant in confined spaces.....4378
AHCCHM309 Fumigate soil.....4381
Assessment Requirements for AHCCHM309 Fumigate soil.....4385
AHCCHM310 Conduct manual fumigation of vertebrate and invertebrate pests.....4388

Assessment Requirements for AHCCHM310 Conduct manual fumigation of vertebrate and invertebrate pests.....	4392
AHCCHM403 Prepare safe operating procedures for calibration of equipment.....	4395
Assessment Requirements for AHCCHM403 Prepare safe operating procedures for calibration of equipment.....	4398
AHCCHM404 Develop procedures to minimise risks in the use of chemicals	4400
Assessment Requirements for AHCCHM404 Develop procedures to minimise risks in the use of chemicals	4404
AHCCHM405 Plan and implement a chemical use program.....	4407
Assessment Requirements for AHCCHM405 Plan and implement a chemical use program.....	4411
AHCCHM501 Develop and manage a chemical use strategy	4414
Assessment Requirements for AHCCHM501 Develop and manage a chemical use strategy.....	4418
AHCCOM201 Assess and receive raw materials for composting	4421
Assessment Requirements for AHCCOM201 Assess and receive raw materials for composting.....	4424
AHCCOM202 Recognise and respond to fire emergencies on a composting site.....	4426
Assessment Requirements for AHCCOM202 Recognise and respond to fire emergencies on a composting site	4429
AHCCOM203 Recognise raw materials, production processes and products on a composting site	4431
Assessment Requirements for AHCCOM203 Recognise raw materials, production processes and products on a composting site.....	4434
AHCCOM301 Operate compost processing plant, machinery and equipment.....	4436
Assessment Requirements for AHCCOM301 Operate compost processing plant, machinery and equipment	4439
AHCCOM401 Develop a composting recipe	4441
Assessment Requirements for AHCCOM401 Develop a composting recipe.....	4444
AHCCOM402 Plan and schedule compost production	4446
Assessment Requirements for AHCCOM402 Plan and schedule compost production.....	4448
AHCFAU501 Manage fauna populations	4450
Assessment Requirements for AHCFAU501 Manage fauna populations	4454
AHCHYD301 Implement a maintenance program for hydroponic systems.....	4456
Assessment Requirements for AHCHYD301 Implement a maintenance program for hydroponic systems.....	4458
AHCHYD302 Install hydroponic systems	4460
Assessment Requirements for AHCHYD302 Install hydroponic systems	4462
AHCHYD501 Develop a plan for a hydroponic system.....	4464
Assessment Requirements for AHCHYD501 Develop a plan for a hydroponic system	4467
AHCILM201 Maintain cultural places	4469
Assessment Requirements for AHCILM201 Maintain cultural places.....	4471
AHCILM202 Observe and report plants or animals.....	4473
Assessment Requirements for AHCILM202 Observe and report plants or animals	4476
AHCILM203 Record information about Country	4478
Assessment Requirements for AHCILM203 Record information about Country.....	4481
AHCILM302 Provide appropriate information on cultural knowledge	4483
Assessment Requirements for AHCILM302 Provide appropriate information on cultural knowledge	4486
AHCILM305 Work with an Aboriginal Community or organisation	4488
Assessment Requirements for AHCILM305 Work with an Aboriginal Community or organisation.....	4491
AHCILM306 Follow Aboriginal cultural protocols	4493
Assessment Requirements for AHCILM306 Follow Aboriginal cultural protocols	4497
AHCILM307 Implement Aboriginal cultural burning practices.....	4499

Assessment Requirements for AHCILM307 Implement Aboriginal cultural burning practices.....	4502
AHCILM308 Identify traditional customs and land rights for an Indigenous Community	4504
Assessment Requirements for AHCILM308 Identify traditional customs and land rights for an Indigenous Community	4506
AHCILM401 Protect places of cultural significance	4508
Assessment Requirements for AHCILM401 Protect places of cultural significance	4511
AHCILM402 Report on place of potential cultural significance	4513
Assessment Requirements for AHCILM402 Report on place of potential cultural significance	4516
AHCILM403 Contribute to the proposal for a negotiated outcome for a given area of Country	4518
Assessment Requirements for AHCILM403 Contribute to the proposal for a negotiated outcome for a given area of Country	4521
AHCILM404 Record and document Community history	4523
Assessment Requirements for AHCILM404 Record and document Community history	4526
AHCILM405 Develop work practices to accommodate cultural identity	4528
Assessment Requirements for AHCILM405 Develop work practices to accommodate cultural identity	4531
AHCILM501 Conduct field research into natural and cultural resources	4533
Assessment Requirements for AHCILM501 Conduct field research into natural and cultural resources	4537
AHCILM502 Develop conservation strategies for cultural resources	4539
Assessment Requirements for AHCILM502 Develop conservation strategies for cultural resources.....	4542
AHCILM503 Manage restoration of cultural places.....	4544
Assessment Requirements for AHCILM503 Manage restoration of cultural places	4547
AHCILM504 Develop strategies for Indigenous land or sea management	4549
Assessment Requirements for AHCILM504 Develop strategies for Indigenous land or sea management	4552
AHCILM505 Map relationship of business enterprise to culture and Country.....	4554
Assessment Requirements for AHCILM505 Map relationship of business enterprise to culture and Country	4557
AHCILM506 Operate within Community cultures and goals	4559
Assessment Requirements for AHCILM506 Operate within Community cultures and goals.....	4561
AHCILM508 Propose a negotiated outcome for a given area of Country	4563
Assessment Requirements for AHCILM508 Propose a negotiated outcome for a given area of Country	4566
AHCILM510 Plan for successful cultural practice at work	4568
Assessment Requirements for AHCILM510 Plan for successful cultural practice at work	4571
AHCILM601 Manage cultural processes in an Indigenous organisation	4573
Assessment Requirements for AHCILM601 Manage cultural processes in an Indigenous organisation.....	4576
AHCINF201 Carry out basic electric fencing operations	4578
Assessment Requirements for AHCINF201 Carry out basic electric fencing operations	4581
AHCINF202 Install, maintain and repair farm fencing	4583
Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing.	4586
AHCINF203 Maintain properties and structures	4588
Assessment Requirements for AHCINF203 Maintain properties and structures.....	4590
AHCINF204 Fabricate and repair metal or plastic structures	4592
Assessment Requirements for AHCINF204 Fabricate and repair metal or plastic structures.....	4594

AHCINF301 Implement property improvement, construction and repair	4596
Assessment Requirements for AHCINF301 Implement property improvement, construction and repair.....	4599
AHCINF302 Plan and construct an electric fence.....	4601
Assessment Requirements for AHCINF302 Plan and construct an electric fence	4604
AHCINF303 Plan and construct conventional fencing.....	4606
Assessment Requirements for AHCINF303 Plan and construct conventional fencing ..	4608
AHCINF304 Install and terminate extra low voltage wiring systems.....	4610
Assessment Requirements for AHCINF304 Install and terminate extra low voltage wiring systems.....	4613
AHCLSK101 Support extensive livestock work.....	4615
Assessment Requirements for AHCLSK101 Support extensive livestock work	4618
AHCLSK102 Support intensive livestock work	4620
Assessment Requirements for AHCLSK102 Support intensive livestock work.....	4623
AHCLSK201 Assist with feeding in a production system.....	4625
Assessment Requirements for AHCLSK201 Assist with feeding in a production system	4627
AHCLSK202 Care for health and welfare of livestock.....	4629
Assessment Requirements for AHCLSK202 Care for health and welfare of livestock ..	4632
AHCLSK204 Carry out regular livestock observation.....	4634
Assessment Requirements for AHCLSK204 Carry out regular livestock observation ..	4637
AHCLSK205 Handle livestock using basic techniques.....	4639
Assessment Requirements for AHCLSK205 Handle livestock using basic techniques ..	4642
AHCLSK206 Identify and mark livestock	4644
Assessment Requirements for AHCLSK206 Identify and mark livestock.....	4647
AHCLSK207 Load and unload livestock	4649
Assessment Requirements for AHCLSK207 Load and unload livestock	4652
AHCLSK209 Monitor water supplies	4654
Assessment Requirements for AHCLSK209 Monitor water supplies.....	4657
AHCLSK210 Muster and move livestock	4659
Assessment Requirements for AHCLSK210 Muster and move livestock	4662
AHCLSK211 Provide feed for livestock.....	4664
Assessment Requirements for AHCLSK211 Provide feed for livestock	4667
AHCLSK213 Clean out production sheds.....	4669
Assessment Requirements for AHCLSK213 Clean out production sheds	4672
AHCLSK214 Maintain production growing environments.....	4674
Assessment Requirements for AHCLSK214 Maintain production growing environments	4677
AHCLSK215 Carry out alpaca handling and husbandry operations	4679
Assessment Requirements for AHCLSK215 Carry out alpaca handling and husbandry operations	4682
AHCLSK216 Clean and maintain livestock pens	4684
Assessment Requirements for AHCLSK216 Clean and maintain livestock pens	4687
AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock	4689
Assessment Requirements for AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock	4691
AHCLSK218 Ride educated horses to carry out basic stock work.....	4693
Assessment Requirements for AHCLSK218 Ride educated horses to carry out basic stock work	4697
AHCLSK301 Administer medication to livestock	4700
Assessment Requirements for AHCLSK301 Administer medication to livestock.....	4703
AHCLSK303 Carry out feedlot operations	4705
Assessment Requirements for AHCLSK303 Carry out feedlot operations.....	4708
AHCLSK304 Carry out post-mortem examination of livestock.....	4710

Assessment Requirements for AHCLSK304 Carry out post-mortem examination of livestock.....	4713
AHCLSK305 Maintain livestock water supplies.....	4715
Assessment Re quirements for AHCLSK305 Maintain livestock water supplies.....	4717
AHCLSK306 Coordinate and monitor production performance	4719
Assessment Requirements for AHCLSK306 Coordinate and monitor production performance	4722
AHCLSK307 Euthanase livestock	4724
Assessment Re quirements for AHCLSK307 Euthanase livestock	4727
AHCLSK308 Identify and draft livestock.....	4729
Assessment Re quirements for AHCLSK308 Identify and draft livestock	4731
AHCLSK309 Implement animal health control programs.....	4733
Assessment Re quirements for AHCLSK309 Implement animal health control programs.....	4736
AHCLSK310 Implement feeding plans for intensive production.....	4738
Assessment Requirements for AHCLSK310 Implement feeding plans for intensive production	4740
AHCLSK311 Implement feeding plans for livestock.....	4742
Assessment Re quirements for AHCLSK311 Implement feeding plans for livestock	4745
AHCLSK313 Monitor livestock production growing environments.....	4747
Assessment Requirements for AHCLSK313 Monitor livestock production growing environments	4749
AHCLSK316 Prepare livestock for competition.....	4751
Assessment Re quirements for AHCLSK316 Prepare livestock for competition.....	4754
AHCLSK317 Plan to exhibit livestock	4756
Assessment Re quirements for AHCLSK317 Plan to exhibit livestock.....	4759
AHCLSK318 Rear newborn and young livestock	4761
Assessment Re quirements for AHCLSK318 Rear newborn and young livestock.....	4764
AHCLSK319 Slaughter livestock.....	4766
Assessment Re quirements for AHCLSK319 Slaughter livestock	4768
AHCLSK320 Coordinate and monitor livestock transport	4770
Assessment Re quirements for AHCLSK320 Coordinate and monitor livestock transport.....	4773
AHCLSK321 Service and repair bores and windmills	4775
Assessment Re quirements for AHCLSK321 Service and repair bores and windmills	4778
AHCLSK322 Transport farm produce or bulk materials.....	4780
Assessment Re quirements for AHCLSK322 Transport farm produce or bulk materials.....	4783
AHCLSK323 Maintain and monitor feed stocks.....	4785
Assessment Re quirements for AHCLSK323 Maintain and monitor feed stocks	4788
AHCLSK324 Care for and train working dogs.....	4790
Assessment Re quirements for AHCLSK324 Care for and train working dogs	4793
AHCLSK325 Castrate livestock	4795
Assessment Re quirements for AHCLSK325 Castrate livestock	4798
AHCLSK326 Mix and mill standard stockfeed.....	4800
Assessment Re quirements for AHCLSK326 Mix and mill standard stockfeed	4803
AHCLSK327 Collect, store and administer colostrum.....	4805
Assessment Re quirements for AHCLSK327 Collect, store and administer colostrum	4807
AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system.....	4809
Assessment Requirements for AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system	4812
AHCLSK331 Comply with industry animal welfare requirements	4814
Assessment Requirements for AHCLSK331 Comply with industry animal welfare requirements.....	4817
AHCLSK332 Monitor animals in intensive production systems	4819

Assessment Requirements for AHCLSK332 Monitor animals in intensive production systems.....4822

AHCLSK333 Monitor pen condition and ration suitability4824

Assessment Re quirements for AHCLSK333 Monitor pen condition and ration suitability4827

AHCLSK334 Plan, prepare and conduct mulesing procedures4829

Assessment Requirements for AHCLSK334 Plan, prepare and conduct mulesing procedures4833

AHCLSK337 Train, care for and ride horses for stock work.....4835

Assessment Re quirements for AHCLSK337 Train, care for and ride horses for stock work4840

AHCLSK401 Develop feeding plans for a production system.....4843

Assessment Re quirements for AHCLSK401 Develop feeding plans for a production system4847

AHCLSK402 Develop livestock feeding plans.....4849

Assessment Re quirements for AHCLSK402 Develop livestock feeding plans4852

AHCLSK404 Implement and monitor animal welfare programs.....4854

Assessment Requirements for AHCLSK404 Implement and monitor animal welfare programs4857

AHCLSK405 Implement intensive production systems4859

Assessment Re quirements for AHCLSK405 Implement intensive production systems .4863

AHCLSK406 Oversee animal marking operations4865

Assessment Re quirements for AHCLSK406 Oversee animal marking operations4868

AHCLSK407 Plan and monitor intensive production systems4870

Assessment Requirements for AHCLSK407 Plan and monitor intensive production systems.....4873

AHCLSK409 Supervise animal health programs.....4875

Assessment Re quirements for AHCLSK409 Supervise animal health programs4878

AHCLSK410 Supervise feedlot operations4880

Assessment Re quirements for AHCLSK410 Supervise feedlot operations4883

AHCLSK412 Arrange livestock purchases.....4885

Assessment Re quirements for AHCLSK412 Arrange livestock purchases.....4888

AHCLSK413 Design livestock handling facilities.....4890

Assessment Re quirements for AHCLSK413 Design livestock handling facilities4893

AHCLSK414 Arrange transport for farm produce or livestock4895

Assessment Requirements for AHCLSK414 Arrange transport for farm produce or livestock.....4898

AHCLSK418 Escort livestock during export.....4900

Assessment Re quirements for AHCLSK418 Escort livestock during export.....4904

AHCLSK419 Manage horses for stock work4906

Assessment Re quirements for AHCLSK419 Manage horses for stock work.....4910

AHCLSK501 Manage livestock production.....4912

Assessment Re quirements for AHCLSK501 Manage livestock production.....4916

AHCLSK502 Arrange marketing of livestock4918

Assessment Re quirements for AHCLSK502 Arrange marketing of livestock4921

AHCLSK504 Develop livestock health and welfare strategies4923

Assessment Requirements for AHCLSK504 Develop livestock health and welfare strategies.....4926

AHCLSK506 Design livestock effluent systems4928

Assessment Re quirements for AHCLSK506 Design livestock effluent systems4931

AHCMER301 Process customer complaints4933

Assessment Re quirements for AHCMER301 Process customer complaints.....4935

AHCMKH401 Carry out cleaning-time tests of milking machines.....4937

Assessment Requirements for AHCMKH401 Carry out cleaning-time tests of milking machines.....4939

AHCMKH402 Design and fabricate milking equipment installations4941

Assessment Requirements for AHCMKH402 Design and fabricate milking equipment installations.....4944

AHCMKH403 Design and install enterprise milk cooling and storage.....4946

Assessment Requirements for AHCMKH403 Design and install enterprise milk cooling and storage4949

AHCMKH404 Install milking equipment.....4951

Assessment Requirements for AHCMKH404 Install milking equipment.....4954

AHCMKH405 Performance test milking machines4956

Assessment Requirements for AHCMKH405 Performance test milking machines4958

AHCMOM101 Assist with routine maintenance of machinery and equipment.....4960

Assessment Requirements for AHCMOM101 Assist with routine maintenance of machinery and equipment4964

AHCMOM201 Operate two wheel motorbikes.....4966

Assessment Requirements for AHCMOM201 Operate two wheel motorbikes.....4970

AHCMOM202 Operate tractors.....4973

Assessment Requirements for AHCMOM202 Operate tractors4977

AHCMOM203 Operate basic machinery and equipment.....4979

Assessment Requirements for AHCMOM203 Operate basic machinery and equipment.....4983

AHCMOM204 Undertake operational maintenance of machinery.....4985

Assessment Requirements for AHCMOM204 Undertake operational maintenance of machinery.....4989

AHCMOM205 Operate vehicles.....4991

Assessment Requirements for AHCMOM205 Operate vehicles.....4995

AHCMOM206 Conduct grader operations.....4997

Assessment Requirements for AHCMOM206 Conduct grader operations5001

AHCMOM207 Conduct front-end loader operations5003

Assessment Requirements for AHCMOM207 Conduct front-end loader operations ...5007

AHCMOM208 Conduct excavator operations.....5009

Assessment Requirements for AHCMOM208 Conduct excavator operations.....5013

AHCMOM209 Conduct dozer operations5015

Assessment Requirements for AHCMOM209 Conduct dozer operations5019

AHCMOM210 Conduct scraper operations5021

Assessment Requirements for AHCMOM210 Conduct scraper operations5025

AHCMOM213 Operate and maintain chainsaws.....5027

Assessment Requirements for AHCMOM213 Operate and maintain chainsaws5032

AHCMOM214 Operate cane haulage vehicle5035

Assessment Requirements for AHCMOM214 Operate cane haulage vehicle.....5039

AHCMOM215 Operate commercial lawnmowers5042

Assessment Requirements for AHCMOM215 Operate commercial lawnmowers.....5046

AHCMOM216 Operate side by side utility vehicles.....5048

Assessment Requirements for AHCMOM216 Operate side by side utility vehicles.....5052

AHCMOM217 Operate quad bikes5055

Assessment Requirements for AHCMOM217 Operate quad bikes.....5059

AHCMOM301 Coordinate machinery and equipment maintenance and repair.....5062

Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair5066

AHCMOM302 Perform machinery maintenance5068

Assessment Requirements for AHCMOM302 Perform machinery maintenance5072

AHCMOM304 Operate machinery and equipment.....5074

Assessment Requirements for AHCMOM304 Operate machinery and equipment.....5078

AHCMOM305 Operate specialised machinery and equipment5080

Assessment Requirements for AHCMOM305 Operate specialised machinery and equipment.....5084

AHCMOM306 Ground spread fertiliser and soil ameliorant.....	5086
Assessment Requirements for AHCMOM306 Ground spread fertiliser and soil ameliorant.....	5091
AHCMOM307 Operate a cane harvester.....	5094
Assessment Requirements for AHCMOM307 Operate a cane harvester.....	5098
AHCMOM308 Operate broadacre and row crop harvest machinery and equipment...5101	
Assessment Requirements for AHCMOM308 Operate broadacre and row crop harvest machinery and equipment	5105
AHCMOM309 Operate broadacre sowing machinery and equipment	5108
Assessment Requirements for AHCMOM309 Operate broadacre sowing machinery and equipment.....	5112
AHCMOM310 Operate land-forming machinery and equipment	5114
Assessment Requirements for AHCMOM310 Operate land-forming machinery and equipment.....	5118
AHCMOM311 Operate precision control technology.....	5121
Assessment Requirements for AHCMOM311 Operate precision control technology....	5125
AHCMOM312 Operate row crop planting and seeding machinery and equipment.....	5127
Assessment Requirements for AHCMOM312 Operate row crop planting and seeding machinery and equipment	5131
AHCMOM313 Operate mobile irrigation machinery and equipment.....	5134
Assessment Requirements for AHCMOM313 Operate mobile irrigation machinery and equipment.....	5138
AHCMOM314 Transport machinery	5140
Assessment Requirements for AHCMOM314 Transport machinery	5143
AHCMOM315 Operate chemical application machinery and equipment.....	5145
Assessment Requirements for AHCMOM315 Operate chemical application machinery and equipment.....	5149
AHCMOM316 Refuel machinery or vehicle	5152
Assessment Requirements for AHCMOM316 Refuel machinery or vehicle.....	5156
AHCMOM317 Operate tractors with attachments.....	5159
Assessment Requirements for AHCMOM317 Operate tractors with attachments.....	5163
AHCMOM401 Conduct major repair and overhaul of machinery and equipment.....	5166
Assessment Requirements for AHCMOM401 Conduct major repair and overhaul of machinery and equipment	5170
AHCMOM402 Supervise maintenance of property, machinery and equipment.....	5172
Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment	5176
AHCMOM501 Manage machinery and equipment	5178
Assessment Requirements for AHCMOM501 Manage machinery and equipment.....	5181
AHCMOM502 Implement a machinery management system.....	5183
Assessment Requirements for AHCMOM502 Implement a machinery management system.....	5187
AHCMOM601 Analyse machinery options.....	5189
Assessment Requirements for AHCMOM601 Analyse machinery options	5192
AHCNRM301 Establish an Australian native stingless bee colony	5194
Assessment Requirements for AHCNRM301 Establish an Australian native stingless bee colony	5197
AHCNRM503 Support the implementation of waterways strategies	5200
Assessment Requirements for AHCNRM503 Support the implementation of waterways strategies.....	5203
AHCNRM504 Interpret and report on catchment hydrology	5206
Assessment Requirements for AHCNRM504 Interpret and report on catchment hydrology.....	5209
AHCNRM505 Provide technical advice on sustainable catchment management	5211

Assessment Requirements for AHCNRM505 Provide technical advice on sustainable catchment management.....	5214
AHCNRM603 Implement a monitoring, evaluation and reporting program	5217
Assessment Requirements for AHCNRM603 Implement a monitoring, evaluation and reporting program.....	5220
AHCORG101 Support organic production.....	5222
Assessment Requirements for AHCORG101 Support organic production	5225
AHCORG401 Manage biodynamic production	5227
Assessment Requirements for AHCORG401 Manage biodynamic production.....	5230
AHCORG402 Manage organic livestock production	5232
Assessment Requirements for AHCORG402 Manage organic livestock production.....	5236
AHCORG403 Manage organic soil improvement.....	5238
Assessment Requirements for AHCORG403 Manage organic soil improvement.....	5241
AHCORG404 Arrange selling through community based marketing.....	5243
Assessment Requirements for AHCORG404 Arrange selling through community based marketing	5246
AHCORG405 Implement sustainable practices in the organic farm based business.....	5248
Assessment Requirements for AHCORG405 Implement sustainable practices in the organic farm based business	5251
AHCORG406 Oversee compliance with an organic certification scheme.....	5253
Assessment Requirements for AHCORG406 Oversee compliance with an organic certification scheme	5256
AHCORG408 Manage on farm composting.....	5258
Assessment Requirements for AHCORG408 Manage on farm composting	5261
AHCORG503 Design and document an organic farm landscape	5263
Assessment Requirements for AHCORG503 Design and document an organic farm landscape	5266
AHCORG504 Develop and manage a community based marketing supply chain.....	5268
Assessment Requirements for AHCORG504 Develop and manage a community based marketing supply chain.....	5271
AHCORG505 Develop and monitor a sustainable production plan	5273
Assessment Requirements for AHCORG505 Develop and monitor a sustainable production plan	5276
AHCORG506 Manage an agroecology production system.....	5278
Assessment Requirements for AHCORG506 Manage an agroecology production system.....	5281
AHCPCM202 Collect, prepare and preserve plant specimens	5283
Assessment Requirements for AHCPCM202 Collect, prepare and preserve plant specimens.....	5286
AHCPCM303 Identify plant specimens	5288
Assessment Requirements for AHCPCM303 Identify plant specimens.....	5291
AHCPER101 Observe permaculture principles and work practices.....	5293
Assessment Requirements for AHCPER101 Observe permaculture principles and work practices.....	5296
AHCPER102 Support resource conservation practices	5298
Assessment Requirements for AHCPER102 Support resource conservation practices	5300
AHCPER103 Support plant care in a permaculture system	5302
Assessment Requirements for AHCPER103 Support plant care in a permaculture system.....	5305
AHCPER201 Work effectively in permaculture	5307
Assessment Requirements for AHCPER201 Work effectively in permaculture	5310
AHCPER202 Harvest, treat and store seed.....	5312
Assessment Requirements for AHCPER202 Harvest, treat and store seed.....	5314
AHCPER203 Record information about the local bioregion.....	5316
Assessment Requirements for AHCPER203 Record information about the local bioregion.....	5319

AHCPER204 Check and operate permaculture water systems.....5321
Assessment Requirements for AHCPER204 Check and operate permaculture water systems.....5323
AHCPER205 Prepare and store permaculture products5325
Assessment Requirements for AHCPER205 Prepare and store permaculture products5327
AHCPER206 Plant and maintain permaculture crops.....5329
Assessment Requirements for AHCPER206 Plant and maintain permaculture crops ..5331
AHCPER207 Care for animals in a permaculture system5333
Assessment Requirements for AHCPER207 Care for animals in a permaculture system5336
AHCPER208 Harvest permaculture crops5338
Assessment Requirements for AHCPER208 Harvest permaculture crops5340
AHCPER209 Recognise characteristics of integrated plant and animal systems5342
Assessment Requirements for AHCPER209 Recognise characteristics of integrated plant and animal systems5344
AHCPER214 Propagate plants for a permaculture garden system.....5346
Assessment Requirements for AHCPER214 Propagate plants for a permaculture garden system.....5349
AHCPER215 Assist with garden soil health and plant nutrition.....5351
Assessment Requirements for AHCPER215 Assist with garden soil health and plant nutrition.....5353
AHCPER301 Research and communicate information on permaculture principles and practices.....5355
Assessment Requirements for AHCPER301 Research and communicate information on permaculture principles and practices.....5357
AHCPER302 Develop recommendations for integrated plant and animal systems.....5359
Assessment Requirements for AHCPER302 Develop recommendations for integrated plant and animal systems5361
AHCPER303 Maintain integrated plant and animal systems5363
Assessment Requirements for AHCPER303 Maintain integrated plant and animal systems5366
AHCPER305 Implement crop maintenance and harvesting programs for permaculture systems.....5368
Assessment Requirements for AHCPER305 Implement crop maintenance and harvesting programs for permaculture systems5371
AHCPER306 Use weedy plants in a permaculture system.....5373
Assessment Requirements for AHCPER306 Use weedy plants in a permaculture system5376
AHCPER307 Establish a rural permaculture system5378
Assessment Requirements for AHCPER307 Establish a rural permaculture system....5381
AHCPER308 Establish an urban permaculture system.....5383
Assessment Requirements for AHCPER308 Establish an urban permaculture system 5386
AHCPER309 Install and maintain permaculture water systems.....5389
Assessment Requirements for AHCPER309 Install and maintain permaculture water systems.....5392
AHCPER310 Install structures for permaculture systems.....5395
Assessment Requirements for AHCPER310 Install structures for permaculture systems5398
AHCPER312 Plan organic garden and orchard systems5400
Assessment Requirements for AHCPER312 Plan organic garden and orchard systems5402
AHCPER313 Coordinate preparation and storage of permaculture products5404
Assessment Requirements for AHCPER313 Coordinate preparation and storage of permaculture products5407
AHCPER314 Read and interpret property maps and plans5410
Assessment Requirements for AHCPER314 Read and interpret property maps and plans5412
AHCPER315 Coordinate community projects.....5414
Assessment Requirements for AHCPER315 Coordinate community projects5417

AHCPER316 Select plant and animal species for permaculture systems	5419
Assessment Requirements for AHCPER316 Select plant and animal species for permaculture systems	5421
AHCPER318 Plan propagation activities for a permaculture system	5423
Assessment Requirements for AHCPER318 Plan propagation activities for a permaculture system.....	5426
AHCPER319 Test, improve and maintain healthy soil in a permaculture system.....	5428
Assessment Requirements for AHCPER319 Test, improve and maintain healthy soil in a permaculture system.....	5431
AHCPER320 Manage plant pests, diseases and disorders in a permaculture system....	5433
Assessment Requirements for AHCPER320 Manage plant pests, diseases and disorders in a permaculture system.....	5436
AHCPER321 Demonstrate permaculture practices to small groups of learners	5438
Assessment Requirements for AHCPER321 Demonstrate permaculture practices to small groups of learners	5441
AHCPER401 Provide advice on permaculture principles and practices	5443
Assessment Requirements for AHCPER401 Provide advice on permaculture principles and practices.....	5446
AHCPER402 Design a rural permaculture system.....	5448
Assessment Requirements for AHCPER402 Design a rural permaculture system.....	5451
AHCPER403 Design an urban permaculture system.....	5454
Assessment Requirements for AHCPER403 Design an urban permaculture system	5457
AHCPER404 Plan and implement permaculture works.....	5460
Assessment Requirements for AHCPER404 Plan and implement permaculture works	5463
AHCPER405 Select appropriate technology for a permaculture system.....	5465
Assessment Requirements for AHCPER405 Select appropriate technology for a permaculture system.....	5468
AHCPER406 Identify and analyse bioregional characteristics and resources.....	5470
Assessment Requirements for AHCPER406 Identify and analyse bioregional characteristics and resources	5473
AHCPER407 Design harvesting and storage systems for permaculture products.....	5475
Assessment Requirements for AHCPER407 Design harvesting and storage systems for permaculture products	5478
AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system.....	5481
Assessment Requirements for AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system.....	5484
AHCPER409 Manage a permaculture seed bank	5487
Assessment Requirements for AHCPER409 Manage a permaculture seed bank.....	5490
AHCPER410 Recommend approaches for sustainable community and bioregional development.....	5493
Assessment Requirements for AHCPER410 Recommend approaches for sustainable community and bioregional development.....	5496
AHCPER411 Operate within a sustainable community and bioregional development program.....	5498
Assessment Requirements for AHCPER411 Operate within a sustainable community and bioregional development program	5501
AHCPER413 Evaluate suitability of species as solutions for permaculture applications	5503
Assessment Requirements for AHCPER413 Evaluate suitability of species as solutions for permaculture applications	5506
AHCPER501 Carry out permaculture field research	5508
Assessment Requirements for AHCPER501 Carry out permaculture field research	5511
AHCPER502 Design an integrated permaculture system.....	5514

Assessment Requirements for AHCPER502 Design an integrated permaculture system5517

AHCPER503 Develop a strategic plan for a permaculture project or enterprise5520

Assessment Requirements for AHCPER503 Develop a strategic plan for a permaculture project or enterprise5523

AHCPER504 Manage a permaculture project or enterprise5527

Assessment Requirements for AHCPER504 Manage a permaculture project or enterprise5530

AHCPER505 Plan and supervise the implementation of permaculture project works..5533

Assessment Requirements for AHCPER505 Plan and supervise the implementation of permaculture project works.....5536

AHCPER507 Research and interpret requirements for a permaculture project.....5539

Assessment Requirements for AHCPER507 Research and interpret requirements for a permaculture project.....5542

AHCPER508 Manage a permaculture aid and development project.....5544

Assessment Requirements for AHCPER508 Manage a permaculture aid and development project5548

AHCPER509 Design permaculture structures and features5551

Assessment Requirements for AHCPER509 Design permaculture structures and features5554

AHCPER511 Facilitate participatory planning and learning activities.....5556

Assessment Requirements for AHCPER511 Facilitate participatory planning and learning activities.....5559

AHCPER512 Plan community governance and decision-making processes.....5561

Assessment Requirements for AHCPER512 Plan community governance and decision-making processes5564

AHCPGD205 Prepare a grave site.....5566

Assessment Requirements for AHCPGD205 Prepare a grave site5568

AHCPLY201 Collect store and handle eggs from breeder flocks5569

Assessment Requirements for AHCPLY201 Collect store and handle eggs from breeder flocks5572

AHCPLY202 Maintain health and welfare of poultry5574

Assessment Requirements for AHCPLY202 Maintain health and welfare of poultry ...5577

AHCPLY203 Set up shed for placement of day-old chickens.....5579

Assessment Requirements for AHCPLY203 Set up shed for placement of day-old chickens5582

AHCPLY204 Collect and pack eggs for human consumption.....5584

Assessment Requirements for AHCPLY204 Collect and pack eggs for human consumption5587

AHCPLY205 Grade and pack eggs for human consumption.....5589

Assessment Requirements for AHCPLY205 Grade and pack eggs for human consumption5592

AHCPLY206 Catch and load poultry5594

Assessment Requirements for AHCPLY206 Catch and load poultry.....5597

AHCPLY302 Brood poultry5599

Assessment Requirements for AHCPLY302 Brood poultry.....5602

AHCPLY304 Incubate eggs.....5604

Assessment Requirements for AHCPLY304 Incubate eggs.....5608

AHCPLY306 Clean and disinfect poultry production sheds.....5610

Assessment Requirements for AHCPLY306 Clean and disinfect poultry production sheds5613

AHCPLY307 Implement and monitor biosecurity measures in poultry production5615

Assessment Requirements for AHCPLY307 Implement and monitor biosecurity measures in poultry production.....5619

AHCPMG201 Treat weeds5621

Assessment Requirements for AHCPMG201 Treat weeds.....5624

AHCPMG202 Treat plant pests, diseases and disorders5627

Assessment Requirements for AHCPMG202 Treat plant pests, diseases and disorders5630

AHCPMG203 Work effectively in a pest management environment5633

Assessment Requirements for AHCPMG203 Work effectively in a pest management environment.....5637

AHCPMG301 Control weeds.....5640

Assessment Re quirements for AHCPMG301 Control weeds5644

AHCPMG302 Control plant pests, diseases and disorders.....5647

Assessment Re quirements for AHCPMG302 Control plant pests, diseases and disorders 5650

AHCPMG304 Use fire arms to humanely destroy animals5653

Assessment Re quirements for AHCPMG304 Use fire arms to humanely destroy animals 5657

AHCPMG305 Survey pests.....5660

Assessment Re quirements for AHCPMG305 Survey pests5663

AHCPMG306 De termine pest control techniques.....5665

Assessment Re quirements for AHCPMG306 De termine pest control techniques5668

AHCPMG307 Apply animal trapping techniques.....5670

Assessment Re quirements for AHCPMG307 Apply animal trapping techniques5674

AHCPMG308 Imple ment pest management strategies.....5677

Assessment Re quirements for AHCPMG308 Imple ment pest management strategies..5681

AHCPMG309 Apply pest animal control techniques5684

Assessment Re quirements for AHCPMG309 Apply pest animal control techniques5688

AHCPMG311 Use fire arms for pest control activities from aircraft5691

Assessment Re quirements for AHCPMG311 Use fire arms for pest control activities from aircraft.....5694

AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental lands capes.....5696

Assessment Re quirements for AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental lands capes5701

AHCPMG313 Pre pare, monitor and maintain biological agents for weeds.....5705

Assessment Re quirements for AHCPMG313 Pre pare, monitor and maintain biological agents for weeds.....5708

AHCPMG409 Imple ment a pest management plan5710

Assessment Re quirements for AHCPMG409 Imple ment a pest management plan5714

AHCPMG412 De velop a pest management plan.....5717

Assessment Re quirements for AHCPMG412 De velop a pest management plan5720

AHCPMG413 De fine the pest problem.....5722

Assessment Re quirements for AHCPMG413 De fine the pest problem5726

AHCPMG506 Manage the implementation of legislation5728

Assessment Re quirements for AHCPMG506 Manage the implementation of legislation 5731

AHCPMG508 De velop a system to monitor and evaluate the pest management plan ...5733

Assessment Re quirements for AHCPMG508 De velop a system to monitor and evaluate the pest management plan5736

AHCPMG510 De velop a pest survey strategy.....5738

Assessment Re quirements for AHCPMG510 De velop a pest survey strategy5741

AHCPRK201 Care for health and welfare of pigs5743

Assessment Re quirements for AHCPRK201 Care for health and welfare of pigs5746

AHCPRK203 Move and handle pigs.....5748

Assessment Re quirements for AHCPRK203 Move and handle pigs5750

AHCPRK204 Care for weaner pigs5752

Assessment Re quirements for AHCPRK204 Care for weaner pigs.....5755

AHCPRK302 Treat rectal prolapse in pigs5757

Assessment Re quirements for AHCPRK302 Treat rectal prolapse in pigs5759

AHCPRK305 Care for grower and finisher pigs.....5761

Assessment Re quirements for AHCPRK305 Care for grower and finisher pigs5764

AHCPRK306 Monitor and maintain outdoor pig production.....5766

Assessment Requirements for AHCPRK306 Monitor and maintain outdoor pig production	5769
AHCPRK401 Implement a feeding strategy for pig production.....	5771
Assessment Requirements for AHCPRK401 Implement a feeding strategy for pig production	5774
AHCSAW503 Plan conservation earthworks.....	5776
Assessment Requirements for AHCSAW503 Plan conservation earthworks	5779
AHCSHG201 Crutch sheep.....	5781
Assessment Requirements for AHCSHG201 Crutch sheep.....	5784
AHCSHG202 Assist in preparing for shearing and crutching	5786
Assessment Requirements for AHCSHG202 Assist in preparing for shearing and crutching.....	5788
AHCSHG203 Shear sheep to novice level	5790
Assessment Requirements for AHCSHG203 Shear sheep to novice level.....	5793
AHCSHG204 Shear sheep to improver level.....	5795
Assessment Requirements for AHCSHG204 Shear sheep to improver level.....	5798
AHCSHG205 Grind combs and cutters for machine shearing.....	5800
Assessment Requirements for AHCSHG205 Grind combs and cutters for machine shearing	5802
AHCSHG206 Prepare handpiece and downtube for machine shearing	5804
Assessment Requirements for AHCSHG206 Prepare handpiece and downtube for machine shearing	5807
AHCSHG210 Undertake basic shearing and crutching	5809
Assessment Requirements for AHCSHG210 Undertake basic shearing and crutching.....	5811
AHCSHG301 Prepare livestock for shearing.....	5813
Assessment Requirements for AHCSHG301 Prepare livestock for shearing.....	5816
AHCSHG302 Prepare combs and cutters for machine shearing.....	5818
Assessment Requirements for AHCSHG302 Prepare combs and cutters for machine shearing	5820
AHCSHG303 Maintain and service shearing handpieces	5822
Assessment Requirements for AHCSHG303 Maintain and service shearing handpieces.....	5824
AHCSHG304 Shear sheep to professional level	5826
Assessment Requirements for AHCSHG304 Shear sheep to professional level.....	5829
AHCSHG305 Maintain consistent shearing performance.....	5831
Assessment Requirements for AHCSHG305 Maintain consistent shearing performance.....	5833
AHCSHG306 Carry out post-shearing procedures.....	5835
Assessment Requirements for AHCSHG306 Carry out post-shearing procedures.....	5837
AHCSHG402 Conduct equipment experting for machine shearing	5839
Assessment Requirements for AHCSHG402 Conduct equipment experting for machine shearing	5841
AHCSHG405 Arrange employment for shearing operations	5843
Assessment Requirements for AHCSHG405 Arrange employment for shearing operations.....	5845
AHCWHS101 Work safely	5847
Assessment Requirements for AHCWHS101 Work safely.....	5849
AHCWHS201 Participate in work health and safety processes.....	5851
Assessment Requirements for AHCWHS201 Participate in work health and safety processes.....	5854
AHCWHS301 Contribute to work health and safety processes.....	5856
Assessment Requirements for AHCWHS301 Contribute to work health and safety processes.....	5859
AHCWHS401 Maintain work health and safety processes	5861
Assessment Requirements for AHCWHS401 Maintain work health and safety processes.....	5864
AHCWOL101 Support woolshed activities.....	5866

Assessment Requirements for AHCWOL101 Support woolshed activities5869
AHCWOL201 Pens sheep.....5871
Assessment Requirements for AHCWOL201 Pen sheep.....5874
AHCWOL202 Perform board duties.....5876
Assessment Requirements for AHCWOL202 Perform board duties.....5879
AHCWOL203 Carry out wool pressing5881
Assessment Requirements for AHCWOL203 Carry out wool pressing.....5884
AHCWOL301 Appraise wool using industry descriptions5886
Assessment Requirements for AHCWOL301 Appraise wool using industry descriptions 5888
AHCWOL303 Prepare wool based on its characteristics5890
Assessment Requirements for AHCWOL303 Prepare wool based on its characteristics 5893
AHCWOL304 Prepare fleece wool for classing.....5895
Assessment Requirements for AHCWOL304 Prepare fleece wool for classing5898
AHCWOL305 Prepare skirtings and oddments.....5900
Assessment Requirements for AHCWOL305 Prepare skirtings and oddments5903
AHCWOL306 Supervise clip preparation5905
Assessment Requirements for AHCWOL306 Supervise clip preparation5908
AHCWOL307 Document a wool clip.....5910
Assessment Requirements for AHCWOL307 Document a wool clip.....5913
AHCWOL308 Prepare facilities for shearing and crutching5915
Assessment Requirements for AHCWOL308 Prepare facilities for shearing and crutching 5918
AHCWOL310 Press wool for a clip5920
Assessment Requirements for AHCWOL310 Press wool for a clip.....5923
AHCWOL311 Perform shed duties5925
Assessment Requirements for AHCWOL311 Perform shed duties5928
AHCWOL401 Determine wool classing strategies5930
Assessment Requirements for AHCWOL401 Determine wool classing strategies.....5933
AHCWOL402 Use individual fleece measurements to prepare wool for sale5935
**Assessment Requirements for AHCWOL402 Use individual fleece measurements to
 prepare wool for sale.....5937**
AHCWOL403 Plan, implement and review wool harvesting and clip preparation5939
**Assessment Requirements for AHCWOL403 Plan, implement and review wool harvesting
 and clip preparation5942**
AHCWOL404 Establish work routines and manage wool harvesting and preparation staff 5944
**Assessment Requirements for AHCWOL404 Establish work routines and manage wool
 harvesting and preparation staff.....5947**
AHCWOL405 Class fleece wool.....5949
Assessment Requirements for AHCWOL405 Class fleece wool.....5952
AHCWRK101 Maintain the workplace5954
Assessment Requirements for AHCWRK101 Maintain the workplace.....5956
AHCWRK201 Observe and report on weather.....5958
Assessment Requirements for AHCWRK201 Observe and report on weather.....5961
AHCWRK202 Observe environmental work practices.....5963
Assessment Requirements for AHCWRK202 Observe environmental work practices .5965
AHCWRK204 Work effectively in the industry.....5967
Assessment Requirements for AHCWRK204 Work effectively in the industry5970
AHCWRK205 Participate in workplace communications.....5972
Assessment Requirements for AHCWRK205 Participate in workplace communications 5975
AHCWRK206 Observe enterprise quality assurance procedures5977
**Assessment Requirements for AHCWRK206 Observe enterprise quality assurance
 procedures5979**
AHCWRK207 Collect and record production data5980
Assessment Requirements for AHCWRK207 Collect and record production data.....5982

AHCWRK208 Provide information on products and services	5983
Assessment Requirements for AHCWRK208 Provide information on products and services	5985
AHCWRK209 Participate in environmentally sustainable work practices	5987
Assessment Requirements for AHCWRK209 Participate in environmentally sustainable work practices.....	5989
AHCWRK301 Collect samples for a rural production or horticulture monitoring program.....	5991
Assessment Requirements for AHCWRK301 Collect samples for a rural production or horticulture monitoring program	5994
AHCWRK302 Monitor weather conditions.....	5996
Assessment Requirements for AHCWRK302 Monitor weather conditions.....	5999
AHCWRK303 Respond to emergencies.....	6001
Assessment Requirements for AHCWRK303 Respond to emergencies.....	6004
AHCWRK304 Respond to rescue incidents	6006
Assessment Requirements for AHCWRK304 Respond to rescue incidents.....	6008
AHCWRK305 Coordinate work site activities.....	6010
Assessment Requirements for AHCWRK305 Coordinate work site activities	6012
AHCWRK306 Comply with industry quality assurance requirements.....	6014
Assessment Requirements for AHCWRK306 Comply with industry quality assurance requirements.....	6017
AHCWRK307 Develop and apply fertiliser and soil ameliorant product knowledge	6019
Assessment Requirements for AHCWRK307 Develop and apply fertiliser and soil ameliorant product knowledge.....	6022
AHCWRK308 Handle bulk materials in storage area	6023
Assessment Requirements for AHCWRK308 Handle bulk materials in storage area ...	6027
AHCWRK309 Apply environmentally sustainable work practices.....	6030
Assessment Requirements for AHCWRK309 Apply environmentally sustainable work practices.....	6033
AHCWRK310 Provide on-job training support.....	6035
Assessment Requirements for AHCWRK310 Provide on-job training support	6037
AHCWRK311 Conduct site inspections.....	6039
Assessment Requirements for AHCWRK311 Conduct site inspections	6042
AHCWRK312 Operate in isolated and remote situations	6044
Assessment Requirements for AHCWRK312 Operate in isolated and remote situations.....	6048
AHCWRK401 Implement and monitor quality assurance procedures	6050
Assessment Requirements for AHCWRK401 Implement and monitor quality assurance procedures	6052
AHCWRK402 Provide information on issues and policies.....	6054
Assessment Requirements for AHCWRK402 Provide information on issues and policies.....	6057
AHCWRK403 Supervise work routines and staff performance	6059
Assessment Requirements for AHCWRK403 Supervise work routines and staff performance	6062
AHCWRK405 Implement and monitor environmentally sustainable work practices ...	6064
Assessment Requirements for AHCWRK405 Implement and monitor environmentally sustainable work practices	6067
AHCWRK502 Collect and manage data.....	6069
Assessment Requirements for AHCWRK502 Collect and manage data	6072
AHCWRK504 Assess new industry developments	6074
Assessment Requirements for AHCWRK504 Assess new industry developments.....	6077
AHCWRK507 Implement professional practice	6079
Assessment Requirements for AHCWRK507 Implement professional practice	6082
AHCWRK508 Interpret legislation	6084
Assessment Requirements for AHCWRK508 Interpret legislation	6087

AHCWRK509 Provide specialist advice to clients	6089
Assessment Requirements for AHCWRK509 Provide specialist advice to clients	6091
AHCWRK510 Audit site operations	6093
Assessment Requirements for AHCWRK510 Audit site operations	6096
AHCWRK511 Develop workplace policy and procedures for sustainability	6098
Assessment Requirements for AHCWRK511 Develop workplace policy and procedures for sustainability	6101
AHCWRK601 Monitor projects in a program	6103
Assessment Requirements for AHCWRK601 Monitor projects in a program	6105
AHCWRK602 Lead and manage community or industry organisations	6107
Assessment Requirements for AHCWRK602 Lead and manage community or industry organisations	6110
AHCWRK603 Design and conduct a field-based research trial	6112
Assessment Requirements for AHCWRK603 Design and conduct a field-based research trial	6115
ACMHBR201 Check and treat horses	6117
Assessment Requirements for ACMHBR201 Check and treat horses	6120
ACMHBR203 Provide daily care for horses	6122
Assessment Requirements for ACMHBR203 Provide daily care for horses	6126
ACMHBR302 Carry out basic hoof care procedures	6128
Assessment Requirements for ACMHBR302 Carry out basic hoof care procedures	6132
ACMHBR310 Prevent and treat equine injury and disease	6134
Assessment Requirements for ACMHBR310 Prevent and treat equine injury and disease	6138
AMPMGT806 Commercialise research and technology product or idea	6141
Assessment Requirements for AMPMGT806 Commercialise research and technology product or idea	6144
AUMGTW001 Perform basic welding, thermal cutting, heating and gouging	6147
AUMGTW001 Perform basic welding, thermal cutting, heating and gouging	6150
BSBADM504 Plan and implement administrative systems	6152
Assessment Requirements for BSBADM504 Plan and implement administrative systems	6156
BSBCMM401 Make a presentation	6158
Assessment Requirements for BSBCMM401 Make a presentation	6161
BSBCMM411 Make presentations	6163
Assessment Requirements for BSBCMM411 Make presentations	6166
BSBCMM511 Communicate with influence	6168
Assessment Requirements for BSBCMM511 Communicate with influence	6171
BSBCOM602 Develop and create compliance requirements	6173
Assessment Requirements for BSBCOM602 Develop and create compliance requirements	6177
BSBCRT413 Collaborate in creative processes	6179
Assessment Requirements for BSBCRT413 Collaborate in creative processes	6182
BSBCUS501 Manage quality customer service	6184
Assessment Requirements for BSBCUS501 Manage quality customer service	6187
BSBDES403 Develop and extend design skills and practice	6189
Assessment Requirements for BSBDES403 Develop and extend design skills and practice	6193
BSBESB401 Research and develop business plans	6195
Assessment Requirements for BSBESB401 Research and develop business plans	6198
BSBESB402 Establish legal and risk management requirements of new business ventures	6200
Assessment Requirements for BSBESB402 Establish legal and risk management requirements of new business ventures	6203
BSBESB406 Establish operational strategies and procedures for new business ventures	6205
Assessment Requirements for BSBESB406 Establish operational strategies and procedures for new business ventures	6208
BSBESB407 Manage finances for new business ventures	6210

Assessment Requirements for BSBESB407 Manage finances for new business ventures	6213
BSBFIA302 Process payroll	6215
Assessment Requirements for BSBFIA302 Process payroll	6218
BSBFIA412 Report on financial activity	6220
Assessment Requirements for BSBFIA412 Report on financial activity	6224
BSBFIM501 Manage budgets and financial plans	6226
Assessment Requirements for BSBFIM501 Manage budgets and financial plans	6229
BSBFIN302 Maintain financial records	6231
Assessment Requirements for BSBFIN302 Maintain financial records	6234
BSBFIN401 Report on financial activity	6236
Assessment Requirements for BSBFIN401 Report on financial activity	6239
BSBFIN501 Manage budgets and financial plans	6241
Assessment Requirements for BSBFIN501 Manage budgets and financial plans	6244
BSBGOV502 Recruit and coordinate committee members	6246
Assessment Requirements for BSBGOV502 Recruit and coordinate committee members	6249
BSBGOV507 Manage board or committee and organisational conflict	6251
Assessment Requirements for BSBGOV507 Manage board or committee and organisational conflict	6254
BSBHRM405 Support the recruitment, selection and induction of staff	6256
Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff	6260
BSBHRM415 Coordinate recruitment and onboarding	6262
Assessment Requirements for BSBHRM415 Coordinate recruitment and onboarding	6265
BSBHRM416 Process payroll	6267
Assessment Requirements for BSBHRM416 Process payroll	6270
BSBHRM506 Manage recruitment selection and induction processes	6272
Assessment Requirements for BSBHRM506 Manage recruitment selection and induction processes	6276
BSBHRM525 Manage recruitment and onboarding	6278
Assessment Requirements for BSBHRM525 Manage recruitment and onboarding	6281
BSBINM201 Process and maintain workplace information	6283
Assessment Requirements for BSBINM201 Process and maintain workplace information	6286
BSBINM401 Implement workplace information system	6288
Assessment Requirements for BSBINM401 Implement workplace information system	6291
BSBINN501 Establish systems that support innovation	6293
Assessment Requirements for BSBINN501 Establish systems that support innovation	6297
BSBINS201 Process and maintain workplace information	6299
Assessment Requirements for BSBINS201 Process and maintain workplace information	6301
BSBINS309 Maintain business records	6303
Assessment Requirements for BSBINS309 Maintain business records	6305
BSBINS401 Analyse and present research information	6307
Assessment Requirements for BSBINS401 Analyse and present research information	6310
BSBINS402 Coordinate workplace information systems	6312
Assessment Requirements for BSBINS402 Coordinate workplace information systems	6315
BSBINS410 Implement records systems for small business	6317
Assessment Requirements for BSBINS410 Implement records systems for small business	6320
BSBINT303 Organise the importing and exporting of goods	6322
Assessment Requirements for BSBINT303 Organise the importing and exporting of goods	6326
BSBITU304 Produce spreadsheets	6328
Assessment Requirements for BSBITU304 Produce spreadsheets	6331
BSBITU306 Design and produce business documents	6333
Assessment Requirements for BSBITU306 Design and produce business documents	6336
BSBITU404 Produce complex desktop published documents	6338

Assessment Requirements for BSBITU404 Produce complex desktop published documents	6342
BSBLDR403 Lead team effectiveness	6344
Assessment Requirements for BSBLDR403 Lead team effectiveness.....	6347
BSBLDR412 Communicate effectively as a workplace leader.....	6349
Assessment Requirements for BSBLDR412 Communicate effectively as a workplace leader.....	6352
BSBLDR413 Lead effective workplace relationships	6354
Assessment Requirements for BSBLDR413 Lead effective workplace relationships.....	6357
BSBLDR414 Lead team effectiveness	6359
Assessment Requirements for BSBLDR414 Lead team effectiveness.....	6362
BSBLIB502 Manage the development of collections	6364
Assessment Requirements for BSBLIB502 Manage the development of collections	6368
BSBLIB602 Develop and monitor procedures for the movement and storage of collection material	6370
Assessment Requirements for BSBLIB602 Develop and monitor procedures for the movement and storage of collection material	6374
BSBMGT605 Provide leadership across the organisation.....	6376
Assessment Requirements for BSBMGT605 Provide leadership across the organisation.....	6380
BSBMGT616 Develop and implement strategic plans.....	6382
Assessment Requirements for BSBMGT616 Develop and implement strategic plans	6386
BSBMGT617 Develop and implement a business plan.....	6388
Assessment Requirements for BSBMGT617 Develop and implement a business plan	6392
BSBMGT621 Design and manage the enterprise quality management system.....	6394
Assessment Requirements for BSBMGT621 Design and manage the enterprise quality management system.....	6398
BSBMGT623 Monitor corporate governance activities	6400
Assessment Requirements for BSBMGT623 Monitor corporate governance activities	6403
BSBMKG431 Assess marketing opportunities.....	6405
Assessment Requirements for BSBMKG431 Assess marketing opportunities	6408
BSBMKG433 Undertake marketing activities.....	6410
Assessment Requirements for BSBMKG433 Undertake marketing activities.....	6413
BSBMKG434 Promote products and services.....	6415
Assessment Requirements for BSBMKG434 Promote products and services	6418
BSBOPS304 Deliver and monitor a service to customers	6420
Assessment Requirements for BSBOPS304 Deliver and monitor a service to customers.....	6423
BSBOPS305 Process customer complaints.....	6425
Assessment Requirements for BSBOPS305 Process customer complaints	6428
BSBOPS401 Coordinate business resources	6430
Assessment Requirements for BSBOPS401 Coordinate business resources	6433
BSBOPS402 Coordinate business operational plans	6435
Assessment Requirements for BSBOPS402 Coordinate business operational plans.....	6438
BSBOPS403 Apply business risk management processes.....	6440
Assessment Requirements for BSBOPS403 Apply business risk management processes.....	6443
BSBOPS503 Develop administrative systems.....	6445
Assessment Requirements for BSBOPS503 Develop administrative systems	6448
BSBOPS504 Manage business risk	6450
Assessment Requirements for BSBOPS504 Manage business risk.....	6453
BSBOPS505 Manage organisational customer service.....	6455
Assessment Requirements for BSBOPS505 Manage organisational customer service	6458
BSBOPS601 Develop and implement business plans.....	6460
Assessment Requirements for BSBOPS601 Develop and implement business plans	6463
BSBPEF301 Organise personal work priorities	6465
Assessment Requirements for BSBPEF301 Organise personal work priorities.....	6468

BSBPEF402 Develop personal work priorities.....6470
Assessment Requirements for BSBPEF402 Develop personal work priorities6473
BSBPEF403 Lead personal development.....6475

BSBPEF501 Manage personal and professional development6479
Assessment Requirements for BSBPEF501 Manage personal and professional development.....6482
BSBPMG417 Apply project life cycle management processes.....6484
Assessment Requirements for BSBPMG417 Apply project life cycle management processes.....6488
BSBPMG418 Apply project stakeholder engagement techniques6490
Assessment Requirements for BSBPMG418 Apply project stakeholder engagement techniques6493
BSBPMG427 Apply project procurement procedures.....6495
Assessment Requirements for BSBPMG427 Apply project procurement procedures...6498
BSBPMG428 Apply project life cycle management processes.....6500
Assessment Requirements for BSBPMG428 Apply project life cycle management processes.....6503
BSBPMG429 Apply project stakeholder engagement techniques6505
Assessment Requirements for BSBPMG429 Apply project stakeholder engagement techniques6508
BSBPMG430 Undertake project work.....6510
Assessment Requirements for BSBPMG430 Undertake project work6513
BSBPRC504 Manage a supply chain6515
Assessment Requirements for BSBPRC504 Manage a supply chain.....6519
BSBREL402 Build client relationships and business networks6521
Assessment Requirements for BSBREL402 Build client relationships and business networks6525
BSBRES411 Analyse and present research information6527
Assessment Requirements for BSBRES411 Analyse and present research information6530
BSBRES801 Initiate and lead applied research6532
Assessment Requirements for BSBRES801 Initiate and lead applied research.....6536
BSBRISK401 Identify risk and apply risk management processes.....6538
Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes.....6541
BSBRISK501 Manage risk.....6543
Assessment Requirements for BSBRSK501 Manage risk6547
BSBSMB403 Market the small business6549
Assessment Requirements for BSBSMB403 Market the small business.....6553
BSBSMB406 Manage small business finances6555
Assessment Requirements for BSBSMB406 Manage small business finances6558
BSBSMB407 Manage a small team.....6560
Assessment Requirements for BSBSMB407 Manage a small team6565
BSBSMB420 Evaluate and develop small business operations.....6567
Assessment Requirements for BSBSMB420 Evaluate and develop small business operations6571
BSBSMB421 Manage small business finances6573
Assessment Requirements for BSBSMB421 Manage small business finances6576
BSBST301 Contribute to continuous improvement.....6578
Assessment Requirements for BSBSTR301 Contribute to continuous improvement6581
BSBST401 Promote innovation in team environments6583
Assessment Requirements for BSBSTR401 Promote innovation in team environments6586
BSBSUS411 Implement and monitor environmentally sustainable work practices.....6588

Assessment Requirements for BSBSUS411 Implement and monitor environmentally sustainable work practices6591

BSBTEC201 Use business software applications.....6593

Assessment Re quirements for BSBTEC201 Use business software applications6595

BSBTEC202 Use digital technologies to communicate in a work environment6597

Assessment Requirements for BSBTEC202 Use digital technologies to communicate in a work environment.....6600

BSBTEC301 Design and produce business documents6602

Assessment Re quirements for BSBTEC301 Design and produce business documents ..6605

BSBTEC401 Design and produce complex text documents.....6607

Assessment Re quirements for BSBTEC401 Design and produce complex text documents6610

BSBTWK401 Build and maintain business relationships.....6612

Assessment Re quirements for BSBTWK401 Build and maintain business relationships6615

BSBWH5302 Apply knowledge of WHS legislation in the workplace6617

Assessment Requirements for BSBWH5302 Apply knowledge of WHS legislation in the workplace6620

BSBWH513 Lead WHS risk management.....6622

Assessment Re quirements for BSBWH513 Lead WHS risk management.....6627

BSBWH518 Manage WHS hazards associated with maintenance and use of plant.....6630

Assessment Requirements for BSBWH518 Manage WHS hazards associated with maintenance and use of plant6635

BSBWOR204 Use business technology6638

Assessment Re quirements for BSBWOR204 Use business technology6641

BSBWOR501 Manage personal work priorities and professional development.....6643

Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development.....6646

BSBWRT311 Write simple documents6648

Assessment Re quirements for BSBWRT311 Write simple documents.....6650

BSBWRT411 Write complex documents6652

Assessment Re quirements for BSBWRT411 Write complex documents6655

CHCCDE002 Develop and implement community programs6657

Assessment Re quirements for CHCCDE002 Develop and implement community programs6660

CHCCDE010 Develop and lead community engagement strategies to enhance participation6662

Assessment Requirements for CHCCDE010 Develop and lead community engagement strategies to enhance participation.....6665

CHCCDE012 Work within organisation and government structures to enable community development outcomes6667

Assessment Requirements for CHCCDE012 Work within organisation and government structures to enable community development outcomes.....6671

CHCMGT007 Work effectively with the Board of an organisation6673

Assessment Requirements for CHCMGT007 Work effectively with the Board of an organisation.....6677

CHCVOL003 Recruit, induct and support volunteers6680

Assessment Re quirements for CHCVOL003 Recruit, induct and support volunteers...6683

CPCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings.....6685

Assessment Requirements for CPCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings6689

CPCBC4002 Manage work health and safety in the building and construction workplace6692

Assessment Requirements for CPCBC4002 Manage work health and safety in the building and construction workplace6695

CPCBC4003 Select, prepare and administer a construction contract.....6698

Assessment Requirements for CPCCBC4003 Select, prepare and administer a construction contract.....6702
CPCCBC4004 Identify and produce estimated costs for building and construction projects 6704
Assessment Requirements for CPCCBC4004 Identify and produce estimated costs for building and construction projects.....6707
CPCCBC4005 Produce labour and material schedules for ordering.....6709
Assessment Requirements for CPCCBC4005 Produce labour and material schedules for ordering.....6712
CPCCBC4006 Select, procure and store construction materials for building and construction projects.....6714
Assessment Requirements for CPCCBC4006 Select, procure and store construction materials for building and construction projects.....6718
CPCCBC4008 Supervise site communication and administration processes for building and construction projects.....6721
Assessment Requirements for CPCCBC4008 Supervise site communication and administration processes for building and construction projects6725
CPCCBC4009 Apply legal requirements to building and construction projects6728
Assessment Requirements for CPCCBC4009 Apply legal requirements to building and construction projects.....6732
CPCCBC4010 Apply structural principles to residential and commercial constructions 6734
Assessment Requirements for CPCCBC4010 Apply structural principles to residential and commercial constructions6739
CPCCBC4012 Read and interpret plans and specifications.....6743
Assessment Requirements for CPCCBC4012 Read and interpret plans and specifications 6746
CPCCBC4026 Arrange building applications and approvals.....6748
Assessment Requirements for CPCCBC4026 Arrange building applications and approvals 6751
CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings6753
Assessment Requirements for CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings6756
CPCCBL2002 Use bricklaying and blocklaying tools and equipment.....6759
Assessment Requirements for CPCCBL2002 Use bricklaying and blocklaying tools and equipment.....6762
CPCCCA2002 Use carpentry tools and equipment.....6765
Assessment Requirements for CPCCCA2002 Use carpentry tools and equipment6768
CPCCCA3018 Construct, erect and dismantle formwork for stairs and ramps6771
Assessment Requirements for CPCCCA3018 Construct, erect and dismantle formwork for stairs and ramps6775
CPCCCA3028 Erect and dismantle formwork for footings and slabs on ground.....6777
Assessment Requirements for CPCCCA3028 Erect and dismantle formwork for footings and slabs on ground.....6780
CPCCCM2010B Work safely at heights6782
CPCCCO2013 Carry out concreting to simple forms6790
Assessment Requirements for CPCCCO2013 Carry out concreting to simple forms6793
CPCCDO3011A Perform dogging6796
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry6807
CPCCOM2001 Read and interpret plans and specifications.....6821
Assessment Requirements for CPCCOM2001 Read and interpret plans and specifications 6824
CPCCON3041 Place concrete6826
Assessment Requirements for CPCCON3041 Place concrete.....6830
CPCCON3042 Finish concrete6833
Assessment Requirements for CPCCON3042 Finish concrete6836

CPCCON3043 Cure concrete6838
Assessment Requirements for CPCCON3043 Cure concrete6841
CPCCST2001 Prepare for stonemasonry construction process6844
Assessment Requirements for CPCCST2001 Prepare for stonemasonry construction process6847
CPCCWHS1001 Prepare to work safely in the construction industry6849
Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry6853
CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry6857
Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.....6860
CPCPCM2040A Read plans and calculate plumbing quantities6862
CPCPCM2043A Carry out WHS requirements.....6873
CPCPCM2047A Carry out levelling6883
CPCPPS5027A Design irrigation systems6891
CPCPWT3027A Connect irrigation systems from drinking water supply6907
CPPFES2005 Demonstrate first attack fire fighting equipment.....6917
Assessment Requirements for CPPFES2005 Demonstrate first attack fire fighting equipment.....6919
CPPSIS2012 Assist in collecting basic spatial data.....6921
Assessment Requirements for CPPSIS2012 Assist in collecting basic spatial data6924
CPPSIS5035 Obtain and validate spatial data6926
Assessment Requirements for CPPSIS5035 Obtain and validate spatial data6930
CPPSIS5064 Coordinate GIS data manipulation and analysis.....6932
Assessment Requirements for CPPSIS5064 Coordinate GIS data manipulation and analysis6936
CPPSSI2012 Assist in collecting basic spatial data.....6939
Assessment Requirements for CPPSSI2012 Assist in collecting basic spatial data6942
CPPSSI2013 Store and retrieve basic spatial data6944
Assessment Requirements for CPPSSI2013 Store and retrieve basic spatial data6946
CPPSSI3011 Produce basic maps6948
Assessment Requirements for CPPSSI3011 Produce basic maps.....6950
CPPSSI4035 Apply GIS software to spatial problems6952
Assessment Requirements for CPPSSI4035 Apply GIS software to spatial problems ...6955
CPPWMT3004 Comply with environmental protection requirements when transporting waste6957
Assessment Requirements for CPPWMT3004 Comply with environmental protection requirements when transporting waste6960
CPPWMT4005 Implement waste management site safety plans6962
Assessment Requirements for CPPWMT4005 Implement waste management site safety plans6965
CPPWMT5043A Develop and implement an environmental management strategy.....6967
CPPWMT5045A Develop site safety plans.....6978
CUAACD302 Produce computer-aided drawings6987
Assessment Requirements for CUAACD302 Produce computer-aided drawings6991
CUAACD303 Produce technical drawings.....6993
Assessment Requirements for CUAACD303 Produce technical drawings6996
CUAACD312 Produce computer-aided drawings6998
Assessment Requirements for CUAACD312 Produce computer-aided drawings7001
CUAACD313 Produce technical drawings.....7003
Assessment Requirements for CUAACD313 Produce technical drawings7005
CUAATS504 Work with Aboriginal and Torres Strait Islander cultural material7007

Assessment Requirements for CUAATS504 Work with Aboriginal and Torres Strait Islander cultural material7011

CUACNM301 Move and store collection material7013

Assessment Re quire ments for CUACNM301 Move and store collection material.....7017

CUADES305 Source and apply information on the history and theory of design.....7019

Assessment Requirements for CUADES305 Source and apply information on the history and theory of design.....7022

CUADES413 Develop and extend design skills and practice7024

Assessment Re quire ments for CUADES413 Develop and extend design skills and practice 7027

CUADES511 Implement design solutions7029

Assessment Re quire ments for CUADES511 Implement design solutions.....7032

CUADES512 Establish, negotiate and refine a design brief.....7034

Assessment Re quire ments for CUADES512 Establish, negotiate and refine a design brief7037

CULMS002B Research and evaluate Aboriginal or Torres Strait Islander cultural material7039

CULMS010B Contribute to the preservation of cultural material7048

FBPBP2002 Operate the carton erection process.....7055

Assessment Re quire ments for FBPBP2002 Operate the carton erection process7058

FBPBP2004 Operate the palletising process7061

Assessment Re quire ments for FBPBP2004 Operate the palletising process7064

FBPBP2008 Perform basic packaging tests and inspections.....7067

Assessment Requirements for FBPBP2008 Perform basic packaging tests and inspections7070

FBPBP3002 Operate the labelling process7073

Assessment Re quire ments for FBPBP3002 Operate the labelling process.....7076

FBPFSY1001 Follow work procedures to maintain food safety7079

Assessment Requirements for FBPFSY1001 Follow work procedures to maintain food safety7082

FBPFSY2001 Implement the food safety program and procedures7085

Assessment Requirements for FBPFSY2001 Implement the food safety program and procedures7088

FBPFSY3001 Monitor the implementation of quality and food safety programs7091

Assessment Requirements for FBPFSY3001 Monitor the implementation of quality and food safety programs7094

FBPFSY3002 Participate in a HACCP team.....7097

Assessment Re quire ments for FBPFSY3002 Participate in a HACCP team.....7100

FBPGPS2011 Operate a creamed honey manufacture process7103

Assessment Requirements for FBPGPS2011 Operate a creamed honey manufacture process7106

FBPOPR1010 Carry out manual handling tasks7109

Assessment Re quire ments for FBPOPR1010 Carry out manual handling tasks7112

FBPOPR2012 Maintain food safety when loading, unloading and transporting food ...7114

Assessment Requirements for FBPOPR2012 Maintain food safety when loading, unloading and transporting food.....7117

FBPOPR2023 Operate a packaging process7120

Assessment Re quire ments for FBPOPR2023 Operate a packaging process.....7124

FBPOPR2037 Operate a filtration process7127

Assessment Re quire ments for FBPOPR2037 Operate a filtration process7131

FBPOPR2063 Clean equipment in place.....7134

Assessment Re quire ments for FBPOPR2063 Clean equipment in place7137

FBPOPR2064 Clean and sanitise equipment7139

Assessment Re quire ments for FBPOPR2064 Clean and sanitise equipment.....7142

FBPOPR2065 Conduct routine maintenance.....7144

Assessment Requirements for FBPOPR2065 Conduct routine maintenance	7147
FBPOPR2066 Apply sampling procedures	7150
Assessment Requirements for FBPOPR2066 Apply sampling procedures	7153
FBPOPR2067 Work in a food handling area for non-food handlers.....	7155
Assessment Requirements for FBPOPR2067 Work in a food handling area for non-food handlers.....	7158
FBPOPR2068 Operate a process control interface	7160
Assessment Requirements for FBPOPR2068 Operate a process control interface	7163
FBPOPR2069 Use numerical applications in the workplace	7165
Assessment Requirements for FBPOPR2069 Use numerical applications in the workplace.....	7168
FBPOPR2070 Apply quality systems and procedures.....	7170
Assessment Requirements for FBPOPR2070 Apply quality systems and procedures ...	7173
FBPOPR2071 Provide and apply workplace information.....	7175
Assessment Requirements for FBPOPR2071 Provide and apply workplace information.....	7178
FBPOPR3004 Set up a production or packaging line for operation.....	7180
Assessment Requirements for FBPOPR3004 Set up a production or packaging line for operation.....	7183
FBPOPR3005 Operate interrelated processes in a production system.....	7185
Assessment Requirements for FBPOPR3005 Operate interrelated processes in a production system.....	7188
FBPOPR3006 Operate interrelated processes in a packaging system	7191
Assessment Requirements for FBPOPR3006 Operate interrelated processes in a packaging system.....	7194
FBPOPR4001 Apply principles of statistical process control.....	7196
Assessment Requirements for FBPOPR4001 Apply principles of statistical process control.....	7199
FBPPHM3001 Apply Good Manufacturing Practice requirements	7201
Assessment Requirements for FBPPHM3001 Apply Good Manufacturing Practice requirements.....	7205
FBPPHM3003 Work in a controlled environment.....	7209
Assessment Requirements for FBPPHM3003 Work in a controlled environment.....	7213
FBPPHM3004 Clean and sanitise facilities and equipment.....	7217
Assessment Requirements for FBPPHM3004 Clean and sanitise facilities and equipment.....	7222
FBPPHM4001 Monitor and maintain Good Manufacturing Practice requirements	7226
Assessment Requirements for FBPPHM4001 Monitor and maintain Good Manufacturing Practice requirements	7230
FBPPHM4002 Prepare and review workplace documentation to support Good Manufacturing Practice requirements	7233
Assessment Requirements for FBPPHM4002 Prepare and review workplace documentation to support Good Manufacturing Practice requirements	7236
FBPPHM4003 Facilitate contamination control	7239
Assessment Requirements for FBPPHM4003 Facilitate contamination control.....	7242
FBPPHM4005 Participate in validation of pharmaceutical manufacturing processes ..	7245
Assessment Requirements for FBPPHM4005 Participate in validation of pharmaceutical manufacturing processes.....	7248
FBPPHM4006 Respond to non-conformance.....	7251
Assessment Requirements for FBPPHM4006 Respond to non-conformance	7254
FBPPPL2001 Participate in work teams and groups	7257
Assessment Requirements for FBPPPL2001 Participate in work teams and groups	7260
FBPPPL3003 Participate in improvement processes	7262
Assessment Requirements for FBPPPL3003 Participate in improvement processes	7265
FBPPPL3005 Participate in an audit process.....	7267
Assessment Requirements for FBPPPL3005 Participate in an audit process	7270
FBPPPL3006 Report on workplace performance	7272

Assessment Requirements for FBPPPL3006 Report on workplace performance	7275
FBPPPL3007 Support and mentor individuals and groups	7277
Assessment Requirements for FBPPPL3007 Support and mentor individuals and groups	7280
FBPTEC4002 Apply principles of food packaging	7282
Assessment Requirements for FBPTEC4002 Apply principles of food packaging	7285
FBPVIT2001 Bench graft vines	7288
Assessment Requirements for FBPVIT2001 Bench graft vines	7291
FBPVIT2002 Carry out potting operations.....	7294
Assessment Requirements for FBPVIT2002 Carry out potting operations	7297
FBPVIT2003 Hand prune vines.....	7300
Assessment Requirements for FBPVIT2003 Hand prune vines	7303
FBPVIT2005 Maintain callusing environment.....	7306
Assessment Requirements for FBPVIT2005 Maintain callusing environment	7309
FBPVIT2006 Obtain and process rootlings.....	7312
Assessment Requirements for FBPVIT2006 Obtain and process rootlings	7315
FBPVIT2007 Tend containerised nursery plants	7318
Assessment Requirements for FBPVIT2007 Tend containerised nursery plants.....	7321
FBPVIT2008 Train vines.....	7323
Assessment Requirements for FBPVIT2008 Train vines	7326
FBPVIT2010 Take and process vine cuttings.....	7328
Assessment Requirements for FBPVIT2010 Take and process vine cuttings	7331
FBPVIT2011 Operate vineyard equipment	7334
Assessment Requirements for FBPVIT2011 Operate vineyard equipment	7337
FBPVIT2012 Identify and treat nursery plant disorders	7340
Assessment Requirements for FBPVIT2012 Identify and treat nursery plant disorders	7343
FBPVIT2016 Carry out hot water treatment.....	7346
Assessment Requirements for FBPVIT2016 Carry out hot water treatment	7349
FBPVIT2017 Operate nursery cold storage facilities	7352
Assessment Requirements for FBPVIT2017 Operate nursery cold storage facilities	7355
FBPVIT2018 Support mechanical harvesting operations	7358
Assessment Requirements for FBPVIT2018 Support mechanical harvesting operations	7361
FBPVIT3001 Coordinate vineyard operations.....	7364
Assessment Requirements for FBPVIT3001 Coordinate vineyard operations	7367
FBPVIT3002 Maintain field nursery	7370
Assessment Requirements for FBPVIT3002 Maintain field nursery.....	7373
FBPVIT3003 Operate spreading and seeding equipment	7376
Assessment Requirements for FBPVIT3003 Operate spreading and seeding equipment	7379
FBPVIT3004 Monitor and maintain nursery plants	7382
Assessment Requirements for FBPVIT3004 Monitor and maintain nursery plants	7385
FBPVIT3005 Install and maintain vine trellis.....	7389
Assessment Requirements for FBPVIT3005 Install and maintain vine trellis	7392
FBPVIT3006 Field graft vines	7395
Assessment Requirements for FBPVIT3006 Field graft vines.....	7398
FBPVIT3007 Operate specialised canopy management equipment	7401
Assessment Requirements for FBPVIT3007 Operate specialised canopy management equipment.....	7404
FBPVIT3008 Operate a mechanical harvester.....	7407
Assessment Requirements for FBPVIT3008 Operate a mechanical harvester	7410
FBPVIT3011 Perform shed nursery activities	7412
Assessment Requirements for FBPVIT3011 Perform shed nursery activities	7415
FDFFS1001A Follow work procedures to maintain food safety.....	7419
FDFGR3002A Demonstrate knowledge of animal nutrition principles	7427
FDFOP2038A Operate a grinding process.....	7433

FNSFMK512 Apply knowledge of emissions markets.....	7442
Assessment Requirements for FNSFMK512 Apply knowledge of emissions markets ...	7446
FSKNUM23 Estimate, measure and calculate measurements for work	7449
Assessment Requirements for FSKNUM23 Estimate, measure and calculate measurements for work	7451
FSKRDG03 Read and respond to basic workplace instructions	7453
Assessment Requirements for FSKRDG03 Read and respond to basic workplace instructions	7455
FWPCOT2236 Fall trees manually (basic).....	7457
Assessment Requirements for FWPCOT2236 Fall trees manually (basic).....	7461
FWPCOT2237 Maintain chainsaws.....	7466
Assessment Requirements for FWPCOT2237 Maintain chainsaws	7469
FWPCOT2239 Trim and cut felled trees	7472
Assessment Requirements for FWPCOT2239 Trim and cut felled trees.....	7476
FWPCOT2254 Maintain chainsaws.....	7480
Assessment Requirements for FWPCOT2254 Maintain chainsaws	7483
FWPCOT2256 Trim and cut felled trees	7486
Assessment Requirements for FWPCOT2256 Trim and cut felled trees.....	7490
FWPCOT3202 Navigate in remote or trackless areas	7493
Assessment Requirements for FWPCOT3202 Navigate in remote or trackless areas ...	7496
FWPCOT3238 Operate a pole saw	7499
Assessment Requirements for FWPCOT3238 Operate a pole saw.....	7502
FWPCOT3259 Operate a four wheel drive on unsealed roads	7504
Assessment Requirements for FWPCOT3259 Operate a four wheel drive on unsealed roads.....	7508
FWPCOT3301 Trim trees using a pole saw	7513
Assessment Requirements for FWPCOT3301 Trim trees using a pole saw.....	7517
FWPCOT3314 Comply with soil and water protection.....	7519
Assessment Requirements for FWPCOT3314 Comply with soil and water protection .	7522
FWPCOT3325 Operate four wheel drive vehicle on unsealed roads	7525
Assessment Requirements for FWPCOT3325 Operate four wheel drive vehicle on unsealed roads	7528
FWPCOT3326 Recover four wheel drive vehicle	7531
Assessment Requirements for FWPCOT3326 Recover four wheel drive vehicle.....	7535
FWPCOT3329 Perform complex four wheel drive operations	7538
Assessment Requirements for FWPCOT3329 Perform complex four wheel drive operations	7542
FWPCOT6204 Use carbon accounting to estimate emissions.....	7545
Assessment Requirements for FWPCOT6204 Use carbon accounting to estimate emissions	7549
FWPFGM2207 Undertake brushcutting operations	7552
Assessment Requirements for FWPFGM2207 Undertake brushcutting operations	7555
FWPFGM3201 Manage seed collection	7558
Assessment Requirements for FWPFGM3201 Manage seed collection.....	7561
FWPFGM3202 Extract seed.....	7564
Assessment Requirements for FWPFGM3202 Extract seed.....	7567
FWPFGM3212 Fall trees manually (intermediate).....	7569
Assessment Requirements for FWPFGM3212 Fall trees manually (intermediate).....	7573
FWPFGM3213 Fall trees manually (advanced).....	7578
Assessment Requirements for FWPFGM3213 Fall trees manually (advanced).....	7582
FWPFGM3216 Fell trees manually (intermediate)	7587
Assessment Requirements for FWPFGM3216 Fell trees manually (intermediate).....	7592
FWPFGM5219 Undertake carbon stock sampling of forests and plantations	7595

Assessment Requirements for FWPFGM5219 Undertake carbon stock sampling of forests and plantations	7598
FWPFGM6203 Manage sustainable tree inventory	7601
Assessment Re quirements for FWPFGM6203 Manage sustainable tree inventory	7604
FWPHAR2206 Operate a mobile chipper/mulcher.....	7608
Assessment Re quirements for FWPHAR2206 Operate a mobile chipper/mulcher	7611
FWPNSY3002 Extract, clean, store and despatch tree seeds.....	7614
Assessment Re quirements for FWPNSY3002 Extract, clean, store and despatch tree seeds.....	7618
HLTAID009 Provide cardiopulmonary resuscitation.....	7621
Assessment Re quirements for HLTAID009 Provide cardiopulmonary resuscitation.....	7623
HLTAID010 Provide basic emergency life support.....	7626
Assessment Re quirements for HLTAID010 Provide basic emergency life support	7628
HLTAID011 Provide First Aid.....	7631
Assessment Re quirements for HLTAID011 Provide First Aid.....	7633
HLTAID013 Provide First Aid in remote or isolated site.....	7637
Assessment Re quirements for HLTAID013 Provide First Aid in remote or isolated site.....	7640
HLTAID015 Provide advanced resuscitation and oxygen therapy.....	7645
Assessment Re quirements for HLTAID015 Provide advanced resuscitation and oxygen therapy	7648
HLTWHS001 Participate in workplace health and safety.....	7653
Assessment Re quirements for HLTWHS001 Participate in workplace health and safety.....	7656
ICTICT203 Operate application software packages	7659
Assessment Re quirements for ICTICT203 Operate application software packages.....	7663
ICTICT214 Operate application software packages	7665
Assessment Re quirements for ICTICT214 Operate application software packages.....	7668
ICTICT402 Determine project specifications and secure client agreement.....	7670
Assessment Re quirements for ICTICT402 Determine project specifications and secure client agreement.....	7673
ICTWOR304 Manage spare parts	7675
Assessment Re quirements for ICTWOR304 Manage spare parts.....	7679
LGACOM404B Establish cooperative arrangements with other organisations	7681
LGACOM502B Devise and conduct community consultations	7686
LGACOMP008A Apply conflict resolution strategies.....	7692
LGAGCM710A Manage contracts and contractors.....	7697
LGALAND503A Develop agreements with native title holders/traditional owners.....	7703
LGALAND504A Undertake effective consultation with Indigenous people on matters of cultural heritage	7709
LGAPLEM508A Manipulate and analyse data within geographic information systems.....	7715
LGAPLEM512A Provide geographic information systems data.....	7719
LGAPLEM612B Protect heritage and cultural assets.....	7725
LGAREGS305A Undertake animal or reptile control duties.....	7731
MARC037 Operate inboard and outboard motors	7736
Assessment Re quirements for MARC037 Operate inboard and outboard motors	7739
MARF027 Apply basic survival skills in the event of vessel abandonment.....	7741
Assessment Re quirements for MARF027 Apply basic survival skills in the event of vessel abandonment.....	7745
MARF028 Follow procedures to minimise and fight fires on board a vessel.....	7749
Assessment Re quirements for MARF028 Follow procedures to minimise and fight fires on board a vessel.....	7752
MARF030 Survive at sea using survival craft	7755
Assessment Re quirements for MARF030 Survive at sea using survival craft	7759
MARI003 Comply with regulations to ensure safe operation of a vessel up to 12 metres.....	7762

Assessment Requirements for MARI003 Comply with regulations to ensure safe operation of a vessel up to 12 metres	7765
MARK007 Handle a vessel up to 12 metres	7767
Assessment Requirements for MARK007 Handle a vessel up to 12 metres	7770
MARN008 Apply seamanship skills aboard a vessel up to 12 metres	7774
Assessment Requirements for MARN008 Apply seamanship skills aboard a vessel up to 12 metres	7778
MEM05004 Perform routine oxy fuel gas welding	7781
Assessment Requirements for MEM05004 Perform routine oxy fuel gas welding	7785
MEM05007 Perform manual heating and thermal cutting	7787
Assessment Requirements for MEM05007 Perform manual heating and thermal cutting	7791
MEM05012 Perform routine manual metal arc welding	7793
Assessment Requirements for MEM05012 Perform routine manual metal arc welding	7796
MEM05015 Weld using manual metal arc welding process	7798
Assessment Requirements for MEM05015 Weld using manual metal arc welding process	7803
MEM05017 Weld using gas metal arc welding process	7805
Assessment Requirements for MEM05017 Weld using gas metal arc welding process	7810
MEM05019 Weld using gas tungsten arc welding process	7812
Assessment Requirements for MEM05019 Weld using gas tungsten arc welding process	7817
MEM05049 Perform routine gas tungsten arc welding	7819
Assessment Requirements for MEM05049 Perform routine gas tungsten arc welding	7823
MEM05050 Perform routine gas metal arc welding	7825
Assessment Requirements for MEM05050 Perform routine gas metal arc welding	7829
MEM07032 Use workshop machines for basic operations	7831
Assessment Requirements for MEM07032 Use workshop machines for basic operations	7835
MEM11011 Undertake manual handling	7837
Assessment Requirements for MEM11011 Undertake manual handling	7840
MEM12024 Perform computations	7842
Assessment Requirements for MEM12024 Perform computations	7846
MEM13015 Work safely and effectively in manufacturing and engineering	7848
Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering	7853
MEM16006 Organise and communicate information	7856
Assessment Requirements for MEM16006 Organise and communicate information	7860
MEM18001 Use hand tools	7862
Assessment Requirements for MEM18001 Use hand tools	7866
MEM18001C Use hand tools	7868
MEM18002 Use power tools/hand held operations	7874
Assessment Requirements for MEM18002 Use power tools/hand held operations	7878
MEM18002B Use power tools/hand held operations	7880
MEMPE001A Use engineering workshop machines	7886
MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces	7892
Assessment Requirements for MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces	7895
MSL913004 Plan and conduct laboratory/field work	7897
Assessment Requirements for MSL913004 Plan and conduct laboratory/field work	7900
MSL924003 Process and interpret data	7902
Assessment Requirements for MSL924003 Process and interpret data	7905
MSL933005 Maintain the laboratory/field workplace fit for purpose	7908
Assessment Requirements for MSL933005 Maintain the laboratory/field workplace fit for purpose	7911
MSL973013 Perform basic tests	7913
Assessment Requirements for MSL973013 Perform basic tests	7916

MSL973016 Perform aseptic techniques	7918
Assessment Requirements for MSL973016 Perform aseptic techniques	7921
MSL974021 Perform biological procedures	7924
Assessment Requirements for MSL974021 Perform biological procedures	7927
MSL974025 Prepare tissue and cell cultures	7930
Assessment Requirements for MSL974025 Prepare tissue and cell cultures	7933
MSL975033 Perform tissue and cell culture techniques	7936
Assessment Requirements for MSL975033 Perform tissue and cell culture techniques	7940
MSL975045 Perform laboratory-based ecological techniques	7942
Assessment Requirements for MSL975045 Perform laboratory-based ecological techniques	7946
MSMSUP280 Manage conflict at work	7948
Assessment Requirements for MSMSUP280 Manage conflict at work	7952
MSS024020 Recognise common geological landforms and samples	7954
Assessment Requirements for MSS024020 Recognise common geological landforms and samples	7958
MSS025014 Perform sampling and testing of contaminated sites	7960
Assessment Requirements for MSS025014 Perform sampling and testing of contaminated sites	7969
MSTGN3003 Estimate and cost job	7973
Assessment Requirements for MSTGN3003 Estimate and cost job	7977
NWPIRR002 Operate basic flow control and regulating devices in irrigation systems .	7979
Assessment Requirements for NWPIRR002 Operate basic flow control and regulating devices in irrigation systems	7982
NWPIRR005 Develop and review a surface water plan	7984
Assessment Requirements for NWPIRR005 Develop and review a surface water plan .	7987
NWPIRR006 Develop and review an irrigation system plan	7989
Assessment Requirements for NWPIRR006 Develop and review an irrigation system plan	7992
NWPIRR007 Implement and coordinate a surface water plan	7994
Assessment Requirements for NWPIRR007 Implement and coordinate a surface water plan	7997
NWPIRR012 Construct open earthen channels or drains	7999
Assessment Requirements for NWPIRR012 Construct open earthen channels or drains	8002
NWPIRR013 Construct and install irrigation delivery and stormwater drainage assets	8005
Assessment Requirements for NWPIRR013 Construct and install irrigation delivery and stormwater drainage assets	8008
NWPIRR014 Install meters for rural water supplies	8010
Assessment Requirements for NWPIRR014 Install meters for rural water supplies	8013
NWPIRR022 Maintain meters for rural water supplies	8016
Assessment Requirements for NWPIRR022 Maintain meters for rural water supplies	8019
NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems	8021
Assessment Requirements for NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems	8024
NWPIWS002 Operate regulating devices in rural irrigation systems	8026
Assessment Requirements for NWPIWS002 Operate regulating devices in rural irrigation systems	8029
NWPIWS004 Install meters for rural water supplies	8031
Assessment Requirements for NWPIWS004 Install meters for rural water supplies	8034
NWPIWS006 Maintain meters for rural water supplies	8036
Assessment Requirements for NWPIWS006 Maintain meters for rural water supplies	8039
NWPIWS008 Monitor and conduct maintenance on rural irrigation assets	8041
Assessment Requirements for NWPIWS008 Monitor and conduct maintenance on rural irrigation assets	8044

NWPIWS012 Monitor and schedule water deliveries8046
Assessment Requirements for NWPIWS012 Monitor and schedule water deliveries8049
NWPNET002 Prepare and restore work site8051
Assessment Requirements for NWPNET002 Prepare and restore work site.....8054
NWPNET011 Locate, identify and protect utilities8056
Assessment Requirements for NWPNET011 Locate, identify and protect utilities.....8059
NWPNET019 Prepare and restore worksite8061
Assessment Requirements for NWPNET019 Prepare and restore worksite.....8064
NWPNET029 Locate, identify and protect utilities8066
Assessment Requirements for NWPNET029 Locate, identify and protect utilities.....8069
NWPSOU006 Develop and manage a flood plan.....8071
Assessment Requirements for NWPSOU006 Develop and manage a flood plan8074
NWPSOU007 Implement and coordinate a catchment plan8076
Assessment Requirements for NWPSOU007 Implement and coordinate a catchment plan8079
NWPTRT028 Operate and control reclaimed water irrigation.....8081
Assessment Requirements for NWPTRT028 Operate and control reclaimed water irrigation.....8084
PMBWELD301 Butt weld polyethylene plastic pipelines.....8086
Assessment Requirements for PMBWELD301 Butt weld polyethylene plastic pipelines8092
PMBWELD302 Electrofusion weld polyethylene pipelines8096
Assessment Requirements for PMBWELD302 Electrofusion weld polyethylene pipelines8102
PSPPCY004 Support policy implementation8106
Assessment Requirements for PSPPCY004 Support policy implementation.....8108
PSPPCY010 Manage policy implementation8110
Assessment Requirements for PSPPCY010 Manage policy implementation8113
PSPREG003 Apply regulatory powers8115
Assessment Requirements for PSPREG003 Apply regulatory powers8118
PSPREG008 Act on non-compliance8120
Assessment Requirements for PSPREG008 Act on non-compliance8123
PUACOM012 Liaise with media at a local level.....8125
Assessment Requirements for PUACOM012 Liaise with media at a local level8127
PUAEMR005 Treat operational risk8129
Assessment Requirements for PUAEMR005 Treat operational risk8132
PUAEMR006 Assess operational risk.....8135
Assessment Requirements for PUAEMR006 Assess operational risk.....8138
PUAFER008 Confine small emergencies in a facility8140
Assessment Requirements for PUAFER008 Confine small emergencies in a facility8143
PUAFIR008 Operate aerial ignition equipment in an aircraft8145
Assessment Requirements for PUAFIR008 Operate aerial ignition equipment in an aircraft.....8149
PUAFIR017 Work safely around aircraft8152
Assessment Requirements for PUAFIR017 Work safely around aircraft8155
PUAFIR203 Respond to urban fire.....8157
Assessment Requirements for PUAFIR203 Respond to urban fire8164
PUAFIR204 Respond to wildfire8167
Assessment Requirements for PUAFIR204 Respond to wildfire8171
PUAFIR204B Respond to wildfire8174
PUAFIR207 Operate breathing apparatus open circuit.....8182
Assessment Requirements for PUAFIR207 Operate breathing apparatus open circuit 8186
PUAFIR209 Work safely around aircraft8188
Assessment Requirements for PUAFIR209 Work safely around aircraft8191
PUAFIR210 Prevent injury8193
Assessment Requirements for PUAFIR210 Prevent injury8196

PUAFIR302 Suppress urban fire8198
Assessment Requirements for PUAFIR302 Suppress urban fire.....8204
PUAFIR303 Suppress wildfire8207
Assessment Requirements for PUAFIR303 Suppress wildfire8211
PUAFIR303B Suppress wildfire8214
PUAFIR310 Operate specialist appliance8224
Assessment Requirements for PUAFIR310 Operate specialist appliance.....8227
PUAFIR312 Operate aerial ignition equipment in an aircraft8229
Assessment Requirements for PUAFIR312 Operate aerial ignition equipment in an aircraft.....8233
PUAFIR402 Conduct simple prescribed burns8236
Assessment Requirements for PUAFIR402 Conduct simple prescribed burns8241
PUAFIR406 Develop simple prescribed burn plans.....8244
Assessment Requirements for PUAFIR406 Develop simple prescribed burn plans8249
PUAFIR504 Assist with formulation and implementation of plans and policies8252
Assessment Requirements for PUAFIR504 Assist with formulation and implementation of plans and policies.....8255
PUAFIR506 Conduct complex prescribed burns8257
Assessment Requirements for PUAFIR506 Conduct complex prescribed burns.....8264
PUAFIR515 Develop complex prescribed burn plans8267
Assessment Requirements for PUAFIR515 Develop complex prescribed burn plans8273
PUAFIR601 Develop and administer organisational policies, procedures and practices8276
Assessment Requirements for PUAFIR601 Develop and administer organisational policies, procedures and practices8279
PUALAW001 Protect and preserve incident scene8281
Assessment Requirements for PUALAW001 Protect and preserve incident scene.....8284
PUAMAN005 Manage projects8286
Assessment Requirements for PUAMAN005 Manage projects8289
PUAOIL202 Use basic equipment operations for oil spill response.....8291
Assessment Requirements for PUAOIL202 Use basic equipment operations for oil spill response8294
PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines.8296
Assessment Requirements for PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines.....8299
PUAOIL304 Use advanced equipment operations for oil spill response.....8301
Assessment Requirements for PUAOIL304 Use advanced equipment operations for oil spill response.....8304
PUAOPE015 Conduct briefings and debriefings8306
Assessment Requirements for PUAOPE015 Conduct briefings and debriefings8309
PUAOPE016 Manage a multi-team sector.....8311
Assessment Requirements for PUAOPE016 Manage a multi-team sector.....8315
PUATEA001 Work in a team8317
Assessment Requirements for PUATEA001 Work in a team.....8320
RGRHBR302 Carry out natural mare mating procedures8322
Assessment Requirements for RGRHBR302 Carry out natural mare mating procedures8326
RGRHBR303 Assist with artificial insemination of mares8328
Assessment Requirements for RGRHBR303 Assist with artificial insemination of mares8332
RGRHBR304 Assess suitability of horses for specific uses.....8334
Assessment Requirements for RGRHBR304 Assess suitability of horses for specific uses8338
RGRHBR305 Handle young horses8340
Assessment Requirements for RGRHBR305 Handle young horses.....8343
RGRHBR306 Raise young horses.....8345
Assessment Requirements for RGRHBR306 Raise young horses.....8348

RGRHBR307 Carry out procedures for foaling down mares.....	8350
Assessment Requirements for RGRHBR307 Carry out procedures for foaling down mares	8354
RGRHBR401 Maintain horse stud records.....	8356
Assessment Requirements for RGRHBR401 Maintain horse stud records	8359
RGRHBR403 Handle and care for breeding stallions.....	8361
Assessment Requirements for RGRHBR403 Handle and care for breeding stallions ...	8365
RGRHBR505 Oversee administration of stud records.....	8367
Assessment Requirements for RGRHBR505 Oversee administration of stud records ..	8370
RIICAR301D Rehabilitate exploration site.....	8372
Assessment Requirements for RIICAR301D Rehabilitate exploration site	8375
RIICAR302D Rehabilitate small mine site.....	8378
Assessment Requirements for RIICAR302D Rehabilitate small mine site	8380
RIIENV401E Supervise dust and noise control.....	8383
Assessment Requirements for RIIENV401E Supervise dust and noise control.....	8385
RIIMEX201E Suppress dust in open-cut environments.....	8388
Assessment Requirements for RIIMEX201E Suppress dust in open-cut environments	8391
RIIMPO206D Conduct bulk water truck operations	8395
Assessment Requirements for RIIMPO206D Conduct bulk water truck operations	8398
RIIMPO304E Conduct wheel loader operations	8402
Assessment Requirements for RIIMPO304E Conduct wheel loader operations	8405
RIIMPO318F Conduct civil construction skid steer loader operations	8409
Assessment Requirements for RIIMPO318F Conduct civil construction skid steer loader operations	8413
RIIMPO319E Conduct backhoe/loader operations.....	8418
Assessment Requirements for RIIMPO319E Conduct backhoe/loader operations	8422
RIIMPO324F Conduct civil construction grader operations	8427
Assessment Requirements for RIIMPO324F Conduct civil construction grader operations	8431
RIIMPO335E Conduct skid steer loader operations without attachments.....	8436
Assessment Requirements for RIIMPO335E Conduct skid steer loader operations without attachments	8440
RIIWS202D Enter and work in confined spaces.....	8444
Assessment Requirements for RIIWS202D Enter and work in confined spaces.....	8447
RIIWS202E Enter and work in confined spaces	8450
Assessment Requirements for RIIWS202E Enter and work in confined spaces.....	8453
RIIWS204D Work safely at heights	8457
Assessment Requirements for RIIWS204D Work safely at heights.....	8460
RIIWS204E Work safely at heights	8463
Assessment Requirements for RIIWS204E Work safely at heights	8466
RIIWS205E Control traffic with stop-slow bat.....	8470
Assessment Requirements for RIIWS205E Control traffic with stop-slow bat.....	8473
RIIWS302D Implement traffic management plan	8477
Assessment Requirements for RIIWS302D Implement traffic management plan	8480
SFICRO302 Conduct crocodile surveys.....	8483
Assessment Requirements for SFICRO302 Conduct crocodile surveys	8486
SFICRO305 Prepare to work with crocodiles	8489
Assessment Requirements for SFICRO305 Prepare to work with crocodiles.....	8492
SFICRO306 Work safely in crocodile habitats	8495
Assessment Requirements for SFICRO306 Work safely in crocodile habitats	8498
SFICRO401 Manage minor crocodile incidents in the wild	8500
Assessment Requirements for SFICRO401 Manage minor crocodile incidents in the wild	8503
SFICRO403 Capture, transport and release crocodiles	8506
Assessment Requirements for SFICRO403 Capture, transport and release crocodiles.	8510
SIRRINV001 Receive and handle retail stock.....	8513

Assessment Requirements for SIRRINV001 Receive and handle retail stock	8516
SIRRINV002 Control stock	8518
Assessment Requirements for SIRRINV002 Control stock	8521
SIRRMER001 Produce visual merchandise displays	8523
Assessment Requirements for SIRRMER001 Produce visual merchandise displays	8526
SIRRMER003 Coordinate visual merchandising activities	8528
Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities	8531
SIRRRTF001 Balance and secure point-of-sale terminal	8534
Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal	8536
SIRXCEG001 Engage the customer	8538
Assessment Requirements for SIRXCEG001 Engage the customer	8540
SIRXCEG003 Build customer relationships and loyalty	8542
Assessment Requirements for SIRXCEG003 Build customer relationships and loyalty	8544
SIRXIND002 Organise and maintain the store environment	8546
Assessment Requirements for SIRXIND002 Organise and maintain the store environment	8548
SIRXINV004A Buy merchandise	8550
SIRXMKT002 Use social media to engage customers	8561
Assessment Requirements for SIRXMKT002 Use social media to engage customers	8564
SIRXPDK001 Advise on products and services	8568
Assessment Requirements for SIRXPDK001 Advise on products and services	8570
SIRXRSK002 Maintain store security	8572
Assessment Requirements for SIRXRSK002 Maintain store security	8574
SIRXSLS001 Sell to the retail customer	8577
Assessment Requirements for SIRXSLS001 Sell to the retail customer	8580
SIRXSLS002 Follow point-of-sale procedures	8583
Assessment Requirements for SIRXSLS002 Follow point-of-sale procedures	8586
SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres	8589
Assessment Requirements for SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres	8593
SISOSCB006 Perform diver rescues	8599
Assessment Requirements for SISOSCB006 Perform diver rescues	8602
SISXRES001 Conduct sustainable work practices in open spaces	8607
Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces	8610
SITTGDE001 Interpret aspects of local Australian Indigenous culture	8612
Assessment Requirements for SITTGDE001 Interpret aspects of local Australian Indigenous culture	8615
SITTGDE002 Work as a guide	8617
Assessment Requirements for SITTGDE002 Work as a guide	8620
SITTGDE007 Research and share general information on Australian Indigenous cultures	8624
Assessment Requirements for SITTGDE007 Research and share general information on Australian Indigenous cultures	8627
SITTGDE008 Prepare specialised interpretive content on flora, fauna and landscape	8630
Assessment Requirements for SITTGDE008 Prepare specialised interpretive content on flora, fauna and landscape	8633
SITTGDE010 Prepare specialised interpretive content on cultural and heritage environments	8636
Assessment Requirements for SITTGDE010 Prepare specialised interpretive content on cultural and heritage environments	8639
SITTPPD002 Develop interpretive activities	8642
Assessment Requirements for SITTPPD002 Develop interpretive activities	8645
SITTPPD009 Develop environmentally sustainable tourism operations	8648

Assessment Requirements for SITTPD009 Develop environmentally sustainable tourism operations8651

SITXCCS002 Provide visitor information8654

Assessment Re quire ments for SITXCCS002 Provide visitor information8657

SITXCCS006 Provide service to customers8660

Assessment Re quire ments for SITXCCS006 Provide service to customers8664

SITXCOM004 Address protocol re quire ments.....8667

Assessment Re quire ments for SITXCOM004 Address protocol re quire ments8670

TAEASS301 Contribute to assessment8673

Assessment Re quire ments for TAEASS301 Contribute to assessment.....8677

TAEDEL301 Provide work skill instruction.....8679

Assessment Re quire ments for TA EDEL301 Provide work skill instruction.....8683

TA EDEL404 Mentor in the workplace8685

Assessment Re quire ments for TA EDEL404 Mentor in the workplace8689

TLIA0015 Organise re ceival and despatch operations.....8691

Assessment Re quire ments for TLIA0015 Organise re ceival and despatch operations ..8694

TLIA0020 Package goods8696

Assessment Re quire ments for TLIA0020 Package goods8699

TLIA2011 Package goods8701

Assessment Re quire ments for TLIA2011 Package goods8704

TLIA2014 Use product knowledge to complete work operations8707

Assessment Re quire ments for TLIA2014 Use product knowledge to complete work operations8710

TLIA3016 Use inventory systems to organise stock control8713

Assessment Re quire ments for TLIA3016 Use inventory systems to organise stock control8716

TLIA3018 Organise despatch operations.....8718

Assessment Re quire ments for TLIA3018 Organise despatch operations8721

TLIA3019 Organise re ceival operations8724

Assessment Re quire ments for TLIA3019 Organise re ceival operations8727

TLIA3038 Control and order stock8729

Assessment Re quire ments for TLIA3038 Control and order stock.....8732

TLIC0023 Operate four wheel drive vehicle8734

Assessment Re quire ments for TLIC0023 Operate four wheel drive vehicle8739

TLID0001 Load and unload vehicles carrying special loads8742

Assessment Re quire ments for TLID0001 Load and unload vehicles carrying special loads8745

TLID0002 Care for livestock in transit.....8748

Assessment Re quire ments for TLID0002 Care for livestock in transit.....8751

TLID0020 Shift materials safely using manual handling methods8753

Assessment Re quire ments for TLID0020 Shift materials safely using manual handling methods8756

TLID1001 Shift materials safely using manual handling methods8758

Assessment Re quire ments for TLID1001 Shift materials safely using manual handling methods8761

TLID2004 Load and unload goods/cargo.....8764

Assessment Re quire ments for TLID2004 Load and unload goods/cargo8767

TLID2010 Operate a forklift8770

Assessment Re quire ments for TLID2010 Operate a forklift8773

TLID2022 Conduct weighbridge operations8776

Assessment Re quire ments for TLID2022 Conduct weighbridge operations8779

TLIE0002 Process workplace documentation.....8781

Assessment Re quire ments for TLIE0002 Process workplace documentation.....8783

TLIE0008 Calculate mass, area and quantify dimensions.....8785

Assessment Re quire ments for TLIE0008 Calculate mass, area and quantify dimensions8787

TLIE3004 Prepare workplace documents.....8789
Assessment Requirements for TLIE3004 Prepare workplace documents8792
TLIF2010 Apply fatigue management strategies8794
Assessment Requirements for TLIF2010 Apply fatigue management strategies8797
TLIG2007 Work in a socially diverse environment.....8799
Assessment Requirements for TLIG2007 Work in a socially diverse environment8802
TLIH0005 Interpret road maps and navigate pre-determined routes.....8804
Assessment Requirements for TLIH0005 Interpret road maps and navigate
pre-determined routes8807
TLIH0006 Plan and navigate routes8809
Assessment Requirements for TLIH0006 Plan and navigate routes.....8812
TLIK2010 Use infotechnology devices in the workplace8814
Assessment Requirements for TLIK2010 Use infotechnology devices in the workplace 8817
TLIL3003 Conduct induction process.....8819
Assessment Requirements for TLIL3003 Conduct induction process8822
TLIL5019 Implement and monitor transport logistics.....8824
Assessment Requirements for TLIL5019 Implement and monitor transport logistics ..8827
TLILIC0003 Licence to operate a forklift truck8830
Assessment Requirements for TLILIC0003 Licence to operate a forklift truck8835
TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11
metres or more)8841
Assessment Requirements for TLILIC0005 Licence to operate a boom-type elevating work
platform (boom length 11 metres or more)8847
TLILIC2001 Licence to operate a forklift truck8854
Assessment Requirements for TLILIC2001 Licence to operate a forklift truck.....8859
TLIO5017 Manage security of storage facilities.....8864
Assessment Requirements for TLIO5017 Manage security of storage facilities8867
TLIR0004 Negotiate a contract.....8869
Assessment Requirements for TLIR0004 Negotiate a contract8872
TLIR4002 Source goods/services and evaluate contractors.....8874
Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors 8877
TLIR4003 Negotiate a contract.....8879
Assessment Requirements for TLIR4003 Negotiate a contract8882
TLIX0004X Administer inventory systems8884
Assessment Requirements for TLIX0004X Administer inventory systems8887
TLIX0013X Maintain stock control and receivals8889
Assessment Requirements for TLIX0013X Maintain stock control and receivals8892
UEECD0007 Apply work health and safety regulations, codes and practices in the
workplace8895
Assessment Requirements for UEECD0007 Apply work health and safety regulations,
codes and practices in the workplace8898
UEERL0001 Attach cords and plugs to electrical equipment for connection to a single
phase 230 Volt supply8902
Assessment Requirements for UEERL0001 Attach cords and plugs to electrical equipment
for connection to a single phase 230 Volt supply8906
UETDRRF002 Perform EWP rescue.....8910
Assessment Requirements for UETDRRF002 Perform EWP rescue8913
UETTDREL14 Working safely near live electrical apparatus as a non-electrical worker8915
Assessment Requirements for UETTDREL14 Working safely near live electrical
apparatus as a non-electrical worker.....8919
UETTDRRF08 Perform EWP controlled descent escape.....8923
Assessment Requirements for UETTDRRF08 Perform EWP controlled descent escape8925

AHC Agriculture, Horticulture and Conservation and Land Management Training	
Package.....	8927
AHCSS00029 Cotton Industry Skill Set.....	8934
AHCSS00030 Farm Business Management Skill Set.....	8936
AHCSS00032 Identify Plants for Indigenous Land Management Skill Set.....	8938
AHCSS00042 Organic Crop Management Skill Set.....	8940
AHCSS00044 Organic Horticulture Management Skill Set.....	8942
AHCSS00045 Spray Operator Skill Set.....	8944
AHCSS00046 Organic Livestock Management Skill Set.....	8946
AHCSS00047 Report on Aboriginal Cultural Sites Skill Set.....	8948
AHCSS00048 Permaculture Demonstrator Skill Set.....	8950
AHCSS00049 Pig Health Supervisor Skill Set.....	8952
AHCSS00050 Pork Industry Euthanasia Skill Set.....	8954
AHCSS00053 Poultry Egg Industry Pullet Rearing Skill Set.....	8956
AHCSS00054 Poultry Egg Industry Stockpersons Skill Set.....	8958
AHCSS00055 Poultry Health Skill Set.....	8960
AHCSS00056 Poultry Husbandry Skill Set.....	8962
AHCSS00058 Poultry Industry Egg Collection and Packing on Farm Skill Set.....	8964
AHCSS00059 Poultry Industry Egg Grading and Packing at Grading Floor Skill Set.....	8966
AHCSS00060 Poultry Meat Industry Stockpersons Skill Set.....	8968
AHCSS00061 Prepare For and Manage Organic Farm Certification Skill Set.....	8970
AHCSS00063 Production Horticulture Administration Officer Skill Set.....	8972
AHCSS00064 Production Horticulture Administration Supervisor Skill Set.....	8974
AHCSS00068 Production Horticulture Technology Skill Set.....	8976
AHCSS00069 Recognise Aboriginal Cultural Sites Skill Set.....	8978
AHCSS00070 Recognise Native and Feral Fauna Skill Set.....	8980
AHCSS00071 Recognise Native Fauna in Indigenous Land Management Skill Set.....	8981
AHCSS00072 Pest Management Planning Skill Set.....	8983
AHCSS00073 Advanced Chemical Spray Application Skill Set.....	8985
AHCSS00074 Agricultural Chemical Skill Set.....	8987
AHCSS00075 Basic Beekeeping Skill Set.....	8989
AHCSS00076 Australian Native Stingless Bees Skill Set.....	8991
AHCSS00077 Pollination Services Skill Set.....	8992
AHCSS00078 Queen Bee Breeding Skill Set.....	8994
AHCSS00079 Carbon Farming Services Advisor (CFSA) Skill Set.....	8995
AHCSS00080 Introduction to Carbon Farming Skill Set.....	8997
AHCSS00081 Introduction to Carbon Farming Savanna Burning Skill Set.....	8999
AHCSS00082 Carbon Farming Aerial Savanna Burning Skill Set.....	9001
AHCSS00083 Carbon Farming Savanna Burning Operations Leader Skill Set.....	9003
AHCSS00084 Carbon Farming Vegetation Method Skill Set.....	9005
AHCSS00085 Carbon Farming Soil-based Method Skill Set.....	9007
AHCSS00086 Carbon Farming Agricultural Method Skill Set.....	9009
AHCSS00087 Farm Business Finances Skill Set.....	9011
AHCSS00088 Farm Business Workforce Skill Set.....	9013
AHCSS00089 Business Skills For Sports Turf Management Skill Set.....	9015
AHCSS00090 Introduction To Sports Turf Maintenance Skill Set.....	9017
AHCSS00091 Technical Skills For Sports Turf Management Skill Set.....	9018
AHCSS00092 Irrigation Retailer Skill Set.....	9020
AHCSS00093 Gravity Fed Irrigation Operator Skill Set.....	9022
AHCSS00094 Irrigation Agronomist Skill Set.....	9024
AHCSS00095 Irrigation Contractor Skill Set.....	9026
AHCSS00096 Irrigation Installer Skill Set.....	9028
AHCSS00097 Irrigation Manager Skill Set.....	9030

AHCSS00098 Pressurised Irrigation System Operator Skill Set.....	9032
AHCSS00099 Irrigation Systems Auditor Skill Set.....	9034
AHCSS00100 Irrigation Systems Efficiency Skill Set.....	9036
AHCSS00101 Irrigation Retail Sales Skill Set.....	9037

AHC10120 Certificate I in Conservation and Ecosystem Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification provides foundation level skills and knowledge required for initial work, community involvement, or as an introduction to further learning in conservation and ecosystem management.

Individuals with this qualification will have basic foundational, technical and communications skills required to undertake defined routine tasks in conservation work in a highly structured work environment.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 6 units of competency:
 - 3 core units plus
 - 3 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

The electives are to be chosen as follows:

- up to 3 from the electives listed below, or from any currently endorsed Training Package or accredited course.

Core Units

AHCECR101	Support ecological restoration
AHCWHS101	Work safely
AHCWRK101	Maintain the workplace

Elective Units

AHCCHM101	Follow basic chemical safety rules
AHCECR102	Support native seed collection
AHCMOM101	Assist with routine maintenance of machinery and equipment
AHCNSY102	Support nursery work
AHCWRK204	Work effectively in the industry

AHC10216 Certificate I in AgriFood Operations

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification is an entry-level qualification aimed at individuals entering the agriculture, horticulture and conservation and land management industries. It allows individuals to develop basic skills and knowledge to prepare for work. They may undertake a range of simple tasks under close supervision. The range of technical skills and knowledge is limited.

The qualification is suited to VET in Schools programs or learners with no previous connection to the agriculture, horticulture or conservation and land management industries or relevant employment history.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 6 units of competency:
 - 2 core units plus
 - 4 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select at least 2 units from the elective list
- 2 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course. The 2 units selected can be at AQF level 1 or AQF level 2
- Selected units must be relevant to job outcomes in AgriFood industries and must be chosen to ensure the integrity of the qualification outcome at AQF level 1.

Core Units

Work

AHCWRK101	Maintain the workplace
-----------	------------------------

Work health and safety

AHCWHS101	Work safely
-----------	-------------

Elective Units

Broadacre cropping

AHCBAC102	Support agricultural crop work

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification an entry-level qualification aimed at individuals entering the permaculture industry. It allows individuals to develop basic skills and knowledge to prepare for work. They may undertake a range of simple tasks under close supervision. The range of technical skills and knowledge is limited.

The qualification is suited to VET in Schools programs or learners with no previous connection to permaculture or relevant employment history.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 7 units of competency:
 - 4 core units plus
 - 3 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select at least 2 units from the elective list
- 1 unit may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course.

Selected unit must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 1.

Core Units

AHCPER101	Observe permaculture principles and work practices
AHCPER102	Support resource conservation practices
AHCPER103	Support plant care in a permaculture system
AHCWHS101	Work safely

Elective Units

AHCECR101	Support ecological restoration
AHCPER212	Use and maintain garden hand tools and equipment
AHCORG101	Support organic production
AHCWRK101	Maintain the workplace

Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification provides a general vocational outcome in agriculture. The qualification enables individuals to select a livestock production, cropping or livestock context as a job focus or, in the case of mixed farming enterprises, both cropping and livestock.

Individuals with this qualification carry out routine tasks under general supervision and exercise limited autonomy with some accountability for their own work. Job roles vary across different industry sectors and may include:

- Assistant animal attendant/stockperson
- Assistant farm or station hand
- Assistant farm or station worker
- Assistant farm or station labourer.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:
 - 3 core units plus
 - 15 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 7 units from Group A
- 5 units from the remaining units in Group A, or from Group B
- up to 3 may be selected from the remaining units listed in this qualification or from any currently endorsed Training Package or Accredited Course.

Core Units

AHCWHS201	Participate in work health and safety processes
AHCWRK204	Work effectively in the industry
AHCWRK209	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

AHCBAC205	Assist agricultural crop establishment
AHCBAC206	Assist agricultural crop maintenance
AHCBAC207	Assist agricultural crop harvesting
AHCBIO203	Inspect and clean machinery, tools and equipment to preserve biosecurity
AHCBIO204	Follow site biosecurity procedures

AHCCHM201	Apply chemicals under supervision
AHCINF201	Carry out basic electric fencing operations
AHCINF202	Install, maintain and repair farm fencing
AHCINF203	Maintain properties and structures
AHCINF204	Fabricate and repair metal or plastic structures
AHCIRG220	Assist with surface irrigation operations
AHCIRG221	Assist with pressurised irrigation operations
AHCLSK202	Care for health and welfare of livestock
AHCLSK204	Carry out regular livestock observation
AHCLSK205	Handle livestock using basic techniques
AHCLSK206	Identify and mark livestock
AHCLSK207	Load and unload livestock
AHCLSK209	Monitor water supplies
AHCLSK210	Muster and move livestock
AHCLSK211	Provide feed for livestock
AHCLSK219	Carry out birthing duties
AHCLSK220	Monitor livestock to parturition
AHCMOM201	Operate two wheel motorbikes
AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles
AHCMOM217	Operate quad bikes
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders

AHCWRK201	Observe and report on weather
AHCWRK205	Participate in workplace communications
AHCWRK206	Observe enterprise quality assurance procedures
AHCWRK207	Collect and record production data
AHCWRK312	Operate in isolated and remote situations
FWPCOT3325	Operate a four wheel drive on unsealed roads
HLTAID010	Provide basic emergency life support
MEM18001	Use hand tools
MEM18002	Use power tools/hand held operations
TLID0020	Shift materials safely using manual handling methods

Group B

ACMEQU202*	Handle horses safely
ACMEQU205	Apply knowledge of horse behaviour
ACMEQU206*	Perform horse riding skills at walk, trot and canter
ACMHBR201*	Check and treat horses
ACMHBR203*	Provide daily care for horses
AHCAIS202	Assist with artificial insemination procedures
AHCBAC208	Prepare grain storages
AHCBEK203	Open and reassemble a beehive
AHCBEK205	Prepare and use a bee smoker
AHCBEK206	Assemble and maintain beekeeping components
AHCDRG202	Maintain drainage systems
AHCDRY202	Milk livestock
AHCIRG219	Assist with low volume irrigation operations

AHCLSK201	Assist with feeding in a production system
AHCLSK213	Clean out production sheds
AHCLSK214	Maintain production growing environments
AHCLSK215	Carry out alpaca handling and husbandry operations
AHCLSK218*	Ride educated horses to carry out basic stock work
AHCMOM206	Conduct grader operations
AHCMOM207	Conduct front-end loader operations
AHCMOM208	Conduct excavator operations
AHCMOM209	Conduct dozer operations
AHCMOM210	Conduct scraper operations
AHCMOM214	Operate cane haulage vehicle
AHCPHT214	Support horticultural crop harvesting
AHCPHT215	Plant horticultural crops
AHCPHT216	Carry out canopy maintenance
AHCPHT218	Carry out post-harvest operations
AHCPLY201	Collect store and handle eggs from breeder flocks
AHCPLY202	Maintain health and welfare of poultry
AHCPLY203	Set up shed for placement of day-old chickens
AHCPLY204	Collect and pack eggs for human consumption
AHCPLY205	Grade and pack eggs for human consumption
AHCPMG309	Apply pest animal control techniques
AHCPRK201	Care for health and welfare of pigs
AHCPRK203	Move and handle pigs
AHCPRK204	Care for weaner pigs
AHCPRK305	Care for grower and finisher pigs

AHCSAW203	Conduct erosion and sediment control activities
AHCSDT309	Prepare a working sample
AHCSDT310	Identify seeds
AHCSHG201	Crutch sheep
AHCSHG202	Assist in preparing for shearing and crutching
AHCSHG203	Shear sheep to novice level
AHCSHG204	Shear sheep to improver level
AHCSHG205	Grind combs and cutters for machine shearing
AHCSHG206	Prepare handpiece and downtube for machine shearing
AHCSOL203	Assist with soil or growing media sampling and testing
AHCWAT201	Set up, operate and maintain water delivery systems for compost
AHCWOL201	Pen sheep
AHCWOL202	Perform board duties
AHCWOL203	Carry out wool pressing
RGRHBR303*	Assist with artificial insemination of mares
RGRHBR305*	Handle young horses
RIIWHS202E	Enter and work in confined spaces
RIIWHS204E	Work safely at heights
TLID2022	Conduct weighbridge operations
TLILIC0003	Licence to operate a forklift truck

Prerequisite requirements

Note: Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	Prerequisite requirement
--------------------	--------------------------

ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour
ACMEQU206 Perform horse riding skills at walk, trot and canter	ACMEQU202 Handle horses safely*

AHC20320 Certificate II in Production Horticulture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for supporting job roles in the production horticulture and floriculture industry including field worker, picker, pruner and packer.

Individuals with this qualification carry out routine tasks under supervision where the work is predictable and structured with limited judgement requirements.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 4 core units plus
 - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. Electives can be chosen to provide a general qualification or a qualification with a specialisation.

For the award of the *Certificate II in Production Horticulture* choose:

- at least 8 units must be selected from groups A, B or C

- up to 3 units from the remaining electives listed in groups A, B or C or any currently endorsed Training Package or accredited course package at Certificate II or III.

For the award of *Certificate II in Production Horticulture (Horticulture)*, choose:

- at least 3 electives must be selected from Group A
- up to 5 units from the remaining units listed in groups A, B or C
- up to 3 unit from the remaining units listed in groups A, B or C, or any currently endorsed Training Package or accredited course packaged at Certificate II or III.

For the award of *Certificate II in Production Horticulture (Floriculture)*, choose:

- At least 3 electives must be selected from Group B
- up to 5 units from the remaining units listed in groups A, B or C
- up to 3 unit from the remaining units listed in groups A, B or C, or any currently endorsed Training Package or accredited course packaged at Certificate II or III.

Core Units

AHCBIO204	Follow site biosecurity procedures
AHCWHS201	Participate in work health and safety processes
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications

Elective Units

Group A (horticulture)

AHCCHM201	Apply chemicals under supervision
AHCMOM203	Operate basic machinery and equipment
AHCPHT214	Support horticultural crop harvesting
AHCPHT215	Plant horticultural crops
AHCPHT218	Carry out post-harvest operations
AHCSOL203	Assist with soil or growing media sampling and testing
AHCWRK209	Participate in environmentally sustainable work practices
FBPFSY2001	Implement the food safety program and procedures

Group B (floriculture)

AHCNSY205	Pot up plants
AHCNSY206	Care for nursery plants
AHCNSY207	Undertake propagation activities
AHCPCM204	Recognise plants
AHCPHT214	Support horticultural crop harvesting
AHCPHT215	Plant horticultural crops
AHCPHT217	Undertake field budding and grafting
AHCPHT218	Carry out post-harvest operations
AHCSOL203	Assist with soil or growing media sampling and testing
AHCWRK209	Participate in environmentally sustainable work practices

Group C (general electives)

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCBIO203	Inspect and clean machinery for plant, animal and soil material
AHCDRG202	Maintain drainage systems
AHCINF203	Maintain properties and structures
AHCIRG219	Assist with low volume irrigation operations
AHCIRG221	Assist with pressurised irrigation operations
AHCMDC201	Assist with propagation of medicinal cannabis
AHCMDC202	Assist with care and maintenance of medicinal cannabis
AHCMDC203	Assist with harvest and pre-processing of medicinal cannabis
AHCMOM201	Operate two wheel motorbikes

AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles
AHCMOM216	Operate side by side utility vehicles
AHCMOM217	Operate quad bikes
AHCNSY208	Maintain indoor plants
AHCPGD203	Prune shrubs and small trees
AHCPHT211	Maintain crop
AHCPHT212	Perform manual pollination of crops
AHCPHT216	Carry out canopy maintenance
AHCPHT219	Handle and move mushroom boxes
AHCPHT220	Perform mushroom substrate process tasks
AHCPHT221	Water mushroom crops
AHCPHT222	Produce trellis dried grapes
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCWRK201	Observe and report on weather
AHCWRK206	Observe enterprise quality assurance procedures
AHCWRK207	Collect and record production data
AHCWRK208	Provide information on products and services
AHCWRK312	Operate in isolated and remote situations
FBPBP2008	Perform basic packaging tests and inspections

FBPOPR1010	Carry out manual handling tasks
FBPOPR2012	Maintain food safety when loading, unloading and transporting food
FBPOPR2063	Clean equipment in place
FBPOPR2064	Clean and sanitise equipment
FBPOPR2065	Conduct routine maintenance
FBPOPR2066	Apply sampling procedures
FBPOPR2067	Work in a food handling area for non-food handlers
FBPOPR2070	Apply quality systems and procedures
FBPVIT2001	Bench graft vines
FBPVIT2002	Carry out potting operations
FBPVIT2003	Hand prune vines
FBPVIT2005	Maintain callusing environment
FBPVIT2006	Obtain and process rootlings
FBPVIT2007	Tend containerised nursery plants
FBPVIT2008	Train vines
FBPVIT2010	Take and process vine cuttings
FBPVIT2011	Operate vineyard equipment
FBPVIT2016	Carry out hot water treatment
FBPVIT2017	Operate nursery cold storage facilities
FBPVIT2018*	Support mechanical harvesting operations
FBPVIT3005	Install and maintain vine trellis

FBPVIT3006	Field graft vines
FBPVIT3007*	Operate specialised canopy management equipment
FWPCOT3259	Operate a four wheel drive on unsealed roads
HLTAID011	Provide First Aid
MEM11011*	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006*	Organise and communicate information
MEM18001*	Use hand tools
MEM18002*	Use power tools/hand held operations
TLIA2011	Package goods
TLID1001	Shift materials safely using manual handling methods
TLID2022	Conduct weighbridge operations
TLILIC0003	Licence to operate a forklift truck

AHC20416 Certificate II in Horticulture

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification underpins a range of work functions and job roles that can lead to a horticultural trade qualification.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 5 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 8 units from the electives listed below
- 2 units may be selected from the remaining electives list below and/or from this or any other currently endorsed Training Package or Accredited Course.

Core Units

AHCPCM201	Recognise plants
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCSOL202	Assist with soil or growing media sampling and testing
AHCWHS201	Participate in work health and safety processes

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCARB201	Apply a range of treatments to trees
AHCARB206	Operate and maintain stump grinding machines
AHCARB303*	Perform pruning operations
AHCARB311	Tie, dress, set and finish arborist knots
AHCARB312*	Use standard climbing techniques to access trees
AHCCHM201	Apply chemicals under supervision
AHCINF203	Maintain properties and structures
AHCINF204	Fabricate and repair metal or plastic structures
AHCIRG215	Assist with low volume irrigation operations
AHCIRG217	Assist with pressurised irrigation operations
AHCLSC201	Assist with landscape construction work
AHCLSC202	Construct low-profile timber or modular retaining walls
AHCLSC203	Install aggregate paths
AHCLSC204	Lay paving
AHCLSC205	Install tree protection devices
AHCMOM202	Operate tractors

AHCMOM203	Operate basic machinery and equipment
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles
AHCMOM211	Operate side by side utility vehicles
AHCMOM212	Operate quad bikes
AHCMOM213	Operate and maintain chainsaws
AHCNSY201	Pot up plants
AHCNSY202	Care for nursery plants
AHCNSY203	Undertake propagation activities
AHCNSY204	Maintain indoor plants
AHCPCM202	Collect, prepare and preserve plant specimens
AHCPCM203*	Fell small trees
AHCPGD201	Plant trees and shrubs
AHCPGD202	Prepare and maintain plant displays
AHCPGD203	Prune shrubs and small trees
AHCPGD204	Transplant small trees
AHCPGD205	Prepare a grave site
AHCPGD206	Conduct visual inspection of park facilities
AHCTRF201	Assist with turf construction
AHCTRF202	Prepare turf surfaces for play
AHCTRF203	Renovate grassed areas
AHCTRF204	Support turf establishment
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK206	Observe enterprise quality assurance procedures

AHCWRK207	Collect and record production data
AHCWRK208	Provide information on products and services
AHCWRK209	Participate in environmentally sustainable work practices
BSBINM201	Process and maintain workplace information
BSBWOR204	Use business technology
FWPCOT2236	Fall trees manually (basic)
FWPCOT2239	Trim and cut felled trees
FWPFGM2207	Undertake brushcutting operations
FWPFGM3212	Fall trees manually (intermediate)
FWPHAR2206	Operate a mobile chipper/mulcher
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations
SIRRINV002	Control stock
SIRRMER001	Produce visual merchandise displays
SIRRRTF001	Balance and secure point-of-sale terminal
SIRXCEG001	Engage the customer
SIRXIND002	Organise and maintain the store environment
SIRXPDK001	Advise on products and services
SIRXSLS001	Sell to the retail customer
SIRXSLS002	Follow point-of-sale handling procedures
TLID1001	Shift materials safely using manual handling methods

Prerequisite requirements

Unit of competency	Prerequisite requirement
AHCARB303 Perform pruning operations	FWPCOT2237 Maintain chainsaws FWPCOT2239 Trim and cut felled trees

	OR FWPCOT3238 Operate a pole saw
AHCARB312 Use standard climbing techniques to access trees	AHCARB311 Tie, dress, set and finish arborist knots
AHCPCM203 Fell small trees	AHCMOM213 Operate and maintain chainsaws

AHC20520 Certificate II in Arboriculture

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Qualification Description

This qualification describes the skills and knowledge for ground-based tree workers in the arboriculture industry.

Individuals with this qualification perform a range of ground-based arboriculture activities under supervision including, pruning of trees, felling of small trees, operation of chainsaws, and the operation of equipment required for processing and removal of tree material. The work may involve high risk operations in support of arborists. Work practices are undertaken within a strict safety regime to protect workers and the public.

This qualification is suitable as a pre-apprenticeship or school based program for introduction to the arboriculture industry.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some States and Territories.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 11 core units of competency

Core Units

AHCARB211	Apply treatments to trees
AHCARB212	Operate and maintain stump grinding machines

AHCARB213	Perform ground-based rigging
AHCARB214	Recognise trees
AHCARB316	Perform pruning operations
FWPCOT2236	Fall trees manually (basic)
FWPCOT2237	Maintain chainsaws
FWPCOT2239	Trim and cut felled trees
FWPCOT3238	Operate a pole saw
FWPHAR2206	Operate a mobile chipper/mulcher
HLTAID011	Provide First Aid

AHC20621 Certificate II in Parks and Gardens

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for supporting job roles in the parks and gardens industry including garden labourer.

Individuals with this qualification carry out routine tasks under supervision where the work is predictable and structured with limited judgement requirements.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 7 core units plus
 - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 5 must be from the electives listed below
- 3 from the remaining electives listed below, or any other currently endorsed Training Package or accredited course.

Core Units

AHCMOM203	Operate basic machinery and equipment
AHCPCM204	Recognise plants
AHCPGD207	Plant trees and shrubs
AHCPGD208	Prepare and maintain plant displays
AHCPGD209	Prune shrubs and small trees
AHCTRF208	Support turf establishment
AHCWHS201	Participate in work health and safety processes

Elective Units

AHCARB211	Apply treatments to trees
AHCCHM201	Apply chemicals under supervision
AHCIRG221	Assist with pressurised irrigation operations
AHCLSC206	Assist with landscape construction work
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM216	Operate side by side utility vehicles
AHCNSY207	Undertake propagation activities
AHCPGD210	Transplant shrubs and small trees
AHCPGD212	Conduct visual inspection of park facilities
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCSOL203	Assist with soil or growing media sampling and testing
AHCTRF205	Assist in the preparation of turf surfaces for play
AHCTRF207	Renovate grassed areas
AHCWRK207	Collect and record production data
FWPCOT2254	Maintain chainsaws

FWPCOT2256	Trim and cut felled trees
HLTAID011	Provide First Aid
PUAFER008	Confine small emergencies in a facility
RIIWHS205E	Control traffic with stop-slow bat

AHC20720 Certificate II in Nursery Operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for supporting job roles in the nursery industry including production nursery assistant, production nursery worker, retail nursery sales assistant and retail nursery maintainer.

Individuals with this qualification undertake routine tasks under supervision where the work is predictable and structured with limited judgement requirements.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 3 core units plus
 - 13 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. Electives can be chosen to provide a general qualification or a qualification with a specialisation.

For the award of the *Certificate II in Nursery Operations* choose:

- at least 10 electives from groups A, B or C

- up to 3 units from the remaining electives listed in groups A, B or C or any currently endorsed Training Package or accredited course packaged at Certificate II or III.

For the award of the *Certificate II in Nursery Operations (Nursery Production)* choose:

- at least 4 electives from Group A
- up to 6 units from the remaining units listed in groups A, B or C
- up to 3 units from the remaining units listed in groups A, B or C, or any currently endorsed Training Package or accredited course packaged at Certificate II or III.

For the award of the *Certificate II in Nursery Operations (Retail Nursery)* choose:

- at least 4 electives from Group B
- up to 6 units from the remaining units listed in groups A, B or C
- up to 3 units from the remaining units listed in groups A, B or C, or any currently endorsed Training Package or accredited course packaged at Certificate II or III.

Where two specialisations are completed, award of the qualification would read (for example), *Certificate II in Nursery Operations (Nursery Production, Retail Nursery)*.

Core Units

AHCNSY206	Care for nursery plants
AHCPCM204	Recognise plants
AHCWHS201	Participate in work health and safety processes

Elective Units

Group A (nursery production)

AHCCHM201	Apply chemicals under supervision
AHCIRG221	Assist with pressurised irrigation operations
AHCNSY205	Pot up plants
AHCNSY207	Undertake propagation activities
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders

AHCSOL203	Assist with soil or growing media sampling and testing
AHCWRK207	Collect and record production data

Group B (retail nursery)

AHCNSY208	Maintain indoor plants
AHCPGD202	Prepare and maintain plant displays
SIRRINV001	Receive and handle retail stock
SIRXIND002	Organise and maintain the store environment
SIRXSLS001	Sell to the retail customer

Group C (general electives)

AHCBIO203	Inspect and clean machinery, tools and equipment to preserve biosecurity
AHCBIO204	Follow site biosecurity procedures
AHCDRG202	Maintain drainage systems
AHCINF203	Maintain properties and structures
AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM216	Operate side by side utility vehicles
AHCPGD203	Prune shrubs and small trees
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK209	Participate in environmentally sustainable work practices
BSBINS201	Process and maintain workplace information
BSBTEC201	Use business software applications

HLTAID010	Provide basic emergency life support
ICTICT214	Operate application software packages
SIRRINV002	Control stock
SIRXSLS002	Follow point-of-sale procedures
TLID1001	Shift materials safely using manual handling methods
TLID2004	Load and unload goods/cargo

AHC20919 Certificate II in Sports Turf Management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for entry level workers and support roles within sports turf management. These workers mainly carry out routine and structured tasks under direct supervision, with limited judgement requirements.

This qualification is suitable as a pre-apprenticeship or school based program for introduction to the sports turf management industry.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 8 units of competency:
 - 5 core units plus
 - 3 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The 3 electives are to be chosen from the elective units listed below.

Core Units

AHCIRG221	Assist with pressurised irrigation operations
AHCMOM203	Operate basic machinery and equipment

AHCTRF205	Assist in the preparation of turf surfaces for play
AHCTRF207	Renovate grassed areas
AHCTRF208	Support turf establishment

Elective Units

AHCCHM201	Apply chemicals under supervision
AHCINF203	Maintain properties and structures
AHCMOM204	Undertake operational maintenance of machinery
AHCPCM204	Recognise plants
AHCPGD201	Plant trees and shrubs
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCSOL203	Assist with soil or growing media sampling and testing
AHCTRF206	Assist with turf construction
AHCWHS201	Participate in work health and safety processes
AHCWRK209	Participate in environmentally sustainable work practices

AHC21020 Certificate II in Conservation and Ecosystem Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification provides the skills and knowledge required for work in a defined context and/or for further study in conservation and ecosystem management. Work would be carried out under general guidance and supervision.

The qualification enables individuals to select and develop basic factual, technical and procedural knowledge in conservation and ecosystem management for Indigenous land management, lands, parks and wildlife services and the restoration and rehabilitation of ecosystems.

No licensing, legislative or certification requirements apply to this qualification at the time of publication. Users are advised that individual elective units selected may have licensing, legislative or certification requirements and are advised to check the units individually for these requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 2 core units plus
 - 13 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

The electives are to be chosen as follows:

- at least 4 units must be selected from Group A
- remaining units can be selected from Group A or Group B and up to 3 units from any Training Package or accredited course.

Core Units

AHCWHS201	Participate in work health and safety processes
AHCWRK209	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

AHCBIO203	Inspect and clean machinery, tools and equipment to preserve biosecurity
AHCECR202	Maintain wildlife habitat refuges
AHCECR203	Perform basic ecological restoration works
AHCECR201	Capture digital media for fieldwork
AHCECR305	Collect native seed
AHCFAU202	Recognise fauna
AHCFIR202	Assist with planned burning
AHCILM201	Maintain cultural places
AHCILM202	Observe and report plants or animals
AHCILM203	Record information about Country
AHCLPW201	Operate a handheld GPS device
AHCLPW311	Construct access tracks
AHCPCM202	Collect, prepare and preserve plant specimens
AHCPCM204	Recognise plants
AHCPGD206	Conduct visual inspection of park facilities
AHCPMG201	Treat weeds

AHCPMG202	Treat plant pests, diseases and disorders
AHCPMG304	Use firearms to humanely destroy animals
AHCPMG307	Apply animal trapping techniques
AHCPMG312	Apply poison baits for vertebrate pest control in rural and environmental landscapes
AHCSAW203	Conduct erosion and sediment control activities
AHCSAW202	Recognise landforms and soil types
AHCWRK202	Observe environmental work practices
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK312	Operate in isolated and remote situations
PUAFIR204*	Respond to wildfire
PUAFIR210	Prevent injury
PUALAW001	Protect and preserve incident scene
SITXCCS002	Provide visitor information

Group B

AHCCHM201	Apply chemicals under supervision
AHCINF201	Carry out basic electric fencing operations
AHCINF202	Install, maintain and repair farm fencing
AHCINF203	Maintain properties and structures
AHCLSC201	Assist with landscape construction work
AHCLSC203	Install aggregate paths
AHCLSC205	Install tree protection devices
AHCMOM201	Operate two wheel motorbikes
AHCMOM202	Operate tractors

AHCMOM203	Operate basic machinery and equipment
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles
AHCMOM206	Conduct grader operations
AHCMOM207	Conduct front-end loader operations
AHCMOM208	Conduct excavator operations
AHCMOM209	Conduct dozer operations
AHCMOM210	Conduct scraper operations
AHCMOM213	Operate and maintain chainsaws
AHCMOM216	Operate side by side utility vehicles
AHCMOM217	Operate quad bikes
AHCNSY206	Care for nursery plants
AHCNSY207	Undertake propagation activities
AHCPCM205*	Fell small trees
AHCPGD201	Plant trees and shrubs
AHCSOL203	Assist with soil or growing media sampling and testing
AHCWRK201	Observe and report on weather
AHCWRK206	Observe enterprise quality assurance procedures
AHCWRK207	Collect and record production data
AHCWRK208	Provide information on products and services
BSBINS201	Process and maintain workplace information
BSBTEC201	Use business software applications
FWPCOT3259	Operate a four wheel drive on unsealed roads
HLTAID009	Provide cardiopulmonary resuscitation

HLTAID010	Provide basic emergency life support
HLTAID011	Provide First Aid
HLTAID013	Provide First Aid in remote or isolated site
PUAFIR210	Prevent injury
TLID1001	Shift materials safely using manual handling methods
TLILIC0003	Licence to operate a forklift truck

Prerequisite requirements

Unit of competency	Prerequisite requirement
AHCPCM205 Fell small trees	AHCMOM213 Operate and maintain chainsaws

AHC21119 Certificate II in Irrigation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for entry-level workers in the irrigation industry.

Individuals with this qualification work under routine supervision where the work is predictable and structured with limited judgement requirements.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 3 core unit plus
 - 13 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 must be from electives Group A
- 7 must be from electives Group A or B
- 2 from the remaining units listed in Groups A or B, or any other currently endorsed Training Package or accredited course packaged at Certificate II.

Core Units

AHCIRG219	Assist with low volume irrigation operations
AHCIRG221	Assist with pressurised irrigation operations
AHCWHS201	Participate in work health and safety processes

Elective Units

Group A

AHCIRG220	Assist with surface irrigation operations
AHCIRG222	Assist with pump and flow control device operations
AHCSOL202	Assist with soil or growing media sampling and testing
AHCWRK209	Participate in environmentally sustainable work practices
NWPIRR002	Operate basic flow control and regulating devices in irrigation systems
NWPIRR012	Construct open earthen channels or drains

Group B

(An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.)

AHCDRG202	Maintain drainage systems
AHCMOM203	Operate basic machinery and equipment
AHCPER209	Recognise characteristics of integrated plant and animal systems
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK208	Provide information on products and services
CPCPCM2040A	Read plans and calculate plumbing quantities
CPCPCM2043A	Carry out WHS requirements

CPCPCM2047A *	Carry out levelling
NWPIRR013	Construct and install irrigation delivery and stormwater drainage assets
NWPNET002	Prepare and restore work site
TLID1001	Shift materials safely using manual handling methods

Prerequisite requirements

Unit of competency	Prerequisite requirement
CPCPCM2047A Carry out levelling	CPCPCM2043A Carry out WHS requirements

AHC21216 Certificate II in Rural Operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome for industries and agencies in rural and regional Australia.

Depending on the units selected individuals can be employed not only in rural industries but also other rural and regional sectors, such as local government, tourism, hospitality, transport, construction, community services, information technology and metals.

Industry expects individuals with this qualification to carry out routine tasks under general supervision and exercise limited autonomy with some accountability for their own work.

This qualification is suitable for an Australian Apprenticeship.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 3
- Elective Units = 12

Core Units

Work

Unit Code	Unit Title
AHCWRK204	Work effectively in the industry

AHCWRK209	Participate in environmentally sustainable work practices
-----------	---

Work health and safety

Unit Code	Unit Title
AHCWHS201	Participate in work health and safety processes

Elective Units

- Select at least 7 units from Certificate II in this Training Package
- 5 units aligned to AQF levels 1, 2, or 3 may be selected from up to 3 other endorsed Training Packages or Accredited Courses
Selected units must be relevant to job outcomes in AgriFood industries and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Qualification Mapping Information

This qualification is not equivalent to AHC21210 Certificate II in Rural Operations.

AHC21316 Certificate II in Shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an entry level occupational outcome in shearing. It recognises the work of a novice shearer who is able to shear a minimum of 40 adult merino sheep or 50 adult crossbred sheep per day to an acceptable industry standard. The shearing industry expects this qualification to be achieved to meet job outcomes at this level.

This qualification is suitable for an Australian Apprenticeship.

Possible job titles relevant to this qualification include:

- Shearer - novice level

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 9

- Core Units = 9
- Elective Units = 0

Core Units

Livestock

AHCLSK217	Apply animal welfare principles to handling and husbandry of livestock
-----------	--

Shearing

Unit Code	Unit Title
AHCSHG201	Crutch sheep
AHCSHG203	Shear sheep to novice level
AHCSHG205	Grind combs and cutters for machine shearing
AHCSHG206	Prepare handpiece and downtube for machine shearing
AHCSHG210	Undertake basic shearing and crutching

Work

Unit Code	Unit Title
AHCWRK204	Work effectively in the industry
AHCWRK209	Participate in environmentally sustainable work practices

Work health and safety

Unit Code	Unit Title
AHCWHS201	Participate in work health and safety processes

Qualification Mapping Information

This qualification is not equivalent to AHC21310 Certificate II in Shearing.

AHC21621 Certificate II in Landscaping

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for supporting job roles in the landscape industry including landscape labourer.

Individuals with this qualification carry out routine tasks under supervision where the work is predictable and structured with limited judgement requirements.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 8 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 must be from the electives listed below
- 3 from the remaining electives listed below, or any currently endorsed Training Package or accredited course.

Core Units

AHCLSC206	Assist with landscape construction work
AHCLSC207	Construct low-profile timber or modular retaining walls
AHCLSC208	Install aggregate paths
AHCLSC209	Lay paving
AHCMOM203	Operate basic machinery and equipment
AHCPCM204	Recognise plants
AHCPGD207	Plant trees and shrubs
AHCWHS201	Participate in work health and safety processes

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCARB211	Apply treatments to trees
AHCCHM201	Apply chemicals under supervision
AHCINF203	Maintain properties and structures
AHCINF204	Fabricate and repair metal or plastic structures
AHCIRG219	Assist with low volume irrigation operations
AHCIRG221	Assist with pressurised irrigation operations
AHCLSC210	Install tree protection devices
AHCLSC311	Set out site for construction works
AHCMOM202	Operate tractors
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles
AHCPGD208	Prepare and maintain plant displays
AHCPGD209	Prune shrubs and small trees

AHCPGD210	Transplant shrubs and small trees
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCSOL203	Assist with soil or growing media sampling and testing
AHCTRF205	Assist in the preparation of turf surfaces for play
AHCTRF206	Assist with turf construction
AHCTRF207	Renovate grassed areas
AHCTRF208	Support turf establishment
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK206	Observe enterprise quality assurance procedures
AHCWRK208	Provide information on products and services
AHCWRK209	Participate in environmentally sustainable work practices
CPCCB2002*	Use bricklaying and blocklaying tools and equipment
CPCCCA2002*	Use carpentry tools and equipment
CPCCCO2013*	Carry out concreting to simple forms
CPCCOM2001*	Read and interpret plans and specifications
CPC CST2001*	Prepare for stonemasonry construction process
CPCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
MEM11011*	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006*	Organise and communicate information

MEM18001*	Use hand tools
MEM18002*	Use power tools/hand held operations
NWPNET019	Prepare and restore worksite
TLID0020	Shift materials safely using manual handling methods

Prerequisite requirements

Unit of competency	Prerequisite requirement
CPCCBL2002 Use bricklaying and blocklaying tools and equipment	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

AHC21716 Certificate II in Permaculture

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification provides an occupational outcome in permaculture. Work would be carried out under general guidance and supervision.

The qualification is suited to VET in Schools, labour market and environmental skills programs. It provides a range of technical skills and knowledge in supporting food growing programs and community programs and is suited to learners with an interest in permaculture as a practical solution for sustainable living.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 6
- Elective Units = 9

Core Units

Unit Code	Unit Title
AHCPER201	Work effectively in permaculture

AHCPER203	Record information about the local bioregion
AHCPER206	Plant and maintain permaculture crops
AHCPER209	Recognise characteristics of plants and animals in a permaculture system
AHCPER212	Use and maintain garden hand tools and equipment
HLTWHS001	Participate in workplace health and safety

Elective Units

- Select 5 units from Group A
- Select 3 units from Group A or B
- 1 unit may be selected from Group B or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Group A

Unit Code	Unit Title
AHCPER202	Harvest, treat and store seed
AHCPER204	Check and operate permaculture water systems
AHCPER205	Prepare and store permaculture products
AHCPER207	Care for animals in a permaculture system
AHCPER208	Harvest permaculture crops
AHCPER214	Propagate plants for a permaculture garden system
AHCPER215	Assist with garden soil health and plant nutrition

Group B

Unit Code	Unit Title
AHCILM203	Record information about country
AHCINF203	Maintain properties and structures

AHCMOM203	Operate basic machinery and equipment
AHCNAR201	Carry out natural area restoration works
AHCWRK201	Observe and report on weather
AHCWRK203	Operate in isolated and remote situations
AHCWRK209	Participate in environmentally sustainable work practices

AHC21819 Certificate II in Protected Horticulture

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.2.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for individuals who work in support roles in the protected horticulture industry undertaking routine tasks in the areas of picking, packing, crop and nursery work.

Individuals with this qualification work under supervision where the work is predictable and structured with limited judgement requirements.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 6 core units plus
 - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. Any combination of electives that meets the packaging rules can be selected for the award of the *Certificate II in Protected Horticulture*.

Where appropriate, electives may be packaged to provide a qualification with a specialisation area as follows:

- At least 2 electives must be selected from Group A for the award of the *Certificate II in Protected Horticulture (Picking)*
- At least 2 electives must be selected from Group B for the award of the *Certificate II in Protected Horticulture (Packing)*.
- At least 2 electives must be selected from Group C for the award of the *Certificate II in Protected Horticulture (Crop work)*
- At least 2 electives must be selected from Group D for the award of the *Certificate II in Protected Horticulture (Nursery)*
- Plus 4 units from the remaining units listed in groups A, B, C, D or E, or any currently endorsed Training Package or accredited course.

Where a specialisation area is not sought, the electives are to be chosen as follows:

- 2 units must be selected from groups A, B, C, D or E
- the remaining 4 electives may be selected from groups A, B, C, D or E or any currently endorsed Training Package or accredited course.

Core Units

AHCWHS201	Participate in work health and safety processes
AHCWRK204	Work effectively in the industry
AHCWRK209	Participate in environmentally sustainable work practices
FBPFSY2001	Implement the food safety program and procedures
FBPOPR1010	Carry out manual handling tasks
FBPOPR2070	Apply quality systems and procedures

Elective Units

Group A Picking

AHCBIO203	Inspect and clean machinery, tools and equipment to preserve biosecurity
AHCPHT214	Support horticultural crop harvesting

AHCPMG202	Treat plant pests, diseases and disorders
-----------	---

Group B Packing

AHCWRK207	Collect and record production data
FBPBPG2008	Perform basic packaging tests and inspections
FBPOPR2063	Clean equipment in place
TLIA0020	Package goods

Group C Crop work

AHCBIO203	Inspect and clean machinery, tools and equipment to preserve biosecurity
AHCIRG219	Assist with low volume irrigation operations
AHCPHT210	Assist with protected cropping water sampling and testing
AHCPHT211	Maintain crop
AHCPHT212	Perform manual pollination of crops
AHCPHT215	Plant horticultural crops
AHCPMG201	Treat weeds
AHCPMG202	Treat plant, pests, diseases and disorders
AHCSOL203	Assist with soil or growing media sampling and testing

Group D Nursery

AHCBIO203	Inspect and clean machinery, tools and equipment to preserve biosecurity
AHCNSY206	Care for nursery plants
AHCNSY207	Undertake propagation activities
AHCPHT213	Perform plant blocking on

AHCPHT217	Undertake field budding and grafting
AHCPMG202	Treat plant pests, diseases and disorders
AHCSOL203	Assist with soil or growing media sampling and testing
FBPVIT2001	Bench graft vines
FBPVIT2007	Tend containerised nursery plants

Group E General electives

AHCINF203	Maintain properties and structures
AHCMDC201	Assist with propagation of medicinal cannabis
AHCMDC202	Assist with care and maintenance of medicinal cannabis
AHCMDC203	Assist with harvest and pre-processing of medicinal cannabis
AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCNSY205	Pot up plants
AHCPCM204	Recognise plants
FBPOPR2064	Clean and sanitise equipment
FBPOPR2065	Conduct routine maintenance
FBPOPR2066	Apply sampling procedures
FBPOPR2069	Use numerical applications in the workplace
FBPOPR2071	Provide and apply workplace information
FBPPPL2001	Participate in work teams and groups
HLTAID011	Provide First Aid
TLID2010	Operate a forklift
TLIG2007	Work in a socially diverse environment
TLIK2010	Use infotechnology devices in the workplace

TLILIC0003	Licence to operate a forklift truck
------------	-------------------------------------

Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification provides a general vocational outcome in agriculture. The qualification enables individuals to select a livestock production, cropping or livestock context as a job focus or, in the case of mixed farming enterprises, both cropping and livestock.

Individuals with this qualification perform tasks in a variety of contexts, which involve some judgement in selecting equipment and services. Job roles vary across different industry sectors and may include:

- Farm or station hand
- Farm or station worker
- Livestock transport driver.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 2 core units plus
 - 14 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

To provide the *Certificate III in Agriculture*, the electives are to be chosen as follows:

- 5 must be selected from the electives listed in Group A
- 5 must be selected from remaining electives in Group A, or from electives listed in Group B, or from the Prerequisite Requirements list if a unit is a required for packaging the qualification
- 4 may be selected from the remaining electives listed in Groups A or B, or from the Prerequisite Requirements list if a unit is a required for packaging the qualification, or from any currently endorsed Training Package or Accredited Course packaged at Certificate II, III or IV levels.

Where appropriate, electives may be packaged to provide a qualification with a specialisation area as follows:

- 10 electives must be selected from Group A, including at least 5 units beginning with the code AHCLSK and at least 5 units beginning with the code TLI for the award of the *Certificate III in Agriculture (Livestock Transport)*.

Core Units

AHCWHS301	Contribute to work health and safety processes
AHCWRK309	Apply environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

AHCAGB302	Keep production records for a primary production
-----------	--

	business
AHCBAC309	Undertake preparation of land for agricultural crop production
AHCBAC310	Maintain pastures and crops for livestock production
AHCBAC311	Conserve forage
AHCBAC312	Test and grade grains and seeds on receipt
AHCBAC313	Establish pastures and crops for livestock production
AHCBAC314	Prepare to receive grains and seeds
AHCBAC315	Establish agricultural crops
AHCBAC316	Maintain agricultural crops
AHCBAC317	Undertake agricultural crop harvesting activities
AHCBER302	Work effectively in a biosecurity emergency response
AHCBER305	Carry out emergency disease or pest control procedures on infected premises
AHCBER306	Carry out movement and security procedures
AHCBIO301	Identify and report signs of unusual disease or pest
AHCBIO303	Apply biosecurity measures
AHCBUS301	Use hand held e-business tools
AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCCHM308	Use application equipment to apply fumigant in confined spaces
AHCCHM309	Fumigate soil
AHCCHM310	Conduct manual fumigation of vertebrate and invertebrate pests
AHCINF301	Implement property improvement, construction and repair

AHCINF302	Plan and construct an electric fence
AHCINF303	Plan and construct conventional fencing
AHCIRG336	Operate and maintain gravity fed irrigation systems
AHCIRG338	Troubleshoot irrigation systems
AHCIRG346	Operate pressurised irrigation systems
AHCLSK301	Administer medication to livestock
AHCLSK305	Maintain livestock water supplies
AHCLSK308	Identify and draft livestock
AHCLSK309	Implement animal health control programs
AHCLSK311	Implement feeding plans for livestock
AHCLSK318	Rear newborn and young livestock
AHCLSK320	Coordinate and monitor livestock transport
AHCLSK323	Maintain and monitor feed stocks
AHCLSK324	Care for and train working dogs
AHCLSK325	Castrate livestock
AHCLSK331	Comply with industry animal welfare requirements
AHCLSK342	Prepare animals for parturition
AHCMER301	Process customer complaints
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment
AHCMOM306	Ground spread fertiliser and soil ameliorant
AHCMOM308	Operate broadacre and row crop harvest machinery and equipment

AHCMOM309	Operate broadacre sowing machinery and equipment
AHCMOM312	Operate row crop planting and seeding machinery and equipment
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCWRK204	Work effectively in the industry
AHCWRK301	Collect samples for a rural production or horticulture monitoring program
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK308	Handle bulk materials in storage area
AHCWRK311	Conduct site inspections
BSBFIN302	Maintain financial records
BSBINS201	Process and maintain workplace information
BSBTEC201	Use business software applications
BSBTEC202	Use digital technologies to communicate in a work environment
BSBITEC301	Design and produce business documents
HLTAID011	Provide First Aid
HLTAID013	Provide First Aid in remote or isolated site
TLID0001	Load and unload vehicles carrying special loads
TLID0002	Care for livestock in transit
TLIE0002	Process workplace documentation
TLIE0008	Calculate mass, area and quantify dimensions

TLIE3004	Prepare workplace documents
TLIF2010	Apply fatigue management strategies
TLIH0005	Interpret road maps and navigate pre-determined routes
TLIH0006	Plan and navigate routes

Group B

ACMGEN311	Maintain and monitor animal health and wellbeing
ACMGEN312	Provide nutritional requirements for animals
ACMHBR302*	Carry out basic hoof care procedures
ACMHBR310	Prevent and treat equine injury and disease
AHCAIS304	Artificially inseminate livestock
AHCDRG305	Install drainage systems
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems
AHCINF304	Install and terminate extra low voltage wiring systems
AHCLSK303	Carry out feedlot operations
AHCLSK304	Carry out post-mortem examination of livestock
AHCLSK306	Coordinate and monitor production performance
AHCLSK307	Euthanase livestock
AHCLSK310	Implement feeding plans for intensive production
AHCLSK313	Monitor livestock production growing environments
AHCLSK316	Prepare livestock for competition
AHCLSK317	Plan to exhibit livestock
AHCLSK319	Slaughter livestock
AHCLSK321	Service and repair bores and windmills

AHCLSK322	Transport farm produce or bulk materials
AHCLSK326	Mix and mill standard stockfeed
AHCLSK327	Collect, store and administer colostrum
AHCLSK328	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK330	Implement procedures for calving
AHCLSK332	Monitor animals in intensive production systems
AHCLSK333	Monitor pen condition and ration suitability
AHCLSK334	Plan, prepare and conduct mulesing procedures
AHCLSK337*	Train, care for and ride horses for stock work
AHCLSK338	Conduct dropped ovary technique procedures for spaying cattle
AHCLSK340	Mate and monitor reproduction of alpacas
AHCLSK341	Coordinate artificial insemination and fertility management of livestock
AHCLSK343	Prepare for and implement natural mating of livestock
AHCMOM202	Operate tractors
AHCMOM206	Conduct grader operations
AHCMOM207	Conduct front-end loader operations
AHCMOM216	Operate side by side utility vehicles
AHCMOM217	Operate quad bikes
AHCMOM307	Operate a cane harvester
AHCMOM310	Operate land-forming machinery and equipment
AHCMOM311	Operate precision control technology
AHCMOM313	Operate mobile irrigation machinery and equipment
AHCMOM314	Transport machinery

AHCMOM315	Operate chemical application machinery and equipment
AHCPCM303	Identify plant specimens
AHCPCM305	Implement a plant nutrition program
AHCPCM306	Provide information on plants and their culture
AHCPGD404	Plan a plant establishment program
AHCPHT312	Implement a crop regulation program
AHCPHT313	Implement a post-harvest program
AHCPHT314	Harvest horticultural crops mechanically
AHCPHT315	Establish horticultural crops
AHCPHT317	Coordinate horticultural crop harvesting
AHCPMG308	Implement pest management strategies
AHCSDT308	Perform tests for quality on seeds
AHCSDT309	Prepare a working sample
AHCSDT310	Identify seeds
AHCSDT412	Perform advanced tests on seeds
AHCSDT413	Handle and store seed subject to quarantine regulations
AHCSDT414	Maintain a quarantine approved laboratory
AHCSHG301	Prepare livestock for shearing
AHCSHG302	Prepare combs and cutters for machine shearing
AHCSHG306	Carry out post-shearing procedures
AHCSOL406	Sample soils and interpret results
AHCSPO309	Process planting seed
AHCSPO310	Treat planting seed
AHCSPO311	Handle, package and store commercial quantities of seed
AHCSPO312	Sample seed before and after processing

AHCWOL304	Prepare fleece wool for classing
AHCWOL308	Prepare facilities for shearing and crutching
AHCWOL310	Press wool for a clip
AHCWOL311	Perform shed duties
CPPFES2005	Demonstrate first attack firefighting equipment
MEM05004	Perform routine oxy fuel gas welding
MEM05007	Perform manual heating and thermal cutting
MEM05012	Perform routine manual metal arc welding
MEM05015*	Weld using manual metal arc welding process
MEM05017*	Weld using gas metal arc welding process

AHC30221 Certificate III in Dairy Production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification reflects the role of individuals who work as farm hands in the dairy production industry. In this role, these individuals have responsibilities for undertaking a wide range of skilled work on a dairy farm with limited supervision. Work includes caring for, and monitoring health of livestock, overseeing the harvesting of livestock milk and maintaining milking equipment and facilities to ensure maximum and high-quality production.

All work is carried out to comply with workplace policies and procedures, according to state/territory work health and safety, animal welfare, environmental and biosecurity legislation, regulations and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
 - 10 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 4 from the electives listed below
- the remaining 3 units from the electives listed below, or from any currently endorsed Training Package or accredited course.

Core Units

AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCCHM304	Transport and store chemicals
AHCDRY303	Coordinate and monitor milking operations
AHCDRY304	Carry out routine service of milking equipment
AHCLSK309	Implement animal health control programs
AHCLSK311	Implement feeding plans for livestock
AHCLSK318	Rear newborn and young livestock
AHCLSK330	Implement procedures for calving
AHCWRK303	Respond to emergencies
AHCWHS301	Contribute to work health and safety processes

Elective Units

AHCAIS304	Artificially inseminate livestock
AHCBAC309	Undertake preparation of land for agricultural crop production
AHCBAC311	Conserve forage
AHCBAC313	Establish pastures and crops for livestock production
AHCBAC315	Establish agricultural crops
AHCBAC316	Maintain agricultural crops
AHCBAC317	Undertake agricultural crop harvesting activities
AHCBER305	Carry out emergency disease or pest control procedures on infected premises
AHCDRY305	Conduct mechanical tests on milking machines
AHCDRY306	Operate a dairy waste utilisation system
AHCINF301	Implement property improvement, construction and

	repair
AHCINF302	Plan and construct an electric fence
AHCINF303	Plan and construct conventional fencing
AHCLSK301	Administer medication to livestock
AHCLSK305	Maintain livestock water supplies
AHCLSK308	Identify and draft livestock
AHCLSK320	Coordinate and monitor livestock transport
AHCLSK321	Service and repair bores and windmills
AHCLSK322	Transport farm produce or bulk materials
AHCLSK323	Maintain and monitor feed stocks
AHCLSK325	Castrate livestock
AHCLSK326	Mix and mill standard stockfeed
AHCLSK327	Collect, store and administer colostrum
AHCLSK328	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK331	Comply with industry animal welfare requirements
AHCLSK341	Coordinate artificial insemination and fertility management of livestock
AHCLSK343	Prepare for and implement natural mating of livestock
AHCMOM305	Operate specialised machinery and equipment
AHCPCM305	Implement a plant nutrition program
AHCWRK301	Collect samples for a rural production or horticulture monitoring program
AHCWRK302	Monitor weather conditions
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK309	Apply environmentally sustainable work practices

AHCWRK310	Provide on-job training support
-----------	---------------------------------

AHC30318 Certificate III in Rural and Environmental Pest Management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Qualification Description

This qualification describes the skills and knowledge required for pest management contractors, pest management field officers, vertebrate pest management field officers and weed management field officers in the pest management industry.

The qualification covers those who work in weed management as well as vertebrate pest management in conservation, land management, horticulture and agriculture settings. Individuals in these roles work under general direction and:

- participate in strategic invasive species management practices
- prepare for management programs
- complete and assess management programs
- carry out weed management programs that require chemical spraying
- maintain required records.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
 - 6 core units plus
 - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

For the award of Certificate III in Rural and Environmental Pest Management the electives are to be chosen as follows:

- 6 units must be selected from the elective groups A, B, C, D or E
- Up to 2 units from the remaining electives or any currently endorsed Training Package or accredited course packaged to reflect AQF Certificate II, III or IV outcomes.

Where appropriate, electives may be packaged to provide a qualification with a specialisation.

For the award of Certificate III in Rural and Environmental Pest Management (Pest animal controller) the electives are to be chosen as follows:

- 5 units must be selected from the elective group A
- 1 unit must be selected from the elective group C or E
- 2 units must be selected from remaining electives in group C and E or any currently endorsed Training Package or accredited course packaged to reflect AQF Certificate II, III or IV outcomes.

For the award of Certificate III in Rural and Environmental Pest Management (Weed Controller) the electives are to be chosen as follows:

- 2 units must be selected from the electives group B
- 1 unit, AHC BIO201 Inspect and clean machinery for plant, animal and soil material, must be selected
- 3 units must be selected from the elective group D or E
- 2 units must be selected from remaining group D or E or any currently endorsed Training Package or accredited course packaged to reflect AQF Certificate II, III or IV outcomes.

Core Units

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCPMG203	Work effectively in a pest management environment
AHCPMG306	Determine pest control techniques
AHCPMG308	Implement pest management strategies
AHCWHS301	Contribute to work health and safety processes

Elective Units**Group A (Pest Controller)**

AHCFAU202	Recognise fauna
AHCPMG304	Use firearms to humanely destroy animals
AHCPMG307	Apply animal trapping techniques
AHCPMG309	Apply pest animal control techniques
AHCPMG312	Apply poison baits for vertebrate pest control in rural and environmental landscapes

Group B (Weed Controller)

AHCPCM303	Identify plant specimens
AHCPMG301	Control weeds

Group C (Vertebrate Pests)

AHCCHM310	Conduct manual fumigation of vertebrate and invertebrate pests
AHCPMG311	Use firearms for pest control activities from aircraft
AHCPMG403	Apply predator trapping techniques

Group D (Weeds)

AHCPCM202	Collect, prepare and preserve plant specimens
AHCPMG313	Prepare, monitor and maintain biological agents for weeds

Group E (General)

AHC BIO203	Inspect and clean machinery, tools and equipment to preserve biosecurity
AHC BIO303	Apply biosecurity measures

AHCECR306	Conduct photography for fieldwork
AHCECR307	Read and interpret maps
AHCEXP301	Handle and store explosives
AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG305	Survey pests
AHCPMG413	Define the pest problem
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK309	Apply environmentally sustainable work practices
AHCWRK311	Conduct site inspections
AHCWRK312	Operate in isolated and remote situations
FWPCOT3202	Navigate in remote or trackless areas
FWPCOT3259	Operate a four wheel drive on unsealed roads
HLTAID011	Provide First Aid
HLTAID013	Provide First Aid in remote or isolated site

AHC30416 Certificate III in Pork Production

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0 and meets the Standards for Training Packages 2012.

Qualification Description

This qualification provides an occupational outcome in the pork industry. The pork industry expects that graduates from this qualification will be able to perform a range of tasks associated with a person performing the job role of a piggery attendant.

The pork industry expects that graduates from this qualification will be able to perform tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures.

Possible job roles relevant to this qualification include:

- Piggery attendant
- Stockperson

This qualification is suitable for an Australian Apprenticeship.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:

- 2 core units plus
- 13 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 6 must be from electives group A
- 4 must be from electives group A or B
- 3 from the remaining electives listed in group A or B, or any currently endorsed Training Package or accredited course packaged at Certificate II, III or IV.

Core Units

AHCLSK331	Comply with industry animal welfare requirements
AHCWHS301	Contribute to work health and safety processes

Elective Units

Group A

AHCBIO303	Apply biosecurity measures
AHCLSK301	Administer medication to livestock
AHCLSK304	Carry out post-mortem examination of livestock
AHCLSK307	Euthanase livestock
AHCLSK308	Identify and draft livestock
AHCLSK309	Implement animal health control programs
AHCLSK313	Monitor livestock production growing environments
AHCLSK318	Rear newborn and young livestock
AHCLSK323	Maintain and monitor feed stocks
AHCLSK328	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK342	Prepare animals for parturition
AHCPRK309	Pregnancy test pigs
AHCPRK310	Artificially inseminate pigs
AHCWRK305	Coordinate work site activities

AHCWRK309	Apply environmentally sustainable work practices
-----------	--

Group B

AHCECR302	Collect and preserve biological samples
AHCINF302	Plan and construct an electric fence
AHCLSK303	Carry out feedlot operations
AHCLSK305	Maintain livestock water supplies
AHCLSK306	Coordinate and monitor production performance
AHCLSK310	Implement feeding plans for intensive production
AHCLSK311	Implement feeding plans for livestock
AHCLSK319	Slaughter livestock
AHCLSK320	Coordinate and monitor livestock transport
AHCLSK322	Transport farm produce or bulk materials
AHCLSK325	Castrate livestock
AHCLSK326	Mix and mill standard stockfeed
AHCLSK327	Collect, store and administer colostrum
AHCLSK343	Prepare for and implement natural mating of livestock
AHCMOM201	Operate two wheel motorbikes
AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCMOM205	Operate vehicles
AHCMOM207	Conduct front-end loader operations
AHCMOM216	Operate side by side utility vehicles
AHCMOM217	Operate quad bikes
AHCMOM305	Operate specialised machinery and equipment
AHCPMG308	Implement pest management strategies

AHCPRK204	Care for weaner pigs
AHCPRK302	Treat rectal prolapse in pigs
AHCPRK305	Care for grower and finisher pigs
AHCPRK306	Monitor and maintain outdoor pig production
AHCPRK307	Mate pigs naturally
AHCPRK308	Monitor dry sow performance
AHCWRK205	Participate in workplace communications

AHC30516 Certificate III in Poultry Production

Modification History

Release	Comments
Release 4	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.1.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0. Version created to update elective unit codes.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0 and meets the Standards for Training Packages 2012.

Qualification Description

This qualification provides an occupational outcome in the poultry industry. The poultry industry expects that graduates from this qualification will be able to perform a range of tasks associated with a person performing the job role of a poultry hand.

Job roles vary and may include:

- Poultry hand
- Poultry stockperson.

The poultry industry expects that graduates from this qualification will be able to perform tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures.

This qualification is suitable for an Australian Apprenticeship.

No licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 3 core units plus
 - 13 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 10 must be from electives group A
- 2 must be from electives group A or B
- 1 from the remaining electives listed in group A or B, or any currently endorsed Training Package or accredited course packaged at Certificate II, III or IV.

Core Units

AHCLSK331	Comply with industry animal welfare requirements
AHCPLY307	Implement and monitor biosecurity measures in poultry production
AHCWHS301	Contribute to work health and safety processes

Elective Units

Group A

AHCLSK301	Administer medication to livestock
AHCLSK304	Carry out post-mortem examination of livestock
AHCLSK306	Coordinate and monitor production performance
AHCLSK307	Euthanase livestock
AHCLSK309	Implement animal health control programs
AHCLSK310	Implement feeding plans for intensive production
AHCLSK313	Monitor livestock production growing environments
AHCPLY203	Set up shed for placement of day-old chickens
AHCPLY206	Catch and load poultry
AHCPLY302	Brood poultry
AHCPLY304	Incubate eggs

AHCPLY306	Clean and disinfect poultry production sheds
AHCPMG308	Implement pest management strategies
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK309	Apply environmentally sustainable work practices

Group B

AHCAGB302	Keep production records for a primary production business
AHCBIO301	Identify and report signs of unusual disease or pest
AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCLSK323	Maintain and monitor feed stocks
AHCLSK328	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM304	Operate machinery and equipment
AHCWRK310	Provide on-job training support
FBPFSY3002	Participate in a HACCP team

AHC30620 Certificate III in Production Horticulture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for job roles in the production horticulture and floriculture industry including field worker, seeding person, operator, irrigation maintainer, machinery maintainer and leading hand.

Individuals with this qualification perform tasks involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in selecting and operating equipment, coordinating resources and applying contingency measures during work.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 3 core units plus
 - 12 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. Any combination of electives that meets the packaging rules can be selected for the award of the *Certificate III in Production Horticulture*.

Where appropriate, electives may be packaged to provide a qualification with a specialisation area as follows:

- At least 3 electives must be selected from Group A for the award of the *Certificate III in Production Horticulture (Horticulture)*
- At least 3 electives must be selected from Group B for the award of the *Certificate III in Production Horticulture (Floriculture)*
- Plus 6 units from the remaining units listed in groups A, B or C
- 3 from the remaining units listed in groups A, B or C, or any currently endorsed Training Package or accredited course packaged at Certificate II, III or IV.

Core Units

AHCBIO303	Apply biosecurity measures
AHCWHS301	Contribute to work health and safety processes
AHCWRK306	Comply with industry quality assurance requirements

Elective Units

Group A (horticulture)

AHCBIO301	Identify and report signs of unusual disease or pest
AHCIRG346	Operate pressurised irrigation systems
AHCMOM304	Operate machinery and equipment
AHCPHT313	Implement a post-harvest program
AHCPHT314	Harvest horticultural crops mechanically
AHCPHT315	Establish horticultural crops
AHCPHT317	Coordinate horticultural crop harvesting
AHCWRK309	Apply environmentally sustainable work practices

Group B (floriculture)

AHCBIO301	Identify and report signs of unusual disease or pest
AHCNSY308	Maintain nursery plants
AHCNSY309	Receive and dispatch nursery products
AHCPCM305	Implement a plant nutrition program

AHCPCM306	Provide information on plants and their culture
AHCSOL305	Prepare growing media

Group C (electives)

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details

AHCBER302	Work effectively in an emergency disease or plant pest response
AHCBER305	Carry out emergency disease or plant pest control procedures on infected premises
AHCBER306	Carry out movement and security procedures
AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCCHM308	Use application equipment to apply fumigant in confined spaces
AHCCHM309	Fumigate soil
AHCDRG305	Install drainage systems
AHCDRG306	Measure drainage system performance
AHCDRG307	Troubleshoot drainage systems
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems
AHCIRG337	Measure irrigation delivery system performance
AHCIRG338	Troubleshoot irrigation systems
AHCIRG345	Install pressurised irrigation systems
AHCIRG347	Maintain pressurised irrigation systems
AHCMOM202	Operate tractors

AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM302	Perform machinery maintenance
AHCMOM305	Operate specialised machinery and equipment
AHCMOM311	Operate precision control technology
AHCMOM315	Operate chemical application machinery and equipment
AHCNSY310	Install and maintain plant displays
AHCNSY311	Promote sales of plants
AHCNSY312	Prepare specialised plants
AHCNSY313	Implement a propagation plan
AHCNSY314	Operate fertigation equipment
AHCPCM405	Implement an integrated pest management program
AHCPGD203	Prune shrubs and small trees
AHCPHT302	Prepare raw materials and compost feedstock
AHCPHT312	Implement a crop regulation program
AHCPHT316	Supervise mushroom substrate preparation
AHCPHT318	Prepare value added compost-based products
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG313	Prepare, monitor and maintain biological agents for weeds
AHCPMG401	Implement the pest monitoring and evaluation plan
AHCWAT302	Monitor and operate water treatment processes
AHCWRK204	Work effectively in the industry
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies

AHCWRK305	Coordinate work site activities
AHCWRK308	Handle bulk materials in storage area
FBPVIT2012	Identify and treat nursery plant disorders
FBPVIT3001	Coordinate vineyard operations
FBPVIT3002	Maintain field nursery
FBPVIT3003	Operate spreading and seeding equipment
FBPVIT3004*	Monitor and maintain nursery plants
FBPVIT3008	Operate a mechanical harvester
FBPVIT3011	Perform shed nursery activities

Prerequisite requirements

Unit of competency	Prerequisite requirement
FBPVIT3004 Monitor and maintain nursery plants	FBPVIT2012 Identify and treat nursery plants and disorders

1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome in amenity horticulture.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 5
- Elective Units = 11

Core Units

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes
AHCPCM302	Provide information on plants and their culture
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCSOL303	Implement soil improvements for garden and turf areas

Elective Units

- Select 8 units from elective list below
- 3 units aligned to AQF levels 2, 3 or 4 may be selected from electives below or from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit

Unit Code	Unit Title
AHCARB301	Implement a tree maintenance program
AHCPCM304	Report on health and condition of trees
AHCARB303	Perform pruning operations
AHCARB305	Dismantle trees
AHCARB306	Undertake aerial rescue
AHCARB307	Use advanced climbing techniques* <i>AHCARB312 Use standard climbing techniques to access trees**</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> <i>HLTAID003 Provide first aid</i>
AHCARB308	Install cable and bracing
AHCARB309	Implement a tree protection program
AHCBER301	Work effectively in an emergency disease or plant pest response
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCBER303	Carry out emergency disease or plant pest control procedures at infected premises
AHCBER304	Carry out movement and security procedures
AHCBIO305	Apply biosecurity measures
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport, handle and store chemicals
AHCIRG303	Measure irrigation delivery system performance

AHCIRG306	Troubleshoot irrigation systems
AHCIRG331	Install pressurised irrigation systems
AHCIRG332	Operate pressurised irrigation systems
AHCIRG333	Maintain pressurised irrigation systems
AHCLSC301	Set out site for construction works
AHCLSC302	Construct landscape features using concrete
AHCLSC303	Construct brick and or block structures and features
AHCLSC304	Erect timber structures and features
AHCLSC305	Construct stone structures and features
AHCLSC306	Implement a paving project
AHCLSC307	Implement a retaining wall project
AHCLSC308	Install metal structures and features
AHCLSC309	Install water features
AHCLSC310	Implement a tree transplanting program
AHCMOM304	Operate machinery and equipment
AHCNSY301	Maintain nursery plants
AHCNSY302	Receive and dispatch nursery products
AHCNSY303	Install and maintain plant displays
AHCNSY304	Deliver and promote sales of plants
AHCNSY305	Prepare specialised plants
AHCNSY306	Implement a propagation plan
AHCNSY307	Operate fertigation equipment
AHCPCM301	Implement a plant nutrition program
AHCPCM303	Identify plant specimens
AHCPGD301	Implement a plant establishment program

AHCPGD302	Plan and maintain plant displays
AHCPGD303	Perform specialist amenity pruning
AHCPGD304	Implement a landscape maintenance program
AHCPGD305	Conduct operational inspection of park facilities
AHCPGD306	Implement a maintenance program for an aquatic environment
AHCSOL301	Prepare growing media
AHCTRF301	Construct turf playing surfaces
AHCTRF302	Establish turf
AHCTRF303	Implement a grassed area maintenance program
AHCTRF304	Monitor turf health
AHCTRF305	Renovate sports turf
AHCWAT301	Monitor and operate water treatment processes
AHCWRK305	Coordinate work site activities
AHCWRK311	Conduct site inspection
AHCWRK309	Apply environmentally sustainable work practices
FWPCOT3238	Operate a pole saw
FWPFGM3213	Fall trees manually (advanced)
RIIWHS302D	Implement traffic management plan

Qualification Mapping Information

This qualification is equivalent to AHC30710 Certificate III in Horticulture.

AHC30820 Certificate III in Arboriculture

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.1.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Qualification Description

This qualification describes the skills and knowledge for trade level roles in the arboriculture industry, including, climbing arborist, EWP arborist, crane specialist, environmental arborist and an arborist works coordinator.

Individuals with this qualification perform a range of arboriculture activities including, shaping and canopy management, tree health and remediation, environmental and habitat development, to tree dismantling and removal. The work involves high risk operations either working at heights or conducting support works to individuals working above ground. Work practices operate within a strict safety regime to protect workers and public.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some States and Territories.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:
 - 9 core units plus
 - 9 elective units.

Elective units must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 7 units must be from groups A, B, C, D, E or F, with all the units from at least one specialisation selected from the specialisations listed below
- the remaining 2 units may be selected from units listed in groups A, B, C, D, E or F or any currently endorsed Training Package or accredited course.

No more than 3 of the 9 electives selected can be coded with an AQF indicator below level 3 or reflect outcomes below AQF level 3.

Electives are to be packaged to provide a qualification with one or more specialisations as follows:

- All 3 electives from Group A must be selected for the award of the *Certificate III in Arboriculture (Climbing Arborist)*
- All 4 electives from Group B must be selected for the award of the *Certificate III in Arboriculture (Crane Specialist)*
- All 4 electives from Group C must be selected for the award of the *Certificate III in Arboriculture (Elevated Work Platform – EWP Arborist)*
- All 4 electives from Group D must be selected for the award of the *Certificate III in Arboriculture (Environmental arborist)*
- All 3 electives from Group E must be selected for the award of the *Certificate III in Arboriculture (Works Coordinator)*
- *Electives from Group G can only be selected where required as a prerequisite.*

Note: If more than one specialisation is completed, award of the qualification would read (for example): Certificate III in Arboriculture (Climbing Arborist, Elevated Work Platform – EWP Arborist).

Note: Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Core Units

Unit	Title
AHCARB213	Perform ground-based rigging
AHCARB314	Implement a tree maintenance program
AHCARB315	Inspect trees for access and work
AHCARB316	Perform pruning operations
AHCARB323	Identify trees
FWPCOT2237	Maintain chainsaws
FWPCOT2239	Trim and cut felled trees

FWPFGM3212	Fall trees manually (intermediate)
HLTAID011	Provide First Aid

Electives

Group A Climbing specialist

AHCARB317	Dismantle trees
AHCARB318*	Undertake aerial rescue
AHCARB319	Use arborist climbing techniques

Group B Crane specialist

AHCARB317	Dismantle trees
AHCARB324	Use cranes to access and dismantle trees
CPCDDO3011 A*	Perform dogging
AHCARB319	Use arborist climbing techniques

Group C Elevated Work Platform (EWP) specialist

AHCARB317	Dismantle trees
TLILIC0005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
UETDRRF002 *	Perform EWP rescue
UETDRRF08	Perform EWP controlled descent escape

Group D Environmental arborist (habitat protection and creation)

AHCARB325	Manage trees to create and maintain habitat refuges
AHCFAU201	Recognise fauna
AHCLPW304	Carry out inspection of designated area

AHCNAR202	Maintain wildlife habitat refuges
-----------	-----------------------------------

Group E Works Coordinator

AHCARB407	Supervise and audit tree operations
AHCARB408	Perform a ground-based tree defect evaluation
AHCARB409	Conduct a safety audit

Group F General Electives

AHCARB212	Operate and maintain stump grinding machines
AHCARB321	Implement a tree protection program
AHCARB320	Install tree support systems
AHCARB322	Access trees for inspection
AHCARB406	Verify pruning specifications
AHCBIO305	Apply biosecurity measures
AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCWRK305	Coordinate work site activities
CPCCCM2010 B*	Work safely at heights
FWPCOT3238	Operate a pole saw
FWPFGM3213	Fall trees manually (advanced)
FWPHAR2206	Operate a mobile chipper/mulcher
RIIWHS205E	Control traffic with stop-slow bat

UETTDREL14	Working safely near live electrical apparatus as a non-electrical worker
------------	--

Group G Prerequisite Units

CPCCOHS200 1A	Apply OHS requirements, policies and procedures in the construction industry
HLTAID009	Provide cardiopulmonary resuscitation

Prerequisite requirements

Note: Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	Prerequisite requirement
AHCARB318 Undertake aerial rescue	HLTAID011 Provide First Aid AHCARB319 Use arborists climbing techniques
CPCCCM2010B Work safely at heights	CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry
CPCCCDO3011A Perform dogging	CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry
UETDRRF002 Perform EWP rescue	HLTAID009 Provide cardiopulmonary resuscitation

AHC30921 Certificate III in Landscape Construction

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for trade level roles in the landscape industry.

Individuals with this qualification perform tasks under broad supervision involving a broad range of skills that are applied in a wide variety of contexts. Discretion and judgement in selecting and operating equipment, coordinating resources and applying contingency measures during work.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

State/territory licensing, legislative or certification requirements apply in some jurisdictions. Users are advised to check with the relevant regulatory authority.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
 - 10 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 1 must be from electives group A
- 3 must be from electives group B
- 3 from the remaining elective units, or any currently endorsed Training Package or accredited course.

Core Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCDRG305	Install drainage systems
AHCLSC311	Set out site for construction works
AHCLSC312*	Construct brick and block structures and features
AHCLSC313	Construct stone structures and features, and install stone cladding
AHCLSC316	Implement a paving project
AHCLSC317	Construct landscape features using concrete
AHCLSC319	Implement a retaining wall project
AHCPCM306	Provide information on plants and their culture
AHCPGD307	Implement a plant establishment program
AHCSOL304	Implement soil improvements for garden and turf areas

Elective Units

Group A

AHCWHS301	Contribute to work health and safety processes
CPCCWHS200 1	Apply WHS requirements, policies and procedures in the construction industry

Group B

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCBUS407	Cost a project
AHCGRI301	Maintain roof gardens, vertical gardens and green facades

AHCIRG345	Install pressurised irrigation systems
AHCLSC314	Implement a tree transplanting program
AHCLSC315	Implement an outdoor tiling project
AHCLSC318	Erect timber structures and features
AHCLSC320	Install water features
AHCLSC321	Install metal structures and features
AHCMOM213	Operate and maintain chainsaws
AHCMOM304	Operate machinery and equipment
AHPCPM204	Recognise plants
AHPCPM303	Identify plant specimens
AHCPGD310	Implement a landscape maintenance program
AHCWRK309	Apply environmentally sustainable work practices
CPCCCA3018 *	Construct, erect and dismantle formwork for stairs and ramps
CPCCCA3028 *	Erect and dismantle formwork for footings and slabs on ground
CPCCON3041 *	Place concrete
CPCCON3042 *	Finish concrete
CPCCON3043 *	Cure concrete
MSFFL3063	Install synthetic textile floor coverings to sports facilities and outdoor spaces

Prerequisite requirements

Unit of competency	Prerequisite requirement
AHCLSC312 Construct brick and block structures and	AHCLSC317 Construct landscape features using concrete

features	
CPCCCA3018 Construct erect and dismantle formwork for stairs and ramps	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

AHC31021 Certificate III in Parks and Gardens

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for trade level roles in the parks and gardens industry including gardener, greenkeeper and groundsperson.

Individuals with this qualification perform tasks under broad supervision involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in selecting and operating equipment, coordinating resources and applying contingency measures during work.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 11 core units plus
 - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 must be from the electives listed below
- 1 from the remaining electives listed below, or any currently endorsed Training Package or accredited course.

Core Units

AHCIRG346	Operate pressurised irrigation systems
AHCMOM304	Operate machinery and equipment
AHCPCM306	Provide information on plants and their culture
AHCPGD307	Implement a plant establishment program
AHCPGD309	Perform specialist amenity pruning
AHCPGD310	Implement a landscape maintenance program
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCSOL304	Implement soil improvements for garden and turf areas
AHCTRF309	Implement a grassed area maintenance program
AHCWHS301	Contribute to work health and safety processes

Elective Units

AHCARB314	Implement a tree maintenance program
AHCARB315	Inspect trees for access and work
AHCARB320	Install tree support systems
AHCARB321	Implement a tree protection program
AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCDRG305	Install drainage systems
AHCECR301	Maintain native ecosystem areas
AHCECR303	Implement biological reintroduction works
AHCIRG337	Measure irrigation delivery system performance
AHCIRG338	Troubleshoot irrigation systems

AHCIRG345	Install pressurised irrigation systems
AHCIRG347	Maintain pressurised irrigation systems
AHCLSC316	Implement a paving project
AHCPCM303	Identify plant specimens
AHCPCM305	Implement a plant nutrition program
AHCPCM307	Report on health and condition of trees
AHCPGD210	Transplant shrubs and small trees
AHCPGD308	Plan and maintain plant displays
AHCPGD311	Conduct operational inspection of park facilities
AHCPGD312	Implement a maintenance program for an aquatic environment
AHCSOL305	Prepare growing media
AHCTRF307	Construct turf playing surfaces
AHCTRF308	Establish turf
AHCTRF310	Monitor turf health
AHCTRF311	Renovate sports turf
AHCWRK305	Coordinate work site activities
AHCWRK309	Apply environmentally sustainable work practices
BSBOPS304	Deliver and monitor a service to customers
BSBOPS305	Process customer complaints
FBPPPL3007	Support and mentor individuals and groups
FWPCOT2254	Maintain chainsaws
FWPCOT2256	Trim and cut felled trees
FWPFGM3216	Fell trees manually (intermediate)
HLTAID011	Provide first aid

PUAFER008	Confine small emergencies in a facility
RIIWHS204E	Work safely at heights

AHC31120 Certificate III in Nursery Operations

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.2.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for trade level roles carried out under broad supervision in the nursery production and retail nursery industry. It is assumed that participants undertaking this qualification as a direct entry qualification would have nursery or horticulture industry experience prior to undertaking this qualification.

Individuals with this qualification perform tasks autonomously involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in planning tasks, selecting and operating equipment, coordinating resources and applying contingency measures during work.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 9 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. Electives can be chosen to provide a general qualification or a qualification with a specialisation.

For the award of the *Certificate III in Nursery Operations* choose:

- up to 7 electives from groups A, B or C
- up to 3 units from any other endorsed Training Package or accredited course packaged at Certificate II, III or IV.

For the award of the *Certificate III in Nursery Operations (Nursery Production)* choose:

- at least 4 electives from group A
- up to 3 units from the remaining units listed in groups A, B or C, or any other endorsed Training Package or accredited course packaged at Certificate II, III or IV.

For the award of the *Certificate III in Nursery Operations (Retail Nursery)* choose:

- at least 4 electives from group B
- up to 3 units from the remaining units listed in groups A, B or C, or any other endorsed Training Package or accredited course packaged at Certificate II, III or IV.

Where two specialisations are completed, award of the qualification would read (for example), *Certificate III in Nursery Operations (Nursery Production, Retail Nursery)*.

Core Units

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCIRG338	Troubleshoot irrigation systems
AHCNSY308	Maintain nursery plants
AHCPCM305	Implement a plant nutrition program
AHCPCM306	Provide information on plants and their culture
AHCPMG302	Control plant pests, diseases and disorders
AHCSOL305	Prepare growing media
AHCWHS301	Contribute to work health and safety processes

Group A (nursery production)

AHCBIO303	Apply biosecurity measures
AHCIRG347	Maintain pressurised irrigation systems
AHCNSY309	Receive and dispatch nursery products
AHCNSY313	Implement a propagation plan

Group B (retail nursery)

AHCPCM303	Identify plant specimens
BSBMKG434	Promote products and services
SIRRMER001	Produce visual merchandise displays
SIRXCEG001	Engage the customer

Group C (general electives)

AHCBER302	Work effectively in an emergency disease or plant pest response
AHCBER305	Carry out emergency disease or plant pest control procedures on infected premises
AHCBER306	Carry out movement and security procedures
AHCBIO301	Identify and report signs of unusual disease or pest
AHCBUS408	Operate within a budget framework
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems
AHCIRG328	Operate irrigation controller and sensor technology
AHCIRG337	Measure irrigation delivery system performance

AHCIRG345	Install pressurised irrigation systems
AHCIRG346	Operate pressurised irrigation systems
AHCMER305	Provide information on hardware products
AHCMER306	Sell products and services
AHCMOM202	Operate tractors
AHCMOM217	Operate quad bikes
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment
AHCNSY310	Install and maintain plant displays
AHCNSY311	Promote sales of plants
AHCNSY312	Prepare specialised plants
AHCNSY314	Operate fertigation equipment
AHCNSY403	Plan a growing-on program
AHCPCM204	Recognise plants
AHCPCM405	Implement an integrated pest management program
AHCPMG301	Control weeds
AHCSOL203	Assist with soil or growing media sampling and testing
AHCWAT302	Monitor and operate water treatment processes

AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK309	Apply environmentally sustainable work practices
BSBOPS304	Deliver and monitor a service to customers
BSBOPS305	Process customer complaints
SIRRINV002	Control stock
SIRRMER003	Coordinate visual merchandising activities
SIRXPDK001	Advise on products and services
SIRXRSK002	Maintain store security
TLILIC0003	Licence to operate a forklift truck

AHC31319 Certificate III in Sports Turf Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for trade level roles carried out under general direction within sports turf management.

Individuals with this qualification perform tasks autonomously involving a broad range of skills that are applied in a wide variety of sports turf facilities and workplaces. They exercise discretion and judgement in planning tasks, selecting and operating equipment, coordinating resources and applying contingency measures during work.

Legislation related to the installation of irrigation and the storage, handling and application of chemicals applies in some states and territories.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 23 units of competency:
 - 18 core units plus
 - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 units must be selected from the electives listed below
- the remaining 2 electives may be selected from the list below or currently endorsed Training Package or Accredited Course.

Core Units

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCDRG305	Install drainage systems
AHCIRG345	Install pressurised irrigation systems
AHCIRG346	Operate pressurised irrigation systems
AHCIRG347	Maintain pressurised irrigation systems
AHCMOM304	Operate machinery and equipment
AHCPCM301	Implement a plant nutrition program
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCSOL304	Implement soil improvements for garden and turf areas
AHCTRF306	Prepare sports turf surfaces for play
AHCTRF307	Construct turf playing surfaces
AHCTRF308	Establish turf
AHCTRF310	Monitor turf health
AHCTRF311	Renovate sports turf
AHCWHS301	Contribute to work health and safety processes
AHCWRK309	Apply environmentally sustainable work practices

Elective Units

ACMGAS308	Communicate effectively with clients and team members
AHCARB301	Implement a tree maintenance program
AHCMOM202	Operate tractors
AHCMOM213	Operate and maintain chainsaws
AHCMOM301	Coordinate machinery and equipment maintenance and

	repair
AHCMOM310	Operate land-forming machinery and equipment
AHCPCM303	Identify plant specimens
AHCPGD201	Plant trees and shrubs
AHCPGD203	Prune shrubs and small trees
AHCSOL401	Sample soils and interpret results
AHCWRK305	Coordinate work site activities
CPPSIS2012	Assist in collecting basic spatial data
FSKNUM23	Estimate, measure and calculate measurements for work
FSKRDG03	Read and respond to basic workplace instructions
RIIMPO335E	Conduct skid steer loader operations without attachments

Qualification Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status

AHC31421 Certificate III in Conservation and Ecosystem Management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification provides the skills and theoretical and practical knowledge for work or further learning in the conservation and ecosystem management industry. The qualification provides for work roles encompassing a broad range of skills, or can be focussed on one or more specialisations, including:

- Indigenous land management
- Ecological restoration
- Land, parks and wildlife management
- Pest controller
- Conservation earthworks
- Marine
- Fire
- Mined land rehabilitation

Individuals with this qualification perform a range of conservation and ecosystem management activities including, site restoration, rehabilitation and renewal and management of the rural and natural landscapes, degraded sites, and marine environments. They contribute to the preservation and maintenance of wildlife and their habitat in the natural ecosystem, parks and reserves. Activities frequently involve working with and preservation of indigenous culture and heritage resources.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 2 core units plus
 - 14 elective units

Elective units must ensure the integrity of the qualification Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 6 must be selected from any of groups A, B, C, D, E, F, G and/or H
- up to 6 from Group I
- up to 4 units may be selected from any currently endorsed Training Package or accredited course.

Any combination of electives that meets the packaging rules can be selected for the award of the *Certificate III in Conservation and Ecosystem Management*. Where appropriate, electives may be packaged to provide a qualification with a specialisation area as follows:

- at least 6 electives from Group A must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Indigenous Land Management)*
- at least 6 electives from Group B must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Ecological Restoration)*
- at least 6 electives from Group C must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Land Parks and Wildlife)*
- at least 6 electives from Group D must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Conservation Earthworks)*
- at least 6 electives from Group E must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Pest Controller)*
- at least 6 electives from Group F must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Marine)*
- at least 6 electives from Group G must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Fire)*
- at least 6 electives from Group H must be selected for the award of the *Certificate III in Conservation and Ecosystem Management (Mined Land Rehabilitation)*

Note: If more than one specialisation is completed the award of the qualification would read, for example, *Certificate III in Conservation and Ecosystem Management (Indigenous Land Management and Conservation Earthworks)*.

Core Units

AHCECR309	Conduct an ecological and cultural site inspection prior to works
AHCWHS301	Contribute to work health and safety processes

Elective Units

Group A: Indigenous Land Management

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCECR301	Maintain native ecosystem areas
AHCFIR301*	Undertake burning for fuel, ecological and cultural resource management
AHCILM302	Provide appropriate information on cultural knowledge
AHCILM305	Work with an Aboriginal Community or organisation
AHCILM306	Follow Aboriginal cultural protocols
AHCILM307*	Implement Aboriginal cultural burning practices
AHCILM308	Identify traditional customs and land rights for an Indigenous Community
AHCWRK305	Coordinate work site activities
AHCWRK312	Operate in isolated and remote situations
SITTGDE001	Interpret aspects of local Australian Indigenous culture

Group B: Ecological Restoration

AHCECR301	Maintain native ecosystem areas
AHCECR302	Collect and preserve biological samples
AHCECR304	Undertake direct seeding
AHCECR305	Collect native seed
AHCECR307	Read and interpret maps
AHCECR310	Implement assisted regeneration works
AHCECR311	Implement ecosystem reconstruction works
AHCLPW302	Implement a biodiversity monitoring plan
AHCPCM303	Identify plant specimens
AHCPCM306	Provide information on plants and their culture

AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCSAW202	Recognise landforms and soil types

Group C: Lands, Parks and Wildlife

AHCECR301	Maintain native ecosystem areas
AHCECR307	Read and interpret maps
AHCFAU302	Identify fauna in the field
AHCINF301	Implement property improvement, construction and repair
AHCINF303	Plan and construct conventional fencing
AHCLPW302	Implement a biodiversity monitoring plan
AHCLPW308	Coordinate and report on data collection
AHCLPW310	Supervise park visitor activities
AHCLPW311	Construct access tracks
AHCLPW312	Carry out inspection of designated area
AHCPCM303	Identify plant specimens
AHCWRK305	Coordinate work site activities
AHCWRK309	Apply environmentally sustainable work practices
FWPCOT3202	Navigate in remote or trackless areas

Group D: Conservation Earth Works

AHCBIO303	Apply biosecurity measures
AHCLPW311	Construct access tracks
AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment

AHCMOM314	Transport machinery
AHCPCM204	Recognise plants
AHCSAW202	Recognise landforms and soil types
AHCSAW303	Construct conservation earthworks
AHCSAW304	Implement erosion and sediment control measures
AHCSAW402	Set out conservation earthworks
AHCWRK311	Conduct site inspections
FWPCOT3314	Comply with soil and water protection

Group E Pest Controller

AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG304	Use firearms to humanely destroy animals
AHCPMG305	Survey pests
AHCPMG306	Determine pest control techniques
AHCPMG307	Apply animal trapping techniques
AHCPMG308	Implement pest management strategies
AHCPMG312	Apply poison baits for vertebrate pest control in rural and environmental landscapes
AHCPMG402	Ensure compliance with pest legislation
AHCPMG403	Apply predator trapping techniques

Group F: Marine

AHCMAR301	Conduct a subtidal marine monitoring operation from a vessel or platform
AHCMAR302	Conduct intertidal marine monitoring

AHCMAR303	Coordinate marine conservation activities on small vessels
AHCMAR304	Identify and collect marine life
AHCMAR305	Monitor ocean conditions and marine environmental quality
MARC037	Operate inboard and outboard motors
MARF027	Apply basic survival skills in the event of vessel abandonment
MARF028	Follow procedures to minimise and fight fires on board a vessel
MARF030	Survive at sea using survival craft
MARN008	Apply seamanship skills aboard a vessel up to 12 metres

Group G: Fire

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCFIR301*	Undertake burning for fuel, ecological and cultural resource management
AHCILM307*	Implement Aboriginal cultural burning practices
AHCMOM304	Operate machinery and equipment
AHCWRK302	Monitor weather conditions
FWPCOT3325	Operate a four wheel drive vehicle on unsealed roads
PUAFIR008*	Operate aerial ignition equipment in an aircraft
PUAFIR204*	Respond to wildfire
PUAFIR210	Prevent injury
PUAFIR303*	Suppress wildfire
PUAFIR310	Operate specialist appliance

Group H: Mined Land Rehabilitation

AHCECR301	Maintain native ecosystem areas
AHCECR304	Undertake direct seeding
AHCECR308	Conduct a site inspection for ecological restoration
AHCECR310	Implement assisted regeneration works
AHCFAU302	Identify fauna in the field
AHCILM305	Work with an Aboriginal Community or organisation
AHCMOM304	Operate machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment
AHCPCM204	Recognise plants
AHCPCM303	Identify plant specimens
CPCCWHS100 1	Prepare to work safely in the construction industry
CPPWMT3004	Comply with environmental protection requirements when transporting waste
RIICAR302D	Rehabilitate small mine site

Group I: General Electives

An asterisk (*) next to the unit code indicates there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

ACMGEN309	Provide basic animal first aid
AHCARB325	Manage trees to create and maintain habitat refuges
AHCBIO301	Identify and report signs of unusual disease or pest
AHCBIO303	Apply biosecurity measures
AHCBUS408	Operate within a budget framework
AHCCFP301	Identify the effects of climate change as a factor in land management

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCECR302	Collect and preserve biological samples
AHCECR303	Implement biological reintroduction works
AHCECR306	Conduct photography for fieldwork
AHCECR311	Implement ecosystem reconstruction works
AHCEXP303	Prepare and use explosives
AHCEXP304	Identify and select explosive products
AHCFAU303	Respond to wildlife emergencies
AHCFAU501	Manage fauna populations
AHCFIR202	Assist with planned burning
AHCILM305	Work with an Aboriginal Community or organisation
AHCILM306	Follow Aboriginal cultural protocols
AHCIRG436	Implement an irrigation-related environmental protection program
AHCLPW307*	Perform restricted diving for scientific purposes
AHCLPW309	Operate remotely piloted system for conservation work
AHCLPW313	Undertake sampling and testing of water
AHCLSC311	Set out site for construction works
AHCLSC304	Erect timber structures and features
AHCMAR306	Operate mobile underwater vehicles
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM305	Operate specialised machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment

AHCPGD307	Implement a plant establishment program
AHCPGD310	Implement a landscape maintenance program
AHCPGD311	Conduct operational inspection of park facilities
AHCPGD312	Implement a maintenance program for an aquatic environment
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG306	Determine pest control techniques
AHCPMG308	Implement pest management strategies
AHCPMG402	Ensure compliance with pest legislation
AHCSAW303	Construct conservation earthworks
AHCSAW304	Implement erosion and sediment control measures
AHCSAW402	Set out conservation earthworks
AHCSPO312	Sample seed before and after processing
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
AHCWRK304	Respond to rescue incidents
AHCWRK305	Coordinate work site activities
AHCWRK310	Provide on-job training support
BSBPMG427	Apply project procurement procedures
BSBTEC301	Design and produce business documents
CPCCWHS100 1	Prepare to work safely in the construction industry
CPPSSI2012	Assist in collecting basic spatial data
CPPSSI2013	Store and retrieve basic spatial data
CPPSSI3011	Produce basic maps
CPPSSI4035	Apply GIS software to spatial problems

FWPCOT3301	Trim trees using a pole saw
FWPCOT3325	Operate a four wheel drive vehicle on unsealed roads
FWPCOT3326	Recover four wheel drive vehicle
FWPCOT3329	Perform complex four wheel drive operations
FWPNSY3002	Extract, clean, store and despatch tree seeds
HLTAID011	Provide First Aid
HLTAID013	Provide First Aid in remote or isolated site
HLTAID015	Provide advanced resuscitation and oxygen therapy
MARI003	Comply with regulations to ensure safe operation of a vessel up to 12 metres
MARK007	Handle a vessel up to 12 metres
MSL974021	Perform biological procedures
MSL975045*	Perform laboratory-based ecological techniques
PUAEMR005	Treat operational risk
PUAEMR006	Assess operational risk
PUAFIR017	Work safely around aircraft
PUAFIR204*	Respond to wildfire
PUAFIR210	Prevent injury
PUAOIL202	Use basic equipment operations for oil spill response
PUAOIL303	Apply health, safety and risk controls when working on oiled shorelines
PUAOIL304	Use advanced equipment operations for oil spill response
RIICAR301D	Rehabilitate exploration site
RIIENV401E	Supervise dust and noise control
RIIMEX201E	Suppress dust in open-cut environments
RIIMPO206D	Conduct bulk water truck operations

SFICRO302	Conduct crocodile surveys
SFICRO305	Prepare to work with crocodiles
SFICRO306	Work safely in crocodile habitats
SISOSCB001	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB006*	Perform diver rescues
SITTGDE002	Work as a guide
TLIC0023	Operate four wheel drive vehicle

Prerequisite requirements

Note: Units listed in the Prerequisite requirement column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	Prerequisite requirement
AHCFIR301 Undertake burning for fuel, ecological and cultural resource management	AHCFIR202 Assist with planned burning
AHCILM307 Implement Aboriginal cultural burning practices	AHCILM306 Follow Aboriginal cultural protocols
AHCLPW307 Perform restricted diving for scientific purposes	SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres SISOSCB006 Perform diver rescues* HLTAID011 Provide First Aid HLTAID015 Provide advanced resuscitation and oxygen therapy
MSL975045 Perform laboratory-based ecological techniques	MSL974021 Perform biological procedures
PUAFIR008 Operate aerial ignition equipment in an aircraft	PUAFIR017 Work safely around aircraft

PUAFIR204 Respond to wildfire	PUAFIR210 Prevent injury
PUAFIR303 Suppress wildfire	PUAFIR204 Respond to wildfire*
SISOSCB006 Perform diver rescues	SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

Qualification Description

This qualification provides a vocational outcome required for an Indigenous land worker operating within Aboriginal Communities, following Community protocols and using a mix of traditional and contemporary land management strategies.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 2 core units plus
 - 14 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 4 units from Group A

- Select 7 units from Group A or Group B
- A maximum of 3 units may be selected from the elective lists of Certificate II, III or IV of this or any other endorsed Training Package or Accredited Course.
Selected units must be relevant to job outcomes in Indigenous land management and must be chosen to ensure the integrity of the qualification outcome at AQF level 3.

Core Units

Work health and safety

AHCWHS301	Contribute to work health and safety processes
-----------	--

Work

AHCWRK309	Apply environmentally sustainable work practices
-----------	--

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

Indigenous land management

AHCILM302	Provide appropriate information on cultural knowledge
AHCILM305	Work with an Aboriginal Community or organisation
AHCILM306	Follow Aboriginal cultural protocols
AHCILM308	Identify traditional customs and land rights for an Indigenous Community
SITTGDE001	Interpret aspects of local Australian Indigenous culture

Fauna

AHCFAU303	Respond to wildlife emergencies
LGAREGS305 A	Undertake animal or reptile control duties

Lands, parks and wildlife

SITTGDE002	Work as a guide
------------	-----------------

Natural area restoration

AHCECR203	Perform basic ecological restoration works
AHCECR301	Maintain native ecosystem areas
AHCECR303	Implement biological reintroduction works
AHCECR305	Collect native seed
FWPFGM3202	Extract seed

Pest management

AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders

Group B

Animal care and management

ACMGAS305	Rescue animals and apply basic first aid
-----------	--

Business

BSBTEC301	Design and produce business documents
-----------	---------------------------------------

Chemicals

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases

Infrastructure

AHCINF301	Implement property improvement, construction and repair
-----------	---

Landscaping

AHCLSC304	Erect timber structures and features
-----------	--------------------------------------

Lands, parks and wildlife

AHCLPW310	Supervise park visitor activities
AHCLPW311	Construct access tracks
AHCLPW312	Carry out inspection of designated area
AHCLPW307	Perform restricted diving for scientific purposes

AHC31818 Certificate III in Beekeeping

Modification History

Release	Comments
Release 2	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Qualification Description

This qualification describes the skills and knowledge of a honey bee (*Apis*) beekeeper, including the establishment of beehives and apiaries, the transport of live bees and the management of bees for honey production and/or provision of pollination services.

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:
 - 13 core units plus
 - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 units must be selected from the electives listed below
- the remaining 2 units may be selected from the remaining electives listed below
- up to 2 units may be selected from any currently endorsed Training Package or accredited course packaged at AQF Certificate II, III or IV levels.

Core Units

AHCBEK203	Open and reassemble a beehive
AHCBEK205	Prepare and use a bee smoker
AHCBEK206	Assemble and maintain beekeeping components
AHCBEK301	Manage honey bee swarms
AHCBEK302	Manipulate honey bee brood
AHCBEK303	Re-queen a honey bee colony
AHCBEK304	Remove a honey crop from a hive
AHCBEK311	Transport bee hives by road to new apiary site
AHCBEK312	Extract honey
AHCBEK313	Manage pests and disease within a honey bee colony
AHCBEK405	Select and establish an apiary site
AHCWHS301	Contribute to work health and safety processes
AHCWRK306	Comply with industry quality assurance requirements

Elective Units

AHCBEK307	Collect and store propolis
AHCBEK308	Produce and harvest royal jelly
AHCBEK309	Trap and store pollen
AHCBEK310	Process raw wax into moulds
AHCBEK402	Perform queen bee artificial insemination
AHCBEK408	Provide bee pollination services
AHCBEK409	Rear queen bees
AHCBIO303	Apply biosecurity measures
AHCBUS407	Cost a project
AHCLSK322	Transport farm produce or bulk materials

AHCMOM213	Operate and maintain chainsaws
AHCPCM204	Recognise plants
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK308	Handle bulk materials in storage area
BSBMKG433	Undertake marketing activities
FBPFSY2001	Implement the food safety program and procedures
FBPFSY3002	Participate in a HACCP team
FBPGPS2011	Operate a creamed honey manufacture process
FBPOPR2023	Operate a packaging process
FBPOPR2066	Apply sampling procedures
HLTAID011	Provide First Aid
TLILIC0003	Licence to operate a forklift truck

AHC32216 Certificate III in Commercial Composting

Modification History

Release	Comments
Release 4	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification provides a general vocational outcome for a person working in a commercial composting business. The composting industry expects this qualification to be achieved to meet job outcomes at this level.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 1 core unit plus
 - 9 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 5 units from Group A

- Select 2 units from Group A or B
- 2 units may be selected from this or any other endorsed Training Package or Accredited Course.

Selected units must be relevant to job outcomes in commercial composting and must be chosen to ensure the integrity of the qualification outcome at AQF level 3.

Core Units

AHCWHS301	Contribute to work health and safety processes
-----------	--

Elective Units

Group A

AHCCOM301	Operate compost processing plant, machinery and equipment
AHCCOM401	Develop a composting recipe
AHCCOM402	Plan and schedule compost production
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK308	Handle bulk materials in storage area
RIIMPO304E	Conduct wheel loader operations

Group B

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCCHM308	Use application equipment to apply fumigant in confined spaces
AHCCHM309	Fumigate soil
AHCCOM201	Assess and receive raw materials for composting
AHCCOM202	Recognise and respond to fire emergencies on a

	composting site
AHCCOM203	Recognise raw materials, production processes and products on a composting site
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment

Qualification Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
AHC32216 Certificate III in Commercial Composting Release 4	AHC32216 Certificate III in Commercial Composting Release 3	Qualification updated to remove three elective units that have been deleted as part of meeting Skills Ministers' priority of removing training products with low or no enrolments, as agreed by the AISC	Equivalent

AHC32419 Certificate III in Irrigation Technology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for trade level roles carried out in the irrigation industry.

Individuals with this qualification perform tasks under broad supervision involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in selecting and operating equipment, coordinating resources and applying contingency measures during work.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 22 units of competency:
 - 9 core units plus
 - 13 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 7 must be from Group A electives
- 2 must be from Group A or B electives

- 4 from the remaining units listed in Groups A or B, or any other endorsed Training Package or accredited course packaged at Certificate III.

Core Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCINF304	Install and terminate extra low voltage wiring systems
AHCIRG337	Measure irrigation delivery system performance
AHCIRG338	Troubleshoot irrigation systems
AHCIRG339	Monitor soils under irrigation
AHCIRG340	Install irrigation pumps
AHCIRG342	Interpret irrigation plans and drawings
AHCIRG345	Install pressurised irrigation systems
AHCWHS301	Contribute to work health and safety processes
AHCWRK309	Apply environmentally sustainable work practices

Elective Units

Group A

AHCDRG305	Install drainage systems
AHCDRG306	Measure drainage system performance
AHCDRG307	Troubleshoot drainage systems
AHCDRG308	Maintain and repair irrigation drainage systems
AHCIRG301	Install gravity fed irrigation systems
AHCIRG328	Operate irrigation controller and sensor technology
AHCIRG336	Operate and maintain gravity fed irrigation systems
AHCIRG341	Operate and maintain irrigation pumping systems
AHCIRG343	Operate irrigation injection equipment
AHCIRG344	Implement an irrigation schedule

AHCIRG346	Operate pressurised irrigation systems
AHCIRG347	Maintain pressurised irrigation systems
AHCIRG348	Operate and maintain moving irrigation system
AHCWRK305	Coordinate work site activities
MEM12024	Perform computations

Group B

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCCHM101	Follow basic chemical safety rules
AHCCHM201	Apply chemicals under supervision
AHCCHM304	Transport and store chemicals
AHCIRG349	Recommend irrigation products and services
AHCLPW313	Undertake sampling and testing of water
AHCMER301	Process customer complaints
AHCMER306	Sell products and services
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM208	Conduct excavator operations
AHCMOM304	Operate machinery and equipment
AUMGTW001	Perform basic welding, thermal cutting, heating and gouging
BSBWRT311	Write simple documents
CPCPCM2043 A	Carry out WHS requirements
CPCPWT3027 A*	Connect irrigation systems from drinking water supply

AHC32516 Certificate III in Aboriginal Sites Work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

The qualification enables individuals to undertake work associated with inspecting, documenting and maintaining Aboriginal cultural and heritage sites.

The qualification enables individuals to operate under recognised, appropriate cultural supervision to undertake work associated with inspecting, documenting and maintaining Aboriginal cultural and heritage sites.

There are no entry requirements for this qualification, although it is recommended that participants undertaking this qualification seek the endorsement of their local Aboriginal Community and local Aboriginal leadership when enrolling in this qualification.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 9
- Elective Units = 6

Core Units

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit

Unit Code	Unit Title
AHCASW301	Protect places of Aboriginal cultural significance* <i>AHCILM306 Follow Aboriginal cultural protocols</i>

AHCASW302	Relate Aboriginal culture to sites work* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW303	Identify and record Aboriginal sites, objects and cultural landscapes* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW308	Apply cultural significance to Aboriginal sites and landscapes* <i>AHCASW302 Relate Aboriginal culture to sites work**</i> <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW310	Move and store Aboriginal cultural material* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW312	Maintain an Aboriginal cultural site* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW313	Apply knowledge of relevant legislation to Aboriginal sites work
AHCILM306	Follow Aboriginal cultural protocols
AHCWHS301	Contribute to work health and safety processes

Electives

- Select 4 units from Group A
- Select 2 additional units from Group A or Group B or from the elective list of any Certificate II, III or IV in this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in Aboriginal sites work and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit

Unit Code	Unit Title
AHCASW305	Work with Aboriginal ceremonial secret sacred materials* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW306	Use technology in Aboriginal sites work*

	<i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW307	Support the documentation of Aboriginal cultural landscapes* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW309	Interpret Aboriginal cultural landscape* <i>AHCASW302 Relate Aboriginal culture to sites work</i> <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM305	Work with an Aboriginal Community or organisation* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM307	Implement Aboriginal cultural burning practices* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM510	Plan for successful cultural practice at work * <i>AHCILM306 Follow Aboriginal cultural protocols</i>

Group B

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit

Unit Code	Unit Title
AHCASW304	Identify Indigenous culturally significant plants* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW501	Survey and report on Aboriginal cultural sites* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCFAU301	Respond to wildlife emergencies
AHCILM201	Maintain cultural places
AHCILM203	Record information about Country
AHCILM302	Provide appropriate information on cultural knowledge
AHCILM308	Identify traditional customs and land rights for an Indigenous Community

AHCILM404	Record and document Community history
AHCINF301	Implement property improvement, construction and repair
AHCLPW301	Supervise park visitor activities
AHCLPW303	Construct access tracks
AHCLPW304	Carry out inspection of designated area
AHCLPW305	Perform diving for scientific purposes
AHCLPW306	Undertake sampling and testing of water
AHCLSC304	Erect timber structures and features
AHCMOM305	Operate specialised machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment
AHCNAR201	Carry out natural area restoration works
AHCNAR301	Maintain natural areas
AHCNAR303	Implement revegetation works
AHCNAR305	Collect native seed
AHCNAR306	Conduct photography for fieldwork
AHCNAR307	Read and interpret maps
AHCPCM301	Implement a plant nutrition program
AHCPCM302	Provide information on plants and their culture
AHCPCM303	Identify plant specimens
AHCPMG301	Control weeds
AHCPMG302	Control pests and diseases in plants
AHCPMG305	Survey pests
AHCPMG307	Apply animal trapping techniques
AHCPMG308	Implement pest management strategies
AHCWRK303	Respond to emergencies

AHCWRK304	Respond to rescue incidents
AHCWRK305	Coordinate work site activities
BSBITU306	Design and produce business documents
CUAATS504	Work with Aboriginal and Torres Strait Islander cultural material
CUACNM301	Move and store collection material
BSBLIB502	Manage the development of collections
BSBLIB602	Develop and monitor procedures for the movement and storage of collection material
CULMS002B	Research and evaluate Aboriginal or Torres Strait Islander cultural material
CULMS010B	Contribute to the preservation of cultural material
FPICOT3259	Operate a four wheel drive on unsealed roads
FPIFGM3202B	Extract seed
LGAREGS305A	Undertake animal or reptile control duties
PUAFIR204B	Respond to wildfire* <i>PUAFIR215 Prevent injury</i>
PUAFIR303B	Suppress wildfire* <i>PUAFIR204B Respond to wildfire</i>
SITTGDE001	Interpret aspects of local Australian Indigenous culture
SITTGDE002	Work as a guide
SITTGDE007	Research and share general information on Australian Indigenous cultures
SITTGDE008	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE010	Prepare specialised interpretive content on cultural and heritage environments
SITTPPD002	Develop interpretive activities
SITXCOM004	Address protocol requirements

AHC32720 Certificate III in Rural Merchandising

Modification History

Release	Comments
Release 1	This version release with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for job roles in the rural merchandising industry including rural merchandiser and rural sales assistant.

Individuals with this qualification perform tasks involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in selecting equipment and services and applying contingency measures during work.

Work must comply with workplace health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 6 core units plus
 - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- At least 4 must be from the electives listed below
- Up to 2 from the electives listed below and/or any other endorsed Training Package or accredited course packaged at Certificate II, III or IV.

Core Units

AHCMER306	Sell products and services
AHCWHS301	Contribute to work health and safety processes
AHCWRK204	Work effectively in the industry
AHCWRK309	Apply environmentally sustainable work practices
BSBOPS304	Deliver and monitor a service to customers
BSBOPS305	Process customer complaints

Elective Units

AHCBAC409	Provide advice on agronomic products
AHCBUS301	Use hand held e-business tools
AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCCHM406	Provide advice and sell farm chemicals
AHCIRG349	Recommend irrigation products and services
AHCIRG446	Provide irrigation sales and service
AHCLSK420	Provide advice on livestock products
AHCMER305	Provide information on hardware products
AHCMER408	Coordinate customer service and networking activities
AHCMOM403	Provide advice and sell machinery
AHCSOL405	Provide information on fertilisers and soil ameliorants
AHCWRK205	Participate in workplace communications
AHCWRK303	Respond to emergencies
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK307	Develop and apply fertiliser and soil ameliorant product

	knowledge
AHCWRK308	Handle bulk materials in storage area
BSBPEF301	Organise personal work priorities
BSBPEF403	Lead personal development
ICTICT214	Operate application software packages
SIRRINV001	Receive and handle retail stock
SIRRINV002	Control stock
SIRRMER001	Produce visual merchandise displays
SIRRMER003	Coordinate visual merchandising activities
SIRXMKT002	Use social media to engage customers
SIRXPDK001	Advise on products and services
SIRXRSK002	Maintain store security
SIRXSLS002	Follow point-of-sale procedures
TLID1001	Shift materials safely using manual handling methods
TLID2004	Load and unload goods/cargo
TLILIC0003	Licence to operate a forklift truck

AHC32816 Certificate III in Rural Operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification provides an occupational outcome in agriculture, horticulture and conservation land management and at least one and up to four other related industries.

Individuals with this qualification perform tasks in a variety of contexts, which involve some judgement in selecting equipment and services. Depending on the units selected individuals will be able to seek employment not only in rural industries but also other industry sectors, such as local government, tourism, hospitality, transport, construction, information technology and metals.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 2 core units plus
 - 14 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- select at least 6 units from Certificate III qualifications in the AHC endorsed Training Package
- up to 8 units aligned to AQF levels 2, 3, or 4 qualifications may be selected from up to 4 currently endorsed Training Packages or Accredited Courses.

Core Units

AHCWHS301	Contribute to work health and safety processes
AHCWRK309	Apply environmentally sustainable work practices

AHC33719 Certificate III in Protected Horticulture

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for individuals who work in the protected horticulture industry undertaking skilled work in the areas of picking, packing, crop and nursery work.

Individuals with this qualification perform tasks involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in selecting and operating equipment, coordinating resources and apply contingency measures during work.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
 - 6 core units plus
 - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. Any combination of electives that meets the packaging rules can be selected for the award of the *Certificate III in Protected Horticulture*.

Where appropriate, electives may be packaged to provide a qualification with a specialisation area as follows:

- At least 3 electives must be selected from Group A electives must be selected for the award of the *Certificate III in Protected Horticulture (Picking)*
- At least 3 electives must be selected from Group B for the award of the *Certificate III in Protected Horticulture (Packing)*.
- At least 3 electives must be selected from Group C for the award of the *Certificate III in Protected Horticulture (Crop Work)*
- At least 3 electives must be selected from Group D for the award of the *Certificate III in Protected Horticulture (Nursery)*
- Plus 8 units with up to 3 from any currently endorsed Training Package or accredited course.

Where a specialisation area is not sought, the electives are to be chosen as follows:

- 8 units must be selected from groups A, B, C, D or E
- the remaining 3 electives may be selected from groups A, B, C, D or E or any currently endorsed Training Package or accredited course.

Core Units

AHCBIO305	Apply biosecurity measures
AHCWHS301	Contribute to work health and safety processes
AHCWRK309	Apply environmentally sustainable work practices
FBPFSY3001	Monitor the implementation of quality and food safety programs
FBPOPR1010	Carry out manual handling tasks
FBPOPR2070	Apply quality systems and procedures

Elective Units

Group A Picking

AHCBIO201	Inspect and clean machinery for plant, animal and soil material
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCPHT214	Support horticultural crop harvesting
AHCPHT310	Coordinate horticultural crop harvesting

Group B Packing

AHCWRK207	Collect and record production data
FBPBPG2002	Operate the carton erection process
FBPBPG2004	Operate the palletising process
FBPBPG2008	Perform basic packaging tests and inspections
FBPBPG3002	Operate the labelling process
FBPOPR2068	Operate a process control interface
FBPOPR3004	Set up a production or packaging line for operation
FBPOPR3006	Operate interrelated processes in a packaging system
FBPTEC4002	Apply principles of food packaging
SIRRINV002	Control stock
TLIA2014	Use product knowledge to complete work operations
TLIA3016	Use inventory systems to organise stock control
TLIA3018	Organise despatch operations
TLIA3019	Organise receipt operations
TLIA3038	Control and order stock

Group C Crop Work

AHCBIO302	Identify and report unusual disease or plant pest signs
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems
AHCHYD401	Establish and monitor hydroponic crops
AHCNSY307	Operate fertigation equipment
AHCPCM301	Implement a plant nutrition program
AHCPHT211	Maintain crop

AHCPHT212	Perform manual pollination of crops
AHCPHT301	Carry out a crop regulation program
AHCPHT305	Regulate crops
AHCPHT306	Establish horticultural crops
AHCPHT311	Install and maintain vertical hanging trellis
AHCPMG302	Control plant pests, diseases and disorders

Group D Nursery

AHCBIO302	Identify and report unusual disease or plant pest signs
AHCNSY203	Undertake propagation activities
AHCNSY301	Maintain nursery plants
AHCNSY307	Operate fertigation equipment
AHCPCM301	Implement a plant nutrition program
AHCPHT204	Undertake field budding and grafting
AHCPHT213	Perform plant blocking on
AHCPMG302	Control plant pests, diseases and disorders
FBPVIT2001	Bench graft vines

Group E General electives

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems
AHCIRG337	Measure irrigation delivery system performance

AHCMOM202	Operate tractors
AHCMOM304	Operate machinery and equipment
AHCPCM302	Provide information on plants and their culture
AHCPMG202	Treat plant pests, diseases and disorders
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCSOL305	Prepare growing media
AHCWAT301	Monitor and operate water treatment processes
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
FBPOPR2037	Operate a filtration process
FBPOPR2063	Clean equipment in place
FBPOPR2064	Clean and sanitise equipment
FBPOPR3005	Operate interrelated processes in a production system
FBPPPL3003	Participate in improvement processes
FBPPPL3005	Participate in an audit process
FBPPPL3006	Report on workplace performance
HLTAID011	Provide First Aid
TLID2010	Operate a forklift
TLIK2010	Use infotechnology devices in the workplace
TLILIC0003	Licence to operate a forklift truck

AHC33816 Certificate III in Permaculture

Modification History

Release	Comments
Release 4	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.1.
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification relates to those individuals who work either independently or in teams to establish and maintain permaculture systems for private clients, organisations or community entities. They perform tasks involving a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, elements in a design or contingency measures.

The qualification is suited to learners who wish to work at the skilled tradesman level within permaculture projects and enterprises, and may involve supervision of others and working with people of diverse backgrounds and abilities.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 5 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 1 unit from Group A
- Select 6 units from Group B
- Select 2 units from Group B or C
- 1 unit may be selected from Group C or this or any other endorsed Training Package or Accredited Course.

Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3.

Core Units

AHCPER301	Research and communicate information on permaculture principles and practices
AHCPER302	Develop recommendations for integrated plant and animal systems
AHCPER303	Maintain integrated plant and animal systems
AHCPER316	Select plant and animal species for permaculture systems
AHCWRK311	Conduct site inspections

Elective Units

Group A

AHCPER307	Establish a rural permaculture system
AHCPER308	Establish an urban permaculture system

Group B

AHCPER305	Implement crop maintenance and harvesting programs for permaculture systems
AHCPER306	Use weedy plants in a permaculture system
AHCPER307	Establish a rural permaculture system
AHCPER308	Establish an urban permaculture system
AHCPER309	Install and maintain permaculture water systems

AHCPER310	Install structures for permaculture systems
AHCPER312	Plan organic garden and orchard systems
AHCPER313	Coordinate preparation and storage of permaculture products
AHCPER314	Read and interpret property maps and plans
AHCPER315	Coordinate community projects
AHCPER318	Plan propagation activities for a permaculture system
AHCPER319	Test, improve and maintain healthy soil in a permaculture system
AHCPER320	Manage plant pests, diseases and disorders in a permaculture system
AHCPER321	Demonstrate permaculture practices to small groups of learners
AHCPER411	Operate within a sustainable community and bioregional development program

Group C

AHCILM306	Follow Aboriginal cultural protocols
AHCILM305	Work with an Aboriginal Community or organisation
AHCINF301	Implement property improvement, construction and repair
AHCLSK319	Slaughter livestock
AHCECR301	Maintain native ecosystem areas
AHCSAW304	Implement erosion and sediment control measures
AHCWRK302	Monitor weather conditions
TAEDEL301	Provide work skill instruction

AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification reflects the roles of individuals who work as cultivation technicians in the medicinal cannabis industry. In this role, these individuals have responsibilities for undertaking a range of skilled work in controlled growing, licensed medicinal cannabis operations.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
 - 6 core units plus
 - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 4 units must be selected from the elective units listed below
- the remaining 4 units may be selected from the elective units listed below or any currently endorsed Training Package or accredited course.

Core Units

AHCMDC301	Apply security regulatory requirements to work in the medicinal cannabis industry
-----------	---

AHCMDC302	Apply regulatory and quality requirements to the production of medicinal cannabis
AHCMDC303	Undertake propagation of medicinal cannabis
AHCMDC304	Undertake care and maintenance of medicinal cannabis
AHCMDC305	Undertake harvest and pre-processing of medicinal cannabis
AHCWHS301	Contribute to work health and safety processes

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCIRG337	Measure irrigation delivery system performance
AHCIRG347	Maintain pressurised irrigation systems
AHCMOM305	Operate specialised machinery and equipment
AHCNSY314	Operate fertigation equipment
AHCPMG302	Control plant pests, diseases and disorders
AHCSOL305	Prepare growing media
AHCWRK207	Collect and record production data
AHCWRK303	Respond to emergencies
AHCWRK309	Apply environmentally sustainable work practices
FBPBP3002	Operate the labelling process
FBPOPR1010	Carry out manual handling tasks
FBPOPR2068	Operate a process control interface
FBPPHM3001	Apply Good Manufacturing Practice requirements
FBPPHM3003	Work in a controlled environment
FBPPHM3004	Clean and sanitise facilities and equipment

FBPPPL3003	Participate in improvement processes
FBPPPL3006	Report on workplace performance
HLTAID011	Provide first aid
MSL933005	Maintain the laboratory/field workplace fit for purpose
MSL973013	Perform basic tests
MSL973016	Perform aseptic techniques
MSL974025*	Prepare tissue and cell cultures
TLIA0015	Organise receipt and despatch operations
TLID2010	Operate a forklift
TLIK2010	Use infotechnology devices in the workplace
TLIX0004X	Administer inventory systems
TLIX0013X	Maintain stock control and receipts

Prerequisite requirements

Unit of competency	Prerequisite requirement
MSL974025 Prepare tissue and cell cultures	MSL973016 Perform aseptic techniques

AHC40116 Certificate IV in Agriculture

Modification History

Release	Comments
Release 7	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0.
Release 6	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1.
Release 5	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.
Release 4	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0.
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification allows individuals to develop post-trade skills and knowledge to become specialists within the agriculture industry. It is designed to meet the needs of supervisors or team leaders in the agriculture industry.

Individuals with this qualification will take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems. Job roles vary across different industry sectors and include:

- Farm team leader
- Farm supervisor.

No licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 1 core unit plus
 - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 units must be selected from Group A electives listed below
- 5 units must be selected from either the remaining Group A electives or from the Group B electives, or from the Prerequisite Requirements list if a unit is a required for packaging the qualification
- up to 2 units may be selected from the remaining electives listed below, or from the Prerequisite Requirements list if a unit is a required for packaging the qualification
- up to 2 units may be selected from any currently endorsed Training Package or Accredited Course packaged in qualifications at AQF levels 3, 4 or 5.

Core Units

AHCWHS401	Maintain work health and safety processes
-----------	---

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

AHCBAC410	Plan and implement a pasture establishment program
AHCBAC411	Manage pastures for livestock production
AHCBAC412	Supervise agricultural crop establishment
AHCBAC413	Plan and implement agricultural crop maintenance
AHCBAC414	Supervise agricultural crop harvesting
AHCBAC415	Maintain grain quality in storage

AHCBAC416	Save, prepare and store agricultural seed
AHCBIO401	Plan and implement a biosecurity program
AHCCHM405	Plan and implement a chemical use program
AHCDRY402	Manage milking shed operations
AHCLSK317	Plan to exhibit livestock
AHCLSK339	Pregnancy test livestock
AHCLSK341	Coordinate artificial insemination and fertility management of livestock
AHCLSK401	Develop feeding plans for a production system
AHCLSK402	Develop livestock feeding plans
AHCLSK404	Implement and monitor animal welfare programs
AHCLSK405	Implement intensive production systems
AHCLSK406	Oversee animal marking operations
AHCLSK407	Plan and monitor intensive production systems
AHCLSK409	Supervise animal health programs
AHCLSK410	Supervise feedlot operations
AHCLSK412	Arrange livestock purchases
AHCLSK413	Design livestock handling facilities
AHCLSK414	Arrange transport for farm produce or livestock
AHCLSK418*	Escort livestock during export
AHCLSK419*	Manage horses for stock work
AHCLSK421	Supervise natural mating of livestock
AHCLSK422	Identify and select animals for breeding
AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCPMG412	Develop a pest management plan

AHCPRK401	Implement a feeding strategy for pig production
-----------	---

Group B

AHCAGB404	Plan and implement infrastructure improvements
AHCAGB405	Analyse and interpret production data
AHCAGB406	Keep financial records for primary production business
AHCAIS402	Supervise artificial breeding and embryo transfer programs
AHCBAC409	Provide advice on agronomic products
AHCBUS406	Administer finance, insurance and legal requirements
AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCBUS409	Participate in an e-business supply chain
AHCBUS512	Develop and implement family business structures and relationships
AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM406	Provide advice and sell farm chemicals
AHCIRG435	Determine hydraulic parameters for an irrigation system
AHCIRG436	Implement an irrigation-related environmental protection program
AHCIRG437	Schedule irrigations
AHCIRG439	Interpret and apply irrigation designs
AHCIRG442	Supervise irrigation system installation
AHCLSK420	Provide advice on livestock products
AHCMER408	Coordinate customer service and networking activities
AHCMKH401	Carry out cleaning-time tests of milking machines
AHCMKH402	Design and fabricate milking equipment installations

AHCMKH403	Design and install enterprise milk cooling and storage
AHCMKH404	Install milking equipment
AHCMKH405	Performance test milking machines
AHCMOM401	Conduct major repair and overhaul of machinery and equipment
AHCMOM403	Provide advice and sell machinery
AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCPCM406	Develop a soil health and plant nutrition program
AHCSDT308	Perform tests for quality on seeds
AHCSDT412	Perform advanced tests on seeds
AHCSDT413	Handle and store seed subject to quarantine regulations
AHCSDT414	Maintain a quarantine approved laboratory
AHCSHG402	Conduct equipment experting for machine shearing
AHCSHG405	Arrange employment for shearing operations
AHCSHG407	Prepare shearing team wages
AHCSOL403	Prepare acid sulphate soil management plans
AHCSOL405	Provide information on fertilisers and soil ameliorants
AHCSOL406	Sample soils and interpret results
AHCSOL407	Develop a soil use map for a property
AHCSOL409	Supervise acid sulphate soil remediation and management projects
AHCWOL401	Determine wool classing strategies
AHCWOL402	Use individual fleece measurements to prepare wool for sale

AHCWOL403	Plan, implement and review wool harvesting and clip preparation
AHCWOL404	Establish work routines and manage wool harvesting and preparation staff
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance
BSBCMM411	Make presentations
BSBESB406	Establish operational strategies and procedures for new business ventures Evaluate and develop small business operations
BSBESB407	Manage finances for new business ventures Manage small business finances
BSBFIN401	Report on financial activity
BSBHRM415	Coordinate recruitment and onboarding
BSBINS402	Coordinate workplace information systems
BSBLDR414	Lead team effectiveness
BSBOPS403	Apply business risk management processes Identify risk and apply risk management processes
BSBPMG428	Apply project life cycle management processes
BSBTEC401	Design and produce complex text documents
MSL913004	Plan and conduct laboratory/field work
MSMSUP280	Manage conflict at work
RGRHBR306*	Raise young horses
RGRHBR401	Maintain horse stud records
RGRHBR403*	Handle and care for breeding stallions
RGRHBR505	Oversee administration of stud records
TAEDEL301	Provide work skill instruction

Prerequisite requirements

Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour
ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver	ACMEQU205 Apply knowledge of horse behaviour
AHCLSK418 Escort livestock during export	AHCLSK307 Euthanase livestock AHCLSK331 Comply with industry animal welfare requirements
AHCLSK419 Manage horses for stock work	ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver*
RGRHBR306 Raise young horses	ACMEQU202 Handle horses safely*
RGRHBR403 Handle and care for breeding stallions	ACMEQU202 Handle horses safely*

AHC40219 Certificate IV in Protected Horticulture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for supervisory and coordinating roles in the protected horticulture industry.

Individuals with this qualification perform tasks involving technical skills, problem solving and supervisory skills to operate, monitor and improve performance of protected horticulture systems, processes and team members.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
 - 5 core units plus
 - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 6 must be from electives group A
- 5 from the remaining units listed in groups A or B, or any currently endorsed Training Package or accredited course packaged at Certificate III, Certificate IV or Diploma.

Core Units

AHCWHS401	Maintain work health and safety processes
AHCWRK403	Supervise work routines and staff performance
BSBLDR403	Lead team effectiveness
BSBSMB407	Manage a small team
FBPFSY3001	Monitor the implementation of quality and food safety programs

Elective Units

Group A

AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCBUS409	Participate in an e-business supply chain
AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
AHCHYD401	Establish and monitor hydroponic crops
AHCHYD501	Develop a plan for a hydroponic system
AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCNSY401	Plan a growing-on program
AHCNSY402	Plan a propagation program
AHCPCM401	Recommend plants and cultural practices
AHCPCM402	Develop a soil health and plant nutrition program
AHCPCM501	Diagnose plant health problems

AHCPHT402	Develop a crop regulation program
AHCPHT404	Implement and monitor a horticultural crop harvesting program
AHCPHT502	Develop a horticultural production plan
AHCPHT503	Manage a controlled growing environment
AHCPMG409	Implement a pest management plan
AHCWAT503	Manage water systems
TAEDEL301	Provide work skill instruction

Group B

BSBINT303	Organise the importing and exporting of goods
BSBRSK401	Identify risk and apply risk management processes
FBPOPR3004	Set up a production or packaging line for operation
FBPTEC4002	Apply principles of food packaging
TAEASS301	Contribute to assessment
TLIA3016	Use inventory systems to organise stock control
TLIA3038	Control and order stock
TLIR4002	Source goods/services and evaluate contractors

AHC40320 Certificate IV in Production Horticulture

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.2.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for supervisory/managerial job roles in the production horticulture industry including grower, field manager, supervisor, crop grower, plant manager, integrated pest manager, quality assurance, compliance manager and human resources manager.

Individuals with this qualification perform tasks involving technical skills, problem solving and supervisory skills to operate, monitor and improve performance of production horticulture systems and may supervise staff.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 5 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 2 units must be from electives in group A

- up to 2 units must be from electives in group A or B
- up to 3 units from the remaining units listed in groups A or B, or any currently endorsed Training Package or accredited course packaged at Certificate III, IV or Diploma.

Core Units

AHCBIO401	Plan and implement a biosecurity program
AHCBUS408	Operate within a budget framework
AHCWHS401	Maintain work health and safety processes
AHCWRK401	Implement and monitor quality assurance procedures
BSBLDR412	Communicate effectively as a workplace leader

Elective Units

Group A

AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
AHCIRG437	Schedule irrigations
AHCNSY403	Plan a growing-on program
AHCNSY404	Plan a propagation program
AHCPCM404	Recommend plants and cultural practices
AHCPCM406	Develop a soil health and plant nutrition program
AHCPCM509	Apply knowledge of plant physiology to horticultural practices
AHCPHT409	Develop a crop regulation program
AHCPHT411	Implement and monitor a horticultural crop harvesting program
AHCSOL406	Sample soils and interpret results
AHCWRK403	Supervise work routines and staff performance
BSBLDR413	Lead effective workplace relationships

Group B

AHCBUS409	Participate in an e-business supply chain
AHCIRG435	Determine hydraulic parameters for an irrigation system
AHCIRG436	Implement an irrigation-related environmental protection program
AHCIRG445	Manage surface irrigation systems
AHCORG401	Manage biodynamic production
AHCORG403	Manage organic soil improvement
AHCPHT410	Develop harvesting and processing specifications to produce an olive oil
AHCPHT412	Manage mushroom substrate preparation
AHCPHT413	Oversee vineyard practices
AHCPHT414	Assess olive oil for style and quality
AHCPHT415	Control Phase II mushroom substrate process
AHCPHT416	Manage mushroom crop development
AHCSOL406	Sample soils and interpret results
AHCSOL407	Develop a soil use map for a property
AHCWRK402	Provide information on issues and policies
BSBMKG431	Assess marketing opportunities

Qualification Description

This qualification allows individuals to develop post-trade skills and knowledge across a broad coverage of the industry prior to undertaking higher level roles in the industry.

No licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 1 core units plus
 - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- select 7 units from elective list below
- 4 units aligned to AQF level 3, 4 or 5 may be selected from electives below or from this or any other endorsed Training Package or Accredited Course

- Selected units must be relevant to job outcomes in horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4.

Core Units

AHCWHS401	Maintain work health and safety processes
-----------	---

Elective Units

AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCCHM403	Prepare safe operating procedures for calibration of equipment
AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
AHCIRG435	Determine hydraulic parameters for an irrigation system
AHCIRG436	Implement an irrigation-related environmental protection program
AHCIRG437	Schedule irrigations
AHCIRG442	Supervise irrigation system installation
AHCIRG445	Manage surface irrigation systems
AHCLSC401	Supervise landscape project works
AHCMER401	Coordinate customer service and networking activities
AHCMOM401	Conduct major repair and overhaul of machinery and equipment
AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCNAR401	Supervise natural area restoration works
AHCNAR402	Plan the implementation of revegetation works
AHCNSY401	Plan a growing-on program

AHCNSY402	Plan a propagation program
AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCPCM401	Recommend plants and cultural practices
AHCPCM402	Develop a soil health and plant nutrition program
AHCPGD401	Design plant displays
AHCPGD402	Plan a plant establishment program
AHCPMG409	Implement a pest management plan
AHCPMG410	Implement the pest monitoring and evaluation plan
AHCPMG411	Ensure compliance with pest legislation
AHCSOL401	Sample soils and interpret results
AHCTRF403	Develop a sports turf maintenance program
AHCTRF404	Plan and implement sports turf renovation
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance
BSBDES403	Develop and extend design skills and practice
BSBHRM405	Support the recruitment, selection and induction of staff
BSBITU404	Produce complex desktop published documents
BSBPMG417	Apply project life cycle management processes
BSBREL402	Build client relationships and business networks
BSBRES411	Analyse and present research information
BSBSMB421	Manage small business finances
CUAACD303	Produce technical drawings

SIRXINV004A	Buy merchandise
TLIR4002	Source goods/services and evaluate contractors

AHC40620 Certificate IV in Nursery Operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for supervisory/managerial job roles in the nursery industry including integrated pest manager, production nursery irrigation manager, dispatch manager, head grower, sales manager, site manager, quality assurance manager, retail nursery stock supervisor, sales manager, green life buyer, nursery manager and merchandiser.

Individuals with this qualification perform tasks involving technical skills, problem solving and supervisory skills to operate, monitor and improve performance of nursery systems and may supervise nursery staff.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

To commence this qualification, individuals must demonstrate they have skills and knowledge in the application of:

- cultivating, growing and harvesting/production skills for a variety of plant types, including pest and disease control
- technology and equipment that apply in a production nursery or retail nursery workplace
- health and safety, pest management and biosecurity processes and regulations that apply in a production nursery or retail nursery workplace

The skills and knowledge may have been acquired through completion of a Certificate III or higher qualification relating to nursery or horticulture, or industry experience.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:

- 4 core units plus
- 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

For the award of the *Certificate IV in Nursery Operations* choose:

- at least 7 units from groups A, B or C
- up to 3 units from the remaining units listed in groups A, B or C or any currently endorsed Training Package or accredited course.

For the award of the *Certificate IV in Nursery Operations (Nursery Production)* choose:

- at least 4 units from group A
- up to 3 units from the remaining units listed in groups A, B or C
- up to 3 units from the remaining units listed in groups A, B or C, or any currently endorsed Training Package or accredited course packaged at Certificate IV or Diploma.

For the award of the *Certificate IV in Nursery Operations (Retail Nursery)* choose:

- at least 4 units from group B
- up to 3 units from the remaining units listed in groups A, B or C
- up to 3 units from the remaining units listed in groups A, B or C, or any currently endorsed Training Package or accredited course packaged at Certificate IV or Diploma.

Where two specialisations are completed, award of the qualification would read (for example), *Certificate Certificate IV in Nursery Operations (Nursery Production, Retail Nursery)*

Core Units

AHCWHS401	Maintain work health and safety processes
AHCWRK403	Supervise work routines and staff performance
BSBHRM415	Coordinate recruitment and onboarding
BSBLDR414	Lead team effectiveness

Elective Units

Group A (nursery production)

AHCAGB302	Keep production records for a primary production business
AHCAGB405	Analyse and interpret production data
AHCPCM405	Implement an integrated pest management program

AHCNSY403	Plan a growing-on program
AHCNSY404	Plan a propagation program
AHCWRK401	Implement and monitor quality assurance procedures

Group B (retail nursery)

AHCMER408	Coordinate customer service and networking activities
AHCPCM404	Recommend plants and cultural practices
AHCPGD401	Design plant displays
AHCSOL405	Provide information on fertilisers and soil ameliorants
SIRRINV002	Control stock

Group C (electives)

AHCBER403	Plan and supervise control activities on infected premises
AHCBER404	Conduct field surveillance for a biosecurity emergency response
AHCBIO401	Plan and implement a biosecurity program
AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCBUS409	Participate in an e-business supply chain
AHCBUS512	Develop and implement family business structures and relationships
AHCBUS517	Monitor and review business performance
AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
AHCIRG437	Schedule irrigations
AHCMOM402	Supervise maintenance of property, machinery and

	equipment
AHCPCM406	Develop a soil health and plant nutrition program
AHCPCM507	Diagnose plant health problems
AHCPHT511	Develop a horticultural production plan
AHCPMG401	Implement the pest monitoring and evaluation plan
BSBFIN401	Report on financial activity
BSBMKG431	Assess marketing opportunities
BSBTWK401	Build and maintain business relationships
BSBOPS403	Apply business risk management processes
BSBESB407	Manage finances for new business ventures
BSBSUS411	Implement and monitor environmentally sustainable work practices
SIRRMER003	Coordinate visual merchandising activities
SIRXMKT002	Use social media to engage customers
SIRXRSK002	Maintain store security

AHC40920 Certificate IV in Conservation and Ecosystem Management

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.1.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification has the practical skills and theoretical knowledge required for specialised or skilled work in the conservation and ecosystem management industry.

The qualification provides for advanced skills and/or supervisory roles in a broad range of conservation and ecological work or can focus on areas of specific needs including:

- supervisory and management
- indigenous land management
- ecosystem management
- pest controller
- fire management.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 2 core unit plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 3 units must be selected from Group A
- remaining units may be selected from Group A or B or C and up to 4 units may be selected from any currently endorsed Training Package or accredited course
- Elective Group C can only be selected if required as a prerequisite.

Where First Aid training is required, the current unit must be imported using the import rules above.

Core Units

AHCECR308	Conduct a site inspection for ecological restoration
AHCWHS401	Maintain work health and safety processes

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

AHCECR401	Supervise ecological restoration works
AHCECR402	Plan the implementation of revegetation works
AHCBUS407	Cost a project
AHCCCF402	Report on project
AHCILM401	Protect places of cultural significance
AHCILM402	Report on place of potential cultural significance
AHCILM403	Contribute to the proposal for a negotiated outcome for a given area of Country
AHCLPW408	Implement land and sea management practices
AHCLPW409	Inspect and monitor culturally significant places
AHCLPW410	Produce maps for land management purposes
AHCLPW406	Supervise the monitoring of biodiversity
AHCPMG409	Implement a pest management plan

AHCPMG410	Implement the pest monitoring and evaluation plan
AHCPMG412	Develop a pest management plan
AHCPMG413	Define the pest problem
AHCSAW402	Set out conservation earthworks
AHCSAW404	Supervise implementation of conservation earthworks plans
AHCWRK403	Supervise work routines and staff performance
MSS024020	Recognise common geological landforms and samples
PUAFIR402*	Conduct simple prescribed burns

Group B

AHCBER403	Plan and supervise control activities on infected premises
AHCBER404	Conduct field surveillance for a biosecurity emergency response
AHCBIO401	Plan and implement a biosecurity program
AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCCCF401	Prepare project acquittal
AHCCCF402	Report on project
AHCCCF403	Obtain and manage sponsorship
AHCCCF404	Contribute to association governance
AHCCCF405	Develop community networks
AHCCCF406	Facilitate ongoing group development
AHCCCF407	Obtain resources from community and groups
AHCCCF408	Promote community programs
AHCCCF409	Participate in assessments of project submissions

AHCCCF410	Support individuals in resource management change processes
AHCCCF411	Develop approaches to include cultural and human diversity
AHCCCF415	Coordinate social events to support group purposes
AHCCCF416	Present proposed courses of action to meeting
AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
AHCILM404	Record and document Community history
AHCILM405	Develop work practices to accommodate cultural identity
AHCLPW406	Supervise the monitoring of biodiversity
AHCLPW407	Process applications for changes in land use
AHCLPW410	Produce maps for land management purposes
AHCLSC401	Supervise landscape project works
AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCPCM401	Recommend plants and cultural practices
AHCPGD402	Plan a plant establishment program
AHCPMG411	Ensure compliance with pest legislation
AHCPMG507	Develop a regional pest management plan
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCPMG509	Investigate a pest control failure
AHCSAW402	Set out conservation earthworks
AHCSAW404	Supervise implementation of conservation earthworks plans
AHCSOL409	Supervise acid sulphate soil remediation and

	management projects
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance
BSBLDR414	Lead team effectiveness
BSBPMG428	Apply project life cycle management processes
BSBINS401	Analyse and present research information
CHCCDE002	Develop and implement community programs
FWPFGM3201	Manage seed collection
LGACOM502 B	Devise and conduct community consultations
LGAPLEM508 A	Manipulate and analyse data within geographic information systems
MSL913004	Plan and conduct laboratory/field work
MSMSUP280	Manage conflict at work
PSPPCY004	Support policy implementation
PUACOM012	Liaise with media at a local level
PUAFIR203*	Respond to urban fire*
PUAFIR204*	Respond to wildfire
PUAFIR207*	Operate breathing apparatus open circuit
PUAFIR210	Prevent injury
PUAFIR302*	Suppress urban fire*
PUAFIR303*	Suppress wildfire*
PUAFIR402*	Conduct simple prescribed burns*
PUALAW001	Protect and preserve incident scene
PUAOPE015	Conduct briefings and debriefings

PUAOPE016*	Manage a multi-team sector*
SFICRO401	Manage minor crocodile incidents in the wild
SFICRO403	Capture, transport and release crocodiles
SITTGDE007	Research and share general information on Australian Indigenous cultures
SITTGDE008	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE010	Prepare specialised interpretive content on cultural and heritage environments
SITTPPD002	Develop interpretive activities
SITXCCS002	Provide visitor information
TAEDEL301	Provide work skill instruction
TLIR4002	Source goods/services and evaluate contractors

Group C Prerequisite Unit

HLTAID011	Provide First Aid
-----------	-------------------

Prerequisite requirements

Note: Units listed in the Prerequisite requirement column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	Prerequisite requirement
PUAFIR203 Respond to urban fire	PUAFIR207 Operate breathing apparatus open circuit*
PUAFIR204 Respond to wildfire	PUAFIR210 Prevent injury
PUAFIR207 Operate breathing apparatus open circuit	PUAFIR210 Prevent injury

AHC41019 Certificate IV in Agribusiness

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification reflects the role of workers who are responsible for the administration and day to day business operations of an agricultural or horticultural production enterprise.

At this level, workers may be required to supervise and lead other workers or teams and be involved in some decision-making. Work may take place in a range of industry sectors and in complex, regularly changing environments.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 3 core units plus
 - 9 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 7 units from the elective list
- up to 2 units from this or any other endorsed Training Package or Accredited Course.

Core Units

AHCAGB405	Analyse and interpret production data
-----------	---------------------------------------

AHCAGB406	Keep financial records for primary production business
AHCWHS401	Maintain work health and safety processes

Elective Units

AHCAGB302	Keep production records for a primary production business
AHCAGB404	Plan and implement infrastructure improvements
AHCBAC408	Manage agricultural crop production
AHCBIO403	Plan and implement a farm or enterprise biosecurity plan
AHCBUS406	Administer finance, insurance and legal requirements
AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCBUS409	Participate in an e-business supply chain
AHCBUS512	Develop and implement family business structures and relationships
AHCCFP301	Identify the effects of climate change as a factor in land management
AHCCFP401	Increase soil organic carbon using land management practices
AHCCFP403	Identify opportunities and risks in carbon farming projects
AHCCFP404	Plan a land-based carbon farming project
AHCCFP405	Increase carbon using vegetation and/or agricultural approaches
AHCLSK501	Manage livestock production
AHCORG404	Arrange selling through community based marketing
AHCPMG411	Ensure compliance with pest legislation
AHCSHG407	Prepare shearing team wages

AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance
BSBCM401	Make a presentation
BSBFIA412	Report on financial activity
BSBHRM405	Support the recruitment, selection and induction of staff
BSBINM401	Implement workplace information system
BSBITU404	Produce complex desktop published documents
BSBLDR403	Lead team effectiveness
BSBPMG417	Apply project life cycle management processes
BSBRES411	Analyse and present research information
BSBRK401	Identify risk and apply risk management processes
BSBSMB420	Evaluate and develop small business operations
BSBSMB421	Manage small business finances
MSL913004	Plan and conduct laboratory/field work
MSMSUP280	Manage conflict at work
PSPPCY004	Support policy implementation
TAEASS301	Contribute to assessment
TAEDEL301	Provide work skill instruction
TAEDEL404	Mentor in the workplace

AHC41119 Certificate IV in Irrigation Management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for supervisory and management job roles in the irrigation industry

Individuals with this qualification perform tasks involving technical skills, problem solving and supervisory skills to operate, monitor and improve performance of irrigation systems and supervise the installation of irrigation systems.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 8 core units plus
 - 4 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 must be from the electives list below
- 2 from the remaining electives listed below or any other currently endorsed Training Package or accredited course.

Core Units

AHCIRG435	Determine hydraulic parameters for an irrigation system
AHCIRG436	Implement an irrigation-related environmental protection program
AHCIRG437	Schedule irrigations
AHCIRG438	Select and manage pumping systems for irrigation
AHCIRG439	Interpret and apply irrigation designs
AHCIRG442	Supervise irrigation system installation
AHCIRG443	Supervise irrigation system maintenance
AHCWHS401	Maintain work health and safety processes

Elective Units

AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCDRG403	Coordinate and supervise installation of an irrigation drainage system
AHCDRG404	Monitor and control irrigation drainage systems
AHCINF304	Install and terminate extra low voltage wiring systems
AHCIRG337	Measure irrigation delivery system performance
AHCIRG440	Manage a moving sprinkler irrigation system
AHCIRG441	Evaluate water supply for irrigation
AHCIRG444	Manage irrigation systems
AHCIRG445	Manage surface irrigation systems
AHCMER408	Coordinate customer service and networking activities
AHCIRG446	Provide irrigation sales and service
AHCSOL406	Sample soils and interpret results

AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK403	Supervise work routines and staff performance
AHCWRK405	Implement and monitor environmentally sustainable work practices
BSBHRM415	Coordinate recruitment and onboarding
BSBLDR414	Lead team effectiveness
BSBOPS402	Coordinate business operational plans
BSBINS401	Analyse and present research information
BSBINS309	Maintain business records
BSBINS410	Implement records systems for small business
BSBESB407	Manage finances for new business ventures
BSBPEF402	Develop personal work priorities
BSBWRT411	Write complex documents
ICTICT402	Determine project specifications and secure client agreement
NWPIRR033	Coordinate and monitor the operation of irrigation delivery systems
NWPTRT028	Operate and control reclaimed water irrigation
TAEASS301	Contribute to assessment
TAEDEL301	Provide work skill instruction

AHC41316 Certificate IV in Wool Classing

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification is a specialist wool classing qualification for wool classers and enables them to apply for registration with AWEX Ltd. as a professional Australian wool classer.

This qualification is suitable for an Australian Apprenticeship.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 core units of competency.

Core Units

First Aid

HLTAID011	Provide First Aid
-----------	-------------------

Wool

AHCWOL301	Appraise wool using industry descriptions
AHCWOL303	Prepare wool based on its characteristics
AHCWOL304	Prepare fleece wool for classing
AHCWOL305	Prepare skirtings and oddments

AHCWOL307	Document a wool clip
AHCWOL310	Press wool for a clip
AHCWOL311	Perform shed duties
AHCWOL401	Determine wool classing strategies
AHCWOL403	Plan, implement and review wool harvesting and clip preparation
AHCWOL404	Establish work routines and manage wool harvesting and preparation staff
AHCWOL405	Class fleece wool

Work

AHCWRK401	Implement and monitor quality assurance procedures
-----------	--

Work health and safety

AHCWHS401	Maintain work health and safety processes
-----------	---

AHC41616 Certificate IV in Organic Farming

Modification History

Release	Comments
Release 5	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1
Release 4	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification allows individuals to develop skills and knowledge within the organic farming and general agriculture industry. It is designed to meet the needs of supervisors or team leaders working in the organic agriculture industry.

This qualification is suitable for people currently working or who wish to find employment on an organic farming enterprise.

Job roles and titles will vary. Possible job titles relevant to this Qualification include:

- Organic farm team leader
- Organic farm supervisor
- Organic farmer.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 1 core unit plus
 - 11 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 4 units from Group A
- Select 5 units from Group A or Group B
- 2 units aligned to AQF levels 3, 4, or 5 may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4.

Core Units

AHCWHS401	Maintain work health and safety processes
-----------	---

Elective Units

Group A

Business

BSBSMB420	Evaluate and develop small business operations
-----------	--

Organic farming

AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCORG404	Arrange selling through community based marketing
AHCORG405	Implement sustainable practices in the organic farm based business
AHCORG406	Oversee compliance with an organic certification scheme
AHCORG408	Manage on farm composting

Pest management

AHCPMG410	Implement the pest monitoring and evaluation plan
-----------	---

Group B**Agribusiness**

AHCAGB404	Plan and implement infrastructure improvements
AHCAGB405	Analyse and interpret production data

Beekeeping

AHCBEK301	Manage honey bee swarms
AHCBEK313	Manage pests and disease within a honey bee colony

Biosecurity

AHCBIO403	Plan and implement a farm or enterprise biosecurity plan
-----------	--

Broadacre cropping

AHCBAC401	Manage pastures for livestock production
AHCBAC402	Plan a pasture establishment program
AHCBAC403	Supervise agricultural crop establishment
AHCBAC404	Plan and implement agricultural crop maintenance
AHCBAC405	Supervise agricultural crop harvesting

Business

AHCBUS406	Administer finance, insurance and legal requirements
AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCBUS409	Participate in an e-business supply chain

BSBRK401	Identify risk and apply risk management processes
BSBSMB421	Manage small business finances

Chemicals

AHCCHM405	Plan and implement a chemical use program
-----------	---

Irrigation

AHCIRG435	Determine hydraulic parameters for an irrigation system
AHCIRG436	Implement an irrigation-related environmental protection program
AHCIRG437	Schedule irrigations

Livestock

AHCLSK402	Develop livestock feeding plans
AHCLSK404	Implement and monitor animal welfare programs
AHCLSK405	Implement intensive production systems
AHCLSK406	Oversee animal marking operations
AHCLSK407	Plan and monitor intensive production systems
AHCLSK409	Supervise animal health programs
AHCLSK411	Supervise natural mating of livestock
AHCLSK412	Arrange livestock purchases
AHCLSK414	Arrange transport for farm produce or livestock
AHCLSK416	Identify and select animals for breeding

Nursery

AHCNSY402	Plan a propagation program
-----------	----------------------------

Production horticulture

AHCPHT402	Develop a crop regulation program
AHCPHT404	Implement and monitor a horticultural crop harvesting program

Soils and media

AHCSOL401	Sample soils and interpret results
AHCSOL402	Develop a soil use map for a property

Work

AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK403	Supervise work routines and staff performance

AHC41720 Certificate IV in Pest Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification provides occupation outcomes for supervisors and senior field officers in the pest management sector. The qualification covers those who work in weed management as well as vertebrate pest management in a range of settings including conservation, land management, agriculture, horticulture and parks and gardens.

Supervisors and senior field officers may undertake the following job functions:

- preparing and carrying out pest management programs
- participating in strategic invasive species management practices
- completing and assessing pest management programs.

Some job functions covered by this qualification may require occupational licencing or certification. Specific determination should be sought through the relevant State or Territory agency.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 4 core units plus
 - 8 elective units.

Elective units must ensure the integrity of the qualification s Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 3 units from Group A
- remaining units may be selected from Group A, Group B and a maximum of 2 units may be selected from Certificate III or above of this or any other endorsed Training Package or accredited course.

Selected units must be relevant to job outcomes in pest management and must be chosen to ensure the integrity of the qualification outcome at AQF level 4.

Core Units

AHCPMG409	Implement a pest management plan
AHCPMG412	Develop a pest management plan
AHCPMG413	Define the pest problem
AHCWHS401	Maintain work health and safety processes

Elective Units

Group A

AHCBER404	Conduct field surveillance for a biosecurity emergency response
AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
AHCPMG401	Implement the pest monitoring and evaluation plan
AHCPMG402	Ensure compliance with pest legislation
BSBPMG429	Apply project stakeholder engagement techniques

Group B

AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCCCF405	Develop community networks
AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCECR306	Conduct photography for fieldwork
AHCPCM510	Collect and classify plants

AHCPMG305	Survey pests
AHCPMG306	Determine pest control techniques
AHCPMG307	Apply animal trapping techniques
AHCPMG309	Apply pest animal control techniques
AHCPMG312	Apply poison baits for vertebrate pest control in rural and environmental landscapes
AHCPMG403	Apply predator trapping techniques
AHCWRK403	Supervise work routines and staff performance
BSBPMG428	Apply project life cycle management processes
CHCCDE002	Develop and implement community programs
FWPCOT3202	Navigate in remote or trackless areas
FWPCOT3259	Operate a four wheel drive on unsealed roads
HLTAID011	Provide first aid
HLTAID013	Provide first aid in remote or isolated site
LGACOM404 B	Establish cooperative arrangements with other organisations
PSPREG003	Apply regulatory powers
PSPREG008	Act on non-compliance
TLIR4002	Source goods/services and evaluate contractors

AHC42021 Certificate IV in Landscape Construction Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for supervisory/managerial job roles in the landscape industry including leading hand, foreman, site supervisor, landscape builder and construction manager.

Individuals with this qualification perform tasks involving technical skills, problem solving and supervisory skills to operate, monitor and improve performance of landscape systems and projects, and may supervise staff.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

State/territory licensing, legislative or certification requirements apply in some jurisdictions. Users are advised to check with the relevant regulatory authority.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 2 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 1 must be from electives group A
- 6 must be from the electives group B

- 3 from the remaining elective units, or any currently endorsed Training Package or accredited course.

Core Units

AHCBUS407	Cost a project
AHCLSC404	Supervise landscape project works

Elective Units

Group A

AHCWHS401	Maintain work health and safety processes
CPCCB4002	Manage work health and safety in the building and construction workplace

Group B

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCBUS408	Operate within a budget framework
AHCCCF402	Report on project
AHCCHM405	Plan and implement a chemical use program
AHCECR401	Supervise ecological restoration works
AHCGRI301	Maintain roof gardens, vertical gardens and green facades
AHCGRI401	Construct roof gardens
AHCGRI402	Construct vertical gardens and green facades
AHCGRI501	Design roof gardens
AHCGRI502	Design vertical gardens and green facades
AHCIRG442	Supervise irrigation system installation
AHCLSC402	Apply building codes and standards to the construction process for Class 10 buildings

AHCLSC403*	Apply structural principles to Class 10 buildings
AHCLSC505	Manage landscape projects
AHCMER301	Process customer complaints
AHCMER408	Coordinate customer service and networking activities
AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCPCM303	Identify plant specimens
AHCPCM404	Recommend plants and cultural practices
AHCPGD403	Design plant displays
AHCPGD404	Plan a plant establishment program
AHCSOL406	Sample soils and interpret results
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance
BSBESB401	Research and develop business plans
BSBESB407	Manage finances for new business ventures
BSBHRM415	Coordinate recruitment and onboarding
BSBINS401	Analyse and present research information
BSBINS410	Implement records systems for small business
BSBLDR414	Lead team effectiveness
BSBOPS402	Coordinate business operational plans
BSBPEF402	Develop personal work priorities
BSBWRT411	Write complex documents
CPCCBBC4001	Apply building codes and standards to the construction process for Class 1 and 10 buildings
CPCCBBC4003	Select, prepare and administer a construction contract

CPCCBC4004	Identify and produce estimated costs for building and construction projects
CPCCBC4005	Produce labour and material schedules for ordering
CPCCBC4006	Select, procure and store construction materials for building and construction projects
CPCCBC4008	Supervise site communication and administration processes for building and construction projects
CPCCBC4009	Apply legal requirements to building and construction projects
CPCCBC4010*	Apply structural principles to residential and commercial constructions
CPCCBC4012	Read and interpret plans and specifications
CPCCBC4026	Arrange building applications and approvals
CPCCBC4053	Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings
CUAACD313	Produce technical drawings
TLIL3003	Conduct induction process
TLIR4002	Source goods/services and evaluate contractors

Prerequisite requirements

AHCLSC403 Apply structural principles to Class 10 buildings	AHCLSC402 Apply building codes and standards to the construction process for Class 10 buildings
CPCCBC4010 Apply structural principles to residential and commercial constructions	CPCCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings

AHC42116 Certificate IV in Permaculture

Modification History

Release	Comments
Release 4	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification relates to individuals who work as project supervisors and designers for private clients or organisations. They require high level permaculture design skills, and knowledge in a broad range of areas in keeping with permaculture's multi-disciplinary nature. They may be involved in supervising individuals and teams of people on urban and rural work sites and in community projects.

The qualification is suited to learners who wish to work at the supervisory level within permaculture design projects, and may involve the supervision of others and working with people of diverse backgrounds and abilities.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 5 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 1 units from Group A
- Select 4 units from Group B
- Select 2 units from Group B or C or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4.

Core Units

AHCPER401	Provide advice on permaculture principles and practices
AHCPER404	Plan and implement permaculture works
AHCPER405	Select appropriate technology for a permaculture system
AHCPER406	Identify and analyse bioregional characteristics and resources
AHCPER413	Evaluate suitability of species as solutions for permaculture applications

Elective Units

Group A

AHCPER402	Design a rural permaculture system
AHCPER403	Design an urban permaculture system

Group B

AHCPER307	Establish a rural permaculture system
AHCPER308	Establish an urban permaculture system
AHCPER402	Design a rural permaculture system
AHCPER403	Design an urban permaculture system
AHCPER407	Design harvesting and storage systems for permaculture products

AHCPER408	Implement and monitor animal health and welfare programs for a permaculture system
AHCPER409	Manage a permaculture seed bank
AHCPER410	Recommend approaches for sustainable community and bioregional development
AHCPER411	Operate within a sustainable community and bioregional development program

Group C

AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCCCF405	Develop community networks
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCORG404	Arrange selling through community based marketing
AHCSAW401	Set out conservation earthworks
AHCSOL402	Develop a soil use map for a property
TAEDEL301	Provide work skill instruction

AHC42320 Certificate IV in Medicinal Cannabis Cultivation and Production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification reflects the role of individuals who work at the supervisory or managerial level in the cultivation and production sector of the medicinal cannabis industry. In this role, these individuals are responsible for ensuring workplace processes and operations comply with the legislative, regulatory and quality requirements of a controlled growing, licensed medicinal cannabis site. They also use their knowledge and skills to plan for future work activities, solve problems, and take responsibility for others.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
 - 6 core units plus
 - 9 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 5 units must be selected from the elective units listed below
- the remaining 4 units may be selected from the elective units listed below or any currently endorsed Training Package or accredited course.

Core Units

AHCMDC401	Apply security measures for medicinal cannabis
-----------	--

AHCMDC402	Monitor medicinal cannabis production for compliance and quality
AHCMDC403	Plan and implement a propagation program for medicinal cannabis
AHCMDC404	Plan and implement a care and maintenance program for medicinal cannabis
AHCMDC405	Plan and implement a harvest and pre-processing program for medicinal cannabis
AHCWHS401	Maintain work health and safety processes

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCBIO401	Plan and implement a biosecurity program
AHCNSY404	Plan a propagation program
AHCPCM507	Diagnose plant health problems
AHCPHT512	Manage a controlled growing environment
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK403	Supervise work routines and staff performance
BSBLDR414	Lead team effectiveness
BSBOPS403	Apply business risk management processes
FBPPHM3003	Work in a controlled environment
FBPPHM4001	Monitor and maintain Good Manufacturing Practice requirements
FBPPHM4002	Prepare and review workplace documentation to support Good Manufacturing Practice requirements
FBPPHM4003	Facilitate contamination control
FBPPHM4005	Participate in validation of pharmaceutical manufacturing processes

FBPPHM4006	Respond to non-conformance
FBPOPR4001	Apply principles of statistical process control
MSL924003	Process and interpret data
MSL973013	Perform basic tests
MSL973016	Perform aseptic techniques
MSL974025*	Prepare tissue and cell cultures
MSL975033*	Perform tissue and cell culture techniques
TLIL5019	Implement and monitor transport logistics
TLIO5017	Manage security of storage facilities
TLIR4002	Source goods/services and evaluate contractors

Prerequisite requirements

Unit of competency	Prerequisite requirement
MSL974025 Prepare tissue and cell cultures	MSL973016 Perform aseptic techniques
MSL975033 Perform tissue and cell culture techniques	MSL973016 Perform aseptic techniques

AHC42421 Certificate IV in Landscape Design

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for entry level design job roles in the landscape design industry.

Individuals with this qualification perform tasks involving technical skills and problem solving to monitor and improve performance of landscape design projects.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
 - 7 core units plus
 - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 units must be from group A
- 1 unit must be from the remaining units listed in groups A or B
- 3 units must be from the remaining units listed in groups A or B, or any currently endorsed Training Package or accredited course.

Core Units

AHCDES401	Apply construction techniques to landscape design
AHCDES402	Apply sustainability principles to landscape design
AHCDES403	Develop landscape designs
AHCDES404	Prepare simple landscape drawings
AHCPCM404	Recommend plants and cultural practices
CUAACD312	Produce computer-aided drawings
CUADES305	Source and apply information on the history and theory of design

Elective Units

Group A

AHCDES405	Produce 2-D landscape drawings using CAD software
AHCPCM303	Identify plant specimens
AHCSOL304	Implement soil improvements for garden and turf areas
AHCWHS401	Maintain work health and safety processes

Group B

AHCBUS407	Cost a project
AHCBUS408	Operate within a budget framework
AHCGRI501	Design roof gardens
AHCGRI502	Design vertical gardens and green facades
AHCIRG342	Interpret irrigation plans and drawings
AHCLSC404	Supervise landscape project works
AHCPCM306	Provide information on plants and their culture
AHCPGD403	Design plant displays
AHCPGD404	Plan a plant establishment program

AHCSOL406	Sample soils and interpret results
AHCTHH401	Develop a therapeutic horticulture design brief
BSBCRT413	Collaborate in creative processes
BSBESB401	Research and develop business plans
BSBESB402	Establish legal and risk management requirements of new business ventures
BSBESB407	Manage finances for new business ventures
BSBSTR301	Contribute to continuous improvement
BSBSTR401	Promote innovation in team environments
BSBTWK401	Build and maintain business relationships
CUAACD313	Produce technical drawings
CUADES413	Develop and extend design skills and practice

Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification reflects the role of personnel working on farms and stations who manage enterprise production units and employees and sole operators of agribusinesses who provide crop production advice and services to production enterprises.

Industry expects individuals with this qualification will take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

Job roles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Farm production manager
- Production unit manager
- Agronomist
- Station/property manager.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 0 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 5 units from Group A
- Select 3 units from Group A or Group B
- 2 units aligned to AQF level 4 or above may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5.

Elective Units

Group A

Agribusiness

AHCAGB513	Develop a farm plan
AHCAGB518	Develop climate risk management strategies

Broadacre cropping

AHCBAC417	Manage agricultural crop production
AHCBAC509	Plan and manage long-term weed, pest and disease control in crops
AHCBAC510	Manage integrated crop and pasture production
AHCBAC511	Plan and manage a stored grain program
AHCBAC512	Develop production plans for crops or pastures

AHCBAC513	Apply plant biology to agronomic practices
AHCBAC515	Manage forage conservation
AHCBAC516	Manage the harvest of crops

Business

AHCBUS511	Manage enterprise staff requirements
AHCBUS513	Market products and services
AHCBUS516	Develop and review a business plan
AHCBUS517	Monitor and review business performance

Livestock

AHCLSK501	Manage livestock production
AHCLSK502	Arrange marketing of livestock
AHCLSK504	Develop livestock health and welfare strategies
AHCLSK508	Plan, monitor and evaluate strategies to improve livestock through genetics
AHCLSK509	Develop and implement a breeding strategy
AHCLSK510	Develop production plans for livestock

Organic production

AHCORG507	Develop an organic or biodynamic management plan
AHCORG508	Prepare the enterprise for organic or biodynamic certification

Soils and media

AHCSOL505	Monitor and manage soils for production
AHCSOL506	Manage erosion and sediment control

AHCSOL507	Develop and manage a plan to reclaim land affected by salinity
AHCSOL508	Manage soils to enhance sustainability

Work health and safety

AHCWHS502	Manage work health and safety processes
-----------	---

Group B

Agribusiness

AHCAGB512	Plan and manage infrastructure
AHCAGB514	Manage application of agents to crops or pastures
AHCAGB515	Develop sustainable agricultural practices that utilise renewable energy and recycling systems
AHCAGB516	Select and implement a GIS for sustainable agricultural systems
AHCAGB517	Develop and manage a plan for sustainable production
AHCAGB519	Plan and monitor production processes
AHCAGB520	Plan production for the whole business
AHCAGB521	Select and use agricultural technology
AHCAGB522	Implement the introduction of biotechnology into the production system
BSBPEF501	Manage personal and professional development

Business

AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCBUS518	Prepare and monitor budgets and financial reports
BSBFIM501	Manage budgets and financial plans

BSBHRM525	Manage recruitment and onboarding
BSBINS401	Analyse and present research information
BSBOPS504	Manage business risk
TLIL5019	Implement and monitor transport logistics
TLIR0004	Negotiate a contract
TLIR4002	Source goods/services and evaluate contractors

Chemicals

AHCCHM405	Plan and implement a chemical use program
AHCCHM501	Develop and manage a chemical use strategy

Drainage

AHCDRG502	Design drainage systems
-----------	-------------------------

Livestock

AHCLSK506	Design livestock effluent systems
-----------	-----------------------------------

Merchandising and sales

AHCMER502	Develop a sales strategy for rural products
-----------	---

Machinery operation and maintenance

AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system

Natural area restoration

AHCECR506	Develop and implement sustainable land use strategies
-----------	---

Organic production

AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement

Plants

AHCPCM513	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs
-----------	--

Shearing

AHCSHG405	Arrange employment for shearing operations
-----------	--

Water

AHCWAT503	Manage water systems
-----------	----------------------

Work

AHCWRK502	Collect and manage data
AHCWRK504	Assess new industry developments
AHCWRK509	Provide specialist advice to clients
AHCWRK511	Develop workplace policy and procedures for sustainability
AHCWRK512	Plan, implement and review a quality assurance program
AHCWRK505	Manage trial and research material

 - 5 core units plus
 - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 3 units from the electives listed below

- up to 2 units from the remaining electives listed below, or any other endorsed Training Package or accredited course packaged at Certificate IV, Diploma or Advanced Diploma.

Core Units

AHCBUS511	Manage enterprise staff requirements
AHCPCM507	Diagnose plant health problems
AHCPHT511	Develop a horticultural production plan
AHCWHS502	Manage work health and safety processes
AHCWRK512	Plan, implement and review a quality assurance program

Elective Units

AHCBER503	Manage active operational emergency disease or pest sites
AHCBER504	Manage the implementation of a biosecurity emergency control program
AHCBUS513	Market products and services
AHCBUS514	Negotiate and monitor contracts
AHCBUS516	Develop and review a business plan
AHCBUS517	Monitor and review business performance
AHCBUS518	Prepare and monitor budgets and financial reports
AHCCHM501	Develop and manage a chemical use strategy
AHCDRG502	Design drainage systems
AHCHYD501	Develop a plan for a hydroponic system
AHCIRG506	Design irrigation systems
AHCIRG508	Design irrigation system maintenance and monitoring programs
AHCIRG509	Develop an irrigation and drainage management plan
AHCMOM501	Manage machinery and equipment

AHCMOM502	Implement a machinery management system
AHCORG507	Develop an organic or biodynamic management plan
AHCORG508	Prepare the enterprise for organic or biodynamic certification
AHCPCM513	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs
AHCPHT512	Manage a controlled growing environment
AHCSOL505	Monitor and manage soils for production
AHCSOL506	Manage erosion and sediment control
AHCSOL507	Develop and manage a plan to reclaim land affected by salinity
AHCSOL508	Manage soils to enhance sustainability
AHCWAT503	Manage water systems
AHCWAT504	Design water treatment systems
BSBOPS504	Manage business risk
TLIL5019	Implement and monitor transport logistics
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract

AHC50416 Diploma of Horticulture

Modification History

Release	Comments
Release 4	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0.
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

The Diploma of Horticulture reflects the role of those who manage amenity horticultural enterprises where a range of skills and knowledge across the breadth of the industry is required or personnel working in horticulture at a level requiring higher technical skills.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 0 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 8 units must be selected from the electives listed below
- 2 units may be selected from the remaining elective units listed below

- 2 units, packaged in qualifications aligned to AQF level 4 or above, may be selected from this or any other currently endorsed Training Package or Accredited Course.

Elective Units

AHCARB508	Identify, select and specify trees
AHCARB509	Develop an arboricultural impact assessment report
AHCARB510	Specify and audit tree work
AHCARB513	Examine and assess trees
AHCARB514	Diagnose tree diseases
AHCBUS511	Manage enterprise staff requirements
AHCBUS513	Market products and services
AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCBUS518	Prepare and monitor budgets and financial reports
AHCCHM501	Develop and manage a chemical use strategy
AHCDES505	Prepare a landscape design
AHCDES508	Design sustainable landscapes
AHCDES509	Assess landscape sites
AHCHYD501	Develop a plan for a hydroponic system
AHCIRG506	Design irrigation systems
AHCIRG507	Audit irrigation systems
AHCIRG508	Design irrigation system maintenance and monitoring programs
AHCIRG509	Develop an irrigation and drainage management plan
AHCIRG510	Establish and maintain an irrigation-related environmental protection program
AHCLPW506	Develop a management plan for a designated area
AHCLSC504	Survey and establish site levels

AHCLSC505	Manage landscape projects
AHCLSC506	Manage a tree transplanting program
AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system
AHCPCM507	Diagnose plant health problems
AHCPCM510	Collect and classify plants
AHCPCM513	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs
AHCPGD506	Manage parks and reserves
AHCPGD507	Manage plant cultural practices
AHCPGD508	Plan the restoration of parks and gardens
AHCPGD509	Develop and implement a streetscape management plan
AHCPGD510	Conduct comprehensive inspection of park facilities
AHCPHT511	Develop a horticultural production plan
AHCPHT512	Manage a controlled growing environment
AHCPMG413	Define the pest problem
AHCPMG501	Develop a regional pest management plan
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCPMG510	Develop a pest survey strategy
AHCSOL505	Monitor and manage soils for production
AHCTRF505	Plan the establishment of sports turf playing surfaces
AHCWAT503	Manage water systems
AHCWAT504	Design water treatment systems
AHCWHS502	Manage work health and safety processes
AHCWRK502	Collect and manage data

AHCWRK504	Assess new industry developments
AHCWRK507	Implement professional practice
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations
AHCWRK511	Develop workplace policy and procedures for sustainability
AHCWRK512	Plan, implement and review a quality assurance program
AHCWRK513	Write and present reports
AHCWRK514	Manage trial and research material
BSBFIN501	Manage budgets and financial plans
BSBHRM525	Manage recruitment and onboarding
BSBINS401	Analyse and present research information
BSBPMG430	Undertake project work
CPPWMT4005	Implement waste management site safety plans
TLIL5019	Implement and monitor transport logistics
TLIR0004	Negotiate a contract
TLIR4002	Source goods/services and evaluate contractors

AHC50520 Diploma of Arboriculture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Qualification Description

This qualification describes the skills and knowledge for consulting arborists and tree managers.

Graduates with this qualification assess trees and produce reports and documentation attesting to the health and risks related to trees. They diagnose tree disorders and defects, document and communicate recommendations for tree establishment, canopy management, tree remediation, environmental and habitat development and tree removals, within a legislative and regulatory framework.

Legislation, regulations and by-laws relating to the establishment, treatment and removal of trees apply in some States and Territories.

Entry Requirements

To commence this qualification an individual must have achieved the following units of competency or their equivalent:

- AHCARB314 Implement a tree maintenance program
- AHCARB316 Perform pruning operations
- AHCARB323 Identify trees.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 8 core units plus
 - 2 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least one unit from the elective list

- one additional unit may be selected from the elective list, or from this or any other endorsed Training Package or Accredited Course that reflect outcomes at AQF level 4 or above.

Core Units

AHCARB408	Perform a ground-based tree defect evaluation
AHCARB508	Identify, select and specify trees
AHCARB509	Develop an arboricultural impact assessment report
AHCARB510	Specify and audit tree work
AHCARB511	Prepare arborist reports
AHCARB513	Examine and assess trees
AHCARB514	Diagnose tree diseases
AHCWRK508	Interpret legislation

Elective Units

AHCARB512	Generate tree plans using computer-aided design software
AHCBUS515	Prepare estimates, quotes and tenders
AHCNRM507	Manipulate and analyse data within geographic information systems
AHCPCM601	Develop and implement a plant health management strategy
AHCPGD504	Develop and implement a streetscape management plan
AHCWRK502	Collect and manage data
AHCWRK504	Assess new industry developments
AHCWRK505	Manage trial and research material
AHCWRK507	Implement professional practice
AHCWRK510	Audit site operations

AHCWRK511	Develop workplace policy and procedures for sustainability
BSBCOM602	Develop and create compliance requirements
BSBITU404	Produce complex desktop published documents
BSBMGT617	Develop and implement a business plan
CPPSIS5035	Obtain and validate spatial data
CPPSIS5064	Coordinate GIS data manipulation and analysis
LGAPLEM512 A	Provide geographic information systems data

AHC50621 Diploma of Landscape Design

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for landscape designer job roles in the landscape industry.

Individuals with this qualification will take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

State/territory licensing, legislative or certification requirements apply in some jurisdiction. Users are advised to check with the relevant regulatory authority.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 6 core units plus
 - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 must be from the electives listed below
- 3 from the remaining electives listed below or any currently endorsed Training Package or accredited course.

Core Units

AHCDES505	Prepare a landscape design
AHCDES506	Design for construction of landscape features
AHCDES507	Produce drawings for landscape design projects using CAD software
AHCDES508	Design sustainable landscapes
AHCDES509	Assess landscape sites
AHCPCM511	Specify plants for landscapes

Elective Units

AHCARB508	Identify, select and specify trees
AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCGRI401	Construct roof gardens
AHCGRI402	Construct vertical gardens and green facades
AHCGRI501	Design roof gardens
AHCGRI502	Design vertical gardens and green facades
AHCLSC504	Survey and establish site levels
AHCLSC505	Manage landscape projects
AHCPCM512	Design specialised landscape
AHCPER401	Provide advice on permaculture principles and practices
AHCPER403	Design an urban permaculture system
AHCPER404	Plan and implement permaculture works
AHCPER505	Plan and supervise the implementation of permaculture project works
AHCPGD508	Plan the restoration of parks and gardens
AHCWRK507	Implement professional practice

AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations
AHCWRK513	Write and present reports
CUAACD313	Produce technical drawings
CUADES511	Implement design solutions
CUADES512	Establish, negotiate and refine a design brief

Qualification Mapping Information

AHC50820 Diploma of Nursery Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge for specialist or managerial job roles in the nursery industry including site manager, head grower, crop manager, sales manager, marketing manager, garden centre manager, nursery manager and specialist consultants.

Individuals with this qualification will take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

To commence this qualification, individuals must demonstrate they have skills and knowledge in the application of:

- cultivating, growing and harvesting/production skills for a variety of plant types, including pest and disease control
- technology and equipment that apply in a production nursery or retail nursery workplace
- health and safety, pest management and biosecurity processes and regulations that apply in a production nursery or retail nursery workplace

The skills and knowledge may have been acquired through completion of a Certificate III or higher qualification relating to nursery or horticulture, or industry experience.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 7 core units plus
 - 3 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 1 unit must be from the electives listed below
- up to 2 units from the remaining electives listed below, or any other endorsed Training Package or accredited course packaged at Certificate IV or Diploma.

Core Units

AHCBUS511	Manage enterprise staff requirements
AHCPCM507	Diagnose plant health problems
AHCPCM508	Develop an integrated pest management program
AHCWAT503	Manage water systems
AHCWRK513	Write and present reports
BSBESB406	Establish operational strategies and procedures for new business ventures
BSBPMG430	Undertake project work

Elective Units

AHCBIO401	Plan and implement a biosecurity program
AHCCHM501	Develop and manage a chemical use strategy
AHCIRG507	Audit irrigation systems
AHCIRG508	Design irrigation system maintenance and monitoring programs
AHCMER502	Develop a sales strategy for rural products
AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system
AHCPCM509	Apply knowledge of plant physiology to horticultural practices
AHCPCM510	Collect and classify plants

AHCPHT511	Develop a horticultural production plan
AHCPHT512	Manage a controlled growing environment
AHCPMG413	Define the pest problem
AHCPMG501	Develop a regional pest management plan
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCPMG510	Develop a pest survey strategy
AHCSOL505	Monitor and manage soils for production
AHCSOL506	Manage erosion and sediment control
AHCSOL507	Develop and manage a plan to reclaim land affected by salinity
AHCSOL508	Manage soils to enhance sustainability
AHCWAT504	Design water treatment systems
AHCWHS502	Manage work health and safety processes
AHCWRK502	Collect and manage data
AHCWRK507	Implement professional practice
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations
AHCWRK512	Plan, implement and review a quality assurance program
AHCWRK514	Manage trial and research material
BSBOPS505	Manage organisational customer service
SIRRINV001	Receive and handle retail stock

AHC51019 Diploma of Sports Turf Management

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 6.2
Release 2	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 6.1
Release 1	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge for management roles in sports turf. Job roles include senior curators/arena managers, golf course superintendents, sports turf managers, racetrack managers, senior bowling greenkeepers and turf consultants.

It applies to individuals who are responsible for the management of sports turf facilities and who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in specific technical areas. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

To commence this qualification an individual must have:

- completed a Certificate III in Sports Turf Management or an equivalent turf management trade level qualification

or

- a certificate III level qualification in amenity horticulture combined with two years current work experience in a trade level role at a sports turf facility.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:

- 10 core units plus
- 4 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 units must be selected from the electives listed below
- up to 2 units may be selected from the remaining elective listed below or
- up to 2 units may be selected that reflect AQF level 4, 5 or 6 outcomes from this or any other currently endorsed Training Package or Accredited Course.

Core Units

AHCBUS511	Manage enterprise staff requirements
AHCBUS518	Prepare and monitor budgets and financial reports
AHCCHM501	Develop and manage a chemical use strategy
AHCIRG507	Audit irrigation systems
AHCPCM402	Develop a soil health and plant nutrition program
AHCPCM501	Diagnose plant health problems
AHCTRF505	Plan the establishment of sports turf playing surfaces
AHCTRF506	Manage sports turf renovation programs
AHCTRF507	Develop sports turf management programs
AHCTRF508	Manage sports turf facility assets

Elective Units

AHCAGB516	Select and implement a GIS for sustainable agricultural systems
AHCAGB518	Develop climate risk management strategies
AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCDRG502	Design drainage systems
AHCPCM601	Develop and implement a plant health management

	strategy
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCWHS502	Manage work health and safety processes
AHCWRK505	Manage trial and research material
AHCWRK511	Develop workplace policy and procedures for sustainability
BSBHRM506	Manage recruitment selection and induction processes
CHCMGT007	Work effectively with the Board of an organisation
CPCPPS5027A	Design irrigation systems
CUAACD302	Produce computer-aided drawings

AHC51120 Diploma of Conservation and Ecosystem Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification reflects the skills and knowledge required for skilled and paraprofessional work in conservation and ecosystem management. Workers with this qualification perform in operational managerial and/or technical positions often with specialist skills and knowledge in a range of sectors. Examples of areas of specialisation include:

- Indigenous land management
- ecosystem restoration, rehabilitation and renewal
- conservation works
- parks management and/or administration
- wildlife management
- marine and/or coastal management
- water and catchment management.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 0 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 4 units selected from Group A

- remaining 6 electives can be selected from Group A, Group B and 2 units can be selected from any currently endorsed Training Package or accredited course.

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A Electives

AHCASW501*	Survey and report on Aboriginal cultural sites
AHCECR501	Manage natural areas on a rural property
AHCECR502	Conduct biological surveys
AHCECR503	Design an ecological restoration project
AHCECR504	Manage implementation of ecological restoration programs
AHCECR505	Plan river restoration works
AHCECR506	Develop and implement sustainable land use strategies
AHCFIR503	Plan and evaluate burning for fuel, ecological and cultural resource management
AHCILM306	Follow Aboriginal cultural protocols
AHCILM501	Conduct field research into natural and cultural resources
AHCILM502	Develop conservation strategies for cultural resources
AHCILM503	Manage restoration of cultural places
AHCILM504	Develop strategies for Indigenous land or sea management
AHCILM505	Map relationship of business enterprise to culture and Country
AHCILM506	Operate within Community cultures and goals
AHCILM508	Propose a negotiated outcome for a given area of Country
AHCILM510*	Plan for successful cultural practice at work
AHCILM601	Manage cultural processes in an Indigenous organisation

AHCLPW506	Develop a management plan for a designated area
AHCLPW504	Assess land use applications for legislative compliance
AHCLPW507	Implement natural and cultural resource management plans
AHCLPW602	Coordinate the preparation of a regional resource management plan
AHCNRM512	Investigate suspected breaches of natural resource management legislation
AHCNRM605	Develop a monitoring, evaluation and reporting program
AHCNRM603	Implement a monitoring, evaluation and reporting program
AHCPCM510	Collect and classify plants
AHCPMG401	Implement the pest monitoring and evaluation plan
AHCPMG413	Define the pest problem
AHCPMG501	Develop a regional pest management plan
AHCPMG506	Manage the implementation of legislation
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCSAW504	Design control measures and structures
AHCSAW505	Plan erosion and sediment control measures
AHCSAW503	Plan conservation earthworks
LGAPLEM612 B	Protect heritage and cultural assets
MSS024020	Recognise common geological landforms and samples
NWPIRR005	Develop and review a surface water plan
NWPIRR006	Develop and review an irrigation system plan
NWPIRR007	Implement and coordinate a surface water plan
NWPSOU006	Develop and manage a flood plan

NWPSOU007	Implement and coordinate a catchment plan
SISXRES001	Conduct sustainable work practices in open spaces
SITTGDE001	Interpret aspects of local Australian Indigenous culture

Group B Electives

AHCBER504	Manage the implementation of a biosecurity emergency control program
AHCBUS511	Manage enterprise staff requirements
AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCBUS518	Prepare and monitor budgets and financial reports
AHCFAU501	Manage fauna populations
AHCFIR504	Manage wildfire hazard reduction programs
AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system
AHCNRM509	Develop a coastal rehabilitation strategy
AHCNRM510	Develop a water quality monitoring program
AHCNRM503	Support the implementation of waterways strategies
AHCNRM504	Interpret and report on catchment hydrology
AHCNRM505	Provide technical advice on sustainable catchment management
AHCNRM511	Plan and monitor works projects in catchments and waterways
AHCPGD503	Manage parks and reserves
AHCPGD505	Conduct comprehensive inspection of park facilities
AHCPMG412	Develop a pest management plan
AHCSOL506	Manage erosion and sediment control

AHCWHS502	Manage work health and safety processes
AHCWRK502	Collect and manage data
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK511	Develop workplace policy and procedures for sustainability
BSBPMG430	Undertake project work
BSBWHS513	Lead WHS risk management
BSBWHS518	Manage WHS hazards associated with maintenance and use of plant
CPPSIS5064	Coordinate GIS data manipulation and analysis
MSS025014*	Perform sampling and testing of contaminated sites
SITTPPD002	Develop interpretive activities
SITTPPD009	Develop environmentally sustainable tourism operations
TLIR4003	Negotiate a contract

Prerequisite requirements

Unit of competency	Prerequisite requirement
AHCASW501 Survey and report on Aboriginal cultural sites	AHCILM306 Follow Aboriginal cultural protocols
AHCILM510 Plan for successful cultural practice at work	AHCILM306 Follow Aboriginal cultural protocols
MSS025014 Perform sampling and testing of contaminated sites	MSS024020 Recognise common geological landforms and samples

AHC51216 Diploma of Community Coordination and Facilitation

Modification History

Release	Comments
Release 5	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.1.
Release 4	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification reflects the role of personnel working in community coordination and facilitation, which focuses on fostering, promoting and supporting community development, particularly in rural communities that are engaged in land management activities.

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Volunteer
- Project manager
- Community group leader/coordinator
- Regional coordinator.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 0 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select a minimum of 4 units from Group A
- Select a minimum of 4 units from Group A or Group B
- A maximum of 2 units may be selected from the elective list of any Certificate IV or above of this or any other endorsed Training Package or Accredited Course.

Selected units must be relevant to job outcomes in community coordination and facilitation and must be chosen to ensure the integrity of the qualification outcome at AQF level 5.

Elective Units

Group A

Community coordination and facilitation

AHCCCF501	Evaluate project submissions
AHCCCF502	Facilitate development of group goals and projects
AHCCCF503	Promote group formation and development
AHCCCF504	Support group and community changes in resource management
AHCCCF505	Contribute to regional planning process
AHCCCF506	Manage the incorporation of a group
AHCCCF601	Coordinate the development of regional plans

Group B

Business

AHCBUS511	Manage enterprise staff requirements
AHCBUS513	Market products and services
AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders

AHCBUS516	Develop and review a business plan
AHCBUS517	Monitor and review business performance
AHCBUS518	Prepare and monitor budgets and financial reports
BSBOPS503	Develop administrative systems
BSBINS401	Analyse and present research information
TLIL5019	Implement and monitor transport logistics
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract

Community coordination and facilitation

AHCCCF401	Prepare project acquittal
AHCCCF402	Report on project
AHCCCF403	Obtain and manage sponsorship
AHCCCF404	Contribute to association governance
AHCCCF405	Develop community networks
AHCCCF406	Facilitate ongoing group development
AHCCCF407	Obtain resources from community and groups
AHCCCF408	Promote community programs
AHCCCF409	Participate in assessments of project submissions
AHCCCF410	Support individuals in resource management change processes
AHCCCF411	Develop approaches to include cultural and human diversity
AHCCCF415	Coordinate social events to support group purposes
AHCCCF416	Present proposed courses of action to meeting
CHCCDE002	Develop and implement community programs

LGACOM502 B	Devise and conduct community consultations
----------------	--

Lands, parks and wildlife

AHCLPW506	Develop a management plan for a designated area
-----------	---

Natural resource management

AHCNRM605	Develop a monitoring, evaluation and reporting program
AHCNRM603	Implement a monitoring, evaluation and reporting program
PUACOM012	Liaise with media at a local level

Workplace Health and Safety

AHCWHS502	Manage work health and safety processes
-----------	---

Work

AHCWRK502	Collect and manage data
AHCWRK513	Write and present reports
AHCWRK504	Assess new industry developments
AHCWRK514	Manage trial and research material
AHCWRK507	Implement professional practice
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations
AHCWRK511	Develop workplace policy and procedures for sustainability
AHCWRK512	Plan, implement and review a quality assurance program

BSBPMG430	Undertake project work
-----------	------------------------

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification provides occupation outcomes for senior officers and managers in the pest management sector. These roles include functions such as planning, coordinating, managing and completing small to large scale pest management programs and may include participating in emergency operations such as disease outbreak or natural disasters.

The qualification is applicable to individuals who work in weed management as well as vertebrate pest management in a range of contexts, including conservation, land management, agriculture, horticulture, and parks and gardens.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 0 core units plus
 - 10 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select at least 5 Units from Group A
- Select at least 3 Units from Group A or Group B
- A maximum of 2 units may be selected from the elective list of a Certificate IV or above of this or any other endorsed Training Package or Accredited Course.

Selected units must be relevant to job outcomes in Conservation and Land Management and must be chosen to ensure the integrity of the qualification outcome at AQF level 5.

Elective Units

Group A

Natural area restoration

AHCECR502	Conduct biological surveys
-----------	----------------------------

Natural resource management

AHCNRM603	Implement a monitoring, evaluation and reporting program
AHCNRM605	Develop a monitoring, evaluation and reporting program

Pest management

AHCPMG502	Investigate a pest control failure
AHCPMG506	Manage the implementation of legislation
AHCPMG507	Develop a regional pest management plan
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCPMG510	Develop a pest survey strategy

Work health and safety

AHCWHS502	Manage work health and safety processes
-----------	---

Group B**Biosecurity**

AHCBER403	Plan and supervise control activities on infected premises
-----------	--

Business

AHCBUS511	Manage enterprise staff requirements
AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCBUS518	Prepare and monitor budgets and financial reports

Community coordination and facilitation

AHCCCF502	Facilitate development of group goals and projects
AHCCCF505	Contribute to regional planning process
AHCCCF601	Coordinate the development of regional plans

Chemicals

AHCCHM404	Develop procedures to minimise risks in the use of chemicals
AHCCHM405	Plan and implement a chemical use program
AHCCHM501	Develop and manage a chemical use strategy

Lands, parks and wildlife

AHCLPW506	Develop a management plan for a designated area
-----------	---

Plants

AHCPCM510	Collect and classify plants
-----------	-----------------------------

Pest management

AHCPMG409	Implement a pest management plan
AHCPMG413	Define the pest problem

Work

AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCWRK502	Collect and manage data
AHCWRK504	Assess new industry developments
AHCWRK509	Provide specialist advice to clients
AHCWRK513	Write and present reports
BSBINS401	Analyse and present research information
BSBPMG430	Undertake project work
CHCCDE010	Develop and lead community engagement strategies to enhance participation
LGACOM404 B	Establish cooperative arrangements with other organisations
TLIR4002	Source goods/services and evaluate contractors

AHC51419 Diploma of Agribusiness Management

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.2.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification reflects the role of those working in decision-making and supervisory roles on farms, stations and related rural businesses.

At this level, workers take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 3 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 4 units from the elective list

- up to 3 units from this or any other endorsed Training Package or Accredited Course.

Core Units

AHCAGB519	Plan and monitor production processes
AHCBUS516	Develop and review a business plan
AHCBUS517	Monitor and review business performance

Elective Units

AHCAGB512	Plan and manage infrastructure
AHCAGB513	Develop a farm plan
AHCAGB514	Manage application of agents to crops or pastures
AHCAGB515	Develop sustainable agricultural practices that utilise renewable energy and recycling systems
AHCAGB516	Select and implement a GIS for sustainable agricultural systems
AHCAGB517	Develop and manage a plan for sustainable production
AHCAGB518	Develop climate risk management strategies
AHCAGB521	Select and use agricultural technology
AHCAGB522	Implement the introduction of biotechnology into the production system
AHCAGB607	Manage succession planning
AHCAGB608	Manage financial resources
AHCBIO403	Plan and implement a farm or enterprise biosecurity plan
AHCBUS406	Administer finance, insurance and legal requirements
AHCBUS511	Manage enterprise staff requirements
AHCBUS512	Develop and implement family business structures and relationships
AHCBUS513	Market products and services

AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCBUS518	Prepare and monitor budgets and financial reports
AHCCFP402	Prepare to comply with measuring and modelling requirements of carbon farming methods
AHCCFP403	Identify opportunities and risks in carbon farming projects
AHCCFP404	Plan a land-based carbon farming project
AHCCFP501	Advise on carbon farming project planning and implementation
AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system
AHCMOM601	Analyse machinery options
AHCNAR506	Develop and implement sustainable land use strategies
AHCORG504	Develop and manage a community based marketing supply chain
AHCSOL505	Monitor and manage soils for production
AHCWAT503	Manage water systems
AHCWHS502	Manage work health and safety processes
AHCWRK502	Collect and manage data
AHCWRK511	Develop workplace policy and procedures for sustainability
BSBADM504	Plan and implement administrative systems
BSBPRC504	Manage a supply chain
BSBRISK501	Manage risk
BSBWHS513	Lead WHS risk management
BSBWHS518	Manage WHS hazards associated with maintenance and use of plant

BSBWOR501	Manage personal work priorities and professional development
TLIR4002	Source goods/services and evaluate contractors

AHC51519 Diploma of Viticulture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Qualification Description

This qualification describes the skills and knowledge of those in management roles within the viticulture industry.

Individuals with this qualification will take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no formal entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 6 core units plus
 - 4 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 must be from the electives listed below
- 2 from the remaining electives listed below, or any currently endorsed Training Package or accredited course.

Core Units

AHCBAC509	Plan and manage long-term weed, pest and disease control in crops
AHCBIO305	Apply biosecurity measures
AHCBUS511	Manage enterprise staff requirements
AHCPHT508	Develop a grape production plan
AHCSOL505	Monitor and manage soils for production
AHCWAT503	Manage water systems

Elective Units

AHCBER501	Manage active operational emergency disease or plant pest sites
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCBUS513	Market products and services
AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCBUS516	Develop and review a business plan
AHCBUS518	Prepare and monitor budgets and financial reports
AHCCHM501	Develop and manage a chemical use strategy
AHCMOM311	Operate precision control technology
AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system
AHCORG507	Develop an organic or biodynamic management plan
AHCORG508	Prepare the enterprise for organic or biodynamic certification
AHCPCM501	Diagnose plant health problems
AHCPHT507	Evaluate grapes for production
AHCPHT509	Evaluate wine

AHCPHT510	Manage a wine making process
AHCWHS502	Manage work health and safety processes
AHCWRK512	Plan, implement and review a quality assurance program
TLIL5019	Implement and monitor transport logistics
TLIR4002	Source goods/services and evaluate contractors

Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification reflects the role of personnel working within an organic farming enterprise who manage enterprise production units, manage the certification and continued compliance with organic standards and develop and maintain organic produce supply chains. It is designed to meet the needs of owners and managers of organic farming enterprises.

This qualification is suitable for people currently working or who wish to find employment on an organic farming enterprise or who own an organic farming enterprise.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 2 core units plus
 - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 2 units from Group A
- Select 5 units from Group A or Group B
- 1 unit aligned to AQF level 4 or above may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5.

Core Units

AHCAGB504	Plan production for the whole business
AHCORG506	Manage an agroecology production system

Elective Units

Group A

Organic farming

AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCORG408	Manage on farm composting
AHCORG503	Design and document an organic farm landscape
AHCORG504	Develop and manage a community based marketing supply chain
AHCORG505	Develop and monitor a sustainable production plan
AHCORG507	Develop an organic and biodynamic management plan
AHCORG508	Prepare the enterprise for organic and biodynamic certification
AHCPER507	Research and interpret requirements for a permaculture project
AHCSOL505	Monitor and manage soils for production projects

Group B**Agribusiness**

AHCAGB518	Develop climate risk management strategies
AHCBUS513	Market products and services
AHCBUS514	Negotiate and monitor contracts
AHCBUS518	Prepare and monitor budgets and financial reports
AHCMER501	Develop a sales strategy for rural products
BSBFIM501	Manage budgets and financial plans

Broadacre cropping

AHCBAC408	Manage agricultural crop production
AHCBAC503	Manage integrated crop and pasture production
AHCBAC506	Manage the harvest of crops
AHCBAC507	Develop production plans for crops
AHCBAC509	Plan and manage long-term weed, pest or disease control in crops

Business

AHCBUS511	Manage enterprise staff requirements
AHCBUS516	Develop and review a business plan
AHCBUS517	Monitor and review business performance
BSBR501	Manage risk

Chemicals

AHCCHM405	Plan and implement a chemical use program
-----------	---

Livestock

AHCLSK501	Manage livestock production
AHCLSK502	Arrange marketing of livestock
AHCLSK503	Develop and implement a breeding strategy
AHCLSK504	Develop livestock health and welfare strategies
AHCLSK505	Develop production plans for livestock
AHCLSK506	Design livestock effluent systems

Natural area restoration

AHCNAR506	Develop and implement sustainable land use strategies

AHC51920 Diploma of Applied Agronomy

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.2.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Qualification Description

This qualification describes the skills and knowledge of those who work as an agronomist in the agriculture and horticulture industry.

Individuals with this qualification will take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities. It is assumed that an individual undertaking this qualification will have prior agriculture or horticulture industry experience.

Work must comply with workplace health and safety, food safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 7 core units plus
 - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 3 must be from the electives listed below
- 2 from the remaining electives listed below, or any currently endorsed Training Package or accredited course packaged at Certificate IV, Diploma or Advanced Diploma.

Core Units

AHCAGB521	Select and use agricultural technology
AHCBAC509	Plan and manage long-term weed, pest and disease control in crops
AHCBAC513	Apply plant biology to agronomic practices
AHCBAC514	Design and manage a crop or pasture nutrition program
AHCBUS408	Operate within a budget framework
AHCSOL508	Manage soils to enhance sustainability
AHCWRK513	Write and present reports

Elective Units

AHCAGB514	Manage application of agents to crops or pastures
AHCAGB518	Develop climate risk management strategies
AHCAGB523	Interpret and use agricultural data
AHBAC409	Provide advice on agronomic products
AHCBAC510	Manage integrated crop and pasture production
AHCBAC511	Plan and manage a stored grain program
AHCBAC512	Develop production plans for crops or pastures
AHCBUS518	Prepare and monitor budgets and financial reports
AHCCHM405	Plan and implement a chemical use program
AHCCHM501	Develop and manage a chemical use strategy
AHCIRG507	Audit irrigation systems

AHCIRG509	Develop an irrigation and drainage management plan
AHCIRG510	Establish and maintain an irrigation-related environmental protection program
AHCNRM507	Manipulate and analyse data within geographic information systems
AHCPCM507	Diagnose plant health problems
AHCPHT508	Develop a grape production plan
AHCPHT511	Develop a horticultural production plan
AHCSOL505	Monitor and manage soils for production
AHCWAT503	Manage water systems
AHCWRK502	Collect and manage data
AHCWRK509	Provide specialist advice to clients
AHCWRK512	Plan, implement and review a quality assurance program
AHCWRK514	Manage trial and research material

AHC52021 Diploma of Landscape Construction Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Qualification Description

This qualification describes the skills and knowledge for landscape project management job roles in the landscape industry.

Individuals with this qualification will take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

Work must comply with work health and safety and environmental regulations and legislation that apply to the workplace.

State/territory licensing, legislative or certification requirements apply in some jurisdictions. Users are advised to check with the relevant regulatory authority.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 4 core units plus
 - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 must be from the electives listed below
- 2 from the remaining elective units, or any currently endorsed Training Package or accredited course.

Core Units

AHCBUS514	Negotiate and monitor contracts
AHCBUS515	Prepare estimates, quotes and tenders
AHCLSC504	Survey and establish site levels
AHCLSC505	Manage landscape projects

Elective Units

AHCBUS518	Prepare and monitor budgets and financial reports
AHCDES505	Prepare a landscape design
AHCDES509	Assess landscape sites
AHCGRI401	Construct roof gardens
AHCGRI402	Construct vertical gardens and green facades
AHCGRI501	Design roof gardens
AHCGRI502	Design vertical gardens and green facades
AHCIRG508	Design irrigation system maintenance and monitoring programs
AHCWHS502	Manage work health and safety processes
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations
AHCWRK513	Write and present reports
BSBHRM525	Manage recruitment and onboarding
BSBTEC401	Design and produce complex text documents

AHC52116 Diploma of Permaculture

Modification History

Release	Comments
Release 5	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.1.
Release 4	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Qualification Description

This qualification provides occupation outcomes for individuals to work in a leadership capacity for organisations, groups or enterprises. They require a whole system approach to planning, designing, managing and implementing integrated permaculture projects and programs, permaculture community programs, and the operation of permaculture enterprises.

The qualification is suited to learners who wish to work within organisations and enterprises where skills in strategic planning and project management, natural system and land use planning, and specialist permaculture design are required. Work is likely to involve working with teams of people at the strategic level as well as working with people of diverse backgrounds and abilities.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
 - 5 core units plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 4 units from Group A
- Select 1 unit from Group A or B
- 2 units may be selected from Group B or from this or any other endorsed Training Package or Accredited Course.

Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5.

Core Units

AHCPER401	Provide advice on permaculture principles and practices
AHCPER502	Design an integrated permaculture system
AHCPER503	Develop a strategic plan for a permaculture project or enterprise
AHCPER504	Manage a permaculture project or enterprise
AHCPER507	Research and interpret requirements for a permaculture project

Elective Units

Group A

AHCPER413	Evaluate suitability of species as solutions for permaculture applications
AHCPER501	Carry out permaculture field research
AHCPER505	Plan and supervise the implementation of permaculture project works
AHCPER508	Manage a permaculture aid and development project
AHCPER509	Design permaculture structures and features
AHCPER511	Facilitate participatory planning and learning activities

AHCPER512	Plan community governance and decision-making processes
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement

Group B

AHCAGB518	Develop climate risk management strategies
AHCBUS513	Market products and services
AHCBUS514	Negotiate and monitor contracts
AHCBUS516	Develop and review a business plan
AHCCCF501	Evaluate project submissions
AHCCCF506	Manage the incorporation of a group
AHCECR501	Manage natural areas on a rural property
AHCILM506	Operate within Community cultures and goals
AHCORG507	Develop an organic or biodynamic management plan
AHCORG508	Prepare the enterprise for organic or biodynamic certification
AHCSAW505	Plan erosion and sediment control measures
AHCWRK509	Provide specialist advice to clients
AHCWRK511	Develop workplace policy and procedures for sustainability
CHCCDE012	Work within organisation and government structures to enable community development outcomes
CHCVOL003	Recruit, induct and support volunteers

Qualification Description

This qualification reflects the roles of individuals working in management roles in horticulture.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 8 units of competency:
 - 0 core units plus
 - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 6 units from the elective list below
- 2 units may be selected from this or any other endorsed Training Package or Accredited Course.

Selected units must be relevant to job outcomes in horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 6.

Elective Units

AHCAGB512	Plan and manage infrastructure
AHCAGB518	Develop climate risk management strategies
AHCAGB607	Manage succession planning
AHCAGB608	Manage financial resources
AHCAGB609	Develop export markets for produce
AHCAGB610	Manage the production system
AHCAGB611	Analyse business performance
AHCAGB612	Manage price risk through trading strategy
AHCBER602	Plan and oversee a biosecurity emergency incident
AHCBUS609	Develop and review an enterprise strategic plan
AHCBUS610	Manage agribusiness risk
AHCBUS611	Manage capital works
AHCBUS612	Review land management plans and strategies
AHCBUS613	Manage human resources
AHCBUS614	Develop a monitoring, evaluation and reporting program
AHCBUS615	Implement a monitoring, evaluation and reporting program
AHCMER502	Develop a sales strategy for rural products
AHCMOM601	Analyse machinery options
AHCPCM602	Develop and implement a plant health management strategy
AHCWHS502	Manage work health and safety processes
AHCWRK601	Monitor projects in a program
AHCWRK602	Lead and manage community or industry organisations
CPPWMT4005	Implement waste management site safety plans

PSPPCY004	Support policy implementation
-----------	-------------------------------

AHC60319 Advanced Diploma of Agribusiness Management

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 4.0.

Qualification Description

This qualification reflects the role of individuals working in a range of agribusiness leadership or consulting roles. The role reflects the need for agribusiness specific expertise in planning and analysis, managing supply chains, financial and human resource management together with an emphasis on return on investment.

At this level, workers utilise significant theoretical agribusiness knowledge and provide leadership and strategic direction across multiple enterprises.

Agribusiness leaders and consultants analyse, design and execute judgements using wide-ranging technical, conceptual and managerial competencies. Their knowledge base may be highly specialised or broad within the agribusiness field. These individuals are often accountable for group outcomes and for the overall performance of agricultural or horticultural production enterprises.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 8 units of competency:
 - 1 core unit plus
 - 7 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 6 units from the elective list
- up to 1 unit from this or any other endorsed Training Package or Accredited Course.

Core Units

AHCBUS610	Manage agribusiness risk
-----------	--------------------------

Elective Units

AHCAGB512	Plan and manage infrastructure
AHCAGB518	Develop climate risk management strategies
AHCAGB607	Manage succession planning
AHCAGB608	Manage financial resources
AHCAGB609	Develop export markets for produce
AHCAGB610	Manage the production system
AHCBIO403	Plan and implement a farm or enterprise biosecurity plan
AHCBUS511	Manage enterprise staff requirements
AHCBUS609	Develop and review an enterprise strategic plan
AHCBUS611	Manage capital works
AHCBUS612	Review land management plans and strategies
AHCBUS613	Manage human resources
AHCBUS614	Develop a monitoring, evaluation and reporting program
AHCBUS615	Implement a monitoring, evaluation and reporting program
AHCCFP402	Prepare to comply with measuring and modelling requirements of soil-based carbon farming methods
AHCCFP501	Advise on carbon farming project planning and implementation
AHCMER501	Develop a sales strategy for rural products
AHCMOM601	Analyse machinery options
AHCORG504	Develop and manage a community based marketing

	supply chain
AHCWRK601	Monitor projects in a program
AHCWRK602	Lead and manage community or industry organisations
AHCWRK603	Design and conduct a field-based research trial
BSBGOV502	Recruit and coordinate committee members
BSBGOV507	Manage board or committee and organisational conflict
BSBINN501	Establish systems that support innovation
BSBMGT605	Provide leadership across the organisation
BSBMGT621	Design and manage the enterprise quality management system
BSBMGT623	Monitor corporate governance activities

AHC60520 Advanced Diploma of Arboriculture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Qualification Description

This qualification describes the skills and knowledge for specialist consulting arborists, senior consulting arborists, and senior tree managers.

It applies to individuals who apply advanced and paraprofessional knowledge and skills to manage trees in the context of society and infrastructure, including:

- integration of design, planning and tree diagnostics
- urban forest performance and operational management
- development of strategies and policy for arboriculture within a legislative and regulatory framework.

Legislation, regulations and by-laws relating to the establishment, treatment and removal of trees apply in all States and Territories.

Entry Requirements

Prior to commencing the qualification, an individual must have:

- a diploma of arboriculture
- or
- a diploma or higher qualification in a field related to arboriculture plus 2 years current work experience as a consulting arborist or a municipal tree manager.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 10 units of competency:
 - 4 core units plus
 - 6 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- up to 4 units selected from electives listed below
- up to 2 units may be selected from electives listed below or this or any other endorsed Training Package or accredited course

No more than 3 of the 6 electives selected can be coded with an AQF indicator below level 6 or reflect outcomes below AQF level 6.

Note: Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Core Units

AHCARB608	Interpret diagnostic test results
AHCARB609	Measure and improve the performance of urban forests
AHCARB610	Provide consultation in a legal framework
AHCARB611	Develop an operational tree management plan

Elective Units

AHCARB512	Generate tree plans using computer-aided design software
AHCARB612	Review and develop strategic tree policy
AHCNRM507	Manipulate and analyse data within geographic information systems
AHCPCM601	Develop and implement a plant health management strategy
AHCWRK603	Design and conduct a field-based research trial
BSBCOM602	Develop and create compliance requirements
BSBMGT616	Develop and implement strategic plans
BSBMGT617	Develop and implement a business plan
CPPSIS5064	Coordinate GIS data manipulation and analysis
FWPCOT6204	Use carbon accounting to estimate emissions
FWPFGM6203	Manage sustainable tree inventory
LGACOMP008 A	Apply conflict resolution strategies

LGAGCM710 A	Manage contracts and contractors
LGAPLEM512 A	Provide geographic information systems data
LGAPLEM612 B	Protect heritage and cultural assets
PSPPCY010	Manage policy implementation

AHC80120 Graduate Diploma of Arboriculture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Qualification Description

This qualification describes the skills and knowledge for specialist consulting arborist, senior consulting arborist, senior tree manager, senior technical arborist and research arborist.

Graduates with this qualification apply a highly technical body of knowledge and skills to undertake professional skilled work, including the use of technical investigative equipment and techniques to design, implement and evaluate scientific experiments for sectors for the arboriculture industry. Graduates may specialise in arboriculture disciplines of urban forestry, biological organisms and tree health, tree biomechanics, and interactions of trees in their environment.

Legislation, regulations and by-laws relating to the establishment, treatment and removal of trees apply in all States and Territories.

Entry Requirements

Prior to commencing the qualification, an individual must have:

- an advanced diploma of arboriculture
- or
- an advanced diploma or higher qualification in a field related to arboriculture plus 3 years current work experience as a consulting arborist or a municipal tree manager.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 5 units of competency:
 - 0 core units plus
 - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- Select 2 units from Group A
- An additional 3 units may be selected from Group A or B or C
- Elective Group C can only be selected if required as a prerequisite

No more than 2 of the 5 electives selected can be coded with an AQF indicator below level 8 or reflect outcomes below AQF level 8.

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

AHCARB804	Analyse tree structure and biomechanics
AHCARB805	Perform mycology assays
AHCARB806	Research urban forest performance
AHCARB807	Conduct an entomology research project
AHCARB808	Contextualise diagnostic tests
AHCARB809*	Develop an urban forest management framework
AHCARB810*	Analyse edaphic interactions of trees and structures

Group B

AHCARB612	Review and develop strategic tree policy
AMPMGT806	Commercialise research and technology product or idea
BSBRES801	Initiate and lead applied research
MSL975045*	Perform laboratory-based ecological techniques

Group C Prerequisite Unit

MSL974021	Perform biological procedures
-----------	-------------------------------

AHCAGB302 Keep production records for a primary production business

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to keep production business records, such as paddock and livestock activity, in accordance with workplace requirements for decision-making and auditing.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCAGB302 Keep production records for a primary production business

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has collected and maintained accurate, accessible and systematic records for a primary production business for at least three of the following purposes, utilising data that covers a full production cycle:

- livestock breeding records
- crop and pasture usage
- farm vehicle and machinery use and maintenance
- property maintenance
- stored produce
- relevant local climatic activity
- procurement
- staff leave.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the organisation's policies and procedures applying to production records
- relevant legislation and codes, relating to the operation of a business and to the tasks undertaken
- relevant sections of Industrial Relations legislation and regulations
- recording processes to meet quality assurance requirements
- the organisation's software and technology used to record and analyse production information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software used to record information relevant to a primary production business
 - production records that cover a full production cycle.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the improvement to be carried out	1.1 Discuss possible improvements for the planning period with the relevant stakeholders 1.2 Prioritise improvements and plan schedules in line with property management and strategic plans

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Make allocations from the available budget for the planned improvements
2. Arrange the design of the improvement	2.1 Investigate designs for planned improvement, taking site features into account 2.2 Formulate improvement plan, specifying location and dimensions
3. Plan materials for property improvement	3.1 Calculate materials required for the construction of the improvement from the drawn plans, and discuss with relevant stakeholders 3.2 Obtain quotes from suppliers for the materials, and prepare proposed budget 3.3 Seek approval from management to go ahead with property improvement, based on plans and return on investment 3.4 Select suitable suppliers based on value for money and quality of service 3.5 Place orders with the chosen suppliers for the quantities, sizes and types of materials required
4. Prepare site for installation	4.1 Inspect site, and note key features for the planned property improvement 4.2 Inform all relevant stakeholders of the proposed activities 4.3 Measure and peg selected site according to the prepared plans 4.4 Prepare the site to be ready for the improvement, and take precautions to ensure that adverse environmental impacts are eliminated or minimised 4.5 Identify work health and safety hazards and take responsible action to minimise risks throughout the work
5. Supervise implementation of property improvement	5.1 Obtain all materials required for each work period and ensure they are on site ready for implementation 5.2 Implement property improvement according to the plans and prepared schedules 5.3 Monitor work to minimise adverse environmental impacts and work health and safety risks 5.4 Maintain communication with those working at the site 5.5 Check the work regularly to ensure it complies with the work plans

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.6 Dispose of any waste material responsibly 5.7 Take corrective action where required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> • Uses scales and measurements relevant to property improvement to prepare drawings and sketches • Calculates costs of required materials and labour • Schedules and adjusts timelines for work, as required
Get the work done	<ul style="list-style-type: none"> • Problem-solves issues as they arise

Assessment Requirements for AHCAGB404 Plan and implement infrastructure improvements

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, and safely and effectively implemented, at least one property improvement that includes one of the following physical assets:

- buildings
- dairy sheds
- shearing sheds
- shelters
- stock yards
- stock handling structures
- fences
- water supply systems
- roads and tracks
- soil conservation works
- irrigation and drainage channels
- grain and/or produce storage

In doing the above, there must also be evidence of:

- developing and monitoring an improvement plan and schedules
- determining, costing and ordering material requirements
- communicating effectively with stakeholders on infrastructure improvements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preparing sites for property improvements

- function and requirements of the physical assets on the property
- sustainable land and water use principles and practices applicable in the region
- environmental controls and codes of practice applicable to the business and to the improvement works
- whole of property plan and property planning cycles
- legislation, regulations and codes of practice relating to soil and water degradation issues, animal health and welfare, chemical use, building construction and workplace health and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - resources, equipment and materials relevant to the property improvement
- relationships:
 - communication with stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB405 Analyse and interpret production data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to collect, analyse, interpret and present data from production activities.

This unit applies to farm supervisors who take responsibility for their own work. They undertake a range of routine and non-routine activities and work in known and changing contexts.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect and organise production data	1.1 Collect and organise production data in a format suitable for analysis and interpretation 1.2 Determine accuracy and relevance of information held by the production unit

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Ensure collection tools and methods of collecting data are reliable and make efficient use of resources 1.4 Use business equipment to access, organise and monitor data 1.5 Update, maintain and store information
2. Analyse and interpret data	2.1 Confirm that objectives to analyse and interpret data are clearly defined and consistent with enterprise requirements 2.2 Use data analysis tools and methods that are reliable and suitable for purpose 2.3 Check assumptions used in analyses are clear, justified and consistent with enterprise objectives 2.4 Check conclusions are supported by evidence and contribute to the achievement of business objectives
3. Present data	3.1 Prepare and report data in an appropriate format, style and structure using appropriate software 3.2 Check structure and format of reports are clear and conform to enterprise requirements 3.3 Present findings of analysis, with conclusions, to work team 3.4 Obtain feedback and comments on suitability and sufficiency of findings

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication skills	<ul style="list-style-type: none"> Communicate production data analysis and conclusions to a group
Get the work done	<ul style="list-style-type: none"> Account for anomalies in data

Assessment Requirements for AHCAGB405 Analyse and interpret production data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively collected, analysed, interpreted and presented production data with conclusions for one of the following:

- animal production
- livestock products
- crop production
- horticulture production.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- current legislation, industry and enterprise codes of practice and quality assurance procedures that impact on production, such as biosecurity, vegetation and cultural heritage
- enterprise record keeping and data storage practices
- enterprise policies and procedures relating to collection, analysis and maintenance of production data
- methods to collect and analyse data, relevant to the enterprise
- data management systems and methods
- principles of effective report writing
- presentation skills and aids used to report data analysis and conclusions.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer-based technology and software used to record data in a primary production business
- relationships:
 - interaction with work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCAGB406 Keep financial records for primary production business

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has kept accurate financial records for at least one primary production business, over a period of at least three months, including:

- collected relevant documentation for purchases
- entered data to track financial records
- reconciled electronic transactions
- prepared at least one cash flow statement
- prepared and reconciled invoices
- copied and stored invoices and other related documents for taxation and auditing purposes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the organisation's policies and procedures applying to financial documentation and records
- current legislation and codes of practice, relating to keeping financial records for a primary production business
- procedures for handling financial transactions including online banking activities
- manual and computerised financial recording systems
- methods of calculating and presenting financial data
- financial accounting software package, relevant to the business
- the organisation's software and technology used to record and transmit financial information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer-based technology and software used to keep financial records for a primary production business.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCAGB501 Develop climate risk management strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research, analyse and interpret climate and enterprise data
- prepare risk management strategies
- integrate climate risk with opportunities and management strategies at a business management level
- implement enterprise sustainability policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- current forecasting techniques and phenomena, such as El Nino, ENSO, Southern Oscillation Index (SOI) and Pacific and Indian Ocean SST patterns
- impact of weather and climate on business activities
- causes of general patterns of weather and climate over Australia
- climate variability and climate change
- direct and indirect impacts of climate variability on land management and sustainability
- property and enterprise management decisions affected by the variable climate
- recognition of climate risks and opportunities
- seasonal climate forecasting systems and related indicators
- natural disaster planning
- climate and weather issues pertaining to sustainable agriculture
- potential impacts of greenhouse warming on land and natural resource management
- strategic options and planning in response to climate variability for a range of seasons (normal, drier or wetter than normal), and other risks and opportunities

- calculating financial returns for different strategic options
- computer applications and Internet to access, record and analyse data
- principles of decision-making based on the variable climate and seasonal climate forecasts.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Review and confirm the organisations	1.1 Compare the organisation's business goals and vision against

Element	Performance criteria
business goals and vision	actual business activities 1.2 Compare the values and community expectations of the organisation against actual business activities 1.3 Review the organisation's operating environment to identify potential opportunities and threats 1.4 Analyse the strengths and weaknesses of the organisation to identify potential areas for development 1.5 Access and discuss information on available innovations for use in the organisation with colleagues 1.6 Document the organisation's goals and vision
2. Prepare human resource development plans	2.1 Identify personal values, attributes and skills of the management team 2.2 Identify specific areas of expertise in the business 2.3 Assign specific areas of responsibility based on identified skills and attributes 2.4 Discuss and establish succession planning with management team 2.5 Identify skill development and training requirements 2.6 Obtain commitment to ongoing skill development from the management team 2.7 Establish communication strategies and develop a collaborative environment
3. Prepare a plan to manage land use	3.1 Survey land to identify natural resources, soil characteristics, water resources, and cultural heritage values of the property 3.2 Determine land use capacities from land condition tests and history of yields 3.3 Determine land use for individual paddocks based on land use capacities, products being produced, and the organisations goals and vision 3.4 Develop a plan to improve the management and use of land on the property, based on property resources and the organisation's goals and vision, and incorporate into the production plan 3.5 Develop organisational policy in relation to the environmental management of the land based on land use, prevalent pests and diseases, and the organisation's goals and vision
4. Plan production processes	4.1 Obtain production information for product under consideration 4.2 Confirm characteristics of the land under production and the quality of existing infrastructure 4.3 Obtain recent and historical data from organisational records for input to production planning 4.4 Collect and use information about organisational planning processes and potential for improvements or innovations to

Element	Performance criteria
	inform production planning 4.5 Identify production processes required to achieve the targeted production and compare with those that currently exist 4.6 Use production planning information as input to other organisational planning processes
5. Develop financial goals and risk management strategies	5.1 Identify the key financial performance indicators of each enterprise in the business from analysis of cash flow, profitability and net worth 5.2 Assess the financial performance of each enterprise in the business from analysis of key financial performance indicators and their impacts on business performance 5.3 Identify financial goals for each enterprise in the business from financial performance assessment and the organisation's goals and vision 5.4 Identify areas of risk in the organisation from analysis of the operating environment, production strategies, work health and safety records and staff skills 5.5 Identify and implement risk management strategies
6. Prepare and communicate the organisations vision, goals and plan	6.1 Integrate the organisation's goals and vision, human resource development, land-use, production and financial plans to reflect the decisions taken in each area 6.2 Articulate the organisation's goals, vision and plans to relevant staff 6.3 Establish a program to regularly review the organisations vision, goals and plans

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCAGB504 Plan production for the whole business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review strategic plans and production goals
- prepare enterprise budgets and calculate financial returns of the business
- develop financial management and marketing plans for the business
- review the natural resource base of the enterprise and incorporating principles of sustainability
- incorporate into production planning the personal aims and priorities of management and, the availability, productivity and training needs of labour
- assess the skills and expertise of self and colleagues
- facilitate group decision making within the business
- plan production processes
- assess environmental impacts and implement impact reduction techniques
- implement enterprise sustainability policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- holistic business planning and benchmarking
- marketplace in which the organisation operates
- land use planning including sustainable land use principles and practices
- soil nutrient cycling potential and limitations
- chemical and biological methods for pest control
- property planning, financial management and enterprise budgeting systems and procedures

- relevant State or Territory legislation, regulations and codes of practice which impact on rural production businesses
- monitoring strategies for financial, production, land use, and human resource development plans
- methods for assessing skills and expertise
- reasons for and methods of succession planning
- value and methods of risk assessment.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCAGB512 Plan and manage infrastructure

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has planned and managed infrastructure requirements for at least one agricultural or horticultural production enterprise, including:

- identified infrastructure requirements for the enterprise
- planned and sourced requirements for at least one infrastructure improvement
- developed an infrastructure maintenance program including scheduling and responsibilities
- recognised potential opportunities to use or install more environmentally efficient systems or equipment
- established a recording system for infrastructure improvement, purchase, construction and maintenance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems for managing maintenance schedules and continuous improvement of infrastructure
- property planning, financial management and enterprise budgeting systems and procedures
- environmental controls and codes of practice relevant to the organisation
- management practices and processes to minimise noise odours and debris from production processes
- current legislation and regulations relating to infrastructure management and workplace health and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer-based technology and software used to record information relevant to a primary production business
- specifications:
 - access to relevant regulations and guidelines for infrastructure management and workplace health and safety.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB513 Develop a farm plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop a farm plan. It includes auditing and managing the natural resources (water, soil, biodiversity including vegetation and wildlife), integrating the management of natural resources with business objectives and production plans.

This unit applies to farm managers whose role is to manage a property's natural resources alongside business objectives and production plans. They usually work autonomously and exercise judgement to complete a range of advanced skilled activities.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine directions for business	1.1 Establish long-term directions and goals for business through identification and analysis of values, expectations and goals of stakeholders

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Identify business and personal strengths, weaknesses, opportunities and threats</p> <p>1.3 Develop and document strategies to address strengths, weaknesses, opportunities and threats consistent with business vision</p>
2. Audit natural resources and infrastructure of property	<p>2.1 Survey land and record physical characteristics, natural resources, soil characteristics and any culturally significant sites</p> <p>2.2 Produce a soil map of property and record land classes using classification terminology</p> <p>2.3 Identify water resources and condition</p> <p>2.4 Determine land capability and identify land management options for each land class</p> <p>2.5 Show natural property features and infrastructure on property map, noting its condition</p> <p>2.6 Identify areas at risk of soil degradation</p> <p>2.7 Classify native vegetation and assess condition</p> <p>2.8 Identify any rare, threatened or endangered species or vegetation communities, as appropriate</p>
3. Address legal requirements that impact on management of property	<p>3.1 Identify legislation, regulations and codes of practice relevant to activity on property</p> <p>3.2 Ensure legal requirements are addressed in business management plans</p>
4. Develop management strategies to address natural resource management issues	<p>4.1 Develop, cost and prioritise property improvement plans, or action plans, to assist natural resource management</p> <p>4.2 Develop plans to repair degraded land and stimulate biodiversity</p> <p>4.3 Plan water supply and water management, vegetation and revegetation management, and wildlife management strategies to ensure natural resources are maintained</p> <p>4.4 Develop strategies for weed and pest animal control</p> <p>4.5 Develop plans to address fire risk and fire management</p> <p>4.6 Ensure business and production plans for the farm incorporate sustainable management of natural resources</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Review farm plan	5.1 Review and revise business and production plans to meet changing circumstances 5.2 Use digital finance and farm management tools to produce and update farm plans

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Carry out research to gather information about farm management, relevant to business

Assessment Requirements for AHCAGB513 Develop a farm plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed a farm plan for one property, including:

- audited, recorded and mapped the natural resources, infrastructure and at-risk areas of the property
- monitored legal requirements that impact on the management of the property
- developed management strategies to maintain natural resources
- integrated business objectives and production plans, with sustainable land management practices, in a whole farm plan
- reviewed and evaluated farm plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- processes used to analyse strengths, weaknesses, opportunities and threats
- sustainable land management practices to maintain natural resources and stimulate biodiversity
- property planning processes and approaches
- farm management planning tools
- land usage/capability for local area
- water, vegetation, soil, fire and wildlife management strategies
- legal requirements that impact on agricultural businesses
- risk associated with agricultural businesses and use of natural resources.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - designated land/farm site
 - digital finance and farm management tools
- specifications:
 - access to land management information, legislation, regulations and codes of practice relevant to business.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB514 Manage application of agents to crops or pastures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency specifies the skills and knowledge required to provide information or manage the application of chemical, biological or organic agents to crops or pastures, utilising application technology.

This unit of competency applies to work in a range of agricultural or support enterprises, such as agronomists and rural merchants. Work is usually undertaken without supervision. Responsibility for, and organisation of, the work of others involved in the program may be required.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse application requirements	1.1 Determine goals for application of agents following a review of enterprise production plans and in consultation with land manager 1.2 Access and review records of previous nutrition, pest, weed and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	disease management including the application of any agents 1.3 Access and review relevant climate, environmental and geographic data from available information systems and sources 1.4 Access and review yield monitoring data including yield variability 1.5 Access and review relevant soil, plant and water information from tests and records
2. Develop an application plan	2.1 Identify performance targets and indicators in the production plan 2.2 Select appropriate agent/s, including adjuvants, method of application and equipment based on site analysis, recommendations, production requirements, environmental conditions and manufacturer specifications 2.3 Select spray nozzles to achieve the optimum droplet size with minimal variation and deliver the appropriate liquid flow rate for the selected agent in the desired spray distribution pattern 2.4 Determine and monitor measures to control factors influencing the level of spray drift 2.5 Determine procedures to ensure compliance with the range of appropriate commonwealth, state and local government legislation and regulations 2.6 Identify work health and safety hazards, assess risks and implement appropriate controls 2.7 Determine environmental impacts of application and implement appropriate clean up strategies to the area 2.8 Schedule applications taking the range of seasonal, geographic and resourcing factors into consideration 2.9 Record details of applications, as required by legislation, regulations and codes of practice
3. Monitor and evaluate the effectiveness of the application plan	3.1 Evaluate the effectiveness of the application at key points and make adjustments to ensure appropriate coverage 3.2 Monitor and assess environmental impacts and work health and safety hazards relating to application strategies throughout the implementation process 3.3 Make modifications to the plan as and when necessary to address environmental, work health and safety, resourcing or effectiveness

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>issues</p> <p>3.4 Analyse data, observations and documentation from the implementation of the application plan against the plan to assess effectiveness</p> <p>3.5 Prepare recommendations for future strategies based on the analysis of the data</p> <p>3.6 Record details of the implementation including information on any difficulties or issues faced, technical details, environmental and work health and safety issues, recommendations for future action, results, costs and any available data analysis</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Apply digital literacy to program application technology
Reading	<ul style="list-style-type: none"> Accurately interpret manufacturer instructions and agent labels
Numeracy	<ul style="list-style-type: none"> Calculate and measure chemicals and agents accurately, following instructions

Assessment Requirements for AHCAGB514 Manage application of agents to crops or pastures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has managed the application of a chemical, biological or organic agent to at least one designated crop or pasture, including:

- determined the need for the agent
- developed an application plan that includes addressing environmental and work health and safety issues
- programmed application technology
- monitored the effectiveness of the application.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- technology to manage application of agents to crops and pastures
- Geographic Information Systems (GIS) and Global Positioning Systems (GPS) and how data from these systems is used in farm management
- types of data used to define field parameters, including aspect and slope
- characteristics of pest, weed and disease species including their life cycles and reproduction capability
- principles of integrated pest and weed management
- range and classes of fertilisers, herbicides, insecticides and fungicides available and their basic chemistry
- growth stages of weeds and plant morphology
- the effects on crops of weeds, pests, diseases and/or lack of soil fertility
- mode of action of chemical or biological control agents and long term effects of these agents with respect to plant back periods and resistance
- range and effect of different nozzles, pressures, spray patterns, droplet sizes and basic physics of droplets and fluids
- work health and safety hazards and controls

- environmental impact of agents used
- best management practices and processes to minimise the impact of agents
- commonwealth, state and local government legislation and regulations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - designated crop or pasture
 - chemical, biological or organic agents
 - spray equipment
- specifications:
 - manufacturer instructions for agents and spray equipment
 - legislation, regulations and codes of practice applicable to chemicals and land-based businesses.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB515 Develop sustainable agricultural practices that utilise renewable energy and recycling systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge to develop planning strategies to address sustainability issues, using renewable energy and opportunities to recycle products, and reduce the impact of waste from the production system.

This unit applies to those who manage land-based businesses and are required to consult with external experts such as alternative energy consultants and suppliers of alternative energy equipment, planning authorities, and government departments who administer subsidies and provide advice.

The work involves applying sustainable renewable energy systems to rural, regional and local conditions. All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify opportunities	1.1 Identify areas of enterprise where renewable energy, recycling

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
to use renewable energy	<p>products or improving work practices could be utilised to reduce greenhouse gas emissions</p> <p>1.2 Identify available government subsidies for the implementation of strategies using renewable energy or recycling and potential cost savings to the business in the longer term</p> <p>1.3 Identify the specified standards of quality, licensing, regulatory requirements, government legislation and safety issues for the introduction of any renewable energy resources and recycled products</p> <p>1.4 Identify potential income generated by on selling energy excesses or recycled products</p> <p>1.5 Measure improvement outcomes from the introduction of renewable energy sources and recycling products in relation to achieving greater sustainability</p> <p>1.6 Conduct risk assessment for work health and safety hazards associated with renewable energy and recycling initiatives</p>
2. Develop strategies to use renewable energy	<p>2.1 Develop strategies to reduce greenhouse gas emissions and use renewable energy resources, recycled products and improved work practices</p> <p>2.2 Estimate plant, material, labour and other associated costs in consultation with appropriate person or organisation</p> <p>2.3 Develop a budget for estimated plant, material, labour and other associated costs</p> <p>2.4 Develop work plan for the introduction of renewable energy resources and recycled products</p> <p>2.5 Investigate sources and availability of materials and human resources needed to complete work plan</p> <p>2.6 Develop risk management strategies including contingencies to maintain supply and deliver contract on time, and incorporate into the plan</p> <p>2.7 Develop work health and safety risk control measures and establish procedures</p>
3. Implement strategies to use renewable energy	<p>3.1 Implement and monitor the plan for renewable energy and recycling products to ensure on time supply of plant and materials</p> <p>3.2 Monitor the progress of strategies to reduce greenhouse gas emissions and recycling against schedule, quality requirements and budget</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.3 Review plan against required inputs and rectify any anomalies to meet and supply contractual arrangements on time</p> <p>3.4 Monitor work health and safety risk control measures and procedures and implement changes</p> <p>3.5 Evaluate the improvement outcomes and document appropriate corrective actions</p>

Assessment Requirements for AHCAGB515 Develop sustainable agricultural practices that utilise renewable energy and recycling systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed sustainable agricultural practices that utilise renewable energy and recycling systems, including:

- identified key parts of the enterprise operation that may be converted to renewable energy sources, reducing greenhouse emissions and recycling opportunities using key principles of sustainability
- calculated the savings for at least one improvement
- implemented at least one improvement
- evaluated the improvement outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the effect of greenhouse gas emissions on the environment
- key principles of sustainability associated with using of renewable energy and recycling systems
- legislation, regulatory and licensing requirements associated with renewable energy and recycling
- subsidies available for adopting renewable energy systems
- environmental and work health and safety risk management strategies.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to an agricultural production site
- specifications:
 - access to information about sustainable work practices in agriculture, renewable energy sources and options for recycling.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB516 Select and implement a GIS for sustainable agricultural systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge to identify, select and implement a Geographic Information System (GIS) into a land based production business.

This unit applies to land based production managers who make decisions about production systems and applications, and who need to integrate GIS and Global Positioning Systems (GPS) technology and into land-based, agricultural activities.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCAGB516 Select and implement a GIS for sustainable agricultural systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has selected and implemented a Geographic Information Systems (GIS) management system to aid at least one farm management activity, including:

- stored and modelled data for specific site
- analysed maps and models to determine appropriate farm management activity
- implemented one GIS based activity to manage either:
 - yield
 - soil health
 - erosion
 - pests
 - weeds
 - or other crop related factors.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- applications of GIS based technology to assist with managing soil, salinity, erosion, weeds farming systems and biodiversity
- uses of Global Positioning Systems (GPS) equipment and technology associated with GIS
- sources of digital mapping data for local area
- financial management and strategic planning benefits from the implementation of a GIS
- mapping principles of GIS
- spatial calculations using GIS
- relevant machinery and equipment for use in agricultural systems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - GIS and GPS technology
 - designated site for land-based production.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB517 Develop and manage a plan for sustainable production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop a farm plan for a rural enterprise to reflect sustainable production principles that may include regenerative, organic, biodynamic or biological farming principles.

This unit applies to those who have a role in managing a farm and the management system to reflect a new philosophy, utilising sustainable principles.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop goals and objectives to improve biodiversity, recycling and sustainability	1.1 Establish long-term direction and purpose of the business by identifying and analysing the values, expectations and personal goals of the people involved 1.2 Identify business and personal strengths, weaknesses, opportunities and threats and strategies to address them

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Investigate sources of information and support for improved practices 1.4 Estimate timelines for, and costs for improved practices
2. Audit the existing and natural resources on the property	2.1 Draw a property map to include land classes using classification terminology, fences and water systems, natural property features and infrastructure 2.2 Conduct a risk assessment of previous land use and an inventory of chemicals applied or evidence of application on the site 2.3 Identify areas at risk of soil degradation and develop strategies to protect the area 2.4 Develop and implement strategies to improve the health and the regeneration of remnant vegetation to support a diversity of living systems 2.5 Assess potential problem pests and weeds and use strategies to implement an eradication program
3. Develop and implement grazing and cropping strategies to improve sustainable outcomes	3.1 Use soil test results to make recommendations for soil improvement with appropriate organic fertilisers and soil conditioners to ensure a mineral-balanced and healthy soil 3.2 Develop and implement an annual grazing program and strategies to optimise pasture growth and animal production 3.3 Develop and implement a strategy for the recycling of farm waste and effluent 3.4 Assess soil biological activity and apply suitable preparations and grazing strategies to improve the soil biota and soil organic matter 3.5 Identify suitability of mulching and composting systems 3.6 Design and implement a plan using crop rotations to optimise soil fertility 3.7 Research the principles and application of biodynamic preparations
4. Manage livestock health and welfare for improved, sustainable production	4.1 Plan strategies to preserve livestock health including allowable treatments and grazing management in the short term and genetic improvement in the long term 4.2 Maintain livestock records to identify treated animals, including a record of all treatments including homeopathic remedies 4.3 Sustain the animal enterprise with pasture and suitable fodder and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	maintain consumption records to meet certification protocols
5. Manage customer feedback and satisfaction	5.1 Develop procedures to obtain, analyse and respond to customer feedback on farm product quality and integrity 5.2 Implement procedures manage customer feedback and satisfaction with sustainable product quality and integrity

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCAGB517 Develop and manage a plan for sustainable production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed and managed a plan to improve practices for one land based business to utilise sustainable farming principles, including:

- researched information on production changes and methods to manage herd, crop or pasture
- analysed benefits to the family and farm from adopting the philosophy
- assessed risks involved with conversion
- developed a comprehensive plan to transition production processes and improve sustainability.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sustainable land management practices including regenerative farming principles
- credible sources of information relating to sustainable farming principles and practices
- property planning process
- water, vegetation, livestock, pasture, soil, fire and wildlife management strategies for sustainable farming
- risk management strategies for land based production processes
- supply chain for the sustainable farming sector and own position in the chain
- methods to manage grazing including feed budgeting and varied grazing strategies
- animal health and options for maintaining health based on pathogen life cycles and the use of suitable preparations
- how to maintain biodiversity to complement a sustainable farming philosophy.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to information about sustainable farming principles
 - land based production site
- specifications:
 - legislation, regulations and codes of practice for sustainable farming.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCAGB518 Develop climate risk management strategies

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed climate risk management strategies for at least one site or property, including:

- researched, analysed and interpreted climate and site data
- recognised climate risks and opportunities presented for the business
- presented strategies to stakeholders, identifying how risks associated with variable climate could be managed.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and sources of data used to record weather patterns
- qualitative and quantitative techniques to analyse risks
- impact of weather and climate on business activities
- difference between weather and climate
- causes of general patterns of weather and climate over Australia
- climate variability and climate change impacts for local region
- property and enterprise management decisions affected by the current and predicted climatic variability
- recognition of climate risks and opportunities
- seasonal climate forecasting systems and related indicators
- contingency planning including natural disaster planning for site
- a definition of risk management, including the identification, assessment, and prioritisation of risks followed by coordinated and economical application of resources to minimise, monitor and control the probability and/or impact of events
- potential impacts of climate change on land and natural resource management
- strategic options and planning in response to climate variability for a range of seasons (normal, drier or wetter than normal)

- how to calculate financial returns for different strategic options
- computer applications to access, record, analyse and model data
- principles for decision-making, based on the variable climate and seasonal climate forecasts.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software used to research information relevant to climate
 - access to information and data relevant to a specific site/plot of land.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB519 Plan and monitor production processes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to plan and monitor production processes, including identifying the production processes required to achieve targets; establishing production targets for each enterprise and each product, crop, herd or flock; and monitoring and evaluating production processes.

This unit applies to individuals who work in agribusiness management roles where they take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine production process requirements	1.1 Access information about the products being grown or manufactured and the market 1.2 Confirm characteristics of the land under production and the

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>quality of associated infrastructure</p> <p>1.3 Analyse recent and historical data from organisational records for input to production planning</p> <p>1.4 Identify potential for improvements or innovations to inform production planning</p> <p>1.5 Identify production processes required to achieve the targeted production and compare with those that currently exist</p> <p>1.6 Check production planning information is fed into other organisational planning processes</p>
2. Plan production and monitoring systems	<p>2.1 Establish targets for the enterprise, for each product, crop, herd or flock using information from organisational management and strategic plans</p> <p>2.2 Schedule production processes taking organisational factors into consideration</p> <p>2.3 Establish waste management controls to minimise waste and dispose of waste sustainably</p> <p>2.4 Establish monitoring points and performance indicators using target, environmental management and scheduling information</p> <p>2.5 Establish appropriate biosecurity and quality assurance requirements</p> <p>2.6 Establish risk management strategies to control hazards</p> <p>2.7 Document the production plan, including targets and monitoring requirements</p>
3. Monitor and evaluate the effectiveness of production processes	<p>3.1 Check that performance indicators, targets and specifications are met and amendments to the process are made where necessary</p> <p>3.2 Evaluate the effectiveness of the production processes at key points and make adjustments as necessary</p> <p>3.3 Monitor and assess environmental impacts and workplace health and safety hazards throughout the production cycle</p> <p>3.4 Modify the production process by shifting priorities and results when necessary</p> <p>3.5 Analyse data, observations and documentation from the production process against the plan</p>
4. Record and manage	4.1 Prepare recommendations for future plans based on the analysis of

Assessment Requirements for AHCAGB519 Plan and monitor production processes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has planned and monitored at least one production cycle, including:

- identified production processes required to achieve targeted production
- established production targets for each product, crop, herd, or flock
- scheduled production processes with monitoring points and performance indicators
- documented the production plan
- evaluated production processes and made modifications where required
- created and maintained records as described in the production plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental controls and codes of practice relevant to the production process
- management practices to minimise noise, odours, waste, erosion, relevant to production process
- sustainable land use principles and practices applicable in the region
- production planning processes
- biosecurity and quality assurance requirements for product
- legislation and regulations relevant to product and production processes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - production records relevant to process
- specifications:
 - access to relevant legislation and guidelines for production processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB520 Plan production for the whole business

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to plan production for a whole, land-based business, including reviewing strategic plans and production goals, developing financial and marketing plans, developing workforce skills and managing land usage.

This unit applies to agribusiness managers whose role is to review and confirm the organisation's business goals and vision, its land-use, human resource development and financial plans. They analyse information from a range of sources and exercise judgement to complete a range of advanced skilled activities.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review and confirm the organisation business	1.1 Compare the organisation business goals and vision against actual business activities

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
goals and vision	<p>1.2 Compare the values and community expectations of the organisation against actual business activities</p> <p>1.3 Review the organisation operating environment to identify potential opportunities and threats</p> <p>1.4 Analyse the strengths and weaknesses of the organisation to identify potential areas for development</p> <p>1.5 Access and discuss information about innovations suitable for the enterprise, with colleagues</p> <p>1.6 Document the organisation goals and vision to provide a basis for future planning</p>
2. Prepare workforce plans	<p>2.1 Identify the values, attributes and skills of the team</p> <p>2.2 Recognise specific areas of expertise in the business</p> <p>2.3 Determine future skill requirements of the business</p> <p>2.4 Assign specific areas of responsibility to team members, based on identified skills and expertise</p> <p>2.5 Identify staff members skill development and training requirements</p> <p>2.6 Obtain commitment to ongoing skill development from the management team</p> <p>2.7 Determine succession planning processes with team</p> <p>2.8 Establish communication strategies to foster a collaborative environment</p>
3. Prepare a plan to manage land use	<p>3.1 Survey land to identify natural resources, soil characteristics, water resources, and cultural heritage sites</p> <p>3.2 Determine land use capacity from land condition tests and history of yields</p> <p>3.3 Determine land use for individual paddocks, based on land use capacity, products being produced, and the organisation goals and vision</p> <p>3.4 Develop a plan to improve the management and use of land on the property, based on property resources, sustainable practices and the organisation goals and vision</p> <p>3.5 Develop organisational policy to determine environmental management of the land, based on land use, prevalent pests and diseases, and the organisation goals and vision</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Develop financial goals and risk management strategies	<p>4.1 Identify key financial performance indicators of each enterprise in the business from analysis of cash flow, profitability and net worth</p> <p>4.2 Assess financial performance of each enterprise in the business from analysis of key financial performance indicators and their impacts on business performance</p> <p>4.3 Identify financial goals for each enterprise in the business from financial performance assessment and the organisation goals and vision</p> <p>4.4 Identify areas of risk in the organisation from analysis of the operating environment, production strategies, workplace health and safety records and staff skills</p> <p>4.5 Identify and implement risk management strategies</p>
5. Prepare and communicate the organisation vision, goals and plan	<p>5.1 Integrate the organisation goals and vision, human resource development, land-use, production and financial plans to reflect the decisions taken in each area</p> <p>5.2 Articulate the organisation goals, vision and plans to stakeholders and staff</p> <p>5.3 Establish a schedule to regularly review the organisation vision, goals and plans</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCAGB520 Plan production for the whole business

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has planned production for one whole land-based business, including:

- reviewed strategic plans and production goals
- prepared enterprise budgets and calculated financial returns of the business
- developed financial management and marketing plans for the business
- reviewed the natural resource base of the enterprise and incorporated sustainable land management practices
- incorporated the enterprise principles and goals into land use planning
- assessed the skills and expertise of the work team and planned training to cover identified gaps.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- marketplace in which the organisation operates
- land use planning principles, including sustainable land use principles and practices
- soil nutrient cycling potential and limitations
- chemical and biological methods used for pest control
- property planning, financial management and enterprise budgeting systems and procedures
- current legislation, regulations and codes of practice that impact on rural production businesses
- monitoring strategies for financial, production, land use, and human resource development plans
- methods for assessing staff skills and expertise
- reasons for and methods of succession planning
- value of, and methods used to assess and manage risks in agribusiness.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - past production and land usage records
 - business activity records
- specifications:
 - legislation, regulations and codes of practice relevant to land-based production.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB521 Select and use agricultural technology

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to select and apply modern agricultural technology in production systems. It covers the recording and reporting of farm activities, mapping, farm and production planning, data collection and analysis.

Applications in agricultural science range from spatial information tools to the precision application of production inputs and growth models for the improvement of production.

This unit is applicable for land managers or advisors who have a role in managing or operating a land based production business or providing expert advice.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate need for agricultural technology	1.1 Identify and evaluate organisational tasks and processes that could be supported by technological applications

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Assess opportunities and limitations for operational improvements that may result from adopting specific technological applications 1.3 Evaluate equipment, tools and resource requirements and select most appropriate options 1.4 Evaluate cost-benefit of using technology 1.5 Seek independent technical advice and sources of information as required 1.6 Develop plan to incorporate use of technology to improve operational efficiency, productivity and sustainability
2. Implement technology to manage production	2.1 Record, analyse and manage production data using technology 2.2 Develop treatment strategies or input requirements using technology 2.3 Collect, store and analyse data across land based business using technology 2.4 Research information resources, report and communicate production management using technology 2.5 Integrate use of technology to improve operational efficiency, production, profitability and sustainability
3. Evaluate use of technology	3.1 Develop and review strategies to ensure use of technology is cost effective and consistent with operational goals 3.2 Assess need for additional training and support 3.3 Develop strategies to address barriers to effective use of technology when necessary 3.4 Evaluate impact of technology use on production levels, input costs and cash flow budget 3.5 Develop strategies for monitoring, evaluating and incorporating future developments in technology

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCAGB521 Select and use agricultural technology

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has selected and used at least two technological products for agricultural production, including:

- identified a range of technologies and explained how they can be applied in an agricultural production system
- obtained and processed production data using technology
- identified and managed issues that have arisen in the use of the technology
- completed a cost and benefits analysis of using the technological product.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- trends and developments in technology relevant to agriculture
- sources of information related to agricultural technology
- basic principles of cost-benefit analysis
- context in which particular organisations operate and how this may impact on the selection and use of technology
- potential barriers to learning to use technological applications, and strategies to address these
- range of technology options available to support organisational activities
- strategies that can be used to evaluate technology use
- training and technical support options available to the organisation to develop skills in the use of technology.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - sources of information about agricultural technology
 - computer-based technology and software relevant to the agricultural production business.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB522 Implement the introduction of biotechnology into the production system

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to evaluate the implications of introducing biotechnology and genetically modified organisms into the current production system. This unit requires the ability of producers to identify potential risks and benefits, responsibly manage all aspects of risks to the neighbours, local community, and to the environment, relevant to the existing and new production system.

This unit applies to producers who manage, or provide advice to, land based production businesses. Work will likely require consultation with external experts, such as extension officers from state Agricultural Departments, agribusiness representatives, agronomists and regulators and insurance agencies.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate benefits and applications of introducing biotechnology in production system	1.1 Identify information on biotechnology relevant to enterprise by researching and analysing potential benefits and ramifications to production system, environment and others in the district 1.2 Identify how biotechnology can be integrated into current production system, to improve business profitability and sustainability 1.3 Compare current and historical production data for production system with potential for increased production 1.4 Investigate potential risks involved in the introduction of biotechnology to current production system 1.5 Collate information in a clear and concise manner to inform decisions 1.6 Evaluate implications for the integration of biotechnology into current production plan
2. Develop an implementation plan for introduction of biotechnology into production system	2.1 Select application of biotechnology suitable to local environment, climate, seasonal conditions, business goals and marketing objectives 2.2 Identify required changes to current production systems and develop suitable strategies for application of a farm production management plan 2.3 Develop risk management strategies including quality assurance (QA) system principles consistent with production plan requirements and marketing boards 2.4 Identify all relevant legislation, regulatory and product supplier requirements and implement according to the production plan 2.5 Identify key roles and responsibilities of personnel including training requirements 2.6 Develop an implementation production management plan including risk management strategies and QA systems
3. Implement and manage biotechnology into production system	3.1 Implement production, infrastructure and land management plans 3.2 Implement risk management strategies for production plan and record information in QA system 3.3 Manage scheduling of production processes taking organisational factors and paddock usage into consideration 3.4 Manage integration of environmental values into production process 3.5 Monitor risk management strategies plan and identify problems

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	and issues by conducting a risk management audit on property
4. Evaluate management strategies	4.1 Evaluate potential results of threats in terms of natural resources, business assets, infrastructure, environmental and community 4.2 Identify preventative and reactive action and develop further contingency plans to minimise threats and maximise opportunities 4.3 Review risk management strategies plan aimed at ensuring business stability, sustainability and profitability, while protecting and preserving natural resources and business assets 4.4 Evaluate production plan for the introduction of biotechnology into production system

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCAGB522 Implement the introduction of biotechnology into the production system

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has introduced biotechnology into a land based production system on at least one occasion, including:

- researched implications of introducing biotechnology into one business
- recognised potential opportunities of introducing biotechnology
- developed a plan to introduce biotechnology
- conducted an audit before and after the introduction of biotechnology products to identify if risk management strategies are appropriate
- completed and maintained appropriate quality assurance documentation
- implemented and evaluated biotechnology plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- benefits and risks of introducing biotechnology into a production system, including those arising from climate change, pressure on global food supplies and the management of pests and diseases
- principles of sustainability
- state/territory legislation, regulations and codes of practice relevant to biotechnology and the development and use of genetically modified organisms in Australia
- methods of risk assessment for the production system
- implementing, monitoring and maintenance of a quality management system
- issues presented to other farmers and community when using biotechnology in a production system.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to information about biotechnology
 - land based production site
- specifications:
 - legislation, regulations and codes of practice relevant to use of biotechnology in land based businesses.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB523 Interpret and use agricultural data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify, interpret, enter and use agricultural data, identify and address data gaps, and review agricultural data.

The unit applies to individuals who apply specialised skills and knowledge to the interpretation and implementation of agricultural data, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify, access and apply agricultural data	1.1 Discuss workplace business objectives, goals and farming system with business owner or land manager to determine purpose of information being sought

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Identify existing sources of agricultural data available in the workplace to support workplace business objectives</p> <p>1.3 Review and select appropriate software programs or applications (app) to meet workplace business objectives</p> <p>1.4 Access existing agricultural data and enter into software program or app</p> <p>1.5 Create maps and summary reports using existing data</p>
2. Interpret and explain agricultural data	<p>2.1 Interpret maps or reports to identify opportunities and limitations for operational improvements that support business objectives</p> <p>2.2 Conduct field work to ground truth data and record interpretations of data for future use</p> <p>2.3 Document data results using appropriate interpretation and presentation techniques</p> <p>2.4 Discuss and explain data results and information with business owner or land manager</p>
3. Analyse agricultural data	<p>3.1 Collect and analyse data to determine significance of results</p> <p>3.2 Undertake simple statistical analysis to detect data outliers, imbalances in generated data sets and identify erroneous data points, including determining spatial density of the managed data set</p> <p>3.3 Produce variability maps from suitable data sets</p> <p>3.4 Discuss and recommend solutions utilising agricultural data, and present to business owner or land manager for approval</p>
4. Identify and address data gaps	<p>4.1 Identify validity and reliability, and gaps in existing agricultural data</p> <p>4.2 Identify solutions to address data gaps utilising existing sources</p> <p>4.3 Identify and cost hardware and software solutions to address data gaps where required</p> <p>4.4 Discuss and recommend solutions and seek approval from business owner or land manager</p>
5. Use agricultural data	<p>5.1 Collect and organise agricultural data and enter into software program or app</p> <p>5.2 Generate maps and reports for agricultural activities for review and discussion with key business personnel</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Incorporate agricultural data into business operations 5.4 Determine if corrective action is required and take appropriate action
6. Review and report agricultural data	6.1 Review production data to identify changes in productivity as a result of using agricultural data, and document results 6.2 Identify opportunities for improvements using agricultural data 6.3 Report results to business owner or land manager

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Initiate discussions with business owner or land manager, using clear language to discuss business objectives, explain data results and information, recommend solutions and seek approval
Numeracy	<ul style="list-style-type: none"> Access, record and analyse agricultural data for input into decision making Estimate hardware and software acquisition, and calculate running costs Compare hardware and software acquisition and running costs with costs of services provided by off-property suppliers

Assessment Requirements for AHCAGB523 Interpret and use agricultural data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has interpreted and used at least three sources of agricultural data on at least two separate occasions during a production cycle, and has:

- discussed workplace objectives and purpose of information being sought with business owner or land manager
- identified, accessed, explained, documented and analysed workplace agricultural data
- generated maps or reports for agricultural activities and incorporated them into business operations
- conducted field work to ground truth data
- identified validity and reliability, gaps in existing data, and solutions to address gaps in existing agricultural data
- identified, recommended and costed hardware and software solutions to address data gaps where required
- collected and organised agricultural data and entered it into software program or application (app)
- implemented corrective actions as required
- identified and reported opportunities for improvements utilising agricultural data.
-

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the concept of farming as a system, including the interconnection of:
 - plants
 - soil
 - water

- environment
- weather
- finance
- production systems
- principles and practices for interpreting and using agricultural data, including:
 - how to distinguish between valid and invalid data and how to clean data
 - how to review data for spatial and temporal variance and compare current data to previous, or average data for consistency or variations
 - how to generate profitability maps of paddocks to highlight areas of differing return
 - how to transfer data to hardware controllers from generated maps
 - the importance of standardised data in generating whole of farm data analysis
 - data tracking and data inputs and outputs of the business
 - the importance of ground truthing
 - how agricultural data and decisions fit into the business plan, business drivers, costs and return on investment
- sources of data to assist with monitoring:
 - plants
 - soil
 - water
 - environment
 - salinity
 - erosion
 - weeds
 - biodiversity
- sources of data to assist with managing:
 - water use
 - precision mapping
 - precision and variable rate prescriptions
 - field record keeping
 - compliance record keeping
 - yield or harvest data
 - soil survey data
 - sensor network data, including; moisture probes, weather stations and canopy sensors
 - crop planning
 - agricultural machinery operation and monitoring
- types of data systems relevant to agricultural production, including:
 - Global Navigation Satellite Systems (GNSS)
 - relevant vegetation indices and their use
 - Unmanned Aerial Vehicle (UAV) imagery.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - hardware and software used to record agricultural data
- relationships:
 - business owner or land manager
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAGB607 Manage succession planning

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to manage and plan the succession and distribution of an estate within a family agricultural business context.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify succession planning requirements	1.1 Identify and assess contingency and succession arrangements against enterprise and individual requirements 1.2 Identify and evaluate income continuation options to find best fit for enterprise requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Identify and distinguish personal and business goals 1.4 Consider needs of those affected by succession arrangements in estate planning
2. Clarify succession planning arrangements	2.1 Make clear plans for retirement of, and inheritance to, all relevant parties 2.2 Consider legal and financial implications of succession planning in determining succession arrangements and estate distribution 2.3 Discuss, clarify and mediate apparent inequities in estate distribution 2.4 Seek external advice as required to clarify obligations and potential effects on business performance
3. Implement succession planning	3.1 Determine and implement strategies for estate distribution and succession 3.2 Monitor and review estate structures and transfer arrangements against tax and legislative requirements 3.3 Monitor estate planning and succession against enterprise performance 3.4 Complete relevant documentation to meet legal and procedural obligations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Access and interpret legislation, regulations and guidelines relevant to estate planning

Assessment Requirements for AHCAGB607 Manage succession planning

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has managed succession planning for at least one agricultural business, including:

- identified estate planning requirements
- clarified estate planning arrangements
- clarified and mediated apparent inequities in estate distribution with relevant parties
- documented agreements and contracts
- identified and assessed investment, financial and retirement options.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- effective interpersonal communication techniques
- conflict resolution, negotiation and mediation techniques
- solve problems relating to estate management
- goal setting strategies
- financial information including estate structures, retirement options, wills and estate planning procedures
- legislation and regulations relevant to taxation, contracts and agreements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- access to a family agricultural business and family members
- specifications:
 - legislation, regulations and guidelines relevant to estate planning.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCAGB609 Develop export markets for produce

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed an export market for at least one product, including:

- researched and analysed product knowledge
- analysed a market and established market potential
- developed and implemented an export market strategy.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- export requirements for identified product
- Australian and international export and import regulations
- international regulations, pricing structures, import and export factors, production times, quality assurance factors, and production and marketing arrangements, relevant to product
- requirements of standards, codes of practice, quality assurance (QA) processes and procedures, relevant to product
- marketing plan formats
- cash flow budgeting techniques
- sensitivity analysis and investment evaluation
- communication and negotiation skills to deal with international export arrangements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - product for export
 - access to information about international market relevant to product
 - communications technology to interact with potential overseas customers
- specifications:
 - legislation, regulations and guidelines for the export of goods from Australia.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCAGB612 Manage price risk through trading strategy

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has managed price risk for one business, including:

- determined the cost of production
- allocated overhead costs against enterprises within the business
- assessed risk to financial returns through market or currency movements
- analysed trends and evaluated forecasts
- monitored and assessed price movements
- implemented a trading strategy for price risk management.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- supply, demand and price relationships
- price trends and sources of market information/forecasts
- cost of production
- overhead costs for the business
- financial risk assessment and attitudes to taking financial risk
- selling options for the relevant commodity or product
- operation of futures markets, forward selling arrangements, put options
- foreign exchange rates in relation to trade
- contract law as it applies to trade
- legislation, regulations and guidelines for taxation and trading on the share market
- cash flow and taxation planning for the business
- contingency planning as it applies to price and trade.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - financial records for a business
- specifications:
 - access to legislation and regulations relevant to trade.

Assessment Requirements for AHCAIS202 Assist with artificial insemination procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assisted with artificial insemination (AI) procedures on at least one occasion, and has:

- assisted with preparation of animals for insemination
- followed workplace animal welfare practices
- followed relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- fitted, used and maintained personal protective equipment (PPE)
- supported insemination procedures
- cleaned work area and equipment on completion of work and disposed of waste
- reported unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for assisting with AI procedures, including appropriate use of PPE
- environment and biosecurity legislation and regulations and workplace practices relevant to AI procedures
- principles and practices of artificial insemination procedures, including:
 - reproductive anatomy and reproductive physiology in the livestock species
 - signs of heat, methods for detection of oestrus and management of animals on heat
 - techniques and methods for humane handling and restraint of the livestock species
 - animal welfare legislation, codes of practice and procedures relevant to assisting with AI of the livestock species
 - types, uses, maintenance, servicing and storage of equipment

- methods and procedures for cleaning of equipment used for AI
- documentation and records that are required
- requirements and procedures for cleaning and maintaining work areas.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to assisting with AI procedures
 - materials, tools and livestock handling equipment applicable to assisting with AI procedures
 - PPE applicable to artificial insemination procedures
- specifications:
 - workplace requirements applicable to health and safety in the workplace for assisting with AI procedures
 - environment and biosecurity legislation and regulations and workplace practices applicable to AI procedures
 - industry standards, legislation and codes of practice and procedures for animal welfare applicable to AI of the livestock species
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAIS301 Collect semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to routinely collect semen for artificial insemination of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

Working with entire male animals is an inherently dangerous activity. Individuals who work at this level must be thoroughly competent in all aspects of handling entire male animals.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Assessment Requirements for AHCAIS301 Collect semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare animals for collecting semen
- prepare for and undertake hygienic collection of semen
- collect semen using industry approved collection techniques
- transfer semen safely to the preparation and storage area
- handle animals in a humane, stress free, and safe manner
- clean up work areas and equipment and record data.
- follow enterprise work health and safety, biosecurity and animal welfare policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, uses and maintenance of personal protective equipment
- resource and manpower requirements, biosecurity and animal welfare requirements, industry standards, codes of practice and procedures for artificial insemination of the livestock species
- types, uses, maintenance, servicing and storage of equipment
- requirements and features of semen collection work areas
- requirements, methods and techniques for processing and storage of semen
- techniques and methods for humane handling and restraint of the livestock species
- relevant animal welfare practices for the conduct of artificial insemination in the livestock species
- methods and procedures for cleaning and sterilisation of equipment used for artificial insemination
- types of diseases transmissible from male to female animals through artificial insemination/semen, and methods of testing, control and prevention

- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- relevant work health and safety policies
- relevant environmental requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas
- relevant documentation and records that are required.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAIS304 Artificially inseminate livestock

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to prepare for and artificially inseminate livestock, complete documentation and records, and complete work.

The unit applies to individuals who artificially inseminate livestock under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, animal welfare legislative, regulatory and codes of practice requirements, and biosecurity practices.

Accreditation requirements apply in some jurisdictions to performing commercial artificial insemination (AI). Users are advised to check with the relevant State or Territory regulatory authority.

Pre-requisite Unit

Nil

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Elements	Performance Criteria

Assessment Requirements for AHCAIS304 Artificially inseminate livestock

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has successfully artificially inseminated at least ten separate animals with an accuracy of over 85 percent, and has:

- prepared for insemination
- prepared equipment and work sites
- identified and controlled potential hazards and risks according to workplace procedures
- followed relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- followed workplace animal welfare and hygiene practices
- correctly selected and thawed semen for insemination
- restrained and inseminated animals using species specific techniques and recognised methods that reduce stress
- completed documentation and records
- cleaned work area and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environment and biosecurity legislation and regulations and workplace practices relevant to artificial insemination (AI) of livestock
- workplace requirements applicable to health and safety in the workplace for AI of livestock, including appropriate use of personal protective equipment (PPE)
- principles and practices of livestock AI, including:
 - basic breeding principles, including the oestrus cycle and its significance
 - relevant anatomy and physiology of female livestock

- reproductive physiology and behaviour of female livestock
- pregnancy testing
- animal health and abnormalities
- semen handling, thawing and storage techniques
- preparation requirements for AI of animals
- animal movement and behavioural characteristics
- handling equipment and techniques, harnessing and restraint methods and when to use them
- workplace and industry identification system for animals
- animal welfare legislation, codes of practice and procedures and hygiene practices relevant to AI of livestock
- legislative and regulatory controls relevant to AI
- workplace and industry policies relevant to AI and recording and reporting routines
- resource and manpower requirements, industry standards, codes of practice and procedures for AI of the livestock species
- criteria and methods for determining conception rates
- methods and procedures for improving the success of AI and its impacts on herd performance
- procedures for cleaning and maintaining work areas and equipment
- documentation and record requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to AI of livestock
 - female livestock
 - semen, materials, tools and livestock handling equipment applicable to AI of livestock
 - PPE applicable to AI of livestock
- specifications:
 - workplace requirements applicable to health and safety in the workplace for AI of livestock
 - environment and biosecurity legislation and regulations and workplace practices applicable to AI of livestock
 - industry standards, legislation and codes of practice and procedures for animal welfare applicable to AI of livestock
 - hygiene practices applicable to AI of livestock
- timeframes:

- according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAIS402 Supervise artificial breeding and embryo transfer programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to determine livestock breeding method, and supervise, monitor and maintain livestock artificial breeding and embryo transfer (ET) programs.

The unit applies to individuals who apply specialist skills and knowledge to supervise livestock artificial breeding and embryo transfer programs. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, animal welfare legislative, regulatory and codes of practice requirements, and biosecurity practices.

Accreditation requirements apply in some jurisdictions to performing commercial artificial breeding and embryo transfer. Users are advised to check with the relevant State or Territory regulatory authority.

Assessment Requirements for AHCAIS402 Supervise artificial breeding and embryo transfer programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has supervised a livestock artificial breeding or an embryo transfer program on at least one occasion, and has:

- determined breeding method
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations, and workplace procedures
- implemented breeding method
- applied workplace animal welfare practices
- monitored and maintained breeding program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for supervising livestock artificial breeding and embryo transfer programs, including appropriate use of personal protective equipment (PPE)
- environment and biosecurity legislation and regulations and workplace practices relevant to supervising livestock artificial breeding and embryo transfer programs
- principles and practices of livestock artificial breeding and embryo transfer programs, including:
 - animal welfare industry standards, legislation and codes of practice and procedures relevant to supervising livestock artificial breeding and embryo transfer programs
 - codes of practice, industry standards and procedures for livestock artificial insemination and embryo transfer
 - resources requirements, types and characteristics of livestock artificial breeding methods and programs

- advantages, disadvantages and cost-benefit analysis of livestock artificial breeding programs for the livestock workplace
- requirements, methods and procedures for sourcing, acquiring, transporting and storing genetic material
- reproductive physiology, reproductive behaviour and pregnancy development of female livestock
- procedures for artificial insemination
- procedures for embryo transfer
- causes, signs, treatment and management of reproductive diseases and complications in female livestock
- methods and procedures for improving the success of livestock artificial breeding programs and their impacts on herd performance
- documentation and record requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to supervising livestock artificial breeding and embryo transfer programs
 - live animals
 - materials, tools and equipment applicable to supervising livestock artificial breeding and embryo transfer programs
 - PPE applicable to supervising livestock artificial breeding and embryo transfer programs
- specifications:
 - workplace requirements applicable to health and safety in the workplace for supervising livestock artificial breeding and embryo transfer programs
 - environment and biosecurity legislation and regulations and workplace practices applicable to supervising livestock artificial breeding and embryo transfer programs
 - industry standards, legislation and codes of practice and procedures for animal welfare applicable to supervising livestock artificial breeding and embryo transfer programs
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCARB201 Apply a range of treatments to trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to remedy common tree problems by applying treatments including alleviating tree stress and improving soil condition. Treating trees also requires consideration of the environmental implications of treatment methods, techniques and procedures.

This unit applies to individuals who undertake defined activities, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCCHM201 Apply chemicals under supervision

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to apply tree treatments	1.1 Locate trees on streets using maps 1.2 Recognise trees requiring treatment 1.3 Identify site hazards, assess risks and report to supervisor 1.4 Confirm work zone with work crew and monitor site 1.5 Select and use personal protective equipment 1.6 Select, prepare, and carry out pre-operational and safety checks, on tools and equipment 1.7 Confirm first aid and emergency personnel, equipment and procedures 1.8 Communicate with work team during operations using voice, hand and whistle signals 1.9 Read packaging labels to maintain awareness of work hazards 1.10 Clean or sterilise tools and equipment to avoid disease transfer and biosecurity issues 1.11 Record and implement work health, safety, site, environmental and traffic control measures
2. Modify environment to maintain health and vigour of tree	2.1 Remove competing plants to ensure maintenance of adequate space, light, water and nutrient requirements of tree 2.2 Apply nutrient additives at specified rates and locations 2.3 Ameliorate soil structure in relation to aeration and drainage 2.4 Ameliorate soil condition with plant-based mulch application 2.5 Determine benefit and limits of decompaction methods
3. Apply chemical treatment	3.1 Calibrate application equipment 3.2 Apply treatment with due regard for environmental implications 3.3 Apply chemicals under supervision
4. Complete treatment operations	4.1 Maintain awareness of effect on environment of own work practices 4.2 Clean and store personal protective equipment 4.3 Clear and clean site 4.4 Report applications and treatments and update work records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB201A Apply a range of treatments to trees.

Assessment Requirements for AHCARB201 Apply a range of treatments to trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- locating trees on streets using maps
- recognising trees requiring treatment
- identifying site hazards, assessing risks and reporting to supervisor
- confirming work zone with work crew and monitoring site
- selecting and use personal protective equipment
- selecting, preparing, and carrying out pre-operational and safety checks, on tools, equipment and machinery
- confirming first aid personnel, equipment and procedures applicable to tree work
- communicating with work team during operations
- reading packaging labels to maintain awareness of work hazards
- cleaning or sterilising tools and equipment
- avoiding disease transfer and biosecurity issues
- recording and implementing work health, safety, site, environmental and traffic control measures
- removing competing plants to ensure maintenance of adequate space, light, water and nutrient requirements of tree
- applying nutrient additives at specified rates and locations
- amelioration of soil structure in relation to aeration and drainage
- amelioration of soil condition with plant-based mulch application
- determining benefit and limits of decompaction methods
- calibrating application equipment
- applying treatment with due regard for environmental implications
- applying chemicals under supervision

- maintaining awareness of effect on environment of own work practices
- cleaning and storing personal protective equipment
- clearing and cleaning sites
- awareness of work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods of locating trees on streets and maps
- tree recognition
- methods of identifying site hazards, assessing risks and reporting to supervisors
- risk assessment systems
- confirmation of work zones
- how trees react to stress
- personal protective equipment
- pre-operational and safety checks, on tools, equipment and machinery
- first aid
- first aid personnel, equipment, and first aid plan procedures
- communication systems using voice, hand and whistle signals
- application of packaging instructions
- methods of cleaning and sterilising tools and equipment
- methods of disease transfer
- biosecurity principles and practices
- work health, safety, site, environmental and traffic control measures
- plant removal methods
- soil nutrition
- rates of nutrient application
- soil amelioration techniques
- soil structure, aeration and drainage
- mulch
- compaction and decompaction
- correct preparation prior to applying treatment to trees
- calibration techniques of application equipment
- chemical application techniques, usage restrictions and risk controls
- environmental implications of chemical use in own work practices.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - spray application equipment
 - spill kit
 - measuring and weighing equipment
 - signage - chemical use
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage - work zone
 - trees
- materials:
 - tree recognition form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - work communications form
 - chemical and treatment application form
 - tree maintenance form
 - soil assessment form
 - work site operations form
 - work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate motorised stump grinding machines to remove tree stumps from the ground.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures, in accordance with manufacturers recommendations and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards

Pre-requisite Unit

AHCARB210 Work effectively in the arboriculture industry

HLTAID003 Provide first aid

Unit Sector

1. Prepare for stump removal operations	1.1 Determine site location and details and clarify with supervisor 1.2 Determine the depth below ground of stump grinding works 1.3 Determine and confirm location and depth of above-and-below-ground services 1.4 Unload stump grinder machine 1.5 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk
2. Carry out pre-operational and safety checks	2.1 Check maintenance log is complete and up to date 2.2 Check belts are appropriately tensioned and in good order 2.3 Check teeth are sharp 2.4 Check no teeth are missing or loose 2.5 Check tyre pressure is correct or tracks are appropriately tensioned 2.6 Check levels of oils and fluids 2.7 Check hoses 2.8 Check brakes are operational 2.9 Check cutter head rotates freely and is not obstructed
3. Check stump grinder safety features	3.1 Check guards for belt, power take-off (PTO) and grinder head are in place 3.2 Check kill switch clearly identifiable and working 3.3 Check that dead-man is working if fitted 3.4 Check debris curtain present and in good order 3.5 Check dust suppression system is working if fitted
4. Complete preparations for work	4.1 Select and use appropriate personal protective equipment 4.2 Confirm first aid and emergency personnel, equipment and procedures 4.3 Expose stump surrounds manually and check for and remove foreign bodies 4.4 Moisten surrounds as required 4.5 Record and implement work health, safety, site, environmental and traffic control measures
5. Position stump grinder	5.1 Determine exclusion zone for work operations 5.2 Isolate exclusion zone with barriers and signs 5.3 Position machine level within recommended ranges to avoid rollover 5.4 Avoid holes with machine wheels 5.5 Position machine to minimise impact from flying debris

Element	Performance criteria
	5.6 Position operator in low risk position 5.7 Position operator to provide a clear view of the stump 5.8 Locate safety screens as required
6. Undertake removal operations	6.1 Communicate with work team during operations using voice, hand and whistle signals 6.1 Confirm work zone cleared prior to starting cutter head 6.3 Plan to complete a series of grinds across the stump 6.4 Start cutter head 6.5 Stop work if exclusion zone is breached and disengage cutter head if required 6.6 Position cutter head over stump 6.7 Engage cutter head into stump surface 6.8 Maintain engine speed in revolutions-per-minute (RPM) 6.9 Ensure grinding process is accurate, smooth and ergonomic 6.10 Grind stump to recommended depth of cut on each cutting pass 6.11 Ensure the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall 6.12 Grind stump to predetermined spread and depth 6.13 Operate equipment without damaging underground services and surrounding areas
7. Remove grindings	7.1 Reposition machine away from ground stump 7.2 Disengage cutter head 7.3 Wait and remain clear of cutter head until cutter head stops moving 7.4 Remove build-up of grindings
8. Perform ongoing grinding operations	8.1 Make check in calls at prearranged times 8.2 Inspect grinder as required between stumps and when refuelling 8.3 Shutdown immediately if abnormal vibration or noise develops 8.4 Stop the engine before refuelling and allow engine to cool as required 8.5 Follow Safe Work Method Statement instructions for refuelling 8.6 Replace and secure fuel cap before restarting 8.7 Disengage cutter head and ensure a complete stop before moving to a new stump
9. Complete stump removal operation	9.1 Back-fill stump hole to original ground level 9.2 Maintain clean and safe work area throughout work and upon completion 9.3 Collect waste material and dispose of or recycle in a manner

Element	Performance criteria
	causing minimal environmental damage 9.4 Clean, maintain and store tools and equipment 9.5 Perform basic maintenance, including sharpening grinder and replacing teeth as required 9.6 Load grinder in accordance with Safe Work Method Statement 9.7 Secure grinder for transport 9.8 Update records of operator usage in log record 9.9 Update records of maintenance and replacement items

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB206A Undertake stump removal.

Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed removing stumps using a motorised stump grinder using low-risk work procedures. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining site location and details and clarifying with supervisor
- determining the depth below ground of stump grinding works
- determining and confirm location and depth of above-and-below-ground services
- unload stump grinder machine
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- checking maintenance log complete and up to date
- checking belts appropriately tensioned and in good order
- checking teeth are sharp
- checking no teeth are missing or loose
- checking tyre pressure is correct or tracks are appropriately tensioned
- checking levels of oils and fluids
- checking hoses
- checking brakes are operational
- checking cutter head rotates freely and is not obstructed
- checking guards for belt, power take-off (PTO) and grinder head are in place
- checking kill switch clearly identifiable and working
- checking that dead-man is working if fitted
- checking debris curtain present and in good order
- checking dust suppression system is working if fitted
- selecting and use appropriate personal protective equipment
- confirming first aid and emergency personnel, equipment and procedures
- exposing stump surrounds manually and check for and remove foreign bodies
- moistening surrounds as required

- recording and implementing work health, safety, site, environmental and traffic control measures
- determining exclusion zone for work operations
- isolating exclusion zone with barriers and signs
- positioning machine level within recommended ranges to avoid rollover
- avoiding holes with machine wheels
- positioning machine to minimise impact from flying debris
- positioning operator in low risk position
- positioning operator to provide a clear view of the stump
- locating safety screens as required
- communicating with work team during operations using voice, hand and whistle signals
- confirming work zone cleared prior to starting cutter head
- planning to complete a series of passes across the stump
- starting cutter head
- stopping work if exclusion zone is breached and disengage cutter head if required
- positioning cutter head over stump
- engaging cutter head into stump surface
- maintaining engine speed in revolutions-per-minute (rpm)
- ensuring grinding process is accurate, smooth and ergonomic
- grinding stump to recommended depth of cut on each cutting pass
- ensuring the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall
- grinding stump to predetermined spread and depth
- operating equipment without damaging underground services and surrounding areas
- repositioning machine away from ground stump
- disengaging cutter head if risk of making unwanted contact
- waiting and remaining clear of cutter head until cutter head stops moving
- removing build-up of grindings
- making check in calls at prearranged times
- inspecting grinder as required between stumps and when refueling
- shutting down immediately if abnormal vibration and/or noise develops
- stopping the engine before refueling and allow engine to cool as required
- following safe work method statement instructions for refueling
- replacing and securing fuel cap before restarting
- disengaging cutter head and ensure a complete stop before moving to a new stump
- back-filling stump hole to original ground level
- maintaining clean and safe work area throughout work and upon completion
- collecting waste material and dispose of or recycle in a manner causing minimal environmental damage
- cleaning, maintaining and storing tools and equipment
- performing basic maintenance, including sharpening grinder and replacing teeth as required
- loading grinder in accordance with safe work method statement

- securing grinder for transport
- updating records of operator usage in log record
- updating records of maintenance and replacement items.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site hazard identification methods
- site risk assessment systems
- control measures for work health, safety, site, environmental and traffic control
- personal protective equipment
- communication systems using voice, hand and whistle signals
- first aid
- emergency procedures
- methods of locating services
- pre-operational checks of stump grinders including:
 - logs
 - belts
 - teeth
 - tyre pressure
 - oils and fluids
 - hoses
 - brakes
 - cutter head
 - guards
- safety checks of stump grinders including:
 - guards for belt, power take-off (PTO) and grinder head
 - kill switch
 - dead man
 - debris curtain
 - dust suppression
- exclusion zones
- operation of stump grinders
- cutter head engagement and disengagement
- positioning of stump grinders and operator
- work zone
- methods of determining spread and depth of cut
- recommended depths of cut
- cutting plan
- engine speed (rpm)
- abnormal vibration

- methods of back-filling
- environmental implications of removal activities
- appropriate methods of collecting waste material and disposal or recycling methods
- basic maintenance of stump grinders
- methods of sharpening stump grinders
- methods of teeth replacement of stump grinders
- records of operator usage in log record
- methods of maintaining records for basic maintenance and replacement items.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes a log record, verifying ten (10) hours of operating a stump grinder, and five (5) hours of unloading and loading, setup and pre-operational and safety checks, preparatory work, backfilling and cleaning up, sharpening and basic maintenance, performed by the candidate.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - stump grinder
 - sharpening equipment
 - refuelling kit
 - spill kit
 - emergency communication system
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - tree stumps
- materials:
 - stump grinder operations form
 - hazard identification and risk control form
 - pre-operational and safety check form
 - emergency preparation form

- work communications form
- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB211 Apply treatments to trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to remedy common tree problems by applying treatments including alleviating tree stress and improving soil condition, application of fertilisers and soil amelioration in consideration of the environmental implications of treatment methods, techniques and procedures.

The unit applies to individuals working in a broad range of arboriculture contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

The arboriculture industry requires that all arboriculture work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to apply tree treatments	1.1 Confirm trees to be treated and work activity instructions with supervisor

Assessment Requirements for AHCARB211 Apply treatments to trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has applied treatments to trees on at least one occasion according to work activity instructions for the following four situations:

- control weeds
- apply soil additives and ameliorants to the tree root system
- apply plant-based mulch
- implement soil de-compaction procedures using tools and equipment.

There must also be evidence that the individual has:

- confirmed target trees and treatments required with supervisor
- identified site hazards, assessed risks and confirmed controls with supervisor, including:
 - selected, checked and used personal protective equipment
 - confirmed availability of first aid equipment and emergency procedures
- selected, prepared, calibrated and conducted pre-operational checks on tools, equipment and machinery according to operational and biosecurity procedures
- identified and prepared chemical treatments according to manufacturer label instructions
- carried out cleaning and maintenance tasks on site and equipment, including disposal of unused materials and waste safely according to environmental procedures
- maintained records and reported according to workplace procedures.

All arboriculture work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- practices and procedures for treating trees, including:

- using maps for locating trees
- tree recognition
- site hazard and risk assessment for tree treatments, including:
 - methods for assessing risk
 - control strategies for managing risk attributed to treating trees
 - first aid personnel, equipment, emergency plans
 - personal protective equipment
- common tree disorders and treatments, including:
 - weed plants and competition for growing conditions
 - nutrient disorders and the role of fertilisers
 - soil conditions and effect on tree growth
 - pests and diseases
- basic control strategies for tree disorders, including:
 - fertiliser application methods
 - ameliorants and effect on pH, soil compaction and condition
 - mulch, moisture retention and nutrient tie down
 - managing the growing environment
 - chemical treatments
 - biological treatments
 - integrated pest control
 - methods of weed control
- tools, equipment and machinery used in the treatment of trees, including:
 - soil de-compaction equipment
 - chemical sprayers and applicators
 - tree injection systems
 - fertiliser and ameliorant spreaders and applicators
- pre-operational and safety checks on tools, equipment and machinery
- chemicals and chemical applications, including:
 - interpretation and use of chemical label instructions
 - material safety data sheets
 - measurements and calculations for weighing and mixing chemicals
 - rates of application
 - dealing with chemical spills
- methods of cleaning and sanitising tools and equipment, including:
 - methods of disease transfer
 - biosecurity principles and hygiene practices
 - calibration techniques of application equipment
 - chemical application techniques, usage restrictions and risk controls
- environmental implications of tree treatments
- waste disposal, including:

- environmental protection
- biosecurity and hygiene practices
- records and record keeping requirements of tree treatments, including legislative and regulatory requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - living trees requiring treatments or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tree treatment equipment, including sprayers
 - measuring and weighing equipment
 - chemical spill kit
 - personal protective equipment
 - safety signage
- specifications:
 - workplace and manufacturer instructions for tree treatment equipment
 - procedures for application of treatments to trees
 - materials safety data sheets
 - product labels, including chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for stump removal operations	1.1 Confirm work instructions and stumps to be removed with supervisor 1.2 Assess the size and scale of stump grinding works 1.3 Identify and confirm location and depth of above and below ground services with supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Confirm workplace health and safety hazards and controls from job safety analysis (JSA) with supervisor 1.5 Confirm availability of first aid and emergency personnel, equipment and procedures 1.6 Unload stump grinder from transport vehicle according to workplace and safety procedures
2. Carry out stump grinder pre-operational and safety checks	2.1 Check maintenance log for outstanding performance issues, and report incomplete maintenance to supervisor 2.2 Conduct pre-start checks on stump grinder according to manufacturer instructions 2.3 Check fluid levels and fill to manufacturer specifications 2.4 Check safety guards are secure and in place 2.5 Check safety switches are functioning correctly 2.6 Check debris curtain is in working order according to manufacturer instructions
3. Complete preparations for work	3.1 Select, check and use personal protective equipment 3.2 Assess stump and surrounds for impediments to grinding operations 3.3 Implement workplace health, safety, site, environmental and traffic control measures
4. Operate stump grinder	4.1 Plan the grinding operation and position grinder according to site conditions and operator instructions 4.2 Implement stump grinder start-up procedure 4.3 Operate stump grinder to grind stump according to manufacturer and operator instructions 4.4 Monitor cutting operation and adjust cutting rate and depth according to manufacturer and supervisor instructions 4.5 Undertake corrective action when stump grinder performance or safe operation has been compromised 4.6 Implement shutdown procedures following stump removal

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Complete stump grinding operations	5.1 Dispose of waste according to work instructions and environmental procedures 5.2 Clean stump grinder and equipment according to workplace and biosecurity procedures 5.3 Perform operator maintenance according to manufacturer instructions 5.4 Report and record stump grinder usage, maintenance and repair requirements according to repair and maintenance procedures 5.5 Load and secure stump grinder onto transport vehicle according to workplace and safety procedures, and regulatory requirements 5.6 Maintain records and report stump grinding outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from maintenance logs, operating instructions and policies to identify relevant and key information for preparing and operating machinery safely
Writing	<ul style="list-style-type: none"> Complete stump grinder operation records using clear language and industry terminology to ensure clarity of meaning
Numeracy	<ul style="list-style-type: none"> Perform basic calculations to determine fuel mixtures and machine fluid level and volumes

Assessment Requirements for AHCARB212 Operate and maintain stump grinding machines

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely operated a stump grinding machine to remove at least one stump no less than 60cm in diameter, including:

- unloaded and loaded the grinder on a transport vehicle
- carried out set-up and pre-operational and safety checks
- prepared the site ready for stump grinding work
- cleaned, sharpened and maintained the stump grinder.

There must also be evidence that the individual has:

- confirmed work instructions and stumps to be removed, and assessed the size and scale of the works
- confirmed hazards and controls from job safety analysis (JSA) including:
 - located services
 - selected, checked and used appropriate personal protective equipment
 - confirmed the availability of first aid and emergency equipment, personnel and procedures
 - implemented workplace health, safety, environmental and traffic control measures
- reviewed the maintenance log for outstanding performance issues, and reported inconsistencies
- assessed stump surrounds for impediments to stump grinding operations and planned and positioned stump grinding machine according to site conditions and operating procedures
- implemented start-up procedure and operated stump grinder including monitored ongoing performance and undertook adjustments and corrective action where performance was lacking
- shut down machine according to operator instructions and cleaned stump grinder disposing of waste material according to environmental and biosecurity procedures
- maintained records and reported grinding operations according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- site hazards, risk assessment and documenting controls in JSA, including:
 - control measures for workplace health, safety, site, environmental and traffic control
 - personal protective equipment
 - first aid kits and access
 - emergency procedures
 - methods and purpose for locating above and below ground services
 - exclusion zones, barriers and fencing
- pre-operational checks of stump grinders, including:
 - maintenance logs and their purpose
 - belts and pulleys, wear and replacement
 - cutter head and teeth adjustments and sharpening
 - tyre pressure
 - oil and fluid levels
 - preparing and adding fuel
 - hydraulic hoses
 - brakes
 - engine types and fuels
- safety checks of stump grinders, including:
 - guards for belt, power take-off (PTO) and grinder head
 - kill switch
 - dead man
 - debris curtain
- operation of stump grinders, including:
 - impediments to stump grinding operations
 - cutter head engagement and disengagement
 - positioning of stump grinders and operator
 - methods for determining spread and depth of cut
 - engine speed (rpm)
 - common faults, their signs and symptoms
- environmental implications of stump grinding operations, including methods of collecting waste material and disposal and recycling
- basic maintenance of stump grinding machines, including:
 - sharpening teeth
 - teeth replacement
 - belt replacement
 - records of operator usage in log record

- methods of maintaining records for maintenance and replacement items.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - access to stumps ready for grinding
- resources, equipment and materials:
 - stump grinder
 - tooth sharpening equipment
 - tools and equipment for conducting basic maintenance practices
 - cutter teeth
 - fuel and spill kit
 - personal protective equipment
 - first aid, emergency and traffic management kit
- specifications:
 - workplace procedures for stump grinding
 - manufacturer instructions for safe operation, cleaning and storage of stump grinding equipment
 - arboriculture hygiene and biosecurity standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB213 Perform ground-based rigging

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to select, check and install rigging systems to support aerial tree work for the controlled descent of loads to drop zone. This unit does not cover crane operations.

The unit applies to individuals working in a broad range of arboriculture contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

The arboriculture industry requires that all ground-based tree rigging work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assist in preparation of work site	1.1 Confirm work instructions and location of worksite with supervisor 1.2 Confirm workplace health and safety hazards and controls in job

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	safety analysis (JSA) with supervisor 1.3 Confirm availability of first aid and emergency personnel, equipment and procedures
2. Prepare for rigging	2.1 Identify tree defects and contribute to tree assessment process 2.2 Discuss and confirm rigging method with work team 2.3 Confirm rigging method complies with identified risk controls with supervisor 2.4 Select rigging equipment and check for defects, removing defective equipment from service 2.5 Select, check and use personal protective equipment
3. Perform rigging operations	3.1 Communicate with work team during operations according to work site and environmental conditions, using methods agreed with work team 3.2 Tie, dress, set and finish rigging knots and hitches according to rigging system requirements 3.3 Monitor rigging system, work team movements and environmental conditions to ensure safe working conditions 3.4 Control load to drop zone and adjust rigging according to aerial worker directions 3.5 Disconnect load from rigging system 3.6 Re-check rigging equipment components for defects, and remove defective equipment from service 3.7 Return rigging components to aerial work team
4. Complete rigging operations	4.1 Confirm completed rigging operations with aerial work team 4.2 Remove and dismantle rigging system from tree 4.3 Clean, check and store tools, equipment and machinery according to workplace procedures 4.4 Report and tag defective tools and equipment 4.5 Clean and store personal protective equipment 4.6 Record and report rigging operation outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Complete reports and records using clear language and industry terminology to ensure clarity of meaning
Oral communication	<ul style="list-style-type: none"> Use open and closed questions logically to clarify work instructions Use industry terminology to communicate with team members
Get the Work Done	<ul style="list-style-type: none"> Respond to routine problems using step-by-step procedures when safely setting and preparing rigging and checking and maintaining rigging equipment

Assessment Requirements for AHCARB213 Perform ground-based rigging

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed rigging equipment and controlled at least six loads from an aerial location to the drop zone using ropes, knots and rigging system appropriate for the load dimensions and mass.

There must also be evidence that the individual has:

- confirmed work instructions and location of worksite
- identified site hazards, assessed risks and confirmed controls with supervisor including:
 - selected, checked and used appropriate personal protective equipment
 - confirmed the availability of first aid and emergency equipment, personnel and procedures
 - implemented workplace health, safety, environmental and traffic control measures
 - contributed to tree assessment process by assessing trees for defects
 - checked and removed defective equipment from service
 - monitored rigging system, work team movements and environmental conditions for safe work conditions
- communicated with work team and discussed and confirmed rigging method and rigging equipment during operations using agreed communications methods
- tied, dressed, set and finished arborist knots according to rigging task, including demonstrating the following knots:
 - alpine butterfly knot
 - bowline on the bight
 - cow hitch with better half
 - clove hitch and two half hitches
 - half hitch pre-knot
 - klemheist friction knot
 - marline pre-knot

- marline spike hitch
- riggers knot and two half hitches
- running bowline
- sheet bend
- slippery sheet bend
- timber hitch
- zeppelin bend
- controlled load to drop zone, adjusting rigging according to aerial worker instructions and disconnected load from rigging system
- returned rigging components to aerial work team after checking components for defects
- confirmed completion of rigging operation with aerial work team and removed and dismantled rigging system including:
 - cleaned, checked and stored tools and equipment from worksite
 - reported and tagged defective tools and equipment
- recorded and reported rigging outcomes according to workplace procedures.

All ground-based tree rigging work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- current industry practices (as outlined in the Companion Volume) for ground-based tree rigging work and tree dismantling
- safe operations in ground-based rigging, including:
 - first aid, emergency personnel, equipment and procedures
 - workplace health, safety, site, environmental and traffic control measures
 - identification of ground-based hazards
 - above ground hazards and risk
 - personal protective equipment
 - monitoring the safety of working conditions
- procedures for tree assessment before rigging operations, including tree examination for tree defects
- ground-based rigging procedures and practices, including:
 - rigging equipment and its performance
 - rigging methods and rigging systems
 - examination of rigging equipment for defects, and procedures to manage defective equipment
 - assembling and installing rigging equipment
 - checking rigging equipment
 - tying, dressing, setting and finishing arborist knots for rigging

- communications strategies used in arboriculture, including:
 - voice
 - hand
 - whistle signals
 - electronic communications
 - communications specific to the rigging task
- techniques for controlling, raising, lowering and redirecting loads, including balancing load on centre of gravity
- cleaning, storing and maintaining tools and equipment
- records and reporting procedures for rigging operations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - worksite with aerial tree operations or environment that accurately represents workplace conditions
- resources, equipment and materials:
 - rigging equipment
 - static and dynamic rope systems
 - harnesses
 - lowering and friction devices
 - high decibel whistle
 - personal protective equipment
 - first aid and emergency kit
 - rescue kit
- specifications:
 - access to current preferred industry practices (as outlined in the Companion Volume) for ground-based tree rigging work and tree dismantling
 - workplace and manufacturer instructions for safe operation of rigging equipment
- relationships:
 - supervisor and aerial work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to recognise trees and their environmental and social benefits.

The unit applies to individuals working in a broad range of arboriculture contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Examine tree features	1.1 Confirm the location and range of trees to be recognised with supervisor 1.2 Examine and record the morphological characteristics of tree specimens 1.3 Examine and record the tactile and sensory characteristics of tree

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	specimens
2. Examine tree condition	2.1 Examine tree for general condition of health and vigour 2.2 Record condition of tree health, noting signs and symptoms of tree disorders, and report to supervisor according to workplace procedures
3. Recognise tree	3.1 Use reference material to compare plant specimen characteristics to assist in tree recognition 3.2 Recognise tree by common name and botanical name 3.3 Confirm accuracy of tree recognition with work team
4. Recognise tree benefits	4.1 Examine tree for ecological habitat for localised biota 4.2 Recognise localised ecological and environmental benefits provided by tree 4.3 Recognise social benefits and value of tree
5. Report on results	5.1 Record key features observed in the process of tree recognition 5.2 Inform client of tree recognition process according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from reference materials to identify relevant characteristics for the recognising and basic classification of trees
Writing	<ul style="list-style-type: none"> Document outcomes of trees and their characteristics according to basic nomenclature for tree identification
Navigates the world of work	<ul style="list-style-type: none"> Follow international standards for plant classification and nomenclature

Assessment Requirements for AHCARB214 Recognise trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has recognised at least a minimum of 35 different trees local to the region, and has:

- confirmed the location and range of trees to recognise with supervisor
- examined and recorded the characteristics of tree, including:
 - form, structures and local environment of tree
 - shape, colour and size of leaves
 - features of buds, branches and bark
 - flower type, colour and shape
 - features of fruit
 - tactile and sensory characteristics
 - general condition of health and vigour and signs and symptoms of tree disorders
 - ecological habitat for local biota
- used reference materials to assist tree recognition to common name and botanical name and confirmed with work team
- recognised ecological, environmental and social benefits provided by tree
- informed client of tree recognition outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- methods of recognising trees
- botanical features of trees and their morphological and sensory characteristics, including:
 - form, structures and local environment of tree
 - shape, colour and size of leaves
 - features of buds, branches and bark

- flower type, colour and shape
- features of fruit if present
- use of sensory methods in tree recognition
- general health and condition of trees and their indicative features for recognising tree species, including:
 - signs and symptoms of diseases
 - presence or absence of pests
 - other indicative disorders that assist in recognition of trees
- methods of collecting and recording information and data relevant to tree recognition
- methods of collecting and using botanical samples for tree recognition, including:
 - photographs and images
 - fresh or dried botanical specimens
- reference materials used in the identification of tree species, including:
 - field guides
 - photographs that assist in tree recognition
- basics of plant taxonomy, including:
 - common names
 - botanical name
- trees and their social and environmental benefits, including:
 - habitat
 - aesthetic
 - functional use
 - food
- workplace procedures and processes for communicating results to client.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - 35 different trees stipulated in the performance evidence
- resources, equipment and materials:
 - live tree specimens
 - specialist tools and equipment necessary for tree observations
 - botanical reference materials, tree databases
 - camera or image capture device
- specifications:
 - workplace procedures and processes for recording tree data and preparing reports
 - workplace instructions
- relationships:

- client and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB301 Implement a tree maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a tree maintenance program. It also describes the skills and knowledge required to apply a range of tree maintenance techniques; and monitor and review the maintenance program over the course of a year.

The work requires application of extensive arboricultural knowledge and a broad range of arboricultural skills. This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCCHM303 Prepare and apply chemicals

AHCCHM304 Transport, handle and store chemicals

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Undertake site assessments and collect specimens	1.1 Determine location of above-and-below-ground services 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Perform site assessment to identify conditions which may impact upon the health of trees on site 1.4 Recognise stress inducing factors in accordance with characteristics of species 1.5 Recognise a wide range of common diseases, pests and nutritional deficiencies in trees 1.6 Recognise abiotic issues affecting health of trees 1.7 Collect specimens of stressed material for testing 1.8 Record and report results of site assessment and tests 1.9 Research health characteristics of tree species
2. Prepare treatment program	2.1 Access and read treatment program and confirm activities with management 2.2 Select appropriate treatment methods 2.3 Select, prepare, and carry out pre-operational and safety checks, on tools, equipment and machinery 2.4 Select and use personal protective equipment 2.5 Identify environmental implications of undertaking treatment program, assess likely outcomes and take appropriate action 2.6 Determine annual maintenance requirements for trees 2.7 Contribute to preparing a comprehensive full-year maintenance program 2.8 Record and implement work health, safety, site, environmental and traffic control measures
3. Undertake treatment program	3.1 Prepare and use treatment equipment 3.2 Apply physical or chemical treatments with due regard for environmental implications 3.3 Maintain growing environment in accordance with species needs 3.4 Monitor and review maintenance program over the course of a season of one year
4. Complete treatment program activities	4.1 Dispose of infected plant material and chemical waste appropriately 4.2 Sterilise equipment

Element	Performance criteria
	4.3 Clean and store personal protective equipment 4.4 Follow up physical or chemical treatments to ensure effectiveness 4.5 Determine timetables for follow up treatments and communicate them to work team 4.6 Maintain records and document the report for that year

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB301A Implement a tree maintenance program

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCARB301 Implement a tree maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed applying physical and chemical treatments to a range of trees in accordance with a full one-year treatment program. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- performing a site assessment to identify conditions which may impact upon the health of trees on site
- recognising stress inducing factors in accordance with characteristics of species
- recognising a wide range of common diseases, pests and nutritional deficiencies in trees
- assessing abiotic issues affecting health of trees, or impact on growth
- researching species characteristics on tree health
- collecting specimens of stressed material
- recording and report results of site assessment and tests
- accessing and read treatment program and confirm activities with management
- selecting, using and maintaining suitable personal protective equipment
- selecting appropriate treatment methods and equipment
- identifying environmental implications of undertaking treatment program,
- assessing likely outcomes of treatment programs and taking appropriate action
- determining annual maintenance requirements for trees
- contributing to preparation of a comprehensive full-year maintenance program
- recording and implementing work health, safety, site, environmental and traffic control measures
- preparing and using equipment
- applying physical or chemical treatments with due regard for environmental implications
- maintaining growing environment in accordance with species needs

- monitoring and reviewing maintenance program over season of one year
- disposing of infected plant material and chemical waste appropriately
- sterilising equipment
- following up physical or chemical treatments to ensure effectiveness
- determining timetables for follow up treatments and communicating to work team
- maintaining records and documenting a report for that year
- use of appropriate treatment methods and equipment
- communicating within the work team
- complying with relevant Australian Standards
- use of industry standard terminology to describe arboriculture and work environment
- applying work health and safety requirements in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site-specific risk assessment methods
- treatments and treatment methods commonly used on trees
- comprehensive full-year maintenance programs
- recognition of a wide range of common diseases, pests and nutritional deficiencies in trees
- the abiotic issues that could affect the health of tree species
- methods of recording, storing and processing data
- how to interpret a treatment program
- the appropriate personal protective equipment
- methods of collecting and storing specimens for identification
- methods of testing collected specimens of stressed material
- worksite traffic control
- stress inducing factors for a variety of tree species
- methods for treating tree pests and diseases
- methods of analysing nutritional status of trees
- health characteristics of tree species.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - sprayers/application equipment
 - measuring and weighing equipment
 - spill kit
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage - chemical use
 - signage - work zone
 - trees
- materials:
 - tree inspection form
 - tree maintenance form
 - site assessment form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - chemical and treatment application form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB303 Perform pruning operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to perform corrective and remedial pruning operations. The application of this unit of competency can occur on the ground or in aerial locations, once the candidate is situated in position to perform work. This unit of competency is independent of where the pruning occurs and the method of accessing the work location.

This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, materials and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable current versions of Australian Standards such as AS 4373 Pruning of amenity trees.

Pre-requisite Unit

FWPCOT2237 Maintain chainsaws

FWPCOT2239 Trim and cut felled trees

OR

FWPCOT3238 Operate a pole saw

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for pruning operations	1.1 Determine location of above-and-below-ground services 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Receive pruning instructions from supervisor and clarify prior to undertaking work 1.4 Confirm first aid, rescue personnel, equipment and procedures 1.5 Communicate with work team during operations using voice, hand and whistle signals
2. Determine requirements of pruning work	2.1 Identify and confirm location of tree to be pruned 2.2 Inspect trees for access and work 2.3 Determine type, extent and limit of pruning work in accordance with specifications, scope of works and client brief 2.4 Maintain awareness of power line proximity, safe approach distances and clearances
3. Select and prepare tools and equipment	3.1 Select appropriate tools and equipment for pruning 3.2 Consider access and impact value of secateurs, handsaws, chainsaws and polesaws 3.3 Carry out pre-operational and safety checks on pruning tools and equipment 3.4 Select and use personal protective equipment 3.5 Sterilise pruning equipment in between individual tree work in accordance with hygiene and biosecurity considerations 3.6 Record and implement work health, safety, site, environmental and traffic control measures
4. Determine tree part to be removed	4.1 Investigate stem bark ridge, old cuts, dead branches and occluded and occluding branches 4.2 Determine separate parts to be a branch or co-dominant stem in relation to tree anatomy and branch attachment 4.3 Determine the part requiring removal to be a branch or co-dominant stem to select the appropriate pruning procedure
5. Carry out branch pruning operations	5.1 Use sharp pruning tools to make clean cuts 5.2 Operate chainsaws and polesaws as required to implement

Element	Performance criteria
	pruning cuts to the standards required by AS 4373 5.3 Apply compartmentalisation of decay in tree (CODIT) principles 5.4 Pre-cut or undercut branches to avoid splitting or tearing 5.5 Remove remaining stub with final cut 5.6 Observe final cut procedure for branch removal cutting as close as possible to the branch collar without cutting into the branch collar or leaving a protruding stub. 5.7 Use branch bark ridge to determine angle of cut when removing a branch in the absence of a visible collar 5.8 Ensure bark at edge of all branch pruning cuts remains firmly attached
6. Carry out reduction pruning	6.1 Use branch bark ridge as guide to angle and position of final cut when making reduction cuts 6.2 Ensure lateral branch to which the final cut is made, is at least one third of diameter of branch being reduced at point of final cut.
7. Carry out stem pruning operations	7.1 Use stem bark ridge to determine angle of cut when removing a co-dominant stem 7.2 Be guided to position and angle of final cut, by positions and angles of joins between tissue of declining or dead stems and those of healthy stems elsewhere in tree 7.3 Ensure bark at edge of all stem pruning cuts remains firmly attached
8. Improve pruning quality	8.1 Inspect past pruning cuts to determine tree response 8.2 Use tree response to assess the quality of past pruning cuts 8.3 Seek feedback on pruning from other arborists 8.4 Identify and rectify incorrect pruning cuts 8.5 Modify future pruning cuts based on tree responses and feedback from others
9. Complete pruning operations	9.1 Drop pruning material into designated drop zone 9.2 Clean, maintain and store tools and equipment 9.3 Collect and dispose of, or recycle pruned material in a manner that causes minimal environmental damage 9.4 Maintain workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB303 Perform pruning operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must perform the remedial and corrective pruning operations involved in branch pruning, reduction pruning and stem pruning. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- receiving pruning instructions from supervisor and clarifying prior to undertaking work
- communicating with work team during operations using voice, hand and whistle signals
- confirming first aid, rescue equipment and rescue procedures applicable to tree work
- identifying location of tree to be pruned
- inspecting trees for access and work
- determining type extent and limit of pruning work in accordance with the specifications, scope of works or client brief
- maintaining awareness of power line proximity, safe approach distances and clearances
- selecting appropriate tools and equipment for pruning
- considering access and impact value of secateurs, handsaws, chainsaws and polesaws
- selecting, preparing, and carrying out pre-operational and safety checks, on tools, equipment and machinery
- selecting and using personal protective equipment
- sterilising pruning equipment in between work on individual trees in accordance with hygiene and biosecurity considerations
- recording and implementing work health, safety, site, environmental and traffic control measures

- investigating stem bark ridge, old cuts, dead branches and occluded and occluding branches
- determining the separate parts to be a branch or co-dominant stem in relation to the tree anatomy and branch attachment
- determining the part requiring removal to be a branch or a co-dominant stem
- using sharp pruning tools to make clean cuts
- operating chainsaws and polesaws
- implementing pruning cuts to the standards required by AS 4373
- applying compartmentalisation of decay in tree (CODIT) principles
- pre-cutting or undercutting branches to avoid splitting or tearing
- removing remaining stub with final cut
- observing final cut procedure for branch removal for cutting as close as possible to the branch collar without cutting into the branch collar or leaving a protruding stub.
- using branch bark ridge to determine angle of cut when removing a branch in the absence of a visible collar
- ensuring bark at edge of all branch pruning cuts remains firmly attached
- using the branch bark ridge as a guide to the angle and position of the final cut when making reduction cuts
- ensuring the lateral branch to which the final cut is made, is at least one third of the diameter of the branch being reduced at the point of the final cut.
- using the stem bark ridge to determine the angle of cut when removing a co-dominant stem
- being guided to the position and angle of the final cut, by positions and angles of joints between tissue of declining or dead stems and those of healthy stems elsewhere in tree
- ensuring bark at edge of all stem pruning cuts remains firmly attached
- inspecting past pruning cuts to determine tree response
- using tree response to assess the quality of past pruning cuts
- seeking feedback on pruning from other arborists
- identifying and rectifying incorrect pruning cuts
- modifying future pruning cuts based on tree responses and feedback from others
- dropping pruning material into designated drop zone
- cleaning, maintaining and storing tools and equipment
- collecting and disposing of, or recycling pruned material in a manner that causes minimal environmental damage
- maintaining workplace records
- use of industry-standard terminology to describe arboriculture and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- risk assessment
- visual tree assessment
- tree health, growth habit, structure, stability and growing environment

- first aid
- operation of chainsaws and polesaws
- tree and branch anatomy and attachments: lateral branch collars, branch bark ridges, stem bark ridges
- pruning cuts to the standards required by AS 4373
- reduction cuts
- tree response to pruning
- correct and incorrect pruning cuts
- rectifying cuts
- pruning hygiene
- biosecurity
- communications using voice, hand and whistle signals
- power line proximity, safe approach distances and clearances
- rescue personnel, equipment and procedures applicable to tree work
- interpreting specifications
- maintaining workplace records
- disposal of plant debris in environmentally aware and sensitive manner
- work health and safety procedures for pruning operations.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment; however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - chainsaws - climbing saw
 - pole saw
 - pruning handsaws
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage - work zone
 - trees and tree parts
- materials:

- pruning operations form
- hazard identification and risk control form
- equipment and PPE check form
- emergency preparation form
- work communications form
- work site operations form
- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB305 Dismantle trees

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to dismantle trees in confined spaces and in difficult or hazardous circumstances.

This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, materials and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. The work requires the application of extensive arboricultural knowledge. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- AHCARB310 Perform aerial rigging
- AHCARB307 Use advanced climbing techniques
- OR
- TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
- FWPFGM3212 Fall trees manually (intermediate).

Note the following chain of prerequisites that also applies to this unit of competency.

Unit of competency	Prerequisite requirement
AHCARB310 Perform aerial rigging	AHCARB207 Perform ground based rigging* AHCARB307 Use advanced climbing techniques*
AHCARB207 Perform ground based rigging	AHCARB311 Tie, dress, set and finish arborist knots
AHCARB307 Use advanced climbing techniques	AHCARB312 Use standard climbing techniques to access trees*
AHCARB312 Use standard climbing techniques to access trees	AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tree removal	1.1 Determine access to site and gain approval by owner or site management 1.2 Confirm site preparations, including notification of local residents and authorities where necessary 1.3 Determine location of above-and-below-ground services 1.4 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.5 Protect, relocate and secure assets, property and vegetation related to work zone activities from potential damage during tree removal 1.6 Inspect trees to determine dimensions, appropriate removal methods and to confirm appropriateness of selected risk controls 1.7 Determine drop zone and communicate to all personnel 1.8 Confirm first aid, rescue personnel, equipment and procedures applicable to tree work

Element	Performance criteria
	1.9 Carry out pre-operational and safety checks on tools, equipment and machinery 1.10 Select and use personal protective equipment 1.11 Record and implement work health, safety, site, environmental and traffic control measures
2. Implement dismantling of trees	2.1 Communicate with work team during operations, as required, verbally, using hand signals and whistles 2.2 Calculate mass of tree section, balance of load and confirm mass does not exceed safe working limit of equipment 2.3 Use dismantling techniques to ensure branches and trunk sections fall or are lowered safely into determined drop zone, with no damage to property and equipment or injury to personnel 2.4 Use and control friction devices as required 2.5 Dismantle branches and trunk sections using the 'cut and drop' method, and cut and lower by ropes and other lowering devices 2.6 Use directional felling techniques to ensure trunk of dismantled tree falls safely into determined drop zone with no damage to property and equipment or injury to personnel 2.7 Use and control elevated work platforms as required
3. Complete tree removal	3.1 Reduce dismantled tree sections to manoeuvrable lengths 3.2 Remove plant material and debris from site 3.3 Clean and check tools, equipment and machinery, and store 3.4 Clean and store personal protective equipment 3.5 Record completion of tree removal and report to owner or site manager

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB305 Dismantle trees

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be observed removing a tree in a confined space using directional felling and removing a tree in a confined space using a dismantling process. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- inspecting trees to determine appropriate removal methods
- confirming appropriateness of selected risk controls
- determining access to site and gaining approval by owner or site management
- confirming site preparations, including notification of local residents and authorities where necessary
- recording and implementing work health, safety, site, environmental and traffic control measures
- determining drop zone and communicate to all personnel
- protecting, relocating and securing assets, property and vegetation related to work zone activities from potential damage during tree removal
- selecting, preparing, checking and using tools, equipment and machinery
- selecting and using personal protective equipment
- selecting and using safety equipment
- calculating mass of tree section
- confirming mass of tree section does not exceed the safe working limit of equipment
- dismantling branches and trunk sections using the 'cut and drop' method, and
- cutting and lowering sections by ropes and other lowering devices

- using dismantling techniques to ensure branches and trunk sections fall or are lowered safely into determined drop zone, with no damage to property and equipment or injury to personnel
- using directional felling techniques to ensure trunk of dismantled tree falls safely into determined drop zone with no damage to property and equipment or injury to personnel
- using and controlling friction devices where required
- using and controlling elevated work platforms as required
- reducing dismantled tree section to manoeuvrable lengths without injury to operator
- removing plant material and debris from site
- cleaning and checking tools, equipment and machinery, replacing if faulty or worn, and storing
- recording completion of tree removal and reporting to owner or site manager
- use of advanced rigging techniques
- calculating tree dimensions, mass of tree section and balance of load
- erecting signage, barriers, warning devices and traffic management equipment
- coordinating and sequencing work team activities
- use of industry standard terminology to describe arboriculture and work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site and tree hazards that might be encountered
- selection of low risk tree removal methods
- advanced climbing techniques and rope handling
- selecting and tying, dressing, setting and finishing arborist knots
- operation of lowering devices where required
- types of lowering devices that might be required, including friction devices, and methods for using them
- how to estimate density of tree sections
- the impact of force, breaking strength, safety factors and cycles to failure
- how to identify and evaluate structural defects in trees
- how to determine the density of tree sections
- safe working limits on all relevant rigging and lowering equipment
- methods of estimating mass and balance of load
- first aid and rescue personnel, equipment and procedures applicable to tree work
- methods of minimising environmental impact
- legislation and local regulations governing tree removal.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - rigging equipment
 - single rope technique (SRT) climbing kit
 - static and dynamic rope kit
 - harness
 - lowering and friction devices
 - gaffs/spurs
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - dismantling operations form
 - chainsaw operations form
 - pruning operations form
 - knot identification form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - rescue form - aerial
 - work communications form
 - work site operations form
 - work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB306 Undertake aerial rescue

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to perform an aerial rescue where an injured or unconscious person is safely brought to the ground from a tree or elevated work platform (EWP).

The unit applies to Arborists preparing and planning for the coordination and execution of rescue operations and the implementation of safety and first aid requirements.

Aerial rescue is likely to be undertaken in emergency situations with little or no supervision. It involves working closely with other members of a team to ensure the safety of all personnel and the public during a rescue operation. This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, materials and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- HLTAID003 Provide first aid

- AHCARB310 Perform aerial rigging.

Note the following chain of prerequisites that also applies to this unit of competency.

Unit of competency	Prerequisite requirement
AHCARB310 Perform aerial rigging	AHCARB207 Perform ground based rigging* AHCARB307 Use advanced climbing techniques* OR TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
AHCARB207 Perform ground based rigging	AHCARB311 Tie, dress, set and finish arborist knots
AHCARB307 Use advanced climbing techniques	AHCARB312 Use standard climbing techniques to access trees*
AHCARB312 Use standard climbing techniques to access trees	AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for aerial rescue	1.1 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.2 Confirm emergency communication system is working 1.3 Confirm emergency services contact numbers are documented 1.4 Select, prepare and check first aid equipment and rescue kit

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Position rescue and first aid equipment for easy access 1.6 Clarify own role in rescue situations 1.7 Confirm first aid, rescue personnel, equipment and rescue plan procedures with work team prior to undertaking work 1.8 Select and use personal protective equipment 1.9 Communicate with work team during operations using voice, hand and whistle signals
2. Assess and respond to an aerial emergency situation	2.1 Attempt communication with casualty 2.2 Activate emergency plan and request assistance from work team and public in accordance with rescue plan 2.3 Identify hazards associated with rescue, assess risks and implement suitable controls 2.4 Determine presence of live electrical wires or apparatus that will interfere with ability to access casualty and take appropriate action 2.5 Apply 'Safe Approach Distance' measures to live electrical situations 2.6 Use appropriate access equipment to carry out rescue in accordance with rescue plan 2.7 Maintain communication with casualty
3. Assess nature of injury	3.1 Secure rescuer safely 3.2 Secure casualty 3.3 Assess injuries to determine whether or not to move casualty based on first aid procedures and risk assessment 3.4 Apply first aid that can be performed above ground, as required 3.5 Support, but do not move, a casualty with possible neck or spinal injuries and await expert medical treatment 3.6 Maintain communications with ground crew
4. Lower casualty to ground	4.1 Inform casualty of lowering procedure 4.2 Prepare casualty for descent in accordance with first aid, rescue plan and risk assessments 4.3 Descend tree safely in a controlled manner

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.4 Lower casualty safely to ground with support of ground crew
5. Complete rescue operations	5.1 Apply first aid on ground as needed 5.2 Obtain emergency assistance as required 5.3 Isolate equipment involved in accident for potential investigation and prevent reuse until checked 5.4 Remove all equipment in a controlled manner 5.5 Clean and store equipment 5.6 Clean and store personal protective equipment 5.7 Maintain records of aerial rescue in appropriate format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB306 Undertake aerial rescue

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be observed planning and implementing a rescue operation and undertaking an aerial rescue. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming emergency communication system is working
- confirming emergency services contact numbers are documented
- selecting, preparing and checking first aid equipment and rescue kit
- positioning rescue and first aid equipment for easy access
- clarifying own role in rescue situations
- confirming first aid, rescue personnel, equipment and rescue plan procedures with work team prior to undertaking work
- selecting and using personal protective equipment
- communicating with work team during operations using voice, hand and whistle signals
- attempting communication with casualty
- activating emergency plan and requesting assistance from work team and public in accordance with rescue plan
- identifying hazards associated with rescue, assessing risks and implementing suitable controls

- determining presence of live electrical wires or apparatus that will interfere with ability to access casualty and take appropriate action
- applying 'safe approach distance' measures to live electrical situations
- using appropriate access equipment to carry out rescue in accordance with rescue plan
- maintaining communication with casualty
- securing rescuer safely
- securing casualty
- assessing injuries to determine whether or not to move casualty based on first aid procedures and risk assessment
- applying first aid that can be performed above ground, as required
- supporting, but do not move, a casualty with possible neck or spinal injuries and awaiting expert medical treatment
- maintaining communications with ground crew
- informing casualty of lowering procedure
- preparing casualty for descent in accordance with first aid, rescue plan and risk assessments
- descending tree safely in a controlled manner
- lowering casualty safely to ground with support of ground crew
- applying first aid on ground as needed
- obtaining emergency assistance as required
- isolating equipment involved in accident for potential investigation and prevent reuse until checked
- removing all equipment in a controlled manner
- cleaning and storing equipment
- cleaning and storing personal protective equipment
- maintaining records of aerial rescue in appropriate format
- using industry standard terminology to describe aerial rescues and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- emergency procedures to assist in ground-based rescues of EWP and climbing workers
- hazard identification methods
- risk assessment systems
- Safe Approach Distances
- recognition of live electrical wires or apparatus
- electrical wires and apparatus safety
- first aid procedures
- contents of a first aid kit
- use of a first aid kit
- emergency services communication systems
- emergency services contact numbers
- emergency plans

- appropriate placement of rescue equipment
- use of rescue kits
- rescue personnel, equipment and rescue plan procedures
- how to control risk to rescuer, victim and others
- types of reporting required after rescue
- personal protective equipment
- how to deal with an emergency
- lowering mechanisms for an aerial rescue
- work health and safety records with regards to incident reporting.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - rescue kit
 - rescue dummy
 - emergency communication system
 - rigging equipment
 - single rope technique (SRT) climbing kit
 - static and dynamic rope kit
 - harnesses
 - lowering and friction devices
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - rescue form - aerial
 - hazard identification and risk control form
 - equipment and PPE check form

- emergency preparation form
- knot identification form
- work communications form
- work site operations form.

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes, harnesses and specialist equipment using advanced techniques for the purpose of mobility around the required sections of trees for work positioning.

This unit applies to individuals who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. The work requires the application of extensive arboricultural knowledge. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB312 Use standard climbing techniques to access trees*

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use static and dynamic rope as required 2.6 Select and use triple locking carabiners 2.7 Determine limits, relative advantages and disadvantages of friction hitches
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line safe approach distances and vegetation clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Prepare climbing spurs and gaffs for dismantling operations	4.1 Prepare climbing spurs and gaffs for dismantling operations 4.2 Check all components of climbing spurs for defects and wear 4.3 Check gaff tip profile for correct dimensions using gaff gauge 4.4 Sharpen gaff tip cutting edge with file at defined angle using gaff gauge

Element	Performance criteria
	4.5 Adjust climbing spurs to provide correct operator fit 4.6 Access and perform dismantling work using climbing spurs 4.7 Maintain separation of spurs 4.8 Maintain clearance distance between spurs and ropes
5. Access and ascend tree	5.1 Access and ascend tree using low risk access route with harness and lanyard 5.2 Ascend using single rope, double rope and selected friction hitch as required 5.3 Ascend using uni-ascenders, foot and hand ascenders, and other ascension devices as required 5.4 Use micrograbs, grigris and micro-pulleys as required for mobility and work positioning 5.5 Demonstrate ability to carry out change-overs as required 5.6 Set up redirects and belays using slings and anchors as required 5.7 Select multiple lines to climb trees and tree parts as required 5.8 Select multiple lines to perform tree operations as required
6. Descend from tree	6.1 Descend tree in a controlled manner 6.2 Remove all access equipment in a controlled manner 6.3 Check, clean and store access equipment 6.4 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB307A Undertake complex tree climbing.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed ascending and descending trees using advanced tree climbing practices.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts. The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using static and dynamic rope as required
- selecting and using triple locking carabiners

- determine limits, relative advantages and disadvantages of friction hitches including: Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line safe approach distances and vegetation clearances
- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using single rope, double rope and selected friction hitch as required
- ascending using uni-ascenders and foot ascenders as required
- using micrograbs, grigris and micro-pulleys as required for access and tree operations
- demonstrating ability to carry out change-overs
- setting up redirects and belays using slings and anchors
- selecting multiple lines to access trees and tree parts
- selecting multiple lines to perform tree operations
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- personal protective equipment
- types of climbing ropes
- dynamic and static ropes
- rope characteristics
- uses of climbing ropes
- safe working limits of ropes
- safe working limits of equipment
- defects in ropes, tools and equipment
- climbing harnesses and lanyards

- climbing equipment
- triple action carabiners
- friction hitches including:
 - Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height
- estimation of load
- safe working limits
- tree access techniques and equipment
- strength and suitability requirements
- single and double rope techniques
- uni-ascenders and foot ascenders
- micrograbs, grigris, micro-pulleys
- use of climbing spikes of various lengths
- change-overs
- redirects and belays using slings and anchors
- use of multiple lines to access trees and tree parts
- advanced climbing techniques
- low risk anchor points
- maintenance of awareness of power lines
- power line safe approach distances and vegetation clearances
- controlled descent operations
- controlled removal of access equipment
- cleaning of equipment
- storage of equipment.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of advanced climbing.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit. Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - single rope technique (SRT) climbing kit
 - harness
 - chaps
 - climbing friction hitches
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - trees
- materials:
 - climbing techniques form - advanced
 - climbing log record – advanced
 - tree inspection form
 - hazard identification and risk control form
 - equipment and PPE check form
 - knot identification form
 - work communications form
 - rescue form - aerial

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB308 Install cable and bracing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install cable and bracing hardware into the structure of a tree.

The work requires the application of extensive arboricultural knowledge. This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems.

Some discretion and judgement may be required to the extent of pruning and cable and bracing required for a particular tree. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Determine cable and bracing requirements from client brief 1.2 Determine materials required for installing cable and bracing 1.3 Determine location of above-and-below-ground services 1.4 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.5 Select appropriate cable and bracing tools and equipment 1.6 Select and use personal protective equipment 1.7 Confirm first aid and emergency personnel, equipment and procedures 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Prepare trees for cable and bracing	2.1 Examine structural tree components using visual tree assessment and in accordance with Compartmentalisation of Decay in Trees (CODIT) principles in relation to tree anatomy and physiology 2.2 Examine branches to determine vitality and integrity of attachment ensuring ability to safely implement bracing 2.3 Undertake preliminary pruning in accordance with AS 4373 to aid cable and bracing installation
3. Install cable and bracing	3.1 Discuss planned approach to cable and bracing with other members of work team 3.2 Install cable and bracing 3.3 Determine the requirement for additional pruning to restore tree to its natural habit and form and sustain its growth 3.4 Check and record completed program for quality of work

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB308A Install cable and bracing.

Assessment Requirements for AHCARB308 Install cable and bracing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed installing cable and bracing according to a pruning program.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment
- determining cable and bracing requirements from client brief
- confirming first aid and rescue procedures applicable to tree work
- examining structural tree components
- examining vitality and structural integrity of branch attachments
- identifying work health and safety hazards and assessing risk
- recording and implementing site and traffic control measures
- use of tree climbing techniques or ability to work from an elevated work platform
- installing cable and bracing
- determining requirement for additional pruning
- checking and recording completed program for quality of work
- use of industry standard terminology to describe arboriculture and work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the effect of pruning on tree growth, habit and form
- tree anatomy and tree physiology
- tree pruning techniques appropriate to requirements of species

- visual tree assessment
- selection of appropriate cable and bracing tools and equipment
- selection of suitable personal protective equipment
- the principles and methods of pruning (tree anatomy and physiology)
- identification of work health and safety hazards, risk assessment and risk control application
- quality of pruning work
- cable and bracing techniques appropriate to tree species
- cable and bracing theory
- Compartmentalisation of Decay in Trees (CODIT) principles
- implications of pruning cuts and the way trees respond
- sustainable growth requirements of trees
- natural habit and form of trees
- first aid and rescue personnel, equipment and procedures applicable to tree work
- local government tree protection and preservation regulations
- Australian Standard 4373–2007 relating to tree pruning.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - dynamic and static cable and bracing tools and products
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - cable and bracing operations form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form

- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB309 Implement a tree protection program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a tree protection program.

The work requires the application of a broad range of arboricultural and horticultural skills and knowledge. This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Determine the implementation requirements of the tree protection program	1.1 Determine location of above-and-below-ground services 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Identify trees to be protected, reasons for protection and types of protection methods from the tree protection plan 1.4 Assess and record the environmental impacts of the program 1.5 Identify resources required to implement the program and confirm availability with relevant personnel or suppliers 1.6 Determine, schedule and allocate implementation tasks and make allowances for contingencies 1.7 Discuss information relating to the implementation of the program with appropriate personnel
2. Make site preparations	2.1 Mark the location of protection areas on the site 2.2 Select, prepare, and carry out pre-operational and safety checks, on tools, equipment and machinery 2.3 Select and use personal protective equipment 2.4 Confirm first aid equipment and emergency procedures 2.5 Record and implement work health, safety, site, environmental and traffic control measures
3. Construct protective devices	3.1 Use tools, equipment and materials appropriate to the task 3.2 Construct or assemble tree protection devices with consideration for any needs specific to the species or individual tree 3.3 Install protection devices 3.4 Inspect completed protection devices for viability and take remedial action where necessary
4. Monitor protection program	4.1 Monitor tree health during program 4.2 Take remedial action to maintain tree health 4.3 Check protection devices periodically for their effectiveness 4.4 Report and repair broken, damaged or ineffective components 4.5 Dismantle and remove protection devices 4.6 Clean, maintain and store tools and equipment 4.7 Maintain records

Foundation Skills

Assessment Requirements for AHCARB309 Implement a tree protection program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed determining the protection requirements of a tree, setting out a site according to the requirements of the protection program and constructing protective devices appropriate to the needs of the tree.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- identifying trees to be protected, reasons for protection and types of protection methods
- assessing and recording environmental impacts of the program
- determining, scheduling and allocating implementation tasks
- making allowances for contingencies
- marking location of protection areas on the site
- erect safety barriers and signage to ensure public and operator safety
- carrying out pre-operational and safety checks
- recording and implementing work health, safety, site, environmental and traffic control measures
- constructing or assembling tree protection devices appropriate for needs of tree
- installing tree protection devices
- inspecting completed protection devices for viability
- monitoring tree health
- reporting and repairing broken, damaged or ineffective protection devices
- dismantling and removing protection devices
- maintaining records

- recognising healthy, stressed and damaged trees
- use of industry standard terminology to describe arboriculture and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods of identifying and protecting trees
- tree protection systems, types and methods of protection
- methods of marking sites
- environmental impact assessment methods
- selection, use and maintenance of suitable personal protective equipment
- application of work health safety and environmental controls
- task scheduling and contingency management
- tree health (tree physiology)
- systems for use installation of safety barriers and signage
- tree protection plans
- techniques for assembling or constructing tree protection devices suitable to the requirements of tree species
- protection requirements of tree species
- remedial actions for tree health
- first aid and rescue personnel, equipment and procedures applicable to tree work
- specifications and construction methods for installing protection devices
- environmental factors affecting trees
- principles, regulations and practices for restricting access and traffic management.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - tree protection devices/equipment
 - construction tools
 - personal protective equipment (PPE)
 - first aid and emergency kit

- traffic management kit
- signage – work zone
- trees
- materials:
 - tree maintenance form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB311 Tie, dress, set and finish arborist knots

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to tie, dress, set and finish arborist knots, hitches and bends.

This unit applies to ground based workers undertake defined activities with appropriate methods, tools and information, work in a structured context, apply knowledge and skills to demonstrate limited autonomy and judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assist in preparation of work site	1.1 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.2 Confirm first aid and emergency equipment and procedures applicable to tree work 1.3 Carry out pre-operational and safety checks on ropes and equipment 1.4 Select and use appropriate personal protective equipment 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2. Tie, dress and set arborist knots	2.1 Communicate with work team during operations using voice, hand and whistle signals 2.2 Determine work application for knot for ground-based, aerial, rigging and climbing work tasks 2.3 Determine appropriate knot for locking and non-locking attributes, strength, impact on rope strength, loosening and slippage 2.4 Determine loss of rope strength in using selected knot 2.5 Determine appropriate rope for knot application 2.6 Determine requirements for secondary knots and stopper knots 2.7 Tie rope to form intended knot 2.8 Leave appropriate tail length approximately five times diameter of rope 2.9 Dress knot to align all parts of knot 2.10 Adjust knot to appropriate proportions 2.11 Set knot to 'tighten and load' knot prior to use 2.12 Finish knot with selected stopper knot, tucked tail or suitable tail length
3. Inspect and use knot	3.1 Inspect completed knot 3.2 Check knot for correctness of assembly 3.3 Confirm knot for correct work application 3.4 Maintain effective communication with work team 3.5 Install and use knot in work application 3.6 Untie knot at completion of work task
4. Complete knot operations	4.1 Clean and check ropes 4.2 Report and tag faulty or worn ropes 4.3 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Ground-based Rigging applications must include knowledge of:

- Alpine butterfly knot
- Bowline on the bight
- Cows hitch with better half
- Clove hitch + two half hitches
- Half hitch pre knot
- Klemheist friction knot
- Marline pre knot
- Marline spike hitch
- Riggers knot + two half hitches
- Running bowline
- Sheet bend
- Slippery sheet bend
- Timber hitch
- Zeppelin bend

Above Ground applications must include knowledge of:

- Scaffold knot
- Double Fishermans Knot/Prusik loop
- Girth Hitch
- English Prusik Knot
- Marlin Spike
- Clove Hitch
- Double Overhand Stopper Knot
- Sheet bend
- Slippery Sheet Bend
- Bowline Knot
- Running Bowline Knot

Aerial Rigging applications must include knowledge of:

- Cows hitch
- Riggers knot + two half hitches
- Clove hitch + two half hitches
- Alpine butterfly knot
- Half hitch pre knot
- Marline pre knot

- Marline spike hitch
- Zeppelin bend
- Running bowline
- Bowline on the bight
- Rolling hitch
- Timber hitch
- Sheet bend
- Slippery sheet bend

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB311 Tie, dress, set and finish arborist knots

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and emergency equipment and procedures applicable to tree work
- selecting and using appropriate personal protective equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- communicating with work team during operations using voice, hand and whistle signals
- determining work application for:
 - ground-based knots
 - aerial knots
 - rigging knots and
 - climbing knots
- determining appropriate knot for locking and non-locking attributes, strength, impact on rope strength, loosening and slippage
- determining loss of rope strength using selected knot
- determining appropriate rope for knot application
- determining requirements for secondary knots and stopper knots
- determining appropriate rope used for knot application
- tying knot to form intended knot
- leaving appropriate tail length approximately five times diameter of rope
- dressing knot to align all parts of knot
- setting knot to 'tighten and load' knot prior to use
- finishing knot with selected stopper knot as required

- inspecting completed knot
- checking knot for correctness of assembly
- confirming knot for correct work application
- maintaining effective communication with work team
- installing and using knot in work application
- untying knot at completion of work task
- clean and check ropes
- reporting and tagging faulty or worn ropes
- cleaning and storing personal protective equipment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site-specific risk assessment
- first aid and emergency equipment and procedures
- personal protective equipment
- work health, safety, site, environmental and traffic control measures
- voice, hand and whistle signals
- work applications for knots
- knots for ground-based rigging tasks
- knots for aerial rigging tasks
- knots for climbing work tasks
- determination of appropriate knot by evaluation of knot attributes:
 - locking and non-locking attributes
 - impact on rope strength
 - loosening and
 - slippage
- determining loss of rope strength using selected knot
- determination of appropriate rope for knot application
- knot tying
- intended knot
- tail length
- diameter of rope
- alignment of knot parts
- knot setting
- knot tightening and loading
- stopper knot
- knot finishing
- correctness of assembly and use in application
- inspection, installation and use of knots
- effective work team communications
- tagging system

- checking and cleaning ropes.

Assessment Conditions

It is an industry requirement for the assessment of the knots appropriate to the work application as listed in the Range of Conditions section of this unit of competency.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - static and dynamic rope kit
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
- materials:
 - knot identification form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - work communications form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes and harnesses using standard techniques for the purpose of accessing required sections of trees.

This unit applies to workers who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use dynamic rope 2.6 Select and use triple locking carabiners
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Access and ascend tree	4.1 Access and ascend tree using low risk access route with harness and lanyard 4.2 Ascend using double rope with prussik technique 4.3 Ascend using trunk walking technique and foot ascenders as required
5. Descend from tree	5.1 Descend tree in a controlled manner 5.2 Remove all access equipment in a controlled manner 5.3 Clean and store access equipment 5.4 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB204A Undertake standard climbing techniques.

Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed climbing trees using standard climbing techniques in a safe manner. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using dynamic rope
- selecting and using triple locking carabiners
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line clearances

- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using double rope with prussik technique
- ascending using trunk walking technique and foot ascenders as required
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- personal protective equipment
- types of climbing ropes
- dynamic ropes
- rope characteristics
- uses of climbing ropes
- safe working limits of ropes
- safe working limits of equipment
- defects in ropes, tools and equipment
- climbing harnesses and lanyards
- climbing equipment
- triple locking carabiners
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height

- estimation of load
- safe working limits
- tree access techniques and equipment
- strength and suitability requirements
- double rope with prussik technique
- trunk walking and foot ascenders
- standard climbing technique
- low risk anchor points
- maintenance of awareness of power lines
- power line clearances
- controlled descent operations
- controlled removal of access equipment
- cleaning of equipment
- storage of equipment
- work health and safety measures relating to own work.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of standard climbing.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - standard climbing kit
 - harness
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - trees

- materials:
 - climbing techniques form- standard
 - climbing log record - standard
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - work communications form
 - knot identification form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB314 Implement a tree maintenance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to identify a tree species and assess the health and condition in order to develop, implement and schedule a tree maintenance program and treatments according to safety and environmental procedures.

The unit applies to individuals who work under broad direction in arboriculture and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that all tree maintenance work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Assessment Requirements for AHCARB314 Implement a tree maintenance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared, documented and implemented a tree maintenance program for at least three trees for a period of not less than 3 months in the following situations:

- a tree requiring tree treatments and reduction pruning
- a tree with structural defects and site targets
- a tree requiring health and soil based remediation.

There must also be evidence that the individual has:

- identified site-specific health and safety issues including personal protective equipment required
- assessed abiotic and biotic conditions affecting health of trees and discussed the conditions and factors with client
- documented a tree maintenance program and included in the program the following:
 - tree maintenance requirements
 - treatment methods and equipment
 - environmental implications of treatments
- maintained growing environment of tree in accordance with species needs and scheduled follow-up treatments
- cleaned and sanitised equipment and disposed of waste
- maintained records and reported work outcomes on completion of activities.

All tree maintenance work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for tree maintenance work
- purpose and process for completing job safety analysis (JSA)
- treatments and treatment methods commonly used on trees, including:
 - physical treatments
 - chemical treatments and materials safety data
 - environmental implications of different types of treatments
 - solutions to conflicting treatment options
 - calculations for measuring treatment applications
- structure and development of tree maintenance programs, scheduling and planning
- site assessment to identify conditions impacting the health of trees on site
- recognition and treatment of common tree disorders above and below ground, including:
 - pests and diseases
 - nutritional disorders, deficiencies and toxicities
 - stress-inducing factors for a variety of tree species
 - signs of stress characteristics
 - causes of stress in tree species
 - common structural faults and defects of trees
 - soil-based problems, including compaction
 - sampling procedures identifying pests, diseases and soil conditions
- abiotic issues that could affect the health of tree species, including:
 - temperature extremes
 - frost and sunburn
 - light intensity and duration
 - water, natural rainfall, hail, snow, including volume and distribution
 - wind direction and intensity
 - lightning
 - topography and aspect
 - compaction and drainage
 - pH, salinity and contamination
- biotic issues that could affect the health of tree species, including:
 - soil ecosystem; beneficial and pathogenic organisms
 - humans
 - animals
 - other plants, including vines and mistletoe
- identification and culture of trees, including:
 - techniques for identifying trees

- recognising and maintaining tree cultural requirements
- tree structure and function
- physiological processes affecting tree growth
- compartmentalisation of decay in trees (CODIT)
- tree growth and structure resulting from CODIT responses
- safety while undertaking tree treatments, including:
 - hazards associated with chemical treatments
 - personal protective equipment
 - traffic control
- effect of treatment materials on off-target species
- methods for identification and analysing for tree health, including:
 - methods of testing collected specimens of affected material
 - methods of analysing nutritional status of trees
 - health characteristics of tree species
- tree establishment and tree maintenance, including:
 - standards for selection of tree stock for landscape use - AS2303
 - standards for pruning of amenity trees – AS4373
 - planting and establishment requirements of tree stock
- waste disposal, including:
 - protection of the environment
 - biosecurity and hygiene practices
- safe operation, maintenance, cleaning and sanitation of tree treatment equipment
- record keeping and data management for tree maintenance.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - the trees growing in the conditions stipulated in the performance evidence
- resources, equipment and materials:
 - tree treatment application equipment
 - measuring and weighing equipment
 - chemical spill kit
 - personal protective equipment
 - first aid and emergency kit
- specifications:
 - preferred industry practices (as outlined in the Companion Volume) for tree maintenance work
 - workplace and manufacturer instructions for safe operation, cleaning and storing of treatment equipment

- procedures for application of treatments
- materials safety data sheets
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Assessment Requirements for AHCARB315 Inspect trees for access and work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has inspected at least six trees, each with a client specified scope of works for access and tree work, and where:

- at least 1 tree is inside the safe approach distance of power lines
- at least 2 trees have defects and hazards that will require additional controls specified in the scope of works
- at least 2 trees have defects and hazards that require a change in the work method specified in the scope of works
- at least 1 tree is within the specifications for the scope of works.

There must also be evidence that the individual has for each of the six trees:

- confirmed access to site and identified tree and scope of works
- completed a job safety analysis documenting site-specific items including:
 - work health, safety and environmental hazards
 - risks that were not controlled by the organisational Safe Work Method Statement (SWMS)
 - risk control measures
 - identification of overhead and underground services and approach distances
 - use of personal protective equipment
- inspected tree for structural defects, disease, insects, fauna and other considerations in trunk, roots and branches that may impact tree access or work
- selected an appropriate tree access or tree work method, considering:
 - the scope of works required
 - site and tree hazards identified
 - limitations imposed by crew skill level and resources available
- informed work team of hazards and control measures to implement during access and tree work

- documented control measures, and tree access and work method according to workplace procedures
- advised stakeholders where tree works were altered or rescheduled according to workplace procedures.

All tree inspection work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for tree inspection work
- the use of organisational policies, procedures and documents to conduct a site-specific job safety analysis
- personal protective equipment when conducting tree inspections
- workplace health, safety, site, environmental and traffic control measures
- tree inspection methods and principles, including:
 - locating and identifying trees
 - tree inspection methodology
 - determination of location of above and below ground services
- methods of identifying tree species
- tree species and characteristics that impact on the selection of access to trees and undertaking tree works
- selection of tree access and tree work methods that are appropriate for:
 - the scope of works required
 - site and tree hazards identified
 - limitations imposed by crew skill level and resources available
- recognising limitations and identifying where risks will affect tree access and work methods, and prevent work
- preparation and use of job safety analysis and/or safe work method statement (SWMS) when managing safety risk and local traffic
- safety considerations and procedures when working near overhead power lines, including:
 - basics of electrocution
 - power line types and insulation
 - approach distances and safety zones, voltage and arching
 - authorisations to work near power lines
 - tools, equipment, tree loads, personnel and power line contact
 - legal liability
- safety considerations and procedures when working near underground services, including:
 - underground power
 - gas lines

- wire and optical fibre
- water
- damage and legal liabilities
- safe work practices
- conducting a hazard evaluation of trees and their surrounds
- risk due to work site environment, including wind and weather conditions
- risk due to condition of tree surrounds, including:
 - soil disturbance
 - trip hazards
 - excavations
 - other trees
 - foot and vehicle traffic
- risk due to roots and trunk flare hazards, including:
 - movement
 - decay
 - mechanical damage
 - compromised structure
- risk due to tree trunk and canopy hazards, including:
 - structural defects
 - decay
 - disease
 - cavities
 - swellings
 - aggressive insects and wildlife
 - integrity of attachment of limbs
 - hangers
 - presence of allergic plants or vines
- ecological impediments to accessing trees, including:
 - insects and other fauna
 - habitat and hollows
- field tests on trees to investigate extent of hazards, including:
 - load testing
 - probing cavities
 - testing hollows by sounding
- documentation and reporting requirements relevant to tree inspections and communicating with clients.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - six trees as stipulated in the performance evidence
- resources, equipment and materials:
 - personal protective equipment used for tree inspections
- specifications:
 - legislation, regulations, codes of practice and standards relating to working near services and power lines
 - preferred industry practices (as outlined in the Companion Volume) for tree inspection work
 - documentation for planning and reporting tree inspection work
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB316 Perform pruning operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to perform corrective and remedial pruning operations to trees either from the ground or whilst working at height.

The unit applies to individuals who work in arboriculture under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that all pruning operations work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for pruning operations	1.1 Receive and confirm instructions with supervisor 1.2 Confirm access to site and location of trees and work zones 1.3 Determine type, extent and limit of pruning work in accordance with specifications, scope of works and client brief

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Undertake a site-specific job safety analysis (JSA) and record and implement site-specific control measures</p> <p>1.5 Communicate with work team using agreed methods according to works undertaken and site and environmental conditions</p>
2. Prepare tools, equipment and work environment	<p>2.1 Select tools and equipment for pruning work</p> <p>2.2 Consider access and impact of selected pruning tools and equipment on tree</p> <p>2.3 Carry out pre-operational and safety checks on pruning tools and equipment</p> <p>2.4 Select, check and use personal protective equipment</p> <p>2.5 Disinfect pruning equipment during tree work according to hygiene and biosecurity procedures and tree assessment outcomes</p> <p>2.6 Implement workplace health, safety, site, environmental and traffic control measures according to JSA</p>
3. Determine tree parts to be removed and plan pruning operations	<p>3.1 Investigate tree canopy shape, structure and defects to determine pruning plan</p> <p>3.2 Assess tree structure for stem co-dominance and branch attachment to determine options for pruning cut procedure</p> <p>3.3 Identify tree part requiring removal and select pruning procedure and location of cut from identified pruning cut options</p>
4. Perform pruning operations	<p>4.1 Prepare pruning equipment to ensure cuts are clean</p> <p>4.2 Use pruning tools to make pruning cuts according to industry standards and manufacturer operating instructions</p> <p>4.3 Make cuts from a secure body position with awareness of extant tree hazards</p> <p>4.4 Maintain awareness of power line proximity, safe approach distances and clearances</p> <p>4.5 Select pruning cuts for crown maintenance or crown modification according to scope of works</p> <p>4.6 Perform pre-cutting techniques to avoid splitting or tearing of the stem and bark</p> <p>4.7 Perform final cut according to the principles of compartmentalisation of decay in trees (CODIT) and current industry standards</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.8 Ensure bark at edge of all pruning cuts remains firmly attached
5. Improve pruning quality	5.1 Review previous pruning cuts to determine tree response to pruning activities 5.2 Assess tree response to previous pruning methods and compare with current work practice 5.3 Seek advice from consulting arborists on quality of current pruning work practice 5.4 Identify substandard current pruning cuts and rectify according to advice
6. Complete pruning operations	6.1 Drop or lower pruned material into designated drop zone 6.2 Clean, maintain and store tools and equipment 6.3 Collect and dispose of pruned material according to environmental procedures 6.4 Maintain pruning records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately complete organisational documents, including job safety analysis, using clear language, correct spelling, grammar and industry terminology

Assessment Requirements for AHCARB316 Perform pruning operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated pruning operations according to given specifications for at least 4 trees, including:

- 1 tree with a minimum height of at least 10 metres and a minimum 5 metre spread for which the pruning specifications must include:
 - removal of hazardous dead wood or branches from the tree canopy
 - reduction of the extent of the crown
 - selective pruning to remove branches to resolve specific problems
- 1 tree of less than 4 metres in height to be formatively pruned
- 2 mature trees of at least 10 metres in height, for which the predetermined specifications must include at least 3 of the following maintenance or modification activities:
 - reduced the extent of the crown
 - lifted the height of the crown
 - pruned trees for low voltage line clearance on a residential property
 - performed remedial pruning including removal of dead wood
 - removed dead fronds and fruit from palm trees
 - pollarded a tree.

There must also be evidence that the individual has:

- communicated with work team during operations using communication method agreed with work team
- determined type, extent and limit of pruning work according to the specifications, scope of works, relevant standards and client brief
- operated safely while undertaking work, including:
 - conducted a job safety analysis for the site before work
 - maintained safe approach distances and clearances to power lines
 - selected and used personal protective equipment

- inspected tree for safe access and work
- conducted tree pruning from a secure and safe position
- selected, prepared and checked and safely used tools and equipment and cleaned and maintained for all pruning operations
- determined crown maintenance and modifications required and identified pruning cut options according to Australian Standards AS 4373 including:
 - stem co-dominance
 - stem bark ridge
 - old cuts
 - dead branches
 - occluded and occluding branches
 - used pre-cuts and undercuts of branches to avoid splitting or tearing and ensured bark remained firmly attached
- performed final cuts that complied with principles of compartmentalisation of decay in trees (CODIT), including:
 - cut to the branch collar without leaving a protruding stub
 - used branch bark ridge to determine angle of cut where visible collar is absent
 - ensured lateral branch to which the final cut is made is the correct diameter for the branch being reduced
 - used stem bark ridge to determine the angle of cut when removing a co-dominant stem
 - positioned the final cut guided by positions and angles of joins between tissue of declining or dead stems and those of healthy stems elsewhere in tree
 - ensured bark at edge of cuts remained firmly attached
- conducted a review of pruning practices for tree response to pruning and advice from arborist and modified pruning methods to improve pruning quality
- dropped or lowered pruned material into designated drop zone and collected and removed pruned material according to workplace and environmental procedures
- maintained pruning records according to workplace procedures.

All pruning operations work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of pruning trees and the standards expected, including:
 - canopy maintenance and the principles of dead wooding, crown thinning, selective pruning, formative pruning
 - canopy modification and the principles of reduction pruning, crown lifting, pollarding, remedial pruning, line clearance
- work health and safety procedures for pruning operations

- work site procedures for job safety analysis (JSA) for pruning and activities and control measures, including:
 - recognition of hazards
 - assessing the risks
 - identifying controls
 - documenting a JSA
 - personal protection
 - first aid
 - rescue procedures
- visual tree assessment, including health, growth habit, structure, stability and growing environment
- pruning equipment; advantages and disadvantages and use, including:
 - secateurs
 - chainsaws
 - pole saws
 - handsaws
 - equipment pre-start checks
- tree and branch anatomy and attachments related to pruning, including:
 - lateral branch collars
 - branch bark ridges
 - stem bark ridges
 - occluded and occluding branches
 - dominant and co-dominant stems
- preferred industry practices (as outlined in the Companion Volume) for pruning operations and Australian Standard AS 4373
- gauging the quality of pruning by assessing tree responses to pruning, including:
 - recognising correct and incorrect pruning cuts
 - rectifying poor pruning cuts
- hygiene and biosecurity procedures to minimise cross-infections from pruning activity
- safe communication during tree pruning work, including the impact of noise, environmental conditions, communications resources, and visibility
- communications strategies used in the arboriculture industry, including:
 - voice
 - hand
 - whistle signals
 - electronic communications
- safety considerations and procedures when working near overhead power lines, including:
 - basics of electrocution
 - power line types and insulation
 - approach distances and safety zones, voltage and arcing
 - authorisations to work near power lines

- tools, equipment, tree loads, personnel and power line contact
- legal liability
- workplace records for pruning operations
- environmental procedures and site management and clean-up.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - the trees stipulated to be pruned in the performance evidence
- resources, equipment and materials:
 - chainsaws, including a climbing saw
 - pole saw
 - pruning handsaws
 - personal protective equipment
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - trees and tree parts
- specifications:
 - workplace procedures and instructions related to pruning trees
 - legislation, regulations, codes of practice, Australian Standard AS 4373 related to pruning trees
 - preferred industry practices (as outlined in the Companion Volume) for pruning operations
 - documentation for planning, obtaining permits
- relationships:
 - client and work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB317 Dismantle trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to dismantle trees in close proximity to structures and other assets and in difficult or hazardous circumstances using a specialised range of methods, tools, equipment and materials and requiring the application of extensive arboricultural knowledge.

The unit applies to individuals who work in arboriculture under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that all tree dismantling work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Assessment Requirements for AHCARB317 Dismantle trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has completely dismantled at least 2 trees in close proximity to structures or other assets. For each tree, the individual must have planned, communicated, prepared, conducted and completed each step of the dismantling process in the correct sequence within a timeframe expected by industry.

Each tree must be a minimum of 15 metres in height and have a minimum canopy spread of 10 metres. There must be a drop zone of no more than 4 square metres available with no access within the remaining drip line of the tree representing structures or other assets to be protected.

There must also be evidence that for each tree the individual has:

- controlled the process from start to finish
- devised a plan, communicated the plan and executed the plan
- selected and implemented an appropriate rigging strategy and sequence including:
 - balancing and lifting of lateral branches
 - negative rigging of timber and heads
- dismantled the tree safely and without damage to assets including:
 - selected appropriate tree components and attached rope correctly
 - made accurate and appropriate cuts from safe working positions
 - maintained constant communication with work team

There must also be evidence that the individual has:

- identified workplace health, safety and environmental hazard and risks and implemented controls for the site, including:
 - conducted and completed a job safety analysis (JSA) or safe work method statement (SWMS)
 - prepared and used personal protective equipment
 - protected site and environmental assets

- controlled vehicular and foot traffic, including erected signage, barriers, and warning devices
- identified above and below ground services
- identified site and tree hazards and risks, and adjusted work method or implemented control measures
- assessed size, characteristics and defects of tree and determined dismantling strategy
- confirmed access to emergency response resources and procedures
- selected, prepared, checked and used tools and equipment for rigging and dismantling work, including:
 - identified working load limits of equipment components
 - configured compatible equipment components into appropriate rigging systems
 - identified force that will be applied to components in configured system during planned rigging operations
 - estimated mass of load and ensured force applied during rigging operations did not exceed working load limit of equipment
 - adjusted rigging systems as required to limit force applied to rigging system and tree structure
 - cleaned, inspected, maintained and stored tools and equipment according to workplace procedures
- installed rigging equipment to industry standards including selected and tied the following knots:
 - bowline
 - bowline on a bight
 - clove hitch and two half hitches
 - cows hitch
 - Flemish bend
 - girth hitch
 - half hitch pre knot
 - marlinspike hitch
 - round turn and two half hitches
 - rolling hitch
 - running bowline
 - sheet bend
 - slippery sheet bend
 - timber hitch
 - twin bowline bend
 - zeppelin bend
- used at least one of the following methods to safely access the tree according to dismantling method and strategy:
 - climbing technique
 - elevated work platform (EWP)

- dismantled trees using rigging techniques to ensure no damage to assets, using all of the following methods:
 - cut and drop into designated drop zone
 - cut and lower using rigging and devices
 - step cut, hold and throw
 - directional felling techniques
 - tip lowering, butt lowering, lifting and balancing
 - negative rigging techniques for leaders and vertical timber
 - the use of multiple anchor points
 - floating anchor rigging (simple floating anchor or highline)
 - running anchor rigging ('cradle' rigging or speed line)
- made accurate cuts according to industry standards, including:
 - making cuts from a safe and secure work position
 - selecting appropriate cuts for the desired outcome
 - accurately cutting scarfs, step cuts and back cuts.

All tree dismantling work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- anatomy and physiology of tree species and tree removal strategies
- weather conditions and impact on planning and dismantling procedures, including the effect of wind direction and speed
- site and tree hazards that might be encountered, including:
 - identification and evaluation of structural defects in trees
 - above and below ground services and effect on tree removal procedures
- selection of tree removal methods for trees in close proximity to structures and other assets
- methods for accessing trees for dismantling, including:
 - climbing techniques
 - elevated work platform (EWP) for tree removal
- handling and using ropes for rigging and dismantling trees, including:
 - selecting, tying, dressing, setting and finishing arborist knots for rigging and dismantling trees
- common problems and hazards with rigging and their potential consequences and solutions
- dismantling techniques, including:
 - cut and drop
 - cut and lower

- step cuts
- directional felling
- rigging techniques, including:
 - butt lowering, tip lowering and balancing
 - negative rigging techniques for leaders and trunk sections
 - floating anchor techniques (highlines and floating anchors)
 - running anchor techniques (cradle rigging and speed lines)
 - applying friction at the point of cut
- rigging equipment selection configuration and use for tree dismantling work, including:
 - friction devices
 - pulleys, blocks, connectors and other hardware
 - dead-eye slings, loopie slings and whoopie slings
 - ropes for rigging and dismantling (tag or pulling lines)
 - configuration of equipment into rigging systems
 - impact of force, breaking strength, safety factors and cycles to failure
 - safe working limits on rigging and lowering equipment
- calculation and estimation of tree dimensions and forces in rigging, including:
 - density of tree sections
 - methods of estimating mass of tree sections
 - estimation of force magnitude and direction applied during rigging operations
 - tree structural limitations and defects and impact on rigging and dismantling operations
 - ensuring force applied does not exceed working load limit of equipment components
 - mass dampening effect of rigging systems
- methods of minimising environmental impact
- preferred industry practices (as outlined in the Companion Volume) relating to dismantling of trees
- legislation, regulations and local government laws governing tree removal, including:
 - permits and approvals
 - stakeholder notifications
- site safety controls, including:
 - first aid and rescue personnel
 - equipment and procedures applicable to tree work
 - barriers and traffic control
 - signage and warning devices
 - responsibility for protecting property and assets in work areas and methods to prevent damage
- considerations in developing a tree dismantling process, including:
 - drop zones
 - lowering zones

- locating tools and equipment
- communication requirements for tree dismantling work, including:
 - communicating with clients, residents and authorities
 - communicating with team members
 - coordinating and scheduling work teams
- effective communication strategies during tree removal work, including the impact of:
 - noise
 - environmental conditions
 - communications resources
 - visibility
- tools, equipment and resources required for dismantling trees, including:
 - safe use and operation
 - care and maintenance
 - cleaning and storing
- inspecting equipment for signs of defects, including:
 - defective ropes and equipment
 - legal responsibility for maintaining equipment
 - tagging, replacing and reporting defective equipment
- workplace record keeping and reporting procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - the two trees to be dismantled as stipulated in the performance evidence requirements
- resources, equipment and materials:
 - rigging equipment
 - height access equipment (climbing equipment or EWP)
 - personal protective equipment
 - chainsaws
 - first aid and emergency response equipment
 - traffic management kit and signage
- specifications:
 - workplace procedures and instructions related to dismantling trees
 - legislation, regulations, codes of practice and preferred industry practices (as outlined in the Companion Volume) relating to dismantling work
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB318 Undertake aerial rescue

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to perform an aerial rescue where an injured or trapped climber is safely brought to ground from the tree. It is likely to be undertaken in an emergency situation.

The unit applies to individuals who work in arboriculture under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that tree rescue work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- HLTAID011 Provide First Aid
- AHCARB319 Use arborist climbing techniques.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for aerial rescue	<p>1.1 Confirm emergency communication system is working</p> <p>1.2 Confirm emergency services contact numbers are documented</p> <p>1.3 Select, prepare and check first aid equipment and rescue kit</p> <p>1.4 Position rescue and first aid equipment for easy access</p> <p>1.5 Clarify own role in rescue situations</p> <p>1.6 Confirm first aid, rescue personnel and equipment with work team prior to undertaking rescue</p> <p>1.7 Select, check and use personal protective equipment</p> <p>1.8 Communicate with work team during operations using agreed communication method for the site and activity being undertaken</p>
2. Assess and respond to an aerial emergency situation	<p>2.1 Follow emergency response protocol according to workplace and industry procedures</p> <p>2.2 Stop all work activity and ensure other workers are aware of the incident</p> <p>2.3 Attempt communication with casualty</p> <p>2.4 Activate emergency plan and request assistance from work team and public in accordance with rescue plan</p> <p>2.5 Obtain emergency assistance according to rescue plan</p> <p>2.6 Inspect site and tree for hazards associated with rescue, assess risks and implement controls</p> <p>2.7 Assess if rescue can be conducted safely within work team capability</p> <p>2.8 Seek assistance from emergency rescue services when safe rescue is not possible</p>
3. Access tree to undertake rescue	<p>3.1 Select low-risk access methods to access tree and undertake rescue</p> <p>3.2 Maintain inspection of tree for above-ground hazards during ascent and throughout the rescue</p> <p>3.3 Maintain communication with casualty and ground crew</p> <p>3.4 Select and install suitable anchor points before reaching casualty</p> <p>3.5 Install redirects to ensure good rope angle when reaching casualty</p>
4. Assess casualty condition and system integrity	<p>4.1 Ensure rescuer is secure before approaching casualty</p> <p>4.2 Assess the security of casualty attachment in tree and secure if deemed unstable</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.3 Assess seriousness of condition of casualty according to first aid procedures and risk assessment</p> <p>4.4 Assess integrity of casualty climbing system to determine its suitability for lowering the casualty</p> <p>4.5 Administer first aid above ground according to first aid procedures and risk assessment</p> <p>4.6 Apply first aid protocols for casualties with possible neck or spinal injuries and await expert medical attention</p> <p>4.7 Maintain communications with ground crew</p>
5. Lower casualty to ground	<p>5.1 Inform casualty of lowering procedure</p> <p>5.2 Prepare casualty for descent in accordance with first aid, rescue plan and risk assessments</p> <p>5.3 Select and implement rescue technique relative to rescue and emergency situation and casualty condition</p> <p>5.4 Descend tree safely in a controlled manner</p> <p>5.5 Lower casualty safely to ground with support of ground crew according to emergency conditions</p>
6. Complete rescue operations	<p>6.1 Administer first aid on ground according to casualty condition until emergency services arrive</p> <p>6.2 Transfer responsibility of casualty to emergency services on their arrival</p> <p>6.3 Isolate equipment involved in incident for potential investigation and prevent reuse until checked</p> <p>6.4 Complete incident report and notify affected parties according to organisational procedures and regulatory requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCARB318 Undertake aerial rescue

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted an aerial rescue for each of the following scenarios in a tree that is a minimum of 5 metres in height:

- a pole top rescue, where the casualty must be safely lowered to the ground without the assistance of other crew members and:
 - is attached within 0.5 metres of the top of the pole
 - is at least 5 metres from the ground
- a pick-off rescue without the assistance of other crew members in which the casualty must:
 - be lifted out of their compromised or non-functioning climbing system
 - be transferred to be lowered down on the rescuer's system or on another climbing system
 - be at least 8 metres from the ground
 - be lifted at least 1 metre prior to beginning descent
- a rescue where:
 - the casualty is away from the main trunk of the tree, toward the end of a branch or in a different stem from the primary anchor point
 - the rope angle between the casualty and the primary anchor point must be at least 30°
 - the rescuer must either control the movement of the casualty back under the primary anchor point, or redirect the casualty's line to bring the casualty directly to the ground.

There must also be evidence that the individual has:

- confirmed resources for emergency rescue, including:
 - communications for emergency services and work team
 - first aid equipment, personnel, equipment and procedures
 - emergency rescue and first aid equipment, protocols and procedures
- conducted a pre assessment of the rescue including:

- attempted communication with casualty
- assessed the tree and situation for hazards and risks and determined rescue plan
- sought assistance from emergency services where safe rescue could not be performed
- used tree climbing equipment to carry out rescue, including:
 - accessed tree safely
 - selected and installed anchor points
 - installed redirects to achieve safe rope angle according to rescue requirements
 - secured rescuer and casualty
- demonstrated the procedure for securing and assessing a severe casualty situation, including:
 - assessed casualty injuries
 - administered first aid above ground according to casualty condition
 - arranged for emergency services
- demonstrated the procedure for rescuing a casualty, including:
 - informed and prepared casualty descent
 - descended tree safely in a controlled manner
 - applied first aid on ground
- removed equipment used in rescue in a controlled manner and isolated and secured equipment for potential investigation
- cleaned and stored all equipment
- updated and maintained records of aerial rescue according to workplace and regulatory requirements.

Aerial rescue is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for aerial rescue
- emergency procedures for aerial rescues, including:
 - planning for the event of an emergency
 - dealing with emergencies
 - emergency protocol, including stop work, activate rescue plan, inspect site for tree hazards, delegate crew roles, access tree, install anchor points, reach casualty, lower casualty, and transfer to emergency services
 - accessing trees in emergency situations
 - accessing and utilising emergency services
- assessing site-specific safety in emergency situations, including:
 - methods for identifying risks
 - risk control measures

- safety and procedures when conducting a rescue near overhead power lines, including:
 - basics of electrocution
 - power line types and insulation
 - approach distances and safety zones, voltage and arcing
 - tools, equipment, personnel and power line contact
 - personal protective equipment
- administering first aid in an aerial rescue environment, including:
 - first aid procedures
 - contents and use of a first aid kit
 - first aid in an aerial environment
 - assessing neck and back injuries and procedures
 - first aid on the ground following rescue
 - importance of communication and reassurance of casualty
- communications in a rescue situation, including:
 - emergency services communication systems
 - emergency services contact numbers
 - work team communication methods
- tools, equipment and other resources required for aerial rescue, including:
 - appropriate placement of rescue equipment
 - components of and use of rescue kits
 - rescue personnel, equipment and rescue plan procedures
- controlling risk to rescuer, victim and others during an aerial rescue
- climbing and rigging systems for aerial rescue, including:
 - pole top rescue
 - pick-off rescue
 - lifting moving or transferring casualties to alternate climbing systems
 - ropes, knots and equipment for rescue climbing and rigging systems
 - lifting and lowering systems
 - cleaning, storing and maintaining safety kits and equipment
- workplace health and safety reporting procedures for accidents, incidents and rescue operations, including:
 - site and equipment security for investigations
 - mandatory records
 - workplace records
 - legislative responsibilities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - the trees in which the types of rescue required for assessment can be demonstrated as stipulated in the performance evidence
- resources, equipment and materials:
 - full arborist climbing kit
 - emergency communications equipment
 - personal protective equipment
 - first aid and emergency response equipment
- specifications:
 - workplace and manufacturer instructions for safe operation, cleaning and storing of rescue equipment
 - preferred industry practices (as outlined in the Companion Volume) for aerial rescue
- relationships:
 - work team
 - worker or rescue dummy as stipulated in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have: In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB319 Use arborist climbing techniques

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes, harnesses and specialist equipment using climbing techniques for the purpose of mobility in the canopy of trees to acquire a safe work position.

The unit applies to individuals who work in arboriculture under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that all climbing work is undertaken according to preferred industry practices (as outlined in the Companion Volume).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCARB319 Use arborist climbing techniques

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence the individual has safely and efficiently climbed a tree of at least 18 metres in height and at least 10 metres in canopy spread using rope climbing equipment, without the aid of climbing spurs. The individual must have:

- reached at least five different designated outer extremities of the tree structure
- selected and performed a suitable, safe and efficient access method consistent with the tree structure and the designated working positions
- selected and used suitable, safe and efficient work positioning methods to reach each target, including the use of multiple lines, redirects and advanced climbing methods
- descended the tree safely and retrieved all climbing equipment.

The timeframe allowed to reach the designated targets must meet industry expectations for the size and shape of the tree being climbed.

There must be evidence the individual has safely and efficiently climbed to a height of 15 metres above the ground using climbing spurs in a tree to be removed. The tree must have at least five metres of clear trunk below the lowest branch. The individual must:

- ascend and descend a trunk by spur climbing the trunk without setting a line at the top
- transition around obstacles safely
- perform a self-arrest
- use branch walking techniques to access designated working positions
- descend the tree safely and retrieve all climbing equipment.

The timeframe allowed to reach the designated targets must meet industry expectations for the size and shape of the tree climbed.

There must also be evidence that the individual has:

- installed a throw line in a tree in a predetermined union representing a target of no larger than 600 mm in diameter and at least 20 metres above the throwing position within a timeframe of 15 minutes

- selected, checked and configured climbing equipment components to form safe and functional climbing systems appropriate for climbing tasks
- identified unsafe equipment, climbing system configuration and climbing techniques.

There must also be evidence that the individual has prepared to conduct climbing work, including:

- undertaken a job safety analysis (JSA) for the specific site and work activities and implemented control measures including:
 - confirmed availability of first aid and rescue personnel, equipment and procedures
 - conducted pre-operational and other safety checks, on ropes, harnesses, tools and equipment
 - selected and used personal protective equipment (PPE) and safety equipment
- performed a pre-climb inspection and identified climbing hazards and controlled risks, including:
 - correctly identified tree species
 - assessed tree for stability and tree defects
 - adjusted climbing plan and implemented control measures
- selected, prepared and fitted climbing equipment.

There must also be evidence that the individual has:

- selected an access system and method that is safe, efficient and suitable for the tree structure and work task
- installed climbing and access ropes to suitable tree anchor points within the tree structure, and used throwlines to install:
 - anchor points near the top of the tree
 - a stationary rope technique (SRT) canopy anchor
 - a SRT basal anchor
 - a moving rope technique (MRT) anchor point including the installation of a cambium saver
- safely ascended and descended tree, transitioned between points of attachment and used work positioning methods, including:
 - used MRT and trunk-walking, foot ascenders or footlocking
 - used SRT
 - installed a second point of attachment when in a working position
 - used multiple lines for climbing and tree operations for both MRT and SRT
 - used natural and artificial redirects
 - used climbing spurs for work positioning
- safely retrieving climbing equipment according to industry standards and manufacturer instructions
- tied, dressed, set and finished the following 19 climbing knots and hitches for rigging and climbing applications according to industry standards:
 - scaffold knot
 - double fisherman's bend/prusik loop

- girth hitch
- prusik hitch (English prusik)
- Blake's hitch
- marlinspike hitch
- clove hitch
- double-overhand stopper knot
- sheet bend
- slippery sheet bend
- bowline knot (with a tie-off or stopper knot)
- running bowline knot
- bowline on a bight
- alpine butterfly
- klemheist
- figure-8 loop
- munter hitch
- Flemish bend
- Zeppelin bend
- tied at least one of the following advanced climbing hitches:
 - Distel hitch
 - Valdôtain tresse (French prusik)
 - Schwabisch hitch
 - Knut
- communicated with work team during operations using agreed communication procedures.

All arborist tree climbing work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for arborist tree climbing work
- assessing and selecting methods for climbing trees and methods of tree access, including:
 - selecting a climb plan or work strategy to achieve a scope of works
 - selecting climbing systems that are safe, simple, efficient and ergonomic
 - identifying tree hazards and selecting low-risk work methods
- assessing work health, safety, site, environmental and traffic control measures, including:
 - completing JSAs for site-specific risks
 - purpose of first aid and rescue personnel, equipment and procedures

- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- PPE used when climbing
- arborist climbing equipment, use and maintenance, including:
 - ropes and their materials, construction and characteristics
 - uses of climbing ropes and lanyards
 - types of climbing ropes
 - harnesses
 - triple locking carabiners and other connectors
 - climbing hardware, including ascenders, descenders, mechanical friction devices, false crotches and artificial redirects
 - climbing spurs and gaffs, their preparation and use for climbing trees
 - maintaining separation between spurs, rigging equipment and ropes
- purpose, function, selection, tying, dressing, setting and finishing of arborist knots used for climbing techniques
- safety when climbing trees, including:
 - safe working limits, ropes and equipment
 - defects in ropes, tools and equipment
 - controlled descent operations
 - controlled removal of access equipment
 - forces applied to anchor points during access and work positioning using MRT and SRT
 - forces applied at primary anchor points and at redirects
- hazards to avoid when climbing within the tree canopy, including:
 - power line safe approach distances and vegetation clearances
 - tree structural defects
 - animals or insects
 - hangers or suspended loads
 - deciding on low-risk access routes
- limits, advantages and disadvantages of friction hitches, including:
 - Blake's hitch
 - Prusik hitch (English prusik)
 - klemheist
 - specialised variations, including Distel hitch, Valdôtain tresse (French prusik), Schwabisch hitch, Knut
- selecting appropriate knots suited for rigging or climbing applications and equipment, including:
 - loss of rope strength
 - appropriate knot for application
 - requirements for secondary knots and stopper knots
- arborist knots, including:
 - knot type and tying procedure

- dressing
- setting
- finishing
- communications strategies used in arboriculture, including:
 - voice
 - hand
 - whistle signals
 - electronic communications
- assessing tree access routes, techniques and equipment and evaluating risk, including:
 - moving rope technique (MRT) and stationary rope technique (SRT)
 - use of climbing spikes of various lengths
 - transitions between points of attachment
 - natural and artificial redirects
 - use of multiple lines to access trees and tree parts
 - low-risk anchor points
- inspecting, cleaning, maintaining and storing climbing equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - trees as stipulated in performance evidence
- resources, equipment and materials:
 - full arborists climbing kit
 - climbing spikes
 - communications equipment agreed by work crew
 - PPE
 - first aid and emergency response equipment
- specifications:
 - workplace and manufacturer instructions for safe operation, cleaning and storage of the equipment specified in the assessment conditions
 - preferred industry practices (as outlined in the Companion Volume) for arborist tree climbing work
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed

- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Assessment Requirements for AHCARB320 Install tree support systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed three different types of tree support systems according to a specification, including:

- steel cable
- textile or synthetic cable
- bracing.

There must also be evidence that the individual has:

- interpreted plans and specifications and determined the materials, tools and equipment required for tree support system work
- identified health, safety and environmental hazard and risks and implemented controls for the installation, including:
 - conducted and completed a job safety analysis (JSA)
 - prepared and used personal protective equipment (PPE)
 - maintained awareness of above-ground hazards while performing work
- assembled tree support system ready for installation
- examined structural integrity of the tree
- determined and confirmed the safest access to location of the tree support system
- pruned tree to aid tree support system installation
- accessed the tree safely and secured into work position
- removed, checked, maintained, cleaned, sanitised and stored tools and equipment according to biosecurity procedures
- recorded and reported completed works.

All tree support systems work is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for tree support systems
- the effect of pruning on tree growth, habit and form
- tree anatomy and tree physiology related to tree support systems, including:
 - pruning techniques appropriate to tree species and their response
 - natural habit and form of trees
 - visual tree assessment
 - tree defects and tree support system solutions
- tree support systems principles and techniques suited to tree species, including:
 - steel cabling
 - synthetic cabling
 - bracing
- impact of tree support system on trees, including:
 - the impact on the tree's natural range of movement
 - the impact on the tree's strategy of flexibility
 - the impact on the tree's formation of reactive growth
- tree support system materials, tools and equipment, including:
 - preparation of steel cabling systems and terminations, including eyes, swaging, wire whipping
 - components and preparation of synthetic cabling systems
 - hardware, including installation requirements for eye bolts, lag hooks, wire stops and grips
 - cable types and sizes, tensile strength and selection criteria as related to arborist specifications
 - preparation of bracing components, including types of rod, threading, terminations and tensile strength
 - cable tension and tensioning methods
 - finishing techniques of cables for aesthetics and function
 - finishing techniques of bracing for safety, aesthetics and function
 - checks and adjustments to installed systems over time
- identification of workplace health and safety hazards, risk assessment and risk control application
 - selection of suitable PPE
 - completing a job safety analysis (JSA)
 - first aid and rescue personnel, equipment and procedures applicable to tree work
 - monitoring and managing above-ground hazards
 - electrical safety

- principles of compartmentalisation of decay in trees (CODIT) in relation to the installation of cables and bracing
- hygiene practices and biosecurity when cable bracing, including:
 - reasons for managing hygiene
 - biosecurity principles and procedures
- record keeping and reporting procedures for cable bracing.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - trees with defects requiring cabling and bracing as stipulated in the performance evidence
- resources, equipment and materials:
 - equipment to access a working position for installation of cables and bracing
 - PPE
 - safety equipment, including first aid and emergency response equipment
 - tools and equipment for preparing wire and synthetic ropes, attaching cables to trees and installation of braces
- specifications:
 - workplace and manufacturer documentation for safe operation, cleaning and storage of tree support system equipment
 - preferred industry practices (as outlined in the Companion Volume) for tree support systems
 - arboriculture hygiene and biosecurity standards
 - specifications for the installation of tree support system for specific tree defects
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine implementation requirements of the tree protection program	1.1 Receive and interpret tree protection plan and specifications 1.2 Undertake a site-specific job safety analysis (JSA), record and implement control measures according to workplace safety procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Confirm availability of first aid equipment and emergency procedures 1.4 Identify and access tools, equipment and materials required to implement program 1.5 Determine, schedule and allocate tasks to work team, allowing for contingencies
2. Prepare site for tree protection	2.1 Identify location of tree protection zone from site plan 2.2 Select, prepare, and carry out pre-operational and safety checks, on tools, equipment and machinery 2.3 Select, check and use personal protective equipment 2.4 Survey the tree protection zone and delineate specified boundaries according to workplace procedures 2.5 Install protective barriers and signage according to tree protection plan
3. Install tree protection measures	3.1 Identify requirements for trunk, branch and root protection from tree protection plan 3.2 Select and assemble materials and equipment required to install tree protection measures 3.3 Construct and install protection measures specified in the program 3.4 Inspect completed protection measures and take remedial action where out-of-specification
4. Monitor protection program	4.1 Monitor tree health during scheduled program period 4.2 Assess effectiveness of protection measures during the scheduled period 4.3 Implement remedial action where tree health has been compromised 4.4 Dismantle and remove protection measures and fencing at conclusion of scheduled period 4.5 Clean, maintain and store tools and equipment according to workplace procedures 4.6 Update records and report tree protection outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret and consolidate information from plans and specifications for design requirements to prepare for the installation of tree support systems
Writing	<ul style="list-style-type: none"> Accurately complete organisational documents, including job safety analysis (JSA), using clear language, correct spelling and grammar, and industry terminology
Numeracy	<ul style="list-style-type: none"> Interpret and calculate numerical information from specifications to determine the size and dimensions of materials required to construct tree protection systems

Assessment Requirements for AHCARB321 Implement a tree protection program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the ability to implement a tree protection program for at least two trees, including:

- received and interpreted a tree protection program and identified:
 - trees to be protected
 - protection methods to use
 - schedule required
 - equipment necessary to perform work
- assessed site-specific health and safety issues and completed a job safety analysis (JSA) and ensured first aid resources and emergency procedures were available
- scheduled and allocated tasks to work team
- surveyed and marked out the tree protection zone
- erected barriers and signage
- selected materials and equipment required for tree protection measures
- conducted pre-operational safety checks and post-operational maintenance of equipment and tools
- installed tree protection measures following specifications in plan
- inspected completed protection installations and rectified where out-of-specification
- monitored tree health during protection scheduled period and implemented remedial action where protection has been compromised
- dismantled and removed protection measures
- maintained records and reports of tree protection outcomes.

All tree protection work is required to be performed according to preferred industry practices (as outlined in the Companion Volume), including Australian Standard AS4970.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for tree protection work, including Australian Standard AS4970
- use and interpretation of tree protection plans and specifications, including:
 - tree protection systems, types and methods of protection
 - surveying and marking out tree protection zones (TPZ)
- application of workplace health, safety and environmental controls, including job safety analysis and personal protective equipment (PPE)
- first aid and rescue personnel, equipment and procedures applicable to tree work
- task scheduling and contingency planning for tree protection
- possible damage to tree physiology, and prevention requirements on development and construction sites, including:
 - barriers and signage
 - techniques for assembling or constructing tree protection measures suitable to the requirements of tree species
 - protection requirements of tree species
 - specifications and construction methods for installing protection measures
- environmental factors affecting trees on development and construction sites, including:
 - soil compaction and contamination
 - shading
 - impact on scaffolding
 - excavations and root damage
- principles, regulations, codes of practice and Australian standards for the protection of trees on development and construction sites
- methods used to protect trees on development sites, including:
 - fencing tree protection zones (TPZ) and signage
 - trunk and branch protection
 - soil within the TPZ and root zone protection
- tools, equipment and materials used in tree protection, including preparation, maintenance and biosecurity procedures
- record keeping and reporting procedures for tree protection.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - trees growing on development and construction sites or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - tree protection materials and equipment
 - tools to construct or assemble tree protection measures
 - PPE
 - first aid and emergency response equipment
 - signage for tree protection zones
- specifications:
 - workplace and manufacturer instructions for safe operation, cleaning and storage of equipment used for tree protection work
 - tree protection plans and specifications
 - preferred industry practices (as outlined in the Companion Volume) for tree protection work, including Australian Standard AS4970
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB322 Access trees for inspection

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to access trees for inspection. It does not describe the skills and knowledge required to access trees to conduct arboricultural work, tree pruning or removal.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare site and inspect equipment	1.1 Confirm access to site and scope of works according to workplace procedures 1.2 Undertake a site-specific job safety analysis (JSA), record and implement control measures according to workplace safety procedures 1.3 Confirm availability of first aid and rescue personnel, equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>and procedures</p> <p>1.4 Conduct pre-operational preparations and safety checks, on ropes, harnesses, tools and climbing equipment</p> <p>1.5 Select, check and use personal protective equipment</p>
2. Prepare to access tree	<p>2.1 Inspect tree to determine efficient low-risk access route and climbing method through discussion with work team</p> <p>2.2 Select and prepare climbing equipment according to manufacturer instructions, workplace health and safety regulations and industry standards</p> <p>2.3 Configure climbing equipment components to form functional tree climbing system appropriate to the access method selected</p> <p>2.4 Tie, dress, set and finish climbing knots and hitches according to climbing system</p> <p>2.5 Conduct pre-climb checks of configured systems to ensure compatibility, safety and function according to selected climbing system, industry standards and manufacturer instructions</p>
3. Access tree safely to work position	<p>3.1 Select and install suitable anchor points according to access method selected</p> <p>3.2 Use climbing equipment to ascend tree to suitable work positions within crown using safe access route</p> <p>3.3 Undertake transitions between attachment points safely to reach suitable work positions</p> <p>3.4 Communicate with work team during operations according to work site and environmental conditions using methods agreed with work team</p> <p>3.5 Maintain awareness and clearances to avoid power lines according to workplace safety procedures</p>
4. Descend from tree	<p>4.1 Descend tree using climbing equipment in a controlled manner</p> <p>4.2 Remove all climbing equipment safely in a controlled manner according to manufacturer instructions</p> <p>4.3 Inspect, clean, maintain and store climbing and safety equipment according to manufacturer instructions</p>

Foundation Skills

Assessment Requirements for AHCARB322 Access trees for inspection

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has used climbing techniques to access at least 2 structurally different trees, including:

- confirmed access to site and scope of works
- identified workplace health, safety and environmental hazards and completed a job safety analysis (JSA) or safe work method statement (SWMS) for the site and activities
- confirmed availability of first aid and rescue personnel, equipment and procedures
- conducted pre-operational safety checks, on ropes, harnesses, tools and equipment
- selected and used personal protective equipment (PPE) and safety equipment during works
- inspected tree and discussed with work team to determine a safe and efficient access route
- selected and prepared climbing equipment for accessing tree
- ascended, navigated through and descended tree canopy using harness and lanyard and safe anchor points, following safe climbing techniques, including:
 - moving rope with prusik technique
 - trunk walking technique
 - use of foot ascenders
- tied, dressed, set and finished the following climbing knots and hitches, including:
 - alpine butterfly
 - blake's hitch
 - scaffold knot
 - double fisherman's bend/prusik loop
 - girth hitch
 - English prusik hitch
 - marlinspike hitch
 - munter hitch

- clove hitch
- double-overhand stopper knot
- bowline
- running bowline
- communicated with work team during operations using agreed communication procedures
- maintained safe clearances from power lines
- removed all access equipment in a controlled manner on descend from tree
- inspected, cleaned, maintained and stored climbing and personal protective equipment according to manufacturer instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- assessing and selecting different methods for climbing trees
- workplace health, safety, site, environmental and traffic control measures, including:
 - completing JSAs and SWMS for site-specific risks
 - purpose of first aid and rescue personnel, equipment and procedures
 - pre-operational and safety checks, on ropes, harnesses, tools and equipment
 - PPE used when climbing
- inspection, use and maintenance of arborist climbing equipment, including:
 - ropes and their characteristics
 - rope type, construction and materials
 - rope inspection and failure conditions
 - uses of climbing ropes
 - triple-locking carabiners
 - climbing hardware
- purpose, function, selection, tying, dressing, setting, checking and finishing of arborist knots used for climbing techniques
- safety when climbing trees, including:
 - safe working limits of ropes and equipment
 - defects in ropes, tools and equipment
 - climbing harnesses and lanyards
- hazards to avoid when climbing within the tree canopy, including:
 - safe distances from electrical power lines
 - tree structural defects
 - the presence of insects or other animals
 - deciding on low-risk access routes
- environmental impacts of tree access methods, including:
 - potential impact on tree of various climbing methods
 - impact on animal habitat or food source

- communications strategies used when climbing with a work team, including:
 - voice
 - hand
 - electronic communications
- climbing techniques using ropes and harnesses, including:
 - moving rope with prusik technique
 - trunk walking
 - foot ascenders
 - safe transitions between points of attachment
 - low-risk anchor points
 - controlled descent operations
- controlled removal of access equipment
- procedures for inspecting, cleaning, maintaining and storing climbing equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - two trees with different canopy structures as stipulated in the performance evidence
- resources, equipment and materials:
 - standard climbing kit
 - harness
 - arborist communications equipment
 - personal protective equipment
 - first aid and emergency response equipment
- specifications:
 - workplace and manufacturer instructions for safe operation, cleaning and storage of the equipment specified in the assessment conditions
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Assessment Requirements for AHCARB323 Identify trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has correctly identified at least 80 botanically different trees relevant to the individual's work environment, including the following for each tree:

- identified and recorded key characteristics of tree morphology
- inspected tree for health and assessed effect on characteristics indicative to identification
- used reference materials to compare characteristics with taxonomic classification
- compiled identification data and recorded the identification process according to workplace procedures
- examined tree as habitat for local biota
- identified, evaluated and documented the environmental and social benefits of tree
- recorded and reported outcomes of identification and social and environmental benefits to client and stakeholders according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- methods of identifying trees
- morphological and sensory characteristics in botanical terms, including:
 - leaf arrangement, shape, colour and size
 - tree shape and structure branchlets, branches and bark
 - flower, inflorescence and bud characteristics
 - fruit type and characteristics
 - smell, taste and touch
- local environment of trees and the characteristics of endemic environment that represent tree's ideal growth conditions

- general health and structural condition of trees and their indicative features for identification, including signs and symptoms of diseases, pests or deficiencies and growth form of trees
- collecting and recording of information and data relevant to tree identification
- botanical samples for tree identification, including:
 - photographs and images
 - fresh or dried botanical specimens
- plant taxonomic classification to the level of genus and species
- plant taxonomic features of tree families common to the local area
- research and reference materials used in the identification of tree species, including:
 - field guides
 - basic taxonomic keys
 - journals and botanical references
- benefits and value of trees, including:
 - cultural or social
 - economic
 - conservation or environmental
 - aesthetic
- documenting and reporting procedures for identification and value of trees to key stakeholders, clients and community
- communications strategies for informing client and organisations of tree identification and value
- trees as a biological habitat for plants animals, insects, fungi and vegetation, including:
 - food source and supply
 - microclimate
 - hollows and nesting sites
 - modifier of the soil environment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - 80 botanically different trees stipulated in the performance evidence
- resources, equipment and materials:
 - live tree specimens
 - tools and equipment necessary for tree observations
 - botanical reference materials, tree databases and taxonomic keys
 - camera or image capture devices
- specifications:

- workplace procedures, processes and documents for recording data and preparing reports related to tree identification
- workplace instructions, specifications or client briefs related to tree identification
- relationships:
 - client and stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- vocational competencies at least to the level being assessed
- current industry skills directly relevant to the unit of competency being assessed.

AHCARB324 Use cranes to access and dismantle trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to use cranes to access and dismantle trees in close proximity to assets and in difficult or hazardous circumstances.

The unit applies to individuals who work in arboriculture under broad supervision and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems

The arboriculture industry requires that all tree work with a crane is undertaken according to preferred industry practices (as outlined in the Companion Volume).

Legislation, regulations and by-laws relating to the treatment and removal of trees, and the use of cranes, apply in some states and territories.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- CPCCDO3011A Perform dogging.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
CPCCDO3011A Perform dogging	CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for the use of cranes for tree access and dismantling	1.1 Identify requirements for crane assisted tree work 1.2 Determine the requirements for crane access 1.3 Inspect site to identify site conditions, features and hazards that may affect crane set-up and operation 1.4 Determine crane type and size, and develop plan for crane assisted tree work 1.5 Communicate requirements to crane operator to confirm plan 1.6 Confirm availability of emergency procedures, rescue personnel and equipment
2. Prepare to conduct crane work	2.1 Determine access to site and gain approval from stakeholders 2.2 Confirm site preparations and notification of local residents and authorities according to dismantling plan 2.3 Liaise with crane operator and crane crew to confirm set-up, clearances from electrical services and working area 2.4 Undertake a site-specific job safety analysis (JSA) and record and implement control measures according to workplace safety procedures 2.5 Liaise with crane operator to determine load limit at working radius
3. Prepare arborist equipment ready for dismantling operations	3.1 Inspect trees for defects to inform planned tree access and dismantling strategy 3.2 Discuss strategy with crane operator and crew to confirm site, environment and crane working limitations 3.3 Determine lowering and processing zones and communicate to work team 3.4 Carry out pre-operational and safety checks on arboriculture tools and equipment required for dismantling 3.5 Select, check and use personal protective equipment
4. Access trees to conduct work	4.1 Select and use safe access methods to conduct crane dismantling work 4.2 Use climbing techniques to access trees to conduct crane work 4.3 Use crane to access trees using an approved crane access method according to industry codes, procedures and legislative and regulatory

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements 4.4 Communicate with crane operator and observer using agreed communication methods 4.5 Use climbing techniques to access work positions and perform dismantling operations
5. Prepare for crane dismantling and attach crane to tree sections	5.1 Maintain communication with crane operator and work team during operations using agreed communication methods 5.2 Use hand and whistle signals to communicate with crane operator according to industry standards 5.3 Select and apply crane lifting methods and sequence according to dismantling strategy and safety procedures 5.4 Determine weight of each tree section and communicate to crane operator 5.5 Attach crane with lifting gear to each tree section according to load limits, centre of gravity and planned lifting operation 5.6 Communicate pre-tension requirements to crane operator
6. Use crane to dismantle tree	6.1 Perform cuts to remove tree sections according to desired lifting operation 6.2 Control and monitor tree section removal and direct crane operator throughout lifting operations 6.3 Communicate with crane operator regarding lifting operation and adjust dismantling strategy 6.4 Apply arborist rigging and felling techniques when crane support is not required 6.5 Adjust work pace and methods to match processing capacity of ground crew and environmental conditions 6.6 Perform final dismantling and lifting operations for tree removal work according to specifications
7. Complete tree dismantling procedures	7.1 Confirm completion of tree dismantling work with crane operator according to workplace procedures 7.2 Clean, check and store tools and equipment according to workplace procedures 7.3 Record completion of tree removal, and report to stakeholders according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB324 Use cranes to access and dismantle trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has fully dismantled at least one tree of a minimum 15 metres in height and with a canopy spread of 10 metres or greater using a crane. The tree must be in close proximity to structures or other assets. The individual must take charge of the process from planning to completion, including the safeguarding of assets.

There must also be evidence that in dismantling the tree, the individual has:

- controlled the process from start to finish
- devised a plan, communicated the plan to work team and crane operator, and executed the plan
- selected and implemented appropriate rigging strategy and sequence for crane work
- planned and dismantled the tree without damage to the assets
- selected appropriate tree components and attached rigging to crane correctly
- performed accurate cuts appropriate to safe crane lifting operations
- maintained constant communication with work team and crane operator
- completed the work safely.

There must also be evidence that the individual has:

- identified work requirements and obtained relevant compliance approvals
- determined the site access, inspected site for safety hazards for crane set-up and dismantling works and confirmed working areas and set-up with crane operator and crew
- undertaken a site-specific job safety analysis and recorded and implemented control measures including:
 - confirmed the availability of emergency procedures, rescue personnel and equipment
 - appointed a spotter to ensure crane clearances from overhead services and obstructions
 - selected, checked and used personal protective equipment
 - selected and used safe access methods for crane dismantling work
- carried out pre-operational and safety checks on arborist tools and equipment

- accessed tree and safe working positions and communicated with work team throughout dismantling operations
- performed dismantling operations including:
 - determined weight of tree section and communicated requirements to crane operator
 - attached tree section to crane with lifting gear according to load limits, centre of gravity and lifting operations
 - controlled and monitored tree section removal and directed crane operator throughout operation
 - applied arborist rigging and felling techniques
- adjusted work pace and methods to match ground crew processing operations
- confirmed completion of dismantling work with crane operator
- cleaned, checked and stored tools and equipment according to workplace procedures
- recorded completion of works and reported to stakeholders.

All tree dismantling work with a crane is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements for crane access and safe operation and limitations when deciding on dismantling operations with cranes, including:
 - sizes and weight of cranes for purpose
 - types and methods for stabilising and impact on surfaces
 - surface structures, including: fill, storm water pipes, retention tanks, driveways
 - soil and ground stability and slope
 - clearances from buildings and structures
 - no-go zones above and near electrical conductors
 - clearances from other trees and potential root zone damage
 - distance of reach to weight
- regulatory requirements for use of cranes on sites, including:
 - local government roadside permits
 - energy authority permits
 - preferred industry practices (as outlined in the Companion Volume) for tree dismantling work
- selection criteria for using cranes for arboriculture work
- arborist requirements for crane set-up, including:
 - crane footprint and set-up area
 - working area
 - working radius
 - largest estimated lift

- order of dismantle
- workplace health, safety, site, environmental and traffic control measures, including:
 - completing JSAs for site-specific risks
 - purpose of first aid and rescue personnel, equipment and procedures
 - pre-operational and safety checks, on ropes, harnesses, tools and equipment
 - personal protective equipment used when climbing
- work planning procedures and collaboration when working with crane operator, including:
 - preparing a dismantling strategy
 - tree access procedures and resources
- arborist climbing equipment and techniques to access and work in trees
- purpose, function, selection, tying, dressing, setting and finishing of arborist knots used for climbing techniques
- safety when climbing trees, including:
 - safe working limits, ropes and equipment
 - defects in ropes, tools and equipment
 - controlled descent operations
 - controlled removal of access equipment
 - forces applied to anchor points during access and work positioning using MRT and SRT
 - forces applied at primary anchor points and at redirects
- hazards to avoid when working within the tree canopy near cranes, including:
 - spatial awareness for crane and cabling components
 - power line, no-go zones, safe approach distances and vegetation clearances
 - tree structural defects
 - animals or insects
 - deciding on low-risk access routes
- access to tree canopy using cranes, including:
 - local state or territory legislation and regulations
 - attaching to the crane hook
 - safety implications
- communications strategies between ground crews, crane operators or crane crew, including:
 - hand and whistle signals
 - UHF or Bluetooth communications
 - crane industry standards for communication
- attaching tree components and loads to crane hooks, including:
 - crane attachment slings
 - chains and cables
 - dead-eye slings
 - estimating load and balance of tree components

- controlling tree sections during crane lift, including:
 - controlling balance
 - methods for controlling branches, leaders and trunk
- dismantle techniques for branches and trunk sections, including:
 - cut and drop method
 - directional felling
 - arborist rigging techniques
- records and reporting procedures for crane supported tree dismantling operations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a crane and a tree to be dismantled as stipulated in the performance evidence
- resources, equipment and materials:
 - rigging equipment
 - personal protective equipment
 - first aid and emergency response equipment
 - crane slings and rigging equipment
 - pruning and cutting tools and equipment
- specifications:
 - workplace procedures and instructions for dismantling trees with cranes
 - legislation, regulations, codes of practice and standards relating to crane use and dismantling of trees
 - preferred industry practices (as outlined in the Companion Volume) for tree dismantling work
 - documentation for planning, obtaining permits and reporting tree dismantling work with cranes
- relationships:
 - work team and crane operator.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB325 Manage trees to create and maintain habitat refuges

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to create and maintain habitat refuges in trees involving the installation of nesting boxes and the use of pruning techniques for habitat hollow and cavity creation in trees. It also involves the retention and positioning of materials from tree works for ground level habitat and refuges.

The unit applies to individuals who work in arboriculture under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

The arboriculture industry requires that all arboriculture work to create and maintain habitat refuges is undertaken according to preferred industry practices (as outlined in the Companion Volume).

No licensing, legislative or certification requirements are to this unit at the time of publication.

Pre-requisite Unit

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare site and inspect equipment	1.1 Interpret and confirm target area work instruction with supervisor 1.2 Select, check and use personal protective equipment 1.3 Conduct pre-operational preparations and safety checks, on ropes, harnesses, tools and equipment 1.4 Undertake a site-specific job safety analysis (JSA), record and implement control measures according to workplace safety procedures
2. Retain and stabilise trees and standing vegetation for wood habitat	2.1 Identify vegetation with existing viable hollows 2.2 Plan retention of standing vegetation with viable hollows and defects 2.3 Identify environmental pruning points to accommodate retention or formation of hollows 2.4 Determine length of limb to be retained according to weight, size and natural fracture points 2.5 Identify and retain branch stubs and residual epicormic growth on lower limb sections 2.6 Implement pruning cuts to tension side of wood to weaken branch at desired point for fracture pruning 2.7 Apply physical force to create natural fracture and breakage of branch at desired point 2.8 Undertake coronet cutting using equipment that minimises contaminants on cut surface 2.9 Use materials and equipment to protect the environment from residues according to workplace and environmental procedures
3. Implement vegetation management techniques to create habitat	3.1 Identify and select vegetation suitable for habitat creation work 3.2 Apply natural fracture pruning techniques consistent with natural branch failure 3.3 Implement coronet cuts on branches or stub according to specifications 3.4 Fracture prune from ground or aerially and remove excess branches safely at a natural breakage point, leaving stub to specified length according to job requirements 3.5 Prepare habitat hollows with an angled faceplate to prevent ingress of water 3.6 Remove internal wood from hollows and install faceplate and

Elements	Performance Criteria

Assessment Requirements for AHCARB325 Manage trees to create and maintain habitat refuges

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed vegetation to create and maintain habitat refuges in at least one tree not less than six metres tall with a stem diameter of at least 20cm at four metres above the ground, including:

- complied with all safety requirements including:
 - completed job safety analysis
 - used personal protective equipment
 - conducted pre-operational preparation and checks on ropes, harnesses, tools and equipment
- identified and implemented measures to prevent tree and environmental health issues including:
 - cleaned and sanitised chainsaws and equipment
 - cleaned up waste and used materials and equipment to protect the environment from residues
- accessed tree for habitat and hollow activities and fracture pruning either:
 - a mobile elevated work platform (MEWP)
 - or arborist climbing techniques
- selected vegetation and created habitats and hollows in trees including:
 - retained viable hollows and defects
 - used fracture pruning applying force using within the tree or hook poles or ropes from the ground
 - identified suitable points to retain or create new hollows
 - retained branch stubs and epicormic growth on tree limbs
- used pruning techniques for habitat creation on branches with a diameter of no less than 20cm, including:
 - natural fractures

- coronet cuts
- pruned and removed excess branches
- ensured overhang is retained to prevent water ingress
- prepared at least three habitat hollows or cavities in trees at least four metres above the ground with a tree diameter of no less than 20cm, including:
 - angled faceplate to prevent water ingress
 - removed internal wood
 - installed or repaired faceplate and entrance hole no closer than 30cm to branch bark ridge
 - installed faceplate through side or rear wall of cavity or through faceplate of sufficient thickness
 - prepared artificial habitat hollow to meet specified dimensions of target fauna for size of hollow, height, and entrance
 - removed an unsafe hollow branch and reinstalled back into a tree with same orientation and attitude
 - removed a branch containing a cavity and reinstalled and fixed cavity branch back into tree or another tree with same orientation and attitude
- installed the following types of nesting boxes:
 - two boxes using natural materials
 - two boxes using artificially constructed structures
- retained materials from tree works for ground habitat, refuges or burrows and restored the site.

All arboriculture work to create and maintain habitat refuges is required to be performed according to preferred industry practices (as outlined in the Companion Volume).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) for arboriculture work to create and maintain habitat refuges
- importance and impact of living and dead vegetation in the environment, including:
 - habitat and refuges
 - public safety and environmental hazard and removal
 - risk management
- common vegetation features providing an ecological habitat, including:
 - stubs, snags, tears and scars
 - fungi
 - dead wood volumes
 - hollows, cavities and small holes
 - animal/insect damage and food

- defective branch union
- bird damage
- extent and quality of fungus rot and colonising organisms
- tree response to infection and compartmentalisation of decay in trees (CODIT), including biosecurity and infection controls
- conservation values of a dead wood habitat and a live wood habitat
- removal or reduction of dead wood or living wood to prevent breakage, including:
 - natural fracture pruning from the ground using hook poles or ropes
 - natural fracture pruning aurally by applying direct force with hand or foot
 - coronet cutting
 - retention of materials suitable for positioning in the landscape for ground burrows, habitat and refuges
 - leaving and rendering safe root plate of fallen trees for animal burrows, habitat and refuges
- different types of ground level refuges, including:
 - vegetation
 - soil
 - artificial
- the nature and role of habitat trees, including:
 - characteristics and essential components of plant and animal life cycles
 - features associated with ageing
 - value or potential value
 - hollows, cavities and roosting branches
 - removal and replacement of hollows or cavities
- nesting box designs and installation, including:
 - animal and bird species and nesting box design
 - natural materials repurposed for nesting structures
 - artificially constructed structures, materials, design and installation
- heritage or protected vegetation, environmental overlays and regulated vegetation, including:
 - historical and cultural aspects of vegetation
 - Aboriginal and Torres Strait Island mortuary and sacred/cultural trees
- pruning techniques for habitat development and possible consequence, including:
 - weakening branches to ensure pruning cut protrudes into the wood of not more than 30% of the diameter at the cut point
 - wood not weakened to break at the desired fracture point
 - cutting with a 15 degree opening on the compression side of the wood to allow the vegetation to fracture
 - use of ropes and pulleys to apply the sufficient force to assist the breakage
 - removal of excess branches and importance of leaving stub lengths of at least 20 cm

- pruning techniques to allow colonisation points for beneficial fungi, invertebrates and small animals
- pruning techniques for habitat hollow and cavity creation in vegetation for larger animals
- importance of retaining and creating variations in dead wood habitat niches
- natural fracture pruning techniques, including:
 - when to apply to branches <20 cm in diameter
 - fibre separation, along the grain and splintering
 - fibre separation in various planes, linear, radial and circumferential
 - natural fracture points
 - appropriate use of hand saws and equipment
 - approved chainsaw use and bar oil to avoid contamination of pruning cuts
- relevant statutory and local authority requirements
- personal protective equipment, including:
 - chaps or chainsaw pants
 - hand tools such as shovels, saws, drills, screwdrivers, hammers
 - ear protection
 - full face helmet/visor or safety glasses
 - harness and full body for MEWP or work position harness for tree climber
 - gloves
 - safety helmet
 - steel-cap boots
- potential hazards when managing vegetation, including:
 - animal responses to interference
 - vegetation density
 - incorrect and unsafe pruning methods used by self and others
 - incorrect and unsafe approaches to staking severed trunks or limbs
 - power lines and utilities
 - unsafe tree climbing methods
 - unsafe use of MEWP
 - unstable ground for equipment
- structural integrity and defects within vegetation that pose a threat to infrastructure, persons in and using the immediate area, and tree health, including:
 - broken branches
 - cankers
 - cracks
 - dead wood
 - decay/fungi
 - poor branch unions
 - poor vegetation architecture

- root problems
- torsional fractures
- environmental and biodiversity values
- when to use natural fracture pruning, coronet cutting and habitat hollow and cavity creation, including alternatives to felling trees to render them safe and retain dead wood habitat.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a site with a range of vegetation requiring natural fracture pruning, coronet cutting, and habitat and cavity creation stipulated in the performance evidence
 - an appropriate site where branch habitat hollows and cavities in branches can be created, nesting boxes can be constructed and installed, and burrows and ground level refuges can be created
- resources, equipment and materials:
 - arborist climbing kit or MEWP for accessing trees
 - personal protection equipment
 - tools, equipment and materials for pruning, constructing and installing habitat, burrows and nesting boxes
- specifications:
 - workplace policies, procedures, operations manuals and instructions related to pruning vegetation to manage habitat
 - biosecurity procedures for managing environmental contamination
 - regulations and codes of practice that relate to pruning vegetation to manage habitat
 - preferred industry practices (as outlined in the Companion Volume) for arboriculture work to create and maintain habitat refuges
 - plans, diagrams and specifications for installing nesting boxes
 - specification for fauna habitat
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.
-

AHCARB406 Verify pruning specifications

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to verify specifications for pruning against tree conditions and national industry standards.

The unit applies to individuals who work in arboriculture and apply specialist skills to provide solutions to technical and unpredictable problems. They work autonomously, instruct and monitor the work of others within a team. They use discretion and judgment in the selection, allocation and use of available resources.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Locate and verify tree and site characteristics	1.1 Confirm trees to be pruned and desired outcomes for pruning works according to client brief and arborist specifications 1.2 Undertake a site-specific job safety analysis (JSA) and record and implement control measures according to workplace safety procedures 1.3 Confirm identified tree species and location according to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace and botanical standards 1.4 Determine dimensions of tree and record characteristics according to workplace requirements
2. Inspect tree and determine pruning specifications	2.1 Inspect and assess condition and growing environment for trees identified in client brief and specifications 2.2 Determine planned pruning operations required for canopy modification or canopy maintenance according to industry standards 2.3 Determine tree care requirements to compensate for planned pruning operations 2.4 Identify and select biosecurity procedures for planned pruning operations
3. Confirm and validate pruning operations	3.1 Review client brief and arborist specifications against tree inspections and planned pruning operations 3.2 Confirm pruning operations comply with client brief and arborist specifications 3.3 Verify planned pruning operations for compliance with industry standards
4. Confirm pruning works with client and work team	4.1 Document planned pruning operations according to workplace procedures 4.2 Confirm and clarify pruning operations plan with client and arborist 4.3 Prepare specifications and contract for pruning works and submit to client for approval according to workplace procedures and industry standards 4.4 Provide specification of pruning operations to work crew for implementation
5. Maintain records of pruning works	5.1 Assess pruning works performed against pruning specifications 5.2 Implement remedial action where anomalies are identified 5.3 Review works with work crew and document improvements for future works 5.4 Record results of completed works and report to client according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret complex documents, plans and specifications to extract critical information to compare pruning requirements against work performed
Writing	<ul style="list-style-type: none"> Create, edit and proofread contracts, specifications and records, ensuring clarity of meaning, accuracy and consistency of information

Assessment Requirements for AHCARB406 Verify pruning specifications

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has verified pruning specifications on at least nine trees for three different classes of pruning, with no more than one pruning class per tree, including:

- confirmed and identified tree species to be pruned and its size and characteristics
- assessed and documented site safety and implemented controls
- assessed the tree to be pruned for condition and growing environment and determined planned pruning operations and compensatory tree care
- reviewed and confirmed planned pruning operations complied with client brief, arborist specifications and industry standards
- documented planned pruning operations and confirmed with client and arborist
- prepared pruning specification and contract for approvals and provided specifications to work team
- assessed completed pruning works against specifications and implemented remedial action for non-compliance
- reviewed pruning operations and documented future improvements
- maintained records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work health, safety, site and environment, including:
 - preparing job safety analysis and safe work method statements for site-specific risks
 - personal protective equipment used when climbing
 - safety and procedures when working near overhead power lines
- specifications and Australian Standard AS4373 for crown maintenance, including:

- dead wooding
- crown thinning
- selective pruning
- formative pruning
- specifications and Australian Standard AS4373 for crown modification, including:
 - reduction pruning
 - crown lifting
 - pollarding
 - remedial or restorative pruning
 - utilities line clearing
- current national recognised industry standards relating to tree pruning operations
- tree species identification standards, including:
 - botanical nomenclature
 - common names
- characteristics of trees and pruning operations, including:
 - approximating height and canopy size and spread
 - trunk dimensions as diameter-at-breast-height (DBH)
 - estimating total crown foliage
 - the location and distribution of branches
 - estimating extent of pruning as a percentage of canopy
 - specification of key reference points within a tree
- tree's health, growth habit, structure, stability and growing environment
- post-pruning tree care, including:
 - impacts arising from pruning of live tissue
 - compensatory tree care activities
- minimising transmission of diseases with pruning equipment and materials, including:
 - biosecurity requirements
 - basic principles of hygiene when maintaining tools and equipment
- pruning procedures and methods, including:
 - maximum and average diameter of live branches
 - minimum clearance distances
 - branch pattern
 - direction of branch growth by selecting north, south, east or west
 - approximation of branch collar diameter
 - location of pruning point
- crown maintenance and modifications and pruning cut options, including:
 - stem co-dominance
 - stem bark ridge
 - old cuts
 - dead branches

- occluded and occluding branches
- basics of contracts and their purpose in arboriculture work, including:
 - client communication strategies
 - verbal contracts
 - documented contracts
 - legal requirements
- importance of gaining regulatory approvals
- specifying and documenting pruning work requirements
- record keeping and reporting procedures when verifying pruning specifications.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - nine different trees stipulated in the performance evidence
- resources, equipment and materials:
 - computer for accessing information and documenting outcomes
- specifications:
 - client or arborist specifications for pruning as stipulated in the performance evidence
 - workplace procedures and instructions, related to pruning operations
 - preferred industry practices (as outlined in the Companion Volume) relating to tree pruning operations, including AS4373
- relationships:
 - client and work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Assessment Requirements for AHCARB407 Supervise and audit tree operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion demonstrated the ability to supervise and audit tree operations on an arboriculture work site with no less than 2 team members and has:

- confirmed tree operations specifications with client brief and arborist and communicated and verified understanding with work team
- conducted a safety audit and analysis of site, tree operations, work team, equipment and machinery against safety procedures
- assessed site access conditions for equipment and personnel and ensured pruning tools, equipment and machinery complied with specification
- monitored site establishment, reviewed tree assessment report and confirmed tree operational works against specifications and standards
- monitored work team activity and tree operations and provided appropriate feedback
- identified and resolved issues of poor performance and non-compliance
- estimated and recorded progress of tree operations against planned works and reviewed completed works against quality standards
- recorded and reported tree operation audit outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- site-specific hazards, risks and controls and the role of the JSA, including:
 - work health and safety hazards
 - work health, safety, site, environmental and traffic control measures
 - hazards and hazardous site conditions
 - safe use and operation of pruning tools, equipment and machinery

- preferred industry practices (as outlined in the Companion Volume) relating to tree operations
- basic safety auditing procedures for personal protection standards and recording and reporting procedures for breaches in safety
- documenting and interpretation of tree operations specifications, including:
 - compliance with Australian standards
 - compliance to specifications
 - types of tree work and expected standards
- supervising an arboriculture site establishment, including:
 - conformance to requirements
 - communications strategies for work teams and the role of toolbox meetings
 - tree evaluation and expected impact on worksite activities
- staff performance review procedures, including:
 - feedback process and the benefits of positive feedback
 - communicating and dealing with poor performance and the use of improvement notices
- work team performance improvement strategies, including professional development
- auditing quality of pruning works
- work team member performance management, including:
 - attendance and punctuality
 - conflict
 - breaches in safety procedures
 - dealing with drug and alcohol abuse
- record keeping and reporting procedures for tree operations, including:
 - digital images and role in recording performance and compliance
 - mandatory and workplace-specific documentation and reporting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - access to active arboriculture work site with work team and tree operations, or environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer and software for accessing information and documenting outcomes
 - digital image capture device for recording outcomes
- specifications:
 - workplace procedures, instructions and arborist specifications for tree operations
 - preferred industry practices (as outlined in the Companion Volume) relating to tree operations

- relationships:
 - client and work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB408 Perform a ground-based tree defect evaluation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to examine trees from the ground, assess and test them for defects, evaluate the potential risk of failure, secure the site and report the condition to specialist arborist for a tree risk assessment.

The unit applies to individuals who work in arboriculture and apply specialist skills to provide solutions to technical and unpredictable problems. They work autonomously, instruct and monitor the work of others within a team. They use discretion and judgment in the selection, allocation and use of available resources.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Assessment Requirements for AHCARB408 Perform a ground-based tree defect evaluation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted a whole-of-tree defect evaluation from the ground for at least 20 individual trees with defects, from at least 10 different species.

There must also be evidence that the individual has:

- performed a site-specific job safety analysis (JSA) and recorded and implemented control measures
- determined tree hazard benchmarks for the project
- considered relationship between tree species, defects and potential risk
- examined trees for indicators of the following defects:
 - tree health
 - visible physical defects
 - damage from organisms
- assessed examination results to determine potential structural failure
- conducted tests to determine visual and concealed defects, including:
 - sounding accessible visual and concealed defects
 - probing accessible cavities
 - exposing and examining root crown
 - removing loose bark and examining for defects
- assessed test results for structural integrity against tree hazard benchmarks
- recorded details of tree under defect evaluation, including:
 - captured images of tree
 - identified tree to genus, species and common name
 - estimated approximate dimensions of tree
 - identified geographical location of tree
- recorded the following attributes of the defects:
 - image of the defect

- location within the tree canopy
- visual indicators of the defect
- estimated the dimensions of defect and affected tree component
- identified potential target from client brief and assessed consequences of tree defects on structural integrity and risk to target
- advised client on outcomes of tree defect evaluation
- implemented action to mitigate tree hazard according to client and workplace procedures
- documented actions taken to mitigate risk
- reviewed tree defect evaluation results and assessed possible options for controlling hazard
- identified and recommended action for client approval
- compiled all results, records and recommendations, and documented in tree defect evaluation report according to workplace procedures
- submitted tree defect evaluation report to client according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work health, safety and environmental hazards, assessing risk and the role of a JSA
- preferred industry practices (as outlined in the Companion Volume) relating to tree defects and effect on structural integrity
- structure and function of client briefs and their interpretation, including:
 - targets and the role of targets in tree risk assessment
 - industry and client tree hazard benchmarks
- work health, safety and environmental hazards, assessing risk and the role of a JSA
- noting and specifying tree under evaluation, including recording:
 - plant naming conventions
 - estimating tree dimensions from the ground
 - specifying geographic location on maps, pictures and global positioning systems (GPS)
- tree examination procedures and methods from the ground, including:
 - signs and symptoms of health of trees
 - methods for determining tree health
 - tree anatomy and morphology relating to structural failures
- tools and equipment required to assist in tree examinations, including:
 - cameras and digital imaging
 - sounding mallet and probing tools
 - materials
- recognising visual indicators of tree defects, their causes and effect on structural failure, including:
 - visible and concealed defects, including cavities, cracks and included bark

- common symptoms of diseases (e.g. rot, fungal growth, loose bark)
- common signs of organisms (e.g. holes, frass, live organisms, loose bark)
- testing procedures for confirming visual indicators of tree health and structural defects, including:
 - sounding and probing techniques for defects
 - loose bark removal and signs of defects
 - exposure of root crown to identify root and crown defects
- health and approximate dimensions of the tree and affected tree part and defect
- documentation of the tree defect evaluation, including:
 - digital imaging and photographs
 - reports and reporting styles and industry best practice
- assessing tree hazards and likelihood of failure, including:
 - potential consequences
 - measures to rectify
 - types of potential target
 - urgency for notifications and gauging imminent threat
 - isolation of hazardous trees
 - moving potential target
 - size of tree and its defects
- considerations for remedial action arising from defect evaluation, including:
 - aerial inspection
 - load testing
 - role of a consulting arborist, and seeking further advice from consulting arborist
 - laboratory testing
- documenting and presenting reports to clients.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - 20 trees from 10 different species as stipulated in the performance evidence
- resources, equipment and materials:
 - cross-sectioned tree components representing visual indicators of tree defects
 - computer and computer software
 - digital image capture device
- specifications:
 - workplace procedures, instructions and client brief for trees requiring evaluation
 - preferred industry practices (as outlined in the Companion Volume) relating to tree defects and effect on structural integrity
- relationships:

- client and consulting arborist.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB409 Conduct a safety audit

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to prepare for and conduct safety audits of arboriculture work teams, work procedures and practices. It includes the detection of faults in height safety equipment and determination of remedial action.

This unit applies to individuals designated as 'Height safety equipment inspectors'. Work is implemented with low-risk work procedures to comply with Australian Standards (AS1891). Individuals work autonomously, instruct and monitor the work of others within a team. They use discretion and judgment in the selection, allocation and use of available resources.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Perform audit planning	1.1 Identify objectives, scope and focus of audit 1.2 Identify audit target and required documentation 1.3 Determine audit process and sampling technique 1.4 Plan frequency and scheduling of audit events

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.5 Prepare audit documentation</p> <p>1.6 Conduct pre-audit communications with client and relevant stakeholders</p>
2. Undertake safety audit activities	<p>2.1 Undertake a site-specific job safety analysis (JSA) and record and implement control measures</p> <p>2.2 Conduct planned audit of personal protective equipment used on site</p> <p>2.3 Conduct planned audit of tools and equipment for defective components</p> <p>2.4 Conduct planned audit inspection of emergency and rescue procedures, practices and equipment</p> <p>2.5 Conduct planned audit inspection of height safety procedures, practices and equipment</p> <p>2.6 Conduct planned audit inspection of workplace safety documentation</p> <p>2.7 Confirm currency of licencing requirements of individuals in work team for specialised work functions</p>
3. Identify and respond to non-conformance	<p>3.1 Assess safety audit outcomes against compliance to safety policies and procedures</p> <p>3.2 Identify non-conformance with safety policies, procedures, manufacturer instructions and applicable industry standards</p> <p>3.3 Identify and detect faults, levels of wear and damage in equipment and determine remedial action</p> <p>3.4 Issue rectification notices for breaches in work health and safety policies, procedures and practices</p> <p>3.5 Remove unsafe tools and equipment from service and tag according to workplace safety procedures</p> <p>3.6 Recommend training to improve safety</p>
4. Record, report and present audit results	<p>4.1 Prepare safety audit report according to workplace procedures</p> <p>4.2 Review safety audit outcomes against workplace policies, procedures and industry safety standards</p> <p>4.3 Identify and record inconsistencies in safe work practices, and recommend action for approval according to workplace safety procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.4 Make recommendations to resolve unsafe work practices according to workplace safety procedures 4.5 Record and report results of safety audit according to workplace procedures 4.6 Maintain equipment data and audit inspection records according to industry standards and workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret critical information in documentation used for workplace compliance, including manufacturer instructions, workplace policies and procedures for equipment, and industry standards
Writing	<ul style="list-style-type: none"> Accurately and clearly report outcomes of safety audits using industry terminology

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted, recorded and reported three separate safety audits, including completion of the following for each audit:

- prepared for audit, including:
 - identified safety audit objectives, scope and focus
 - reviewed legislation, standards, codes of practice, manufacturer instructions and industry guidance required for audit
 - identified target operations and documentation required for audit
 - determined the audit process and sampling technique
 - determined the frequency and scheduling of audit events
 - prepared audit documentation for recording audit
 - communicated audit requirements with client and relevant stakeholders
- assessed, analysed and documented site safety and implemented control measures
- conducted site audits according to planned schedule against workplace and industry safety standards for the following:
 - testing and use of personal protective equipment
 - testing and inspection of tools and equipment for safety defects
 - inspection of height safety equipment for condition and suitability for intended use
 - inspection and operation of emergency and rescue equipment
 - maintenance of workplace safety documentation
 - confirmed currency of licencing requirements for specialised equipment
- identified and recorded non-conformances and issued notices for breaches in safety policies, procedures and standards
- presented auditing outcomes and recommendations and sought approvals, including:
 - recommended alternative equipment configurations and practices
 - removed from service and tagged unsafe tools and equipment

- recommended training to improve safety
- maintained inspection records and equipment data.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- preferred industry practices (as outlined in the Companion Volume) relating to safe arboriculture work
- process and procedures of developing and conducting safety audits, including:
 - developing safety audit objectives
 - understanding and developing safety audit scope and focus
 - specifying the operational targets for audit
 - audit sampling technique
 - scheduling the frequency and timing of audit events
 - developing audit documentation and checklists
- communication strategies for informing key stakeholders of audit, and their purpose, including toolbox talks
- testing and observation of safety procedures and practices, including:
 - work function and operational safety
 - use and condition of personal protective equipment
- testing and observation of tools and equipment use on site, including:
 - defective components
 - correct safe operation
 - pre-start checks and shutdown procedures
 - use and maintenance of safety guards
 - restriction on equipment use
 - tagging tools and equipment
 - repair information and log books
 - application of Australian Standard AS1891 when testing fall arrest equipment
- testing and checking operation and availability of emergency resources, including:
 - rescue equipment kit
 - first aid kit
 - emergency response procedures
- testing and checking procedures used for:
 - arborist height safety equipment
 - rigging and climbing ropes
- manufacturer guidelines, industry standards and applicable regulations to determine suitable configurations and use of arborist height safety equipment
- purpose and use of safety documentation, including:
 - injury, accident and incident reports

- job safety analysis (JSA) and safe work method statements (SWMS)
- equipment tags and repairs log books
- availability of chemical and material safety data sheets
- audit requirements and safety procedures requiring certifications
- procedures for assessing work performance and activities against safety policies, procedures and industry standards
- managing non-conformance to safety standards, including:
 - non-conformance notices
 - professional development
 - changes to policies and procedures
 - recommendations for rectification of non-conformance
- safety audit reporting procedures and documentation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - access to an active arboriculture work site, or environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer and word processing software
 - arborist equipment stipulated in the performance evidence
- specifications:
 - workplace safety policies and procedures
 - client brief and instruction for safety audit objectives
 - preferred industry practices (as outlined in the Companion Volume) relating to safe arboriculture work
 - Australian and international standards related to safety audits for arboriculture work including AS1891
 - manufacturer instructions for arborist equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB508 Identify, select and specify trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to identify, select and specify a range of trees in a range of urban and regional applications for local government and legal contexts. It requires the documentation of specification of trees and their respective growing environment in residential, commercial, public open spaces and amenity areas.

The unit applies to individuals who work in arboriculture and analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others, and analyse, design and communicate solutions to a range of complex problems.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine tree selection criteria	1.1 Develop tree selection brief in consultation with client 1.2 Undertake site inspection to identify site conditions and constraints 1.3 Identify tree selection limitations according to legislative,

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	regulatory and Australian standards 1.4 Determine functional life expectancy of site and planting 1.5 Assess tree characteristics suitable for the site conditions and constraints according to client brief 1.6 Assess and confirm the suitability of trees as a valid option for site
2. Identify and select trees	2.1 Determine dimensions of site for planting according to client brief 2.2 Estimate available root zone profile of site for planting 2.3 Assess and verify root zone profile is proportional to proposed tree size according to client brief 2.4 Assess environmental and hydrological conditions and consider impact on tree selection 2.5 Test and assess root zone profile physical and chemical properties to assist tree selection 2.6 Recommend soil/media amendments for planting site according to test result outcomes 2.7 Identify and evaluate performance of trees common in local region for suitability of selection 2.8 Use reference materials to identify and select trees with characteristics conforming to site conditions, selection criteria and client brief 2.9 Compile and update a database of tree selections and characteristics
3. Specify trees	3.1 Research and select availability, type and size of tree stock for selected trees 3.2 Select size and type of tree stock according to tree production characteristics and Australian quality standards for tree stock 3.3 Verify tree selection against selection criteria, size and quantities with client 3.4 Determine planting method and specification appropriate to the species and the site 3.5 Document specifications for selected trees according to industry and Australian standards

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Verify quality of tree and materials on delivery	4.1 Inspect selected plants on site for quality and quantities according to specifications 4.2 Inspect delivered materials for root zone profile for quality and quantity according to specifications 4.3 Record quality check results according to workplace procedures
5. Correlate and present a report	5.1 Produce a report of the identification, selection and specification process, and incorporate correlated records according to industry standards 5.2 Present client or organisation with report

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Accurately interpret information from legislation, industry standards, botanical and biological references for plant selections and specifications
Writing	<ul style="list-style-type: none"> Create reports and recommendations, expressing ideas and exploring complex issues, that are logically constructed, succinct and accurate

Assessment Requirements for AHCARB508 Identify, select and specify trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has used reference materials to identify and select ten trees for three distinctly different sites (a total of 30 trees), taking into account the following:

- geographical location on the site
- taxonomic characteristics
- edaphic and environmental preferences
- limitations of the tree for the site
- rationale for tree selection

There must also be evidence that the individual has compiled and updated a database for at least 50 tree species, from the taxonomic groups of angiosperms (dicotyledons and woody monocotyledons) and gymnosperms with the following details:

- botanical and common name
- general size characteristics
- canopy characteristics
- distinguishing features
- general cultural requirements

There must also be evidence that the individual has:

- consulted with client and developed a tree selection brief for the size and type of the site, including:
 - identified site conditions and constraints
 - identified limitations for tree selection
 - determined functional life expectancy of site and plantings
 - assessed tree characteristics suitable for site and client requirements
 - assessed and determined the suitability of trees for site

- evaluated performance of trees common to a local region for suitability for planting site
- assessed the root zone profile for the tree planting site, including:
 - estimated the available root zone profile
 - verified the root zone profile is proportionate for proposed tree dimensions
 - assessed the hydrological and environmental conditions on tree selection
- tested root zone profiles for characteristics to aid tree selection for at least 5 distinct root zone profiles, including: 3 natural soils, 1 soil mix and 1 growing media. The tests must include:
 - field texture assessment
 - structure
 - compaction
 - bulk density
 - organic content
 - pH and electrical conductivity
 - infiltration rate and drainage
 - moisture holding capacity
- prepared specifications for tree selection according to industry standards including:
 - planting method appropriate to the species and the site
 - soil or media amendments from test results
- investigated the availability of potential tree stock and verified size and quantities against selection criteria and client brief
- checked and recorded quality and quantity of trees and root zone profile materials on site for quality and quantities according to specifications
- produced a report of the identification, selection and specification process and incorporated the correlated records and presented report according to client brief.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of consulting with clients and use and purpose of client brief
- legislative and regulatory requirements regarding tree selection, including:
 - environmental and ecological implications
 - declared and other weed restrictions
 - hazardous tree species
- assessing site characteristics for tree selection, including:
 - functional life expectancy of tree and site
 - tree functionality for specified locations
 - appropriateness of tree selection characteristics for site aspect and dimensions
- effect of site constraints on the tree selection process, including:

- verge width
- aerial power and telecommunications lines
- potential to impede visual references (roads and driveways, signage, traffic lights)
- potential to impede traffic flow and structures (footpaths, roadways, building, infrastructure)
- use of research techniques from reference materials, including:
 - plant taxonomic keys
 - electronic data
 - plant guides
- broad botanical concepts of tree selection for the following:
 - ethnobotany
 - tree morphology
 - tree physiology
 - taxonomy and nomenclature
 - environmental conditions for the functional characteristics of the tree
- basic calculations for estimating planting area and root zone profile
- root zone profile and characteristics as a determinant for tree selection, including:
 - type of root zone profile (natural soil, soil mix or growing media)
 - size and volume of root zone profile and proportion to the mature size of tree
 - site hydrology
 - specifying soils and growing media, including standards to apply
- testing and evaluating soils, soil mixes and growing media for physical and chemical properties and suitability for growing trees, including:
 - identifying soils and soil types
 - testing for pH, electrical conductivity (EC), nutrients
 - testing for wettability, moisture holding capacity, drainage, organic matter
 - amendments to improve soil, soil mix and growth media
 - growing media or soil selection and suitability for purpose
- tree selection methodology using quality criteria of suitability for purpose, including:
 - evaluation of trees common to a region
 - documenting and rationale for tree selection
 - selection of trees based on form and function
 - selection of trees for ecological and environmental purposes
 - recommendations of trees
 - matching species and cultivars appropriately to the selection criteria
 - transplanting issues for mature trees
- documenting tree specifications, including:
 - quality standards for tree stock
 - tree stock selection, type and size of plant, container or root ball
 - tree stock selection and growing media quality and specifications

- tree planting specifications
- quality control and quality assurance, including:
 - checking procedures for deliveries of plants and growing materials with the specifications
 - how to monitor quality and apply quality controls
 - tree structural quality
 - recording quality checks on delivered plants and products
 - impact of Australian Standards AS2303, AS2223 and AS3743 on growing media and quality assurance
- design and construction of plant databases, including:
 - field design for taxonomy and nomenclature
 - field design for characteristics of tree
 - entry of tree data
- reports and reporting procedures for identification, selection and specification process.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a worksite requiring tree planting, or environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing software, and database software
 - digital image capture device
 - soil testing equipment
 - loupe
 - tree reference materials, including field guides, print and digital taxonomic keys
 - live tree specimens
 - soils, soil mixes and growing media
- specifications:
 - workplace safety policies and procedures related to tree identification and selection
 - client brief and instruction for tree requirements for a specific site
 - Australian Standards AS2303, AS2223 and AS3743
- relationships:
 - client.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed

- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB509 Develop an arboricultural impact assessment report

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to decide on the appropriateness for retaining trees and to assess, plan and monitor the protection of trees on construction and development sites where trees subject to retention are exposed to potential damage.

The unit applies to individuals who work in arboriculture and analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Undertake assessment of trees affecting site	1.1 Identify and research impact of legislation and Australian Standards of trees on site 1.2 Determine requirements of statutory authorities for trees on development site

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Determine local government planning laws, tree protection and preservation regulations for site</p> <p>1.4 Assess or survey trees on adjacent site and determine legal status and suitability for retention</p> <p>1.5 Conduct a site assessment and identify conditions that impact tree protection program</p> <p>1.6 Identify hazards, activities and circumstances that have potential to harm trees and assess the level of risk</p> <p>1.7 Locate and confirm trees plotted on survey plan</p> <p>1.8 Plot trees not represented onto survey plan</p>
2. Compile preliminary tree assessment data	<p>2.1 Collect available relevant plans and documentation</p> <p>2.2 Identify and record affected trees with botanical and common name on development and adjoining site</p> <p>2.3 Record tree dimensions according to statutory requirements</p> <p>2.4 Determine age class and estimate life expectancy</p> <p>2.5 Determine tree health in relation to tree physiology and pathology</p> <p>2.6 Determine condition of tree structure in relation to tree anatomy</p> <p>2.7 Assess heritage and cultural value of trees</p> <p>2.8 Assess habitat, ecology and environmental impact of trees on site</p> <p>2.9 Assess impact of location to existing and past site structures</p> <p>2.10 Determine the retention value</p> <p>2.11 Compile all tree assessment data required for report</p>
3. Document preliminary arboricultural report	<p>3.1 Record all trees and groups of trees suitable for retention</p> <p>3.2 Determine indicative tree protection zone (TPZ) and structural root zone (SRZ) for each tree</p> <p>3.3 Plot tree identifiers and indicative TPZ on survey plan</p> <p>3.4 Document preliminary arboricultural report</p>
4. Assess impact of proposed development on trees	<p>4.1 Interpret existing plans, working drawings, terms and symbols</p> <p>4.2 Interpret development and design language</p> <p>4.3 Assess potential mechanical and chemical impact of development on trees and determine controls</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.4 Determine impact of proposed development on trees</p> <p>4.5 Provide preliminary feedback to client on potential areas of improvement</p>
5. Contribute to design development	<p>5.1 Liaise with client on design of development to minimise impact on trees</p> <p>5.2 Assess constructability of design to ensure impacts on trees are minimised</p> <p>5.3 Liaise with design team to develop tree sensitive design and construction methods</p>
6. Determine indicative and actual TPZ	<p>6.1 Assess development requirements for site access and logistics</p> <p>6.2 Review indicative TPZ</p> <p>6.3 Determine extent of encroachment into indicative TPZ</p> <p>6.4 Determine impact of works on SRZ</p> <p>6.5 Determine extent of actual SRZ</p> <p>6.6 Determine actual TPZ for trees to be retained</p> <p>6.7 Define and record the actual TPZ</p>
7. Establish site conditions to retain tree viability to major encroachment	<p>7.1 Determine level of encroachment into TPZ following design development</p> <p>7.2 Assess impact of major encroachment on tree</p> <p>7.3 Consider implications of major encroachment on health, physiology and structural integrity of tree</p> <p>7.4 Assess impact on soil characteristics and volume of past, existing and future structures on tree</p> <p>7.5 Consider site conditions and design factors to minimise impact of encroachment on tree</p> <p>7.6 Establish site conditions and design factors required to retain viability of tree</p> <p>7.7 Determine additional remedial measures to protect tree viability</p>
8. Develop protection measures and advise client	<p>8.1 Investigate tree protection devices and techniques to mitigate development activities</p> <p>8.2 Specify protection devices, techniques and systems to minimise impact of development</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	8.3 Specify construction operations to minimise impact on trees 8.4 Produce working drawings for installation and construction of tree protection systems 8.5 Provide advice on tree removal and tree pruning program to client
9. Document the relevant reports	9.1 Prepare draft arboricultural impact assessment report 9.2 Document tree protection recommendations and drawings 9.3 Prepare and document tree management and monitoring guidelines and strategies for addressing potential problems 9.4 Consolidate reports, plans and guidelines into final arboricultural impact assessment report and present to client according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret legislative documents, industry standards, plans and specifications to identify critical information and concepts for use in tree assessment reports
Writing	<ul style="list-style-type: none"> Create complex documents and reports demonstrating control over different writing styles and purposes
Numeracy	<ul style="list-style-type: none"> Accurately interpret numeric data from plans, specifications and site measurements Perform calculation for measuring and estimating tree dimensions and the extent of TPZ and SRZ

Assessment Requirements for AHCARB509 Develop an arboricultural impact assessment report

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion developed an arboricultural impact assessment report for a development site and has:

- identified and researched the impact and specific requirements of legislation, Australian Standards, and local government laws for trees on development site
- conducted site assessment and identified conditions that impact tree protection program
- identified work health and safety hazards, assessed risk and applied controls for site
- identified hazards and assessed the risks that harm trees
- located, confirmed and plotted all trees on survey plan
- collected plans and documentation
- identified and recorded tree by botanical and common name and included a record of:
 - tree height, crown spread and diameter-at-breast-height (DBH), diameter at ground level and statutory dimensions
 - age class and estimated life expectancy
 - tree health in relation to tree physiology and pathology
 - condition of tree structure in relation to tree anatomy
- assessed the following values for trees:
 - heritage and cultural
 - habitat, ecological and environmental
 - location of tree to existing and past site structures
- determined the tree retention value
- compiled tree assessment data for report
- recorded all trees suitable for retention
- determined and plotted indicative tree protection zone (TPZ), tree identifiers for each tree on survey plan
- documented preliminary arboricultural report

- interpreted plans, designs, working drawings, terms, symbols and language for development
- assessed and determined controls for mechanical and chemical damage affecting trees
- provided client with preliminary feedback for potential improvements
- liaised with client on design development and assessed impact of construction on trees
- liaised with design team to develop tree sensitive design and construction methods
- assessed development requirements for site access and logistics
- reviewed indicative tree protection zone and determined:
 - extent of encroachment into indicative TPZ
 - impact of works on structural root zone (SRZ)
- determined extent of SRZ
- determined and recorded level of encroachment and actual TPZ for trees to be retained
- assessed the following factors affecting tree viability for a major encroachment:
 - location and distribution of roots
 - potential loss of root mass
 - species tolerance to root loss
 - age, health, size, lean and stability of tree
- assessed impact of encroachment on health, physiology and structural integrity of tree
- assessed impact on soil characteristics and volume from past, existing or planned structures
- considered site and design factors to minimise impact of proposed encroachment
- rationalised all factors to decide on the viability of the tree
- determined remedial measures to protect the tree
- investigated, specified and produced installation and construction drawings for tree protection devices and systems to mitigate tree damage
- provided advice to client on tree removal and tree pruning program
- prepared a draft arboricultural impact assessment report
- developed a tree protection plan and drawings
- prepared, documented tree management and monitoring, including strategies to handle problems
- consolidated reports, plans and guidelines into final arboricultural impact assessment report in both:
 - digital format
 - print format
- presented report to client.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislative and regulatory framework for trees on development sites, including:
 - role of Australian Standards AS2303, AS2223, AS3743, AS4970 and AS4373

- specific requirements of statutory authorities
- local government tree protection and preservation regulations
- construction drawings, plans and documentation, including:
 - types of drawings and plans
 - terms, symbols and language used in development
 - version control of drawings, including revision and issue dates
- working and communicating with clients and development design personnel
- conducting site assessment and conditions that impact tree protection programs, including:
 - development site safety and safe access procedures
 - plotting trees/tree identifiers onto survey plans
 - naming and recording tree by botanical and common name
 - methods for determining tree dimensions, height, crown spread and DBH
 - age class and estimated life expectancy
 - tree health in relation to tree physiology and pathology
 - assessing and determining the viability of a trees
 - soil volume and characteristics on development sites
- tree values and importance, including:
 - heritage and cultural values
 - habitat, ecological value
 - environmental values
 - methods of determining retention value
- the principles of TPZ, including:
 - methods of mechanical and chemical damage to trees on development sites
 - impact of proposed development on trees
 - SRZ
 - levels of tolerance to encroachment and potential loss of root mass
 - species tolerance to root loss
- type and structure of tree impact assessment reports, including:
 - purpose and structure of preliminary arboricultural report
 - purpose and structure of arboricultural assessment report
 - use and interpretation of development plans and documentation
 - drawing techniques for illustration in reports and plans, including digital images
 - tree protection plans and drawings
 - purpose and structure of tree management and monitoring guidelines
 - presenting reports in digital or paper-based formats
- tree protection devices, methods and systems, including:
 - designs and their purpose
 - tree response to tree protection systems
 - installation and construction methods for tree protection.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a development worksite with existing trees, or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing and drawing software
 - digital image capture device
 - personal protective equipment
 - basic diagnostic tools, including sounding hammer, trowel, probe, cordless drill
 - basic soil testing equipment
 - trees
- specifications:
 - client brief and instruction for safety audit objectives
 - industry standards AS2303, AS2223, AS3743, AS4970 and AS4373
- relationships:
 - client.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB510 Specify and audit tree work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to review and audit arboriculture operations for tree establishment, restoration, repair, protection, tree pruning, tree support systems and removal works and produce specifications required to rectify identified non-compliance.

The unit applies to individuals who work in arboriculture and analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and prepare audit information	1.1 Identify audit objectives, scope and focus 1.2 Identify target operations and documentation 1.3 Determine audit process and sampling technique

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Determine frequency and schedule of audit events</p> <p>1.5 Acquire and prepare audit documentation and information ready for audit</p> <p>1.6 Conduct pre-audit communications with client and relevant stakeholders</p>
2. Audit tree works	<p>2.1 Organise on-site inspections to conduct audit process</p> <p>2.2 Audit tree work operations being undertaken</p> <p>2.3 Inspect and assess impact of arboricultural tree work on the tree health, structure, environment and development works</p> <p>2.4 Audit works according to prepared documentation and legislative and regulatory requirements</p> <p>2.5 Audit work to identify compliance with project documentation, and legislative and regulatory requirements</p> <p>2.6 Record non-compliance according to audit procedures</p> <p>2.7 Assess extent and manner of non-compliance against workplace and industry standards</p> <p>2.8 Document findings according to audit and workplace procedures</p>
3. Assess impact of non-arboricultural works	<p>3.1 Inspect and assess non-arboricultural works impacting on the tree or work environment</p> <p>3.2 Determine impact of non-arboricultural works of contractors and stakeholders</p> <p>3.3 Provide feedback on non-arboricultural works to contractors and stakeholders</p>
4. Provide feedback to stakeholders on audit	<p>4.1 Provide feedback on the findings of audit to clients, contractors and stakeholders</p> <p>4.2 Provide advice for improvement, rectification and management of non-conformances</p> <p>4.3 Identify and specify priority of ongoing tree management</p>
5. Specify remedial action for tree defects	<p>5.1 Identify and assess impact of remedial action on tree and stakeholder expectations</p> <p>5.2 Discuss tree retention value and remedial action options with stakeholder</p> <p>5.3 Select and agree on acceptable remedial action with stakeholder</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.4 Document specifications for remedial action according to workplace procedures, industry standards and design parameters 5.5 Submit specifications to stakeholder for final approval
6. Document and present audit report, notifications and plans	6.1 Document audit report with non-conformance notifications 6.2 Advise stakeholders according to legislative and regulatory requirements 6.3 Document an ongoing management plan addressing audit findings 6.4 Document a rectification plan specifying the required rectifications of non-conformances and remedial action 6.5 Review audit process and outcomes and recommend modifications to audit process 6.6 Prepare and present reports and plans to stakeholders according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret complex texts, including industry standards and workplace procedures, to extract critical information required for the tree work to be performed
Writing	<ul style="list-style-type: none"> Create complex written arborist reports, demonstrating control over a range of writing styles using industry-specific language
Oral communication	<ul style="list-style-type: none"> Use effective verbal communication, including open questioning and active listening, to communicate effectively with contractors, clients and other stakeholders

Assessment Requirements for AHCARB510 Specify and audit tree work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least two occasions, audited tree works and created a report with specifications for rectification.

For each of the two audits, there must be evidence that the individual has:

- identified audit objectives, scope and focus
- identified target operations and documentation
- determined audit process, sampling technique, frequency and schedule
- compiled and prepared audit documentation
- communicated audit preparations with client and stakeholders
- organised site inspections to conduct audit
- conducted audits of operational tree works for each of the following activities:
 - pruning, including root pruning
 - tree removal
 - transplanting and planting
 - tree protection on development sites
 - tree support systems
 - arboricultural practices
- inspected and assessed impact of works on tree health, structure, environment and development
- conducted the audit according to prepared documents and legislative requirements
- audited compliance of works to documented project outcomes
- recorded and assessed non-compliances against expected standards
- prepared records of audit and non-compliances
- inspected and assessed non-arboricultural works
- determined impact of non-arboricultural works of contractors and stakeholders

- provided feedback on the findings of inspections to stakeholders, including provided advice for:
 - improvements
 - rectification
 - management of non-conformances
- identified and specified ongoing management priorities
- discussed tree retention with stakeholder
- identified and assessed effect of remedial action on tree and stakeholder expectations and selected remedial action
- documented remedial action, which must include specifications for:
 - tree removal
 - tree transplanting
 - pruning, including root pruning work
 - tree support system
 - tree protection
- documented audit report and non-conformance notifications and advised stakeholders according to regulatory requirements
- documented ongoing management plan, which must include:
 - specifying the tree management techniques and ongoing maintenance
 - practices required to address the audit findings
- documented a rectification plan specifying rectification of non-conformances
- prepared and presented reports and plans to stakeholders.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- developing and planning for audits, including:
 - setting objectives, scope and focus
 - auditing terminology
 - audit processes
 - audit sampling techniques
 - setting frequency and timing of audit events
 - preparation of audit documentation
- communication in audit situations, including:
 - notifying and preparing stakeholders for audit
 - providing feedback after auditing
 - rectification notices and follow-up for non-compliance
 - negotiating rectification works and actions
 - reporting procedures of completed audit
- relevant audit information and sample documentation, including:

- codes of practice
- Australian Standards including, AS2303, AS2223, AS3743, AS4373 and AS4970
- arboriculture reports and specifications
- legislation and regulations governing audit procedures and topics, including:
 - responsibilities for safety and safe work practices
 - tree protection and removal
 - conservation and environmental protection
 - statutory reporting and documentation
- targeting, auditing and documenting specific tree work operations, including:
 - pruning, including root pruning
 - tree removal
 - planting and transplanting
 - tree protection techniques
 - arboricultural practices and construction and development activities
 - tree support systems
- inspection and assessment of tree works and impact on physiology, anatomy, pathology and environment
- inspections and assessment of non-arboricultural works that may impact on the tree or its environment
- reconciling actual works performed against documented planned works
- provision of feedback and findings of inspections to clients, contractors and stakeholders
- improvement, rectification and management of non-conformances
- documenting specified remedial action, including:
 - tree removal
 - pruning, crown maintenance and crown modifications
 - response of roots to wounding and treatment of severed roots
 - planting and transplanting
 - tree support systems
 - tree protection systems
 - tree management techniques and practices
 - rectifying and modifying work site practices and tree protection measures for trees on development sites
 - ongoing management and maintenance
- documentation for recording and reporting audit procedures, including reviewing and revising audit procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- an arboriculture work site with trees, or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing software
 - digital image capture device
- specifications:
 - workplace safety policies and procedures
 - client brief and instruction for safety audit objectives
 - codes of practice relevant to tree works and use of arboriculture equipment
 - industry standards AS2303, AS2223, AS3743, AS4373 and AS4970
 - legislation and regulations relevant to safe work practices, environmental safety and conservation and protection of trees
- relationships:
 - client and stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB511 Prepare arborist reports

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to collect and analyse arboricultural information from a site and make determinations and recommendations for inclusion in arborist reports, using word processing software to meet the standard expected of arboricultural professionals.

The unit applies to individuals who work in arboriculture and analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine report parameters from client brief	1.1 Review client brief and determine expectations for report outcomes 1.2 Determine evidentiary data records according to client brief

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Determine statutory reporting requirements 1.4 Establish specific scope and assumptions for report 1.5 Evaluate requirements and limitations and determine arboricultural content 1.6 Determine textual and visual content required for report 1.7 Confirm report parameters with client
2. Determine and collate evidentiary data	2.1 Research content and information for report 2.2 Assess primary and secondary sources of research material 2.3 Evaluate the validity and reliability of researched information 2.4 Inspect site and record observations relevant to scope of report 2.5 Record visual evidence using image capture equipment required for report 2.6 Obtain and record information from test results 2.7 Collate and record observations, test results, research material and inspections as evidentiary data 2.8 Store and back up data according to workplace data management procedures
3. Prepare a report format using a word processing program	3.1 Determine report structure and style to meet stakeholder and statutory outcomes 3.2 Determine requirements for specific document content and layout according to arboriculture industry conventions 3.3 Obtain permissions for copyrighted material required for report 3.4 Produce document using a word processor according to workplace style guide and industry conventions 3.5 Incorporate collated data, information and evidentiary data into formatted report 3.6 Operate computer and word processing software application to produce report
4. Formulate a conclusive determination and recommendations	4.1 Assess body of evidentiary data according to scope of report 4.2 Determine value of data from conflicting evidence 4.3 Develop an informed decision from considered viewpoints 4.4 Formulate a conclusive determination

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.5 Inform client of determination 4.6 Develop recommendations based on determination
5. Prepare draft report	5.1 Compile determinations and recommendations in a draft report 5.2 Seek professional feedback and opinion on draft report and findings 5.3 Review feedback and opinion expressed, and edit report according to professional advice 5.4 Draft final sections of report document
6. Deliver the final report	6.1 Review report content and develop and document summary for report 6.2 Review and edit final version of report ready for distribution 6.3 Deliver final report to client and stakeholders according to client brief

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret and analyse complex texts, including industry standards, workplace procedures and research materials, to identify critical information and concepts for use in arborist reports
Writing	<ul style="list-style-type: none"> Create complex arborist reports, demonstrating control over a range of writing styles and using industry-specific language appropriate for key stakeholders
Oral communication	<ul style="list-style-type: none"> Use effective verbal communication, including open questioning and active listening, to communicate with contractors, clients and other stakeholders, and when discussing and presenting arborist reports

Assessment Requirements for AHCARB511 Prepare arborist reports

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared at least one arborist report, including:

- reviewed client brief and determined report outcomes
- determined evidentiary data records
- determined statutory requirements for report
- established scope and assumptions for report
- determined arboricultural content and textual and visual content for report
- confirmed report parameters with client
- researched content and information for report
- assessed primary and secondary sources, and evaluated the validity and reliability of researched material
- inspected site and recorded details and observations, which must include:
 - location of site and trees under consideration
 - matters relevant to scope of report
- recorded visual evidence using image capture equipment
- obtained and recorded information from test results
- collated observations, test results, research material and inspection data into a body of evidentiary data
- stored and backed up data according to data management procedures
- prepared report format and layout according to workplace style guide and industry standards, which must include:
 - used a word processor and its tools and functions to produce the report
 - used custom templates and logos
 - obtained permission for copyrighted materials intended for the report
 - created and populated tables and charts
 - used images and graphics to enhance report presentation and content

- inserted document elements for titles, page numbers, table of content, glossary of terms, headers and footers, watermarks for drafts, endnotes or footnotes and acknowledged references
- incorporated information and evidentiary data into formatted report.

There must also be evidence that the individual has:

- assessed body of evidentiary data and determined value of conflicting evidence
- developed an informed decision from considered viewpoints
- formulated a conclusive determination and informed client
- developed recommendations based on determination
- prepared a draft document based on brief, method, observation, conclusion and recommendations
- sought feedback on report from at least two professional colleagues and edited report based on feedback
- drafted final sections of report
- reviewed and developed summary of report content
- reviewed and edited final report ready for distribution
- delivered final report to client and stakeholders according to client brief.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- consulting with clients and purpose of a client brief
- arborist reports and their development and context, including:
 - evidentiary data
 - statutory reporting
 - limits and assumptions of arborist reports
 - arboricultural content in reports
- investigation and researching valid data and information, including:
 - research design and methodology
 - valid and reliable data collection
 - sources of research material, including primary and secondary sources
 - methods of analysing data collected and compiling into logical data sets
 - balancing conflicting viewpoints
- site inspections and gathering primary data
- image capture equipment appropriate to arboricultural reports and visual evidence, including:
 - still photographic images
 - imaging equipment, including light detection and ranging (LiDAR) technology
 - video recording

- collation of observations, test results, research material and inspection data into a body of evidentiary data, including:
 - managing, storing and interrogating data
 - data collection procedures
 - storage, backup and retrieval systems for data
- report for statutory, client and organisation purposes, including:
 - formats and presentation
 - requirements for specific document content
 - layout and arboriculture industry conventions
 - copyright, intellectual property and referencing when preparing reports and using material as inclusions in reports
 - developing draft report structure
 - use of active and passive voice in reports and presentations
 - summarising the report
- computer software for preparing and organising data sets
- word processors and computer software used for creating and editing documents
- corporate style guides and their purpose for formal reports, including:
 - custom document templates
 - purpose and use of corporate logos
 - creating and formatting tables
 - generating charts and graphics
 - elements of reports, including, title, page numbers, table of contents, footers and headers and watermarks
- quality document outcomes, including:
 - correct use of language
 - logical organisation and development of content
 - spelling, grammar and punctuation
 - arborist terminology and jargon
 - industry expectations and standards
- decision-making processes, including:
 - consideration of different viewpoints in making informed decisions
 - formulating conclusions and determinations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - access to an arboriculture work site with trees, or an environment that accurately represents workplace conditions
 - resources, equipment and materials:

- computer with word processing software
- internet connection
- digital image capture device
- specifications:
 - client and/or project brief and instructions for report outcome
 - codes of practice relevant to tree works and use of arboriculture equipment
 - preferred industry practices (as outlined in the Companion Volume) related to project brief
 - legislation and regulations relevant to arboriculture and project brief
- relationships:
 - clients and stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm project and drawing requirements	1.1 Confirm project requirements for computer-aided design (CAD) drawings 1.2 Identify drawing requirements, purpose and scope and confirm with client

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Create drawing template files to meet standard drawing requirements	<p>2.1 Prepare CAD desktop layout and user interface according to software instructions and working environment</p> <p>2.2 Determine layering strategy for plan components</p> <p>2.3 Identify and select CAD libraries containing blocks, symbols and components according to software application</p> <p>2.4 Select text and dimensioning styles according to workplace style guide</p> <p>2.5 Select line types and weights to provide visual differentiation of plan elements</p> <p>2.6 Select hatch and infill patterns and styles according to planned components, elements and purpose</p> <p>2.7 Set up title blocks for planned drawings and sizes</p> <p>2.8 Set up reference schedules according to project outcomes</p>
3. Create 2D drawings	<p>3.1 Use CAD software and functions to produce two-dimensional (2D) drawings according to industry drawing standards</p> <p>3.2 Scan documents and save as digital files compatible for importing into 2D CAD programs</p> <p>3.3 Import digital drawing components from software applications into 2D CAD drawings</p>
4. Edit, measure and inspect drawing components	<p>4.1 Review, edit and remove incongruous elements in drawings</p> <p>4.2 Record explanatory notes in drawings according to project purpose</p> <p>4.3 Identify and apply dimensions and scale to drawings</p> <p>4.4 Identify and apply tree symbols appropriate for purpose</p> <p>4.5 Plot tree symbols with precision on drawing according to drawing scale and dimensions</p> <p>4.6 Perform calculations to determine tree protection zones (TPZ), structural root zone (SRZ) and encroachments, and plot on drawing according to project purpose</p> <p>4.7 Check accuracy and quality of drawing and amend drawings where below standard</p>
5. Print CAD drawings	<p>5.1 Input page setup parameters to suit printing and project requirements</p> <p>5.2 Input printer setup parameters for quality and quantity of pages</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Print drawings according to printer instructions, workplace and environmental procedures
6. Save and back up files	6.1 Create file directories for drawing project on storage media according to workplace file management procedures 6.2 Identify and create file names according to workplace style guide, software instructions and project naming convention 6.3 Save drawing files to file directories according to software and workplace procedures
7. Export files to CAD program or document reader	7.1 Select and open drawing files to be exported and save in file format specified by external drawing software application 7.2 Select and open drawing files to be exported and save in file format specified by external document reader software

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Document plan annotations according to plan requirements using terminology and style appropriate for arboriculture plans and drawings
Numeracy	<ul style="list-style-type: none"> Identify and interpret embedded mathematical information from site plans and information, and transition into two-dimensional (2D) drawings
Get the work done	<ul style="list-style-type: none"> Use the main features and functions of computer-aided design software and digital tools to generate 2D drawings

Assessment Requirements for AHCARB512 Generate tree plans using computer-aided design software

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced plans using computer-aided design software and calculated and plotted tree protection zones (TPZ) for at least 20 trees and 10 encroachments across two different sites.

There must also be evidence that the individual has:

- confirmed project requirements for drawings
- identified drawing requirements, purpose and scope, and confirmed with client
- prepared computer-aided design (CAD) software ready for drawing, including:
 - prepared the computer desktop user interface
 - determined the layering strategy for components
 - identified and selected component libraries
 - selected text and dimension styles according to workplace style guide
 - selected line types and weights
 - selected hatch patterns and types
 - set up title blocks for drawing sizes
 - set up reference schedules
- used two-dimensional (2D) CAD software program and functions to produce drawings using layers for different components. The tree protection CAD plan must contain:
 - TPZ
 - structural root zone (SRZ)
 - encroachments
 - imported digital text and drawing files from other software applications
- scanned and saved documents in digital format for import into 2D CAD drawings
- reviewed, edited and deleted incongruous elements
- recorded notes to drawings
- identified and applied dimensioning and scale to drawings

- identified and applied tree symbols with precision. Drawing must provide the following differentiations:
 - trees to be retained
 - trees to be removed
 - trees to be transplanted
- calculated areas of TPZ, SRZ and encroachments
- checked the drawing for accuracy and quality
- set page layout on printer, including:
 - scale
 - line weights
- set print parameters for the printer, including:
 - page size and paper quality
 - output print quality (fast, draft, best)
- created file storage directories according to workplace file management procedures
- named and saved drawing files to file directories according to workplace file management procedures and naming convention
- created drawing files and sent to external personnel for use in different software applications
- created exportable files for CAD software and document readers.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- interpretations and planning of drawing needs for arboriculture projects, including:
 - types of drawings used in arboriculture
 - content and purpose of drawings
 - use of drawings and importance of accuracy
 - planning the design and drawing project
- sources of information for drawing development, including:
 - project personnel
 - site visits and survey plans
 - digital images and aerial photography
- basic principles of 2D CAD drawing, including:
 - 2D CAD software programs available
 - CAD drawing tools
 - principles of layers and a layering strategy
 - CAD libraries and standard detail and components
 - selecting and using fonts and styles in business and drawings
 - selecting and setting dimension size and styles

- line types, thickness and colour as a means to communicate and differentiate design elements
- entering text and notations into CAD drawings
- setting and maintaining accuracy in CAD drawings
- basic tools and setup of a CAD drawing program, including:
 - preparing the CAD desktop and user interface
 - CAD drawing tools, their use and menu options
 - preparing page layout for drawing size
 - selecting hatch patterns, fill and colour
 - creating and using title blocks
 - use of style guides in maintaining quality and standards for organisations
- adding, editing and changing CAD components in drawings, including:
 - drawing lines, shapes and polygons
 - editing and deleting lines, text and shapes
 - joining and breaking lines and shapes
 - adding and editing text
 - plotting and positioning trees and other symbols
 - entering and positioning dimensions
- quality control check and document control
- page layout and standard size paper, including:
 - International Organization for Standardization (ISO) and American National Standards Institute (ANSI) paper sizes and use in Australia
- standard file formats for drawings and file exchange between CAD software
- standard file formats for conversion of drawings for document sharing
- saving computer files, file directories and storage media, including:
 - methods of saving files
 - file retrieval and backup
 - importing and exporting files
 - organisational standards for naming, filing and file security
- scanning and importing documents and graphics into CAD software
- plan printers, plan plotters and printing requirements, including:
 - print page size
 - media type
 - print quality
- calculating and plotting TPZ, SRZ and encroachments.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- two arboriculture work sites with trees as stipulated in the performance evidence, or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with 2D CAD software, symbols libraries for architecture and arboriculture
 - digital scanner
 - plan printers and/or plotters
- specifications:
 - workplace safety policies and procedures for CAD drawing standards and file conventions
 - current drawing standards for page sizes and drawing conventions
- relationships:
 - client.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB513 Examine and assess trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to examine and assess tree health, structure, age, taxonomy, risk, amenity value and significance, and compile a tree assessment report.

The unit applies to individuals who work in arboriculture and analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some states and territories.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for tree assessment	1.1 Identify scope of survey according to client brief 1.2 Select, check and use personal protective equipment 1.3 Locate tree and document tree position according to client brief 1.4 Identify and record tree species and determine implications on

Assessment Requirements for AHCARB513 Examine and assess trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has examined and assessed at least two different trees, including:

- identified scope and purpose of assessment from client brief
- selected, checked and used personal protective equipment
- located tree and documented position
- identified and recorded tree species and determined implication on brief
- assessed and considered tree health and impact on brief
- estimated age of tree, tree parts and defects
- determined and recorded tree dimensions, which must include:
 - tree height
 - tree spread
 - diameter-at-breast-height (DBH)
 - trunk circumference
 - diameter at base
- investigated, assessed and recorded the following indicators of value:
 - habitat and ecological significance
 - historical and cultural significance
 - statutory controls
- selected and compared amenity tree for at least 2 different valuation methods
- collected unit values and data required by the valuation method selected
- calculated and recorded amenity value of at least 2 different trees
- compared results of different valuation methods and accounted for differences
- considered and communicated value of trees captured for valuation
- inspected tree for visual indicators of likely failure of tree or tree parts
- assessed relationship of tree to potential targets

- assessed likely impact of wind loading on potential for failure
- used basic diagnostic tools to confirm presence and extent of hazards
- assessed hazards and determined likelihood of failure
- selected tree risk assessment methods and determined their limitations
- determined target of concern and occupation rate
- determined tree components of concern and their likelihood of failure
- determined likelihood of impact and consequence of tree failure on target
- calculated and documented determinations and level of risk
- provided client with benchmarks and context for risk assessment
- determined and documented potential risk mitigation controls and estimated residual risk
- recommended timeframes for implementation of risk mitigation controls and follow-up inspections
- considered risk against value of tree
- produced a tree risk assessment report.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- areas to address in a client brief and developing the scope of assessment, including:
 - purpose of assessment
 - owner/client and address
 - who requested the assessment
 - reasons for assessments to be requested
 - client risk thresholds
 - data capture procedures
 - requirements for assessment
 - tree assessment and measuring equipment
- trees and surveying their location on a site, including:
 - methods for locating trees on devices, drawings, plans or aerial images
 - techniques to position tree on site from boundaries and structures
- tree identification, biology and physiology
- assessing tree health, including:
 - signs and symptoms of disease
 - methods of detecting decay and structural defects in trees
 - use of basic diagnostic tools
 - testing equipment to detect decay, disease and scope of tree problems
 - factors affecting the likelihood of tree failure
 - use of diagnostic tools
- computations and estimating tree dimensions and their relevance to tree assessment, including:

- tree height and spread
- trunk circumference
- DBH
- diameter at ground level
- assessing structure and symmetry of the canopy, including:
 - symmetrical and asymmetrical canopy structure and consequences on tree stability and health
 - trunk inclination and calculating the lean
 - impact of wind loading on trees and tree structures
 - estimating and calculating wind loading
- relationship and responsiveness of form of crown to surrounding trees and structures
- tree age and health issues and their estimation, including:
 - unimodal and multimodal tree species as an indicator of age
 - growth increments, including bud scars, sympodial growth and flush marks
 - checking age estimations using documented images
- valuation methods of amenity trees, including:
 - a range of tree valuation methods and their application
 - legal and statutory controls and protection of trees
 - indicators of habitat use
 - ecological value and significance
 - cultural value and significance
 - historical value and significance
 - preservation orders and local environmental protection laws
 - calculating amenity tree value of individual trees
- visual tree assessment (VTA) techniques and procedures, including:
 - visual indications and symptoms of disease and health issues
 - tests and checking the extent of disease and health issues
 - assessment of impact of tree disease and health issues on tree safety
 - the purpose and use of basic diagnostic tools
- methods of determining and mitigating levels of risk, including:
 - a range of tree risk assessment methods and their application
 - identification and extent of tree hazards
 - causes of instability, decay, damage and stress in trees
 - quantification and qualification of tree risk
 - risk benchmarks from non-arboricultural activities
 - controls available to mitigate risks
 - remedial action of tree problems
- determining the consequence of risk, including:
 - why most likely outcomes are used and not worst case
 - abbreviated injury index/scale

- possible targets associated with tree risk, including:
 - persons, property, interruptions to community activity, interruptions to services
 - occupation rates
- tree assessment reporting procedures, including images.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an arboriculture site with the trees stipulated in the performance evidence
- resources, equipment and materials:
 - computer with software for word processing
 - digital imaging equipment
 - personal protective equipment
 - diagnostic tools, including sounding hammer, trowel, probe, cordless drill
 - measuring equipment for tree dimensions, locating trees on site
 - samples of cross-sectioned defects and diseases
 - field tree inspection equipment, including hand lenses, probes, binoculars, containers for sample collection
- specifications:
 - legislation and regulations relevant to arboriculture
 - client brief and specifications for tree assessment task
- relationships:
 - client.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB514 Diagnose tree diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to diagnose tree diseases and develop a management program for their control. Diseases include pathogens, pests and other disorders of angiosperms, gymnosperms and woody monocotyledons.

The unit applies to individuals who work in arboriculture and analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCARB514 Diagnose tree diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that individual has identified and collated representative samples of at least 30 diseases of trees, including evidence of infection, into a referenced collection, including:

- 10 invertebrate pests, including insects and molluscs
- 10 pathogenic organisms
- 10 environmental and soil disorders.

Where biosecurity is a concern, the sample can be replaced by a high quality informative image.

There must also be evidence that the individual has:

- identified the affected tree and determined its origin and seasonal growth stages
- determined factors affecting tree health and growth, which must include:
 - current and past cultural practices
 - characteristics of growing environment
 - environmental and cultural factors that predispose trees to disease
 - assessed physical and chemical properties of the soil or growing media
- identified trees with diseases
- recognised natural defence systems for major disease types
- determined disease groups according to disease classification
- investigated trees for signs and symptoms of disease
- recorded symptoms and signs of disease using accepted nomenclature
- determined impact of disease type on tree parts and systems
- determined the nature and severity of the disease
- determined disease type
- researched and identified tree diseases
- prepared specimens of diseases for microscopic examination

- collected, packaged and prepared specimens for dispatch for specialist diagnosis or laboratory testing according to biosecurity procedures
- determined current health and vigour of the tree
- assessed severity and extent of the disease
- researched virulence of the disease on the specific host
- determined phenology of the host and the disease
- researched and considered the constraints for management options
- considered influences of environmental conditions on host, disease and management options
- documented prognosis according to workplace procedures
- investigated and recommended management options
- developed a disease management program
- recorded and documented tree diseases and management programs in a report
- monitored, reviewed and updated management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- definition of disease and basic concepts of plant pathology, including:
 - plant pathogens, pests and disorders
 - macro organisms, microorganisms
 - disease classification guides
 - virulence, phenology, prognosis and disease severity and extent
 - economics and tree diseases
- trees species; their growing environment and relationship to diseases, including:
 - taxonomic identification
 - tree anatomy, physiology, pathology
 - life cycle stages and characteristics of trees and their vulnerabilities
 - primary cellular and anatomical structures of trees
 - critical systems in trees and relationship to plant health, including physiological and biochemical
 - natural defence mechanisms and systems of trees
 - implications of growing season, climate and regional characteristics on tree species and disease development
 - cultural practices, including mulching, irrigation, pruning
- impact of soil or media on tree health, including:
 - chemical and physical characteristics
 - test and test results indicating tree nutrient, and growth health issues
 - controlling soil and environmental problems
- identification of signs and symptoms of tree health problems, including:

- disease detection and identification methods
- patterns of host–disease interaction for each major disease type
- nomenclature of symptoms and signs of pathogens, pests and disorders
- describing the nature and severity of disease infection, including:
 - chronic and acute
 - passive and aggressive
 - seasonal and ongoing
 - localised and unconfined
- methods for managing pathogens, pests and disorders, including:
 - mechanical control practicalities
 - chemical use, toxicity and safety, compatibility and off-target considerations
 - managing the cultural factors, growing conditions and environment
 - managing soil fertility and amelioration
 - biological control and working with natural agents to control pathogens, pests and growing environment
 - importance and use of Integrated Pest Management strategies
 - biosecurity and basic principles of hygiene in arboricultural work
- constraints to disease management, including:
 - timing and scheduling treatments
 - cost and budgetary constraints
 - perceived and real value of infected tree
- tree diseases collection and diagnosis, including:
 - collecting, preserving, securing and storing specimens and examples of tree pathogens, pests and disorders
 - biosecurity risks and mitigation when collecting and storing specimens
 - preparation of specimens for diagnostics
 - microscopic and macroscopic examinations
 - microscope slide preparation
 - methods of providing a reasoned prognosis
- horticultural function, cultural and performance requirements and characteristics of the trees or other woody plants
- processes and principles of researching tree health problems, diagnoses and remedial treatment available
- industry standards and terminology to describe disease attributes
- recording and reporting tree disease prognosis and management strategies, including:
 - written documentation
 - oral presentations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an arboriculture work site with the diseased trees stipulated in the performance evidence
- resources, equipment and materials:
 - computer with word processing software
 - digital imaging device
 - diagnostic tools, including sounding hammer, trowel, probe, cordless drill
 - soil testing equipment and materials
 - basic dissection microscope 10x – 100x
 - optical devices, including compound microscope, binoculars, hand lens
 - sampling equipment, secure storage containers, disinfectant
 - trees without diseases
 - trees with biotic diseases
 - trees with abiotic diseases
 - bio-secure samples of tree diseases
 - disinfection materials and equipment to minimise infections
- specifications:
 - codes of practice relevant to tree diagnostics work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB608 Interpret diagnostic test results

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to interpret diagnostic test results and evaluate and critique the testing methods and results. It requires knowledge and application of tree anatomy, physiology, pathology, tree dynamics and edaphic environment with substantial depth of understanding of diagnostics methods and analysis.

The unit applies to individuals with broad theoretical and technical knowledge of tree diagnostics. They have a broad range of cognitive, technical and communication skills and demonstrate autonomy and judgement for a defined area of responsibility, undertaking complex work with broad parameters to provide specialist advice and functions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCARB608 Interpret diagnostic test results

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has analysed and critiqued a minimum of five different diagnostic test results.

- For each of the five tests, there must also be evidence that the individual has:
- compiled a portfolio of sample reports of diagnostic test results, including the following types of tests:
 - dynamic and static loading
 - drill resistance measurement device
 - sap flow measurements
 - electronic impedance
 - chlorophyll fluorescence
 - increment core
 - sonic tomography
 - radar imaging system
 - bulk density
 - soil and pH tests
- compiled peer reviewed papers on the use of each diagnostic tool
- reviewed diagnostic tool specifications and user manuals and researched output ranges for each diagnostic tool
- identified key thresholds and benchmarks
- determined suitability of tool selection for purpose of test
- identified and evaluated testing methods
- assessed relevance, benefits and limitations and determined assumptions of methodology
- determined veracity of the equipment, software and systems
- accessed available raw data and testing evidence and verified data relevance and accuracy
- reviewed references cited in the report and identified inconsistencies

- evaluated test results and completed the following:
 - recorded discrepancies against standards
 - assessed the suitability of diagnostic tool for purpose
 - highlighted unsupported statements and factual errors
 - detailed significant omissions, errors and ambiguities
 - detailed inconsistencies and errors of logic
 - identified variances to specifications
- assessed the suitability of the testing process as fit for purpose
- analysed test results, compared test outcomes with original interpretation and considered and accounted for anomalies
- determined validity of outcomes of original report
- developed substantiated positions for critical analysis
- determined further testing required to verify results
- compiled the analysis and reviewed completeness and accuracy of analysis
- recorded analysis outcomes and rationale and documented the analytical processes
- provided alternate analysis and conclusion and documented critique in a report
- presented report according to agreed format and within agreed timelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- diagnostic tests and tools used in arboriculture and their purpose, including:
 - dynamic and static loading
 - drill resistance measurement device
 - sap flow measurements
 - electronic impedance
 - chlorophyll fluorescence
 - increment core
 - sonic tomography
 - radar imaging system
 - bulk density
 - soil and pH tests
- specifications of arboricultural diagnostic tools, including:
 - arboriculture terminology and language used in tree diagnostics
 - data output, interpretation and output ranges, key thresholds and benchmarks
 - diagnostic tool selection and testing methods
- developing an evidence-based critique of testing procedures and results, including:
 - reviewing and verifying cited references and data reports
 - data accuracy and relevance
 - testing diagnostic tools and methods against standards and quality assurance

- identifying non-conformances in documentation of results and reports, including:
 - unsupported statements and factual errors
 - significant omissions, errors and ambiguities
 - variances to specifications and standard procedures
 - incorrect use of arboricultural terminology
 - verification and falsification of results
- selecting and determining the suitability of diagnostics tools and testing procedures and deciding best fit for purpose
- analysing test results and use of industry benchmarks and standards.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an arboriculture work site or environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing software and statistical analysis software
- specifications:
 - test equipment manuals, standard procedures and quality standards
 - sample reports for the diagnostic test methods listed in the performance criteria.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

1. Research urban forest practices and applications	1.1 Research urban forest case studies and management reports 1.2 Review best management practices in urban forest planning and management

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Research applications and functional tools for measuring benefits of urban forests
2. Analyse and report on urban forest benefits	2.1 Analyse economic, social and environmental benefits of urban forests 2.2 Document evidence-based research into a preliminary report on benefits of urban forests
3. Determine values of urban forest benefits	3.1 Conduct sampling analysis of specified urban forest 3.2 Determine required sample size to assess total tree population 3.3 Determine accuracy of sample size 3.4 Determine the quantitative values of urban forest environmental benefits 3.5 Identify base financial value for functional benefit 3.6 Calculate financial values of functional and environmental benefits of current tree population 3.7 Determine benefits of heat island modification of urban areas 3.8 Document a preliminary report on total asset valuation of an urban forest
4. Analyse and compile results	4.1 Analyse urban forest structure and function 4.2 Estimate life expectancy of tree population 4.3 Compile results of urban forest analysis
5. Determine and report on urban forests improvements	5.1 Identify urban forest issues within tree population sample area 5.2 Determine recommendations for tree species and diversity 5.3 Determine extent of current tree planting and replacement programs 5.4 Determine volume and rate of planting programs required for improvements to urban forest performance 5.5 Determine required modifications to planting practices 5.6 Determine targets for urban forest improvement 5.7 Document urban forest performance and provide recommendations for improvement in a report

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyse and extract information from complex research materials for urban forest management and analysis to critique and formulate performance outcomes for urban forests
Writing	<ul style="list-style-type: none"> Demonstrate sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning in urban forest performance reports
Numeracy	<ul style="list-style-type: none"> Select and apply a wide range of highly developed mathematical and problem-solving strategies and techniques to quantitatively analyse the financial, social and ecologic benefits of urban forests

Assessment Requirements for AHCARB609 Measure and improve the performance of urban forests

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has measured and improved the performance of an urban forest, including:

- researched urban forest case studies and management reports
- reviewed best management practices in urban forest planning and management
- researched applications and functional tools measuring benefits of urban forests
- analysed and documented a preliminary report of social and environmental benefits of urban forests
- conducted sampling analysis of a specified urban forest
- determined sample size required to accurately assess total tree population
- determined the quantitative values of urban forest, energy savings, environmental and amenity benefits for the following:
 - canopy cover
 - total carbon storage and annual carbon dioxide sequestration
 - rainfall interception
 - air pollution removal
- identified base financial value for each functional benefit
- calculated financial values of functional and environmental benefits of tree population
- determined benefits of urban heat island modification
- documented a preliminary report on total asset valuation of urban forest
- analysed urban forest structure and function, covering the following in the analysis:
 - urban tree population half-life
 - vacant planting ratio
 - species distribution
 - population diversity
- estimated life expectancy of tree population

- compiled results of urban forest analysis
- identified urban forest issues within tree population sample area
- determined recommendations for tree species and diversity
- determined extent of current tree planting and replacement programs
- determined volume and rate of planting programs required for improvements to urban forest performance
- determined required modifications to planting practices
- determined targets for urban forest improvement
- documented a report on urban forest performance and provided recommendations for improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- urban forests and their management, including:
 - sources of reports and case studies
 - best practices in urban forest planning and management
- measuring the performance of urban forests and their management
- applications and functional tools for measuring benefits of urban forests
- analysing the benefits of urban forests, including:
 - economic and political
 - physical and psychological on community
 - environmental and ecological
- evidence-based research, including what it is and how it is conducted
- sampling techniques and their analysis
- urban forests and their social, environmental and economic implications, including:
 - calculating canopy cover and estimating carbon storage and annual carbon dioxide sequestration
 - rainfall interception
 - air pollution removal
 - energy savings benefit
 - environmental benefits
 - amenity benefits
- valuing urban forests from an economic perspective, including:
 - financial value for functional benefits
 - calculations of financial values of functional and environmental benefits
 - concepts of urban heat island and its modification with urban forests
 - determining the total asset valuation
- the structure, function and faults of urban forests, including:
 - urban tree population life expectancy

- vacant planting ratio
- species distribution and population diversity
- urban forest analysis techniques
- identifying urban forest issues within tree populations
- defining problems and compiling recommendations for tree species and diversity, including:
 - tree planting and replacement programs
 - volume and rate of planting programs
 - modifications to planting practices
 - targets for urban forest improvement
- report writing and structure of urban forest documents and reports.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an urban forest
- resources, equipment and materials:
 - computer with word processing software and statistical analysis software
 - measurement and data collection tools
- specifications:
 - urban forest performance reports, research materials and case studies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB610 Provide consultation in a legal framework

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to provide arboricultural consultation in a legal framework, including the analysis of cases and their outcomes, reviewing policies and preparing for and contributing to legal proceedings.

The unit applies to individuals with a broad theoretical and technical knowledge of the legal implications of arboriculture. They have a broad range of cognitive, technical and communication skills and demonstrate autonomy and judgement for a defined area of responsibility, undertaking complex work with broad parameters to provide specialist advice and functions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the legal context	1.1 Determine legislation and legal cases for area of arboricultural specialisation 1.2 Review and analyse state, territory and federal legislation, regulations and planning instruments pertaining to arboriculture

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Apply legal and ethical standards to professional practice 1.4 Recognise and use legal terminology relevant to professional practice in arboriculture
2. Analyse precedent cases to determine advice outcomes	2.1 Analyse the jurisdiction of tree matters for specific cases 2.2 Recognise the legal framework and court system when preparing and implementing strategies for management of client legal needs 2.3 Seek and review precedents in law and published case studies for arboriculture related cases 2.4 Determine appropriate statutes and supporting precedent cases 2.5 Extract arboricultural information from case studies based on the legal context 2.6 Develop a course of action and discuss consequences with client 2.7 Provide advice within context of statutes and precedent cases
3. Review, develop and apply policies	3.1 Analyse and review policy documents according to legislation and relevant cases 3.2 Prepare policy documents based on legislation and relevant cases 3.3 Determine areas of uncertain legal outcomes in policy documents 3.4 Seek legal advice and amend policy documents to comply with advice
4. Prepare expert report	4.1 Identify additional research and supporting documentation required for matter under investigation 4.2 Follow statutory framework to give advice and work as an expert 4.3 Ensure all available observations and test results are recorded with precision in expert reports 4.4 Declare assumptions underpinning any discussion in report 4.5 Substantiate reported opinion with external authorities according to availability and case requirements 4.6 Prepare and provide a detailed evidentiary expert report according to client brief and statutory requirements
5. Provide expert evidence	5.1 Determine any matter or conflict of interest that may impact on ability to provide impartial evidence 5.2 Read and comply with statutory requirements for an expert witness

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>5.3 Prepare presentation of evidence based on factual data, documented observations and results according to rules of evidence in legal proceedings</p> <p>5.4 Deliver oral evidence and report according to legal proceedings, jurisdiction and client requirements</p> <p>5.5 Assist the court on matters relevant to expert witness testimony and area of expertise</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Draw on a broad range of strategies to build and maintain understanding while interpreting complex legal and regulatory texts when researching and preparing for legal proceedings
Writing	<ul style="list-style-type: none"> Demonstrate sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning for evidentiary and legal reports

Assessment Requirements for AHCARB610 Provide consultation in a legal framework

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least two occasions, provided consultation in a legal framework, including:

- determined legislation and cases applying to trees within specialist consulting areas of work
- reviewed and analysed legislation, statutory regulations and planning instruments
- applied legal and ethical standards to professional practice
- recognised and used legal terminology in professional practice
- analysed jurisdiction of tree matters to specific cases
- recognised the legal framework and courts system when managing client legal needs
- sought and reviewed precedents in law and published arboriculture related case studies
- determined statutes and supporting precedent cases
- provided arboricultural information based on the legal context
- determined course of action and discussed with client
- provided advice within the context of statutes and precedent cases
- analysed and reviewed policy documents according to legislation and relevant cases
- prepared policy documents based on legislation and relevant cases
- determined areas of uncertainty in policy documents
- sought legal advice and amended policy documents
- identified gaps in own arboriculture knowledge and developed and implemented professional development for improvements
- implemented statutory framework when providing advice as an expert
- ensured observations and test results were recorded with precision
- declared and clarified assumptions underpinning policy documents
- substantiated reported opinions using external authorities
- prepared and provided a detailed evidentiary report
- confirmed status as provider of expert evidence

- read and complied with expert witness code of practice
- prepared presentation of evidence based on factual data, documented observations and results and complied with the rules of evidence
- delivered oral evidence and report to court according to legal proceedings, jurisdiction and client requirements
- assisted the court on matters relevant to expert testimony.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, statutory regulations, including planning instruments in state, territory and federal jurisdictions affecting the arboriculture industry, including:
 - environmental planning and management
 - interactions with people and property
- court systems including common law, statute law, civil law, law of torts
- precedents to strategies
- management of client needs
- professional practice and legal and ethical standards, including:
 - processes and practices of preparing and presenting in court
 - responsibilities and constraints of legal presentations
 - developing areas of expertise
- precedents in law and working with published case studies for arboriculture testimony
- accessing and developing professional and arboricultural knowledge, including:
 - benefits of accessing legal and arboricultural professional bodies
 - accessing and studying legal cases
 - maintaining professional standards
 - building and developing expertise and specialised arboriculture knowledge
- legal terms associated with professional practice in arboriculture, their meaning and common use in discourse
- preparation of policy documents based on legislation and relevant cases
- preparation of detailed evidentiary reports
- oral presentation skills and presenting in court.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - courts and court system used for arboriculture cases, or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- computer
- word processing software
- specifications:
 - procedures and processes used in the courts system
 - court case studies related to arboriculture
- relationships
 - client.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB611 Develop an operational tree management plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to determine, collect and collate information required, and to develop and document an operational tree management plan for a specified geographical area.

The unit applies to individuals with a broad theoretical and technical knowledge of trees and their management. They have a broad range of cognitive, technical and communication skills and demonstrate autonomy and judgement for a defined area of responsibility, undertaking complex work with broad parameters to provide specialist advice and functions.

No licensing, legislative or certification requirements are to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine strategic context	1.1 Determine operational area for management plan 1.2 Define scope and purpose of management plan 1.3 Source workplace policies that impact on management plan 1.4 Specify the geographical area for which management plan will

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	apply 1.5 Determine historical and cultural values within geographical area of management plan
2. Determine legislative framework	2.1 Determine land use and ownership of geographic area 2.2 Establish national, state and local government legislative and regulatory constraints for the area
3. Determine stakeholders	3.1 Determine key stakeholders and community group influences in geographic area 3.2 Determine core objectives for trees in geographic area 3.3 Determine current and permissible usage of area
4. Determine tree resources	4.1 Identify, assess and record species, diversity and distribution of trees to be included in management plan 4.2 Determine tree assessments requirements for geographic area 4.3 Define and collect data required for operational management 4.4 Locate and map position of tree planting locations 4.5 Determine tree removal and tree replacement processes 4.6 Determine selection criteria for replacement trees 4.7 Establish a tree inventory for geographic area
5. Determine financial resources	5.1 Determine estimated and actual resources required for development of management plan 5.2 Determine management requirements of trees 5.3 Estimate cost of works required for operational program 5.4 Establish a priority of works and a risk mitigation plan 5.5 Determine frequency of pruning cycles 5.6 Determine operational resources required for planned works 5.7 Identify and incorporate existing third party obligations into planned works
6. Develop documentation	6.1 Collate supporting data and documentation for management plan 6.2 Develop and document operational procedures to achieve management plan objectives

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	6.3 Document draft operational tree management plan
7. Incorporate feedback and prepare plan	7.1 Prepare draft plan for public consultation 7.2 Notify stakeholders and community groups and obtain feedback 7.3 Review and evaluate feedback 7.4 Amend draft plan and incorporate feedback 7.5 Prepare final version of operational tree management plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret relevant information from complex texts, reports, maps and plans, including legislation and regulations, policies and procedures, to formulate organisational strategies for the development of operational management plans for trees
Writing	<ul style="list-style-type: none"> Create detailed procedures and planning documents that include selecting appropriate conventions and stylistic devices to convey precise meaning to the target audience
Numeracy	<ul style="list-style-type: none"> Interpret complex financial information and perform calculations to translate estimates of operational costings and scheduling for inclusion in tree management plans

Assessment Requirements for AHCARB611 Develop an operational tree management plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed an operational tree management plan, which must take all of the following operational components into consideration:

- tree inspections and assessments
- tree selection and planting requirements
- tree management
- tree maintenance
- tree protection
- tree removal
- risk identification and mitigation
- infrastructure protection
- habitat protection
- power line clearance
- community and private trees
- pest and disease control
- significant trees
- trees of a selected geographic area.

There must also be evidence that the individual has:

- determined the strategic context for a specific operational area for management plan
- defined scope of operational management plan
- sourced policies that impact on the management plan
- specified geographical area for the management plan and determined the historical and cultural values within the area
- determined land use and ownership of the area
- established national, state and local government legislative and regulatory constraints for the management plan

- determined key stakeholders and community group influences
- determined core objectives for trees in area
- determined current and permissible usage of area
- identified, assessed and recorded trees to be managed, which must include:
 - botanical and vernacular names
 - diversity of species
 - distribution
- identified and performed assessments required, which must include:
 - tree health and hazards
 - site conditions
 - soil type and condition
- defined and collected data required for operational management
- located and mapped position of planting locations
- determined tree removal and tree replacement processes
- determined selection criteria for replacement trees
- established a tree inventory for the geographical area
- identified financial resources available for management plan implementation
- determined the requirements for tree management
- determined operational resources, priorities, schedules and estimated cost of works required for operational program
- identified existing third party management arrangements and incorporated in plan
- collated information for management plan and developed and documented operational procedures
- prepared a draft operational tree maintenance plan and circulated to key stakeholders and community groups for feedback
- reviewed feedback, amended draft and prepared final operational tree management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tree management plans, their purpose and structure, including:
 - operational areas for formulating an operational tree management plan
 - specifying the objectives, performance targets and intended outcomes for the plan
 - identifying key stakeholders who influence operational tree management plans
 - documenting and preparing draft management plans for feedback
 - preparing documentation and distribution for stakeholder feedback
 - using and assessing stakeholder feedback to finalise final versions
- communications strategies for stakeholder engagement, including:
 - print media
 - public submissions

- public hearing and presentations
- developing and documenting tree management policies and procedures
- considerations for specific sites and trees their use and value, including:
 - historical and cultural heritage
 - land ownership and use
 - street trees and street tree planting
 - national, state and local government legislation and regulations governing arboriculture management policies, including:
 - zoning and planning controls
 - development and planning laws
 - disability discrimination
 - companion animals
- management and maintenance of trees within specific sites, including:
 - health, condition and maintenance requirements
 - the need and frequency of pruning cycles
 - tree assessments and maintaining an inventory
 - tree species, type, diversity and distribution
 - soils analysis and growing conditions
 - tree protection for development and construction sites
 - tree pruning operations
 - power line clearance
 - habitat protection
 - pest and disease controls and control strategies relevant to users
- tree removal and replacement strategies, including:
 - selection of planting locations
 - criteria for the selection of tree species
 - reasons for tree replacement
 - protecting infrastructure
- working with and managing third party obligations, including:
 - contractual arrangements and contractors
 - leasing arrangements
 - licensing obligations
- data collection methodologies and storage
- developing and documenting operational procedures and managing resources, including:
 - personnel
 - supplies and materials
 - equipment and machinery
- third party management and maintenance arrangements, including:
 - obligations affecting management plans
 - existing contracts for works or resources

- leasing arrangements for equipment
- licensing requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an arboriculture work site with trees or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing and statistical software
- specifications:
 - tree inventory
 - operational tree management plan
 - federal, state and local government legislation and regulations relevant to trees
 - codes of practice and Australian standards relevant to arboricultural activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the system	1.1 Identify, consult with and establish stakeholder needs 1.2 Research historic and current tree policies 1.3 Analyse statutory context of tree policies

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Research tree management activities 1.5 Analyse industry tree policy models 1.6 Evaluate comparative tree policy methods and systems 1.7 Research policy and strategic information to inform and develop policy
2. Define policy objectives	2.1 Identify key management objectives and metrics, and establish benchmarks 2.2 Analyse existing policies, procedures and systems for compliance with policy planning requirements 2.3 Evaluate conflicting needs amongst stakeholders 2.4 Determine tree management strategies 2.5 Define strategic tree policy objectives of the organisation 2.6 Define organisational tree policy reflecting strategic objectives 2.7 Develop and communicate change management strategies 2.8 Make recommendations for policy options
3. Define legal parameters	3.1 Determine legal parameters, statutes and local planning laws affecting tree policy 3.2 Determine need for tree policy in compliance with statutory documents 3.3 Seek advice on legal implications of policy from legal representative
4. Define context and limitations of tree policy	4.1 Determine parameters of tree policy 4.2 Determine and record localised soil characteristics relevant to tree species and policy 4.3 Compile database of local and indigenous tree species 4.4 Compile database of introduced tree species suitable for inclusion in policy 4.5 Create list of preferred and desired species 4.6 Determine extent and type of tree data for inclusion in policy documentation 4.7 Set diversity goals of trees for policy

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Develop tree policy	5.1 Develop tree policy to meet strategic objectives 5.2 Develop and communicate procedures to implement policy 5.3 Develop policy determinations for key elements of policy 5.4 Develop draft of strategic tree policy 5.5 Promote tree policy and expected outcomes to key stakeholders 5.6 Seek feedback from stakeholders 5.7 Review and amend policy 5.8 Develop tree policy documentation 5.9 Develop compliance programs in policy documentation 5.10 Implement strategies for continuous improvement
6. Review tree policy implementation	6.1 Publish final tree policy documentation 6.2 Use policy to guide development of operational tree management plans 6.3 Investigate and document implementation outcomes of policy 6.4 Provide feedback to key personnel and stakeholders 6.5 Monitor records for remedial action to improve performance 6.6 Modify policy and procedures according to feedback and performance outcomes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret relevant information from complex texts, reports, maps and plans, including legislation, regulations, policies and procedures, to formulate a strategic view for the development of a tree policy
Writing	<ul style="list-style-type: none"> Create detailed documents for recommendations and tree policy that include selecting appropriate conventions and stylistic devices

Skill	Description
	to express precise meaning to the target audience <ul style="list-style-type: none"> • Create and edit a database of trees using appropriate language, botanical references and characteristics

Assessment Requirements for AHCARB612 Review and develop strategic tree policy

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has reviewed at least two strategic tree policies and has developed at least one strategic tree policy.

There must also be evidence that the individual has:

- identified, consulted with and established stakeholder needs
- researched historic and current tree policies
- analysed statutory and policy context of tree policies
- researched tree management activities
- analysed current industry tree policy models
- evaluated comparative tree methodologies and systems
- researched current policy and strategic information for policy development
- identified key management objectives and management metrics and established benchmarks
- analysed existing policies, procedures and systems for compliance with policy planning requirements
- evaluated stakeholder needs and analysed conflicts
- determined tree management strategies
- defined strategic organisational policy objectives
- defined strategic objectives of the tree policy
- developed and communicated change management strategies
- made recommendations for policy options
- determined legal parameters, statutes and local planning laws
- determined impact of statutory documents on tree policy
- sought legal advice on implications of tree policy
- determined parameters of policy
- determined and recorded soil characteristics relevant to policy

- compiled a database of at least 20 tree species, detailing intensive tree profiles and attributes affected under the policy. The database must include:
 - preferred and desired species highly suitable for local use to be included under the policy
 - the location of species
 - taxonomic characteristics of each species
 - edaphic and environmental preferences and limitations of the trees selected
 - a mix of local, indigenous and exotic tree species must be included
- determined extent and type of tree data to be included in policy documentation
- set goals for tree diversity for the policy
- developed tree policy to meet strategic objectives
- developed and communicated procedures to implement policy
- developed policy determinations for key elements of policy, which must include:
 - hazard identification and mitigation
 - significant trees
 - tree selection and tree replacement strategies
 - street tree planting
 - tree removal
 - tree inspections and assessments
 - tree pruning operations, including power line clearance
 - habitat protection
 - infrastructure protection
 - pest and disease control
- developed draft of strategic tree policy
- promoted tree policy and expected outcomes to key stakeholders
- sought feedback from stakeholders
- reviewed and amended policy
- developed tree policy documentation
- developed compliance programs in policy documentation
- implemented strategies for continuous improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- organisational tree policies their use and structure, including:
 - value and purpose of reviewing historic and current tree policies
 - models for the design of tree policies
 - influences of current and historic tree management activities
- setting management objectives for trees, including:
 - management metrics

- developing and working with industry benchmarks
- setting strategic objectives for trees for organisations and policies
- key stakeholders and their influences on tree policies, including:
 - identifying key stakeholders and their needs
 - assessing and evaluating stakeholder input and values
- analysing and developing tree management strategies
- tree policies and the legal framework, including:
 - legal parameters
 - impact of statutes on trees and policy development
 - local planning laws and their impact on tree policy development
 - compliance with policy planning requirements
 - legal implications of policies
 - seeking legal advice
 - policy design and styles
- local environment and tree selection for policy development, including:
 - edaphic and environmental preferences and limitations
 - rainfall infiltration and runoff
 - local and introduced tree species and their performance for inclusion in tree policies
 - regional implication of tree selection
 - taxonomic characteristics
- database development for tree species, including:
 - programs used for database design
 - structure and use of databases
 - data input of tree inventory and tree profiles
- key elements for policy determination, including:
 - hazard identification and mitigation
 - the significance of trees from an environmental, cultural or historic perspective
 - tree selection and use in the landscape
 - tree replacement strategy
 - street tree planting and effect on the urban landscape
 - tree removal and tree protection issues
 - tree inspections and assessments
 - tree pruning operations, infrastructure protection and power line clearance
 - environmental considerations and habitat protection
 - pest and diseases and their control
- communications strategies for seeking and providing feedback on draft policies
- developing, documenting and reviewing draft policies, including:
 - compiling and organising policy materials into a structure policy design
 - role and design of compliance programs
 - the continuous improvement process in policy development

- record keeping, reporting and policy development.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - access to an organisation requiring strategic tree policy development, or environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing, statistical and database software
- specifications:
 - procedures and processes used for the design of strategic tree policies
 - two strategic tree policies stipulated in the performance evidence
- relationships:
 - organisation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB804 Analyse tree structure and biomechanics

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to identify and analyse aspects of tree biomechanics that affect the physical load and strength of trees, branches and anchorage in the ground. It requires the assessment of tree strength and the loads that occur, and the ability to assess factors that can weaken trees that increase the chance of failure.

The unit applies to individuals with highly specialised advanced theoretical and technical knowledge for professional work and research in arboriculture. They exercise advanced cognitive, technical and communication skills and demonstrate complete autonomy, judgement and adaptability in research and analysis for complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine existing physical loads and strengths of trees, branches and anchorage	1.1 Determine existing physical loads affecting trees 1.2 Identify source and factors causing stress on trees 1.3 Assess root plate environment and history for damage

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Assess history of pruning operations to above and below ground components</p> <p>1.5 Determine presence and extent of defects on trunk and root system</p> <p>1.6 Assess strength and material properties of tree structural components</p>
2. Determine wind load	<p>2.1 Determine wind environment of tree</p> <p>2.2 Determine surface area of structure exposed to wind</p> <p>2.3 Determine crown surface area exposed to wind</p> <p>2.4 Assess aerodynamic drag factor of tree crown</p> <p>2.5 Estimate primary loads occurring in seasonal climatic events</p> <p>2.6 Determine wind-load of prevailing stormy weather</p> <p>2.7 Determine load and drag associated with saturated foliage</p>
3. Determine structural integrity by static load testing	<p>3.1 Determine static load on trees for structural integrity testing and estimate wind-equivalent load</p> <p>3.2 Calibrate static load testing instruments according to manufacturer instructions</p> <p>3.3 Conduct static tests according to instrument instructions and analysis procedures</p> <p>3.4 Monitor loads and forces on trees to ensure safe limits to prevent damage</p> <p>3.5 Record data from static tests according to workplace procedures</p> <p>3.6 Compare data with benchmarks obtained from stable tree populations</p> <p>3.7 Prepare a report on structural integrity testing of tree from the static load tests</p>
4. Determine tree dynamic response	<p>4.1 Investigate tree biomechanics using dynamic methods of analysis</p> <p>4.2 Review complex models of tree dynamics analyses</p> <p>4.3 Calculate mass of branches of tree to determine degree of open-grown</p> <p>4.4 Calculate vector of force on tree</p> <p>4.5 Determine tree dynamic response under defined wind loads</p> <p>4.6 Prepare a report on structural integrity testing of tree from</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	dynamic load analysis
5. Investigate and consolidate structural integrity data and create a structural integrity report	5.1 Investigate level of contribution of material properties in tree dynamics 5.2 Investigate dynamic effect of branches on natural oscillation frequency and damping effect 5.3 Determine level of contribution of form and morphology in tree dynamics 5.4 Review suitability of invasive and non-invasive methods of testing 5.5 Evaluate and determine likelihood of structural failure 5.6 Confirm level of anchoring potential of root system and stability of tree 5.7 Prepare a structural integrity report and provide to client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Create logical, succinct and accurate reports that use appropriate industry terminology and mathematical language and symbols
Numeracy	<ul style="list-style-type: none"> Analyse and synthesise highly complex mathematical information for tree mechanics, and perform calculations to determine structural integrity of trees

Assessment Requirements for AHCARB804 Analyse tree structure and biomechanics

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has analysed the structure and biodynamics of a minimum of five different trees, including performed the following:

- five static load tests, and
- five dynamic load analyses.

There must also be evidence that the individual has:

- determined existing physical loads affecting trees
- identified areas of high stress on trees and the factors that affect these areas of high stress
- assessed root plate environment for damage
- assessed history and effect of tree pruning operations on tree roots and stems
- determined presence and extent of tree defects
- assessed strength and material properties of tree structural components
- determined wind environment of tree
- determined surface area of structure exposed to wind
- determined crown surface area exposed to wind
- assessed aerodynamic drag factor of tree crown
- estimated primary loads occurring in seasonal climatic events
- determined wind-load of prevailing storms
- determined load associated with saturated foliage
- determined static load on trees for structural integrity testing as an estimate of a wind equivalent load
- calibrated static load testing instruments
- conducted static tests that must include:
 - loads to the tree
 - measures the trunk strength
 - assesses root plate anchorage

- monitored loads and forces using electronic equipment
- monitored trees to ensure loads are kept within safe limits to prevent damage
- maintained records of all data from static tests
- compared data against benchmarks from stable tree populations and prepared a report on structural integrity testing
- investigated tree biomechanics using dynamic methods of analysis
- reviewed complex models of tree dynamics analysis
- calculated mass of branches to determine degree of open-grown form of tree
- calculated vector of force on the tree
- determined tree dynamic response under defined wind loads
- investigated level of contribution of material properties in tree dynamics
- investigated the dynamic effect of branches on frequency and damping
- determined the level of contribution of form and morphology in tree dynamics
- reviewed suitability of invasive and non-invasive methods of testing
- evaluated and determined likelihood of structural failure
- confirmed level of anchoring potential of root system and stability of tree
- prepared a structural integrity report and provided to client.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tree dynamics and impact of tree form and morphology
- tree stability and physical loads affecting trees, particularly in high stress environments
- root plate environment, including:
 - depth and consistency of soil
 - spatial limitations
 - site excavations and potential damage
- arboricultural activity and impact on tree structure and stability, including:
 - pruning operations to branches and roots
- presence and impact of defects on tree structure, including:
 - extent of decay and damage of trunk and root system
 - assessment of strength and material properties of structural wood
- biomechanical impact of wind on tree structure, including:
 - seasonal wind patterns, and tree exposure
 - surface area and tree structure
 - aerodynamic drag factor of tree crown in relation to trunk diameter and extent of hollowness
 - estimation of primary loads occurring in seasonal climatic events
 - severe wind-load due to storms and extreme weather conditions
 - load associated with rain and snow saturated foliage

- additional drag associated with saturated foliage
- open-grown form of tree
- testing principles for static load, including:
 - use and purpose of a static load on trees during structural integrity testing as an estimate of a wind equivalent load
 - calibrating static load testing instruments
 - limits of structural safety during a static testing
 - measurement of trunk strength
 - invasive and non-invasive methods of testing trees
- assessment of root plate anchorage in the ground
- methods and reasons for monitoring loads and forces on trees, including:
 - electronic monitoring
 - monitoring of tree to ensure loads are kept within safe limits
- value and purpose of benchmarks obtained from stable tree populations
- tree biomechanics studies using dynamic methods of analysis, including:
 - simple models of tree dynamics
 - complex models and finite element analyses
 - multimodal approaches representing dynamics of branches on trees
- calculations required for structural and biomechanical assessments of trees, including:
 - mass of branches
 - vector of force on trees
 - tree dynamic response
 - wind velocity and direction
 - statistical analysis and interpretation of test results
- dynamic effect of branch movement on tree stability and failure rate, including:
 - oscillation frequency
 - energy dissipation and damping effect of canopy structure
 - likelihood of structural failure
 - level of anchoring potential of root system
 - stability of tree
- records and reporting procedures for analysis of structural integrity testing.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an arboriculture work site that has the trees stipulated in the performance evidence
- resources, equipment and materials:
 - computer with word processing software

- wind environment statistics
- static load test equipment
- models of tree dynamics
- specifications:
 - test equipment manuals, standard procedures and quality standards for performing load tests
 - sample reports for the diagnostic test methods listed in the performance criteria.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB805 Perform mycology assays

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to safely work within a laboratory environment, collect and identify wood decay fungi specimens from the field, prepare in-vitro cultures, and carry out primary experiments on fungi cultures. Work is performed using laboratory hygiene and safety procedures for sampling, sterilisation and cleaning of laboratory equipment and instruments.

The unit applies to individuals with highly specialised advanced theoretical and technical knowledge for professional work and research in arboriculture. They exercise advanced cognitive, technical and communication skills and demonstrate complete autonomy, judgement and adaptability in research and analysis for complex problems.

No licensing, legislative or certification requirements are to this unit at the time of publication.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed the following:

- conducted field identification of a minimum of ten wood decay fungi to generic level
- conducted field identification of a minimum of ten non-pathogenic fungi to generic level
- analysed the lifecycle, biology, ecology and effects of a minimum of ten saprophytic wood decay fungi species on trees
- analysed the lifecycle, biology, ecology and effects of a minimum of ten pathogenic wood decay fungi species on trees
- collected, cultured, analysed and identified a minimum of five wood decay fungi to generic level.

There must also be evidence that the individual has:

- researched the role of microorganisms in the health of trees and forests
- researched the role and contribution of wood decay fungi to forest and tree health, and responses
- examined the taxonomy and evolutionary relationships of corticoid and polypore wood decay fungi
- investigated the role of fungal species on various hosts
- analysed lifecycle, biology, ecology and effects of wood decay fungi species
- examined relationships of fungal species with tree defects and failures
- analysed biosecurity implications of pathogenic fungal species
- reviewed state and federal biosecurity plans and procedures
- observed and evaluated signs and symptoms of fungi causing decay in trees
- maintained a record of the following for each mycological specimen:
 - location, size, and condition of wood decay fungi
 - presence of mycoparasites
 - size, condition and extent of hollows and cavities

- documented details of environmental characteristics of fungal affected trees
- determined methods of dissemination and infection of adjacent trees and vegetation
- sampled wood decay fungi and mycoparasites from trees for in-vitro culture and identification
- selected, checked and fitted personal protective equipment and contamination prevention clothing
- decanted and prepared standard laboratory chemicals and materials
- prepared selective mycological culture media to grow and isolate field samples
- prepared field samples of fungi for culturing on media
- excised fungal specimens and applied to media
- maintained cultures and repeated excise procedures to isolate clean specimens
- prepared and maintained cultured samples for further testing
- updated records and securely stored evidence according to chain of evidence protocols
- prepared microscope slides of isolated cultures
- examined and identified cultured fungal samples to generic level
- recorded digital images of identified fungi
- performed laboratory assay tests to evaluate fungal characteristics
- documented experimental assay test results
- developed and maintained a mycology culture collection and submitted to government databases and culture collections according to procedures
- prepared a diagnostic report on a suspected emergency plant pest according to state and federal biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- microbiological organisms and their impact on the health of forests and trees, including:
 - bacteria
 - fungi
 - protozoa
 - algae
 - viruses
- fungi in the forest environment, including impact on:
 - biodiversity
 - tree nutrition
 - forest health
 - environmental biochemistry
 - pathology
- taxonomy and evolutionary relationships of corticoid and polypore wood decay fungi, including:
 - lifecycles, biology and ecology

- important pathogenic and saprophytic tree wood decaying fungi
- tree infections of tree components by fungal species and tree failure
- visual symptoms of decay and tree decline, including:
 - dieback
 - reduced growth rate and chlorosis
 - presence of basidiocarps
 - decayed wounds
 - hollows and cavities
- state and federal biosecurity plans and procedures, including:
 - biosecurity implications of known and threat fungal species
 - Australian Emergency Plant Pest Response Plan
- field identification of fungi and fungal infections of trees, including:
 - pathogenic fungi
 - non-pathogenic fungi
 - recording and describing location, size and condition of wood decay fungi
 - presence of mycoparasites
 - size, condition and extent of hollows and cavities
- environmental characteristics and growing conditions of trees affected by fungi, including:
 - site characteristics and site history
 - soil conditions
 - climate and microclimatic variables
 - proximity of adjacent trees and vegetation
 - movement of people and vehicles
 - potential impact on assets, property and landscape
- tree infection methods and introduction, establishment, spread, and susceptibility of trees
- collecting and sampling of fungi in the field, including:
 - field sampling techniques of wood decay fungi and mycoparasites
 - storage of collected samples
- standard laboratory techniques and safety when preparing, measuring and decanting chemicals and materials
- culturing fungi for identification in the laboratory environment, including:
 - species-specific media and growing environment for culturing fungi
 - techniques to prepare and extract field samples for culturing
 - methods of excising and inoculating media with specimens
 - isolating clean cultures from primary cultures
 - preparation and maintaining clean cultured samples
- laboratory assay tests for fungal species identification, including:
 - deoxyribonucleic (DNA) based assay techniques
 - growth rate
 - temperature range

- pathogenicity
- mycoparasitism
- documentation of assay test results
- laboratory identification of wood decay fungi, including:
 - procedures and techniques for the preparation of microscope slides of isolated cultures
 - identification of cultured fungal samples
 - use of guides, keys and reference materials for identifying fungi
- development and maintenance of culture collections
- the importance and procedures for chain of evidence protocols, including:
 - secure storage of digital and physical evidence
 - storing and recording field samples
 - maintaining accurate records for slides, cultures and DNA samples
 - digital imaging techniques and importance in evidence and record keeping
- maintaining fungi collections, including:
 - methods of submission to relevant government databases and culture collections
- record keeping, reports and documentation requirements, including:
 - state and federal biosecurity procedures
 - emergency plant pest (EPP) and PLANTPLAN guidelines.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - trees with fungal infections stipulated in the performance evidence
 - laboratory suitable for performing the tests stipulated in the performance evidence
- resources, equipment and materials:
 - computer with word processing software
 - digital imaging device
 - diagnostic tools, including sounding hammer, trowel, probe, cordless drill
 - soil testing equipment
 - digital dissection microscope 10x – 100x
 - compound microscope
 - laboratory equipment to perform aseptic techniques in a sterile environment
 - personal protective equipment and contamination prevention clothing
 - culture growing environment
- specifications:
 - access to standard procedures and quality standards for growing culture, performing tests and conducting assessments
 - access to reference materials for fungi identification.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB806 Research urban forest performance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to research an urban forest for its processes, benefits, values and impact on climate change, and produce a report on its performance.

The unit applies to individuals with advanced theoretical and technical knowledge and skills for professional or highly skilled work and/or further learning in one or more disciplines or areas of practice. This unit applies to individuals with advanced cognitive, technical and communication skills to provide specialist advice and analysis, and generate and transmit solutions to complex problems. They demonstrate autonomy, well-developed judgement, adaptability and responsibility as a practitioner or learner.

No licensing, legislative or certification requirements are to this unit at the time of publication.

Assessment Requirements for AHCARB806 Research urban forest performance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has researched the performance of an urban forest, including:

- investigated urban forest processes, including:
 - elemental components of urban forests
 - role of urban forests as a component of urban ecosystems
 - threats and resilience of urban forests
 - impact of urban forests on hydrology and water quality
 - relationship of trees on soil biota and chemistry
- determined contribution of trees towards rhizosphere biodiversity, bioremediation and soil health
- investigated energy conservation and microclimate modification systems of trees and urban forests
- researched and analysed heat island effect of an urban area
- evaluated health, social and psychological benefits of urban forests
- prepared a preliminary report on benefits of urban forests
- researched methods and technologies for spatial mapping of urban forests
- analysed carbon sequestration process in urban forests
- analysed methods for sampling urban forests
- evaluated urban forest valuation methodologies
- prepared a preliminary report on valuation of an urban forest
- investigated contribution of urban forest to carbon cycles
- determined local climate, soil and management factors affecting forest growth and carbon sequestration
- investigated forest carbon sequestration to help mitigate climate change
- prepared a report evaluating the contribution of forest for mitigation of climate change
- prepared a report on social, environmental, economic and climatic values of urban forests

- determined challenges of increased urbanisation and urban densification on urban forests
- determined potential benefit of urban forest to help mitigate climate change
- compiled reports and investigations and prepared a final report on urban forest performance, which must include multi-disciplinary solutions to challenges of urbanisation on urban forests.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and impact of urban forest on our ecological and social environment, including:
 - elemental components of urban forests
 - role of urban forests as a primary component of urban ecosystems
 - urban forests in cities, their threats and resilience
- trees and their impact on hydrology and water quality, including:
 - regulation of hydrological processes
 - retention of precipitation
 - mitigation of salinity
- trees and their impact on soils, including:
 - relationship of soil biological network
 - soil chemistry and structure
 - soil stabilisation and erosion control
- interactions of trees in their growing environment and urban setting, including:
 - contribution of trees towards rhizosphere biodiversity, bioremediation and soil health
 - energy conservation and microclimate modification systems of trees and urban forests
 - heat island analyses of an urban area
 - health, social and psychological benefits of urban forests
- capturing, recording and assessing urban forest data and values, including:
 - methods and technologies of spatial mapping of urban forests
 - the carbon cycle, urban forests and carbon economics
 - methods for sampling urban forests
 - urban forest valuation methods
 - contribution of urban forest to carbon cycles and mitigation of climate change
 - influences of climate, soil and management strategies affecting forest growth and carbon sequestration
 - evaluation of urban forest and benefits to climate change
- social, environmental, economic and climatic values of urban forests, including:
 - urbanisation and urban densification on urban forests development
 - solutions to challenges of urbanisation on urban forests.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - urban forest and urban environment
- resources, equipment and materials:
 - computer with word processing and statistical software
 - measurement and data collection tools
- specifications:
 - standard procedures and quality standards for performing tests and conducting assessments
 - urban forest valuation methods and techniques.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to conduct an entomology research project requiring the collection and documentation of insects affecting trees. Important research themes to be investigated include the interrelationships of insects on their environment, forests and trees and the impact they have on economics, health of trees and the control strategies employed to contain infestations.

The unit applies to individuals with highly specialised advanced theoretical and technical knowledge for professional work and research in arboriculture. They exercise advanced cognitive, technical and communication skills and demonstrate complete autonomy, judgement and adaptability in research and analysis for complex problems.

No licensing, legislative or certification requirements are to this unit at the time of publication.

Assessment Requirements for AHCARB807 Conduct an entomology research project

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted entomological research with a focus in any two of the following research themes:

- conception, design, and implementation of safe and efficacious control strategy
- research and development of alternative pest management strategies
- investigative study on the longevity, infectivity and virulence of tree pests
- monitoring and assessment of infestation levels of a pest outbreak
- design and implementation of biocontrol strategies using predators, parasitoids and entomopathogenic fungi
- design and implementation of methods for monitoring and assessing population dynamics and distribution of tree pest species
- implementation of a comparative ecological field study investigating efficacy and compatibility of pest insect control strategies
- research and test a management plan for a phytophagous insect
- research and test a breeding program for a beneficial insect
- research three model systems to examine tritrophic effects of tree susceptibility
- design, implement, investigate, evaluate and report on tritrophic interactions
- investigate preference and survivability of insects in a tree environment
- design projects investigating the subsequent risk analysis and tests required
- development of a tree pest survey strategy
- research and report on geographical or climatic distribution of insect pests
- coordination with an international and domestic multidisciplinary collaborative research initiative.

There must also be evidence that the individual has:

- investigated anatomical, morphological and taxonomical features of insects
- examined the interaction of insects with trees
- researched annualised population and generational behaviour of insects

- developed and documented a reference collection of a minimum of one hundred specimens of arboricultural related insects and vectors from at least four orders of insects, annotated with the following:
 - date of collection
 - location where insect was collected
 - host tree/plant on which it was collected/feeds
 - name of insect to at least the level of genera
- designed and developed a database to store information of tree pests and vectors
- compiled host climatic and geographic distribution data
- investigated and identified natural antagonists, predators and parasitoids of insects
- investigated phytophagous and damaging insect–tree dynamics
- investigated symbiotic/beneficial insect–tree dynamics
- investigated physiological responses of tree resistance to insects
- investigated host–pathogen and pathogen–vector interactions
- evaluated conditions affecting selection of host trees by subcortical feeding insects and factors associated with attack
- investigated and assessed insect transmission of disease
- evaluated multi-trophic interactions between host plant-pest-pathogen/parasitoids
- determined economic costs of insect damage to trees
- evaluated insects as environmental indicators of health and condition
- determined insect biological hazards
- investigated impact and effects of control strategies on target and non-target organisms
- investigated insect resistance to pesticides
- investigated and evaluate biological control agents of tree pest control
- researched and evaluated plant health management options to manage insect damage
- collected, tabulated and analysed data for publications
- determined relevance of results to arboriculture
- compiled and communicated research and results in a research paper according to standards expected of professional technical peer-reviewed journal
- submitted research paper for review
- reviewed feedback from reviewer and amended paper
- communicated key facts and conclusions to industry in an article or presentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- research skills and designing research projects, including:
 - investigative skills and monitoring techniques
 - defining the scope and purpose of research activity
 - data collection, management and storage
 - data processing, analysis and modelling

- statistics and data interpretation
- design and development of formal research papers and the process of peer-reviewed publication
- design and development of industry papers and presentations for communication of research and findings
- entomology and the impact of insects on our environment, including:
 - anatomical, morphological and taxonomical features of different classes of insects
 - insect behaviour, ecology and nutrition and their interaction with trees
 - population and generational behaviour and phenology of insects and impact on plants and trees over time
 - host, climatic and geographic distribution of insects
 - insects as indicators of environmental health
- collecting, storing and documenting insect reference collections, including:
 - catching and preserving techniques
 - taxonomic and naming conventions for insects
 - tagging and labelling specimens
- design and construction of databases and data entry procedures
- insects and their economic impact on society and health of trees, including:
 - natural antagonists, predators and parasitoids of insects
 - phytophagous and damaging insects on tree dynamics
 - symbiotic and beneficial insects and impact on tree dynamics
 - natural responses of trees to insect invasion
 - host-pathogen and pathogen-vector interactions
 - subcortical feeding insects and conditions for selecting host trees
 - factors associated with successful attack
 - insect as a vector for transmission of disease
 - insects as biological hazards
- a systems approach to multi-trophic interactions between host plant-pest-pathogen or parasitoids
- pest insect control strategies, their advantages and disadvantages, including:
 - mechanical control
 - chemical control and pesticide resistance
 - biological control agents
 - managing the environment and tree health to offset infestations
 - integrated pest management (IPM)
- direct and indirect impact of chemical pesticides and biocontrol agents on target and off-target organisms.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - trees and forests with insect populations
- resources, equipment and materials:
 - computer with word processing, database and statistical analysis software
 - digital imaging device
 - diagnostic tools, including sounding hammer, trowel, probe, cordless drill
 - soil testing equipment
 - digital dissection microscope 10x – 100x
 - compound microscope
 - microtome, staining and slide mounting equipment
 - histochemical stains
- specifications:
 - standard procedures and quality standards for performing tests and analysis
 - reference materials and keys for insect identification.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB808 Contextualise diagnostic tests

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to review diagnostic testing models, analyse their performance, contextualise the test for a range of tree domains and execute a diagnostic test project.

The unit applies to individuals with highly specialised advanced theoretical and technical knowledge for professional work and research in arboriculture. They exercise advanced cognitive, technical and communication skills and demonstrate complete autonomy, judgement and adaptability in research and analysis for complex problems.

No licensing, legislative or certification requirements are to this unit at the time of publication.

Arboriculture (ARB)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research diagnostic testing principles and processes	1.1 Conduct a literature review on tree-related research and diagnostic test case studies 1.2 Operate diagnostic testing equipment to industry and manufacturer standards

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Interpret underpinning scientific principles of test processes 1.4 Determine diagnostic assumptions and limitations of testing process for selected diagnostic tool
2. Analyse requirements and calibration processes	2.1 Analyse quantification, variance and tolerance requirements for selected diagnostic tools 2.2 Investigate and verify calibration baselines for diagnostic equipment 2.3 Verify calibration processes have been performed on diagnostic equipment according to verified baselines
3. Determine project parameters and execute a diagnostic test project	3.1 Select testing processes for primary tree domains 3.2 Select diagnostic tools for each domain and contextualise the testing process 3.3 Define research method to be used 3.4 Conduct a literature review for current research and science of each primary domain 3.5 Establish efficacy of test for each primary domain 3.6 Conduct a diagnostic test project
4. Interpret testing results	4.1 Analyse test results for performance metrics of each of the selected diagnostic tools 4.2 Interpret results against benchmark and anticipated ranges 4.3 Confirm predictive responses in terms of pre-treatment results to projected post-treatment outcomes 4.4 Articulate meaning of results within context of primary domain
5. Provide prognosis and prepare management plans	5.1 Provide an informed prognosis 5.2 Research management options and lag time 5.3 Prepare a report that documents management plans

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Compare and contrast technical specifications and procedures for diagnostic tests from case studies to analyse and formulate views and opinions
Numeracy	<ul style="list-style-type: none"> Perform complex analytical calculations for testing and evaluating the accuracy and tolerances of diagnostic tests and to establish baselines and calibration requirements for testing and equipment

Assessment Requirements for AHCARB808 Contextualise diagnostic tests

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has contextualised diagnostic test results for each of the following five primary domains for trees:

- anatomy
- physiology
- pathology
- dynamics
- edaphic environment.

There must also be evidence that the individual has:

- conducted a literature review of peer-reviewed research and relevant case studies
- operated diagnostic testing equipment
- interpreted underpinning scientific principles of test processes
- determined the diagnostic assumptions and limitations of the testing process for the selected diagnostic tool
- analysed quantification, variance and tolerance requirements
- investigated and verified calibration baselines for diagnostic equipment
- verified calibration processes have been performed on test equipment
- selected testing processes for each of five primary tree domains
- selected diagnostic tools and contextualised the testing process for each domain
- defined research method to be used
- conduct a literature review for current research and science of each primary domain
- established efficacy of the test for each primary domain
- conducted a diagnostic test project
- analysed test results for performance metrics of selected diagnostic tools
- interpreted results against benchmark and anticipated ranges
- confirmed predictive responses in terms of post-treatment to pre-treatment results

- articulated meaning of results within context of primary domain
- provided an informed prognosis
- researched management options and lag time
- formulated a report documenting management plans.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- conducting literature reviews for peer-reviewed documentation, scientific research and case studies
- diagnostic testing processes and test equipment, and their purpose and functional operation, used for tree domains, including:
 - limitations of the testing process
 - assumptions and limitations of tools used in diagnostics
 - standardising test equipment and determining baselines and calibration
 - verifying efficacy of testing methodologies
- primary tree domains and testing regimes and diagnostics used for each, including:
 - tree anatomy
 - tree physiology
 - tree pathology
 - tree dynamics
 - the edaphic environment of trees
- developing scientific research projects and selecting a research method, including:
 - setting goals and outcomes for research
 - hypothesis testing
 - observational research
 - measurement of functional relationships
 - establishing performance metrics and normal anticipated ranges of test result
- test results; their documentation and interpretation, including:
 - diagnostic test projects and processes
 - contextual understanding of results
 - statistical analysis of results
 - prognostics
 - use of diagnostic outcomes in the development of management plans.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- trees and forests or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing and statistical analysis software
 - diagnostic tools for selected testing
 - access to diagnostic test equipment and operating instructions
- specifications:
 - standard procedures and quality standards of performing diagnostics tests and analysis
 - reference materials, reports and scientific literature for reviews.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

Assessment Requirements for AHCARB809 Develop an urban forest management framework

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed an urban forest management framework for a specified geographic location, including:

- investigated models of urban forest management
- established key performance metrics and outcomes from client brief
- determined data sets required for objectives of managing the resources according to stakeholder needs
- analysed urban forest for resources
- determined agents and conditions affecting urban forest health
- analysed species spatial geography using geographical information systems (GIS)
- determined canopy density targets
- determined objectives and outcomes of urban forest to community
- determined asset value of trees and forest according to client brief and industry benchmarks
- performed cost-benefit analysis of forest assets
- analysed variation in asset value within variables
- analysed and reviewed policy documents for meeting performance metrics and desired outcomes
- determined statutory, liability and risk affecting urban forests
- identified stakeholder requirements and perceptions
- evaluated extent of impact and outcomes of proposed policy documents
- recorded and reported policy determinations on tree assets
- documented an urban forest management policy
- developed a conceptual framework for urban forest management
- determined requirements for street tree master plans according to client brief
- set vision and objective statements
- determined quantifiable goals

- established and maintained inventories and databases according to client brief
- developed implementation and operational plans
- developed and documented an urban forest management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- urban forests and their benefits to community, including:
 - models of urban forest management
 - objectives, outcomes and performance metrics of urban forests
 - maintaining urban forest health
 - tree anatomy, physiology, pathology, tree dynamics and edaphic environment in relation to urban forest management
 - urban forest as a resource
- quantifying the urban forest as an asset, including:
 - measuring and data sets
 - spatial analysis of trees and forests, and the use of geographical information systems (GIS)
 - canopy density targets
 - asset value of single tree
 - asset value of forest
 - value criteria
 - relevant benchmarks
 - cost-benefit analysis
 - competing views of forest values
- community objectives and outcomes of urban forests, including:
 - social
 - environmental
 - public health
 - economic
 - aesthetic terms
- measuring the performance of urban forests, including:
 - performance metrics
 - stakeholder requirements and perceptions
- design and development of urban forest policies and management plans, including:
 - conceptual framework of managing urban forests
 - street tree master plans
 - vision statements and their role in management plans
 - setting and documenting achievable and quantifiable goals and objectives
- maintaining accurate and accessible tree inventories, including:

- mapping and managing data
- data management software
- inventories and databases
- setting and planning the implementation of management plans, including:
 - urban forest operational plans
 - the urban forest management plans.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an urban community with trees and forests or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing software
- specifications:
 - standard procedures and quality standards for developing urban forest plans
 - client brief.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCARB810 Analyse edaphic interactions of trees and structures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to analyse the edaphic interactions of trees and structures through investigations into soil characteristics and effect on tree and structure stability, tree roots and interactions with structures, and their relationship resulting in potential tree and structural failure.

The unit applies to individuals with highly specialised advanced theoretical and technical knowledge for professional work and research in arboriculture. They exercise advanced cognitive, technical and communication skills and demonstrate complete autonomy, judgement and adaptability in research and analysis for complex problems.

No licensing, legislative or certification requirements are to this unit at the time of publication.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- AHCARB804 Analyse tree structure and biomechanics.

Unit Sector

Arboriculture (ARB)

Elements	Performance Criteria

Assessment Requirements for AHCARB810 Analyse edaphic interactions of trees and structures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has analysed the edaphic interactions of trees and structures for a specific site and has prepared a minimum of two reports, which must include:

- a report on damage to structures by tree roots
- a report on the stability of tree with a defective or damaged root plate.

There must also be evidence that the individual has:

- investigated soil conditions that contribute to structure and tree stability, including:
 - angle of repose of soil materials
 - soil plasticity
 - impact of soil moisture on soil cohesion and plasticity
 - modes of soil liquefaction
- investigated and tested soils for properties affecting soil conditions, including:
 - measured soil moisture content and field capacity
 - determined soil texture
 - assessed level of soil cohesion
 - determined shear strength of the soil
 - investigated load bearing capacity of soil
 - calculated mass of the soil plate
- determined root morphology, division and distribution and amount of buttressing of tree
- determined species characteristics for development of tap root system
- determined anatomical features of tree roots and identified tree roots for a given tree
- conducted research tests to determine forces and pressures exerted by trees through the soil
- estimated and measured dimensions of roots exerting a force on a structure
- calculated total surface area of the roots exerting a force on a structure
- calculated force exerted by roots per unit of surface area of structure

- calculated total force exerted by roots of a given surface area
- measured and determined volume of structure
- researched and calculated mass of structures
- determined impact of gravity on mass
- determined effect of leverage on the forces exerted by tree roots on structure
- determined factors of root–soil matrix interactions
- investigate area of contact between root and soil
- investigated elasticity, tensile strength and breaking stress of roots
- investigated root cross-sectional morphology
- assessed root plate for damage, deficiencies or defects that may contribute to tree failure
- estimated impact of static and dynamic testing for root plate stability
- evaluated possible root failure by root breakage
- evaluated possible anchorage failure by soil breakage or slippage
- investigated and assessed:
 - effects of increasing mass
 - methods for, and effects of, increasing the modulus of rupture
 - effects of use of curved structures
 - effects of soil mass and friction
 - effects of use of anchors, braces and props
- compiled investigations and assessments into reference portfolio
- created a report of potential tree damage to structure and provided design suggestions to mitigate damage
- reviewed root plate assessment, prepared final report on stability of tree and provided design advice to mitigate potential tree failure
- created an expert witness report on potential structure or tree stability
- discussed installation and protection measures with project personnel
- negotiated and resolved anomalies in installation and protection measures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- impact of soil on the stability and structural integrity of structures and trees, including:
 - angle of repose of soil
 - soil plasticity
 - soil moisture content
 - field capacity of soil
 - effects of soil moisture on soil cohesion and plasticity
 - modes of soil liquefaction
- testing soils for performance characteristics and soil stability, including:
 - soil texture
 - soil cohesion

- soil moisture and field capacity
- shear strength of soils
- load bearing capacity
- calculating mass of soil plate
- tree root structures and their impact on soils and stability, including:
 - root morphology
 - root division
 - root distribution
 - buttressing
 - species development of tap root systems
 - identification of tree roots based on anatomical features
- pressures exerted by tree roots, including:
 - experimental modelling of tree root damage
 - testing tree roots impact on structures and soils
 - direct and indirect forces and pressures exerted in soils by trees
 - techniques and methods of estimating and measuring dimensions of roots
 - factors of root–soil matrix interactions
 - area of contact between root and soil
 - elasticity of roots
 - tensile strength of roots
 - breaking stress of roots
 - root cross-sectional morphology
- calculations for determining forces exerted by tree roots, including:
 - total surface area of the roots exerting forces on structures
 - forces exerted by roots per unit of surface area of structure
 - total force exerted by roots of a given surface area
 - measurement of volume of structures
 - calculating the mass of structures and the impact of gravity on mass
 - effect of leverage on the forces exerted by tree roots onto structure
- tree root health and condition and impact on tree stability, including:
 - size of root plate and extent of root plate damage
 - extent of root plate deficiencies
 - extent of root plate defects
 - impact of static and dynamic testing for root plate stability
 - likelihood of root failure by root breakage and failure of root plate
 - likelihood of anchorage failure by soil breakage or slippage
- considerations of structural design and development, and tree support to mitigate potential tree or structure damage, including:
 - effects of increasing mass of structure
 - effects of structure design and curvature of shape on strength of structures

- effects of soil mass and friction
- effects of increasing the modulus of rupture
- effects of use of tree support mechanisms
- Australian standards relevant to trees on development sites
- structure designs for mitigation of tree damage and failure
- tree protection measures
- creating reference portfolios of research and investigations, including annotations and calculations
- documenting and reporting procedures, report preparation and communicating results of analysis, including:
 - test results and assumptions
 - expert witness reports, their purpose and design
 - using the correct language in reports and reporting
- fundamentals of the concepts, basic science and technology of structural engineering, construction and architecture as relates to arboriculture and impact of trees on structures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a construction or development site with trees and structures or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer with word processing software
 - digital imaging device
 - diagnostic tools, including sounding hammer, trowel, probe, cordless drill
 - soil testing equipment
 - digital dissection microscope 10x – 100x
 - compound microscope
 - microtome, staining and slide mounting equipment
- specifications:
 - standard procedures and quality standards for performing soil analysis, tests and analysis on roots and structures
 - reference materials, reports and literature relevant to investigations and research into engineering, construction and architectural interactions with trees.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In particular, assessors must have:

- arboriculture vocational competencies at least to the level being assessed

- current arboriculture industry skills directly relevant to the unit of competency being assessed.

AHCBAC102 Support agricultural crop work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.

Application

This unit of competency describes the skills and knowledge required to provide support to others undertaking agricultural crop production activities.

The unit applies to individuals who work alongside a supervisor and undertake defined routine activities. They exercise limited autonomy and identify and seek help with simple problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials, tools and equipment for agricultural crop work	1.1 Identify materials, tools and equipment required according to supervisor instructions 1.2 Check materials, tools and equipment and report inconsistencies and faulty items to supervisor 1.3 Load and unload materials onto vehicle without damage to load and vehicle

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Select and check personal protective equipment (PPE) 1.5 Identify hazards and report to supervisor according to work health and safety procedures
2. Undertake agricultural crop work as directed	2.1 Follow instructions from supervisor seeking clarification when unclear 2.2 Handle and transport materials, equipment and machinery according to instructions and safety procedures 2.3 Perform cropping work according to safety, environmental and biosecurity procedures 2.4 Communicate with work team in a positive and professional manner 2.5 Maintain a clean and safe work site 2.6 Report work performance and inconsistencies in timelines to supervisor
3. Clean up on completion of cropping work	3.1 Store re-usable materials according to supervisor instructions 3.2 Dispose of waste material according to supervisor instructions 3.3 Clean, maintain and store tools and equipment according to manufacturer specifications and supervisor instructions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret documented instructions for work relevant information and identifies inaccuracies for implementing requirements
Oral Communication	<ul style="list-style-type: none"> Use short simple spoken texts to communicate with work team and supervisor
Numeracy	<ul style="list-style-type: none"> Estimate weights and measures of materials to ensure safe manual handling and loading of materials

Unit Mapping Information

Assessment Requirements for AHCBAC102 Support agricultural crop work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion, supported others in agricultural crop production and has:

- identified and prepared tools, materials and equipment according to instructions
- demonstrated crop support activities while handling materials and equipment safely
- maintained a clean and safe working environment and cleaned up after work activities
- followed workplace work health and safety, biosecurity and environmental procedures
- selected and checked personal protective equipment (PPE) and reported work performance to supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work procedures for cropping work, including:
 - health and safety
 - biosecurity risk
 - environmental controls
- common materials, tools and equipment used for agricultural crop production work, including:
 - loading and unloading transport vehicles safely
 - safe handling of materials and equipment
- common agricultural cropping work activities and expected performance outcomes
- procedures for cleaning site following completion of work.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a farm where cropping activities are performed or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - basic tools and equipment
 - materials and consumables
 - specific items of personal protective equipment
- specifications:
 - workplace procedures for work to be performed
 - manufacturer operating instructions for tools and equipment
 - workplace instructions
- relationships:
 - team member(s)
 - supervisor(s)
- timeframes:
 - according to timelines specified in supervisor instructions

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC202 Assist agricultural crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist others to maintain agricultural crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for agricultural crop maintenance	1.1 Follow instruction for crop maintenance activities and clarify any

Element	Performance criteria
operations	special operating instructions 1.2 Select and prepare appropriate machinery, equipment and tools 1.3 Identify work health and safety hazards in crop maintenance and report to supervisor 1.4 Select, use and maintain suitable personal protective equipment
2. Assist with the implementation of maintenance operations	2.1 Assist with the implementation of the crop weed control program 2.2 Assist with the implementation of the crop pest and disease control program 2.3 Assist with the implementation of the crop nutrition program 2.4 Assist with the implementation of paddock maintenance duties 2.5 Assist with the implementation of any appropriate irrigation duties
3. Complete maintenance operation	3.1 Clean and sterilise tools and equipment appropriately 3.2 Dispose of all containers, leftover fluids, waste and debris according to enterprise policies and minimising the impact on the environment 3.3 Complete all required workplace records appropriately 3.4 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC202 Assist agricultural crop maintenance.

Assessment Requirements for AHCBA202 Assist agricultural crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare machinery, equipment and tools to maintain crops
- conduct scheduled routine checks on machinery and vehicles for oil levels, tyre pressures, water levels and greasing points
- assist with cropping duties including weed control, pest and disease control, crop nutrition and paddock maintenance
- report the presence of weeds, pests and disease in crops
- record the details of crop maintenance
- identify hazards and follow safety directions at work
- read and interpret a range of workplace information
- calibrate equipment
- measure quantities of treatment
- operate machinery to manufacturer's specifications and enterprise procedures
- safely apply under supervision appropriate agricultural chemicals in weed and pest control programs
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- operations of a range of cropping machinery
- importance of correct timing and procedures for crop maintenance
- weed control in crops

- pest and disease control
- crop nutrition
- methods of waste disposal causing minimal impact on the environment
- enterprise work health and safety and biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC204 Prepare grain storages

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely prepare storages, surrounding areas and equipment in readiness for receiving grain at an acceptable level of hygiene. This unit applies to workers in specialist grain storages or on grain farms.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all work in confined spaces must comply with state and federal legislation requirements.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work in bulk material storage area	1.1 Follow the work program and clarify with supervisor 1.2 Identify work health and safety hazards in grain storage and report to supervisor and implement suitable controls 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select, prepare and maintain appropriate equipment and tools
2. Prepare storage area	2.1 Clean the storage site of weeds, dust and spillage appropriately 2.2 Dispose refuse appropriately 2.3 Prepare and maintain the storage site appropriately
3. Prepare storages	3.1 Clean bulk material storages appropriately of all residues 3.2 Check bulk material storages for structural safety, damage or deterioration, and repaired or reported appropriately 3.3 Prepare and erect temporary storages appropriately
4. Prepare bulk material handling machinery	4.1 Clean bulk material handling machinery appropriately to be free of contamination and residues 4.2 Assist in the adjustment and setting bulk material handling equipment appropriately 4.3 Prepare bulk material handling equipment according to manufacturer's instructions and enterprise requirements
5. Complete maintenance operation	5.1 Record workplace information 5.2 Dispose of all waste and debris according to enterprise policies and minimising the impact on the environment 5.3 Clean and store tools and equipment appropriately 5.4 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC204A Prepare grain storages.

Assessment Requirements for AHCBC204 Prepare grain storages

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- erect simple temporary bulk material storages
- check equipment and storage facilities, and identify current or impending faults
- perform pre-operational checks and routine safety, service and maintenance procedures on tools, equipment and machinery
- operate hand and independently powered tools and cleaning equipment to industry standards
- clean, secure and store machinery and equipment
- handle hazardous substances (fuels) safely
- read and interpret manufacturer's specifications, work and maintenance programs, and Safety Data Sheets (SDS)
- prepare the storage area for access by grain carriers
- prepare grain storages by removing all residues and checking structure
- work in confined spaces in accordance with State/Territory legislation, where required
- prepare and test grain handling machinery
- communicate with supervisor
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- range of construction methods, potential hazards, safety and structural requirements for storage

- erection and dismantling for types of temporary storage used by organisation
- organisation and commodity quality requirements for grain storage
- grain storage hygiene requirements
- typical signs of structural damage to be documented and reported
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- machinery maintenance procedures and operating principles
- machinery and equipment cleaning, storage and protection methods
- appropriate action in contingency situations
- organisation requirements for protective equipment and safe practices in relation to work health and safety
- State/Territory legislation in respect to working in confined spaces
- potential hazards associated with the operation of basic tools and equipment
- regulations and codes of practice with regard to work health and safety, environment and the use and control of machinery and equipment
- personal protective clothing and equipment and when and how it should be used
- organisational recording and reporting procedures.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBC205 Assist agricultural crop establishment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assisted in the establishment of at least one agricultural crop in a broad acre setting, including:

- communicated with supervisor and team members and followed instructions and crop production plan
- performed paddock and ground preparations ready for planting including:
 - applied pre-planting soil treatments according to instructions
 - prepared planting equipment
- performed planting operations according to instructions and crop production plan including:
 - treated and planted crop
 - applied soil amendments if required
 - applied weed control treatments
- operated a range of crop establishment machinery or technology
- maintained records of preparation and planting according to workplace procedures
- used and maintained personal protective equipment (PPE)
- followed workplace work health and safety, biosecurity and environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic principles of broad acre cropping and their establishment, including:
 - importance of correct timing and procedures for crop planting
 - field hygiene, biosecurity and quality control for crop establishment
 - a range of pre-planting soil treatments and amendments, their application and importance

- basics of managing previous crops including, cutting, slashing, rolling and burning stubble
- accumulation of waste and its disposal, including:
 - impact on the environment
 - types of waste common to cropping
 - procedures for the disposal of containers, leftover fluids, organic materials and other debris
- workplace health and safety, risks and hazards, including:
 - responsibilities for following safety instructions/directions
 - application and handling of agricultural chemicals
 - materials handling
- preparation and operation of common farm machinery used in crop establishment, including:
 - machinery operation and safety
 - manufacturer specifications
 - workplace procedures
- basic principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
 - integrated pest and weed management techniques
- communication with team members and supervisor
- calculations and measurements required for:
 - determining quantities of materials for treatments and amendments
 - determining crop row spacing and density.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broad acre farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seeds or plants for planting
 - broad acre crop planting tools machinery and equipment or technology
 - personal protective equipment

- specifications:
 - workplace procedures and processes
 - manufacturer operating instructions for tools, equipment and machinery
 - specific safety data sheets for treatments and fertilisers
 - instructions and plans for planting
- relationships:
 - team member(s) and supervisor(s)

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBC206 Assist agricultural crop maintenance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assisted others in the maintenance of a broadacre agricultural crops one at least one occasion and has:

- prepared machinery, equipment and tools
- identified basic hazards and reported to supervisor for directions
- selected, checked and maintained personal protection equipment (PPE)
- conducted routine checks on machinery and vehicles for safe operation
- operated machinery to manufacturer specifications and workplace procedures
- reported the presence of weeds, pests and disease in crops
- assisted cropping duties under direction, including:
 - weed, pest and disease control program
 - crop nutrition program
 - general paddock maintenance
 - soil moisture management according to crop production plan
 - maintained records of crop maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operations and maintenance of common cropping machinery, including:
 - preparation
 - safe operation
 - repairs and maintenance
 - cleaning and biosecurity
- importance of correct timing and procedures for crop maintenance

- weed, pests and disease control in crops, including:
 - recognition of common weeds, pests and diseases
 - basic control strategies
 - tools and equipment used for control and their safe operation
- basic crop nutrition, including:
 - common fertilisers and ameliorants used
 - application strategies for application
 - tools and equipment used for application and their safe operation
- basic irrigation maintenance activities, including:
 - component operation
 - common repairs
 - common water transport methods and maintenance activities
- general paddock maintenance duties, including:
 - basic fencing and paddock security
 - fire mitigation and control
 - headland weed control
 - drainage and irrigation channels
- waste disposal and potential impact on the environment
- work health and safety, including:
 - broadacre farm hazards, risks and controls
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pests, diseases and weeds and related control materials
 - specific tools and equipment
 - personal protective equipment (PPE)
 - irrigation equipment
- specifications:
 - workplace procedures and processes
 - manufacturer operating instructions for tools, equipment and machinery
 - safety data sheets
 - workplace instructions

- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC207 Assist agricultural crop harvesting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to assist others in harvesting a broadacre agricultural crop, under direction of a supervisor.

The unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for agricultural crop harvesting operations	1.1 Confirm crop harvesting plan and instructions with supervisor 1.2 Prepare tools, machinery, equipment or technology according to supervisor instructions 1.3 Identify work health and safety hazards in crop harvesting, assess risks and report to supervisor 1.4 Select, check, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	(PPE)
2. Prepare harvesting machinery and vehicles for crop harvesting operations	2.1 Refuel machinery and vehicles used for harvesting 2.2 Conduct routine pre-start checks 2.3 Confirm special operating instructions and work procedures with supervisor
3. Assist with harvesting of crops	3.1 Assist safe operation of harvesting machinery and ancillary equipment according to crop conditions 3.2 Maintain hygiene procedures for harvest equipment 3.3 Assist with checks and adjustments for harvester and ancillary equipment according to instructions
4 Complete harvesting operation	4.1 Clean harvesting machinery and vehicles according to biosecurity and hygiene procedures 4.2 Dispose waste according to workplace and environmental procedures 4.3 Update workplace records according to procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret, consolidate and check understanding and accuracy of instructions with supervisor
Writing	<ul style="list-style-type: none"> Use industry language and correct concepts and terminology when updating records
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations to determine correct volumes of fuel, lubricants and coolants Perform basic calculations when setting machinery for harvesting operations

Assessment Requirements for AHCBC207 Assist agricultural crop harvesting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion assisted in the preparation, operation and maintenance of machinery and equipment during harvest operations, including:

- identified and reported safety hazards and risks and follow safety directions
- communicated with supervisor
- prepared harvesting equipment or technology and machinery, including:
 - calibrated and adjusted equipment for optimum performance
 - measured quantities
 - checked and maintained oil levels
 - greased equipment and machinery components
 - checked and maintained water levels
 - checked and maintained tyre air pressures
- operated machinery to manufacturer instructions and workplace procedures as directed in support of the harvesting team
- refuelled harvesting vehicles and machinery
- disposed of waste according to environmental procedures
- maintained records according to procedures
- followed workplace health and safety and biosecurity procedures
- used and maintained personal protective equipment (PPE).

Knowledge Evidence

- An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
- basic harvesting machinery operation and equipment basic maintenance

- basic principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- hazard identification during harvesting, including:
 - workplace health and safe work practices
 - trapping, entanglement, sheering and cutting
 - noise
 - dust and respiratory issues
 - vibration
 - personal protective equipment and its use
- crop hygiene and biosecurity requirements and procedures
- work health and safety, including:
 - types of crops and their characteristics for harvest
 - weather conditions, fire risk and fire prevention
 - broad acre farm hazards, risks and controls
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety
 - workplace biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broad acre farm with harvestable crop or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - harvest equipment appropriate for the crop to be harvested
 - tools and equipment or technology for checking and maintaining machinery
 - personal protective equipment
- specifications:
 - workplace procedures
 - manufacturer operating instructions for machinery and equipment
 - workplace instructions
- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC208 Prepare grain storages

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to safely prepare storages, surrounding areas and equipment in readiness for receiving grain at an acceptable level of hygiene. This unit applies to workers in specialist grain storages or on grain farms.

The unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No licensing, legislative or certification requirements apply to this unit at the time of publication. However, all work in confined spaces must comply with state and federal legislation requirements.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work in bulk material storage area	1.1 Confirm work program instructions and clarify anomalies with supervisor 1.2 Identify work health and safety hazards in grain storage and report to supervisor and implement suitable controls 1.3 Select, check, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	(PPE) 1.4 Select, prepare and maintain equipment and tools
2. Prepare storage area	2.1 Clean storage site of contaminants according to workplace and biosecurity procedures 2.2 Dispose of waste according to workplace procedures 2.3 Prepare and maintain the storage site according to procedures
3. Prepare storage facilities	3.1 Clean residue from bulk material storage facility according to workplace and biosecurity procedures 3.2 Check structural integrity, damage or deterioration of bulk material storage facility and repair or report according to workplace procedures 3.3 Prepare and erect temporary storage facility according to work program instructions
4. Prepare bulk material handling machinery	4.1 Clean machinery of contamination and residues according to workplace and biosecurity procedures 4.2 Assist setting and adjustment of bulk material handling equipment according to work program instructions 4.3 Conduct pre checks of bulk material handling equipment according to manufacturer instructions and workplace requirements
5. Complete maintenance operation	5.1 Update grain storage preparation records according to workplace procedures 5.2 Dispose of waste according to workplace and environmental procedures 5.3 Clean, maintain and store tools and equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret manufacturer specifications, work and maintenance programs, and safety data sheets (SDS) relevant to storage preparation and equipment operation
Oral Communication	<ul style="list-style-type: none"> Use concepts and industry terminology when communicating with supervisor
Numeracy	<ul style="list-style-type: none"> Use and recognise the numerical relationships between adjustment and settings on bulk materials handling equipment and their effective operation

Assessment Requirements for AHCBAC208 Prepare grain storages

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared grain storage facilities for any 2 of the following storage methods:

- silo
- grain bags
- shed
- bunker/pit

In doing so, there must also be evidence that the individual has:

- identified hazards and followed safe work procedures
- erected temporary bulk material storages according to storage plan
- checked equipment and storage facilities, and identified current or impending faults
- selected, checked, used and maintained personal protective equipment (PPE)
- performed pre-operational checks and routine safety, service and maintenance procedures on tools, equipment and machinery
- operated hand and independently powered tools and cleaning equipment to industry standards
- cleaned, secured and stored machinery and equipment following use
- prepared storage facility ready for grain delivery
- worked in confined spaces in accordance with State/Territory legislation
- followed work health and safety, and biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- methods for storing grain in Australia and their construction, including:

- hazards, safety and structural requirements for storage
- erection and dismantling for types of temporary storage used by organisation
- typical signs of structural damage to be documented and reported
- commodity quality standards for grain storage
- grain storage hygiene and biosecurity requirements
- machinery and equipment used in grain storage work, including:
 - pre-operational and safety checks
 - settings and adjustments and effect on grain handling
 - servicing and maintenance procedures
 - safety and operating principles
 - cleaning and storage
 - biosecurity requirements
- common problems and contingencies in grain storage situations
- workplace health and safety practices and personal protection, including:
 - working at heights and confined spaces with storage bins
 - potential hazards associated with the operation of basic tools and equipment
 - regulations and codes of practice for grain storage machinery and equipment
 - personal protective clothing and equipment and when it should be used
 - power lines and elevated equipment safety
 - storage dust and potential for fire and explosions
- recording and reporting procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated at a grain storage facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - materials and consumables for grain storage repair/construction
 - cleaning tools, equipment and consumables
 - machinery and equipment for grain handling
 - specific items of personal protective equipment (PPE)
- specifications:
 - workplace procedures
 - manufacturer operating instructions for equipment and machinery
 - safety data sheets
 - workplace instructions
- relationships:

- supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC303 Prepare to receive grains and seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare to test grains and seeds at receival facilities.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work	1.1 Identify and report on work health and safety hazards and risks in grain handling to supervisor 1.2 Select and use appropriate personal protective equipment 1.3 Follow enterprise work health and safety policies
2. Maintain hygiene in receival storage facilities	2.1 Clean and inspect receival and storage areas 2.2 Ensure receival area is free from potential contaminants 2.3 Inspect facilities and identify and report items that require maintenance or repair
3. Prepare testing equipment for use	3.1 Assemble testing equipment manufacturers instructions 3.2 Check equipment calibration and arrange for recalibration if required 3.3 Inspect testing equipment and identify and report items requiring maintenance or repair 3.4 Clean testing equipment and ensure it is free from residue
4. Prepare to provide service to growers or suppliers	4.1 Collate all documentation and information including conflict and dispute resolution procedures 4.2 Record information on receival and store all documents and data appropriately
5. Prepare for storage of grains and seed	5.1 Confirm arrangements for appropriate segregation of grain and seed 5.2 Confirm site transfer arrangements 5.3 Inspect conveying equipment and identify and report any items requiring maintenance or repair 5.4 Apply enterprise biosecurity policies as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC303A Prepare to receive grains/seeds.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCBC303 Prepare to receive grains and seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and assess risks in grain/seed receival area
- operate and maintain of grain/seed testing equipment
- inspect and clean receival and storage areas and equipment
- source grower/supplier information
- identify grain/seed types
- use personal protective equipment
- identify defects such as split grains/seeds, undersize, chaff, weed seeds
- prepare the site and maintain hygiene
- prepare testing equipment
- liaise with growers and/or contractors
- maintain segregation of grains/seeds and arrange storage
- follow work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- grain/seed receival processes and industry practice
- calibration requirements for testing equipment
- types of testing equipment such as protein, oil content, moisture etc
- requirements for segregation, traceability and hygiene
- impact of residues including chemical
- seed and grain industry grains receival standards and quality assurance requirements

- legislation, regulations and policies for Work Health and Safety and biosecurity
- segregation strategies/methods
- conflict and dispute resolution.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC309 Undertake preparation of land for agricultural crop production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to select materials and equipment from crop production plan and prepare the land for an agricultural crop.

The unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine requirements for land preparation	1.1 Confirm work requirements from crop production plan with supervisor 1.2 Confirm method of land preparation and order of work from crop production plan 1.3 Identify work health and safety hazards, assess risk and implement

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	controls according to workplace health and safety procedures 1.4 Select, check, use and maintain personal protective equipment (PPE)
2. Prepare for land preparation	2.1 Select vehicles, equipment, machinery or technology required for land preparation according to crop production plan 2.2 Inspect vehicles, equipment and machinery for operational use and report faults to supervisor 2.3 Clean vehicles, equipment and machinery according to workplace biosecurity and hygiene procedures 2.4 Check and calibrate equipment and machinery according operator instructions and crop production plan specifications 2.5 Record maintenance and servicing activity according to workplace record keeping procedures
3. Implement land preparation activities	3.1 Verify timelines, resources and quality standards specified in crop production plan 3.2 Clear land of unwanted debris and waste according to crop production plan, biosecurity and environmental procedures 3.3 Implement weed and pest control measures specified in crop production plan 3.4 Apply fertilisers, ameliorants, or pre-planting treatments according to crop production plan 3.5 Identify and respond to potential implications of land preparations on environment according to workplace environmental procedures 3.6 Operate vehicles and equipment efficiently and safely according to operator instructions and crop production plan specifications 3.7 Monitor vehicle and equipment performance and adjust for discrepancies
4 Complete land preparation operations	4.1 Clean and store vehicles, equipment and machinery according to workplace biosecurity and hygiene procedures 4.2 Dispose of waste according to workplace environmental procedures 4.3 Maintain records and documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCBC309 Undertake preparation of land for agricultural crop production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared land for at least one agricultural crop and has:

- interpreted and implemented crop production activities according to plans, specifications, crop quality standards and work procedures
- fitted and used PPE
- conducted accurate measurements for materials and land specifications
- adjusted, calibrated and maintained cultivation equipment
- conducted pre- and post-operational checks on tools, vehicles and equipment
- used tools, machinery and equipment safely incorporating technology to improve efficiency during land preparation
- followed workplace health and safety, biosecurity and environmental procedures and practices
- cleaned and stored vehicles, equipment and machinery
- disposed of waste
- maintained records and documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of soils preparation and effect on crop establishment including expected standards for different crop types
- soil types and impact of methods for land preparation for crop production, including:
 - cultivation
 - deep ripping
 - spading

- mouldboard ploughing
- minimum tillage and direct seeding
- environmental issues relating to soil preparation activities for cropping, including:
 - drainage and irrigation systems
 - soil nutrition and amelioration
 - waste disposal procedures
 - disposal or incorporation of preceding crops
 - legality and impact of land clearing
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
 - integrated pest and weed management techniques
- a range of pre-planting chemical or organic treatments, their purpose and method of application
- safe operation and maintenance of land preparation equipment
- work health and safety procedures and principles, including:
 - manual handling
 - exposure to hazardous substances
 - working safely around farm machinery
 - fire risk and control strategies
 - power lines and elevated equipment safety
- workplace biosecurity and environmental policies.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or an environment that accurately represents workplace conditions
- relationships
 - supervisor
- resources, equipment and materials:
 - site preparation tools, machinery and equipment
 - fertilisers, ameliorants and treatments
 - personal protective equipment (PPE)

- specifications:
 - workplace policies and procedures
 - manufacturer operating instructions for tools, equipment and machinery
 - workplace plans and specifications

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC310 Maintain pastures and crops for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain pastures and crops for livestock production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Operating machinery carries risk and candidates should observe all enterprise and manufacturer's requirements.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor & assess agricultural pasture and crop condition, growth and requirements	1.1 Monitor pasture and crop growth, nutrient status and health regularly and record observations 1.2 Report deviation from expected growth and vigour 1.3 Identify, monitor and report weeds, pests and diseases 1.4 Monitor soil fertility and plant nutrition where required 1.5 Follow directions to establish sites for regular measurement of soil moisture where required. 1.6 Measure moisture levels and calculate soil water percentage using soil probe or other measuring tools 1.7 Report observations of pasture and crop ripening to manager to determine the timing of harvest
2. Undertake pasture and crop health operations	2.1 Identify work health and safety hazards and implement appropriate controls 2.2 Select, use and maintain appropriate personal protective equipment 2.3 Contribute to an Integrated pest and plant health strategy to address pasture / crop health and growth issues 2.4 Select and use equipment to apply treatments where required 2.5 Follow label instructions and any specialist advice 2.6 Apply specialist sprays appropriately for growth stages 2.7 Apply technology to ensure most efficient performance of operations 2.8 Conduct any required chipping or spot spraying 2.9 Assess, record and report pasture and crop growth stages and keys 2.10 Apply water as required in irrigated situations 2.11 Consider adverse environmental impacts when performing all applications
3. Complete cleaning and hygiene operations	3.1 Clean and maintain equipment appropriately 3.2 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work appropriately 3.3 Follow enterprise biosecurity procedures 3.4 Complete all required records and documentation appropriately
4. Implement grazing strategies	4.1 Contribute to an integrated pest management program using livestock to conduct stubble and fallow weed control 4.2 Implement appropriate grazing program to maintain pasture and

Element	Performance criteria
	crop production for grazing 4.3 Respond to changes in quantity and quality of available pasture and crop with appropriate grazing management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCBAC310 Maintain pastures and crops for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- detect differences and variations in pasture and crop growth
- report/communicate such differences to the supervisor/farm owner
- observe and report on health, nutrition and growth of the pasture and crop
- monitor pests and disease in pastures and crops
- assess pastures and crop maturity
- apply sprays and fertilizers as directed
- measure soil moisture and relate data to crop requirements
- apply technology to ensure most efficient performance of operations
- monitor the productivity and feed intake of grazing livestock
- assess the impact of grazing on pasture and crop productivity
- follow enterprise work health and safety and animal welfare policies and procedures.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential hazards associated with the operation of basic tools, equipment and machinery
- general machine maintenance procedures
- machinery operating principles and safe operating methods
- role of technology in improving efficiency
- environmental impacts associated with the operation of machinery and equipment
- organisation recording and reporting procedures
- symptoms of pasture and crop lacking health and vigour
- signs of pest and disease infestation, moisture stress and nutrient deficiencies

- hygiene requirements for equipment that comes into contact with the pastures and crops
- types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical)
- work health and safety and pesticides, legislation
- different livestock grazing habits
- enterprise sustainability practices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC311 Conserve forage

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to prepare paddocks and storage facilities for forage conservation. It includes processing and harvesting forage crops and placing them into storage. The process also includes managing risks associated with forage conservation activities.

The unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for forage conservation	1.1 Confirm forage conservation options from production plan 1.2 Identify risk factors for spoilage in forage conservation 1.3 Confirm paddock conditions for suitable forage production 1.4 Prepare machinery and equipment or technology for forage

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>production according to production plans and biosecurity procedures</p> <p>1.5 Ensure clear access to paddocks for harvesting and transport machinery</p> <p>1.6 Prepare storage facility for selected forage conservation method</p> <p>1.7 Identify work health and safety hazards, assess risks and implement controls according to workplace health and safety policies, including selection of personal protective equipment</p>
2. Prepare paddocks for forage conservation	<p>2.1 Close paddock to stock access according to production plan</p> <p>2.2 Report growth stage of crop for harvest to supervisor</p> <p>2.3 Monitor paddock for pest control and biosecurity for threats to forage bulk and quality</p>
3. Make forage	<p>3.1 Implement work health and safety procedures for forage conservation</p> <p>3.2 Monitor weather conditions affecting forage harvest</p> <p>3.3 Identify and assess moisture content of forage material</p> <p>3.4 Mow, condition, tedder and rake swaths according to weather conditions and forage drying targets</p>
4. Harvest and store forage	<p>4.1 Select and use forage harvest equipment efficiently according to production plan</p> <p>4.2 Monitor harvest equipment for mechanical performance and resolve, repair or report wear or damage according to workplace procedures</p> <p>4.3 Prepare forage for storage according to forage storage and production plan</p> <p>4.4 Load and transport forage safely to forage storage site according to storage plan</p> <p>4.5 Place forage into storage facility to minimise spoilage and potential fire risk</p> <p>4.6 Collect samples and perform quality tests of stored forage according to workplace procedures</p>
5. Complete operations	<p>5.1 Complete records according to workplace procedures</p> <p>5.2 Dispose of waste and debris according to workplace and environmental procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Clean and maintain machinery and ancillary equipment according to manufacturer instructions 5.4 Inspect stored forage facilities for environmental impact and report to supervisor according to workplace and environmental procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret plans and procedures for forage crop conservation. Interpret manufacturer specifications, work and maintenance programs, and safety data sheets (SDS) relevant to forage crop conservation
Oral Communication	<ul style="list-style-type: none"> Reporting to supervisor on crop growth stages
Numeracy	<ul style="list-style-type: none"> Use and recognise the numerical relationships for adjustments and settings on harvesting and handling equipment and their effective operation

Assessment Requirements for AHCBC311 Conserve forage

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared at least two of the following forms of forage:

- hay
- wilted silage (baleage or haylage)
- bulk chopped silage
- green chop

There must also be evidence that the individual has:

- interpreted and implemented a forage conservation production plan
- prepared paddocks for forage conservation
- prepared forage for harvest, prepared storage facilities and stored forage according to production plan
- maintained records according to workplace procedures
- prepared, operated and maintained forage preparation and harvesting equipment or technology
- assessed workplace health and safety risks and implemented controls according to workplace health and safety policies
- selected and used personal protective equipment
- harvested forage efficiently according to production plan
- followed workplace biosecurity and environmental policies and procedures
- completed records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of forage systems and methods including:
 - hay, wilted silage (baleage haylage), bulk chopped silage, green chop

- factors affecting the quality of forage
- dry matter content and testing
- hygiene and biosecurity requirements
- manufacturer specifications
- forage production equipment and machinery, including:
 - range and functions of silage and haymaking machinery and equipment
 - operation and safety
 - preparation for use
 - cleaning and biosecurity
 - licensing requirements on public land
- common weeds, pests and diseases associated with crops and pastures
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- workplace health and safety risks associated with conservation of forage, including:
 - types and application of personal protective equipment (PPE)
 - impact of moisture on combustion and fires in hay stacks
 - fire/explosion from dust in enclosed spaces
 - potential contact with overhead power lines
 - personal exposure to noise and dust and the need for PPE
 - animal health factors
 - working at heights and in confined spaces with storage bins
- potential risks of forage conservation on the environment
- record keeping systems for forage conservation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm with paddocks of forage or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - forage plants ready for preparation and harvesting
 - tools, equipment or technology and machinery
 - personal protective equipment (PPE)
- relationships:
 - supervisor

- specifications:
 - workplace policies, procedures, processes for forage conservation
 - manufacturer operating instructions for tools, machinery and equipment or technology
 - use of forage specifications
- timeframes:
 - within a time period required to preserve forage quality.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BAC312 Test and grade grains and seeds on receipt

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to prepare test equipment, sample and perform receipt tests on delivered grains and seeds, prepare samples for despatch for further tests and prepare for grains and seeds storage.

The unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare sampling and testing equipment for use	1.1 Clean, maintain, test and calibrate testing and sampling instruments according to manufacturer instructions 1.2 Identify and report faulty sampling and testing equipment 1.3 Identify work health and safety hazards, assess the risk and implement controls according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2 Identify grains on receipt	2.1 Inspect load to confirm commodity type 2.2 Identify presence of contaminants 2.3 Record supplier information according to workplace procedures
3. Collect grains samples for testing	3.1 Collect sample for testing according to workplace sampling procedures and industry standards 3.2 Prevent mixing or contamination of samples 3.3 Label and prepare samples for testing according to workplace procedures and industry standards 3.4 Record sample information according to workplace procedures
4 Perform initial tests on samples	4.1 Handle samples during testing to prevent cross contamination 4.2 Operate testing equipment to perform required tests according to manufacturer instructions, workplace procedures and industry standards 4.3 Record results of test outcomes according to procedures 4.4 Determine the level of defects and contaminants from visual comparison with industry reference material 4.5 Compare test results with specifications to determine grade of sample 4.6 Accept or reject receipt of commodity according to workplace policies and procedures 4.7 Communicate outcome of tests and acceptance/rejection of delivery to client
5 Despatch samples to testing facilities	5.1 Pack and label samples according to sampling procedures 5.2 Record testing requirements according to workplace procedures 5.3 Despatch samples to testing facility
6. Prepare for storage of grains and seed	6.1 Conduct segregation arrangements of grain and seed according to storage plan and biosecurity policies and procedures 6.2 Complete required site transfer arrangements 6.3 Inspect conveying equipment and identify and report faulty equipment

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret instructions, policies and procedures for sampling and testing of grains and seeds
Writing	<ul style="list-style-type: none"> Record and complete workplace records, sample labels and test results using clear language, and industry terminology
Oral communication	<ul style="list-style-type: none"> Participate in verbal exchanges using collaborative and inclusive techniques including active listening and questioning to convey outcome of receipt process to client
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations for sample tests and interpret results to determine if product is to be received or rejected

Assessment Requirements for AHCBC312 Test and grade grains and seeds on receipt

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has sampled and tested grains or seed on receipt of delivery on at least one occasion, including:

- identified work health and safety hazards, assessed risks and implemented controls
- identified grain and seed types on delivery
- sampled grains and seeds including:
 - collected representative sample
 - packaged sample to prevent cross contamination
 - recorded and labelled samples according to procedures
- identified defects in grain including:
 - split grains and seeds
 - undersize
 - chaff
 - weed seeds and other contaminants
 - damage
- read, interpreted and applied seed and grain sampling and testing standards
- dispatched and stored grains and seeds samples and maintained hygiene
- conducted sampling and initial testing
- operated testing equipment which must include:
 - manual tests
 - electronic test equipment
- maintained records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- safe operating procedures for handling and storing grain, including:
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety
 - storage dust and potential for fire and explosions
- grain/seed testing processes including testing and calibrating sampling instruments
- industry standards, codes of practice and quality assurance requirements for grains and seeds
- testing procedures and parameters for grains, including:
 - protein
 - weight
 - oil content
 - moisture
 - defects
 - sprouts
- testing procedures and parameters for seed, including:
 - genetic purity
 - cultivar
 - dead
 - abnormal
 - hard seed
 - germination potential
 - contamination with foreign matter
- analysis and consequence of test result
- segregation strategies/methods and hygiene management
- record keeping strategies and importance for traceability
- impact of residues including chemical
- enterprise biosecurity policies and procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or seed handling/processing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - delivery vehicle with seed or grain

- tools for sampling grains/seeds
- seed and grain test equipment
- personal protective equipment
- specifications:
 - workplace policies, procedures and delivery documents and forms
 - manufacturer operating instructions for specific equipment, machinery
 - workplace specifications for seed/grain quality standards
- relationships:
 - client/delivery person.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC313 Establish pastures and crops for livestock production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to prepare and establish pasture and crops for livestock and implement grazing strategies for livestock production.

The unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for pasture and crop establishment	1.1 Confirm the pasture and crop establishment program with supervisor 1.2 Conduct pre-treatment of seed prior to sowing according to program 1.3 Select sowing methods for crop and pasture species

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Apply fertilisers according to production program 1.5 Select, check and operate machinery and equipment, digital technology and personal protective equipment (PPE) 1.6 Identify work health and safety hazards, assess risk and implement controls
2. Implement pasture and crop establishment program	2.1 Prepare machinery and equipment or technology according to program 2.2 Calibrate machinery and equipment to delivery specified rates of application of seed and treatments 2.3 Sow the pasture crop according to specifications and program requirements 2.4 Conduct pasture and crop sowing procedures using equipment and time efficiently 2.5 Apply fertilisers and treatments according to program
3. Implement grazing strategies during establishment	3.1 Implement stubble and fallow weed control using livestock according to grazing and crop establishment program 3.2 Implement controlled grazing of crops and pastures during pasture and crop establishment according to grazing strategy 3.3 Implement grazing management according to sustainable land management practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret plans and strategies for crop establishment and grazing procedures
Numeracy	<ul style="list-style-type: none"> Calculate rates of application of seed, treatments and fertilisers, and calibrate equipment and machinery to deliver specified rates

Assessment Requirements for AHCBC313 Establish pastures and crops for livestock production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has established at least one pasture and one crop for grazing or fodder for livestock and has:

- interpreted and implemented crop and pasture production plan
- selected personal protective equipment (PPE) for the job task
- selected plant species, sowing method and application to achieve optimal yield
- selected and operated machinery and equipment or technology for establishing crops and pasture, including:
 - demonstrated safe operation and working around machinery
 - used digital technologies of equipment and machinery to improve efficiencies
- calibrated each of the following types of equipment according to specifications set in the crop establishment program:
 - boom spray
 - drill
 - fertiliser spreader
- identified pests, diseases and weeds
- implemented pest and weed control strategies without damage to crop or pasture
- mixed and treated seed safely according to crop and pasture production plan
- assessed existing pastures and crops to maximise livestock production
- sowed and monitored new pastures and crops
- identified seed and seedling stages of pasture and crop species
- implemented grazing systems including weed and stubble control
- followed work health and safety and environmental policies and procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pastures and crops used for pasture, their establishment and management, including:
 - advantages and disadvantages of pasture and crop establishment programs
 - types of grasses, legumes and crops
 - types of seed inoculants and fertilizers
 - paddock preparation
 - maintenance and establishment activities
 - livestock grazing strategies and determining feed on offer (FOO)
 - timing of pasture and crop establishment
 - seed and fertilizer placement for optimal germination and growth
- pests, diseases and weed control strategies in pastures and fodder crops, including:
 - identifying common pests, diseases and weeds
 - chemical control
 - cultural practices
 - grazing management
 - integrated pest management
- equipment and machinery used in crop and pasture establishment, including:
 - types and selection of equipment, including personal protective equipment (PPE)
 - safe operation while using or working around farm equipment
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- workplace health and safety policies and procedures, including:
 - safe use of chemicals
 - use and maintenance of personal protective equipment (PPE)
 - farm fire safety with dried crops and stubble and accumulation in equipment
 - power lines and elevated equipment safety
- procedures for minimising environmental impact.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or an environment that accurately represents workplace conditions
- resources, equipment or technology and materials:
 - livestock for grazing
 - equipment or technology and machinery for preparing and sowing pasture seed and crops
 - personal protective equipment (PPE)
- specifications:
 - workplace policies, procedures, processes
 - safety data sheets for treatments
 - workplace plans and specifications
- relationships:
 - supervisor(s)
- timeframes:
 - according to specified timeframes and efficiencies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBAC314 Prepare to receive grains and seeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion prepared grain or seed receival facilities and has:

- identified hazards, assess risks and implemented controls in grain/seed receival area
- checked and maintained grain/seed testing equipment
- identified and applied industry quality standards relevant to seed and grain storage
- inspected and cleaned storage areas, seed and grain handling equipment according to workplace hygiene and biosecurity procedures
- conducted preliminary inspection, and identified and reported defects according to quality standards and workplace procedures
- assembled and prepared testing equipment
- identified grain/seed types and classification and maintained segregation and organised storage
- collated documentation for client/supplier
- liaised with growers and/or contractors, including:
 - sourced grower/supplier information
 - completed, collated and stored documentation
 - resolved conflict and disputes according to procedures
- followed work health and safety procedures, including use of personal protective equipment (PPE)

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- grain/seed identification, receival processes and industry practice
- grain handling machinery and equipment, including:

- hoppers, bins, bags and temporary storage
- grain transfer equipment including, augers and other grain conveyance systems
- work health and safety, including:
 - broadacre farm hazards, risks and controls
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety
- testing equipment including:
 - types of testing equipment used
 - adjustments and calibration requirements
- requirements for seed segregation, traceability, hygiene and biosecurity
- impact of residues on storage including chemicals
- seed and grain industry standards and quality assurance requirements for receivals
- preliminary inspections requirements and expected standards, including:
 - biological contaminants including pests, diseases, weeds, foreign seeds, split grains/seeds, undersize, chaff
 - physical contaminants soil, stones and other debris
- legislation, regulations and policies for workplace health and safety and biosecurity
- conflict and dispute resolution
- working in confined spaces, the dangers and what permits they may require to do so
- record keeping procedures for seed storage.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm, grain/seed handling/processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and machinery
 - personal protective equipment (PPE)
- specifications:
 - specific workplace policies, procedures and forms
 - manufacturer operating instructions for equipment and machinery
 - workplace instructions
- relationships:
 - client(s)/delivery people

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBC315 Establish agricultural crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has established at least two agricultural crops and has:

- confirmed crop establishment requirements with crop production plan
- identified health and safety hazards, assessed the risk and implemented controls
- sown seed and applied soil fertilisers/treatments at the required placement and rate
- coordinated weeds, pest and disease controls with sowing, including:
 - identified types of weeds, pests and diseases harmful to crop establishment
 - selected and applied controls
- prepared and safely operated machinery and equipment or technology, including:
 - performed pre-operational and safety checks
 - maintained machinery and equipment
 - calibrated according to planned outcomes
 - attached and detached supplementary equipment
 - recognised and reported machinery faults and perform minor repairs
 - cleaned, secured and stored machinery and equipment
 - selected and used personal protective equipment (PPE)
- maintained accurate records for the following:
 - equipment or technology faults and servicing
 - workplace hazards and incidents
 - crop establishment operations
- used equipment or technology safely and efficiently to perform the following operations:
 - applied soil remediation
 - applied pre-planting treatments
 - sowed/planted the crop

- applied fertilisers/soil amendments
- monitored environmental impact of establishing crop
- prepared and implemented contingency plans for unsuitable weather conditions
- followed workplace health and safety, environmental and biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- crop types, preparation of seeds, seeding methods and application techniques
- fertiliser types, rates of application and crop nutrient requirements
- effects of weather conditions both normal and adverse, on seeding and fertilising applications
- operating principles and operating methods for machinery and equipment, including:
 - pre-operational and safety checks, servicing and maintenance procedures for seeding machinery and equipment
 - principles of weight distribution with regard to load shifting and vehicle movement
 - adverse weather conditions and machinery operation
- sustainable land management and soil conservation techniques, including:
 - stubble management
 - minimum till
 - no-till
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
 - integrated pest and weed management techniques
- procedures for cleaning, securing and storing machinery, equipment and materials
- workplace policies regarding seeding/planting operations, and recording and reporting routines
- workplace health and safety policies and procedures including:
 - use chemicals and fertilizers
 - personal protective equipment (PPE) and when and how it should be used
 - relevant state/territory legislation and regulations
 - farm fire safety with dried crops, stubble and accumulation in equipment
 - power lines and elevated equipment safety
- licensing requirements and the use and control of machinery and equipment on public land

- workplace biosecurity and environmental policies.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seeds, fertilisers and treatments
 - tools, equipment and machinery for preparing and sowing crops
 - personal protective equipment (PPE)
- specifications:
 - workplace policies, procedures, processes
 - safety data sheets for fertilisers and treatments
 - manufacturer specifications
 - workplace plans and specifications
- relationships:
 - supervisor
- timeframes:
 - according to specified timeframes and efficiencies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC316 Maintain agricultural crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to monitor and assess broadacre crop health and condition and implement crop maintenance procedures.

The unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor & assess agricultural crop condition, growth and requirements	1.1 Monitor crop health and record observations according to crop production plan 1.2 Report deviation from expected growth and vigour to supervisor 1.3 Identify, monitor and report weeds, pests and diseases 1.4 Measure soil moisture and determine soil water requirements according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Report observations of crop ripening to supervisor to determine the timing of harvest
2. Undertake crop health operations	<p>2.1 Identify work health and safety procedures and hazards, assess risk and implement controls according to workplace policies</p> <p>2.2 Select, check use and maintain personal protective equipment (PPE)</p> <p>2.3 Select and use appropriate machinery, equipment or technology according to manufacturer specifications</p> <p>2.4 Apply specialist treatments at each growth stage according to label instructions and advice</p> <p>2.5 Conduct chipping or spot spraying of declared weed infestation where specified in crop management plan</p> <p>2.6 Assess, record and report crop growth stages, crop harvest indicators and milestones according to workplace procedures</p> <p>2.7 Assess soil moisture and implement procedures to mitigate water stress according to crop production plan</p>
3. Complete cleaning and hygiene operations	<p>3.1 Clean equipment according to hygiene and biosecurity procedures</p> <p>3.2 Check and maintain machinery, equipment or technology performance according to workplace procedures and manufacturer specifications</p> <p>3.3 Dispose of waste according to workplace procedures and environmental polices</p> <p>3.4 Maintain records and documentation according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret plans and procedures for maintaining crops
Numeracy	<ul style="list-style-type: none"> Calculate rates of application of seed, treatments and fertilisers, and calibrate equipment and machinery to deliver specified rates Calculate soil moisture and crop water demand

Assessment Requirements for AHCBC316 Maintain agricultural crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion maintained an agricultural crop from post seeding to pre harvest and has:

- detected differences and variations in crop growth and reported outcomes to supervisor
- observed and reported health of the crop, including:
 - monitored pests and diseases
 - assessed crop maturity
 - applied treatments and fertilizers according to crop production plan
- measured soil moisture and assessed crop water requirements
- maintained records and documentation
- checked and maintained machinery, equipment or technology
- followed workplace health and safety procedures, including use of personal protective equipment (PPE)
- followed biosecurity and environmental procedures and policies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislative requirements, manufacturer instructions and workplace procedures/instructions
- potential hazards associated with the operation of basic tools and equipment
- general machine maintenance procedures
- machinery operating principles and safe operating methods
- environmental impacts associated with the operation of machinery and equipment
- principles of precision agriculture and the role of technology in improving efficiencies, including:

- self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
- digital and remote sensors
- remote piloted systems
- controlled traffic farming (CTF) principles and impacts
- variable rate technology (VRT)
- soil moisture testing, assessment and crop water requirements, including types and application of irrigation systems used in broadacre farming
- workplace recording and reporting procedures
- health and vigour of developing crop, including:
 - symptoms of crop lacking health and vigour
 - signs of pest and disease infestation
 - moisture stress
 - nutrient deficiencies
- hygiene and biosecurity requirements for agricultural crops and equipment
- types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical), including:
 - integrated pest and weed management techniques
 - pesticide policies and procedures
 - legislative requirements
- workplace health and safety, including:
 - broadacre farm hazards, risks and controls
 - power lines and elevated equipment safety
 - farm fire safety for dried crops, stubble and accumulation in equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, machinery and equipment or technology
 - soil moisture testing probes
 - fertilisers, ameliorants and treatments
 - personal protective equipment (PPE)
- specifications:
 - workplace policies and procedures
 - manufacturer operating instructions for tools, equipment and machinery
 - workplace plans and specifications.

- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BAC317 Undertake agricultural crop harvesting activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to prepare equipment and resources for crop harvesting, determine crop readiness for harvest and harvest a crop safely and efficiently.

The unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to harvest agricultural crops	1.1 Determine requirements for work according to harvest strategy and crop production plan 1.2 Identify work health and safety hazards, assess risk and implement controls according to workplace procedures 1.3 Select, check, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>(PPE)</p> <p>1.4 Complete pre-harvest treatments to crop according to harvest strategy and crop production plan</p> <p>1.5 Sample crop for moisture content and report to supervisor to assess timing of harvest</p> <p>1.6 Identify hygiene requirements for the crop and paddock according to harvest strategy, standards and storage plan</p>
2. Prepare the harvesting equipment	<p>2.1 Clean harvesting machinery and equipment or technology according to hygiene, biosecurity and fire mitigation standards</p> <p>2.2 Assess and service machinery and equipment and make adjustments and repairs as required and according to manufacturer specifications</p> <p>2.3 Record maintenance and servicing activities according to procedures</p>
3. Harvest crops	<p>3.1 Harvest crop according to harvest strategy for each paddock,</p> <p>3.2 Operate harvesting machinery and ancillary equipment efficiently for conditions to ensure fire prevention measures are implemented</p> <p>3.3 Maintain equipment hygiene and biosecurity procedures during crop harvest</p> <p>3.4 Check and adjust harvester and ancillary equipment to ensure efficient and safe operation</p>
4. Complete harvesting operations	<p>4.1 Clean and store equipment, attachments and other ancillary equipment according to hygiene and biosecurity procedures</p> <p>4.2 Apply treatments to crop according to harvest strategy</p> <p>4.3 Dispose waste according to workplace and environmental procedures</p> <p>4.4 Ensure harvesting equipment or technology is moved between sites and on public property according to workplace procedures and regulatory requirements</p> <p>4.5 Maintain records and documentation of harvest according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret work plans and strategies to elicit harvesting work requirements and activities
Numeracy	<ul style="list-style-type: none"> Calculate rates of application for pre-harvest crop treatments where specified in crop harvest plan Perform calculations for calibrating and setting machinery for harvest operations Calculate harvested yield rates

Assessment Requirements for AHCBC317 Undertake agricultural crop harvesting activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has harvested at least one agricultural crop and has:

- sampled crops to assess readiness for harvest, including:
 - moisture content
 - maturity/ripeness of the crop
- implemented crop pre-treatment procedure
- used and maintained personal protective equipment (PPE)
- operated crop harvesting machinery and equipment, including:
 - handled and manoeuvred harvesting equipment or technology
 - used technology to improve efficiency
 - implemented pre-and post-operational checks on tools, harvesting machinery and equipment
 - performed routine, service and maintenance procedures on tools, harvesting machinery and equipment
 - transported, cleaned and stored harvesting equipment
 - monitored efficiency of harvesting equipment
 - made adjustments to settings to improve harvest efficiency
- implemented procedures for seed handling, hygiene and biosecurity
- maintained records and documentation
- identified health and safety hazards, assessed risk and implement safety procedures for harvest tasks including:
 - implemented fire prevention measures
 - performed harvesting safely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- manufacturer specifications and workplace procedures
- operation of crop harvesting machinery and equipment, including:
 - safety and use of equipment
 - handling and manoeuvring of harvesting equipment
 - pre-and post-operational checks on tools, harvesting machinery and equipment
 - routine, service and maintenance procedures for tools, harvesting machinery and equipment
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF)
- principles and impacts pre-harvest treatments and their application in broadacre crops, including:
 - windrowing
 - swathing
 - chemical desiccants
- crop features and recognition of readiness for harvesting, including:
 - sampling crops
 - assessing samples for harvesting
 - post-harvest treatments of crops
- workplace, federal and international standards for harvested crops
- procedures for seed handling and hygiene
- workplace health and safety procedures including:
 - broadacre farm hazards, risks and controls
 - working near harvesting machinery and equipment
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety
 - fire risk for equipment and stored crop
- workplace environmental and biosecurity policies and practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in on broadacre farm with paddocks of agriculture crop ready for harvest or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - harvestable crop
 - harvesting tools, equipment or technology and machinery
 - personal protective equipment (PPE)
 - crop sampling equipment
- specifications:
 - workplace policies, procedures, processes for harvesting
 - manufacturer operating instructions for tools, equipment and machinery
 - crop harvest specifications
- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBAC401 Manage pastures for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage pastures for livestock production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a pasture	1.1 Assess pasture types on property and seasonal production

Element	Performance criteria
management program	<p>potential and limitations</p> <p>1.2 Confirm or modify livestock production and enterprise objectives to develop production targets achievable by each pasture type</p> <p>1.3 Assess grazing and rest period requirements of pasture types for pasture quality, quantity and persistence considerations</p> <p>1.4 Assess nutrient requirements for pastures to determine appropriate fertiliser and soil ameliorant program</p> <p>1.5 On properties / paddocks with irrigation, determine appropriate irrigation schedules for each soil and pasture type using assessed water requirements, rainfall, Readily Available Water and evapo-transpiration data</p> <p>1.6 Identify and plan grazing and fodder conservation strategies</p> <p>1.7 Determine infrastructure and resources required to support grazing management</p> <p>1.8 Identify and account for budgetary constraints appropriately</p> <p>1.9 Develop appropriate pasture management program</p> <p>1.10 Identify hazards in pasture management and assess risks</p>
2. Implement pasture management program	<p>1.1 Identify work health and safety hazards and implement controls</p> <p>1.2 Monitor pasture capacity appropriately</p> <p>1.3 Implement planned strategic grazing to reduce or eradicate areas of weed infestation and maintain ground cover</p> <p>1.4 Determine fertiliser and soil ameliorant applications and rates appropriate to pasture type, soil analysis and production targets, and applied accordingly</p> <p>1.5 On properties / paddocks with irrigation, monitor soil moisture and schedule watering</p> <p>1.6 Apply technology to ensure most efficient performance of operations</p> <p>1.7 Develop and implement appropriate processes to minimise waste, soil degradation and environmental impacts</p>
3. Monitor pasture growth and fodder production	<p>3.1 Determine longer term trends in weed, pest and disease incidence and implement any identified changes to control measures</p> <p>3.2 Monitor soil structure and risks of erosion, determine changes to cultural practices, grazing management and drainage to improve soil quality</p> <p>3.3 On properties with irrigation, check and maintain irrigation and drainage systems</p> <p>3.4 Monitor grazing management to ensure sustainable pasture and optimal livestock production levels</p> <p>3.5 Identify feed surpluses and deficiencies and rectify appropriately</p> <p>3.6 Monitor pasture maturity and conduct seed harvesting to meet any</p>

Element	Performance criteria
	marketing and production targets
4. Review production level	4.1 Monitor pasture yields and evaluate against forecast production levels 4.2 Evaluate grazing programs for sustainability of the land and pasture resource, and livestock profitability 4.3 Collect and maintain physical and financial records of production for analysis and evaluation of production performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA401A Manage pastures for livestock production.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBC401 Manage pastures for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine fertiliser, soil ameliorants and biological inputs required to support production
- set objectives and milestones for pasture production
- calculate costs
- determine soil quality and land use capability
- monitor the productivity and feed intake of grazing livestock
- develop grazing strategies and plan infrastructure required
- assess the impact of grazing on pasture productivity and resilience
- identify pasture species and estimate dry matter production of pasture
- assess options to control weed infestation
- identify strategies for pest and disease control
- establish production targets for each pasture type in an enterprise
- develop a pasture management program to meet production targets and enterprise objectives
- carry out strategic grazing to reduce or eradicate areas of weed infestation
- monitor soil health and grazing management to ensure sustainable pasture and optimal livestock production levels
- monitor pasture yields and evaluate against forecast production levels
- correct use of technology to improve efficiency
- maintain relevant physical and financial records for pasture and livestock production
- implement work health and safety policies and procedures
- implement enterprise environmental management and sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land and soil conditions
- pasture species and growing requirements
- pasture grazing strategies
- nutrient requirements and soil fertility
- environmental management strategies in land use
- safe handling processes for fertilisers
- infestation patterns for different types of weed
- role of technology in improving efficiency
- work health and safety legislative and enterprise requirements
- relevant environmental codes of practice, legislation and regulations relating to farm production.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBC402 Plan a pasture establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine requirements of the pasture establishment program
- research suitable pasture species for the site and proposed land use
- prepare and document the pasture establishment program
- develop strategies for weed, pest and disease control
- assess pastures for production potential
- assess site factors
- select suitable pasture species and cultivars
- identify threats to pasture establishment including weeds, pests and diseases
- determine resources and equipment for planting and post-planting care
- prepare pasture establishment plans to meet livestock production plans and schedules
- demonstrate correct use of technology to improve efficiency
- implement enterprise work health and safety policies in the context of the work team
- implement sustainability practices in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- pasture varieties and their characteristics, requirements and production potential
- establishment techniques of specific pasture species and cultivars
- advantages and disadvantages of a range of pasture establishment procedures
- maintenance requirements and practices for specific pasture species and cultivars after initial establishment
- livestock production systems and their integration with pasture production

- planning process, including costing and scheduling of works
- plant identification of pasture and weed species
- role of pasture in sustainable land use
- role of technology in improving efficiency
- environmental impacts of pasture establishment.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA403 Supervise agricultural crop establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise agricultural crop establishment, including planning and scheduling plantings based on the planting plan.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information for input to planting plan	1.1 Identify and obtain documents relating to crop production 1.2 Identify competing demands on human and physical resources

Element	Performance criteria
	<p>that may affect planting</p> <p>1.3 Identify the specific target area, or paddock, for planting from the production or management plan</p> <p>1.4 Obtain paddock history to identify crop and pasture rotation, and potential weed, pest & disease issues</p> <p>1.5 Obtain and evaluate soil test results to determine appropriate soil treatments</p> <p>1.6 Assess and account for trash levels and seedbed conditions</p>
<p>2. Prepare planting plan</p>	<p>2.1 Determine the agricultural crop and method(s) of planting to be used from the organisations production or management plan and availability</p> <p>2.2 Assess and calculate the resources required for the planting operations from the area to be sown, the method of planting to be used, and the available timelines</p> <p>2.3 Assess technology to ensure most efficient performance of operations</p> <p>2.4 Set target dates for planting, including the sequencing for planting across paddocks or crop areas, in line with the overall production or management plan</p> <p>2.5 Select the chemical applications that are required prior to and post planting and organise to occur appropriately</p> <p>2.6 Prepare the plan to ensure that any potential detrimental environmental impacts are minimised or eliminated, including the proper disposal of containers, drums and other waste</p> <p>2.7 Identify and assess hazards, and safe work practices for planting are implemented and overseen with staff</p> <p>2.8 Identify, arrange and obtain required approvals for the planting operations</p> <p>2.9 Determine measurable indicators, specifications and targets, based on the production or management plan and the method, resources and seed to be used</p>
<p>3. Determine scheduling and key responsibilities</p>	<p>3.1 Determine appropriate planting schedule</p> <p>3.2 Determine key responsibilities for required specific preparatory processes</p> <p>3.3 Determine key responsibilities for specific implementation processes</p> <p>3.4 Determine and implement appropriate recordkeeping processes, including the type, format, frequency and detail of any reporting required by both managers and operators</p> <p>3.5 Document the plan, including scheduling and key responsibilities</p>
<p>4. Monitor and adjust the</p>	<p>4.1 Ensure adherence to monitoring points outlined in the</p>

Element	Performance criteria
planting plan	implementation plan 4.2 Conduct checks to ensure that work health and safety procedures and site environmental requirements are being observed and followed 4.3 Communicate with operational staff and any contractors 4.4 Conduct checks to ensure that the required documentation is completed clearly and accurately during the progress of the planting process 4.5 Determine and implement any required corrective action or amendment to the planting plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA403A Supervise agricultural crop establishment.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBA403 Supervise agricultural crop establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and oversee safe operating procedures
- identify the seasonal conditions which affect crop establishment
- plan and schedule planting including amending plans during the operations
- recognise poor growth and lack of vigour caused by nutrient deficiency and incorrect planting depth
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- plan the planting operation including timing and resources required
- correct use of technology to improve efficiency
- carry out pest, weed and disease control either pre or post planting if required
- supervise staff and monitor the planting operation
- implement work health and safety policies in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment that is required for a range of tillage methods, and pest and weed control prior to planting
- crop establishment requirements
- equipment servicing requirements
- role of technology in improving efficiency
- integrated pest and weed management techniques
- environmental controls and codes of practice applicable to the enterprise

- legislation, codes of practice and enterprise procedures for work health and safety and environmental management
- management practices and processes to minimise environmental impacts such as noise, soil degradation, and debris from planting operations.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA404 Plan and implement agricultural crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement agricultural crop maintenance.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine condition of	1.1 Measure and assess soil moisture and calculate soil water

Element	Performance criteria
agricultural crops	percentage 1.2 Calculate water requirements to soil analysis data, standing crop, and forecast weather conditions 1.3 Assess nutrient requirements and availability for crops and identify deficiencies 1.4 Identify factors affecting crop capacity 1.5 Assess technology to ensure most efficient performance of operations 1.6 Identify work health and safety hazards in crop maintenance and assess risks
2. Determine pest control	2.1 Assess evidence of pests and disease and determine appropriate integrated control measures 2.2 Locate and identify areas of weed infestation for reduction or eradication 2.3 Select appropriate integrated control methods 2.4 Schedule suitable control methods appropriately 2.5 Maintain records on severity of infestations and treatments used
3. Manage crop health	3.1 Implement work health and safety controls 3.2 Monitor crop to maintain water and nutritional requirements for optimal production 3.3 Implement sustainable land management practices appropriately 3.4 Monitor weed and pest levels and modify the control program as required 3.5 Assess, document and analyse benefits from soil and plant inputs and treatments 3.6 Monitor and document cropping programs 3.7 Document and record relevant data for continual analysis and effective crop management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBAC404A Plan and implement agricultural crop maintenance.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCBA404 Plan and implement agricultural crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- refer to records of, and assess, soil health and nutrient status
- dispatch soil samples to laboratories
- carry out a soil health appraisal
- identify likely threats to crop from pests, weeds and diseases
- recognise damage to crop caused by weeds, pests or diseases
- recognise poor growth and lack of vigour in crop caused by nutrient deficiency
- record monitoring results
- plan and implement integrated control strategies to address nutrient deficiencies, disease outbreaks, pest and weed infestations
- accurately measure soil moisture and estimate irrigation needs if required
- apply pesticides or fertility treatments as required
- apply correct use of technology to improve efficiency
- communicate with industry, suppliers and other personnel
- read and interpret Safety Data Sheets (SDSs), production plans and analysis results
- estimate and measure pest control treatments
- assess crop needs accurately
- carry out crop cultural practices and treatments
- monitor and assess crop maturity
- ascertain water requirements from survey advice and weather forecasts
- measure soil moisture and interpret data accurately
- determine time of harvest with specialist advice
- implement work health and safety policies in the context of the work team
- implement enterprise sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop growth stages and keys
- crop growth requirements compared to soil nutrient status
- fertiliser and soil ameliorant types and application times, methods and rates
- chemical use if applicable
- factors leading to development of chemical resistance
- role of technology in improving efficiency
- integrated pest management strategies
- life-cycles of pest, diseases and weeds
- work health and safety legislative requirements
- relevant codes of practice with regard to the use and control of agricultural chemicals
- legislation and codes of practice with regard to environmental protection.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA405 Supervise agricultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise agricultural crop harvesting.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for harvesting	1.1 Assess crop maturity and quality in readiness for harvesting

Element	Performance criteria
	1.2 Determine pre-harvest treatments for the control and eradication of pests and implement appropriately 1.3 Identify and comply with licence or permit requirements 1.4 Assess insurance requirements and plan and implement required risk management strategies 1.5 Identify work health and safety hazards and assess risks in crop harvesting
2. Determine harvest strategy	2.1 Estimate and calculate optimum timing to carry out harvest according to crop maturity assessment 2.2 Assess resource requirements appropriate to the size of the crop and estimated timing of harvest 2.3 Assess technology to ensure most efficient performance of operations 2.4 Arrange and confirm required labour and equipment to carry out harvesting operations within budgetary constraints 2.5 Identify and arrange appropriate requirements for fire prevention and control
3. Coordinate the harvest strategy	3.1 Implement work health and safety controls 3.2 Implement appropriate communication strategies 3.3 Implement harvesting operations and adjust as required according to weather, equipment and staff requirements 3.4 Coordinate and monitor equipment operation 3.5 Identify and control existing and potential biosecurity hazards appropriately
4. Complete harvest operation	4.1 Identify appropriate storage resources and strategies for drying grain 4.2 Segregate grain quality of grain to marketing grades and monitor for moisture content according to classification standards 4.3 Evaluate harvesting operations and outcomes against harvest strategy 4.4 Document and record information for continual analysis and effective planning management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBAC405A Supervise agricultural crop harvesting.

Assessment Requirements for AHCBA405 Supervise agricultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise and schedule the maintenance of plant and equipment
- establish strategies, procedures and controls for crop harvesting
- negotiate and arrange contracts and agreements
- implement safe workplace and positive environmental practices
- deal with weather and other contingencies
- establish strategies, procedures and controls for crop harvesting, including fire prevention and control plans
- correct use of technology to improve efficiency
- negotiate and arrange contracts and agreements
- estimate crop yields
- maintain budgetary controls
- assess crop maturity and quality in readiness for harvesting
- arrange storage and delivery requirements
- segregate grain for quality and monitor for moisture content
- implement work health and safety policies in the context of the work team
- implement biosecurity policies in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop maturity and yield potential
- grain or seed quality
- functions and limitations of harvesting equipment

- role of technology in improving efficiency
- crop measurement techniques and parameters
- grain market information and sources
- location and relative skills and abilities of available contractors
- weather conditions which may affect the harvest
- relevant legislation, codes of practice and enterprise requirements for Work Health and Safety, contractor engagement, environment and pesticides
- environmental controls and codes of practice applicable to harvesting operations
- enterprise biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA408 Manage agricultural crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage agricultural crop production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine	1.1 Select plant varieties that are best suited to soil, climate, seasonal

Element	Performance criteria
<p>requirements for an agricultural crop establishment program</p>	<p>conditions and marketing goals</p> <p>1.2 Determine required irrigation schedules where required for each soil and crop type based on assessed water requirements, rainfall and evapo-transpiration data</p> <p>1.3 Assess nutrient requirements for crops to determine appropriate fertiliser program</p> <p>1.4 Assess technology to ensure most efficient performance of operations</p> <p>1.5 Identify and maintain budgetary constraints</p> <p>1.6 Develop a crop establishment program appropriate to the crop production plan</p> <p>1.7 Identify work health and safety hazards and develop control strategies in establishing agricultural crops</p>
<p>2. Implement crop maintenance</p>	<p>2.1 Implement strategic grazing to reduce or eradicate areas of weed infestation</p> <p>2.2 Determine fertiliser applications and rates appropriate to crop type and applied accordingly</p> <p>2.3 Determine crop nutrient requirements to ensure sustainability and achievement of yield</p> <p>2.4 Monitor soil moisture and adjust watering schedule if appropriate</p> <p>2.5 Determine and implement processes to minimise waste and soil degradation appropriately</p>
<p>3. Monitor an agricultural crop through to harvest</p>	<p>3.1 Determine longer term trends in weed, pest and disease incidence, and implement any necessary changes to control measures</p> <p>3.2 Monitor soil structure and erosion and determine necessary changes to cultural practices, grazing management and drainage</p> <p>3.3 Check and maintain irrigation and drainage systems</p> <p>3.4 Monitor grazing management to ensure crop production levels</p> <p>3.5 Monitor crop maturity and undertake harvesting to meet marketing and production targets</p>
<p>4. Implement the harvest strategy</p>	<p>4.1 Follow the harvesting plan to apply pre-harvest pest control treatments where weather patterns permit</p> <p>4.2 Ensure adherence to all work health and safety and environmental requirements throughout the application of pre-harvest treatments and throughout the harvest</p> <p>4.3 Ensure that all required labour and equipment is ready and available at the scheduled place and time</p> <p>4.4 Commence the harvest at the scheduled time</p> <p>4.5 Follow the order of the harvest described in the harvesting plan</p> <p>4.6 Monitor harvesting operations and adjust to allow for weather,</p>

Element	Performance criteria
	contracting and equipment maintenance needs 4.7 Instruct truck, tractor and harvester operators on procedures to deliver each crop load at maximum quality
5. Record production	5.1 Maintain appropriate records of production for analysis and evaluation of production performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCBA408 Manage agricultural crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply environmental protection strategies in land use
- set objectives and milestones for a cropping program
- determine soil quality and land use capability
- determine crop nutrient requirements and fertiliser requirements
- measure and assess quantities of fertiliser to meet plant requirements
- predict patterns of weed infestation
- manage irrigation processes to avoid soil degradation if applicable
- demonstrate use of technology to improve efficiency
- prepare budgets
- develop a cropping program for an enterprise
- plan for crop establishment
- monitor growing crops, provide inputs and carry out cultural practices as required
- develop a plan for the crop harvest
- monitor crop yields and evaluate production performance
- implement work health and safety policies in the context of the work team
- implement enterprise environmental sustainability practices in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land and soil conditions
- effects of soil characteristics on nutrient availability

- role of technology in improving efficiency
- budgeting and financial analysis techniques
- environmental protection strategies
- cultivation requirements for different types of crop
- safe handling processes for fertilisers
- infestation patterns for different types of weed
- integrated strategies for the management of pests, weeds and diseases
- work health and safety legislative requirements
- environmental legislation and codes of practice, relating to farm production.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC409 Provide advice on agronomic products

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify customer needs and provide advice on agronomic products.

The unit applies to individuals who apply specialist skills and knowledge to providing advice on agronomic products, including fertilisers. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish customer needs	1.1 Use interpersonal skills to engage customer and identify needs 1.2 Handle customer enquiries courteously and promptly according to workplace procedures and legislative requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Match available products to customer needs and ecological considerations
2. Research and provide product advice	2.1 Research and update knowledge and understanding of agronomic products and related products from authoritative sources 2.2 Research local workplace and district requirements for agronomic products 2.3 Provide advice to customer in a timely and professional manner according to workplace procedures and legislative requirements 2.4 Exhibit or demonstrate products safely to customer according to workplace procedures and legislative requirements 2.5 Organise product trials when required 2.6 Address customer concerns and questions and suggest alternative or additional products to meet requirements 2.7 Provide safety information to the customer for recommended products

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about agronomic and related product range, and legislative requirements
Oral communication	<ul style="list-style-type: none"> Use clear language with customers to gather information and match products to customer needs

Assessment Requirements for AHCBC409 Provide advice on agronomic products

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided advice on agronomic products and related products on at least three occasions, and has:

- engaged with and advised customer on the range of products available for the purpose and growing environment of the client
- complied with relevant legislative requirements in sales environments, including fair trading, trade practices and sale of goods legislation and public liability
- represented the workplace in a professional manner when dealing with customers
- researched sources of agronomic information to retain technical currency in all aspects of agronomy relevant to local district requirements
- applied workplace procedures for providing advice on agronomic products and related products
- demonstrated agronomic or related products
- applied workplace health and safety procedures for the safe handling of agronomic and related products.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- local workplace, district and customer agronomic requirements
- legislative requirements in sales environments, including fair trading, trade practices and sales of goods legislation and public liability
- agronomic products, including fertilisers and crop seeds, and their uses
- industry terminology for agronomic products and related products
- legislative requirements relevant to fertilisers and certified seeds
- workplace procedures for providing advice on agronomic products and related products
- workplace health and safety procedures for the safe handling of products.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - agronomic products and related products
- specifications:
 - legislative requirements relevant to sales environments, including fair trading, trade practices and sales of goods legislation and public liability
 - legislative requirements relevant to fertilisers and certified seeds
 - workplace procedures relevant to providing advice on agronomic products and related products
 - workplace health and safety procedures for the safe handling of agronomic and related products
- relationships:
 - customers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC410 Plan and implement a pasture establishment program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan and oversee the implementation of a pasture establishment program.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine requirements for pasture establishment program	1.1 Assess pasture site for current condition and suitability for replacement 1.2 Identify pasture species and cultivars suitable to soil, climate, seasonal conditions and livestock goals 1.3 Identify and select pasture establishment procedures consistent

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>with site parameters</p> <p>1.4 Assess and program equipment and technologies to ensure most efficient performance of operations</p> <p>1.5 Determine post-planting care according to production needs, enterprise standards and site capabilities</p> <p>1.6 Identify and assess plant germination and nutrient requirements according to soil characteristics</p> <p>1.7 Identify, cost and confirm availability of materials and resources</p> <p>1.8 Identify health and safety hazards, assess risk and develop controls</p>
2. Develop plan for pasture establishment program	<p>2.1 Collate identified production requirements for pasture establishment and prepare detailed plans</p> <p>2.2 Develop and document procedures for work team to follow</p> <p>2.3 Develop on-site planting procedures and schedules</p> <p>2.4 Develop post-planting procedures for pasture care</p> <p>2.5 Plan for contingencies and identify alternative strategies</p>
3. Oversee implementation of pasture establishment program	<p>3.1 Communicate procedures to work team</p> <p>3.2 Monitor implementation of pasture establishment program</p> <p>3.3 Implement contingencies and alternate strategies as planned conditions change</p> <p>3.4 Record progress and outcomes of pasture establishment during implementation according to workplace procedures</p>
4. Review pasture establishment program	<p>4.1 Collate records of implemented pasture establishment program</p> <p>4.2 Reconcile planned program outcomes against actual outcome</p> <p>4.3 Review and document changes to pasture establishment program for future implementation</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Research and analyse documentation for pasture species to identify suitable species for a defined site and purpose
Writing	<ul style="list-style-type: none"> Develop and document plans and procedures for work team using clear and easily understood language to convey explicit information, requirements, recommendations and performance targets.
Oral Communication	<ul style="list-style-type: none"> Use collaborative and inclusive language and techniques including active listening, questioning and reading of verbal and non-verbal signals to convey and clarify procedural information and confirm work team understanding
Numeracy	<ul style="list-style-type: none"> Use formulae and numerical information to calculate financial data and interpret basic statistical and analytical data Apply basic financial modelling skills to identify, analyse and evaluate budgetary information, time durations and resource allocations and scheduling

Assessment Requirements for AHCBC410 Plan and implement a pasture establishment program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion prepared and planned a pasture establishment program and has:

- determined a pasture establishment program consistent with the following parameters:
 - seasonal conditions
 - site and soil characteristics
 - production plans
 - additional available resources and equipment
- identified a suitable pasture species for the site and proposed land use and selected suitable species and cultivars
- prepared and documented a pasture establishment program which must include:
 - tools, equipment and machinery or technology required for planting
 - post-planting treatments
 - identification of suppliers, contractors and other personnel
 - materials and consumables
 - procedures for work team to easily follow
 - soil moisture management
- assessed site pasture for production potential
- assessed site factors influencing production
- identified threats to pasture establishment, including:
 - weeds
 - pests
 - diseases
- developed strategies for weed, pest and disease control
- determined resources and equipment for planting and post-planting care
- prepared plans, procedures and schedules for pasture establishment

- planned appropriate use of technology to improve efficiency
- incorporated and implemented workplace health, safety, environmental and animal welfare policies in plans and procedures
- implemented, monitored and recorded outcomes of pasture establishment program
- reviewed and documented changes to pasture establishment program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- selection and use of pasture varieties, including:
 - characteristics
 - requirements
 - production potential
- pasture establishment techniques of specific species and cultivars
- advantages and disadvantages of a range of pasture establishment procedures
- maintenance requirements and practices for specific pasture species and cultivars after initial establishment
- livestock production systems and their integration with pasture production
- planning process, including:
 - costing
 - scheduling of works
- preparation and documentation of procedures
- identification of pasture problems and threats, including:
 - weed species
 - vertebrate and invertebrate pests
 - diseases
 - soil conditions
 - integrated pest and weed management techniques
- role of pasture in sustainable land use
- soil moisture management strategies for pastures
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- workplace health and safety, legislative requirements and enterprise policies and procedures, including:
 - safety in the workplace

- chemical and hazardous substances
- fire safety
- personal protection
- environmental impacts of pasture establishment
- reviewing plans and programs, including:
 - monitoring implementation and importance of records
 - assessing programs in need of change
 - updating and changing programs and their related procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm with pasture suitable for livestock production or an environment that accurately represents workplace conditions
- relationships
 - work team
- resources, equipment and materials:
 - planning and project management tools
 - word processing equipment for documentation
- specifications:
 - workplace policies, procedures and processes
 - safety data sheets
 - workplace production plans, specifications and financial budget formats
 - legislation and codes of practice relevant to livestock production.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess pasture and property for livestock production	1.1 Assess pasture types on property and seasonal production potential and limitations 1.2 Confirm or modify livestock production and workplace objectives to develop production targets achievable for pasture type 1.3 Assess grazing and rest period requirements of pasture type

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Assess nutrient and soil biological requirements for pastures to determine fertiliser and amelioration program
2. Develop a pasture management program	2.1 Determine objectives and milestones for pasture production and in doing so, consider the role of technology in improving efficiencies 2.2 Determine water demand and availability for each soil type and pasture species 2.3 Identify and plan grazing and fodder conservation strategies 2.4 Determine infrastructure and resources required to support grazing management 2.5 Identify and account for budgetary constraints according to financial plan 2.6 Document pasture management program according to workplace procedures
3. Implement pasture management program	3.1 Identify health and safety hazards, assess risk and implement controls according to workplace procedures 3.2 Monitor pasture capacity according to planned use 3.3 Implement strategic grazing for weed control to maintain ground cover and soil condition 3.4 Determine and apply fertiliser and soil amelioration according to fertiliser and amelioration program 3.5 Monitor soil moisture and implement strategies to manage water requirement according to workplace conditions 3.6 Develop and implement procedures to minimise waste, soil degradation and environmental impact
4. Monitor pasture growth and fodder production	4.1 Determine longer term trends in weed, pest and disease incidence and implement changes to control measures 4.2 Monitor soil structure and erosion risk and consider changes to cultural practices, grazing management and drainage and use of technology to mitigate risk 4.3 Check and maintain water resources and drainage systems according to workplace conditions 4.4 Monitor grazing management to ensure sustainable pasture and optimal livestock production levels 4.5 Identify feed availability and manage according to workplace

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	procedures 4.6 Monitor pasture maturity and conduct seed harvesting according to marketing and production targets
5. Review production level	5.1 Monitor pasture yields and assess against forecast production levels 5.2 Evaluate grazing programs for sustainability of land and pasture resource, and livestock profitability 5.3 Collect and maintain records of production according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret and analyse plans and strategies and consolidates information into actions for pasture and livestock management
Writing	<ul style="list-style-type: none"> Maintain physical and financial records of production to assist in reviewing production targets Develop procedures for specific audiences using clear and detailed language in order to convey explicit information, requirements and recommendations for livestock and pasture management
Numeracy	<ul style="list-style-type: none"> Use formula and numerical information to calculate financial data and interpret basic statistical and analytical data Apply basic financial modelling skills to identify, analyse and evaluate budgetary information, time durations and resource allocations

Assessment Requirements for AHCBC411 Manage pastures for livestock production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion managed a broadacre pasture for livestock production and has:

- determined soil quality and land use capability
- determined fertiliser, ameliorants and biological inputs required to support production using the following:
 - pasture type
 - soil analysis
 - production targets
- set objectives and milestones for pasture production
- calculated costs of production
- determined pasture water requirements using each of the following:
 - pasture species demand
 - local rainfall
 - water reserves and availability
 - evapo-transpiration data
 - irrigation potential
- assessed grazing and rest periods for pasture types after assessing:
 - pasture quality
 - quantity
 - coverage and persistence
- monitored the productivity and feed intake of grazing livestock
- developed grazing strategies and planned infrastructure required
- assessed the impact of grazing on pasture productivity and resilience
- identified pasture species and estimated dry matter production of pasture
- assessed options to control weed infestation

- identified strategies for pest and disease control
- established production targets for each pasture type on property
- developed a pasture management program according to production targets and workplace objectives
- implemented grazing program to reduce or eradicate areas of weed infestation
- monitored soil health and grazing management to ensure sustainable pasture and optimal livestock production levels
- monitored pasture yields and evaluated against forecast production levels
- considered how technology can be used to improve efficiency
- maintained records for analysis of pasture and livestock production, including:
 - physical
 - financial
- implemented workplace health, safety, and environmental policies and procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- livestock production systems and property requirements
- land and soil conditions and assessment
- pasture species and their growing requirements, including water
- pasture grazing strategies
- basic budgeting and the cost of production, including:
 - basic financial analysis
 - estimating costs
 - importance of financial records
- soil nutrient and fertility, including:
 - interpretation of soil analysis reports
 - pasture nutrient requirements
 - impact of soil biological processes
- environmental management strategies in land use and the impact of practices, including:
 - soil moisture and erosion control
 - chemical and waste contamination
 - weed and pasture impact on adjoining properties
- weed control strategies, including:
 - infestation patterns for different types of weed
 - grazing methods used to control species
 - impact of weeds on productivity and livestock health
 - integrated pest and weed management techniques
- principles of precision agriculture and the role of technology in improving efficiencies, including:

- self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
- digital and remote sensors
- remote piloted systems
- controlled traffic farming (CTF) principles and impacts
- variable rate technology (VRT)
- water management for pastures, including:
 - drainage systems and maintenance
 - soil moisture retention strategies
 - irrigation systems for broadacre farms and pastures
- workplace health and safety, legislative requirements and workplace policies and procedures, including:
 - safe handling
 - chemical and hazardous substances
 - fire safety
 - personal protection
 - working near power lines with elevated equipment
- codes of practice, legislation and regulations relating to farm production, including:
 - environmental
 - animal welfare and ethics
 - health and safety.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on broadacre farm with land suitable for pasture and livestock production or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - livestock
 - tools, equipment or technology
 - chemicals and consumables for fertilising and treating pasture
- specifications:
 - workplace policies, procedures and processes
 - manufacturer operating instructions for tools and equipment
 - access to safety data sheets, workplace production plans, specifications and financial budgets
 - legislation and codes of practice relevant to livestock production.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBA412 Supervise agricultural crop establishment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to supervise agricultural crop establishment, including planning and scheduling seeding/planting based on the crop production plan.

The unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Source and assess information for input to crop establishment program	1.1 Obtain and review crop production plan and related documentation 1.2 Assess competing demands on human and physical resources affecting crop establishment 1.3 Assess the role of technology in improving efficiencies 1.4 Determine specific target area, or paddock, for crop from crop

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	production plan 1.5 Review historical records of target area for potential impact on crop establishment program 1.6 Access and evaluate soil test and results to determine soil treatments for crop 1.7 Assess and account for rubbish levels and crop growing conditions
2. Prepare crop establishment program	2.1 Identify the crop and method of establishment from crop production plan 2.2 Assess and calculate the resources required for crop establishment operations 2.3 Set target dates and sequencing for crop establishment according to crop production plan 2.4 Select and organise treatments according to crop production plan 2.5 Identify health and safety hazards, assess risk and develop controls procedures 2.6 Identify and obtain approvals for planting operations from key stakeholders 2.7 Document measurable performance indicators, specifications and targets, for crop establishment according to workplace and industry standards
3. Determine scheduling and key responsibilities	3.1 Determine planting schedule from identified target dates and sequencing 3.2 Determine work team responsibilities for specific tasks and actions 3.3 Develop record keeping and reporting procedures for crop establishment key performance indicators 3.4 Document crop establishment program according to workplace procedures
4. Monitor and adjust the crop establishment program	4.1 Communicate work procedures and performance outcomes to work team and contractors 4.2 Monitor implementation of crop establishment against key performance indicators 4.3 Monitor work team performance against health, safety and environmental procedures 4.4 Monitor compliance with record keeping and reporting procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.5 Review and reconcile crop establishment records and reports against key performance indicators</p> <p>4.6 Implement corrective action for non-compliance with key performance indicators</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify, collate and analyse documentation for crop and its establishment for a defined site and purpose
Writing	<ul style="list-style-type: none"> Develop and document plans and procedures for work team using clear and easily understood language in order to convey explicit information, requirements, recommendations and performance targets
Oral Communication	<ul style="list-style-type: none"> Use collaborative and inclusive language and techniques including active listening, questioning and reading of verbal and non-verbal signals to convey and clarify procedural information, confirm work team understanding and compliance with specified procedures
Numeracy	<ul style="list-style-type: none"> Use formula and numerical information to determine timing of crop and establish work schedules

Assessment Requirements for AHCBAC412 Supervise agricultural crop establishment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion supervised the establishment of a crop and has:

- identified hazards, assessed risks and documented controls and monitored team adherence to safety procedures
- identified resources required for establishing a crop
- reviewed historical records for paddock, including:
 - previous crop species grown
 - crop rotation
 - weed, pest and disease impacts
- identified the seasonal conditions affecting crop establishment
- documented crop establishment program which must include:
 - pre-planting and post planting tillage method/s
 - planting method
 - timelines and schedules
 - key work team and contractor responsibilities
- recognised crop establishment performance issues, including:
 - poor growth and lack of vigour
 - nutrient deficiencies
 - incorrect planting depth
 - pest, weed and disease control for pre or post planting
- identified and established record keeping processes which must include:
 - type of records to maintain
 - format of record
 - frequency records to be kept
 - details of reporting responsibilities

- assessed the role of technology in improving efficiencies
- supervised work team and crop establishment against key performance indicator and implemented corrective action.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- equipment required for a range of crop establishment methods, including:
 - tillage, no-till and minimum till techniques and consequences
 - pre-planting pest and weed control
 - primary soil preparation including deep and sub soil
 - secondary tillage
 - seasonal influences
 - seeding and/or planting preparation for crop species
- machinery and equipment required and its performance, including:
 - servicing and maintenance requirements
 - safe operation
 - impact on planting site
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- environmental controls and codes of practice applicable to crop and paddock
- legislation, codes of practice and workplace procedures for work health and safety and environmental management
- crop and seed standards and certification requirements
- management practices and processes to minimise environmental impacts, including:
 - noise
 - soil degradation
 - debris from planting operations
 - chemical use and environmental impact
 - integrated pest and weed management techniques
 - rubbish removal
- workplace health and safety, legislative requirements and workplace policies and procedures, including:
 - safety in the workplace

- chemical and hazardous substances
- fire safety
- personal protection
- power lines and elevated equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on broadacre farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - planning and project management tools
 - word processing for documentation
- specifications:
 - workplace policies, procedures and processes
 - safety data sheets
 - workplace production plans and specifications
 - legislation and codes of practice relevant to crop production
 - industry standards for crop production
- relationships:
 - work team and contractors
- timelines:
 - to be specified in schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBC413 Plan and implement agricultural crop maintenance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, planned and implemented an agricultural crop maintenance program for a broadacre crop and has:

- reviewed and assessed historical data to input into crop maintenance plan, including:
 - soil health, moisture and nutrition
 - weather conditions
 - crop growth and load potential
 - proximity and history of previous crops
- identified likely threats to crop from pests, weeds and diseases, including recognised damage to crop caused by weeds, pests or diseases
- recognised poor growth and lack of vigour in crop caused by nutrient deficiency
- assessed crop needs, monitored crop and recorded results
- planned and implemented control strategies for the following:
 - nutrient deficiencies
 - disease outbreaks
 - pest and weed infestations
- measured soil moisture and estimated water needs
- applied pesticides or nutrient treatments
- communicated with industry, suppliers and work team
- planned and monitored crop water requirements, including:
 - measure soil moisture and interpreted data
 - determined water requirements from survey advice and weather forecasts
- monitored and assessed maturity of crop
- determined time of harvest with specialist advice
- considered the role of technology in improving efficiencies
- identified hazards, assessed risks and implemented controls

- documented relevant crop management data
- implemented workplace environmental practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- crop growth stages and keys
- crop growth requirements compared to soil nutrient status
- soil moisture and management strategies for broadacre crops, including:
 - working with natural rainfall and soil moisture
 - water storages and irrigation practices
 - measuring soil moisture and determining crop moisture requirements
- fertiliser and soil ameliorant types and application times, methods and rates
- factors leading to development of chemical resistance
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- life-cycles of pest, diseases and weeds
- pests, diseases and weeds control strategies, including:
 - chemical
 - mechanical
 - biological
 - integrated pest and weed management techniques
- workplace health and safety, legislative requirements and workplace policies and procedures, including:
 - safety in the workplace
 - chemical and hazardous substances
 - fire safety
 - personal protection
 - power lines and elevated equipment safety
- environmental protection legislation and codes of practice.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on broadacre farm with an existing crop or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crop
 - planning and project management tools
 - tools, equipment and machinery
 - personal protective equipment
 - chemicals and consumables for fertilising and treating pasture
- specifications:
 - workplace policies, procedures and processes
 - safety data sheets
 - workplace production plans and specifications
 - legislation and codes of practice relevant to crop production
 - industry standards for crop production
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBA414 Supervise agricultural crop harvesting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to assess crop harvesting condition and resource requirements, plan a strategy for harvest operations and supervise the harvesting of an agricultural crop.

The unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for harvesting	1.1 Assess crop maturity and quality standards required in preparation for harvesting 1.2 Assess the role of technology in improving efficiencies 1.3 Determine and implement pre-harvest treatments according to crop production plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Identify and comply with licence or permit requirements 1.5 Check insurance requirements are in place and implement risk management strategies 1.6 Identify health and safety hazards, assess risk and develop and implement controls procedures
2. Prepare a harvesting plan	2.1 Assess optimum timing for harvest according to crop maturity assessment 2.2 Assess resource requirements for size of crop and estimated timing of harvest 2.3 Identify storage resources and strategies for handling harvested crop 2.4 Identify potential disruptions to harvest operations and prepare contingency procedures 2.5 Identify and arrange fire prevention and control procedures according to risk assessment 2.6 Develop work team communications procedures for harvesting operations
3. Implement harvest plan	3.1 Arrange and confirm labour and equipment resources for harvesting operations within budgetary constraints 3.2 Communicate harvesting plan and communication procedures to work team and contractors 3.3 Implement harvesting operations and contingencies procedures according to impact of weather, equipment or technology and work team performance 3.4 Coordinate and monitor equipment performance 3.5 Control contamination and biosecurity threats according to workplace procedures and quality standards
4. Complete harvest operation	4.1 Assess crop quality and segregate according to marketing grades 4.2 Monitor moisture content according to industry classification standards 4.3 Assess and reconcile harvesting operations and outcomes against harvest strategy 4.4 Record information on harvesting operations according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify, collate and analyse documentation for crop and harvest requirements for incorporation in harvest plan
Oral Communication	<ul style="list-style-type: none"> Use collaborative and inclusive language and techniques including active listening, questioning and reading of verbal and non-verbal signals to convey and clarify information, confirming work team understanding and compliance with harvesting procedures
Numeracy	<ul style="list-style-type: none"> Use formulae and numerical information to determine timing of harvest and establish volumes of harvested crop for transport and storage requirements

Assessment Requirements for AHCBA414 Supervise agricultural crop harvesting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion planned and supervised the harvest of a broadacre agricultural crop and has:

- organised and scheduled maintenance of plant and equipment or technology
- assessed the use of technology in improving efficiencies
- established strategies, procedures and controls for crop harvesting
- arranged and confirmed labour and equipment resources for crop harvesting
- checked to ensure insurance requirements are in place and implemented risk management strategies
- implemented safe workplace and environmental practices
- considered and implemented contingencies
- developed crop harvesting plan, procedures and controls
- implemented and supervised health and safety procedures during harvesting operations, including:
 - fire prevention and control plans
 - personal safety
 - safe use of equipment
- estimated crop yield and storage requirements
- maintained budgetary controls
- assessed crop maturity and quality in readiness for harvesting
- arranged storage and delivery requirements
- communicated with work team and contractors
- implemented work health and safety and biosecurity procedures during harvest operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- harvesting strategies for various agricultural crops
- quality standards for harvested crops, including:
 - standards for food safety
 - national and international seed certification standards
 - silos and grain storage standards for harvested crops
 - standards for handling genetically modified (GM) crops
- resource requirements for harvesting, including:
 - machinery and equipment
 - crop storage
 - human resources
 - materials and consumables
- crop features and recognition of readiness for harvesting, including:
 - sampling crops
 - crop measurement techniques and parameters
 - assessing samples for harvesting
 - post-harvest treatments of crops
 - crop maturity and yield potential
 - grain or seed quality
 - grain market information and sources
- pre-harvest treatments for the control and/or eradication of pests and disease
- operation of crop harvesting machinery and equipment, including:
 - functions and limitations of harvesting equipment
 - safety and use of equipment
 - handling and manoeuvring of harvesting equipment
 - pre- and post-operational checks on tools, harvesting machinery and equipment
 - routine, service and maintenance procedures for tools, harvesting machinery and equipment
- principles of precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, global navigation satellite systems (GNSS) and laser technologies
 - remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- federal and international standards for harvested crops
- procedures for crop handling and hygiene
- workplace health and safety procedures including:

- hazards and risk assessment
- machinery hazards
- fire risk for equipment and stored crop
- working at heights and confined spaces with storage bins
- power lines and elevated equipment safety
- workplace environmental and biosecurity policies and procedures
- location and relative skills and abilities of available contractors
- weather conditions affecting harvest operations
- relevant legislation, codes of practice and workplace requirements, including:
 - workplace health and safety
 - contractor engagement
 - pest control and chemical use
- environmental controls and codes of practice applicable to harvesting operations
- workplace biosecurity policies and procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm with maturing crop or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crop nearing maturity
 - planning and project management tools
 - harvesting tools, equipment or technology and machinery
 - crop sampling equipment
- specifications:
 - workplace policies, procedures and processes
 - workplace harvesting plans and specifications
 - legislation and codes of practice relevant to crop harvesting
 - industry standards for crop quality and condition for sale
- relationships:
 - work team and contractors
- timelines:
 - specified in harvest plan to preserve quality.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC415 Maintain grain quality in storage

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to maintain grain quality in storage and includes assessing and maintaining hygiene in grain storage areas, as well as monitoring the grain for deterioration, pests and contamination.

The unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

Licensing or certification for the use of fumigants and poison baits is strictly controlled in Australian states and territories. Users must check with their relevant regulatory authority before use.

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain hygiene in storage areas	1.1 Test storage conditions and facilities for compliance with grain storage hygiene standards 1.2 Identify, report or repair damage and faults to storage areas according to workplace procedures 1.3 Apply treatments to storage facilities to ensure hygiene standards

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>are maintained according to grain storage program</p> <p>1.4 Maintain storage environment according to biosecurity procedures</p> <p>1.5 Record application of treatments according to workplace procedures</p>
2. Monitor grain quality from arrival to dispatch	<p>2.1 Collect samples of grain and refer for testing prior to storage</p> <p>2.2 Sample grain at a frequency specified in sampling procedures to ensure compliance with purity standards</p> <p>2.3 Check grain quality at time of dispatch against records at point of storage for consistency</p> <p>2.4 Take, prepare and forward test samples for analysis according to workplace procedures and industry standards</p> <p>2.5 Maintain records of grain storage movement according to grain storage program</p> <p>2.6 Research and recommend technology, systems or practices to improve or maintain grain storage quality</p> <p>2.7 Implement work health and safety policies for activities around the grain storage facilities</p>
3. Monitor and maintain grain condition in storage	<p>3.1 Check stored grain for contaminants and deterioration according to workplace procedures and schedules</p> <p>3.2 Check grain in long-term storage for quality factors and viability according to workplace procedures and schedules</p> <p>3.3 Collect, prepare and send samples of grain for laboratory testing according to industry quality assurance and laboratory standards</p> <p>3.4 Create and maintain records of grain tests and inspections according to grain storage program.</p> <p>3.5 Monitor condition of stored grain according to schedule and methods specified in grain storage program</p> <p>3.6 Implement corrective action to maintain grain quality standards according to workplace procedures</p> <p>3.7 Ensure grain storage activities and facilities management are conducted according to grain storage program</p>
4. Control weeds and pests in storage area	<p>4.1 Monitor grain according to the monitoring points, targets and methods outlined in the grain storage program</p> <p>4.2 Collect samples of grain to test for pest infestation</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.3 Prepare and forward sample for analysis according to workplace procedures and industry standards</p> <p>4.4 Control pests in storage according to grain storage program</p> <p>4.5 Apply fumigants and treatments in enclosed stored grain and surrounding environment according to pest management strategy and grain storage program</p> <p>4.6 Identify and control sources of infestation according to the pest management strategy and biosecurity procedures in grain storage program</p> <p>4.7 Create and maintain records of treatments to grain and storage facilities according to grain storage program</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Research and analyse journals, documentation and digital media to identify new technologies and procedures for grain storage
Writing	<ul style="list-style-type: none"> Design and develop records and recordkeeping procedures for grain storage activities using clear and easily understood language

Assessment Requirements for AHCBAC415 Maintain grain quality in storage

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion monitored, and maintained the quality of grain in storage and has:

- sampled grain delivered for storage, and conducted basic grain quality analysis
- created, maintained and used clear and traceable records during grain storage, including:
 - application of treatments to stored grain and facilities
 - movement of grain while in storage
 - inspections, sampling and testing of grain
 - chemicals and treatments used and the applicable withholding periods
- inspected and tested silos for hygiene, contamination and damage
- identified insects, pests and other factors affecting grain quality
- treated grain and grain storage facilities and surrounds including:
 - planned and scheduled weed, pest and disease control
 - setup and operated fumigation and pesticide application equipment
 - set up and operate inert atmosphere equipment
 - handled and mixed chemicals for baiting, fumigation, spraying, and other forms of treatment
- interpreted and monitored information on pests
- calculated mass and volumes of grain and grain storage facilities
- monitored and maintained hygiene and control of pests and contaminants
- investigated and recommend options for technology, systems or practices required to improve grain quality.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, levels and control methods for a range of pests and contaminants
- permanent and temporary storage configurations and operations, including:
 - silos
 - storage bags
 - sheds and bunkers
 - underground pits
- chemical handling and dangerous goods requirements
- range of applicable pesticides, their uses, application methods and handling requirements
- grain commodity types, varieties and grades, marketing requirements and options for grain growers
- handling requirements for gas cylinders
- insect life cycles and optimum conditions for development
- Integrated Pest Management (IPM) principles and the procedures used within the organisation
- legislative requirements, codes of practice and workplace procedures relating to:
 - the storage and quality of grains
 - the purchase, transport, storage, use and disposal of pesticides and fumigants
 - work health and safety and environment
- sampling and classification requirements of grains
- common grain pests and their general control methods, including:
 - vertebrate
 - non-vertebrate
- equipment used in grain storage facilities and its safe use
- site safety hazards and management practices and processes, including:
 - minimise noise
 - odours
 - debris from grain storage operations
 - dust and fire risk
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety.
- chemical handling and dangerous goods requirements
- industry hygiene and quality standards
- developments and options available for maintaining or improving the quality of grain during storage
- workplace biosecurity policies and procedures
- record keeping systems and mandatory traceability requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a farm, grain processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - grain storage facilities
 - digital or analogue record keeping system
 - chemicals, fumigants and measuring and application equipment
- specifications:
 - specific workplace policies, procedures and forms
 - manufacturer operating instructions for equipment and machinery
 - safety data sheets (SDS)
 - workplace instructions

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BAC416 Save, prepare and store agricultural seed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to determine the seed to be saved, save seed from harvest, and prepare and store agricultural seed for sowing or sale.

The unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

Licensing or certification for the use of fumigants and poison baits is strictly controlled in Australian states and territories. Users must check with their relevant regulatory authority before use.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select seed from agricultural crops	1.1 Calculate the quantity of seed required for future season's crops 1.2 Calculate the area of crop needed to produce the required quantity of seed 1.3 Select a portion of current crop to be used as future crop seed 1.4 Check and record the soil type in selected portion of crop

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.5 Identify equipment to be used in seed movement, testing and storage</p> <p>1.6 Implement measures to improve seed and plant health, vigour and uniformity within the selected area</p> <p>1.7 Identify treatments required for crop and subsequent detrimental environmental impact</p> <p>1.8 Implement workplace health, safety and biosecurity policies and procedures</p>
2. Evaluate and grade seed	<p>2.1 Assess grain variety for its location, soil, and current workplace marketing requirements' suitability following harvest</p> <p>2.2 Research information regarding new varieties or trial results for input into management decision-making</p> <p>2.3 Grade the seed to the required size</p> <p>2.4 Apply fungicidal and insecticidal dressings to the seed according to workplace procedures</p> <p>2.5 Collect, prepare and forward test samples according to laboratory procedures and industry standards</p> <p>2.6 Collect and maintain records, and report outcomes according to workplace procedures</p>
3 Store seed	<p>3.1 Select and prepare facilities for hygienic storage of seed</p> <p>3.2 Transfer seed to storage facility according to workplace and biosecurity procedures</p> <p>3.3 Ensure seed is stored under conditions that maintain quality, viability and purity</p> <p>3.4 Check seed in long-term storage for quality factors and viability according to schedule specified in seed storage program</p> <p>3.5 Collect, prepare and forward seed samples for laboratory testing and analysis according to laboratory and sampling procedures</p> <p>3.6 Create and maintain records of seed storage, tests and inspections according to seed storage program</p> <p>3.7 Monitor condition of storage facilities using schedule and methods specified in seed storage program</p> <p>3.8 Implement corrective action to maintain seed quality and biosecurity</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Collect and deliver seed	4.1 Collect or deliver seed according to agreed terms and conditions and biosecurity procedures 4.2 Ensure seed sold or purchased conforms to local State and Federal legislative and regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyse seed variety trial results, journals, documentation and digital media to identify new seed varieties suitable for future crops
Writing	<ul style="list-style-type: none"> Create, develop and maintain accurate records for seed selection, preparation and storage

Assessment Requirements for AHCBC416 Save, prepare and store agricultural seed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion stored agricultural seed for sowing future crop or sale and has:

- selected and applied seed tests to determine seed quality including:
 - moisture
 - protein
 - falling numbers
 - screenings
 - damaged seed
- sampled seed according to laboratory procedures
- applied pre and post-harvest treatments for seed
- identified and utilised equipment required for seed movement, testing and storage
- identified varieties from growth patterns
- identified weed seeds and contaminants
- identified pests in stored grain and initiated control measures
- performed the following calculations for seed storage:
 - volume of seed required
 - capacity of storage available and required for seed storage
 - area of crop required to produce seed based on health, vigour and grain size
 - ratios of chemical use
- created and maintained records for traceability, including:
 - results of test on seeds
 - seed provenance and varieties
 - pest control measures
 - seed storage locations and movement
 - application of treatments to stored grain and facilities

- movement of grain while in storage
- inspections, sampling and testing of grain
- graded and tested seed and interpreted results
- collected and maintained records
- stored and maintained the quality of seed for use in following season
- implemented workplace health, safety, biosecurity and environmental policies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- seed varieties and their identification
- seed treatment and cleaning measures
- tests commonly performed on seeds for storage and quality assessment, including:
 - moisture
 - protein
 - falling numbers
 - screenings
 - damaged seed
 - seed health tests
- sources of seed to purchase and expected terms, conditions and standards
- inoculation treatments and seed dressings used to protect seed and promote seed germination
- records and documentation required for traceability and handling of seed
- storage techniques and requirements for seed and grain including:
 - silo
 - storage bags
 - sheds and bunkers
 - underground pits
- biosecurity controls and codes of practice
- relevant legislation and regulations relating to:
 - health and safety
 - contractor engagement
 - chemical use and application
 - vehicle and plant operation and use
 - use, handling and sale of seed
- national and international standards for commercial seed production
- site workplace health and safety management practices and procedures, including:
 - minimise noise
 - odours
 - debris from grain storage operations

- dust and fire risk
- working at heights and confined spaces with storage bins
- power lines and elevated equipment safety.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or grain processing plant, or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seed and storage facilities
 - tools, equipment and machinery for transporting and transferring seed
 - personal protective equipment
 - digital or analogue record keeping system
 - chemicals and measuring and application equipment
- specifications:
 - specific workplace policies, procedures and forms
 - manufacturer operating instructions for equipment and machinery
 - safety data sheets (SDS)
 - workplace instructions
 - terms and conditions for supply or purchase of seed

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBA417 Manage agricultural crop production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to determine crop requirements, implement a crop growing and maintenance program and harvest an agricultural crop.

The unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine requirements for an agricultural crop establishment program	1.1 Select plant varieties best suited to soil, climate, seasonal conditions and marketing goals 1.2 Determine available soil moisture and water requirement for crop 1.3 Assess available water reserves and develop a water management

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	plan for crop production 1.4 Determine crop nutrient requirements to achieve required yield according to environmental procedures 1.5 Determine fertiliser program from crop nutrient requirements 1.6 Assess technology to ensure most efficient performance of operations 1.7 Identify and maintain budgetary requirements 1.8 Develop a crop establishment program according to crop production plan 1.9 Identify health and safety hazards, assess risk and develop and implement controls procedures
2. Implement crop maintenance	2.1 Implement strategies to reduce or eradicate weed infestation 2.2 Apply fertilisers at rates specified in fertiliser program 2.3 Monitor soil moisture and implement water management plan to maintain crop 2.4 Determine and implement processes to minimise waste and soil degradation according to environmental management policies
3. Monitor an agricultural crop through to harvest	3.1 Determine trends in weed, pest and disease incidence, and implement control measures 3.2 Monitor soil structure and erosion and implement changes to production practices according to production plan 3.3 Check and maintain irrigation and drainage systems 3.4 Monitor crop maturity and undertake harvesting to meet marketing and production targets
4. Implement the harvest strategy	4.1 Apply pre-harvest pest control treatments conditional on weather according to harvesting plan and environmental procedures 4.2 Ensure required labour and equipment is ready and available at the scheduled place and time 4.3 Communicate crop harvest procedures and performance expectations to harvesting and transport operators 4.4 Implement crop harvest order and procedures as scheduled in harvesting plan 4.5 Monitor harvesting operations and implement contingencies for

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	weather, contracting and equipment maintenance
5. Record production	5.1 Maintain records of crop production according to workplace procedures 5.2 Store records according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Use collaborative and inclusive techniques including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify work requirements and performance expectations
Numeracy	<ul style="list-style-type: none"> Use formula and numerical information to calculate financial data and interpret basic statistical and analytical data Apply basic financial modelling skills to identify, analyse and evaluate budgetary information, time durations and resource allocations

Assessment Requirements for AHCBC417 Manage agricultural crop production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion planned, implemented and monitored the production of a broadacre agricultural crop from planting to harvest and has:

- applied environmental protection strategies for land use
- set objectives and milestones for a cropping program
- determined soil quality and land use capability
- determined crop nutrient requirements and developed and implemented a fertiliser program
- predicted weed infestations and implemented control strategies
- monitored and managed crop water requirements avoiding soil degradation
- demonstrated use of technology to improve efficiency
- prepared budgets for the production cycle
- developed and implemented plans, programs and monitoring procedures for:
 - cropping
 - crop establishment and maintenance
 - harvesting
 - environmental management and minimising waste
- checked and maintained irrigation and drainage systems
- assessed crop yields and evaluated production performance
- implemented workplace health, safety policies
- communicated with harvesting and transport operators on issues related to crop harvest procedures and performance expectations
- monitored and implemented workplace health, safety and environmental policies and procedures
- recorded and stored crop production records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- agricultural crops and their cultural requirements
- land and soil conditions and assessment, including:
 - soil nutrient and fertility
 - interpretation of soil conditions and analysis
 - crop nutrient requirements
 - impact of soil biology on soil condition and nutrient availability
 - effects of soil characteristics on nutrient availability
 - soil moisture and impact on crop development
- managing water reserves, including:
 - strategies for retaining natural soil moisture
 - irrigation strategies for broadacre crops
 - maintaining reserves of water for irrigation
- precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
- budgeting and financial analysis techniques, including:
 - basic financial analysis
 - estimating costs
 - importance of financial records
- environmental protection strategies
- pest and weed management and control strategies, including:
 - weeds and infestation patterns and methods of control
 - use of strategic grazing
 - cultural and mechanical controls
 - integrated pest management strategies
- work health and safety legislative requirements, including:
 - safe handling
 - chemical and hazardous substances
 - fire safety
 - personal protection
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety

- environmental legislation and codes of practice, relating to crop production.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm suitable for agricultural crop production or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - agricultural crop
 - chemicals and consumables for fertilising and treating crops
- specifications:
 - workplace policies, procedures and processes
 - safety data sheets
 - workplace production plans, specifications and financial budgets
 - legislation and codes of practice relevant to agricultural crop production.
- relationships:
 - harvesting and transport operators
- timelines:
 - specified in schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBA503 Manage integrated crop and pasture production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage integrated crop and pasture production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a pasture and	1.1 Establish production targets for each crop and pasture type

Element	Performance criteria
crop program	<p>consistent with marketing and enterprise objectives</p> <p>1.2 Select plant varieties that are best suited to soil, climate, seasonal conditions and marketing goals</p> <p>1.3 Determine irrigation schedules, where required, for each soil and crop or pasture type based on assessed water requirements, rainfall and evapo-transpiration data</p> <p>1.4 Assess nutrient requirements for crops and pastures to determine appropriate fertiliser program</p> <p>1.5 Assess technology to ensure most efficient performance of operations</p> <p>1.6 Identify and maintain budgetary constraints appropriately</p> <p>1.7 Develop a pasture and crop program to meet production targets and enterprise objectives</p> <p>1.8 Identify work health and safety hazards in crop & pasture management and develop control strategies</p>
2. Implement pasture and crop management program	<p>2.1 Implement pasture and crop program and monitor pasture capacity appropriately</p> <p>2.2 Implement planned strategic grazing, where necessary, to reduce or eradicate areas of weed infestation</p> <p>2.3 Determine and conduct fertiliser applications and rates appropriate to crop or pasture type</p> <p>2.4 Apply crop and pasture nutrient requirements to ensure achievement of yield and sustainability of pasture</p> <p>2.5 Monitor soil moisture schedule watering, and adjust as required</p> <p>2.6 Determine and implement appropriate processes to minimise waste, soil degradation and environmental standards</p>
3. Monitor crop or pasture growth and fodder production	<p>3.1 Determine longer term trends in weed, pest and disease incidence and implement any necessary control measures changes</p> <p>3.2 Monitor soil structure and erosion, determine and implement any necessary changes to cultural practices, grazing management and drainage</p> <p>3.3 Check and maintain irrigation and drainage systems</p> <p>3.4 Monitor grazing management</p> <p>3.5 Integrate livestock into the cropping cycle through grazing of pastures returning to crop, stubbles and crop residues, and dual purpose crops</p> <p>3.6 Identify feed surpluses and deficiencies and take appropriate action</p> <p>3.7 Monitor crop or pasture maturity is monitored and conduct harvesting to meet marketing and production targets</p>
4. Review production	4.1 Monitor pasture and crop yields and evaluate against forecast

Element	Performance criteria
level	production levels 4.2 Evaluate efficiency and effectiveness of grazing and cropping programs and document for future best practice 4.3 Evaluate production performance of each enterprise and document for management program review 4.4 Maintain appropriate production records for production performance analysis and evaluation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCBA503 Manage integrated crop and pasture production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- measure and assess quantities of fertiliser
- apply environmental protection strategies in land use
- set objectives and milestones
- determine soil quality and land use capability
- predict patterns of weed infestation
- design irrigation processes to avoid soil degradation
- apply correct use of technology to improve efficiency
- assess financial strategies and prepare budgets
- develop a pasture and crop program to meet production targets and enterprise objectives
- maintain the productivity of crops and pastures in a farming system
- monitor soil structure and erosion and make required changes to cultural practices and grazing management
- implement grazing strategies to optimise pasture and livestock production levels and support the cropping program
- evaluate grazing and cropping programs for efficiency and effectiveness
- use physical and financial records of production to evaluate production performance
- implement work health and safety policies in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land and soil conditions
- effects of nutrients of soil types

- crop and pasture production financial analysis techniques
- environmental standards
- cultivation requirements for different types of crop
- safe handling processes for fertilisers
- role of technology in improving efficiency
- infestation patterns for different types of weed
- work health and safety legislation codes of practice and enterprise procedures.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA506 Manage the harvest of crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the harvest of crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Harvesting crops carries risk of fire. All harvesting activities shall be conducted appropriate to relevant regulations, legislation and guidelines as determined by the relevant fire authority.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine crop quality	1.1 Assess the potential crop yield using measurements made in the field 1.2 Test and assess the potential quality of the crop using quality parameters before harvest 1.3 Estimate the value of each crop using the measurements taken and assessments made before harvest
2. Determine crop readiness	2.1 Refer pre-harvest samples to the laboratory or marketing agent to determine the potential quality of the crop 2.2 Monitor weather patterns estimate the rate of ripening 2.3 Monitor crop maturity and estimate when the crop will be at its optimum and harvest commencement 2.4 Assess the incidence of pests and determine the requirement for, and the type of, pre-harvest treatment 2.5 Select pre-harvest treatments to ensure that the crop meets market requirements 2.6 Ensure adherence to all work health and safety and environmental requirements throughout the application of pre-harvest treatments
3. Assess the need for insurance	3.1 Confirm any commitments to insure the crop 3.2 Estimate the crop value 3.3 Insure the crop, if appropriate 3.4 Analyse, assess and implement appropriate strategies to manage financial risk
4. Plan harvest strategy	4.1 Estimate the appropriate harvest commencement date and the time span 4.2 Calculate equipment and labour resources required for harvest from the size of the crop and harvest time limitations 4.3 Analyse equipment and labour resources required against those available within the enterprise, and determine the amount of labour and equipment to be contracted 4.4 Assess technology to ensure most efficient performance of operations 4.5 Plan for and order any equipment preparation required prior to harvest 4.6 Plan application of required pre-harvest pest control treatments appropriately 4.7 Determine and arrange required licenses, permits and notifications

Element	Performance criteria
	4.8 Determine and describe the order of the harvest in the plan
5. Plan for work health and safety hazard management	5.1 Communicate with all harvesting personnel and ensure awareness of work health and safety hazards that may be present, their responsibilities for action, and the systems that are in place to deal with such hazards 5.2 Implement suitable controls to reduce work health and safety hazard risks 5.3 Monitor, identify and assess work health and safety hazards at each stage of the harvesting process
6. Plan for fire prevention and control	6.1 Evaluate the property and identify fire risks and hazards 6.2 Develop a fire prevention and control strategy that addresses the identified risks and hazards, including measures to be taken 6.3 Assess the fire prevention and control strategy, and the specific measures to be taken 6.4 Prepare appropriate fire breaks as identified in the strategy 6.5 Ensure that sufficient firefighting equipment meets appropriate fire authority standards or guidelines is available as prescribed in the strategy 6.6 Implement appropriate community fire control practices
7. Decide on storage and delivery requirements	7.1 Allocate crop storage facilities, and plan and arrange for immediate delivery of the crop to packing sheds, the bulk handling system, or other purchasers 7.2 Ensure that silos, storage bins and other containers are located to enable efficient harvesting and transport operations 7.3 Identify any work health and safety hazards from silo operation and implement risk minimisation practices 7.4 Plan storage for flexible marketing and distribution initiatives 7.5 Evaluate resources required for crop transport, engage contractors where required 7.6 Identify strategies and resources to dry crops appropriately
8. Manage harvest operations	8.1 Ensure harvest plan is adhered to 8.2 Ensure adherence to all work health and safety and environmental requirements 8.3 Monitor harvest operations to ensure efficient and timely completion 8.4 Monitor crop quality against the harvesting plan as the crop is harvested and segregate into the various marketing grades 8.5 Store each crop grade as determined by the harvesting plan 8.6 Implement enterprise biosecurity policies
9. Record production	9.1 Maintain appropriate records of production for analysis and

Element	Performance criteria
level and review cropping strategies	evaluation of production performance 9.2 Monitor and evaluate crop yields against forecast production levels

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA506A Manage the harvest of crops.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBC506 Manage the harvest of crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and implement harvesting operations, including amendment of these during the operation itself
- organise and schedule the maintenance of plant and equipment
- establish processes or strategies, procedures and controls for crop harvesting
- demonstrate correct use of technology to improve efficiency
- interpret, analyse and extract information from a range of sources and discussions
- assess potential yields
- negotiate and arrange contracts and agreements
- explain, and deliver instructions about the plans and scheduling of the harvest operations to both staff and contractors, as well as suppliers, customers, and neighbours
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- estimate crop yield and value and monitor for harvest readiness
- plan for the resources that will be required for harvest
- negotiate insurance and equipment supply contracts
- develop risk management procedures for work health and safety, climate and fire risk
- organise for the logistics of the harvesting operation including harvesting, storage and delivery
- keep grain batches separate and monitor for pests or spoilage
- implement work health and safety policies in the context of the work team
- implement enterprise biosecurity policies
- implement enterprise environmental sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- capability and use of harvesting equipment
- role of technology in improving efficiency
- crop measurement techniques and parameters
- market information and sources
- contracting requirements for crop insurance
- management of the moisture content of crops, including drying and aeration
- storage options and local storage availability
- bushfire prevention and control legislation
- bushfire prevention and control strategies and equipment
- contact details for local fire services
- weather conditions which may affect the harvest
- relevant legislation and regulations relating to WHS, contractor engagement, chemical use and application, and vehicle and plant use
- environmental controls and codes of practice applicable to the business and to the harvesting operations
- sound management practices and processes to minimise noise, odours, and debris from the harvesting operations
- enterprise biosecurity policies and environmental sustainability practices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA507 Develop production plans for crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop production plans for agricultural and horticultural crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select crop species and	1.1 Establish production targets for each crop type, consistent with

Element	Performance criteria
variety	<p>marketing and enterprise objectives</p> <p>1.2 Assess and select crop types and varieties for their market potential and gross margin returns for the farm environment</p> <p>1.3 Select most profitable cultural practices and rotations, consistent with disease and pest management strategies, available machinery resources, and management for sustainability of resources</p> <p>1.4 Assess technology to ensure most efficient performance of operations</p> <p>1.5 Identify production risks for each crop and determine strategies to address these</p> <p>1.6 Identify environmental risks and develop appropriate strategies</p>
2. Establish yield potential and quality specification for crop	<p>2.1 Source relevant benchmark yields, where available, to assist setting target yields</p> <p>2.2 Analyse past production records and determine the key determinants of yield</p> <p>2.3 Use appropriate available models for calculating water use efficiency or other key determinants of yield to assist in setting target yields</p> <p>2.4 Establish quality specifications and target yields for all crops</p>
3. Prepare crop program	<p>3.1 Assess proposed crop land areas for nutrient, pest and disease status, water reserves, tillage requirements, and other factors before selecting crop variety</p> <p>3.2 Use records of chemical use for planning to reduce chemical resistance</p> <p>3.3 Select crop variety and plan paddock preparation, planting, fertilising and other treatments</p> <p>3.4 Determine optimum timing of planting, applications and treatments and prepare calendar of operations</p> <p>3.5 Determine cash flow budget for the cropping program</p>
4. Review production plan	<p>4.1 Plan logistical arrangements related to harvesting, transportation, marketing and other key production cycle operations</p> <p>4.2 Plan and check machinery and equipment requirements for the crop production cycle</p> <p>4.3 Assess work health and safety requirements of the production plan</p> <p>4.4 Identify and plan labour requirements for the crop production cycle</p> <p>4.5 Identify seed, fertiliser, pest and disease treatments and other input requirements</p> <p>4.6 Establish record keeping system provide data for the analysis of crop performance, and to meet other statutory requirements including records of chemical use</p>

Element	Performance criteria
	4.7 Review and amend production plan and documented as a final plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCBA507 Develop production plans for crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare budgets and gross margins
- source and interpret relevant benchmark information from consultants or peers
- assess proposed crop land areas for nutrient status by sampling and testing soils and plant tissue
- analyse past production records
- select crop species and variety
- source and interpret relevant benchmark information
- select crop species and variety and determine yield potential for crop
- demonstrate correct use of technology to improve efficiency
- prepare crop programs
- review, amend and document the production plan
- prepare budgets and gross margins
- source and interpret relevant benchmark information
- prepare individual paddock plans and a whole farm cropping plan
- assess work health and safety implications of the plan.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- determinants of crop yield
- cultural practices related to cropping
- role of technology in improving efficiency
- market prices, gross margins, cash flow budgets

- benchmark performance indicators
- disease and pest management for relevant crops
- machinery and equipment requirements for cropping
- record keeping systems.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHC BAC509 Plan and manage long-term weed, pest and disease control in crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to source information for weed, pest and disease control planning, determine long-term control strategies, provide input to other planning processes, determine scheduling and key responsibilities, monitor, adjust and evaluate control strategies and record results.

The unit applies to individuals who apply specialised skills and knowledge to the planning and management of long-term weed, pest and disease control in crops, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1.Source information for input to weed, pest and	1.1 Identify and access historical data, including recent data from organisational records for input to weed, pest and disease control

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
disease control planning	planning 1.2 Research and collate information from other workplaces within the district 1.3 Use information regarding the characteristics of the crop planned for, or under production 1.4 Research and collate information regarding the local geography, soil and climatic conditions 1.5 Consider and document the environmental and biosecurity implications of pesticide or herbicide use, alternative methods and non-chemical preventative methods 1.6 Assess technology to ensure most efficient performance of operations 1.7 Assess information including agrochemical resistance strategies and determine potential key information for input to planning decisions 1.8 Assess crop end use and agrochemical maximum residue limits (MRL) for domestic and export, primary and secondary product outcomes 1.9 Select agrochemical based on crop end use MRL, seasonal restrictions and buyer specifications
2.Determine long-term weed, pest and disease control strategies	2.1 Analyse information gathered for suitable methods 2.2 Consider methods of control, including their impacts and off target risks 2.3 Evaluate weeds, pests and diseases, and beneficial flora and fauna as indicators of farming system health 2.4 Determine strategies for weed, pest and disease control to integrate the most suitable control methods with the proposed crops and the existing geography 2.5 Identify environmental controls and include in the plan 2.6 Identify workplace health and safety hazards, assess risks and incorporate suitable controls into the plan
3.Provide input to other planning processes	3.1 Incorporate selected weed, pest and disease control strategies into other organisational planning processes 3.2 Collect and use information regarding other planning processes in the weed, pest or disease control plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.3 Communicate information appropriately about the range of planning processes
4. Determine scheduling and key responsibilities	<p>4.1 Determine appropriate scheduling for weed, pest and disease control</p> <p>4.2 Determine legal and key responsibilities for specific implementation processes</p> <p>4.3 Determine record keeping requirements and implement appropriate procedures</p> <p>4.4 Document the plan, including scheduling, legal and key responsibilities ensuring it includes the type, format, frequency and detail of any reporting required by both managers and operators</p>
5. Monitor and adjust weed, pest or disease control strategies	<p>5.1 Evaluate the effectiveness of the weed, pest and disease control strategies at key points, and implement any necessary adjustments</p> <p>5.2 Identify, monitor and assess environmental impacts and workplace health and safety hazards relating to weed, pest and disease control throughout the implementation process</p> <p>5.3 Identify and implement necessary modifications to the strategy</p> <p>5.4 Implement workplace biosecurity policies</p>
6. Evaluate weed, pest and disease control strategies and record result	<p>6.1 Analyse data, observations, and documentation from the implementation against the plan appropriately</p> <p>6.2 Prepare recommendations for future strategies</p> <p>6.3 Prepare a report that documents the implementation of the strategies including any difficulties or issues faced</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Initiate discussions with staff, contractors and suppliers, using clear language to communicate weed, pest and disease plan

Skill	Description
Numeracy	<ul style="list-style-type: none"> Access and analyse data for input to weed, pest and disease control planning Document costs of implemented strategy
Navigate the world of work	<ul style="list-style-type: none"> Identify and describe own workplace requirements associated with own role and area of responsibility Monitor self and others adherence to workplace requirements including safety requirements
Interact with others	<ul style="list-style-type: none"> Use appropriate language and communication skills to disseminate information within work team

Assessment Requirements for AHCBA509 Plan and manage long-term weed, pest and disease control in crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has planned and managed two long-term weed, pest and disease control in crops operations on at least two occasions and has:

- monitored information on pest and weed numbers, density and control
- analysed and extracted information from a range of sources and discussions
- planned and managed long-term weed, pest and disease control including developing a plan and amending the plan during the operations
- established processes or strategies, procedures and controls for long-term weed, pest and disease control
- considered the impacts and risks associated with long-term weed, pest and disease control methods
- demonstrated use of technology to improve efficiency
- assessed crop end use and agrochemical maximum residue limits (MRL) and selected appropriate agrochemical
- explained, and delivered instructions about the plans and scheduling of the weed, pest and disease control operations to both staff and contractors, as well as suppliers and customers
- recognised poor growth and lack of vigour caused by weeds, pests and disease rather than nutrient deficiency, with consideration to biosecurity
- evaluate and adjust appropriately to environmental implications and workplace health and safety hazards
- interpreted information on pest and weed numbers, density and control
- used records and observations to evaluate and report on weed, pest and disease control strategies
- planned land use incorporating long term weed, pest and disease control strategies
- followed workplace health and safety and biosecurity policies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest and weed species, including their life cycles and reproduction or multiplication capability
- pest, weed and disease control strategies including integrated pest management
- effects on crops of weeds, pests or diseases including:
 - competitive effects on crop yield
 - threshold levels
 - effects of alternative methods of control
- role of technology in improving efficiency
- agrochemical MRL for domestic and export, primary and secondary product outcomes
- relevant legislation and regulations relating to:
 - workplace health and safety
 - environment and biosecurity
 - contractor engagement
 - chemical use and application
 - vehicle and plant use
- environmental controls and codes of practice applicable to the workplace, and to the weed, pest and disease control operations
- sound management practices and processes to minimise noise, odours, and debris from weed, pest and disease control operations
- workplace biosecurity policies.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - historical data and organisational records
 - information regarding the characteristics of the crop planned for, or under production
 - information regarding the local geography, soil and climatic conditions
 - information regarding pesticide or herbicide use, alternative methods and non-chemical preventative methods
- specifications:
 - pesticide or herbicide application machinery and equipment operation and maintenance manuals and manufacturer specifications
 - agrochemical MRL for domestic and export, primary and secondary product outcomes
 - legislative and regulatory requirements applicable to pesticide or herbicide application

- industry and workplace biosecurity procedures applicable to pesticide or herbicide application
- relationships:
 - managers, operators and contractors
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBC510 Manage integrated crop and pasture production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed integrated crop and pasture production on at least one occasion, and has:

- determined fertiliser and pesticide application rates
- applied correct use of technology to improve efficiency
- identified financial strategies and maintained budgetary constraints
- developed a pasture and crop program to meet production targets and workplace objectives
- developed and implemented relevant workplace health and safety procedures
- monitored soil structure and erosion and made required changes to cultural practices and grazing management
- evaluated grazing and cropping programs for efficiency and effectiveness.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- land and soil capability, and marketing constraints and their impact on sustainable production
- establishment and cultivation requirements for different types of crop
- infestation patterns and control measures for different types of weeds, including integrated weed management strategies
- the use of soil nutrients to improve crop production
- role and assessment of technology in improving efficiency and competitiveness
- relevant workplace health and safety legislation, regulations and workplace procedures
- types of fertilisers and pesticides, their use, application and safe handling processes
- environmental standards applicable to managing integrated crop and pasture production

- methods for measuring crop and pasture development, capacity and quality.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace budget, marketing and objectives
- specifications:
 - workplace health and safety legislation, regulations and workplace procedures applicable to managing integrated crop and pasture production
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BAC511 Plan and manage a stored grain program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to plan, implement and manage a grain storage program, and maintain records of stored grain movement.

This unit applies to individuals who apply specialised skills and knowledge to the planning and management of a stored grain program, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan grain storage program	1.1 Collect and analyse workplace documentation and financial information to develop the storage program 1.2 Identify, record and assess available storage facilities for

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>suitability and capacity</p> <p>1.3 Calculate and analyse projected grain production and delivery quantities, types and timeframes against storage capacity</p> <p>1.4 Arrange and estimate cost of temporary storage</p> <p>1.5 Evaluate the benefits, risks and costs of storing grain and compare to immediate sale of grain</p> <p>1.6 Estimate timeframes and scheduling for delivery of grain to on-site and off-site storage facilities</p> <p>1.7 Prepare program plan to include plans for annual, seasonal and short-term periods, appropriate to achieving workplace goals and objectives</p> <p>1.8 Document program plan, including scheduling and key responsibilities, and reporting type, format, frequency and detail required by managers and operators</p>
2. Plan integrated pest control for the storage area	<p>2.1 Organise grain testing and sampling for pest infestation</p> <p>2.2 Record and analyse results of samples and tests for pest infestation</p> <p>2.3 Develop and implement an integrated pest management (IPM) program including monitoring points, to control grain insects and other pests in storage</p> <p>2.4 Confirm pest control strategies meet end-use requirements and customer expectations</p> <p>2.5 Determine appropriate record keeping requirements and procedures to ensure compliance with applicable regulations</p> <p>2.6 Document the program, including scheduling and key responsibilities, including the type, format, frequency and detail of any reporting required by both managers and operators</p>
3. Implement workplace health and safety program for grain storage area	<p>3.1 Identify workplace health and safety hazards within and surrounding the grain storage area</p> <p>3.2 Develop, document and implement workplace health and safety procedures to reduce or eliminate risks</p> <p>3.3 Communicate workplace health and safety procedures</p> <p>3.4 Check the program describes the personal protective equipment and safety gear required to be used around the storage facilities</p> <p>3.5 Determine workplace health and safety record keeping requirements, and implement procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.6 Confirm the program includes the type, format, frequency and detail of any reporting required by both managers and operators
4. Manage the grain storage program	<p>4.1 Implement the grain storage program in accordance with workplace requirements and workplace health and safety procedures</p> <p>4.2 Schedule and organise activities for efficient transport and storage of the grain</p> <p>4.3 Implement pest control strategies according to the IPM program</p> <p>4.4 Confirm personal protective equipment and safety gear is provided to all people operating around the storage facilities</p> <p>4.5 Conduct checks to ensure that the grain performance indicators, targets and specifications, including grain stored for seed, are being met, and make amendments to the program where necessary</p> <p>4.6 Communicate regularly with operational personnel throughout the storage, transport, sampling and chemical application operations to ensure efficient and safe operation and progress</p> <p>4.7 Minimise environmental and biosecurity impacts of grain storage and movement activities according to workplace environmental and biosecurity procedures</p> <p>4.8 Identify existing and potential grain storage problems and investigate likely causes</p> <p>4.9 Consider and recommend alternative solutions to appropriate personnel</p>
5. Maintain records of stored grain movement	<p>5.1 Create, maintain and store records and documentation as described in the grain storage program, the IPM program, and workplace health and safety requirements</p> <p>5.2 Complete appropriate records and documentation throughout the storage program in accordance with workplace procedures</p>

Foundation Skills

Assessment Requirements for AHCBC511 Plan and manage a stored grain program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and managed a stored grain program on at least one occasion, and has:

- planned for grain storage and transportation needs based on grain production estimates
- planned, scheduled, monitored and amended plans for operations
- supervised personnel to monitor transport, storage, sampling and pest control procedures
- implemented an integrated pest management (IPM) program for grain storage
- established procedures and controls for implementation by others
- maintained grain storage records
- supervised procedures to manage workplace health and safety risk for the storage site, including working at heights and confined spaces
- developed and implemented workplace health and safety procedures, including working at heights and confined spaces
- administered and coordinated operations on a site
- explained and delivered instructions about the plans and scheduling of the grain storage operations to personnel
- implemented workplace environmental and biosecurity procedures, including hygiene procedures for handling different grades and varieties of grains.
-

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- storage layout and operations, configuration, and maintenance procedures
- integrated pest and weed management techniques
- workplace internal and external reporting and recording requirements

- relevant legislation and regulations relating to chemical use and application, site management and vehicle and plant use
- safe working practices, especially in confined spaces and at heights
- relevant workplace health and safety legislation and regulations
- sound management practices and processes to minimise noise, odours and debris from grain storage operations
- organisational priorities and policies in relation to:
 - production planning
 - chemical use
 - quality
 - personnel
 - operations
- grain quality requirements, including grain stored for seed
- workplace environmental and biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace documentation and financial information applicable to the storage program
- specifications:
 - chemical use and application, site management and vehicle and plant use legislation and regulations applicable to planning and managing a stored grain program
 - workplace health and safety legislation and regulations applicable to planning and managing a stored grain program
 - workplace environmental and biosecurity procedures applicable to planning and managing a stored grain program
- relationships:
 - appropriate personnel
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC512 Develop production plans for crops or pastures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to select and establish species, variety, yield potential and quality specification of crop or pasture, prepare a crop or pasture program, and review crop or pasture production plans.

The unit applies to individuals who apply specialised skills and knowledge to the development of crop or pasture production plans, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select plant species and variety	1.1 Establish production targets for each crop or pasture type, consistent with marketing and workplace objectives

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Assess and select plant types and varieties for their market potential and gross margin returns for the farm environment</p> <p>1.3 Select cost-effective cultural practices and rotations, consistent with disease and pest management strategies, available machinery resources and sustainable management of resources</p> <p>1.4 Assess technology to ensure most efficient performance of operations</p> <p>1.5 Identify production risks and determine strategies to minimise risk for each plant type selected</p> <p>1.6 Identify and assess environmental and biosecurity risks, and develop risk controls and procedures</p>
2. Establish yield potential and quality specification for crop	<p>2.1 Source relevant benchmark yields to assist in setting target yields</p> <p>2.2 Analyse past production records and determine the key determinants of yield</p> <p>2.3 Use available models for calculating water use efficiency or other key determinants of yield to assist in setting target yields</p> <p>2.4 Establish quality specifications and target yields for all crops or pastures</p>
3. Prepare crop or pasture program	<p>3.1 Assess proposed land areas for nutrients, pest and disease status, water reserves, tillage requirements and other factors that may affect crop or pasture production</p> <p>3.2 Use records of chemical use for planning to reduce chemical resistance where required</p> <p>3.3 Confirm crop or pasture varieties and plan paddock preparation, planting, fertilising and other treatments</p> <p>3.4 Determine optimum timing of planting, applications and treatments, and prepare calendar of operations</p> <p>3.5 Determine cash flow and budget for the crop or pasture program</p>
4. Review production plans	<p>4.1 Plan logistical arrangements related to harvesting, transportation, marketing and other key production cycle operations</p> <p>4.2 Plan and check machinery and equipment requirements and availability for the production cycle</p> <p>4.3 Assess workplace health and safety requirements of the production plan</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.4 Identify and plan labour requirements for the production cycle 4.5 Identify seed, fertiliser, pest and disease treatments and other input requirements 4.6 Establish record keeping system to provide data for the analysis of crop or pasture performance, and to meet other statutory requirements, including records of chemical use 4.7 Review and amend crop or pasture production plans, and document final plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding requirements for crop or pasture production plans
Writing	<ul style="list-style-type: none"> Develop crop or pasture yield and quality specifications, and chemical use records
Numeracy	<ul style="list-style-type: none"> Calculate water use, target yields, cash flow and budget

Assessment Requirements for AHCBC512 Develop production plans for crops or pastures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed and reviewed production plans for crops or pastures on at least two occasions, and has:

- prepared budgets and gross margins
- assessed use of technology to improve efficiency
- assessed environmental and biosecurity risks, and developed controls and procedures
- sourced and interpreted relevant benchmark information
- analysed past production records
- selected crop or pasture species and variety, and determined yield potential for crop or pasture
- assessed proposed land areas for nutrient status
- assessed relevant workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- market prices, gross margins, cash flow budgets
- cultural practices, characteristics and variability related to crops or pastures
- machinery and equipment requirements for selected crops or pastures
- role of technology in improving efficiency
- relevant workplace health and safety and environmental protection legislation, regulations, codes of practice and workplace procedures
- determinants of crop or pasture yield
- benchmark performance indicators
- models for calculating water efficiency
- disease and pest management selection for relevant crops or pastures

- crop or pasture performance record keeping systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - benchmark yields, past production records and chemical use records
- specifications:
 - workplace health and safety and environmental protection legislation, regulations, codes of practice and workplace procedures applicable to developing crop or pasture production plans
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBA513 Apply plant biology to agronomic practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to apply introductory plant biology, including plant taxonomy, plant morphology and plant physiology, to a wide range of agronomic practices.

The unit applies to individuals who apply specialised skills and knowledge to the application of plant biology to agronomic practice, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Apply plant taxonomy to agronomic practices	1.1 Identify botanical terminology of plant taxonomy, including plant kingdom divisions, major plant families and genera for plant

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	classification 1.2 Apply the rules of plant nomenclature when naming plants 1.3 Identify the external features of plants, including leaves, stems, flowers and fruits 1.4 Identify a range of plants used in agronomy to species level, using plant botanical key and other references where required 1.5 Use botanical terminology to discuss plant taxonomy in agronomic practices with appropriate personnel
2. Identify plant functions and their impact on growth	2.1 Investigate and identify plant cell structures, their functions and the organisation of cells into primary tissues 2.2 Research the structure and functions of leaves, stems, root and flowers in relation to agronomic practices 2.3 Identify the processes and outcomes of photosynthesis, respiration and transpiration
3. Apply knowledge of plant morphology to agronomic practices	3.1 Research, analyse and document specialist botanical knowledge of plant morphology, including leaf, root, stem, flower and seed characteristics from development to maturity for crop and pasture management 3.2 Use botanical terminology when discussing plant morphology and growth stages 3.3 Identify critical growth stages for crop and pasture monitoring, nutrient assessment and spray applications

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Initiate discussions with appropriate personnel, using clear language to discuss plant taxonomy, morphology and critical growth stages

Assessment Requirements for AHCBAC513 Apply plant biology to agronomic practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has applied plant biology to agronomic practices on at least two occasions, and has:

- identified plants according to accepted taxonomic classifications
- used appropriate authoritative references and resources for plant classification
- used an appropriate botanical key to identify a variety of plant species, including:
 - natives
 - introduced plants
 - crops or pastures
- described plant taxonomy, morphology and critical growth stages
- applied scientific concepts of plant biology to agronomic practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of agronomy and agronomic practices, including:
 - plant taxonomy
 - plant nomenclature
 - plant physiology
 - plant morphology
 - relationship to plant development
 - farming systems
 - weeds as indicators of soil conditions
 - characteristics of plants at various growth stages, from germination to maturity.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - plants
 - botanical key
- relationships:
 - appropriate personnel
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC514 Design and manage a crop or pasture nutrition program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to review, test and analyse site characteristics, determine plant nutrient requirements, design a nutrient management plan, and monitor and evaluate a crop or pasture nutrition program and nutrient management plan.

The unit applies to individuals who apply specialised skills and knowledge to the design and management of a crop or pasture nutrition program, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review, test and analyse site characteristics	<p>1.1 Review workplace crop or pasture production plan in consultation with land manager to determine production, economic output and environmental goals for assessment and development of nutrition program</p> <p>1.2 Access and review climate, environmental and site data</p> <p>1.3 Determine soil, plant and water tests for plant species and climatic conditions according to industry accepted standards and workplace requirements</p> <p>1.4 Develop soil, plant and water testing program that includes visual inspection, sampling, field testing, off-site analysis, task responsibilities, scheduling and desired information outcomes</p> <p>1.5 Implement and monitor a soil, plant and water testing program</p> <p>1.6 Supervise liaison with outside testing agencies and take remedial action where necessary</p> <p>1.7 Determine characteristics, condition and nutritional status of soil and plant species by analysing and comparing data against industry accepted standards</p>
2. Determine plant production system nutrient requirements	<p>2.1 Identify plant species nutrition requirements during growing cycle from published data, historical records, current site data, experience and workplace guidelines</p> <p>2.2 Identify appropriate soil conditions and nutrient availability for plant production according to workplace crop or pasture production plan</p> <p>2.3 Calculate capital and maintenance nutrient applications using nutrient planning tools</p> <p>2.4 Determine potential seasonal variations requirements</p> <p>2.5 Document nutrition program according to analysis of plant production nutrient requirements</p>
3. Design a nutrient management plan	<p>3.1 Identify criteria for determining and selecting fertiliser and soil amendment products</p> <p>3.2 Calculate application rates according to soil, plant and water test results, plant requirements, growth stage, manufacturer specifications and workplace crop or pasture production plan</p> <p>3.3 Select application methods and timings to ensure effective and efficient product formulation and to minimise loss</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.4 Identify and cost resource requirements for program, and confirm availability of suppliers, contractors and appropriate personnel</p> <p>3.5 Calculate cost-effective unit cost, total costs and estimated returns of soil management and amendment, and provision of plant nutrients</p> <p>3.6 Identify and apply applicable compliance requirements of legislation and regulations</p> <p>3.7 Identify and assess workplace health and safety, environmental hazards and risks, and environmental and biosecurity impacts of nutrition program</p> <p>3.8 Develop and document workplace health and safety and environmental and biosecurity controls to minimise risks, impacts and poor nutrient management practices according to workplace environmental and biosecurity procedures</p> <p>3.9 Document workplace nutrient management plan according to analysis of nutrient management requirements</p>
4. Monitor and evaluate nutrition program and nutrient management plan	<p>4.1 Monitor and evaluate nutrition program and nutrient management plan implementation and results, and produce according to industry accepted standards and workplace requirements</p> <p>4.2 Review and refine nutrition program in response to changing conditions</p> <p>4.3 Identify non-compliance with documented nutrient management plan, and determine remedial actions</p> <p>4.4 Document remedial action to improve plant nutrition, and report to relevant personnel</p> <p>4.5 Record nutrition program results, and incorporate changes to nutrient management plan and nutrition program for future season application</p>

Foundation Skills

Assessment Requirements for AHCBA514 Design and manage a crop or pasture nutrition program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed and managed a crop or pasture nutrition program on at least one occasion, and has:

- reviewed and analysed workplace crop or pasture production plan, findings on plant structure, biology and nutritional requirements, nutrients available from fertilisers, soils and soil amendments
- documented a nutrition program and nutrient management plan, including remedial actions
- calculated fertiliser and soil amendment application rates
- identified nutrition program resource requirements, and calculated cost and estimated returns
- identified and complied with legislation and regulations requirements applicable to designing and managing a crop or pasture nutrition program
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- developed and documented relevant workplace health and safety and environmental and biosecurity controls to minimise risks, impacts and poor nutrient management practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principals of workplace crop or pasture production plan
- site evaluation techniques, including methods of sampling and analysing soils and other growth media
- characteristics and variability of soil and uses of soil amendments and additives to enhance available nutrition for specific crops

- characteristics of plants at various growth stages, including nutritional requirements and demands
- plant nutritional requirements of selected crop species
- organic matter, pests and disease, and nutrient interactions in soil and nutrient cycle
- soil amendments commonly required to treat soil problems experienced by workplace
- nutrients and water required by plants grown within workplace, and effects of nutrient deficiency and toxicity on individual plant species and varieties, including visual symptoms
- processes and techniques for preparing, costing and documenting a plant nutrition program
- common and compound fertiliser products and soil ameliorants available to workplaces, including analysis, solubility, salt index, application rates, method, timing and costs
- methods of nutrient uptake by plants and favourable conditions for effective uptake to occur
- legislation and regulations requirements relevant to designing and managing a crop or pasture nutrition program
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to designing and managing a crop or pasture nutrition program.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - climate, environmental and current site data
 - species published data and historical records
 - soil, plant and water samples and testing equipment
 - plant identification keys and booklets
 - test results
 - soil amendment product specifications and performance data
 - fertiliser labels, product cards and material safety data sheets (MSDS)
- specifications:
 - workplace crop or pasture production plan
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to designing and managing a crop or pasture nutrition program
 - legislation and regulations requirements relevant to designing and managing a crop or pasture nutrition program
- relationships:

- staff, managers, suppliers, contractors, consultants, appropriate personnel and customers
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC515 Manage forage conservation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan, prepare and administer a crop for forage conservation, including, resourcing, budgeting and overseeing its implementation.

The unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for forage conservation	1.1 Determine end use requirements of forage conservation in farm production system 1.2 Determine forage conservation options and cost benefit 1.3 Select location for forage crop according to variety and target

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>growth stage</p> <p>1.4 Determine machinery and equipment required for forage crop production</p> <p>1.5 Determine supporting technology required to enable efficient performance of operations</p> <p>1.6 Plan and prepare storage facilities or system for selected forage conservation method</p> <p>1.7 Identify potential environmental impact of forage conservation activities and develop controls to mitigate damage</p> <p>1.8 Determine cost of production and prepare working budget</p> <p>1.9 Determine contractor support and negotiate contracts according to production system requirements and budget constraints</p> <p>1.10 Identify workplace health and safety hazards, assess risks and develop control strategies</p>
2. Prepare paddocks for forage conservation	<p>2.1 Determine crop cultural management requirements for crop</p> <p>2.2 Identify optimum time for harvest of key species</p> <p>2.3 Monitor and control weeds, pests and diseases</p> <p>2.4 Coordinate safe access to paddocks for harvesting and transport machinery</p>
3. Oversee forage harvesting operations	<p>3.1 Establish dry matter targets for selected method of forage conservation</p> <p>3.2 Monitor seasonal and current weather conditions to determine optimum time for harvest to ensure quality</p> <p>3.3 Assess condition and dry matter content of crop during harvesting operation</p> <p>3.4 Select harvesting and conditioning machinery based on weather conditions and forage drying targets</p> <p>3.5 Communicate work activities and performance targets to work team and contractors</p> <p>3.6 Check harvesting activities are conducted in a safe, controlled and efficient manner</p> <p>3.7 Verify forage storage system is implemented according to storage plan</p> <p>3.8 Confirm health, safety and quality of forage requirements are</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	implemented according to workplace procedures
4. Complete operation	4.1 Maintain records according to quality assurance requirements and industry practice 4.2 Check waste is disposed of to minimise environmental impact according to environmental policies 4.3 Verify machinery and ancillary equipment is cleaned and serviced according to manufacturer instructions and biosecurity procedures 4.4 Conduct quality checks of stored forage 4.5 Monitor and minimise environmental impact of forage conservation activities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and extract information for planning forage conservation from complex texts, reports, maps and plans including legislation and regulations, policies and procedures to formulate organisational strategies
Oral Communication	<ul style="list-style-type: none"> Express complex information in a simple, clean and effective manner when negotiating contracts and informing work teams and contractors of work requirements and performance targets
Numeracy	<ul style="list-style-type: none"> Use highly-developed numeracy skills to interpret complex financial information and perform calculations to translate estimates of operational costs and scheduling for inclusion in forage crop management plan and budget

Assessment Requirements for AHCBA515 Manage forage conservation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion, planned, prepared and administered a full cycle of forage crop for conservation and has:

- assessed and selected a forage conservation system for farm
- developed a cost benefit analysis for forage conservation options
- identified resource requirements and produced a budget including:
 - crop inputs
 - harvest area
 - machinery and contractors
 - labour
 - storage type and sites
- determined cultural requirements and timing of crop, including:
 - crop species/variety
 - fertilisers and amelioration
 - irrigation
 - pest and weed control
 - grazing regimen
- planned and monitored harvesting operations
- conducted quality checks of stored forage
- selected forage conservation machinery and technologies for efficient forage crop harvesting
- managed harvest operations, forage preparation and storage of forage according to plan
- communicated work activities and performance targets to work team and contractors
- ensured waste is disposed ethically to reduce environmental impact
- maintained records of operations

- monitored the implementation of workplace health, safety, biosecurity and environmental policies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- forage conservation options and cost benefit analysis
- silage and hay conservation systems, including:
 - baling
 - wrapping
 - compacting
 - sealing
 - final storage
- factors affecting the quality of silage and hay
- dry matter content, quality, hygiene and biosecurity requirements
- range and functions of silage and haymaking machinery and equipment and the technologies that support efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - controlled traffic farming (CTF) principles and impact
 - variable rate technology (VRT)
 - remote piloted systems
 - digital and remote sensing and monitoring
- weeds, pests and diseases associated with crops and pastures, including:
 - infestation patterns and methods of control
 - cultural and mechanical controls
 - integrated pest management strategies
- types and application of personal protective equipment
- work health and safety legislation and regulations, including:
 - licensing requirements in relation to forage operations
 - chemical and hazardous substances
 - fire safety and management
 - personal protection
 - working at heights and confined spaces with storage bins
 - power lines and elevated equipment safety
 - forage handling, loading, transported and storage
- risk factors affecting production and harvesting, including:
 - human and animal health
 - weather and impact on crop quality and harvesting
 - environmental including, nutrient levels at field out areas and effluent run-off

- irrigation, soil moisture and erosion
- workplace and industry biosecurity and environmental policies and practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm suitable for forage conservation crop production or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - forage conservation crop
 - chemicals and consumables for fertilising and treating crops
 - computer or analogue financial models and formats
- specifications:
 - workplace policies, procedures and processes
 - safety data sheets
 - legislation and codes of practice relevant to forage conservation crop production.
- relationships:
 - work team and contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBC516 Manage the harvest of crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan a harvesting strategy, determine the readiness, quantity and value of the crop and plan and oversee the harvest of a crop.

The unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Broad Acre Cropping (BAC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine crop quality	1.1 Assess potential crop yield from data collected in the field 1.2 Test and assess crop quality in the field according to workplace and industry standards 1.3 Estimate the pre-harvest value of crop from tests and assessments

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Determine crop readiness	<p>2.1 Refer pre-harvest samples to laboratory or marketing agent to determine potential crop quality</p> <p>2.2 Monitor weather conditions to estimate rate of ripening</p> <p>2.3 Monitor crop maturity and estimate optimal crop harvest commencement period</p> <p>2.4 Assess incidence of pests and determine pre-harvest treatment requirements</p> <p>2.5 Select pre-harvest treatments to ensure crop meets market requirements and industry standards</p> <p>2.6 Check adherence to work health and safety and environmental requirements throughout the application of pre-harvest treatments</p>
3. Assess the need for insurance	<p>3.1 Confirm commitments to insure the crop</p> <p>3.2 Estimate crop value</p> <p>3.3 Insure crop according to estimates and commitments</p> <p>3.4 Analyse, assess and implement strategies to manage financial risk</p>
4. Plan harvest strategy	<p>4.1 Estimate harvest commencement date and timing</p> <p>4.2 Determine equipment, technologies, and labour resources required for harvest</p> <p>4.3 Reconcile required equipment and labour against available resources and determine contract requirements</p> <p>4.4 Plan and organise equipment preparation prior to harvest</p> <p>4.5 Plan application of required pre-harvest pest control treatments according to crop assessment</p> <p>4.6 Determine and arrange required licenses, permits and notifications</p> <p>4.7 Determine and document order of harvest in harvest plan</p>
5. Plan for work health and safety hazard management	<p>5.1 Communicate workplace health and safety procedures to harvesting workforce</p> <p>5.2 Implement controls to reduce work health and safety hazard and risks</p> <p>5.3 Monitor, identify and assess health and safety hazards and risks for each stage of harvesting process</p>
6. Plan for fire	6.1 Evaluate the property and identify fire hazards and risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
prevention and control	<p>6.2 Develop a fire prevention and control strategy to manage fire risk</p> <p>6.3 Monitor implementation of fire prevention and control strategy and amend according to prevailing conditions</p> <p>6.4 Prepare fire breaks specified in fire prevention and control strategy</p> <p>6.5 Check firefighting equipment complies with fire authority requirements and fire prevention and control strategy</p> <p>6.6 Implement community fire control practices</p>
7. Decide on storage and delivery requirements	<p>7.1 Allocate crop storage facilities, and plan and arrange delivery of crop according to harvesting plan</p> <p>7.2 Check temporary silos, storage bins and other containers are located for efficient harvesting and transport operations</p> <p>7.3 Identify work health and safety hazards and assess risk from silo operation and implement controls</p> <p>7.4 Plan storage for flexible marketing and distribution initiatives</p> <p>7.5 Review planned crop transport resources against actual and amend workforce/contractor needs accordingly</p> <p>7.6 Identify strategies and resources to dry crops according to harvest plan</p>
8. Manage harvest operations	<p>8.1 Monitor performance of harvest plan and implement contingencies to address inconsistencies</p> <p>8.2 Monitor adherence to health, safety and environmental procedures and implement remedial action for breaches</p> <p>8.3 Monitor harvest operations to ensure efficient and timely completion</p> <p>8.4 Monitor crop quality during crop harvest and segregate and store into marketing grades according to harvesting plan</p> <p>8.5 Implement enterprise biosecurity policies</p>
9. Record production level and review cropping strategies	<p>9.1 Maintain records of harvest according to workplace procedures</p> <p>9.2 Monitor and evaluate crop yields against forecast production levels</p> <p>9.3 Review harvest plan and production outcomes and recommend changes to production plan</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and extract information for managing harvest operations from complex texts, reports, maps and plans including legislation and regulations, policies and procedures to formulate organisational plans
Writing	<ul style="list-style-type: none"> Write detailed plans and procedural texts, including contingencies, for agricultural workforce and contractors for the purpose of informing on harvesting activities and performance targets, taking into account the needs of a culturally and linguistically diverse workforce
Oral Communication	<ul style="list-style-type: none"> Establish and maintain complex and effective communications when negotiating contracts and informing work teams and contractors of work requirements and performance targets
Numeracy	<ul style="list-style-type: none"> Use highly-developed numeracy skills to interpret complex financial information and perform calculations to translate estimates of operational costs and scheduling for inclusion in harvest management plans and costings

Unit Mapping Information

Assessment Requirements for AHCBC516 Manage the harvest of crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared and overseen the harvest of an agricultural crop on at least one occasion and has:

- planned and implemented harvesting operations
- organised and scheduled the selection, maintenance and use of technologically efficient harvesting plant and equipment
- established processes or strategies, procedures and controls for crop harvesting
- assessed crop quality, quantity and value of potential yields
- planned and negotiated workforce, contracts and agreements
- communicated instructions, plans, scheduled and performance targets to key stakeholders
- observed, identified and respond to environmental implications and work health and safety issues according to policies and procedures
- assessed financial risk and implemented insurance processes to mitigate risk
- developed management procedures for health, safety, climate and fire risk
- organised logistical requirements for harvesting operations, including:
 - harvesting
 - storage and delivery
 - licenses, permits and notifications
 - reconciliation of equipment and labour against available resources and contract requirements
 - temporary silos, storage bins and other containers for efficient harvesting and transport operations
 - contingencies to address harvest plan inconsistencies
 - records of harvest
- assess and classify crop grades and segregate crops for storage according to marketing plan and industry standards
- manage crop pre-harvest and post-harvest pest and spoilage controls

- implemented workplace health, safety, biosecurity and environmental policies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- range and functions of harvesting machinery and equipment
- precision agriculture and the role of technology in improving efficiencies, including:
 - self-drive, auto steer, global navigation satellite systems (GNSS) and laser technologies
 - digital and remote sensors
 - remote piloted systems
 - controlled traffic farming (CTF) principles and impacts
 - variable rate technology (VRT)
 - capability and use of harvesting equipment
 - yield mapping
- crop quality and quantity measurement and assessment techniques and parameters
- crop market information and sources
- contracting requirements
- financial risk management including:
 - valuing crops
 - assessing financial risk
 - mitigating risk and insuring crops
- management and maintenance of harvested crop including:
 - moisture content, including drying and aeration
 - pest management and treatments
 - storage options and availability
- managing fire risk on farms, including:
 - harvesting equipment and fire risk
 - stubble and crop waste management
 - fire prevention and control strategies and equipment
 - contacting and arranging support from fire services
- weather conditions and their impact of crop harvesting and storage
- legislation, regulations and industry standards relating to health, safety, contractor engagement, crop treatments, biosecurity and harvesting plant use
- environmental controls and codes of practice applicable to harvesting operations
- management policies and procedures for health and safety, including:
 - licensing requirements harvesting operations
 - use of chemicals and hazardous substances
 - personal protection
 - harvesting, handling, loading, transport and storage

- working at heights and confined spaces with storage bins
- power lines and elevated equipment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm suitable for harvesting a crop or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crop nearing maturity
 - planning and project management tools
 - safety equipment
 - crop sampling and assessment equipment and procedures
- specifications:
 - workplace policies, procedures and processes
 - legislation and codes of practice relevant to crop quality, and storage
- relationships:
 - work team and contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBER301 Work effectively in an emergency disease or plant pest response

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to work effectively within own area of responsibility while responding to an emergency disease or plant pest incursion.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify information required	1.1 Access information about emergency disease or plant pest and appropriate response to apply during an emergency response 1.2 Use information to address specific work needs and identify further information requirements 1.3 Identify and access information and resources required from stakeholders
2. Carry out work	2.1 Communicate with stakeholders according to organisational procedures 2.2 Carry out work activities to conform to relevant legislation, regulations, procedures and codes of practice appropriate to work area and level of responsibility 2.3 Identify hazards and risks relevant to specific work being undertaken and respond as required
3. Manage own work	3.1 Interpret work instructions and seek clarification if inconsistencies are noted 3.2 Assess workload and prioritise competing demands to achieve personal, team and organisational goals and objectives 3.3 Communicate the need for physical and human resources clearly to appropriate person 3.4 Perform own role, responsibilities and duties in a positive manner to promote cooperation within the workplace 3.5 Respect the importance of own and others' roles in achieving organisational goals 3.6 Recognise personal symptoms of stress and its potential to impact on performance and take action to minimise negative effects 3.7 Report undue personal stress to appropriate person
4. Comply with biosecurity requirements	4.1 Identify biosecurity procedures relevant to own work area 4.2 Maintain personal protective equipment and fomites according to biosecurity procedures 4.3 Report biosecurity breaches immediately to appropriate person 4.4 Complete biosecurity records according to work area requirements
5. Adapt to change as required	5.1 Identify and assess any need for change in own work practices to reflect critical emergency issues or emerging trends 5.2 Discuss and seek agreement with senior staff if changes are required 5.3 Change own work practices where required and according to agreed arrangements 5.4 Apply a flexible approach that takes account of changing priorities and circumstances when implementing instructions for

Element	Performance criteria
	changes to work practices 5.5 Monitor change to determine the effectiveness of revised work practices and advise senior staff members of findings

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO301A Work effectively in an emergency disease or plant pest response.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBER301 Work effectively in an emergency disease or plant pest response

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and use information to determine appropriate response, work needs, and information and resources to be accessed from stakeholders
- carry out work activities to conform with national plan
- communicate with stakeholders
- identify hazards and risks
- manage own work load and priorities
- interpret work instructions and seek clarification as needed
- recognise and respond to personal stress
- promote cooperation and respect within work team
- communicate the need for physical and human resources
- comply with biosecurity requirements for personal protective equipment and fomites, reporting biosecurity breaches and completing records
- adapt to and monitor change
- complete biosecurity records.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP) relating to an emergency disease or plant pest incursion response
- organisational procedures for communication in an emergency response
- common physical and human resources needed in an emergency response
- common work health and safety, and biosecurity hazards in an emergency response

- personal protective equipment, and fomites relevant to emergency response
- signs of personal stress and potential impact on response
- techniques for prioritising work activities and time management
- techniques for managing own responses to change, and to personal stress
- communication principles for working effectively in teams, and reporting information
- records required to be kept during an emergency response.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER302 Work effectively in a biosecurity emergency response

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to work in an emergency environment where there is a response to a biosecurity threat.

The unit applies to individuals who have been appointed or engaged to undertake and support an emergency response. They work under broad supervision and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for AHCBER302 Work effectively in a biosecurity emergency response

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has participated in at least two emergency response activities, where one must be for a plant scenario and one must be for an animal or insect scenario.

There must also be evidence that the individual has:

- accessed and applied information for emergency response work and resources
- performed work activities to conform with biosecurity response procedures and legislative and regulatory requirements
- conducted a workplace health and safety assessment and implemented controls
- interpreted and applied work instructions
- recognised and responded to stress
- promoted a positive and cooperative work team
- complied with biosecurity requirements for personal protective equipment and fomites,
- reported breaches in biosecurity according to workplace procedures
- reviewed team work practices during emergency response and identified changes for approval and implementation
- completed biosecurity records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- standards and legislative requirements for biosecurity emergency response, including:
 - state and territory and Commonwealth policies, legislation and regulations
 - emergency response plans relevant to industry sector
 - nationally agreed standard operating procedures

- a basic understanding of emergency response needs relating to biosecurity emergencies
- workplace procedures for communication in an emergency response
- resources required for emergency response, including:
 - human
 - materials
 - equipment
- common workplace health and safety, and biosecurity hazards in an emergency response, including:
 - assessing risk and common controls used to mitigate risk
 - personal protective equipment, and fomites relevant to emergency response
 - signs of personal stress and potential impact on work team and stakeholders
- coordinating a small team during an emergency response, including:
 - planning and implementing work activities
 - time management
 - assessing work team performance
 - implementing changes to work practices
- communication principles for working effectively in teams, and reporting information
- records required during an emergency response.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an emergency response situation or an environment that represents an emergency response condition
- resources, equipment and materials:
 - tools, equipment and materials used to respond to a specific emergency response
 - personal protective equipment
- specifications:
 - specific workplace policies, procedures and processes for biosecurity and emergency response
 - workplace instructions for emergency response activity
 - specific legislation, codes of practice and information regarding the specific biosecurity emergency
- relationships
 - stakeholders
 - work team, supervisor
- timeframes:
 - emergency response completed according to time specified in response plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for emergency disease or plant pest control activities	1.1 Clarify work instructions received from infected premises (IP) site supervisor in preparation for carrying out control procedures 1.2 Select and prepare appropriate equipment and materials to undertake control activities in line with IP site supervisor's work instructions and associated safety requirements 1.3 Select and prepare personal protective equipment (PPE) 1.4 Identify animal welfare considerations if dealing with an emergency disease
2. Carry out emergency disease or plant pest control activities	2.1 Implement control activities in line with work instructions, work health and safety requirements and standards and protocols 2.2 Maintain a log of activities carried out on the IP in accordance with instructions from IP site supervisor 2.3 Use PPE as instructed by IP site supervisor 2.4 Give and receive work instructions within own area of responsibility
3. Check and adjust emergency disease or plant pest control activities	3.1 Check control activities within own area of responsibility regularly to ensure compliance with work instructions, work health and safety requirements and standards and protocols 3.2 Provide reports to IP site supervisor as required 3.3 Report any variations from work instructions and standards and protocols, or failure to achieve objectives to IP site supervisor and undertake remedial action within own scope of authority 3.4 Communicate any recommendations for adjusting work instructions to IP site supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for control activities
- follow infected premises (IP) site supervisor instructions
- identify animal welfare concerns
- select, prepare and use personal protective equipment (PPE)
- apply biosecurity principles and work health and safety practices in implementing, monitoring and reporting on variations to control activities
- implement control activities
- monitor, review and report on control activities within area of own responsibility, for compliance and effectiveness
- undertake remedial action within own scope of authority
- provide reports to IP site supervisor on variations to activities, failure to meet objectives and recommendations for adjustments to work instructions
- communicate effectively with IP site supervisor and when giving and receiving work instructions to others
- maintain log of activities as required.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- common control activities associated with emergency disease and plant pest control procedures at infected premises (IP)
- objectives and work instructions commonly associated with IP control responses
- own work role and responsibilities within an IP control response

- animal welfare guidelines relevant to the species, disease and IP environment if animals are under control procedures
- PPE gear commonly used in IP control response
- biosecurity principles commonly associated with an IP control response
- safe work practices applicable to work role and responsibilities in an IP environment
- reporting templates and requirements for logging control activities
- communication principles used in giving, receiving and clarifying instructions, and reporting on control activities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBER304 Carry out movement and security procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must undertake movement and security procedures including establishing a traffic check point and monitoring the movement of vehicles and issuing permits.

The candidate must demonstrate that they can:

- determine logistics and required documentation applicable to specific movement and security operations
- obtain and check any resources and personal protective equipment (PPE)
- establish and operate traffic checkpoint
- issue and check permits
- respond to vehicles without valid permit for load being transported as appropriate to standards and protocols
- liaise with external security providers
- use PPE and decontaminate resources as required
- monitor, review and report on application of movement and security procedures within area of own responsibility
- undertake remedial action within own scope of authority
- provide reports on variations to appropriate authorities in consistency, currency and ongoing effectiveness or failure to achieve objectives
- communicate recommendations on adjusting movement and security procedures to supervisor and appropriate authorities.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- movement and security procedures commonly associated with movement and security controls during a disease or plant pest incursion
- AUSVETPLAN or PLANTPLAN, and other relevant standards and protocols to determine:

- permits and documentation associated with implementing movement and security procedures
- action required for any vehicle without a valid permit
- biosecurity principles associated with movement and security procedures, use of PPE gear, and need for decontamination
- safe work practices
- objectives and work instructions associated with movement and security procedures
- own work role, responsibilities and scope of authority in implementing movement and security procedures
- decontamination procedures for PPE and resources
- reporting templates
- communication principles used in operating a traffic control point, issuing permits and documentation, and reporting to supervisor and appropriate authorities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER305 Carry out emergency disease or pest control procedures on infected premises

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to carry out emergency disease or plant pest control activities at a site affected by an emergency disease outbreak or plant pest incursion.

The unit applies to individuals who undertake a role within an emergency incursion response. They work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCBER305 Carry out emergency disease or pest control procedures on infected premises

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least two occasions, carried out procedures for disease or pest control at an infected premises (IP) and has:

- prepared for control activities
- followed IP site supervisor instructions
- identified animal welfare concerns
- selected, prepared and used personal protective equipment (PPE)
- applied biosecurity principles and workplace health and safety practices when implementing, monitoring and reporting on control activities
- implemented control activities
- monitored, reviewed and reported on control activities for compliance and effectiveness
- undertaken remedial action according to authority
- reported variations to activities, failure to meet objectives and recommended adjustments to work instructions to IP site supervisor
- maintained log of emergency response activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control activities and procedures for emergency disease and pest control at IP
- objectives and work instructions commonly associated with IP operations
- responsibilities of roles within an IP control response
- ethical standards and animal welfare guidelines relevant to control procedures
- PPE and its requirement when working in IP operations
- principles of maintaining biosecurity at a workplace
- safe work practices applicable to work role

- reporting templates and requirements for logging control activities
- communication principles used in giving, receiving and clarifying instructions, and reporting on control activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on an IP site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - specific tools and equipment for specific pest or disease control on IP
 - PPE
- specifications:
 - workplace policies, procedures and processes for pest or disease control
 - workplace instructions for emergency response on IP
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBER306 Carry out movement and security procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to implement procedures to restrict the movement of vehicles, personnel, resources, animals and plant material when engaged in a response to a biosecurity incursion.

The unit applies to individuals who have been appointed or engaged to undertake a role within an emergency disease or pest incursion response. They work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCBER306 Carry out movement and security procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has participated in at least two emergency response activities; one must be for a plant scenario and one must be for an animal or insect scenario.

There must also be evidence that the individual has:

- determined logistics and documentation required to carry out movement and security operations
- selected, checked and used personal protective equipment (PPE) according to workplace procedures
- established and operated a traffic checkpoint and issued permits
- responded to breaches of movement security according to standards and protocols
- liaised with contracted security providers
- monitored, reviewed and reported on movement and security procedures
- communicated recommendations on adjusting movement and security procedures to supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- procedures commonly associated with movement and security controls during a biosecurity incursion, including:
 - key objectives
 - importance of work instructions
- standards and legislative requirements for movement and security on an emergency response site, including:
 - emergency response plans relevant to the industry

- nationally agreed standard operating procedures
- permits and documentation associated with implementing movement and security procedures
- action required for any vehicle without a valid permit
- biosecurity principles associated with movement and security procedures, including:
 - required PPE and its purpose and use
 - decontamination procedures
- safe work practices on work sites
- roles, responsibilities and scope of authority in implementing movement and security procedures
- reporting templates and reporting procedures to supervisor and authorities
- communication principles used in operating a traffic control point.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a biosecurity site with traffic control point or in an environment that represents workplace conditions
- resources, equipment and materials:
 - barriers and traffic control equipment
 - decontamination equipment
- specifications:
 - specific workplace policies, procedures and processes for traffic control point
 - traffic movement permits
 - workplace instructions
- relationships:
 - work team
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBER403 Plan and supervise control activities on infected premises

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to supervise others in a range of activities required on infected premises (IP).

The unit applies to individuals who have been appointed or engaged to undertake a role within an emergency disease or pest incursion response. They work autonomously, instruct, and monitor the work of others within a team. They use discretion and judgment in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan emergency disease or pest control	1.1 Plan emergency disease or pest control activities under direction of operations manager

Elements	Performance Criteria

Assessment Requirements for AHCBER403 Plan and supervise control activities on infected premises

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has engaged with the Operations Manager and planned and supervised control activities for at least two premises, and has:

- planned control activities for emergency disease or pest control response, including:
 - scheduled implementation of control activities
 - conducted a workplace health and safety risk assessment
 - identified infected premises (IP) procedures required, and confirmed with IP manager
 - requested resources required for planned activities
 - established reporting processes
 - established staff rosters
- communicated IP procedures to stakeholders
- supervised and monitored control activities, including:
 - checked standard of work and compliance with protocols required
 - monitored resources for control activities
 - monitored IP service provision for compliance with standards, protocols and contractual arrangements
 - maintained a log and records of control activities and performance
- monitored control activity costs, impact on property and effectiveness against planned objectives, which must include:
 - product, materials and resources requiring destruction
 - cost of plant, equipment and resources
- monitored and responded to health and safety of work team, including their mental health
- reported control activity outcomes to IP operations manager
- revised control activities following a review of performance
- communicated revisions to control activities to local control centre (LCC) according to IP operations procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- standards and legislative requirements that guide development and implementation of IP control plan, contractual arrangements and control procedures, including:
 - emergency response plans relevant to the industry
 - nationally agreed standard operating procedures
- organising and the planning process, including:
 - operational work requirements
 - scheduling and planning work teams
 - basics of contracting and contractor management
 - identifying and acquiring resources
- impact of control activities on the environment and restoration
- resources required for control activities, including:
 - equipment
 - chemicals and materials required for control
 - vehicle movement, entry/exit points and security controls
 - containment and exclusion boundaries and fences
 - personal health and safety equipment
 - adequate budget and approvals processes
 - work teams
 - communications equipment and processes
- communication techniques when dealing with those involved in emergency response, including:
 - principles used for consulting and providing information
 - reporting procedures
 - interacting with and supervising work teams
 - techniques for motivating work team
- recognising and interacting with various stakeholders involved in an emergency response, including general public, farmers, growers and producers, and conservation land and water managers
- workplace health and safety when working in emergencies, including:
 - conducting risk assessments
 - working with staff and stakeholders under stressful emergency situations
- supervisory skills and monitoring practices, including:
 - measuring and reviewing work performance against standards
 - responding to work team performance issues
- statutory and workplace reporting requirements and purpose.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on an IP or in an environment that represents workplace conditions
- resources, equipment and materials:
 - tools and equipment as designated by the IP operation plan
 - personal protective equipment
 - treatments and chemicals required for controlling disease or pest incursion
- specifications:
 - specific workplace documents, policies, procedures and processes for control activities on an IP
 - specific safety data sheets for treatments and chemicals
 - workplace instructions for IP control activities
 - specific legislation and codes of practice for biosecurity
- relationships:
 - stakeholders
 - work team
 - IP operations manager.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBER404 Conduct field surveillance for a biosecurity emergency response

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to conduct field surveillance for identifying potential biosecurity threats, to gather evidence to confirm a diagnosis and to implement a response to contain the emergency.

The unit applies to individuals who have been appointed or engaged in a supervisory role in a surveillance response team. Field surveillance teams work under instructions from the local control centre Operations Manager. The individuals take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCBER404 Conduct field surveillance for a biosecurity emergency response

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least two occasions, conducted field surveillance for a biosecurity emergency response and has:

- confirmed and coordinated surveillance activities
- conducted site visits, collected, prepared and dispatched suspect emergency disease or pest samples
- followed biosecurity standards and protocols throughout surveillance operations
- sought expert advice to assist in identification and diagnosis of emergency disease or pest
- alerted surveillance authority and contained emergency disease or pest in a timely manner as directed by Operations Manager and biosecurity standards and protocols
- collected information for management of outbreak and reported to Operations Manager
- directed and communicated with stakeholders of suspected emergency disease or pest
- ensured decontamination of personnel, equipment and vehicles according to biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- standards, guidelines and protocols for the emergency disease or pest
- signs and symptoms of diseases or pests subject to surveillance for different environments
- emergency disease or pest surveillance procedures, including:
 - collecting and handling samples and supporting evidence of diagnosis
 - reporting findings and information that may help in control response
 - containment of outbreak
 - personal and general decontamination
- communication principles for providing direction and warnings to stakeholders, including:

- property owners
- property or land managers
- transient operators such as bee keeping
- recognising and interacting with various stakeholders involved in a biosecurity emergency response, including, general public, farmers, growers and producers and conservation land and water managers
- roles, responsibilities and reporting procedures of stakeholders in an emergency response event
- sources of information for identifying and managing emergency diseases and pests, including:
 - seeking and accessing expertise for disease and pest identification
 - emergency response plans relevant to the industry
 - nationally agreed standard operating procedures
 - codes of practice relevant to different industry sectors
- decontamination procedures for the following:
 - personnel
 - tools and equipment
 - vehicles
- timeliness in an emergency response.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that represents a property or location with a biosecurity emergency
- resources, equipment and materials:
 - references and resources for identification of possible diseases or pests
 - tools and equipment required to contain the emergency disease or pest
 - personal protective equipment and decontamination facilities
- specifications:
 - surveillance authority documents and instructions
 - biosecurity legislation and codes of practice
- relationships:
 - stakeholders
 - surveillance authority and control centre
- timeframes:
 - according to time specified for emergency containment response.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBER501 Manage active operational emergency disease or plant pest sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage active operational emergency disease or plant pest sites.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse information and demonstrate deep knowledge in a specific technical area. They analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan control procedures across the declared area	1.1 Conduct planning and consultation with stakeholders and field personnel 1.2 Conduct planning in line with relevant standards, protocols and guidelines, and according to instructions from operations director 1.3 Identify, obtain, schedule, prioritise and deploy required resources 1.4 Identify work health and safety requirements and hazards associated with implementing control procedures and ensure appropriate action is taken to minimise risks to self and others 1.5 Identify criteria for implementing control procedures which satisfy relevant standards and protocols with minimal livestock or crop destruction and property damage 1.6 Prepare contingency plans for effective control of emergency disease or plant pest
2. Manage the implementation of control procedures	2.1 Coordinate control procedures to achieve effective emergency disease or plant pest control outcomes 2.2 Maintain ongoing consultation and communication links with all stakeholders, field staff, property owners or managers and others in control centre 2.3 Implement control procedures and services supplied under contract 2.4 Prepare and submit written and verbal reports as required
3. Monitor and review the effectiveness of control procedures	3.1 Monitor personnel to ensure that they are achieving specified objectives 3.2 Monitor supply of resources for appropriateness and availability 3.3 Monitor implementation of control procedures to ensure cost-effective compliance with relevant standards and protocols 3.4 Review priorities for emergency disease or plant pest control operations, and confirm or revise as appropriate
4. Implement review findings	4.1 Revise control activities as required 4.2 Advise relevant stakeholders and personnel of revisions to control activities promptly for implementation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO501A Manage active operational emergency disease or plant pest sites.

Assessment Requirements for AHCBER501 Manage active operational emergency disease or plant pest sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines, protocols and legislation in:
 - planning control procedures
 - resourcing the control plan
 - addressing work health and safety requirements
 - determining criteria for implementing control procedures
 - contracting services
 - monitoring implementation of control procedures for cost effectiveness
 - monitoring, reviewing control operations and revising priorities as part of managing active emergency disease or plant pest sites
- plan and resource control procedures, and contingency plans
- engage with stakeholders and field personnel in planning process
- engage with stakeholders, field staff, property owners/managers and others in control centre throughout the control period
- manage and monitor implementation of control procedures
- monitor personnel against specified objectives
- monitor supply of resources
- review priorities and revise as appropriate after consultation
- review control activities as required and communicate to stakeholders and personnel.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, and relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP)
- incident control management procedures
- the requirements of relevant commonwealth, state and territory legislation
- relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
- techniques for monitoring and reviewing control procedures, and resource expenditure
- advanced communication principles to consult and communicate with a range of stakeholders and the control centre
- project management principles.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBER503 Manage active operational emergency disease or pest sites

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and managed site specific operational emergencies for a disease or pests on at least two different sites.

There must also be evidence that the individual has:

- applied standards, guidelines, protocols and legislation in:
 - planning control procedures
 - resourcing the control plan
 - addressing workplace health and safety requirements
 - determining criteria for implementing control procedures
 - contracting services
 - monitoring implementation of control procedures for cost effectiveness
 - monitoring, reviewing control operations and revising priorities as part of managing active emergency disease or pest sites
- planned and resourced control procedures
- engaged with stakeholders and field personnel in planning process
- engaged with stakeholders, and control centre throughout the control period
- managed and monitored implementation of control procedures
- monitored work performance against specified objectives
- monitored resources including:
 - suitability
 - availability
 - cost against budget
- reviewed priorities and revised plan
- reviewed control activities and communicated to stakeholders.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- standards and legislative requirements that guide development for planning and implementing emergency response to disease or pests, including:
 - emergency response plans relevant to the industry
 - nationally agreed standard operating procedures
 - biosecurity codes of practice
 - commonwealth, state and territory legislation for biosecurity
- management procedures for incident control
- public sector policies, practices and constraints for emergency disease or pest management
- workplace health and safety policies procedures and processes including:
 - risk assessment
 - type and use of personal protective equipment
 - working with personnel and stakeholders under stressful emergency situations
- techniques for monitoring and reviewing control procedures, and resource expenditure, including:
 - allocating costs against planned operations
 - assessing cost against budget
 - losses in production and
- advanced communication principles to consult and communicate with a range of stakeholders and the control centre
- project management principles.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on an active operational emergency site or an environment that represents workplace conditions
- specifications:
 - policies, procedures and processes for managing a biosecurity operation
 - instructions from incident controller
 - biosecurity legislation, codes of practice
 - emergency response cost sharing deeds
- relationships:
 - stakeholder
 - incident controller
- timeframes:

- operations are conducted according to timelines specified by incident control.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBER504 Manage the implementation of a biosecurity emergency control program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to manage and implement a biosecurity emergency control program.

The unit applies to individuals who have been appointed or engaged to undertake an operations management role within a biosecurity emergency incursion response and who take personal responsibility for their own work and the work of others and exercise autonomy in undertaking complex work. They analyse information and demonstrate deep knowledge in a specific technical area. They design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Initiate biosecurity emergency management protocols	1.1 Identify, source or develop control procedures required to manage a biosecurity emergency control program according to legislation, standards, protocols and site conditions

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Implement operational objectives and plans within personal area of responsibility 1.3 Contribute to plans and strategies developed by others 1.4 Source resources for incursion according to resource plan
2. Direct implementation of biosecurity emergency control procedures	2.1 Manage activities, work teams and resources of biosecurity emergency control procedures according to operational plan, specified guidelines and site conditions 2.2 Prepare and disseminate reports on progress of biosecurity emergency control according to standards and protocols 2.3 Implement and verify management system functionality
3. Monitor biosecurity emergency control procedures	3.1 Monitor biosecurity emergency status for site according to operational objectives and control plan 3.2 Monitor and review outcomes of biosecurity emergency control procedures 3.3 Monitor resources, availability and expenditure and assess adequacy for program 3.4 Monitor effectiveness and completeness of records of biosecurity emergency control information management system
4. Review biosecurity emergency control program	4.1 Review and revise biosecurity emergency control plans and procedures 4.2 Review, reallocate or acquire resource requirements according to program outcomes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, evaluate and critique information from biosecurity standards and procedures for managing an implementation program for biosecurity emergency response

Assessment Requirements for AHCBER504 Manage the implementation of a biosecurity emergency control program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed a biosecurity emergency control program on at least two occasions and has:

- identified, sources or developed control procedures and monitored their implementation according to standards, guidelines and protocols
- develop operational plan and contributed to the development other plans and strategies within personal area of responsibility
- sourced resources for control program
- directed implementation of the control plan and procedures
- reported progress according to information management system
- monitored and reviewed control procedures against guidelines, and operational control plan
- monitored effectiveness of information management system and revised procedures to ensure completeness of records
- monitored resource expenditure and availability against requirements of the or control plan and reviewed allocation of resources.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- standards and legislative requirements that guide the management of an emergency response to biosecurity, including:
 - emergency response plans relevant to the industry
 - nationally agreed standard operating procedures
 - industry biosecurity codes of practice

- commonwealth, state and territory legislation for regulations and practices for biosecurity
- management procedures for biosecurity incident control
- relevant policies, practices and constraints for biosecurity emergency management
- reporting procedures including, information management and record keeping systems and situation reports
- techniques for monitoring and reviewing operational or control plans, and resource expenditure and allocation
- communication principles and strategies to liaise with other agencies, and direct implementation of the operation or control plan
- project management tools and skills required for implementing biosecurity control programs.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site where a biosecurity emergency control program is to be implemented or an environment that represents workplace conditions
- resources, equipment and materials:
 - information management and record keeping systems
- specifications:
 - policies, procedures and processes for managing a biosecurity operation for biosecurity emergency control
 - biosecurity legislation, codes of practice and industry deeds.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBER602 Plan and oversee a biosecurity emergency incident

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to plan and control a biosecurity emergency incident according to the relevant standards and protocols provided in a national response plan.

The unit applies to individuals who have been appointed or engaged to take control of a biosecurity incident and response. They take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse, design and communicate solutions to a range of complex problems. They work in contexts that are subject to change, and adapt a range of fundamental principles accordingly.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan biosecurity emergency incident control	1.1 Identify strategies to support biosecurity emergency incident control 1.2 Confirm biosecurity emergency incident control programs comply with state, territory and commonwealth legislative and regulatory

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	frameworks and nationally approved response plans 1.3 Seek expert advice on biosecurity emergency incident and gauge its likely impact 1.4 Identify declared areas of biosecurity emergency incident according to expert advice and available evidence 1.5 Develop plans to effectively and efficiently control biosecurity emergency incident 1.6 Submit plans to authority for approval 1.7 Identify consequences of biosecurity emergency outbreak relating to stakeholders
2. Oversee biosecurity emergency incident plans	2.1 Implement and monitor emergency biosecurity incident plans 2.2 Monitor recording and dissemination of information to ensure compliance with standards and protocols 2.3 Send, receive and act on reports according to relevant standards and protocols 2.4 Brief stakeholders on outcomes of management of biosecurity emergency incident according to command and control procedures
3. Monitor the biosecurity emergency incident	3.1 Monitor biosecurity emergency incident strategies to ensure they achieve planned outcomes 3.2 Monitor resource requirements to ensure strategies are achieved
4. Review biosecurity emergency incident control programs	4.1 Review biosecurity emergency incident control strategies and plans 4.2 Communicate changes to emergency biosecurity incident control strategies to stakeholders 4.3 Amend biosecurity emergency incident control plans according to review, expert advice, biosecurity standards and protocols

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, evaluate and critique information from biosecurity standards, procedures and legislative and regulatory frameworks when checking the planning and performance of biosecurity emergency incident response
Writing	<ul style="list-style-type: none"> Demonstrate sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning in reporting and briefing documents to a diverse audience
Oral Communication	<ul style="list-style-type: none"> Communicate effectively with a range of different stakeholders in different situations

Assessment Requirements for AHCBER602 Plan and oversee a biosecurity emergency incident

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on more than one occasion for a specified infected property, taken an oversight role in the planning and implementation of biosecurity emergency incident measures.

There must also be evidence that the individual has:

- applied biosecurity standards, guidelines, protocols and legislation
- recorded and disseminated information on a management system
- identified stakeholder communications required for overseeing a biosecurity emergency incident or control program
- planned and submitted for approval a control program contingent on identified strategies following expert advice
- contributed to the development of at least one of the following:
 - response plan
 - incident action plan
 - resource plan
 - communications plan
- identified declared areas that are within the jurisdiction of the control program
- briefed stakeholders, organisations and agencies on outcomes and management of emergency disease or pest outbreak
- implemented and monitored control plans using information management and reporting systems according to standards and protocols
- reviewed control strategies and plans against the intended outcomes, and amended plans commensurate with review outcomes
- monitored resource requirements to ensure strategies are achieved
- communicated revisions of control strategies and/or plans to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- standards and legislative requirements that inform and govern management of an emergency response to biosecurity incidents, including:
 - emergency response plans relevant to the industry
 - nationally agreed standard operating procedures
 - biosecurity codes of practice
 - commonwealth, state and territory legislation for biosecurity
- incident management functions
- phases of an emergency response
- strategies for controlling and managing emergency diseases or pests
- the purpose and development of plans designed to support a control program, including:
 - response plan
 - incident action plan
 - resource plan
 - communications plan, including working with the media
- support agencies and sources of expert advice and direction
- control procedures relevant to the emergency disease or pest
- project management principles for coordinating and managing control programs
- consequences and impacts of an outbreak, and management controls
- information and records management systems
- processes for monitoring and reviewing control plans, and resource expenditure
- human and physical resources required to implement the control plan
- methods and techniques for communicating with stakeholders, including:
 - oral presentation
 - print-based and media
 - reports and reporting styles.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site where a biosecurity emergency incident control program is to be implemented or in an environment that represents workplace conditions
- resources, equipment and materials:
 - record-keeping and information management systems
- specifications:

- policies, procedures and processes for managing a biosecurity operation for emergency disease or pest control
- biosecurity legislation, codes of practice and industry deeds
- relationships:
 - stakeholders
 - subject matter experts.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BIO201 Inspect and clean machinery for plant, animal and soil material

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to inspect and clean machinery and vehicles of material that may contribute to the spread of weeds, pests or diseases.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to inspect and	1.1 Confirm the activity to be undertaken with supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
clean machinery	1.2 Identify health and safety hazards and risks and apply controls according to supervisor instructions and workplace procedures 1.3 Identify and select tools and equipment required according to supervisor instructions 1.4 Check serviceability of tools and materials required for the task
2. Inspect machinery and support vehicles	2.1 Ensure machinery is safe before inspection and ensure free moving parts are immobilised according to workplace and operating procedures 2.2 Inspect machinery and equipment for contamination according to workplace biosecurity procedures 2.3 Remove covers and guards safely 2.4 Identify contamination and cleaning requirements according to workplace biosecurity procedures
3. Clean machinery, equipment and support vehicles	3.1 Select correct equipment and location of site for cleaning 3.2 Clean the machinery and support vehicles according workplace biosecurity procedures 3.3 Replace guards and covers safely
4. Complete cleaning work	4.1 Dispose of waste materials according to workplace and environmental procedures 4.2 Record cleaning history on appropriate forms according to workplace procedures
5. Report inspection results	5.1 Document inspection results according to workplace procedures 5.2 Deliver inspection reports according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets and consolidates information from workplace procedures for application to the cleaning process

Skill	Description
Writing	<ul style="list-style-type: none"> Prepares records and documentation using clear and accurate terminology
Numeracy	<ul style="list-style-type: none"> Performs basic mathematical calculations to prepare and dilute products used for cleaning
Oral Communication	<ul style="list-style-type: none"> Uses clear language, concepts, tone and pace appropriate when reporting to supervisor
Navigate the world of work	<ul style="list-style-type: none"> Complies with explicit policies and procedures seeking clarification or assistance when required
Get the work done	<ul style="list-style-type: none"> Responds to highly obvious routine problems by using step by step instruction and procedures

Assessment Requirements for AHC BIO201 Inspect and clean machinery for plant, animal and soil material

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have inspected and cleaned machinery of contaminations, including:

- confirmed work activity with supervisor and identified hazards and risks and applied controls for work practices
- selected cleaning tools, equipment and materials for the cleaning activity
- identified and checked equipment, materials and suitable location for cleaning activity
- made the machinery safe for inspection and exposed contamination according to workplace procedures
- cleaned machinery of contamination according to workplace biosecurity procedures
- reinstated machinery to operational condition and disposed of waste materials according to workplace and environmental procedures
- maintained and presented records of inspection and cleaning according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- biosecurity protocols for contaminants relevant to industry and location
- types of equipment and contamination that can occur
- contaminants and how they are disseminated by machinery and equipment including, weeds, pests and diseases
- cleaning techniques appropriate to machinery, vehicles and types of contaminant including cleaning agents and safety data sheets
- operating features of machinery and equipment relevant to inspection and cleaning

- safe work practices associated with inspecting and cleaning machinery
- safe and environmental methods of disposing of cleaning waste
- records and reporting procedures for biosecurity.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - horticultural or agricultural machinery and equipment relevant to workplace context
 - cleaning tools and equipment
 - appropriate cleaning agents
- specifications:
 - workplace documents including policies, procedures and processes relevant to cleaning practices
 - manufacturers' operating instructions for equipment and machinery
 - cleaning agents' safety data sheets
 - specific legislation/codes of practice relevant to biosecurity and environmental waste.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BIO202 Follow site quarantine procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to follow the organisation's procedures that reduce the likelihood of pathogenic organisms entering a quarantine site.

It applies to any personnel entering and leaving the quarantine area.

This unit applies to individuals who work under general supervision and exercise limited autonomy. They undertake defined activities and work in a structured context.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work in quarantine site	1.1 Check with supervisor on quarantine procedures and biosecurity protocols relevant to the site 1.2 Check all vehicles are decontaminated before entering the quarantine site, and if required leaving the site 1.3 Report contact with potential contaminants either within the site, or externally 1.4 Shower and change into work clothes if required 1.5 Select and apply appropriate personal protective equipment including footwear before commencing work 1.6 Store street clothing securely away from livestock, feed or other products 1.7 Wash hands before and after livestock, feed, plant stock or other products are handled 1.8 Check disinfectant levels in footbaths and use rigorously before entering quarantine site and before exiting site 1.9 Follow site exit procedures for decontaminating self, work clothing and personal protective equipment
2. Work in quarantine site	2.1 Handle and store chemicals and medications in accordance with site procedures 2.2 Store different feed mixes, soils, growing media and other products separately and mark appropriately 2.3 Identify cases of disease or pest infestation and report to supervisor 2.4 Identify breaches of quarantine procedures and report to supervisor 2.5 Identify work health and safety hazards and report to supervisor 2.6 Dispose of all waste products appropriately 2.7 Dispose of all deceased livestock, unwanted biological material or damaged or infected plant stock as instructed by supervisor 2.8 Record information relating to work in quarantine site
3. Assist in maintaining site quarantine procedures	3.1 Inform all visitors of the quarantine procedures and provide them with appropriate clothing and footwear if required 3.2 Check that visitors are signed in, have stated their recent activities and exposures and have washed or showered if required 3.3 Check that visitors sign out and follow site exit procedures 3.4 Note and report any observed breaches of quarantine procedures by visitors to supervisor 3.5 Keep gates and doors locked where required 3.6 Maintain security fencing according to supervisor's instructions 3.7 Check deliveries to site to ensure that established procedures for

Element	Performance criteria
	vehicle decontamination, unloading and receipt and holding or storage of stock and supplies are followed
4. Respond to site quarantine breach or problem	4.1 Identify and report a site quarantine breach or problem and report the location to supervisor 4.2 Secure any site quarantine breaches or problems 4.3 Clean and disinfect any quarantine breach sites as required according to the specific nature of the breach 4.4 Isolate livestock, plant stock or other items suspected of being exposed to contaminants and monitor for evidence of contamination 4.5 Treat or dispose of all contaminated stock and materials 4.6 Record information about the breach or problem

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO202A Follow site quarantine procedures.

Assessment Requirements for AHC BIO202 Follow site quarantine procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- meet site security and entry/exit requirements for vehicles, apparel and personal hygiene and safety
- follow procedures and biosecurity protocols for handling and storing chemicals, medications, feed mixes, soils, growing media and other products
- report disease/pest infestation, breaches of quarantine procedures and work health and safety hazards to supervisor
- dispose of waste products, deceased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock and contaminated material as instructed
- record information related to work in quarantine area, including any breach or problem
- maintain security of quarantine site, any site identified as a quarantine breach and any site considered a problem area
- direct visitors in their obligations to follow quarantine procedures
- control site deliveries to ensure quarantine procedures are followed
- follow quarantine procedure and biosecurity protocols in responding to a site quarantine breach or problem
- clean and disinfect any quarantine breach sites
- isolate and monitor livestock, plant stock or other items suspected of being exposed to contaminants.

Knowledge Evidence

The participant must demonstrate knowledge of:

- site quarantine procedures and biosecurity protocols for:

- disposal of waste products, diseased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock or contaminated material
- directing visitors at the quarantine site
- reporting diseases and pest infestations problem, work health and safety hazards
- handling and storing chemicals, medications, feed mixes, soil, growing media
- controlling entry of deliveries to a quarantine site
- isolating livestock and monitoring livestock
- cleaning and disinfecting quarantine area
- maintaining security for the quarantine site
- recording information about own work and any quarantine breaches
- personal protective equipment appropriate to site quarantine procedures and biosecurity protocols
- work health and safety hazards
- methods for cleaning and disinfecting quarantine site or area of quarantine breach
- biosecurity protocols and how they apply to the work site, industry and in the context of a work role.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated that they have inspected and cleaned machinery, tools and equipment of contaminations, including:

- confirmed work activity with supervisor and identified hazards and risks and applied controls for work practices
- selected cleaning tools, equipment and materials for the cleaning activity
- identified and checked equipment, materials and suitable location for cleaning activity
- made the machinery, tools and equipment safe for inspection and exposed contamination according to workplace procedures
- cleaned machinery, tools and equipment of contamination according to workplace biosecurity procedures
- reinstated machinery, tools and equipment to operational condition and disposed of waste materials according to workplace and environmental procedures
- maintained and presented records of inspection and cleaning according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- biosecurity protocols for contaminants relevant to industry and location
- types of machinery, hand tools and equipment and the biosecurity risks that can occur
- contaminants and how they are disseminated by machinery, tools and equipment including, weeds, pests and diseases
- cleaning techniques appropriate to machinery, tools and equipment including vehicles
- cleaning agents for types of contaminant, including safety data sheets
- personal decontamination and procedures
- operating features of machinery, tools and equipment relevant to inspection and cleaning

- safe work practices associated with inspecting and cleaning machinery including personal protective equipment (PPE)
- safe and environmental methods of disposing of cleaning waste
- records and reporting procedures for biosecurity.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - horticultural or agricultural machinery, tools and equipment relevant to workplace context
 - cleaning tools and equipment
 - cleaning agents
 - PPE
- specifications:
 - workplace documents including policies, procedures and processes relevant to cleaning practices
 - manufacturers' operating instructions for equipment and machinery
 - cleaning agents' safety data sheets.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BIO204 Follow site biosecurity procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to follow the workplace biosecurity procedures for accessing and leaving a quarantine site to reduce and contain the transfer of diseases or pests.

The unit applies to individuals who work under general supervision and exercise limited autonomy. They undertake defined activities and work in a structured context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to enter biosecurity site	1.1 Confirm biosecurity procedures and protocols with supervisor 1.2 Ensure all vehicles are decontaminated before entering and leaving the biosecurity area according to biosecurity procedures 1.3 Identify and report contact with potential biosecurity risk 1.4 Perform personal decontamination before entering biosecurity area according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Store and isolate personal fomites from biosecurity area according to workplace and biosecurity procedures
2. Prepare to work in biosecurity site	2.1 Identify workplace health and safety hazards and report to supervisor 2.2 Select, check and apply personal protective equipment 2.3 Apply personal hygiene procedures while working in biosecurity or quarantine area environments according to workplace procedures 2.4 Check disinfectant levels and report irregularities to supervisor
3. Work in biosecurity site	3.1 Handle and store chemicals and medications according to workplace procedures 3.2 Store and label production materials and products to minimise risk according to biosecurity procedures 3.3 Identify and report abnormal conditions of produce/stock to supervisor 3.4 Identify and report breaches of biosecurity procedures to supervisor 3.5 Dispose of all waste according to workplace biosecurity procedures 3.6 Dispose of all contaminated produce according to supervisor instructions 3.7 Maintain records for quarantine activities according to workplace procedures 3.8 Perform personal decontamination before exiting biosecurity or quarantine area according to workplace procedures
4. Assist in maintaining site biosecurity procedures	4.1 Follow visitor quarantine procedures 4.2 Check visitor sign in, sign out and hygiene procedures are observed according to workplace procedures 4.3 Ensure quarantine facilities are secured according to workplace security procedures 4.4 Maintain security of boundaries and fencing according to supervisor's instructions 4.5 Check deliveries to site comply with delivery procedures and biosecurity protocols

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Respond to infringements of site biosecurity procedures	5.1 Report issues and infringements of site quarantine procedures to supervisor 5.2 Secure site where quarantine infringement occurs according to supervisor instructions 5.3 Apply sanitation procedures to affected areas according to workplace procedures and supervisor instructions 5.4 Isolate potentially contaminated produce, stock or materials and monitor for evidence of contamination 5.5 Treat or dispose of all contaminated produce, stock and materials according to workplace quarantine procedures 5.6 Maintain records of quarantine infringements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Update records using familiar text types and simple vocabulary, grammatical structures and conventions
Oral Communication	<ul style="list-style-type: none"> Communicate with visitors using everyday language to provide biosecurity information and directions in familiar spoken contexts

Assessment Requirements for AHC BIO204 Follow site biosecurity procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has followed biosecurity procedures for at least one biosecure site and has:

- met site security entry and exit requirements for vehicles, personal fomites and personal hygiene
- handled and stored production materials and products according to procedures and biosecurity protocols
- identified and reported abnormal conditions and infringements of biosecurity procedures and workplace health and safety hazards to supervisor
- disposed of waste and contaminated produce and products according to biosecurity and quarantine procedures
- maintained records for quarantine activities and infringements
- maintained security of biosecurity or quarantine site and reported infringements
- checked visitors for compliance with workplace biosecurity procedures
- controlled site deliveries according to biosecurity procedures
- applied sanitation procedures on contaminated quarantine sites
- isolated and monitored produce, stock or materials suspected of being contaminated according to supervisor instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- site quarantine procedures and biosecurity protocols for:
 - disposal of waste products, diseased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock or contaminated material
 - directing visitors at the quarantine site

- reporting diseases and pest infestations, workplace health and safety hazards
- handling and storing production materials and products, including chemicals, medications, feed mixes, soil, growing media
- controlling entry of deliveries to a quarantine site
- isolating livestock and monitoring livestock
- cleaning and disinfecting quarantine area
- maintaining security for the quarantine site
- recording information about own work and any quarantine breaches
- personal infection control and decontamination procedures while working in a biosecure site, including:
 - shower in and shower out environments
 - removal of street clothing and replacement with decontaminated work clothing
 - decontaminating hands and exposed skin during work
 - purpose and use of hair nets, coveralls, booties, gloves
 - footbaths and disinfectant levels
- fomites - inanimate objects that can cause infections:
 - clothing, boots and hats
 - cars and trucks
 - utensils and hand tools
 - furniture
 - work machinery
- security procedures for biosecurity:
 - fences and boundaries
 - entrance access locks
 - site visitors checking and communicating their responsibilities
- external deliveries and protocols, including:
 - vehicle decontamination
 - unloading of produce and stock
 - receipt and holding or storage of stock and supplies are followed
- personal protective equipment appropriate to site quarantine procedures and biosecurity protocols
- workplace health and safety hazards and controls
- methods for cleaning and disinfecting quarantine areas
- control area and restricted area
- biosecurity protocols and how they apply to the work site, industry and in the context of a work role.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site subject to quarantine and biosecurity conditions or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - products, stock and materials relevant to the industry sector
 - tools and equipment required to secure biosecurity site
 - personal protective safety equipment
 - sanitation materials and equipment specific to site
- specifications:
 - specific workplace procedures and processes for maintaining a biosecure environment
 - access to safety data sheets for treatments, chemicals and medications
 - workplace instructions
- relationships:
 - visitors
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BIO301 Identify and report signs of unusual disease or pest

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify and report signs of diseases and pests that are not commonly found during day-to-day work. The unit is typically performed by those who have daily contact with plants or animals and is carried out in conjunction with routine animal or plant husbandry tasks.

The unit applies to individuals who work in a range of production environments under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify signs of unusual disease or pest	1.1 Identify signs of disease or pest on target species 1.2 Compare signs with those common to the target species 1.3 Seek advice from supervisor or other professional when signs indicate an unusual disease or pest

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Report signs of unusual disease or a plant pest	2.1 Report signs of unusual disease or pest to supervisor in a timely manner 2.2 Implement biosecurity measures according to enterprise biosecurity plans and instructions from appropriate authority

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Use clear communication when describing the symptoms of unusual pest or disease for identification to supervisor or professional

Assessment Requirements for AHC BIO301 Identify and report signs of unusual disease or pest

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on two occasions the individual has:

- identified signs of unusual disease or pest
- sought advice from supervisors or professionals
- notified supervisor
- implemented biosecurity measures according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- signs of common endemic diseases or pests for the target species
- key exotic pests and disease threats for the target species
- abnormal signs indicating unusual disease or pest
- methods for assessing severity and extent of problem
- biosecurity measures associated with enterprise biosecurity plans, including local government, State and Federal biosecurity policies and legislation
- the process of reporting any unusual findings to appropriate authorities.

Assessment Conditions

Assessment of skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:

- plants or animals showing signs of disease or pest infestation
- specifications:
 - workplace procedures for managing a biosecurity threat
 - reference materials for comparing observations
- relationships:
 - supervisor and/or professional.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BIO302 Identify and report unusual disease or plant pest signs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.

The unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.

This unit applied to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify signs of unusual disease or a plant pest	1.1 Identify signs of disease or a plant pest 1.2 Compare signs of disease or a plant pest with own experience of common endemic disease or a plant pest in the species 1.3 Assess severity and extent of the problem in the species where signs indicate an unusual disease or a plant pest 1.4 Seek immediate advice from supervisors, professionals or appropriate authorities when signs indicate an unusual disease or a plant pest
2. Report signs of unusual disease or a plant pest	2.1 Report signs of unusual disease or a plant pest to appropriate authorities immediately 2.2 Implement biosecurity measures according to enterprise biosecurity plans and instructions from appropriate authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO302A Identify and report unusual disease or plant pest signs.

Assessment Requirements for AHC BIO302 Identify and report unusual disease or plant pest signs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify unusual disease or pest signs
- assess the severity and extent of problem in the disease or pest species
- seek advice from supervisors or professionals
- notify appropriate authorities
- implement appropriate biosecurity measures.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- signs of common endemic diseases or plant pests in the species
- signs indicating unusual disease or plant pests
- methods for assessing severity and extent of problem
- biosecurity measures associated with enterprise biosecurity plans
- the process of reporting any unusual findings to appropriate authorities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHC BIO303 Apply biosecurity measures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has applied biosecurity measures, including:

- located and interpreted site biosecurity plans and information to inform control measures
- identified biosecurity hazards and threats for the site and determined control measures
- determined responsibilities for applying control measures
- incorporated and applied biosecurity control measures into work routines according to the biosecurity plan
- maintained records for traceability of input and output data
- monitored control measures for effectiveness
- monitored workplace personnel for compliance with biosecurity control measures
- reported biosecurity issues and concerns according to procedures
- maintained currency in biosecurity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of biosecurity on different sites, including:
 - production agriculture
 - amenity and production horticulture
 - conservations and land management including the natural landscape
- sources of biosecurity information, including:
 - government and industry websites
 - technical and research papers
 - journals
 - training
 - on farm resources, standard operating procedures, mandatory documentation

- biosecurity plans and their function
- biosecurity threats, including:
 - vertebrate pests
 - plants
 - diseases
 - invertebrate pests
- risk assessment principles, standards and regulations for biosecurity
- control measures to minimise the threats entering or spreading into, or from, the site, including:
 - inputs
 - outputs
 - movement of people
 - movement of animals
 - vehicles and equipment
 - production practices
 - feral and wild animals, pests and weeds
- record keeping for traceability, both trace back and trace forward, of inputs and outputs
- processes for monitoring effectiveness of control measures
- process for reporting biosecurity concerns and issues.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site that has exposure to potential biosecurity threats or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and websites to access current biosecurity information
 - tools and equipment required to implement control measures
 - recording system relevant to biosecurity
- specifications:
 - workplace biosecurity plans, procedures, records,
 - workplace instructions, job specifications or work routines
 - regulations, legislation, codes of practice relevant to biosecurity
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has applied biosecurity measures, including:

- located and interpreted farm biosecurity plans and biosecurity information to inform control measures
- identified biosecurity threats for the property and determined control measures
- determined responsibilities for applying control measures
- incorporated and applied biosecurity control measures into work routines according to the biosecurity plan
- maintained records for traceability of farm inputs and farm outputs, and monitoring and surveillance data
- monitored control measures for effectiveness
- monitored workplace personnel for compliance with biosecurity control measures
- reported biosecurity issues and concerns according to procedures
- maintained currency in biosecurity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of biosecurity on farms
- sources of farm biosecurity information, including:
 - government and industry websites
 - technical and research papers
 - journals
 - training

- farm/enterprise biosecurity plans and their function
- farm biosecurity threats, including:
 - pests animals vertebrate
 - plants
 - diseases
 - invertebrate pests
- control measures to minimise the threats entering or spreading into, or from, the farm production and resources, including:
 - farm inputs
 - farm outputs
 - movement of people
 - movement of animals
 - vehicles and equipment
 - production practices
 - feral and wild animals, pests and weeds
- record keeping for traceability (both trace back and trace forward) of farm inputs and outputs
- record keeping for retention of monitoring and surveillance data
- processes for monitoring effectiveness of control measures
- process for reporting biosecurity concerns and issues.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a farm or rural property or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computers and websites to access current biosecurity information
 - tools and equipment required to implement control measures
 - recording system relevant to biosecurity
- specifications:
 - workplace documents including farm biosecurity plans, procedures, records,
 - workplace instructions, job specifications or work routines
 - regulations, legislation, codes of practice relevant to biosecurity
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BIO401 Plan and implement a biosecurity program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify potential biosecurity threats, conduct a risk assessment and develop, implement and review a biosecurity program.

The unit applies to individuals who apply specialist skills to provide solutions to technical and unpredictable problems. They work autonomously, instruct and monitor the work of others within a team. They use discretion and judgment in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Scope threats and hazards for a biosecurity program	1.1 Collate and interpret biosecurity advice, standards and protocols according to the biosecurity plan 1.2 Confirm known biosecurity threats to workplace operations 1.3 Identify current potential incursion points for property and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace operations 1.4 Incorporate the objectives of biosecurity plan for workplace operations
2. Conduct a biosecurity risk assessment	2.1 Investigate workplace activity and practices for potential biosecurity hazards and assess the risks 2.2 Identify and assess control measures to mitigate risk for resources entering and leaving the workplace 2.3 Identify and assess procedures to manage human activity and movement 2.4 Identify and assess control measures for vehicles and equipment to reduce biosecurity threats
3. Document biosecurity program	3.1 Collate controls for identified biosecurity hazards and risks 3.2 Identify resources for implementing identified controls 3.3 Prioritise biosecurity activity within financial limits of management 3.4 Combine control measures into a biosecurity program according to workplace operations
4. Prepare for training and keeping records	4.1 Develop a communication program for informing work team and visitors of biosecurity procedures 4.2 Identify and document training requirements for work team and visitors for biosecurity controls 4.3 Develop record keeping procedures for monitoring program according to biosecurity plan
5. Implement and monitor biosecurity program	5.1 Induct and train work team and visitors according to biosecurity plan 5.2 Monitor work team and visitor adherence to biosecurity procedures 5.3 Monitor effectiveness of biosecurity program against the planned goals
6. Review biosecurity program	6.1 Review outcomes of biosecurity program implementation against planned goals 6.2 Identify and record inconsistencies between implementation and goals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	6.3 Compile recommendations to rectify inconsistencies for future programs 6.4 Record and report recommendations for biosecurity programs according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Plan to review biosecurity resources produced by industry to update personal skills and knowledge for revising and redesigning biosecurity plan and program
Reading	<ul style="list-style-type: none"> Interpret and critically analyse biosecurity advice, standards, and protocols for including content in plans and programs
Writing	<ul style="list-style-type: none"> Communicate complex relationships between biosecurity principles into plans and programs using a style of writing applicable to work team and visitors
Oral Communication	<ul style="list-style-type: none"> Communicate clearly and effectively with work team and visitors

Assessment Requirements for AHC BIO401 Plan and implement a biosecurity program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and implemented at least one biosecurity program and has:

- scoped biosecurity threats and possible incursion points and established goals for property
- used current biosecurity advice, standards and protocols
- identified biosecurity hazards, assessed the risks and identified controls for the specific work site, including:
 - inputs to the workplace
 - output from the workplace
 - movement of personnel and visitors
 - movement and hygiene of machinery and equipment
 - worksite practices
 - pest and disease control
- prepared a communications program to train work team and visitors
- identified and assessed documentation required for managing biosecurity
- developed a program for implementing biosecurity
- monitored work team and visitor compliance
- reviewed biosecurity program
- reviewed and updated training and induction records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- national industry standards and guidelines relevant to managing biosecurity
- principles of risk management for biosecurity, including:

- relevant standards and procedures
- identification
- assessment of risk and the significance and severity
- evaluation of risk
- establishing control options
- documentation and traceability procedures, including:
 - quality and disease free assurance status
 - compliance with national, state and territory standards and regulations
 - industry health assurance programs
 - movement of product and materials on and from properties
 - chemical use and storage in accordance with industry best practice
 - pest, disease and weed status of organic materials and compliance with Industry Purchasing Code of Practice or equivalent quality controls
- biosecurity threats to production and land management environments
- workplace inputs, including:
 - new plants or animals
 - quality of water resource
 - production material
 - use of organic and inorganic materials
- movement of workers and visitors, including:
 - training and communication
 - signage
 - visitor access, sign in and out
 - controlled access points and production areas
 - general hygiene
 - biosecurity entry and exist procedures such as shower in and shower out
- vehicles and equipment, including:
 - dedicated equipment use, harvest and storage
 - vehicle entry points, roads and tracks
 - vehicle movement and parking
 - vehicle and equipment hygiene and run off from wash areas
- worksite and production practices, including:
 - plant or animal by-products and waste
 - product and feed storage
 - water quality and access
 - animal or plant disease control and resistance to treatments
 - monitoring production, biosecurity surveillance and frequency
 - fencing and boundary security
- control of pests, including:
 - vertebrate pests

- pest and volunteer plants
- treatments and control measures
- influence of biosecurity on property and enterprise performance and values
- possible environmental incursion points to sites, including, wind, denudation and soil movement
- planning processes for costing, allocating resources and establishing timelines
- importance of records and record keeping for biosecurity procedures and processes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a work environment specified in the performance evidence or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - specific tools and equipment for training work team and inducting visitors
- specifications:
 - workplace policies, procedures and process information for the specific workplace environment
 - legislation, codes of practice for biosecurity
- relationships:
 - visitors
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC BIO403 Plan and implement a farm or enterprise biosecurity plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement a farm or enterprise biosecurity plan which includes a set of measures designed to protect a property from the entry and spread of pests and diseases.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify relevant information for developing a biosecurity plan	1.1 Interpret biosecurity guidance in industry standards and protocols relevant to enterprise 1.2 Identify known disease, pest and weed seed threats relevant to enterprise 1.3 Identify current access points on the property through which staff, visitors, machinery, equipment, vehicles, farm inputs and farm outputs pass
2. Develop control measures and procedures for controlling farm inputs	2.1 Research farm inputs relevant to the enterprise and identify practices to minimise risk of introducing and spreading disease, pests and weeds 2.2 Establish control measures and procedures as required for controlling farm inputs 2.3 Seek vendor declarations or animal health statements
3. Develop control measures to support biosecurity for farm outputs	3.1 Research farm outputs relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 3.2 Establish control measures as required to support biosecurity for farm outputs 3.3 Provide and retain supporting documentation
4. Develop control measures for movement of people	4.1 Research the movement of people relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 4.2 Establish control measures as required for movement of people 4.3 Arrange appropriate signage to support established control measures
5. Develop control measures for vehicles and equipment	5.1 Research the role of vehicles and equipment relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 5.2 Establish control measures as required for vehicles and equipment as required
6. Develop control measures for production practices	6.1 Research production practices relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 6.2 Establish control measures as required for production practices
7. Develop control measures for control of feral animals, plant pests and weeds	7.1 Identify feral animals, plant pests and weeds relevant to the enterprise and determine options for their control 7.2 Establish and document control measures as required for control of feral animals, plant pests and weeds
8. Develop control measures for training staff and keeping	8.1 Identify and document staff training required to implement control measures 8.2 Establish recording requirements in accordance with industry best

Element	Performance criteria
records	practice
9. Implement, monitor and review biosecurity plan	9.1 Conduct a property risk assessment and identify risk factors for pest and disease spread 9.2 Identify appropriate control measures 9.3 Document control measures in the form of a property biosecurity plan 9.4 Develop a biosecurity plan that is achievable and cost effective with short and long term goals 9.5 Induct and train staff in control measures relevant to their role and responsibility 9.6 Monitor staff performance in adhering to control measures 9.7 Monitor effectiveness of control measures and progress against the program timelines, and identify improvements that can be made 9.8 Monitor industry standards and protocols relevant to biosecurity and incorporate into the on farm biosecurity plan 9.9 Revise and amend risk assessment and control measures 9.10 Review staff training and induction records to ensure staff are able to implement biosecurity control measures appropriate to their position

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHC BIO403A Plan and implement a biosecurity program.

Assessment Requirements for AHC BIO403 Plan and implement a farm or enterprise biosecurity plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine biosecurity threats to farm or enterprise and control measures using standards and protocols
- identify sources of current biosecurity best practice
- identify current access points to property
- establish control measures and procedures for:
 - controlling farm inputs including:
 - new plants or animals
 - the quality of water sources
 - bee hives coming onto the property
 - bedding material
 - records of source, and use of organic and inorganic fertiliser
 - measures to support biosecurity for farm outputs including:
 - harvest bins
 - packaging operations
 - transport and movement of plants, produce, livestock and livestock products, and plant waste
 - intensive rearing of young animals
 - animal breeding facilities
 - animal milking facilities
 - maintaining records
 - movement of people including:
 - controlled access points and production areas

- visitors, their vehicles, and risk profile
- general hygiene
- vehicles and equipment including:
 - equipment hygiene
 - dedicated equipment use
 - storage areas
 - vehicle entry points
 - vehicle movement and parking
 - vehicle hygiene and washes
 - run off from wash areas
 - roads and tracks
- production practices including:
 - water management
 - plant byproducts and waste
 - animal manure and waste effluent
 - feed storage, feed spills and disposal of unwanted feed
 - feed and water troughs
 - product storage
 - resistance to chemicals
 - animal disease control
 - monitoring and surveillance
 - monitoring frequency
 - fencing
- control of feral animals, plant pests and weeds including:
 - wild and feral animals
 - boundary fences
 - property cleanliness
 - weeds
 - volunteer plants
 - straying animals
 - agisted or other visiting animals
 - property and land destruction
- training staff and keeping records including:
 - staff training
 - traceability (both trace back and trace forward)
 - animal health assurance
 - vendor declarations and animal health and product statements
 - monitoring and surveillance data
- seek vendor declarations or animal health statements for:

- quality and disease free assurance status of animals, animal feed and compliance with national, state and territory standards and regulations and industry health assurance programs
- disease and weed free status of organic fertilisers and compliance with Industry Purchasing Code of Practice or equivalent quality controls
- purchased animal bedding material being fit for purpose
- provide and retain supporting documentation for:
 - moving plants, or animals on and off the property
 - appropriate chemical usage and storage in accordance with industry best practice
- develop, document, and induct and train staff in control measures for:
 - controlling farm inputs
 - biosecurity for farm outputs
 - movement of people
 - vehicles and equipment
 - production practices
 - control of feral animals, plant pests and weeds
 - training staff
 - keeping records
- develop a plan for implementing biosecurity
- monitor staff performance
- monitor effectiveness of control measures, and identify improvements
- revise and amend control measures as needed
- review staff training and induction records.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- national industry standards and guidelines relevant to farm or enterprise biosecurity
- Nationally Agreed Standard Operating Procedures (NASOP) relevant to farm or enterprise biosecurity plan
- diseases, pests and weeds that pose a threat and potential causes of spread
- principles of risk management applied to biosecurity
- biosecurity practices for:
 - farm inputs
 - farm outputs
 - people, vehicles and equipment
 - production
 - feral animals, pests and weeds
 - training staff, biosecurity planning, and maintaining records
- planning processes for costing, allocating resources and establishing timelines
- processes for improving staff performance.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBUS406 Administer finance, insurance and legal requirements

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has administered the finance, insurance and legal requirements of a business covering a period of at least six months, including:

- interpreted financial reports and business data
- maintained accounts
- administered the legal requirements of the business
- processed and maintained the insurance requirements for the business
- identified sources, types and cost of finance
- prepared and processed the application for finance or investment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- obligations imposed by the choice of the business structure
- award and enterprise agreements
- insurance requirements, including:
 - workers' compensation
 - public liability
 - superannuation
 - life
 - personal accident and sickness
 - buildings
 - plant
- sources of finance, including:
 - banks
 - merchant banks

- building societies
- credit unions
- co-operatives
- finance companies
- solicitors
- accountants
- private treaty
- business and financial data, including:
 - balance sheets
 - profit and loss statements
 - production yields
 - sales
 - income
 - security
 - assets and liabilities
 - cash flow performance
- taxation and account keeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - financial, insurance and legal business records covering a period of at least six months
 - access to legislation and information relevant to insurance and finance
 - office equipment and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBUS407 Cost a project

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has costed at least one project for a business, including:

- identified resources for a project
- investigated options for material supplies, services, contractors and consultants
- researched prices for resources
- calculated costs for the project
- documented a summary of project costs.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- state/territory and commonwealth legislation and management policies relating to the project
- project costing technology and software
- current pricing structures and options for material supplies, services, contractors and consultants relevant to work role.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer based technology to research goods and services
 - communications technology to request quotes for services.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBUS408 Operate within a budget framework

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated effectively within a budget framework for a period of at least three months (a financial quarter), using a software application or spreadsheet, including:

- identified information to be included in a budget
- reviewed budgeted income and expenditure and compared to actuals
- recorded transactions and allocated them to cost and income categories
- identified and reported budget variations
- reviewed production and expenditure plans to meet financial targets.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- income and expenditure categories
- budgeting procedures and templates
- taxation and accounting requirements for business
- costing and forecasting mechanisms
- cash flow analyses and records
- financial recording and reporting systems
- records of receipts and expenditure
- factors that impact upon the timing of sales and purchases, including taxation, goods and services tax (GST), and market conditions.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to business financial records that cover a period of at least three months.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBUS409 Participate in an e-business supply chain

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has actively participated in an e-business supply chain for one business, including:

- effectively used e-business technology
- developed procedures and systems for an e-business process
- implemented an e-business process
- met timelines required by the e-business supply chain
- monitored and reviewed e-business systems.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- entire supply chain for a business, including from raw materials to producers, component suppliers, manufacturers, wholesalers, third-party service providers, retailers, customers and recyclers, plus freight, distribution and cash flow
- technology hardware and software requirements of the e-business supply chain
- protocols for electronic data access and interchange
- protocols for electronic funds transfer
- protocols for e-business legal and security issues.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- e-business technology suitable to business.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBUS512 Develop and implement family business structures and relationships

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop and implement business structures and relationships for a family based primary production business.

This unit applies to individuals who participate in the establishment of a family based primary production business and communicate the roles and responsibilities of family members within that business. They take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCBUS513 Market products and services

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has marketed at least one product or service, including:

- collected, analysed and presented data about the product or service, in the internal and external business environment
- identified the marketable features of the product or service and potential markets
- assessed alternative marketing strategies and techniques to meet business plan objectives
- evaluated performance targets and recommend modifications or improvements
- implemented and evaluated the marketing strategy
- planned promotional activities
- monitored pricing and distribution policies to improve market performance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- markets specific to the product or service, such as wholesalers; retailers; exporters; local, national and/or international customers
- sales networks and distribution systems, customer trends and preferences, relevant to product or service
- financial management and budgeting practices
- price risk management
- performance evaluation measures for relevant product or service
- competitors' strengths and weaknesses
- customer relations policies
- enterprise goals, objectives and directions
- sales and marketing principles and practices
- principles of trend analysis

- legal issues that affect marketing activities (trade practices, Fair Trading Acts, Sales of Goods Acts)
- demographic studies and their application in the development of a marketing plan.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - products or services to be marketed
 - access to relevant market information
- specifications:
 - legislation, regulations and guidelines for marketing and selling products and/or services.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared an estimate, quote or tender for at least one project, including:

- clarified details of requirement with client
- investigated options for supplies, services, contractors and consultants with current pricing structures and availability
- developed a work schedule with timelines and expenditure
- developed detailed costing sheets with the final quoted cost, including an estimated margin for risk
- submitted the completed document to the client with supporting information including details of organisation's previous work and client feedback
- sought feedback from the client to ensure information supplied is sufficient.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- state/territory and Commonwealth legislation, awards, enterprise agreements relevant to project
- enterprise policies relating to labour hire and employment terms
- current pricing structures and options for supplies, services, contractors and consultants
- enterprise and industry standards and practices for formatting, organising and presenting financial and quantitative information
- ethical considerations in relation to confidentiality and the tendering process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to information about, and costs of, supplies and services, relevant to project.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBUS516 Develop and review a business plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop and review a business plan.

This unit applies to individuals whose role is to set the short, medium or long term goals and targets for the business plan. Roles may relate to marketing and production targets, resource and asset development and management, supply chain management, acquisitions, capital, property improvements, and operational systems.

At this level, workers take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCBUS516 Develop and review a business plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed and reviewed a business plan for at least one enterprise, including:

- set strategic goals, targets and directions for the enterprise
- determined clear and measurable indicators of operational performance
- identified and designed risk management strategies
- developed appropriate operational plans
- documented the business plan
- monitored the business plan to identify strengths, weaknesses and areas for improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- profit and loss and cash flow systems
- forecasting trends in expenditure and production for an enterprise
- communication techniques typically used to negotiate business strategies and directions
- risk management strategies relevant to the enterprise
- marketing strategies relevant to the enterprise
- measures of operational performance
- financial and operational systems and resource considerations relevant to business planning
- logical and analytical methods to interpret and analyse financial reports
- industrial relations, taxation, corporate and industry legislation, environmental and work health and safety legislation as they relate to the enterprise
- capital investment analysis.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to business records for an enterprise.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
