5. Complete propagation operations	5.1 Clean work site using appropriate hygiene requirements 5.2 Collect waste and dispose of or recycle to minimise damage to the environment 5.3 Complete and maintain records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY306A Implement a propagation plan.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCNSY306 Implement a propagation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare the growing environment to suit species and propagation method
- recognise and rectify problems and anomalies with parent plants, propagation material, propagation media, equipment and materials
- select appropriate propagation material
- handle potting mixes and propagation materials in a safe manner
- apply propagation techniques as appropriate to plants being propagated
- Provide aftercare to suit media conditions, plant requirements and propagation techniques

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for implementing a propagation plan
 - aftercare requirements for a range of propagated plants
 - problems that may occur performing propagation activities and preventative action
 - enterprise hygiene standards required for propagation activities
 - preferred types of propagation media for different species
 - propagation techniques required for a range of plants
 - quality specifications for parent plants and propagation materials
 - testing methods applied to propagation media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY307 Operate fertigation equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate fertigation equipment to deliver fertilisers via an irrigation system.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials and equipment for operation	1.1 Interpret workplace instructions and organise tasks to achieve daily work routine within time constraints 1.2 Select and prepare appropriate tools, equipment and machinery 1.3 Identify work health and safety hazards, assess risks, implement

Element	Performance criteria
	control measures and report to the supervisor 1.4 Select, use and maintain appropriate personal protective equipment (PPE) 1.5 Calibrate and connect injection or fertigation equipment 1.6 Calculate fertiliser concentration and mix the solution thoroughly 1.7 Set equipment to meet fertigation requirements
2. Operate the fertigation process	2.1 Implement start-up sequence 2.2 Operate and monitor fertigation process to ensure delivery is maintained 2.3 Monitor fertigation equipment to ensure no adverse environmental impact is caused by faulty operation 2.4 Implement corrections to the process and equipment adjustments as necessary
3. Shut down fertigation equipment	3.1 Flush injection equipment prior to shut down 3.2 Clean and store equipment 3.3 Manage waste generated by both the fertigation process and cleaning procedures 3.4 Report and record fertigation activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY307A Operate fertigation equipment.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCNSY307 Operate fertigation equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and prepare fertigation materials
- connect and calibrate fertigation equipment
- monitor and adjust the delivery of fertilisers
- shut down, clean equipment and dispose of waste

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of fertigation operation
 - fertigation injection equipment
 - chemical handling procedures for fertiliser, chlorine, acid and cleaning agents
 - cleaning procedures for fertigation equipment
 - Material Data Sheets (MDSs)
 - environmental impacts of delivering fertilisers via the irrigation system

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY308 Maintain nursery plants

Modification History

Release	Comments
Release1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to monitor and maintain the nursery environment, determine water requirements and plant interventions that promote plant growth, and complete nursery plant maintenance work.

The unit applies to individuals who maintain nursery plants under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work	1.1 Determine work requirements from workplace instructions 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks 1.3 Select required materials, tools and equipment, and check for safe operation 1.4 Select, fit, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	applicable to the task 1.5 Follow biosecurity practices applicable to maintaining plants
2. Monitor and maintain the nursery environment	2.1 Monitor environmental conditions against the needs of the plants 2.2 Adjust environmental controls to meet the needs of nursery plants 2.3 Check and operate irrigation system components according to manufacturer's specifications and desired application
3. Determine and apply daily water requirements	3.1 Determine water requirements according to plant needs and environmental conditions 3.2 Apply water to meet the needs of the plant
4. Promote plant growth by intervention	4.1 Monitor plant health and stage of growth according to end use 4.2 Undertake plant interventions as required
5. Complete work	5.1 Remove and dispose of waste according to workplace procedures 5.2 Clean and return tools and equipment to required location 5.3 Identify and report unserviceable tools and equipment according to workplace procedures 5.4 Record maintenance activities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret textual information from a range of sources to identify relevant and key information about nursery plant maintenance
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare irrigation system component service records, and complete nursery plant maintenance activity records
Oral communication	<ul style="list-style-type: none"> Use clear language to report tool and equipment unserviceability

Skill	Description
Numeracy skills	<ul style="list-style-type: none"> Calculate daily water requirements

Assessment Requirements for AHCNSY308 Maintain nursery plants

Modification History

Release	Comments
Release1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has maintained nursery plants on at least three occasions, and has:

- prepared for nursery plant maintenance activities according to workplace instructions
- applied workplace health and safety requirements, including use of PPE equipment
- selected, cleaned, used and maintained nursery plant maintenance tools and equipment
- applied workplace hygiene practices
- monitored and adjusted environmental conditions
- implemented plant maintenance activities according to workplace instructions
- serviced irrigation system components
- applied and monitored water according to plant needs and environmental conditions
- monitored plant health, and applied interventions as required
- recognised stages of plant growth
- removed and disposed of waste material
- recorded nursery plant maintenance activities and irrigation system service activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for maintaining nursery plants
- principles and practices of nursery plant maintenance, including:
 - plant physiology as it applies to plant maintenance
 - symptoms of unhealthy nursery plants, likely causes and treatment options
 - effect of different pruning and intervention methods
 - effects of environmental conditions on plant growth

- best practice guidelines for nursery hygiene
- methods of calculating daily water needs
- optimum growing conditions for a range of plants in a nursery
- principles and operations of irrigation systems used in nurseries
- processes for modifying environmental conditions
- relationship between plant water needs and environmental conditions
- treatments required by plants at different growth stages
- irrigation system manufacturer specifications.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - nursery plants
 - nursery plant maintenance tools and equipment
 - irrigation system, tools and components
 - personal protective equipment applicable to nursery plant maintenance
- specifications:
 - workplace requirements applicable to health and safety in the workplace and nursery plant maintenance
 - work instructions, workplace procedures, quality specifications and best practice guidelines for nursery hygiene applicable to nursery plant maintenance
 - irrigation system manufacturer specifications
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNSY309 Receive and dispatch nursery products

Modification History

Release	Comments
Release1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to select and collect nursery products. Further requirements are maintaining stock and receiving products from suppliers.

The unit applies to individuals who receive and dispatch nursery products under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select product for an order	1.1 Select required materials and equipment for receiving and dispatching stock 1.2 Select, fit and use personal protective equipment applicable to the task 1.3 Select product from stock batches to match order forms or customer requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Confirm with supervisor or workplace procedures, the product quarantine requirements prior to dispatch 1.5 Block up stockholding areas as required
2. Maintain the stock inventory	2.1 Collate orders in the sales or dispatch area 2.2 Check orders for product quality and quantity 2.3 Record electronic or manual outgoing sales records in the product inventory 2.4 Check inventory quantity of nursery stock available for sale
3. Prepare and dispatch products	3.1 Check product for correct labelling 3.2 List and prepare products to meet customer requirements 3.3 Pack product safely for ease of handling and to minimise damage 3.4 Load product according to vehicle configuration 3.5 Maintain and tidy sales and dispatch areas
4. Receive products	4.1 Check incoming product for type, quality and quantity 4.2 Transfer product to stock holding areas using correct manual handling techniques, and applying relevant biosecurity and quarantine requirements 4.3 Transfer incoming documentation, receipts of delivery and invoices to administration

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language and accurate industry terminology to prepare nursery product sales records in the product inventory, and record incoming stock
Numeracy	<ul style="list-style-type: none"> Match stock batch quantities to order forms Confirm and record product quantities and sales records

Assessment Requirements for AHCNSY309 Receive and dispatch nursery products

Modification History

Release	Comments
Release1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has received and dispatched nursery products on at least three occasions, and has:

- applied workplace health and safety requirements, including use of PPE
- interpreted order forms
- met customer service requirements
- selected product for order requirements
- evaluated product quality
- monitored product dispatch, delivery and receipt processes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for receiving and dispatching nursery products
- principles and practices of receiving and dispatching nursery products, including:
 - workplace hygiene practices and procedures
 - common sources of cross-contamination from transport vehicles
 - environmental controls necessary for transporting plants
 - quality standards for the packing, packaging and labelling of products
 - quarantine policies and relevant biosecurity legislation
 - biosecurity practices
 - stock control procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - nursery plants and products
 - nursery plant and product receipt and dispatch materials and equipment
 - personal protective equipment applicable to nursery plant and product receipt and dispatch
- specifications:
 - workplace requirements applicable to health and safety in the workplace for receiving and dispatching nursery products
 - work instructions and workplace procedures for receiving and dispatching nursery products
- relationships:
 - customers
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNSY310 Install and maintain plant displays

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to assess plant display requirements, document plant display plan, and install and maintain plant displays.

The unit applies to individuals who install and maintain plant displays under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess client requirements and document plant display plan	1.1 Consult with client and determine requirements 1.2 Assess and record site factors impacting plant display requirements prior to installation 1.3 Assess and record environmental conditions prior to installation 1.4 Review project suitability and site conditions, constraints and maintenance requirements, and record findings

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Select plants to meet the requirements of the site 1.6 Identify and schedule materials, equipment and machinery applicable to the task 1.7 Determine the benefit of reviving or replacing plants 1.8 Document display plan according to workplace procedures
2. Install plant display	2.1 Identify potential hazards and risks, and implement safe working practices to manage risks 2.2 Select, fit, use and maintain safety equipment and personal protective equipment applicable to the task 2.3 Install plants according to display plan 2.4 Prune damaged or unnecessary material to enhance the presentation 2.5 Water and fertilise plants as required 2.6 Clean and maintain site according to workplace requirements
3. Maintain plants	3.1 Identify watering requirements to maintain plant health 3.2 Identify and rectify the symptoms of low and high light intensity 3.3 Identify the symptoms of low and high fertiliser concentration 3.4 Identify and control insects, pests and diseases associated with plants as required 3.5 Service plants to ensure optimum appearance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to document plant display plan
Numeracy	<ul style="list-style-type: none"> Measure and calculate area and dimension of plant display site

Assessment Requirements for AHCNSY310 Install and maintain plant displays

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed and maintained plant displays on at least three occasions, and has:

- consulted with clients to determine requirements
- assessed site conditions, requirements and constraints impacting plant display
- determined spatial measurements of a plant display
- selected plants that meet the requirements of the display and site
- identified and scheduled materials and equipment to install a plant display
- documented display plan, including:
 - plant selection
 - plant installation
 - plant rotation and maintenance requirements
- applied workplace health and safety requirements, including the use of appropriate PPE
- maintained plants to meet their water, light and fertiliser requirements
- detected and controlled pests and diseases.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of plant displays, considering:
 - timeframe
 - location
- ranges of plant displays, including:
 - exhibition
 - visual merchandising

- marketing
- commercial leasing and hiring activities
- the principles and practices of installing and maintaining plant displays, including:
 - acclimatisation techniques for plants
 - characteristics and attributes of a range of plants used for plant display
 - commonly occurring problems with plant display
 - light and moisture tolerance/intolerance for common plant species
 - options for remedial action
 - photosynthesis, respiration, nutrient uptake and growth rate for plants
 - plant growth requirements
- workplace requirements applicable to health and safety in the workplace for installing and maintaining plant displays.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - plants
 - plant display site
 - personal protective equipment applicable to installing and maintaining plant displays
- specifications:
 - workplace requirements applicable to health and safety in the workplace for installing and maintaining plant displays
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCNSY312 Prepare specialised plants

Modification History

Release	Comments
Release1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared specialised plants on at least three occasions, and has:

- implemented plant treatments and techniques
- applied workplace production and marketing plan requirements
- applied workplace health and safety requirements, including the use of appropriate personal protective equipment (PPE)
- organised and coordinated materials and equipment
- met quality standards for plant health and aesthetic appearance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles and practices of specialised plant preparation, including:
 - aftercare requirements of treated plants
 - characteristics of a range of potted plants commonly treated for special aesthetic purposes
 - different treatments and techniques that are applied to plants to achieve desired aesthetic appearance
 - optimum timing of treatments
- workplace production and marketing plan objectives
- workplace requirements applicable to health and safety in the workplace for preparing specialised plants.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - specialised plants
 - specialised plant preparation materials, tools and equipment
 - PPE applicable to preparing specialised plants
- specifications:
 - workplace requirements applicable to health and safety in the workplace for preparing specialised plants
 - workplace production and marketing plan
- relationships:
 - customers and supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNSY313 Implement a propagation plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to implement a propagation plan, including; preparing for, implementing and completing propagation of plants.

The unit applies to individuals who implement a propagation plan under broad direction, and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for propagation activities	1.1 Determine work requirements from workplace instructions 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks 1.3 Select required tools, equipment and machinery, and check for safe operation 1.4 Select, fit, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	applicable to the task 1.5 Prepare propagation environment to suit species and propagation method 1.6 Implement hygiene and biosecurity practices applicable to plant propagation activities
2. Select seed or vegetative propagation material	2.1 Identify parent plant or seed and select according to health, vigour or desired characteristics 2.2 Select or collect propagation material according to propagation method and species 2.3 Select appropriate conditioning and storage requirements to ensure maximum viability of propagating material 2.4 Undertake treatments as required
3. Prepare propagation components and media	3.1 Select components and prepare propagation media and appropriate container for planting 3.2 Test propagation media according to workplace quality specifications
4. Propagate plants	4.1 Prepare propagation material according to workplace instructions 4.2 Perform propagation techniques and treatments appropriate for plant species 4.3 Handle propagation material to minimise damage or deterioration 4.4 Label units or batches to enable tracking of propagated material 4.5 Place propagated material into suitable environment for propagation cycle 4.6 Provide aftercare to suit growing conditions, plant requirements and propagation techniques
5. Complete propagation operations	5.1 Clean work site using appropriate hygiene requirements 5.2 Remove and dispose of waste according to workplace procedures 5.3 Clean and return tools, equipment and machinery to required location 5.4 Identify and report unserviceable tools, equipment and machinery according to workplace procedures 5.5 Monitor and record propagation activities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret textual information from a range of sources to identify relevant and key information about plant propagation
Writing	<ul style="list-style-type: none"> Use clear language and accurate industry terminology to complete propagation activity records
Oral communication	<ul style="list-style-type: none"> Use clear language to report tool, equipment and machinery unserviceability
Numeracy skills	<ul style="list-style-type: none"> Calculate propagation media ratios, proportions and quantity

Assessment Requirements for AHCNSY313 Implement a propagation plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a propagation plan on at least one occasion, and has:

- prepared for propagation activities according to workplace instructions
- applied workplace health and safety requirements, including use of PPE
- implemented hygiene and biosecurity practices applicable to plant propagation activities
- selected, cleaned, used and maintained propagation tools, equipment and machinery
- prepared the growing environment to suit species and propagation method
- selected appropriate propagation material
- applied propagation techniques and treatments as appropriate to plants being propagated
- applied a minimum of 7 of the following propagation techniques as part of that plan:
 - deflasking plantlets
 - tissue culture
 - seed sowing
 - budding and grafting
 - soft tip cutting
 - semi-hardwood cutting
 - hardwood cutting
 - leaf cutting
 - division
 - layering
- labelled propagated units or batches, and recorded propagation activities
- provided aftercare to suit growing conditions, plant requirements and propagation techniques
- removed and disposed of waste material.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for implementing a propagation plan
- problems that may occur performing propagation activities, and preventative action
- enterprise hygiene and biosecurity standards required for propagation activities
- the principles and practices for implementing a propagation plan, including:
 - preferred types of propagation media for different species
 - propagation techniques and treatments required for a range of plants
 - problems and anomalies with parent plants, propagation material, propagation media, equipment and materials, and their rectification
 - quality specifications for parent plants and propagation materials
 - testing methods applied to propagation media
 - aftercare requirements for a range of propagated plants.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - parent plants, propagation media and propagation material applicable to propagation techniques being undertaken
 - propagation tools, equipment and machinery
 - personal protective equipment applicable to implementing a propagation plan
- specifications:
 - workplace requirements applicable to health and safety in the workplace for implementing a propagation plan
 - work instructions, workplace procedures and quality specifications applicable to implementing a propagation plan
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNSY314 Operate fertigation equipment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare, operate and shut down fertigation equipment, and report fertigation activities, to deliver fertilisers using an irrigation system.

The unit applies to individuals who operate fertigation equipment under broad direction, and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials and equipment for operation	1.1 Determine work requirements from workplace instructions 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks 1.3 Select required tools, equipment and machinery, and check for safe operation 1.4 Select, fit, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>applicable to the task</p> <p>1.5 Identify water quality issues related to fertigation activities</p> <p>1.6 Calibrate and connect injection or fertigation equipment</p> <p>1.7 Calculate fertiliser and chemical concentration, and mix according to compatibility requirements</p> <p>1.8 Prepare equipment to meet fertigation requirements</p>
2. Operate the fertigation process	<p>2.1 Start up fertigation process according to operators manual</p> <p>2.2 Operate and monitor fertigation process to confirm performance is maintained within specification</p> <p>2.3 Monitor water quality and test concentrations at irrigation emitter to ensure calculated concentration is achieved</p> <p>2.4 Identify, rectify and report out-of-specification equipment performance</p> <p>2.5 Apply emergency procedures in the event of a spillage or chemical accident</p>
3. Shut down fertigation equipment	<p>3.1 Carry out fertigation equipment shut-down according to operators' manual</p> <p>3.2 Clean fertigation equipment according to maintenance procedure</p>
4. Record information	<p>4.1 Record and report environmental hazards of fertigation process where applicable</p> <p>4.2 Record and report fertiliser application and storage details according to workplace recording procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret textual information from a range of sources to identify relevant and key information about fertigation equipment operations

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare fertigation activity records
Oral communication	<ul style="list-style-type: none"> Use clear language to report out-of-specification equipment performance
Numeracy	<ul style="list-style-type: none"> Calculate fertiliser dilution rates

Assessment Requirements for AHCNSY314 Operate fertigation equipment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated fertigation equipment on at least two occasions, and has:

- applied workplace health and safety requirements, including use of PPE
- selected, cleaned, used and maintained fertigation tools and equipment, and injection equipment, according to operators manuals, and scope of works
- selected and prepared fertigation and injection materials
- completed relevant calculations
- handled fertilisers and chemicals safely
- monitored and adjusted the delivery of fertilisers and chemicals
- monitored water quality and tested pH and Ec at irrigation emitter for correct application concentration
- reported and recorded corrective action
- taken corrective action in response to out-of-specification results or non-compliance
- implemented routine maintenance and minor repairs of the system
- removed and disposed of waste material
- recorded fertigation activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for operating fertigation equipment, including backflow prevention
- purpose and operation of fertigation equipment and instrumentation components
- basic injection equipment operating principles and process control systems where relevant
- the principles and practices of fertigation operation, including:

- chemical handling techniques for fertiliser, chlorine, acid and cleaning agents
- safety data sheets (SDS) information for fertiliser and chemicals to be injected
- fertiliser solubility and dilution rates
- fertiliser compatibility or incompatibility in mixtures, with crops, and fertigation equipment
- water quality monitoring and pH and Ec testing techniques and procedures
- advantages of delivering fertilisers using an irrigation system
- fertigation and injection equipment operators' manuals
- fertigation and injection equipment monitoring and control points
- common causes of application variation and corrective action required
- fertigation and injection equipment shutdown sequence, including emergency shutdown
- cleaning procedures for fertigation and injection equipment
- workplace fertiliser and chemical application and storage, and fertigation activity recording requirements and procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fertigation and injection equipment operators manuals
 - fertigation and injection tools, equipment and procedures
 - fertilisers, chemicals and cleaning agents
 - personal protective equipment applicable to operating fertigation and injection equipment
- specifications:
 - workplace requirements applicable to health and safety in the workplace and operating fertigation and injection equipment
 - work instructions and workplace procedures applicable to operating fertigation and injection equipment
 - SDS for substances being injected
 - recording procedures
 - environmental procedures for collection, treatment, disposal or recycling of waste
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNSY401 Plan a growing-on program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan a growing-on program and monitor the implementation of the program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify issues affecting the growing-on program	1.1 Determine production requirements in consultation with management 1.2 Identify factors that could limit the production of nursery plants

Element	Performance criteria
	1.3 Identify work health and safety hazards, assess risks and implement control measures 1.4 Consider the environmental implications of a growing-on program 1.5 Incorporate sustainable practices into the growing-on plan
2. Develop the growing-on plan	2.1 Identify activities involved in the growing-on program 2.2 Identify labour, materials, tools and equipment needs 2.3 Select environmental parameters and alter to meet plant needs and production plans 2.4 Determine growing media requirements, taking into account the needs of the plant and production plans 2.5 Determine planting dimensions and layout after consulting production plans 2.6 Identify treatments required for the growing-on program 2.7 Identify hygiene requirements for the growing-on program
3. Document the growing-on plan	3.1 Document the growing-on plan, including all information identified in the development stage 3.2 Document a budget supporting the plan and request approval by management 3.3 Organise a schedule of activities 3.4 Communicate the growing-on plan and schedule of activities to staff
4. Oversee and monitor the growing-on program	4.1 Monitor the health of the plants to ensure they are at optimum growth 4.2 Modify treatments as required to maintain optimum growth 4.3 Confirm plants are ready for dispatch meet customer specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY401A Plan a growing-on program.

Assessment Requirements for AHCNSY401 Plan a growing-on program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and assess factors that could impact the growing-on program
- Identify labour, materials and activities involved in the growing-on program
- conduct research about production requirements, growth conditions and marketing implications of a growing-on program
- negotiate, budget and document plans
- communicate plans and schedules to staff
- oversee and monitor the growing-on program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of planning a growing on program
 - application techniques for chemical and non-chemical intervention or treatments
 - chemical, cultural and biological pest, weed and disease control techniques
 - common problems of growing-on and preventative actions that may apply
 - enterprise hygiene standards required for growing-on activities
 - enterprise quality standards of nursery plant production
 - optimal growing requirements of nursery plants
 - preferred types of propagation media for different species
 - processes and techniques for preparing, costing and documenting plans for and scheduling growing-on activities
 - testing methods applied to propagation media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY404 Plan a propagation program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and, Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned a propagation program on at least one occasion, and has:

- researched information about propagation requirements and plant end use
- identified and assessed factors that could impact the propagation program
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- developed and documented a propagation plan and schedule that identifies plants, labour, materials, costs, propagation media requirements and environmental conditions
- identified hygiene requirements for propagation activities
- communicated plans and schedules to staff
- overseen and monitored the propagation program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to planning a propagation program
- principles and practices of propagation program planning, including:
 - workplace quality standards for parent plants and other propagation materials
 - common propagation activity problems and preventative actions
 - techniques to minimise deterioration during preparation of propagules
 - types of propagation environments required to meet plan requirements
 - propagation program hygiene practices
 - identification of techniques to meet propagation requirements
 - Plant Breeder's Rights (PBR) and common licensing arrangements

- preferred types of propagation media for different species and cultivars
- quality specifications of propagation media
- processes and techniques for preparing, costing and documenting plans and scheduling propagation activities
- application techniques for chemical and non-chemical intervention or treatments
- aftercare requirements applicable to propagated plant species and cultivars.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - production plans
 - industry publications, internet and in house sources of information relevant to the planning of a propagation program
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to planning a propagation program
 - PBR and common licensing arrangements
- relationships:
 - management and staff
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCORG501 Develop an organic management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop an organic management plan (OMP).

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to those producers who develop an OMP to convert an agricultural or horticultural farm to an organic, biological and ecological system. It requires the capability to set objectives to meet organic certification requirements of the National Standard for Organic and Biodynamic Produce.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Locate and access assistance in developing the OMP	1.1 Locate and access sources of support and advice including agricultural extension officers and training programs 1.2 Assess industry publications and internet sources for their value in informing decision making 1.3 Seek and consider contributions of work colleagues and others during planning process 1.4 Access information from certifier and relevant Organic Standards on OMP requirements
2. Design the organic farming system to be described in the OMP	2.1 Develop or obtain map of property to be covered by OMP 2.2 Determine time scale to be addressed in plan 2.3 Collect information on soil fertility and management, and weed, pest, disease and animal health status and their interrelationships to serve as benchmarks for development of management options 2.4 Obtain regional catchment targets for land, water and biodiversity and identify those applicable to property and sub-catchment 2.5 Identify components of OMP that need to be developed 2.6 Develop suitable format for planning documents 2.7 Identify risks to organic integrity for the farm enterprise and outline strategies to manage these risks
3. Develop soil fertility plan	3.1 Undertake or commission a soil fertility assessment of farm production areas 3.2 Map soil types and topography on farm plan 3.3 Develop and document soil fertility plan that amends soil chemistry, soil structure and soil biology, based on assessment of soil test results, enterprise performance, overall budget and intended cropping/grazing regime 3.4 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce and/or agro-ecological principles 3.5 Document plan according to established format
4. Develop soil management sub-plan	4.1 Determine suitability of land for production based on soil type, slope, aspect and previous use 4.2 Develop soil management plan to enhance soil structure and prevent compaction and water logging 4.3 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce or agro-ecological principles

Element	Performance criteria
	4.4 Document sub-plan according to established format 4.5 Identify farm management practices and strategies that enhance soil fertility
5. Develop weed management sub-plan	5.1 Identify problematic weed species and observe weeds as an indicator of soil health 5.2 Identify life cycles of weeds species to inform management options 5.3 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce or agro-ecological principles 5.4 Develop integrated farming strategies and cultural practices for managing weeds 5.5 Document sub-plan according to established format
6. Develop and design an integrated pest and disease management sub-plan	6.1 Collect and document evidence of pest and disease burden in farming system 6.2 Observe and monitor pests and diseases and their life cycles 6.3 Evaluate evidence of pest and disease burden to develop strategy for management 6.4 Evaluate pests and diseases as indicators of farming system health 6.5 Identify options for addressing pest and disease issues, including improving soil health, cultural practices and system redesign 6.6 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce or agro-ecological principles 6.7 Document sub-plan according to established format
7. Develop animal health and management sub-plan	7.1 Identify regional and farm-based animal health issues 7.2 Identify options for preventative actions aimed at establishing and maintaining optimal animal health 7.3 Identify options for treating animal health issues 7.4 Develop a sustainable grazing management plan that addresses feed requirements, stocking densities and meets regional catchment land and soil condition targets where applicable 7.5 Develop an animal management program that ensures compliance to organic standards and/or agro-ecological principles 7.6 Document sub-plan according to established format
8. Integrate and finalise the organic management plan	8.1 Integrate sub-plans for soil fertility and management, and weed, pest, disease and animal health 8.2 Develop and implement record-keeping system to track various components of OMP as they are put into practice and reviewed 8.3 Review and update OMP annually noting any changes to farm practices

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG501A Develop an organic management plan.

Assessment Requirements for AHCORG501 Develop an organic management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and develop required components of an OMP for a property
- understand and use interrelationships between soil, plant and animal health and farming system's resilience when developing plan
- identify options for prevention and treatment of risks
- apply appropriate regional catchment targets
- document the plan in compliance with certification requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of organic agriculture, especially fundamental role of soil health
- principles of sustainable production
- requirements and components of an OMP
- systems approach to agriculture and horticulture
- organic and biodynamic certification requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG502 Prepare the enterprise for organic certification

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare an enterprise for organic certification.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farmers who are preparing a production enterprise for compliance with the Federal Government Department of Agriculture, accredited certification bodies and the National Standard for Organic and Biodynamic Produce.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate and access information sources and support for conversion to organic production	1.1 Establish contact with other organic producers and marketers of organic products 1.2 Identify and use other sources of support and advice including agricultural extension officers and training programs 1.3 Assess literature, publications and internet sources of information to support decision-making for usefulness and reliability 1.4 Obtain certification process requirements from certification bodies and select appropriate certifier 1.5 Investigate roles and responsibilities of inspector, certifier and accreditation bodies, including role of government departments
2. Conduct a risk assessment of the site	2.1 Identify and document previous land use and chemicals applied on the site 2.2 Undertake and document risk assessment for potential on-farm contaminants 2.3 Assess potential contamination risk from off-farm land use and agricultural practices 2.4 Incorporate risk management procedures to minimise potential contamination from internal and external sources into a certification preparation plan
3. Develop and implement hazard analysis critical control point (HACCP) based procedures	3.1 Identify and document production processes and activities, and those sections of supply chain under one's control, according to certification bodies' requirements and the National Standard for Organic and Biodynamic Produce 3.2 Identify, document and compare quality, organic and statutory product standards to be met to actual standards achieved by product and enterprise 3.3 Identify and document corrective actions or improvements to processes and activities 3.4 Develop and implement procedures and processes for monitoring and annual review, including an internal review protocol where appropriate 3.5 Where required integrate a food safety management program
4. Manage customer feedback	4.1 Develop and implement procedures to obtain, analyse and respond to customer feedback on quality and integrity of organic product 4.2 Develop, communicate to relevant parties and monitor product recall procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG502A Prepare the enterprise for organic certification.

Assessment Requirements for AHCORG502 Prepare the enterprise for organic certification

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify requirements for organic certification and apply them to one's enterprise
- identify critical points in supply chain at which the organic integrity of one's product may be compromised
- implement and monitor effective risk management for those parts of supply chain under one's control
- identify practices and strategies to minimise the risk of contamination and non conformance with organic standards
- develop an operational plan for conversion to organic production

Knowledge Evidence

The candidate must demonstrate knowledge of:

- certification process
- chain of custody
- HACCP (Hazard Analysis and Critical Control Points) principles and risk management
- health and food safety requirements and issues
- labelling requirements for domestic and export markets
- market for organic produce, including the organic movement and organic industry
- National Standard for Organic and Biodynamic Produce
- principles of organic agriculture
- procedures and responsibilities in the case of product recall
- procedures for conducting and documenting a risk assessment
- regulatory requirements and their domestic and international contexts

- requirements of an OMP, including record keeping
- role of quality management systems in organic industry including documentation requirements
- working knowledge of the regulated organic industry, including the role of the government, certification bodies and inspectors

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG507 Develop an organic or biodynamic management plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to locate and access assistance, and design an organic management plan (OMP) or biodynamic management plan (BMP), develop soil fertility plan and soil, weed, integrated pest and disease, animal health and environmental sub-plan's and integrate and finalise the OMP or BMP.

The unit applies to individuals who apply specialised skills and knowledge to the development of an OMP or BMP and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and demonstrate deep knowledge in a specific technical area. They analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, animal welfare and legislative and regulatory requirements, organic standards, sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for AHCORG507 Develop an organic or biodynamic management plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed two biodynamic or organic management plans on at least two different occasions and has:

- identified and developed required components of an organic management plan (OMP) or biodynamic management plan (BMP) for a property
- identified and used interrelationships between soil, plant, animal health and environmental management and farming system's resilience when developing plan
- identified options for prevention and treatment of risks
- applied appropriate regional catchment targets
- documented the plan in compliance with certification standard requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of organic agriculture, especially fundamental role of soil health
- principles of sustainable production
- requirements and components of an OMP and BMP
- organic and biodynamic certification standard requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - industry publications relevant to OMP or BMP
 - OMP or BMP certifier information

- map of property
- farm production area soil fertility assessment
- specifications:
 - National Standard for Organic and Biodynamic Produce or agro-ecological principles
- relationships:
 - work colleagues
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCORG508 Prepare the enterprise for organic or biodynamic certification

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared an enterprise for organic or biodynamic certification on at least one occasion and has:

- identified requirements for organic certification and applied them to the workplace
- identified critical points in supply chain at which the organic or biodynamic integrity of the product may be compromised
- implemented and monitored effective risk management for those parts of supply chain under their control
- identified and documented practices and strategies to minimise the risk of contamination and non-conformance with organic or biodynamic standards
- developed an operational plan for conversion to organic or biodynamic production.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- certification process
- chain of custody
- Hazard Analysis and Critical Control Points (HACCP) principles and risk management
- health and food safety requirements and issues
- labelling requirements for domestic and export markets
- market for organic produce, including the organic movement and organic industry
- National Standard for Organic or Biodynamic Produce
- principles of organic or biodynamic agriculture
- procedures and responsibilities in the case of product recall
- procedures for conducting and documenting a risk assessment
- regulatory requirements and their domestic and international contexts
- role of quality management systems in organic industry including documentation and record keeping requirements

- working knowledge of the regulated organic industry, including the role of the government, certification bodies and inspectors.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - literature, publications and internet sources of information relevant to organic or biodynamic certification
 - certification process requirements
- specifications:
 - National Standard for Organic or Biodynamic Produce
- relationships:
 - work colleagues
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM201 Recognise plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise commonly encountered plants. Plants include desired species as well as weeds.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for plant recognition	1.1 Clarify work activity instructions with supervisor 1.2 Identify any work health and safety hazards and tell supervisor 1.3 Prepare resources and equipment for use in recognition activity 1.4 Identify, select and prepare available processes for plant

Element	Performance criteria
	recognition 1.5 Identify a range of desirable and non-desirable plants requiring recognition
2. Recognise specified plants	2.1 Carry out a visual inspection of plants 2.2 Recognise specified plants by their identifiable characteristics and name them 2.3 Record brief descriptions of plant habits, characteristics and significant features 2.4 Consult with others, browse the internet browsing, collect specimen collections, consult field guides and use workplace notetaking to assist with plant recognition 2.5 Seek advice when necessary and where appropriate to assist with plant recognition
3. Update the reference collection	3.1 Document information about plants and add to the reference collection 3.2 Update reference collection as new plants are recognised

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM201A Recognise plants.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPM201 Recognise plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare resources and processes for use in recognition activity
- identify desirable and non-desirable plants requiring recognition
- recognise and describe plant attributes
- describe specific handling requirements and growth requirements
- use appropriate methods of research to assist with plant recognition
- document and update information about identified plants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant recognition
 - plant morphology and physiology as they relate to recognising plants
 - plant nomenclature
 - procedures for obtaining and providing advice and information about plants
 - plant recognition techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM203 Fell small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to fell small trees where hazards have been assessed as low risk.

It is an introductory or base-level unit that covers felling procedures for small trees.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant state or territory.

Pre-requisite Unit

AHCMOM213 Operate and maintain chainsaws

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assist in preparation of work site	1.1 Determine location of worksite and correct tree from the scope of works 1.2 Identify site hazards, assess risks and report to supervisor 1.3 Confirm work zone with work crew and monitor site 1.4 Identify first aid and emergency personnel, equipment and procedures 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2. Identify tree felling requirements	2.1 Identify hazards associated with felling operation 2.2 Assess risks and report to supervisor 2.3 Examine topography and site conditions 2.4 Identify factors influencing the tree felling operation and confirm findings with supervisor 2.5 Identify <i>trees considered outside own skill level for felling</i> and seek assistance from appropriate personnel 2.6 Determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor 2.7 Receive instructions for tree felling operations from supervisor and clarify instructions prior to undertaking work
3. Prepare for tree felling	3.1 Select and prepare felling equipment and component options appropriate to the task being undertaken 3.2 Prepare, transport and appropriately position support tools to minimise felling delays 3.3 Select, check, use, maintain and store suitable safety and personal protective equipment (PPE) 3.4 Clear fall zone of obstacles and articles which may be damaged by felled tree 3.5 Establish clear escape route appropriate to site
4. Fell tree	4.1 Note and monitor location of other personnel 4.2 Carry out tree felling operation 4.3 Communicate with work team during operations using voice, hand and whistle signals 4.4 Determine standard tree felling techniques, patterns and cut sequences by ground conditions and state of canopy 4.5 Take corrective action in response to changing conditions or problems encountered 4.6 Use planned escape route when tree starts to fall 4.7 Monitor fall of tree and movement on ground until felled tree is stable 4.8 Use low risk work practices in all activities

Element	Performance criteria
5. Complete tree felling operation	5.1 Determine appropriate method of clearing the site of felled tree 5.2 Select and use machinery required for removal of felled tree 5.3 Clear fall site of tree and all tree debris 5.4 Clean and store all machinery and equipment on completion of operation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB202A Fell small trees.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPM203 Fell small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare, transport and appropriately position support tools to minimise felling delays
- assess topography and site conditions, identify factors influencing tree felling operation and confirm findings with supervisor
- receive instructions for tree felling operations from supervisor and clarify prior to undertaking work
- clear fall zone of obstacles and articles which may be damaged by felled tree
- confirm first aid and emergency personnel, equipment and procedures
- identify site hazards, assess risks and report to supervisor
- record and implement work health, safety, site, environmental and traffic control measures
- select, check, use, maintain and store suitable safety and personal protective equipment
- confirm work zone with work crew and monitor location of other personnel
- determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor
- determine standard tree felling techniques by ground conditions and state of canopy
- establish clear escape route appropriate to site
- safely operate a chainsaw to fell small trees
- monitor fall of tree and movement on ground until felled tree is stable
- take corrective action in response to changing conditions or problems encountered

Knowledge Evidence

The candidate must demonstrate knowledge of:

- corrective action
- emergency and first aid procedures
- felling equipment and components

- first aid and emergency personnel, equipment and procedures
- ground conditions
- how to determine natural direction of fall
- how to establish a clear escape route
- industry standard terminology
- low risk work practices
- obstacles and articles which may be damaged by felled trees
- positioning support tools
- safe operating procedures for felling small trees
- safe fall and exclusion zones
- selection, preparation and appropriate equipment for task
- standard tree felling techniques, patterns and cut sequences
- topography, site conditions and other factors influencing tree felling operations

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM204 Recognise plants

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to recognise commonly encountered plants, including desired species and weeds, and to document and confirm plant identification.

The unit applies to individuals who recognise plants under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for plant recognition	1.1 Confirm work activity and instructions with supervisor 1.2 Recognise workplace health and safety hazards, and report to supervisor 1.3 Select and prepare tools, equipment and material for plant recognition activity 1.4 Locate a range of desirable and non-desirable plants requiring

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	recognition
2. Recognise specified plants	2.1 Conduct a visual inspection on plants to identify plant family features and classifications 2.2 Record brief descriptions of plant habits, characteristics and significant features 2.3 Use available resources to assist with plant recognition 2.4 Seek advice to assist with plant recognition from appropriate personnel 2.5 Recognise and name specified plants using their identifiable characteristics
3. Identify plants	3.1 Record plant information according to workplace requirements 3.2 Confirm plant identification with supervisor, and refer to plant by botanical name

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual, photographic and drawn information from a range of sources to identify relevant and key information about plant recognition
Writing	<ul style="list-style-type: none"> Record plant habits, characteristics, significant features and relevant information
Oral communication	<ul style="list-style-type: none"> Initiate discussions with appropriate personnel and supervisor, using clear language to discuss plant recognition

Assessment Requirements for AHCP204 Recognise plants

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has recognised a range of plants from a range of plant families and classifications, including:

- annual
- biennial
- perennial
- evergreen and deciduous
- trees
- shrubs
- ground cover
- climbers
- monocot.

There must also be evidence that the individual has:

- applied workplace health and safety requirements applicable to recognising plants
- selected and prepared tools, equipment and materials for use in recognition activity
- located desirable and non-desirable plants requiring recognition
- recognised and described plant habits, characteristics and significant features
- used appropriate reference material to assist with plant recognition
- recorded information about identified plants.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for recognising plants
- principles and practices of plant recognition, including:
 - plant morphology and physiology as they relate to recognising plants

- plant nomenclature
- resources for obtaining information about plants
- plant recognition techniques.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - plants
 - plant recognition resources and equipment
 - access to internet and field guide reference materials applicable to plant recognition
- specifications:
 - workplace requirements applicable to health and safety in the workplace for recognising plants
- relationships:
 - appropriate personnel and supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM205 Fell small trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare for tree felling, fell small trees and complete felling operations where hazards have been assessed as low risk.

The unit applies to individuals who apply low risk work procedures and comply with worksite health and safety requirements when felling trees under general supervision, with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- AHCMOM213 Operate and maintain chainsaws.

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Assessment Requirements for AHCPM205 Fell small trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has felled small trees on at least three occasions, and has:

- applied workplace health and safety requirements applicable to felling small trees
- applied principles and practices of small tree felling operations
- applied documented low risk work methods and workplace procedures
- assessed topography and site conditions, identified factors influencing tree felling operation, and confirmed findings with supervisor
- prepared, transported and positioned support tools to minimise felling delays
- safely operated a chainsaw to fell small trees
- reported felling activities, and machinery, tool and equipment unserviceability according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for small tree felling operations
- principles and practices of small tree felling operations, including:
 - corrective action
 - emergency and first aid procedures
 - felling equipment and components
 - first aid and emergency personnel, equipment and procedures
 - ground conditions
 - how to determine natural direction of fall
 - how to establish a clear escape route
 - industry standard terminology

- obstacles and articles that may be damaged by felled trees
- positioning support tools
- safe operating procedures for felling small trees
- safe fall and exclusion zones
- selection, preparation and appropriate equipment for task
- standard tree felling techniques, patterns and cut sequences
- topography, site conditions and other factors influencing tree felling operations
- low risk work methods and workplace procedures for small tree felling operations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - personal protective equipment (PPE) must be worn whilst operating chainsaw
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
 - chainsaws
 - chainsaw tools
 - small trees
 - tree felling machinery, tools and equipment
 - safety equipment and PPE applicable to the task being undertaken
- specifications:
 - workplace requirements applicable to health and safety in the workplace and small tree felling operations
 - documented low risk work methods and workplace procedures applicable to small tree felling operations
- relationships:
 - team members, supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM301 Implement a plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and control the nutritional requirements of and applications to plants across a range of situations and environments.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for implementation of the plant nutrition program	1.1 Identify goals, target site, soils, plant species and varieties for implementing the program 1.2 Identify materials for soil and plant treatments and locate the storage site or supplier details

Element	Performance criteria
	1.3 Locate services using site plans and in consultation with the supervisor 1.4 Identify work health and safety hazard, assess risks and implement control measures 1.5 Select and use suitable personal protective equipment (PPE)
2. Monitor soil pH	2.1 Monitor soil pH in the implementation site in relation to plant nutrition 2.2 Identify, select, compare and source products useful in changing soil pH 2.3 Assess product application methods according to product type and type of growing media
3. Determine nutritional problems in plants	3.1 Identify common nutrient deficiency and toxicity problems in plants, using visual inspection 3.2 Consult supervisor or horticulturist, as required, to determine causes of nutritional or toxicity problems 3.3 Identify, compare, select and source soil ameliorants to improve soil fertility
4. Prepare to use fertilisers	4.1 Select a fertiliser that is compatible with plant species and type of growing media 4.2 Assess fertiliser application methods, taking into account the fertiliser type, soils and the environmental implications 4.3 Apply fertilisers appropriate to the plant growing cycle and the organisation's fertiliser calendar
5. Prepare application equipment	5.1 Select tools, equipment and machinery 5.2 Carry out pre-operational and safety checks on tools, equipment and machinery 5.3 Calibrate tools, equipment and machinery
6. Apply specific products at appropriate rates	6.1 Select specific products based on their analysis to meet plant needs 6.2 Calculate product application rates to optimise plant benefit and minimise environmental impact 6.3 Apply specific products at the correct rate, timing and method according to the product type and analysis and with consideration of the environmental implications 6.4 Record product applications 6.5 Monitor, document and report target plant response to the plant nutrition program, as well as non-target effects responses including environmental impacts or pests

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM301A Implement a plant nutrition program.

Assessment Requirements for AHPCMB01 Implement a plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify goals, target site, soils and plants for implementing the program
- identify materials and their supply source
- monitor soil pH in the implementation site
- identify appropriate products and application methods appropriate to implementing nutrition program
- estimate treatment and product requirements, material sizes and quantities
- conduct a site hazard identification and risk control assessment
- determine nutritional problems in plants
- plant nutrition program specifications
- apply specific products at appropriate rates and record their application
- select, check and calibrate tools, equipment and machinery

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant nutrition
 - botany and plant physiology
 - methods of nutrient uptake by plants
 - nutrient cycling and its practical relevance to the specific plants and soils
 - nutrients required by plants grown within the enterprise
 - soil ameliorants commonly required to treat the soil problems experienced by the enterprise
 - the effects of nutrient deficiency and toxicity on plant species and varieties

- the environmental implications of soil ameliorant and fertiliser use
- the main simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, application rates and costs
- the relationship between soil characteristics and the availability of nutrients

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM302 Provide information on plants and their culture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide information to clients and others about plants and their cultural requirements.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the issue	1.1 Initiate contact with the client when appropriate 1.2 Assist the client in explaining the issue by using attentive listening and questioning techniques 1.3 Clarify the nature of the issue by gathering all relevant information from the client

Element	Performance criteria
	1.4 Define the issue as closely as possible according to the amount of information gathered 1.5 Advise the client that expert advice may be required to assist them further with their issue
2. Decide on preferred solution	2.1 Identify and develop options and strategies using available in-house and online reference material, product information, own experiences and sharing collective workplace knowledge 2.2 Examine and evaluate options and strategies using sound problem-solving techniques 2.3 Determine the optimal solution based on reasoned argument, appropriate evidence and sound cultural principles
3. Provide the preferred solution	3.1 Explain the recommended solution, method of application and probable outcomes to the client 3.2 Refer to the original source of the plant and its cultural requirements where necessary 3.3 Respond to client requests for clarification or expansion by the use of attentive listening and questioning techniques

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMB02 Provide information on plants and their culture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop product knowledge through research and access to in-house and online information
- interpret information sheets, labels, horticultural literature, specifications and design symbols
- investigate requests for information, identify and evaluate options, decide on a solution, and deliver recommendation and information to the client
- select plants from a range of available stock lists
- communicate with clients, work team members, supervisors, suppliers, contractors and consultants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of plant culture
 - broad range of plant species and their cultural requirements
 - duty of care in provision of advice and recommendations to retail, commercial and private clients
 - local plant suppliers, consultants, services, products and contractors
 - pest and disease symptoms, basic physiology and life cycle of pests and diseases, vulnerable plant growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications
 - plant identification techniques, plant selection, plant physiology, habit and growth characteristics of the plants
 - soil characteristics particularly in relation to the local region

- weed species, growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM304 Report on health and condition of trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to report on general tree health and condition. It applies to the evaluation of trees for the purpose of work proposed in a local government area including parks and gardens, building and construction sites, public and private environments, and schools.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare tree inspection requirements	1.1 Determine scope of work 1.2 Identify and prepare tools and equipment for inspection 1.3 Document and implement traffic management requirements

Element	Performance criteria
	where required
2. Inspect the tree	2.1 Determine the type, location and condition of tree 2.2 Inspect tree for obvious signs of structural damage, defects, pests, diseases and fauna 2.3 Identify and record tree condition on the inspection form
3. Record findings and advise client	3.1 Record tree location and site details 3.2 Recommend follow up treatments or further inspection from a consulting arborist 3.3 Complete report on tree health and condition and advise client-stakeholder

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPMB04 Report on health and condition of trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare materials and implement traffic management requirements for tree inspection
- document and implement traffic management requirements where required
- recognise a range of tree species and cultivars common to the region
- identify and report on the general health and condition of trees
- identify obvious potential structural defects, damage, pests and and/or diseases
- recommend treatments for pest and disease problems
- recognise potential structural or other defects that require inspection by an arborist
- record findings and inform client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for inspecting trees
 - AS4373-2007 Pruning of amenity trees
 - botany and tree physiology
 - local government tree protection and preservation regulations
 - methods of determining tree dimensions
 - methods of low risk work
 - recognition of a wide range of trees common to the region
 - relevant Code of Practice
 - signs of structural defects, decay, damage and stress in trees

Assessment Conditions

Assessors must satisfy current standards for RTOs.

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for implementation of the plant nutrition program	1.1 Identify goals, target site, plant species and varieties for implementing the program 1.2 Locate services using site plans or consultation with supervisor 1.3 Identify potential hazards and risks, and identify safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Confirm environmental and biosecurity implications associated with plant nutrition program activities, and minimise impact 1.5 Select, fit use and maintain personal protective equipment applicable to the task
2. Identify and assess soil or growing media characteristics	2.1 Assess site soil or growing media characteristics, including pH, in relation to plant nutrition 2.2 Identify, compare, select and source ameliorants to improve soil or growing media characteristics or fertility 2.3 Assess product application methods according to product type and growing media
3. Determine nutritional problems in plants	3.1 Conduct a visual inspection and identify common nutrient deficiency and toxicity problems in plants 3.2 Determine causes of nutritional or toxicity problems, and confirm with supervisor or horticulturalist, as required
4. Prepare to use fertilisers	4.1 Select a fertiliser that is compatible with plant species and growing media according to nutrition program 4.2 Assess fertiliser application methods, taking into account the fertiliser type, soils and environmental implications according to nutrition program
5. Prepare application equipment	5.1 Select tools, equipment and machinery appropriate for the plant application being performed, and check for safe operation 5.2 Calibrate and adjust tools, equipment and machinery
6. Apply specific products at appropriate rates	6.1 Calculate product application rates to optimise plant benefit and minimise environmental impact according to nutrition program 6.2 Apply products with the correct rate, timing and method according to the product type, plant needs and with consideration of the environmental implications and according to nutrition program 6.3 Apply fertilisers appropriate to the plant growing cycle, workplace fertiliser schedule and nutrition program 6.4 Record product applications according to workplace procedures 6.5 Monitor, document and report target plant response to the plant nutrition program, as well as non-target effects or responses according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
7. Complete plant nutrition program activities	7.1 Remove and dispose of waste material according to workplace and environmental requirements 7.2 Clean, maintain and return tools, equipment and machinery to required location 7.3 Identify and report unserviceable tools, equipment and machinery according to workplace procedures 7.4 Record and report plant nutrition program activities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about the plant nutrition program
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to complete product application and plant nutrition program activity records
Oral communication	<ul style="list-style-type: none"> Initiate discussions with supervisor using clear language to confirm site services, and report target plant response, non-target effects or responses, and unserviceable tools, equipment and machinery Initiate discussions with supervisor or horticulturalist using clear language to confirm plant nutritional or toxicity problems
Numeracy	<ul style="list-style-type: none"> Calculate soil ameliorant, fertiliser and product ratios, quantity and application rates

Assessment Requirements for AHCPMB05 Implement a plant nutrition program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a plant nutrition program on at least one occasion, and has:

- applied workplace health and safety requirements, including a site hazard identification and risk control assessment
- minimised environmental and biosecurity impacts associated with the plant nutrition program
- identified appropriate products and application methods according to nutrition program
- determined nutritional problems in plants
- selected, calibrated and operated plant nutrition program tools, equipment and machinery, and checked for safe operation
- calculated treatment and product requirements, material sizes and quantities
- applied specific products at appropriate rates
- recorded product applications and plant nutrition program activities
- reported target plant response, non-target effects or responses, and unserviceable tools, equipment and machinery
- removed and disposed of waste material
- cleaned, maintained and stored tools, equipment and machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety requirements applicable to implementing a plant nutrition program
- industry and workplace environmental and biosecurity procedures applicable to implementing a plant nutrition program
- principles and practices of plant nutrition, including:

- methods of nutrient uptake by plants
- nutrient cycling and its practical relevance to the specific plants and growing media
- common nutrients requirements applicable to plants grown in the workplace
- ameliorants commonly used to treat soil or growing media problems
- the effects of nutrient deficiency and toxicity on plant species and varieties
- the environmental implications of ameliorant and fertiliser use
- the main simple and compound fertiliser products available to the workplace, including analysis, solubility, salt index, application rates and costs
- the relationship between soil characteristics and the availability of nutrients
- plant nutrition tools, equipment and machinery operating instructions and safe work procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - plant nutrition tools, equipment and machinery
 - soil ameliorants, fertiliser and plant nutrition products commonly used to treat soil problems
 - personal protective equipment applicable to plant nutrition
- specifications:
 - plant nutrition tools, equipment and machinery operating instructions and safe work procedures
 - industry and workplace environmental and biosecurity procedures applicable to implementing a plant nutrition program
 - workplace health and safety requirements applicable to implementing a plant nutrition program
- relationships:
 - supervisor and horticulturalist
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCPCM306 Provide information on plants and their culture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify client issues or requirements, identify the preferred solution, and provide information and solutions to clients.

The unit applies to individuals who provide information on plants and their culture under broad direction, and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify client issues or requirements	1.1 Initiate contact with the client in a timely and professional manner using interpersonal skills and communication techniques 1.2 Assist the client in explaining issues or requirements by using attentive listening and questioning techniques 1.3 Clarify the nature of the issue or requirements by gathering relevant information from the client

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Define the issue according to the amount of information gathered 1.5 Seek assistance from appropriate personnel, and follow up with client where required
2. Identify preferred solution	2.1 Identify and develop recommendations, options or strategies using available in-house and online reference material, product information, own experience and collective workplace knowledge 2.2 Examine and evaluate options and strategies using problem-solving techniques 2.3 Determine optimal solution based on reasoned argument and gathered evidence
3. Provide information or preferred solution	3.1 Explain cultural requirements for the plant or recommended solution, including method of application, where applicable, and probable outcomes to the client 3.2 Refer to original source of the plant and its cultural requirements, where necessary 3.3 Use attentive listening and questioning techniques to respond to client requests for clarification or more information

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about plant production information and culture requirements
Oral communication	<ul style="list-style-type: none"> Use clear language with clients to determine issue and explain plant cultural requirements or recommended solution Initiate discussions with personnel as appropriate, using clear language to communicate client issues or requirements and determine preferred solutions

Unit Mapping Information

Assessment Requirements for AHCPMB06 Provide information on plants and their culture

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided information on plants and their culture on at least two occasions, and has:

- communicated effectively with clients and appropriate personnel as required
- investigated requests for information, identified and evaluated options, decided on a solution, and delivered recommendation and information to the client
- developed product knowledge through research and access to in-house and online information
- interpreted information sheets, labels, horticultural literature, specifications and design symbols
- selected solutions from a range of available stock lists.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of plant culture, including:
 - duty of care in provision of advice and recommendations to retail, commercial and private clients
 - local plant suppliers, consultants, services, products and contractors
 - pest and disease symptoms, basic physiology and life cycle of pests and diseases, vulnerable plant growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications
 - plant identification techniques, plant selection, plant physiology, and habit and growth characteristics of the plants
 - soil characteristics, particularly in relation to the local region

- weed species, growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - in-house and online information
- specifications:
 - information sheets, labels, horticultural literature, specifications and design symbols
- relationships:
 - clients and appropriate personnel
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM307 Report on health and condition of trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare and inspect trees and record and report findings.

The unit applies to individuals who report on the health and condition of trees under broad direction, and take responsibility for their own work.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare tree inspection requirements	1.1 Determine scope of work for tree inspection 1.2 Select tools and equipment appropriate for inspection being performed, and check for safe operation 1.3 Document and implement traffic management requirements where

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	required
2. Inspect the tree	2.1 Identify the type and location of tree 2.2 Inspect tree for obvious signs of structural damage, defects, pests, diseases and fauna 2.3 Identify and record tree condition on the inspection form
3. Record findings and advise client	3.1 Record tree location and site details 3.2 Recommend follow-up treatments or further inspection from a consulting arborist 3.3 Complete tree health and condition report, and advise client or other stakeholder according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare tree health and condition reports

Assessment Requirements for AHPCMB07 Report on health and condition of trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has reported on the health and condition of trees on at least two occasions, and has:

- applied workplace health and safety requirements
- selected tools and equipment for tree inspection
- documented and implemented traffic management requirements where required
- recognised a range of tree species and cultivars common to the region
- identified obvious potential structural defects, damage, pests or diseases
- completed inspection form and tree health condition report
- recognised potential structural or other defects that require inspection by an arborist
- reported and informed client of tree health and condition, and recommended follow-up treatments or further inspection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety requirements applicable to inspecting and reporting on health and condition of trees
- principles and practices for inspecting trees, including:
 - Australian standard for pruning of amenity trees
 - botany and tree physiology applicable to determining the health and condition of trees
 - local government tree protection and preservation regulations
 - methods of determining tree dimensions
 - methods of low risk work applicable to inspecting trees
 - recognition of a wide range of trees common to the region
 - relevant codes of practice

- signs of structural defects, decay, damage and stress in trees
- workplace recording and reporting requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tree inspection tools and equipment
 - inspection forms
- specifications:
 - workplace health and safety requirements applicable to inspecting and reporting on health and condition of trees
 - Australian standard for pruning of amenity trees
 - local government tree protection and preservation regulations
 - relevant codes of practice
 - workplace recording and reporting requirements
- relationships:
 - client or other stakeholder
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM401 Recommend plants and cultural practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recommend plants and cultural practices. It applies to both sales staff in plant nurseries and garden centres and others in the amenity horticulture industries.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify client preferences and	1.1 Initiate contact with the client when appropriate 1.2 Clarify the purpose of the planting and cultural and environmental

Element	Performance criteria
requirements	factors of the intended planting site by gathering all relevant information from the client 1.3 Use botanical and common names to describe plants
2. Select plants to suit specific situations	2.1 Identify plants and their growth and performance characteristics that suit the specific situation using research and experiential awareness 2.2 Compare, assess and evaluate available plants using sound problem-solving techniques 2.3 Determine the best choice based on reasoned argument, appropriate evidence, sound principles and customer needs
3. Advise on plants for specific situation	3.1 Explain performance characteristics and particular planting, cultural and maintenance requirements to the client 3.2 Refer to the original supplier of the plant where necessary 3.3 Respond to client requests for clarification or expansion by the use of attentive listening and questioning techniques 3.4 Record and report recommendations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM401A Recommend plants and cultural practices.

Assessment Requirements for AHPCPM401 Recommend plants and cultural practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct literature and industry research, collate and analyse findings on plant species and cultivars, their characteristics and requirements
- comply with legislative requirements
- explain to the client work health and safety requirements or basic safety precautions relevant to the establishment and on-going maintenance of plants
- document client preferences and site particulars
- select plants that suit client preferences and suitability for the site
- report recommendations to the client that detail the types of plants chosen and their requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recommending plants and their cultural practices
 - customer service and communication skills
 - features of plant species and cultivars
 - innovation and recent practices in plant selection, use and performance
 - plant nomenclature (family, genus, species and cultivar) for the range of plants recommended by the enterprise
 - practical understanding of the physiology of the range of plants supplied and recommended by the enterprise and their comparative growth and performance characteristics in response to different cultural and environmental factors
 - principles and practices for the establishment and maintenance of plants

- soil characteristics, particularly in relation to the geographical and climatic region from which clients generally originate

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCPCM402 Develop a soil health and plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a soil health and plant nutrition program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1.Determine relevant regional data and site characteristics	1.1 Define goals and target site for assessment and development of program 1.2 Access and review relevant climate data, environmental context

Element	Performance criteria
	<p>information and site data</p> <p>1.3 Determine appropriate soil, plant and water tests, taking into account plant species, climatic conditions and prevailing growth media</p> <p>1.4 Develop a soil, plant and water testing program that defines sampling, field testing, off-site analysis activities, task responsibilities, involvement of contractors, scheduling and desired information outcomes</p> <p>1.5 Implement and monitor soil, plant and water testing tasks, supervise liaison procedures with outside testing agencies and take remedial action where necessary</p> <p>1.6 Compile data and readings and present in a form that can be easily understood</p> <p>1.7 Determine seasonal variations and requirements from published data on species, historical records and own experience</p> <p>1.8 Determine characteristics, condition and nutritional status of soils and plant species by analysing collected data and comparing to accepted standards</p>
2. Define the requirements for plant nutrition	<p>2.1 Identify different nutritional requirements of the plant during the growing cycle and growing conditions, using published data on species, historical records and own experience</p> <p>2.2 Develop program to achieve appropriate soil conditions and nutrient availability for plant growth</p> <p>2.3 Determine soil amendments, management practices and fertiliser requirements</p> <p>2.4 Identify and cost resources, tools, equipment and machinery required for program and confirm availability with suppliers, contractors and appropriate personnel</p> <p>2.5 Determine cost-effective approach to soil management, soil amendment and provision of plant nutrients</p> <p>2.6 Identify work health and safety hazards associated with program, assess risks and develop and document control measures</p> <p>2.7 Identify and document environmental implications of program</p>
3. Document the soil health and plant nutrition program and specifications	<p>3.1 Establish a detailed soil health and plant nutrition plan, objectives, specifications and associated costs based on program requirements</p> <p>3.2 Develop and document detailed on-site procedures and schedules required for program</p>
4. Monitor plant growth and evaluate the program	<p>4.1 Monitor program implementation and results by testing soil, plants and produce</p> <p>4.2 Review and refine program to ensure it is responsive to changing</p>

Element	Performance criteria
	conditions 4.3 Identify non-compliance with documented objectives and specifications and implement remedial actions to alleviate or overcome identified shortcomings in program 4.4 Take remedial action to improve plant nutrition and document 4.5 Incorporate agreed changes into a detailed plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM402A Develop a soil health and plant nutrition program.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHPCPM402 Develop a soil health and plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and analyse information on regional site factors
- assess the physical, chemical and biological characteristics of soils
- assess the physical, nutritional and health requirements of plants
- develop a soil, plant and water testing program
- develop a program to achieve appropriate soil conditions and nutrient availability for plant growth, incorporating a soil health and plant nutrition plan
- research and analyse findings on plant nutritional requirements, nutrients available from soils and other growth media, and environmental implications of program
- select suitable management practices, soil amendments, additives and fertilisers

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of soil health and plant nutrition
 - characteristics of soil and other growth media types, uses and additives to enhance available nutrition for specific plants
 - main simple and compound fertiliser products available to enterprise, including analysis, solubility, salt index, application rates and costs
 - methods of nutrient uptake by plants and favourable conditions for effective uptake to occur
 - nutrients and water required by plants grown within enterprise and effects of nutrient deficiency and toxicity on individual plant species and varieties
 - visual and other symptoms of nutrient deficiency and toxicity on individual plant species and varieties

- organic matter, pest and disease, and nutrient interactions in soil and nutrient cycling
- environmental issues associated with selecting nutritional materials, implementing a plant nutrition program, legislation compliance requirements and ensuring minimal impact on environment
- the following types of relationships between soil and growth media characteristics and availability of nutrients to plants: macro and micro elements
- the following types of site evaluation techniques: methods of sampling and analysing soils and other growth media
- soil amendments commonly required to treat soil problems experienced by enterprise

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM404 Recommend plants and cultural practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify client preferences and requirements, and select and advise on plants for specific situations.

The unit applies to individuals who apply specialist skills and knowledge to recommending plants and cultural practices. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify client preferences and requirements	1.1 Use interpersonal skills to engage client and identify needs 1.2 Confirm with the client the purpose of the planting, and cultural and environmental factors of the intended planting site

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Use botanical and common names to describe plants
2. Select plants to suit specific situations	<p>2.1 Research plants and their growth and performance characteristics that suit the specific situation, using authoritative sources</p> <p>2.2 Research local workplace and district requirements for planting site</p> <p>2.3 Use problem-solving techniques to compare, assess and evaluate available plants</p> <p>2.4 Determine the best choice based on reasoned argument, appropriate evidence, sound principles and client needs</p>
3. Advise on plants for specific situation	<p>3.1 Explain performance characteristics and particular planting, cultural and maintenance requirements to the client</p> <p>3.2 Address client concerns and questions and refer to the original supplier of the plant where necessary</p> <p>3.3 Record and report cultural practice recommendations</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about plants and related cultural practices
Oral communication	<ul style="list-style-type: none"> Use clear language with clients to gather information, address concerns and questions, and explain plant performance characteristics and particular planting, cultural and maintenance requirements

Assessment Requirements for AHPCPM404 Recommend plants and cultural practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has recommended plants and cultural practices on at least two occasions, and has:

- conducted literature and industry research, and collated and analysed findings on plant species and cultivars, their characteristics and requirements
- complied with local workplace and district requirements
- selected plants that suit client preferences and suitability for the site
- explained to the client work health and safety requirements or basic safety precautions relevant to the establishment and ongoing maintenance of plants
- documented client preferences and site particulars
- reported recommendations to the client that detailed the types of plants chosen and their requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for recommending plants and their cultural practices, including:
 - customer service and communication skills
 - features of plant species and cultivars
 - innovation and recent practices in plant selection, use and performance
 - plant nomenclature, including family, genus, species and cultivar, for the range of plants recommended by the workplace
 - practical understanding of the physiology of the range of plants supplied and recommended by the workplace, and their comparative growth and performance characteristics in response to different cultural and environmental factors
 - principles and practices for the establishment and maintenance of plants

- soil characteristics, particularly in relation to the geographical and climatic region of the intended planting site
- local workplace and district requirements relevant to the intended planting site.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - planting, cultural and maintenance requirements
- specifications:
 - local workplace and district requirements relevant to the intended planting site
- relationships:
 - clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM405 Implement an integrated pest management program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to assess infestations, and plan and implement an integrated pest management program.

The unit applies to individuals who apply specialist skills and knowledge to implementing an integrated pest management program. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess weed, pest and disease infestations	1.1 Determine operational parameters and objectives of the integrated pest management (IPM) program

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Identify symptoms of weed, pest and disease infestation in response to client needs</p> <p>1.3 Define weed, pest and disease relationships and vectors as key factors in plan</p> <p>1.4 Assess size and scope of infestation</p> <p>1.5 Assess business implications and urgency of action according to published data and workplace procedures</p> <p>1.6 Report to management conditions likely to impact on business viability</p>
2. Plan appropriate integrated treatments for weeds, pests and diseases	<p>2.1 Identify and confirm treatments selected include chemical or non-chemical products according to workplace procedures and IPM program</p> <p>2.2 Outline integrated application of treatments in planning documentation</p> <p>2.3 Identify and cost treatments that provide a suitable response to infestations, having regard to cost of damage, cost of infestation, marketing requirements, withholding periods and sustainable horticultural practices</p> <p>2.4 Determine if professional assistance is required and seek professional assistance where necessary</p> <p>2.5 Document IPM plan according to workplace procedures</p>
3. Implement weed, pest and disease control measures	<p>3.1 Confirm control procedures reflect sound implementation of integrated pest management strategy, marketing objectives and business imperatives</p> <p>3.2 Develop and implement monitoring procedures</p> <p>3.3 Communicate IPM plan and activities to staff, and supervise work according to the IPM plan</p> <p>3.4 Identify non-compliance with documented objectives, and implement remedial actions to alleviate or overcome identified shortcomings in plan</p> <p>3.5 Identify and record variances from IPM plan or monitoring procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about IPM program requirements and key factors in plan development
Oral communication	<ul style="list-style-type: none"> Initiate discussions with management, using clear language to report conditions likely to impact on business viability Use clear communications with staff to communicate IPM plan and activities
Numeracy	<ul style="list-style-type: none"> Calculate IPM plan treatment costs

Assessment Requirements for AHPCPM405 Implement an integrated pest management program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented an integrated pest management (IPM) program on at least one occasion, and has:

- identified symptoms of weed, pest and disease infestation
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- applied and implemented IPM program requirements
- developed an IPM plan and monitoring procedures
- communicated IPM plan to staff, and supervised work.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for integrated pest management, including:
 - application techniques for chemical and non-chemical treatments
 - concept and principles of IPM
 - cost and benefit analysis relevant to selection of weed, pest and disease control measures
 - crop and plant scouting and monitoring
 - ecological impacts of different control treatments
 - integration of weed, pest and disease control measures
 - lifecycles of hosts, predators and pests and diseases
 - sustainable horticultural practices
 - weeds and pests of specific horticultural workplaces
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to implementing an IPM program

- IPM program requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - published data, marketing requirements, withholding periods and sustainable horticultural practice information relevant to implementing an integrated pest management program
 - industry publications and internet sources of information relevant to implementing an integrated pest management program
- specifications:
 - IPM program requirements
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to implementing an IPM program
- relationships:
 - staff and management.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHPCPM406 Develop a soil health and plant nutrition program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed a soil health and plant nutrition program on at least one occasion, and has:

- applied relevant workplace health and safety, and environmental and biosecurity legislation, regulations and workplace procedures
- accessed and analysed information on regional site factors
- assessed the physical, chemical and biological characteristics of soils
- assessed the physical, nutritional and health requirements of plants
- developed a soil, plant and water testing program
- researched and analysed findings on plant nutritional requirements, nutrients available from soils and other growth media, and environmental implications of program
- developed a program to achieve appropriate soil conditions and nutrient availability for plant growth, incorporating a soil health and plant nutrition plan
- selected suitable management practices, soil amendments, additives and fertilisers
- negotiated, budgeted and documented soil health and plant nutrition plans
- communicated plans, site procedures and schedules to staff
- monitored soil health and plant nutrition program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of soil health and plant nutrition, including:
 - characteristics of soil and other growth media types, their uses and additives to enhance available nutrition for specific plants
 - main simple and compound fertiliser products available to workplace, including analysis, solubility, salt index, application rates and costs

- methods of nutrient uptake by plants, and favourable conditions for effective uptake to occur
- nutrients and water required by plants grown within workplace, and effects of nutrient deficiency and toxicity on individual plant species and varieties
- visual and other symptoms of nutrient deficiency and toxicity on individual plant species and varieties
- organic matter, pest and disease, and nutrient interactions in soil and nutrient cycling
- types of relationships between soil and growth media characteristics and availability of nutrients to plants, including macro and micro elements
- types of site evaluation techniques, and methods of sampling and analysing soils and other growth media
- soil amendments commonly required to treat soil problems experienced by the workplace
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to developing a soil health and plant nutrition program.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site and climate data, and environmental context information relevant to developing a soil health and plant nutrition program
 - industry publications and internet sources of information relevant to developing a soil health and plant nutrition program
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to developing a soil health and plant nutrition program
- relationships:
 - staff, suppliers, contractors, appropriate personnel and management
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM501 Diagnose plant health problems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to diagnose plant health problems.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor factors that influence plant health	1.1 Identify the plant species to the lowest taxonomic level and state its region of origin 1.2 Determine the seasonal growth stages of the plant

Element	Performance criteria
	1.3 Record the day-to-day cultural practices used on each horticultural species 1.4 Determine the characteristics of the growing environment that affect the growth of a specific plant species 1.5 Record climatic data and environmental growing conditions 1.6 Record the presence or numbers of beneficial organisms
2. Diagnose plant health problems	2.1 Identify environmental and cultural factors that predispose plants to attack by pests and diseases 2.2 Identify the symptoms and signs of plant health problems using accepted nomenclature 2.3 Assess the severity and extent of the problem in a plant species 2.4 Compare observations with published data, historical records and own experience 2.5 Determine the possible causes of the plant health problem 2.6 Consult with specialist services in severe, complex or rapid onset cases 2.7 Sample plant or soil specimens and dispatch for specialist diagnosis or laboratory testing where required 2.8 Record plant disorders and problems and document in a report
3. Remedy plant health problems	3.1 Formulate a weed, pest and disease control program, taking into account the Integrated Pest Management (IPM) strategy and production plan 3.2 Identify a range of modifications to growing conditions for a specific situation or plant species to rectify plant health problems 3.3 Identify resources, tools, equipment and machinery required for work activities, analyse the costs and benefits and confirm availability with suppliers, contractors and appropriate personnel 3.4 Identify work health and safety hazards associated with work activities, assess risks and implement controls
4. Evaluate treatment program	4.1 Monitor plants during treatment 4.2 Record appropriate data 4.3 Compare observations to expected results 4.4 Recommend modifications to the treatment program are to client or management 4.5 Present treatment program report to client or management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCPM501 Diagnose plant health problems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research information about plant health problems, their diagnosis and remedial treatments
- differentiate between pest, disease and nutrient-associated symptoms
- identify signs and symptoms of plant health problems
- assess the severity, extent and speed of onset of health problems in a specific situation
- determine possible causes of the problem
- liaise with specialist services, clients and management
- formulate a weed, pest and disease control program
- implement treatment programs to remedy the diagnosed health problems
- evaluate treatment program and recommend modifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant health
 - chemical use, toxicity and compatibility with target plants, growth media, and environmental characteristics of the horticultural region
 - chemical, cultural and biological control methods included in the integrated pest management (IPM) strategy of the enterprise
 - enterprise and industry record keeping and reporting policies and requirements
 - evaluation procedures, including cost/benefit analysis, for plant and growth media treatments in relation to plant health, enterprise budget and performance targets
 - plant anatomy, morphology, physiology, histology, pathology, taxonomy and nomenclature

- plant nutrition issues associated with the growth media used and horticultural region for specific plant species
- sustainable horticultural practices relevant to the enterprise or horticultural region
- taxonomic descriptions, horticultural function, cultural and growth requirements, and target growth and performance characteristics of specific horticultural plants for the achievement of enterprise production and business plans
- weeds, pests and disease detection methods, taxonomic identification, life cycle stages and characteristic symptoms for the specific horticultural plants of the enterprise

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCPM507 Diagnose plant health problems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has diagnosed plant health problems on at least two occasions, and has:

- researched information about plant health problems, their diagnosis and remedial treatments
- differentiated between pest, disease and nutrient associated symptoms
- identified signs and symptoms of plant health problems
- assessed the severity, extent and speed of onset of health problems in a specific situation
- determined possible causes of the problem
- liaised with specialist services, clients and management
- formulated and documented a weed, pest and disease control plan
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- implemented a control plan to remedy the diagnosed health problems
- evaluated a control plan and recommended modifications.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant health, including:
 - chemical use, toxicity and compatibility with target plants, growth media and environmental characteristics of the horticultural region
 - chemical, cultural and biological control methods
 - evaluation procedures, including cost and benefit analysis, for plant and growth media treatments in relation to plant health, workplace budget and performance targets

- plant anatomy, morphology, physiology, histology, pathology, taxonomy and nomenclature
- plant nutrition issues associated with the growth media used and the horticultural region for specific plant species
- sustainable horticultural practices relevant to the workplace or horticultural region
- taxonomic descriptions, horticultural function, cultural and growth requirements, and target growth and performance characteristics of specific horticultural plants for the achievement of workplace production and business plans
- weeds, pests and disease detection methods, taxonomic identification, lifecycle stages and characteristic symptoms for the specific horticultural plants of the workplace
- workplace and industry record-keeping and reporting procedures and requirements
- workplace integrated pest management (IPM) strategy and production plan requirements
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to diagnosing plant health problems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - published data and historical records relevant to diagnosing plant health problems
 - workplace IPM strategy and production plan requirements
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to diagnosing plant health problems
 - workplace and industry record-keeping and reporting procedures and requirements
- relationships:
 - specialist services, clients or management
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHPCPM508 Develop an integrated pest management program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed an integrated pest management (IPM) program on at least one occasion, and has:

- determined IPM strategy
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- determined business and crop economic threshold
- developed and documented an IPM program based on analysis of weed, pest or disease presence
- tracked costs of IPM program against budget requirements
- reported on IPM program activities and control procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to developing an IPM program
- principles and practices for developing integrated pest management programs, including:
 - application techniques for chemical and non-chemical treatments
 - concept and principles of IPM
 - cost and benefit analysis relevant to selection of weed, pest and disease control measures
 - crop and plant scouting and monitoring
 - ecological impacts of different control treatments
 - integration of weed, pest and disease control measures
 - lifecycles of hosts, predators and pests and diseases

- sustainable horticultural practices
- weeds and pests of specific horticultural workplaces.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - published data, crop and business economic thresholds, workplace marketing objectives, business imperatives and sustainable horticultural practice information relevant to developing an IPM program
 - industry publications and internet sources of information relevant to developing an IPM program
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to developing an IPM program.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM509 Apply knowledge of plant physiology to horticultural practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to research plant structures, investigate plant growth and responses to horticultural practices, and analyse plant reproduction for horticultural practices.

The unit applies to individuals who apply specialist skills and knowledge to apply knowledge of plant physiology to horticultural practices, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and design and communicate solutions to sometimes complex problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHPCPM509 Apply knowledge of plant physiology to horticultural practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has applied knowledge of plant physiology to horticultural practices on at least two occasions, and has:

- researched plant internal and external structures, including cell structures, primary tissues, and plant structural features
- investigated and described plant growth responses to horticultural practices
- applied knowledge of plant responses to physical and environmental conditions to manipulate plants for desired horticultural outcomes
- analysed plant reproduction, including asexual and sexual reproduction of plants and methods of seed and propagule dispersal
- researched and evaluated plant reproduction information for a range of plants.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- botanical and biological references and publications relevant to plant physiology, including:
 - the International Code of Botanical Nomenclature (ICBN)
 - the International Code of Nomenclature for Cultivated Plants (ICNCP)
- plant cell structures and components, including:
 - cell wall
 - cell membrane
 - nucleus
 - vacuole
 - cytoplasm
 - mitochondrion

- chloroplasts
- other organelles
- plant primary tissues, including:
 - xylem
 - phloem
 - cuticle
 - epidermis
 - cortex
 - vascular cambium
 - vascular rays
 - stomata
 - parenchyma
 - sieve tubes
 - meristem
- plant structural features, including:
 - roots
 - stems
 - leaves
 - flowers
 - fruit
- plant functions, including:
 - diffusion
 - osmosis
 - photosynthesis
 - respiration
 - transpiration
 - translocation
- physical and environmental conditions that may impact on plant function, including:
 - light quantity, quality and duration
 - availability of water
 - temperature range
 - frost
 - wind
 - air quality
 - soil conditions, including availability of a range of mineral nutrients, compaction and drainage
 - presence of competing plants, diseases and pests
 - influence of building, walls and paving
- horticultural practices that may impact on plant function, including:
 - the selection, growing, management and maintenance of plants

- the manipulation and management of growing environments
- plant protection
- propagating and disbudding
- pruning techniques, including crown reduction, thinning and root pruning
- creation of artificial microclimates and growing environments
- use of soil ameliorants and mulches
- fertilising and watering regimes
- location of plants in relation to light, moisture, air pollutants and competition with other plants
- the role of plant growth regulators in plant responses
- the manipulation of physical and environmental conditions for desired plant growth outcomes
- the asexual reproduction of plants through natural vegetative reproduction and the propagation of plants through horticultural practices, including stem, leaf and root:
 - cuttings
 - division
 - grafting
 - layering
- sexual reproduction of plants, including:
 - the development of gametes
 - pollination
 - fertilisation and embryo development
 - seed
 - fruit
- the range of dispersal characteristics of seeds and other propagule, including:
 - size
 - shape structure
 - wind, water or vector dispersal
- the application of plant reproduction processes for use in horticultural practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to a wide range of plants that grow in a range of horticultural settings
 - microscope
 - computer

- industry publications and internet sources of information relevant to applying knowledge of plant physiology to horticultural practices
- specifications:
 - botanical and biological references and publications relevant to plant physiology
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for plant collecting	1.1 Confirm purpose and objectives for collecting a range of plants

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Define area, location and habitat for collecting 1.3 Determine and prepare resources to assist in locating and identifying plants 1.4 Determine and prepare equipment required for collecting and preserving specimens 1.5 Obtain licences or permission to collect specimens from landowner or managing agency 1.6 Assess range of likely operating conditions, hazards and difficult or sensitive environments for impact on collecting and preserving specimens 1.7 Identify workplace health and safety hazards associated with plant collecting, assess risks and implement controls
2. Collect plant specimens	2.1 Observe collection ethics when selecting specimens for picking 2.2 Enter into a field note book relevant information about the specimen, its characteristics and occurrence, and note location coordinates 2.3 Confirm specimen collected provides adequate material for identification and preserving 2.4 Tag and store specimens for later identification 2.5 Follow appropriate work health and safety requirements and work practices
3. Preserve specimens	3.1 Preserve specimen while still fresh 3.2 Clean and prepare specimen for preserving 3.3 Preserve specimen using either pressing or drying techniques 3.4 Mount dried specimen and label with information from note book
4. Identify plant specimen	4.1 Use relevant plant key to identify plant 4.2 Identify and document basic characteristics of a plant 4.3 Confirm plant identity against botanical description of species 4.4 Document plant identity on label according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding the collection of plants and the botanical description and plant key of plant specimens
Numeracy	<ul style="list-style-type: none"> Record specimen collection date and location coordinates into field note book

Assessment Requirements for AHCPM510 Collect and classify plants

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has collected and classified a variety of plants on at least three occasions, and has:

- prepared for plant collection
- noted the location, characteristics and occurrence of specimens at the point of collection
- cleaned, preserved, mounted and labelled specimens
- used a plant key to identify plants against the botanical description of the species.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant classification,
 - herbarium collection techniques and ethics
 - physical and biological habitat types, including vegetation associations and communities, where appropriate
 - plant anatomy, physiology, morphology, taxonomy and nomenclature
- specimen license or permission granting processes
- environmental conditions and hazards that impact upon plant specimen collection and preservation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - plants
 - plant specimen collection and preservation equipment and materials
 - field note book
- specifications:
 - plant key
 - herbarium collection techniques and ethics
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a client brief	1.1 Discuss and clarify client needs and objectives 1.2 Identify purposes of the landscape and client expectations

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Establish plant selection criteria 1.4 Consult with client to finalise agreement of the brief
2. Determine the suitability of a plant for a purpose	2.1 Inspect the site and determine planting area 2.2 Select species and cultivars according to the size and aspect of the site 2.3 Consider and apply environmental conditions to the functional characteristics of the plant 2.4 Determine the suitability of the soil for the plants selected 2.5 Evaluate and document plant selection and rationale
3. Select plants	3.1 Select plants according to client brief and their suitability for the intended purpose 3.2 Determine plant function for the precise location within the plan 3.3 Make recommendations for soil improvements for the selected plant species 3.4 Match species and cultivars according to plant selection criteria for species-specific characteristics 3.5 Identify plant species appropriate for the site 3.6 Research relevant reference sources 3.7 Recommend plant species or cultivars for replacement or new plantings 3.8 Document plant selections, selection criteria and notes on quality expectations and specifications
4. Specify plants	4.1 Evaluate selection criteria for mature plants against capability and availability of transplanted plants 4.2 Assess final selections against the specified soil, site location and client brief, and confirm with client 4.3 Assess selected plants for quality and quantities outlined in the specifications 4.4 Check materials, soils and growing media for specified quality 4.5 Record quality checks on delivered plants and product
5. Correlate and present a report	5.1 Gather and correlate records for client report 5.2 Document and present client report to the client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHPCPM511 Specify plants for landscapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has specified plants for landscapes on at least one occasion, and has:

- developed a client brief on client needs, objectives and expectations, the purpose of the landscape and plant selection criteria
- conducted site inspections and site assessments
- compiled a database of plant specimens and characteristics
- evaluated and determined plant selections
- identified and selected from a range of plants appropriate to the site
- researched plant reference sources
- documented plant selection and specifications
- used comparative techniques
- assessed quality and quantity of plants and materials meet specifications
- selected and checked soils and growing media
- recorded plant and product quality checks
- documented and presented client report.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of specifying plants for landscapes, including:
 - basic physiology and life cycle of pests and diseases
 - botany, plant morphology, physiology, taxonomy and nomenclature
 - methods of data capture
 - plant identification techniques
 - soil characteristics, particularly in relation to the local region

- soil and growing media selection techniques
- symptoms of plant pests and diseases.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information on plant species, cultivars growing requirements, environmental conditions and functional characteristics
- relationships:
 - client
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPM512 Design specialised landscape

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed a specialised landscape on at least one occasion, and has:

- developed a design brief in consultation with client to establish design purpose and requirements
- identified plant species and cultivars using botanical nomenclature
- identified and selected plants appropriate to the design criteria
- used botanical nomenclature when selecting plants
- identified the implications of climate and environment on plant selection and design
- identified and designed with plants appropriate for use in controlled environments where required
- identified and recommended soils and plant nutrition requirements
- identified biological, organic and inorganic plant and plant pest management techniques to be used
- identified weeds and recommended appropriate weed management
- provided garden design solutions
- compiled the recommendations and documented and presented a design plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of specialised landscape design, including:
 - aesthetic, ornamental, productive and economic plant groups
 - allied horticultural, environmental and conservation industries and movements
 - botanical geography, including plant families, geographic distribution and links
 - botany, including plant structures and physiology

- ethno-botany, including sustainability and the stories of plants
- horticultural media, information and knowledge-based resources
- how to determine suitability of plants for different environments, such as green buildings, rooftops, conservatories, glass houses and atriums
- irrigation and current progress in new irrigation techniques
- plant families and detailed knowledge of species and cultivars used in garden design, horticulture industry and other ornamental, productive and economic plant industries
- plant taxonomy and nomenclature
- principles and processes of plant culture
- the use and development of plants through history
- turf culture
- types, properties and characteristics of a wide range of soils and growing media.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information on plant species, cultivars growing requirements, environmental conditions and functional characteristics
- relationships:
 - client
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM513 Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to conduct an environment and food safety risk assessment of plant nutrition and soil fertility programs, including maintaining currency, evaluating risks, developing a plant nutrient and soil fertility program, and identifying and communicating best practice.

The unit applies to individuals who apply specialised skills and knowledge to diagnose plant health problems, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHPCPM513 Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted environment and food safety risk assessments of plant nutrition and soil fertility programs on at least one occasion, and has:

- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- researched, identified and documented community, government and agricultural industry information, concerns and requirements in relation to fertiliser and soil ameliorant use and environmental stewardship
- researched, identified and documented information and standards relating to transporting, handling, storing and applying fertilisers and soil ameliorants
- identified and evaluated probability and severity of identified environmental risks associated with plant nutrition and soil fertility programs
- liaised with managers and landowners, and local and national organisations
- developed a plant nutrition and soil fertility management program, and key environmental stewardship issues report
- monitored effectiveness of plant nutrition and soil fertility management decisions over time
- identified opportunities to improve efficiency and effectiveness of plant nutrition and soil fertility program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to conducting environment and food safety risk assessment of plant nutrition and soil fertility programs

- principles and practices of food safety risk assessment, including:
 - environmental implications of soil amendment and fertiliser use, which may include nutrient mining, run-off, nutrient loading of soil and water, toxicity, noise and dust
 - food safety issues relating to the use of fertilisers and soil ameliorants
 - law of the minimum, and importance of nutrient interactions
 - methods and pathways of nutrient uptake by plants, and loss from soil
 - nutrient cycling and its practical relevance to specific plants and soils encountered in local area, including role of soil biology
 - nutrients required by plants grown within workplace, and effects of nutrient deficiency and toxicity on individual plant species and varieties
 - relationship between soil characteristics and the availability of nutrients, including macro and micro elements, to plants
 - single nutrient and complete fertiliser products encountered in local area, including physical attributes, nutrient analysis, solubility, salt index, application rates and costs, and appropriate application techniques and equipment
 - soil amendments commonly used to treat local soil problems
 - soil and water sampling techniques to adapt activities and instructions to a range of environmental contexts
 - techniques for interpreting laboratory results and making fertiliser and amendment recommendations
 - techniques to assess effects of fertiliser and amendment recommendations on soil, plants and water.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - published local information relevant to nutrient management
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to conducting environment and food safety risk assessment of plant nutrition and soil fertility programs
 - legislation and standards relevant to fertiliser and soil ameliorant transportation, handling, storage, application and environmental stewardship
 - national and local information and standards relevant to food safety associated with fertiliser and soil ameliorant
- relationships:
 - land owner or manager, client and local organisations
- timeframes:

- according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM601 Develop and implement a plant health management strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to gather information and advice on plant health and develop and implement a management strategy on plant health.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a plant health and management	1.1 Identify plant health issues from published data, historical records and industry consultation

Element	Performance criteria
program	1.2 Define management issues relative to desired quality, quantity and productivity requirements of marketing and production plans 1.3 Develop a program which defines enterprise guidelines and specific responsibilities of operational elements to achieve required outcomes 1.4 Establish systems to monitor business goals 1.5 Seek professional assistance where appropriate 1.6 Assess information to determine potential key information for input to planning decisions 1.7 Consider and document the environmental implications of chemical use, alternative methods and non-chemical preventative methods 1.8 Assess information to determine potential key information for input to planning decisions
2. Determine plant health strategies	2.1 Analyse gathered information for suitable approaches to plant health management 2.2 Consider strategies in the light of their impacts 2.3 Determine strategies for plant health management to integrate the most suitable methods with the proposed plants and the existing soil types 2.4 Establish environmental controls and include in the plan 2.5 Identify workplace health and safety hazards, assess risks and incorporate suitable controls into the plan
3. Provide input to other planning processes	3.1 Use details regarding plant health management strategies as input to other organisational planning processes 3.2 Collect and use information regarding other planning processes to inform the plant health management planning process 3.3 Communicate information about the range of planning processes verbally or in writing according to requirements and circumstances and the people involved
4. Determine scheduling and key responsibilities	4.1 Determine scheduling for plant health management, taking into consideration the range of seasonal, geographic, and resourcing factors 4.2 Determine key responsibilities for specific implementation processes 4.3 Determine record keeping requirements and put procedures in place to ensure compliance with the range of applicable regulations 4.4 Document the strategic plan, including scheduling and key responsibilities 4.5 Confirm the plan includes the type, format, frequency and detail

Element	Performance criteria
	of any reporting required by both managers and operators
5. Monitor and adjust plant health management strategies	5.1 Evaluate the effectiveness of the plant health management strategies at key points and make adjustments as necessary 5.2 Identify and monitor environmental impacts and workplace health and safety hazards relating to plant health management and assess and manage risks throughout the implementation process 5.3 Make modifications to the strategy as and when necessary for environmental, workplace health and safety, resourcing, or effectiveness reasons
6. Evaluate plant health management strategies and record result	6.1 Analyse data, observations and documentation from the implementation of the plant health management program against the plan, based on organisation guidelines 6.2 Prepare recommendations for future strategies based on the analysis of the data 6.3 Prepare a report that documents the implementation of the strategies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM601A Develop and implement a plant health management strategy.

Assessment Requirements for AHPCPM601 Develop and implement a plant health management strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine plant health strategies
- determine scheduling and key responsibilities
- develop plant health management strategies
- evaluate plant health management strategies and record results
- provide input to other planning processes
- monitor and adjust plant health management strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant health management
 - environmental controls and codes of practice applicable to the business and to plant health management operations
 - environmental controls and codes of practice applicable to the enterprise
 - Integrated Pest Management (IPM)
 - management of weed, pest and disease infestations
 - management practices and processes to minimise plant health management control operations
 - planning water budgets and irrigation strategies
 - plant growth and development and growth regulators
 - plant growth processes such as photosynthesis, respiration, nutrient uptake, solute transport and metabolism, water balance and osmotic pressure
 - strategic aspects of managing plant quality, performance and nutrition

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM602 Develop and implement a plant health management strategy

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to gather information and advice on plant health, and develop, implement and evaluate a plant health management strategy.

The unit applies to individuals who apply advanced skills and knowledge to develop and implement a plant health management strategy, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities. They work in contexts that are subject to change, and adapt a range of fundamental principles accordingly.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for AHPCPM602 Develop and implement a plant health management strategy

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed and implemented a plant health management strategy on at least one occasion, and has:

- developed plant health management program
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- provided input to other planning processes
- determined scheduling and key responsibilities
- documented record-keeping procedures and strategic plant health management plan
- evaluated plant health management strategy and recorded results
- monitored and adjusted plant health management strategy
- prepared recommendations for future strategies and implementation report.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant health management, including:
 - environmental controls and codes of practice applicable to the business and to plant health management operations
 - environmental controls and codes of practice applicable to the enterprise
 - integrated pest management
 - management of weed, pest and disease infestations
 - management practices and processes to minimise plant health management control operations
 - planning water budgets and irrigation strategies
 - plant growth and development and growth regulators

- plant growth processes such as photosynthesis, respiration, nutrient uptake, solute transport and metabolism, water balance and osmotic pressure
- strategic aspects of managing plant quality, performance and nutrition
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to developing and implementing a plant health management strategy.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - published data and historical records relevant to developing and implementing a plant health management strategy
 - workplace marketing and production plans
 - workplace planning processes relevant to developing and implementing a plant health management strategy
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to developing and implementing a plant health management strategy
- relationships:
 - professionals, managers or operators
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPER212 Use and maintain garden hand tools and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use and maintain garden hand tools and equipment. It requires knowledge of the correct purpose and function of garden hand tools and equipment and their maintenance needs.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and describe	1.1 Correctly identify garden hand tools and equipment

Element	Performance criteria
uses of tools	1.2 Describe the correct purpose of each tool and how to use it correctly 1.3 Describe the maintenance and storage requirements for the tools
2. Use tools for their designed purpose	2.1 Ensure safe work practices are complied with 2.2 Undertake tasks using garden hand tools and equipment correctly 2.3 Return tools used to the storage area and stow correctly
3. Clean, maintain and store garden hand tools and equipment	3.1 Identify tools that need repairs or maintenance 3.2 Undertake regular tool maintenance tasks 3.3 Store garden hand tools and equipment properly to ensure long service

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER212 Use and maintain garden hand tools and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- describe uses of tools and equipment
- use a range of garden hand tools and equipment properly
- clean, maintain and store garden hand tools and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to garden tool use and maintenance
- principles of sustainable horticultural practices
- ergonomics
- garden hand tools and equipment used in permaculture systems, such as:
 - spades and shovels
 - forks
 - trowels
 - rakes
 - scythes and sickles
 - hand mowers
 - secateurs & loppers
 - picks & mattocks
 - pruning saws and bow saws
 - club hammer and sledge hammer
- maintaining tools and equipment in good condition, such as:

- replacing dulled blades
- replacing broken handles
- lubricating moving parts
- adjusting mechanisms
- sharpening and honing blades
- storage techniques for hand tools and equipment
- carrying and transporting hand tools and equipment safely

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPGD101 Support gardening work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support for gardening work.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for gardening work	1.1 Identify required materials, tools and equipment according to lists provided and supervisor's instructions 1.2 Conduct checks on all materials, tools and equipment and tell supervisor if there are insufficient or faulty items 1.3 Use correct manual handling techniques when loading and

Element	Performance criteria
	unloading materials and minimise damage to the load and the vehicle 1.4 Use suitable personal protective equipment (PPE) selected as directed by supervisor and ensure correct fit 1.5 Tell supervisor if any risks are identified
2. Undertake gardening work as directed	2.1 Follow instructions and directions provided by supervisor and ask for clarification when necessary 2.2 Communicate with other staff and clients in a professional manner 2.3 Handle and dispose of materials 2.4 Tell supervisor of there are problems or difficulties in completing work to required standards or timelines 2.5 Undertake gardening work in a safe and environmentally appropriate manner
3. Handle materials and equipment	3.1 Store waste material and debris produced during gardening work in a designated area 3.2 Handle and transport materials, equipment and machinery 3.3 Maintain a clean and safe work site while undertaking landscaping activities
4. Clean up on completion of gardening work	4.1 Return materials to store or disposed of as required 4.2 Clean, maintain and store tools and equipment 4.3 Restore site 4.4 Tell supervisor of work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPGD102 Support gardening work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has supported gardening work on at least two occasions, and has:

- prepared tools and equipment
- applied safe work practices in gardening work, including fitted and used personal protective equipment (PPE)
- handled materials and equipment
- undertaken gardening work as directed
- cleaned up on completion of gardening work
- reported work outcomes and faulty, worn or damage of tools.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of gardening work, including:
 - garden tools and equipment
 - maintenance practices for planted areas
 - planting techniques
- safe work practices used in gardening work.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - work instructions and workplace procedures applicable to supporting gardening work
 - gardening materials, tools and equipment
 - PPE applicable to supporting gardening work
- relationships:
 - supervisor, staff and customers
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD201 Plant trees and shrubs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manually plant trees and shrubs and other containerised and bare-rooted plants.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for planting operations	1.1 Identify work health and safety hazards and tell the supervisor 1.2 Select and use personal protective equipment (PPE) and ensure correct fit 1.3 Use and maintain tools and equipment for planting 1.4 Mark site out as directed

Element	Performance criteria
	1.5 Control competing plants 1.6 Modify soil as directed
2. Prepare trees and shrubs for planting	2.1 Excavate planting holes 2.2 Water trees and shrubs prior to planting 2.3 Confirm root ball is damp 2.4 Remove trees and shrubs from containers
3. Inspect plants and report problems	3.1 Inspect plant and root ball 3.2 Report dry, water repellent and loose root balls 3.3 Report the presence of symptoms of pests or disease 3.4 Apply root treatments as directed
4. Install trees, shrubs and/or other plants	4.1 Place plants in prepared hole 4.2 Back-fill planting hole and consolidate soil 4.3 Water plants to eliminate air pockets 4.4 Apply mulch as directed
5. Complete work	5.1 Dispose of or recycle soil and waste material from the site to minimise damage to the environment 5.2 Clean and store all tools and equipment

AHC PGD202 Prepare and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and maintain a plant display.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare the display site	1.1 Prepare the display site as instructed 1.2 Select and use materials, tools, equipment and machinery 1.3 Identify hazards and report to supervisor 1.4 Select and use suitable personal protective equipment (PPE)

Element	Performance criteria
2. Install plants	2.1 Place plants in the pattern specified by the plan 2.2 Choose accessories and materials specified in the plan
3. Maintain plants	3.1 Monitor the health of the plants to ensure they retain optimum appearance 3.2 Fertilise and water plants to maintain optimum health and appearance 3.3 Replace plants when no longer at optimum health and appearance 3.4 Remove rubbish, litter and decaying material from plants, pots and surrounds to maintain optimum appearance of display

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD202A Prepare and maintain plant displays.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD202 Prepare and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- use hand tools and machinery for preparation of plant displays
- interpret planting plans
- calculate quantities of plants and materials
- complete plant display in a timely manner
- use fertilisers and chemicals for maintenance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant display maintenance
 - common problems occurring with display plants
 - maintenance techniques for annuals and/or indoor displays
 - planting techniques for annual bed displays
 - remedial action required for display plants displaying health problems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD203 Prune shrubs and small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prune shrubs and small trees that are less than three meters in height while standing on the ground.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify pruning requirements	1.1 Identify work health and safety hazards and report to the supervisor 1.2 Select and use personal protective equipment (PPE) and ensure correct fit 1.3 Select appropriate pruning tools and equipment for the location,

Element	Performance criteria
	access and size of material to be pruned 1.4 Identify plants that require pruning and confirm with supervisor 1.5 Confirm with the supervisor pruning method to be used
2. Undertake pruning of shrubs and small trees	2.1 Carry out pre-operational and safety checks on pruning tools and equipment 2.2 Operate machinery, equipment and tools as required 2.3 Carry out pruning as directed 2.4 Use correct manual handling techniques when lifting or moving heavy loads 2.5 Record and report work outcomes to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD203A Prune shrubs and small trees.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD203 Prune shrubs and small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- identify pruning requirements
- identify and report site and tree hazards
- recognise plants, shrubs and trees
- prune shrubs and small trees
- use appropriate tools, equipment and safety equipment
- minimise environmental disturbance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of pruning
- basic botany and physiology as they apply to pruning
- correct and safe use and care of tools and equipment
- effects of pruning on plant growth and habit
- plant health principles
- plant names and growth habits
- use of hygienic practices
- AS4373-2007 Pruning of amenity trees

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD204 Transplant small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to transplant small trees and shrubs without the use of lifting machinery or equipment.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tree or shrub removal	1.1 Confirm transplanting instructions confirmed with the supervisor 1.2 Identify work health and safety hazards and report to the supervisor 1.3 Locate all underground services as outlined by supply authorities 1.4 Prepare and use tools and equipment appropriate to the task being

Element	Performance criteria
	undertaken 1.5 Select and use suitable personal protective equipment (PPE)
2. Prepare tree or shrub and undertake earthworks for removal	2.1 Prepare crown as required by the species and time of removal 2.2 Clear and water site prior to transplanting 2.3 Confirm root ball width and depth with the supervisor to ensure the root system can colonise new ground, depending on the needs of the species and size of the specimen
3. Remove tree or shrub from original site	3.1 Excavate the soil around the root zone 3.2 Prune tree roots where required to meet the appropriate Australian Standard 3.3 Stabilise tree as the root system is undercut and apply anti-transpirants as a root soak or foliar spray to ensure viability of the plant is maintained 3.4 Bind root ball with appropriate material to ensure adequate soil is retained and kept moist prior to transportation and installation 3.5 Lift tree and secure for potential storage or transportation using safe lifting techniques 3.6 Prepare and handle tree or shrub to minimise damage during handling and transportation
4. Replant tree or shrub in new environment	4.1 Provide appropriate drainage to ensure root system survival is maintained according to the needs of the species and conditions of the planting site 4.2 Modify soil according to the cultural requirements of the species 4.3 Plant tree or shrub in prepared hole 4.4 Install plant support devices as instructed
5. Complete transplant operation	5.1 Maintain transplanted plant with regular aftercare activities appropriate to the requirements of the species 5.2 Clean, maintain and store tools and equipment 5.3 Collect waste and dispose of or recycle to minimise damage to the external environment 5.4 Maintain records of transplant

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD204A Transplant small trees.

Assessment Requirements for AHCPGD204 Transplant small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- identify and report site and tree hazards
- prepare for tree or shrub removal
- prepare crown, root ball and earthworks
- prune roots where appropriate
- use tools and equipment in a safe and effective manner
- remove tree or shrub from original site
- transplant tree or shrub in selected site
- maintain transplanted specimen
- install support devices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of transplanting trees
 - causes of damage or drying-out of trees and shrubs, and prevention methods
 - factors affecting the timing and method of lifting trees and shrubs
 - techniques of securing and anchoring transplanted trees and shrubs
 - the effect of adverse outdoor climatic conditions, such as rain, hail, or very high ultraviolet radiation, which may prevent or impede transplanting operations
 - transference of soil or root-borne diseases
 - transplanting practices associated with different soil types and relationships to plant care
 - trees and shrubs that are most suited to transplanting

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PGD206 Conduct visual inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out routine visual inspections of park and recreational facilities to identify visible hazards and existing and potential risks.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for visual inspection	1.1 Interpret site plans and inspection checklists and clarify requirements with the supervisor 1.2 Clarify the specific terminology used in checklists 1.3 Identify park site to be inspected and locate on the site plan

Element	Performance criteria
	1.4 Identify park facilities, equipment and services on site from checklist descriptions and site plan
2. Undertake visual inspection	2.1 Inspect park facilities, equipment and services and compare to enterprise presentation standards and workplace health and safety requirements 2.2 Identify work health and safety hazards and adverse environmental impacts and record on the appropriate form 2.3 Report situations requiring urgent action to supervisor
3. Submit report	3.1 Confirm that inspection activity reports and checklists are concise and accurate and comply with enterprise standards 3.2 Forward checklist and report promptly to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD206A Conduct visual inspection of park facilities.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD206 Conduct visual inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare for visual inspection of park facility
- carry out a visual inspection of park facility
- determine the extent of problems
- evaluate serious issues that may be present
- identify environmental risks and impacts from site facilities
- rate the condition of facilities
- rate the hazards and associated environmental implications of malfunctioning facilities, equipment and services
- report urgent situations
- complete and submit inspection activity checklist and report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of park facility visual inspection
 - cleaning, servicing and hygiene requirements of public conveniences
 - hazards investigation and risk assessment
 - effective maintenance and repair work particularly in relation to end use of the facilities and equipment, and the safety of users
 - recognition of the range of park facilities, equipment and services relevant to the enterprise
 - reporting requirements, procedures and materials for use in park inspection
 - terminology used to describe different components of the range of facilities, equipment and services relevant to the enterprise

- the effect of adverse outdoor climatic conditions, such as rain, hail, wind, or very high ultraviolet radiation, on park facilities inspection activities
- hazards that are likely to be encountered by visitors using the park facilities and equipment
- the practical application of site plans, checklist descriptions and presentation standards to locate and effectively assess facilities and equipment against the required parameters
- the relevant Australian Standards

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD207 Plant trees and shrubs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to manually plant trees and shrubs and other containerised and bare-rooted plants, including preparing, inspecting and planting trees and shrubs and completing planting work.

The unit applies to individuals who plant trees and shrubs under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for planting operations	1.1 Confirm tree and shrub planting activities with supervisor 1.2 Identify workplace health and safety hazards, assess risks and report to supervisor 1.3 Prepare and use tools and equipment according to supervisor instructions 1.4 Select, fit and use personal protective equipment (PPE) applicable

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	to the task 1.5 Mark out site as directed 1.6 Control competing plants as required
2. Prepare trees and shrubs for planting	2.1 Water trees and shrubs prior to planting where appropriate 2.2 Confirm root ball is damp 2.3 Remove trees and shrubs from containers
3. Inspect plants and report problems	3.1 Inspect plant and root ball condition 3.2 Report dry, water repellent and loose root balls 3.3 Report the presence of symptoms of pests or disease 3.4 Apply root treatments as directed
4. Install trees, shrubs and/or other plants	4.1 Excavate planting holes 4.2 Apply soil treatments and amendments according to supervisor instructions 4.3 Place plants in prepared hole 4.4 Back-fill planting hole and consolidate soil 4.5 Water plants to eliminate air pockets and prevent dehydration 4.6 Install plant protection, stakes and ties as directed 4.7 Apply mulch as directed
5. Complete work	5.1 Dispose of or recycle soil and waste material from site 5.2 Clean, maintain and store materials, tools and equipment 5.3 Report work outcomes and malfunctions, faults, wear or damage of tools to supervisor

Assessment Requirements for AHCPGD207 Plant trees and shrubs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planted trees and shrubs on at least three occasions including at least two of the following:

- bare rooted, tube stock, potted or bagged plants

and has:

- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- prepared, used and maintained tree and shrub planting tools, equipment, material and plants
- inspected plant and root ball condition
- excavated planting holes
- applied soil treatments and amendments
- installed plant protection, stakes and ties
- applied mulch
- cleaned up the site and disposed of or recycled waste
- reported tree and shrub planting operations and unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for planting trees and shrubs, including:
 - basic plant structure, physical and nutritional requirements of plants
 - basic botany and plant physiology applicable to planting trees and shrubs
 - factors affecting the timing and method of tree or shrub planting
 - initial establishment needs of young plants

- common plant and root ball problems
- types and use of plant protection
- mulches and fertilisers
- planting techniques relating to specific species
- soil and root ball amelioration techniques
- effects of environmental conditions on plant growth
- methods of disposing of waste to minimise damage to the environment
- the impact of planting activities on the surrounding environment
- workplace requirements applicable to health and safety in the workplace for planting trees and shrubs, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - materials, tools and equipment applicable to planting trees and shrubs
 - trees and shrubs
 - tree protection material
 - PPE applicable planting trees and shrubs
- specifications:
 - workplace requirements applicable to health and safety in the workplace and planting trees and shrubs
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPGD209 Prune shrubs and small trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has pruned at least three different shrubs and small trees using the following:

- secateurs
- loppers or extension loppers
- shears
- pruning or pole saws

and has:

- identified plant pruning requirements
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- prepared, used and maintained shrubs and small trees pruning tools and equipment
- cleaned up the site and disposed of or recycled waste
- reported tree and shrub planting operations and unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of pruning, including:
 - basic botany and physiology applicable to pruning shrubs and small trees
 - correct and safe use and care of tools and equipment
 - effects of pruning on plant growth and habit
 - plant health principles applicable to pruning shrubs and small trees
 - plant names and growth habits
 - AS4373-2007 Pruning of amenity trees

- workplace requirements applicable to health and safety in the workplace for pruning shrubs and small trees, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - materials, tools and equipment applicable to pruning shrubs and small trees
 - shrubs and small trees
 - PPE applicable to pruning shrubs and small trees
- specifications:
 - workplace requirements applicable to health and safety in the workplace and pruning shrubs and small trees
 - AS4373-2007 Pruning of amenity trees
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPGD210 Transplant shrubs and small trees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has transplanted shrubs and small trees on at least two separate occasions and has:

- prepared for tree or shrub removal
- identified and reported workplace health and safety hazards
- fitted and used personal protective equipment (PPE)
- prepared, used and maintained small tree and shrub transplanting tools and equipment
- prepared crown, root ball and earthworks
- pruned roots where appropriate
- removed tree or shrub from original site
- prepared new environment
- transplanted tree or shrub in selected site
- installed support devices
- maintained transplanted specimen
- cleaned up the site and disposed of or recycled waste
- reported tree and shrub planting operations and unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of transplanting trees, including:
 - causes of damage or drying-out of trees and shrubs, and prevention methods
 - basic physiology applicable to transplanting shrubs and small trees
 - correct and safe use and care of tools and equipment
 - factors affecting the timing and method of lifting trees and shrubs

- techniques of securing and anchoring transplanted trees and shrubs
- transportation, manual handling and lifting techniques applicable to transplanting shrubs and small trees
- AS4373-2007 Pruning of amenity trees
- methods of disposing of waste to minimise damage to the environment
- workplace requirements applicable to health and safety in the workplace for transplanting shrubs and small trees, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - materials, tools and equipment applicable to transplanting shrubs and small trees
 - shrubs and small trees
 - PPE applicable transplanting shrubs and small trees
- specifications:
 - workplace requirements applicable to health and safety in the workplace and transplanting shrubs and small trees
 - AS4373-2007 Pruning of amenity trees
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD212 Conduct visual inspection of park facilities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to conduct routine visual inspections of park and recreational facilities to identify visible hazards and existing and potential risks.

The unit applies to individuals who conduct visual inspections of park facilities under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for visual inspection	1.1 Interpret site plans and inspection checklists and confirm inspection activities with supervisor 1.2 Clarify the specific terminology used in checklists with supervisor 1.3 Identify park elements to be inspected and locate on the site plan 1.4 Confirm park facilities, equipment and services on site

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Undertake visual inspection	2.1 Inspect park facilities, equipment and services and compare to workplace standards of presentation and workplace health and safety requirements 2.2 Identify and record workplace presentation, workplace health and safety hazards and adverse environmental impacts using appropriate form and photographs 2.3 Report situations requiring urgent action to supervisor
3. Submit report	3.1 Complete and check inspection activity reports and checklists are concise, accurate and comply with workplace standards, and include photographs where required 3.2 Forward checklist and report to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual and drawn information from site plans and checklists to identify relevant and key information about park facilities, inspection and workplace standards requirements
Oral communication	<ul style="list-style-type: none"> Initiate discussions with supervisor using clear language to confirm inspection activities and clarify information

Assessment Requirements for AHCPGD212 Conduct visual inspection of park facilities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted a visual inspection of park facilities on at least two occasions and has:

- prepared for and conducted visual inspection of park facility
- applied workplace health and safety requirements
- applied workplace standards of presentation
- compared the condition of facilities to the required workplace standard
- determined the extent of problems
- recorded and reported hazards and associated environmental implications of malfunctioning facilities, equipment and services
- reported serious issues that may be present
- completed and submitted inspection activity checklist, report and photographs.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of park facility visual inspection, including:
 - cleaning, servicing and hygiene requirements of public conveniences
 - hazard identification and reporting
 - the range of park facilities, equipment and services
 - park inspection reporting requirements, procedures and materials
 - terminology used to describe different components of the range of facilities, equipment and services relevant to the workplace
 - issues likely to be encountered by visitors using the park facilities and equipment

- the practical application of site plans, checklist descriptions and workplace standards of presentation to locate and effectively assess facilities and equipment against the required parameters
- workplace standards of presentation and Australian Standards applicable to park facilities
- workplace requirements applicable to health and safety in the workplace for inspection of park facilities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site plans, checklists, forms and activity reports applicable to conducting visual inspection of park facilities
 - photographic device
- specifications:
 - workplace requirements applicable to health and safety in the workplace and inspection of park facilities
 - workplace standards of presentation and Australian Standards applicable to park facilities
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD301 Implement a plant establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish planting areas in new projects and in programs of extensive replacement and renovation works across a range of situations and environments.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to establish a planting area	1.1 Identify the planting site, planting methods and plant species and cultivars from the site plan 1.2 Select appropriate materials, tools, equipment and machinery 1.3 Carry out pre-operational and safety checks on tools, equipment

Element	Performance criteria
	<p>and machinery</p> <p>1.4 Identify work health and safety hazards, assess risks and implement controls</p> <p>1.5 Select and use suitable safety and personal protective equipment (PPE)</p> <p>1.6 Maintain a clean and safe work area throughout work</p>
2. Prepare the planting area	<p>2.1 Determine the layout of services, check depths against the site plan and report discrepancies to the supervisor and the relevant authority</p> <p>2.2 Carry out earthworks as directed</p> <p>2.3 Select and apply additives as required by site conditions</p> <p>2.4 Water the planting site where required</p> <p>2.5 Mark out the positions of plants on site</p> <p>2.6 Remove debris and pollutants from the site and dispose of in an environmentally safe manner</p>
3. Undertake planting operation	<p>3.1 Inspect all plants for health, vigour and well-established root systems prior to being planted</p> <p>3.2 Return plants with major defects to the supplier or set aside to be returned</p> <p>3.3 Trim or treat plants with minor defects to maintain health and vigour</p> <p>3.4 Space plants appropriately</p> <p>3.5 Use planting methods that comply with the growing requirements of individual plant species and cultivars</p> <p>3.6 Provide newly placed plants with post-planting care</p> <p>3.7 Prune, where necessary, according to the needs of the species and cultivar to ensure plants develop a sound framework for their growth and habit</p>
4. Review the plant establishment works	<p>4.1 Review the plant establishment program as required</p> <p>4.2 Identify, record and report plants incorrectly planted, or situations that will prevent plants from reaching their full potential</p> <p>4.3 Take remedial action to ensure all requirements of the plant establishment program are implemented</p>
5. Complete establishment works	<p>5.1 Complete earthworks and surface finishes</p> <p>5.2 Remove waste material from the planting site and dispose of in an environmentally safe manner</p> <p>5.3 Clean, maintain and store equipment, tools and machinery</p> <p>5.4 Record work outcomes and report to the supervisor</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD301A Implement a plant establishment program.

Assessment Requirements for AHCPGD301 Implement a plant establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare to establish a planting area
- interpret site plans and plant establishment specifications
- measure quantities, calculate material requirements, area, volume, ratios and application rates
- carry out planting operations
- ensure planting methods comply with plant species and cultivar growing requirements
- prune plants to ensure they develop a sound framework for their growth and habit
- inspect and determine plant quality and health
- record and report work outcomes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant establishment
 - soils and soil amelioration techniques
 - the identification of pests and diseases, plant symptoms of infections, treatment threshold levels, recommended treatments, methods of application and environmental implications
 - the objectives of the plant establishment program, including finished plant forms, site appearance, end use and time constraints
 - the physiology of required plant species and cultivars, culture and planting procedures, including growth rates, main nutrient and water requirements, deficiency symptoms, recommended treatments and associated environmental implications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD302 Plan and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and establish plant displays either indoors or as seasonal displays of annual and perennial plants in garden beds.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare plans for plant displays	1.1 Inspect the display site for aesthetic, environmental and physical attributes 1.2 Identify occupational Health and Safety (OHS) hazards, assess risks assess and implement controls

Element	Performance criteria
	1.3 Select, use and maintain personal protective equipment (PPE) according to procedures 1.4 Identify on the display plan the location and projected life of the display 1.5 Identify on the display plan the plant types suitable for aesthetic effects, environmental and physical attributes 1.6 Identify on the display plan actions, timelines and work organisation, in consultation with the supervisor or manager. 1.7 Confirm the availability of plants, materials and services for preparing the display 1.8 Select materials, tools, equipment and machinery according to the display plan and enterprise work procedures
2. Select plants	2.1 Select plants that are healthy and vigorous and comply with enterprise specifications for quality. 2.2 Select number and size of plants according to the display plan. 2.3 Select plants that display the ability to survive in the display position for the length of the display
3. Place plants	3.1 Plants are placed in a pattern specified by the plan 3.2 Accessories and materials are chosen as specified in the plan 3.3 Work is undertaken according to OHS requirements
4. Maintain plants	4.1 Monitor the health of the plants to ensure they retain optimum appearance. 4.2 Fertilise and water plants to maintain optimum health and appearance. 4.3 Replace plants when they are no longer at optimum health and appearance. 4.4 Remove rubbish, litter and decaying material plants, pots and surrounds to maintain optimum appearance of display.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD302A Plan and maintain plant displays.

Assessment Requirements for AHCPGD302 Plan and maintain plant displays

Modification History

NotReleased	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare design plans and specifications
- determine spatial measurements of display site
- calculate number of plants and materials
- select plants according to the display that comply with quality specifications and the ability to survive for the length of the display.
- place the plants according to the display plan and pattern
- complete plant display in a timely manner
- maintain the plant display

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant display maintenance
 - aim and purpose of building plant displays
 - common problems occurring with display plants
 - design principles for plant displays
 - features and characteristics of a range of plants used for display purposes
 - growing requirements of a range of common plants used in plant displays
 - remedial action required for display plants displaying health problems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD303 Perform specialist amenity pruning

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform specialist amenity pruning using specialist pruning techniques.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for specialist amenity pruning	1.1 Inspect plants and determine pruning strategy according to the plants' characteristics or desired outcome 1.2 Identify common diseases, pests and nutrition deficiencies in trees 1.3 Identify work health and safety hazards, assess risks and implement suitable controls

Element	Performance criteria
	1.4 Select and prepare pruning tools and equipment required by the pruning program 1.5 Consult references where required to determine best pruning strategies for special plants
2. Undertake specialist pruning	2.1 Undertake pruning using established and specialist pruning techniques 2.2 Adhere to site environmental procedures 2.3 Assess pruned plants to determine if pruning requirements have been met 2.4 Carry out remedial work where required
3. Complete work	3.1 Dispose of or recycle waste material from the site to minimise damage to the environment 3.2 Clean, maintain and store tools, equipment and machinery 3.3 Clean and clear site 3.4 Record completed pruning and report to supervisor or the client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD303A Perform specialist amenity pruning.

Assessment Requirements for AHCPGD305 Conduct operational inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- determine the purpose of the inspection and the facilities and equipment to be inspected and tested
- carry out pre-operational and safety checks on tools and equipment
- clarify specific terminology used in checklists with the supervisor
- identify workplace health and safety hazard, assess risks and implement controls
- interpret design symbols and terminology
- compare actual measurements of inspected components with legal, workplace health and safety and/or enterprise standards and specifications
- determine the degree of urgency to report serious situations
- evaluate the condition of facilities
- use proforma reporting and work procedure documents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different modes of non-conformity that may be identified in reference to relevant Australian Standards and work health and safety requirements
- identification, assessment and control of hazards
- inspection procedures and techniques, and legal and enterprise reporting requirements for maintenance, repair and replacement recommendations
- principles and practices of park facility operational inspections
- terminology used to describe different components of park or recreational facilities and equipment
- operational expectations and enterprise standards for the presentation and working order of a range of park or recreational facilities and equipment

- the range, use and safety parameters of park or recreational facilities and equipment, their material construction and maintenance requirements
- work health and safety legislative requirements and codes of practice associated with public use of park facilities

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- interpret site plans and maintenance program requirements, and use proforma reporting, recording, analysis and work procedure documents
- measure materials and aquatic site dimensions
- schedule and implement monitoring activities correctly and record, interpret and apply monitoring data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of aquatic environment maintenance
 - aquatic systems ecology
 - correct safety procedures working from boats or adjacent to large bodies of water
 - enterprise systems and procedures for the safe operation and maintenance of machinery and equipment in aquatic environments
 - food chain and nutrient cycling in aquatic systems
 - recognition, physiology and biological characteristics of animals and/or plants specific to the aquatic environment
 - regulations and industry standards for water quality requirements in association with specified use
 - relevant legislation regarding water pollution and management
 - safe systems and procedures for handling, transporting and storing chemicals and hazardous substances taking into account toxicity levels and environmental impacts
 - wildlife habitats associated with the aquatic environment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD307 Implement a plant establishment program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to establish planting areas, including preparing, implementing, reviewing and completing plant establishment work, in new projects and in programs of extensive replacement and renovation works across a range of situations and environments.

The unit applies to individuals who implement a plant establishment program under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to establish a planting area	1.1 Identify the planting site, planting methods and plant species and cultivars from site plan and specifications 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks 1.3 Select materials, tools, equipment and machinery required to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	implement a plant establishment program and check for safe operation 1.4 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task 1.5 Maintain a clean and safe work area
2. Prepare the planting area	2.1 Determine the layout of services against site plan and report discrepancies to supervisor and relevant authority 2.2 Check and confirm site layout and plant stock against site plan and report discrepancies 2.3 Prepare planting site according to site plan 2.4 Select and apply additives as required by site conditions 2.5 Mark out the positions of plants on site 2.6 Remove and dispose of debris and pollutants from the site
3. Undertake planting operation	3.1 Inspect all plants for health, vigour and well-established root systems prior to being planted 3.2 Return plants with major defects to supplier or set aside to be returned 3.3 Trim or treat plants with minor defects to maintain health and vigour 3.4 Space plants appropriately 3.5 Use planting methods that comply with growing requirements of individual plant species and cultivars 3.6 Apply water to planting site where required 3.7 Provide newly placed plants with post-planting care 3.8 Prune plants, where necessary, according to needs of species and cultivar to ensure plants develop a sound framework for their growth and habit
4. Review the plant establishment works	4.1 Review plant establishment program as required 4.2 Identify, record and report plants incorrectly planted, or situations that will prevent plants from reaching their full potential 4.3 Take remedial action to ensure all requirements of plant establishment program are implemented
5. Complete	5.1 Complete surface finishes including mulch

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
establishment works	5.2 Dispose of or recycle waste material from the planting site 5.3 Clean, maintain and store tools, equipment and machinery 5.4 Identify and report unserviceable tools, equipment and machinery according to workplace procedures 5.5 Record completed plant establishment program and report to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use clear language to report tool, equipment and machinery unserviceability
Numeracy	<ul style="list-style-type: none"> Estimate area, volume and ratios, and calculate application rates Apply numerical information to determine quantities, material and application rates

Assessment Requirements for AHCPGD307 Implement a plant establishment program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a plant establishment program on at least one occasion and has:

- interpreted site plans and specifications
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, used and maintained tools, equipment and machinery required for implementing a plant establishment program
- checked and confirmed site plan and plant stock
- measured quantities, calculated material requirements, area, volume, ratios and application rates
- carried out planting operations
- inspected and determined plant quality and health
- ensured planting methods comply with plant species and cultivar growing requirements
- pruned plants to ensure they develop a sound framework for their growth and habit
- reviewed site establishment program
- reported unserviceable tools, equipment and machinery
- recorded and reported work outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant establishment, including:
 - soils and soil amelioration techniques

- the identification of pests and diseases, plant symptoms of infections, treatment threshold levels, recommended treatments, methods of application and environmental implications
- the objectives of the plant establishment program, including finished plant forms, site appearance, end use and time constraints
- selection and calculation of stock requirements
- site planning
- the physiology of required plant species and cultivars, culture and planting procedures, including growth rates, main nutrient and water requirements, deficiency symptoms, recommended treatments and associated environmental implications
- workplace requirements applicable to health and safety in the workplace for implementing a plant establishment program, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - workplace procedures applicable to implementing a plant establishment program
 - materials, tools, equipment and machinery applicable to implementing a plant establishment program
 - plants
 - PPE applicable to implementing a plant establishment program
- specifications:
 - workplace requirements applicable to health and safety in the workplace for implementing a plant establishment program
 - site plans and specifications applicable to implementing a plant establishment program
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD308 Plan and maintain plant displays

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan and establish plant displays, including preparing, selecting, placing and maintaining plants either indoors or as seasonal displays of annual and perennial plants in garden beds and completing work.

The unit applies to individuals who plan and maintain plant displays under broad direction and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for plant displays	1.1 Confirm display plan requirements with supervisor or manager 1.2 Inspect the display site for aesthetic, environmental and physical attributes 1.3 Identify potential hazards and risks, and implement safe working practices to manage risks 1.4 Select, fit, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>applicable to the task</p> <p>1.5 Identify location and projected life of display</p> <p>1.6 Check site irrigation system</p> <p>1.7 Identify plant types suitable for aesthetic effects, environmental and physical attributes</p> <p>1.8 Identify actions, timelines and organise work, in consultation with supervisor or manager</p> <p>1.9 Confirm the availability of plants, materials and services for preparing display</p> <p>1.10 Select materials, tools, equipment and machinery according to the display plan and workplace procedures</p> <p>1.11 Record display requirements</p>
2. Select plants	<p>2.1 Select healthy and vigorous plants according to workplace quality specifications</p> <p>2.2 Select number and size of plants according to display requirements</p> <p>2.3 Select plants that display ability to survive in display position for length of display</p>
3. Install plants	<p>3.1 Place plants according to pattern specified in display plan requirements</p> <p>3.2 Plant stock</p> <p>3.3 Select accessories and materials according to display plan requirements</p>
4. Maintain plants	<p>4.1 Check irrigation system where applicable</p> <p>4.2 Monitor plant health</p> <p>4.3 Maintain plant display appearance, including weeding, dead heading and shaping</p> <p>4.4 Fertilise and water plants to maintain optimum health and appearance</p> <p>4.5 Replace plants where required</p>
5. Complete plant installation and maintenance work	<p>5.1 Remove and dispose of or recycle rubbish and plant waste material</p> <p>5.2 Clean, maintain and store tools, equipment and machinery</p> <p>5.3 Identify and report unserviceable tools, equipment and machinery</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	according to workplace procedures

Assessment Requirements for AHCPGD308 Plan and maintain plant displays

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and installed one plant display, and maintained the plant display on three occasions and has:

- selected, used and maintained tools, equipment and machinery required for installing and maintaining plant displays
- determined spatial measurements of display site
- applied workplace health and safety requirements
- checked irrigation system where required
- selected plants according to the display plan and workplace quality specifications, and for their ability to survive for the length of the display
- calculated number of plants and materials
- placed plants according to the display plan
- planted stock
- maintained plant display appearance, including mulching, weeding, dead heading, and shaping, and replacing plants
- removed and disposed of or recycled waste material
- reported unserviceable tools, equipment and machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for planning, installing and maintaining plant displays, including appropriate use of personal protective equipment (PPE)
- irrigation system operation
- principles and practices of plant display planning, installation and maintenance, including at least ten annual and ten perennial plant types, including their:

- features and characteristics
- growing requirements
- common health problems and remedial action
- workplace quality specifications applicable to planning, installing and maintaining plant displays
- methods of disposing of waste to minimise damage to the environment.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - workplace procedures applicable to planning, installing and maintaining plant displays
 - materials, tools, equipment and machinery applicable to planning, installing and maintaining plant displays
 - annual and perennial plants
 - PPE applicable to planning, installing and maintaining plant displays
- specifications:
 - workplace requirements applicable to health and safety in the workplace for planning, installing and maintaining plant displays
 - workplace quality specifications applicable to planning, installing and maintaining plant displays
- relationships:
 - supervisor or manager
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD309 Perform specialist amenity pruning

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to perform specialist amenity pruning, including preparing, undertaking and completing amenity pruning work using specialist pruning techniques.

The unit applies to individuals who perform specialist amenity pruning under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for specialist amenity pruning	1.1 Identify and inspect plants and determine pruning strategy according to plant characteristics or desired outcome 1.2 Identify common diseases, pests and nutrition deficiencies in plants 1.3 Identify potential hazards and risks, and implement safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Select tools, equipment and machinery required to perform specialist pruning and check for safe operation</p> <p>1.5 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task</p> <p>1.6 Consult references where required to determine best pruning strategies for special plants</p>
2. Undertake specialist pruning	<p>2.1 Undertake pruning using established and specialist pruning techniques</p> <p>2.2 Adhere to site environmental and disease control procedures</p> <p>2.3 Assess pruned plants to determine if pruning requirements have been met</p> <p>2.4 Carry out remedial work as required</p>
3. Complete work	<p>3.1 Dispose of or recycle waste material from the site</p> <p>3.2 Clean, maintain and store tools, equipment and machinery</p> <p>3.3 Identify and report unserviceable tools, equipment and machinery according to workplace procedures</p> <p>3.4 Report completed specialist amenity pruning activities according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCPGD309 Perform specialist amenity pruning

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed specialist amenity pruning on at least three different plants including at least one tree using at least three of the following:

- secateurs
- loppers or extension loppers
- shears
- pruning or pole saws
- powered hedgers
- powered secateurs

and has:

- identified and inspected plants
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, used and maintained tools, equipment and machinery required for specialist amenity pruning
- stored and carried tools safely
- carried out pruning using specialist pruning techniques
- applied site environmental and disease control procedures
- met pruning program requirements
- assessed pruning quality
- cleaned and cleared pruning site
- reported unserviceable tools, equipment and machinery
- reported work outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of specialist amenity pruning, including:
 - anatomy and physiology of plants, shrubs and trees
 - AS4373-2007 Pruning of amenity trees
 - compartmentalisation of decay in trees (CODIT)
 - effect on plant growth and habit after pruning
 - identification of plant species and their pruning requirements
 - local government tree protection and preservation regulations
 - types of plants and their pruning requirements, including; climbing plants, fruiting plants, standard plants
 - methods of specialist pruning, including; espalier, topiary, hedging, pleaching, crown lifting, pollarding, thinning out and sucker control
 - specialist pruning tools, equipment and machinery
- workplace requirements applicable to health and safety in the workplace for performing specialist amenity pruning, including appropriate use of PPE
- site environmental and disease control procedures applicable to performing specialist amenity pruning.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - workplace procedures applicable to performing specialist amenity pruning
 - tools, equipment and machinery applicable to performing specialist amenity pruning
 - three different plant types including at least one tree
 - PPE applicable to performing specialist amenity pruning
- specifications:
 - workplace requirements applicable to health and safety in the workplace for performing specialist amenity pruning
 - site environmental and disease control procedures applicable to performing specialist amenity pruning
 - AS4373-2007 Pruning of amenity trees
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPGD310 Implement a landscape maintenance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a landscape maintenance program on at least one occasion and has:

- applied workplace health and safety requirements
- completed general site inspection
- determined maintenance requirements
- implemented maintenance operations
- performed general plant maintenance, including:
 - weeding
 - fertilising
 - watering
 - pruning
 - pest and disease control
- repaired and renovated landscape structures and features, including:
 - tidying up
 - blowing
 - sweeping
 - cleaning
- identified any items requiring further action or cannot be completed within existing resources
- evaluated and recorded results of maintenance works.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of landscape maintenance, including:
 - actions permitted in the event of variations to maintenance programs
 - common maintenance tasks for landscapes
 - characteristics and optimal growing conditions of a range of plants
 - common problems and remedial actions of a range of plants
- workplace requirements applicable to health and safety in the workplace for a landscape maintenance program.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - workplace procedures applicable to implementing a landscape maintenance program
 - site inspection checklist
 - soft and hard landscape
 - materials, tools and equipment applicable to implementing a landscape maintenance program
- specifications:
 - workplace requirements applicable to health and safety in the workplace for implementing a landscape maintenance program
 - landscape maintenance program and standards
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD311 Conduct operational inspection of park facilities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to conduct operational inspections of park or recreational facilities to identify hazards, existing and potential risks and non-conformities with Australian Standards and workplace health and safety requirements.

The unit applies to individuals who conduct operational inspection of park facilities under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for operational inspection	1.1 Determine from operational request, specific facilities and equipment to be inspected and purpose of inspection 1.2 Identify potential hazards and risks of conducting inspection, and implement safe working practices to address risks 1.3 Select, tools and equipment required for testing and inspection and

Elements	Performance Criteria

Assessment Requirements for AHCPGD311 Conduct operational inspection of park facilities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted an operational inspection of two different park facilities and has:

- determined the purpose of the inspection and the facilities and equipment to be inspected and tested
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, used and maintained tools and equipment required for operational testing and inspection of park facilities
- clarified specific terminology used in checklists with the supervisor
- compared actual measurements of inspected components with Australian standards, workplace health and safety requirements, and workplace specifications
- evaluated the condition of facilities
- determined and reported urgent and serious situations
- completed and submitted proforma inspection report, photographs and workplace procedure documents.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of park facility operational inspection, including:
 - different areas of non-conformity that may be identified in relevant Australian standards and health and safety in the workplace requirements
 - identification, assessment and control of hazards
 - inspection procedures and techniques, and workplace reporting requirements for maintenance, repair and replacement recommendations

- principles and practices of park facility operational inspections
- terminology used to describe different components of park or recreational facilities and equipment
- operational expectations and workplace requirements for the presentation and working order priorities of a range of park or recreational facilities and equipment
- the range, use and safety parameters of park or recreational facilities and equipment, their material construction and maintenance requirements
- legislative requirements and codes of practice applicable to public use of park facilities
- workplace requirements applicable to health and safety in the workplace for conducting an operational inspection of park facilities, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - workplace procedures applicable to conducting an operational inspection of park facilities
 - materials, tools and equipment applicable to conducting an operational inspection of park facilities
 - checklists, forms and inspection report proformas applicable to conducting an operational inspection of park facilities
 - photographic device
 - PPE applicable to conducting an operational inspection of park facilities
- specifications:
 - workplace requirements applicable to health and safety in the workplace for conducting an operational inspection of park facilities
 - workplace requirements and Australian standards applicable to park facilities and conducting an operational inspection of park facilities
 - legislation and codes of practice applicable to public use of park facilities and conducting an operational inspection of park facilities
- relationships:
 - client or supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD312 Implement a maintenance program for an aquatic environment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to implement a maintenance program for an aquatic environment, including preparing for maintenance activities, and maintaining aquatic organisms and water quality, in a park or garden setting.

The unit applies to individuals who implement a maintenance program for an aquatic environment under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for maintenance activities	1.1 Identify and apply requirements for maintenance of aquatic environment 1.2 Identify potential hazards and risks, and implement safe working practices to address risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Select and prepare tools, equipment and machinery for use 1.4 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task 1.5 Identify environmental implications associated with maintenance activities and report to supervisor
2. Maintain aquatic organisms	2.1 Identify indigenous, exotic and pest aquatic animals and plants for specific aquatic environment 2.2 Monitor aquatic plants and animals and record and maintain relevant data and apply to aquatic plant maintenance activities 2.3 Report issues to supervisor, with suggestions for action 2.4 Implement control methods for excess aquatic animals and plants, and identified pest animals and plants 2.5 Process waste plant and animal material with regards to environmental issues
3. Maintain water quality	3.1 Monitor aquatic environment water quality and input water resource 3.2 Record and maintain monitoring data, and apply to water quality maintenance activities 3.3 Remove and process debris using appropriate equipment 3.4 Report water quality issues to supervisor, with suggestions for remedial action 3.5 Discharge water, clean environment, and recharge water from designated storage area or other input water resource

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use clear language to report environmental, organism or water quality issues and recommend suggestions for remedial action

Unit Mapping Information

Assessment Requirements for AHCPGD312 Implement a maintenance program for an aquatic environment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a maintenance program for an aquatic environment on at least one occasion and has:

- interpreted site plans and maintenance program requirements, and used proforma reporting, recording, analysis and work procedure documents
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, used and maintained tools, equipment and machinery required for implementing a maintenance program for an aquatic environment
- scheduled and implemented monitoring activities correctly and recorded, interpreted and applied monitoring data.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of aquatic environment maintenance, including:
 - aquatic systems ecology
 - correct safety procedures working from boats or adjacent to large bodies of water
 - enterprise systems and procedures for the safe operation and maintenance of machinery and equipment in aquatic environments
 - food chain and nutrient cycling in aquatic systems
 - recognition, physiology and biological characteristics of animals and/or plants specific to the aquatic environment
 - regulations and industry standards for water quality requirements in association with specified use
 - relevant legislation regarding water pollution and management

- safe systems and procedures for handling, transporting and storing chemicals and hazardous substances taking into account toxicity levels and environmental impacts
- wildlife habitats associated with the aquatic environment
- workplace requirements applicable to health and safety in the workplace for implementing a maintenance program for an aquatic environment, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - workplace procedures applicable to implementing a maintenance program for an aquatic environment
 - materials, tools, equipment and machinery applicable to implementing a maintenance program for an aquatic environment
 - PPE applicable to implementing a maintenance program for an aquatic environment
- specifications:
 - workplace requirements applicable to health and safety in the workplace for implementing a maintenance program for an aquatic environment
 - site plans and maintenance program requirements applicable to implementing a maintenance program for an aquatic environment
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD401 Design plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design plant displays in a wide range of locations and situations, buildings and structures. It applies to permanent, semi-permanent and temporary displays of plant life under a range of gardening, exhibition, visual merchandising, marketing and commercial leasing and hiring activities.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop the design	1.1 Consult with client to establish the purpose and requirements of

Element	Performance criteria
concept plan	the design 1.2 Evaluate site or location for aesthetic, environmental and physical attributes 1.3 Determine timelines for display and incorporate into the plan 1.4 Clarify budget parameters for concept plan with client or manager 1.5 Develop concept plan using common horticultural conventions
2. Ensure compliance with the design plan	2.1 Present concept plan to client and negotiate agreement on design 2.2 Develop final design plan documentation 2.3 Inspect plants and display materials prior to installation to ensure they meet required quality standard 2.4 Inspect plant display to ensure compliance with design plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD401A Design plant displays.

Assessment Requirements for AHCPGD401 Design plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- develop maintenance programs
- evaluate sites or locations to determine the effect of aesthetic, environmental and physical attributes on nature of display
- research and analyse information about plant and materials specifications, cultural requirements and environmental requirements
- consult with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant display design
- characteristics of a range of plants used in plant displays
- growth and maintenance requirements of plants in natural and artificial environments
- horticultural conventions for design plans
- plant selection
- principles of design
- processes and techniques for preparing, costing and documenting plans for plant displays
- plants commonly used in plant displays

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCPGD403 Design plant displays

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed two different plant displays and has:

- consulted with clients
- evaluated sites or locations to determine the effect of aesthetic, environmental and physical attributes on nature of display
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- determined timelines and budget constraints
- researched and analysed information about plant and materials specifications and cultural requirements
- developed concept plan, design plan and specifications.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant display design, including:
 - characteristics of a range of plants used in plant displays
 - growth and maintenance requirements of plants in natural and artificial environments
 - horticultural conventions for design plans
 - plant selection
 - principles of design
 - processes and techniques for preparing, costing and documenting plans for plant displays
 - client consultation and negotiation techniques
 - plants commonly used in plant displays
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to designing plant displays.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - industry publications, internet and in house sources of information relevant to designing plant displays
 - plant display
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to designing plant displays
- relationships:
 - clients
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPGD404 Plan a plant establishment program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned a plant establishment program on at least one occasion and has:

- consulted with clients
- researched plant species and cultivars and local by-laws and restrictions
- complied with local by-laws and restrictions
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- developed a plant establishment program concept plan
- calculated the cost and spatial and logistical requirements of components of the plant establishment program
- documented plant establishment program, site plan, work procedures, schedules, and specifications.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant establishment program planning, including:
 - identification and establishment techniques of specific plant species and cultivars
 - the advantages and disadvantages of a range of plant establishment procedures
 - maintenance requirements and practices for specific plant species and cultivars, prior to and after initial establishment
 - processes and techniques for preparing, costing and documenting plans for and scheduling plant establishment activities
 - processes and techniques for scheduling plant establishment activities
- local by-laws and restrictions relevant to planning a plant establishment program

- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to planning a plant establishment program.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - industry publications, internet and in house sources of information relevant to planning a plant establishment program
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to planning a plant establishment program
 - local by-laws and restrictions relevant to planning a plant establishment program
- relationships:
 - clients
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPGD503 Manage parks and reserves

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- assess environmental impacts on the immediate and related environments and impact reduction techniques
- assess financial systems, prepare and monitor budgets and liaise effectively with consultants and other industry contacts on the spatial and logistical aspects of management systems and on-ground operations
- assign work, receive and interpret staff feedback and consultants' reports, and respond effectively to achieve management objectives
- interpret business, financial, marketing and human resource management plans
- research and consult to obtain the information required for effective maintenance and development of the park or reserve.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of park and reserve management:
 - asset and resource management
 - budgeting, monitoring systems and allocation of monetary resources
 - legislative and regulatory requirements relevant to parks and reserve land use applications and management activities including OHS, HAZCHEM, dangerous goods, duty of care and Australian Standards as they apply to Parks and Gardens - AS/NZS 4486.1:1997
 - management information systems
 - performance management and benchmarking

- policies applying across all levels of government and within the specific region, including those under catchment plans
- principles of the Australian Natural Heritage Charter and the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places and the Burra Charter
- sports and recreational land use applications and associated environmental implications
- staff training and development principles, practices and techniques
- technologically assisted management tools such as computing systems, software and hardware, and telecommunications equipment.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD504 Develop and implement a streetscape management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and implement a streetscape management plan.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define the need for a streetscape	1.1 Identify the management plan objectives for the streetscape 1.2 Consult with client and identify brief requirements

Element	Performance criteria
management plan	1.3 Identify a planning team including specialists and consultants
2. Undertake preliminary planning activities	2.1 Identify major stakeholders 2.2 Determine the availability of specialists to assist in management planning work and prepare contracts where required 2.3 Establish timelines for development of the management plan and reporting arrangements to client 2.4 Identify required resources for developing management strategies
3. Prepare a site description	3.1 Identify and map landscape values of the area 3.2 Identify and map physical features and characteristics of the streetscape 3.3 Research land , including current, cultural and historical modifications, and determine and record their effects on the streetscape 3.4 Assess and document physical condition of site 3.5 Document the biological characteristics of the site
4. Analyse site information and description	4.1 Evaluate information in terms of core principles and objectives 4.2 Produce documents, including plans, technical reports and maps 4.3 Determine priorities and key management issues 4.4 Identify and document opportunities and constraints to meeting planning objectives and goals 4.5 Make a presentation to clients and residents and incorporate feedback into planning documentation
5. Identify management strategies	5.1 Identify management strategies that address defined objectives 5.2 Design management strategies to alleviate existing impacts or to target management action 5.3 Cost management strategies and compare to existing budgets and available resources 5.4 Plan implementation of work to prioritise outcomes and management resource allocation 5.5 Consult with clients and residents and incorporate feedback into documentation
6. Prepare the management plan	6.1 Develop a draft management plan that includes site information and management strategies 6.2 Consult with stakeholders and clients and incorporate agreed changes into the final plan 6.3 Present final plan to client

Element	Performance criteria
7. Implement the management plan	7.1 Implement the management plan within predetermined budget, and according to the schedule and strategies set out in the plan 7.2 Modify the implementation strategy to address on-going feedback from clients and residents 7.3 Provide reports to clients and residents on the progress of implementation works

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD504A Develop and implement a streetscape management plan.

Assessment Requirements for AHCPGD504 Develop and implement a streetscape management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- define the need for a management plan
- undertake preliminary planning activities
- analyse site information and description
- identify management strategies
- prepare the management plan
- prepare a site description
- implement the management plan

Knowledge Evidence

The candidate must explain:

- principles and practices for streetscape management planning
 - basic civil design
 - community consultation processes
 - horticultural, landscape and arboricultural practices used in streetscape management
 - landscape assessment, survey and analysis techniques
 - management planning principles and issues
 - soil, plant and water testing processes and procedures, interpretation and application of results

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PGD505 Conduct comprehensive inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct a compliance audit of park or recreational facilities to identify non-conformities with Australian Standards, legislative and work health and safety requirements, as well as manufacturers' standards.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for comprehensive	1.1 Determine the specific facilities and equipment to be inspected as well as the purpose of the inspection as outlined in the operational

Element	Performance criteria
inspection of park facilities	request 1.2 Identify the tools and equipment for testing and inspection and confirm availability with appropriate personnel 1.3 Carry out pre-operational and safety checks on tools and equipment 1.4 Prepare appropriate checklists and reporting formats to suit the activity 1.5 Identify the types of facilities from checklist descriptions
2. Undertake comprehensive inspection of park facilities	2.1 Identify and record instances of non-conformity with Australian Standards, work health and safety guidelines and manufacturers' standards 2.2 Undertake inspections for structural integrity in an efficient and safe manner, according to enterprise policy. 2.3 Identify and detail safety risks and hazards and situations. 2.4 Ensure that checklist entries are concise and accurate. 2.5 Undertaken inspections according to OHS requirements.
3. Assess age and predict effective lifespan of existing park facilities	3.1 Identify the manufacturer of playground equipment and structures through reference to original plans and specifications 3.2 Determine and record the age and future lifespan of park facilities 3.3 Estimate and record the cost of repair or replacement of park facilities
4. Submit report and recommendations	4.1 Address situations requiring urgent action 4.2 Prepare concise and accurate reports and submit to management 4.3 Review existing management systems, particularly regarding frequency of inspection, and make improvements in consultation with management 4.4 Make recommendations for future action that are consistent with industry standards and best practice 4.5 Submit collected data and information for inclusion on the asset management system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD505A Conduct comprehensive inspection of park facilities.

Assessment Requirements for AHCPGD505 Conduct comprehensive inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare for a comprehensive inspection of park facilities
- carry out a comprehensive inspection of park facilities
- interpret design symbols and terminology
- interpret standards, specifications and legal requirements
- determine age and calculate effective lifespan of existing park facilities
- estimate costs of repair or replacement

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of park facility inspection
 - different modes of non-conformity that may be identified in relation to specific park facilities and equipment
 - hazard identification, assessment and control
 - information management systems such as AS4456
 - hazards associated with conducting a comprehensive inspection of park facilities and equipment, and the controls necessary to remove or minimise associated risks
 - park facilities and equipment including installation methods, intended use, intended users and safety parameters
 - practical understanding of inspection and auditing procedures and techniques, and legal and enterprise reporting requirements for recommendations on maintenance, repair and replacement of park facilities
 - practical understanding of the terminology used to describe different components of park facilities and equipment

- relevant national industry standards such as AS486.1, AS4422, AS1924.1 and AS1924.2)
- work health and safety legislative requirements and Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD506 Manage parks and reserves

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to manage parks and reserves, including reviewing the organisation, identifying problems, researching and communicating potential solutions and their impact.

The unit applies to individuals who apply specialist skills and knowledge to manage parks and reserves, take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review organisation	1.1 Identify goals and objectives, including cultural for park and reserve management

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Identify external agencies requirements and objectives for parks and reserves management</p> <p>1.3 Review asset database, condition reports and service levels</p> <p>1.4 Consult with appropriate personnel to review strengths, weaknesses, opportunities and threats, and best communication methods for staff, community, and user groups</p>
2. Identify problem	<p>2.1 Determine quantity, quality, and timing of supply of each input and service as required by business plan and cash flow budgets</p> <p>2.2 Determine new or potential problems that would affect delivery of identified goals and objectives</p> <p>2.3 Determine inefficiencies, stock outs and system problems</p>
3. Research solutions	<p>3.1 Identify solutions and their impact if adopted</p> <p>3.2 Confirm that purchasing system and records enable selection of suppliers and arrangement of orders</p> <p>3.3 Review improvements affecting business planning, personnel, morale, productivity, and systems efficiency</p> <p>3.4 Establish key performance outcomes and indicators to measure performance of all park or reserve operations and personnel</p> <p>3.5 Undertake benchmarking according to workplace requirements</p>
4. Communicate solutions and their impact	<p>4.1 Develop and implement communication methods</p> <p>4.2 Seek feedback from staff, community, and user groups</p> <p>4.3 Document recommendations for improvements to operations that are supported by appropriate evidence and reasoned arguments, and present to senior management</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding goals, objectives and requirements of park or reserve management plans
Oral communication	<ul style="list-style-type: none"> Initiate discussions with staff community and user groups, using clear language and standard industry terminology to identify problems, research and communicate solutions and their impact

Assessment Requirements for AHCPGD506 Manage parks and reserves

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed a park or reserve on at least one occasion and has:

- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- liaised effectively with consultants and other industry contacts on management systems and on-ground operations
- assessed and monitored budgets and allocation of monetary resources
- interpreted business, financial, cultural, marketing and human resource management plans
- assessed environmental impacts of management decisions on the immediate and related environments
- researched and obtained information required for effective maintenance and development of the park or reserve
- assigned work, received and interpreted staff feedback and consultant reports, and responded effectively to achieve management objectives
- identified, documented and recommended improvements to operations and presented to senior management.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of park and reserve management, including:
 - asset and resource management
 - budgeting, monitoring systems and allocation of monetary resources

- legislative and regulatory requirements relevant to parks and reserve land use applications and management activities including hazardous chemicals, dangerous goods, duty of care and Australian standards relevant to parks and reserves management
- management information systems
- performance management and benchmarking
- policies applying across all levels of government and within the specific region, including those under catchment plans relevant to managing parks or reserves
- principles of the Australian Natural Heritage Charter and the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places and the Burra Charter
- sports and recreational land use applications and associated environmental implications
- staff training and development principles, practices and techniques
- computer software and hardware, and telecommunications equipment relevant to managing parks or reserves
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to managing parks or reserves.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources:
 - park or reserve business, financial, marketing and human resource management plans
 - computer software and hardware, and telecommunications equipment relevant to managing parks or reserves
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to managing parks or reserves
 - legislative and regulatory requirements relevant to parks and reserve land use applications and management activities including hazardous chemicals, dangerous goods, duty of care and Australian standards relevant to parks and reserves management
 - policies applying across all levels of government and within the specific region, including those under catchment plans relevant to managing parks or reserves
 - Australian Natural Heritage Charter and the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places and the Burra Charter
 - sports and recreational land use applications
- relationships:

- staff, consultants and senior management
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPGD507 Manage plant cultural practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed plant cultural practices on at least one occasion and has:

- allocated resources
- contracted specialist services
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- determined and implemented staff training and development where required
- determined plant cultural requirements
- developed a plant cultural program and budget documentation
- planned and scheduled of operations
- managed contingencies
- supervised, monitored and appraised the performance of work team and contracted services
- completed plant cultural program report.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant cultural practice management, including:
 - budgeting and planning
 - operation and maintenance of irrigation systems
 - plant anatomy, physiology, morphology, taxonomy and nomenclature relevant to program
 - plant cultural practices
 - plant identification and selection

- plant nutrition requirements and practices
- soil types, properties, field tests and sampling techniques
- staff and contractor supervision and performance appraisal
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to managing plant cultural practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources:
 - soil and growing media sampling and testing equipment
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to managing plant cultural practices
- relationships:
 - staff, contractors and specialist sub-contractors
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD508 Plan the restoration of parks and gardens

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to plan the restoration of parks and gardens of historical or cultural significance, develop a comprehensive restoration program of works and develop a relevant site plan, specifications and work procedures.

The unit applies to individuals who apply specialist skills and knowledge to planning the restoration of parks and gardens, take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPGD508 Plan the restoration of parks and gardens

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned the restoration of parks and gardens on at least one occasion and has:

- consulted with clients
- determined requirements of the restoration work
- complied with legislative requirements
- researched and evaluated information
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- calculated the cost and spatial and logistical requirements of components of the restoration works
- selected restoration procedures that are consistent with the agreed concept plan, appropriate to the site and account for historical and cultural values, available resources and relevant environmental factors
- prepared and documented the restoration plan and specifications.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of park and garden restoration, including:
 - construction procedures, plant selection and cultural practices for historically or culturally significant parks and gardens
 - growth habits and cultural requirements of specific plants under a range of soil and environmental conditions
 - historic parks and gardens management principles and guidelines
 - legislation and regulations relating to heritage sites and restoration works

- maintenance requirements and practices for specific plants prior to and after initial establishment
- principles of the Australian Natural Heritage Charter, the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places and the Burra Charter
- role of project briefs and client consultation processes in planning restoration works
- site evaluation techniques, including methods of analysing the condition of soils, plants and waterways for restoration activities
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to planning the restoration of parks and gardens.
-

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources:
 - computer software and hardware relevant to planning the restoration of parks and gardens
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to planning the restoration of parks and gardens
 - legislative and regulatory requirements relevant to planning the restoration of parks and gardens
 - Australian Natural Heritage Charter and the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places and the Burra Charter
- relationships:
 - clients, other professionals
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPGD509 Develop and implement a streetscape management plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed and implemented a streetscape management plan on at least one occasion and has:

- consulted with clients, planning team, major stakeholders and residents
- defined the need for a management plan
- undertaken preliminary planning activities
- prepared a site description
- analysed site information and description
- identified and costed management strategies
- prepared and documented the management plan
- implemented the management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for streetscape management planning, including:
 - basic civil design
 - client and stakeholder consultation processes
 - horticultural, landscape and arboriculture practices used in streetscape management
 - landscape assessment, survey and analysis techniques
 - management planning principles and issue identification strategies
 - site description and management plan documentation and reporting
 - plants commonly used in streetscapes and their growing requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources:
 - soil, plant and water test results
 - sources of information on current, cultural and historical modifications relevant to the development and implementation of a streetscape management plan
- relationships:
 - clients, planning team, major stakeholders and residents
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD510 Conduct comprehensive inspection of park facilities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to conduct a comprehensive inspection of park or recreational facilities to identify non-conformities with Australian standards, legislation and workplace health and safety requirements, as well as industry and manufacturer specifications.

The unit applies to individuals who apply specialist skills and knowledge to conducting comprehensive inspections of park or recreational facilities, take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to a range of complex problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Parks and Gardens (PGD)

Elements and Performance Criteria

Assessment Requirements for AHCPGD510 Conduct comprehensive inspection of park facilities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted a comprehensive inspection of three different park facilities and has:

- prepared for and undertaken a comprehensive inspection of park facilities
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- selected, used and maintained tools and equipment required for testing and comprehensive inspection of park facilities
- interpreted Australian standards, workplace health and safety and workplace standards, industry and manufacturer specifications
- interpreted plans, design symbols and terminology
- determined age and calculated effective lifespan of existing park facilities
- estimated costs of repair or replacement of existing park facilities
- completed inspection records and reports, including photographs where required and submitted to management
- made improvements to inspection documentation or practice
- made recommendations to management.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of park facility inspection, including:
 - different modes of non-conformity that may be identified in relation to specific park facilities and equipment
 - hazard identification, assessment and control
 - information management systems relevant to park facilities inspection

- software and hardware relevant to park facilities inspection
- hazards associated with conducting a comprehensive inspection of park facilities and equipment, and the controls necessary to remove or minimise associated risks
- park facilities and equipment including installation methods, intended use, intended users and safety parameters
- practical understanding of inspection and auditing procedures and techniques, legal and workplace reporting requirements for recommendations on maintenance, and estimating cost of repair and replacement of park facilities
- practical understanding of the terminology used to describe different components of park facilities and equipment
- Australian standards relevant to park facilities
- legislative requirements and codes of practice applicable to public use of park facilities
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to conducting a comprehensive inspection of park facilities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources:
 - workplace procedures applicable to conducting a comprehensive inspection of park facilities
 - materials, tools and equipment applicable to conducting a comprehensive inspection of park facilities
 - site plans applicable to conducting a comprehensive inspection of park facilities
 - information management system, software and hardware applicable to park facilities inspection
 - photographic device
- specifications:
 - workplace requirements applicable to health and safety in the workplace for conducting a comprehensive inspection of park facilities
 - industry and workplace specifications, and Australian standards, applicable to park facilities and conducting a comprehensive inspection of park facilities
 - legislation and codes of practice applicable to public use of park facilities and conducting a comprehensive inspection of park facilities
- relationships:
 - management
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPHT102 Support horticultural production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to undertake routine horticultural production work under direct supervision and to support the horticultural production work of others.

The unit applies to individuals who support horticultural production work while working alongside a supervisor, exercising limited autonomy within established and well-known parameters. They identify and seek help with simple problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials, tools and equipment for horticultural production work	1.1 Collect required materials, tools and equipment according to lists provided and supervisor instructions 1.2 Check materials, tools and equipment required to carry out routine horticultural production work 1.3 Fit and use personal protective equipment (PPE) applicable to job

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements 1.4 Demonstrate correct manual handling techniques when loading and unloading materials 1.5 Report faulty or unsafe tools, equipment or PPE to supervisor 1.6 Provide horticultural production work support according to work health and safety requirements and supervisor instruction 1.7 Recognise and report workplace hazards to supervisor
2. Undertake horticultural production work as directed	2.1 Follow instructions and directions provided by supervisor, and seek clarification when necessary 2.2 Interact with other staff and customers in a professional manner 2.3 Follow workplace policy and procedures in relation to workplace practices, handling and disposal of materials 2.4 Report problems or difficulties in completing work to required standards or timelines to supervisor
3. Clean up on completion of work	3.1 Store materials and dispose of waste materials according to supervisor instructions 3.2 Clean, maintain and store tools and equipment according to supervisor instructions 3.3 Report work outcomes and malfunctions, faults, wear or damage of tools to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> • Use clear language to report malfunctions, faults, wear or damage to tools • Participate in verbal exchanges to respond to questions and clarify information

Assessment Requirements for AHCPHT102 Support horticultural production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has supported horticultural production work on at least two occasions, and has:

- prepared materials, tools and equipment for horticultural production work
- applied safe work practices
- undertaken routine horticultural production work as directed, including the safe use and operation of farm tools and equipment
- cleaned up and disposed of waste material on completion of work, consistent with environmental and workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for supporting production of horticultural crops:
 - planting, picking, packing, loading and transporting techniques support work
 - safe work practices used in horticultural production work
 - use of horticultural tools and equipment, including the safe use and operation of farm tools and equipment
- workplace health and safety requirements and environmental protection legislation applicable to supporting horticultural production.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to supporting horticultural production work
 - horticultural production materials, tools and equipment
 - personal protective equipment applicable to supporting horticultural production work
- relationships:
 - supervisor, staff and customers
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPTH204 Undertake field budding and grafting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to bud and graft trees, shrubs, vines and other plant types in nurseries or in-field situations.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare parent material for budding and grafting	1.1 Follow workplace hygiene practices to ensure tools and equipment are clean 1.2 Prepare plant material and use a suitable method of taking budding or grafting material 1.3 Select and use appropriate tools

Element	Performance criteria
2. Prepare budding and grafting materials	2.1 Select budding/grafting material for propagation 2.2 Use appropriate storage methods to maintain viability of materials 2.3 Dispose of discarded material 2.4 Prepare stock according to species guidelines 2.5 Handle budding/grafting materials and stock in a way that prevents damage
3. Bud/graft scion	3.1 Select budding/grafting method according to species guidelines 3.2 Seal bud/graft is sealed according to instructions 3.3 Affix labels and identification 3.4 Complete records accurately and timely 3.5 Identify, rectify or report out-of-specification process and equipment performance
4. Complete budding/grafting activities	4.1 Clean tools and equipment 4.2 Dispose of or store unused grafting material 4.3 Collect, treat, dispose of or recycle waste generated by both the grafting and cleaning procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH204A Undertake field budding and grafting.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT204 Undertake field budding and grafting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and prepare stock for budding and grafting
- demonstrate a range of budding and grafting techniques
- maintain labels and records of the budding and grafting operation
- store unused grafting material
- treat plants after budding/grafting

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for field budding and grafting
 - cleaning requirements of work area and equipment
 - common problems and corrective action required
 - environmental issues and controls
 - importance of selection and use of rootstock
 - maintenance requirements of equipment
 - operation, components and purpose of budding/grafting and equipment
 - plant features and processes relevant to budding and grafting
 - procedures and responsibilities for reporting problem
 - recording requirements and procedures
 - root stocks and scion stock
 - stages of the budding/grafting procedure and their purpose

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCPHT212 Perform manual pollination of crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has manually pollinated a crop on at least two occasions and has:

- selected, positioned, used and maintained manual pollination tools and equipment
- minimised environmental impacts associated with manual pollination of crops
- followed industry and workplace biosecurity procedures
- applied workplace health and safety requirements
- applied manual pollination equipment operating instructions
- used appropriate crop manual pollination technique.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- manual pollination:
 - purpose
 - optimum flowering and pollination conditions
 - techniques
 - tools and equipment
- environmental impacts associated with manual pollination of crops
- industry and workplace biosecurity procedures
- workplace requirements applicable to health and safety in the workplace for manual pollination of crops
- manual pollination equipment operating instructions.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - manual pollination tools and equipment
 - personal protective equipment applicable to manual pollination
- specifications:
 - manual pollination equipment operating instructions
 - workplace requirements applicable to health and safety in the workplace and manual pollination of crops
 - industry and workplace biosecurity procedures applicable to manual pollination of crops
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT213 Perform plant blocking on

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to block on plants including preparing and completing blocking on activities.

The unit applies to individuals who block on plants under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to block on plants	1.1 Confirm plant block on activities and substrate with supervisor 1.2 Select tools, equipment, substrate and materials appropriate to task 1.3 Identify environmental and biosecurity implications associated with blocking on and minimise impact 1.4 Recognise workplace hazards and report safety concerns 1.5 Select, fit, use and maintain personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	applicable to the task and workplace safety requirements
2. Block on plants	2.1 Position plant in blocking on substrate 2.2 Flood substrate with water 2.3 Check plant health, substrate water flow and drainage 2.4 Adjust substrate water flow
3. Complete blocking on activities	3.1 Remove and dispose of waste material 3.2 Clean and return tools and equipment to required location 3.3 Identify and report unserviceable tools and equipment according to workplace procedures 3.4 Record blocking on activities according to workplace procedures 3.5 Report blocking on activities to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations and products
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare blocking on activity records
Oral Communication	<ul style="list-style-type: none"> Use clear language to confirm and report blocking on activities and report tool and equipment unserviceabilities
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Get the work done	<ul style="list-style-type: none"> Take responsibility for routine decisions about blocking on activities and reflect on outcomes to identify effectiveness of decisions

Assessment Requirements for AHCPHT213 Perform plant blocking on

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed plant blocking on, on at least three occasions and has:

- selected, positioned, used and maintained plant blocking on tools, equipment, substrate and materials
- minimised environmental impacts associated with plant blocking on
- followed industry and workplace biosecurity procedures
- applied workplace health and safety requirements
- flooded block on substrate, checked plant health and adjusted water flow
- recorded and reported plant blocking on activities and unserviceable tools and equipment
- removed and disposed of waste material.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of blocking on substrate, including:
 - clay aggregate
 - coco coir
 - perlite
 - rockwool
 - vermiculite
- plant blocking on tools and equipment operating instructions
- purpose and procedures for plant blocking on
- environmental impacts associated with blocking on plants
- industry and workplace biosecurity procedures

- workplace requirements applicable to health and safety in the workplace for blocking on plants.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - plant blocking on tools, equipment, substrate and materials
 - personal protective equipment applicable to plant blocking on
- specifications:
 - plant blocking on equipment operating instructions
 - workplace requirements applicable to health and safety in the workplace and blocking on of plants
 - industry and workplace biosecurity procedures applicable to blocking on of plants
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT214 Support horticultural crop harvesting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to support horticultural crop harvesting, including preparing equipment for harvesting, harvesting crops and transporting crops.

The unit applies to individuals who support horticultural crop harvesting under general supervision and exercise limited autonomy or accountability for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for harvest	1.1 Carry out pre-operational and safety checks on tools, equipment and machinery 1.2 Recognise workplace hazards and report safety concerns 1.3 Select, fit, use and maintain personal protective equipment applicable to the task and workplace safety requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Harvest the crop	2.1 Estimate readiness of crop for picking according to supervisor instructions 2.2 Apply harvesting processes that minimise crop damage 2.3 Carry out basic sorting and grading according to workplace procedures 2.4 Clean and maintain harvesting tools, equipment and machinery according to industry standards 2.5 Report harvesting problems to supervisor
3. Transport the crop	3.1 Use safe manual handling when handling containers 3.2 Move and stack containers to minimise damage to the crop 3.3 Maintain temperature of the harvested crop 3.4 Transport harvested crop to the processing or storage area 3.5 Maintain containers in good working order according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to report harvesting problems
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Assessment Requirements for AHCPHT214 Support horticultural crop harvesting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has supported horticultural crop harvesting on at least two occasions and has:

- applied workplace health and safety requirements
- estimated the readiness of crop for picking
- harvested the crop using the correct procedure
- selected and graded produce at picking where required
- stacked produce in containers without causing damage or losses
- transported produce according to enterprise requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for harvesting horticultural crops
- workplace requirements applicable to health and safety in the workplace and horticultural crop harvesting
- the effect of adverse climatic conditions which may downgrade the quality of affected crop, prevent or impede harvest operations or severely influence the time taken to complete the harvest program, such as:
 - rain
 - hail
 - extreme wind with dust
 - very high ultraviolet radiation
- recognition of crop maturity and readiness for picking
- enterprise quality procedures
- grading characteristics of each crop

- the importance of maintaining quality of produce, including cooling requirements and quick transport to processing areas.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - horticultural crop harvesting tools, equipment and machinery
 - personal protective equipment applicable to horticultural crop harvesting
- specifications:
 - workplace requirements applicable to health and safety in the workplace and horticultural crop harvesting
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT215 Plant horticultural crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to plant horticultural crops in the annual, vegetable and flower growing industries, including preparing for crop planting, preparing site and plant material for planting and completing planting operations.

The unit applies to individuals who plant horticultural crops under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for crop planting operations	1.1 Confirm crop planting activities and instructions with supervisor 1.2 Select tools, equipment and machinery appropriate for crop planting 1.3 Identify workplace health and safety hazards, and report to supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Select and maintain personal protective equipment (PPE) according to workplace health and safety requirements 1.5 Fit and use PPE applicable to the task being undertaken
2. Prepare the site and plant material for planting	2.1 Prepare soil or growing media according to instructions 2.2 Carry out crop protection measures according to instructions 2.3 Apply pre-planting treatments according to instructions where required 2.4 Store planting material to required location
3. Carry out planting operations	3.1 Operate soil preparation tools, equipment and machinery where required according to instructions and manufacturer instructions 3.2 Locate planting material according to instructions 3.3 Store, handle and transport planting materials to the site 3.4 Plant crop according to instructions 3.5 Identify environmental and biosecurity implications associated with planting crops, and minimise impact
4. Complete planting operations	4.1 Water plants in and apply post-planting treatments 4.2 Clean and return tools, equipment and machinery to required location 4.3 Identify and report unserviceable tools, equipment and machinery according to workplace procedures 4.4 Record and report planting operations according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCPHT215 Plant horticultural crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed horticultural crop planting on at least one occasion, and has:

- selected, used and maintained crop planting tools and equipment
- applied workplace health and safety requirements
- applied treatments under supervision where required
- operated and maintained crop planting machinery where required according to manufacturer specifications
- located planting material
- minimised environmental impacts associated with crop planting
- followed industry and workplace biosecurity procedures
- recorded and reported planting operations and unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for planting horticultural crops, including:
 - basic preparation of soil and growing media
 - importance of correct timing and procedures for crop planting
 - importance of field hygiene and quality control in regard to crop planting
 - nutritional, water and other requirements of the crop
 - basic principles of pest, weed and disease control
 - pre-planting soil and plant treatments and their importance
 - basic soil structure and health
- workplace requirements applicable to health and safety in the workplace for planting horticultural crops

- horticultural crop planting tools, equipment and machinery operating instructions and manufacturer specifications
- environmental impacts associated with planting horticultural crops
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crop planting tools, equipment and machinery
 - pre-planting soil and plant treatment material
 - personal protective equipment applicable to planting horticultural crops
- specifications:
 - horticultural crop planting tools, equipment and machinery operating instructions and manufacturer specifications
 - workplace requirements applicable to health and safety in the workplace and planting horticultural crops
 - industry and workplace biosecurity procedures applicable to planting horticultural crops
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT216 Carry out canopy maintenance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare for crop canopy maintenance, and carry out and complete maintenance and pruning on crop canopies.

The unit applies to individuals who carry out crop maintenance under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for canopy maintenance activities	1.1 Confirm canopy maintenance activities and instructions with supervisor 1.2 Select tools and equipment appropriate to canopy maintenance 1.3 Identify workplace health and safety hazards, and report to supervisor 1.4 Select and maintain personal protective equipment (PPE) according to workplace health and safety requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Fit and use PPE applicable to the task being undertaken
2. Carry out basic canopy maintenance	2.1 Identify and prune unwanted growth 2.2 Remove pruned material out of the canopy 2.3 Perform post-pruning treatments on the canopy 2.4 Shape, support or position canopy according to supervisor instructions 2.5 Use control measures to regulate exposure of the crop to sun and protect crop from damage 2.6 Operate and maintain tools and equipment according to instructions and manufacturer instructions
3. Complete canopy maintenance activities	3.1 Clean, sharpen and return tools and equipment to required location 3.2 Identify and report unserviceable tools and equipment according to workplace procedures 3.3 Dispose of pruned material according to supervisor instructions 3.4 Record and report canopy maintenance activities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about canopy maintenance

Assessment Requirements for AHCPHT216 Carry out canopy maintenance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed canopy maintenance on at least two occasions, and has:

- interpreted instructions and confirmed with supervisor
- selected, used and maintained crop canopy maintenance tools and equipment
- applied workplace health and safety requirements
- applied basic crop maintenance techniques including shaping, supporting and positioning according to supervisor instruction
- removed and disposed of pruning waste material
- recorded and reported canopy maintenance activities according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of canopy maintenance, including:
 - basic canopy maintenance techniques and their importance in relation to the desired quality of fruit
 - the difference between fruiting and non-fruiting wood
 - the effect of different climatic conditions on canopy maintenance requirements
 - the importance of hygiene and quality control when performing basic canopy maintenance activities
- workplace requirements applicable to health and safety in the workplace for crop canopy maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crops with canopies
 - canopy maintenance tools and equipment
 - personal protective equipment applicable to crop canopy maintenance
- specifications:
 - workplace requirements applicable to health and safety in the workplace and crop canopy maintenance
 - work instructions and workplace procedures applicable to crop canopy maintenance
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT217 Undertake field budding and grafting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare parent material and budding and grafting materials for budding and grafting, and bud and graft trees, shrubs, vines and other plant types in nurseries or in-field situations.

The unit applies to individuals who undertake field budding and grafting under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare parent material for budding and grafting	1.1 Confirm budding and grafting activities with supervisor 1.2 Clean tools and equipment according to workplace procedures 1.3 Prepare plant material and use appropriate method for taking budding or grafting material 1.4 Select and use tools and equipment appropriate to field budding and grafting

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Select and maintain personal protective equipment (PPE) according to workplace health and safety requirements 1.6 Fit and use PPE applicable to the task being undertaken
2. Prepare budding and grafting materials	2.1 Select budding and grafting material for propagation 2.2 Use appropriate storage methods to maintain viability of materials 2.3 Dispose of discarded material according to workplace procedures 2.4 Prepare stock according to species guidelines 2.5 Handle budding and grafting materials and stock in a way that prevents damage
3. Bud and graft scion	3.1 Select budding and grafting method according to species guidelines 3.2 Seal bud and graft according to workplace procedures 3.3 Affix labels and identification
4. Complete budding and grafting activities	4.1 Clean, maintain and return tools and equipment to required location 4.2 Identify and report unserviceable tools and equipment according to workplace procedures 4.3 Return materials to store and dispose of waste and unused grafting material according to supervisor instructions 4.4 Record and report budding and grafting activities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about field budding and grafting

Assessment Requirements for AHCPHT217 Undertake field budding and grafting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken field budding and grafting on at least three occasions, and has:

- selected, cleaned, used and maintained field budding and grafting tools and equipment
- selected and prepared stock for budding and grafting
- applied workplace health and safety requirements
- stored, removed or disposed of unused grafting material
- applied budding and grafting techniques applicable to plant species
- treated plants after budding and grafting
- recorded and reported budding and grafting activities according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for field budding and grafting, including:
 - cleaning requirements of work area and equipment
 - common problems and corrective action required
 - environmental issues and controls
 - importance of selection and use of rootstock
 - maintenance requirements of equipment
 - operation, components and purpose of budding and grafting equipment
 - plant features and processes relevant to budding and grafting
 - procedures and responsibilities for reporting problems
 - recording requirements and procedures
 - rootstock and scion stock

- stages of the budding and grafting procedure and their purpose
- workplace requirements applicable to health and safety in the workplace for field budding and grafting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - plants, rootstock, and budding and grafting material
 - budding and grafting tools and equipment
 - personal protective equipment applicable to plant budding and grafting
- specifications:
 - workplace requirements applicable to health and safety in the workplace, and for field budding and grafting
 - work instructions and workplace procedures applicable to field budding and grafting
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPHT218 Carry out post-harvest operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to carry out post-harvest operations, including preparing for post-harvest operations, transporting, packing and storing harvested produce.

The unit applies to individuals who carry out post-harvest operations under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for post-harvest operations	1.1 Identify post-harvest treatments, operations to be performed and client specifications with supervisor 1.2 Select materials, tools, equipment and machinery according to post-harvest operations requirements 1.3 Carry out pre-operational and safety checks on tools, equipment and machinery

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify the Hazard Analysis and Critical Control Points (HACCP) and food safety requirements applicable to crop under cultivation</p> <p>1.5 Identify site quarantine protocols and farm and personal hygiene requirements</p>
2. Transport harvested produce	<p>2.1 Transport produce to post-harvest processing or storage area</p> <p>2.2 Maintain required temperature of harvested produce</p> <p>2.3 Maintain containers, materials and equipment in good working order according to workplace requirements</p>
3. Grade, label, treat, weigh and pack produce	<p>3.1 Grade and label produce according to client specifications</p> <p>3.2 Apply post-harvest treatments according to produce requirements</p> <p>3.3 Identify quality parameters of produce and specifications for packaging materials, containers, filling techniques and labelling</p> <p>3.4 Select packaging materials and containers for specific produce</p> <p>3.5 Weigh filled containers, record weight and repack to correct weight</p> <p>3.6 Use required filling techniques for specific containers and produce</p> <p>3.7 Apply wraps and lids, and label containers according to client specifications</p>
4. Store produce in a facility	<p>4.1 Place containers onto pallets or racks to ensure stability and optimum airflow</p> <p>4.2 Transport and arrange pallets or racks in storage facility</p> <p>4.3 Read storage facility monitoring gauges, and report abnormal readings to supervisor</p> <p>4.4 Check condition of stored produce, and remove damaged produce and containers from storage facility</p> <p>4.5 Clean storage facility and packing containers</p> <p>4.6 Record and report post-harvest operations according to workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about post-harvest operations
Writing	<ul style="list-style-type: none"> Use clear language and accurate industry terminology to prepare produce labels and record post-harvest operations
Oral communication	<ul style="list-style-type: none"> Use clear language to confirm post-harvest operations and client specifications and report to abnormal gauge readings and post-harvest operations to supervisor

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
AHCPHT218 Carry out post-harvest operations	AHCPHT205 Carry out post-harvest operations	Minor changes to application Major changes to performance criteria Foundation skills added Assessment requirements updated	Not equivalent

Assessment Requirements for AHCPHT218 Carry out post-harvest operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has carried out post-harvest operations on at least two occasions, and has:

- identified post-harvest treatments and operations to be performed
- applied client specifications and workplace requirements applicable to post-harvest operations
- used a range of equipment for handling and transporting produce
- identified the Hazard Analysis and Critical Control Points (HACCP) and applicable food safety requirements
- transported, graded, treated, packed and stored harvested produce according to market requirements, client specifications and workplace requirements
- labelled produce accurately and correctly
- read storage facility monitoring gauges, and reported abnormal readings
- minimised handling damage to produce
- maintained records of post-harvest operations to allow traceability
- reported on post-harvest operations to supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- client specifications and workplace requirements applicable to post-harvest operations
- HACCP and applicable food safety requirements
- principles and practices of post-harvest operations, including:
 - attributes of workplace produce in relation to desired quality of produce to be presented to client
 - characteristics and procedures for the use of cool rooms

- cool chain principles and practices
- correct storage temperatures for a range of enterprise produce
- disposal of waste materials to minimise damage to external environment
- environmental effects of post-harvest treatments
- humidity levels and the effect of humidity on quality of enterprise produce
- hygiene issues in the handling and storage of plant produce
- industry standards for packaging
- produce handling and cooling requirements
- relationship between quality attributes of produce and packing techniques and packaging
- storage methods for different workplace produce.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - post-harvest tools, equipment and machinery
- specifications:
 - client specifications and workplace requirements applicable to post-harvest operations
 - HACCP and applicable food safety requirements
 - principles and practices of post-harvest operations
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT219 Handle and move mushroom boxes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to handle and move mushroom boxes, including distributing empty boxes, collecting and moving filled boxes, and finalising handing and moving tasks.

The unit applies to individuals who handle and move mushroom boxes under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Distribute boxes for filling to picking rooms	1.1 Select, assemble and position materials, trolleys, tools and equipment appropriate for handling and moving mushroom boxes 1.2 Carry out pre-operational and safety checks on trolleys, tools and equipment 1.3 Follow site quarantine protocols and farm and personal hygiene requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Identify workplace health and safety hazards, and report to supervisor 1.5 Identify environmental and biosecurity implications associated with work, and minimise impact 1.6 Distribute empty boxes to pickers in a timely and efficient manner
2. Collect and move filled boxes	2.1 Coordinate collection of filled boxes with delivery of empty boxes 2.2 Stack filled boxes on trolleys to the recommended height 2.3 Move stacked trolleys safely from picking rooms and with consideration for other traffic flow in the area 2.4 Transfer and stack filled boxes into cool room using safe work practices 2.5 Record cool room air and mushroom pulp temperatures 2.6 Report variations of temperature and anomalies, and take remedial action according to supervisor instructions
3. Finalise tasks	3.1 Clean and return trolleys, tools and equipment to required location 3.2 Identify and report unserviceable trolleys, tools and equipment according to workplace procedures 3.3 Complete daily work records legibly and accurately 3.4 Report work outcomes and seek feedback on performance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about handling and moving mushroom boxes
Writing	<ul style="list-style-type: none"> Use clear language and accurate industry terminology to complete daily work records
Oral communication	<ul style="list-style-type: none"> Use clear language to report cool room and mushroom pulp

Skill	Description
	temperature variations and anomalies, unserviceable trolleys, tools and equipment, and work outcomes to supervisor and seek feedback
Numeracy	<ul style="list-style-type: none"> Estimate mushroom box quantities and packing rate Record cool room air and mushroom pulp temperatures

Assessment Requirements for AHCPHT219 Handle and move mushroom boxes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has handled and moved mushroom boxes on at least three occasions, and has:

- selected, assembled, positioned and maintained mushroom box handling and moving materials, trolleys, tools and equipment
- applied workplace health and safety requirements
- carried out an inventory of mushroom boxes
- estimated and supplied quantities of empty boxes to mushroom pickers in a number of picking rooms
- minimised environmental impacts associated with handling and moving mushroom boxes
- followed industry and workplace biosecurity procedures
- estimated rate of packing for collection
- collected filled boxes to ensure continued smooth flow of picking and packing work
- recorded cool room air and mushroom pulp temperatures
- reported temperature variations and anomalies, and taken remedial action
- completed daily work records and reported work outcomes and unserviceable trolleys, tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for handling and moving mushroom boxes, including:
 - collection and packing procedures
 - quality requirements
 - safe manual handling techniques
 - storage requirements for mushrooms

- workplace requirements applicable to health and safety in the workplace for handling and moving mushroom boxes
- environmental impacts associated with handling and moving mushroom boxes
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - mushroom box handling and moving materials, trolleys, tools and equipment
 - mushroom boxes
 - thermometer
- specifications:
 - workplace requirements applicable to health and safety in the workplace for handling and moving mushroom boxes
 - industry and workplace biosecurity procedures applicable to handling and moving mushroom boxes
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT220 Perform mushroom substrate process tasks

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to perform mushroom substrate process tasks, including preparing and assisting with each process stage and finalising substrate processes.

The unit applies to individuals who perform mushroom substrate process tasks under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for each process stage	1.1 Identify substrate process requirements with supervisor 1.2 Select and prepare tools, equipment and machinery 1.3 Report and fix faults or variations from required settings 1.4 Identify site quarantine protocols, workplace and personal hygiene requirements and food safety requirements when preparing for substrate process stages

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.5 Identify workplace health and safety hazards, and report to supervisor</p> <p>1.6 Identify environmental and biosecurity implications associated with work, and minimise impact</p>
2. Fill units with mushroom substrate	<p>2.1 Operate filling equipment at a speed that maintains continuous operation</p> <p>2.2 Fill units with mushroom substrate according to workplace procedures</p>
3. Assist with spawning processes	<p>3.1 Inspect and report any abnormalities found in spawn</p> <p>3.2 Mix spawn into mushroom substrate</p> <p>3.3 Check spawn usage rate and report variations according to workplace procedures</p> <p>3.4 Apply and mix supplement as required</p> <p>3.5 Install spawned mushroom substrate in spawn run rooms</p> <p>3.6 Take samples of mushroom substrate according to workplace procedures</p> <p>3.7 Check mushroom substrate for presence of pests, and take remedial action as required</p>
4. Prepare and apply casing mixture	<p>4.1 Assemble and check required quantities of pesticides, peat, limestone and additives for casing</p> <p>4.2 Blend casing ingredients according to workplace procedures</p> <p>4.3 Take samples of prepared casing and mushroom substrate before casing has been added</p> <p>4.4 Apply and mix supplement as required</p> <p>4.5 Check casing depth, structure and consistency, and report variations according to workplace procedures</p>
5. Finalise mushroom substrate processes	<p>5.1 Clean and return tools, equipment and machinery to required location</p> <p>5.2 Identify and report unserviceable tools, equipment and machinery according to workplace procedures</p> <p>5.3 Clean up at the end of each process stage</p> <p>5.4 Complete records legibly and accurately</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.5 Report work outcomes and seek feedback on performance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCPHT220 Perform mushroom substrate process tasks

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed mushroom substrate process tasks on at least three occasions, and has:

- selected, prepared and maintained mushroom substrate processing tools, equipment and machinery
- maintained site quarantine protocols and personal hygiene
- applied workplace health and safety requirements
- minimised environmental impacts associated with mushroom substrate process tasks
- followed industry and workplace biosecurity procedures
- filled units with mushroom substrate
- applied spawn into mushroom substrate
- reported spawn usage rate variations, and casing depth, structure and consistency variations
- calculated pesticide, peat, limestone and additive quantities
- prepared and applied casing mixture
- measured casing depth
- completed work records and reported work outcomes and unserviceable tools and equipment to supervisor and sought feedback.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of mushroom substrates, including:
 - food safety standards, hazards and critical control points, quality systems and emergency procedures

- the impact on the rest of the mushroom production cycle of deviations of mushroom substrate quality from workplace standards for substrate
- the mushroom production cycle
- substrate production
- site quarantine protocols
- workplace requirements applicable to health and safety in the workplace for mushroom substrate process tasks
- environmental impacts associated with mushroom substrate process tasks
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - mushroom substrate processing tools, equipment and machinery
 - mushroom substrate and spawn
 - pesticide, peat, limestone, additive and casing mixture
- specifications:
 - food safety standards relevant to mushroom substrate preparation
 - workplace requirements applicable to health and safety in the workplace for mushroom substrate process tasks
 - industry and workplace biosecurity procedures applicable to mushroom substrate process tasks
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT221 Water mushroom crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare and operate watering equipment and complete watering operations for mushroom crops.

The unit applies to individuals who water mushroom crops under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to use watering equipment	1.1 Identify mushroom watering requirements with supervisor 1.2 Assemble and connect watering equipment components to water supply 1.3 Add chemicals to water according to supervisor instructions 1.4 Read and record water meter for the area to be watered

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Identify rooms requiring watering and required watering pattern
2. Operate watering equipment	2.1 Follow site quarantine protocols, workplace and personal hygiene requirements for watering operation 2.2 Check and adjust water pressure to ensure correct spray or droplet pattern is achieved 2.3 Provide and distribute water evenly in the correct quantity and pressure 2.4 Report and fix faults or variations in watering operations 2.5 Identify workplace health and safety hazards, and report to supervisor 2.6 Identify environmental and biosecurity implications associated with work, and minimise impact
3. Finalise watering operations	3.1 Read water meter for area, and record amount of water used 3.2 Disconnect watering equipment and return to storage area 3.3 Identify and report unserviceable watering equipment according to workplace procedures 3.4 Report work outcomes and seek feedback on performance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about watering mushroom crops

Assessment Requirements for AHCPHT221 Water mushroom crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has watered mushroom crops on at least three occasions, and has:

- assembled, connected and maintained watering equipment
- measured correct doses of additives for water
- delivered water to the mushroom crop at required rate and pressure
- estimated flow rate of water by the range of watering equipment in use
- applied workplace health and safety requirements
- minimised environmental impacts associated with watering mushroom crops
- followed industry and workplace biosecurity procedures
- recorded water use
- reported work outcomes and unserviceable tools and equipment to supervisor and sought feedback.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for watering mushroom crops, including:
 - effect on mushrooms of under-watering, overwatering, insufficient evaporation, late watering and moisture imbalance
 - effects of water on casing structure, mycelium, yields and quality
 - factors affecting effective operation of watering tree or other equipment used
 - how panning occurs
 - light, medium and heavy water and when each type is used
 - safe and effective use of fungicides and other water additives

- workplace requirements applicable to health and safety in the workplace for watering mushroom crops
- environmental impacts associated with watering mushroom crops
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - mushroom watering equipment
 - water additives
- specifications:
 - workplace requirements applicable to health and safety in the workplace for watering mushroom crops
 - industry and workplace biosecurity procedures applicable to watering mushroom crops
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT222 Produce trellis dried grapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to produce trellis dried grapes, including summer pruning, emulsion application, crown bunch removal, harvesting and post-harvest drying.

The unit applies to individuals who produce trellis dried grapes under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Summer prune grape crop for trellis drying	1.1 Reduce leaf coverage on fruiting canes to assist cutting, emulsion application and drying 1.2 Cut canes according to workplace requirements 1.3 Leave replacement canes intact and undamaged to ensure next year fruiting 1.4 Spray grapes requiring emulsion treatment to ensure full and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	complete coverage
2. Prepare for harvesting trellis dried grapes	<p>2.1 Recognise workplace hazards and report safety concerns</p> <p>2.2 Select, fit, use and maintain personal protective equipment according to the task and workplace requirements</p> <p>2.3 Identify and hang uncut grapes and cut crown bunches on trellis without causing damage for drying or removal</p> <p>2.4 Sample crop and test for moisture content and fruit maturity</p> <p>2.5 Select harvest tools, equipment and machinery appropriate to harvesting operations</p> <p>2.6 Carry out pre-operational and safety checks on harvesting machinery and ancillary equipment</p>
3. Harvest trellis dried grapes	<p>3.1 Operate harvesting machinery and ancillary equipment according to workplace requirements in a safe manner and at speeds to suit crop conditions</p> <p>3.2 Maximise crop quality by implementing and maintaining standards that meet processor and workplace requirements</p> <p>3.3 Remove, store and treat full bulk bins as soon as possible to minimise deterioration of crop quality</p> <p>3.4 Clean and return harvest tools, equipment and machinery to required location</p>
4. Carry out post-harvest drying	<p>4.1 Select and check drying tools, equipment and machinery</p> <p>4.2 Carry out post-harvest drying as directed to meet processor requirements</p> <p>4.3 Monitor moisture and temperature of crop during drying, and return to bulk bins after appropriate cool down has occurred</p> <p>4.4 Identify and report unserviceable tools, equipment and machinery according to workplace procedures</p> <p>4.5 Report harvest and post-harvest activities to supervisor</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about trellis dried grape production

Assessment Requirements for AHCPHT222 Produce trellis dried grapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced trellis dried grapes on at least one occasion, and has:

- summer pruned vines according to workplace requirements
- identified parts of the vine
- selected, used and maintained trellised grape harvesting and drying tools, equipment and machinery
- applied workplace health and safety requirements
- carried out post-harvest drying
- reported harvest and post-harvest activities, and unserviceable tools, equipment and machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for producing trellis dried grapes, including:
 - crown and cordon bunch picking or removal requirements and procedures
 - environmental impact issues
 - hazard identification and control
 - processor quality standards and requirements
 - summer pruning requirements and procedures
 - year-round preparation required for trellis drying
- workplace requirements applicable to health and safety in the workplace for producing trellis dried grapes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - trellis dried grape crops
 - crop harvesting and drying tools, equipment and machinery
 - personal protective equipment applicable to producing trellis dried grapes
- specifications:
 - workplace requirements applicable to health and safety in the workplace and producing trellis dried grapes
 - work instructions and workplace procedures applicable to producing trellis dried grapes
- relationships:
 - supervisors
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPTH301 Carry out a crop regulation program

Modification History

Not applicable.

Application

This unit of competency describes the skills and knowledge required to carry out a crop regulation program in which thinning and pruning of flower, fruit or vegetable crops is undertaken to control yield and quality.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for the crop regulation program	1.1 Identify the site and operational requirements of the program 1.2 Select crop regulation tools and equipment 1.3 Carry out pre-operational and safety checks on tools, equipment and machinery 1.4 Calibrate and adjust tools, equipment and machinery
2. Implement the crop regulation program	2.1 Identify and organise work teams and contractors 2.2 Co-ordinate work in a sequential, timely and effective manner 2.3 Plan work in an efficient, sequential and co-ordinated manner 2.4 Monitor crop regulation tasks and undertake remedial action where necessary to achieve program objectives
3. Complete crop regulation activities	3.1 Remove and dispose of waste material 3.2 Clean, maintain and store tools, equipment and machinery 3.3 Record or report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

This unit is equivalent to AHCPTH301A Carry out a crop regulation program.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPHT301 Carry out a crop regulation program

Modification History

Release	TP Version	Comment
1	AHC v1.1	Initial release

Performance Evidence

The candidate must demonstrate evidence of their ability to satisfy holistically all of the requirements of unit. Performance should be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the effects on plant growth, habit and production levels of thinning and pruning operations
- co-ordinate work groups
- prepare for crop regulation activities
- carry-out crop thinning procedures as required
- use a range of methods to achieve crop regulation goals
- record or report activities
- store and maintain equipment and materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of crop regulation
 - effects on plant growth, habit and production levels of thinning and pruning operations in relation to the market goals of the enterprise
 - enterprise quality procedures and characteristics of a crop relative to varying market requirements
 - environmental impacts of crop regulation and disposal of waste
 - principles of thinning and pruning and the methods used to achieve crop regulation goals
 - safe work procedures for use of machinery and equipment
 - types of crop regulation materials
 -

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHC PHT302 Prepare raw materials and compost feedstock

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare and mix raw materials into a suitable feedstock mixture, monitor the composting process, conduct quality control inspection and clean up.

The unit applies to individuals who prepare raw materials and compost feedstock under broad direction, and take responsibility for their own work and for the quality of the work of others.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise for processing	1.1 Determine processing requirements from job specifications 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks 1.3 Select required materials, equipment and machinery, and check for

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	safe operation
2. Prepare raw materials and compost the feedstock mixture	2.1 Identify and collect raw materials and additives, and check for physical contamination 2.2 Confirm composting technology and methods to be used according to raw material types and workplace product requirements 2.3 Pre-process raw materials into suitable forms for composting 2.4 Mix pre-processed raw materials into suitable feedstock mixtures for composting 2.5 Handle feedstock mixtures for composting according to technology, appropriate method and industry best practice 2.6 Assign batch numbers or codes, and create batch documentation to enable tracking of batch
3. Monitor composting process	3.1 Monitor composting batch by observing and using field testing equipment 3.2 Maintain processing and operations records for process control and to track batch through the compost production cycle 3.3 Identify and report faults or variations to supervisor, and take remedial action to maintain effective and consistent compost production
4. Conduct quality control inspection	4.1 Inspect and assess finished compost for compliance according to workplace product requirements 4.2 Report faults or variations in compost product 4.3 Adjust and reprocess non-compliant product 4.4 Confirm compliance of compost batch according to workplace product requirements 4.5 Complete batch documentation for compliant compost product 4.6 Inform sales and operational staff members that product is suitable for sale or preparation of value-added products
5. Clean up area	5.1 Clean and secure load-shift machinery and other processing equipment according to workplace procedures 5.2 Clear away raw materials and finished compost products to designated areas, and clean processing site

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about raw material and compost feedstock preparation
Oral communication	<ul style="list-style-type: none"> Use clear language to report compost production faults or variations to supervisor
Numeracy skills	<ul style="list-style-type: none"> Calculate quantities and ratios of raw materials and feedstock mixtures

Assessment Requirements for AHCPHT302 Prepare raw materials and compost feedstock

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared raw materials and compost feedstock on at least three occasions, and has:

- applied workplace health and safety requirements
- prepared raw materials for composting according to workplace product requirements
- established, maintained and completed compost batch documentation
- prepared batches for composting according to defined compost recipes
- conducted and interpreted basic field test results to confirm effective processing and defined intervention required to rectify composting processes
- maintained processing operations records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for preparing composting raw materials, including:
 - Australian composting standards
 - batch documentation techniques
 - characteristics of a range of raw materials
 - compost production cycle
 - compost quality standards
 - fundamental characteristics of compost quality
 - key process control stages critical to consistent compost production
 - overview of systems and technologies used in compost production
 - principles of commercial compost production
 - range and characteristics of categories of compost product

- steps in pre-processing compost materials
- workplace requirements applicable to health and safety in the workplace for preparing raw materials and compost feedstock.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - commercial composting materials, equipment and machinery, and load-shift machinery
 - raw compost materials and feedstock mixtures
 - field testing equipment
- specifications:
 - workplace requirements applicable to health and safety in the workplace for preparing raw materials and compost feedstock
- relationships:
 - supervisor, sales and operational staff members
- timeframes:
 - according to job specification requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPTH305 Regulate crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to regulate crops by thinning and pruning flower, fruit or vegetable crops to control yield and quality.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crop regulation	1.1 Select crop regulation tools, equipment and machinery 1.2 Carry out pre-operational and safety checks on crop regulation tools, equipment and machinery 1.3 Select and prepare chemicals to be used for crop regulation 1.4 Select, use and maintain personal protective equipment (PPE)

Element	Performance criteria
2. Undertake crop regulation	2.1 Identify the plant material to be thinned or pruned 2.2 Undertake the crop regulation program 2.3 Operate crop regulation tools, equipment and machinery safely and effectively 2.4 Record and report signs of diseases and pests
3. Complete crop regulation	3.1 Dispose of waste material removed from the site 3.2 Follow correct manual handling techniques when lifting or moving heavy loads 3.3 Clean, maintain and store tools, equipment and machinery 3.4 Maintain a clean and safe work area 3.5 Record or report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH305A Regulate crops.

Assessment Requirements for AHCPHT305 Regulate crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out pre-operational and safety checks on crop regulation tools, equipment and machinery
- assess the effects on plant growth, habit and production levels of thinning and pruning operations
- interpret requirements for pruning or thinning and work to instructions
- use and maintain a range of plant thinning or pruning tools
- remove and dispose of waste material
- report signs of diseases and pests
- operate crop regulation tools, equipment and machinery

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of crop regulation
 - effect of weather which may prevent or impede crop regulation activities
 - effects on plant growth, habit and production levels of thinning and pruning operations in relation to the market goals of the enterprise
 - enterprise quality procedures and characteristics of a crop relative to varying market requirements
 - principles of thinning and pruning and the methods used to achieve crop regulation goals
 - safe work procedures for use of machinery and equipment
 - tools, equipment and machinery used for crop regulation
 - types of crop regulation materials

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH306 Establish horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish horticultural crops by seed, seedlings or other vegetative means.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare machinery and equipment for use	1.1 Select and prepare machinery and equipment and confirm against the work plan 1.2 Attach and calibrate equipment for operation 1.3 Identify workplace hazards, assess and control risks
2. Prepare for	2.1 Monitor soil and weather conditions for optimal seeding

Element	Performance criteria
horticultural crop establishment	<p>conditions</p> <p>2.2 Recognise and confirm soil conservation and sustainable land management practices and procedures</p> <p>2.3 Confirm and prepare seeding/planting, fertiliser, and pest and weed control requirements</p>
3. Sow/plant the crop	<p>3.1 Undertake seeding/planting and fertiliser applications out</p> <p>3.2 Coordinate pest and weed control treatment with seeding/planting and fertiliser applications</p>
4. Complete seeding/planting operations	<p>4.1 Maintain seeding/planting, machinery and equipment operation records</p> <p>4.2 Report machinery and equipment damage, malfunctions or irregular performance</p> <p>4.3 Clean, secure and store machinery and equipment</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH306A Establish horticultural crops.

Assessment Requirements for AHCPHT306 Establish horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out ground preparation and apply pre-planting treatments
- prepare and service machinery and equipment
- carry out sowing/planting operations and fertiliser application
- monitor the environmental impacts of establishing the crop
- clean, secure and store machinery and equipment
- keep records of the sowing/planting operation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for establishing crops
 - crop types, preparation of seeds/plants, seeding/planting methods and application techniques
 - effects of weather conditions on seeding/planting and fertilising applications
 - enterprise policies for seeding/planting operations and recording and reporting routines
 - fertiliser types, rates of application and crop nutrient requirements
 - operating principles and operating methods for machinery and equipment
 - positive environmental practices, negative environmental impacts and minimisation measures associated with seeding operations
 - personal protective equipment (PPE) and when and how it should be used
 - pre-operational and safety checks, servicing and maintenance procedures for seeding/planting machinery and equipment
 - principles of weight distribution with regard to load shifting and vehicle movement

- procedures for cleaning, securing and storing machinery, equipment and materials
- relevant legislation, regulations and codes of practice with regard to workplace health and safety and the use and control of hazardous substances
- sustainable land management and soil conservation techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH307 Prepare raw materials and compost feedstock

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and mix raw materials into a suitable feedstock mixture for commercial-scale composting and compost feedstock mixtures to manufacture compost products.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for processing	1.1 Review job sheet to identify all processing requirements 1.2 Check machinery, equipment and materials for serviceability and safe operation 1.3 Identify and assess workplace hazards and take action to

Element	Performance criteria
	minimise risk to self and others
2. Prepare raw materials and compost the feedstock mixture	2.1 Identify, collect and check raw materials and additives for physical contamination 2.2 Confirm composting technology and methods to be used as appropriate to raw material types and enterprise product requirements 2.3 Pre-process raw materials into suitable forms for composting 2.4 Mix pre-processed raw materials into suitable feedstock mixtures for composting 2.5 Handle feedstock mixtures for composting according to technology, appropriate method and industry best practice 2.6 Assign batch numbers or codes and create batch documentation to enable tracking of batch
3. Monitor composting process	3.1 Monitor composting batch by observing and using field testing equipment 3.2 Maintain processing and operations records for process control and to track batch through the compost production cycle 3.3 Report to supervisor faults or variations observed at any stage of the process and take remedial action to maintain effective and consistent compost production
4. Conduct quality control inspection	4.1 Inspect and assess finished compost for compliance with enterprise product requirements 4.2 Report faults or variations 4.3 Reprocess non-compliant product with necessary adjustments 4.4 Confirm compliance of compost batch with product requirements 4.5 Complete batch documentation for compliant compost product 4.6 Inform sales and operational staff members that product is suitable for sale and/or preparation of value-added products
5. Clean up area	5.1 Clean loading-shifting machinery and other processing equipment 5.2 Clear away raw materials and finished compost products to designated areas and clean processing site

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH307A Prepare raw materials and compost the feedstocks.

AHCPHT310 Coordinate horticultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate crop harvesting activities.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crop harvesting	1.1 Identify the crop to be harvested and the requirements and procedures to assure crop quality 1.2 Determine crop maturity by experience, specification charts, aids or devices and according to client, enterprise and industry quality assurance specifications

Element	Performance criteria
	1.3 Identify that suitable weather conditions for picking are established according to enterprise work procedures 1.4 Select tools, equipment and machinery according to harvest requirements 1.5 Carry out pre-operational and safety checks on tools, equipment and machinery
2. Coordinate harvesting activities	2.1 Inform seasonal labour of the harvest plan/strategy 2.2 Assign daily work tasks to harvest staff 2.3 Ensure work program allows for contingencies caused by weather or other interruptions 2.4 Monitor the harvest and coordinate changes to work activities as required
3. Monitor crop quality throughout harvest	3.1 Ensure harvesting procedures and the harvested crop comply with specifications 3.2 Ensure crop is handled in a way that minimises damage 3.3 Ensure sorting and grading of the crop complies with specifications 3.4 Minimise post-harvest deterioration in crop storage according to enterprise work procedures 3.5 Transport the crop with minimum damage 3.6 Calculate and record picking tallies or harvest yields
4. Deliver crop to specified destination	4.1 Confirm delivery details including quantity, timing and destination 4.2 Deliver crop with damage levels that are within specifications 4.3 Ensure crop complies with client, enterprise and industry quality assurance specifications 4.4 Complete delivery documentation accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPHT310 Coordinate horticultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- coordinate a work group
- maintain harvest requirements
- monitor crop quality
- prepare for crop harvesting activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for
 - effect of adverse climatic conditions (e.g., rain, hail, extreme wind, or very high ultraviolet radiation), which may prevent or impede crop harvesting operations, or severely influence the time taken to complete the tasks necessary to fulfil the operation
 - enterprise quality procedures and characteristics of a crop relative to varying market requirements
 - grading characteristics of each crop
 - importance of maintaining quality of produce including cooling requirements and quick transport from field to processing areas
 - industry wage rates and conditions, contractors services, conditions and rates
 - licensing requirements for use of forklifts, trucks and machinery
 - recognition of the maturity parameters of a range of crops

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT311 Install and maintain vertical hanging trellis

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to install and maintain vertical hanging trellis.

The unit applies to individuals who install and maintain vertical hanging trellis under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to install and maintain vertical hanging trellis	1.1 Clarify requirements of the installation and maintenance work with supervisor 1.2 Identify and select tools, equipment and material resource requirements according to scope of work and supervisor instructions 1.3 Recognise workplace hazards and report safety concerns 1.4 Identify environmental and biosecurity implications associated with installation and maintenance work, and minimise impact

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Select, fit, use and maintain personal protective equipment applicable to the task and workplace safety requirements
2. Install vertical hanging trellis	2.1 Identify appropriate starting point for installation activities 2.2 Position equipment and materials at commencement and during installation activities to ensure they are ready for use 2.3 Identify appropriate suspension point for vertical hanging trellis 2.4 Attach vertical hanging trellis to suspension point 2.5 Attach base of plant to vertical hanging trellis using loose overhand knot or trellis clip
3. Maintain vertical hanging trellis and plants	3.1 Inspect trellis for signs of disrepair 3.2 Rectify and report disrepair according to workplace procedures 3.3 Evaluate plant growth and attach vertical hanging trellis to new plant growth using trellis clip or twisting method 3.4 Lower and lean plants where appropriate
4. Complete installation and maintenance activities	4.1 Remove and dispose of waste material according to workplace procedures 4.2 Clean and return tools and equipment to required location 4.3 Identify and report unserviceable tools and equipment according to workplace procedures 4.4 Record installation activities according to workplace procedures 4.5 Report installation and maintenance activities to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations and products

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare installation and maintenance activity records
Oral communication	<ul style="list-style-type: none"> Use clear language to confirm and report installation and maintenance activities, and report safety concerns and tool and equipment unserviceability
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Get the work done	<ul style="list-style-type: none"> Take responsibility for routine decisions about installing and maintaining vertical hanging trellis, and reflect on outcomes to identify effectiveness of decisions

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Vertical hanging trellis must include at least one of the following:	<ul style="list-style-type: none"> plastic trellis trellis twine or string trellis netting.
--	--

Assessment Requirements for AHCPHT311 Install and maintain vertical hanging trellis

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed and maintained two different vertical hanging trellis on at least two occasions, and has:

- selected, positioned, used and maintained vertical hanging trellis tools equipment and materials
- applied workplace health and safety requirements
- minimised environmental impacts associated with installing and maintaining vertical hanging trellis
- followed industry and workplace biosecurity procedures
- evaluated vertical hanging trellis and plant growth maintenance requirements
- applied plant maintenance techniques, including:
 - clipping or twisting
 - lowering and leaning where appropriate
- removed and disposed of waste material
- recorded and reported installation and maintenance activities and unserviceable tools and equipment

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- vertical hanging trellis installation and maintenance tools and equipment and operating instructions
- workplace requirements applicable to health and safety in the workplace for installing and maintaining vertical hanging trellis
- environmental impacts associated with installing and maintaining vertical hanging trellis
- industry and workplace biosecurity procedures

- vertical hanging trellis and plant maintenance:
 - purpose
 - techniques
 - tools, equipment and materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - vertical hanging trellis installation and maintenance tools, equipment and materials
 - personal protective equipment applicable to vertical hanging trellis installation and maintenance
- specifications:
 - vertical hanging trellis equipment operating instructions
 - workplace requirements applicable to health and safety in the workplace and installing and maintaining vertical hanging trellis
 - industry and workplace biosecurity procedures applicable to installing and maintaining vertical hanging trellis
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT312 Implement a crop regulation program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to implement a crop regulation program, including preparing the program and communicating, monitoring and undertaking crop regulation, and completing crop regulation activities.

The unit applies to individuals who implement a crop regulation program under broad direction, and take responsibility for their own work and the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the crop regulation program	1.1 Identify and confirm with supervisor the crop to be regulated and operational requirements of the program 1.2 Select, tools, equipment and machinery appropriate for the crop to be regulated, and check for safe operation 1.3 Identify environmental and biosecurity implications associated with regulating crop, and minimise impact

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Select, fit, use and maintain personal protective equipment according to the task and workplace safety requirements 1.5 Calibrate and adjust tools, equipment and machinery
2. Communicate and monitor crop regulation activities	2.1 Inform work teams and contractors of the operational requirements of the regulation program and strategy 2.2 Communicate daily work tasks to work teams and contractors 2.3 Monitor crop regulation tasks and undertake remedial action where necessary to achieve program objectives
3. Undertake crop regulation	3.1 Evaluate crop growth and identify plant material to be thinned or pruned 3.2 Regulate crop using techniques appropriate to crop requirements 3.3 Operate crop regulation tools, equipment and machinery safely 3.4 Record and report signs of diseases and pests according to workplace procedures
4. Complete crop regulation activities	4.1 Remove and dispose of waste material according to workplace and biosecurity requirements 4.2 Clean, maintain and return tools, equipment and machinery to required location 4.3 Identify and report unserviceable tools, equipment and machinery according to workplace procedures 4.4 Record and report crop regulation activities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about the crop regulation program
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to record signs of diseases and pests, and complete crop

Skill	Description
	regulation activity records
Oral communication	<ul style="list-style-type: none"> Initiate discussions with supervisor using clear language to confirm crop to be regulated and report signs of diseases and pest, crop regulation activities, and unserviceable tools, equipment and machinery Use clear language to inform work teams and contractors of crop regulation program operational requirements and strategy, and daily work tasks

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a crop regulation program on at least two occasions, and has:

- selected and operated crop regulation tools, equipment and machinery, and checked for safe operation
- applied workplace health and safety requirements applicable to regulating crops
- minimised environmental and biosecurity impacts associated with the crop regulation program
- used and maintained a range of plant thinning and pruning tools
- communicated and monitored the crop regulation program
- evaluated crop growth and identified plant material to be thinned or pruned
- assessed the effects of thinning and pruning operations on plant growth, habit and production levels
- used a range of methods to achieve crop regulation goals
- recorded and reported signs of diseases and pests, crop regulation activities and unserviceable tools, equipment and machinery
- removed and disposed of waste material
- cleaned, maintained and stored tools, equipment and machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- crop regulation tools, equipment and machinery operating instructions and safe work procedures
- workplace health and safety requirements applicable to regulating crops
- industry and workplace environment and biosecurity procedures applicable to regulating crops

- principles and practices of crop regulation, including:
 - effect of weather on crop regulation activities
 - effects on thinning and pruning operations on plant growth, habit and production levels
 - workplace quality procedures and characteristics of crop being regulated
 - principles of thinning and pruning and the methods used to achieve crop regulation goals
 - types of crop regulation methods and materials
 - signs of pests and disease.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crop regulation tools, equipment and machinery
 - personal protective equipment applicable to crop regulation
 - principles and practices of crop regulation
- specifications:
 - crop regulation tools, equipment and machinery operating instructions and safe work procedures
 - industry and workplace environment and biosecurity procedures applicable to regulating crops
 - workplace health and safety requirements applicable to regulating crops
- relationships:
 - team members, contractors and supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPHT313 Implement a post-harvest program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to implement a post-harvest program for horticultural crops.

The unit applies to individuals who implement a post-harvest program under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for implementation of post-harvest operations	1.1 Identify post-harvest operations to be performed and requirements of the program 1.2 Select materials, tools, equipment and machinery according to post-harvest operations requirements, and check for safe operation 1.3 Identify the Hazard Analysis and Critical Control Points (HACCP) and food safety requirements applicable to crop under cultivation

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Coordinate post-harvest work	<p>2.1 Identify work team and coordinate tasks</p> <p>2.2 Undertake post-harvest operations according to post harvest program requirements</p> <p>2.3 Follow site quarantine protocols and farm and personal hygiene requirements</p>
3. Implement post-harvest treatments	<p>3.1 Grade and label produce according to client specifications</p> <p>3.2 Identify and dispose of produce that does not meet client specifications or workplace requirements</p> <p>3.3 Select post-harvest treatments according to harvested produce requirements</p> <p>3.4 Confirm timing, rate, application method, environmental requirements and handling techniques conform to the requirements of the harvested produce</p> <p>3.5 Confirm post-harvest practices meet workplace requirements and minimise damage to produce</p> <p>3.6 Clean, maintain and return tools, equipment and machinery to required location</p> <p>3.7 Identify and report unserviceable tools, equipment and machinery according to workplace procedures</p>
4. Implement hazardous waste disposal guidelines	<p>4.1 Review waste disposal requirements and determine operational tasks</p> <p>4.2 Monitor collection and disposal of waste according to workplace procedures</p> <p>4.3 Report conditions likely to impact on business viability</p>
5. Implement packing and presentation requirements of produce	<p>5.1 Review packing and presentation specification requirements, and determine operational tasks</p> <p>5.2 Monitor and adjust packing and presentation processes</p> <p>5.3 Record packing and presentation processes</p>
6. Implement storage requirements of produce	<p>6.1 Review storage specification requirements, and determine operational tasks</p> <p>6.2 Monitor storage processes and facilities</p> <p>6.3 Record storage processes and conditions</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about post-harvest program
Oral communication	<ul style="list-style-type: none"> Initiate discussions with supervisor using clear language to report unserviceable tools, equipment and machinery, and conditions likely to impact on business viability Use clear language to inform work teams of post-harvest program operational tasks

Assessment Requirements for AHCPHT313 Implement a post-harvest program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a post-harvest program on at least two occasions, and has:

- identified and coordinated post-harvest operations according to post-harvest program requirements
- applied client specifications and workplace requirements applicable to post-harvest operations
- identified the Hazard Analysis and Critical Control Points (HACCP) and applicable food safety requirements
- implemented post-harvest treatments and labelling, packing, presentation and storage requirements according to market requirements, client specifications and workplace procedures
- reported unserviceable tools, equipment and machinery, and conditions likely to impact on business viability
- monitored the collection and disposal of hazardous waste materials according to guidelines and workplace procedures
- completed packing and presentation process records, and storage processes and conditions records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- client specifications and workplace requirements applicable to post-harvest operations
- HACCP and applicable food safety requirements
- principles and practices of post-harvest treatments and processes, including:
 - attributes of produce in relation to the desired quality of produce to be presented to the client

- characteristics and procedures for the use of cool rooms
- cool chain principles and practices
- correct storage temperatures for a range of produce
- enterprise confined spaces policy and safety procedures
- environmental effects of post-harvest treatments and hazardous waste disposal methodologies, application and purpose
- humidity levels and their effect on the quality of produce
- hygiene issues in the handling and storage of plant produce
- industry standards for packaging
- relationship between the quality attributes of produce and packing techniques and packaging
- storage methods for a range of produce
- the importance of maintaining the quality of produce, including handling and cooling requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - post-harvest tools, equipment and machinery
- specifications:
 - client specifications, post-harvest program and workplace requirements applicable to post-harvest operations
 - HACCP and applicable food safety requirements
 - principles and practices of post-harvest operations
- relationships:
 - team members
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT314 Harvest horticultural crops mechanically

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare, operate and shut down machinery and related equipment used in the harvest of horticultural crops.

The unit applies to individuals who harvest horticultural crops mechanically under broad direction, and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare machinery for use	1.1 Determine work requirements from workplace instructions 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks 1.3 Source and interpret relevant machinery and equipment operation and maintenance manual and manufacturer instructions 1.4 Select, fit, use and maintain personal protective equipment applicable to the task

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Select required tools, equipment and machinery, and conduct routine pre-operational checks 1.6 Document and replace damaged or worn components according to workplace procedures 1.7 Attach ancillary equipment and check for correct operation
2. Operate machinery and equipment	2.1 Carry out pre-start and start-up procedures according to workplace procedures 2.2 Operate machinery and equipment in a safe, controlled and efficient manner, and monitor for performance efficiency 2.3 Operate machinery according to operation and maintenance manual, manufacturer specifications, task requirements and conditions 2.4 Identify environmental and biosecurity implications associated with harvesting, and undertake activities to minimise impact 2.5 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment
3. Complete work	3.1 Conduct shut-down according to workplace procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures 3.4 Clean, store and secure harvest machinery and equipment 3.5 Record and report harvest activities and machinery use records

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about mechanical horticultural crop harvesting
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to record harvest activity

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage
Numeracy skills	<ul style="list-style-type: none"> Calculate quantities of machinery fluids

Assessment Requirements for AHCPHT314 Harvest horticultural crops mechanically

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has harvested horticultural crops mechanically on at least two occasions, and has:

- applied workplace health and safety requirements
- carried out horticultural harvesting machinery and equipment pre-operational checks according to operation and maintenance manual
- operated and shut down horticultural harvesting machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and local conditions
- recognised and documented defects in horticultural harvesting machinery and equipment
- attached and uncoupled ancillary equipment safely
- minimised environmental impacts associated with horticultural harvesting machinery and equipment operation
- performed minor maintenance
- recorded and reported harvest activities and machinery use
- cleaned, stored and secured machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for harvesting horticultural crops mechanically
- principles and practices for operating horticultural crop harvesting machinery, including:
 - basic diagnostic techniques
 - components and controls features and functions
 - crop quality assurance and hygiene requirements

- equipment characteristics, technical capabilities and limitations
- manufacturer and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - planned and emergency-shut down procedures
- industry and workplace environmental and biosecurity procedures applicable to horticultural crop harvesting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating harvest machinery
- resources, equipment and materials:
 - horticultural harvest machinery and equipment
 - horticultural crop
 - personal protective equipment applicable to operating horticultural harvesting machinery and equipment
- specifications:
 - horticultural harvest machinery and equipment operation and maintenance manuals
 - workplace requirements applicable to health and safety in the workplace for harvesting horticultural crops mechanically
 - work instructions and workplace procedures applicable to operating horticultural crop harvest machinery and equipment
 - recording procedures
 - industry and workplace environmental and biosecurity procedures applicable to horticultural crop harvesting
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPHT315 Establish horticultural crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to establish horticultural crops by seed, seedlings or other vegetative means.

The unit applies to individuals who establish horticultural crops under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare machinery and equipment for use	1.1 Determine work requirements from work plan 1.2 Identify potential hazards and risks and implement safe working practices to manage risks 1.3 Select required tools, equipment and machinery, and check for safe operation 1.4 Attach and calibrate equipment, and check for correct operation

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare for horticultural crop establishment	2.1 Monitor soil and weather conditions for optimal planting conditions 2.2 Recognise and confirm soil conservation and sustainable land management practices and procedures 2.3 Confirm and prepare seeding or planting, and fertiliser, and pest and weed control requirements
3. Sow or plant the crop	3.1 Undertake sowing or planting and fertiliser applications safely and according to work plan 3.2 Coordinate pest and weed control treatment with sowing or planting and fertiliser applications 3.3 Identify environmental and biosecurity implications associated with establishing crop, and minimise impact
4. Complete sowing or planting operations	4.1 Conduct machinery and equipment shut-down according to workplace procedures 4.2 Perform routine machinery and equipment operational servicing and minor maintenance 4.3 Identify and report tool, machinery and equipment malfunctions, faults, irregular performance or damage according to workplace procedures 4.4 Clean, store and secure tools, machinery and equipment 4.5 Record and report crop establishment activities and machinery use records

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCPHT315 Establish horticultural crops

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has established horticultural crops on at least two occasions, and has:

- applied workplace health and safety requirements
- carried out tool, machinery and equipment pre-operational checks according to operation and maintenance manual
- attached and calibrated equipment safely
- carried out ground preparation and applied pre-planting treatments
- operated tools, machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and local conditions
- carried out sowing or planting operations, and fertiliser application
- minimised environmental and biosecurity impacts associated with establishing horticultural crops
- shut down machinery and equipment
- performed minor maintenance
- recognised and documented defects in machinery and equipment
- cleaned, stored and secured tools, machinery and equipment
- recorded and reported establishment activities and machinery use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for establishing horticultural crops
- manufacturer and workplace requirements for seeding and planting machinery and equipment, including:

- pre-operational checks
- machinery operation techniques
- principles of weight distribution with regard to load shifting and vehicle movement
- operator level servicing
- planned and emergency shut-down procedures
- principles and practices for establishing crops, including:
 - crop types, preparation of seeds and plants, seeding and planting methods and application techniques
 - effects of weather conditions on seeding and planting and fertilising applications
 - workplace procedures for seeding and planting operations, recording and reporting
 - fertiliser types, rates of application and crop nutrient requirements
 - sustainable land management and soil conservation techniques
- environmental and biosecurity impacts associated with establishing horticultural crops, including:
 - positive environmental practices, negative environmental impacts, and minimisation measures associated with seeding operations
 - chemical handling techniques for fertiliser
 - fertiliser safety data sheets information
 - environmental impacts of fertiliser
 - use and control of hazardous substances.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating seeding and planting machinery
- resources, equipment and materials:
 - seeding and planting machinery
 - horticultural seeds and seedlings
 - personal protective equipment applicable to establishing horticultural crops
- specifications:
 - horticultural seeding and planting machinery and equipment operation and maintenance manuals
 - workplace requirements applicable to health and safety in the workplace for establishing horticultural crops

- work instructions and workplace procedures applicable to establishing horticultural crops
- recording procedures
- industry and workplace environmental and biosecurity procedures applicable to establishing horticultural crops
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT316 Supervise mushroom substrate preparation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to supervise mushroom substrate preparation (Phase II), including confirming preparation requirements, monitoring the preparation process and finalising the mushroom substrate preparation process.

The unit applies to individuals who supervise mushroom substrate preparation under broad direction, and take responsibility for their own work and for the quality of the work of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm requirements for mushroom substrate preparation	1.1 Obtain details of required quantities of substrate, dates and times to be achieved for each stage of the process, and inform work team 1.2 Determine availability, quality, serviceability and cleanliness of resources required for mushroom substrate preparation 1.3 Identify and apply site quarantine protocols, workplace and personal hygiene requirements, and food safety requirements for

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	substrate preparation 1.4 Identify potential hazards and risks and implement safe working practices to manage risks 1.5 Identify environmental and biosecurity implications associated with substrate preparation, and undertake activities to minimise impact
2. Monitor mushroom substrate preparation process	2.1 Monitor mushroom substrate preparation processes 2.2 Take samples of materials and outputs according to workplace procedures 2.3 Monitor and position probes to ensure representative readings 2.4 Record production information required for Hazard Analysis and Critical Control Points (HACCP) 2.5 Report faults or variations from required settings or workplace quality standards 2.6 Monitor compost, rooms and work areas for the presence of pests, and take remedial action according to workplace procedures
3. Finalise mushroom substrate preparation process	3.1 Monitor clean-up activities at the end of each process stage 3.2 Perform routine preventative maintenance, and report faults according to workplace procedures 3.3 Clean and store tools and equipment according to workplace requirements 3.4 Record substrate preparation activities according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about mushroom substrate preparation

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to record production information and substrate preparation activity

Assessment Requirements for AHCPHT316 Supervise mushroom substrate preparation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has supervised mushroom substrate preparation on at least two occasions, and has:

- organised and communicated mushroom substrate preparation process
- maintained site quarantine protocols, and workplace and personal hygiene
- applied workplace health and safety requirements
- minimised environmental and biosecurity impacts associated with mushroom substrate preparation
- coordinated substrate preparation activities so that standards relating to productivity, workflow requirements, workplace procedures and quality are met
- recorded and reported production information and substrate preparation activities
- observed and reported non-compliance with workplace quality standards
- reported routine preventative maintenance faults.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for supervising mushroom substrate preparation, including:
 - hazard and critical control points, quality systems, emergency procedures, organisational structure and workplace communication channels and protocols
 - casing function, application, required depth and required surface structure
 - impact on mushroom production cycle of deviations of mushroom substrate quality from workplace standards for substrate
 - overview of mushroom production cycle
 - overview of Phase I and Phase II substrate production

- food safety standards, legislation and industry codes of practice relevant to mushroom substrate preparation
- site quarantine protocols
- workplace requirements applicable to health and safety in the workplace for mushroom substrate preparation
- industry and workplace environmental and biosecurity procedures applicable to mushroom substrate preparation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- specifications:
 - food safety standards, legislation and industry codes of practice relevant to mushroom substrate preparation
 - workplace requirements applicable to health and safety in the workplace for mushroom substrate preparation
 - industry and workplace environmental and biosecurity procedures applicable to mushroom substrate preparation
- relationships:
 - team members
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPHT317 Coordinate horticultural crop harvesting

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has coordinated horticultural crop harvesting on at least one occasion, and has:

- prepared for crop harvesting activities
- determined and complied with client, workplace and industry quality assurance specifications
- applied workplace health and safety requirements
- minimised environmental and biosecurity impacts associated with horticultural crop harvesting
- coordinated a work group
- maintained harvest requirements
- monitored crop quality
- calculated and recorded picking tallies and harvest yields
- completed crop delivery documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for coordinating horticultural crop harvesting, including:
 - effect of adverse climatic conditions, including rain, hail, extreme wind, or very high ultraviolet radiation, which may prevent or impede crop harvesting operations or severely influence the time taken to complete the tasks necessary to fulfil the operation
 - workplace quality procedures and characteristics of a crop relative to varying market requirements
 - grading characteristics of each crop

- importance of maintaining quality of produce, including cooling requirements and quick transport from field to processing areas
- industry wage rates and conditions, and contractor services, conditions and rates
- licensing requirements for use of forklifts, trucks and machinery
- recognition of the maturity parameters of a range of crops
- client, workplace and industry quality assurance specifications
- crop harvesting tools, equipment and machinery operating instructions
- workplace requirements applicable to health and safety in the workplace for horticultural crop harvesting
- industry and workplace environmental and biosecurity procedures applicable to horticultural crop harvesting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - horticultural crop harvesting tools, equipment and machinery
 - personal protective equipment applicable to horticultural crop harvesting
- specifications:
 - client, workplace and industry quality assurance specifications
 - horticultural crop harvesting equipment and machinery operating instructions
 - workplace requirements applicable to health and safety in the workplace for horticultural crop harvesting
 - industry and workplace environmental and biosecurity procedures applicable to horticultural crop harvesting
- relationships:
 - team members, client
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT318 Prepare value added compost-based products

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare or blend compost with other materials or products to produce various value-added compost-based products, and conduct quality inspection.

The unit applies to individuals who prepare value-added compost-based products under broad direction, and take responsibility for their own work and for the quality of the work of others.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise for value-added product preparation	1.1 Identify product requirements from job specifications or work order 1.2 Identify potential hazards and risks, and implement safe working

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>practices to manage risks</p> <p>1.3 Select required equipment and machinery, and check for safe operation</p> <p>1.4 Identify environmental and biosecurity implications associated with preparing products, and minimise impact</p>
2. Prepare value-added products	<p>2.1 Confirm compost and product additives according to job specifications</p> <p>2.2 Measure and transport compost and additives to preparation area</p> <p>2.3 Monitor and check compost and additives against specifications, and identify and report variations or non-conformances</p> <p>2.4 Blend and process compost, materials and other additives</p> <p>2.5 Clean machinery, equipment and site to avoid contamination between batches according to workplace procedures</p>
3. Conduct quality inspection and readiness for sale checks	<p>3.1 Inspect and check product for compliance according to job specifications and workplace product requirements</p> <p>3.2 Document product details according to workplace procedures</p> <p>3.3 Transport product to holding bay and confirm quantity of product</p> <p>3.4 Label product according to regulatory and customer requirements</p> <p>3.5 Release product for dispatch</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about value-added compost-based products preparation
Oral communication	<ul style="list-style-type: none"> Use clear language to report compost and additive variations or non-conformance
Numeracy skills	<ul style="list-style-type: none"> Calculate and measure quantities and ratios of compost and

Assessment Requirements for AHCPHT318 Prepare value added compost-based products

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared value-added compost-based products on at least three occasions, and has:

- identified value-added product requirements
- interpreted job specifications and followed workplace production procedures
- applied workplace health and safety requirements
- followed industry and workplace environmental and biosecurity procedures, and minimised impacts associated with preparing value-added compost-based products
- prepared batches of value-added product according to defined batch recipes and methods
- recognised value-added products and their characteristics
- recognised, quantified and handled products.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for preparing value-added compost-based products, including:
 - Australian standards for products
 - common product contaminants
 - workplace product specifications and standards
 - environmental license requirements, aspects and management measures associated with operation of machinery and equipment
 - hazards in handling materials and additives, and appropriate risk control measures
 - identification of contaminants
 - legislation, regulations and codes of practice with regard to licensing, roads and traffic requirements
 - operating principles and methods for plant and machinery

- potential risks and hazards associated with operation of machinery and equipment
- procedures for cleaning, securing and storing machinery, equipment and materials
- product types and characteristics
- raw materials, compost and additives commonly used to manufacture value-added products
- value-added product types and characteristics
- workplace requirements applicable to health and safety in the workplace for preparing value-added compost-based products
- industry and workplace environmental and biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - commercial compost and value-added products blending, processing and transporting equipment and machinery
 - compost and value-added products
- specifications:
 - job sheets and work orders relevant to preparing value-added compost-based products
 - workplace requirements applicable to health and safety in the workplace for preparing value-added compost-based products
 - industry and workplace environmental and biosecurity procedures relevant to preparing value-added compost-based products
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPTH402 Develop a crop regulation program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a crop regulation program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess crop regulation methods	1.1 Identify production targets and requirements in terms of quantity, quality and availability of specified crops 1.2 Research the characteristics and growing requirements of plant

Element	Performance criteria
	species and cultivars that may affect the crop regulation program 1.3 Assess the benefits and limitations of available crop regulation methods for specified crops 1.4 Evaluate implementation risk of available methods and record and cost risk controls 1.5 Determined the most cost-effective approach to crop regulation and submit to management for approval
2. Identify the requirements of a crop regulation program	2.1 Develop the crop regulation program to achieve the appropriate yield and quality 2.2 Identify and confirm availability of resources, tools, equipment and machinery for the program 2.3 Outline staged implementation and development according to the range of conditions over the growing cycle 2.4 Determine timelines for crop regulation activities, taking into account the needs of the crop and site conditions
3. Prepare and document the crop regulation program and specifications	3.1 Prepare a plan, specifications and quotation based on the requirements of the program 3.2 Develop and document on-site procedures and schedules for the program
4. Monitor the crop regulation program	4.1 Monitor implementation of the program to ensure requirements of the production plan are achieved 4.2 Monitor and review the program to ensure it remains responsive to changing conditions 4.3 Implement appropriate courses of action to alleviate or overcome identified shortcomings 4.4 Document and report remedial action undertaken to management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT402A Develop a crop regulation program.

Assessment Requirements for AHCPHT402 Develop a crop regulation program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess and select cost-effective techniques, resources and equipment for the regulation of horticultural crops
- develop a crop regulation program to achieve the yield and quality specified in the enterprise production plan
- document a crop regulation plan, specifications and quotation
- document detailed schedules and work procedures
- prepare a cost-benefit analysis on available crop regulation methods
- review the crop regulation program
- implement appropriate courses of action in response to identified shortcomings

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop regulation published data on the species and cultivars
- principles and practices for developing a crop regulation program
- processes and techniques for preparing, costing and documenting plans for scheduling crop regulation activities
- site evaluation techniques, including analysis of the condition of soils, plants and the site for production activities
- specific crop physiology and timing of regulation
- the characteristics of soil and other growth media types and the use of additives to enhance the available nutrition for specific plant species and cultivars
- the relationship between enterprise crop regulation methods, such as thinning, pruning and RDI, and the yield and quality of specific crops

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT404 Implement and monitor a horticultural crop harvesting program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement and monitor of a horticultural crop harvesting program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture [PHT]

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for harvesting	1.1 Assess and record crop maturity and quality 1.2 Estimate best time to harvest crop

Element	Performance criteria
	1.3 Undertake pre-harvest treatments for control and eradication of pests 1.4 Determine harvesting resource requirements and estimate when to harvest
2. Coordinate the harvest strategy	2.1 Implement harvesting operations according to customer requirements, weather, equipment and staff availability 2.2 Coordinate and monitor equipment operation for maximum efficiency and effectiveness 2.3 Identify and control hazards
3. Complete harvest operation	3.1 Locate storage resources 3.2 Determine strategies for drying crops if necessary 3.3 Monitor work to ensure that crop is graded, packed and stored according to enterprise requirements 3.4 Evaluate harvesting operations and outcomes against harvest strategy 3.5 Provide feedback on performance to personnel under supervision 3.6 Document crop quality, pre-harvest treatments and outcomes of harvest for continual analysis and effective planning management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT404A Implement and monitor a horticultural crop harvesting program.

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- coordinate equipment
- document a crop harvesting report
- establish strategies for pre-harvest and harvest
- estimate crop quality and yield
- evaluate harvest operations and outcomes
- implement treatments for control and eradication of pests
- implementing safe workplace and positive environmental practices
- organise resources for the harvest

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for crop harvesting
 - crop measurement techniques and parameters
 - customer requirements
 - environmental controls and codes of practice applicable to harvesting operations
 - functions and limitations of harvesting equipment
 - location and relative skills and abilities of available staff, contractors or casual staff
 - market information and sources
 - relevant legislation and regulations relating to workplace health and safety, contractor engagement, chemical use and application, and vehicle and plant use
 - required productivity rates
 - weather or other conditions that may affect harvest

- where relevant to enterprise's production: food safety and Hazard Analysis Critical Control Point (HACCP) requirements, and requirements for export markets

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCPHT410 Develop harvesting and processing specifications to produce an olive oil

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed harvesting and processing specifications to produce olive oil on at least one occasion, and has:

- estimated and scheduled fruit maturity
- documented and communicated olive crop harvest and post-harvest requirements and procedures
- selected an appropriate style of oil that can be produced from a crop, and described it using standard industry terminology
- incorporated specifications into an olive oil processor contract
- arranged for an appropriate method of processing to produce the desired style and quality of oil
- documented olive oil specifications and related processing requirements in a report.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for developing specifications for olive oil, including:
 - how an olive oil is produced from olives
 - influence of processing on chemical composition of oil, including polyphenols, aroma and flavour compounds
 - influence of various harvesting methods on olive oil style and quality, including; bitterness, pungency, aroma and flavour
 - market preferences for styles of olive oil
 - methods of olive oil extraction and advantages/disadvantages associated with each
 - post-harvest handling, including storage and transport requirements for olive fruit intended for olive oil processing

- post-processing storage and handling requirements of olive oil.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the development of olive oil harvesting and processing specifications
- relationships:
 - harvesting personnel and olive oil processor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPHT411 Implement and monitor a horticultural crop harvesting program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented and monitored a horticultural crop harvesting program on at least one occasion, and has:

- estimated crop quality and yield
- established strategies for pre-harvest and harvest
- implemented treatments for control and eradication of pests
- organised resources for the harvest
- coordinated equipment
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- documented a crop harvesting program and schedule of activities
- evaluated harvest operations and outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for crop harvesting, including:
 - crop measurement techniques and parameters
 - customer requirements
 - environmental controls and codes of practice applicable to harvesting operations
 - functions and limitations of harvesting equipment
 - location and relative skills and abilities of available staff, contractors or casual staff
 - market information and sources
 - required productivity rates
 - weather or other conditions that may affect harvest

- where relevant to workplace production: food safety and Hazard Analysis and Critical Control Points (HACCP) requirements, and requirements for export markets
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to implementing and monitoring a horticultural crop harvesting program.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the planning of a horticultural crop harvesting program
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to implementing and monitoring a horticultural crop harvesting program
 - where relevant to workplace production food safety and HACCP requirements, and requirements for export markets
- relationships:
 - staff
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPTH412 Manage mushroom substrate preparation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to manage mushroom substrate preparation, including confirming status of system requirements, confirming quality and consistency of Phase II outputs, monitoring and manipulating spawning and spawn run, and managing clean-up procedures.

The unit applies to individuals who apply specialist skills and knowledge to manage mushroom substrate preparation. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm status of system requirements for	1.1 Determine details of quantities of substrate required, and dates and times to be achieved for each process stage, and inform personnel

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
mushroom substrate preparation	<p>1.2 Determine availability, quality, serviceability and cleanliness of all rooms, work areas, machinery, equipment and materials for mushroom substrate preparation</p> <p>1.3 Allocate staff duties and responsibilities according to mushroom substrate preparation plan</p> <p>1.4 Identify and implement site quarantine protocols and workplace and personal hygiene requirements for mushroom substrate preparation</p> <p>1.5 Identify hazards and assess risks in the workplace, and implement control measures to manage risks according to workplace health and safety procedures</p>
2. Confirm quality and consistency of Phase II outputs	<p>2.1 Confirm Phase II process conforms to required production schedule and workplace procedures</p> <p>2.2 Measure and record key factors and critical points</p> <p>2.3 Take random samples of end product and dispatch for analysis</p> <p>2.4 Record test results, compare to standards and take remedial action</p>
3. Monitor and manipulate spawning and spawn run	<p>3.1 Assess condition and quality of compost before spawning, and take remedial action</p> <p>3.2 Take temperature readings, and record and adjust if required</p> <p>3.3 Measure, record and control carbon dioxide content</p> <p>3.4 Monitor spawn growth and appearance of mycelium during spawn run period</p> <p>3.5 Select product and its rate of application where supplement is to be added to substrate at spawning</p> <p>3.6 Monitor room hygiene and occurrence of pests and diseases, and implement control measures</p>
4. Manage clean-up procedure	<p>4.1 Manage clean-up activities at the end of each process stage</p> <p>4.2 Conduct cook-out or chemical disinfestations treatment before removal of spent substrate</p> <p>4.3 Return tools and equipment to storage area after cleaning, performing basic preventative maintenance and checking for future serviceability</p> <p>4.4 Report faults to maintenance personnel</p> <p>4.5 Complete workplace records according to workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding requirements for managing mushroom substrate preparation
Oral Communication	<ul style="list-style-type: none"> Initiate discussions with staff, using clear language and standard industry terminology to communicate substrate preparation activities and allocate duties and responsibilities Use clear language to report faults or variations from required settings to maintenance personnel

Assessment Requirements for AHCPHT412 Manage mushroom substrate preparation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed mushroom substrate preparation on at least two occasions, and has:

- set and monitored productivity standards for mushroom substrate and rest of production cycle
- maintained site quarantine protocols, and workplace and personal hygiene requirements
- applied relevant workplace health and safety procedures
- established and reviewed workplace procedures for mushroom substrate preparation
- recorded and analysed production data
- monitored and manipulated all interactions between inputs, conditions and outputs for each stage of substrate process.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for managing mushroom substrate preparation and casing production, including:
 - casing function, application, required depth and required surface structure
 - detailed knowledge of all stages in Phase II substrate preparation process
 - Hazard Analysis and Critical Control Points, quality systems, emergency procedures, organisational structure and workplace communication channels and protocols
 - how mushrooms are grown, with a focus on interaction between compost, environmental factors such as temperature, water, relative humidity, carbon dioxide and ammonia, and mushroom growth
 - industry and workplace awards and conditions

- key parameters to be recorded and monitored, and appropriate ranges in relation to temperature, ammonia, relative humidity, moisture content, carbon dioxide and time
- overview of mushroom production cycle and possible impact of deviations from workplace standards on substrate and rest of production cycle
- overview of Phase I compost production
- food safety standards, legislation and industry codes of practice relevant to managing mushroom substrate preparation
- workplace requirements applicable to health and safety in the workplace for managing mushroom substrate preparation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- specifications:
 - food safety standards, legislation and industry codes of practice relevant to managing mushroom substrate preparation
 - workplace requirements applicable to health and safety in the workplace for managing mushroom substrate preparation
- relationships:
 - staff and maintenance personnel
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPHT413 Oversee vineyard practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has overseen vineyard practices on at least one occasion, and has:

- recognised wine grape varieties and cultivars
- determined maintenance requirements for the vineyard
- planned and programmed vineyard practices
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- documented and communicated the vineyard growing program
- maintained daily workplace records
- overseen the implementation of vineyard practices
- monitored and reviewed the vineyard growing program
- determined and organised work schedules.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for overseeing vineyard practices, including:
 - irrigation systems operation
 - plant nutrition practices
 - safe operating practices
 - supervision and team building
 - trellis and harvesting systems
 - vineyard practices and growing systems for grape varieties and cultivars
 - weed, pest and disease control practices

- wine grape varieties and cultivars
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to overseeing vineyard practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to overseeing vineyard practices
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to overseeing vineyard practices
- relationships:
 - staff
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT414 Assess olive oil for style and quality

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to establish olive oil tasting protocols, determine sensory and analytical quality of olive oil, identify factors influencing the style and quality of olive oil, and implement findings.

The unit applies to individuals who apply specialist skills and knowledge to assessing olive oil for style and quality. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish and implement appropriate tasting protocols	1.1 Establish appropriate tasting conditions 1.2 Apply industry tasting procedures 1.3 Determine oils to taste, and taste oils in the order that will best show the character of each oil

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Determine style and sensory quality of the olive oil	2.1 Identify and assess characteristics of the olive oil 2.2 Taste oil to assess style 2.3 Smell and taste oil to assess sensory quality 2.4 Analyse and record observed defects for future action
3. Determine the analytical quality of the olive oil	3.1 Send oil samples to laboratory to test key chemical indices 3.2 Interpret key chemical indices to assess analytical quality of oil 3.3 Record observed chemical indices that are beyond the normal range, for future action
4. Identify factors influencing the style and quality of the olive oil	4.1 Identify horticultural factors that may influence the style and quality of the olive oil 4.2 Identify processing factors that may influence the style and quality of the olive oil 4.3 Identify other factors that may influence the style and quality of the olive oil
5. Implement findings of tastings and chemical analyses	5.1 Maintain records of season tastings and chemical analyses 5.2 Evaluate horticultural and processing activities and methods to identify modifications and improvements 5.3 Adjust and document horticultural production plan for next season 5.4 Document and communicate next season processing requirements to processing personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding requirements for assessing olive oil style and quality

Assessment Requirements for AHCPHT414 Assess olive oil for style and quality

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assessed olive oil for style and quality on at least one occasion, and has:

- applied industry tasting procedures
- identified olive oil style and quality
- identified common olive oil defects
- interpreted olive oil chemical indices
- maintained records of season tasting and chemical analyses
- modified horticultural and processing practices to remedy variations from desired style and quality
- documented and communicated next season processing requirements and adjustments to horticultural production plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry tasting procedures
- principles and practices for assessing olive oil, including:
 - cause of olive oil defects and how they can be remedied
 - horticultural and processing practices that affect olive oil style, and reasons for the effect
 - relationship between critical chemical parameters and oil style and quality.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - olive oils
 - sampling equipment
 - horticultural production plan
- specifications:
 - industry tasting procedures
- relationships:
 - processing personnel
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPTH415 Control Phase II mushroom substrate process

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to control Phase II of a mushroom substrate process, including confirming requirements for mushroom substrate preparation and carrying out Phase II processes.

The unit applies to individuals who apply specialist skills and knowledge to control Phase II of a mushroom substrate process. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCPHT415 Control Phase II mushroom substrate process

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has controlled Phase II mushroom substrate processes on at least two occasions, and has:

- applied relevant workplace health and safety procedures
- differentiated between Phase I substrate and substrate ready for spawning, and described desired parameters of each stage
- monitored and managed Phase II process for at least eight crops
- assessed room or tunnel layout and determined most appropriate locations for taking substrate and air measurements
- carried out effective troubleshooting during Phase II process.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for controlling Phase II mushroom substrate processes, including:
 - concept of compost selectivity and biological indicators of compost quality
 - correct probe placement and calibration
 - factors influencing air quantity and distribution
 - Hazard Analysis and Critical Control Points, quality systems, emergency procedures, organisational structure
 - interpretation of chemical test results
 - how different systems, including; shelf, tray and tunnel, impact on temperature zones in substrate
 - key parameters to be recorded and monitored relating to temperature, ammonia and moisture content
 - objectives and desired parameters of each sub-stage of Phase II substrate preparation

- overview of Phase I compost production and how it impacts on Phase II process
- food safety standards, legislation and industry codes of practice relevant to controlling Phase II processes
- site quarantine protocols
- workplace requirements applicable to health and safety in the workplace for controlling Phase II mushroom substrate processes.
-

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- specifications:
 - food safety standards, legislation and industry codes of practice relevant to controlling Phase II processes
 - site quarantine protocols
 - workplace requirements applicable to health and safety in the workplace for controlling Phase II mushroom substrate processes
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT416 Manage mushroom crop development

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to manage mushroom crop development, including the selection, application and management of the mushroom casing and all activities up to the end of the harvesting period.

The unit applies to individuals who apply specialist skills and knowledge to manage mushroom crop development. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage casing application	1.1 Select casing materials and recipe 1.2 Assess condition and quality of spawn run before casing

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Select product and rate of application where supplement is to be added to substrate at casing, and instruct appropriate personnel</p> <p>1.4 Confirm casing mixture is checked against workplace standards for moisture, structure and depth, and confirm remedial action has been taken if required</p>
2. Control environment during casing colonisation growth phase	<p>2.1 Install crop in growing room according to workplace procedures</p> <p>2.2 Set up growing room air conditioning system and check for correct functioning</p> <p>2.3 Measure, record and adjust temperature, relative humidity and carbon dioxide content as required</p> <p>2.4 Assess mycelium growth and determine timing and quantity of water to be applied</p> <p>2.5 Monitor and record pest and disease status and take remedial action as required</p>
3. Initiate fruit body formation and manage pinning and pre-picking growth phases	<p>3.1 Assess growth and make changes to temperature and ventilation to initiate fruit body formation according to workplace procedures</p> <p>3.2 Record and adjust temperature, relative humidity and carbon dioxide content</p> <p>3.3 Identify and analyse variations from expected or required ranges of temperature, relative humidity and carbon dioxide content, and take appropriate remedial action</p> <p>3.4 Assess mycelium development and pin development, and determine timing and quantity of water and additives to be applied to water</p> <p>3.5 Monitor and record pest and disease status, and take remedial action as required</p>
4. Assess crop maturity, flush development and quality, and monitor the harvesting process	<p>4.1 Assess crop maturity to determine when and what to pick</p> <p>4.2 Instruct pickers on tasks to be performed</p> <p>4.3 Monitor picking results to ensure instructions continue to be appropriate and are being carried out</p> <p>4.4 Consult markets to ensure product meets market needs and specifications</p> <p>4.5 Monitor crop quality, recognise disorders stimulated by environmental conditions, and implement remedial action as required</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.6 Monitor and record pest and disease status during this stage of crop development, and take remedial action as required</p> <p>4.7 Plan daily work schedule for waterers, and coordinate picking and watering schedules</p> <p>4.8 Review harvest process for compliance with quality standards, and identify, document and implement areas for improvement as appropriate</p> <p>4.9 Provide feedback to pickers on individual and team performance</p>

Assessment Requirements for AHCPHT416 Manage mushroom crop development

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed mushroom crop development on at least two occasions, and has:

- maintained environment within parameters for production
- recorded, analysed and adjusted temperature, relative humidity and carbon dioxide content
- monitored and managed growing room conditions, watering and flush development of mushroom crops
- identified stages of growth and development, and factors impacting on yields and mushroom quality
- identified the interdependency of stages of growth, and impact of early stages of production cycle on production results
- recorded pest and disease status, and documented harvest process and areas for improvement
- developed work schedules.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of mushroom crop development, including:
 - available options of additives to irrigation water to promote mushroom quality, and the main considerations of their use
 - basic understanding of air conditioning principles, particularly relative humidity
 - casing function, application and depth and surface structure requirements
 - desirable physical, biological and chemical characteristics of casing

- Hazard Analysis and Critical Control Points (HACCP), quality systems, emergency procedures, organisational structure and workplace communication channels and protocols
- goals and sub-stages of Phase II substrate preparation, and impact of Phase II on yields and quality
- growth phases of a mushroom crop, and interactions that occur between the compost, casing, environmental factors, such as temperature, water, relative humidity and carbon dioxide, and growth of the mushroom
- how nature of casing and the appearance and quantity of mycelium growth in casing affect the number, distribution and quality of fruit bodies formed
- impact of mushroom numbers and size on picking and quality
- industry and workplace awards and conditions
- management impacts of supplementing at spawning or casing
- management requirements of casing, including Compost Added at Casing (CAC) or Casing Inoculums (CI)
- overview of Phase I substrate production and its impact on yields and quality
- food safety standards, legislation and industry codes of practice relevant to managing mushroom crop development
- site quarantine protocols.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- specifications:
 - food safety standards, legislation and industry codes of practice relevant to managing mushroom crop development
 - site quarantine protocols
- relationships:
 - appropriate personnel, pickers, waterers
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPHT502 Develop a horticultural production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a production plan for a horticultural enterprise.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out planning activities	1.1 Ensure client preferences and requirements are understood and confirmed according to enterprise marketing and business plans 1.2 Assess the production site for growing factors, services and site

Element	Performance criteria
	<p>modifications</p> <p>1.3 Research the growing requirements of plant species and cultivars and restrictions that may affect the production plan</p> <p>1.4 Identify sustainable land use issues that may affect planned production</p> <p>1.5 Set production targets that are consistent with the marketing strategy and business plan</p> <p>1.6 Determine production requirements in terms of quantity, quality and availability of the product</p> <p>1.7 Develop a plan that reflects client preferences and requirements</p>
2. Determine the requirements of horticultural production	<p>2.1 Identify plant species that are consistent with the plan and the calculate, cost and confirm availability with the supplier</p> <p>2.2 Select plant establishment procedures consistent with the agreed plan</p> <p>2.3 Ensure design of the site includes irrigation and drainage systems, and takes into account the growing requirements of plants and sustainable land use practices</p> <p>2.4 Provide cultural management of the growing environment from planting to harvest</p> <p>2.5 Determine harvesting dates to meet market deadlines</p> <p>2.6 Identify resources required for the establishment of the site</p>
3. Schedule production activities	<p>3.1 Outline staged implementation and development with future works access provided for</p> <p>3.2 Determine timelines, taking into account any other planning requirements</p> <p>3.3 Plan marketing and schedule according to the production schedule and marketing strategy</p>
4. Plan monitoring of the production plan	<p>4.1 Determine production activities to be monitored, the format for recording factors, frequency of monitoring and the thresholds for remedial action</p> <p>4.2 Document required remedial for implementation by staff</p> <p>4.3 Review on a regular basis the effectiveness of the monitoring system</p> <p>4.4 Compare the production program with feedback and projections from clients</p>
5. Prepare and document the production plan and specification	<p>5.1 Prepare detailed plan, specifications and quotation based on horticultural conventions and the requirements of production</p> <p>5.2 Develop and document detailed on-site procedures and schedules required for production</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH502A Develop a horticultural production plan.

Assessment Requirements for AHCPHT502 Develop a horticultural production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a horticultural production plan that reflects client preferences and requirements
- design and incorporate infrastructure into planning
- document and cost the production plan
- establish product specifications
- research site factors and land use issues
- select and source plants or plant material for seeding or propagation
- develop a monitoring program to cover the horticultural operation from sowing to sale

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing a horticultural production plan
 - advantages and limitations of sustainable horticulture systems
 - establishment and maintenance of a range of enterprise horticultural products in relation to client needs and the standards required by the marketplace
 - establishment procedures, plant selection and cultural practices for a range of enterprise horticultural products
 - processes and techniques for preparing, costing and documenting plans for and scheduling horticultural production
 - role of business and marketing plans and client consultation processes in planning horticultural production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH503 Manage a controlled growing environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage controlled growing environments.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify crop requirements	1.1 Determine crop growth and production requirements according to a documented production plan 1.2 Research environmental parameters for optimal growing

Element	Performance criteria
	<p>conditions for the specific crop, using available information resources</p> <p>1.3 Identify and record controlled growing environment factors</p>
<p>2. Determine requirements for controlled growing environment</p>	<p>2.1 Identify, cost and confirm availability of structures, machinery, equipment and resources required to control environmental conditions</p> <p>2.2 Identify detrimental environmental impacts associated with the controlled growing environment system</p>
<p>3. Prepare a management plan for controlled growing environment</p>	<p>3.1 Determine management objectives for controlled growing environment consistent with production plan and market requirements for crop quantity and quality</p> <p>3.2 Develop a schedule of environmental control procedures according to controlled environment management objectives</p> <p>3.3 Evaluate and report staff training needs with regard to operation and maintenance of environmental control systems</p> <p>3.4 Document a budget supporting the controlled environment management plan and seek approval</p> <p>3.5 Communicate the schedule of environmental control procedures clearly to staff</p>
<p>4. Manage controlled growing environment</p>	<p>4.1 Identify controlled environment indicators and thresholds for remedial action for monitoring</p> <p>4.2 Develop monitoring frequency and schedule according to the requirements of the production plan and communicate to staff</p> <p>4.3 Record, analyse and apply all monitoring data to ensure optimal plant development</p> <p>4.4 Document and report remedial action undertaken</p> <p>4.5 Monitor costs of the controlled growing environment system against budget</p> <p>4.6 Record and report budget adjustments</p> <p>4.7 Evaluate recorded information, budget data and production outputs and document operational achievements towards management objectives in a report</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH503A Manage a controlled growing environment.

Assessment Requirements for AHCPHT503 Manage a controlled growing environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a management plan to cover staff training, budgets, operating procedures and remedial actions
- develop environmental monitoring procedures
- evaluate and document the achievements towards management objectives
- identify the growing requirements of the crop
- prepare specifications for controlled growing infrastructure

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing controlled growing environments
 - controlled environmental conditions in regard to crop plant physiology, growth stages, and product quality and quantity
 - legislation and regulations relating to the controlled environment systems
 - market requirements for crop quantity and quality
 - monitoring, analysis and recording systems
 - plant physiology and biochemistry
 - quality production methods and techniques for a range of controlled environment plants
 - staff training requirements
 - techniques and methods of implementing optimal growing conditions for a range of horticultural crops

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT507 Evaluate grapes for production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to collect, process and evaluate grapes for production, monitor and evaluate vineyard, and analyse the effect of climate, site characteristics, grape varieties and viticultural practices on grape quality.

The unit applies to individuals who apply specialised skills and knowledge to the evaluation of grapes for production, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect samples	1.1 Identify vineyard block to be sampled 1.2 Determine optimum grape sampling time 1.3 Identify and interpret standard sampling procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Utilise vegetation indices where available to identify zones of uniformity or variation</p> <p>1.5 Confirm sampling areas with client or winemaker</p> <p>1.6 Observe and record out-of-specification condition or characteristics of grapes</p> <p>1.7 Take samples of grapes according to standard sampling procedures</p>
2. Process samples	<p>2.1 Prepare sample processing equipment according to standard sampling procedures</p> <p>2.2 Extract juice using processing equipment</p> <p>2.3 Wash processing equipment between samples</p> <p>2.4 Wash and store processing equipment after use</p>
3. Evaluate samples	<p>3.1 Evaluate juice using standard organoleptic procedures</p> <p>3.2 Perform simple grape analysis procedures and record results</p> <p>3.3 Evaluate results using quantitative parameters</p>
4. Taste and evaluate wine	<p>4.1 Use accepted tasting procedures for tasting wine</p> <p>4.2 Identify the flavour and aroma components and characteristics of wine using organoleptic evaluation techniques</p> <p>4.3 Identify the relative contribution and interaction of wine components to the wine taste, aroma and appearance, using accepted wine description terminology</p>
5. Monitor and evaluate vineyard	<p>5.1 Establish and document vineyard qualitative parameters</p> <p>5.2 Monitor qualitative parameters to determine harvest time for optimum wine quality</p> <p>5.3 Compare results to grape production plan schedule, and determine best course of action</p> <p>5.4 Identify and communicate opportunities to optimise fruit quality prior to harvest</p>
6. Analyse effects in grape quality	<p>6.1 Identify effects of climate on grapes</p> <p>6.2 Identify site effects on grape quality</p> <p>6.3 Identify and analyse effects of grape variety and flavour</p> <p>6.4 Identify and evaluate effects of vineyard management practices on grapes in terms of modifications and improvements to be made for the</p>

Assessment Requirements for AHCPHT507 Evaluate grapes for production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has evaluated grapes for production on at least two occasions and has:

- utilised vegetation indices where available
- researched, evaluated and recorded relevant information
- collected, processed and evaluated samples using standard sampling procedures
- evaluated juice using standard organoleptic procedures
- tasted and evaluated wines using standard organoleptic evaluation techniques
- recorded grape analysis results and evaluated results using quantitative parameters, including:
 - sugar content, soluble solids concentration (SSC)
 - titratable acidity (TA)
 - concentration of hydrogen ions in solution (pH)
- established and documented vineyard qualitative parameters, including:
 - berry colour and skin splitting
 - texture
 - aroma
 - aftertaste
 - rachis
 - berry dehydration
 - seed ripeness
- identified areas of concern and opportunities to change harvest plans to optimise grape quality outcomes prior to harvest, including unsuitable or special parcels of fruit
- identified and recommended improvements to vineyard management practices that will contribute to enhanced grape quality in the next season.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for evaluating grapes for production, including:
 - changes to the chemical characteristics of grapes during ripening, including SSC, TA and pH
 - changes to the physical characteristics of grapes during ripening, including size, hardness and colour
 - climatic and physical features of wine grape growing areas and wine styles produced
 - quantitative parameters of grape testing
 - sensory evaluation and qualitative parameters of grapes and wine
- sensory evaluation of wines
- grape end-use, including:
 - dried
 - table
 - wine
- grape standard sampling procedures
- vegetation indices, including:
 - plant cell density (PCD) maps
 - normalised difference vegetation index (NDVI)
- vineyard management practices and their impact on grapes, including:
 - plant moisture status management
 - irrigation management
 - canopy management
 - pruning levels
 - nutrition regimes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - grapes
 - vineyard
 - sample processing equipment
 - grape standard sampling procedures
- relationships:
 - clients or winemakers
- timeframes:

- according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPHT508 Develop a grape production plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to carry out preliminary planning activities, determine grape production requirements, schedule production activities, plan monitoring of grape production plan and document grape production plan.

The unit applies to individuals who apply specialised skills and knowledge to the development of a grape production plan, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPHT508 Develop a grape production plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed a grape production plan on at least one occasion and has:

- researched, evaluated and recorded relevant information
- calculated production costs, including:
 - staff
 - resources
 - tools
 - equipment and machinery
 - logistical requirements required for production
- planned and scheduled grape production activities
- planned and scheduled marketing
- communicated and negotiated with the client
- documented plans, specifications and production work procedures
- prepared reports for staff, managers, clients and contractors
- produced a site plan which can be readily understood by on-site personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- trends and issues of the Australian viticulture industry
- principles and practices for developing a grape production plan, including:
 - establishment and management of grape production in relation to client specifications and the standards required by the marketplace
 - environmental growing conditions and sustainable land use strategies
 - establishment procedures, grape variety selection and cultural practices for grape production

- processes and techniques for preparing, costing and documenting plans for grape production and scheduling grape production
- the role of business and marketing plans and client consultation processes in planning grape production
- regulations and legislation relevant to grape production.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the development of a grape production plan
 - marketing strategy
- specifications:
 - market specifications
 - regulations and legislation relevant to grape production
- relationships:
 - customers
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT509 Evaluate wine

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to analyse chemical components of wine, resolve winemaking problems, taste and evaluate wine, analyse the effect of winemaking techniques, site characteristics, viticultural practices and grape varieties on wine quality, and analyse current packaging and bottle closure methods and wine labelling laws.

The unit applies to individuals who apply specialised skills and knowledge to the evaluation of wine, take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse chemical components of wine	1.1 Determine chemical components for a particular wine style, and identify testing laboratories 1.2 Take samples of grapes, juice or wine according to standard

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	sampling procedures and laboratory requirements 1.3 Perform simple wine analysis procedures and record results 1.4 Evaluate and compare results of chemical analyses with desired values to identify potential chemical problems in the winemaking process and any required additions or fining agents
2. Resolve winemaking problems	2.1 Evaluate wine or juice using standard laboratory and organoleptic procedures 2.2 Identify the protein stability of a wine using a buttes or heat technique 2.3 Identify the need for cold stabilisation of a wine 2.4 Use additives or fining agents to alleviate problems or improve quality 2.5 Evaluate the effectiveness of additives and/or fining agents used to alleviate problems or improve quality, and adjust their use where indicated 2.6 Carry out winemaking and handling processes in a hygienic working environment 2.7 Identify, record and use cellar operations procedures and instructions during the winemaking process
3. Taste and evaluate a wine	3.1 Use accepted tasting procedures for tasting the wine 3.2 Identify the flavour and aroma components and characteristics of the wine using organoleptic evaluation techniques 3.3 Identify the relative contribution and interaction of wine components to the wine taste, aroma and appearance, using accepted wine description terminology
4. Analyse the effect of winemaking techniques on wine	4.1 Identify evidence of the winemaking technique in the wine to distinguish it from other influences on the wine 4.2 Identify faults in the wine attributable to the winemaking technique, and distinguish from bottle age characteristics 4.3 Determine the effect of winemaking techniques on suitability of wine for cellaring
5. Analyse the effect of site characteristics, vineyard management	5.1 Identify effects of climate in the wine 5.2 Identify site effects on grape quality 5.3 Identify and evaluate effects of vineyard management practices in

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
practices and grape varieties on wine quality	the wine in terms of modifications and improvements to be made for the next season 5.4 Identify and analyse effects of grape variety on wine flavour 5.5 Adjust, document and communicate viticultural production plan for next season to vineyard personnel
6. Analyse current packaging methods, bottle closure methods and wine labelling laws	6.1 Identify the range of wine packaging available and used in the Australian wine industry 6.2 Identify and compare the range of wine bottle closure methods used in the Australian wine industry 6.3 Identify and interpret current wine labelling regulations and their impact on the wine industry

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCPHT509 Evaluate wine

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has evaluated wine on at least one occasion and has:

- researched, evaluated and recorded information for a wine
- performed chemical analyses necessary for the winemaking process
- determined wine characteristics and faults using organoleptic evaluation techniques
- evaluated a wine, following tasting
- determined the effect of winemaking techniques on wine
- identified and recommended improvements to vineyard management practices that will contribute to enhanced wine quality in the next season
- analysed current packaging methods, bottle closure methods and wine labelling laws.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for evaluating wine, including:
 - balance in relation to wine taste
 - changes to the chemical characteristics of grapes during ripening, including acid, sugar and flavour
 - changes to the physical characteristics of grapes during ripening, including size, hardness and colour
 - climatic and physical features of wine grape growing areas and wine styles produced
 - factors involved in the initiation and management of primary, secondary and malolactic fermentation processes
 - food safety requirements
 - ideal Australian cellaring conditions
 - main export markets
 - packaging, regulations and relationship to product marketing and quality

- sensory evaluation of wines with potential for cellaring
- types and styles of wine produced in Australia
- varieties of wine grapes in Australia
- vintage ratings in Australia
- vineyard management practices and their impact on wine, including:
 - plant moisture status management
 - canopy management
 - pruning levels
 - nutrition regimes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - grapes, juice or wine
 - sampling equipment
 - viticultural production plan
- specifications:
 - wine labelling regulations
 - standard laboratory and organoleptic procedures
 - cellar operations procedures and instructions
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHC PHT510 Manage a wine making process

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to determine wine to be produced and winemaking process, acquire grapes for processing, initiate a ferment, manage primary and secondary fermentation and mature wine in storage vessels.

The unit applies to individuals who apply specialised skills and knowledge to the management of a wine making process, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Production horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine wine and wine making process	<p>1.1 Determine the type and style of wine to be produced according to variety and characteristics of the grapes, winemaking factors, consumer preferences, client requirements and industry trends</p> <p>1.2 Determine the winemaking process to be followed according to type and style of wine to be produced, quality and quantity of grapes</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	available, and availability of required equipment and personnel
2. Acquire, deliver and prepare grapes for fermentation	<p>2.1 Harvest and handle grapes according to standard vineyard practices and quality criteria</p> <p>2.2 Acquire and deliver the grapes that meet the desired variety and quality parameters to the winery</p> <p>2.3 Prepare grapes for fermentation, and deliver must or juice to fermentation vessels to meet the desired wine type and style requirements</p>
3. Initiate a ferment	<p>3.1 Select yeast types or strains to produce a given wine type and style</p> <p>3.2 Prepare fermentation vessels and transfer must or juice according to wine type and style requirements</p> <p>3.3 Prepare yeast culture according to specifications and add to fermentation vessels</p>
4. Manage primary fermentation	<p>4.1 Monitor and adjust physical and chemical characteristics of ferment</p> <p>4.2 Predict potential fermentation problems</p> <p>4.3 Detect the presence of undesirable fermentation characteristics</p> <p>4.4 Outline steps to rectify fermentation problems</p> <p>4.5 Rack off gross lees or pressings into appropriate vessels at a determined time</p> <p>4.6 Maintain records of additions and adjustments</p>
5. Manage secondary fermentation	<p>5.1 Obtain and check oak barrels for serviceability for use if required</p> <p>5.2 Inoculate wine with selected malolactic fermentation bacteria</p> <p>5.3 Manage malolactic fermentation to the predetermined end point</p>
6. Mature wine in storage vessels	<p>6.1 Select suitable maturation storage vessels to produce a given wine style and check for serviceability and use</p> <p>6.2 Transfer wine into the selected vessels according to determined wine style characteristics</p> <p>6.3 Monitor condition of wine in storage</p> <p>6.4 Bottle and seal wine according to workplace procedures</p> <p>6.5 Maintain wine production and storage records</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding type and style of wine, grape variety and characteristics Identify and interpret information regarding winemaking factors, consumer preferences, client requirements and industry trends
Oral communication	<ul style="list-style-type: none"> Initiate discussions with clients, using clear language to determine wine production requirements
Numeracy	<ul style="list-style-type: none"> Access and analyse data from specifications to calculate yeast culture quantities Calculate bacteria quantities for inoculation of wine
Navigate the world of work	<ul style="list-style-type: none"> Identify and describe own workplace requirements associated with own role and area of responsibility

Assessment Requirements for AHCPHT510 Manage a wine making process

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has managed a wine making process on at least one occasion and has:

- planned processes that may be used to maximise production of grapes that meet winery quality requirements
- acquired and processed grapes for wine production
- performed must handling processes
- operated the range of equipment required to process grapes from winery receipt point to the fermentation tank
- initiated and managed the fermentation process
- made additions and finings as required
- identified, established, supervised and monitored daily cellar work practices
- performed chemical analyses necessary for the winemaking process
- organised and undertaken routine cellar operations
- operated the filtration and bottling processes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- changes to the chemical characteristics of grapes during ripening, including acid, sugar and flavour
- changes to the physical characteristics of grapes during ripening, including size, hardness and colour
- climatic and physical features of wine grape growing areas and wine styles produced
- types and styles of wine produced in Australia
- varieties of wine grapes in Australia
- principles and practices for managing a wine making process
- balance in relation to wine taste

- vineyard practices relevant to the production of grapes that meet the requirements of the winery
- processes involved in handling grapes from the vineyard to the winery in order to produce wine
- must and marc handling procedures
- routine winemaking and cellar operation procedures including maintenance of a clean, safe working environment
- ranges of equipment and using this equipment to process grapes and must in a winery
- factors involved in the initiation and management of primary, secondary and malolactic fermentation processes
- ideal Australian cellaring conditions
- equipment and processes for wine filtration.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information on variety and characteristics of grapes, winemaking factors, consumer preferences, client requirements and industry trends
 - grapes, yeast and bacteria for production of wine
 - fermentation vessels
 - oak barrels
 - storage vessels
 - wine bottles and seals
- specifications:
 - yeast culture specifications
 - malolactic fermentation bacteria inoculation specifications
- relationships:
 - clients
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPHT511 Develop a horticultural production plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to develop a production plan, including carrying out planning activities, determining horticultural production requirements, scheduling production activities, planning monitoring of the production plan, and documenting the production plan and specifications for a horticultural workplace.

The unit applies to individuals who apply specialised skills and knowledge to the development of a horticultural production plan, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCPHT511 Develop a horticultural production plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed a horticultural production plan on at least one occasion, and has:

- developed a horticultural production plan that reflects client preferences and requirements
- communicated and negotiated with the client and suppliers
- researched, evaluated and recorded relevant information, including site factors and land use issues
- selected and sourced plants or plant material for seeding or propagation
- calculated and documented the cost and logistical requirements of the production plan
- designed and incorporated infrastructure into planning
- planned and scheduled production activities
- planned and scheduled marketing
- developed a monitoring program to cover the horticultural operation from sowing to sale
- established product specifications
- documented plans, specifications and production work procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for developing a horticultural production plan:
 - advantages and limitations of sustainable horticulture systems
 - establishment and maintenance of a range of enterprise horticultural products in relation to client needs and the standards required by the marketplace
 - establishment procedures, plant selection and cultural practices for a range of enterprise horticultural products

- processes and techniques for preparing, costing and documenting plans for and scheduling horticultural production
- the role of business and marketing plans and client consultation processes in planning horticultural production.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the development of a horticultural production plan
 - marketing strategy
- specifications:
 - market specifications
- relationships:
 - client
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed a controlled growing environment on at least one occasion, and has:

- researched, evaluated and recorded relevant information about production requirements, growing requirements of the crop, and controlled growing environment factors
- developed a controlled growing environment plan to cover staff training, budgets, operating procedures and remedial actions
- developed environmental monitoring procedures
- evaluated, documented and reported the achievements towards management objectives.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for managing controlled growing environments, including:
 - controlled environmental conditions for crop plant physiology, growth stages and product quality and quantity
 - legislation and regulations relevant to controlled growing environment systems
 - market requirements for crop quantity and quality
 - monitoring, analysis and recording systems
 - plant physiology and biochemistry
 - quality production methods and techniques for a range of controlled environment plants
 - staff training requirements
 - techniques and methods of implementing optimal growing conditions for a range of horticultural crops.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the management of a controlled growing environment and development of a controlled growing environment plan
 - production plan
- specifications:
 - legislation and regulations relevant to controlled growing environment systems
- relationships:
 - management and staff
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG401 Implement the pest monitoring and evaluation plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to implement the pest monitoring plan and evaluate and report on performance of pest management.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Obtain and collate all available data	1.1 Determine objectives of pest monitoring and evaluation plan 1.2 Collate data on pest numbers, economic and environmental impacts of pests and pest management plan operating costs 1.3 Consult with stakeholders for input into pest management plan 1.4 Investigate site and record presence of recent pest activity

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Investigate and record previous pest control activity
2. Monitor the pest management plan	2.1 Determine monitoring points in the monitoring plan 2.2 Measure and record outcomes of pest control procedures 2.3 Verify and record compliance with health and safety and environmental requirements 2.4 Report monitoring outcomes and compliance according to workplace procedures
3. Evaluate data against objectives and performance criteria	3.1 Collate and evaluate pest control outcomes against objectives in the monitoring plan 3.2 Reconcile cost of plan against budget 3.3 Conduct a cost–benefit analysis of pest control program
4. Compile a report of the evaluation	4.1 Isolate and examine indicators of performance 4.2 Analyse indicators to build a considered conclusion on outcome of control program on pest populations and impact 4.3 Compile conclusions into a report
5. Recommend modifications	5.1 Consider conclusions and recommend changes to improve pest control performance and impact on land management and production processes 5.2 Provide recommendations to stakeholders according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyse pest control plans and outcomes, and consolidate information into data sets for analysis to formulate recommendations for improvement
Writing	<ul style="list-style-type: none"> Prepare reports to stakeholders to inform on pest control outcomes using clear and accurate language

Assessment Requirements for AHCPMG401 Implement the pest monitoring and evaluation plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, implemented a pest monitoring and evaluation plan to workplace requirements.

There must also be evidence that the individual has:

- collated data for performance of control program according to pest monitoring and evaluation plan
- consulted with stakeholders on monitoring plan performance metrics
- analysed performance data against objectives
- produced a cost–benefit analysis
- reported results of monitoring operations and evaluation results.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- setting and analysing performance metrics, including:
 - data sets and analysis against objectives and performance
 - comparing actual costs with budgeted costs
 - creating a cost–benefit analysis
- environmental and economic impacts of pests on land management and production processes
- pest management plans, their structure and use in land management
- monitoring and evaluation principles and how they work in the pest management plan
- types and range and characteristics of pests, including:
 - identified pests
 - lifecycles

- threshold levels
- effects of control methods on them
- local, regional, state or territory and national pest management strategies for pest control
- federal, state or territory legislation and regulations relating to pest management activities
- principles of integrated pest management (IPM).

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site for a specified pest management plan or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for analysing data and preparing reports
- specifications:
 - workplace policies and procedures for pest management and reporting
 - workplace pest management plans and performance data
 - legislation, regulations and codes of practice for Commonwealth, state and local jurisdictions
- relationships:
 - stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG402 Ensure compliance with pest legislation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify and investigate non-compliances with pest legislation and act on non-compliance issues.

The unit applies to individuals who take a lead role in implementing pest management procedures and work autonomously, instruct, and monitor the work of others within a team. They use discretion and judgment in the selection, allocation and use of available resources.

Pest control legislation and regulations apply in all states and territories and must be adhered to. Users are advised to check details with the relevant regulatory authority.

Assessment Requirements for AHCPMG402 Ensure compliance with pest legislation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, conducted an investigation, determined status of compliance and advised rectification procedures to stakeholders for a breach in pest control legislation according to Commonwealth, state or territory legislation.

There must also be evidence that the individual has:

- identified and interviewed stakeholders alleged to have not complied with pest control legislation
- investigated and collected evidence of breaches
- provided advice to stakeholders of a non-compliance issue according to authority guidelines
- provided advice and support to stakeholder to rectify the non-compliance according to authority guidelines
- conducted investigations and communication according to privacy and right of entry legislation and policies
- reported findings of investigations and actions according to legislative requirements
- produced and issued notices to stakeholders for non-compliance
- completed records and reports according to authority and workplace standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant Commonwealth, state, territory and local government legislation regarding pest management and the destruction and movement of declared species
- methods of investigation and procedures for collecting evidence, including:
 - interview skills

- types of evidence relevant to non-compliant pest control
- conflict avoidance and resolution techniques
- site access rights and responsibilities
- communicating with and supporting stakeholders through notifications and advice
- the legislative status of particular pests and how to identify whether a pest is a declared species
- the types of breaches that generally occur in the locality, and the appropriate control options for pests, including:
 - plants
 - vertebrates
 - invertebrates
 - microbial
- property owners' rights and responsibilities for managing pests on properties
- delegations under the relevant Acts and Certificates of Authority
- control measures appropriate to the pests and environment in the area.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a property with an actual breach in legislative compliance or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - equipment used to capture and store evidence during investigations
- specifications:
 - workplace policies, procedures and processes for conducting investigations and preparing notices and reports
 - legislation, regulations and codes of practice relevant to pest control
- relationships:
 - stakeholder
 - agency authority.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to effectively use leg hold traps to capture predator species, to release the animal unharmed as part of research programs or to humanely euthanise in accordance with pest management programs. It primarily deals with the use of leg hold or foothold traps to capture predator pest species, including dogs, foxes and cats. Animals may be native animals, domestic animals, animals determined to be pests or feral animals. Trapping techniques call for the use of a variety of equipment and may include the use of lures or attractants baits.

Trapping must be carried out in accordance with an approved pest management plan or research project plan.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

Some forms of traps are strictly regulated in some states and territories in Australia. Specific determination should be sought through the relevant state or territory authority.

Where feral animals are trapped, they may need to be euthanised with a firearm. Firearms licensing conditions apply to this unit, in particular the use of Cat A, B or C firearms. Specific approval should be sought through the relevant state or territory firearms licensing agency.

Appropriate firearms licences and training are also required for those involved in training and assessment of this unit.

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess site and predator trapping requirements	1.1 Identify purpose of animal capture and set objectives 1.2 Confirm the location and extent of the pest problem 1.3 Confirm target animal movement patterns and behaviour to determine trapping location and placement of equipment 1.4 Identify non-target animals present in the area 1.5 Estimate time required to complete trapping
2. Prepare equipment required for trapping	2.1 Identify and check vehicles, materials and equipment required for trapping 2.2 Clean and maintain trapping equipment and prepare traps for trapping 2.3 Identify hazards, assess risks and implement controls according to workplace health and safety and environmental procedures 2.4 Assess site access requirements and obtain authority and permits to enter property 2.5 Identify potential hazards to non-target animals from trapping, and implement control strategies to mitigate risk 2.6 Tune, modify and prepare traps to minimise non-target capture
3. Place and set traps	3.1 Undertake site surveillance to identify target and non-target animals 3.2 Identify and interpret signs of target animal 3.3 Select, check and use personal protective equipment 3.4 Select and prepare trap site to maximise opportunity of trapping target animals 3.5 Position, set, calibrate and check trapping equipment 3.6 Apply lures, decoys or baits and toxins according to trapping objectives 3.7 Camouflage traps according to trap design
4. Check and remove traps	4.1 Inspect traps according to frequency specified in trapping objectives and legislative requirements 4.2 Identify trapped animals, then release, destroy or prepare for transport according to trapping objective

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.3 Handle and transport captured animals humanely according to animal welfare codes of practice</p> <p>4.4 Observe workplace health and safety procedures and public safety requirements during trapping activities</p> <p>4.5 Render traps safe and remove trap according to manufacturer specifications</p> <p>4.6 Restore trap site to its prior condition</p>
5. Maintain accurate records	<p>5.1 Record details of trapping activities according to workplace procedures</p> <p>5.2 Report results of trapping activities and incidents according to workplace procedures</p> <p>5.3 Report trapping results and outcomes according to approved management plan</p> <p>5.4 Record trap locations and captures according to workplace record-keeping procedures</p>
6. Clean and store equipment and material	<p>6.1 Remove, retain or dispose of carcasses according to workplace health and safety and biosecurity procedures</p> <p>6.2 Clean, maintain and store equipment and unused materials</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCPMG403 Apply predator trapping techniques

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has deployed leg hold traps on at least two occasions for the capture of predatory pest animals.

There must also be evidence that the individual has:

- trapped, handled and released or euthanised animals humanely according to trapping objectives and animal welfare regulations and guidelines
- identified target and non-target animals in the field
- checked vehicles, equipment and materials for serviceability, and cleaned equipment before starting and on completion of trapping activity
- selected and prepared the trapping site and restored it on completion of trapping activity
- positioned, set, calibrated and checked trapping equipment according to trapping objectives and procedures
- prepared and applied lures or attractants to traps
- identified signs of target animals using scent stations, and identifiable tracks, scats and/ or other traces
- summarised and presented trapping results according to workplace reporting procedures
- maintained accurate records according to workplace procedures including:
 - types of trap sets and lures
 - target species captured
 - non-target species captured
- recorded location of traps and lures using at least one of the following methods:
 - Global Positioning System (GPS) device
 - software application
 - maps or charts.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic requirements for ensuring the welfare of animals described in the relevant codes of practice and standard operating procedures, including animal ethics
- purpose of the animal capture
- selecting trapping location and equipment, including:
 - target animal's range
 - movement patterns and behaviour
- factors affecting choices around equipment and resources and timing of trapping activities, including:
 - the reproductive cycle of the target animal
 - food preferences, both general and local, of target animals
 - biology of non-target animals that may be impacted by trapping program in the area
 - permissions and permits that may be required
 - suitable traps for the target animal
 - precautions that need to be taken to minimise trapping non-target animals
- capture and humane killing methods for target animals
- principles relating to property, stock and duty of care
- how to camouflage traps
- how to safely set off traps to render them inactive
- workplace health and safety procedures that relate to trapping animals
- recording and reporting requirements
- decoys and lures types, purpose and safe use
- toxins used in trapping, including:
 - types
 - preparation
 - use
 - state or territory legislation on the use and storage of toxins
- applicable legislation on the capture and handling of pest animals
- suitable personal protective equipment
- transportation methods for captured animals.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field where predatory pest animals are to be found, or in an environment that accurately represents workplace conditions
- resources, equipment and materials:

- leg hold and foothold traps and lures that comply with Commonwealth and state/territory legislation
- personal protective equipment
- specifications:
 - workplace policies and procedures for using trapping techniques
 - manufacturer operating instructions for traps
 - safety data sheets for chemical lures and baits
 - workplace instructions and trapping objectives
 - legislation and codes of practice for humane traps, trapping and handling of animals
- timeframes:
 - checking traps according to timeframes recommended in legislation and animal welfare regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit:

- assessors must have appropriate firearms licence where required by trapping techniques.

AHCPMG410 Implement the pest monitoring and evaluation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement the pest monitoring plan and evaluate and report on performance of pest management.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain and collate all	1.1 Determine the objectives of the pest monitoring and evaluation

Element	Performance criteria
available data	plan 1.2 Collate data on pest numbers, economic and environmental impacts of pests and pest management plan operating costs 1.3 Consult with stakeholders about the pest management plan 1.4 Identify pest signs and confirm if there is presence of recent pest activity around the site 1.5 Identify signs of previous control activity
2. Monitor the pest management plan	2.1 Determine monitoring points in the monitoring plan 2.2 Measure response to the control procedures used 2.3 Confirm that work health and safety requirements are being followed 2.4 Confirm that environmental requirements are being followed 2.5 Record any corrective actions required, processes used and outcomes achieved and report to management
3. Evaluate data against objectives and performance criteria	3.1 Compare data with objectives and performance criteria in the monitoring plan 3.2 Compare costs with budget 3.3 Document costs and benefits
4. Compile a report of the evaluation	4.1 Isolate and examine indicators of good and poor performance 4.2 Use clearly stated conclusions, supported by data, in relation to changes in pest abundance and impacts 4.3 Compile a report that includes discussion of data analysis results
5. Recommend modifications	5.1 Make recommendations to modify or eliminate causes of poor performance or to enhance current performance 5.2 Make recommendations to reduce impacts on land management and production processes 5.3 Provide recommendations to management in the required format

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit has resulted from the merging of AHCPMG407A Monitor and evaluate the local pest management action plan, AHCPMG408A Assess and monitor weed, pest and/or disease control programs and AHCPMG505A Evaluate the pest management strategy and is not equivalent to any of these units.

Assessment Requirements for AHCPMG410 Implement the pest monitoring and evaluation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement a pest monitoring and evaluation plan to organisational requirements
- collate data as required in the pest monitoring and evaluation plan
- conduct a site inspection
- consult with stakeholders about the plan
- measure responses to the organisation's pest control procedures
- analyse data against objectives and performance criteria
- produce a report on the results of monitoring operations and a report with evaluation results
- apply all monitoring techniques stipulated in the monitoring and evaluation plan
- apply work health and safety policies and procedures in all monitoring activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to compare data with objectives and performance criteria
- how to compare actual costs with budgeted costs
- environmental and economic impacts of pests on land management and production processes
- the organisation's pest management plan
- monitoring and evaluation principles and how they work in the pest management plan
- land management and production purposes
- range of pests identified in the pest management plan, their lifecycles, threshold levels and the effects of control methods upon them

- relevant local, regional, State or Territory and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- principles of integrated pest management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify non-compliance with legislation	1.1 Identify non-compliance through complaint or other means, and record 1.2 Notify senior staff of non-compliance

Element	Performance criteria
2. Investigate non-compliance	2.1 Determine land ownership or identity of stakeholder and confirm responsibilities of all parties 2.2 Obtain further information on possible non-compliance with legislation 2.3 Contact stakeholder to notify them of breach and provide advice on how to fulfil requirements for compliance 2.4 Provide stakeholder with estimates for pest control work 2.5 Adhere to policies of right of entry when communicating with stakeholders 2.6 Maintain accurate records
3. Act on non-compliance issues	3.1 Issue relevant notices 3.2 Collect evidence and report findings 3.3 Provide advice to the stakeholder that is consistent with legislative requirements 3.4 Provide support to stakeholders in the implementation of programs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK404A Ensure compliance with pest legislation.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPMG411 Ensure compliance with pest legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed meeting with a stakeholder. All work must be carried out in accordance with relevant Federal, State or Territory legislation regarding pest management activities and the destruction and movement of declared pests.

The candidate must provide evidence that they can:

- identify a non-compliance issue
- provide advice to stakeholders of a non-compliance issue according to authority guidelines and in a manner and language appropriate to the situation
- provide advice and support to stakeholder to manage the issue in accordance with authority guidelines
- follow right of entry requirements
- investigate and collect evidence of breaches
- report findings of non-compliance and compliance according to legislative requirements
- issue relevant notices
- complete recording and reporting requirements to authority and workplace standards

Knowledge Evidence

The candidate must demonstrate a knowledge of:

- relevant Federal, State, Territory and local government legislation regarding pest management and the destruction and movement of declared species
- the legislative status of particular pests and how to identify whether a pest is a declared species

- the types of breaches that generally occur in the locality and the appropriate control options
- conflict avoidance and resolution techniques
- property owners' rights
- delegations under the relevant Acts and Certificates of Authority
- control measures appropriate to the pests and environment in the area

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced at least one pest management plan that must include the following:

- objectives of the management plan
- alternative management options
- measurable metrics for objectives.

The management plan must also comply with relevant legislation and best practice principles for pest management, and must take into consideration the following points:

- pest populations and options for control
- changes to land management or production practices
- impact of economic factors
- technical difficulty
- practicality and feasibility
- social and environmental acceptability.

There must also be evidence that the individual has:

- consulted with stakeholders to reach agreed outcomes
- investigated geographical area for landscape and land use
- developed pest management plan according to defined pest problem
- aligned pest management plan to biosecurity regulations and other legislation
- developed, evaluated and documented management options for managing pest populations
- achieved approval of the plan from key stakeholders
- conducted risk assessment and cost–benefit analyses of a range of management options to assist in selection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- consultative planning methods and techniques
- concepts of the strategic approach to pest management, the importance of monitoring and the effectiveness of management evaluation
- relevant local, regional, state/territory and national pest management strategies
- federal, state or territory legislation and regulations relating to pest management activities
- principles of integrated pest management
- types of monitoring technology for pest management
- impact of pests on terrestrial and aquatic ecosystems and production enterprises
- pest management options and strategies
- techniques used to validate target pest population and distribution data supplied by stakeholders, and methods of obtaining other relevant data
- measuring and estimating economic losses and environmental impact from pest presence
- federal and state or territory legislation and regulations relating to property, stock and duty of care
- target pest biology and lifecycles
- pest population dynamics and economic and environmental thresholds
- wildlife issues and how to minimise risks to non-target species as well as deal with pest behaviour
- environmental protection, cultural and heritage legislation affecting pest management
- basic requirements for ensuring the welfare of animals described in the relevant codes of practice.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated for a regional area or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for research and documenting plans
- specifications:
 - workplace policies and procedures for pest management planning
 - legislation, regulations and industry codes of practice for pest management
- relationships:
 - stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPMG502 Investigate a pest control failure

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, investigated a failure of a pest control program, determined solutions and rectified pest management planning and implementation documentation.

There must also be evidence that the individual has:

- investigated the planning process, including:
 - planning documentation
 - stakeholder engagement and support
 - pest and damage caused
- reviewed and assessed methods and records of pest control measures used
- analysed pre-treatment and post-treatment pest infestation levels
- evaluated and determined solutions to the failure
- revised pest management plans and procedures and advised stakeholders of changes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles that underpin the strategic approach to managing pests
- pest management processes and procedures, including:
 - surveying pest populations for determining infestation levels
 - pest monitoring techniques
 - defining the pest problem
 - pest treatments for different contexts
 - pest control measures
- chemical, biological, physical and habitat management techniques for pest management

- investigative techniques, including:
 - desktop reviews
 - site visits and evidence collection
- federal, state or territory legislation and regulations relating to pest management activities
- designing and developing pest management plans and procedures
- assessing work team performance and skills
- importance of public and stakeholder consultation in pest management planning.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for reviewing records and revising documents
- specifications:
 - legislation, regulations and industry codes of practice for pest management
- relationships:
 - stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPMG507 Develop a regional pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a pest management plan that contains objectives and management options which comply with relevant legislation and best practice principles of pest management
- consult with stakeholders to reach agreed upon outcomes from identified objectives
- scope geographical area, landscape and land uses within area and with stakeholders
- develop pest management plan according to defined pest problem
- align pest management plan to biosecurity plans or legislation
- develop pest management plan in accordance with sustainable land use principles, economic feasibility, environmental acceptability and statutory requirements for pest control
- develop, evaluate and document all management options to control, eradicate or prevent pest populations
- achieve approval of the plan by key stakeholders
- conduct risk assessments and cost-benefit analyses of the range of management options available in order to select the best option for the specific context
- apply work health and safety policies and procedures in the context of own work
- include appropriate animal welfare Code of Practice and Standard Operating Procedures in the plan
- apply appropriate sustainability practices in the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- planning techniques

- concepts of the strategic approach to pest management, the importance of monitoring and the effectiveness of management evaluation
- relevant local, regional, State/Territory and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- principles of integrated pest management
- types of monitoring technology available
- land use processes, ecological systems and production systems
- pest management options and strategies
- techniques used to validate target pest population and distribution data supplied by stakeholders, and methods of obtaining other relevant data
- how to measure or estimate economic losses and environmental impacts from pest presence
- Federal and State or Territory legislation and regulations relating to property, stock and duty of care
- target pest biology and lifecycles
- potential diseases or toxicity risks
- pest population dynamics and economic and environmental thresholds
- wildlife issues and how to minimise risks to non-target species as well as deal with pest behaviour
- environmental protection legislation
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG509 Investigate a pest control failure

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to investigate causes of pest control failure after the implementation of a pest management plan.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

Treatment may be any measure used to decrease the pest population and the damage caused by it.

This unit applies to regional pest control officers and managers who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

Individuals operating in this field are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess planning techniques used	1.1 Determine and assess management techniques used in the pest management plan 1.2 Assess the level of community and stakeholder consultation carried out 1.3 Evaluate the level of commitment gained from the community and stakeholders 1.4 Assess whether the definition of the pest problem is correct 1.5 Assess staff understanding of the pest and the damage caused 1.6 Determine monitoring techniques used and assess suitability
2. Assess treatment failure	2.1 Assess whether damage caused by the pest after treatment is within expectations 2.2 Determine pre-treatment and post-treatment pest infestation levels by monitoring pest management plan records and inspection 2.3 Determine expected pest population after treatment using available information 2.4 Assess the difference between expected and monitored population 2.5 Assess treatments and application techniques used 2.6 Determine whether failure is due to product failure or pesticide resistance if pesticides are involved 2.7 Determine operator's qualifications and experience in applying a particular pest treatment where appropriate
3. Evaluate solutions to the failure	3.1 Assess possible solutions to the failure 3.2 Determine best option for solution based on cost, appropriateness to the problem and timing 3.3 Review pest management plans and implementation plans as required and advise stakeholders, personnel and contractors of the changes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCPMG406A Investigate a reported pest treatment failure

Assessment Requirements for AHCPMG509 Investigate a pest control failure

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate and assess a pest treatment failure
- find solutions to the failure
- analyse pre-treatment and post-treatment pest infestation levels
- assess planning techniques used
- evaluate solutions to the failure

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to survey pest populations to determine infestation levels
- monitoring techniques
- how to assess whether the definition of the pest problem is correct
- range of pest treatments appropriate to context
- a deep understanding of a variety of pest control measures
- the principles that underpin the strategic approach to managing pests
- Federal, State or Territory legislation and regulations relating to pest management activities
- chemical, biological, physical and habitat techniques for pest management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPRK307 Mate pigs naturally

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to manage the mating of pigs, including preparing for and facilitating mating.

The unit applies to individuals who mate pigs under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, animal welfare legislative, regulatory and codes of practice requirements, and sustainability and biosecurity practices.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Assessment Requirements for AHCPRK307 Mate pigs naturally

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has mated pigs on at least two occasions and has:

- followed relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- followed workplace animal welfare practices
- facilitated mating
- completed mating procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environment and biosecurity legislation and regulations and workplace practices relevant to mating pigs
- workplace requirements applicable to health and safety in the workplace for mating pigs, including appropriate use of personal protective equipment (PPE)
- principles and practices of mating pigs, including:
 - nutritional requirements for boars
 - husbandry and management practices for pregnant and non-pregnant sows
 - anatomy and physiology of sows and boars
 - tools and equipment used during methods and procedures
 - methods and procedures for oestrus detection in sows
 - requirements, methods, procedures and management of mating in pigs
 - methods and management of conception rates in pigs
 - animal welfare legislation, codes of practice and procedures relevant to mating of pigs
 - documentation and record keeping requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to mating pigs
 - live pigs
 - materials, tools and equipment applicable to mating pigs
 - PPE applicable to mating pigs
- specifications:
 - workplace requirements applicable to health and safety in the workplace for mating pigs
 - environment and biosecurity legislation and regulations and workplace practices applicable to mating pigs
 - industry standards, legislation and codes of practice and procedures for animal welfare applicable to mating pigs
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPRK308 Monitor dry sow performance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to monitor dry sow performance, including determining conditions of pigs, adjusting nutrition for mating and providing adequate nutrition for pregnant sows.

The unit applies to individuals who monitor dry sow performance under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, animal welfare legislative, regulatory and codes of practice requirements, and sustainability and biosecurity practices.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

AHCSAW202 Recognise landforms and soil types

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to recognise commonly encountered landforms and soil, their origins and human and natural influences on their degradation.

The unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for landform and soil survey	1.1 Identify sources of expertise and references for assisting in landform and soil recognition 1.2 Prepare resources and equipment required for landform and soil survey 1.3 Identify hazards and report to supervisor for controls to implement

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	during field survey work 1.4 Follow workplace procedure for landform and soil field survey
2. Identify regional geology	2.1 Identify geological land forms and associated rock types for a local region 2.2 Conduct geological field tests to identify broad rock types and their characteristics 2.3 Recognise historical geological events that created landforms and soils in a local region
3. Recognise specified landforms and soils	3.1 Carry out a visual inspection of landforms and soil on specified site 3.2 Recognise and name outcropping rocks and parent materials by their identifiable characteristics 3.3 Conduct basic field tests to assist in recognising soil types 3.4 Recognise the association between soil type and local geology 3.5 Record description of landforms and soil for a specified site 3.6 Seek expert advice and consult references to confirm recognition of landform and soil type
4. Recognise and record degrading influences on landforms and soil	4.1 Identify natural and human activity that impacts on identified landforms and soil 4.2 Identify degrading processes associated with natural and human activity on specified site 4.3 Recognise impact of current land use of site on landforms and soil 4.4 Record degrading impact from current and projected future activity on landforms and soil according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret reference materials to identify characteristics and assist in the recognition of landforms, rock types and soils
Oral Communication	<ul style="list-style-type: none"> Use clear language, vocabulary, tone and pace appropriate for the audience to discuss and confirm recognition of soils and landforms with experts

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed landform and soil surveys on at least two sites with distinctly different landforms and soil conditions, and has recognised the landforms and basic soil type on each site.

There must also be evidence that the individual has:

- implemented safe work procedures relating to landform and soil field survey
- prepared for landform and soil recognition activities
- selected sampling and testing equipment and materials and:
 - conducted basic field tests on rock samples to assist recognition
 - conducted basic field tests on soil samples to assist recognition
- operated sampling and testing equipment according to safe work practices and manufacturer instructions
- recognised the processes affecting the formation and degradation of common landforms and soil types
- recorded results of landform and soil recognition activity according to supervisor instruction and workplace procedures
- cleaned and stored tools and equipment according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- main geological crustal processes and influences in a region
- main rock types, formation, common mineral content and characteristics for identification, including:
 - sedimentary
 - volcanic

- metamorphic
- field tests to assist in identifying rock types
- main soil types, common mineral content, soil characteristics and basic tests used for identification
- weathering, change and degrading processes relating to landforms and soil from both natural and human causes
- sampling and testing equipment
- landforms common to different geological regions, and the processes for their formation
- basic soil survey techniques and the equipment required
- records required for documenting results for rocks, landforms and soils
- sources of expertise and reference materials required for landforms and soil recognition.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field on at least two sites with different landforms and soil types, or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - sampling and testing equipment
 - personal protective equipment
 - access to expertise and reference materials to assist in recognition of soils and landforms
- specifications:
 - workplace instructions and procedures for sampling rocks and soils
 - manufacturer operating instructions for equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSAW203 Conduct erosion and sediment control activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to control erosion and sediment using earthworks construction and other land forming activities, usually using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector.

The unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined routine activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed erosion and sediment control on at least two different sites with distinctly different terrain and soil conditions.

There must also be evidence that the individual has:

- conducted erosion and sediment control activities as instructed by a supervisor
- identified hazards and followed safe operating procedures for each site
- identified erosion and sediment control structures, measures and practices
- carried out routine work using control measures and structures
- identified areas at risk of erosion
- operated machinery tools and equipment safely and efficiently
- followed biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- need of erosion and sediment, including:
 - importance of erosion and sedimentation to the community
 - effect on loss of habitat
 - effect on water quality
 - loss of production, assets and amenities
- maintenance, repair and monitoring requirements for erosion and sediment controls
- agents and processes of erosion and sedimentation, and ways to control them
- types of erosion and sediment control structures, and techniques for constructing them
- role of vegetation in erosion control
- basic catchment issues

- basic characteristics of erodible soils
- environmental and biosecurity procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on at least two different sites with distinctly different terrain and soil characteristics
- resources, equipment and materials:
 - tools, equipment and machinery for installing erosion and sediment controls specific to the site requirements
 - consumables and materials required for erosion controls
 - personal protective equipment
- specifications:
 - manufacturer operating instructions for equipment and machinery
 - workplace instructions and specifications
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSAW303 Construct conservation earthworks

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to use specialised earthmoving techniques to achieve fine tolerances in the construction of conservation earthworks, using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector.

The unit applies to individuals who work in conservation and land management roles and who use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

Special vehicle licenses may apply to this unit, dependent on the type of machinery and conditions of use. Specific determination should be sought through the relevant state or territory authority.

Assessment Requirements for AHCSAW303 Construct conservation earthworks

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, selected equipment and safely constructed earthworks for conservation using plans and specialisations.

There must also be evidence that the individual has:

- identified hazards and implemented controls and safe operating procedures
- prepared for construction according to construction plans and workplace requirements
- carried out planned earthworks with minimal damage to natural areas according to construction works plan and specifications, including:
 - excavation
 - transport
 - dumping
 - compaction of material
- applied finishing techniques to the site
- interpreted maps and plans to identify site construction requirements
- selected and safely used earthmoving equipment suitable for construction, soil properties and terrain
- cleaned, maintained and stored equipment and machinery according to biosecurity and environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- erosion and sediment control standards
- soil types and formation and impact on construction works and site access
- principles of conservation earthwork construction and erosion and sediment control, including:

- catchment management and soils
- earthmoving principles
- levels and levelling
- interpreting plans and designs
- natural area protection and rehabilitation principles, including:
 - preservation of topsoil
 - soils and effect on erosion and sediment control
 - recognition and preservation of threatened vegetation
 - basic plant root physiology and construction works
 - root disturbance and compaction
 - disturbance of fauna habitat
- application of legislation and regulations relating to conservation earthwork construction, including:
 - protection of flora and fauna
 - health and safety
 - environmental protection from fuels and oils
 - biosecurity
- safety while working on construction sites, including:
 - proximity to machinery and site personnel
 - impediments to safe machinery operation, including terrain
 - workplace health and safety procedures
 - personal protective equipment
- construction works and sequencing, including:
 - excavation and earthmoving principles
 - transport
 - dumping
 - compaction
 - surface finish
- risk factors, including human health and environmental damage
- environmental and biosecurity impacts and controls for constructing conservation earthworks.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on at least one conservation site for earthworks, or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment suitable for conservation earthworks

- personal protective equipment
- specifications:
 - workplace documents such as policies, procedures, processes
 - manufacturer operating instructions for equipment and machinery
 - workplace instructions, plans and specifications
- relationships:
 - work team, supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSAW304 Implement erosion and sediment control measures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted erosion and sediment control activities on at least one conservation worksite, and has constructed, installed and maintained at least three erosion and sediment control measures.

There must also be evidence that the individual has:

- identified hazards, assessed risk and implemented controls
- read and followed plans for construction work and site construction layout
- implemented site and equipment repairs and maintenance according to workplace procedures
- selected and operated tools and equipment according to safe work practices and manufacturer instructions
- cleaned, maintained and stored equipment, machinery and tools according to workplace and biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- construction and site plan types, reading and interpretation
- erosion and sediment control methods and construction techniques
- materials cartage pollution control
- operational planning skills to sequence and schedule the timing/duration of work
- workplace health and safety issues relating to erosion and sediment control works, including:
 - equipment
 - site-specific risks
 - personal protective equipment

- sun protection
- type and operation of machinery and equipment used for erosion and sediment control, including:
 - safety checks
 - site access and operational restrictions
 - maintenance
 - environmental protection from fuels and oils
 - impact of tools and machinery on biosecurity
- materials suitable for constructing erosion and sediment control measures, and where to source them on site
- limitations of structures, including:
 - timing of maintenance
 - structure life cycle
 - specifications and standards for construction.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a conservation worksite or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and materials for installing specified erosion and sediment controls
 - personal protective equipment
- specifications:
 - workplace policies, procedures and processes for safety, biosecurity and environmental safety
 - manufacturer operating instructions for specific equipment and machinery
 - workplace instructions and plans
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSAW401 Set out conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to set out standard structures using specialised pegging and marking techniques, for erosion and sediment control earthworks.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources. This includes undertaking a range of routine and non-routine activities and work in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret plans and specifications	1.1 Determine overall plan in consultation with landholder and surveyor 1.2 Establish earthworks specifications in consideration of desired

Element	Performance criteria
	outcome and prevailing conditions 1.3 Verify plan in line with job requirements
2. Relate plan to site	2.1 Locate key plan points on site 2.2 Identify additional features on site plan 2.3 Identify and record site issues which affect survey and pegging
3. Peg project	3.1 Establish pegging sequence in consultation with the site surveyor 3.2 Measure site dimensions in compliance with job specification 3.3 Establish peg locations using prescribed methods 3.4 Peg earthworks in line with project specification 3.5 Advise all construction personnel of pegging and the need for site integrity

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCSAW401 Set out conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- set out conservation earthworks
- identify hazards and ensure the safety of self, field operators and any other person on site
- interpret plans and specifications
- relate plan to site
- measure out site dimensions precisely and peg project
- protect site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types of survey equipment
- civil engineering and survey techniques applicable to conservation earthworks
- erosion control and design principles
- principles of native topsoil conservation and protection
- interpretation of plans and general and technical specification

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSAW402 Set out conservation earthworks

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has interpreted plans and specifications and transferred dimensions to at least one conservation earthworks site.

There must also be evidence that the individual has:

- set out conservation earthworks site using industry and workplace practices
- identified hazards, assessed risks and implemented controls for the survey site
- interpreted plans and specifications and related plan to site for layout
- transferred measurements from plan to site to specified accuracy
- marked out site according to workplace and industry practices
- informed work team of layout and to preserve the integrity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- plans and plan reading and interpretation, including:
 - types of plans
 - general and technical specifications
 - scale and calculating dimensions
 - supplementary plan documentation
 - version control
- survey equipment and its use for setting out earthworks, including:
 - equipment used for linear dimensions
 - determining levels and heights
 - setting up, operation and maintenance of equipment for preserving accuracy
- civil engineering and survey techniques applicable to conservation earthworks, including:

- industry operating procedures
- methods and materials used for marking out sites
- workplace health and safety issues relating to site safety while undertaking site survey works, including:
 - safe use of laser equipment
 - site-specific risks and impediments
 - personal protective equipment
 - sun protection.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a conservation construction site or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - surveying tools and equipment for transferring measurements
 - consumables for marking out site
 - personal protective equipment
- specifications:
 - workplace policies and procedures for safely conducting survey work
 - manufacturer operating instructions for survey equipment
 - workplace instructions, plans and specifications
- relationships:
 - landholder
 - surveyor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSAW404 Supervise implementation of conservation earthworks plans

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to supervise the on-site implementation of earthworks designed to control erosion and sediment at a given site.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. This includes using discretion and judgement in the selection and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan efficient implementation of erosion and sediment control works	1.1 Review plans and specifications and correlate to earthworks work site 1.2 Determine resource requirements to undertake work 1.3 Plan and record work sequences according to proposed work schedule

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify pest control requirements and develop a strategy for control</p> <p>1.5 Order resources required for works according to construction schedule and workplace procedures</p> <p>1.6 Identify potential regulatory, planning, biosecurity and environmental impacts of the work, and notify senior management of inconsistencies</p> <p>1.7 Identify workplace health and safety hazards, assess risks and implement control measures</p>
2. Direct and monitor work	<p>2.1 Communicate instructions and expected work performance standards to work team</p> <p>2.2 Assess work team skill level and arrange training according to assessment outcomes</p> <p>2.3 Assess site for constraints limiting achievement of performance targets, and modify techniques and schedules to mitigate constraints</p> <p>2.4 Report mitigating conditions and project modifications to senior management for approval</p> <p>2.5 Assess work performance against target and adjust activities or plan where inconsistencies in performance are identified</p> <p>2.6 Monitor site and machinery operational safety according to workplace health and safety policies and environmental and biosecurity practices</p> <p>2.7 Liaise with stakeholders to keep them apprised of project development</p>
3. Complete work	<p>3.1 Inspect site for confirmation of completion of work according to performance targets</p> <p>3.2 Report underperformance to target, and arrange rectification notices</p> <p>3.3 Supervise the maintenance and cleaning of machinery and equipment</p> <p>3.4 Report outcomes of conservation earthworks to senior management according to workplace reporting procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyse project plans and specifications, and consolidate information into schedules, programs, materials and equipment requirements, and for monitoring work team performance
Writing	<ul style="list-style-type: none"> Prepare reports for stakeholders and senior managers to inform on project progress and completion targets, using clear and accurate language
Oral Communication	<ul style="list-style-type: none"> Use collaborative and inclusive techniques, including active listening and questioning and reading of non-verbal signals, to convey and clarify instruction to workers and to provide reports to stakeholders
Numeracy	<ul style="list-style-type: none"> Interpret and perform calculations to analyse materials and resource requirements, to determine costs and quantities, and to accurately report on progress performance against target

Assessment Requirements for AHCSAW404 Supervise implementation of conservation earthworks plans

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, supervised the implementation of conservation earthworks, and has:

- determined operational resource requirements, including:
 - human resources
 - materials and consumables
 - tools and equipment
 - financial
- identified hazards and implemented controls for the site
- identified pests and control strategy
- planned the implementation of works
- protected natural areas from damage
- directed implementation of planned works
- monitored job performance against target and took action to rectify
- identified and addressed risks to achieving planned outcomes
- communicated with stakeholders about work undertaken
- assessed and arranged work team upskilling
- ensured workplace health and safety policies and procedures were followed
- monitored adherence to biosecurity measures and sustainability practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- conservation earthworks standards and principles, including:
 - erosion control and design principles

- sediment control principles
- natural area topsoil protection and rehabilitation principles
- impact of earthworks on the ecology
- impact of geology on soils and subsequent earthworks activity and site access
- pest control required on earthworks, including:
 - site weeds
 - soil-borne pests and pathogens
 - strategies required to control or eradicate
- supervision techniques and strategies, including:
 - working with work teams
 - assessing performance
 - rectifying performance issues
 - reporting procedures
- work sequencing and scheduling
- equipment most suitable to the constructing of erosion and sediment control works, including:
 - earthmoving principles
 - principles of machine operation
- quality assurance systems, processes and practices
- staff deployment, supervision, skills assessment and training
- application of legislations and codes of practice, including:
 - workplace health and safety
 - environmental legislation, codes of practice
 - biosecurity
 - workplace policies and procedures
 - enterprise requirements to work site
- communications strategies to ensure stakeholders are engaged and informed, including:
 - working with the media
 - special interest groups
 - general public
 - clients and senior managers
- workplace health and safety hazards associated with conservation earthworks, and the controls necessary to remove or minimise associated risks
- state/territory legislative requirements related to conservation earthworks, environmental protection and biosecurity standards.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated on a conservation earthworks site or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - materials and other resources as specified in project plans and specifications
 - tools and equipment required to perform earthworks activities
- specifications:
 - workplace policies and procedures for safety and supervision of work
 - earthworks plans and specifications
- relationships:
 - stakeholders
 - senior managers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSAW504 Design control measures and structures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to design erosion and sediment control measures and structures.

The unit applies to individuals who work in soil and water conservation and who analyse information and exercise judgement to complete design and development activities, demonstrating a deep understanding of the technical areas within soil and water conservation. They have accountability for the work of others and analyse, design and communicate solutions to complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify measures or structures to be designed	1.1 Review erosion and sediment control plan for technical accuracy and environmental impact 1.2 Confirm adherence to regulations and legislation, and record on works plans

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Confirm budget constraints for project with management or client 1.4 Apply design criteria according to industry standards
2. Apply design procedures	2.1 Calculate catchment characteristics to required accuracy 2.2 Determine design specifications for project 2.3 Use a computer aided design (CAD) program to develop draft design according to budgetary constraints and erosion and sediment control plan 2.4 Verify design against plans, budget and industry best practice with stakeholders 2.5 Review and recommend changes to the design to comply with design procedures and accepted industry practices and environmentally sustainable practices
3. Prepare specification schedule	3.1 Prepare documentation and specifications for design 3.2 Verify design and documentation complies with industry standards 3.3 Confirm suitability of design and specifications for the category of work and legislative requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, assess and critique data and information from legislation and regulations and plans for incorporation into design
Writing	<ul style="list-style-type: none"> Select appropriate conventions and stylistic devices to express precise meaning in design documentation and specifications
Numeracy	<ul style="list-style-type: none"> Use highly developed numeracy skills to interpret design criteria from catchment characteristics and costs, and perform calculations to translate into dimensions and structural design of control measure

Assessment Requirements for AHCSAW504 Design control measures and structures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced at least one design for erosion and sediment control measures and structures, and has:

- identified control measures for a specified situation
- applied design procedures and prepared specifications
- costed the project and provided recommendations according to budget
- used computer aided design (CAD) program to create the design
- determined design specifications according to industry standards
- developed design plan to meet planned sediment and erosion control criteria
- verified design with stakeholders and for compliance with sustainability principles.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- erosion control and design principles:
 - soils and soil formation
 - levels and levelling
 - earthmoving principles
 - total catchment issues
 - managing peak water flows
- state and territory legislative requirements for design of control measures, including heritage and cultural regulations
- sub-surface and surface drainage principles and systems
- environmental issues related to the design
- limitations of design aids provided for industry
- CAD software for design.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated for a specified site for erosion and sediment control, or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology with CAD software
- specifications:
 - workplace documents, policies and procedures
 - catchment data for determining the design characteristics
 - legislation and codes of practice for civil design work
- relationships:
 - client/stakeholder
 - senior manager.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish suitability of development proposal	1.1 Access and analyse development proposal for site 1.2 Investigate development site and compile data on suitability for development 1.3 Consider changes to development proposal, and report to developer or consenting authority

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Verify development proposal complies with regulatory planning authority and environmental, heritage and cultural legislation 1.5 Confirm development proposal meets erosion and sediment control guidelines
2. Develop erosion and sediment control strategy	2.1 Develop erosion control measures for site 2.2 Develop sediment control measures for site 2.3 Apply workplace health and safety and environmentally sustainable practices to strategy 2.4 Establish erosion and sediment control strategies 2.5 Document strategies in cooperation with developer and consenting authority
3. Prepare an erosion and sediment control plan	3.1 Check earthwork structures or measures comply with selection criteria and industry guidelines 3.2 Develop erosion and sediment control plan for site 3.3 Design structures and specifications for erosion and sediment control 3.4 Compile plans, specifications and documentation into final plan, and verify compliance with industry guidelines

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, evaluate and analyse ideas and information from site development documents, and compare with legislation, regulations and other compliance documents to verify the suitability and compliance of development for site
Writing	<ul style="list-style-type: none"> Demonstrate sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning in plans and strategies Prepare documentation and specifications for plans and designs,

Skill	Description
	expressing ideas, exploring complex design issues and constructing the documents accurately and succinctly to industry standards
Numeracy	<ul style="list-style-type: none"> Interpret complex design ideas and perform calculations with precision and accuracy for inclusion in erosion and sediment control structures

Assessment Requirements for AHCSAW505 Plan erosion and sediment control measures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed at least one plan for erosion and sediment control measures according to regulatory requirements and industry standards.

There must also be evidence that the individual has:

- established suitability of development proposal to location and environment
- prepared erosion and sediment control plans to enterprise standards
- developed erosion and sediment control measures consistent with industry principles and selection criteria
- prepared an erosion and sediment control plan according to industry standards and in compliance with regulatory planning authority.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- application of relevant environmental, planning, groundwater and heritage and cultural legislation in erosion and sediment control work
- planning process for erosion and sediment control
- surface water and groundwater interactions and their influence on erosion, erosion control and design, including:
 - soils and soil formation and impact on water flow
 - levels and levelling
 - earthmoving principles
 - total catchment issues
 - managing peak water flows
 - sub-surface and surface drainage principles and systems
- computations relevant to water runoff, flow and design of erosion control

- structures and structural design principles of erosion and sediment control
- permits or approvals required for developing erosion and sediment control structures
- environmental issues related to erosion and sediment
- awareness of the limitations of design aids provided for industry
- workplace health and safety implications of implementing plans.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a development site requiring sediment and erosion control, or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology with planning and design tools and resources
- specifications:
 - workplace policies, procedures and processes for planning and design
 - site development proposals
 - legislation, regulations and industry codes of practice for controlling land degradation sediment
- relationships:
 - developer
 - consenting authority.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSDT302 Identify seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise and identify seeds and contribute samples to the seed reference collection. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for seed identification	1.1 Confirm seeds requiring identification 1.2 Prepare resources and equipment for use in identification 1.3 Identify, select and prepare for use, processes for seed identification

Element	Performance criteria
2. Identify seed	2.1 Identify specified seeds according to their general characteristics 2.2 Record botanical name of seed to species level where possible 2.3 Seek advice when necessary and where appropriate to confirm identification
3. Update the reference collection	3.1 Consult supervisor about possible addition to the reference collection 3.2 Document information and add the seed to the reference collection if appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT302A Identify seeds.

Assessment Requirements for AHCSDT302 Identify seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for seed identification
- recognise or identify seed to genus and, where possible, species level
- contribute to enterprise seed reference collection

Knowledge Evidence

The candidate must demonstrate knowledge of:

- binomial nomenclature
- concepts of seed identification
- enterprise and/or legal traceability requirements
- enterprise standard operating procedures (SOPs)
- relevant work health, safety and environment requirements
- seed identification techniques
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT306 Perform a seed germination test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to performing germination tests on a seed sample under laboratory conditions. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret and schedule test requirements	1.1 Identify seeds to be germinated, test methods and equipment 1.2 Recognise hazards and enterprise control measures associated with the sample, seed pre-treatment, test methods, reagents and/or equipment

Element	Performance criteria
	1.3 Plan work sequences
2. Prepare materials for test	2.1 Draw prescribed number of replicates 2.2 Select and prepare growing media 2.3 Pre-treat seed to break physiological dormancy where necessary 2.4 Check water quality and pH is within required tolerances 2.5 Check and prepare apparatus and equipment for germinating seeds
3. Plant and maintain seeds	3.1 Plant seed on or into selected media 3.2 Monitor temperature and light conditions of germination apparatus in accordance with test procedures
4. Evaluate test results	4.1 Categorise seedlings and count as normal or abnormal 4.2 Assess un-germinated seed as hard, fresh or dead 4.3 Assess other determinations for un-germinated seed if required 4.4 Record and report results
5. Maintain a safe work environment	5.1 Use safe work practices and personal protective equipment (PPE) 5.2 Minimise wastes and environmental impacts 5.3 Collect and dispose of laboratory and hazardous waste 5.4 Clean and store equipment and reagents

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT306A Perform a seed germination test.

AHCSDT308 Perform tests for quality on seeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to perform tests on seeds and grain to determine quality. Tests are performed under laboratory conditions in accordance with industry standards.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

Seed to be processed for Certification must be sampled by an Authorised Sampler in accordance with International, Federal and State seed certification regulations.

Pre-requisite Unit

Nil

Unit Sector

Seed Testing (SDT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare seed for testing and maintain condition and purity	1.1 Identify purpose of seed tests from work instructions 1.2 Verify authenticity of seed from submitted sample documentation 1.3 Verify submitted seed sample complies with condition specified for seed test and report inconsistencies to supervisor 1.4 Prepare working test sample/s from submitted seed sample

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>according to workplace and laboratory procedures</p> <p>1.5 Store and maintain condition and quality of seed samples for testing according to seed species, workplace procedures and industry standards</p> <p>1.6 Implement procedures to prevent contamination of submitted sample and working samples</p> <p>1.7 Label and record working samples according to workplace and industry standards for traceability</p>
2. Prepare equipment for seed tests	<p>2.1 Select number of replicates for seed test according to specified test procedure and work instructions</p> <p>2.2 Prepare the required number of replicates according to specific test procedures and industry standards</p> <p>2.3 Label and store replicates according to workplace procedures and industry standards</p> <p>2.4 Compile and prepare materials required according to specified seed test procedures</p> <p>2.5 Select, clean, check and calibrate test equipment according to manufacturer instructions and seed test specifications</p> <p>2.6 Report and record faults, repairs and calibration of equipment according to workplace procedures</p> <p>2.7 Identify health and safety hazards, assess risk and implement controls according to workplace procedures</p>
3. Conduct seed tests	<p>3.1 Measure quantities of seed required for each test replicate according to test procedures</p> <p>3.2 Pre-treat or condition seed replicates ready for testing according to test procedures</p> <p>3.3 Conduct seed test according to seed test procedures and industry standards</p> <p>3.4 Maintain conditions to maintain quality and prevent contamination of replicates during testing process</p> <p>3.5 Update labelling of replicates and records according to workplace and industry standards for traceability</p>
4. Examine and assess tested seed	4.1 Identify endpoint of test and prepare replicates for assessment according to testing procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Examine each replicate and record observations</p> <p>4.3 Assess observations against standards specified in workplace and industry procedures</p> <p>4.4 Record observations and test results according to workplace and industry procedures</p>
5. Prepare and report test results	<p>5.1 Calculate test results according to workplace procedures and industry standards</p> <p>5.2 Compile and document test results</p> <p>5.3 Assess test results against standards and report results according to workplace procedures</p> <p>5.4 Update records according to workplace and industry standards for traceability</p>
6. Finalise testing procedures	<p>6.1 Dispose of replicates and waste according to testing protocols and workplace waste and biosecurity procedures</p> <p>6.2 Clean and store test equipment according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret seed testing procedures and industry standards to ensure accuracy of tests performed and integrity of test results
Writing	<ul style="list-style-type: none"> Document test results accurately using industry recognised language and formatting
Numeracy	<ul style="list-style-type: none"> Perform calculations accurately and according to industry standards for seed testing

Assessment Requirements for AHCSDT308 Perform tests for quality on seeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed the following tests on seeds:

- seed purity
- germination
- fluorescence
- moisture
- 'Determination of Other Seeds by Number' test
- hybrid vigour

There must also be evidence that the individual has:

- verified compliance of seed sample with documentation, including:
 - seed species/variety
 - seed condition as submitted
 - seed condition suitable for testing
- prepared and stored samples to maintain quality and condition
- selected, prepared and used testing equipment and materials to conduct tests
- selected, and prepared replicates from working samples for testing
- conducted seed tests, examined tested seed, assessed and calculated test results
- maintained accurate labelling and records at each stage of the testing process suitable for traceability according to industry and workplace standards
- cleaned test equipment, laboratory and disposed of waste according to biosecurity and workplace procedures.

Knowledge Evidence

- An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
- industry and enterprise standard operating procedures (SOPs) for seed tests, including:

- seed purity
- germination
- fluorescence test on seeds
- moisture
- 'Determination of Other Seeds by Number' test
- hybrid vigour
- testing equipment, setup, calibration and operation for the different seed tests
- work health, safety and environment requirements
- seed biology and relation to seed quality, condition and seed tests
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- preparing statistically representative replicates by weight or number of seed for testing
- seed sampling methods, including:
 - hand samples
 - mechanical samples
 - authorised sampler and seed certification
- federal and state agencies overseeing seed movement in Australia and sampling and testing standards, including:
 - Australian Quarantine and Inspection Service (AQIS)
 - Organisation for Economic Co-operation and Development (OECD)
 - Association of Official Seed Certifying Agencies (AOSCA)
 - other certification agencies
- assessing seed test results against industry standards and reporting results
- recordkeeping and documentation for traceability and reporting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in seed testing laboratory or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seeds of crops or pasture plants
 - tools and equipment to perform all the tests specified in the Performance Evidence
 - personal protective equipment
- specifications:
 - sampled seed documentation
 - workplace policies, procedures, processes and forms for seed testing
 - manufacturer operating instructions for seed sampling and testing equipment
 - specific safety data sheets for reagents used in seed testing

- workplace instructions and industry specifications for seed testing and assessment
- specific seed testing and certification regulations and industry practice
- relationships:
 - supplier of seed for testing
 - supervisor(s)
- timeframes:
 - according to seed testing times specified testing procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to receive a sample of seed, reduce the sample for testing and store the working sample to maintain its quality.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Seed Testing (SDT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Receive submitted sample	1.1 Receive submitted sample and verify documentation 1.2 Assess sample for compliance with documentation and laboratory standards and report inconsistencies to supervisor 1.3 Label sample and update records according to workplace procedures and industry standards 1.4 Prepare submitted sample for testing according to timeframes

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	specified in workplace procedures and documentation 1.5 Handle and store submitted sample according to workplace procedures and industry specifications for species
2. Reduce sample	2.1 Check working area and equipment is clean and free of contaminants 2.2 Identify and use equipment suitable for dividing samples according to workplace procedures and industry specifications for species 2.3 Reduce sample size to equal or greater than required working sample according to workplace and industry procedures 2.4 Package working sample for testing according to procedures 2.5 Update sample labelling and records according to workplace procedures and industry specifications
3. Store working sample after testing	3.1 Receive tested samples and verify records and labels before storing 3.2 Handle samples according to workplace guidelines where live insects have been detected before storage 3.3 Store samples after testing in environmental conditions that minimise changes in seed quality traits

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Document samples and labels accurately using industry standards formatting and language
Numeracy	<ul style="list-style-type: none"> Calculate seed quantities and sample sizes accurately

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared a working sample of seeds for testing from at least five samples submitted and has:

- received and verified submitted samples
- obtained a working sample from a seed sample submitted for testing
- reduced samples to a size consistent with documentation and industry standards
- updated documentation and labelling accurately
- stored samples following testing to preserve their integrity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace procedures for sampling seeds for testing
- mechanical dividers and their applications
- sample reduction methods and apparatus
- procedures for obtaining working samples for different tests
- relevant work health, safety and environment requirements
- seed handling and storage requirements to maintain seed quality
- the rules and role of the International Seed Testing Association (ISTA).

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a seed testing laboratory or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seed samples with documentation for testing
 - seed sampling equipment
 - recording and labelling materials
- specifications:
 - specific workplace procedures, processes, forms for seed sampling
 - manufacturer operating instructions for sampling equipment
 - workplace instructions and seed sampling specifications
 - industry codes of practice and standards
- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSDT310 Identify seeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has accurately identified the seeds of at least ten different crop plants to species level and has:

- prepared for seed identification
- identified botanical name of seed according to nomenclature specified in workplace procedures
- contributed to workplace seed reference collection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- binomial nomenclature
- basic botany and concepts required for seed identification
- seed identification techniques
- workplace and/or legal traceability requirements
- workplace procedures
- tools and testing methods
- work health, safety and environmental requirements in seed testing conditions
- role of workplace seed reference collections
- role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a seed testing laboratory, on a farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seeds requiring identification
 - seed identification reference materials, tools and equipment
- specifications:
 - workplace policies, procedures, processes and forms for seed testing
 - laboratory or workplace instructions and specifications
- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSDT412 Perform advanced tests on seeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to perform advanced tests on seeds and grain to determine quality, performed under laboratory conditions in accordance with Australian and industry standards. Tests to be demonstrated include, Anguina test on annual ryegrass seed, endophytic seed test, electrophoresis test on a seed sample, tetrazolium test, seed vigour test and 1000 seed weight test.

The unit applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

Seed to be processed for Certification must be sampled by an Authorised Sampler in accordance with international, federal and state seed certification regulations.

Pre-requisite Unit

Nil

Seed Testing (SDT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare seed for testing and maintain	1.1 Identify purpose and type of seed tests from work instructions 1.2 Verify authenticity of seed from submitted sample documentation

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
condition and purity	<p>1.3 Verify submitted seed sample complies with condition specified for seed test and report inconsistencies to supervisor</p> <p>1.4 Select and implement correct personal protective equipment (PPE)</p> <p>1.5 Prepare working test sample/s from submitted seed sample according to workplace and laboratory procedures</p> <p>1.6 Store and maintain condition and quality of seed samples for testing according to seed species, workplace procedures and industry standards</p> <p>1.7 Implement procedures to prevent contamination of submitted sample and working samples</p> <p>1.8 Label and record working samples according to workplace and industry standards for traceability</p>
2. Prepare equipment and materials for seed tests	<p>2.1 Select number of replicates for seed test according to specified test procedure and work instructions</p> <p>2.2 Prepare the required number of replicates according to specific test procedures and industry standards</p> <p>2.3 Label and store replicates according to workplace procedures and industry standards</p> <p>2.4 Compile and prepare materials required according to specified seed test procedures</p> <p>2.5 Select, clean, check and calibrate test equipment according to manufacturer seed test specifications</p> <p>2.6 Rectify or arrange repair of faulty equipment according to workplace procedures</p> <p>2.7 Update records of equipment faults, repairs and calibration</p> <p>2.8 Identify health and safety hazards, assess risk and implement controls according to workplace procedures</p>
3. Implement seed testing procedures	<p>3.1 Measure quantities of seed required for each test replicate according to test procedures</p> <p>3.2 Pre-treat or condition seed replicates ready for testing according to test procedures</p> <p>3.3 Conduct seed test according to seed test procedures and industry standards</p> <p>3.4 Maintain conditions to maintain quality and prevent contamination of replicates during testing process</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.5 Update labelling of replicates and records according to workplace and industry standards for traceability
4. Examine and assess tested seed	4.1 Identify endpoint of test and prepare replicates for assessment according to testing procedures 4.2 Examine each replicate and record observations 4.3 Assess observations against standards specified in workplace and industry procedures 4.4 Record observations and test results according to workplace and industry procedures
5. Prepare and report test results	5.1 Calculate test results according to workplace procedures and industry standards 5.2 Compile and document test results 5.3 Assess test results against standards and report results according to workplace procedures 5.4 Update records according to workplace and industry standards for traceability
6. Finalise testing procedures	6.1 Dispose of replicates and waste according to testing protocols and workplace waste and biosecurity procedures 6.2 Clean and store test equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret seed testing procedures and industry standards to ensure accuracy of tests performed and integrity of tests results
Writing	<ul style="list-style-type: none"> Document test results accurately using industry recognised language and formatting
Numeracy	<ul style="list-style-type: none"> Perform calculations accurately and according to industry standards for seed testing

Assessment Requirements for AHCSDT412 Perform advanced tests on seeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed each of the following tests on seeds:

- tetrazolium test, including:
 - prepared seed and tetrazolium solution
 - stained seeds with a tetrazolium solution
- seed vigour test
- 1000 seed weight test, including:
 - calculated variance, standard deviation and coefficient of variance
 - determined the weight per 1000 pure seeds from a submitted sample

There must also be evidence that the individual has conducted at least one of the following tests:

- Anguina test on annual ryegrass seed, including:
 - identified galls on ryegrass seed
 - inspected seed samples using a diaphanoscope
 - used a microscope to detect nematode gall (*Anguina* spp.)
- endophytic seed test, including:
 - prepared endophyte staining solution
 - tested seed for endophyte presence
 - tested seedlings for endophyte presence
- electrophoresis test on a seed sample, including:
 - extracted seed and prepared gel
 - centrifuged seed and gel mixes
 - interpreted stain bands and patterns.

There must also be evidence that the individual has:

- verified compliance of seed sample with documentation

- selected and correctly used personal protective equipment (PPE)
- prepared and stored working sample and supplied sample to maintain quality and condition
- selected, prepared and used testing equipment and materials to conduct tests and complied with manufacturer specifications
- selected, and prepared replicates from working samples for testing
- conducted seed tests, examined tested seed, assessed and calculated test results
- maintained accurate labelling and records at each stage of the testing process for traceability according to industry and workplace standards
- cleaned test equipment, laboratory and disposed of waste according to biosecurity and workplace procedures
- disposed of replicates and waste
- updated records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry and workplace operating procedures for seed tests, including:
 - Anguina test on annual ryegrass seed
 - endophytic seed test
 - electrophoresis test on a seed sample
 - tetrazolium test
 - seed vigour test
 - 1000 seed weight test
 - testing equipment, setup, calibration and operation for the different seed tests
- work health, safety and environment requirements
- seed biology and relation to seed quality, condition and seed tests
- role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- seed sampling methods, including:
 - hand samples
 - mechanical samples
 - authorised sampler and seed certification
 - preparing statistically representative replicates by weight or number of seed for testing
- federal and state agencies overseeing seed movement in Australia and sampling and testing standards, including:
 - Australian Quarantine and Inspection Service (AQIS)
 - Organisation for Economic Co-operation and Development (OECD)
 - Association of Official Seed Certifying Agencies (AOSCA)
 - other certification agencies
- calculations and statistical analysis of seed test results

- personal protective equipment (PPE)
- assessment of seed test results and against industry standards and reporting results
- recordkeeping and documentation for traceability and reporting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in seed testing laboratory or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seeds of crops or pasture plants
 - use of tools and equipment to perform all tests selected in the Performance Evidence
 - use of personal protective equipment
- specifications:
 - use of sampled seed documentation
 - use of workplace policies, procedures, processes and forms for seed testing
 - use of manufacturer operating instructions for seed sampling and testing equipment
 - access to specific safety data sheets for reagents used in seed testing
 - use of workplace instructions and industry specifications for seed testing and assessment
 - access to specific seed testing and certification regulations and industry practice
- relationships:
 - supplier of seed for testing
 - supervisor(s)
- timeframes:
 - according to seed testing times specified in testing procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSDT413 Handle and store seed subject to quarantine regulations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to store and handle seeds subject to quarantine or isolation to mitigate biosecurity risk, in accordance with laboratory procedures in compliance with state and federal regulations.

The unit applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

Federal, state and territory legislation, regulations and certification requirements apply to this unit for biological materials subject to quarantine.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has complied with state and federal regulations for handling and storing seed subject to quarantine and biosecurity regulations on at least one occasion, and has:

- handled, tested and stored seeds subject to quarantine
- maintained records and documentation of seed in compliance with state and federal quarantine and biosecurity regulations
- designed work procedures to prevent non-compliance
- reported non-compliance according to workplace and regulatory obligations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- state and federal regulations for handling and storing seeds subject to quarantine
- biosecurity regulations governing the importation and transportation of seeds in Australia
- laboratory systems, records and reporting procedures for dealing with seed subject to quarantine and biosecurity regulations
- testing methods and equipment
- relevant work health, safety and environment requirements
- statutory and legal compliance requirements for seeds.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in quarantine compliant laboratory or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seeds subject to quarantine restrictions
 - access to tools, equipment and materials subject to quarantine regulations
 - access to training and mentoring materials and equipment
- specifications:
 - use of workplace policies, procedures and processes
 - access to specific legislation, regulations and codes of practice for quarantine compliant laboratories
- relationships:

Assessment Requirements for AHCSDT414 Maintain a quarantine approved laboratory

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion maintained a quarantine approved laboratory and has:

- monitored a quarantine approved laboratory meeting federal and state regulations and certification
- planned work processes and initiated action to rectify instances of non-compliance
- maintained records and reporting according to quarantine and biosecurity regulations
- designed and negotiated changes to work practices and procedures to comply with quarantine and biosecurity regulations
- provided information, coaching and mentoring support to laboratory work team to comply with required work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- state and federal quarantine and biosecurity regulations for approved laboratories
- compliant laboratory systems, records and reporting procedures
- workplace procedures
- health, safety and environment requirements for approved quarantine laboratories
- statutory and legal compliance requirements
- coaching and mentoring strategies
- communication and supervision skills/techniques.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in quarantine compliant laboratory or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and materials subject to quarantine regulations
 - training and mentoring materials and equipment
- specifications:
 - workplace policies, procedures and processes
 - specific legislation, regulations and codes of practice for quarantine compliant laboratories and biosecurity
- relationships:
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSHG407 Prepare shearing team wages

Modification History

Release	Comments
Release 1	This version released with Agriculture Horticulture and Conservation and Land Management Training Package 4.0.

Application

This unit of competency describes the skills and knowledge required to prepare the wages for shearing teams.

This unit applies to individuals who manage shearing teams, who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

All work must be carried out to comply with workplace procedures, legislative requirements and workplace health and safety policies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain staff records	1.1 Confirm that all employees are signed on and declaration forms are completed and signed 1.2 Collect tax file and superannuation numbers and maintain confidentially

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Arrange employment agreements for staff 1.4 Ensure number and type of sheep shorn is recorded accurately 1.5 Record total units of work for each employee relevant to basis of engagement 1.6 Maintain staff injury records
2. Calculate earnings	2.1 Obtain relevant awards and current pay rates 2.2 Follow employment contracts and agreements 2.3 Calculate gross earnings for each employee
3. Calculate deductions and net pay	3.1 Calculate taxation deductions 3.2 Produce payslips for individuals 3.3 Transfer tax to the Australian Taxation Office 3.4 Calculate and document superannuation 3.5 Transfer superannuation payment to appropriate fund
4. Pay staff	4.1 Schedule electronic transfer of funds to individuals, in accordance with the relevant award 4.2 Arrange cash advances on request

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Access and interpret legislation and regulations relevant to taxation and superannuation
Get the work done	<ul style="list-style-type: none"> Effectively navigate online banking systems

Unit Mapping Information

Assessment Requirements for AHCSHG407 Prepare shearing team wages

Modification History

Release	Comments
Release 1	This version released with Agriculture Horticulture and Conservation and Land Management Training Package 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared wages for three shearing team members from different employee categories, using manual or computer-based systems, and including:

- maintained staff records
- calculated earnings, deductions and net pay
- arranged electronic transfers for individual's pay
- produced individual's pay slips.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- physical and financial recording systems
- accounting system software programs
- how wages are calculated for different employment categories, such as piece work, daily, per run, per fleece
- types of records kept during shearing, including the number and types of sheep shorn, the number of bales produced, the size of the shed
- roles of a shearing team, including shearers, learner shearers, crutchers, shearing cooks, shed hands, wool pressers, shearing shed experts and wool classers
- additional allowances that can be claimed, such as for mess, travel, vehicle
- Commonwealth and/or state and territory awards relevant to the shearing industry
- maintenance of employment and payment records
- Australian Tax Office requirements including Goods and Services Tax, Pay As You Go withholding tax and Super Guarantee Charge
- legislative requirements for keeping records of contracts, wage payments and payment summaries
- Commonwealth or state/territory legislation relevant to hiring shearing contractors.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - information about shearing activity over a pay period
 - access to internet banking
- specifications:
 - access to relevant award for shearing operations, and ATO and superannuation requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSOL202 Assist with soil or growing media sampling and testing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with the sampling and testing of soil or growing media sampling and testing.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect soil or media samples for testing	1.1 Discuss task requirements with supervisor and seek clarification where necessary 1.2 Prepare tools and materials for collecting samples

Element	Performance criteria
	1.3 Take and prepare samples as instructed 1.4 Assist with labelling and recording samples if required
2. Perform basic tests on soil or media sample	2.1 Recognise basic features of a soil profile 2.2 Assist with testing or inspecting physical properties of samples 2.3 Assist with testing chemical properties of samples 2.4 Relate soil test results to suitability of the soil or media for growing

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSOL201A Determine basic properties of soil and/or growing media.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSOL202 Assist with soil or growing media sampling and testing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect soil and media samples
- perform basic descriptive tests for soil texture, salinity and pH
- describe soils or media using commonly used descriptive terms
- assist with the use of simple soil testing equipment for testing pH and salinity
- prepare records of soil sampling results as required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recognising soils or growing media properties
 - basic soil or media field tests
 - soil or media chemical properties
 - soil or media physical properties
 - soil or media plant relationships
 - soil sampling techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL203 Assist with soil or growing media sampling and testing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to assist with the sampling and testing of soil or growing media, including collecting soil or media samples, performing basic tests on soil or media samples, and completing sampling and testing activities.

The unit applies to individuals who assist with soil or growing media sampling and testing under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soils and Media (SOL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect soil or media samples for testing	1.1 Confirm with supervisor soil or growing media to be sampled 1.2 Select soil or growing media sampling tools and materials 1.3 Follow environmental and biosecurity procedures when sampling and testing soil and growing media, to minimise impact

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Select, fit and use personal protective equipment applicable to the task 1.5 Take samples as instructed 1.6 Assist with labelling and recording samples as required
2. Perform basic tests on soil or media sample	2.1 Recognise basic features of soil or growing media 2.2 Assist with testing and inspecting physical properties of samples 2.3 Assist with testing chemical properties of samples 2.4 Relate soil or growing media test results to suitability for plant requirements
3. Complete sampling and testing activities	3.1 Remove and dispose of waste material 3.2 Clean and return tools and materials to required location 3.3 Identify and report unserviceable tools and materials according to workplace procedures 3.4 Record soil or growing media test results according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about soil and growing media sampling and testing
Writing	<ul style="list-style-type: none"> Use clear language and accurate industry terminology to prepare and record soil and media test results
Oral communication	<ul style="list-style-type: none"> Use clear language to confirm soil and media to be sampled and to report tool and materials unserviceability

Unit Mapping Information

Assessment Requirements for AHCSOL203 Assist with soil or growing media sampling and testing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has sampled and tested soil or growing media on at least two occasions, and has:

- selected and used soil and growing media sampling tools and material
- minimised environmental impacts associated with testing soil and media
- followed industry and workplace biosecurity procedures
- applied workplace health and safety requirements
- collected and described soil and media samples
- performed basic descriptive tests for soil or media properties
- assisted with the use of simple soil testing equipment for testing pH and salinity
- removed and disposed of waste material
- recorded soil and media test results and reported unserviceable tools and materials.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental impacts associated with testing soil or growing media
- industry and workplace biosecurity procedures applicable to soil and growing media testing
- workplace requirements applicable to health and safety in the workplace for testing soil or growing media
- principles and practices for recognising soils or growing media properties, including:
 - basic soil or media tests
 - basic soil or media chemical properties
 - basic soil or media physical properties
 - soil or media plant relationship

- soil or media sampling techniques.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - soil and growing media sampling and testing tools and materials
 - personal protective equipment applicable to soil and growing media sampling and testing
- specifications:
 - workplace requirements applicable to health and safety in the workplace, and sampling and testing soil and growing media
 - industry and workplace biosecurity procedures applicable to sampling and testing soil and growing media
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSOL301 Prepare growing media

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine the requirements of a growing media for various plants and preparing and storing the media in accordance with the production specifications.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Clarify work instructions with supervisor 1.2 Prepare tools and equipment 1.3 Identify hazards, assess risks and implement control measures 1.4 Select and use personal protective equipment (PPE)

Element	Performance criteria
2. Confirm specifications of growing media	2.1 Investigate and select various media components for specific plant requirements 2.2 Determine nutrient requirements for growing period 2.3 Determine growing media by plant requirements and accepted industry practice 2.4 Investigate sources of nutrients for their suitability 2.5 Analyse growing media for chemical, physical and biological characteristics to confirm suitability for plants 2.6 Determine sterilisation methods of the growing media
3. Prepare and store growing media	3.1 Establish growing media composition 3.2 Maintain soil mixing equipment in a clean and effective condition 3.3 Store components in a safe and hygienic manner 3.4 Weigh and mix components into the growing media 3.5 Dispose of waste in an environmentally safe manner 3.6 Store growing media is stored in safe and hygienic manner 3.7 Keep records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSOL301A Prepare growing media.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSOL301 Prepare growing media

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and analyse data
- confirm specifications of growing media
- interpret chemical labels
- prepare growing media
- store growing media

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing growing media
 - alternative methods of incorporating ingredients into a growing media
 - hygiene in the preparation and storage of the media
 - ingredients used in the preparation of growing media
 - physical, chemical and biological characteristics required of the media
 - plant nutrition
 - properties of the various ingredients used in the preparation of the growing media
 - requirements of a growing media
 - volume and weight determination

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL303 Implement soil improvements for garden and turf areas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide information about and determine its suitability for garden beds or turf areas and determine ameliorants or additives to improve it.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and collect soil samples for testing	1.1 Determine reasons for testing of soil 1.2 Prepare tools and materials for collecting samples

Element	Performance criteria
	1.3 Take samples according to recognised sampling techniques 1.4 Label and record samples
2. Determine physical characteristics of sample	2.1 Conduct tests for texture and structure on the samples 2.2 Determine soil colour and the presence of organic matter 2.3 Determine characteristics of soil profile where required 2.4 Determine depth of topsoil and determine if sufficient for the requirements of the plants to be installed 2.5 Determine the ability of soil to drain or retain water 2.6 Assess the physical characteristics of soil and determine improvements needed
3. Determine chemical characteristics of sample	3.1 Conduct tests for pH and salinity 3.2 Determine the suitability of soil for particular plants 3.3 Determine the soil's fertility and the need for additional fertiliser or other amendments 3.4 Determine the chemical characteristics of soil and improvements needed
4. Prepare soils for planting or replanting	4.1 Improve physical characteristics of garden or lawn areas as required 4.2 Adjust pH and salinity of soil in garden or lawn areas as required 4.3 Incorporate additional soil as needed to establish final levels 4.4 Finish soil level and consolidate ready for planting according to planting plans and enterprise procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Unit is not equivalent to AHCSOL302A Construct a soil profile.

Assessment Requirements for AHCSOL303 Implement soil improvements for garden and turf areas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct tests to determine soil physical properties of texture and structure
- conduct tests to determine soil chemical properties of pH and salinity
- make observations about fertility, mineral and organic matter content based on sample colour
- make observations about soil drainage and water holding capacity
- make recommendations to improve soils based on results of simple soil tests

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for providing information on soils or growing media
 - physical properties of soils and media
 - chemical properties of soils and media
 - products and processes for improving soils and media
 - sample collection, testing and methods used to perform tests
 - water holding capacity and readily available water
 - organic matter in soil and media
 - soil ameliorants and improvement techniques
 - nutrient availability in soils

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSOL304 Implement soil improvements for garden and turf areas

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has collected soil samples, including:

- determined the purpose for collecting and testing soil samples
- collected representative soil samples for testing and packaged and labelled them according to workplace and laboratory requirements
- collected samples of at least three different soil types, and:
 - conducted tests safely to determine soil physical and chemical properties according to industry standards
 - assessed test results and prepared soil improvement plan to meet the requirements and conditions required for the plant species to be cultivated.

There must also be evidence that, on at least one occasion, the individual has, according to workplace procedures:

- selected tools, materials and equipment required for implementing soil improvement plan
- calibrated equipment prior to application of soil improvement materials
- adjusted physical and chemical properties according to cultural requirements of the plants to be grown
- maintained records and reported soil test outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- physical properties of soils and media and methods for testing, including:
 - colour
 - organic matter
 - texture tests using field and sieve analysis techniques

- structure
- air filled porosity
- moisture holding capacity
- soil bulk density
- infiltration rate and drainage properties, including hydraulic conductivity
- perched water tables
- wettability
- chemical properties of soils and media, and methods for testing, including:
 - pH using colorimetric and pH meters
 - salinity, total dissolved salts and electrical conductivity
 - types of nutrient tests and their purpose
- soil sampling, collecting and testing procedures, including:
 - tools and equipment required
 - procedures for testing
 - procedures for sampling, securing, packaging and labelling
- soil and media improvement strategies for physical and chemical characteristics, including:
 - products and processes for improving soil and media physical condition
 - soil ameliorants and improvement techniques
 - bio-stimulants
 - organic matter and effect on soil and media
 - water holding capacity and readily available water, including wetting agents and penetrants
 - soil biological organisms and their impact
 - effect of pH, salinity and fertilisers on availability of nutrients
 - soil profile both natural and constructed
 - Australian standards AS4454:2012 Composts, soil conditioners and mulches, and AS4419:2018 Soils for landscaping and garden use
- assessment and interpretation of soil test results for physical and chemical properties and their relationship to cultivated plants relevant to workplace
- basic mathematics for calculating rates of application of soil additives, water holding capacity, air filled porosity and measuring and weighing materials to perform accurate soil tests
- using test results to determine soil improvements
- safe field and laboratory practices when collecting and testing soils and media
- record keeping and reporting procedures for soil collecting, testing and planning procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - at least three separate soil sites or media for collecting and testing
- resources, equipment and materials:
 - soil testing equipment, including pH meter and pH colour test kit, conductivity meter, soil colour charts, NPK colour test kit
 - equipment for storing and handling samples
 - accurate measuring equipment for soil testing
 - personal protection and other safety equipment required for safe handling and testing of soils
- specifications:
 - workplace procedures and instructions related to soil testing and soil improvement
 - industry standards for testing and interpreting soil test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSOL305 Prepare growing media

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to prepare growing media for various plants, including preparing for work, confirming specifications for growing media and preparing and storing the media.

The unit applies to individuals who prepare growing media under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work	1.1 Clarify work instructions with supervisor 1.2 Prepare required tools and equipment for the task 1.3 Recognise workplace hazards and report safety concerns 1.4 Select, fit, use and maintain personal protective equipment according to the task and workplace safety requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Confirm specifications of growing media	2.1 Investigate and select various media components for specific plant requirements according to growing media specifications 2.2 Determine plant nutrient requirements for growing period 2.3 Determine growing media by plant requirements and accepted industry practice 2.4 Investigate sources of nutrients and their suitability for plant requirements 2.5 Analyse growing media for chemical, physical and biological characteristics to confirm suitability for plants 2.6 Determine and applied sterilisation methods for the growing media
3. Prepare and store growing media	3.1 Establish growing media composition according to specifications 3.2 Maintain mixing equipment in a clean and effective condition 3.3 Store components in a safe and hygienic manner 3.4 Weigh and mix components into the growing media 3.5 Dispose of waste in an environmentally safe manner 3.6 Store growing media in a safe and hygienic manner 3.7 Record growing media preparation activities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations and products
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare growing media preparation activity records
Oral Communication	<ul style="list-style-type: none"> Use clear language to confirm work instructions

Skill	Description
Numeracy	<ul style="list-style-type: none"> Access growing media specification data Calculate and weigh growing media components
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Get the work done	<ul style="list-style-type: none"> Take responsibility for routine decisions about confirming specifications, preparing and storing growing media, and reflect on outcomes to identify effectiveness of decisions

Assessment Requirements for AHCSOL305 Prepare growing media

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared growing media on at least two occasions and has:

- applied workplace health and safety requirements
- collected and analysed data
- confirmed specifications of growing media
- analysed growing media chemical, physical and biological characteristics
- disposed of waste in an environmentally safe manner
- stored growing media.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for preparing growing media
- principles and practices for preparing growing media
- alternative pre-prepared growing media options, including coconut fibre bags
- alternative methods of incorporating ingredients into a growing media
- plant nutrition requirements for growing period
- ingredients used in the preparation of growing media
- physical, chemical and biological characteristics required of the media
- properties of the various ingredients used in the preparation of the growing media
- requirements of a growing media
- hygiene in the preparation and storage of the media
- volume and weight determination
- environmentally safe disposal of waste.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to growing media preparation
 - growing media tools and equipment
 - growing media ingredients
 - mixing and weighing equipment
 - personal protective equipment applicable to growing media preparation
- specifications:
 - growing media specifications
 - work instructions and workplace procedures for preparing growing media
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or current standards.

AHCSOL401 Sample soils and interpret results

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to take a soil sample and interpret the test results.

This unit applies to individuals whose job role includes undertaking soil or growing media sampling and interpreting the results as a foundation for further horticultural operations such as nutrition programs and irrigation scheduling.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Prepare for soil sampling	1.1 Identify the soils to be surveyed, surveying activity and contractors 1.2 Select tools, equipment and machinery as required by the testing agency requirements 1.3 Carry out pre-operational and safety checks on tools, equipment and machinery 1.4 Identify areas of homogeneous soil types for sampling 1.5 Locate services in consultation with the supervisor 1.6 Identify work and safety hazards, assess risks and implement controls 1.7 Select and use suitable safety equipment and personal protective equipment (PPE) 1.8 Maintain a clean and safe work area throughout and on completion of work
2. Determine soil characteristics by performing soil sampling	2.1 Determine the density and depth for a representative sampling of the area 2.2 Excavate holes at identified sampling sites 2.3 Collect and prepare, label, package and dispatch samples for off-site testing 2.4 Determine the physical and chemical characteristics of the soil 2.5 Clean and store sampling and testing tools and equipment 2.6 Record results
3. Interpret results of soil analysis	3.1 Classify the soil types of the sample area according to standards for soil classification 3.2 Determine, from published data and records, the acceptable soil physical and chemical parameters for a specified plant 3.3 Compare collected analytical results with acceptable physical and chemical parameters for a specified plant 3.4 Evaluate soil characteristics to determine whether they can be altered to meet plant needs 3.5 Determine the Readily Available Water values for irrigation sites

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSOL401A Sample soils and interpret results.

Assessment Requirements for AHCSOL401 Sample soils and interpret results

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect soil and media samples using appropriate sampling methodology
- file and record analytic results for future use
- implement a nutrient and nutrition program
- prepare soil and media samples for dispatch to soil analysis laboratory
- receive and interpret analytic results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of soils sampling
 - environmental implications associated with soil surveying activities and the application of analytical results
 - practical understanding of the range of sample collection, testing and analytical methods that may be used to perform soil surveys, and the association of surveying methods with site conditions, environmental implications and intended horticultural use of the surveyed site
 - soil ameliorants and soil improvement techniques for addressing site limitations identified through surveying
 - the capacity of soils to provide water to plants
 - the importance of organic matter in soil in relation to the intended horticultural use
 - the physical and chemical properties of soils in relation to their ability to support specified horticultural production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Soils and media [SOL]

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect information for soil mapping	1.1 Confirm soils samples collected for off-site assessment by soil testing agencies used recommended procedures 1.2 Collect soil physical, chemical and biological information

Element	Performance criteria
	1.3 Determine the acceptable soil parameters for specified plants from published data and records 1.4 Collect information about areas of cultural significance and habitats of biodiversity on the property 1.5 Collate research outcomes
2. Analyse soil information	2.1 Classify the soil types of the sample area according to standards for soil classification 2.2 Compare collected results with established parameters for land use and production 2.3 Evaluate soil characteristics to determine whether they can be altered to meet land use needs 2.4 Determine readily available water values for irrigation sites
3. Plot topography and soil survey data on property map	3.1 Map interpreted results 3.2 Identify potential uses of the soil for purposes of land classing, land capability, areas of cultural significance and habitats of biodiversity 3.3 Define property boundaries and features 3.4 Identify paddocks or irrigation areas 3.5 Plot contour or spot level information 3.6 Plot soil sampling sites on map 3.7 Determine soil profile and irrigation characteristics for each sampling site and irrigation area and index to the map 3.8 Index the Readily Available Water values for irrigation sites 3.9 Plot areas of specific concern on the map and index descriptions to the map

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSOL402A Develop a soil use map for a property.

Assessment Requirements for AHCSOL402 Develop a soil use map for a property

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse survey results
- determine soil characteristics
- identify adverse environmental impact of irrigation activities and take appropriate action
- interpret soil analyses results
- perform a soil survey
- plot topography and soil survey data on a property map

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing soil use maps
 - environmental impacts of irrigation, using water from any ground or underground source
 - methods and techniques of soil sampling
 - nutrient availability in soils
 - physical and chemical properties of soils
 - readily available water
 - soil analyses results
 - soil quality factors
 - soil types and profiles
 - soil water retention testing techniques
 - water table and salinity

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL403 Prepare acid sulphate soil management plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop management plans that address the relevant legislation and issues associated with land and ground water disturbing activities for acid sulphate soil (ASS).

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media [SOL]

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct assessment of the disturbing activity	1.1 Establish and document current or proposed land use following discussions with landholder and relevant consent authority

Element	Performance criteria
for ASS risk	1.2 Assess site data following industry guidelines and relevant consent authority standards 1.3 Establish compliance issues with relevant regulatory authority or environmental legislation or industry procedures 1.4 Communicate site investigations to landholder and establish agreement to develop a management plan in accordance with relevant consent authority requirements
2. Develop ASS remediation or management strategy	2.1 Review field investigation and laboratory test data and match to strategy options consistent with industry principles and relevant consent authority standards 2.2 Identify ASS management options consistent with industry guidelines and relevant consent authority requirements 2.3 Identify and document remediation or management strategies in consultation with the landholder and relevant consent authority
3. Prepare an ASS site management plan	3.1 Check remediation or management strategies against industry guidelines and relevant consent authority requirements 3.2 Incorporate design specifications for structures in management plan details 3.3 Detail monitoring strategies for the site in line with prevailing site factors and relevant consent authority standards 3.4 List on site responsibilities following industry guidelines and relevant consent authority requirements 3.5 Ensure contingency procedures in accordance with industry guidelines and relevant consent authority requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSOL403A Prepare acid sulphate soil management plans.

Assessment Requirements for AHCSOL403 Prepare acid sulphate soil management plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and use field and test data to identify strategies to remediate and manage the site
- complete a desktop assessment of the land for actual and potential ASS risk based on current and proposed land use, site data and compliance issues
- document an ASS management plan and effectively communicate it to the landowner, relevant consent authority and contractors
- support implementation of ASS management plan by reports on materials management and remediation and site rehabilitation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing acid sulphate soil management plans
 - ASS assessment tools
 - earthmoving principles
 - environmental impact issues
 - environmental impacts of ASS
 - environmental plans, strategies and options for management and remediation
 - managing acid leachate water flows
 - planning process for remediation and management plans
 - principles of duty of care and due diligence
 - relevant environmental, planning and groundwater legislation
 - soils and soil chemistry
 - subsurface and surface drainage principles and systems

- total catchment issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL405 Provide information on fertilisers and soil ameliorants

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to gather and provide information on fertilisers and soil ameliorants.

The unit applies to individuals who apply specialist skills and knowledge to provide information on fertilisers, soil ameliorants and related environmental information. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCSOL405 Provide information on fertilisers and soil ameliorants

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided information on fertilisers and soil ameliorants on at least three occasions, and has:

- considered the following when providing information:
 - applicable workplace health and safety procedures
 - manufacturer requirements
 - chemical safety and food safety legislation and regulations
 - biosecurity and environmental guidelines for using
 - transportation, storage and handling of fertiliser and soil ameliorants
- explained the use of nutrient management tools
- recorded details of information provided to the customer.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- crop nutrient requirements, including both macro and micro nutrients
- effect of soil ameliorants in dispersion and adjustment for acidity or alkalinity (pH)
- workplace health and safety procedures, manufacturer requirements, chemical safety and food safety legislation and regulations, biosecurity and environmental guidelines for using, transportation, storage and handling of fertiliser and soil ameliorants
- packaging and dispatch procedures for samples
- physical, chemical and biological properties related to a healthy soil and environment
- sampling tools and methods, including:
 - soil, plant tissue and water tests
 - yield monitoring

- electrical conductivity survey
- workplace health and safety and environmental procedures in operating sampling equipment
- impact of climate on soil productivity
- environmental impacts, including:
 - soil structural decline
 - fertility decline
 - acidification and salinity
 - erosion
 - loss of organic matter
 - water quality
 - fertiliser and soil ameliorant impurities
 - greenhouse gas emissions
- major nutrient management risks of leach, run-off, load, blow, and mine, and how these impact on the environment
- nutrient management advisory tools and processes used by advisers in making a crop nutrition recommendation
- fertiliser and soil ameliorant application methods, including timing and frequency of fertiliser and soil ameliorant application to minimise losses
- industry production regimes and fertiliser practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fertilisers and soil ameliorants
 - soil, plant tissue and water sampling tools
 - nutrient management tools
- specifications:
 - workplace health and safety procedures, manufacturer requirements, chemical safety and food safety legislation and regulations, biosecurity and environmental guidelines applicable to fertiliser and soil ameliorant use, transportation, storage and handling
- relationships:
 - customers, specialist adviser.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSOL406 Sample soils and interpret results

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has sampled soils and interpreted results on at least two occasions, and has:

- identified and collected soil samples using appropriate sampling methodology
- applied testing agency requirements applicable to sampling soils
- applied workplace health and safety requirements applicable to sampling soils
- prepared soil samples for dispatch to soil analysis laboratory
- received, interpreted and compared published data and records with analytical results
- filed and recorded results according to workplace procedures
- provided soil improvement recommendations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- testing agency requirements applicable to sampling soils
- workplace health and safety requirements applicable to sampling soils
- principles and practices of soil sampling, including:
 - environmental implications associated with soil sampling activities and the application of analytical results
 - practical understanding of the range of sample collection, testing and analytical methods that may be used to perform soil samples, and the association of sampling methods with site conditions, environmental implications and intended horticultural use of the sampled site
 - soil ameliorants and soil improvement techniques for addressing site limitations identified through sampling
 - the capacity of soils to provide water to plants

- the importance of organic matter in soil in relation to the intended horticultural use
- the physical and chemical properties of soils in relation to their ability to support specified horticultural production
- workplace filing and recording procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - soil sampling and testing tools, equipment and machinery
 - safety and personal protective equipment applicable to soil sampling
 - principles and practices of soil sampling
- specifications:
 - testing agency requirements applicable to sampling soils
 - workplace health and safety requirements applicable to sampling soils
 - workplace filing and recording procedures
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSOL407 Develop a soil use map for a property

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed a soil use map for a property on at least one occasion, and has:

- confirmed soil samples were collected according to testing agency requirements
- determined soil characteristics and parameters
- interpreted and compared published data and records with analytic results
- determined areas of cultural significance and habitats of biodiversity on the property
- interpreted soil analysis test results
- determined RAW values for irrigation sites, and indexed on property map
- plotted topography, soil survey data and areas of concern on property map.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- testing agency requirements applicable to sampling soils
- principles and practices for developing soil use maps, including:
 - environmental impacts of irrigation, using water from any ground or underground source
 - methods and techniques of soil sampling
 - nutrient availability in soils
 - physical and chemical properties of soils
 - readily available water
 - soil analyses results
 - soil quality factors
 - soil types and profiles

- soil water retention testing techniques
- water table and salinity.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - soil sampling test results
 - information on areas of cultural significance and habitats of biodiversity on the property
 - principles and practices for developing soil use maps
- specifications:
 - testing agency requirements applicable to soil sampling
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSOL409 Supervise acid sulphate soil remediation and management projects

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to plan and supervise acid sulphate soil (ASS) remediation and management projects.

The unit applies to individuals who apply specialist skills and knowledge to supervising ASS remediation and management projects. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Soils and Media (SOL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan implementation	1.1 Review and relate ASS management plan, work schedule and specifications to the worksite

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Plan and record work sequences in line with work schedule 1.3 Maintain compliance with relevant consent authority standards, environmental legislation and industry guidelines
2. Carry out environmental site induction	2.1 Communicate specific site workplace health and safety and environmental issues to stakeholders 2.2 Describe and communicate project objectives and duty of care responsibilities to stakeholders 2.3 Brief plant operators, contractors and other staff on special aspects of performance relating to using specific equipment and handling hazardous materials 2.4 Determine monitoring requirements for the site, and identify individual responsibilities as stated in ASS management plan
3. Direct implementation of planned works	3.1 Monitor work according to ASS management plan and implement contingency procedures if required 3.2 Maintain compliance with ASS management plan, work schedule, specifications and regulatory requirements
4. Review works and site environment	4.1 Review works and site environment to ensure outcomes are reviewed according to the ASS management plan, work schedule and specifications 4.2 Provide instructions to staff and contractors 4.3 Determine if changes are required to works in consultation with ASS management plan provider and take appropriate action

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret textual information regarding ASS management plan, work schedule and specifications, and relevant consent authority standards, environmental legislation and industry guidelines for ASS management

Skill	Description
Oral communication	<ul style="list-style-type: none"> Initiate discussions with stakeholders, plant operators, contractors and staff, using clear language to describe and communicate ASS management plan Use clear language to discuss changes to works with ASS management plan provider

Assessment Requirements for AHCSOL409 Supervise acid sulphate soil remediation and management projects

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has supervised an acid sulphate soil (ASS) remediation and management project on at least one occasion, and has:

- reviewed ASS management plan and planned work schedule
- applied relevant consent authority standards, environmental legislation and industry guidelines applicable to ASS remediation management
- described and communicated objectives of the project, workplace health and safety and environmental issues to stakeholders and individual contractors
- monitored works identified in the ASS management plan and compliance with work schedule, specifications and regulatory requirements
- reviewed completed works and made changes in consultation with ASS management plan provider where necessary.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- ASS management plan
- relevant consent authority standards, environmental legislation and industry guidelines applicable to ASS remediation management
- principles and practices of ASS remediation, including:
 - ASS and soil chemistry
 - equipment most suited to ASS site remediation and management
 - quality assurance systems, processes and practices
 - relevant environmental, planning and groundwater legislation
 - subsurface and surface drainage principles and systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - ASS management plan
 - principles and practices of ASS remediation
- specifications:
 - relevant consent authority standards, environmental legislation and industry guidelines applicable to ASS remediation management
- relationships:
 - stakeholders, plant operators, contractors, staff and ASS management plan provider
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSOL505 Monitor and manage soils for production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to research soil information, apply soil testing information to production or management plan, develop and monitor soil amendment practices, review and document soil management plan.

The unit applies to individuals who apply specialised skills and knowledge to the monitoring and management of soils for production, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research information about soil	1.1 Research and analyse soil type, characteristics and properties 1.2 Identify particular soil properties that are relevant to the workplace and research for further enquiry 1.3 Determine, from published data and records, acceptable soil

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	physical and chemical parameters for a specified crop 1.4 Identify relevant properties of soils and areas of homogenous soils for testing 1.5 Take soil samples from the land under production 1.6 Collect, package, label and dispatch soil samples according to testing agency requirements
2. Apply information from soil testing to production or management plan	2.1 Classify soil types from the sample area according to standards for soil classification 2.2 Compare results from soil testing with the identified soil physical and chemical parameters for the specified crop 2.3 Compare results from soil testing with soil records and production history 2.4 Review the comparative results and record differences 2.5 Develop production or management plan and record testing and comparative results
3. Develop soil amendment practices	3.1 Identify soil properties capable of being ameliorated 3.2 Identify relevant soil ameliorants or cultural practices and include in production plan 3.3 Cost soil ameliorating activities and include in production plan 3.4 Quantify and purchase soil ameliorants
4. Monitor soil amendment practices	4.1 Sample areas of ameliorant activities for testing across a representative sampling area 4.2 Analyse results to measure the performance of soil amelioration activities 4.3 Record monitoring program and include in the production plan
5. Review and document the soil management plan	5.1 Record analysis of the sampling methods and amend methods as required 5.2 Review monitoring program, amend for effectiveness and record 5.3 Document production plan incorporating reviews and reports

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding soil types, characteristics and properties
Numeracy	<ul style="list-style-type: none"> Access and analyse published data regarding soil physical and chemical parameters for specified crops Interpret soil test data results and compare with published data Calculate and document soil ameliorant activity costs
Navigate the world of work	<ul style="list-style-type: none"> Identify and describe own workplace requirements associated with own role and area of responsibility

Assessment Requirements for AHCSOL505 Monitor and manage soils for production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has monitored and managed soils for at least one product project and has:

- interpreted soil analytical data for the purposes of developing management or production plans
- identified particular soil properties that are relevant to the workplace and researched for further enquiry
- applied information from soil testing to production or management plan
- documented the soil management plan or production plan
- developed soil improvement programs
- reviewed ongoing soil monitoring programs.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for managing soils for production, including:
 - basic soil field tests
 - interpreting laboratory results
 - soil chemical properties
 - soil conservation strategies and sustainable production techniques
 - soil physical properties
 - soil sampling techniques
 - soil types
 - strategies to ameliorate soil properties.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - published data and records
 - production history
 - soil sampling equipment
 - soil test results
- specifications:
 - testing agency requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSOL506 Manage erosion and sediment control

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed erosion and sediment control on at least one occasion, and has:

- applied environmental and biosecurity practices and workplace procedures applicable to managing erosion and sediment control
- identified appropriate erosion and sediment control strategy methods
- developed and documented erosion and sediment control plan
- communicated and collaborated effectively with stakeholders for planning and conflict resolution
- prepared plans and reports on erosion and sediment control plans
- monitored, evaluated and analysed effectiveness of erosion and sediment control plan outcomes
- organised required resources and key stakeholders
- applied workplace health and safety requirements applicable to managing erosion and sediment control.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of erosion and sediment control management, including:
 - environment and sustainability as a whole farm system approach
 - environmental issues with regard to water catchment, ecosystems, habitats and waste minimisation
 - erosion control and design principles
 - planning processes for erosion and sediment control

- project and risk management techniques and tools for the management of erosion and sediment control
- soils and soil formation
- earthmoving principles and practices
- subsurface and surface drainage principles and systems
- environmental and biosecurity practices and workplace procedures applicable to managing erosion and sediment control, including licences and permits to implement erosion and sediment control activities
- workplace health and safety requirements applicable to managing erosion and sediment control.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - regulatory planning authority and environmental legislation relevant to erosion and sediment control planning
 - principles and practices of erosion and sediment control management
- specifications:
 - workplace health and safety requirements applicable to managing erosion and sediment control
 - environmental and biosecurity practices and workplace procedures applicable to managing erosion and sediment control
- relationships:
 - landowner, personnel, stakeholders, developer, relevant government and planning authorities, and consent authority
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSOL507 Develop and manage a plan to reclaim land affected by salinity

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to review the saline area, manage water use and movement, protect and manage natural areas, implement a strategy to reduce salinity, and document a long-term plan to reclaim land affected by salinity.

The unit applies to individuals who apply specialist skills and knowledge to the development and management of a plan to reclaim land affected by salinity, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCSOL507 Develop and manage a plan to reclaim land affected by salinity

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed and managed a plan to reclaim land affected by salinity on at least one occasion, and has:

- assessed land forms and soil types
- determined categories of saline land
- assessed the level of degradation and damage through salinity
- identified salinity indicator plant species
- managed the crop and animal selected for the farm to utilise the saline area
- calculated the costs of the project
- calculated benefits of salinity reduction to the property
- taken soil and water samples for testing
- communicated with adjacent property landowners, relevant authorities and community groups
- researched the latest innovations and salinity management techniques
- documented a long-term plan to reclaim land affected by salinity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for reclaiming land affected by salinity, including:
 - salt tolerant plant and pasture species, and the management of each
 - range of methods for reclaiming saline land
 - strategies to profit from the saline area
 - value of using natural species and natural systems to improve farm production
 - benefits of biodiversity on plant production and the animal enterprise
 - strategic and responsible use of susceptible land

- consequences of poor management or removal of vegetation on the land.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - principles and practices for reclaiming land affected by salinity
 - fencing tools and equipment
 - water sampling and testing tools and equipment
 - safety and personal protective equipment applicable to reclaiming land affected by salinity
 - industry publications and internet sources of information relevant to researching the latest innovations and salinity management techniques
- relationships:
 - adjacent property landowners, relevant authorities and community groups
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSOL508 Manage soils to enhance sustainability

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed soils to enhance sustainability on at least one occasion, and has:

- researched information on soils
- assessed soil type, texture and structure in the paddock
- diagnosed areas with soil problems or potential soil problems
- developed, implemented, monitored and evaluated a plan to achieve healthy soils through application of soil science
- diagnosed and interpreted soil sample test results, and determined priorities for improving soil health
- calculated amounts of nutrients required, and prepared a fertiliser program that reflects needs and priorities
- considered and selected alternatives, including organic products and methods for improving soil health
- recorded and filed soil management activities according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- physical, chemical and biological properties of soils
- extent and nature of soil microorganisms
- soil biota types, role in cycling nutrients and improving soil structure
- natural cycling of nutrients, including:
 - carbon
 - nitrogen
 - phosphorous

- the role of soil biota
- factors affecting soil biota, including:
 - moisture
 - temperature
 - aeration
 - nutrient supply
 - pH
 - organic matter
- basic chemistry concepts related to interpreting soil test analysis, including:
 - symbols, elements and compounds
 - valency, anions, cations
 - reactions
 - EC (electrical conductivity)
 - CEC (Cation Exchange Capacity)
 - organic matter
 - pH and its importance in the availability of nutrients
 - role of macronutrients and micronutrients in plant nutrition
 - the concept of limiting factors for production
- basic biology, including:
 - chemical basis of plants and animals
 - basic plant structure and function
- plant nutrition, including:
 - water
 - proteins
 - sugar
 - nitrate
 - lignin content
- potential problems with the use of conventional chemical fertilisers, including:
 - acidification
 - contamination of soil and associated water contamination
 - harm to soil biota
- alternative methods to improve soil fertility, including:
 - products
 - aeration and mulching machinery
- workplace recording and filling procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- specifications:
 - workplace recording and filling procedures
- relationships:
 - staff and stakeholders
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSP0309 Process planting seed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to operate seed processing machinery and equipment to clean, grade, and prepare grains and seeds for planting or further pre-planting treatments.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Seed Processing (SPO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare for processing of planting seeds and grains	1.1 Determine seed type, location and volume for processing from work plan and storage schedule 1.2 Confirm seed processing requirements and specifications from work plan 1.3 Confirm transfer and storage requirements of pre and post seed

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	processing according to work plan and seed storage schedule
2. Select and prepare seed processing machinery and equipment	2.1 Select, check and use personal protective equipment (PPE) according to workplace health and safety procedures 2.2 Select seed processing machinery and equipment according to work plan 2.3 Prepare seed processing machinery and equipment according to work plan 2.4 Conduct pre-operational checks of machine according to manufacturer specifications, workplace requirements and biosecurity procedures 2.5 Identify work health and safety hazards, assess risk and implement controls 2.6 Calibrate and adjust settings of machinery and equipment to comply with seed processing specifications 2.7 Perform a sample seed run to confirm settings and seed processing performance against specifications according to workplace procedures
3. Operate seed processing machinery and equipment	3.1 Transfer seeds for processing to storage bins and hoppers according to work plan, operator requirements and seed storage schedule 3.2 Use seed processing machinery and equipment safely according to manufacturer operating procedures 3.3 Monitor the performance and efficiency of machinery operation and make adjustments to maintain optimum performance and safety 3.4 Sample and monitor processed seed and make adjustments to machinery to maintain specified quality standards 3.5 Monitor input and output seed storage capacities and implement mitigation procedures to maintain safe and efficient seed storage levels according to workplace procedures and storage schedule
4. Complete seed processing machinery and equipment operation	4.1 Implement seed processing machinery shut-down procedures according to manufacturer specifications and workplace requirements 4.2 Implement operator level maintenance procedures for seed treatment machinery and equipment according to workplace and manufacturer specifications 4.3 Identify and report faults and performance problems of seed processing machinery and equipment according to workplace

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	procedures 4.4 Clean, secure and store seed processing machinery and equipment according to biosecurity requirements and to prevent cross contamination
5. Maintain records and reporting for processed seed	5.1 Update records of processed seeds and grains according to workplace procedures 5.2 Update records of seed storage according to storage schedule and workplace procedures 5.3 Identify and report seed processing and machinery irregularities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret work plans, seed processing quality specifications, seed processing equipment manufacturer specifications and operator instruction
Oral Communication	<ul style="list-style-type: none"> Use industry language and concepts, and tone and pace appropriate for reporting to supervisor
Numeracy	<ul style="list-style-type: none"> Adjust and calibrate seed processing machinery and equipment

Assessment Requirements for AHCSPO309 Process planting seed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion processed planting seed or grains according to a defined quality specification and must include at least 3 of the following processes:

- separated seed from impurities and contaminants
- graded seed by size
- graded seed by weight/density
- graded seed by deformity
- graded seed by colour
- modified seed

There must also be evidence that the individual has:

- identified seed, location and volume requiring processing
- coordinated access and storage of seeds with seed storage schedule
- selected, set up and prepared seed processing machinery and equipment
- fitted and used PPE
- operated seed processing machinery safely within manufacturer specifications and identified irregularities
- complied with biosecurity guidelines to prevent cross contamination
- monitored seed processing and implemented mitigation procedures to maintain quality
- maintained safe and efficient seed storage during processing
- shut down, cleaned and maintained seed processing equipment
- maintained records and reporting according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic understanding of seed biology in relation to viability and seed cleaning processes

- principles and practices for operating seed processing machinery, including:
 - safety equipment and safe operation of machinery
 - operator servicing and maintenance
 - calibration and settings for quality outcomes of different seed and grain types
- the basic principles of seed processing equipment, their operation and effects on seeds, including:
 - screen cleaners
 - indent cylinder
 - gravity tables
 - airlegs and winnowers
 - seed modification machinery for de-awners, clippers and scarifiers
 - optical/colour sorters
 - floatation tanks
 - magnetic rollers
 - dryers
 - spirals
 - velvet rollers
- workplace health and safety in the seed treatment process, including personal protective equipment (PPE)
- basics of programmable logic controller/treatment control systems and electrical process for seed processing equipment
- operation and maintenance of seed processing machinery
- seed storage requirements and scheduling during seed processing
- biosecurity and cross contamination during seed processing
- seed and grain quality standards affecting seed processing, equipment setup and monitoring
- record keeping and reporting procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a seed processing plant, a farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seed processing machinery and equipment
 - tools and equipment for calibration and adjustments
 - use of specific items of personal protective equipment
- specifications:
 - workplace procedures

- manufacturer operating instructions for equipment
- workplace instructions and specifications
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSP0310 Treat planting seed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to apply a range of treatments to planting seed using specialised seed treatment machinery and equipment.

The unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for AHCSPO310 Treat planting seed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion treated seed using seed treatment machinery and equipment and has:

- prepared the seed resources and machinery for treatment
- set up and prepared seed treatment machinery
- calculated, calibrated and measured dose rates
- formulated chemical mix to achieve treatment goals according to specifications
- maintained safe and efficient seed storage during processing
- fitted and used PPE
- operated seed treatment machinery and equipment safely, efficiently and according to manufacturer specifications
- cleaned and stored machinery, equipment according to workplace, and environmental procedures
- maintained and reported seed treatment operations according to workplace procedures
- updated records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for operating seed treatment machinery, including:
 - basics of programmable logic controller/treatment control systems and electrical process
 - drying, scalping and aspiration of treated seed
 - expectations and limitations of different types of seed coating machines
 - interaction of biological components and their effect on other chemicals, powders, polymers and heat
 - use and differences in biological components in seed coatings

- types of seed treatment machinery and equipment
- seed treatments their purpose and application, including:
 - chemical types and classes
 - difference between coating and pelleting which includes <5% weight gain film coating (insecticide/fungicide) or >5% weight gain is pelleting
 - disposal of waste chemical
 - hazards of chemicals
 - labelling requirements associated with coated seed
 - methods of applying chemical and basic recipe formula
 - methods of applying powders
- workplace health and safety considerations in the seed treatment process, including personal protective equipment (PPE)
- rules and regulations for storage, transportation and bunding.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a seed processing plant, a farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seed treatment machinery
 - seed treatment consumables, materials and chemicals
 - tools and equipment for calibration and adjustments
 - use of personal protective equipment
- specifications:
 - workplace procedures
 - manufacturer operating instructions for equipment
 - workplace instructions and specifications
 - safety data sheets (SDS)
- relationships:
 - supervisor

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSP0311 Handle, package and store commercial quantities of seed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion handled, packaged and stored commercial quantities of seed and has:

- packaged seed which must include:
 - prepared packaging equipment
 - prepared packaging
 - operated packaging and labelling machinery
 - operated label printers and label and apply stickers and labels
 - operated industrial sewing machines
 - sealed seed packages
 - labelled and stencilled seed containers
- handled packed seed which must include:
 - moved and stored packaged seed
 - operated a pallet wrapper to shrink wrap palletised seed
 - operated bag and pallet transportation systems
 - operated bulk seed transportation equipment
 - operated palletising equipment
- performed basic machinery maintenance
- selected, used and maintained personal protective equipment (PPE)
- identified work health and safety hazards, assess risks and implemented controls
- moved and stored and retrieved seed
- set up and prepare machinery for use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for handling commercial quantities of seed, including:
 - types of packaging
 - seed packaging methods and equipment and
 - methods for sealing bags
 - regulations and legislation for labelling of packaged seed
 - chemical warnings and seed details required on packages
 - labelling requirements and equipment
- bulk seed storage and planning storage of raw and packaged materials, including:
 - controlled environment
 - pest control and contamination
 - segregation of seed types and grades
- types of machinery, operation and safety, including:
 - basic equipment preparation and maintenance
 - packaged product transport and storage
 - relevant manufacturer specifications
- workplace health and safety policies and procedures, including:
 - confined space and working at heights
 - handling of chemically treated seed
 - manual handling techniques
 - implications of packaging operations on the natural environment and risk mitigation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a seed processing plant, a farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - seed packaging machinery including palletiser
 - seed to package
 - seed labelling and packaging consumables
 - tools and equipment for adjustments
 - personal protective equipment (PPE)
- specifications:
 - workplace procedures
 - manufacturer operating instructions for equipment

- workplace instructions and specifications
- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSP0312 Sample seed before and after processing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has sampled seed using industry and workplace sampling methods on at least one occasion for the following situations:

- graded and/or treated seed
- delivery truck on arrival at a processing plant/farm
- bulk containers and/or sacks

In doing so, there must be evidence that the individual has:

- completed sampling documentation including packaged and labelled seed samples and prepared samples for despatch
- recognised common weed seeds and other seed contaminants in sample
- recorded workplace information for seed samples
- selected sampling equipment for a representative sample according to workplace procedures and certification authority
- collected seed samples for testing by other agencies according to their specifications and procedures
- completed record and labels accurately according to specifications
- used tools for sampling and prepared a sample for despatch
- followed workplace health and safety standards, including fitted and used personal protective equipment (PPE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of seed sampling, including:
 - purpose and correct methods of sampling
 - workplace records and other documentation

- seed handling and the importance of seed moisture content in seed samples
- recognised seed/grain types, including contaminating seed and biosecurity threats
- seed sampling protocols required by farm and/or agencies
- federal and state agencies overseeing seed movement in Australia and sampling standards, including:
 - federal and state quarantine and biosecurity regulators
 - Organisation for Economic Co-operation and Development (OECD)
 - Association of Official Seed Certifying Agencies (AOSCA)
 - other certification agencies
- workplace health and safety when sampling seed, including:
 - personal protective equipment used for sampling treated seed
 - working in confined spaces
 - safety barriers
 - working at heights.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a seed processing plant, a farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - bulk unprocessed seed
 - bulk processed seed
 - seed sampling equipment
 - seed record keeping and labelling resources
 - personal protective equipment
- specifications:
 - seed sampling procedures and standards
 - manufacturer operating instructions for equipment
 - workplace instructions and specifications
- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTHH401 Develop a therapeutic horticulture design brief

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to develop a therapeutic horticulture (TH) design brief. It includes undertaking research, identifying client requirements, determining the **therapeutic horticulture benefits of plant species**, potential site and materials, and documenting a design brief.

The unit applies to individuals who apply specialist skills and knowledge to develop a therapeutic horticulture design brief. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Therapeutic Horticulture (THH)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	practices 1.3 Analyse the health benefits of TH for individuals and stakeholder groups
2. Identify client requirements	2.1 Identify and clarify the needs and requirements of client and end user 2.2 Conduct risk assessment based on client brief and regulatory requirements 2.3 Determine existing client resources and budgetary constraints 2.4 Communicate information on health benefits of TH to clients 2.5 Determine potential of site for TH project 2.6 Determine specific applications of TH principles and practices related to client resources, needs and requirements
3. Determine therapeutic horticulture benefits of plant species	3.1 Research plant growth and performance characteristics, using authoritative sources 3.2 Obtain and compare plant samples or images to plants 3.3 Use problem-solving techniques to compare, assess and evaluate therapeutic horticulture benefits of plants 3.4 Determine best choice of plants for specific TH applications based on reasoned argument, evidence, sound principles, client and end user needs 3.5 Record TH benefits and recommendations
4. Determine therapeutic benefits of potential site and materials	4.1 Research tactile and sensory characteristics of landscape materials 4.2 Analyse potential site for orientation, aspect, borrowed landscape hazards, opportunities and amenities 4.3 Document and present design brief to client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding TH principles and practices, and their health benefits for individuals and stakeholder groups
Oral communication	<ul style="list-style-type: none"> Initiate discussions with client, using clear language to discuss and establish design purpose, conduct risk assessment, and present design brief

Assessment Requirements for AHCTHH401 Develop a therapeutic horticulture design brief

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed a therapeutic horticulture (TH) design brief on at least one occasion, and has:

- researched, interpreted and applied information relevant to TH principles and practices
- consulted with clients
- conducted risk assessment
- interpreted and applied local council, legislative and regulatory requirements relevant to TH design
- assessed site
- documented and presented TH design brief.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- local council, legislative and regulatory requirements relevant to TH design
- principles and practices of TH, including:
 - sources of information and resources relevant to TH principles and practices
 - health and wellbeing benefits of TH
 - TH activities relevant to individual and stakeholder groups
 - communication strategies to promote TH
 - interpreting client project requirements
 - client consultation strategies
 - risk assessment
 - site assessment techniques
 - project timelines, scope and reports.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site plans, client brief
 - software and hardware to source and document information
- specifications:
 - local council, legislative and regulatory requirements applicable to TH design
- relationships:
 - clients
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF102 Support turf work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to assist with turf maintenance and growing activities to industry standards and deadlines for the green keeping and turf production industry.

The unit applies to individuals who maintain turf under direct supervision in most situations and exercise limited autonomy within established and well-known parameters. They identify and seek help with simple problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials, tools and equipment for turf work	1.1 Confirm work activity and identify resources required with supervisor 1.2 Check availability and serviceability of materials, tools and equipment, and report problems and faults to supervisor 1.3 Identify workplace health and safety hazards, and report to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	supervisor 1.4 Load and unload materials according to workplace health and safety procedures 1.5 Select, check and use personal protective equipment according to work health and safety requirements
2. Undertake turf work as directed	2.1 Follow supervisor instructions and directions and seek clarification when unclear of activity 2.2 Interact with team members and turf users in a professional manner 2.3 Use tools and equipment safely according to supervisor instructions 2.4 Handle and dispose of materials according to workplace policies, procedures and practices 2.5 Report problems or difficulties for complying with standards or work timelines
3. Handle materials and equipment	3.1 Store plant debris and waste material produced during turf work 3.2 Handle and transport materials, equipment and machinery according to workplace health and safety procedures 3.3 Maintain a clean and safe work site while completing turf activities
4. Clean up on completion of turf work	4.1 Store or dispose of materials according to supervisor instructions 4.2 Clean, maintain and store tools and equipment 4.3 Report work outcomes to supervisor

Assessment Requirements for AHCTRF102 Support turf work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, supported others in turf work according to workplace procedures, including:

- confirmed instructions and prepared materials, tools and equipment ready for turf work
- used tools and equipment and assisted with turf work according to supervisor instructions
- handled materials and equipment safely while completing turf activities
- cleaned up and stored equipment on completion of turf work
- disposed of waste materials according to workplace procedures
- reported work outcomes to their supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- safe operation and storage of turf machinery and equipment, including:
 - cylinder, rotary and electrical mowers and mowing patterns
 - mower settings for required turf surface
 - cultivation hand tools, including rakes and spades
 - whipper snippers
 - lawn edgers
 - wheelbarrow
 - level lawn and screed
 - powered blowers
 - self-propelled mowers
 - walk-behind mowers and rollers
 - marking out equipment, including string lines, tape measures, pegs and frames
- safe work practices required for turf work sites, including:

- personal protection
- machine operator safety
- materials handling
- hazard identification and reporting
- turf and facility maintenance requirements and practices, including:
 - mowing
- enterprise procedures for disposing of turf waste, including:
 - methods of disposal
 - impact of waste disposal on the environment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - basic machinery including cylinder mowers, rotary mowers and rotary hoe
 - hand tools and equipment for turf cultivation
 - personal protective equipment
- specifications:
 - workplace procedures and instructions for turf work
- relationships:
 - team members and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF201 Assist with turf construction

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support workers in a team who are constructing soil profiles for the establishment of turf.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for soil profile construction	1.1 Locate services using site and construction plans and in consultation with the supervisor 1.2 Identify work health and safety hazards, assess and report risks 1.3 Select suitable safety equipment for the soil profile construction program

Element	Performance criteria
	1.4 Prepare the construction site according to the construction plan
2. Prepare equipment for soil profile construction	2.1 Select construction tools, equipment and machinery 2.2 Carry out pre-operational and safety checks on tools, equipment and machinery 2.3 Select, use and maintain suitable personal protective equipment (PPE)
3. Undertake soil profile construction	3.1 Grade and consolidate the base to the specified level and on a consistent slope to achieve uniform compaction over the site 3.2 Dig trench lines to the specified depth, width and fall, with all superfluous material evacuated and stored safely
4. Restore the site after drainage and irrigation installation	4.1 Back fill trenches with specified construction materials, consolidate and level 4.2 Level the site as each layer of the soil profile is installed 4.3 Water the site thoroughly on completion 4.4 Remove and dispose of waste material from the site 4.5 Clean, maintain and store tools, equipment and machinery 4.6 Maintain a clean and safe area 4.7 Record or report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF201A Assist with turf construction.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCTRF201 Assist with turf construction

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- clean, maintain and store turf construction machinery and equipment
- follow procedures and sequence work during the course of the construction
- use a range of turf construction machinery and equipment
- work in a team on a turf construction project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf construction
 - different soil preparations for construction
 - effective and safe use of tools and machinery
 - influences on the selection of tools, machinery and safety equipment
 - irrigation and/or drainage installation procedures and operational techniques
 - purpose of turf construction in maintaining turf presentation
 - relationship between a well-constructed soil profile for the quality and appearance of the turf

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCTRF202 Prepare turf surfaces for play

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the condition of the existing surface with advice from senior greenkeepers for subsequent routine preparations, treatments and turf cultural practices
- prepare a turf surface or sports playing field according to the rules of the game
- use turf surface preparation machinery and equipment safely according to manufacturer's specifications to achieve the desired playing surface outcome

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf preparation for play
 - competition playing requirements affecting preparation of the turf surface
 - effect of adverse outdoor climatic conditions
 - effective and safe use of tools and machinery
 - high performance uses of turf surfaces
 - irrigation and drainage system design and operational techniques
 - potential public nature of turf renovation work sites
 - purpose of turf surface preparation in maintaining turf presentation
 - various requirements of turf species and their cultural requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF203 Renovate grassed areas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake basic seasonal renovation practices to restore turf health and condition on a range of grassed areas.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare turf area for renovation	1.1 Locate services using site and construction plans 1.2 Identify work health and safety hazards 1.3 Select suitable safety equipment for the turf renovation program 1.4 Identify and report the environmental implications of the turf renovation program

Element	Performance criteria
	1.5 Carry out preparation of turf area
2. Prepare equipment for turf renovation	2.1 Select appropriate hand tools and renovation machinery 2.2 Carry out pre-operational and safety checks on hand tools and renovation machinery 2.3 Select, use and maintain suitable personal protective equipment (PPE)
3. Undertake turf renovation	3.1 Erect safety barriers around trench lines, holes and other disturbed surfaces during and between work periods 3.2 Use correct manual handling techniques when lifting or moving heavy loads 3.3 Operate turf renovation tools and machinery safely and effectively
4. Complete turf renovation	4.1 Dispose of plant debris and waste material removed from the site in an environmentally aware and safe manner 4.2 Clean, maintain and store tools and machinery 4.3 Maintain a clean and safe area throughout and on completion of work 4.4 Record work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF203A Renovate grassed areas.

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish the purpose of turf renovation programs in maintaining turf presentation, particularly in relation to the end use of the turf
- record turf maintenance activities as required by the enterprise
- transport, clean and store turf renovation machinery and equipment
- use turf renovation machinery and equipment to restore turf health and condition

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grass area renovation
 - different soil preparations for renovation
 - effect of adverse outdoor climatic conditions
 - effective and safe use of tools and machinery
 - hazards and responsibilities working near public access
 - influences on the selection of tools, machinery and safety equipment
 - potential public nature of turf renovation work sites

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF204 Support turf establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish turf by seed, sod or other methods.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to establish a planted area	1.1 Select materials, tools, equipment and machinery for planting 1.2 Carry out pre-operational and safety checks on tools, equipment and machinery 1.3 Identify the environmental implications of the turf establishment program

Element	Performance criteria
2. Prepare the planting area	2.1 Determine layout of services before undertaking earthworks 2.2 Control existing weeds 2.3 Check soil for moisture, tilth, compactness, depth and organic matter 2.4 Apply soil additives as instructed 2.5 Rake the surface evenly to achieve a consistent surface and level as required 2.6 Water the planting site 2.7 Remove and disposed of debris and rubbish
3. Plant turf	3.1 Inspect turf plant material before planting and discard material with defects 3.2 Ensure seed is evenly distributed over the whole planting area with no overlap or areas missed 3.3 Rake surface evenly and water thoroughly 3.4 Position sods and roll evenly onto a moist surface 3.5 Water newly laid turf thoroughly to encourage establishment
4. Provide post-planting care	4.1 Protect the site from animals, pedestrian and vehicular traffic 4.2 Roll the site evenly and efficiently with no disturbance 4.3 Mow turf according to a specified pattern and height 4.4 Apply top dressing evenly to the required depth over the whole area and is work or rub into the surface 4.5 Water dry or under-watered plants 4.6 Check watering patterns for dry spots
5. Complete establishment of the planted area	5.1 Remove and dispose of waste material 5.2 Clean, maintain and store tools, equipment and machinery 5.3 Maintain a clean and safe work area throughout and on completion of work 5.4 Record and report work outcomes to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCTRF205 Assist in the preparation of turf surfaces for play

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared turf surfaces for play on at least one of the following types of sports turf surface:

- a golf course
- a lawn bowling green
- a cricket ground
- a sporting field
- a horse race track.

There must also be evidence that the individual has:

- identified safety hazards and risks and implemented controls to ensure personal and users' safety when performing work
- selected, checked, adjusted, transported and operated equipment on the turf site safely
- assessed turf condition and confirmed preparation requirements against set-up plan, and reported changed conditions to supervisor
- prepared a consistent and uniform sports turf playing surface according to the rules and regulations of the game
- collected and disposed of waste
- selected, checked and used marking-out equipment, materials and procedures to accurately lay out a sports turf play surface
- reported work outcomes, faults and irregularities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of turf preparation for play, including:

- effect of adverse climatic conditions on turf preparation
- the use of turf in high performance sport environments
- purpose of turf surface preparation in maintaining turf presentation
- various cultural requirements of turf grass species
- biological factors of turf grass species affected by turf preparation activities, including:
 - moving golf holes
 - reasons for moving markers
 - height of cut for grass species and sport
 - effect of rollers on compaction and turf growth
 - effect of mower cutting type
- assessment of turf grass condition when reporting irregularities to supervisor prior, including:
 - colour and length of sward in relation to turf health
 - set-up equipment requirements and selection criteria
- conducting mowing operations, including:
 - ensuring uniform cut
 - maintaining a consistent pattern
 - implications of repetitive activity on equipment wear and tear and grain, and the need to vary direction of cut
- marking out sports turf surfaces for play, including:
 - preparation and use of tools and equipment for marking out
 - line marking methods for sports turf surfaces
 - basic calculations for line marking
 - rules and regulations for marking and layout of sports turf surfaces
- markers and other sports turf match play requirements, including:
 - holes
 - tee markers
 - out of bounds markers
- water and its effect on sports play, preparation activities, and how to rectify, including:
 - soil water requirements
 - turf surface water condition, including dew and rain
 - effect on play condition
 - water and dew removal techniques
- work health and safety hazards, risks and controls when preparing turf surfaces for play, including:
 - rapid risk assessment for safety of self, the community and the environment
 - safe transport of equipment to site
 - legal requirements when transporting equipment on public roads
- maintaining a safe work site, including:
 - safety barriers

- signage and notifications
- managing pedestrian user traffic flow
- obstacles affecting sports turf set-up, and methods for managing them during preparation activities, including:
 - permanent obstacles
 - temporary obstacles
 - identifying hazards to players and playing conditions
- adjustment and safe use of equipment commonly used for preparation of sports turf, including:
 - mowers and height adjustments
 - sports turf edgers
 - rollers
 - water soppers and blowers
 - line marking equipment
- equipment checks, including:
 - electrical cords
 - checking and testing procedures
 - identifying, tagging and reporting faulty equipment
 - pre-start checks
 - post-work checks
 - fault reporting procedures
- waste materials disposal procedures and environmental considerations
- record keeping requirements and their purpose.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions in which to demonstrate the preparation and layout of at least one type of sports turf surface specified in the performance evidence
- resources, equipment and materials:
 - turf set-up equipment, including cylinder and rotary mowers, edger, roller and marking-out materials and equipment
 - measuring and layout equipment, including tape measures and string lines
- specifications:
 - workplace procedures and instructions for turf preparation
 - set-up plan for a specific sports playing surface
- relationships:
 - supervisor
- timeframe:

- sports turf play schedule.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF206 Assist with turf construction

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to assist in the construction of soil profiles for the establishment of a turf surface.

The unit applies to individuals who support turf construction and undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for soil profile construction	1.1 Interpret site and construction plans to locate services in consultation with the supervisor 1.2 Identify workplace health, safety and environmental hazards, assess risks and implement controls in consultation with supervisor 1.3 Select safety equipment, signage and barriers required according to the construction plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Install safety equipment to ensure construction site is secure
2. Prepare equipment for soil profile construction	<p>2.1 Select tools, equipment and machinery according to construction project requirements</p> <p>2.2 Carry out pre-operational and safety checks on tools, equipment and machinery</p> <p>2.3 Report faulty or defective equipment and machinery according to workplace procedures</p> <p>2.4 Select, ensure serviceability of, fit and use personal protective equipment</p>
3. Undertake soil profile construction	<p>3.1 Interpret site construction plan to establish grades, levels and boundaries of works</p> <p>3.2 Use basic survey equipment to assist construction team to mark out and define grades, levels and boundaries</p> <p>3.3 Use hand tools and machinery to grade and consolidate the base according to specifications</p> <p>3.4 Excavate drainage and irrigation trenches to depth, width and fall specified in the construction plan</p> <p>3.5 Remove and store excavated material safely according to construction plan specifications</p>
4. Restore the site after drainage and irrigation installation	<p>4.1 Back fill trenches, consolidate and level the site to construction plan specifications</p> <p>4.2 Restore the soil profile, maintaining levels of each layer</p> <p>4.3 Irrigate the restored site according to soil profile requirements</p> <p>4.4 Collect and dispose of waste material from the site</p>
5. Clean and store equipment and machinery	<p>5.1 Clean and maintain tools, equipment and machinery according to workplace procedures</p> <p>5.2 Collect and store tools, equipment, machinery and unused materials</p> <p>5.3 Report work outcomes to supervisor</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret construction plans to identify key information, including symbols and text
Oral communication	<ul style="list-style-type: none"> Use open and closed questions logically to clarify work instructions Use industry terminology to communicate with team members
Numeracy	<ul style="list-style-type: none"> Estimate and calculate distance, area, volume and ratio

Assessment Requirements for AHCTRF206 Assist with turf construction

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, assisted in the construction of a turf surface project using a construction plan, including:

- assisted in locating services and established construction site grades, levels and boundaries from the plan
- used basic survey equipment and assisted with the layout of construction grades, levels and boundaries
- selected and checked machinery and equipment required to perform levelling, grading, excavation and consolidation
- reported faults and defects in machinery and equipment
- safely used tools, equipment and machinery to perform levelling, grading, excavation and consolidation tasks
- safely cleaned, maintained and stored turf construction tools, equipment and machinery
- followed workplace procedures, including health, safety and environmental
- worked collaboratively and productively within a team
- reported work outcomes on completion.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of turf construction, including:
 - different soil preparations for construction
 - purpose of turf construction in maintaining turf presentation
 - relationship between a well-constructed soil profile and the quality and appearance of the turf
 - purpose, effect, methods and equipment used for compacting turf profiles

- materials used in developing a profile for turf
- selection, effective use and safe operation of tools and machinery
- basic irrigation and drainage installation techniques relevant to turf construction
- basic awareness of survey techniques and equipment required to support survey work, including:
 - principles of surveying, including laser levels, dumpy levels
 - purpose and use of surveyor staff and lenses
 - purpose and use of tape measures
- basic survey calculations used for determining levels, grades and boundaries, including:
 - 3,4,5 triangle for right angles
 - calculating grades
 - measurements and units of measure
- basic plan reading skills required for supporting turf construction operations and to identify:
 - services
 - measurements
 - levels and grades
- safe handling and disposal of construction waste materials
- workplace health and safety hazards, risks and control measures when constructing new turf, including:
 - site safety
 - personal safety
 - safe use and operation of tools, equipment and machinery
- reporting procedures relevant to turf construction.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - excavation and grading equipment
 - personal protection and other safety equipment
 - measuring and layout equipment including levels, tape measures, string lines
 - basic levelling tools
- specifications:
 - professionally drawn sports turf site and construction plans that include site layout, existing services, proposed services, excavation levels, fill materials, fill profiles and finished levels
 - workplace procedures and instructions for sports turf construction

- workplace health, safety and environmental procedures related to sports turf construction
- relationships:
 - work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCTRF207 Renovate grassed areas

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, renovated a sports turf area according to a renovation plan, including:

- identified work site impediments and the required renovation activity in consultation with supervisor
- identified hazards and risks and implemented control measures for personal and site-specific safety
- prepared materials, equipment, machinery and turf propagation materials ready for implementation
- performed turf renovation activities safely using equipment, machinery and materials
- collected waste from renovation works and disposed of safely
- safely transported, cleaned and stored turf renovation machinery and equipment
- reported turf renovation activities, faults and issues to supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of grass area renovation activities, including:
 - purpose of turf renovation programs for maintaining turf presentation and use
 - soils and soil preparation for renovation
 - turf grass species and effect on mat, thatch and dethatching techniques
 - soil aeration and compaction, including core, solid tyne, and water injection
 - impact of soil compaction and thatch on irrigation and infiltration rate
 - turf grass improvements using topdressing, dusting, shaving, scarifying and grooming
 - effect of adverse weather conditions on renovation activities
 - levelling turf surfaces

- effective and safe use of equipment commonly used during sports turf renovation programs, including:
 - scarifier
 - sod cutter
 - corer
 - slicer
 - shaver
 - top dresser
 - drag mat
 - fertiliser spreader
 - transporter
 - loader, bobcat or similar
 - hand tools, tynes, shovels, spades, level lawns, and wheelbarrows
 - influences on the selection of tools, machinery and safety equipment
 - common pre-operational and post-operational checks of equipment
 - adjustments and settings for renovation equipment
- assessment of safety hazards and risks when renovating turf areas, including:
 - responsibilities of working near the public
 - barriers and exclusion zones
 - signage
 - personal protection and equipment
 - manual handling techniques for lifting or moving heavy loads and materials
- chemical amendments for renovations, including:
 - fertilisers
 - ameliorants
 - growth regulators
- turf repairs and regeneration procedures, including:
 - over sowing
 - sprigging
 - chaffing
 - plugging
 - rolled turf/turf replacement
 - divot replacement
- waste materials handling and disposal, including environmental considerations
- reporting procedures and requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- a facility that has sports turf requiring renovation or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - turf renovation machinery and equipment
 - turf renovation hand tools
 - fertiliser, ameliorants and growth regulators
 - top dressing sand/materials
 - turf propagation materials
- specifications:
 - sports turf area renovation plan
 - workplace procedures and instructions related to sports turf renovation, including health, safety and environment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCTRF208 Support turf establishment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has established a turf surface using at least three different propagation materials, including:

- seed (hand seed sowing, mechanical seed sowing, hydro-seeding, drilling)
- sod (turf rolls or sheets)
- and one of following:
 - sprigs (hand sprigging, hydro sprigging, mechanical sprigging)
 - plugs.

There must also be evidence that the individual has:

- interpreted site plans and turf establishment instructions to determine work site impediments and required turf establishment activities
- identified hazards and risks and implemented control measures for personal and site-specific safety
- prepared materials, equipment, machinery and turf propagation materials ready for implementation
- performed turf establishment activities safely using equipment, machinery and materials
- collected and disposed waste from turf establishment site
- safely transported, cleaned, maintained and stored turf establishment machinery and equipment
- reported turf renovation activities, faults and issues.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for supporting turf establishment, including:

- propagation methods for new turf, including seed, sod, sprigs and plugs
- distributing/laying/planting turf propagation materials to establish even coverage
- applications of propagation methods for sports turf
- sports turf grass species and their propagation and establishment
- handling and assessing turf propagation materials for defects
- irrigation requirements for establishment of newly propagated turf
- soil types and their preparation for establishing new turf, including:
 - basic checks to assess soil condition, including soil moisture, tilth, compactness, depth and organic matter
 - soil preparation additives, including fertilisers, ameliorants, moisture control materials and growth regulators
 - calculations for rates of application
 - methods for incorporation of soil additives
 - soil preparation requirements for turf propagation techniques
- tools and machinery used in preparing new turf surfaces, including:
 - sod cutter
 - rotary hoe
 - transporters
 - bobcat or loader
 - scarifier
 - self-propelled cylinder mower
 - ride-on mower
 - fertiliser application equipment
 - top-dresser
 - drag mat
 - hand tools, including shovels, spades, turf pluggers, buckets, level lawns
 - equipment pre-start checks
 - care and storage of tools, equipment and machinery
- post-turf propagation treatments, including:
 - protection for seed, sod, sprigs and plugs during first weeks of establishment
 - basic irrigation practices, and recognising turf establishment needs and problems
 - rolling and mowing practices for new turf
 - monitoring nutrient, pest, diseases and damage
 - top dressing
- workplace health and safety hazards, risks and control measures when constructing new turf, including:
 - site safety
 - personal safety
 - safe use and operation of tools, equipment and machinery
- reporting procedures relevant to turf construction.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - soil preparation hand tools, equipment and machinery
 - personal protection safety equipment
 - soil amendments and treatment materials
 - turf grass species and propagation materials
- specifications:
 - turf establishment program and specifications
 - workplace procedures and instructions for turf establishment, including health, safety and environmental procedures
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF301 Construct turf playing surfaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct soil profiles for the establishment of high-performance sports and recreational turf surfaces.

It applies to the construction of turf playing surfaces in new projects and to the complete renovation of existing soil profiles in sporting, commercial and public recreational open spaces such as golf greens and tees, cricket pitches and other turfed sporting surfaces.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan for construction activities	1.1 Identify the construction site and the construction method 1.2 Take representative samples for soil tests 1.3 Locate services and utilities, check depths against the site plan and report discrepancies to the supervisor 1.4 Consider the site history when planning construction details 1.5 Determine likely consequences of site aspect, features and run-off from adjacent sites and incorporated in construction plans 1.6 Identify work health and safety hazards, assess risks, implement controls 1.7 Select, use and maintain suitable safety equipment and personal protective equipment (PPE)
2. Survey and lay out the construction site	2.1 Set up surveying equipment and establish and record existing levels and temporary benchmark 2.2 Set new levels and place pegs according to specifications 2.3 Determine the existing lay of the land and proposed contours 2.4 Shape new contours into the proposed site
3. Prepare for construction work	3.1 Obtain or develop plans for the new construction profile 3.2 Estimate and cost materials 3.3 Schedule work in a logical, timely and effective manner
4. Set out site for construction	4.1 Check and verify boundaries and features against the actual site and existing features 4.2 Check finishing levels, provision for drainage and irrigation to ensure nominated levels are workable 4.3 Check all measurements against the construction plan, peg out the construction area and account for variances
5. Excavate the construction site	5.1 Remove and stockpile excess soil in a designated area 5.2 Grade the base to the level and slope specified in the design 5.3 Consolidate the base of the profile to achieve uniform compaction over the entire site 5.4 Install sub-surface irrigation system components to the required depth and design specified in the plan
6. Install drainage system	6.1 Dig drainage trenches to the depth specified in the plan 6.2 Lay drainage material on the base of the trench, install pipes and cover trenches
7. Install soil profile	7.1 Calculate quantities of material to be spread over the area 7.2 Compact each profile layer to reflect the final contour 7.3 Ensure the interface between profile layers is uniform and unbroken

Element	Performance criteria
	7.4 Mix soil amendments thoroughly and apply evenly over the area 7.5 Give the finished surface a final levelling and consolidate in readiness for planting

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF301A Construct turf playing surfaces.

Assessment Requirements for AHCTRF301 Construct turf playing surfaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine turf construction requirements from plans
- implement a turf construction project
- interpret existing site and construction plans and specifications
- organise work and use tools and equipment for turf construction project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for constructing turf playing surfaces
 - environmental implications associated with construction and excavation activity, drainage and irrigations systems, soil amendments and waste disposal procedures
 - materials, tools, equipment and machinery available to the enterprise for construction of soil profiles, including soil amendments and base construction materials
 - practical understanding of surveying principles and techniques
 - range of construction methods that may be used to construct soil profiles for high performance turf surfaces, and the association of construction methods with site limitations, environmental implications, and end use of the turf surface
 - soil testing techniques and the application of results to the construction process

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF302 Establish turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish turf by sowing, turf laying, sprigging and chaffing or stolonization in sporting, public recreational open space, commercial and residential sites.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Sample soil for testing	1.1 Take and test site soil samples from a representative area 1.2 Use test results to guide soil preparation for establishing turf
2. Plant turf	2.1 Select tools and equipment for the task being undertaken and use safe working practices

Element	Performance criteria
	2.2 Prepare planting site and sow seed or roll out lawn 2.3 Water and top-dress newly planted turf as required
3. Maintain newly established turf	3.1 Water and fertilise newly established turf 3.2 Mow turf according to a specified pattern and height 3.3 Monitor newly established turf, identify problems and report any changes 3.4 Apply top dressing according to the establishment plan
4. Report and repair areas of damaged turf	4.1 Monitor turf condition for quality and repair as necessary 4.2 Prepare work reports and recommendations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF302A Establish turf.

Assessment Requirements for AHCTRF302 Establish turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- demonstrate turf establishment by sowing, turf laying, sprigging and chaffing/stolonization
- determine turf establishment methods and requirements
- implement successful turf establishment works
- operate and store turf establishment machinery and equipment
- organise work and use tools, equipment and machinery for a turf establishment project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for establishing turf:
 - common weeds, pests and diseases
 - fertiliser use and application
 - soils and turf nutrition
 - turf identification and growth characteristics
 - turf establishment methods
 - watering practices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF303 Implement a grassed area maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and repair grassed areas.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for grassed area maintenance work	1.1 Clarify with supervisor requirements of the maintenance program 1.2 Identify equipment and material resource requirements according to the scope of the coordination work 1.3 Identify the priorities for maintenance activities and time allocation

Element	Performance criteria
2. Maintain and repair grassed areas	2.1 Mow lawns and trim edges 2.2 Undertake coring and scarifying as necessary 2.3 Undertake top dressing and fertilising as required 2.4 Spread fertiliser as necessary 2.5 Undertake control measures for broad leaf weeds and grass weeds 2.6 Perform repairs to irrigation systems as required
3. Coordinate and report on grassed area maintenance activities	3.1 Instruct machinery operators of appropriate use and their responsibilities in respect to operational maintenance requirements of machinery and equipment 3.2 Monitor personnel, activities, timelines and materials usage 3.3 Recognise contingency situations and take corrective actions 3.4 Prepare a report of work undertaken

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF303A Implement a grassed area maintenance program.

Assessment Requirements for AHCTRF303 Implement a grassed area maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a risk assessment for work in a turf area
- determine the maintenance requirements for a turf area
- carry out weed control measures
- repair irrigation systems
- safely adjust and use turf maintenance machinery and equipment
- coordinate and report on grassed area maintenance activities
- write a report on the maintenance program activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grassed area maintenance
 - growth rates and cultural requirements of specific turf types
 - methods and practices for maintaining grassed areas
 - range, use and availability of materials, equipment and machinery that may be required for the project
 - turf grass physiology as it applies to grassed area maintenance
 - types of turf and specific maintenance requirements
 - work schedule programming
 - work health and safety issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF304 Monitor turf health

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor the health and condition of high performance sports turf playing surfaces.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for monitoring activities	1.1 Identify the turf site to be monitored, the nature and regularity of monitoring and time constraints for delivering reports 1.2 Identify plant tissue and soil analysis consultants and determine their sampling specifications in consultation with the supervisor and/or consultants

Element	Performance criteria
	1.3 Select monitoring tools and equipment
2. Collect soil and plant tissue samples	2.1 Perform on-site soil tests according to testing instrument instructions 2.2 Collect samples for off-site testing from a representative area and prepare, package and despatch 2.3 Replace divots from soil sampling sites and dispose of waste materials 2.4 Clean sampling tools and equipment and return to storage 2.5 Record and compare results of analysis with acceptable parameters 2.6 Make recommendations to address identified deficiencies and to meet target chemical balances
3. Visually monitor turf health	3.1 Assess indicators of turf health visually with reference to researched and experiential awareness 3.2 Identify deficiencies in turf health and quality visually with reference to researched and experiential awareness 3.3 Make reports and recommendations according to the playing requirements and desired objectives of the enterprise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF304A Monitor turf health.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCTRF304 Monitor turf health

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess turf health
- identify deficiencies and diseases in turf
- inspect and report on the condition of turfed surfaces
- perform soil sampling and analyse results
- prepare turf maintenance recommendations according to the playing requirements and desired objectives of the enterprise

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf health
 - botany and turf physiology as it applies to turf health
 - main, simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, rates and cost
 - rates and regularity of recommended fertiliser and pesticide application to achieve optimum plant health objectives while minimising external environment impact through leaching, excessive spraying and overuse
 - role of trace elements and nutrients required by turf grass plants, and symptoms of toxicities and deficiencies
 - soil and plant tissue analysis as a monitoring and turf management tool, the main elements of analysis and their significance as indicators of nutritional deficiency and toxicity
 - turf grass diseases, including commonly occurring regional diseases, seasonality, site history and visual disease symptoms

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC TRF305 Renovate sports turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement renovation or remediation of a sports turf area for minor projects and seasonal renovations in the turf industry.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to renovate turf	1.1 Identify the turf renovation site and extent of works 1.2 Select turf and renovation materials 1.3 Identify work health and safety hazards, assess risks and implement controls

Element	Performance criteria
	1.4 Select, use and maintain safety and personal protective equipment (PPE)
2. Prepare renovation equipment	2.1 Carry out pre-operational and safety checks on tools, equipment and machinery 2.2 Calibrate and adjust tools, equipment and machinery
3. Implement sports turf renovation	3.1 Identify renovation works from the program and schedule work in a sequential, timely and effective manner 3.2 Review renovation tasks and undertake remedial action 3.3 Maintain a clean and safe work area throughout and on completion of work
4. Complete renovation activities	4.1 Remove and dispose of waste material in an environmentally aware and safe manner 4.2 Clean, maintain and store tools, equipment and machinery 4.3 Record and report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF305A Renovate sports turf.

Assessment Requirements for AHCTRF305 Renovate sports turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a site hazard identification and risk control assessment
- implement a sports turf renovation program
- prepare, check and calibrate turf renovation machinery and equipment
- record outcomes of renovation works
- renovate a sports turf for successful high performance use
- use turf renovation machinery and equipment to restore turf health and condition

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf renovation
 - field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness, and turf sward height
 - nutrition and plant growth regulators
 - planting, care and renovation scheduling requirements of grass species and cultivars
 - specialist turf renovation practices to achieve high performance turf
 - standards for turf surface appearance and quality
 - structure of a sports turf soil profile

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF306 Prepare sports turf surfaces for play

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to plan, prepare the turf and mark out the sports surfaces ready for play, complying with the rules and regulations of the sport.

The unit applies to individuals who prepare turf surfaces for play under general direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare the site for sports surface preparation activities	1.1 Establish sports surface set-up plan and work activity according to sport rules and specifications 1.2 Identify and manage permanent and temporary obstacles according to sport set-up procedures 1.3 Identify workplace health, safety and environmental hazards,

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	assess risks and implement controls 1.4 Identify and select equipment and resources for setting up the sport surface according to the sport's rules and regulations 1.5 Check and adjust profile moisture condition according to sport rules, regulations and workplace procedures
2. Select and prepare equipment and machinery required for sports surface preparation	2.1 Select and check tools, equipment and machinery and rectify, report and tag faults 2.2 Calibrate equipment and adjust according to sport set-up plan 2.3 Conduct pre-operational checks of tools, equipment and machinery 2.4 Implement site safety requirements and monitor and direct sport users 2.5 Select, check, use and maintain personal protective equipment
3. Use machinery and equipment to prepare sports turf playing surface	3.1 Assess turf preparation area for moveable obstacles, and relocate during preparation activities 3.2 Operate machinery and equipment to prepare sports surface in a consistent and uniform manner 3.3 Collect and dispose of waste and return obstacles according to workplace and environmental procedures
4. Finalise preparation of playing surface	4.1 Select and check sports surface marking tools, equipment and machinery, and rectify or report faults 4.2 Use measuring equipment, geometry and calculations to position lines, markers and match play equipment according to rules and regulations of intended sport 4.3 Conduct marking-out activities according to the timeframes in the sports surface set-up plan 4.4 Use measurement equipment to test playing surface performance 4.5 Check sports turf play area for potential hazards to players, and report or rectify 4.6 Clean and store equipment and dispose of waste materials according to workplace and environmental procedures 4.7 Record sports preparation activities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret symbols and text on plans
Numeracy	<ul style="list-style-type: none"> Calculate distance, area, volume, percentage, time and ratio

Assessment Requirements for AHCTRF306 Prepare sports turf surfaces for play

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared sports surfaces for play for at least three of the following:

- a single hole for a golf course with tee and surrounds, rough, fairway and green, and including moving the hole and location of tee markers
- a bowling green, including the assessment of the pace of green
- a cricket ground, including preparation of wicket surface, line marking of wicket and outfield and stump installation
- a ball sport surface selected from Australian Rules football, soccer or rugby, including outfield line marking
- a horse race track surface preparation, including line marking, and rail positioning installation
- a sports surface selected from lawn tennis, lacrosse, hockey, polo or croquet.

There must also be evidence that the individual has:

- determined the condition required for playing surface and planned the work requirements according to sport rules and regulations
- identified safety hazards, assessed risks and implemented controls to ensure personal and user safety when performing work
- selected, checked, adjusted and operated equipment and machinery on the sport site safely
- assessed sports surface condition and confirmed preparation requirements
- prepared a consistent and uniform sports playing surface
- collected and disposed of waste
- selected, checked and used marking-out equipment, materials and procedures to accurately lay out sports surfaces
- checked playing surface performance and potential hazards to players, and reported or rectified
- cleaned and stored tools, equipment and machinery

- prepared a report on sports surface preparation activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of turf preparation for play, including:
 - golf courses, lawn bowls, cricket, race courses, sports fields and tennis
 - effect of adverse climatic conditions on turf preparation
 - use of turf in high performance sport environments
 - purpose of turf surface preparation in maintaining turf presentation
 - cultural requirements of warm and cool turf grass species
- turf surface performance measurement equipment and benchmarks for play, including:
 - stimpmeter
 - bowling green speed
 - clegg hammer
 - traction meter
 - moisture sensor
 - bounce and ball roll/smoothness
- artificial surfaces and their preparation, including:
 - cleaning
 - grooming
 - watering
 - decompacting
 - sterilisation
- biological factors of turf grass species affected by turf preparation activities, including:
 - moving golf holes
 - reasons for moving markers
 - height of cut for grass species
 - effect of rollers on compaction and turf growth
 - effect of mower cutting type
- assessment of turf grass condition prior to setting up, including:
 - colour of sward
 - length of sward and cutting heights
 - set-up equipment requirements and selection criteria
 - moisture content
- conducting mowing operations, including:
 - ensuring uniform cut
 - maintaining a consistent pattern

- implications of repetitive activity on equipment wear, tear and grain, and the need to vary direction of cut
- marking out sports surfaces for play, including:
 - tools and equipment for marking out, and their preparation and use, including pegs, measuring equipment and string lines
 - line marking methods for sports surfaces
 - basic calculations and geometry relevant to layout and line marking
 - rules and regulations for marking and layout of sports surfaces
 - common terms for sport markers and line marking
- markers and other sports surface obstacles for match play requirements, including:
 - holes
 - tee markers
 - out of bounds markers
- water and its effect on sports play and preparation activities, including:
 - soil water requirements
 - turf surface water condition, dew and rain
 - water and dew removal techniques
 - turf covers, their application and consequences of use
- work health and safety hazards, risks and controls when preparing turf surfaces for play, including:
 - rapid risk assessment
 - safe transport of equipment to site
 - legal requirements when transporting equipment on public roads
- maintaining a safe work site, including:
 - safety barriers
 - signage and notifications
 - managing pedestrian traffic flow
- obstacles affecting sports surface set-up, and methods for managing them during preparation activities, including:
 - permanent obstacles
 - temporary obstacles
 - identifying and rectifying hazards to players and playing conditions
- calibration, adjustment and safe use of equipment commonly used for preparation of sports surfaces, including:
 - mowers and height adjustments
 - sports surface edgers
 - rollers
 - water soppers and blowers
 - line marking equipment
- pre-operational and post-operational machinery and equipment checks, including:
 - electrical cords

- checking and testing procedures
- identifying, tagging and reporting faulty equipment
- fault reporting procedures
- waste materials disposal procedures and environmental considerations
- record keeping and report preparation procedures and their purpose.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports surface facility or an environment that accurately represents workplace conditions in which to demonstrate the preparation and layout of at least three sports stipulated in the performance evidence
- resources, equipment and materials:
 - turf set-up equipment, including cylinder and rotary ride-on mowers, edger, roller
 - marking-out materials and equipment
 - measuring and layout equipment, including tape measures and string lines
 - turf surface performance measuring equipment
- specifications:
 - turf preparation and set-up plan for at least three specific sports play surfaces stipulated in the performance evidence
 - workplace procedures and instructions for turf preparation for play
- timeframe:
 - sports play schedule.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF307 Construct turf playing surfaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to construct the soil profile for the establishment of high-performance sports and recreational turf for new or complete renovation projects in sporting, commercial and public recreational spaces.

The unit applies to individuals who construct turf playing surfaces under general direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for construction activities	1.1 Read and interpret plans and specifications to determine scope of turf construction project 1.2 Collect representative soil samples for the site for testing 1.3 Test soil samples and interpret and record results according to workplace procedures and industry standards

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Locate services and impediments to construction on site, and report discrepancies from construction plan 1.5 Assess the surrounding area relative to construction site and identify potential impact on construction activities 1.6 Identify workplace health, safety and environmental hazards, assess risks and implement controls according to workplace health, safety and environmental procedures 1.7 Document a working plan for the construction
2. Survey and peg out levels for construction site	2.1 Survey construction site and establish and record existing levels and temporary benchmarks according to turf construction and working plans 2.2 Mark out construction site with new levels and contours according to specifications
3. Prepare for construction work	3.1 Read and interpret plans and specifications to determine measurements relevant to materials and quantities 3.2 Identify type of materials required for the turf construction soil profile from construction specifications 3.3 Compute an estimate of materials and costs required for the project and submit for approval 3.4 Develop a construction logistics program for the construction 3.5 Prepare a schedule of works and obtain approvals
4. Set out site for construction	4.1 Reconcile and verify planned boundaries and features of construction works are within actual site constraints 4.2 Verify finishing levels for site, drainage and irrigation are within nominated construction plan specifications 4.3 Transfer measurements for the construction area using markers, and account for variances from construction plan
5. Excavate the construction site	5.1 Select, check, use and maintain safety and personal protective equipment 5.2 Excavate the site within the marked boundaries, and stockpile excess soil according to working plan 5.3 Grade and consolidate the sub-base to levels specified in the construction plan
6. Install irrigation and	6.1 Excavate trenches in sub-surface to receive irrigation and drainage

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
drainage system	components 6.2 Install irrigation system components according to construction plan 6.3 Install drainage system according to construction plan 6.4 Return disturbed sub-surface to levels specified in construction plan
7. Install soil profile	7.1 Install and consolidate soil profile layers according to construction plans and specifications 7.2 Ensure the interface between profile layers is uniform and unbroken 7.3 Ensure soil profile is level and consolidated within specifications ready for planting
8. Complete soil profile construction works	8.1 Clean, maintain and store tools, equipment and machinery according to workplace procedures 8.2 Collect and store unused materials and dispose of waste 8.3 Record and report work outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret symbols and text on plans and specifications
Writing	<ul style="list-style-type: none"> Prepare working plans, drawings and simple procedures for implementing a turf playing surface construction project
Numeracy	<ul style="list-style-type: none"> Make calculations, including distance, area, volume and ratio, when marking out the construction site and estimating materials for construction works

Assessment Requirements for AHCTRF307 Construct turf playing surfaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has contributed to the completion of a sports turf construction project of a minimum of 100 square metres, individually or as part of a team, from concept to completion, including:

- developed a working plan and drawings to scale, including:
 - selected root zone materials
 - determined construction method according to industry standards
 - assessed the site layout
 - obtained, read and interpreted site and construction plans and specifications
 - selected the drainage system
 - estimated materials and costs for the project
- planned the construction of a turf profile, including:
 - conducted and interpreted soil tests
 - identified hazards and assessed the risks and implemented controls
 - used surveying equipment and techniques to accurately set out the site
- constructed the turf profile according to plans and specifications, including:
 - excavated to planned levels
 - installed sub-base to specification
 - installed drainage system to specification
 - installed and consolidated soil profile to specified grade and levels
- complied with local environmental requirements
- scheduled and organised construction work tasks according to construction project
- identified hazards and risks, and implemented control measures for personal, environmental and site-specific safety requirements
- operated, cleaned, maintained and stored tools and excavation and load shifting equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- interpretation of plans and specifications for the scope of sports turf construction, including:
 - location of site
 - implication of impediments and services on construction activities, including irrigation pipes, overhead and underground power, drainage, telecommunications, gas, root system of trees
 - dimensions of construction for determining list of materials
- sports turf soil profile construction principles, methods and resources, including:
 - range of construction methods for specific applications (e.g. golf and bowling greens, cricket wickets, sports fields, race tracks, lawn tennis)
 - Australian and international standards for sports turf construction
 - United States Golf Association (USGA) greens construction profiles
 - Californian method
 - local construction methods
 - natural construction
 - push up greens
 - sand over clay
 - working with a perched water table
- drainage installation methods and materials, including:
 - pipes
 - drainage materials
 - root zone layer and uniformity in depth of horizons
- materials, tools, equipment and machinery for construction of soil profiles, including:
 - soil amendments
 - base construction materials
 - turf growing media and quality
- safe operation of machinery and equipment for constructing profiles, including:
 - excavating to known levels, including the cut and fill quantities
 - working to a consistent level and grade from sub-base to final level
 - methods of compacting and testing the compaction of the sub-base
- practical understanding of surveying principles and techniques, including:
 - using survey equipment to establish benchmarks and levels on a construction site
 - interpreting and constructing basic contour drawings
 - transferring and pegging out contours to a construction site
- soil testing techniques and the application of results to the construction process, including:
 - texture (particle size)
 - pH

- electrical conductivity
- infiltration rates
- site constraints and their impact on constructing turf surface, including:
 - aspect
 - site history
 - trees and other vegetation
 - location of services
 - water quality and reclaimed sources of water
- workplace health and safety hazards, risks and control measures when constructing new turf, including:
 - site safety
 - personal safety
 - safe use and operation of tools, equipment and machinery
- planning and scheduling construction works to ensure a logical, timely and effective process
- laying out a construction area from plans and drawings, including:
 - measuring techniques
 - finding and marking levels
 - types of markers, including paint, pegs, stringlines, flags
- calculations relevant to costing and estimating a turf construction project, including:
 - excavation volumes
 - volume of construction materials
 - labour time and costs
- environmental practices and procedures relevant to turf construction sites, including:
 - implications associated with construction and excavation activity
 - waste disposal procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions of a minimum of 100 square metres
- resources, equipment and materials:
 - personal protective equipment and other site safety equipment
 - surveying equipment
 - hand tools, excavation and load shifting equipment
 - soil testing equipment for pH, electrical conductivity, texture and infiltration rates
- specifications:
 - workplace procedures and instructions for construction of sports turf playing surfaces

- sports turf project construction drawings, plans and specifications
- workplace safety and environmental procedures related to construction of sports turf playing surfaces.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF308 Establish turf

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to establish turf by sowing, turf laying, sprigging and chaffing or stolonisation in sporting, public recreational open space, commercial and residential sites.

The unit applies to individuals who establish turf under general direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a turf establishment plan	1.1 Collect representative soil samples of turf establishment area for testing 1.2 Package and label soil samples for laboratory testing according to laboratory requirements 1.3 Perform field tests of soil and record results

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify and select turf grass species and propagation method according to workplace or client planned outcomes</p> <p>1.5 Assess the site for physical and cultural impediments to turf establishment and record results</p> <p>1.6 Interpret results and prepare a turf establishment plan</p>
2. Prepare to establish a new turf area	<p>2.1 Select materials, tools, equipment and machinery for planting according to turf establishment plan</p> <p>2.2 Carry out pre-operational and safety checks on tools, equipment and machinery</p> <p>2.3 Identify workplace health, safety and environmental hazards, assess the risks and implement controls</p> <p>2.4 Select, check, use and maintain personal protective equipment</p> <p>2.5 Implement weed control strategy in preparation for turf establishment activities</p>
3. Prepare soil and plant turf	<p>3.1 Prepare planting site, incorporate soil additives and ensure soil moisture is within specification</p> <p>3.2 Distribute turf propagation material on turf area according to turf establishment plan</p> <p>3.3 Implement irrigation requirements to newly propagated turf</p> <p>3.4 Collect and dispose of waste according to workplace and environmental procedures</p> <p>3.5 Clean, store and maintain tools, equipment and machinery</p>
4. Maintain turf establishment	<p>4.1 Protect the site from disturbance and damage according to workplace procedures</p> <p>4.2 Assess soil moisture condition and rectify according to workplace irrigation practices</p> <p>4.3 Implement turf mowing practices during establishment according to workplace procedures and turf establishment plan</p> <p>4.4 Apply top dressing to level the turf area according to turf establishment plan</p> <p>4.5 Apply nutrients and amendments according to turf establishment plan</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Report and repair areas of damaged turf	5.1 Monitor turf condition for quality, and repair according to turf establishment plan 5.2 Record and report work outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has established a turf surface using:

- seed (hand seed sowing, mechanical seed sowing, hydro-seeding or drilling)
- sod (turf rolls or sheets)
- and one of the following methods:
 - sprigs (hand sprigging, hydro sprigging, mechanical sprigging)
 - plugs
 - chaffing or stolonisation.

There must also be evidence that the individual has:

- collected and prepared soil samples for testing and interpreted results
- identified impediments to turf establishment and recorded results
- determined turf establishment species, methods and requirements
- prepared an establishment plan to meet client or workplace requirements
- identified hazards and risks and implemented control measures for personal and site-specific safety
- prepared materials, equipment, machinery and turf propagation materials ready for implementation
- performed turf establishment activities safely using equipment, machinery and materials
- collected waste and disposed of it safely
- selected, safely used, cleaned, maintained and stored turf establishment machinery and equipment
- maintained turf establishment records and reported outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for establishing, turf, including:

- preparing a turf establishment plan
- turf grass identification, propagation and growth characteristics
- turf establishment methods, including seed, sod, sprigs, plugs, chaffing and stolonisation
- handling and assessing turf propagation materials for defects
- distributing, laying and planting turf propagation materials to establish even coverage
- fertiliser use and application
- soils and turf nutrition
- overseeding warm season grasses and allelopathy
- common weeds, pests and diseases, and control measures for establishing new turf, including field tests to identify problems
- physical and chemical properties of soils and effect on establishing new turf, including:
 - compaction
 - pH
 - salinity and nutrition
 - texture and soil type
 - soil sampling techniques and preparation for laboratory testing
 - field testing techniques for soils
- irrigation requirements for establishment of new and establishing turf
- soil types and their preparation for establishing new turf, including:
 - basic checks to assess soil condition, including soil moisture, tilth, compactness, depth and organic matter
 - soil preparation additives, including fertilisers, ameliorants, moisture control materials, pesticides and herbicides
 - methods for incorporation of soil additives
 - soil preparation requirements for different turf propagation techniques
- calculations to determine application rates of amendments, fertiliser and planting material, including distance, area, volume, percentage and ratio
- tools, equipment and machinery used in preparing new turf surfaces, including:
 - types of equipment and their effective and safe operation
 - pre-start checks
 - care and storage of tools, equipment and machinery
- turf propagation treatments for establishment, including:
 - protection for seed, sod, sprigs and plugs during first weeks of establishment
 - basic irrigation practices and recognising turf establishment needs and problems
 - rolling and mowing practices for new turf
 - monitoring and control of disorders
 - top dressing purpose and procedures
 - nutrients and amendments used for establishing turf
- workplace health and safety hazards, risks and control measures when constructing new turf, including:

- site safety
- personal safety
- safe use and operation of tools, equipment and machinery
- record keeping and reporting procedures relevant to turf establishment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - hand tools, stringlines, buckets, shovels, rakes, spades, level lawns and wheelbarrows
 - equipment, sod cutter, scarifier, transporter, roller, fertiliser and chemical application equipment
 - dry sand, propagation material and turf plugger
 - personal protection equipment
 - soil amendments and treatment materials
 - soil testing equipment
 - the two types of turf propagation materials and at least one of the propagation methods specified in the performance evidence
- specifications:
 - turf grass species specifications and requirements
 - workplace procedures and instructions for establishing turf.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF309 Implement a grassed area maintenance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to maintain general turf grass surfaces involving the general procedures for cutting and trimming grass, dethatching older grassed areas, applying fertilisers and treatments for managing grass health.

The unit applies to individuals who maintain turf surfaces under general direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for grassed area maintenance work	1.1 Clarify requirements for maintenance program with supervisor 1.2 Identify permanent and temporary obstacles on grassed area and manage according to maintenance program 1.3 Identify workplace health and safety and environmental hazards, and assess risks and implement controls

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Identify and select equipment and resources according to the maintenance program 1.5 Identify priorities and schedule maintenance activities
2. Prepare equipment and machinery required for grassed area maintenance work	2.1 Select and check tools, equipment and machinery, and rectify, report or and tag faults 2.2 Adjust and calibrate equipment according to maintenance program and manufacturer instructions 2.3 Conduct pre-operational checks of tools, equipment and machinery according to manufacturer instructions and workplace procedures 2.4 Select, check, use and maintain personal protective equipment
3. Implement grassed area maintenance activities	3.1 Assess site-specific safety hazards and implement controls according to workplace safety procedures 3.2 Implement pre-start checks and start-up procedures for machinery according to operator instructions 3.3 Operate machinery and equipment on grassed area according to maintenance plan, operator instructions and workplace procedures 3.4 Implement shut-down procedures for machinery according to manufacturer instructions 3.5 Clean and store equipment and dispose of waste materials according to workplace and environmental procedures
4. Finalise grassed area maintenance activities	4.1 Reconcile outcomes of work maintenance activities against maintenance plan 4.2 Identify discrepancies in outcomes and recommend corrective action 4.3 Discuss recommendations with supervisor and modify maintenance plan and schedules 4.4 Record and report grassed area maintenance activities according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Accurately interpret maintenance plans and operator instructions
Writing	<ul style="list-style-type: none"> Accurately record and update maintenance plans and schedules using clear language and correct spelling, grammar and industry terminology
Numeracy	<ul style="list-style-type: none"> Make calculations, including distance, area, volume, ratio, percentage and time

Assessment Requirements for AHCTRF309 Implement a grassed area maintenance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, implemented a grassed area maintenance program, including:

- clarified the maintenance requirements for a grassed area with supervisor
- conducted a risk assessment and implemented controls for grassed area maintenance work
- identified fixed and temporary obstacles, and implemented procedures to avoid damage to obstacles
- identified and selected equipment and resources required for the maintenance activities
- prioritised and scheduled maintenance activities
- ensured workplace safety practices were implemented for all grassed area maintenance works
- selected, checked and used personal safety equipment
- selected, checked and adjusted equipment and machinery.

There must also be evidence that the individual has:

- operated equipment and machinery safely to maintain at least 100 square metres of grassed area and has performed the following tasks:
 - used mowers and trimmers to cut grass to a specified height
 - used coring or scarifying equipment to manage thatch
 - used mechanical spreader to apply fertilisers or amendments at a specified rate
 - used manual methods to control broad leaf and grass weeds
 - used manual or mechanical equipment to apply liquid treatments to control weeds at a specified rate
- followed operating procedures for pre-start checks, start-up, operation and shut-down for all machinery and equipment used
- reviewed grassed area maintenance activities and recommended changes to the maintenance plan with supervisor
- recorded and reported grassed area maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- maintenance and management of grassed areas, including:
 - recognising local turf grass species
 - growing conditions and cultural requirements of warm and cool climate turf grass species
 - purpose of grass and selection of mowing height
 - thatch and impact on grass health and vigour, and methods for reducing thatch
 - basic nutrient requirements of grass and commonly used fertilisers
 - fertiliser application methods and rates
 - turf grass physiology as it applies to grassed area maintenance
- methods of applying fertiliser and chemical treatments to grassed areas, including:
 - liquid treatments using drenches and sprayers and basic application equipment
 - broadcasting granular and powder applications by hand or mechanical means
- health, safety and environmental policies and procedures in a workplace, including:
 - identifying hazards, assessing and controlling risk
 - protecting the environment during operations and waste
 - personal protection and equipment
- methods and practices for mowing grassed areas, including:
 - setting the height of cut
 - obtaining uniform cut
 - maintaining consistent pattern
 - variation of cut direction to reduce wear and tear
- tools, equipment and machinery used for grass maintenance, including:
 - rotary and cylinder mowers and other grass cutting and trimming equipment
 - operation of coring or scarifying equipment, including the potential damage to irrigation and drainage infrastructure
 - mechanical spreaders
 - hand or motorised spray equipment
- equipment operation and maintenance, including:
 - pre-start checks, start-up and shut-down procedures
 - clean-up and storage
- impediments to safe maintenance activities and action to be taken, including:
 - people and animals
 - proximity to roadways, pathways and other public spaces
 - assets and other facilities that may be damaged
- weed species and control strategies in turf grasses, including:

- broad leaf weeds
- grass weeds
- mosses and other invasive plant species
- record keeping and recording procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a grassed area of at least 100 square metres
- resources, equipment and materials:
 - rotary and cylinder mowers, coring and scarifying equipment or machines
 - fertiliser spreaders, and spray and drenching equipment
 - measuring equipment for treatments and fertilisers
 - fertilisers, amendments and weed treatments
 - fuel, oil, tools and equipment required to adjust and operate machinery
- specifications:
 - workplace procedures and instructions related to implementing grassed area maintenance programs, including safety and environmental procedures
 - operating instructions for machinery and equipment
 - specifications for rates of application of fertilisers and weed treatments
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF310 Monitor turf health

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to monitor the health and condition of sports turf playing surfaces.

The unit applies to individuals who monitor turf health under general direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for monitoring activities	1.1 Establish the scope, regularity and time constraints for monitoring and reporting turf health 1.2 Identify turf grass species and assess common health issues attributed to the species 1.3 Identify plant health specialist advisor and determine their scope of support and sampling specifications

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Identify and select tools and equipment required to monitor and sample turf plant health according to specialist advice
2. Assess the health of turf grass area	<p>2.1 Inspect and record signs and symptoms of abnormal turf grass health</p> <p>2.2 Assess extent of turf grass health problem, and report according to workplace procedures</p> <p>2.3 Conduct field diagnoses and tests to aid in identifying plant health issue</p> <p>2.4 Collect, secure, label and despatch samples for laboratory testing according to specialist advisor specifications</p> <p>2.5 Repair sample sites, clean tools and equipment and dispose of waste materials according to workplace and environmental procedures</p> <p>2.6 Communicate with specialist advisors to establish diagnoses of plant health problem</p> <p>2.7 Assess diagnoses and compare results with acceptable parameters</p> <p>2.8 Prepare recommendations to address identified plant health problems</p>
3. Monitor and report turf health and condition	<p>3.1 Examine turf for poor health and substandard quality indicators in a scheduled manner</p> <p>3.2 Identify poor turf health and deviations in turf quality according to expected sporting standards and workplace requirements</p> <p>3.3 Compile examination results and report with recommendations</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCTRF310 Monitor turf health

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored the health of a warm and a cool season turf species and reported recommendations for turf health, including:

- established the scope and scheduling for monitoring turf health for a warm season turf grass species and the common health issues
- established the scope and scheduling for monitoring turf health for a cool season turf grass species and the common health issues
- identified turf health specialist advisors and their requirements to support monitoring procedures
- identified and selected tools and equipment required to monitor and sample turf health issues
- inspected and assessed turf grass for signs of common turf health problems and assessed the extent of the problems, including:
 - pests
 - diseases
 - nutritional
 - environmental causes
- conducted field tests to aid in diagnosing turf grass health issues, including:
 - pH
 - electrical conductivity (EC)
 - drainage and infiltration rate
 - soil temperature
- collected and despatched samples for laboratory testing and repaired sample sites
- assessed diagnosis from field and specialist advisor results and determined acceptable parameters
- prepared recommendations according to the sports play standards
- monitored turf grass during growing season.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- 15 turf grass species or cultivars, their common name, genus and species, and growth habit, including warm and cool grass species
- importance of plant physiology in plant health, including:
 - photosynthesis
 - transpiration
 - structural components of turf grasses and relation to turf grass health
 - basic metabolic and physiological processes for disease resistance in turf grass
 - nutrients, nutrient uptake and role in plant growth
 - basic physiology processes for insect and disease resistant turf
 - basic endophyte infection of turf
 - allelopathy in turf grass species
- specialist advisors, their purpose and method of engagement to support turf health diagnosis
- turf grass species selection for plant health management, including:
 - disease tolerance
 - mowing height
 - playing requirements
 - dormancy
 - salinity
 - resilience, wear and recovery
 - water requirements
- turf grass species and common regional health issues, including:
 - basic biology, symptoms and controls of pests
 - basic biology, symptoms and controls of diseases
 - symptoms and controls of disorders, including soil condition, nutrition
 - environmental disorders (e.g. frost, poor drainage, shade)
- tools, equipment and process for diagnosing turf health and disorders
- expectations and quality indicators for turf grass and sports turf standards
- rates and recommended treatments to achieve optimum turf grass health objectives, including:
 - simple and compound fertilisers used in the turf industry and their effect on turf health
 - fertiliser types and nutrient release rates
 - common pesticide types and methods of application
 - external environment impact of treatments through leaching, excessive spraying, off target damage and overuse
 - interpretation of labels and safety data sheets for treatments
 - use of growth regulators and concept of 'growing degree days'

- calculating nutrient application according to fertiliser rates
- role of trace elements and nutrients required by turf grass plants, and symptoms of toxicities and deficiencies
- soil and plant tissue analysis for monitoring and managing turf health, including:
 - main elements of analysis
 - significance as indicators of nutritional deficiency and toxicity.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions
 - a sports play area with warm season turf grass species to monitor for health issues
 - a sports play area with cool season turf grass species to monitor for health issues
- resources, equipment and materials:
 - test equipment and resources for pH, soluble salts and soil moisture analysis
 - sampling equipment and materials for collecting, storing and despatching soil, plant, pest and disease test samples
 - examples of pests, diseases and disorders for identification purposes
 - turf health specialist advisory reports
- specifications:
 - workplace procedures and instructions related to monitoring turf health
- relationships:
 - specialist advisor
- timeframe:
 - a scheduled period of time for monitoring a turf grass area for health issues.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF311 Renovate sports turf

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to implement renovation or remediation of a sports turf area for minor projects and seasonal renovations in the turf industry.

The unit applies to individuals who renovate sports turf under general direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to renovate turf	1.1 Assess the turf renovation site and determine extent of works according to renovation program 1.2 Identify turf grass species, materials and resources and calculate quantities required for renovation program 1.3 Collect soil samples and conduct or arrange tests to establish physical and chemical condition of the soil according to industry

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	standards 1.4 Identify, select and check hand tools, equipment and materials required for renovation work 1.5 Identify workplace health, safety and environmental hazards, assess their risks and implement controls 1.6 Prepare a schedule of works according to site assessment and soil conditions
2. Prepare renovation equipment	2.1 Select, check, use and maintain safety and personal protective equipment 2.2 Carry out pre-operational and safety checks on tools, equipment and machinery and rectify, report or tag faults 2.3 Calibrate and adjust tools, equipment and machinery for turf renovation
3. Implement sports turf renovation	3.1 Operate turf renovation tools, equipment and machinery safely and effectively to renovate turf surface 3.2 Assess and review renovation activities against scheduled works and undertake remedial action where out-of-specification 3.3 Maintain a clean and safe work area throughout and on completion of work
4. Complete renovation activities	4.1 Collect and dispose of waste material according to workplace and environmental procedures 4.2 Clean, maintain and store tools, equipment and machinery 4.3 Record and report work outcomes according to workplace procedures

Foundation Skills

Assessment Requirements for AHCTRF311 Renovate sports turf

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, renovated a sports turf surface, including:

- assessed the site and renovation program to determine the extent of works and required renovation activities
- identified turf grass, materials and resources and calculated quantities required
- collected and tested soil samples and established the soil condition for renovation site
- prepared a schedule of works for renovation activities
- identified hazards and risks, and implemented control measures for personal and site-specific safety
- selected and prepared materials, equipment, machinery and turf propagation materials ready for renovation works
- performed turf renovation activities safely using equipment, machinery and materials according to renovation schedule and workplace procedures, including:
 - coring or spiking
 - top dressing
 - scarifying or grooming
 - shaving or turf cutting or plugging
 - fertilising or adding amendments
- cleaned site and collected waste from renovation works and disposed of
- cleaned, maintained and stored turf renovation machinery and equipment
- assessed renovation activities against schedule of works and implemented remedial action where out-of-specification
- recorded and reported turf renovation activities, faults and issues.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of turf renovation, including:
 - turf renovation programs and their function in maintaining playable surfaces
 - developing a schedule of works for sports turf renovation
- calculations required to determine the quantities required for the renovation program, including:
 - amendments
 - fertiliser
 - seed
 - soil, sand and other growing media
- techniques for conducting field tests for soils, including:
 - pH
 - electrical conductivity
 - infiltration rate
 - organic matter
 - firmness and compaction of the surface
 - traction
 - surface smoothness
- planting, care and renovation scheduling requirements of grass species and cultivars, including:
 - specialist turf renovation practices to achieve high performance turf
 - national and international standards for turf surface appearance and quality
 - turf sward height
- structure of a sports turf soil profile, including:
 - soils and soil preparation for renovation
 - soil aeration and compaction, including, core, solid tyne and water injection
 - impact of soil compaction and thatch on irrigation and infiltration rate
 - levelling turf surfaces
- turf grass species and effect on mat, thatch and dethatching techniques, including:
 - turf grass improvements using top dressing, dusting, shaving, scarifying and grooming
 - effect of adverse weather conditions on renovation activities
- effective and safe use of tools, machinery and equipment commonly used for sports turf renovation programs, including:
 - scarifier
 - sod cutter
 - corer
 - slicer
 - shaver

- top-dresser
- drag-mat
- fertiliser spreader
- transporter
- loader, bobcat or similar
- hand tools, tynes, shovels, spades, level lawns and wheelbarrows
- factors for consideration in the selection of tools, machinery and safety equipment
- common pre-operational and post-operational checks of equipment
- adjustments and settings for renovation equipment
- assessment of safety hazards and risks when renovating turf areas, including:
 - public safety
 - barriers and exclusions zones
 - signage
 - personal protection and equipment
 - manual handling techniques for lifting or moving heavy loads and materials
- chemical amendments for renovations, including:
 - fertilisers
 - ameliorants
 - growth regulators
- turf repairs and regeneration procedures, including:
 - over sowing
 - plugging
 - sprigging
 - rolled turf and turf replacement
 - divot replacement
 - top dressing materials and procedures
- waste materials handling and disposal, including environmental considerations
- record keeping and reporting procedures and requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - turf renovation machinery and equipment
 - turf renovation hand tools
 - fertiliser, ameliorants and top dressing material
 - turf propagation materials, including seed, sprigs and rolled turf
- specifications:

- turf renovation program
- workplace procedures and instructions related to turf renovation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF403 Develop a sports turf maintenance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop a sports turf maintenance program, prepare implementation documents, communicate the program to work team and key stakeholders and review and update the program.

The unit applies to individuals who apply specialist skills in turf maintenance to provide solutions to technical and unpredictable problems. They work autonomously, and instruct and monitor the work of others within a team. They use discretion and judgment in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine soil properties and plant health	1.1 Develop a soil and plant tissue testing program 1.2 Monitor testing activities against testing program and initiate remedial action where activity does not comply 1.3 Assess and interpret test results with due consideration of

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared a sports turf maintenance program for play on at least one of the following:

- a single hole for a golf course with tees and surrounds, rough, fairway and green
- a bowling green
- a cricket ground with wicket surface and outfield
- a sports field for one of Australian Rules football, soccer, rugby, lacrosse or polo
- a horse race track
- a turf farm
- a lawn tennis court
- a croquet lawn
- other natural sports turf surface.

The sports turf maintenance program must:

- include a twelve month cycle for the sports turf playing surface
- specify all maintenance practices, including:
 - irrigation
 - mowing and rolling
 - fertiliser applications
 - pesticide applications to treat pests, diseases and weeds
 - plant growth regulator applications
 - renovation practices
 - surface set-up standards and player expectations
- be implemented for a period of no less than eight weeks to verify the performance outcomes documented in the program.

There must also be evidence that the individual has:

- prepared an annual sports turf maintenance program according to budget
- assessed and incorporated into maintenance program the following: test results, optimum performance characteristics, financial constraints and resource implications
- scheduled activities and informed key stakeholders and work team of their respective roles and responsibilities
- monitored and reviewed the program to ensure program outcomes are achieved
- implemented appropriate course of action to overcome program deficiencies
- documented and reported actions and changes to maintenance program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- biological principles and processes of a range of sports turf species for playing surfaces, including:
 - growth habits and cultural requirements of turf grass species and cultivars under varying soil and environmental conditions
 - maintenance requirements and practices for specific turf plant species and cultivars after initial establishment
 - nutrients required by specific turf plant species and cultivars, and the effects of nutrient deficiency and toxicity on individual plant species and cultivars, including symptoms
 - plant diseases, pests and disorders and weeds of specific turf plant species and cultivars
- site evaluation techniques, including analysis of the condition of soils, plants and the site for turf maintenance activities, including:
 - soil ameliorants required to treat common soil problems
 - the characteristics of soil and other growth media
 - types and functions of additives used to enhance the nutrition available for specific turf plant species and cultivars
 - the main simple and compound fertiliser products available
- design and development of maintenance programs within turf grass requirements, including:
 - requirements to build healthy turf to meet national or international standards
 - standards and player expectations of the playing surface
 - availability of equipment and materials
 - financial resources
- soil and plant testing programs and their development, including:
 - types of soil and plant tissue tests used in turf management
 - field testing activities
 - off-site and laboratory testing activities and the role of consultants
 - scheduling and timing of tests for optimum results

- sampling techniques for soils and plant tissue
- interpretation of soil and plant test results, including:
 - impact of the seasons on results
 - expected results for turf species and cultivars
 - importance of using and maintaining historical records
- turf grass species and their cultural requirements and the implication for a maintenance program, including:
 - irrigation methods and water budget
 - mowing and rolling methods, including frequency for turf play surface requirements
 - fertiliser and ameliorant application timing and impact on turf health and growth
 - pests and disease control, including pesticide application
 - impact and management of plant growth regulators and their application to turf grass
 - planned maintenance for renovation of worn and damaged surfaces
 - maintenance implications for setting up for sports play
- management of unexpected activities and outcomes, including:
 - developing contingencies to manage unpredictable situations
 - managing adverse climatic conditions
 - adverse or unplanned turf usage
- record keeping and reporting procedures and practices.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - access to a sports turf facility or an environment that accurately represents workplace conditions on which to implement and monitor a maintenance program, and at least one of the sports turf surfaces stipulated in the performance evidence
- resources, equipment and materials:
 - access to national and international sports turf industry standards
 - access to player and user expectations for playing surface
 - access to soil and plant tissue analysis reports for interpretation
- specifications:
 - workplace documents, including procedures and brief related to development of a sports turf maintenance program, including a maintenance budget and list of the equipment, machinery and human resources available
- relationships:
 - work team
- timeframe:
 - maintenance program must span 12 months
 - implementation of a minimum of 8 weeks to verify the program outcomes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF404 Plan and implement sports turf renovation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to plan and implement sports turf renovation activities, which involves the preparation of procedures, scheduling and coordination of staff, and monitoring and reviewing financial and renovation performance.

The unit applies to greenkeepers and turf managers that use specialist skills to plan, coordinate and supervise the work of others within known parameters. They use discretion and judgment in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare the turf renovation program	1.1 Assess existing turf site plans and documentation to establish purpose of turf surface to be renovated 1.2 Determine the size of sports turf surface in need of renovation 1.3 Conduct field tests to establish renovation site conditions according to workplace and industry standards

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Assess size of area and test results against purpose, and identify scope of renovations required</p> <p>1.5 Identify and select materials and resources required for the identified renovation requirements</p> <p>1.6 Identify workplace health, safety and environmental hazards, assess risks and identify controls</p> <p>1.7 Develop a renovation program containing site assessment report, results of field measurements and tests, risk controls, and material and resource requirements</p> <p>1.8 Develop and document a schedule of works and specifications for renovation program</p>
2. Prepare renovation equipment	<p>2.1 Review machinery maintenance logs to verify operational status for renovation activities</p> <p>2.2 Conduct pre-operational and safety checks of tools, equipment and machinery</p>
3. Implement the renovation program	<p>3.1 Select work team and contractors, and coordinate work in a sequential, timely and effective manner</p> <p>3.2 Organise and direct work according to the renovation schedule of works</p> <p>3.3 Monitor renovation tasks against performance targets, and undertake remedial action where non-compliant</p> <p>3.4 Monitor renovation work activities to maintain a clean and safe work environment</p>
4. Complete renovation activities	<p>4.1 Reconcile completed works against renovation plan objectives</p> <p>4.2 Inspect equipment and machinery for operational status, and implement repairs</p> <p>4.3 Record expenses and review against budget according to workplace financial procedures</p> <p>4.4 Record and report turf renovation outcomes against planned objectives according to workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Develop plans, procedures and schedules for work team and key stakeholders using clear language in order to convey explicit information
Oral communication	<ul style="list-style-type: none"> Present complex information appropriate to the audience using clear and convincing language, tone and pace
Numeracy	<ul style="list-style-type: none"> Perform calculations when implementing and interpreting tests and results

Assessment Requirements for AHCTRF404 Plan and implement sports turf renovation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, prepared and implemented a sports turf renovation plan, including:

- assessed site plans and documentation to establish sports turf purpose
- determined size of sports turf area in need of renovation
- conducted field tests to establish the degree of degradation of sports turf surface
- assessed results and established the scope of renovation works
- identified site health, safety and environmental hazards, assessed risks and established controls for the renovation works
- developed and documented a plan for a sports turf renovation program and prepared a schedule of works and specifications for implementation
- reviewed status of machinery and equipment and conducted pre-operational checks in preparation for renovation works
- selected and coordinated work team and contractors to implement the schedule of works for renovation of sports turf surfaces
- monitored restoration activity, safety and environmental impacts of restoration work against performance targets, and implemented remedial actions where non-compliant
- reconciled completed works against renovation plan
- checked equipment for serviceability, and initiated repairs
- recorded costs of restoration and reviewed against budget
- maintained records and produced reports on renovation outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- enterprise, national and international industry standards for turf surface appearance, performance and quality

- environmental implications of renovation activities, turf and soil treatments, and waste disposal procedures
- safe work practices and procedures applicable to renovation activities, including:
 - safe materials handling
 - equipment and operation
 - public and turf area users
- basic surveying skills to measure the size of renovation site
- methods and purpose of field tests, including:
 - infiltration rate
 - organic fines
 - hardness
 - traction
 - surface smoothness
 - turf sward height
- identification and cultural requirements of turf grass species and cultivars, including:
 - planting and propagating
 - care and maintenance
 - renovation scheduling requirements
- specialist turf renovation practices to achieve high performance turf, including:
 - dethatching
 - top dressing
 - aerating
 - over sowing
 - fertilising and soil conditioning
 - drainage and water holding
- determining resource and material requirements for turf grass renovation program, including:
 - financial and budgetary constraints
 - consumables, including fertilisers, ameliorants and other chemicals
 - labour and contractor requirements and scheduling
 - equipment and machinery
 - turf grass propagation material
 - growing soils and media
 - expectations and specification of work quality outcomes
- tools, equipment and machinery commonly used for sports turf renovation programs, including:
 - effective and safe use of tools and machinery
 - influences on the selection of tools, machinery and safety equipment
 - common pre-operational and post-operational checks of equipment
 - adjustments and settings for renovation equipment

- assessment of safety hazards and risks when renovating turf areas, including:
 - public safety
 - barriers and exclusions zones
 - signage
 - personal protection and equipment
 - manual handling techniques for lifting or moving heavy loads and materials
- coordinating a work team and working with contractors, including:
 - communicating with team members
 - organising and directing labour
 - dealing with performance issues
- preparation of renovation plans, recording and reporting renovation activities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions on which to prepare and implement a turf renovation plan
- resources, equipment and materials:
 - turf renovation tools, machinery and equipment
 - fertiliser, ameliorants, top dressing materials
 - turf planting and propagation materials
 - measuring and layout equipment, including levels, tape measures, boning rods, laser level, dumpy level
- specifications:
 - workplace procedures and work instructions for turf area maintenance
 - access to workplace, national and international turf grass industry standards
- relationships:
 - work team and contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF505 Plan the establishment of sports turf playing surfaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to establish sports turf playing surfaces, develop a design for the site, its specifications and works procedures, planning processes involved in establishing turf in new constructions and major renovations of existing sports turf surfaces.

The unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCTRF505 Plan the establishment of sports turf playing surfaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, planned the establishment of a sports turf playing surface taking into consideration the soil profile, including:

- liaised with client to establish the scope of the turf establishment project
- assessed the hydrological, biophysical and chemical characteristics and their impact on turf establishment site and playing surface design
- assessed and evaluated drainage and irrigation requirements for sports turf playing surface
- established a site survey depicting key features, benchmarks, levels and services
- investigated and selected each of the following for inclusion in performance brief:
 - turf area construction technique suitable for client requirements and site characteristics
 - turf grass species and cultivars suitable for the playing surface
- identified conflicts with legislative and regulatory requirements, and proposed solutions to these
- identified environmental impacts of turf establishment and recommended actions for proposed works
- investigated and selected sports turf profile options
- developed a performance brief for a sports turf surface and presented it to client for approval
- sourced, tested and evaluated materials suitable for sports turf profile, including conducting the following tests:
 - saturated infiltration
 - porosity
 - volumetric moisture retention
 - bulk density
 - moisture release curve
 - particle size and distribution

- pH
- selected suitable materials for turf grass profile construction consistent with performance brief and industry best practice
- developed and designed a profile consistent with irrigation and drainage design requirements and performance brief
- documented turf establishment concept design and presented it to client for approval
- determined turf establishment procedures
- confirmed profile, irrigation and drainage concept designs are consistent with performance brief
- produced plans for the design of turf establishment project, including:
 - elevations and views consistent with industry standards
 - section drawings of sports turf profile
- prepared documentation to accompany the turf establishment plan, including:
 - schedule of works
 - details of construction
 - specifications for construction
 - list of materials
 - identified sub-contracted works
- prepared work procedures for turf establishment activities and practices
- prepared maintenance procedures for the turf establishment phase.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- establishing and maintaining sports turf playing surfaces, including:
 - construction procedures, turf species selection and cultural practices for sports turf playing surfaces
 - growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
 - crop factor
 - readily available water estimates
- best practices in turf grass profile design, including:
 - United States Golf Association method
 - California method
 - national best practice
 - local practices
- irrigation, drainage and the interrelationship between soil, air, water and the physical structure of existing and manufactured soils and sports turf mixes
- considerations for establishment of type and depth of soil profiles, including:
 - retaining existing soil profile and infrastructure
 - remedial action on existing profile

- full renovation and replacement of soil profile
- sources of irrigation water, including:
 - volume and quality of water supply
 - relative cost
 - irrigation demand and specifications, including flow rate, pressure, water quality testing
- hydrological characteristics of soil profile, materials and tests for root zone profiles, including:
 - saturated infiltration rate and testing procedures
 - sub-soil stability and moisture content
 - perched water table
 - climate and rainfall, including the impact on soil moisture and growth rate
 - factors for establishing 'drainage design rate' (drainage modulus)
 - volumetric moisture retention and moisture release
 - precipitation rate
 - infiltration rate and depth of soil profile
- computations for soil profile design and specifications, including:
 - calculating area and volume
 - hydrological calculations, including flow rates, infiltration rate, precipitation rates and Hooghoudt's equation
 - costing and documenting materials
- biophysical environment of the turf establishment site, including:
 - microbial activity (pests, diseases, beneficial organisms)
 - competition with weeds
 - shade trees
- physical and chemical characteristics of the soil for turf grass establishment, including:
 - compaction, porosity and bulk density of profile materials
 - pH, salinity and nutrition and their respective standards for measuring
 - soil profiles, texture, soil type and particle size distribution
 - soil sampling techniques
 - field testing techniques for soils
- legislation and regulations relating to sports turf sites and turf establishment works, including national and international standards for sports turf surfaces
- maintenance requirements and practices for specific turf plant species and cultivars prior to and after initial establishment
- site evaluation techniques, including analysis of the condition of soils, plants and the site for turf establishment activities, including:
 - surveying principles and techniques
 - surveying services
 - basic surveying techniques and equipment for establishing main features, services and levels

- basic geospatial and digital surveying techniques
- basic plan drawing skills
- role of project briefs and client consultation processes in planning turf establishment works, including:
 - client liaison and negotiation skills
 - working with consultants and professional services
- preparation of plans, specifications and list of materials, including:
 - type and functions of drawings, including views, scale, dimensions and documentation
 - calculation of area, volume and rates
 - costing materials
 - documenting a list of materials
 - plan development, including manual and digital drawing principles
 - industry standards for drawing plans
- identifying resource implications, including:
 - availability and use of tools, equipment and machinery used in preparing new turf surfaces
 - turf establishment treatments and costs
 - delivery and management of raw materials during construction
 - accessing specialist consultants and professional services.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to a site suitable for establishing a sports turf surface
- resources, equipment and materials:
 - manual drawing equipment and digital drawing equipment and programs
 - computers and software for searching information and preparing documentation
 - reports, results and testing equipment for soil, plant tissue and biophysical characteristics of the site used in the performance evidence
 - site plans with levels for the site used in the performance evidence
 - meteorological data for the site used in the performance evidence
- specifications:
 - workplace documents, including a client brief, work instructions and turf area construction plans
 - local, national and international standards for turf grass establishment
- relationships:
 - client.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCTRF506 Manage sports turf renovation programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared a renovation management program for at least three sports turf playing surfaces from the following list:

- a single hole for a golf course with tees and surrounds, rough, fairways and green
- a bowling green
- a cricket ground wicket surface and outfield
- a ball sport surface selected from one of Australian Rules football, soccer or rugby
- a horse race track
- a sport turf surface selected from one of lawn tennis, lacrosse, hockey, polo or croquet.

There must also be evidence that the individual has:

- inspected and assessed turf surface for condition
- assessed soil test results and determined corrective action
- assessed water quality tests and determined effect on turf growth
- assessed grass sward cover and identified species and over-sowing requirements
- reviewed historical records and practices and determined a turf renovation technique for current conditions and desired outcomes
- identified work health, safety and environmental hazards, assessed risks and identified control measures to include in plan
- documented a turf renovation plan and schedule of works
- produced and reviewed a cost budget for the project
- determined suitability and operational status of machinery and equipment and specified settings and adjustments
- identified and liaised with team and contractor for expected works
- prepared a schedule of works
- calculated materials and ordered goods, services and contractors required for the renovation
- prepared a post-renovation turf recovery maintenance program

- updated records and reported outcomes for renovation program
- reviewed program outcomes against plan, and recommended future adjustments.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- comparative health, safety and environmental implications of renovation activities, turf and soil treatments and waste disposal
- enterprise and industry standards for turf surface appearance and quality
- field measurement techniques, including infiltration rate, organic fines, hardness, traction, and surface smoothness
- impact of environment on turf recovery, including:
 - climatic conditions
 - soil temperature
 - moisture
- turf grass species and cultivars, including:
 - planting
 - care
 - renovation scheduling
- requirements of the turf's intended use, including intensity and scheduling
- soil physical and chemical properties for imported and existing soils
- specialist turf renovation principles and practices, including:
 - aeration
 - thatch removal
 - topdressing and dusting
 - over-sowing
 - application of soil ameliorants
 - removal of over-sown species
 - turf nutrition and plant growth regulators
- scheduling, program management and time management tools and Gantt charts
- developing and managing budgets, including:
 - direct costs
 - indirect costs
 - fixed or variable costs
- enterprise, national and international industry standards for sports turf surface appearance, performance and quality
- safe work practices and procedures applicable to renovation planned activities, including:
 - materials handling
 - equipment and operation
 - public and turf user safety

- purpose and methods of field measurement tests, including:
 - infiltration rate
 - organic fines
 - hardness
 - traction
 - surface smoothness
 - turf sward height
- identification and cultural requirements of turf grass species and cultivars, including:
 - planting
 - propagating
 - care and maintenance
 - renovation scheduling requirements
- specialist turf renovation practices to achieve high performance turf, including:
 - dethatching
 - topdressing
 - aerating
 - de-compaction
 - over-sowing
 - fertilising and soil conditioning
 - adjusting drainage and water holding
- establishing and estimating resource and material requirements for turf grass renovation programs, including:
 - financial and budgetary considerations
 - consumables
 - labour and contractor requirements and scheduling
- tools, machinery and equipment used in turf renovation, including:
 - log books and operation status
 - adjustments and settings of tynes and blades
 - types of equipment and their purpose
 - effective and safe use of tools and machinery
 - influences on the selection of tools, machinery and safety equipment
 - common pre-operational and post-operational checks of equipment
- managing techniques and working with a work team and contractors, including:
 - communicating with work team
 - organising and directing labour
 - dealing with performance issues
- preparation of renovation plans, recording and reporting renovation activities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a sports turf facility or an environment that accurately represents workplace conditions with access to at least three sites suitable for sports turf surface renovation stipulated in the performance evidence
- resources, equipment and materials:
 - computer software for documenting plans and preparing schedules
 - reports, results and testing equipment for soil and plant tissue
- specifications:
 - workplace procedures and site plans for sports turf renovation
 - local, national and international standards for sports turf grass conditions
- relationships:
 - work team and contractor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF507 Develop sports turf management programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop short-term, annual and ongoing sports turf establishment, management and maintenance programs, for the extension, redesign, upgrade and renovation of sports turf surfaces using an organisation's available resources.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCTRF507 Develop sports turf management programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed a management program spanning a 12-month period for at least two sports turf surfaces from the following:

- a single hole for a golf course, including tee and surrounds, rough, fairways and green
- a bowling green
- a cricket surface, including the wicket surface and outfield
- a ball sport selected from one of Australian Rules football, soccer or rugby
- a horse race track
- a sport turf surface selected from one of lawn tennis, lacrosse, hockey, polo or croquet.

There must also be evidence that the individual has:

- liaised with key stakeholders and investigated technical requirements for managing a sports turf site
- determined the scope and objectives of management program and documented in a project brief
- researched turf culture, management principles and practices, health and safety and environmental implications of managing sports turf surface
- assessed availability and quality of resources to inform maintenance program design
- assessed the condition, characteristics and usage of existing turf surface to inform maintenance program design
- developed specifications and schedule of works using a Gantt chart
- developed a list of materials and financial budget for turf management program
- communicated turf management program to key stakeholders according to workplace procedures, including:
 - a digital written report
 - a presentation to a group of stakeholders
- reviewed and documented in an electronic format at least one turf management program against actual works

- communicated planned changes and works achieved by the management program with a verbal presentation of at least 15 minutes' duration
- recorded and reported activities and changes for maintenance program according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- management programs structure, design and development
- project management and scheduling, including:
 - project management tools and software
 - creating and using Gantt charts
- maintaining quality of sports turf, including:
 - impact of type of sport and frequency of usage on turf quality
 - turf varieties and characteristics
 - users' expectations
 - sport regulatory requirements
- cultural requirements of sports turf surfaces, including:
 - turf grass species, varieties and cultivars
 - soil type, characteristics, tests and interpreting results
 - nutritional requirements for different stages of turf development
 - impact of climate on turf grass species and varieties
 - sports turf maintenance requirements and techniques
 - turf establishment techniques and requirements
- sources of water supply and measures of quality, including:
 - testing and interpreting results
 - impact of water quality on soils and turf
 - advantages and disadvantages of sources of water
 - volume of water, irrigation performance and water budgets
- key stakeholders and their importance in developing a sports turf management plan, including:
 - clients and their needs
 - senior management and relevant authorisations
 - employees and their role in implementation
 - contractors and their role in implementation
- workplace health, safety and environmental constraints on management programs, including:
 - legislative requirements
 - storing and use of agricultural chemicals
 - accessing, storing and using hazardous materials

- safety procedures and practices
- strategies to communicate management programs to key stakeholders, including:
 - documentation
 - oral presentations
 - visual presentations
 - electronic presentations
- assets required for sports turf maintenance, including:
 - quality water supply
 - equipment and machinery
 - suitably trained human resources
 - materials and consumables
- record keeping and reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions
 - access to two sporting venues specified in the performance evidence
- resources, equipment and materials:
 - internet access and computers for researching and documenting a sports turf management program
- specifications:
 - workplace procedures relevant to the development of sports turf management programs
 - sports turf industry standards
 - rules, regulations and standards for two of the sports specified in the performance evidence
- relationships:
 - stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCTRF508 Manage sports turf facility assets

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to manage physical resources, infrastructure and assets for sports turf playing surfaces at sporting venues and clubs.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a sports turf facility asset database	1.1 Identify sports turf physical resources and infrastructure 1.2 Categorise sports turf physical resources and infrastructure according to type and maintenance requirement 1.3 Record resources and infrastructure into sports turf facility assets

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	register according to workplace data management procedures
2. Determine maintenance requirements for turf facility assets	<p>2.1 Establish program maintenance requirements and resources for turf facility assets according to workplace and manufacturer specifications</p> <p>2.2 Establish program maintenance schedules for equipment and machinery assets according to manufacturer specifications</p> <p>2.3 Purchase and store resources and consumables required for maintenance of turf facility assets</p>
3. Schedule and monitor program of maintenance works	<p>3.1 Establish the timing of maintenance activities for workplace facility assets according to workplace and manufacturer specifications</p> <p>3.2 Document a maintenance schedule for turf facility assets</p> <p>3.3 Develop, implement and monitor record keeping procedures for maintenance of turf facility assets</p> <p>3.4 Communicate maintenance activities, schedules and recording procedures to stakeholders</p> <p>3.5 Review safe work procedures associated with maintenance of turf facility assets</p> <p>3.6 Ensure unserviceable sports turf facility assets are recorded on replacement schedule</p>
4. Review maintenance works	<p>4.1 Review maintenance schedules and update maintenance programs according to workplace timeframes</p> <p>4.2 Assess and report status of turf facility assets and recommend upgrade, replacement or disposal</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret and evaluate manufacturer instructions to identify and synthesise critical information into programs to manage sports turf asset

Skill	Description
Writing	<ul style="list-style-type: none"> Use industry and other specialised terminology when documenting maintenance programs
Numeracy	<ul style="list-style-type: none"> Analyse and synthesise mathematical information from a broad range of materials to develop maintenance schedules and procedures

Assessment Requirements for AHCTRF508 Manage sports turf facility assets

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, managed sports turf facility assets, including:

- identified sports turf facility assets, categorised them into type and maintenance requirements and recorded in workplace asset register or database
- determined maintenance requirements, resources and timing of maintenance and developed a schedule for sports turf facility, equipment and mechanical assets
- developed and implemented maintenance record keeping procedures for sports turf facility assets
- communicated sports turf facility assets maintenance schedule and procedures to stakeholders
- monitored maintenance work and safety procedures for sports turf facility assets
- reviewed and updated replacement programs and schedules
- assessed and reported status of sports turf facility assets, and recommended action when identified as unserviceable.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- management strategies for managing sports turf facility assets and effect on key stakeholders
- typical sports turf facility assets, including:
 - buildings and structures
 - tools, machinery and equipment
 - water supply, irrigation and drainage equipment
 - office equipment and resources

- gardens and surrounds
- fencing
- sporting hardware
- maintenance requirements of sports turf physical resources and infrastructure, including:
 - repairs
 - manufacturer specifications
 - regular service requirements and scheduling
 - standards and specifications
- recording asset management, including:
 - information to be recorded
 - proprietary software
 - paper or electronic databases
- scheduling and programming of sports turf maintenance works, including replacement plans and depreciation
- workplace health and safety procedures for overseeing asset maintenance programs, including:
 - safe operating procedures and practices
 - designating required personal safety equipment
- communication strategies and methods for informing stakeholders of maintenance programs
- procedures for reporting and recording maintenance activities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - access to a sports turf facility or an environment that accurately represents workplace conditions with assets on which to develop a maintenance program
- specifications:
 - workplace procedures and instructions for managing sports turf facility
 - manufacturer maintenance instruction for assets
- relationships:
 - stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWAT201 Set up, operate and maintain water delivery systems for compost

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to set up, operate and maintain water delivery systems for composting.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Water (WAT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to set up a water delivery system	1.1 Confirm details of location 1.2 Select and use hoses, tools and equipment and components 1.3 Identify appropriate water sources on site

Element	Performance criteria
	1.4 Identify workplace health and safety hazards associated with task 1.5 Select and use appropriate personal protective equipment 1.6 Measure and mark out water delivery lines 1.7 Set up water delivery system
2. Operate a water delivery system	2.1 Commence water delivery 2.2 Set water application rate 2.3 Check all pipes, hoses and all joints and confirm they are secure and leak free 2.4 Check and operate pumps
3. Check the efficiency of a water delivery system	3.1 Check the water application rate and distribution 3.2 Inspect water delivery system for operating faults and dry areas 3.3 Look for variations from required rate or settings, leaks, operating faults and dry areas at any stage in process 3.4 Carry out remedial action 3.5 Record the amount of water delivered to location

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWAT201A Set up, operate and maintain water delivery systems for compost.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWAT201 Set up, operate and maintain water delivery systems for compost

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and adopt safe work practices
- interpret site water management plan and site operating plan or map
- observe faults and variations from required settings
- operate pumps
- record water application data
- set out and operate watering systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices compost water delivery systems
- characteristics and operation of joints, hoses, valves and sprinkler components
- components of water delivery system
- methods and techniques of water delivery
- procedures for safe use of equipment, such as powered and hand tools, as used in water delivery system maintenance
- reporting and recording requirements
- standard industry risk-control measures to minimise risk associated with setting up and operating a water delivery system
- workplace health and safety and environmental legislation and enterprise requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWAT302 Monitor and operate water treatment processes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored and operated water treatment processes on at least two occasions, and has:

- applied workplace health and safety requirements applicable to monitoring and operating water treatment processes
- applied food safety codes, environmental and biosecurity practices and workplace procedures applicable to monitoring and operating water treatment processes
- used water sampling and testing techniques
- recorded and reported equipment and water treatment processes according to workplace procedures
- prepared and applied chemicals
- identified and reported process faults
- minimised environmental impacts of water treatment processes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace health and safety requirements applicable to monitoring and operating water treatment processes
- food safety codes, environmental and biosecurity practices and workplace procedures applicable to monitoring and operating water treatment processes
- workplace recording and reporting procedures
- the principles and practices for monitoring and operating water treatment processes, including:
 - chemical dosing processes
 - environmental impacts of irrigation using water from any ground or underground source

- environmental issues associated with water treatment
- hazardous materials handling
- water quality monitoring methods and techniques
- water treatment and water filtration techniques.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - water treatment tools, equipment and machinery
 - water treatment testing equipment and chemicals
 - personal protective equipment applicable to monitoring and operating water treatment processes
 - principles and practices for monitoring and operating water treatment processes
- specifications:
 - workplace health and safety requirements applicable to monitoring and operating water treatment processes
 - food safety codes, environmental and biosecurity practices and workplace procedures applicable to monitoring and operating water treatment processes
 - workplace recording and reporting procedures
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWAT503 Manage water systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to determine the feasibility of using or up-grading an irrigation system, install or maintain an irrigation or drainage system, monitor and assess water inputs, irrigation system and plant response and evaluate irrigation system performance.

The unit applies to individuals who apply specialised skills and knowledge to the management of water systems, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Water (WAT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess soil and water resources for crop and plant type	1.1 Identify suitability of soil and water resources for irrigation 1.2 Determine range of crops and plant types that could be grown in soil utilising available water resources

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Select crop and/or plant type based on assessment
2. Determine the feasibility of using or up-grading irrigation system	<p>2.1 Assess water resources and drainage implications to determine suitability for irrigation</p> <p>2.2 Determine water quality and treatment requirements</p> <p>2.3 Determine water requirements and most suitable application systems for each crop and plant type and area, and for each soil type</p> <p>2.4 Determine other water requirements, such as climate control</p> <p>2.5 Determine drainage requirements in relation to each soil and crop and plant type and type of irrigation system</p> <p>2.6 Assess performance data, audit reports, environmental and workplace health and safety data for existing systems</p> <p>2.7 Obtain information from irrigation specialists on all relevant aspects of irrigation design</p> <p>2.8 Assess and cost available irrigation system types and components and make a decision on the particular system to be used or upgrades to existing system</p>
3. Install or maintain an irrigation or drainage system	<p>3.1 Determine and acquire materials and equipment making up the system</p> <p>3.2 Install irrigation system using advice, as necessary, from irrigation specialists</p> <p>3.3 Check that irrigation and drainage systems are supervised to ensure there are no leaks or blockages</p> <p>3.4 Confirm that the water is being evenly distributed and that the drainage is effective and the system is in good working order</p>
4. Assess the need for water inputs	<p>4.1 Assess the need for water inputs at critical growth stages</p> <p>4.2 Consider crop value and induce appropriate water regimes including frost protection where appropriate</p> <p>4.3 Utilise soil moisture monitoring data</p> <p>4.4 Consider weather forecast, seasonal weather outlook, water allocations and water quality</p> <p>4.5 Consider energy costs in water application timing</p>
5. Monitor irrigation system and plant	<p>5.1 Identify volume and quality of water flow</p> <p>5.2 Plan scheduled irrigation system maintenance work to ensure</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
response	minimised disruption to watering activities 5.3 Monitor plant response to irrigation 5.4 Modify irrigation scheduling to minimise water wastage and maximise outcomes 5.5 Record irrigation system water usage according to workplace procedures
6. Evaluate irrigation system performance	6.1 Determine and value plant growth, crop quality and yield from irrigation 6.2 Calculate the cost of irrigation 6.3 Identify and minimise poor water usage practices 6.4 Determine the cost benefit of irrigation and compare with alternative systems and approaches

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding irrigation system design Identify and interpret workplace procedures regarding irrigation system use
Oral communication	<ul style="list-style-type: none"> Initiate discussions with suppliers, using clear language to communicate irrigation requirements
Numeracy	<ul style="list-style-type: none"> Access and analyse performance data, audit reports, environmental and workplace health and safety data for existing irrigation systems Calculate the cost of irrigation and determine the cost benefit of irrigation and alternative systems and approaches
Navigate the world of work	<ul style="list-style-type: none"> Identify and describe own workplace requirements associated with own role and area of responsibility

Assessment Requirements for AHCWAT503 Manage water systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has managed water systems on at least one occasion and has:

- assessed soil and water resources
- analysed performance and audit data
- assessed environmental and workplace health and safety data
- monitored and assessed water inputs
- monitored and evaluated irrigation system performance
- strategically managed irrigated production systems, including:
 - considered energy costs
 - minimised water wastage
 - prevented poor water usage practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of water systems management, including:
 - cost or benefit analysis
 - workplace policies and procedures
 - environmental impacts of irrigation, using water from any ground or underground source
 - plant requirements
 - natural water system retention and storage
 - soil moisture storage
 - use of yeomans keyline or swales
 - assessing water inputs

- strategies for reducing water evaporation and transpiration
- water quality maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - performance data, audit reports, environmental and workplace health and safety data for existing systems
 - alternative system information
- specifications:
 - irrigation system design information
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCWAT504 Design water treatment systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify design requirements, determine specifications, pumping and power system requirements, capital expense and operating expense budgets, and design water treatment systems.

The unit applies to individuals who apply specialised skills and knowledge to the design of water treatment systems, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Water (WAT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine design requirements	1.1 Determine the quality of water to be treated and level of treatment required to meet water treatment system quality requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Develop construction specifications that define the work required to treat water</p> <p>1.3 Identify and protect environmentally sensitive areas according to local, state and federal legislation and regulations</p> <p>1.4 Document design calculations and requirements</p>
2. Determine pumping and power system requirements	<p>2.1 Identify and select pumps that can treat water efficiently and at the flow and the pressure required to operate the distribution system</p> <p>2.2 Select pump and pump motor combinations that are efficient, reliable, functional, serviceable and flexible for the intended application</p> <p>2.3 Determine energy requirements and layout of electricity lines, and check with local authorities</p> <p>2.4 Optimise the relationship between capital and operational costs, and compare energy sources</p> <p>2.5 Select structures, valves and accessories and integrate into a functional system that can be monitored and maintained</p> <p>2.6 Document performance indicators, design calculations and decisions</p> <p>2.7 Design construction specifications that define the work required to make a suitable pumping and power system</p>
3. Design a water treatment system	<p>3.1 Evaluate treatment systems and design with respect to a range of key variables</p> <p>3.2 Size pipes, valves and fittings according to design system specifications so that capital cost is balanced against operation costs over the anticipated system life</p> <p>3.3 Calculate and document flows, water levels and pressures so that they are within the acceptable tolerances for optimum performance</p> <p>3.4 Confirm that flows, water levels and pressures are achievable by the pumps operating at optimum efficiency</p> <p>3.5 Include mechanisms for controlling and adjusting pressure in system design</p>
4. Determine capital expense budget	<p>4.1 Document design calculations and decisions, and communicate relevant information through plans, specifications and manuals</p> <p>4.2 Determine and document materials required from plans and</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	specifications 4.3 Estimate labour requirements based upon documented work schedule with reasonable allowance for variances in work schedules 4.4 Base costing attributed to each component on quoted information from suppliers, or sound analysis of individual elements 4.5 Document capital expense budget 4.6 Confirm design and capital expense budget output with an appropriately experienced and qualified person
5. Determine operating expense budget	5.1 Calculate an operating expense budget that includes all expenses applicable to the completed system 5.2 Document operating expense budget

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding design requirements for water treatment system, including environmentally sensitive areas
Writing	<ul style="list-style-type: none"> Develop and document construction specifications, performance indicators and design calculations
Oral communication	<ul style="list-style-type: none"> Initiate discussions with local authorities, using clear language to communicate energy requirements, check layout of electricity lines and confirm power supply design specifications Use clear communications with appropriately experienced and qualified person to discuss design output and capital expense budget outputs
Numeracy	<ul style="list-style-type: none"> Calculate water flows, levels and pressures Calculate and document capital and operating expense budgets

Assessment Requirements for AHCWAT504 Design water treatment systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed a water treatment system on at least one occasion, and has:

- identified system design requirements
- documented construction specifications, performance indicators and design calculations
- collected and analysed information for the design of a water treatment system
- identified adverse environmental impacts of water treatment activities, and documented appropriate remedial actions
- calculated and documented capital and operating expense budgets
- developed water treatment system specifications.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of water treatment system design, including:
 - automatic control and monitoring systems
 - budgeting, contractual development and obligations
 - design processes
 - developments in water treatment technology
 - environmental impacts of water treatment
 - environmental protection agency regulations
 - waste management and environmental issues
- workplace health and safety and environmental protection legislation and regulations, codes of practice and workplace policies and procedures relevant to water treatment system design
- water treatment systems, including pumping and power systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - water treatment system site
 - site information and data relevant to water treatment system design
- specifications:
 - local, state and federal workplace health and safety and environmental protection legislation, regulations, codes of practice and workplace requirements applicable to water treatment system design
- relationships:
 - local authorities, appropriately experienced and qualified person
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWHS502 Manage work health and safety processes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop health and safety policies and procedures that demonstrate enterprise commitment to health and safety in the workplace.

This unit applies to individuals who develop and implement systems to manage health and safety in the workplace. In this role, individuals analyse information and exercise judgement to complete a range of advanced, skilled activities.

All work must be conducted in accordance with relevant legislative requirements, Codes of Practice, workplace procedures and safe work practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work health and safety (WHS)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop health and safety policies and procedures	1.1 Develop a health and safety management plan and program for the enterprise in consultation with designated personnel and management 1.2 Clearly define and allocate health and safety responsibilities and duties and include them in job descriptions and duty statements for all

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	relevant positions 1.3 Identify, seek and allocate financial and human resources for implementing health and safety policies and procedures 1.4 Provide and explain information on the health and safety system, for the area of responsibility, in a form which is readily understood by employees
2. Establish and maintain processes to ensure the participation of all employees in the application of health and safety	2.1 Establish and maintain consultation processes with employees and their representatives 2.2 Deal with issues raised through participation and consultation and resolve them promptly and effectively 2.3 Provide information about the outcomes of participation and consultation in a manner readily accessible to employees 2.4 Provide information on injury management and return to work programs
3. Establish and maintain procedures for managing work health and safety risks	3.1 Identify existing and potential hazards and risks in accordance with trends identified in health and safety records 3.2 Integrate the risk management process for the ongoing identification of hazards, risk assessment, control and review of risks within systems of work and procedures 3.3 Monitor activities to ensure that the procedure is effectively adopted throughout areas of responsibility 3.4 Address work health and safety hazards and risks at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards and risks are not created 3.5 Investigate, record and report incident and dangerous occurrences in accordance with legal requirements and enterprise procedures
4. Plan and manage enterprise procedures for dealing with potential emergency events	4.1 Identify, with accuracy, potential emergencies posing risks to the health and safety of workers and the public 4.2 Develop plans and procedures, which control the risks associated with potential emergency events, in consultation with relevant emergency services
5. Establish and maintain a health and safety induction and training program	5.1 Develop a health and safety induction program to meet the health and safety needs of new employees and visitors to the workplace 5.2 Develop a health and safety training program as part of

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	supervisors' and employees' general training
6. Establish and maintain a system for health and safety records	6.1 Establish and monitor a system for keeping health and safety records to allow identification of patterns of occupational injury and disease in the enterprise 6.2 Regularly update records and use them to evaluate the effectiveness of the enterprise health and safety system
7. Evaluate the enterprise health and safety system	7.1 Assess the effectiveness of the health and safety system according to enterprise aims with respect to health and safety 7.2 Develop and implement improvements to the health and safety system to ensure more effective achievement of enterprise aims

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Develop policies and procedures that provide clear and succinct guidance for employees
Numeracy	<ul style="list-style-type: none"> Create graphs utilising health and safety data to summarise relevant activity

Assessment Requirements for AHCWHS502 Manage work health and safety processes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has managed work health and safety processes for at least one enterprise, including:

- developed health and safety policies and procedures that demonstrate enterprise commitment to health and safety
- established and maintained arrangements to ensure the involvement of all employees in the management of health and safety in the workplace
- established and maintained procedures for identifying hazards, assessing risks, controlling risks, and dealing with emergency events
- established and maintained a health and safety induction and training program
- established and maintained a system for health and safety records
- analysed and recorded health and safety data
- evaluated the enterprise health and safety system and related policies, procedures and programs.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- data and documentation for industry injury statistics
- legislated employer and employee health and safety responsibilities
- significant hazards and areas of risk in the workplace
- all relevant health and safety legislation and codes of practice consistent with the hierarchy of health and safety risk control and its implementation for hazards in land-based industries
- requirements of workplace discrimination, harassment and bullying legislation
- risk control measures
- the hierarchy of risk controls
- systems to manage health and safety data and procedures

- public safety issues
- local emergency response organisations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to health and safety data for an enterprise
- specifications:
 - health and safety legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK203 Operate in isolated and remote situations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, prepare for and work safely in isolated and remote situations.

The skills and knowledge described in this unit underpin a broad range of activities applicable to job roles throughout the horse industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for operating in remote environments	1.1 Collate and record information relating to the operating environment and location

Element	Performance criteria
	1.2 Establish detailed operating and travel plans, including a disaster plan and fallback position requirements in consultation with supervising staff 1.3 Notify the appropriate authorities of the action plans and time schedules 1.4 Identify and source relevant maps 1.5 Assess factors that may impact on public and personal health and safety and the environment, for consideration in preparations
2. Prepare for operating in remote environments	2.1 Prepare personal needs for activities or travel in remote areas 2.2 Prepare transportation and equipment for use in prescribed work location or along prescribed routes 2.3 Obtain and study relevant maps prior to departure 2.4 Record planned activities and itinerary prior to departure 2.5 Identify weather patterns and indicators
3. Prepare for emergency situations	3.1 Confirm that provisioning meets expected operational and possible emergency needs 3.2 Use initial planning and regular monitoring to ensure structured usage of available provisions and resources 3.3 Structure an operating plan to include training in remote area survival techniques prior to operating in remote situations 3.4 Include emergency management procedures as an integral part of operating plans and enterprise policy
4. Operate in remote environment	4.1 Complete activities according to instructions and established time schedules 4.2 Use bushcraft skills to modify the living environment where necessary 4.3 Carry out all activities in remote situations in accordance with prescribed procedures 4.4 Handle emergency situations in accordance with prescribed procedures 4.5 Follow established reporting procedures on completion of planned activities and on return to base

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK203A Operate in isolated and remote situations

Assessment Requirements for AHCWRK203 Operate in isolated and remote situations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for operating in remote environments
- prepare for emergency situations
- source and interpret maps of the area
- operate in remote environments
- implement workplace procedures to notify location, activities and travel
- prepare provisions to cover essential and emergency needs
- preparing communication equipment
- use bushcraft skills to modify the living environment and reduce the risk of mishap
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- map reading and navigation skills including direction finding (including GPS, use of compass, stars or watch)
- local topography, nearby inhabitants and locations within that area
- survival techniques and human needs relating to survival situations
- clothing requirements for sun or heat protection
- first aid procedures for common injuries
- bush craft including making a fire, cooking and wild food gathering
- water supplies, sources and generation methods
- emergency vehicle and mechanical equipment repair

- the operation of communication equipment (including field communications by two-way, satellite telephony or HF radio), and distress signalling including use of signalling mirrors
- weather patterns and indicators
- work health and safety in the context of work in isolated and remote situations
- environmental impacts of work in isolated and remote situations
- rope skills including useful knots including: reef, clove hitch, truckie's hitch, and bowline; simple lashings and tying down of loads.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK503 Prepare reports

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare comprehensive reports.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research material	1.1 Identify and describe the topic of the report 1.2 Determine the sources of information 1.3 Collect and organise information appropriate to the task
2. Evaluate information	2.1 Confirm that information collected is relevant and sufficient to

Element	Performance criteria
	provide a full report 2.2 Seek clarification where information is unclear or difficult to understand and seek assistance if required 2.3 Obtain additional information where available information is inadequate 2.4 Assess information for its validity and reliability and organise into a suitable form to aid decision making 2.5 Confirm that conclusions drawn from relevant information are based on reasoned argument and appropriate evidence
3. Produce a document	3.1 Use language that is applicable to the task and audience 3.2 Organise the document logically, and confirm it is structured and balanced according to purpose, audience and context 3.3 Format the document 3.4 Confirm that conclusions reached reflect the stated objectives of the report 3.5 Complete preparation within the specified timeframe 3.6 Follow enterprise and work health and safety requirements and procedures
4. Deliver a verbal presentation	4.1 Confirm language is applicable to the task and audience 4.2 Use concise and well presented support materials are used in oral presentations 4.3 Allocate sufficient time to allow clear presentation of the desired topic 4.4 Deliver verbal presentation is delivered within a specified time

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the purpose of the report and verify it with the client
- conduct research and compile information
- draw conclusions from research supported by reasoned argument and supporting information
- make recommendations if required and reference to information and conclusions
- produce a correctly formatted report document that uses appropriate language and terminology, is arranged in a logical order, and provides details on information sources and consultation
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- information and research sources
- report structure and presentation
- public presentation techniques and approaches.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK505 Manage trial and research material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a trial and research material as part of a designated research project.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify scope and extent of work	1.1 Identify trial and research hypothesis and parameters as required by researchers 1.2 Plan the trial or research to meet research objectives 1.3 Assess the data relevant to managing trial or research materials according to research parameters

Element	Performance criteria
	1.4 Assess data relevant to managing trial or research materials 1.5 Identify work health and safety, assess risks and develop controls and cost and document in the survey design 1.6 Identify and cost tools, equipment and machinery required for managing trial or research materials and confirm availability with suppliers, contractors and appropriate personnel 1.7 Determine research design according to the trial or research plan
2. Oversee management of trial/research materials	2.1 Prepare, maintain and monitor trial or research in line with project parameters 2.2 Conduct field work to verify and collect data as required by the trial or research design and research parameters 2.3 Monitor work activities for accuracy, validity and compliance to the parameters of the trial or research design 2.4 Undertake staged data collection as required by the trial or research design, scheduling and access requirements 2.5 Record monitoring and data
3. Prepare reports on work complete	3.1 Record collected data 3.2 Analyse data statistically to determine significance of research results 3.3 Accept or reject hypothesis based on data collected 3.4 Produce reports which conform to the structure and content required by the researcher

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK505A Manage trial and/or research material.

AHCWRK512 Plan, implement and review a quality assurance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to determine workplace quality assurance objectives and plan, implement and review a quality assurance program.

The unit applies to individuals who apply specialised skills and knowledge to the planning, implementing and reviewing of a quality assurance program, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine quality assurance objectives for the workplace	1.1 Assess future market requirements for quality assured products 1.2 Determine premiums for quality assurance products 1.3 Assess strategic benefits of a quality assurance program

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Plan the quality assurance program and develop implementation strategies	2.1 Define product quality standards 2.2 Audit current status of products and operations 2.3 Evaluate and cost industry quality assurance programs 2.4 Select quality assurance program based on a cost benefit analysis 2.5 Document required processes and practices in the quality assurance program manual and prepare an implementation plan
3. Implement the quality assurance program	3.1 Document instructions defining task and process requirements 3.2 Implement contractor and staff training 3.3 Confirm communication takes account of social, cultural and ethnic backgrounds 3.4 Introduce changes to processes and practices 3.5 Establish processes to monitor and verify product quality 3.6 Introduce recording systems 3.7 Validate operating instructions under conditions to verify their suitability 3.8 Analyse problems and issues and resolve appropriately, promptly and decisively 3.9 Conduct system analysis, hazard analysis and critical control points (HACCP) or related processes
4. Review the quality assurance program	4.1 Establish reporting formats 4.2 Implement mechanisms for gaining feedback information 4.3 Prepare for quality assurance audit

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding operating instructions

Skill	Description
Oral communication	<ul style="list-style-type: none"> Initiate discussions with contractors and work colleagues, using clear language to communicate quality assurance program requirements
Numeracy	<ul style="list-style-type: none"> Calculate and document costs of implemented strategy
Navigate the world of work	<ul style="list-style-type: none"> Identify and describe own workplace requirements associated with own role and area of responsibility Monitor self and others adherence to workplace requirements including safety requirements
Interact with others	<ul style="list-style-type: none"> Use appropriate language and communication skills to disseminate information within work team

Assessment Requirements for AHCWRK512 Plan, implement and review a quality assurance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has planned, implemented and reviewed a quality assurance program on at least one occasion and has:

- determined quality assurance objectives for the workplace
- selected a quality assurance program using a cost benefit analysis
- planned the quality assurance program and developed implementation strategies
- implement the quality assurance program
- maintained required records to support quality assurance
- reviewed the quality assurance program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- market projections and customer requirements
- cost/benefit of quality assurance implementation
- leadership and administrative skills including change management
- human resources induction practices
- organisational objectives
- quality standards
- audit processes
- quality assurance recording procedures
- workplace culture and values
- human resources performance monitoring practices
- system analysis, hazard analysis and critical control points (HACCP) or related processes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
 - operating instructions relevant to quality assurance program
- timeframes:
 - according to the job requirements
- relationships:
 - between managers and staff, contractors and those under the banner of the quality assurance program.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK513 Write and present reports

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to write and present reports, including researching and evaluating information, producing a document and delivering a verbal presentation.

The unit applies to individuals who apply specialised skills and knowledge to the preparation of a report, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research material	1.1 Identify and clarify report topic and objectives with client

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Determine sources of information 1.3 Collect and organise information appropriate to report topic
2. Evaluate information	2.1 Confirm information collected is relevant and sufficient to address report objectives 2.2 Seek clarification and assistance as required where information is unclear or difficult to understand 2.3 Obtain additional information where available information is inadequate 2.4 Assess information for its validity and reliability, and organise into a suitable form to aid decision making 2.5 Confirm that conclusions drawn from relevant information are based on reasoned argument and appropriate evidence
3. Produce a document	3.1 Use industry standard terminology and language that is applicable to the task and audience 3.2 Organise the report logically, and confirm it is structured and balanced according to purpose, audience and context 3.3 Present report in required format 3.4 Confirm that conclusions reached reflect the stated objectives of the report 3.5 Complete preparation within the specified timeframe
4. Deliver a verbal presentation	4.1 Confirm language is applicable to the task and audience 4.2 Use concise and well-presented support materials to support oral presentations 4.3 Allocate sufficient time to allow clear presentation of the desired topic 4.4 Deliver verbal presentation within specified time

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has written and presented a separate report on at least two occasions, and has:

- identified and verified the purpose of the report with the client
- conducted research and compiled information
- drawn conclusions from research supported by reasoned argument and supporting information
- produced a correctly formatted report that uses appropriate language and industry standard terminology, is arranged in a logical order, and provides details on information sources and consultation
- made recommendations if required, and referenced to information and conclusions
- delivered a verbal presentation within a specified time using language applicable to the task and audience.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and research sources that may be used to develop reports
- report and presentation structure
- public presentation techniques and approaches.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the development of a report
- relationships:
 - appropriately experienced and qualified person, client and work colleagues
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK514 Manage trial and research material

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed trial and research material on at least one occasion, and has:

- complied with research and workplace health and safety requirements
- identified the purpose, scope and extent of work
- calculated and documented research costs
- overseen the management of trial and research materials
- collated data and produced report using industry standard terminology.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- research methodologies, planning and design
- workplace health and safety legislation, regulations and workplace procedures relevant to managing trial and research material
- research procedures and best practice techniques
- workplace team management guidelines relevant to managing trial and research material
- data collection and reporting techniques.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- research hypothesis, parameters and objectives
- specifications:
 - workplace health and safety legislation, regulations and workplace procedures applicable to managing trial and research material
- relationships:
 - suppliers, contractors and appropriate personnel
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU202 Handle horses safely

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to identify, safely catch, control and handle calm, consistent and obedient horses educated for the relevant activity. It covers knowledge of potential risks working with and around horses and following industry guidelines and procedures to ensure the welfare and safety of the individual, other workers and the horse.

The unit applies to individuals who have no experience, limited experience or no recent experience working in the relevant horse industry sector. They undertake defined routine activities under supervision and have limited responsibility for their own work. Working environments may include stables, paddocks, yards, tracks, exercise arenas and public areas.

No licensing or certification requirements apply to this unit at the time of publication, except for the racing industry, where requirements vary between states and territories. Users working in the racing industry are advised to contact the relevant Principal Racing Authority for advice on current requirements.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- ACMEQU205 Apply knowledge of horse behaviour.

Unit Sector

Equine (EQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify features of horses	1.1 Distinguish horses by their features, and describe using industry terminology 1.2 Identify common horse behaviour and social traits
2. Safely approach, catch, control and lead horses	2.1 Check and clarify supervisor instructions for tasks requiring involving approaching, catching and leading horse 2.2 Select and correctly fit personal protective equipment (PPE) 2.3 Identify, select and prepare appropriate gear for handling horses safely 2.4 Identify and report to supervisor potential safety risks prior to approaching horse 2.5 Identify horse according to instructions and observe horse body language and behaviour before approaching 2.6 Prepare halter and lead in hand prior to approaching the horse 2.7 Approach calmly and catch horse using safe handling techniques under supervision 2.8 Apply safe control when leading and tying up horse and use safe handling practices around tied-up horses 2.9 Use safe handling procedures around other handlers and horses
3. Load and unload horses under supervision	3.1 Check and clarify supervisor instructions for tasks requiring the loading and unloading of horses 3.2 Identify potential safety risks to handler and horse when loading and unloading horses, and discuss with supervisor 3.3 Select and correctly fit PPE for safe loading and/or unloading of horses 3.4 Select gear and equipment for loading horse and check gear for safety 3.5 Fit gear to horse correctly prior to loading under supervision 3.6 Load horses safely according to instructions under supervision

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Position horse according to transport configuration 3.8 Unload horse safely according to instructions under supervision
4. Control horses in exercise environments	4.1 Check and clarify supervisor instructions for tasks requiring the handling of horses in public areas 4.2 Identify potential safety risks to handler and horse when handling horses in public areas, and discuss with supervisor 4.3 Select and correctly fit PPE for safe handling of horses 4.4 Select gear and equipment, including safety check of gear 4.5 Observe and identify horse body language and behaviour prior to handling in exercise environments 4.6 Use safe control when leading and standing with a horse in a public area under supervision 4.7 Use safe control when leading and standing with a horse confined in a stable or yard

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use active listening and questioning techniques to clarify and confirm supervisor instructions Use industry terminology to describe horses, gear and equipment used for handling horses
Navigate the world of work	<ul style="list-style-type: none"> Follow workplace procedures, including work health and safety and animal welfare requirements, relating to own role and work area Demonstrate a duty of care to self and others when working with horses
Get the work done	<ul style="list-style-type: none"> Assemble resources and follow clear, sequenced instructions for handling horses under supervision

Assessment Requirements for ACMEQU202 Handle horses safely

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual safely handled at least three different calm, consistent and obedient horses educated for the activity being performed including:

- carrying out a basic risk assessment prior to each activity, including observing and identifying horse body language
- communicating clearly with supervisor, including raising safety risks or concerns
- approaching, catching, controlling, leading, standing and tying up horses safely in at least one public space and one confined space, under supervision, including:
 - following work health and safety (WHS) procedures in the context of own work
 - applying safe horse handling techniques according to animal welfare requirements
 - fitting and correctly using horse handling gear and personal protective equipment (PPE)
- loading and unloading horses to a horse transport vehicle under supervision in a calm and humane manner.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common features of a horse, including points, colour, markings, gender, and common breeds
- basic characteristics of common horse behaviour and social traits
- features of horse body language
- communication protocols with supervisor, and procedures within the work environment
- potential hazards and risks when dealing with horses in open and confined spaces
- common types of injuries sustained by horses, handlers and others during handling activities
- safe horse handling zones

- purpose and use of PPE and gear for handling horses
- features of defective equipment and the implications to safety
- quick release knots and methods of securing horses
- types of horse transport and common loading configurations
- difficult situations that may occur when loading and unloading horses and procedures for dealing with difficulties.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions, including open and confined spaces in suitable environments
- resources, equipment and materials:
 - various calm, consistent and obedient horses educated for the activity and assessed as suitable for the experience and skill of the individual
 - appropriate tack for individual, horse and activity
 - horse transport vehicle
 - PPE that is appropriate for activity and correctly fitted for individual
 - other people and horses in the vicinity of the assessment activity
- specifications:
 - work instructions
- relationships with others:
 - supervisor.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU205 Apply knowledge of horse behaviour

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop basic knowledge of horse behaviour, read horse body language and minimise risk to self and others when interacting with horses.

The unit applies to individuals who are new or inexperienced in handling, working with and/or riding horses. Individuals at this level work under supervision.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. As requirements vary between industry sectors and state/territory jurisdictions, users must check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

Assessment Requirements for ACMEQU205 Apply knowledge of horse behaviour

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has:

- observed and interpreted horse behaviour and body language of at least three different horses on separate occasions
- identified hazards and determined how to minimise risk to self and others when interacting with horses in at least three different workplace areas, environments or scenarios.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features of horse instinct and behaviour, including:
 - social organisation, need for space and companions
 - attachment, separation anxiety
 - flight and fear responses, arousal
- features of horse senses, including vision, touch, smell, hearing and vocalisation
- how to read horse body language, including posture and body position, facial features, ears, legs and tail
- how to read horse body language to identify:
 - flight response
 - threatened or defensive behaviour
 - stress, agitation or unsettled behaviour
- situations where horse behaviour may cause harm to handlers or other horses, including:
 - approaching from a horse's blind spot
 - around other horses

- leading through gateways or restricted spaces
- safe handling zones when interacting with horses
- basic features of how horses learn:
 - cues
 - repetition and reward
 - exposure to new situations and activities
- basic handling and/or riding cues that assist in the control of horses
- types of rewards used for horses, including pressure release, food, scratch and rub, and rest
- potential hazards and risks associated with interacting with horses
- strategies to minimise and control common risks associated with interacting with horses.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a safe workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - opportunities to observe and interpret live horses displaying different behavioural states and body language in different environments.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU206 Perform horse riding skills at walk, trot and canter

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to control a horse under saddle that is suitably educated for a beginner rider. It focuses on walking, trotting and cantering calm, obedient and consistent horses that are suitable for the level of rider experience, during controlled, supervised horse riding activities.

It covers knowledge of potential risks when working with and around horses, and the application of industry guidelines and procedures to ensure the welfare and safety of the individual, other participants and horses.

The unit applies to individuals who have limited or no horse riding experience, and who are developing skills needed to ride horses for work tasks. They undertake defined routine activities under supervision with limited responsibility for their own work. Working environments may include exercise yards and fenced horse riding areas or arenas.

No licensing, legislative or certification requirements apply to this unit at the time of publication, except for the racing industry, where licensing or registration varies between states and territories. Users working in the racing industry are advised to contact the relevant Principal Racing Authority for advice on current requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite units of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
--------------------	--------------------------

ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for horse riding activity	<p>1.1 Discuss current skill level, riding skill development goals and horse suitability with riding instructor</p> <p>1.2 Identify potential hazards and risks associated with the specific location, environment and horse riding activity, and apply control measures as directed</p> <p>1.3 Select and correctly fit personal protective equipment (PPE) required for preparing and riding the horse according to WHS requirements</p> <p>1.4 Catch, groom and tack-up assigned horse as directed using tack appropriate for rider, horse and discipline</p> <p>1.5 Present horse to instructor appropriately tacked up for riding for gear check prior to mounting</p>
2. Demonstrate controlled riding skills	<p>2.1 Mount horse in a safe and balanced manner as instructed</p> <p>2.2 Ride horse through gaits in a balanced and controlled manner</p> <p>2.3 Use recognised aids including legs, weight, hands and voice to control movement, speed and direction of horse at halt, walk, trot and canter</p> <p>2.4 Cue horse through a range of movements and direction, maintaining control of horse</p> <p>2.5 Control horse under saddle among other horse and rider combinations, maintaining safe group riding practices while performing a variety of required movements</p> <p>2.6 Negotiate potential hazards appropriately to minimise risks</p> <p>2.7 Dismount safely and lead horse in a controlled manner</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
3. Complete and report post-riding activities	3.1 Perform post-riding cool down of horse as directed 3.2 Remove tack safely and check condition 3.3 Report to riding instructor on condition of gear and horse post-exercise 3.4 Discuss with riding instructor, using objective and positive language, personal performance and goals for future riding skill development

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Active listening and questioning to clarify and confirm supervisor instructions Use industry standard terminology to describe horse riding-related activities
Learning	<ul style="list-style-type: none"> Seek, reflect and respond to feedback from supervisor to improve own performance
Navigate the world of work	<ul style="list-style-type: none"> Follow workplace procedures, including WHS and animal welfare requirements, relating to own role and work area Demonstrate a duty of care to self and others when working with horses
Get the work done	<ul style="list-style-type: none"> Assemble resources and follow clear, sequenced instructions to ride horses at walk, trot and canter

Assessment Requirements for ACMEQU206 Perform horse riding skills at walk, trot and canter

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual performed horse riding skills at walk, trot and canter, on at least two different horses assessed as suitable for rider skills and experience. The individual must have ridden each horse on at least three different occasions, with and without other horses and riders in the immediate vicinity, during which the individual has:

- discussed with instructor current skill level and suitability of chosen horse prior to riding
- used and correctly fitted personal protective equipment (PPE)
- fitted gear and equipment for nominated horses, including:
 - saddle
 - saddle cloth
 - bridle
 - accessory gear
- mounted horse using a stirrup mount, mounting block, leg-up assisted mount
- controlled horse under saddle at all times in the following tasks:
 - demonstrating an effective riding position at walk, trot (or jog) and canter (or lope) according to chosen discipline
 - using hand, seat and leg aids according to discipline
 - using transitions or increasing and decreasing speed within a gait according to chosen discipline
 - following arena figures of circles, straight and diagonal lines and changes of direction
 - cantering for a continuous distance of a minimum of 200 metres
- dismounted using a stirrup dismount and a vault dismount
- dealt with risks associated with riding horses around others
- accepted and applied feedback from riding instructor
- reported progress and discussed future personal riding skills needs with riding instructor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic process for assessing horse suitability and matching to own skills
- purpose and use of different items of gear, including accessory tack and equipment and personal protective equipment (PPE)
- purpose of appropriate aids to communicate with a horse
- safe group riding techniques
- safe horse handling techniques
- key animal welfare principles and practices for handling horses
- basic work health and safety (WHS) risk assessment and control principles relating to interacting with horses, riding in an arena and with others
- how to address common undesirable horse behaviours including:
 - travelling too fast
 - reefing and pulling
 - jogging sideways
 - running backwards
- risk factors that influence riding horse behaviour, including:
 - other horses
 - vehicles, fences and equipment
 - other people or animals
 - wind, noise and environmental hazards
 - riding with others
- factors that influence horse ability to respond to rider position and application of the natural and artificial aids.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - confined arena in a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - various calm, consistent and obedient horses assessed as suitable for the experience and skill of the individual
 - other riders
 - appropriate tack for walk, trot and canter riding activities suitable for horse, rider and discipline
 - correctly fitted PPE for the individual, including riding boots, safety vest and Australian standard or equivalent compliant helmet.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

The following specific assessor requirements apply to this unit. The assessor must:

- hold a current, recognised qualification for instructing or coaching horse riding and handling skills (refer to *User Guide* for details), and
- have three years of experience organising groups and responding to different types of riders and horses in order to prevent incidents that could lead to injury of rider or horse.

ACMGAS305 Rescue animals and apply basic first aid

Modification History

Release	Comments
Release 2	This version released with ACM Animal Care and Management Training Package Version 2.0.
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to rescue and restrain animals, and to provide basic first aid.

The unit applies to individuals working as animal keepers and carers, where it may be necessary to identify where assistance is required in the rescue of animals and the management of animal stress and injuries. These individuals work under broad supervision and use discretion and judgement in the selection and use of available resources. Work routines must meet industry standards and compliance requirements for ethical handling and welfare of animals, work health and safety, and biosecurity appropriate to the work role.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess the situation and plan response	1.1 Assess risk posed to self, others and animals 1.2 Evaluate options for assisting animals, and implement procedures with reference to workplace protocols and regulations 1.3 Identify animals and select appropriate equipment for the rescue 1.4 Use personal protective equipment (PPE) at all times when handling animals, and use safe work practices according to WHS requirements
2. Capture and protect animal	2.1 Provide basic animal care to minimise stress to animals 2.2 Catch animal and handle safely and humanely to minimise pain and potential injuries 2.3 Reassure animal in a caring manner and make comfortable using available resources 2.4 Assess physical condition and vital signs of the animal
3. Provide first aid assistance	3.1 Provide basic first aid according to established animal first aid procedures 3.2 Seek first aid assistance from others as appropriate and required 3.3 Seek advice and assistance from supervisor or appropriate personnel in respect to future options for animal 3.4 Record treatment and any additional information on the animal according to legislative and organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately record events of the situation requiring first aid

Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual, on two different animals, has:

- planned and rescued according to WHS requirements
- applied basic first aid and care
- gathered information and accurately recorded and maintained records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the animal emergency network, including animal welfare bodies and support facilities
- animal first aid techniques
- examination techniques for health status
- first aid casualty management principles
- methods used to capture, restrain and examine animals, including equipment commonly used
- methods used to identify animals
- personal protective clothing and equipment and when and how it should be used
- safe animal handling techniques and procedures
- organisation policies and procedures, including WHS and emergency procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live or simulated animals for capture
 - PPE for handling animals
 - first aid equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for ACMGAS308 Communicate effectively with clients and team members

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- communicated effectively on a minimum of three different occasions, including each of the following:
 - interacting appropriately with clients in writing using digital media
 - interacting appropriately with a client or industry representative by telephone
 - actively participating in a team meeting.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- models of effective communication across a range of modes, including written, verbal, electronic and digital
- the role of non-verbal communication
- effective communication principles for working in a team
- conflict resolution techniques
- social media platforms used for business
- ways to show empathy and support those in distress
- appropriate industry language and terminology
- communication systems, procedures and technology commonly used in workplaces
- confidentiality and privacy legislation, regulations and protocols.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - communication equipment and resources appropriate to work undertaken
- specifications:
 - access to organisational policies and procedures
- relationships (internal and/or external):
 - interactions with team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMGEN309 Provide basic animal first aid

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to provide essential first aid for animals. The first aider is not expected to deal with complex cases or incidents, but to provide an initial response where first aid is required.

The unit applies to individuals working in the animal care and management industry in a range of small to large facilities who may be required to apply animal first aid. They work under broad direction, typically in a team environment, and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes, solving routine problems and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for ACMGEN309 Provide basic animal first aid

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- identified the animal and hazards, and assessed and minimised risks to self, other people, injured animal and other animals for two separate incidents
- provided basic first aid for at least two animals with different first aid needs, including:
 - approached, secured and handled each animal safely using low stress techniques and following workplace health and safety procedures
 - updated supervisor or relevant personnel of animal condition
 - accurately recorded and maintained records for each animal.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- risks of providing first aid to animals, including:
 - risks to self and other people, including bites, scratches, envenomation, zoonoses and manual handling
 - risks to other animals
 - risks to injured animal
- first aid management principles
- methods used to catch, restrain and secure animals, including commonly used equipment
- personal protective equipment (PPE), including when and how it should be used, and correct fitting
- safe and humane animal handling techniques and procedures
- basic examination techniques to determine health status
- basic animal first aid techniques, including how to:
 - check airway and clear if required

- control bleeding
- minimise impact of shock by keeping animal quiet, warm and away from activity or noise
- immobilise limb injuries, if safe to do so, where soft tissue damage or fractures are suspected
- apply water appropriately, if available, in cases of burns or overheating
- transport animal to veterinary assistance as soon as possible using methods appropriate to illness or injury
- organisation policies and procedures, including health safety, and emergency procedures
- animal emergency networks, where applicable, including:
 - veterinary services
 - animal welfare bodies and support facilities
 - state and local government emergency services relevant to animal incidents.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live animals or animal models/replicas specified in the performance evidence – live animals can only be used where first aid is undertaken as part of routine workplace activity and the animal's welfare is not compromised
 - PPE for handling animals
 - animal first aid equipment specified in the performance evidence
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMGEN311 Maintain and monitor animal health and wellbeing

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to follow animal health management practices to monitor animal health via daily observations of behaviour and condition. The animals may include a range of species housed long-term or cared for short-term in a workplace.

This unit applies to individuals undertaking animal care activities in small to large scale animal facilities where it may be necessary to care for a range of animal species and to monitor the wellbeing of healthy, ill or injured animals. They work under broad direction, typically in a team environment, and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes, solving routine problems and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for ACMGEN311 Maintain and monitor animal health and wellbeing

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has maintained and monitored the health and wellbeing of a minimum of three different animals and, on each occasion, the individual must have:

- applied work practices for personal safety and personal hygiene standards
- monitored and tested indicators of animal health
- assessed the physical environment of animals for evidence of conditions that may have affected the physical wellbeing and welfare of animals
- maintained records of observations, monitoring activities and samples, including isolation and/or quarantine records where required
- selected, fitted and correctly used personal protective equipment
- administered treatments under supervision.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- anatomical and physiological structures and functions related to animal health and wellbeing
- overview of anatomical and physiological terminology
- broad categories of parasitic infestations and preventative treatments
- common infectious diseases and their causes and transmission, including:
 - bacteria
 - fungi
 - virus
 - zoonoses
- common non-infectious diseases, including:

- allergies
- chemical toxicities
- genetic
- metabolic
- neoplastic
- nutritional
- observing and reporting normal species-specific behaviour and indicators of ill health, injury or distress
- indicators of poor response to treatment or management of young, ill, injured or compromised animals
- indicators of recovery from illness or injury
- isolation and/or quarantine protocols
- safe work practices related to animal handling, including infection control
- methods used to measure, interpret and record animals' weight and other objective measures of animal health
- key principles of animal welfare and ethics.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live animals specified in the performance evidence
 - videos/photos may be used for identification of diseases where live samples are not available
 - equipment and resources typically available in an animal care environment for animal health assessment and isolation and/or quarantine, including personal protective equipment
- specifications:
 - workplace policies and procedures, and current, relevant legislation and codes of practice related to animal health assessment and isolation and/or quarantine
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMGEN312 Provide nutritional requirements for animals

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to prepare rations based on animal species needs and availability of food products.

The unit applies to individuals working in the animal care industry who feed and provide nutritional requirements for animals, in a range of small to large facilities. They work under broad direction, typically in a team environment and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes, solving routine problems and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

General Animal Care (GEN)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify nutritional requirements of animals	1.1 Identify natural nutrient sources and types of digestive systems for animal species or groups within the workplace

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Align normal feeding behaviours and nutritional requirements of a range of animals</p> <p>1.3 Evaluate feeding strategies and methods to maximise activity and behavioural enrichment</p> <p>1.4 Identify characteristics of under-supply or over-supply of nutrients, and evaluate methods used to monitor nutritional uptake</p>
2. Review food sources and calculate dietary requirements	<p>2.1 Classify food products according to nutrient content for animals cared for in the workplace</p> <p>2.2 Assess foodstuffs for shelf life, preparation requirements, availability and cost</p> <p>2.3 Identify hazards to animal and human health from food sources, and implement procedures to manage risks</p> <p>2.4 Estimate with reasonable accuracy or calculate feed and water requirements, based on provided diet plan</p> <p>2.5 Identify key food groups of animal food or diet</p> <p>2.6 Identify other dietary issues included in animal diets</p> <p>2.7 Document diet provided to animals according to workplace procedures or instructions</p>
3. Prepare diets and provide food and water	<p>3.1 Prepare food as required by diet plan</p> <p>3.2 Store food safely to avoid contamination and minimise degradation or nutrient loss</p> <p>3.3 Provide food and water according to animal's requirements</p>
4. Monitor feeding and watering practices	<p>4.1 Monitor and record food and water consumption according to the workplace procedures</p> <p>4.2 Identify and report abnormal feed intake or feeding behaviour according to the workplace procedures</p> <p>4.3 Monitor animals for condition, metabolic and behavioural changes</p> <p>4.4 Identify reasons for poor response to diet and seek specialist advice</p> <p>4.5 Determine required dietary changes in consultation with supervisor</p> <p>4.6 Document required dietary variations and update workplace records</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.7 Hand over individual dietary information to team member or client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret species-specific dietary and nutritional terminology in workplace policies and procedures
Writing	<ul style="list-style-type: none"> Use biological and industry terminology when completing records
Oral communication	<ul style="list-style-type: none"> Use open-ended questioning, active listening, paraphrasing and summarising to identify animal dietary issues and possible resolutions with relevant personnel
Numeracy	<ul style="list-style-type: none"> Calculate volume, weight, area, ratio, time and application rates Measure, interpret and record animal weight, length and other relevant objective indicators of change in physiological status

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided a nutritionally appropriate diet for a minimum of three different animals. The three animals selected must include two species and include at least two different individual dietary needs.

In doing the above, the individual must have undertaken the following for each animal:

- prepared animal diet in consultation with relevant personnel
- prepared, stored and distributed food according to animal needs and workplace quality control procedures and hygiene practices
- monitored animal response to feeding program and reviewed diet in consultation with supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- animal classifications that influence dietary needs and styles of eating
- key food groups in animal food or diet, including protein, carbohydrate, vitamin and mineral supplement and fibre content
- behavioural features related to feeding styles and unsuitable responses to diets
- methods used to monitor nutritional uptake, including:
 - comparing food distributed and food not eaten
 - estimating condition scores
 - weighing animals
- principles of contamination and cross-contamination
- species-specific feed products available and approved in Australia, including availability, cost, shelf life, method of storage, preparation and presentation to animals

- feeding methods of different animals, including the use of safe, low stress animal handling/interaction techniques
- appropriate food storage and feeding containers for different animals
- common nutrition-related health problems and health problems that impact an animal's diet
- importance of compliance with veterinary or supervisor instructions for specific animals
- sources of nutrients for particular animal classes and groups
- potential causes of poor response to diets.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care facility or an environment that represents workplace conditions
- resources, equipment and materials:
 - live animals specified in the performance evidence
 - animal care environment equipment and resources required for the nutrition tasks specified in the performance evidence
- specifications:
 - workplace procedures relevant to animal diets and nutritional requirements
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAIS302 Process and store semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to process and store semen collected from livestock for the purpose of artificial insemination.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare diluent	1.1 Clean containers to be used for preparation of diluent according to enterprise hygiene standards

Element	Performance criteria
	1.2 Calibrate equipment and tools used in processing semen 1.3 Heat distilled water for use in diluent to required temperature 1.4 Add distilled water to powdered diluent in correct proportions 1.5 Store diluent correctly before use
2 Determine number of semen doses	2.1 Determine concentration of the ejaculate using appropriate equipment 2.2 Calculate number of doses according to the concentration determined
3 Assess quality of semen batch	3.1 Examine semen batch and check for contamination 3.2 Assess motility of semen 3.3 Compare quality of semen batch against enterprise benchmarks 3.4 Discard poor quality semen appropriately
4 Check incubator	4.1 Check temperature and other operational parameters of incubator before use 4.2 Report and resolve problems with incubator before operation
5 Prepare semen doses	5.1 Add diluent to semen batch 5.2 Divide diluted semen into doses 5.3 Label each semen dose 5.4 Place doses in incubator 5.5 Assess quality of prepared doses 5.6 Record data in line with enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAIS302A Process and store semen.

Assessment Requirements for AHCAIS302 Process and store semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare diluent
- determine number of semen doses
- assess quality of semen batch
- check incubator temperature and other operational parameters before use
- prepare and label semen doses
- record semen details.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods and procedures for cleaning and sterilisation of containers, equipment and tools
- calibration of equipment and tools
- preparation and storage of diluent
- types, uses, maintenance and servicing of equipment used for determining semen concentration and quality
- calculation of semen doses
- criteria, characteristics and methods for assessing semen quality
- requirements and methods for the disposal of semen
- types, functions and maintenance of incubator
- requirements, methods and procedures for preparing semen doses
- effects and impacts of environmental conditions, equipment factors and human factors on viability of semen doses
- enterprise recording requirements.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCASW301 Protect places of Aboriginal cultural significance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to protect places of cultural significance to Aboriginal people. It requires following Aboriginal cultural protocols and details the specific cultural, gender and kinship sensitivities of working in Aboriginal communities and on Country with diverse cultural requirements.

This unit applies to those whose work on Country and in cultural keeping places and includes protecting cultural places, sites and objects often in co-operation with a range of stakeholders and with reference to Aboriginal communities and/or line management. The unit involves and requires a high level of awareness and experience with Aboriginal culture and communities and the need to observe Aboriginal cultural protocols. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit, due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and communicate with key stakeholders	1.1 Identify appropriate persons within communities who hold cultural knowledge relevant to determining the cultural significance of Aboriginal places and heritage 1.2 Develop working relationships with key stakeholders that assist in the management of culturally significant places 1.3 Develop communication approaches that place Aboriginal cultural protocols and values at the forefront and accommodate stakeholder concerns and interests 1.4 Seek and obtain views on the way in which the cultural significance and resource can be conserved and used 1.5 Report feedback to management for operational planning processes
2. Define cultural significance	2.1 Ensure cultural knowledge holders inform the decision-making process to determine the cultural significance of places 2.2 Acknowledge and respect traditional Aboriginal knowledge, practices, rights and responsibilities in managing Country and environment 2.3 Determine the Aboriginal beliefs embedded in a place of cultural significance 2.4 Recognise the embodiment of cultural significance in the place itself, its fabric, natural resources, setting, use, associations, meanings, records, related places and related objects 2.5 Assess cultural significance 2.6 Document cultural significance in accordance with Community permissions
3. Identify threats to Aboriginal cultural places	3.1 Identify threats to culturally significant places, both external and internal to the area under consideration 3.2 Observe, describe and record details of evidence of land degradation using standard industry and Indigenous terminology and according to Community permissions 3.3 Participate in a risk assessment of all threats to determine potential impact on sites and associated cultural landscape 3.4 Identify appropriate protection or conservation measures to control potential and actual threats
4. Conserve significance	4.1 Use conservation policies and plans along with stakeholder views to participate in planning for ongoing conservation actions 4.2 Implement conservation activities in culturally sensitive ways,

Element	Performance criteria
	and in accordance with Burra Charter guidelines and enterprise, Community and legislative requirements 4.3 Apply safe and environmentally sustainable work practices 4.4 Obtain resources for conservation and restoration activities, along with any associated ceremonial or cultural activity

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW301A Protect places of Aboriginal cultural significance.

Assessment Requirements for AHCASW301 Protect places of Aboriginal cultural significance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or for a site
- develop working relationships with Aboriginal and non-Aboriginal stakeholders in cultural sites
- canvass views in determining the cultural significance and heritage value and preservation issues of an Aboriginal cultural site
- contribute to planning for the protection of an Aboriginal cultural site including identifying resources required and submissions to be completed
- observe Aboriginal cultural protocols when working with stakeholders and land managers
- identify threats to Aboriginal site and measures to mitigate and manage the risk of damaging incidents or loss of cultural integrity
- identify natural resources and how they relate to cultural protocol, spirituality, art, environment, values, beliefs and lore/law
- identify cultural rights and responsibilities when using Community knowledge, information and material
- identify groups to be consulted in relation to owners or custodians of cultural and Community knowledge, information and material
- use Aboriginal names and standard industry terminology appropriate to the task
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Community's history, cultural values and interpersonal and Community protocols related to the place
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- industry, organisational and enterprise policies and procedures for conservation of places of cultural significance
- key concepts of Burra Charter and Guidelines
- key concepts of Cultural and Heritage Legislation and National Parks and Wildlife Service (NPWS) legislation relevant to the protection of Aboriginal significant places.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW302 Relate Aboriginal culture to sites work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to understand cultural landscapes from Aboriginal perspectives. The unit introduces overarching belief systems that operate where Aboriginal sites work takes place. It provides a conceptual foundation for understanding Aboriginal cultural protocols, cultural customs and cultural practices that the Aboriginal sites worker is likely to encounter in daily work routines.

This unit applies to Aboriginal worldviews and beliefs as they impact and affect Aboriginal sites work on Country. The unit applies to working either as an autonomous sites worker or under the supervision and cultural authority of Traditional owners or Elders for specific Country and is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply understanding of traditional cultural frameworks when working with Aboriginal people	1.1 Integrate the relationship to the land into daily work routines 1.2 Determine relationships of Aboriginal objects, features and cultural landscapes to Aboriginal beliefs 1.3 Determine the interrelationship of discrete Aboriginal sites to cultural frameworks 1.4 Acknowledge and respect traditional knowledge, belief systems, customs and cultural practices in managing Country
2. Recognise traditional Aboriginal social frameworks	2.1 Recognise different language groups and general lore/laws and customs 2.2 Identify extended family structures and clans in physical and geographical locations 2.3 Relate totemic structures and associated stories about ancestral beings from the Creation Period to landscape features and sites 2.4 Identify social structures that define the social positions, behaviours and obligations in kinship names, sections and networks 2.5 Identify the kinship system for determining roles and responsibilities, marriage unions, ceremonial relationships, funeral roles and behaviour patterns with other kin 2.6 Determine marriage relationships resulting from the union of two moieties or skin names 2.7 Recognise and respect gender roles
3. Relate Aboriginal spirituality to the landscape	3.1 Acknowledge and record Aboriginal beliefs that determine Aboriginal cultural protocols 3.2 Define the connection between spirituality and the land in local and trans-local terms of identity, culture and food 3.3 Relate the historical and present living environments to Dreaming stories and cultural knowledge 3.4 Recount cultural language and customs embedded in the relationship to the land and Aboriginal sites 3.5 Define the relationships of Creation stories, oral histories, kinship and totems to the cultural landscape 3.6 Recount the sense of belonging to the land and culture embedded in landscape in culturally appropriate ways 3.7 Express elements of spirituality in ceremony, rituals, stories, dance, song, art and language
4. Relate the interactions	4.1 Record the effects of cultural disconnection with the land,

Element	Performance criteria
between Dreaming, traditional beliefs and ceremonies to Aboriginal sites work	spirituality and ceremonial expressions of culture 4.2 Record impacts of disintegration and disconnection on Aboriginal sites 4.3 Acknowledge and respect the evolving nature of Dreaming 4.4 Identify and document current trends in mainstream culture and heritage and opportunities and threats to the Aboriginal sites work sector

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCASW302 Relate Aboriginal culture to sites work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- explain traditional Aboriginal belief systems of the Community
- identify examples and impacts of disintegration and disconnection with Aboriginal culture
- describe the relationship between the land and environment and Aboriginal peoples in culturally relevant ways
- explain the relationship between Dreaming, traditional beliefs, Ceremony and sites
- use Aboriginal names and standard industry terminology appropriate to the task.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to source appropriate cultural and lore/law authority for specific Country and/or sites
- protocols and customs relating to disclosure of knowledge about Country
- Aboriginal cultural and social frameworks
- Community's ancestral beliefs
- kinship names, sections and networks
- totems, moieties, skin names
- relationship of Community's Dreaming to the site and how it is evolving
- rules and limitations to access to cultural knowledge
- different social structures of various Indigenous Communities
- Indigenous cultural customs and heritage of the Community
- recording and documentation procedures used by organisation.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW304 Identify Indigenous culturally significant plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe, record and report on the presence of plants of Indigenous cultural significance against criteria provided by a supervisor or as required under legislation, regulations, and or community protocols.

This unit involves the recognition of plants of Indigenous significance that are commonly encountered in land management situations and covers knowledge of Indigenous plant identification techniques, Indigenous plant names, community and organisational procedures for obtaining and supplying advice and information about Indigenous plants, and community or organisational expectations about the range and number of Indigenous plants to be recognised.

This unit has a particular focus on culturally significant Indigenous plants, management and conservation.

This unit applies to the identification and recording of Indigenous plants, local bushland and bush foods on Country. The unit applies to working with lore/law men and women either as an autonomous worker or under the supervision and cultural authority of Traditional Owners or Elders for specific Country.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for plant recognition	1.1 Identify range of Indigenous plants and plant species according to pre-determined criteria, and job or client needs 1.2 Identify and locate resources required for use in recognition activity 1.3 Identify, select and prepare processes for Indigenous plant recognition including consultation and seeking approval from relevant cultural authorities to be on specific Country 1.4 Identify safety hazards and apply work health and safety procedures
2. Identify specified Indigenous plants	2.1 Name specified Indigenous plants according to their identifiable characteristics and by their Indigenous name 2.2 Determine plant habits, characteristics and significant features according to enterprise requirements 2.3 Seek advice from cultural authorities or supervisors when necessary and where appropriate in the recognition activity
3. Survey and record identification of Indigenous plants in a specified area	3.1 Identify survey site and record location of plants using maps and grid references 3.2 Determine and record cultural uses and significance of specified Indigenous plants 3.3 Document information about Indigenous plants and add to reference collection according to organisational requirements 3.4 Update reference collection if new Indigenous plants are recognised 3.5 Identify rare or endangered plant species in location 3.6 Determine disposal techniques for plant debris if specimen collection is necessary 3.7 Apply environmentally sustainable practices for carrying out observation activities to minimise degradation and disturbance 3.8 Follow work health and safety policies and procedures for

Element	Performance criteria
	carrying out survey activities
4. Identify local bushland and/or bush foods and their uses	4.1 Determine the relationship between local foods, general health and the land in Aboriginal culture 4.2 Locate and gather information from a range of sources about access to bush foods 4.3 Identify local Indigenous plants using their common, scientific and cultural names 4.4 Identify Indigenous cultural uses of available bush resources for food and medicine 4.5 Identify land management practices and conservation of Indigenous species

Foundation Skills

Assessment Requirements for AHCASW304 Identify Indigenous culturally significant plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify Indigenous culturally significant plants
- observe and accurately identify species of Indigenous plants
- document observations in required format, according to Community and organisational needs
- apply environmentally sustainable practices to carry out survey activities in a natural area in order to minimise disruption to the environment
- explain and/or demonstrate uses of plants for food and medicine
- utilise available resources and equipment to identify Indigenous plants accurately
- read map and grid references to identify locations of plants
- use standard industry terminology and local Community names for Indigenous plants
- apply work health and safety practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria used to categorise plant species
- common and scientific names of Indigenous plants
- biological species occurring in the study area
- the importance, value or potential impact of the species in a designated area
- rare and endangered species
- plant identification techniques and plant names used by enterprise
- organisational expectations relating to the range and number of Indigenous plants to be recognised in the survey

- cultural protocols for obtaining and utilising information about Indigenous plants
- nutritional and medicinal purposes of bushland and/or bush foods
- land management and conservation techniques applicable to Aboriginal sites work.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW305 Work with Aboriginal ceremonial secret sacred materials

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop an awareness of the protocols involved in Aboriginal culture as they relate to individuals and communities, specifically in relation to materials with restrictions on access for cultural reasons.

The unit covers Community cultural processes including the need to identify the appropriate persons when approaching a Community and the cultural and social rules associated with that task.

This unit applies to following Aboriginal cultural protocols when coming into contact and working with cultural materials defined as Aboriginal ceremonial secret sacred objects. The unit applies to working with this material on Country and off Country where rules apply to limited access to the material for cultural and ceremonial reasons. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
<p>1. Conduct background research and consultation with Traditional Owners, Community, Cultural Managers/Knowledge holders</p>	<p>1.1 Confirm traditional ownership of cultural material and objects and consult appropriate Owners or Cultural Managers and Communities</p> <p>1.2 Identify gender requirements for consultations, handling of and access to materials according to Aboriginal cultural protocols</p> <p>1.3 Consult with Traditional Owner/s, Community groups and experts to determine suitable holding for materials not authorised for general exhibition</p> <p>1.4 Obtain permissions from cultural authorities for access and use of Aboriginal secret, sacred and ceremonial materials</p> <p>1.5 Consult with Community to determine culturally appropriate handling of material and any limitations on access to materials</p> <p>1.6 Demonstrate confidentiality and neutrality in consultations and dealings with Traditional Owners and Cultural Managers</p>
<p>2. Handle Aboriginal secret sacred cultural material</p>	<p>2.1 Allow for and carry out any required Ceremony and procedure associated with seeing, handling or moving the material</p> <p>2.2 Identify, move, store, maintain and return cultural material according to Aboriginal cultural requirements and enter into agreements</p> <p>2.3 Note aspects of cultural material requiring repair or attention and pass onto supervisor or person with relevant expertise</p> <p>2.4 Communicate specific Aboriginal cultural requirements to colleagues</p> <p>2.5 Select and use appropriate handling and moving equipment according to safe work practices and to protect sacred and ceremonial material</p> <p>2.6 Adhere to cultural restrictions and limitations on secret, sacred and ceremonial material</p> <p>2.7 Demonstrate handling cultural material in a manner that protects individual items, assists efficient loading and unloading processes if moving, and in accordance with safe work practices</p> <p>2.8 Handle, move, store and manage secret sacred cultural material in accordance with Burra Charter guidelines and legislative</p>

Element	Performance criteria
	requirements
3. Contribute to documenting a generational succession plan for passing on ownership of secret sacred material	3.1 Discuss options for inheritance of ownership with Traditional Owners and/or Elders 3.2 Participate in documenting the process, guidelines and timeframes agreeable to Traditional Owners and Cultural Managers for handover of ownership, control and access to secret sacred materials

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW305A Work with Aboriginal ceremonial secret sacred materials.

Assessment Requirements for AHCASW305 Work with Aboriginal ceremonial secret sacred materials

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify cultural authority for ceremony in a particular area or site
- consult effectively with Traditional Owners and relevant Community representatives about the handling, access to and display of cultural material
- observe Aboriginal cultural protocols and follow collection management practices and industry cultural requirements when moving, storing, displaying and maintaining cultural material
- select and use handling, storage and transport systems in accordance with Aboriginal cultural protocols
- create, maintain and store records of the process, guidelines and timeframes for handover of ownership, control and access to secret sacred materials
- use standard industry terminology and Aboriginal names for sites and materials, as appropriate
- apply work health and safety practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues that frame the development of cultural protocols
- Community Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- ownership relationships for secret, sacred material

- content of contracts and confidentiality agreements applicable to working with ceremonial secret sacred materials
- organisational procedures and guidelines for working with ceremonial secret sacred materials
- Burra Charter guidelines appropriate to working with Aboriginal secret sacred materials
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to working with ceremonial secret sacred materials.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW306 Use technology in Aboriginal sites work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use technology and tools necessary to conduct Aboriginal sites work.

This unit applies to Aboriginal sites workers utilising technology on Country and in an office environment to assist them in their work. The unit applies to working either as an autonomous sites worker or under the supervision and cultural authority of Traditional owners or Elders for specific Country and is also applicable to the work of repatriation workers and anthropologists.

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country to identify and record site locations, read maps, and photograph and record sites, landscapes and objects.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

AHCASW307 Support the documentation of Aboriginal cultural landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify and assist with the documentation of an Aboriginal cultural landscape on Country from an Aboriginal perspective.

This unit applies to Aboriginal sites workers who are working with experts to identify and record Aboriginal cultural landscapes on and off Country.

The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owners and Elders for specific Country and is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the characteristics of Aboriginal cultural landscapes on Country	1.1 Identify Aboriginal cultural landscapes and associated sites and features of cultural significance 1.2 Determine boundaries and extent of Country 1.3 Apply the concept of lore/law in the land 1.4 Describe Aboriginal cultural landscapes in ecological and archaeological terms, Aboriginal cultural language and spiritual terms, and traditional Aboriginal economic terms 1.5 Identify archaeological evidence of landforms
2. Participate in investigations of cultural and historical records of an Aboriginal cultural landscape	2.1 Identify from relevant databases or websites whether any historical records or previous research is available for the site 2.2 Participate in research activities to determine traditional understanding of the cycle of the seasons and meteorological phenomena, and of landform and vegetation community types in a cultural landscape 2.3 Determine environmental cultural knowledge, cultural connections and relationships with the landscape that are passed down generationally 2.4 Carry out investigations on Country in accordance with safe work policies and procedures, enterprise requirements and Burra Charter guidelines
3. Identify Aboriginal cultural value links to cultural landscapes	3.1 Identify cultural landscapes and determine links with Aboriginal cultural and Community knowledge 3.2 Describe relationships between Creation stories, oral histories, kinship and totemic to the cultural landscape 3.3 Identify gender access, roles and usage as this relates to the cultural landscape 3.4 Identify Aboriginal cultural values in cultural landscapes 3.5 Identify links between archaeological evidence and cultural landscapes 3.6 Identify indicators in the landscape that reveal traditional Aboriginal land management practices

Element	Performance criteria
4. Describe Aboriginal cultural practices and beliefs which maintain cultural connections to cultural landscapes	4.1 Identify appropriate persons within Communities who hold cultural knowledge 4.2 Identify appropriate Cultural Knowledge holders and/or Cultural Manager for an Aboriginal cultural landscape 4.3 Recount the range and interrelationship of Aboriginal beliefs and Aboriginal cultural and ceremonial practices that maintain connection with the cultural landscape 4.4 Document the associations of connection to Country through language, stories, song, dance and art if appropriate according to Community protocols and customs relating to disclosure of knowledge, using archaeological and Aboriginal terminology

AHCASW308 Apply cultural significance to Aboriginal sites and landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine theoretical and practical concepts of cultural significance in relation to Aboriginal cultural sites and landscapes. It uses the Burra Charter as the industry benchmark in assessing significance for culture and heritage work.

This unit applies to those who are working on Country finding Aboriginal sites and working to assess significance in landscapes on Country. The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owners and Elders for specific Country. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal-sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

AHCASW310 Move and store Aboriginal cultural material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle, pack and unpack Aboriginal cultural material for movement and storage.

This unit applies particularly to working around and with Aboriginal cultural materials and objects and focuses on the specific cultural and consultative requirements for sourcing, handling, and possibly interpreting Aboriginal cultural material. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source Aboriginal cultural material	1.1 Confirm traditional ownership of cultural material 1.2 Consult with the appropriate traditional custodians and Community to determine suitable keeping places for cultural materials 1.3 Work with cultural authorities to identify appropriate persons within Community who hold cultural knowledge relevant to establishing any restrictions on access to materials 1.4 Seek permission and advice for being on site and using cultural material according to Aboriginal cultural protocols 1.5 Locate and identify cultural material and objects and assess material's suitability for moving 1.6 Complete records according to cultural protocols 1.7 Identify issues and follow protocols in relation to the return of cultural material to local Aboriginal Community
2. Determine movement and storage requirements	2.1 Implement legislative and work health and safety requirements 2.2 Assess and document the scope of work required for movement and storage of cultural material 2.3 Identify and confirm organisational procedures and guidelines and specific requirements for moving and storing cultural material with relevant personnel 2.4 Determine future storage requirements with relevant personnel 2.5 Assess and arrange the need for specialist expertise
3. Handle and transfer Aboriginal cultural material	3.1 Identify, move, store, maintain and return cultural material according to Aboriginal cultural requirements 3.2 Record details of material requiring repair or attention and take action within scope of own job role or refer to relevant personnel as required 3.3 Communicate specific Aboriginal cultural requirements to colleagues 3.4 Select and use appropriate handling and moving equipment 3.5 Handle cultural material in a manner that protects individual items and assists efficient loading and unloading processes 3.6 Prepare transportation documentation 3.7 Transfer Aboriginal cultural material to approved location 3.8 Use techniques for moving material that minimise environmental disturbance and degradation, where appropriate

Element	Performance criteria
4. Store cultural material according to Aboriginal cultural requirements	4.1 Install, position or store cultural material as required 4.2 Ensure specific storage needs of cultural material are based on knowledge of requirements for different types of materials 4.3 Clear and clean work areas according to organisational procedures 4.4 Maintain storage records according to organisational policies and procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW310A Move and store Aboriginal cultural material.

Assessment Requirements for AHCASW310 Move and store Aboriginal cultural material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or site
- consult effectively with Traditional Owners, Cultural Managers and relevant Community representatives about the handling, access to and display of cultural material
- handle, move and store cultural materials according to cultural protocols
- seek permissions from cultural authorities for being on site and handling, moving, storing and recording cultural material, according to Community protocols
- observe Aboriginal cultural protocols, follow collection management practices and industry requirements when moving, storing, displaying and maintaining cultural material
- record details of transporting and storing of cultural material
- report damage or faults with cultural material to appropriate persons
- select and use handling, storage and transport equipment
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices to minimise environmental disturbance and degradation when moving cultural objects from Aboriginal sites.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- cultural authority for ceremony on the site
- ownership relationships for secret, sacred material
- record-keeping techniques
- organisational procedures and guidelines.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

AHCASW312 Maintain an Aboriginal cultural site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain Aboriginal cultural sites.

This unit applies to those working in Aboriginal communities and on Country in cultural landscapes and with cultural sites and objects. The unit applies to working with lore/law men and women, either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owners or Elders for specific Country. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess maintenance work requirements and relevant cultural protocols	1.1 Identify and consult appropriate cultural authorities according to Aboriginal cultural protocols 1.2 Obtain approval and permits from relevant Traditional Owners and Cultural Managers for work to be carried out and for access to cultural site and materials for the specific persons who will conduct work 1.3 Access records of assessment of significance incorporated into strategies and plans for area and site, to determine required and appropriate actions 1.4 Identify any prior works that are not in keeping with cultural practices or causing damage to culturally significant sites or assets and determine appropriate maintenance actions 1.5 Collect information on environmental systems and procedures and provide to the work group where appropriate 1.6 Identify machinery, tools, equipment and materials to carry out maintenance works with appropriate techniques 1.7 Estimate level of work and document materials required for maintenance work 1.8 Identify where traditional Aboriginal repair or maintenance techniques and relevant archaeological practices and procedures are to be used and where modern techniques should be applied
2. Prepare for maintenance	2.1 Organise machinery, equipment and materials to carry out maintenance works and undertake pre-maintenance checks 2.2 Prepare and assemble safety equipment and materials 2.3 Identify safety hazards and apply safe work policies and procedures for all maintenance work
3. Maintain condition of place	3.1 Undertake maintenance work according to archaeological practices and Aboriginal cultural protocols and approvals and requirements of work programs and in a manner that ensures significance of place is maintained, and that work meets environmental sustainability requirements and does not cause damage to surrounds, fabric or building, or materials 3.2 Apply continuous improvement strategies to own area of responsibility, including communicating ideas and possible solutions to the work group and management 3.3 Support team members to identify possible areas for improved practices in work area on Country 3.4 Report evidence of deterioration and wear to Traditional Owners,

Element	Performance criteria
	Cultural Managers and supervisor 3.5 Record maintenance work according to Aboriginal cultural protocols and approvals and requirements of work programs 3.6 Clean up site on completion of maintenance works according to Aboriginal cultural protocols and supervisor's instructions
4 Protect cultural place	4.1 Report any breach of legislation or enterprise regulations to Traditional Owners, Cultural Managers and supervisor 4.2 Maintain protective barriers and signs according to enterprise procedures and Aboriginal cultural practices 4.3 Provide information to workers and contractors to ensure significance of place is maintained, and that work meets environmental sustainability requirements, does not cause damage to surrounds, fabric or building, and materials, equipment and tools are removed at the completion of work

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW312A Maintain an Aboriginal cultural site.

Assessment Requirements for AHCASW312 Maintain an Aboriginal cultural site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or for a cultural site
- consult with appropriate cultural authorities and obtain informed approval for works and access of specific persons
- assess the level of work required to maintain the cultural place
- carry out maintenance activities in accordance with organisational, environmental sustainability and Aboriginal cultural requirements
- report deterioration or damage to place according to Community protocols and requirements
- report incidents of breaches of legislation including vandalism
- determine the cultural rights and responsibilities when using Community knowledge, information and material
- apply work health and safety practices in the context of own work
- ensure sustainability practices are applied by all workers and contractors on site to minimise environmental degradation and deterioration of site.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- workplace health and safety requirements and responsibilities of own role
- sustainable environmental practices applicable to maintaining site
- traditional and Western modern techniques of site protection appropriate to the site
- range of maintenance works undertaken on cultural sites
- enterprise procedures for reporting deterioration or damage to place or reporting incidents
- site recording systems used by the enterprise or Community

- relevant archaeological practices and procedures
- Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to maintenance of an Aboriginal site.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

AHCASW313 Apply knowledge of relevant legislation to Aboriginal sites work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to work within the constructs of relevant legislation when working with Aboriginal-sites, cultural materials and cultural landscapes.

This unit applies to Aboriginal sites workers working on Country or in other cultural and heritage contexts where legislative requirements are in place. The unit applies to working either as an autonomous sites worker or under the supervision and cultural authority of Traditional owners or Elders for specific Country.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research the relevant legislation	1.1 Identify the legislative requirements that relate to Aboriginal sites work 1.2 Identify the purpose of legislation and environmental and sustainability requirements which apply to own work context
2. Identify relevant legislative provisions	2.1 Identify the laws that protect Aboriginal sites 2.2 Clarify compliance requirements with supervisor to confirm understanding and to ensure consistency of application across the organisation 2.3 Consult with experts to address any competing interests arising from different pieces of legislation with jurisdiction over the one Aboriginal cultural site, landscape or material 2.4 Carry out Aboriginal sites work within the constructs of relevant legislation
3. Identify stakeholder requirements	3.1 Communicate with clients and stakeholders to identify their needs in relation to relevant legislation 3.2 Provide referrals for stakeholders to expert advisors or advisory organisations 3.3 Recognise own limitations and professional boundaries 3.4 Conduct own Aboriginal sites work in accordance with legislative requirements and following Aboriginal cultural protocols and values

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCASW311A Apply relevant legislation in Aboriginal-sites work.

Assessment Requirements for AHCASW313 Apply knowledge of relevant legislation to Aboriginal sites work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- work within the constructs of relevant legislation in their work with Aboriginal sites, cultural materials and cultural landscapes
- identify and apply relevant legislation to the circumstances appropriately and accurately
- identify relevant compliance requirements affecting Aboriginal sites work in a specified jurisdiction
- use referral options and other expertise to assist in interpreting and applying legislative requirements
- communicate basic legal concepts and legislative language to Aboriginal clients and stakeholders in culturally appropriate way.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how Cultural and Heritage Legislation or relevant National Parks and Wildlife Service (NPWS) legislation applies to Aboriginal sites work
- other legislation that may impact on Aboriginal sites work
- organisations to which appropriate referrals can be made.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

The assessor must satisfy the current standards for RTOs.

AHCASW501 Survey and report on Aboriginal cultural sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to survey and report on Aboriginal cultural sites.

This unit applies to those working in Aboriginal communities and on Country in cultural landscapes and with cultural sites and objects. The unit applies to working with lore/law men and women either as an autonomous sites worker or under the supervision and cultural authority of Traditional Owners or Elders for specific Country and is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify, communicate and consult with key stakeholders	<p>1.1 Work with cultural authorities to identify appropriate persons within Communities who hold cultural knowledge relevant to determining the cultural significance of Aboriginal places and heritage</p> <p>1.2 Develop and implement communication and consultation systems that place Aboriginal cultural protocols and values at the forefront and accommodate stakeholder concerns and interests</p> <p>1.3 Confirm traditional ownership of Aboriginal sites, cultural material, and objects</p> <p>1.4 Ensure approval and permissions are obtained from relevant Traditional Owners and Cultural managers for work to be carried out and for access to the Aboriginal site for the specific persons who will conduct work</p> <p>1.5 Complete any necessary submissions for conducting Aboriginal cultural sites surveys</p> <p>1.6 Develop working relationships with key stakeholders that assist in the management of culturally significant places</p> <p>1.7 Scope and document client needs for deliverables required in a formal sites survey report</p> <p>1.8 Manage planning and assessment processes, ensuring they are in accordance with the Burra Charter process and other existing industry guidelines and legislation</p>
2. Manage collection of initial site data	<p>2.1 Source and verify site plans and maps including topographical maps</p> <p>2.2 Identify and acquire required resources</p> <p>2.3 Prepare a base plan of the site</p> <p>2.4 Undertake site orientation and define and verify location, geographic and operational boundaries</p> <p>2.5 Identify and record current land use and environmental problems and threats</p> <p>2.6 Identify and record covenants that could affect the site or report</p> <p>2.7 Ascertain climate and weather conditions from historical data</p>
3. Compile a site inventory	<p>3.1 Categorise and record site context, location and site information data</p> <p>3.2 Categorise and record features data</p> <p>3.3 Identify and record cultural material, objects, properties and relevant physical characteristics on site inventory according to</p>

Element	Performance criteria
	<p>archaeological or scientific protocols</p> <p>3.4 Undertake relevant field research in accordance with safe work policies and procedures</p> <p>3.5 Implement appropriate techniques and tools and relevant archaeological practices and procedures</p> <p>3.6 Locate structural elements and confirm existing services and facilities</p> <p>3.7 Record the presence, location and/or extent of other relevant site constraints</p> <p>3.8 Develop limits of acceptable change in the forms of deterioration and damage to the places of cultural significance to legislative and enterprise requirements</p>
4. Review, assess and record the site data	<p>4.1 Engage relevant expertise and consultant services when required</p> <p>4.2 Conduct an assessment of cultural significance</p> <p>4.3 Document a statement of cultural significance</p>
5. Determine the impact of threats to the site	<p>5.1 Identify threats to culturally significant places, both external and internal to the area under consideration</p> <p>5.2 Undertake a risk assessment of all threats to determine potential impact on sites and associated cultural landscape</p> <p>5.3 Develop and implement risk management strategies and protection/conservation measures to control risks</p> <p>5.4 Develop and document a risk management report that incorporates an impact analysis</p> <p>5.5 Document policy changes required to address the threats</p>
6. Document a site survey report	<p>6.1 Document site information into a site assessment report or site survey report</p> <p>6.2 Incorporate all relevant data from the site assessment into assessment report in line with client needs and the requirements of relevant legislation and regulations</p> <p>6.3 Provide and record specific recommendations for remedial action of site conservation and mitigation of site problems</p> <p>6.4 Formulate and document recommendations for appropriate risk controls of site hazards</p> <p>6.5 Store and maintain survey and assessment data as part of professional practice</p> <p>6.6 Inform and advise client-stakeholder of the content and implications of the report and present a copy</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCASW501 Survey and report on Aboriginal cultural sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate Aboriginal cultural authorities for a Community, place or site
- identify key stakeholders to be consulted in relation to owners and custodians of cultural and Community knowledge, information or material and cultural significance
- develop and implement consultation processes
- survey and assess Aboriginal cultural sites using appropriate techniques, tools and relevant archaeological practices
- incorporate the cultural significance, heritage values and conservation issues of an Aboriginal cultural site into report documentation
- identify threats and develop controls to mitigate and manage the risk of deterioration, damaging incidents or loss of cultural integrity
- prepare a site survey report to meet Community and enterprise needs
- complete submissions required to carry out a site survey
- observe Aboriginal cultural protocols in dealing with stakeholders and land managers.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- site survey techniques, procedures and processes
- archaeological and scientific research techniques relevant to survey Aboriginal cultural site
- monitoring of site including fabric deterioration, damage and likely causes of deterioration and damage

- cultural rights and responsibilities when using Community knowledge, information and material
- general understanding of impacts of natural resources, such as geological settings, ecological processes, and interaction between natural and cultural processes
- provisions in the Australian Natural Heritage Charter and the Burra Charter and Guidelines and how they relate to surveying and reporting on Aboriginal sites
- design and methodology of consultation processes
- policy analysis and development of impact statements
- the range of conservation strategies for cultural areas
- data submission systems and reporting requirements
- components of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to surveying Aboriginal cultural sites.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

AHCBEK203 Open and reassemble a beehive

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to open and reassemble a beehive to carry out routine bee husbandry and related tasks.

The unit applies to individuals that undertake routine beekeeping tasks. This includes identifying and providing solutions to a limited range of predictable problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to open a beehive	1.1 Confirm the activity to be undertaken according to job requirements. 1.2 Identify health and safety hazards and take action according to workplace procedures 1.3 Select, ensure serviceability, fit and use personal protective

Elements	Performance Criteria

Assessment Requirements for AHCBEK203 Open and reassemble a beehive

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least two occasions the individual has demonstrated that they have safely opened and reassembled a hive, including:

- identified health and safety hazards and risks and applied appropriate controls
- selected, checked serviceability, fitted and used appropriate personal protective equipment (PPE)
- selected appropriate tools and equipment, and checked serviceability
- complied with hive quarantine and biosecurity requirements
- assessed the weather and other factors to minimise the risk of robbing and stress to bees
- worked from a safe position and used smoker, tools and equipment to move, open and dismantle a hive according to workplace procedures
- ensured hive components were kept clean and free from dirt
- replaced hive components and brood, reassembled the hive according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of opening and reassembling beehives
- bee behaviour when manipulating and dismantling a beehive
- the use of smoke to control bee behaviour
- hive components, location and purpose
- beekeeping tools and their application for dismantling a hive
- basic principles of hive hygiene, biosecurity and quarantine
- safety hazards, risks and controls when working bees including:

- PPE
- manual and mechanical handling techniques
- effect of weather and nectar flow on bee behaviour.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary with live bees
- resources, equipment and materials:
 - live bees
 - hive tools
 - hive components
 - PPE
 - mechanical handling equipment
- specifications:
 - workplace procedures related to opening and reassembling beehives
 - access to specific bee related quarantine regulations and biosecurity codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK205 Prepare and use a bee smoker

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have operated a bee smoker including:

- confirmed work activity with supervisor
- identified and confirmed that the conditions are appropriate for using a bee smoker
- checked bee smoker equipment is available and serviceable
- identified hazards and risks and used personal protective equipment (PPE) and safe work practices to minimise risk
- ensured fire prevention procedures were carried out
- anticipated defensive behaviour of bees and monitored and applied smoke to control bee behaviour
- selected and ignited suitable fuel for smoker keeping it alight and functioning while carrying out bee husbandry tasks
- used and shut down bee smoker safely after completing operations according to regulations and workplace fire prevention procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of using smoke on bees to pacify behaviour
- types of bee smokers and their use and advantages/disadvantages, including:
 - bellows (traditional)
 - electric fan operated
 - electric ignition
- types of smoke and the effect on bees and hive products
- suitable bee safe fuel and ignition procedures

- operation of bee smokers and the effect of weather and environmental conditions on the safe use of smoker including fire prevention activities
- fire restrictions and regulations that impact on use of bee smokers, including:
 - permits and exemptions
 - applications for exemptions
- health and safety hazards and risks and their controls when using smokers.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a functioning apiary with live bees or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - bee smoker and apiary tools for manipulating hives
 - access to live bees
 - PPE
- specifications:
 - access to specific regulations and permits relevant to the lighting and operating bee smokers within work area.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK206 Assemble and maintain beekeeping components

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely assemble and disassemble beehives, identify and repair damaged components, and treat hive components according to biosecurity and legislative requirements.

The unit applies to beekeepers who work under routine supervision. This includes identifying and providing solutions to a limited range of predictable problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to assemble or repair hive components	1.1 Confirm construction plans, hive components, other materials and equipment required for hive assembly, repair and treatment with supervisor 1.2 Check and inspect stored hive components for availability and suitability for use 1.3 Remove faulty components from store and replace, repair or

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	discard according to workplace procedures 1.4 Identify health and safety hazards and take action according to workplace procedures 1.5 Select, ensure serviceability, fit and use personal protective equipment
2. Assemble or repair hive components	2.1 Inspect hives to identify necessary repairs, scope of job, materials and tools required 2.2 Treat hive components where inspection or testing indicated presence of pests or diseases according to supervisor instructions, biosecurity procedures and product label 2.3 Assemble or repair hive components according to workplace procedures 2.4 Apply treatments to preserve hive components appropriate for materials used and according to workplace procedures, product label and safety data sheets 2.5 Mark hive components with beekeeper identifier according to state or territory legislation 2.6 Report problems or difficulties in completing work to required standards or timelines to supervisor 2.7 Maintain a clean and safe work site while working
3. Clean up on completion of work	3.1 Return, store or dispose of materials according to workplace waste management and biosecurity procedures 3.2 Clean, maintain and store equipment 3.3 Report work outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret basic hive plans and specifications Interpret safety data sheets for treatments and preservatives used

Skill	Description
	on hive components
Writing	<ul style="list-style-type: none"> Complete workplace documentation using appropriate terminology and in required format
Numeracy	<ul style="list-style-type: none"> Identify and interpret numerical information and symbols, including quantity, date, time, temperature, area and volume found on plans and product specifications Perform basic mathematical calculations required to interpret hive plans, including quantity, distance, area and volume
Navigate the world of work	<ul style="list-style-type: none"> Recognise workplace expectations and follows explicit procedures, and seeks clarification when required
Get the work done	<ul style="list-style-type: none"> Follow clearly defined instructions and sequencing, and monitors own progress for the task, seeks assistance when necessary

Assessment Requirements for AHCBEK206 Assemble and maintain beekeeping components

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have assembled and maintained beekeeping components including:

- identified hive components for assembly or repair
- identified materials, equipment and tools required for assembly work
- identified health and safety hazards and risks and applied relevant actions
- checked components for suitability and biosecurity risk to the environment or apiculture products
- removed, repaired or replaced unsuitable materials from the store
- constructed and repaired hive components according to workplace procedures, including correct selection and safe use of tools
- applied biosecurity and preservation treatments according to product labels, safety data sheets and workplace procedures
- marked hive components according to legislative requirements
- disposed of waste materials according to workplace biosecurity and waste management procedures
- cleaned and maintained and stored equipment and unused materials after completion of work
- maintained workplace records and reporting procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, materials and properties of hive components
- principles and techniques for construction, repair and preservation of hive components
- tools and equipment used for assembly work, including:
 - safe use
 - appropriate personal protection equipment

- maintenance and storage
- biosecurity issues with used hive components and treatments including:
 - pests and diseases and treatment options
 - sanitising new and used components
- hive components preservation materials and techniques, including:
 - plastic components
 - timber components
 - paints
 - chemical dips
 - wax dips
- interpretation of chemical labels and safety data sheets for treatments and preservatives
- legislative requirements for identifying hive ownership
- mandatory and workplace record keeping systems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - hand tools and equipment
 - new and used hive components
 - preservatives and treatments relevant to the type of materials used in the hive
 - use of appropriate personal protective equipment
- specifications:
 - workplace procedures relating to assembly and maintenance of beehives
 - manufacturer's operating instructions for tools and equipment used in beehive construction, assembly and preservation
 - product labels and safety data sheets for preservatives and treatments
 - access to specific legislation/codes of practice for hive identification and bee biosecurity
 - construction plans showing hive components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK301 Manage honey bee swarms

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have managed a honey bee swarm including:

- assessed swarm for condition and viable and safe options for collection, and determined resources and equipment required
- identified the hazards and risks and selected, fitted and used appropriate personal protective equipment
- identified and prepared equipment required for swarm collection
- interpreted behaviour and handling of bees and applied appropriate management strategies
- collected a swarm of honey bees using appropriate equipment and techniques while following quarantine and biosecurity requirements
- assessed captured swarm for health and need for re-queening
- selected and implemented control options to manage swarming behaviour in honey bees
- updated and maintained workplace and statutory records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of managing swarms, including:
 - causes and timing of honey bees swarm activity
 - why swarms are collected including environmental and social impacts
 - signs of colony swarming activity
 - management techniques that can be used to manage a colony showing signs of potential swarm activity
 - setting up swarm catch boxes to capture swarming bees

- biosecurity considerations, including:
 - pests and diseases that occur in honey bees
 - signs of pests and diseases in swarms
 - quarantine procedures to prevent cross contamination of apiaries
 - sampling procedures for pests and disease for confirmation
- signs and purpose for re-queening collected swarms
- swarm collecting and boxing techniques, including:
 - tools and equipment used for capturing swarms
 - hive components
- hazards and risks when collecting swarms and control strategies, including:
 - safety aspects of swarm collection and location
 - personal protective clothing
 - public safety
- workplace and statutory apiary records and notifications.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
 - access to bee swarm
- resources, equipment and materials:
 - live bees or hive preparing to swarm
 - safety equipment for handling bees
 - tools and equipment appropriate for managing swarms.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK302 Manipulate honey bee brood

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have manipulated a honey bee brood including:

- established the purpose for manipulating brood and determined appropriate actions and sequencing of a honey bee brood to achieve a desired outcome
- identified hazards, assessed the risks and implemented safe work procedures for handling bees
- selected, checked serviceability, fitted and used appropriate personal protective equipment
- selected and used tools, materials and equipment for manipulating bee brood
- complied with apiary biosecurity and quarantine procedures during the activity
- opened hives, removed frames and set aside with minimal disturbance to brood and queen
- repositioned frames safely according to plan with minimal damage or unintended disturbance to brood
- monitored the hive after manipulation
- cleaned up work area and disposed of waste appropriately
- updated and maintained workplace and statutory records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of honeybee brood manipulation
- biosecurity and quarantine requirements when manipulating bees
- bee behaviour and handling techniques
- different types of manipulation that may be used to achieve desired results, including:
 - hive expansion

- splitting and nucleus development (nucs)
- pests and disease inspection and control
- increasing honey production
- swarm control
- re-queening and queen rearing
- seasonal preparations
- frame rotation
- tools and equipment and their safe use for opening hives and manipulating brood
- types of hive waste and processes for disposal
- workplace and statutory records and reporting.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
- resources, equipment and materials:
 - hives with live bees with brood comb
 - specific hive tools
 - personal protective equipment
- specifications:
 - workplace procedures and instructions for manipulating brood
 - access to beekeeping legislation and biosecurity code of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK303 Re-queen a honey bee colony

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated that they have re-queened a honey bee colony for at least one hive including:

- monitored colony performance, assessed the queen against specifications and determined the need and method for re-queening
- identified hazards and risks and implement control measures for re-queening operations
- selected, fitted and used suitable personal protective equipment
- selected and ensured serviceability of tools and equipment required for re-queening operations
- obtained, assessed the condition and stored the new queen according to workplace and biosecurity requirements
- monitored conditions to ensure optimum time for re-queening operations
- assessed the health and condition of the parent colony
- conducted hive operations to locate old queen and replace with new queen according to selected method
- monitored hives for colony acceptance of new queen and queen brood development performance
- updated and maintained apiary records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of re-queening honey bee hives
- common manipulations, methods and techniques used to re-queen colonies

- tools and equipment required for hive operations and re-queening, including:
 - maintenance
 - safe operation
 - hygiene and biosecurity
- natural processes for queen replacement and their signs, including:
 - supersedure
 - swarming
 - emergency queen replacement
- hive monitoring techniques and assessing the performance of queen bee in the colony, including:
 - behaviour
 - colony traits
 - brood and egg laying
 - honey bee brood production
- selection criteria for queen bees
- assessing the health of queen bees
- handling queen bees, including:
 - transport and storage requirements
 - handling cages
 - handling live queen bee
 - identifying, removing and destroying old queen
 - introducing new queen
- sources of queen bees their advantages and disadvantages, including:
 - commercial suppliers
 - apiary breeding stock
 - supersedure
- health and safety hazards and risks when handling bees and personal protection equipment
- biosecurity considerations when selecting queen bees and suppliers
- workplace and statutory records and reporting procedures for re-queening operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
- resources, equipment and materials:
 - live bees
 - live queen bee as supplied by commercial supplier or own apiary breeding program
 - tools for hive and queen bee manipulation
 - personal protective equipment

- specifications:
 - workplace procedures related to re-queening a bee colony
 - workplace queen bee specifications
 - access to biosecurity code of practice
- timeframes:
 - within a specific time period according to queen bee replacement method.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK304 Remove a honey crop from a hive

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to separate bees from ripe honey comb and remove the full comb from the hive for transport to the extracting facility.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Harvesting honey is subject to state and territory food safety legislation and regulations.

Assessment Requirements for AHCBEK304 Remove a honey crop from a hive

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated that they have removed a ripe honey crop from a hive including:

- selected and ensured serviceability of tools and equipment for harvesting a honey crop
- identified work safety hazards and risks and implemented control measures when working around bees
- selected and used appropriate personal protective equipment (PPE)
- performed honey harvest activities according to food safety, quarantine and biosecurity procedures
- determined the ripeness and volume of honey comb and its readiness for harvest
- checked treatment records and ensured honey is harvested according to treatment withholding periods
- determined the factors affecting quality and quantity of honey and planned the time and location to harvest
- handled comb filled with honey to prevent contamination and maintain quality
- selected and used appropriate method to remove ripe honey comb from hives and loaded and secured for transport
- used safe handling and loading techniques
- transported and stored ripe honey comb in a pest and bee secure environment protected from damage and contamination
- updated and maintained apiary records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of removing honey filled frames from hives
- impact on colony, type of honey and apiary site on the quality of honey, planning and timing of removal
- methods of removing bees from ripe honey comb and supers, including:
 - fume boards
 - brushing
 - blowers
 - escape boards
- food safety and handling requirements of honey comb
- indicators of ripe honey and adequately filled comb
- honey quality and factors that impact on quality
- calculations for estimating volume of harvest
- hive medications and treatments and their effect on honey harvesting and withholding periods
- tools and equipment required for honey harvest operations, including:
 - maintenance
 - safe operation
 - hygiene and biosecurity
- potential contaminants of ripe honey and the effect on honey quality
- loading, securing, protecting, transporting and storing ripe honey comb to minimise contamination, and comply with biosecurity requirements
- biosecurity standards and practices, barrier system and traceability of hive components when harvesting ripe honey
- hazards and risks when harvesting honey and control measures to apply including PPE
- planning a harvest and factors and conditions that impact on timing and location
- records and record keeping systems when harvesting honey crop.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - bee hives with ripe honey
 - live bees
 - PPE
 - equipment, resources and tools used for removing bees from ripe honey comb
- specifications:

- workplace procedures for honey removal
- safety data sheets for fume boards used
- access to specific food safety regulations, biosecurity code of practice and transport regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK307 Collect and store propolis

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to collect propolis from bee hives and store propolis according to food safety standards.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work in the specialist production of propolis according to food safety and quality assurance requirements. They use discretion and judgement in the selection, allocation and use of available resources to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to collect propolis	1.1 Identify and prepare hives suitable for propolis collection 1.2 Clean and sanitise equipment to be used 1.3 Identify health and safety in the workplace hazards and take action to minimise risks 1.4 Select, check, fit and use personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Determine and implement propolis production strategy 1.6 Stimulate propolis production by manipulating hive conditions
2. Collect and store propolis	2.1 Remove propolis from hive with minimum colony disturbance and care according to production strategy 2.2 Comply with quality assurance and food safety requirements throughout propolis production process 2.3 Observe personal hygiene requirements according to food health and safety standards and workplace procedures 2.4 Extract propolis according to production strategy and workplace procedures 2.5 Store extracted propolis according to food safety standards, quality and workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret product labels, safety data sheets, instructions, procedures and specifications

Assessment Requirements for AHCBEK307 Collect and store propolis

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have collected and stored propolis including:

- assessed safety hazards, risks and applied appropriate controls
- selected, fitted and used personal protective equipment (PPE) while handling and working safely around bees
- identified and prepared hives suitable for producing propolis
- determined a propolis production strategy and manipulated hive to stimulate propolis production
- applied quality assurance and food safety and quality procedures
- cleaned and sanitised tools and removed propolis from the hive
- remove propolis ensuring minimal colony disturbance
- used appropriate propolis extraction and storage methods.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- honey bees and their behaviours for propolis and its production including types of flora
- recognition of propolis and distinguishing features from other substances collected by honey bees
- propolis production and collection strategies and hive manipulations to increase propolis production
- suitable extraction methods, conditions and constraints when collecting propolis
- methods, procedures and conditions for storing propolis
- food safety requirements when collecting propolis and working with hives
- honey industry quality assurance and biosecurity requirements specific to propolis production.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live honey bees
 - tools for manipulating a hive and collecting propolis
 - cleaning products that comply with food safety standards
 - PPE
- specifications:
 - workplace procedures for propolis production
 - safety data sheets for cleaning products.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK308 Produce and harvest royal jelly

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to manipulate a honey bee hive to encourage the production, collection and storage of royal jelly.

The unit applies to beekeepers who work under broad direction to analyse information and complete a range of specialised beekeeping activities and who demonstrate a thorough understanding of the development of queens in hives and the production of royal jelly. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

State and Territory food safety legislation, regulations and standards apply to royal jelly that is used in food for human consumption.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to produce and harvest royal jelly	1.1 Assess health and safety in the workplace hazards and risks associated with working with bees and apply appropriate control measures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Select, ensure serviceability, fit and use personal protective equipment 1.3 Assess hive for suitability for production of royal jelly 1.4 Prepare hive and introduce artificial queen bee cells 1.5 Graft bee larvae according to workplace procedures 1.6 Stimulate the colony into producing royal jelly 1.7 Ensure production equipment is clean and sanitised according to hygiene procedures
2. Collect and store royal jelly	2.1 Adhere to hygiene requirements according to food safety and workplace procedures 2.2 Ensure royal jelly collection and storage equipment is clean and sanitised according to hygiene procedures 2.3 Remove and discard larvae from queen cells ensuring no contamination of jelly 2.4 Harvest royal jelly from each cell according to workplace procedures 2.5 Prepare the royal jelly for storage according to workplace procedures 2.6 Place royal jelly into hygienic containers ensuring minimum exposure to contamination and refrigerate according to food safety procedures
3. Finalise tasks	3.1 Check, clean and store equipment according to workplace procedures and hygiene procedures 3.2 Update and maintain records according to workplace procedures and quality assurance procedures

Assessment Requirements for AHCBEK308 Produce and harvest royal jelly

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated that they have manipulated a hive to produce and harvest royal jelly including:

- assessed safety hazards, risks and applied appropriate controls
- selected, fitted and used appropriate personal protective equipment (PPE)
- assessed the suitability of hives for the production of royal jelly
- introduced queen cells, grafted larvae and stimulated the colony for royal jelly production
- handled bees and hive components while preparing the hive
- prepared and sanitised equipment ready for royal jelly harvest
- maintained a hygienic environment according to food safety requirements
- removed and discarded larvae according to workplace procedures
- collected and stored royal jelly according to workplace and food safety procedures
- checked, cleaned and stored production equipment used in royal jelly harvesting
- maintained records of royal jelly production for food safety and quality assurance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of royal jelly production in honey bee hives including biological processes and role of nurse bees
- queen bee cells and their development, larvae grafting techniques and methods of stimulating royal jelly production
- safety and safe practices when handling bees
- cleaning and sanitation methods and procedures for royal jelly production tools and equipment

- food safety requirements for collecting and storage of royal jelly
- quality assurance and record keeping requirements
- procedures and practices for removing and discarding larvae
- identification, use, maintenance and storage of tools and equipment required for production, harvesting, preparation and storage of royal jelly.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in hives suitable for royal jelly production or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live bees
 - tools and equipment required to prepare hives and harvest royal jelly
 - PPE
 - consumables and equipment required to store and preserve royal jelly
- specifications:
 - workplace procedures and specifications for royal jelly production
 - access to food safety and beekeeping legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK309 Trap and store pollen

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to obtain and install a suitable pollen trapping mechanism to collect and store pollen according to its intended use.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work in the collection of pollen according to food safety and quality assurance requirements. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

State and territory food safety legislation, regulations and standards apply to pollen that is used in food for human consumption.

Assessment Requirements for AHCBEK309 Trap and store pollen

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have trapped and stored pollen including:

- identified flora and assessed suitability of colonies for pollen collection
- selected a pollen trap and used according to manufacturer instructions
- assessed health and safety and food handling hazards and risks, and applied controls
- fitted and used appropriate personal protective equipment (PPE)
- collected, stored and processed pollen according to food safety and handling and workplace procedures
- assessed colony health, pests and contamination and rectified according to hive management procedures
- maintained records according to workplace procedures
- handled bees safely
- cleaned and sanitised equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of trapping and storing pollen
- pollen traps, their construction and operation
- colony pollen requirements and impact of harvesting on colony development including signs and symptoms of colony decline
- bee and hive handling techniques for collecting pollen
- flora resources and impact on pollen productivity
- quality assurance requirements for pollen collection including food safety and handling
- health and safety in the workplace and equipment requirements when working with hives
- commercial processing practices for pollen including, cleaning and treatments to prevent deterioration
- storage techniques for pollen for pre and post processing

- pests and contamination of pollen and corrective actions
- record keeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
- resources, equipment and materials:
 - live bees
 - tools and equipment to trap and store pollen, including pollen traps
 - PPE
 - cleaning and sanitising products
- specifications:
 - workplace procedures and specifications for pollen capture and storage
 - manufacturer's instructions for construction/operation of pollen traps
 - safety data sheets for cleaning and sanitising products
 - access to food safety and beekeeping legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK310 Process raw wax into moulds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has processed raw wax into moulds, on at least one occasion including:

- received and stored wax, ensuring no cross contamination with operational hive components
- prepared the raw wax for loading into processing equipment
- identified hazards and risks and implemented controls, including fitting and use of personal protective equipment (PPE) and safe work practices
- selected tools, equipment and moulds required for the wax processing
- ensured wax processing equipment is clean and ready for service, conducted pre start checks and identified, rectified or reported faults
- loaded raw wax into processing equipment, started equipment and monitored temperature, time and equipment operation during processing
- separated residual honey and slum gum from wax and transferred molten wax to moulds
- stored or disposed of residual honey and slum gum according to workplace, biosecurity and food safety and handling procedures
- removed wax from moulds, labelled and placed into storage according to workplace procedures
- shut down and cleaned processing equipment according to operating instructions
- cleaned work area and disposed of all waste material according to workplace waste management procedures and environmental procedures
- updated records and reports according to workplace, biosecurity and legislative requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of processing honey bee wax
- sources of raw wax used for processing and its preparation, including:
 - cappings from honey extraction
 - bur comb
 - damaged or rotated brood and honey comb
 - slum gum
- bees wax properties and impact on processing
- types and uses of residual materials in unprocessed and processed bees wax, including:
 - burned or cooked honey
 - slum gum
- wax processing equipment, their maintenance and operation, including:
 - types of wax processing equipment and their operation, solar, hot water, steam, direct heat
 - signs of faults in equipment operation and reporting procedures
 - repairs and maintenance requirements
 - cleaning procedures
- wax processing temperatures and timing
- types of moulds
- hygiene and biosecurity requirements and procedures for processing wax
- cleaning procedures and disposal of waste
- storage requirements for unprocessed and processed bees wax
- health and safety, hazards and risks and their controls when using wax processing equipment, including:
 - working with hot materials and equipment
 - PPE
 - manual handling
 - processing equipment safety
 - safe use of tools and equipment
- stock control records, labelling and mandatory records and reporting requirements for processing wax.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a wax processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - raw bees wax
 - tools for processing wax
 - PPE

- specifications:
 - workplace procedures and specifications for processing raw wax
 - manufacturer's operating instructions for wax processing equipment
 - access to specific biosecurity codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK311 Transport bee hives by road to new apiary site

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare, load and transport live bee colonies (hives) by road transport between apiary sites.

The unit applies to beekeepers who operate apiaries under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership.

The transport, siting and cross border movement of livestock including bee hives and must comply with state and territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

No vehicle licensing is required for individuals undertaking the work described in this unit. Where an individual is the nominated transport vehicle owner or driver, state and territory legislation, regulations, licencing and registration apply.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Assessment Requirements for AHCBEK311 Transport bee hives by road to new apiary site

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated that they have transported hives by road to an apiary site, including:

- prepared a hive transport plan, determined hazards to bees and people and prepared a hive management strategy for transporting bees to a new apiary site
- assessed suitability and condition of hives for road transport and secured hives and components ready for transport
- selected equipment and resources required for transit of bee hives and prepared vehicle according to workplace procedures and biosecurity requirements
- loaded and secured hives according to workplace procedures and transport regulations
- transported hives according to public safety and traffic regulations
- monitored load security and bee health during transport
- removed bee hives safely according to workplace procedures and positioned and reinstated hives according to apiary site plan
- completed documentation and permits and complied with biosecurity and regulatory requirements
- updated records, assessed, reviewed and reported on the transport plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic map reading and navigation skills to determine route parameters and transport plan, including:
 - road conditions
 - route efficiencies
 - journey duration and estimated time of arrival

- access to transport vehicle services e.g. fuel, water, air
- critical factors that affect hive health during transit, including:
 - weather and other environmental factors
 - travel time
 - road conditions
 - vibration
 - distance from previous apiary
- vehicle preparation for bee safety and vehicle operation, including:
 - tyre pressure for bee health, terrain and road conditions
 - exhaust fumes
 - pre-start checks
- transport methods for hives, including:
 - open hives
 - closed hives
 - covers and netting
 - barrier system
- transporting bee colonies and effect on health and biosecurity, including:
 - ventilation
 - water
 - loose frames
 - recognising bee disorders and distress during transport and remedial actions required
- techniques and equipment for securing hives for transport, including:
 - moving and handling hives for transport vehicle and safety
 - hive orientation on transport vehicle and impact on hive management
 - securing load techniques, load restraint procedures and transport regulations
 - vehicle load limits
 - unloading procedures
- managing live bee loads during stops, including:
 - fuel stops
 - mandatory rest periods
 - checking load movement and stability
- other road users safety when transporting live bees, including:
 - night road workers and work lights
 - police and road transport authority checks
 - weigh bridges
 - accidents and emergencies
 - emergency services
 - quarantine checkpoints
 - ferry crossings
 - urban areas

- general public approaching the transporting vehicle
- strategies to mitigate safety concerns for other road users, including:
 - signage and placarding
 - accident emergency procedures
 - communication and notification procedures
- hive manipulations to prepare for transport and restore hives to operational conditions after arrival
- assessing and reviewing transport plan and hive management strategies
- permits and regulations for transporting live bees, including:
 - biosecurity requirements
 - health certification
- record keeping and reporting procedures for bee transport
- health and safety procedures and requirements for transporting and handling hives.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary with hives to be transported or an environment that accurately represents workplace conditions
 - an apiary site prepared and ready to receive hives
- resources, equipment and materials:
 - health and safety equipment for transporting and handling bees
 - hives with live bees
 - hive tools and equipment used for transporting hives
 - vehicle for loading and transporting bee hives
 - loading and unloading tools and equipment
 - resources to secure bee hive loads to vehicles
- specifications:
 - work procedures for transporting bee hives, including safe work practices, bee handling and management, environmental requirements
 - information on equipment and vehicle carrying capacity and operating parameters
 - specifications, control points and parameters for handling and assessing bee health
 - documentation and recording requirements and procedures
 - access to biosecurity codes of practice, quarantine and transport regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK312 Extract honey

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare comb and safely operate equipment used to extract honey fit for human consumption. The work may be carried out on hive, in a mobile processing facility or a purpose built fixed facility.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

Honey extraction for human consumption is subject to state and territory food safety legislation and regulations.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to extract honey	1.1 Identify and select appropriate extraction method and equipment for type of honey production used 1.2 Identify health and safety in the workplace hazards and take action to minimise risks to self and others 1.3 Select, ensure serviceability, fit and use personal protective

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>equipment</p> <p>1.4 Ensure extraction equipment and storage containers are clean, dry, sanitised and serviceable according to workplace procedures, sanitiser product labels and safety data sheets</p> <p>1.5 Undertake personal hygiene requirements according to workplace and food safety procedures</p>
2. Prepare unprocessed honey comb	<p>2.1 Identify, select and reserve frames or sections for unprocessed honey comb according to workplace product and customer requirements</p> <p>2.2 Separate and clean sections or divide comb according to workplace product requirements</p> <p>2.3 Package, label and store raw honeycomb according to workplace quality assurance, food safety, handling and packaging requirements</p>
3.Extract honey	<p>3.1 Identify and comply with quality assurance and food safety and handling requirements throughout the process of extracting honey</p> <p>3.2 Inspect comb visually for areas of brood and prepare comb to avoid damage to brood</p> <p>3.3 Prepare comb to assist the extraction process according to workplace procedures</p> <p>3.4 Expose the honey by decapping or breaking comb avoiding unnecessary damage to cells, frames and hive components according to extraction method selected</p> <p>3.5 Operate the extraction equipment to remove honey from comb according to equipment operation instructions and safety procedures</p>
4. Handle extracted frames and supers	<p>4.1 Remove frames from extractor and return to supers according to extraction method, workplace and biosecurity procedures</p> <p>4.2 Store extracted supers in suitable bee and pest proof facility awaiting return to apiary according to workplace pest management and biosecurity procedures</p> <p>4.3 Return frames to apiary according to workplace barrier system and biosecurity procedures</p> <p>4.4 Reserve frames due for rotation or damaged and store for</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	wax extraction or repair according to workplace, quarantine and biosecurity procedures
5.Handle extracted honey	5.1 Ensure extracted honey meets temperature specifications to assist removal of wax, air, pollen and detritus 5.2 Test moisture content of honey and take action to maintain appropriate moisture according to workplace procedures 5.3 Monitor conditions of honey fermentation and implement procedures to reduce risk
6.Store honey	6.1 Store cleaned honey in containers to meet quality assurance standards, food health regulations and customer requirements 6.2 Obtain a reference sample of honey, label and store according to workplace procedures 6.3 Clean, dry and sanitise all equipment and work area according to workplace procedures.
7. Collect and store cappings and raw comb for future wax processing	7.1 Identify comb suitable for future wax processing 7.2 Extract residual honey from cappings and raw comb according to workplace procedures 7.3 Consolidate wax cappings and raw comb and store according to workplace, quarantine and biosecurity procedures
8. Maintain records of honey production	8.1 Update records for honey production according to workplace procedures and legislative requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret product labels, safety data sheets, instructions, procedures and specifications to determine activities in honey extraction processes
Writing	<ul style="list-style-type: none"> Complete workplace documentation using appropriate terminology and in required format

Skill	Description
Numeracy	<ul style="list-style-type: none"> Interprets numerical information related to testing of moisture levels in honey samples
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for following policies, procedures and regulatory requirements for extracting honey, maintaining food safety standards and quality assurance
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks for operation of extraction equipment and collection and storage of extracted honey

Assessment Requirements for AHCBEK312 Extract honey

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have extracted honey from mature honey comb, including:

- identified and selected appropriate extraction method for honey production process
- identified hazards and risks and implemented control measures and used equipment safely
- selected, fitted and used appropriate personal protective equipment (PPE) and complied with workplace personal hygiene practices
- identified, selected and prepared tools and equipment required for extraction process and ensured appropriate food hygiene procedures were performed on them
- identified, selected, prepared and stored unprocessed comb according to workplace product requirements
- identified and complied with quality assurance and food safety and handling requirements while extracting honey
- safely extracted honey using extraction equipment in compliance with quality assurance and food safety requirements
- prepared the comb for extraction avoiding brood comb according to the extraction method and equipment being used
- organised frames from the extraction process stored, returned to apiary or retained for repair or future wax processing in compliance with pest management, biosecurity and barrier system requirements
- ensured extracted honey was maintained at specified temperature to assist removal of wax, air, pollen and detritus
- tested moisture content of honey and took action to maintain appropriate condition
- monitored conditions conducive to honey fermentation and implemented procedures to reduce risk
- stored honey in containers and obtained a reference sample following to meet quality assurance standards, food health regulations and customer requirements
- identified comb suitable for wax processing, collected, removed residual honey and stored wax cappings following workplace, quarantine and biosecurity procedures
- cleaned and sanitised honey extraction equipment
- maintained appropriate records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of honey extraction
- recognition of different types of bee comb and maturity, including:
 - brood worker and drones
 - queen cells
 - mature and immature honey comb
 - pollen cells
- biosecurity protocols for honey extraction and transport of supers and hive components to extraction site
- processing of raw honey comb, including:
 - sections
 - cutting/slicing comb from frames
- honey extraction processes, including:
 - pressing
 - centrifugal/spinning
 - gravity draining or drip method
- equipment commonly used to extract honey and the safe operation and maintenance requirements
- hygiene and sanitation procedures and materials used for tools, equipment and storage of extracted honey
- storage requirements of honey, honey comb, extracted frames and supers including bulk storage and pest management
- food safety systems and requirements relevant to honey extraction
- quality assurance tests and standards for extracted honey
- temperature and the effect of heat on the extraction processes and quality of honey
- health and safety in the workplace issues associated with extraction and extraction technologies
- record keeping systems and labelling for extracted honey
- preparation and storage procedures for comb at time of extraction for later wax processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - either a portable honey extraction unit or a permanent extraction facility
- resources, equipment and materials:
 - mature honey comb ready for extraction

- specific tools and equipment for the type of extraction method employed
- PPE
- sanitising chemicals and equipment
- specifications:
 - workplace procedures related to honey extraction
 - manufacturer's operating instructions for honey extraction equipment
 - safety data sheets for chemical sanitisers
 - access to specific legislation/codes of practice related to honey extraction and food safety.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK313 Manage pests and disease within a honey bee colony

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to inspect a honey bee colony for indicators of disease or evidence of pests, and take appropriate follow-up action.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership, compliance with biosecurity codes of practice and notifiable pests and diseases.

Assessment Requirements for AHCBEK313 Manage pests and disease within a honey bee colony

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated an ability to manage pests and diseases that affect brood and adult bees including:

- selected and ensured serviceability of tools and equipment for opening and checking hives
- identified health and safety in the workplace hazards and risks and implemented control measures when working around bees
- selected, fitted and used appropriate personal protective equipment (PPE)
- conducted inspections to hive to assess general health and condition of brood and adult honey bees and identified signs and symptoms of disease and pests that affect brood or adult honey bees
- collected samples and conducted field diagnosis following workplace procedures and industry standards
- labelled and secured samples for dispatch to specialist and confirmed diagnosis and reported notifiable diseases
- identified and implemented appropriate treatments and biosecurity measures to control pests and diseases
- monitored, reviewed and recorded outcomes of treatments for future beekeeping operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of disease management within a honey bee colony
- pests and diseases of bees including common and notifiable species, including:
 - mechanism for infection/infestation
 - level of risk to bees and beekeeping industry

- biological processes relevant to infection and control
- hive inspection procedures and recording pests and disease observations
- identification of pests diseases, including:
 - signs and symptoms
 - field diagnosis techniques
 - collecting, labelling and sending samples for specialist diagnosis
 - immune detection kits
- types of samples and procedures, including:
 - adults
 - brood
 - honey
 - comb
- legislative and biosecurity standards for pests and diseases control and notification for Australian apiaries including procedures for reporting
- tools, equipment, materials and safe handling procedures when manipulating hive components and taking samples
- hazards and risks when working with bees and collecting pests and disease samples
- hygiene and sanitation practices for tools and equipment
- biosecurity procedures for pests and diseases of honey bees, including:
 - barrier systems
 - isolation
 - quarantine
 - frame rotation
- treatment of contaminated hive components, including:
 - burning and burial
 - sterilisation and irradiation
 - dipping treatments (e.g. hot wax or caustic dips)
 - scorching
- hive health, pests and disease control
- treatments for specific pest and diseases, including:
 - chemicals, types and application methods
 - antibiotics and prescription treatments
 - environmental treatments
- procedures for monitoring and reviewing treatments
- record keeping for pests and diseases including mandatory and workplace documents.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active aviary or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - live bees
 - hive management tools
 - treatments appropriate to pests or diseases
 - equipment and materials required for field diagnosis activities
 - PPE
 - inert samples or representations of bee pests and diseases
- specifications:
 - workplace procedures for managing pests and diseases within a honey bee colony
 - safety data sheets for pest and disease treatments
 - access to specific legislation and codes of practice relevant to biosecurity and mandatory reporting
- relationships:
 - specialists in honey bee pest and disease diagnosis.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK402 Perform queen bee artificial insemination

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated artificial insemination on at least one occasion including:

- reviewed options and developed artificial breeding objectives
- selected and scheduled an artificial breeding option for breeding program
- obtained resources and determined artificial insemination activities
- identified hazards and risks and implemented control measures
- selected, fitted and used appropriate personal protective equipment (PPE)
- obtained and ensured genetic material complied with breeding characteristics and objectives
- received, checked and stored genetic materials to ensure maximum viability
- ensured queen and drone maturity and breeding cycles aligned
- prepared queen and drone honey bees for artificial insemination
- used appropriate techniques to extract semen from drones and inseminate queens
- complied with required hygiene practices
- introduced inseminated queen bees to new hive and monitored progress and success
- reviewed and documented genetic material transfer and management practices
- determined the success of artificial insemination program by calculating success rates
- maintained records in relation to an artificial insemination program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of artificial insemination of queen honey bees

- anatomy and physiology of reproductive organs and reproductive process in queen and drone honey bees
- genetics and inheritance for bee characteristics required in genetic material, including:
 - honey bee health
 - abnormalities
 - productivity
 - habit
- artificial breeding methods and the benefits and limitations
- identification systems for queen and drone honey bees and semen
- physical resource requirements for artificial insemination practices
- safe handling and transportation of bees and genetic material
- artificial insemination policies and recording and reporting requirements
- preparation requirements for artificial insemination
- semen collection and preparation processes
- reviewing and maintaining effective insemination procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a laboratory or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live queen bees and donor drones
 - tools and equipment for collecting sperm and inseminating queens
 - PPE for hygiene and safety
- specifications:
 - workplace procedures for laboratory operations
 - workplace specifications for bee breeding.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK405 Select and establish an apiary site

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to evaluate and analyse potential honey production sites and select, establish and evaluate an apiary site.

The unit applies to experienced beekeepers with thorough understanding in honey production who analyse nectar flow and likely honey production to complete a range of specialist apiary site selection and establishment activities. They work autonomously and have accountability for the work of others. They research, analyse, design and communicate solutions to a range of complex problems.

All work must be carried out to comply with workplace procedures, state/territory legislation, regulations and local government by-laws which may apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice. The transport, siting and cross border movement of livestock including bee hives must comply with state/territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to select and establish an apiary site	1.1 Establish and prioritise criteria for selecting a site 1.2 Identify suitable locality in which to search for site 1.3 Identify appropriate certificates and permits required for moving and establishing an apiary site 1.4 Gather and analyse information for potential sites in selected locality
2. Select the apiary site	2.1 Analyse data collected and select suitable site according to criteria 2.2 Determine capacity of available flora to support desired number of hives 2.3 Prepare a plan to establish an apiary at the selected site 2.4 Select precise areas to establish an apiary within the site 2.5 Ensure appropriate permissions and certificates are obtained prior to locating apiary
3. Establish the apiary at the selected site	3.1 Identify health and safety, biosecurity and food safety hazards and risks and implement controls for establishing suitable apiary sites 3.2 Select, fit and use personal protective equipment 3.3 Select tools and equipment required and ensure serviceability 3.4 Transport hives to apiary site according to workplace procedures, legislative requirements and biosecurity procedures 3.5 Locate hives on site according to site establishment plan and safe handling procedures 3.6 Observe and record access of bees to floral sources and water and effect on colony strength and production 3.7 Monitor the suitability of the site and reposition hives according to honey production and bee activity 3.8 Record results of inspections and any remedial action according to biosecurity and production procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret symbols and other technical information on maps and other documentation that impact on apiary site selection
Writing	<ul style="list-style-type: none"> Document outcomes of site performance and activities using industry terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to analyse potential honey production and costs for selected site
Navigate the world of work	<ul style="list-style-type: none"> Accept responsibility and ownership for selecting a site and make decisions on suitability and coordination of resources Follow explicit and implicit policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Select and use appropriate conventions and protocols when communicating with persons when seeking permission for site
Get the work done	<ul style="list-style-type: none"> Make routine decisions and implement standard procedures for site selection tasks and resources

Assessment Requirements for AHCBEK405 Select and establish an apiary site

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated site selection and establishment of an apiary site including:

- established and prioritised selection criteria for apiary site
- identified suitable localities and appropriate permits and certificates required
- analysed site options and selected site according to selection criteria
- determined apiary capacity, orientation and layout, and prepared an establishment plan
- selected actual site and ensured appropriate permissions and certificates were obtained
- identified health and safety, food safety and biosecurity hazards and risks and implemented control measures
- selected serviceable tools and equipment required for site establishment
- transported hives to site safely, and located hives according to establishment plan and legislative and biosecurity requirements
- observed, monitored and recorded apiary performance and implemented corrective action according to apiary plan
- maintained apiary records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of apiary site selection
- sources of information for selecting potential sites
- site selection criteria for strategic and regulatory purposes, including:
 - legislation, regulations and biosecurity codes of practice relevant to the establishment of apiary sites

- relevant planning and land use regulations and permissions
- proximity to flora, water, general public, animals, gates, stockyards and movement of the sun
- accessibility of the site for beekeeper and security
- nearby land use
- protection from extreme environmental conditions
- fire risk
- site selection criteria for different bee management purposes, including:
 - honey
 - pollen
 - propolis
 - royal jelly
 - queen rearing
 - pollination services
 - over wintering
- nutritional and other requirements of a bee colony
- hazards, risks and controls associated with establishing apiaries, including:
 - personal protective equipment
 - safe handling procedures
 - barriers and distances from sensitive areas and public space
 - hive densities
 - elevated hives
- tools and equipment and their safe use for handling bees and hives when establishing an apiary site
- types of flora for the production of pollen and nectar flow
- apiary records and recording systems
- bee keeping legislation and biosecurity codes of practice for apiary sites, including:
 - weeds
 - diseases
 - pests
 - genetically modified organisms
 - certified organic produce.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live bees in hives

- tools and equipment for working with and re-locating hives
- personal protective equipment
- maps showing site access and available resources
- specifications:
 - workplace procedures related to selecting and establishing an apiary site
 - workplace specifications for apiary site layout and orientation
 - access to legislation, permit requirements and biosecurity codes of practice related to establishing an apiary site.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK408 Provide bee pollination services

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to negotiate with clients and to determine pollination requirements and costs for bee pollination services.

This unit applies to experienced beekeepers who analyse information and exercise judgement to complete specialised pollination services activities. They work autonomously, have accountability for the work of others. They analyse, design and communicate solutions to a range of complex problems.

The transport, siting and cross border movement of livestock including bee hives must comply with state/territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess pollination service requirement	1.1 Discuss and confirm the pollination services required with client 1.2 Determine number, location and types of colonies required for crop 1.3 Confirm state, territory and local government legislative and regulatory and requirements, including biosecurity affecting

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>pollination services</p> <p>1.4 Assess strength, condition and health of bee colonies for their suitability for use as crop pollinators</p> <p>1.5 Assess risk of pollination problems with client and establish process to monitor risk</p> <p>1.6 Provide technical information to client to support bee performance and maintain health</p> <p>1.7 Obtain appropriate certificates and permits where bees are to be moved across state borders</p>
2. Price and formalise agreement for pollination services	<p>2.1 Identify resources and calculate costs in providing pollination services</p> <p>2.2 Confirm with client the price for pollination services</p> <p>2.3 Document, confirm and exercise an agreement with client to provide pollination service</p>
3. Prepare apiary sites and deliver hives to client	<p>3.1 Prepare sites for hives according to workplace procedures and client requirements</p> <p>3.2 Deliver hives to site and set up apiary according to client and workplace procedures, legislative requirements and biosecurity code of practice</p> <p>3.3 Demonstrate strength and condition of hives to client to confirm agreed service has been provided</p>
4. Monitor pollination performance of bee colonies	<p>4.1 Liaise with client on spraying programmes to minimise damage to bees</p> <p>4.2 Monitor crop within appropriate timeframe for evidence of bee foraging and pollination efficiency</p> <p>4.3 Carry out bee husbandry practices to ensure apiary performance</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> • Draft and finalise written pollination service agreements for clients • Accurately complete applications for permits and certificates according to legislatives and regulatory requirements
Numeracy	<ul style="list-style-type: none"> • Perform calculations to analyse bee and pollination data, including quantity of hives required, costs and the performance of pollination services
Oral Communication	<ul style="list-style-type: none"> • Determine and confirm client requirements using active listening and questioning and observation of verbal and non-verbal signals to convey and clarify information and to confirm pollination services required
Get the work done	<ul style="list-style-type: none"> • Plan and monitor progress of services and reviews and implements change to meet client and service requirements

Assessment Requirements for AHCBEK408 Provide bee pollination services

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have provided bee pollination services, including:

- discussed and confirmed pollination service requirements with a client
- assessed number, types and hive condition required for pollination outcomes
- assessed the risks of pollination services and provided technical advice to client
- identified resources and calculated costs associated with providing the pollination service and confirmed with client
- prepared and implemented an agreement after confirmation with client
- identified suitable locations within crop or site for hive placement and established, delivered and managed an apiary for pollination services
- liaised with the client to protect apiary from chemical use
- monitored and managed hive activity according to industry practice and agreed service outcomes
- obtained requisite certificates and permits and complied with relevant legislation, regulations and biosecurity codes of practice.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of pollination services
- crop chemicals and alternatives when managing hives
- environmental and climatic factors affecting bee foraging behaviour and pollination
- health and performance of bee colonies, including:
 - pests and diseases
 - swarm management
- hive management strategies, including effects of:

- weather
- nutrition
- water requirements
- basic negotiation skills and essential elements of valid agreements and service contracts
- pollination requirements of major crops targeted, including:
 - hive numbers, strength and densities
 - locality conditions of operation
 - competing crops and plants
 - timing to maximise crop pollination
- measuring and assessing pollination performance and success and readiness to remove
- site selection and impact of location on colonies to maximise pollination
- calculations and pricing techniques for service industry
- legislation, regulations and biosecurity requirements affecting pollination services.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live bees in hives
 - tools and equipment required to locate and manage hives
 - access to crop requiring pollination
- specifications:
 - client specifications for pollination service
 - access to legislation/codes of practice related to pollination services
- relationships:
 - client with pollination requirement.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK409 Rear queen bees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to rear queen bees and queen cells through the manipulation of hives.

The unit applies to experienced beekeepers who exercise judgement to complete a range of specialist activities requiring a thorough understanding in honey production. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

All work must be carried out to comply with workplace procedures, state and territory legislation, regulations and local government by laws that apply to the ownership and registration of bee hives and compliance with industry biosecurity codes of practice. The transport and cross border movement of livestock including queen bees must comply with state and territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish breeding stock and obtain	1.1 Select and obtain queen bee breeding stock according to breeding program

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements for queen bee rearing	1.2 Identify health and safety hazards, risks and implement controls according to workplace requirements 1.3 Select, fit and use personal protective equipment 1.4 Select and safely use tools and equipment required to rear queen bees 1.5 Confirm site quarantine and other biosecurity protocols and ensure that they are followed
2. Assess condition of colonies and nurse bees and prepare queen cups with larvae	2.1 Ensure hives and colonies used for queen bee and drone production are in a clean and healthy condition 2.2 Select larvae from the breeder queen bee cells for grafting according to specification 2.3 Select and prepare queen cups according to workplace procedures and production method 2.4 Transfer larvae from worker cells into queen cell cups according to workplace procedures 2.5 Ensure an adequate number of nurse bees are present in cell raising colonies
3. Establish and monitor the queen mating process	3.1 Transfer ripe queen cells into the nucleus after grafting according to workplace procedures 3.2 Provide drones during mating period according to workplace standards and specifications 3.3 Monitor and maintain hives in a healthy pest and disease free condition 3.4 Maintain records of grafting and queen rearing activities according to workplace procedures
4. Package queen bees for transport	4.1 Select type of queen cage suitable for transport according to workplace procedures and method of production 4.2 Capture mated queen bee and transfer to queen cage supported by young escort bees according to cage type and workplace procedures 4.3 Ensure queen cage is stocked with food and secured for transport 4.4 Prepare package with queen bee cage and contents according to transport method and according to workplace and transport company procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret queen bee breeding procedures and specifications to determine requirements
Writing	<ul style="list-style-type: none"> Accurately record and complete workplace documents and using clear language and correct spelling, grammar and terminology
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following policies, procedures, legislative requirements and industry codes of practice relevant to queen bee rearing
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks for queen bee production

Assessment Requirements for AHCBEK409 Rear queen bees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have reared queen bees including:

- obtained queen bee breeding stock according to breeding program
- assessed safety hazards, risks and implemented controls
- obtained tools, equipment and personal protective equipment (PPE) required for breeding manipulations and ensured serviceable for use
- conducted all bee manipulations and activity according to biosecurity and quarantine protocols
- ensured hives used for queen rearing are clean and healthy
- prepared queen using desired method and assessed, selected and grafted larvae into queen cells according to workplace procedures
- assessed and maintained nurse bee population to support developing queens
- monitored and maintained hive nutrition and health
- transferred ripe queen cells into nucleus
- monitored the queen mating process and provided drones according to workplace procedures
- maintained records according to workplace and industry procedures
- selected queen bee cage type and packaging requirements and ensured adequate food and escort bees for transport
- prepared package for transport according to workplace procedures and transport company requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of rearing queen bees
- basic genetics, breeding and evaluation for selecting queen bee stock

- techniques and timing for queen cell production including queenright and queen less starter and finishers
- grafting techniques including the use of kits
- making, placement and use of nucleus hives (nucs) for queen rearing
- capturing and handling techniques for queen bees
- holding and securing queen bees, including:
 - queen cages
 - queen banks
- transport, postage and handling queen bees
- labelling and identifying queens including international colour codes
- monitoring and recognising brood and adult bee health, diseases, pests and other disorders and required action
- optimum conditions and timing for queen rearing activities
- required number of mature, healthy and genetically suitable drones
- standards and protocols for selecting and manipulating bees and larvae for queen bee production.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an active apiary
- resources, equipment and materials:
 - live bees and queen bee stock
 - hive manipulation and larvae grafting tools
 - PPE
- specifications:
 - workplace procedures and specifications for rearing queen bees
 - access to legislation and codes of practice for biosecurity and queen bee breeding.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBUS301 Use hand held e-business tools

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use hand held e-business tools including computers, personal data assistants, (PDAs), radio frequency (RF) scanners, microchip scanners, mobile phone enabled email and SMS, data recording devices, barcoding equipment.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes and in consultation with the management team.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They must use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare hand held e-business tools for use	1.1 Select e-business tools 1.2 Complete relevant start-up procedures 1.3 Configure tools with business data 1.4 Test connectivity
2. Use hand held e-business tools	2.1 Use e-business tools 2.2 Address equipment faults 2.3 Check data for accuracy and address errors
3. Process business data	3.1 Generate and compile business data 3.2 Process business data 3.3 Maintain the integrity of data and data security 3.4 Review performance of hand held e-business tools and make recommendations for improvements to hardware, software or their use in accordance with e-business strategy and budget

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBUS301A Use hand held e-business tools.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBUS301 Use hand held e-business tools

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare hand held e-business technology
- use relevant technology such as computers, handheld scanners, and barcoding equipment
- enter and process data according to technical and business requirements
- generate data in the format required by the e-business supply chain.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features and operating procedures of relevant business tools
- relevant protocols for electronic data interchange
- personal identification and password for online access between businesses for access to inventory data and purchasing, payment or supply processes.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHCCCF401 Prepare project acquittal

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to review project documentation and prepare an acquittal statement for approval and auditing.

It applies to community program managers who have to prepare project acquittal statements. This includes taking responsibility for own work and providing and communicating solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish acquittal records	1.1 Review program or project plans, guidelines or contracts and financial reporting requirements 1.2 Collect financial information for acquittal report 1.3 Establish records of materials, equipment and labour provided before start of project for acquittal report

Element	Performance criteria
2. Identify transactions and reports relating to project	2.1 Identify project-related accounting transactions and reports in group accounts for use in acquittal 2.2 Determine need for separate statements based on different funding sources 2.3 Estimate financial values of in-kind donations of materials, loan of equipment and labour
3. Prepare acquittal in required format	3.1 Prepare acquittal from accounting and other information to program and contract requirements 3.2 Report program funds and expenditure on operations separately from group contributions to project 3.3 Report group contributions to project to contract requirements 3.4 Consolidate report for approval and auditing
4. Arrange audit of acquittal and transaction	4.1 Arrange audit of report to program and contract requirements 4.2 Arrange approval of report to group, program and contract requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF401A Prepare project acquittal.

Links

Assessment Requirements for AHCCCF401 Prepare project acquittal

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collate budgeted resources and inputs to project from planning document
- access accounts and develop a list of transactions related to the project
- prepare the project acquittal for reporting and auditing to program or funding body requirements
- arrange for an audit of the acquittal, the final report and the full list of transactions.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- program objectives and guidelines
- agency procedures for preparing project acquittals
- basic financial reporting formats and procedures
- project acquittal reporting requirements.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCCF402 Report on project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collate the documentation for the background and aims, budget, timelines, and resources allocated for the project
- prepare a report format that complies with organisational and funding organisation's requirements
- apply drafting and editing techniques in report writing
- implement consultation processes to determine report conclusions
- respond to feedback on draft report and finalise the version to be published and distributed
- develop project reports to organisational and funding organisation's standards
- finalise report within approved timeframe.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- program objectives and guidelines
- project report formats
- contractual requirements for reporting
- project background, processes and outcomes
- agency procedures for drafting, consultation and finalising project reports.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF403 Obtain and manage sponsorship

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to obtain program sponsorship and manage sponsorship commitments.

It applies to those who plan and obtain sponsorship for a community program such as Landcare. It includes taking responsibility for own work and providing and communicating solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify sponsorship opportunities	1.1 Target appropriate partners to the program as potential sponsors 1.2 Develop a rationale for sponsoring the program or activities which achieves a balance between the sponsors' requirements and the program goals, and benefits to the sponsor and program 1.3 Confirm feasibility of sponsorship opportunities through research

Element	Performance criteria
	<p>and analysis</p> <p>1.4 Itemise mutual benefits and develop list of targets</p> <p>1.5 Consider community, cultural and equity requirements in the group operations in developing list of target sponsor companies</p>
2. Prepare and deliver sponsorship pitch	<p>2.1 Make contact with potential sponsor</p> <p>2.2 Maintain the best interests of the program, group and agency in sponsorship approach</p> <p>2.3 Prepare presentation support materials with appropriate accuracy, style and degree of information</p> <p>2.4 Ensure presentation and approach demonstrates an understanding of and respect for sponsors' business and shows how sponsorship will be mutually beneficial</p> <p>2.5 Include outcomes of any prior sponsorship arrangements in pitch and negotiations</p> <p>2.6 Follow up presentation in a manner that preserves the integrity of the negotiations</p>
3. Successfully negotiate sponsorship deal	<p>3.1 Agree on terms which satisfy both the sponsor and the program and the associated agency</p> <p>3.2 Express nature of sponsorship and the benefits to the sponsor in explicit terms, ensuring they are understood by both parties</p> <p>3.3 Identify commitments under the sponsorship arrangements to assist maintenance of relationship</p> <p>3.4 Prepare a sponsorship agreement, contract or memorandum of understanding in accordance with enterprise, sponsor and legal requirements</p>
4. Maintain sponsorship deal	<p>4.1 Meet legal, financial, cultural, ethical, equity and other requirements throughout the sponsorship period</p> <p>4.2 Meet commitments under the sponsorship arrangements promptly and deliver benefits to the sponsor as agreed</p> <p>4.3 Recognise the support of sponsor for program or project in literature, reports and on-site</p> <p>4.4 Identify timing for the start of discussions to extend or complete the sponsorship</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF403A Obtain and manage sponsorship.

Assessment Requirements for AHCCCF403 Obtain and manage sponsorship

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify sponsorship opportunities with companies that have common values to the program
- identify the mutual benefits the sponsorship arrangement could provide to both organisations
- develop and present a sponsorship pitch that creates a professional and honest image
- negotiate an appropriate sponsorship arrangement to support a project
- document a sponsorship arrangement, detailing all agreements and responsibilities
- meet legal, financial, cultural, ethical, equity and other requirements for the duration of the sponsorship arrangement
- review a sponsorship arrangement and plan its renegotiation.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- strategy, goals, ethics, program and activities of community group or agency
- effective marketing techniques
- acts, policies and guidelines governing programs and activities
- sources of legal and financial advice
- operation of contracts and agreements.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF404 Contribute to association governance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor association activities and contribute to association governance.

It applies to individuals who take responsibility for others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor association activities	1.1 Monitor activities undertaken by group to ensure: <ul style="list-style-type: none"> • association objectives are being adhered to • resolutions of meetings are being followed • finances are properly managed • employees are managed and volunteers are appropriately supervised • legislative requirements are being met

Element	Performance criteria
	<ul style="list-style-type: none"> • ethical requirements are being met • group operations and approaches are sensitive to and inclusive of community and sections within the community 1.2 Note variations from expected standards and take immediate routine action
2. Identify opportunities, threats and risks	2.1 Identify and recommend opportunities for the group to commence new projects or activities to the committee 2.2 Identify and raise threats to the ongoing operation of the group at committee meetings 2.3 Identify risks associated with the group's activities and ongoing operation 2.4 Submit risks and proposed risk control measures to the committee
3. Participate in board/committee meeting	3.1 Review agendas before meetings 3.2 Submit agenda items and reports as required 3.3 Attend meetings and discuss issues on the agenda 3.4 Establish and maintain communications with other members to ensure competent management of group affairs 3.5 Raise personal observations and concerns at committee meetings including opportunities, threats and risks 3.6 Take actions and report on commitments made at meeting

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF404A Contribute to association governance.

AHCCCF407 Obtain resources from community and groups

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to obtain resources from community and groups and coordinate the use of resources in projects.

It applies to those who source resources from within the community and group to support Landcare or similar group activities and projects.

This unit applies to individuals who take responsibility for others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify potential resources	1.1 Determine resources required to carry out a project, function or activity

Element	Performance criteria
	1.2 Identify potential resources in the group, community and agency to match project requirements as documented in plan 1.3 Identify likely conditions under which alternative resources would be sourced in order to determine suitable sources and conditions of supply
2. Seek commitment of resources	2.1 Approach owners of resources to discuss resource availability and conditions of availability 2.2 Review costs of alternative arrangements in context of the budget to determine which arrangements can be accepted or renegotiated 2.3 Make arrangements with resource owners to access resources within overall project plan and budget 2.4 Ensure approach and relationship with resource owners caters for range of viewpoints to ensure a positive image of program is maintained
3. Coordinate use of resources	3.1 Coordinate provision of resources to suit project plan and any changes in timing and availability of complementary resources 3.2 Record use of resources to program and project requirements 3.3 Acknowledge contributors of resources in project documentation or reports

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCCCF415 Coordinate social events to support group purposes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- facilitate small groups to plan event
- coordinate group members to organise and run events
- plan and follow-up tasks to be completed for the social event
- assess and manage risks to ensure safety of members and visitors
- close event and restore venue to clean, pre-event condition
- conduct evaluation of event to make recommendations for future events
- organise appropriate events in keeping with the community group's goals and vision

Knowledge Evidence

The candidate must demonstrate knowledge of:

- resources available in the community
- resources required for different types of events
- group goals and aim of events
- community views and cultures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF416 Present proposed courses of action to meeting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop proposed courses of action and present recommendations at meeting.

This unit applies to community program facilitators. These individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop course of action and documentation	1.1 Identify and compare a range of courses of action to proposed course of action 1.2 Determine best course of action related to goal, action strategy, project or issue to solve a problem or to advance the group 1.3 Determine legislative and ethical requirements and diverse

Element	Performance criteria
	viewpoints for inclusion in decision or discussion 1.4 Identify reasons for proposed course of action including costs and benefits
2. Present recommendations	2.1 Present recommendations and rationale to committee for approval

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF416A Present proposed courses of action to meeting.

Assessment Requirements for AHCCCF416 Present proposed courses of action to meeting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop solutions or appropriate courses of action on own or in small groups
- present recommendations to a meeting, including analysis of suitability of course of action

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of knowledge and advice appropriate to submission
- legislation and regulations related to proposed course of action
- structure for presenting reasoned submissions

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF501 Evaluate project submissions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and apply evaluation criteria and processes to project submissions.

This unit applies to those who typically work as part of a team process to decide on government funding for community-based projects at regional and State/Territory levels.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Review previously planned project	1.1 Identify updates to proposed project outcomes and evaluation

Element	Performance criteria
outcomes	processes 1.2 Conduct consultations with community group leaders, coordinators and facilitators to identify any changes to original plan, timelines, outcomes, and to evaluation 1.3 Identify availability of data and suitable range of methods to evaluate project progress
2. Develop evaluation approach for project submissions	2.1 Develop criteria for evaluation of project applications or submissions 2.2 Develop decision making process for evaluating and accepting or rejecting project submissions 2.3 Consult with stakeholders on proposed criteria and decision making process 2.4 Review process based on stakeholder feedback and organisational requirements 2.5 Develop review panel for evaluation of project submissions 2.6 Communicate decision making process and selection criteria to review panel, project applicants and other key stakeholders
3. Evaluate project submissions	3.1 Acknowledge receipt of all project submissions 3.2 Use agreed processes and criteria to evaluate project submissions 3.3 Review decisions with other panellists to determine outcomes
4. Communicate decisions	4.1 Communicate decisions of panel to project applicants 4.2 Provide feedback on submissions and reasons for decisions 4.3 Publish outcomes according to organisational policies and procedures
5. Report on and implement conclusions	5.1 Prepare report to program, agency and project requirements 5.2 Check analysis and report conclusions with key stakeholders to identify any deficiencies to be removed or additional information that should be included 5.3 Ensure report meets required program and agency standards in terms of layout, format, style and process 5.4 Ensure data collection, analysis and reporting are timely to project agency requirements 5.5 Submit report according to project, program and agency requirements 5.6 Implement report conclusions to project, program and agency requirements and within the scope of the group resources and authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF501A Evaluate project submissions.

AHCCCF502 Facilitate development of group goals and projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to facilitate development of group goals and projects.

This unit applies to those dealing with groups and communities involved in a Landcare or similar program and covers the facilitation role to assist a group to develop its direction and role in terms of goals, action plans and projects, and to prepare submissions for funding on relevant projects. These individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Promote the identification of land management and	1.1 Encourage group members to identify local environmental issues within the context of the group's activities and program scope 1.2 Develop identified issues in terms of problems, causes and actions

Element	Performance criteria
environmental issues	<p>required</p> <p>1.3 Provide opportunities for group members to learn about environmental matters and to acquire additional related skills</p>
2. Facilitate development of priorities for action	<p>2.1 Facilitate group to develop potential action strategies for identified issues that comply with program scope</p> <p>2.2 Determine priorities for action strategies based on members' interests and skills, the impact on environmental issues and promotion of solutions, and compliance with the program guidelines</p> <p>2.3 Ensure facilitation processes used are appropriate to the level of group development</p>
3. Facilitate development of goals	<p>3.1 Facilitate the group to develop goals and link them to action strategies in a cohesive action plan</p> <p>3.2 Support group to document their goals and action strategies and achieve membership approval</p> <p>3.3 Review previous goals and action plans with the group as part of the development of new goals and action plans</p> <p>3.4 Identify role of coordinator in group development and management to reduce unrealistic expectations and conflict</p> <p>3.5 Manage individual views and interests to ensure group cohesion is maintained</p> <p>3.6 Enable group to develop its goals and projects within its rules of association and program guidelines</p> <p>3.7 Correlate goals and action strategies to regional plans and initiatives</p>
4. Support group to identify and evaluate potential projects	<p>4.1 Facilitate group to identify a range of potential projects within goals and action strategy</p> <p>4.2 Lead group through an evaluation process of alternative projects to determine: compliance with members' interests and skills; project scope within the resources of the group or network of regional groups; compliance within program scope; available funding; and potential for acceptance</p> <p>4.3 Encourage group to review the results of previous projects and submissions for funds as part of the development of new projects</p> <p>4.4 Ensure facilitation process is sensitive to individual member viewpoints, perspectives and cultures, and considerate of community goals and plans to manage any potential conflict</p>
5. Support group in development of project proposals and submissions	<p>5.1 Facilitate group to develop a project plan and costing within program guidelines</p> <p>5.2 Assist group to prepare project proposal in terms of the program requirements and to complete submission for lodgement to the</p>

Element	Performance criteria
	authorities by the due date 5.3 Assist group to document project evaluation requirements in accordance with program and proposal requirements 5.4 Source relevant information to assist the group with the submission

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF502A Facilitate development of group goals and projects.

Assessment Requirements for AHCCCF502 Facilitate development of group goals and projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- facilitate development of group goals and projects
- identify and discuss land management issues with local groups
- work with groups to identify local actions that they can become involved in to promote improved land management outcomes
- provide support to a group in developing project plans and preparing project proposals and submissions
- facilitate group to reach consensus in planning decisions
- facilitate group to allow all group members the opportunity to contribute to discussions

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the range of group facilitation styles
- previous group history
- local, regional and national environmental issues
- regional community, groups and cultures
- strategic planning principles
- national, State and regional funding priorities
- community and sector perspectives on land management and environmental issues
- project planning, budgeting and costing techniques
- mediation and facilitation strategies

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF503 Promote group formation and development

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to promote group formation and development to address land management programs or projects.

This unit applies to those who bring people together to form and strengthen a Landcare group or similar, its processes and outcomes. These individuals exercise autonomy and manage other to undertake complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify potential for group	1.1 Carry out community research to determine potential interest in forming group in a locality or region 1.2 Encourage members of existing groups to use their networks to promote the group and program, and to obtain new members

Element	Performance criteria
2. Develop approach to create and maintain interest	2.1 Identify community organisations and media as potential avenues for promotion 2.2 Promote program in region or locality to create interest in it and its objectives 2.3 Modify approaches to diverse sections of the community to cater for their perspectives and cultures 2.4 Bring together people interested in forming new groups
3. Communicate group potential and achievements	3.1 Identify and promote environmental issues that have the potential to be addressed by the community and group to raise interest 3.2 Record and use group and regional achievements to promote the group and the program 3.3 Identify and address any tension or conflict between people in group formation and development using appropriate and consistent conflict resolution approaches
4. Enlist members and volunteers	4.1 Invite contacts to join the group and program to increase community involvement and resources 4.2 Identify interests and skills of community members to introduce them to relevant program activities and others with mutual interests 4.3 Give people who wish to form new groups advice, support and access to information and program resources 4.4 Ensure approaches and dealings with individuals and groups include appropriate regard for cultural issues, equity and disability 4.5 Manage minority interests within the group to develop group cohesiveness in line with program requirements 4.6 Use activities to facilitate group formation and bonding and to attract new members

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF503A Promote group formation and development.

AHCCCF504 Support group and community changes in resource management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support group and community changes in resource management.

This unit applies to those who support change management processes in a group and community context. These individuals take personal responsibility and exercise autonomy in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify changes occurring at group and community levels	1.1 Identify changes at group and community level due to voluntary initiatives or legislative requirements

Element	Performance criteria
2. Identify potential impacts and reactions	2.1 Identify potential impact of changes and reactions at group and community level 2.2 Identify support in terms of change management initiatives that may be required to implement change in the group or community 2.3 Identify cultural and sector perspectives and viewpoints to address different reactions to change
3. Facilitate change management processes	3.1 Distribute information related to the changes in terms that assist understanding and acceptance 3.2 Enable group to develop understanding of change, to manage reactions and to develop response 3.3 Encourage group to develop and implement a plan to address change and its impacts

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF504A Support group and community changes in resource management.

AHCCCF505 Contribute to regional planning process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to contribute to a regional planning process.

This unit applies to those whose job role requires them to contribute to and assist in the regional planning process under the broad direction of technical specialists, facilitator and/or group and panels. These individuals take personal responsibility and exercise autonomy in managing and undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Participate in panels and group discussion on the planning	1.1 Submit natural resource management issues, economic and social factors, and potential solutions or directions to groups for discussion

Element	Performance criteria
process	1.2 Ensure contributions are positive to assist group to develop course of action and recommendations 1.3 Structure contributions to discussions and panels and groups to comply with legislative, program and agency requirements
2. Collect data and background information	2.1 Collect information on local natural resource management issues and survey local groups, projects and programs 2.2 Make arrangements for additional data to be collected for input into analysis and the planning process
3. Contribute to the plan	3.1 Highlight local natural resource management issues to the planning team for inclusion in planning considerations 3.2 Explore relationship between local and wider issues to submit views on natural resource management priorities and solutions 3.3 Review draft plans in terms of impact on the local and wider region to identify deficiencies and propose solutions 3.4 Ensure participation in community consultation assists the regional planner to obtain feedback on the draft plan 3.5 Base proposals for improvement to draft plans on natural resource management within relevant contexts

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF505A Contribute to regional planning process.

AHCCCF601 Coordinate the development of regional plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate the development of regional plans in the context of natural resource management.

This unit applies to individuals who take responsibility for teams and exercise autonomy in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Scope requirements	1.1 Determine reasons for development of a regional plan to identify broad goals and legislative requirements 1.2 Identify prior regional planning work as input to proposed regional planning process
2. Determine regional	2.1 Determine regional boundaries from economic, environmental

Element	Performance criteria
boundaries	<p>and social factors, that will produce a coherent plan</p> <p>2.2 Identify economic, environmental and social factors that overlap the proposed regional boundaries to develop a scope and weighting of the factors</p> <p>2.3 Review previous plans and reports to verify the suitability of the proposed regional boundaries</p> <p>2.4 Meet program requirements for the development of regional plans in the identification of regional boundaries</p>
3. Identify regional resource management issues	<p>3.1 Research regional natural resource issues from past documentation and from stakeholder views</p> <p>3.2 Research and assess current and potential impacts of government, economic, industry, environmental and social factors on natural resource management issues</p> <p>3.3 Estimate the likely depth of research required to obtain sufficient information on issues for planning purposes</p>
4. Scope stakeholders in regional resource management planning process	<p>4.1 Scope economic, industry, social and government activities to identify influential organisations, groups and people and their particular interests</p> <p>4.2 Approach organisations and groups to determine their interests, viewpoints on natural resource management issues, and willingness to participate in regional planning process</p> <p>4.3 Identify nature of community involvement in planning process from understanding of issues and community</p>
5. Develop proposal for regional plan	<p>5.1 Review the objectives of the plan after scoping to determine feasibility of proposed processes</p> <p>5.2 Develop proposal for a new or revised plan to obtain funding</p> <p>5.3 Make estimates of time to complete tasks including time for consultations and approvals and any discussion with Indigenous communities and groups</p> <p>5.4 Identify costs associated with development of regional plan from preliminary research</p> <p>5.5 Prepare proposal to address the requirements of program and relevant legislation and agency policies and processes</p> <p>5.6 Submit proposal for regional plan for approval and funding according to agency and program procedures</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review existing planning documents and sources of information to inform the plan
- identify land management issues and potential solutions
- identify stakeholders to form discussion groups and seek individual input to planning
- organise for the collection and analysis of data to inform planning and monitor progress
- work with stakeholders and technical advisers to develop goals and performance criteria
- develop a draft plan for widespread consultation and feedback
- finalise the regional resource management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- broad geographic indicators with particular emphasis on the region
- regional and rural planning concepts from town planning, rural industry planning, and natural resource planning perspectives
- impact of government processes and industry activities in social and economic terms
- consultative techniques
- National, State and Local policies, procedures and legislation that applies to regional planning
- natural resource management and issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCHM101 Follow basic chemical safety rules

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to follow instructions and direction for safe handling, storage and use of chemicals.

The unit applies to individuals who undertake a range of defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well-known parameters and identify and seek help for simple problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work with chemicals	1.1 Confirm the activity to be undertaken with supervisor 1.2 Confirm tools and equipment to be used with supervisor 1.3 Use appropriate personal protective equipment (PPE) and ensure

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	correct fit as directed by supervisor 1.4 Identify functions of chemicals in the workplace
2. Identify risks associated with chemicals	2.1 Identify and interpret chemical labels, safety signs, symbols and safety data sheets according to supervisors' instructions 2.2 Identify health and safety hazards and risks in the workplace and report to supervisor 2.3 Control risks as directed
3. Follow chemical handling and storage rules	3.1 Identify and locate chemical store 3.2 Interpret and follow safe chemical handling, transport, and storage according to product label and supervisor instructions 3.3 Observe instructions for maintenance and storage of PPE and application equipment 3.4 Follow safety rules when working in areas where chemicals are stored 3.5 Identify emergency procedures to follow in the event of an accident or spillage 3.6 Record information as directed by supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret chemical labels, instructions and information
Oral Communication	<ul style="list-style-type: none"> Use clear language and concepts, tone and pace appropriate when communicating with supervisor
Navigate the world of work	<ul style="list-style-type: none"> Recognises organisational expectations and follows explicit instructions, protocols and procedures when working with chemicals
Get the work done	<ul style="list-style-type: none"> Follow clearly defined instructions and sequencing, and monitors own progress for the task, seeks assistance when necessary

Assessment Requirements for AHCCHM101 Follow basic chemical safety rules

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have followed basic rules relevant to chemical safety, including:

- confirmed work requirements and equipment for chemical use with supervisor
- located and followed information on chemical labels and relevant safety data sheets according to supervisors' instructions
- recognised the use of chemicals and complied with chemical safety signs and symbols in the workplace
- recognised chemical hazards and risks and reported to supervisor and applied risk controls
- used, maintained and stored personal protective equipment (PPE)
- maintained and stored chemical application equipment according to supervisors' instructions
- located chemical store, handled, transported, stored and worked with chemicals according to supervisors' instructions
- followed emergency procedures for accidents or chemical spillage and reported to supervisor
- maintained records according to supervisor instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- rules and instructions for working with and around chemicals
- common types of chemicals used in the workplace
- common types of chemical application equipment to be maintained and stored
- the structure and purpose of chemical labels and safety data sheets

- basics of hazards and risks of chemical use
- safety signage and symbols for chemical use in the workplace
- level of hazard and risks associated with common chemicals used in the workplace and methods of control
- PPE, when and how it should be worn, stored and maintained
- methods of reporting to supervisors' chemical hazards and risks
- safe methods of transporting, handling and storage of chemicals
- types of emergencies and the procedures for accidents and spills of chemicals
- records commonly kept for chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to chemicals and chemical store
- resources, equipment and materials:
 - PPE
- specifications:
 - workplace instructions and procedures
 - chemical safety data sheets
 - common chemical labels
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM201 Apply chemicals under supervision

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to handle, transport, and apply chemicals under supervision using workplace specified chemicals and application equipment.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to handle chemicals	1.1 Confirm the activity related to chemical handling to be undertaken with supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Identify and select tools and equipment required according to supervisor instructions 1.3 Identify health and safety hazards and risks and apply controls according to supervisor instructions and workplace procedures 1.4 Select, ensure serviceability, fit and use personal protective equipment (PPE)
2. Check application equipment	2.1 Carry out pre-operational checks of application equipment and identify and replace any damaged or worn components or report to supervisor 2.2 Prepare application equipment for use according to workplace practice and safe chemical handling processes
3. Handle and transport chemicals	3.1 Confirm safety precautions for the handling and transport of chemicals with supervisor 3.2 Handle and transport chemicals according to chemical label, safety data sheets and supervisor instructions
4. Prepare chemical for application	4.1 Interpret and apply chemical label instructions according to safety data sheets for the chemical or substance being used 4.2 Select and use appropriate mixing equipment 4.3 Measure, mix and load application equipment with chemical according to application rates 4.4 Clear chemical spills according to chemical label and supervisor instructions 4.5 Check that output of application equipment is correct and in accordance with chemical application plan
5. Apply chemicals	5.1 Assess and record weather conditions and forecasts prior to and during application according to workplace requirements 5.2 Apply chemical safely according to chemical application plan, chemical label and supervisor instructions 5.3 Monitor conditions for application and take appropriate action when conditions are unsuitable according to workplace procedures 5.4 Minimise risks to others, product integrity and the environment prior to and during application
6. Finalise work	6.1 Clean and store PPE and application equipment in accordance with manufacturers and health and safety in the workplace

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements 6.2 Dispose of excess chemicals and clean containers in accordance with label instructions and regulatory requirements 6.3 Complete incident reports according to workplace procedures 6.4 Complete chemical application records according to workplace procedures 6.5 Store unused chemical and products according to workplace procedures 6.6 Adhere to all re-entry requirements for treated areas

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret instructions, chemical labels and safety documentation to identify relevant and key information to apply to mixing and application of chemicals
Writing	<ul style="list-style-type: none"> Use clear language and correct concepts and terminology when reporting incidents and completing chemical application records
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations when measuring and mixing chemicals and checking chemical application equipment
Oral Communication	<ul style="list-style-type: none"> Use clear language, concepts, tone and pace appropriate when confirming chemical application parameters with supervisor
Get the work done	<ul style="list-style-type: none"> Follow clearly defined instructions and sequencing, and monitors own progress for the task, seeks assistance when necessary

Assessment Requirements for AHCCHM201 Apply chemicals under supervision

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated that chemicals have been applied under supervision, ensuring they have:

- identified hazards and risks and adopted safe work practices and used appropriate personal protective equipment (PPE) according to supervisors' instructions
- confirmed activity with supervisor and identified and selected tools and equipment necessary for the application of chemical treatment
- carried out pre-operational checks of application equipment and made it ready for operation
- handled and transported chemicals to be used according to chemical labels and supervisors' instructions
- followed directions on chemical labels and relevant safety data sheets to safely mix and prepare chemicals
- selected appropriate measuring equipment and measured, mixed and loaded application equipment with chemicals safely and correctly
- ensured chemical spills were cleared according to chemical label instruction and supervisor instructions
- checked the application equipment for output against plan and applied chemical safely complying with weather conditions
- monitored and recorded weather and applied chemical appropriate to prevailing conditions
- maintained a healthy and safe condition for the environment and others while applying and following chemical application
- cleaned application equipment and PPE and disposed of waste according to equipment manufacturer instructions, chemical label and supervisor instructions
- complied with equipment manufacturer instructions, chemical label and supervisor instructions

- maintained chemical application records and incident reports according to workplace procedures
- stored protection equipment, application equipment and unused chemicals according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- various handling and transport techniques and requirements for chemicals
- structure and content of chemical labels and safety data sheets and their use and purpose for safe chemical application
- principles and methods of measuring, mixing and applying chemicals
- features and functions of a range of application equipment relevant to the workplace their operations, and maintenance requirements
- risk factors to be taken into account for human and animal health, spillage and environmental impact relevant to chemical use before, during and following chemical application
- basic chemical groupings and types used in the workplace, including:
 - the of mode of action
 - the impact on chemical safety
 - application methods
- paths of entry of poisons into the body and the methods of limiting exposure through practices and personal protective clothing
- maintenance practices for chemical application related equipment and PPE and disposal procedures for chemical contaminants and containers
- assessing weather conditions and the impact on safe application of chemicals
- components of a workplace chemical application plan
- chemical related records and reports and their purpose.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to chemical store
- resources, equipment and materials:
 - common chemicals
 - PPE
 - chemical application equipment
 - chemical measuring and mixing equipment
- specifications:

- workplace documents, including work instructions and procedures
- chemical labels and safety data sheets
- chemical application plan and relevant chemical application rates
- manufacturers' operation and maintenance instructions for chemical measuring and application equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have safely transported and stored chemicals, including:

- identified health and safety hazards, assessed risks and implemented controls
- ensured emergency services contact details are available
- ensured transport vehicle meets regulations and that chemicals were loaded, secured and protected according to regulations and procedures
- ensured emergency equipment and procedures were available
- handled, transported and stored chemicals safely
- carried out emergency procedures safely and according to procedures
- maintained a chemical storage manifest and safety data sheets (SDS) according to legislative and regulatory requirements
- complied with chemical label instructions and SDS for transporting and storage of chemicals and legislative and regulatory requirements
- maintained inventory and records according to workplace procedures and legislative and regulatory requirements
- monitored chemical expiration and disposed of chemicals and waste according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- chemical labels and SDS their purpose, use and terminology, including:

- chemical signs, symbols and coding
- basic chemical properties and reactivity related to SDS and labels
- legislation and regulations that apply to transporting and storing chemicals, including:
 - transport vehicle requirements
 - information and documentation
 - dangerous and hazardous chemicals
 - placarding requirements
- risk factors including human and animal health and environmental
- processes and procedures for the disposal of excess, unwanted, expired chemicals and chemical waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- emergency procedures for spills and accidents
- recording and monitoring of chemical stores including, expiration and disposal procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to storage facility for chemicals
 - access to vehicle for transporting chemicals
- resources, equipment and materials:
 - chemicals
 - PPE
 - materials and equipment to handle, secure and protect chemical loads
- specifications:
 - specific workplace documents, including work instructions and procedures for chemical handling, storage and transport
 - chemical labels and safety data
 - legislation and regulations about handling, storage and transport of chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely prepare and apply chemicals for the control of pests, weeds and diseases, using general application equipment.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the need for chemical use and prepare an application plan	1.1 Identify the pest, weed or disease, and assess the need for control 1.2 Assess the requirement for chemical use 1.3 Assess health and safety hazard, risks and controls for different chemicals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Confirm requirement for chemical application according to workplace procedures 1.5 Assess off target risk of each application method 1.6 Assess the environmental risk for application method 1.7 Notify stakeholders of intended chemical application according to workplace procedures and legislative and regulatory requirements 1.8 Prepare application plan according to workplace procedures
2. Prepare chemical mixes	2.1 Identify and select chemical required for target according to application plan 2.2 Calculate the volume, rate or dose according to chemical label instructions 2.3 Identify and select application equipment and set-up requirements according to application plan and operator instructions 2.4 Identify hazards, assess risks and implement control measures for application method according to chemical label and health and safety in the workplace procedures 2.5 Identify, select, fit and use personal protective equipment (PPE) according to workplace procedures 2.6 Select appropriate mixing equipment and suitable location to prepare and load chemicals according to workplace procedures 2.7 Prepare chemicals according to chemical label instructions 2.8 Return unused chemical to store and clean preparation equipment and work site of residues and spillage according to chemical label instructions and workplace procedures
3. Calibrate application equipment	3.1 Select application equipment for chemical according to application plan, off target risks and workplace procedures 3.2 Conduct pre-operational checks of application equipment according to operator and maintenance manual 3.3 Calibrate equipment according to operating instructions and application plan 3.4 Load equipment with chemical according to operating instructions and workplace safety procedures
4. Apply chemicals	4.1 Monitor and assess weather conditions and forecasts to ensure effective chemical application according to application plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Select, ensure serviceability, fit and use PPE according to chemical label instructions and workplace procedures</p> <p>4.3 Apply chemical according to label directions and application plan relating to the control of the pest, weed or disease</p> <p>4.4 Monitor application equipment for correct performance and ensure effective chemicals application according to operating instructions</p> <p>4.5 Identify health and safety in the workplace hazards and risks and implement controls</p> <p>4.6 Clean up spills during application according to chemical label instructions and workplace procedures</p>
5. Clean up equipment and complete records	<p>5.1 Clean and decontaminate application equipment according to operator instructions, safety data sheets (SDS) and legislative requirements</p> <p>5.2 Dispose of chemicals and used containers according to chemical label instructions, SDS and legislative requirements</p> <p>5.3 Clean and store PPE according to workplace procedures</p> <p>5.4 Record and report safety and environmental incidents according to workplace procedures and regulatory requirements</p> <p>5.5 Record details of chemical application according to workplace procedures and legislative requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret SDS, chemical labels, operating instruction and other documentation and consolidates information to determine chemical application actions and activity
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational records using clear language and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine rates of application chemical mixtures and calibration of equipment

Skill	Description
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following policies, procedures and regulations Identify and implement chemical label requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for chemical application activities

Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely prepare and apply chemicals ensuring they have:

- determined and confirmed the need for chemical application by assessing the infestation, off target risk, and environmental risks
- developed an application plan for chemical application
- identified health and safety hazards, risk and implemented control procedures according to chemical label
- notified stakeholders of planned chemical application
- used personal protective equipment (PPE) according to workplace procedures
- interpreted chemical labels and applied chemical according to safety data sheets (SDS) and application plan
- identified and selected the chemical required for the target and calculated the amount and rates required according to chemical label
- identified and selected application equipment and suitable location, and determined the set up parameters according to application plan and operator instructions
- monitored and assessed weather conditions and equipment performance to ensure effective chemical application
- selected, conducted pre-operational checks according to operator and maintenance manual
- completed at least one calibration activity for application equipment
- prepared and loaded chemicals and returned unused chemicals to store in accordance with label, application plan and workplace procedures
- applied chemicals safely according to chemical labels, regulations and workplace procedures
- complied with chemical labels, SDS, regulations, maintenance manual, environmental procedures, operator instructions and application plan
- cleaned equipment and spills, and disposed of waste according to workplace and environmental procedures

- maintained records and reported incidents according to workplace procedures and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control options when selecting chemicals for pests, diseases and weeds infestations, including:
 - chemical
 - mechanical
 - cultural
 - biological
 - integrated pest management including resistance management principles
- types of pest, diseases and weed their treatment and resistance
- legal implications and requirements of chemical labels and SDS
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- impact of weather factors on the safe and effective application of chemicals
- characteristics of chemicals, their mode of action and relevance to chemical selection and use, including:
 - translocated/systemic
 - contact
 - ingested poison
 - protectant
 - eradicant
 - knock-down
 - residual
 - selective/non selective
- factors that contribute to off target damage, including:
 - physical movement of chemicals (e.g. animals moving baits or soil movement)
 - chemical formulation
 - wind speed and direction
 - temperature and relative humidity
 - temperature inversions
 - controlling off target damage
 - rainfall
 - buffer zones and barriers
- hazards of chemical application, including:
 - human and animal health
 - environmental contamination

- residues in environment, plants and animals
- withholding/re-entry periods
- safety requirements when applying chemicals, including:
 - procedures
 - PPE
 - signage
- safe handling, transporting and storage of chemicals
- preparing chemicals including preparation, compatibility, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- selecting and operating suitable application equipment
- features, functions and calibration techniques for powered and hand held application equipment, including:
 - pressure and volume of chemical
 - travel speed
 - nozzle identification, selection, operation
- legislation, regulations and licensing requirements in relation to chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chemicals
 - PPE
 - application equipment
 - chemical measuring and mixing equipment
- specifications:
 - specific workplace documents, including work instructions and procedures for chemical application
 - chemical labels and SDS
 - regulations about use of chemicals
 - manufacturers' operation and maintenance instructions for equipment
 - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM308 Use application equipment to apply fumigant in confined spaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to use application equipment to fumigate grain, seed, crops and plants housed in enclosures or confined spaces.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions for the purchase and use of fumigants.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan fumigation	1.1 Determine the need for fumigation as an option for pest management strategy of the workplace 1.2 Assess the facility and conditions for suitability of fumigation as a method to use 1.3 Select method of fumigant and application equipment to suit type

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>of pest, facility and material to be treated</p> <p>1.4 Identify and select fumigant to be used and its application rate according to chemical label</p> <p>1.5 Identify hazards, assess risks and implement control measures for fumigation in confined spaces</p> <p>1.6 Establish security measures to control access during fumigation and prescribed re-entry periods according to chemical label and workplace procedures</p> <p>1.7 Determine appropriate personal protective equipment (PPE) according to fumigant safety requirements</p>
2. Prepare storage facility, equipment and fumigants for fumigation activity	<p>2.1 Erect signage and barriers to control risk of inadvertent entry to facility</p> <p>2.2 Seal the facility and check the seal integrity</p> <p>2.3 Take appropriate measurements and calculations to ensure the concentration of fumigant will meet specification</p> <p>2.4 Check operational effectiveness of fumigation equipment according to operating procedures</p> <p>2.5 Calibrate fumigation equipment to deliver the correct rate of application according to chemical label and operating instructions</p> <p>2.6 Transport and store fumigants according to chemical label and safety data sheets (SDS) and regulatory requirements</p> <p>2.7 Select, ensure serviceability, fit and use PPE for selected fumigant according to chemical label and SDS</p> <p>2.8 Prepare fumigant according to chemical label and equipment operator instructions</p>
3. Conduct and monitor fumigation	<p>3.1 Apply fumigant according to planned application method, pest management strategy and chemical label</p> <p>3.2 Monitor fumigation site during exposure time and prevent unauthorised access</p> <p>3.3 Maintain integrity of seals throughout the active fumigation period</p> <p>3.4 Respond to emergency situations according to workplace emergency procedures</p>
4. Ventilate storage facility	4.1 Establish ventilation and re-entry times and risk controls according to chemical label and withholding periods

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Ventilate facility using appropriate equipment to remove fumigant in a safe and controlled manner</p> <p>4.3 Test for evidence of residual gas according to workplace procedures, and maximum residue limits for the material being treated</p> <p>4.4 Notify appropriate personnel of any further risk control measures required</p>
5.Restore storage facility	<p>5.1 Collect and remove all equipment, sealants, fumigants and waste materials according to workplace procedures</p> <p>5.2 Remove signage and barriers according to site security measures</p>
6.Clean, safety-check and store equipment and fumigants	<p>6.1 Clean, decontaminate, check and store equipment and PPE according to workplace procedures, chemical labels, SDS and regulatory requirements</p> <p>6.2 Dispose of all waste according to chemical label instructions and workplace environmental procedures</p>
7.Record fumigation details	<p>7.1 Record details of fumigation applications according to workplace procedures</p> <p>7.2 Record and report safety incidents according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret safety data, labels, manufacturers specifications, operating procedures, specifications, and other documentation and consolidates information to determine fumigation actions and activity
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational documents using clear language and correct spelling, grammar and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine storage facility volumes and rates of application and to check, interpret and confirm results of tests

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Effectively participate in verbal exchanges using active listening to convey and clarify post treatment risks and control measures
Navigate the world of work	<ul style="list-style-type: none"> Identify and implement manufacturer requirements for fumigants
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for fumigation activities Address problems and initiate standard procedures in response to emergencies applying problem solving processes

Assessment Requirements for AHCCHM308 Use application equipment to apply fumigant in confined spaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely apply a fumigant on materials housed in an enclosure, ensuring they have:

- determined need, appropriateness and method for fumigating a storage facility
- determined hazards and risks and established safety and security resources and control measures required
- prepared facility for safe fumigation
- determined fumigant requirements and prepared the fumigant and equipment for treatment according to chemical label instructions and safety data sheets (SDS)
- ensured personal safety by using appropriate personal protective equipment (PPE)
- applied fumigant and monitored the safety and integrity of the fumigation process, responding appropriately to emergencies
- rendered the storage facility safe through ventilation, conducted tests to establish safe air quality notifying personnel of residual risks
- removed fumigation materials, waste and temporary resources from storage facility and disposed of waste according to workplace and environmental procedures
- complied with workplace and environmental procedures and chemical label instructions and SDS
- checked, decontaminated, cleaned and stored equipment used in the fumigation process according to workplace procedures
- maintained records of fumigation activities and incidents and reported according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pests relevant to materials to be treated and factors and considerations in relation to the use of fumigation
- pest management strategies and relation to the use and selection of fumigation methods, including:
 - chemical
 - mechanical
 - biological
 - cultural
 - integrated pest management including resistance management principles
- types of fumigant used for treating storage facilities, their mode of action, methods of application, transport, storage and handling
- fumigant labels and SDS and how to interpret and apply label requirements for specific crops and facilities
- equipment used in fumigation, their setup, calibration, operation, shutdown, care and maintenance
- storage facilities and their suitability for fumigation, techniques used to seal a facility, and methods and calculations required to determine fumigant rates of application
- monitoring procedures during a fumigation process and methods of assessing leakage
- safety requirements including signage, equipment, PPE for use when handling fumigants and conducting fumigation activities
- legislation, regulations, licensing and codes of practice relevant to fumigant use
- risks associated with working near confined spaces including signage, gas detection and relevant entry and exit procedures
- chemical hazards and risk factors including human and animal health, leakage, spillage, environment damage and control measures required to mitigate risk
- methods for ventilating storage facilities and the equipment required
- how to assess for residual gas and safe re-entry periods including the consequence of fumigant residues and maximum residue limits
- requirements for disposal of excess fumigants, clearing spillages and equipment clean up
- procedures and processes for rendering a storage facility safe and operational after fumigation
- records required when conducting fumigation activities and related safety reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to storage facility and materials for fumigation
- resources, equipment and materials:
 - fumigants

- PPE
- fumigation and ventilation equipment
- fumigation measuring and mixing equipment
- gas testing equipment
- materials required to seal facilities for fumigation
- specifications:
 - workplace documents, including work instructions and procedures for fumigation
 - fumigant labels and SDS
 - legislation, regulations, codes of practice relevant to handling, storage, transport and use of fumigants
 - manufacturers' operation and maintenance instructions for fumigation equipment
 - relevant standards for air quality for test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCCHM309 Fumigate soil

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely apply a fumigant to soil ensuring they have:

- determined need, appropriateness and method for fumigating a soil
- determined hazards and risks and established safety and security resources and control measures required
- prepared soil for safe fumigation
- determined fumigant requirements and prepared the fumigant and equipment for treatment according to fumigant label instructions and safety data sheets (SDS)
- transported, handled and stored fumigants according to safety procedures, label and legislative requirements
- ensured personal safety by selecting, fitting and using appropriate personal protective equipment (PPE)
- applied fumigant and monitored the safety and integrity of the fumigation process, responding appropriately to emergencies
- rendered the soil and surrounding area safe through aeration and conducted tests to establish safe soil and air quality notifying personnel of residual risks
- removed fumigation materials, waste and temporary resources from treatment area and disposed of waste according to workplace and environmental procedures
- complied with fumigant label instructions and SDS
- checked, decontaminated, cleaned and stored equipment used in the fumigation process according to workplace procedures
- maintained records of fumigation activities and incidents and reported according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- primary and secondary soil pests, diseases and weeds to be treated and factors and considerations in relation to the use of fumigation including threshold pest levels and cost benefit
- pest management strategies and relation to the use and selection of fumigation methods, including:
 - chemical
 - mechanical
 - biological
 - cultural
 - integrated pest management including resistance management principles
- soil, media type, moisture and temperature factors relative to fumigation and methods employed to "seal" soils during fumigation
- types of fumigant used for treating soils, their mode of action, methods of application, transport, storage and handling
- fumigant labels and SDS and how to interpret and apply label requirements for specific soil and media situations
- equipment used in fumigation, their setup, calibration, operation, shutdown, care and maintenance
- calculations required to determine fumigant rates of application
- monitoring procedures during a fumigation process and methods of assessing escape
- safety requirements including signage, equipment, PPE for use when handling fumigants and conducting fumigation activities
- legislation, regulations, codes of practice and licensing requirements relevant to fumigant use, transport, storage and handling
- chemical hazards and risks factors including human and animal health, leakage, spillage, environment damage and control measures required to mitigate risk
- methods for aerating treated soils and assessment of residual fumigants including testing fumigant residues and maximum residue limits
- requirements for disposal of excess fumigants, clearing spillages and equipment clean up
- records required when conducting fumigation activities and related safety reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - soil requiring fumigation
 - fumigants
 - PPE
 - fumigation and soil aeration equipment

- fumigant measuring and mixing equipment
- fumigant testing equipment
- materials required to seal soil for fumigation
- specifications:
 - specific workplace documents, including work instructions and procedures for fumigation
 - fumigant labels and SDS
 - legislation, regulations, codes of practice relevant to handling, storage, transport and use of fumigants
 - manufacturers' operation and maintenance instructions for fumigation equipment
 - relevant standards for fumigation test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine type and method of fumigation	1.1 Identify the pest characteristics and degree of infestation 1.2 Assess the infestation and determine threshold for fumigant treatment 1.3 Identify fumigant treatment options for vertebrate and invertebrate pests

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify and select fumigant and its application rate according to chemical label and pest to be controlled</p> <p>1.5 Identify hazards, assess risks and implement control measures for pest fumigation activities</p>
2. Prepare to use fumigant according to label and safety data sheets (SDS)	<p>2.1 Identify, select, fit and use personal protective equipment (PPE) according to chemical label instructions and workplace procedures</p> <p>2.2 Identify and calculate application rates for fumigation conditions according to chemical label instructions</p> <p>2.3 Prepare hazard exclusion barriers, signage and emergency response procedure according to health and safety in the workplace procedures and legislative and regulatory requirements</p> <p>2.4 Identify hazards, assess risks and implement control measures according to health and safety in the workplace procedures</p>
3. Conduct fumigation	<p>3.1 Ensure emergency response resources are ready and available according to workplace emergency response procedure</p> <p>3.2 Check current weather and forecast conditions are favourable for fumigation activity to proceed</p> <p>3.3 Create seal in treatment area to ensure maximum effectiveness of fumigant according to workplace and chemical label instructions</p> <p>3.4 Apply fumigant according to chemical label instructions and workplace procedures</p> <p>3.5 Transport and store fumigants according to workplace procedures and chemical transport and storage regulations</p>
4. Monitor fumigation	<p>4.1 Monitor fumigation site and control access to maintain safe conditions according to chemical label instructions and workplace procedures</p> <p>4.2 Monitor fumigation site for effective fumigation according to workplace procedures</p> <p>4.3 Assess fumigation seal and integrity and take action to rectify according to workplace procedures</p>
5. Ventilate fumigated area	<p>5.1 Determine ventilation parameters according to chemical label instructions and workplace procedures</p> <p>5.2 Calculate ventilation time according to chemical label instructions and workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Ventilate site according to chemical label instructions, SDS, workplace procedures and legislative and regulatory requirements 5.4 Check for residual fumigant according to chemical label instructions and workplace procedures
6. Clean up following fumigation	6.1 Remove site exclusion barriers, signs when safe to do so according to workplace procedures 6.2 Clean, decontaminate, check and store fumigation equipment, safety signs and equipment and PPE according to chemical label instructions, workplace procedures and legislative and regulatory requirements 6.3 Dispose of all waste according to chemical label instructions
7. Record application details	7.1 Record details of fumigation activities and application according to workplace practices and legislative and regulatory requirements 7.2 Update chemical and resource register for used and remaining stock according to workplace procedures and legislative and regulatory requirements 7.3 Record and report safety incidents according to workplace procedures and legislative and regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret SDS, chemical labels, manufacturer instructions, signs and symbols, equipment operating instruction and other documentation and consolidates information to determine fumigant application actions and activity
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational and legal records using clear language and terminology

Assessment Requirements for AHCCHM310 Conduct manual fumigation of vertebrate and invertebrate pests

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have fumigated vertebrate and invertebrate pests manually, including:

- selected the appropriate fumigant option for the pest characteristics and infestation
- determined fumigation parameters according to manufacturer instructions and safety data sheets (SDS)
- prepared fumigant according to chemical manufacturers instructions
- identified health and safety hazards, risks and implemented controls for fumigation activities
- transported, handled and stored fumigants according to safety procedures, fumigant label and legislative requirements
- maintained the fumigant inventory and disposed of waste fumigant and materials according to workplace and environmental procedures
- implemented emergency response procedures to maintain a safe site
- prepared site for fumigation and erected exclusion barriers and signage
- checked weather conditions and forecasts to decide on fumigation progression
- sealed treatment area, applied the fumigant, monitored fumigation activity and ventilated sites
- checked for residual fumigant according to workplace procedures
- restored the treatment area, cleaned and decontaminated the equipment
- complied with chemical manufacturers' instructions, workplace and legislative and regulatory requirements, safety procedures, fumigant label and legislative requirements, and environmental procedures
- maintained records, stock inventories and reported on work activities and incidents. according to workplace and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pests and their characteristics for fumigation control
- primary vertebrate and invertebrate pests that can be controlled by manual fumigation methods
- pest control strategies and the role of fumigation, including:
 - chemical
 - cultural
 - biological
 - mechanical
 - Integrated Pest Management
- fumigants their use and action
- fumigant selection criteria to consider, including:
 - size of area
 - weather conditions
 - type of material concentration
 - safety implications
- interpretation and use of labels and SDS
- techniques to seal fumigation treatment sites
- site characteristics and conditions for suitable for fumigation
- relevant legislation and regulatory requirements for fumigant use
- risk factors including human and animal health, weather, leakage, spillage and environment
- safety and environmental requirements for disposal of fumigant, spills and waste materials
- clean-up procedures and decontamination
- pre and post fumigation safety procedures
- transporting and storage requirements of fumigants, including:
 - legislation and regulations that apply to transporting and storing chemicals including:
 - transport vehicle requirements
 - dangerous and hazardous chemicals
 - placarding requirements
- processes and procedures for the disposal of excess, unwanted, expired fumigants and waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- record keeping procedures and practices for workplaces and regulations
- tests and testing for residual fumigants
- inventory and stock records and procedures for fumigants.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to storage facilities for fumigants
- resources, equipment and materials:
 - site requiring fumigation
 - fumigants
 - PPE
 - fumigation aeration equipment
 - fumigant measuring and mixing equipment
 - fumigant testing equipment
 - materials required to seal treatment area
- specifications:
 - specific workplace documents, including work instructions and procedures for fumigation
 - chemical labels and SDS
 - legislation and regulations relevant to handling, storage, transport and use of fumigants
 - manufacturers' and maintenance instructions for hand fumigation equipment
 - relevant standards for residual fumigation test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM403 Prepare safe operating procedures for calibration of equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare workplace procedures for the calibration of equipment used in the application of pest, weed and disease control chemicals and bio-agents.

The unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify equipment requiring calibration	1.1 Assess the skill of operators in calibration in consultation with operators and supervisors

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
procedures	1.2 Identify, source and interpret information required for calibration from equipment manufacture and operating instructions
2. Prepare calibration procedure	2.1 Confirm information in calibration procedure complies with relevant regulatory requirements, manufacturers' instructions and industry practice 2.2 Carry out a risk assessment of the calibration procedure and incorporate risk controls in the calibration procedure 2.3 Document the procedures in a form appropriate to the intended use and according to workplace protocols 2.4 Document health and safety in the workplace issues relevant to the activities in the procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyse and consolidate information to determine risks in calibration
Writing	<ul style="list-style-type: none"> Develops procedural material using clear and detailed language in order to convey explicit risk for calibration information
Navigate the world of work	<ul style="list-style-type: none"> Works independently or with others in making decisions to achieve organisation outcomes Takes full responsibility for following policies, procedures and legislative requirements
Get the work done	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload Applies systematic and analytical decision making processes for complex and non-routine situations

Assessment Requirements for AHCCHM403 Prepare safe operating procedures for calibration of equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have prepared safe operating procedures for calibration of equipment, including:

- identified and analysed the need for equipment calibration
- analysed and confirmed equipment calibration requirements and operator capability
- performed a risk assessment of the calibration activity and incorporated risk controls into the calibration procedure
- documented procedures for calibration according to intended use and workplace protocols.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, codes of practice and enterprise procedures relevant to pesticides, the environment and health and safety in the workplace
- sources of chemical safety information, including:
 - codes of practice
 - legislation and regulations
 - chemical manufacturer labels
 - safety data sheets
- chemical handling and application
- mechanical and electronic controls on application equipment
- calibration techniques
- hazards, risks and controls including use of personal protective equipment (PPE).

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chemical application equipment
 - specific tools for calibration and adjustments
 - PPE
- specifications:
 - workplace documents including policies, procedures and processes
 - manufacturers' operating instructions for equipment to be calibrated
 - workplace instructions and specifications for calibration
- relationships:
 - access to supervisors and operators.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM404 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to assess hazards and risks and determine controls and develop procedures to mitigate risks when using chemicals.

The unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify chemical use hazards and risks	1.1 Identify, source and analyse information relating to safe use of chemicals in industry 1.2 Identify steps for the process of using chemicals 1.3 Identify hazards and risks for the process of using chemicals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess risks associated with chemical use and develop control procedures	<p>2.1 Assess risks associated with using chemicals in the workplace</p> <p>2.2 Develop control measures and emergency action plans to mitigate risk according to workplace procedures and industry best practice</p> <p>2.3 Develop procedures for risk control for operational activities using chemicals according to industry best practice</p> <p>2.4 Develop a continuous improvement strategy to address identified deficiencies in risk control procedures</p>
3. Monitor and assess adherence to chemical risk procedures	<p>3.1 Provide personnel with chemical use procedures, instruction and safety equipment, including personal protective equipment, for using chemical control strategies</p> <p>3.2 Monitor and assess personnel performance against procedures for selecting equipment for chemical use</p> <p>3.3 Monitor and assess personnel performance against procedures for operational activities of chemical use</p> <p>3.4 Measure the performance of personnel for following risk control procedures according to industry practice</p>
4. Evaluate risk control measures and maintain records	<p>4.1 Develop procedures for evaluating the effectiveness of risk control measures</p> <p>4.2 Identify shortfalls in procedures and document changes required</p> <p>4.3 Update procedures to reflect required changes according to industry best practice</p> <p>4.4 Develop and maintain record systems for risk assessment according to industry best practice and legislative and regulatory requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critical analysis information and consolidate to determine risks in chemical control procedures

Skill	Description
Writing	<ul style="list-style-type: none"> Develop procedural material using clear and detailed language in order to convey explicit risk control information
Oral Communication	<ul style="list-style-type: none"> Present complex information using clear and convincing language, tone and pace appropriate when briefing personnel on procedures
Navigate the world of work	<ul style="list-style-type: none"> Work independently or with others in making decisions to achieve organisation outcomes Contribute to roles and responsibilities of others Take full responsibility for following policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Implement strategies for a diverse range of colleagues in order to build rapport and foster strong relationships when instructing and monitoring performance Elicit feedback and provide feedback to others in order to improve workgroup behaviours and update procedures
Get the work done	<ul style="list-style-type: none"> Accept responsibility for planning and sequencing complex tasks and workload Monitor progress of procedures and reviews and amends them to meet demands and priorities Apply systematic and analytical decision making processes for complex and non-routine situations

Assessment Requirements for AHCCHM404 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed procedures to minimise risks in the use of chemicals, including:

- sourced information and analysed its content for safe chemical use
- identified steps in the chemical use process and identified hazards and risks
- assessed the risks and developed risk control procedures to mitigate the risk for chemical use
- implemented procedures, monitored and evaluated personnel using procedures
- developed a continuous improvement strategy for risk control procedures
- implemented, monitored and evaluated a chemical risk control procedure
- developed and maintained records for risk assessment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of chemical safety information, including:
 - codes of practice
 - legislation and regulations
 - chemical manufacturer labels
 - safety data sheets (SDS)
- industry best practice requirements relating to chemical use
- strategies for identifying hazards, risks and controls
- risk factors, including:
 - human
 - animal health
 - product integrity

- weather
- residues and maximum residue levels
- spray drift, spillage and environment
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations
- principles and practices of chemical handling, transporting and storage of chemicals and fumigants
- principles and practices of chemical application strategies and equipment including integrated pest management
- operational factors to consider in procedures, including:
 - transport, handling and storage
 - application methods, equipment and personal protective equipment (PPE)
 - cleaning and decontamination
 - disposal of waste
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment required to implement the chemical use procedure
 - PPE
- specifications:
 - specific workplace documents including policies and processes
 - manufacturers' operating instructions for equipment and machinery
 - SDS
 - workplace instructions and job specifications
 - chemical information including legislation, codes of practice, manufacturer instructions
- relationships:
 - team member(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM405 Plan and implement a chemical use program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to assess and control the risks associated with chemical use and to plan and implement a program for chemical use.

The unit applies to individuals who take responsibility for their own work and provide direction to others. All work must be carried out to comply with workplace procedures, in accordance with applicable state/territory health and safety in the workplace, pesticide and environmental legislation and codes of practice.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify requirements for chemical use	1.1 Identify, source and interpret information required for planning and implementing a chemical use program 1.2 Assess the need for chemical use as an option 1.3 Ensure that personnel are adequately trained in chemical use according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess risks and develop control procedures	<p>2.1 Identify hazards, assess risks and develop control measures and emergency action plans for chemical use operational activities</p> <p>2.2 Assess weather conditions and forecasts to determine implications for off target contamination</p> <p>2.3 Assess the sensitivity of target area and impact of chemical on the environment according to chemical label instructions and safety data sheets (SDS)</p> <p>2.4 Assess the risk to human and animal health according to chemical label instructions and SDS</p> <p>2.5 Analyse assessments and document risk control procedures for the chemical application plan according to workplace procedures</p>
3. Develop an operational and maintenance program for chemical use	<p>3.1 Determine chemicals to be used according to workplace pest management strategy</p> <p>3.2 Calculate mixing requirements for chemicals according to chemical label instructions and workplace procedures</p> <p>3.3 Document operational checks and calibration requirements of equipment according to operators instructions and manufacturer specifications</p> <p>3.4 Develop and implement an operational and maintenance strategy for application equipment and personal protective equipment according to health and safety practices</p> <p>3.5 Document operational and maintenance procedures for chemical application plan according to workplace protocols</p>
4. Implement and monitor chemical application plan	<p>4.1 Provide personnel with chemical use procedures, and instruction on safety equipment for chemical application plan</p> <p>4.2 Monitor adherence with safe practice for preparation and application of chemicals according to chemical application plan</p> <p>4.3 Monitor adherence to procedures for handling, transport, storage, decontamination and disposal of chemicals according to chemical application plan</p> <p>4.4 Monitor adherence to maintenance procedures according to chemical application plan</p> <p>4.5 Monitor adherence to residue procedures for product and environment according to chemical application plan</p>
5. Finalise work	5.1 Ensure excess chemicals are disposed of according to waste

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
activities in accordance with chemical application plan	management and environment procedures 5.2 Ensure required records are completed according to operational and workplace, health and safety procedures
6. Evaluate chemical application plan and records for continuous improvement	6.1 Develop procedures for evaluating the effectiveness of chemical application plan 6.2 Identify and document shortfalls in chemical application plan 6.3 Develop a continuous improvement strategy to rectify the chemical application plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyse and consolidate information to determine chemical control procedures and develop chemical application plan
Writing	<ul style="list-style-type: none"> Develop procedural material using clear and detailed language in order to convey explicit risk control information
Oral Communication	<ul style="list-style-type: none"> Present complex information using clear and convincing language, tone and pace appropriate when briefing personnel on chemical application plan
Navigate the world of work	<ul style="list-style-type: none"> Work independently or with others in making decisions to achieve organisation outcomes Contribute to roles and responsibilities of others through implementation of plans Take full responsibility for following policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Implement strategies for a diverse range of colleagues in order to build rapport and foster strong relationships when instructing and monitoring performance Elicit feedback and provides feedback to others in order to improve workgroup behaviours and update plans

Skill	Description
Get the work done	<ul style="list-style-type: none"> Accept responsibility for planning and sequencing complex tasks and workload Monitor progress of procedures and reviews and amends them to meet demands and priorities Apply systematic and analytical decision making processes for complex and non-routine situations
