Assessment Requirements for FWPCOT3259 Operate a four wheel drive on unsealed roads

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT3259 Operate a four wheel drive on unsealed roads, which was first released with FPI11 Forest and Forest Products Training Package version 1.0. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow applicable workplace safety, environmental and regulatory requirements and codes of practice relevant to operating a 4x4 vehicle
- follow organisational policies and procedures relevant to operating a 4x4 vehicle, including:
 - own work role and responsibilities
 - procedural manuals
 - quality and continuous improvement
 - WHS, emergency and evacuation procedures
 - recording and reporting requirements
 - equipment use, maintenance and storage requirements
 - environmental management requirements
- communicate and work safely with others in rough terrain when operating a 4x4 vehicle
- perform pre-start checks of vehicle and equipment suitable to different terrains by checking loads and tyre pressure, selecting navigation aids and advising passengers of safety precautions
- operate safely, a 4x4 vehicle, on unsealed road conditions and different terrain types, including negotiating steep slopes, by identifying hazards and assessing risks
- use appropriate range, gear, speed, driving and braking techniques safely when operating a 4x4 vehicle on a steep slope

- demonstrate safe use of a jack to support a 4x4 vehicle while changing a tyre under relevant road terrains and conditions within the operating environment
- park and shut down 4x4 vehicle in line with *manufacturer specifications* and organisational requirements
- perform and document operational maintenance as permitted by vehicle operator handbook.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- four wheel drive operational information
- structural differences between conventional two wheel drive and a four wheel drive including:
 - recovery hooks and mounting features
 - purpose and use of front wheel hubs
 - factors affecting tyre size, fitment, rating and pressure
- applicable regulations, standards, codes of practice and established safe practices relevant to the operating a 4x4 vehicle
- road rules, regulations, permit and licence requirements of the relevant state or territory
- environmental protection requirements including the safe disposal of waste material
- prestart checks for 4 x 4 vehicle on:
 - fuel, either diesel, gas or petrol
 - water
 - oil
 - brake and transmission fluid levels
 - battery water levels and electrolyte checks
 - tyres
 - belts
 - leads
 - hydraulic lines and connections
 - air cleaners
 - brakes
 - off-road safety equipment
 - traction devices
- Types of communication equipment including:
 - personal location beacon (PLB)
 - flares
 - markers
 - phone
 - radio
 - V-Sheet

- safe operating conditions for a 4 X 4 vehicle
 - interpreting weather conditions to determine suitability for driving
 - determining food, water, PPE (sunglasses, high-visibility vest, etc.) and clothing requirements for journey
 - selecting routes to minimise damage to the environment
 - on and off-road conditions
 - traffic pattern and density
 - visibility
 - loading of four-wheel drive, including techniques to reduce overloading
- types of environmental risks and hazards associated with operating a 4x4 vehicle on unsealed roads including:
 - rocks and other unexpected obstacles
 - damage to vehicle
 - tidal influences
 - fire in vehicle
 - faulty brakes
 - leaking fuel
 - faulty steering mechanism on vehicle
 - animals and objects in vehicle path
 - crocodiles and snakes in some areas
 - windy or foggy sections of terrain
 - steep slopes
 - side slopes
 - slippery surfaces
 - land slides
 - overhead tree limbs
 - black ice
 - towing trailers
 - other vehicles
 - fallen trees, limbs and logs
 - icy terrain
 - flooded terrain
 - oil on road
 - parked vehicles on road
 - pedestrians on or near the road
 - poor visibility
- 4x4 driving techniques in different terrains including:
 - smooth
 - rough
 - uneven

- slippery
- wet
- boggy
- sandy
- steep or hilly
- rock
- icy
- snow
- mud, including:
 - brown clay
 - black silt
 - salt pan mud
 - red
- hard ground
- water
- operational knowledge of a 4x4 vehicle, including controls, instruments, indicators and their use
- tyre management principles for checking, changing and maintenance
- workplace communication channels and protocols
- techniques for travelling in convoy
- problem identification and resolution strategies, and common fault-finding techniques relevant to safely operating a four wheel drive vehicle
- types of tools and equipment relating to a 4x4 vehicle, and procedures for their safe use and maintenance
- maintenance equipment including spares and fluids
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace offering conditions including different terrain on unsealed roads and steep slopes
- materials and equipment relevant to undertaking work applicable to this unit, including manual or automatic four-wheel drive or all-wheel drive
- specifications and work instructions relevant to workplace requirements and the safe operation of four wheel drive vehicles
- personal protective equipment required for operating a four wheel drive on unsealed roads
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3301 Trim trees using a pole saw

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to use a fuel or battery powered pole saw to trim tree branches within safe height and angle limits.

The unit applies to individuals who operate pole saws to trim tree branches as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for trimming	1.1 Determine job requirements from work order or instruction and, where required, seek clarification from appropriate personnel 1.2 Confirm safety and environmental requirements for the task

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>according to workplace procedures</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with using pole saw to trim branches</p> <p>1.4 Plan trimming activities according to workplace procedures</p> <p>1.5 Consult with team members and other appropriate personnel to ensure that work is coordinated effectively with others in the workplace</p> <p>1.6 Obtain pole saw and other support equipment needed for the work</p> <p>1.7 Select, fit and use personal protective equipment</p> <p>1.8 Conduct pre-start-up checks of pole saw to determine serviceability according to manufacturer instructions</p>
2. Assess trees	<p>2.1 Identify and assess tree type, location and stability for safe working conditions</p> <p>2.2 Plan trim of tree according to workplace procedures and environmental conditions</p> <p>2.3 Identify trees unsafe to be trimmed, and refer to supervisor</p> <p>2.4 Identify hazards in immediate vicinity of the tree to be trimmed, and refer to supervisor</p> <p>2.5 Determine whether the height of branches to be trimmed is within safe reach and safe working angle when using the pole saw</p> <p>2.6 Establish general falling direction of branches to be trimmed, and identify clear escape routes</p>
3. Trim trees	<p>3.1 Trim accessible branches within safe height and angle limits according to work order or instructions and manufacturer recommendations</p> <p>3.2 Monitor location and movement of people in work area to ensure work site is safe</p> <p>3.3 Undertake sequence of cuts to trim tree branches</p> <p>3.4 Operate pole saw according to workplace procedures and manufacturer instructions, adjusting technique in response to condition of the tree</p> <p>3.5 Identify unexpected tree characteristics during trimming operations, and review tree assessment if required</p> <p>3.6 Complete cutting once initiated to minimise splitting</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Clear cut branches from the site according to workplace procedures and environmental requirements
4. Conduct operator maintenance	<p>4.1 Follow workplace safety procedures and manufacturer instructions to lock out equipment</p> <p>4.2 Inspect condition of pole saw and other equipment on completion of trimming activities</p> <p>4.3 Clear pole saw of dust, shavings and debris, and check for serviceability</p> <p>4.4 Remove, sharpen, adjust or replace chain and other components according to manufacturer recommendations</p> <p>4.5 Recycle, re-use or dispose of blunt or damaged chain and other components according to workplace procedures and environmental requirements</p> <p>4.6 Record and report equipment faults and maintenance activity</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace documentation to determine requirements
Writing	<ul style="list-style-type: none"> Use technical and workplace specific vocabulary to accurately and legibly complete workplace records and forms
Oral communication	<ul style="list-style-type: none"> Ask questions and actively listen to clarify contents of work plans

Assessment Requirements for FWPCOT3301 Trim trees using a pole saw

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed, planned and conducted the trimming of the accessible branches of six trees within safe height and angle limits using a pole saw
- followed workplace policies and procedures, current workplace health and safety legislation, regulations and related industry standards and codes of practice in completing the tree trimming work
- inspected and carried out routine operator maintenance on one pole saw on one occasion, including removing, sharpening, replacing and adjusting the chain, according to manufacturer requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and components of pole saws
- uses of pole saws to trim trees
- procedures for pole saw operations
- risks and hazards associated with trimming trees with a pole saw
- characteristics of trees and timber defects
- trimming sequence and pole saw cutting techniques for trimming trees
- safe height and angle limits for pole saw use when trimming trees
- criteria for assessing condition of pole saw chain
- procedures for removing, sharpening, adjusting or replacing pole saw chain and other components
- established communication channels and protocols for trimming trees with a pole saw
- problem identification and resolution strategies related to trimming trees with a pole saw

- procedures for recording and reporting workplace information related to trimming trees with a pole saw.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - an industry standard fuel or battery powered pole saw
 - tools and equipment used to maintain pole saws
 - consumable pole saw parts, oil and fuel
 - personal protective equipment required in pole saw operations
- specifications:
 - access to workplace safety and environmental policies and procedures applicable to use of pole saws for trimming branches
 - access to workplace procedures and forms for recording pole saw maintenance and faults
 - access to workplace standard operating procedures or operator manual for pole saws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3314 Comply with soil and water protection

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to carry out soil erosion and sediment control works and pollution prevention measures in forestry operations and other work environments.

The unit applies to individuals who work as forestry technicians, nursery technicians, forestry operations supervisors, tree planters, silviculturists, arboriculture technicians and mobile equipment operators to implement erosion, sediment control and pollution prevention measures in a variety of work settings, including in forest, horticultural, domestic, local council and emergency services environments.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3314 Comply with soil and water protection

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- implemented either a soil or a water protection procedure in an operational work setting on one occasion
- followed workplace policies and procedures, current legislation, regulations and related industry standards and codes of practice applicable to soil and water protection operations
- monitored work practices in one operational work setting for consistency with soil and water protection requirements and made at least one recommendation on ways of improving work practices to enhance soil and water protection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, standards, codes of practice and established safe practices for soil and water protection procedures
- applicable regulations from all levels of government that affect operations in relation to soil and water protection:
 - regional agreements
 - relevant codes of practice
 - operational plans
- workplace standards, requirements, policies and procedures relevant to soil and water protection
- techniques and measures relevant to erosion mitigation:
 - walk-over techniques
 - minimal disturbance techniques
 - crown and cross fall drainage

- cross bank drainage
- relief culverts on roads
- mitre and table drains on roads
- armouring/gravelling of roads
- crossing and draining surfaces
- batter stabilisation
- contour banks and channels
- gabions
- sediment basins
- riparian buffer zones
- outlet protection structures
- revegetation
- factors that are likely to influence soil and water protection measures:
 - track and road maintenance
 - drainage structures
 - setting of contour lines
 - slope measurement techniques
 - boundaries and survey markers
 - site preparation techniques
 - site cultivation techniques
 - disposal of logging waste materials
 - windrowing placement and techniques
 - tree selection and felling techniques
 - log dump locations and techniques
 - log extraction and haulage techniques
 - clearing techniques
 - soil types
- environmental features that can be adversely affected if soil erosion occurs, or if inundated with sediment of other pollutants:
 - trees, understorey and other vegetation
 - drainage lines and drainage depressions
 - water course, creeks and rivers
 - lakes, swamps and wetlands
 - aquatic species
 - steep slopes
 - caves
 - historic and cultural heritage sites
 - road and water supply infrastructure
- other pollution control measures:
 - fuel containment barriers

- chemical spillage barriers
- containment and removal of work waste, rubbish litter and human waste
- risks and hazard identification relevant to soil and water protection
- established communication channels and protocols for compliance with soil and water protection
- procedures for recording and reporting workplace information related to soil and water protection activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and machinery required for soil and water protection operations
 - personal protective equipment used in soil and water protection operations
 - communication system
- specifications:
 - access to workplace policies and procedures applicable to soil and water protection operations
 - access to operational plans
 - access to access to workplace procedures and forms for recording soil and water protection activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Links

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0d96fe23-5747-4c01-9d6f-3509ff8d3d47>

FWPCOT3325 Operate four wheel drive vehicle on unsealed roads

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the outcomes required to safely operate a four wheel drive vehicle on unsealed roads.

The unit applies to individuals who operate four wheel drive vehicles in a variety of work settings and industry sectors, including forestry, agriculture, construction, tourism and energy.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

Individuals must hold a driver licence or a provisional driver licence prior to commencing this unit of competency.

Pre-requisite Unit

Assessment Requirements for FWPCOT3325 Operate four wheel drive vehicle on unsealed roads

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed each of the following tasks while driving a four wheel drive vehicle on unsealed roads:

- driven three separate ascents and three separate descents less than 15 degrees. In conducting this task, the individual has:
 - selected appropriate range and gearing
 - used foot brake effectively to control descent speed
 - used vehicle hill descent or similar function where available
 - used the most appropriate wheel placement
- used on one occasion traction aids and brakes when driving ascents and descents less than 15 degrees
- performed on two occasions a forward and a reverse stop start recovery on an incline according to the type of transmission
- demonstrated on one occasion the setting of vehicle controls for operation on unsealed roads. This may include:
 - the use of free wheel hubs if fitted
 - selection of low range in either manual or automatic vehicles
 - use of terrain selection system if fitted
 - use of differential locks if fitted
 - activation of traction control or terrain selection mode if fitted and where effective
- driven vehicle and operated vehicle controls and technology to avoid traction loss on unsealed roads in three of the following conditions:
 - loose gravel
 - ruts
 - loose material in centre and sides of track
 - corrugations

- mud
- rocky
- sand
- snow
- side slopes
- rutted
- water crossing
- fitted and used personal protective equipment (PPE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- structural differences between conventional two wheel drive and a four wheel drive, including:
 - purpose and use of front wheel hubs
 - factors affecting tyre selection and pressure
- environmental protection requirements affecting four wheel drive operations
- common unsealed road surface hazards:
 - loose gravel
 - ruts
 - loose material in centre and sides of track
 - corrugations
- pre-start checks for four wheel drive vehicle
- types of communication equipment, including:
 - personal location beacon (PLB)
 - phone
 - radio
 - vehicle/personnel tracking devices
- safe operating conditions for a four wheel drive vehicle:
 - interpreting weather conditions to determine suitability for driving
 - selecting routes to minimise damage to the environment
 - visibility
 - loading of four wheel drive, including techniques to reduce overloading
 - braking techniques
 - cornering techniques
- types of environmental risks and hazards associated with operating a four wheel drive vehicle on unsealed roads, including:
 - rocks and other unexpected obstacles
 - damage to vehicle
 - animals and objects in vehicle path

- slippery surfaces
- overhead tree limbs
- other vehicles
- fallen trees, limbs and logs
- flood
- poor visibility
- tyre pressure management principles for varying terrain types
- principles for effective self-recovery of vehicle via driving skills (not the use of recovery equipment such as straps or winches)
- communication channels and protocols
- techniques for travelling in convoy
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site with access to unsealed roads
 - manual or automatic four wheel drive vehicle or all-wheel drive vehicle
 - PPE required for operating a four wheel drive on unsealed roads
 - relevant personnel for the purposes of communicating information
- specifications:
 - workplace safety and environmental policies and procedures applicable to forestry operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify loads, ratings and equipment serviceability related to four wheel drive vehicle recovery	1.1 Determine the Gross Vehicle Mass (GVM) and estimate the recovery load on the vehicle using a recognised formula 1.2 Identify the rating and labelling of recovery gear 1.3 Identify rated recovery points on a vehicle

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Determine the appropriate equipment to be used given the GVM, estimated recovery load and the equipment rating</p> <p>1.5 Determine serviceability of recovery equipment required for task</p>
2. Plan recovery	<p>2.1 Identify and follow work health and safety procedures, including selection and use of personal protective equipment relevant to recovery operations</p> <p>2.2 Identify, assess and take actions to mitigate risks and hazards associated with recovery operations</p> <p>2.3 Identify and implement workplace environmental protection procedures associated with recovery operations</p> <p>2.4 Identify emergency procedures to follow in the event of accident or incident</p> <p>2.5 Locate and survey site to determine recovery strategy and establishment of an exclusion zone</p> <p>2.6 Inform appropriate personnel of location of vehicle to be recovered and recovery strategy</p>
3. Perform kinetic rope or strap recovery	<p>3.1 Establish and maintain communications with appropriate personnel during recovery operation</p> <p>3.2 Establish when and by what means to start and stop the recovery</p> <p>3.3 Lay out the kinetic rope/strap prior to recovery</p> <p>3.4 Fit the kinetic rope/strap to an approved recovery point/device that is suitably rated for use with the strap</p> <p>3.5 Demonstrate the joining of two kinetic ropes and/or straps</p> <p>3.6 Identify where to place dampeners</p> <p>3.7 Perform a safe recovery using the kinetic rope/strap</p>
4. Perform winch recovery	<p>4.1 Establish and maintain communications with appropriate personnel during recovery operation</p> <p>4.2 Establish when and how to start and stop the recovery</p> <p>4.3 Lay out all the equipment to be used, including the dampeners</p> <p>4.4 Perform winch recovery using a single line pull</p> <p>4.5 Perform winch recovery using a double line pull using a snatch block or pulley ring</p> <p>4.6 Perform winch recovery using a change of direction pull using a</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	snatch block or pulley ring
5. Use other recovery tools and equipment	5.1 Use a spade for vehicle recovery 5.2 Use traction boards for vehicle recovery
6. Maintain vehicle recovery equipment	6.1 Clean, carry out operator maintenance, check serviceability and store recovery equipment after use according to manufacturer requirements 6.2 Record equipment maintenance according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret basic factual information on tool and equipment labels and in manufacturer manuals
Writing	<ul style="list-style-type: none"> Complete workplace forms using required format, industry terminology and structure
Oral communication	<ul style="list-style-type: none"> Use effective verbal communication techniques to convey instructions to people in vicinity location of recovery operation
Numeracy	<ul style="list-style-type: none"> Apply numeric skills to check rating of recovery equipment

Assessment Requirements for FWPCOT3326 Recover four wheel drive vehicle

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- performed two kinetic rope and/or strap recoveries
- performed one of the following winch recoveries:
 - single line
 - double line
 - change of direction.

In conducting each of the above tasks, the individual has:

- estimated the recovery load using a recognised formula
- determined the Gross Vehicle Mass (GVM) of the vehicle/s in the recovery
- determined the rating of the equipment being used
- determined the most appropriate recovery strategy to be used
- assessed why the vehicle is bogged, taken action to ensure vehicle is in four wheel drive, taken action to clear obstructions from the vehicle, taken action to use traction boards where available, determined safest method of recovery if straps or winches are to be used
- determined the appropriate equipment to be used given the GVM, equipment rating and chosen strategy.

There must be also be evidence that on one occasion the individual has joined two kinetic ropes and/or straps.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- safety procedures during recovery operations

- recognised formula used to estimate the recovery load and what variables apply to this formula
- reasons and procedures for establishing exclusion zone
- Gross Vehicle Mass (GVM):
 - identifying which vehicle's GVM should be used in relation to kinetic recovery
- ratings used on recovery equipment:
 - MBS (Minimum Breaking Strength) of ropes, straps and soft shackles
 - WLL (Working Load Limit) of hard shackles
 - drag chains
 - pulley blocks
 - pulley rings
 - winches (wire and/or rope)
- anchor point selection
- number, location and weighting of strap dampeners
- rated recovery points:
 - characteristics and purpose of rated recovery points
 - location of rated recovery points
 - what is and what is not a rated recovery point
- kinetic recovery:
 - kinetic recovery procedure
 - manufacturer recommendations on recovery techniques and equipment
- winches:
 - types, main components, ratings and manufacturer recommendation for use
 - effect of the layers of wrap of rope or wire on a winch drum
 - effects of a ring or snatch block on the load on a winch
 - impact of angle of rope or cable on recovery operation
 - procedures for easing the load on a winch
 - the reasons for not driving while winching
- maintenance of recovery gear:
 - straps/ropes
 - winches.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a work environment or an environment that accurately represents workplace conditions
 - work environment must include varied terrains and conditions from which to recover vehicle

- resources, equipment and materials:
 - four wheel drive to recover
 - rated recovery equipment for four wheel drive vehicle
 - relevant personnel for the purposes of communicating information
 - personal protective and safety equipment required for recovering a four wheel drive vehicle
- specifications:
 - workplace safety and environmental policies and procedures applicable to the recovery of four wheel drive vehicle.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3329 Perform complex four wheel drive operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to safely operate four wheel drive vehicles in difficult terrain. Difficult terrain has surface conditions that include frequent steeps and/or rocks, slippery or sandy track sections, and including possible water crossings.

The unit applies to individuals who operate four wheel drive vehicles in a variety of work settings and industry sectors, including forestry, agriculture, construction, tourism and energy.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

Individuals seeking to undertake this unit should have prior experience in operating four wheel drive vehicles on unsealed surfaces.

Individuals must hold a driver licence or a provisional driver licence prior to commencing this unit of competency.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for complex	1.1 Identify and assess types of trip and terrain being accessed for safe

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
four wheel drive operations	operating conditions 1.2 Check vehicle for suitability for the task 1.3 Identify and check operation of suitable communication equipment and protocols in the event of misadventure 1.4 Identify, fit and use suitable personal protective equipment 1.5 Secure loads according to safety, environmental and regulatory requirements 1.6 Ensure emergency rations food/water and clothing are carried
2. Operate vehicle in steep terrain	2.1 Assess the steep terrain and determine what may cause loss of traction 2.2 Perform steep ascent and descent using appropriate driving methods 2.3 Perform forward and reverse stop start recovery on an incline according to the type of transmission 2.4 Set vehicle controls according to manufacturer specifications
3. Operate vehicle over difficult terrain	3.1 Assess difficult terrain 3.2 Select appropriate wheel placement 3.3 Negotiate difficult terrain using vehicle's traction aids 3.4 Identify impact that wet weather or wet tracks will have on driving style 3.5 Set vehicle controls according to manufacturer specifications 3.6 Check vehicle for damage after driving
4. Operate vehicle through water crossing	4.1 Assess the water crossing 4.2 Identify wading depth of vehicle according to manufacturer specifications 4.3 Identify vulnerable mechanical aspects of the vehicle and prepare the vehicle for water crossing 4.4 Select appropriate range and gear and other traction aids for the water crossing 4.5 Perform water crossing by maintaining steady constant speed 4.6 Drain water from vehicle back into water crossing 4.7 Dry brakes after water crossing

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Perform post-trip tasks	5.1 Notify relevant personnel of trip completion 5.2 Complete post-trip inspection of vehicle 5.3 Record and report any repairs or replacement or damaged items to relevant personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret basic factual information on road signs and in manufacturer manual
Writing	<ul style="list-style-type: none"> Complete workplace forms using required format, industry terminology and structure

Assessment Requirements for FWPCOT3329 Perform complex four wheel drive operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed three separate ascents and three separate descents greater than 15 degrees for the safest route and the most appropriate wheel placement
- driven three separate ascents and three separate descents greater than 15 degrees, having selected appropriate range and gearing and using the most appropriate wheel placement
- used traction aids and/or brakes when driving ascents and descents greater than 15 degrees on one occasion
- performed a forward and a reverse stop start recovery on an incline according to the type of transmission on two occasions
- demonstrated the setting of vehicle controls for operation in complex terrain on one occasion. This must include:
 - the use of free wheel hubs, if fitted
 - selection of low range in either manual or automatic vehicles
 - use of differential locks, if fitted
 - activation of traction control or terrain selection mode, if fitted and where effective
- driven vehicle in difficult terrain and operated vehicle controls and technology to avoid traction loss in three of the following conditions:
 - mud
 - rocky
 - sand
 - side slopes
 - rutted
- completed two water crossing of at least axle depth
- recorded and reported repairs or replacement or damaged items on two occasions
- fitted and used personal protective equipment (PPE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- four wheel drive systems:
 - differences between four wheel drive, two wheel drive and all-wheel drive vehicles
 - types and operating principles of different four wheel drive systems
- planning trips
- sources of information for weather forecasts and road/track conditions:
 - water and food requirements for trip
 - emergency communication methods
 - first aid and first aid kit
- procedures for:
 - pre-departure vehicles check
 - track assessment
 - wheel placement over rutted, broken ground
 - using traction aids
 - driving ascents and descents greater than 15 degrees
 - performing a safe stop and start forward down a slope (greater than 15 degrees) and in reverse down a slope in manual or automatic vehicle
 - performing a water crossing of at least axle depth
 - driving in loose ground such as mud and sand
 - vehicle shutdown
- vehicle selection for complex four wheel drive activity:
 - high and low range or similar capability
 - requirement for wading depth according to manufacturer specifications
 - types, purpose and use of traction aids
 - types and uses of tyres for complex four wheel drive activity
 - impact of tyre pressure on traction
 - Gross Vehicle Mass (GVM) or Gross Vehicle Weight (GVW)
 - impact of loading and accessories on GVM or GVW
- type and use of personal protective equipment required for complex four wheel drive activity
- type of emergency equipment used in complex four wheel drive activity
- type and use of communications equipment used in remote locations
- purpose and procedures for securing loads
- types of road surfaces and impact on traction when ascending or descending steep slopes
- impact of wet weather on track conditions
- environmental impact of four wheel drive use on wet unsealed roads
- techniques for four wheel driving in difficult terrain
- reasons and procedure for post-trip vehicle inspection

- water crossings:
 - assessment of water crossings, including water base, water depth, flow rate and debris
 - vulnerable aspects of vehicle when completing water crossings
 - environmental impact of water crossings.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site with access to a water crossing and difficult terrain with safe entry into and out of a waterway, shallow run-ins and a firm base. Simulated water crossings are acceptable for assessment if no suitable crossing is available due to little or no water level or flooded and unsafe to cross
 - manual or automatic four wheel drive vehicle with a low range transmission or equivalent
 - PPE required for operating a four wheel drive in difficult conditions and waterways
- specifications:
 - workplace safety and environmental policies and procedures applicable to the use of four wheel drive vehicles in difficult conditions and waterways.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT6204 Use carbon accounting to estimate emissions

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT6204A Use carbon accounting to estimate emissions in the workplace which was first released with FPI11 Forest and Forest Products Training Package Version 2.2

Application

This unit of competency describes the outcome required to identify and apply carbon accounting methodologies to develop and analyse a carbon inventory. It applies to senior managers and can apply to the full scope of forest and wood products industry workplaces and to operations of all sizes.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Evaluate context for carbon accounting	<p>1.1 Determine organisational need to quantify stocks, sources and sinks of carbon and other greenhouse gas (GHG) emissions in line with anthropogenic impacts on global climate.</p> <p>1.2 Investigate mandatory and voluntary obligations for carbon</p>

ELEMENTS	PERFORMANCE CRITERIA
	<p>accounting under international conventions and protocols within national context.</p> <p>1.3 Examine the principles of baseline scenario, leakage and permanence.</p> <p>1.4 Assess the role of forest and wood products industry in global balance of GHG emissions.</p> <p>1.5 Establish organisational objective of conducting carbon emission accounting.</p>
2. Identify carbon accounting methodologies and define approach	<p>2.1 Identify and explore methodologies for carbon accounting.</p> <p>2.2 Examine carbon accounting frameworks.</p> <p>2.3 Identify protocols for carbon biomass pools including harvested wood products and non-CO2 emissions.</p> <p>2.4 Establish approach for developing carbon inventory in line with nationally agreed standards.</p>
3. Establish accounting area	<p>3.1 Define organisational and operational boundaries for carbon inventory.</p> <p>3.2 Determine time period over which carbon emissions will be assessed.</p>
4. Collect data	<p>4.1 Identify emissions and offset sources.</p> <p>4.2 Determine collection of activity consumption and offset data, based on data availability, analytical capacity and available resources.</p> <p>4.3 Construct carbon inventory summary table, listing and separating emission sources into correct scopes.</p> <p>4.4 Include carbon offset sources outside scope in carbon inventory summary table.</p> <p>4.5 Record available data in separate spreadsheet tabs.</p> <p>4.6 Research and gather existing secondary and field data for carbon storage sources.</p>
5. Calculate carbon emissions	<p>5.1 Calculate carbon dioxide equivalent emissions consistent with GHG protocol within spreadsheets for each emissions source.</p> <p>5.2 Calculate carbon storage according to standardised methodology for each carbon offset source in the inventory.</p> <p>5.3 Populate carbon inventory summary with calculated emissions and offsets in descending order.</p>

ELEMENTS	PERFORMANCE CRITERIA
	5.4 Calculate total emissions for each scope and for removals and offsets. 5.5 Calculate sum total of emissions and offsets for inventory. 5.6 Estimate change in carbon stock if a baseline exists. 5.7 Display emissions by scope and source, using charts or graphs. 5.8 Formulate suitable ratio indicator for organisation and calculate value based on total carbon emissions in the summary. 5.9 Report value of ratio indicator in carbon inventory summary.

Foundation Skills

<i>This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.</i>	
Numeracy skills to:	<ul style="list-style-type: none"> • interpret a range of complex abstract numerical data • complete highly technical and complex calculations using equations • record abstract data with precision and prepare interpretative charts and graphs.
Reading skills to:	<ul style="list-style-type: none"> • interpret highly technical, complex and unfamiliar information within international and Australian protocol and convention documents.
Writing skills to:	<ul style="list-style-type: none"> • document clear explanatory notes for calculations.
Planning and organising skills to:	<ul style="list-style-type: none"> • source, collect and organise a range of data to inform carbon emission calculations • plan and organise collection of all required information and manage own timing and productivity to complete calculations.
Technology skills to:	<ul style="list-style-type: none"> • use a computer, keyboard and spreadsheet software to prepare and maintain calculations.

Unit Mapping Information

FPICOT6204A Use carbon accounting to estimate emissions in the workplace.

Assessment Requirements for FWPCOT6204 Use carbon accounting to estimate emissions

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT6204A Use carbon accounting to estimate emissions in the workplace which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- For a given forest and wood products industry organisation within any sector:
 - identify mandatory and voluntary obligations for carbon accounting
 - define organisational objectives for participating in carbon accounting processes
 - define boundaries for the carbon inventory
 - select a methodology for carbon accounting calculations for emissions and offsets
- Complete two different carbon accounting calculations for two different time periods in line with the selected methodology and include the following factors:
 - direct greenhouse gas (GHG) emissions
 - indirect GHG emissions
 - on-site and off-site emissions (geographical)
 - upstream emissions
 - downstream emissions
 - full cycle accounting
 - non-CO2 emissions; soil disturbance, fertilisation, biomass combustion

In forest applications also consider the following:

- above ground biomass
- below ground biomass
- dead organic matter - wood, litter
- soil organic matter

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Methods to access, locate and select applicable objectives and key content in relevant international and national conventions, protocols, standards and guidance frameworks, including the following key references:
 - Kyoto Protocol
 - ISO 14000 essentials:
 - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
 - Greenhouse Gas Protocol Corporate Standard
 - Copenhagen Agreement
 - National Greenhouse Accounts (NGA) Factors Workbook
- Key drivers for carbon accounting
- Basic theory of the greenhouse effect and its impacts
- Basic principles of the carbon cycle and influences
- Carbon accounting terminology, frameworks and methods used to calculate carbon emissions and offsets
- Types of emissions and offset sources included in common calculations:
 - Direct GHG emissions
 - Indirect GHG emissions
 - On-site and off-site emissions (geographical)
 - Upstream emissions
 - Downstream emissions
 - Full cycle accounting
 - Non-CO2 emissions; soil disturbance, fertilisation, biomass combustion
- Sources of secondary data for carbon accounting
 - national statistical agencies
 - research institutes
 - information from sectoral experts
- Organisational and operational boundaries for the carbon inventory
- The full range of organisational emission sources and methods used to select key emission factors for calculations.

Assessment Conditions

The following resources must be made available:

- Computer, keyboard and spreadsheet software to prepare and maintain calculations
- Documents, spreadsheets and commonly used proformas for calculating carbon emissions

- Access to international and national conventions, protocols, standards and guidance frameworks including the following key references:
 - Kyoto Protocol
 - ISO 14000 essentials:
 - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
 - Greenhouse Gas Protocol Corporate Standard
 - Copenhagen Agreement
 - National Greenhouse Accounts (NGA) Factors Workbook

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM2207 Undertake brushcutting operations

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM2207B Undertake brushcutting operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan for and safely cut vegetation using a professional standard blade type brushcutter. Work is completed in a variety of work settings including forest environments, farms, nurseries and local council environments.

The unit applies to forestry worker, plantation forest officer, arboriculture worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for brushcutting	1.1 Review work order and where required check with appropriate personnel. 1.2 Select personal protective and other equipment and check for operational effectiveness.

ELEMENTS	PERFORMANCE CRITERIA
	<p>1.3 Identify and assess environmental conditions and site hazards in line with organisational procedures.</p> <p>1.4 Select appropriate cutting methods for identified types of vegetation and to optimise time and safety.</p>
2. Operate brushcutter	<p>2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices.</p> <p>2.2 Use hand signals with other operators to maintain effective and safe operations.</p> <p>2.3 Adjust brushcutter safety harness and handles to correct ergonomic position.</p> <p>2.4 Monitor brushcutter for operational effectiveness and refuel as required.</p> <p>2.5 Operate brushcutter appropriate to site conditions and at a safe distance from other people present.</p> <p>2.6 Dispose of cut vegetation in line with environmental protection practices.</p>
3. Complete operator maintenance	<p>3.1 Follow organisational safety procedures to lock out equipment.</p> <p>3.2 Check brushcutter blades for bluntness or damage.</p> <p>3.3 Remove and replace brushcutter blades and other operator-replaceable components in line with manufacturer's recommendations.</p> <p>3.4 Dispose of used blades in line with environmental protection practices.</p> <p>3.5 Record and report equipment faults and maintenance requirements to appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> complete routine measurements of fuel volume.
Oral communication skills to:	<ul style="list-style-type: none"> ask open and closed probe questions and actively listen to clarify contents of work orders.
Reading skills to:	<ul style="list-style-type: none"> interpret: <ul style="list-style-type: none"> workplace health and safety and other organisational

	procedures <ul style="list-style-type: none"> • work orders • manufacturers' instructions and maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> • complete accurate basic records for equipment faults and maintenance requirements.
Planning and organising skills to:	<ul style="list-style-type: none"> • efficiently and logically sequence the stages of preparation and brushcutting activities using work order to guide activities.

Assessment Requirements for FWPFGM2207 Undertake brushcutting operations

Modification History

Release	Comment
Release 1	<p>Replaces equivalent unit FPIFGM2207B Undertake brushcutting operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- assess, plan and safely complete brushcutting jobs in line with work order prescribing areas and types of vegetation to be cut
- on completion of each of the above jobs:
 - dispose of cut vegetation in line with environmental protection practices
 - complete operator maintenance operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
 - complete basic records for equipment faults and maintenance requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- typical workplace hazards associated with operating brushcutters and methods of minimising risks:
 - ground growth
 - ground slope
 - ground hazards
 - noise
 - weather
 - kickback

- flying objects
- safe working distances from other people present
- purpose, features and safe operation of brushcutters
- the correct ergonomic position in which to conduct brushcutter operations, including using a safety harness and handle adjustments
- methods for assessing blade condition, removing and replacing
- operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
- different types of vegetation and the appropriate brushcutting methods
- environmental protection practices for disposing of cut vegetation:
 - recycling vegetation where appropriate
 - sending vegetation to landfill only where it cannot be recycled
 - redirecting vegetation for energy recovery.
- organisational procedures specific to brushcutting operations:
- workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
- communication reporting lines
 - recording and reporting equipment faults and maintenance requirements.

Assessment Conditions

The following resources must be made available:

- brushcutters
- maintenance tools and equipment for removing and replacing blades
- consumable fuel, brushcutter blades and other components
- personal protective equipment suitable for operating brushcutters
- manufacturers' instructions for use and maintenance of equipment
- work order with specific instructions for brushcutting operations
- template documents for recording equipment faults and maintenance requirements
- relevant personnel for the purposes of communicating information
- organisational procedures for operating brushcutters.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3201 Manage seed collection

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3201B Manage seed collection, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan and monitor the implementation of seed collection or sowing programs. The unit includes collection of native and non-native species.

The unit applies to those who manage seed collection in settings such as: forest environments, farms, agriculture, nurseries and local councils.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

Forest Growing and Management

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Plan seed collection	1.1 Analyse seeding and/or planting program and identify seed characteristic requirements.

	<p>1.2 Identify seed collection opportunities and determine a suitable area for seed collection.</p> <p>1.3 Select seed collection methods and determine the quantity, cost and impacts on provenances and species.</p> <p>1.4 Identify the required approvals and seek and obtain from relevant authorities.</p> <p>1.5 Determine measurable performance indicators, specifications and targets.</p> <p>1.6 Seed collection plan, costs and performance indicators are clearly documented and communicated to appropriate personnel.</p>
2. Implement and monitor seed collection	<p>2.1 Coordinate and schedule resources required for seed collection.</p> <p>2.2 Establish and maintain communication with others to ensure safety.</p> <p>2.3 Implement the seed collection plan.</p> <p>2.4 Monitor seed collection activities to ensure compliance requirements are adhered to.</p> <p>2.5 Adjust seed collection activities to meet site conditions and communicate to appropriate personnel.</p>
3. Review seed collection	<p>3.1 Assess and evaluate data from seed collection activity to confirm techniques, methodologies and costs are in line with plan.</p> <p>3.2 Identify issues and impediments to seed collection activities and program costs.</p> <p>3.3 Prepare a cost benefit analysis and make recommendations to improve future seed collecting activity.</p> <p>3.4 Record and report seed collection activity to appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> calculate costs of seed collecting activity and simple cost benefit analysis
Oral communication skills to:	<ul style="list-style-type: none"> interact with land owners, and internal and external bodies and groups to gain approvals disseminate information about seed collecting activity to appropriate personnel.
Writing skills to:	<ul style="list-style-type: none"> prepare a seed collecting plan and report on seed collection

	activity.

Assessment Requirements for FWPFGM3201 Manage seed collection

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIFGM3201B Manage seed collection, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow legal and regulatory requirements, and codes of practice for managing seed collection
- follow organisational policies and procedures for managing seed collection
- develop a plan for seed collection which includes measurable performance indicators, specifications and targets
- coordinate and schedule resources, and manage the work of others to achieve specific outcomes
- monitor seed collection operations, ensuring that activity follows quality standards
- document results from seed collection activities and prepare a report for relevant personnel.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for managing seed collection
- organisational and site standards, policies and procedures for managing seed collection
- environmental risks and hazards of seed collection
- seed collection methods including:
 - climbing

- removal of branches with rifle
- elevated platform vehicles
- collecting after falling or felling
- ladders
- shaking
- biological signs that indicate that the seed crop is ready to be collected
- procedures to extract and handle seed from collected material, including handling procedures of the seed crop after picking
- treatment and documentation requirements of extracted seed
- characteristics of seed including:
 - provenance
 - potential growth characteristics
 - forest types
 - optimum time to collect
 - physiology and biology
 - dormancy
 - species
- process for approvals to undertake seed collection
- established communication channels and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- seed collection site
- tools and equipment required to collect seed
- relevant personnel for the purposes of communicating information
- organisational requirements and standards for managing seed collection.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3202 Extract seed

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3202B Extract seed, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to extract and process native or non-native seed using an extraction unit. It includes seed storage requirements and extraction unit maintenance.

The unit applies to those who extract seed in a variety of work settings, including forest environment settings such as farms, agriculture, workshops, domestic, nurseries and local councils.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for seed extraction	1.1 Review and clarify work order with appropriate personnel. 1.2 Receive and visually assess seed bearing material and ensure species is identified on container label.

	<p>1.3 Weigh and label containers with identifiers in line with site procedures.</p> <p>1.4 Store material in dry and well-ventilated conditions.</p>
2. Extract seed	<p>2.1 Plan and check seed extraction processes for safe working conditions</p> <p>2.2 Select appropriate extraction units and equipment and check for operational effectiveness.</p> <p>2.3 Operate and monitor seed extraction systems to extract maximum seed yield.</p> <p>2.4 Inspect seed capsules and reprocess as required to ensure maximum yield.</p>
3. Clean and store seed	<p>3.1 Weigh and store separated seed in line with species requirements and site procedures.</p> <p>3.2 Accurately record seed information.</p> <p>3.3 Package seed for storage with label to maintain traceability to collection source.</p>
4. Clean and maintain extraction unit	<p>4.1 Clean, maintain and calibrate extraction units and equipment.</p> <p>4.2 Dispose of residue and other waste material in line with site environmental management guidelines.</p> <p>4.3 Report abnormal operation or faults in equipment for corrective action.</p> <p>4.4 Clean and maintain work areas in line with site procedures, and organisational and environmental requirements.</p> <p>4.5 Record and report results of seed extraction process.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

- calibrate scales, ensuring compliance with weights and measure authority.
- correctly label seeds
- complete records, reports and maintenance logs.

Range of Conditions

Not Applicable

Assessment Requirements for FWPFGM3202 Extract seed

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIFGM3202B Extract seed, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- apply safe and efficient techniques to identify, extract, clean and store seed in line with species requirements, work order and organisational guidelines
- operate seed extraction units and equipment including
 - kilns operated by gas, solar energy, oil or electricity
 - sieves of various sizes
 - air-drying racks and trays
 - conveyor belt
- clean, maintain and calibrate seed extraction units and equipment
- record seed species information and extraction results including
 - species name
 - weight
 - place or origin
 - container identifier.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for extracting seed
- organisational and site standards, policies and procedures for extracting seed
- environmental protection requirements for extracting seed
- the cleaning maintenance and calibration of plant, tools and equipment
- hazards associated with seed extraction, processing and storage
- seed species, including native and non-native
- seed extraction processes
- identification of seed species from capsules
- storage procedures and requirements for different seed species
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- manual or automated seed extraction equipment
- material with seed to be extracted
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- work order, workplace requirements and site standards for extracting seed.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3212 Fall trees manually (intermediate)

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

Persons competent in this unit should be able to effectively fell most trees except very large trees, and/or those with significant defects and/or characteristics that cause excessive complexity.

It applies to trees that have a diameter greater than the bar length of the chainsaw.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution, which can be assessed and readily adapted to falling direction with the use of wedges and/or control with hinge-wood
- various dimensions relative to local forest size distribution
- limited visible damage or defect
- species prone to free splitting and adverse reactions during felling
- single or multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for felling	<p>1.1 Identify and comply with applicable work health and safety (WHS), environmental, legislative and organisational requirements relevant to felling trees</p> <p>1.2 Identify and adhere to site environmental protection measures according to relevant legislation and regulations</p> <p>1.3 Review and check job requirements with appropriate personnel</p> <p>1.4 Sharpen and adjust chainsaw or change components according to manufacturer recommendations</p> <p>1.5 Assess tree and determine felling requirements</p> <p>1.6 Identify and control potential and existing risks and hazards in the work area</p> <p>1.7 Identify trees to be retained and felled</p> <p>1.8 Establish and maintain communication with others according to WHS requirements</p>
2. Visually assess site conditions and surroundings	<p>2.1 Review terrain and slope to determine if they add complexity to the operation</p> <p>2.2 Assess general factors affecting felling requirements and detect and control specific forest or site risks and hazards</p>
3. Assess tree and plan felling	<p>3.1 Visually assess tree for felling characteristics</p> <p>3.2 Confirm tree is safe to fell</p> <p>3.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations</p> <p>3.4 Identify trees to be felled for size, significant defects and any characteristics causing excessive complexity</p> <p>3.5 Assess and progressively plan tree-felling sequence for individual trees</p> <p>3.6 Assess and check required falling direction and possible deviation</p> <p>3.7 Plan sequence of cuts to fell tree according to standard felling</p>

	<p>procedures</p> <p>3.8 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required</p> <p>3.9 Monitor and exclude location and activity of other personnel on the work site</p>
4. Apply tree-felling techniques	<p>4.1 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements</p> <p>4.2 Fell individual trees using planned techniques according to site requirements, at a safe distance from other personnel in the work area</p> <p>4.3 Adjust cutting technique in response to movement and condition of tree</p> <p>4.4 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable</p> <p>4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen</p> <p>4.6 Identify and implement procedures for removal of trees that are hung-up</p> <p>4.7 Dispose of waste materials in line with environmental and operational requirements</p> <p>4.8 Detect, rectify and report blunt or damaged saw chain according to workplace procedures</p> <p>4.9 Monitor chainsaw for operational effectiveness and record and report faults, malfunctions and problems according to workplace procedures</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> • measure and record tree height, length and diameter • estimate, measure and compare height, size and distance relevant to tree felling • calculate product mass of individual trees and determine fall zone
Oral communication skills to:	<ul style="list-style-type: none"> • select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees • interpret hand signals with other operators to ensure safe tree

	felling
Reading skills to:	<ul style="list-style-type: none"> • interpret: <ul style="list-style-type: none"> • workplace health and safety, industry standards and regulations for felling trees and other relevant tree felling procedures • work orders • manufacturers' maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> • complete forms to record WHS considerations for felling trees • report equipment faults and request maintenance of equipment. • complete log book requirements
Planning and organising skills to:	<ul style="list-style-type: none"> • identify an unsafe tree. • efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.
Problem solving skills to:	<ul style="list-style-type: none"> • plan and apply the hierarchy of risk control • review and identify work requirements • recognise own limitations in conditions and trees for felling • identify problems and equipment faults and demonstrate appropriate response procedures

Assessment Requirements for FWPFGM3212 Fall trees manually (intermediate)

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at an intermediate level
- comply with organisational policies and procedures relevant to felling trees manually at an intermediate level
- comply with applicable licensing and certification requirements relevant to felling trees at an intermediate level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an intermediate level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell intermediate trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up

- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at an intermediate level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
 - PPE and clothing
 - safety equipment
 - first aid equipment
 - firefighting equipment
 - hazard and risk control procedures
 - fatigue management procedures
 - appropriate signage
 - elimination of hazardous materials and substances procedures
 - safe forest practices, including required actions relating to fire
 - techniques for manual handling, including shifting, lifting and carrying
 - types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
 - shakes
 - insect defects
 - knots and resin pockets
 - pipe
 - drysides
- Identifying trees:
 - that contain hazards and are deemed unsafe to fell
 - considered outside own skill level
 - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
 - uneven and unstable terrain
 - unsafe trees
 - fires
 - overhead and underground services
 - excavations

- traffic
- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
 - native vegetation
 - soil and water
 - heritage and archeological artefacts
 - flora and fauna
 - geomorphologic features
 - landscape
 - external site pollution
 - recreational opportunities
 - regeneration opportunities
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on intermediate tree felling activities:
 - general forest lean
 - ground growth
 - ground hazards and obstacles
 - ground slope
 - gullies
 - presence and density of seed and habitat trees
 - water courses
 - wet and adverse weather conditions
 - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
 - warning signs
 - chainsaw and components
 - PPE and clothing
 - first aid equipment
 - maintenance requirements
 - support tools
 -

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
 - Safety helmet
 - Safety gloves
 - Protective footwear
 - Eye protection
 - Hearing protection
 - High visibility clothing
 - Leg protection (trousers or chaps)
- materials and equipment including:
 - warning signs
 - chainsaw and components
 - first aid equipment
 - maintenance tools and equipment
 - support tools
 - manufacturers' instructions for use and maintenance of equipment
 - radio or communication device
 - fire fighting equipment (if prescribed)
- specifications and work instructions, including
 - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
 - policy and procedures for work health and safety (WHS)
 - risk assessment plan
 - general and specific environmental requirements
 - applicable state or territory logging code of practice
 - emergency and evacuation procedures
 - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3213 Fall trees manually (advanced)

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3213 Fall trees manually (advanced), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.

Persons competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution that adds significant complexity yet can be assessed and adapted to site requirements
- larger dimensions relative to local forest size distribution
- substantial lean
- damage or defect that requires complex felling techniques
- multi-legged, hollow butts, culls and stags
- species prone to free splitting and adverse reactions during felling
- single or complex multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add significant complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
 - native vegetation
 - soil and water
 - heritage and archeological artefacts
 - flora and fauna
 - geomorphologic features
 - landscape
 - external site pollution
 - recreational opportunities
 - regeneration opportunities
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on advanced tree felling activities:
 - general forest lean
 - ground growth
 - ground hazards and obstacles
 - ground slope
 - gullies
 - presence and density of seed and habitat trees
 - water courses
 - wet and adverse weather conditions
 - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
 - warning signs
 - chainsaw and components
 - PPE and clothing
 - first aid equipment
 - maintenance requirements
 - support tools
 -

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
 - safety helmet
 - safety gloves
 - protective footwear
 - eye protection
 - hearing protection
 - high visibility clothing
 - leg protection (trousers or chaps)
- materials and equipment including:
 - warning signs
 - chainsaw and components
 - first aid equipment
 - maintenance tools and equipment
 - support tools
 - manufacturers' instructions for use and maintenance of equipment
 - radio or communication device
 - fire fighting equipment (if prescribed)
- specifications and work instructions, including
 - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
 - policy and procedures for work health and safety (WHS)
 - risk assessment plan
 - general and specific environmental requirements
 - applicable state or territory logging code of practice
 - emergency and evacuation procedures
 - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3216 Fell trees manually (intermediate)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to assess, plan and safely carry out manual felling of intermediate trees using a chainsaw. This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

Individuals competent in this unit should be able to effectively fell most trees, except advanced trees and/or those with significant defects and/or characteristics that cause excessive complexity.

Trees typical to the scope of this unit may have some of the following characteristics:

- lean and weight distribution that can be assessed and readily adapted to falling direction with the use of wedges and/or controlled with hinge wood of a larger size than typical for the local environment
- limited visible damage or defect
- multi-stems
- forward lean, backward lean or side lean
- small or medium size diameter trees that can be safely felled with intermediate felling techniques
- dead trees with minimal visible damage or defects that do not add significant complexity to the cutting technique
- various dimensions relative to other trees when working in a forest environment
- in local site conditions that add additional complexity to the felling operation, including site conditions that impact the working position of the operator or the natural direction of fall of the tree.

The unit applies to individuals who fell intermediate trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management (FGM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for felling	<p>1.1 Determine job requirements from work order or instruction and, where required, seek clarification from appropriate personnel</p> <p>1.2 Confirm safety and environmental requirements for the task according to workplace procedures</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with felling intermediate trees</p> <p>1.4 Identify, assess and determine felling requirements of trees to be felled according to work order or instruction</p> <p>1.5 Consult and maintain communication with team members and other appropriate personnel to ensure that work is coordinated effectively with others in the workplace</p> <p>1.6 Obtain tools and equipment needed for the work, and check for correct operation and safety</p> <p>1.7 Select, fit and use personal protective equipment</p>
2. Assess site conditions and surroundings	<p>2.1 Inspect site for conditions likely to affect safe implementation of felling activities</p> <p>2.2 Identify and report site environmental conditions to appropriate personnel</p> <p>2.3 Determine fall zone and implement control measures to minimise risks and hazards in the zone according to safe work procedures</p> <p>2.4 Monitor location and activity of other personnel on the work site, and implement control measures according to workplace safety procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
3. Assess tree and plan felling	3.1 Identify trees considered outside own skill level, and seek assistance from appropriate personnel where required 3.2 Assess tree visually to identify felling characteristics 3.3 Confirm tree is safe to fell 3.4 Assess trees and site to determine complexity of felling requirements 3.5 Assess and progressively plan tree-felling sequence for individual trees 3.6 Assess and check required felling direction and possible deviation 3.7 Plan sequence of cuts to fell tree according to standard felling procedures 3.8 Assess need, safety and suitability of an industry approved technique and associated equipment to control tree fall 3.9 Identify suitable escape routes, and clear growth and other obstacles according to environmental care principles and workplace procedures
4. Apply tree-felling techniques	4.1 Apply an industry approved technique and equipment to ensure that the tree falls in the direction of the scarf cut 4.2 Fell individual trees using planned and appropriate techniques according to the current Australian Standard and industry code of practice at a safe distance from other personnel in the work area 4.3 Adjust cutting technique in response to movement and condition of tree 4.4 Maintain accuracy of cuts and consistency with the cutting technique 4.5 Use planned escape route when tree starts to fall, and monitor the fall of the tree until all movement has stopped 4.6 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen or is stable enough to allow safe access back into the felling area 4.7 Identify procedures for removal of trees that are hung-up if safe to do so 4.8 Dispose of waste materials according to environmental and operational requirements
5. Maintain chainsaw	5.1 Follow workplace health and safety procedures and manufacturer

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
and cutting attachments	instructions to lock out equipment 5.2 Inspect chainsaw on completion of activities 5.3 Inspect for damage to chainsaw and cutting attachments, and tag for repair, service or replacement according to workplace requirements and manufacturer recommendations if required 5.4 Remove, clean, adjust, sharpen or replace chain and other components according to workplace requirements and manufacturer recommendations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read workplace documentation and correctly identify work requirements
Writing	<ul style="list-style-type: none"> Use technical and workplace specific vocabulary to accurately and legibly complete workplace records and forms
Oral communication	<ul style="list-style-type: none"> Select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees Interpret hand signals with other operators to ensure safe tree felling
Numeracy	<ul style="list-style-type: none"> Complete routine calculations and report on size, length and diameter of felled trees

Assessment Requirements for FWPFGM3216 Fell trees manually (intermediate)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assessed, planned and conducted the felling of six intermediate trees. This must include demonstration of:

- two different scarf cutting techniques
- two different back cutting techniques, which must be for either forward leaning, side leaning or back leaning trees
- applying, on one occasion, an industry approved technique, such as the use of wedges, to ensure that the tree falls in the direction of the scarf cut.

The scarfing methods must be selected from the following:

- Standard
- Humboldt
- 90 degree scarf
- V scarf.

In performing all cuts, the individual must have complied with the following criteria:

- direction – the scarf must be in the direction of the desired fell
- depth – the depth of the scarf is 1/4 to 1/3 of the diameter of the tree
- size (width) of opening – 2/3 across the front of the tree
- top and bottom scarf cuts – the two cuts should meet without overcutting or undercutting, the scarf line is level and the scarf line is at 90 degrees to the intended direction of fall
- back cut height – the back cut is level and above the scarf line by about 1/10 of the tree diameter
- hinge wood thickness is about 1/10 of the tree diameter.

In completing this work, the individual must demonstrate that, for each tree, the felling technique was consistent with current Australian Standards and industry codes of practice applicable to tree felling operations.

There must also be evidence that the individual has inspected and carried out routine maintenance on one occasion on one chainsaw and its cutting attachments according to manufacturer requirements.

This work must comply with workplace policy and procedures and current workplace health and safety legislation and regulations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australian Standards and codes of practice applicable to tree felling operations
- hazards and risks related to felling trees with chainsaws, and methods to minimise associated risks:
 - physical conditions of the site
 - unsafe/hazardous trees
 - fire and other emergency situations
 - overhead and underground services
 - nearby structures
 - standing vegetation in the intended direction of fall
 - falling branches
 - weather conditions
 - impediments of escape routes
 - vehicle and traffic access
 - people on or near worksite
 - machinery on or near worksite
 - carrying and transporting a chainsaw
 - user fatigue
- hazards related to maintaining chainsaws, and methods to minimise associated risks
- features of unsafe/hazardous intermediate trees and defects of trees and how they affect tree felling activities
- types and purposes of cuts to fell intermediate trees:
 - scarf cuts
 - back cuts using different methods to provide hinge wood and wedges to maintain control of tree
- characteristics of intermediate trees
- methods used to identify intermediate trees:
 - that contain hazards and are deemed unsafe to fell
 - that are considered outside own skill level
 - where cuts made may lead to loss of control of tree in felling
- methods used to remove trees that are hung up, and procedures for removal
- methods for assessing chain condition

- types, safe use, operation and maintenance of chainsaws, support tools and attachments
- workplace procedures specific to felling trees with chainsaws:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE), safe manual handling and fire prevention measures
 - communication reporting lines
 - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection measures that meet legal obligations and requirements of the industry, state and local standards and/or codes of practice for felling trees with chainsaws:
 - protection of natural and cultural assets
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials
 - disposing of hazardous substances.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chainsaw and accessories
 - suitable trees to fell
 - tools and equipment to fell trees
 - PPE required in tree felling operations
 - communication system
- specifications:
 - access to workplace safety and environmental policies and procedures applicable to tree felling and chainsaw operations
 - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPFGM5219 Undertake carbon stock sampling of forests and plantations

Modification History

Release	Comment
1	Replaces superseded equivalent unit FPIFGM5219 Undertake carbon stock sampling which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the outcomes required to assess forests and plantations for current and future carbon stocks, including the use of growth modelling techniques to estimate future stocks. Work is completed in a variety of settings including native forest environments, hardwood or softwood plantations and agroforestry and farm forestry.

The unit applies to job roles including Forest Auditor, Forest Planner, Environmental Manager, Environmental Planner Forest Sustainability Manager And Sustainability Manager.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>

ELEMENTS	PERFORMANCE CRITERIA
1. Plan for carbon stock sampling activities	<p>1.1 Confirm purpose, objectives and scope of sample collection activity through stakeholder discussions and consultations.</p> <p>1.2 Conduct desktop study of existing forests and plantations.</p> <p>1.3 Design measurement program and confirm sampling site locations and where required, obtain approval for site access.</p> <p>1.4 Evaluate characteristics of sites for impact on sampling and testing method.</p> <p>1.5 Determine and arrange human and physical resource requirements.</p>
2. Prepare for carbon stock sampling activities	<p>2.1 Locate forests and plantations using site maps and plans and identify areas for sampling.</p> <p>2.2 Complete administrative requirements, arrange contractors and obtain approvals in line with organisational procedures.</p> <p>2.3 Complete a risk assessment for the sample site and activities.</p>
3. Conduct carbon stock sampling collection	<p>3.1 Inspect and test sampling equipment to ensure operational effectiveness.</p> <p>3.2 Coordinate sampling activities at sites prior to commencement of and during the work activity.</p> <p>3.3 Conduct surveys and sampling in line with organisational safety procedures.</p> <p>3.4 Record results of samples and surveys, in line with sampling plan.</p> <p>3.5 Monitor sampling activities on a regular basis against sampling plan, and implement modifications or improvements as required.</p>
4. Interpret results	<p>4.1 Estimate forest carbon stocks from collected data.</p> <p>4.2 Review data against assessment program in line with organisational procedures.</p> <p>4.3 Analyse data to determine effectiveness of assessment.</p> <p>4.4 Prepare recommendations for future programs based on analysis.</p> <p>4.5 Record and report assessment processes and improvement suggestions to appropriate personnel.</p>
5. Use growth models to predict biomass and carbon stocks	<p>5.1 Select appropriate growth model.</p> <p>5.2 Predict biomass growth and carbon stocks from data</p>

ELEMENTS	PERFORMANCE CRITERIA
	assessments and incorporate in growth model. 5.3 Analyse data to determine comparability of predicted forest carbon stocks to current available data.

Foundation Skills

<i>This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.</i>	
Numeracy skills to:	<ul style="list-style-type: none"> • Interpret numerical data and symbols on maps. • Collect, analyse and record complex statistical data. • Identify and extract relevant information from complex diagrams, graphs and charts. • Use complex numerical modelling calculations to predict biomass growth and carbon stock growth.
Reading skills to:	<ul style="list-style-type: none"> • Interpret complex information in a range of internal and external source documents to plan for sampling activities.
Oral communication skills to:	<ul style="list-style-type: none"> • Hold high-level consultative discussions to generate ideas for and negotiate purpose, objectives and scope of sampling program.
Writing skills to:	<ul style="list-style-type: none"> • Prepare detailed and accurate reports involving qualitative and quantitative content where precise meaning is required. • Report on effectiveness of programs and potential improvements including rationale for recommendations.

Assessment Requirements for FWPFGM5219 Undertake carbon stock sampling of forests and plantations

Modification History

Release	Comment
1	<p>Replaces superseded equivalent unit FPIFGM5219 Undertake carbon stock sampling which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Design two measurement programs for two individual sites to calculate current and expected biomass and carbon stocks of:
 - trees above and below ground
 - other vegetation
 - litter layer
 - soil.
- Complete survey and sampling activities for one of those sites using the measurement plan designed.
- Record and analyse all data collected for the site, estimate current carbon stocks, select a growth model and predict and document biomass growth and carbon stocks.
- Complete a report on survey and sampling activities recommending improvements for future processes.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Requirements for obtaining permits and licences for site sampling activities and the authority from whom approval must be obtained.
- Characteristics and growth habits of local vegetation.
- Soil characteristics and topography of local area.

- Purpose, features and application of measurement programs used to calculate current and expected biomass and carbon stocks of the following:
 - trees above and below ground
 - other vegetation
 - litter layer
 - soil
 - wood products.
- Data collection and sampling methods for estimating carbon stocks.
- Statistical analysis techniques applicable to biomass and carbon assessments.
- Methods used to predict biomass growth and carbon stock growth, specifically the use of growth models.
- Purpose, features and operation of survey and assessment equipment and tools, including:
 - geographic information systems
 - interpretation of topographic maps and aerial photography
- Organisational procedures specific to carbon stock sampling, including:
 - workplace health and safety with particular emphasis on risk assessment and control
 - communication reporting lines
 - recording and reporting sampling data.

Assessment Conditions

The following resources must be made available:

- topographic maps
- aerial photography
- geographic information systems
- documents and commonly used proformas for recording sampling data
- organisational procedures for carbon stock sampling.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM6203 Manage sustainable tree inventory

Modification History

Release	Comment
1	Replaces superseded equivalent FPIFGM6203 Manage sustainable tree inventory which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the outcomes required to develop a tree inventory plan to manage an inventory of forestry timber assets. The unit applies to those people who manage forests for enterprises but may also apply to people who have responsibility for sustainable tree management in urban or rural enterprises.

The unit applies to job roles including Forest Auditor, Forest Planner, Environmental Manager, Environmental Planner Forest Sustainability Manager And Sustainability Manager.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Conduct risk assessment	1.1 Research and analyse sustainable tree management

ELEMENTS	PERFORMANCE CRITERIA
for managing tree inventory	<p>requirements.</p> <p>1.2 Identify resources and site characteristics.</p> <p>1.3 Research and assess external influences on tree inventory.</p> <p>1.4 Identify risks and potential outcomes related to identified resources and site characteristics and document risk management strategy.</p>
2. Obtain approvals for development of tree inventory plan	<p>2.1 Consult stakeholders and obtain support for development of tree inventory plan and management approach.</p> <p>2.2 Obtain approval for identified inventory plan and management approach.</p>
3. Prepare tree inventory plan for sustainable forest management	<p>3.1 Identify administrative tools, physical resources and recording methodology.</p> <p>3.2 Identify forest estate and associated management requirements.</p> <p>3.3 Forecast required human and financial resources to manage inventory.</p> <p>3.4 Establish quality assurance practices for collecting, documenting and verifying data.</p> <p>3.5 Clearly document plan and communicate to appropriate personnel.</p>
4. Manage the implementation of tree inventory plan	<p>4.1 Explain inventory plan requirements and responsibilities to participating stakeholders.</p> <p>4.2 Provide stakeholder support to ensure quality outcomes and objectives are met.</p> <p>4.3 Monitor finances and resources and maintain record keeping systems.</p> <p>4.4 Monitor risks and implement contingency management processes.</p>
5. Evaluate tree inventory plan	<p>5.1 Collect, analyse and store data about tree inventory in line with organisational procedures.</p> <p>5.2 Identify and investigate variations in tree inventory outcomes and objectives.</p> <p>5.3 Consult appropriate stakeholders on variation between desired results and actual outcomes.</p> <p>5.4 Evaluate outcomes and processes against tree inventory plan.</p>

ELEMENTS	PERFORMANCE CRITERIA
	5.5 Prepare recommendations for future plans based on consultation and analysis.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> Analyse complex numerical data involving areas, ratios, percentages, volumes, lengths and diameters.
Oral communication skills to:	<ul style="list-style-type: none"> Hold high-level consultative discussions to generate ideas for and negotiate content of tree inventory plans.
Reading skills to:	<ul style="list-style-type: none"> Interpret complex information in a range of source documents to research and develop tree inventory plans.
Writing skills to:	<ul style="list-style-type: none"> Develop and document comprehensive tree inventory plans. Report on effectiveness of inventory management approach and potential improvements including rationale for recommendations.
Planning and organising skills to:	<ul style="list-style-type: none"> Source, collect and organise a range of data to inform plan content. Plan and manage own timing and productivity to plan, implement and evaluate management of tree inventory.
Technology skills to:	<ul style="list-style-type: none"> Use a computer, keyboard and software to prepare plans and reports.

FPIFGM6203 Manage sustainable tree inventory

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0d96fe23-5747-4c01-9d6f-3509ff8d3d47>

Assessment Requirements for FWPFGM6203 Manage sustainable tree inventory

Modification History

Release	Comment
1	<p>Replaces superseded equivalent FPIFGM6203 Manage sustainable tree inventory which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Develop a comprehensive written plan to manage sustainability tree inventory for a given site.
- Incorporate these inclusions in the plan:
 - risk management strategy to manage and minimise risks
 - quality assurance practices for collecting, documenting and verifying data
 - required data collection and administrative tools
 - required human resources and responsibilities
 - data recording methodology
 - recording and reporting procedures.
- For a specified period, analyse data and record and report on the following types of outcomes:
 - established growth rates
 - established volumes
 - forecasted outputs
 - forecasted sustainability
 - monitored sustainability
 - preserved forest sustainability.
- Evaluate the effectiveness of the tree inventory plan and complete a report including recommendations for improving future plans and tree management approach.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Role of wood or waste products in generating renewable energy through biomass.
- Behavioural characteristics of a range of tree species.
- Silvicultural practices associated with management objectives.
- Key sustainability indicators for tree management.
- Key content and application of mensuration theory.
- Risks involved managing a sustainable tree inventory and methods used to minimise impacts, including:
 - biological
 - pests and diseases
 - weather and climate change
 - economic risk
 - erosion
 - fire
 - market failure
 - natural disaster
 - sabotage
 - water
 - structural failure.
- External influences and how they impact on managing a sustainable tree inventory, including:
 - international and Australian forestry and environmental standards
 - state, territory and local laws
 - advisory standards and codes of practice
 - land tenure and access
 - neighbouring tenure and access
 - habitat
 - cultural and heritage sites
 - agriforestry arrangements
 - fire management
 - data availability
 - human resource skills and availability.
- Purpose, features and application of inventory management tools, including:
 - measuring or diameter tapes
 - dataloggers and laptops
 - log sheets
 - compass
 - clinometer
 - height sticks

- prisms
- mobile GPS
- maps
- survey and title data
- survey equipment
- gantt charts
- flow charts.
- Key features and benefits of different recording methodologies, including:
 - dataloggers
 - log sheets
 - manual or electronic data transfer
 - analytical techniques and formulae
 - radio, UV, laser advanced technology
 - digital dataloggers and laptop computers
 - desk or field surveys
 - testing and calibration records.
- Organisational procedures specific to managing sustainable tree inventory:
 - communication reporting lines
 - database management and document control.

Assessment Conditions

The following resources must be made available:

- Computers, keyboards, printers and software used to document plans and reports.
- Administrative tools and equipment for managing sustainable tree inventory:
 - filing systems
 - field templates
 - operational manual
 - land access information
 - gantt charts
 - flow charts.
- Documents and commonly used proformas used to document risk management strategies and tree inventory plans.
- Organisational procedures for managing sustainable tree inventory.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPHAR2206 Operate a mobile chipper/mulcher

Modification History

Release	Comment
1	Replaces equivalent unit FPIHAR2206B Operate a mobile chipper/mulcher, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate a mobile chipping or mulching unit to chip or mulch timber refuse such as branches and other timber waste left after felling operations. Work is completed in a forest or forest farm setting.

The unit applies to those who operate a mobile chipping or mulching unit in a forest environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting and Haulage

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for mobile chipping or mulching.	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate personal protective and other equipment and check for operational effectiveness. 1.3 Identify type and quantity of timber refuse to be chipped or

	<p>mulched.</p> <p>1.4 Plan chipping or mulching activities in line with work order.</p>
2. Chip or mulch timber refuse	<p>2.1 Reject timber refuse assessed as unsuitable for chipping or mulching and dispose of or recycle in line with environmental protection practices.</p> <p>2.2 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection requirements.</p> <p>2.3 Position, secure and set up chipping and mulching unit in line with manufacturer's specifications and required size.</p> <p>2.4 Direct timber refuse into chipper or mulcher at rate applicable to machine capacity.</p> <p>2.5 Chip timber refuse to chip sizes specified in work order.</p> <p>2.6 Respond to critical situations requiring emergency shutdown to prevent personal injury or damage to machine or product.</p>
3. Complete operator maintenance.	<p>3.1 Follow organisational safety procedures to lock out equipment.</p> <p>3.2 Check cutters for wear and damage at appropriate or recommended intervals.</p> <p>3.3 Remove, replace and dispose of cutters in line with manufacturer's recommendations, site procedures and environmental protection practices.</p> <p>3.4 Complete operator maintenance tasks in line with manufacturer's recommendations and site procedures.</p> <p>3.5 Record and report production outcomes and equipment faults to appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> • identify quantities of required material within work orders • read basic numerical machine settings and choose according to chip size • complete routine production records involving quantities tallied against orders.
Oral communication skills to:	<ul style="list-style-type: none"> • ask questions and actively listen to clarify contents of work orders.

Reading skills to:	<ul style="list-style-type: none"> interpret workplace health and safety and other organisational procedures work orders manufacturers' instructions and maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> complete accurate basic records for production outcomes and equipment faults.
Planning and organising skills to:	<ul style="list-style-type: none"> efficiently and logically sequence the stages of preparation and processing activities using work order to guide activities.

Assessment Requirements for FWPHAR2206 Operate a mobile chipper/mulcher

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIHAR2206B Operate a mobile chipper/mulcher, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete chipping and mulching jobs in line with individual work orders which prescribe different quantities of timber refuse and different chip sizes
- complete operator maintenance, including fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement to manufacturer recommendations and site procedures.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest and forest farm settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber
- types of timber refuse suitable and unsuitable for chipping and mulching
- purpose, features and operation of mobile chipping and mulching units
- capacity of chippers and mulchers to cope with differing sizes and diameters of branch
- feed rates at which waste is fed into chippers and mulchers to optimise output without damaging or blocking machinery
- methods for checking cutting blade condition

- operator maintenance procedures including for fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement
- common hazards associated with chipping and mulching operations and methods to minimise associated risks
- organisational procedures specific to chipping and mulching timber refuse:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting production outcomes and equipment faults.
 -

Assessment Conditions

The following resources must be made available:

- mobile chipping and mulching units feeding into a truck or other form of transportation:
 - truck mounted
 - trailer mounted
- tools and consumables for operator maintenance
- tools and equipment for removing and replacing cutters
- consumable cutters
- personal protective equipment suitable for chipping and mulching timber refuse
- timber refuse for processing
- manufacturers':
 - instructions for equipment use
 - recommendations for operator maintenance
- work order with specific instructions for chipping or mulching timber refuse
- template documents for recording production outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for chipping and mulching timber refuse.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence
-

FWPNSY3002 Extract, clean, store and despatch tree seeds

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to extract, clean, store and despatch tree seeds.

The unit applies to individuals who are involved in tree nursery operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Nursery Production (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for processing tree seeds	1.1 Determine job requirements from work order or instruction, and where required seek clarification from appropriate personnel 1.2 Confirm safety and environmental requirements, including use of personal protective equipment, for the task according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with extracting, cleaning, storing and despatching tree seeds</p> <p>1.4 Identify emergency and evacuation procedures to follow in the event of an incident or accident</p> <p>1.5 Consult with appropriate personnel to ensure that work is coordinated effectively with others in the workplace</p> <p>1.6 Select tools, equipment and materials, and check for serviceability according to workplace procedures</p>
2. Extract tree seed	<p>2.1 Receive and visually assess seed bearing material, and ensure species is identified on container label</p> <p>2.2 Weigh and allocate identifiers according to workplace procedures</p> <p>2.3 Select appropriate extraction units and equipment, and check for operational effectiveness</p> <p>2.4 Operate and monitor seed extraction systems to extract maximum seed yield</p> <p>2.5 Inspect seed capsules and reprocess as required to ensure maximum yield</p> <p>2.6 Clean, maintain and calibrate extraction units and equipment, and report abnormal operation or faults in equipment for corrective action</p> <p>2.7 Dispose of residue and other waste material according to workplace procedures</p> <p>2.8 Clean and maintain work areas according to workplace procedures</p> <p>2.9 Record and report results of seed extraction process</p>
3. Clean, treat and store tree seed	<p>3.1 Separate seeds from other materials, weigh and store according to workplace procedures</p> <p>3.2 Treat seeds to prevent deterioration according to seed species and workplace procedures</p> <p>3.3 Record seed information onto inventory system accurately according to workplace procedures</p> <p>3.4 Package seed for storage according to workplace procedures</p>
4. Prepare tree seed sample for viability testing	<p>4.1 Identify and check seed sample for testing according to work order</p> <p>4.2 Remove seed sample from lot and prepare for testing according to workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.3 Clearly label and package representative seed sample for despatch to testing body according to workplace procedures</p> <p>4.4 Record seed sample information onto inventory system accurately according to workplace procedures</p>
5. Despatch tree seed	<p>5.1 Interpret and check seed request specifications with appropriate personnel</p> <p>5.2 Retrieve seed from storage, and calculate quantities and species of seed to meet request specifications</p> <p>5.3 Weigh, document and place each seed species in an appropriate container in line with request requirements and workplace procedures</p> <p>5.4 Mix multiple seed lots thoroughly, as required in line with request specifications</p> <p>5.5 Label seed and seed mixtures according to workplace procedures</p> <p>5.6 Organise and undertake despatch of seed in line with request specifications and workplace procedures</p> <p>5.7 Record seed processing results onto inventory system according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and follow information on equipment and in workplace procedure manuals on safety and environmental requirements when processing seed Interpret instructions combining written and pictorial information on equipment or in operational manuals
Writing	<ul style="list-style-type: none"> Complete seed records and labels accurately and legibly using correct technical and enterprise specific vocabulary
Oral communication	<ul style="list-style-type: none"> Ask open and closed questions and use active listening techniques to clarify contents of work orders

Skill	Description
Numeracy	<ul style="list-style-type: none"> Calculate seed weight and quantity using scales Identify and calculate percentages in specifications for seed mix Estimate impact of time on storage of seed Estimate time to complete work tasks when processing seed Undertake numerical calculations on seed processing equipment

Assessment Requirements for FWPN3002 Extract, clean, store and despatch tree seeds

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has extracted, cleaned, stored and despatched one batch of tree seeds.

In undertaking this activity, the individual has:

- extracted tree seed using appropriate items of equipment selected from:
 - kilns operated by gas, solar energy, oil or electricity
 - sieves of various sizes
 - air-drying racks and trays
 - conveyor belt
 - computer controlled extraction systems
- cleaned, treated and stored one batch of tree seed
- prepared one tree seed sample for viability testing
- despatched one batch of seed in line with seed request specifications
- complied with safety requirements, including use of personal protective equipment (PPE)
- recorded seed processing information and results.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tree seed species and structure
- tree seed source classes
- methods to treat seed
- methods for testing, packaging and storing tree seed species using:
 - vacuum sealing
 - use of inert atmospheres, including nitrogen and carbon dioxide

- methods for controlling the packing environment, including temperature, light and moisture
- types, operation and maintenance procedures for seed processing equipment, including electric and manual scales, packaging material, seed cleaning machine, seed lot mixing device, lifting equipment
- seed separation methods:
 - hand selection
 - wind separation and winnowing
 - sieving
 - vibrating
 - flotation
 - drying
 - crumbling of husks
 - computer controlled extraction systems
- seed despatch process:
 - seed species
 - seed batching and mixing
 - pure graded seed
 - sowing rate
 - despatch container
 - method of despatch
 - sowing equipment to be used
- methods for recording seed processing information and results and maintaining workplace information
- impact and application procedures of seed treatments, including fungicides and cleaning
- hazards associated with the storage, treatment and despatch of seed
- seed species and treating, packaging and storage processes
- seed treatments and storage requirements for different seed species
- types of diseases and pests likely to infect the species
- workplace procedures for recording and reporting workplace seed information, including:
 - species
 - time and date of harvest
 - time and date of receipt into the store
 - place or origin of seed
 - container identifier
- request specifications, including:
 - seed species
 - percentage of seed mix
 - pure graded seed
 - rate of sown
 - dispatch container

- method of dispatch
- sowing equipment to be used
- appropriate container criteria:
 - length of time seed will be stored
 - method to be used to transport seed
 - equipment to be used for sowing seed
 - quantity of seed
 - size of individual seeds
- methods for viability testing tree seed samples.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tree seed bearing material
 - workplace location or simulated workplace, required to extract, treat, store and despatch tree seed
 - materials and equipment relevant to tree seed extraction and processing work
 - PPE suitable for work involving the extraction, cleaning, storing and despatching of tree seeds
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to tree seed extraction and processing work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to all persons who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for cardiopulmonary resuscitation (CPR).
- 1.4. Seek assistance from emergency services.

2. Perform CPR procedures.

- 2.1. Perform CPR in accordance with the ARC guidelines.
- 2.2. Display respectful behaviour towards casualty.
- 2.3. Operate an automated external defibrillator (AED) according to manufacturers' instructions.

3. Communicate details of the incident.

- 3.1. Accurately convey incident details to emergency services.
- 3.2. Report details of incident in line with appropriate workplace or site procedures.
- 3.3. Maintain privacy and confidentiality of information in line with statutory or organisational policies.

4. Review the incident.
- 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID001 Perform cardiopulmonary resuscitation

Links

Assessment Requirements for HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
 - handing over to emergency services
 - providing an accurate verbal report of the incident
 - reviewing the incident
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - relevant ARC guidelines to managing the unconscious breathing and non-breathing casualty and provision of CPR
 - potential incident hazards and risk minimisation processes when providing first aid

- infection control procedures, including use of standard precautions and resuscitation barrier devices
- requirements for currency of skill and knowledge
- first aid codes of practice
- appropriate workplace or site procedures relevant to the provision of first aid
- legal, workplace and community considerations, including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- AED training devices
- personal protective equipment (PPE).

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID010 Provide basic emergency life support

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to recognise and respond to life-threatening emergencies in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

This unit applies to all persons who may be required to provide an emergency response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid equipment according to manufacturers' instructions.
- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

3. Communicate details of the incident.
 - 3.1. Accurately convey incident details to emergency services.
 - 3.2. Report details of incident in line with appropriate workplace or site procedures.
 - 3.3. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.
 - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAID010 Provide basic emergency life support

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - shock
- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE)

- providing appropriate first aid treatment
- conveying incident details to emergency services or advising casualty on any required post incident action
- providing an accurate verbal report of the incident
- reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

guidelines and procedures including:

- ARC guidelines relevant to the provision of first aid
- first aid guidelines from Australian national peak clinical bodies
- potential incident hazards and risk minimisation processes when providing first aid
- infection control procedures, including use of standard precautions and resuscitation barrier devices
- requirements for currency of skill and knowledge
- first aid codes of practice
- appropriate workplace or site procedures relevant to the provision of first aid
- contents of first aid kits
- legal, workplace and community considerations, including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- Signs, symptoms and management of the following conditions or injuries:

- allergic reaction
- anaphylaxis
- asthma
- non-life-threatening and life-threatening bleeding
- cardiac conditions, including chest pain
- choking
- shock
- stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- workplace first aid kit
- adrenaline auto-injector training device
- AED training devices
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE).

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid equipment according to manufacturers' instructions.
- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

3. Communicate details of the incident.
 - 3.1. Accurately convey incident details to emergency services.
 - 3.2. Report details of incident in line with appropriate workplace or site procedures.
 - 3.3. Complete applicable workplace or site documentation, including incident report form.
 - 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.
 - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
 - minor wound cleaning and dressing
 - nosebleed
 - shock

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally

- rate, ratio and depth of compressions and ventilations
- correct hand positioning for compressions
- basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening and life-threatening bleeding
 - burns
 - cardiac conditions, including chest pain
 - choking
 - diabetes
 - drowning
 - envenomation - all current treatments
 - eye injuries
 - fractures, dislocations, strains and sprains
 - head, neck and spinal injuries
 - hypothermia
 - hyperthermia
 - minor wounds
 - nose-bleed
 - poisoning
 - seizures
 - shock
 - sharps injuries
 - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in a remote or isolated site over an extended period of time until medical assistance is provided, or evacuation occurs.

This unit applies to any site where medical assistance is likely to be delayed.

First aid is to be provided in line with guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1. Prepare equipment for first aid response in remote or isolated site. | 1.1. Evaluate information about remote or isolated site and identify potential injuries and illnesses requiring extended management.
1.2. Select first aid equipment and resources to manage a range of potential incidents, according to organisational emergency response and first aid procedures.
1.3. Select communication equipment to facilitate emergency response in remote or isolated site.
1.4. Complete pre-departure safety and serviceability checks on equipment. |
| 2. Assess the situation. | 2.1. Recognise and assess an emergency situation.
2.2. Ensure safety for self, bystanders and casualty.
2.3. Assess casualty to determine extent of first aid response.
2.4. Identify need for medical assistance and relay initial and |

- concise information.
- 2.5. Triage when multiple casualties are involved.
3. Apply appropriate first aid procedures.
- 3.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers.
- 3.2. Provide first aid in accordance with established first aid principles.
- 3.3. Display respectful behaviour towards casualty.
- 3.4. Obtain consent from casualty where possible.
- 3.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 3.6. Operate first aid equipment according to manufacturers' instructions.
- 3.7. Monitor the casualty's condition and respond in accordance with first aid principles.
- 3.8. Assess need to evacuate casualty, ability to transport to medical assistance or need for external assistance.
- 3.9. Administer medication as required according to medical instructions.
4. Communicate details of the incident.
- 4.1. Accurately convey incident details to emergency services.
- 4.2. Report details of incident in line with appropriate workplace or site procedures.
- 4.3. Complete applicable workplace or site documentation, including incident report form.
- 4.4. Maintain privacy and confidentiality of records and information in line with applicable statutory or organisational policies.
5. Coordinate evacuation and first aid activities until assistance arrives.
- 5.1. Determine need, in consultation with external services, to evacuate casualty.
- 5.2. Provide accurate information about location of incident, number of casualties, their condition and their position to enable deployment of appropriate resources.
- 5.3. Continue to provide treatment using available resources until help arrives.
- 5.4. Prepare site for evacuation of patient.
- 5.5. On approach, assist emergency services to locate the site of the incident.
- 5.6. Follow instructions and provide assistance to emergency services personnel during evacuation.
6. Review the incident.
- 6.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
- 6.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID005 Provide first aid in remote situations.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>

Assessment Requirements for HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) guidelines and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performing at least 2 minutes of ventilation and at least 2 minutes of compressions during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - responding appropriately in the event of regurgitation or vomiting
 - demonstrating a rotation of operators with minimal interruptions to compressions
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - minor wound cleaning and dressing
 - nosebleed
 - shock
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques for remote situations and appropriate equipment improvisations

- head, neck and spinal injuries
- hypothermia and hyperthermia
- life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - conducting a secondary survey assessment
 - assessing vital signs respirations, pulse, temperature
 - level of consciousness
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident
- conducted a basic triage for a multiple casualty incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies including those relevant to remote or isolated sites
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of medication

- legal requirements
- the five rights
- the responsibilities of the first aider
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions or injuries:
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - burns
 - cardiac conditions, including chest pain
 - choking
 - diabetes
 - drowning
 - envenomation - all current treatments
 - eye injuries
 - fractures, dislocations, sprains and strains
 - head, neck and spinal injuries
 - hypothermia
 - hyperthermia
 - minor wounds
 - nose-bleed
 - poisoning
 - seizures
 - shock
 - sharps injuries
 - stroke
 - life threatening bleeding including use of tourniquets and haemostatic dressings

- considerations when providing first aid including:
 - assessment, interpretation and documentation of vital signs, including normal clinical values for respirations, temperature, pulse and level of consciousness
 - how to conduct a secondary assessment of a casualty
 - basic triage processes
 - ongoing care requirements of casualty beyond initial treatment
- remote considerations in the provision of first aid, including:
 - the nature of remote or isolated sites and how this may impact on first aid management
 - key features, functions and limitations of different types of emergency communication equipment used in remote or isolated sites, and factors that affect choice:
 - radio equipment
 - mobile phones
 - satellite phones
 - alerting and tracking devices including personal locator beacons (PLBs)
 - management options relating to transporting casualty, including aero-medical evacuation
 - specific considerations contextualised to alpine, desert, marine, rural or remote settings and tropical environments
 - methods used to assist emergency services to locate incident sites and the key features, functions and limitations of resources used to assist:
 - verbal directions
 - flags
 - flares or smoke
 - fires
 - use of man-made and natural resources to supplement first aid equipment
 - content of remote area first aid kits
 - content of remote area medication boxes
- psychological impacts of first aid incidents on rescuers and how to seek help.
-

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Scenarios must concentrate on the significance of remote or isolated site circumstances.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikin following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training devices
- placebo bronchodilator and spacer device
- haemostatic dressings
- haemostatic wound packing trainer
- thermometers
- tourniquets
- tourniquet trainer
- different types of wound dressings and bandages
- blankets and items to manage a casualty for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other appropriate workplace or site incident report form, which includes space for recording vital signs of casualties
- remote first aid kits
- immobilisation devices.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID015 Provide advanced resuscitation and oxygen therapy

Modification History

Release	Comments
Release 2	Minor grammatical changes to ensure clarity. Equivalent outcome. Updated mapping details.
Release 1	HLTAID015 Provide advanced resuscitation and oxygen therapy supersedes and is not equivalent to HLTAID007 Provide advanced resuscitation.

Application

This unit describes the skills and knowledge required to use specialised equipment in the provision of resuscitation and oxygen therapy in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to persons who may be required to use specialised equipment to provide resuscitation or oxygen therapy in a range of complex situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Pre-requisite Unit

HLTAID011 Provide First Aid

Elements and Performance Criteria

ELEMENT

Elements define the essential outcomes.

1. Respond to an emergency situation.

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3 Assess the casualty and recognise the need for CPR,

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

	advanced resuscitation response or oxygen therapy.
	1.4. Manage life-threatening bleeding.
	1.5. Seek assistance from emergency services.
	1.6. Ensure environment is safe for delivery of oxygen.
2. Perform resuscitation procedures.	2.1. Perform single-rescuer cardiopulmonary resuscitation (CPR) or two-rescuer resuscitation procedures, including use of oxygen, in accordance with the ARC guidelines and availability of rescuers.
	2.2. Display respectful behaviour towards casualty.
	2.3. Use available resources and equipment according to manufacturers' instructions.
3. Deliver oxygen therapy.	3.1. Identify need for oxygen therapy, including by using a pulse oximeter.
	3.2. Use appropriate delivery device to provide oxygen.
	3.3. Monitor casualty condition and rectify issues preventing adequate treatment.
4. Communicate details of the incident.	4.1. Accurately convey incident details to emergency services.
	4.2. Report details of incident in line with appropriate workplace or site procedures.
	4.3. Complete applicable documentation, including incident report form.
	4.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
5. Review the incident.	5.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
	5.2. Contribute to a review of the first aid response as required.
	5.3. Check, maintain and clean equipment ready for future use.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and

employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

HLTAID015 Provide advanced resuscitation and oxygen therapy supersedes and is not equivalent to HLTAID007 Provide advanced resuscitation.

Assessment Requirements for HLTAID015 Provide advanced resuscitation and oxygen therapy

Modification History

Release	Comments
Release 2	Minor grammatical changes to ensure clarity, equivalent outcome. Updated mapping details.
Release 1	HLTAID015 Provide advanced resuscitation and oxygen therapy supersedes and is not equivalent to HLTAID007 Provide advanced resuscitation.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performing at least 2 minutes of bag-valve-mask (with oxygen) ventilation and at least 2 minutes of compression during resuscitation procedures involving at least two rescuers on an adult resuscitation manikin placed on the floor
 - selecting and inserting an appropriate basic airway adjunct
 - responding appropriately using positioning and suctioning in the event of regurgitation or vomiting
 - demonstrating a rotation of operators with minimal interruptions to compressions
 - following the prompts of an Automated External Defibrillator (AED) to deliver at least one shock
 - managing oxygen equipment appropriately
 - handing over to emergency services
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:

- performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed a casualty with life-threatening bleeding requiring use of tourniquets and haemostatic dressings
- used personal protective equipment (PPE) as required
- managed a conscious casualty who requires supplemental oxygen, including:
 - assessing vital signs respirations, pulse, oxygen saturation
 - level of consciousness
 - selecting and preparing correct oxygen equipment
 - checking area for ventilation and sources of ignition
 - administering oxygen safely at correct flow rate
 - managing an equipment malfunction
 - providing an accurate verbal and written report of the incident
 - reviewing the incident
- monitored and coordinated maintenance of resuscitation equipment and oxygen therapy equipment, including:
 - dismantling
 - storage
 - disposal
 - cleaning and decontamination
 - checking and diagnosis of faults.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to life threatening bleeding, managing the unconscious breathing and non-breathing casualty and provision of CPR and oxygen therapy
 - potential incident hazards and risk minimisation processes when providing first aid, including Oxygen Therapy and Advanced Resuscitation Techniques
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - safe work practices to deal with oxygen cylinders and associated equipment
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
 - duty of care requirements

- own skills and limitations
- consent and how it relates to the conscious and unconscious casualty
- privacy and confidentiality requirements
- awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of oxygen:
 - legal requirements
 - the five rights
 - the responsibilities of the first aider
- considerations when providing resuscitation, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
 - use of suction devices
 - benefits, contraindications and complications with the use of a basic airway adjunct
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- assessment and interpretation of vital signs including normal clinical values for respirations, pulse, oxygen saturation
- level of consciousness
- how to use a suction device
- signs, symptoms and management of life-threatening bleeding including use of tourniquets and haemostatic dressings
- considerations when providing oxygen to a casualty, including:
 - circumstances and conditions where oxygen is beneficial
 - circumstances and conditions where oxygen should not be used
 - contraindications and complications associated with providing oxygen
 - benefits, contraindications and complications of suction during advanced resuscitation
 - complications with the use of a bag-valve-mask device and suitable strategies to minimise these
 - selection and operation of oxygen masks and other appropriate oxygen therapy devices
- methods for cleaning, replenishing, recharging and maintaining resuscitation and oxygen equipment including:
 - actions to rectify problems

- procedures to ensure operational readiness as per manufacturers' guidelines and site procedures
- storage, cleaning, decontamination and safe disposal of consumables
- troubleshooting to identify minor and major faults
- psychological impacts of first aid incidents on rescuers and how to seek help.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment. Evidence of the learner's currency as required by the first aid codes of practice must be confirmed prior to assessment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- anatomical model for use with a basic airway adjunct
- AED training devices
- bag-valve-mask
- basic airway adjunct
- oxygen resuscitation system with oxygen cylinder and regulator
- pulse oximeter
- selection of oxygen masks and tubes
- suction devices
- personal protective equipment (PPE)
- haemostatic dressings
- haemostatic wound packing trainer
- tourniquet trainer
- tourniquets
- workplace incident, injury, trauma or illness record or other appropriate workplace or site incident report form, which includes space for recording vital signs of casualties.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTWHS001 Participate in workplace health and safety

Modification History

Release	Comments
Release 3	<p>Updated:</p> <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards <p>Equivalent outcome.</p>
Release 2	<p>Minor corrections to formatting to improve readability. Equivalent competency outcome.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Updated to incorporate content of unit HLTWHS200A. Revised scope of unit to reflect requirements of workers. New evidence requirements for assessment.</p>

Application

This unit describes the skills and knowledge required for workers to participate in safe work practices to ensure their own health and safety, and that of others.

The unit applies to all workers who require knowledge of workplace health and safety (WHS) to carry out their own work, either under direct supervision or with some individual responsibility.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Follow safe work practices

1.1 Follow workplace policies and procedures for safe work practices

1.2 Identify existing and potential hazards in the workplace, report them to designated persons, and record them according to workplace procedures

1.3 Follow workplace emergency procedures

2. Implement safe work practices

2.1 Identify and implement WHS procedures and work instructions

2.2 Identify and report incidents and injuries to designated persons according to workplace procedures

2.3 Take actions to maintain safe housekeeping practices in own work area

3. Contribute to safe work practices in the workplace

3.1 Raise WHS issues with designated persons according to organisational procedures

3.2 Participate in workplace safety meetings, inspections and consultative activities

3.3 Contribute to the development and implementation of safe workplace policies and procedures in own work area

4. Reflect on own safe work practices

4.1 Identify ways to maintain currency of safe work practices in regards to workplace systems, equipment and processes in own work area

4.2 Reflect on own levels of stress and fatigue, and report to designated persons according to workplace procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- *Reading* – in order to accurately read and interpret workplace safety policies and

procedures including safety signs, dangerous goods classifications and safety instructions

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTWHS001 Participate in workplace health and safety

Modification History

Release	Comments
Release 3	<p>Updated:</p> <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards <p>Equivalent outcome.</p>
Release 2	<p>Minor corrections to formatting to improve readability. Equivalent competency outcome.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Updated to incorporate content of unit HLTWHS200A. Revised scope of unit to reflect requirements of workers. New evidence requirements for assessment.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- contributed to a WHS meeting or inspection in workplace
- conducted a workplace risk assessment and recorded the results
- consistently applied workplace safety procedures in the day-to-day work activities required by the job role
- followed workplace procedures for reporting hazards
- followed workplace procedures for a simulated emergency situation.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
 - state/territory WHS authorities
 - rights and responsibilities of employers and workers, including duty of care
 - hazardous manual tasks
 - infection control
- safety signs and their meanings, including signs for:
 - dangerous goods classifications
 - emergency equipment
 - personal protective equipment (PPE)
 - specific hazards such as sharps, radiation
- hazard identification, including:
 - definition of a hazard
 - common workplace hazards relevant to the industry setting
 - workplace procedures for hazard identification
- workplace emergency procedures
- workplace policies and procedures for WHS

Assessment Conditions

Skills must be demonstrated:

- in the workplace

OR

- in an environment that provides realistic in-depth industry validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment must ensure use of:

- current workplace policies and procedures for WHS
- PPE relevant to the workplace and job role of the worker

In addition, assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

ICTICT203 Operate application software packages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify, select and operate three commercial software packages, including a word-processing and a spreadsheet application package.

It applies to individuals who utilise different software applications within a small to large office environment to produce diverse documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use appropriate workplace health and safety (WHS) office work practices	1.1 Use safe work practices to ensure ergonomic, work organisation, energy and resource conservation requirements are addressed 1.2 Use wrist rests and document holders where appropriate 1.3 Use monitor anti-glare and radiation reduction screens where appropriate
2. Use appropriate	2.1 Select word-processing software appropriate to perform

ELEMENT	PERFORMANCE CRITERIA
word-processing software	activity 2.2 Identify document purpose, audience and presentation requirements, and clarify with personnel as required 2.3 Identify organisational requirements for text-based business documents, and design document structure and layout to ensure consistency of style and image 2.4 Match document requirements with software functions to provide efficient production of documents 2.5 Use technical functions, other data and formatting to finalise documents 2.6 Ensure the naming and storing of documents in appropriate directories or folders and the printing of documents to the required specifications
3. Use appropriate spreadsheet software	3.1 Select spreadsheet software appropriate to perform activity 3.2 Identify document purpose, audience and presentation requirements, and clarify with personnel as required 3.3 Enter simple formulas and functions using cell referencing where required 3.4 Customise spreadsheet settings to meet requirements 3.5 Ensure the naming and storing of documents in appropriate directories or folders and the printing of documents to the required specifications
4. Use a third application software package	4.1 Select software application package appropriate to perform activity 4.2 Identify purpose, audience and presentation requirements, and clarify with personnel as required 4.3 Use technical functions, other data and formatting to finalise documents 4.4 Ensure documents are named and stored in appropriate directories or folders and printed to required specifications

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2-2.5, 3.2-3.4, 4.2, 4.3	<ul style="list-style-type: none"> Recognises and interprets textual information to determine organisational standards and job requirements Interprets and comprehends symbols, icons and text associated with applications software
Writing	2.3-2.6, 3.3- 3.5, 4.3, 4.4	<ul style="list-style-type: none"> Enters both written and verbally received information and data into a format suitable for the software application Selects vocabulary, syntax, terminology, labelling and naming conventions suitable for the program
Oral Communication	2.2, 2.3, 3.2, 4.2	<ul style="list-style-type: none"> Uses simple, relevant language, effective questioning, and active listening techniques to clarify work requirements
Numeracy	3.2-3.4	<ul style="list-style-type: none"> Adds, subtracts, multiplies and divides whole numbers and decimals, identifying and selecting the correct formulas and functions to use Applies the order of operations in calculations
Navigate the world of work	1.1	<ul style="list-style-type: none"> Takes some personal responsibility for adherence to legal and regulatory requirements
Get the work done	1.2, 1.3, 2.1-2.6, 3.1-3.5, 4.1-4.4	<ul style="list-style-type: none"> Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role Understands purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks, adapting some functions to improve personal efficiency Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing

Assessment Requirements for ICTICT203 Operate application software packages

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce workplace documents using a minimum of three different software application packages
- open, amend and save files and documents according to organisational requirements
- apply workplace health and safety (WHS) principles and responsibilities for ergonomics, such as work periods and breaks
- use help manuals and online help.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify application software packages used by the organisation and list the purpose of each
- explain basic technical terminology related to reading help files and responding to system help prompts
- outline current business practices related to using software to prepare reports
- list features and functions of commercial computing packages
- describe import and export software functions
- describe the process of linking documents
- outline WHS principles and responsibilities for ergonomics, such as work periods and breaks
- explain the purpose of input and output devices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer (PC) and printer
- software currently used in industry
- documents detailing organisational style guide and policy
- documents or information containing data suitable for developing software application documents.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT214 Operate application software packages

Modification History

Release	Comments
Release 2	This version first released with the Information and Communications Technology Training Package Version 8.0. Minor typographical correction in Knowledge Evidence.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to identify, select and operate commercial software packages, including a word-processing and a spreadsheet application package.

It applies to individuals who utilise different software applications within a small to large office environment to produce diverse documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to operate software packages	1.1 Set up workstation according to work health and safety standards and organisational requirements 1.2 Determine word-processing software task requirements 1.3 Determine spreadsheet software task requirements 1.4 Determine software application according to task

ELEMENT	PERFORMANCE CRITERIA
	<p>requirements</p> <p>1.5 Identify document purpose, audience and presentation requirements and clarify with required personnel</p>
2. Use word-processing software	<p>2.1 Identify document purpose, audience and presentation requirements and clarify with required personnel</p> <p>2.2 Determine text-based business document style guide requirements</p> <p>2.3 Finalise documents using software and technical functions and formatting according to task requirements</p> <p>2.4 Name, save and print to a Portable Document Format (PDF) according to task requirements</p>
3. Use spreadsheet software	<p>3.1 Identify document purpose, audience and presentation requirements and clarify with personnel as required</p> <p>3.2 Enter formulas and functions and customise spreadsheet settings according to task requirements</p> <p>3.3 Name, save and print to PDF document according to task requirements</p>
4. Use third application software package	<p>4.1 Select software application package according to task requirements</p> <p>4.2 Determine purpose, audience and presentation requirements</p> <p>4.3 Use technical functions, other data and formatting to finalise document</p> <p>4.4 Name, save and print to PDF document according to task requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Adds, subtracts, multiplies and divides whole numbers and decimals, identifying and selecting formulas and functions to use Applies order of operations in calculations
Oral communication	<ul style="list-style-type: none"> Clarifies work requirements using required language, questioning and active listening techniques
Reading	<ul style="list-style-type: none"> Interprets textual information and determines organisational standards and job requirements Identifies and applies symbols, icons and text associated with

Skill	Description
	applications software
Writing	<ul style="list-style-type: none"> Enters both written and verbally received information and data into a format applicable to software application Selects vocabulary, syntax, terminology, labelling and naming conventions applicable to program
Planning and organising	<ul style="list-style-type: none"> Plans routine tasks with goals and outcomes, taking some limited responsibility in decisions regarding sequencing
Self-management	<ul style="list-style-type: none"> Follows routine procedures in using digital technology and enters, stores and retrieves information directly applicable to own role
Technology	<ul style="list-style-type: none"> Identifies and evaluates purposes, specific functions and key features of basic digital systems and tools Operates digital systems and tools in completing routine tasks and adapting some functions

Unit Mapping Information

Supersedes and is equivalent to ICTICT203 Operate application software packages.

Assessment Requirements for ICTICT214 Operate application software packages

Modification History

Release	Comments
Release 2	This version first released with the Information and Communications Technology Training Package Version 8.0. Minor typographical correction in Knowledge Evidence.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce three workplace documents using three different software packages including word processing, spreadsheets and one additional software application package on at least one occasion.

In the course of the above, the candidate must:

- apply workplace health and safety (WHS) principles and responsibilities
- follow organisational requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational application software packages
- technical terminology applicable to reading help files and responding to system help prompts
- industry standard business practices applicable to preparing reports
- features and functions of commercial computing packages and of the industry standard software
- functions and features of Portable Document Formats (PDFs)
- import and export software functions
- document linking functions
- WHS principles and responsibilities

- purpose of input and output devices.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- required hardware device
- industry standard software
- documents detailing organisational style guide and policy
- data required in developing software application documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTICT402 Determine project specifications and secure client agreement

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop agreed acceptance criteria for information and communications technology (ICT) projects.

It applies to individuals who are competent in a wide range of general ICT technologies and support small to medium enterprises (SMEs) that require broader rather than more specialised ICT support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine milestones and quality attributes with client	1.1 Interview client to determine project deliverables and acceptance criteria 1.2 Document project milestones and associated deliverables in measurable terms, taking into account constraints 1.3 Determine and document criteria to evaluate each deliverable

ELEMENT	PERFORMANCE CRITERIA
	1.4 Negotiate and document quality standards with client 1.5 Confirm project direction with appropriate person
2. Formulate metrics and milestones	2.1 Define the units of measurement (metrics) that will be used in the project, including consideration of project milestones, timeframe and costs 2.2 Schedule the measurement of project milestones and associated deliverables 2.3 Document the process for analysing variances and their impact on the project 2.4 Schedule quality reviews into project plan
3. Obtain client agreement to acceptance criteria	3.1 Obtain client agreement for project delivery dates 3.2 Communicate acceptance criteria clearly and coherently to the client 3.3 Obtain client agreement to acceptance criteria and anticipated timeframes for the project

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	1.2-1.4, 2.2-2.4	<ul style="list-style-type: none"> Uses plain English; appropriate grammatical structures and specialised terminology; diagrams and flow charts; logical document structures and formatting relevant to the job role and organisation to record project deliverables and benchmarks Enters text, data and financial information into project planning tools to produce output for the project plan that is appropriate to the audience
Oral Communication	1.1, 1.4, 1.5, 3.1-3.3	<ul style="list-style-type: none"> Uses open questioning and effective listening techniques to elicit information, clarify requirements and conduct effective negotiations Uses appropriate vocabulary, grammatical structure, voice tone, body language and reflective responses to negotiate deliverables, present project plan and gain consensus

Numeracy	1.1-1.4, 2.1-2.3	<ul style="list-style-type: none"> Applies mathematical calculations and financial functions relating to timelines and project budgets
Interact with Others	1.1, 1.4, 1.5, 3.1-3.3	<ul style="list-style-type: none"> Identifies and takes steps to follow accepted communication practices and protocols Uses a limited range of accepted practices for communicating in a work environment
Get the work done	1.1-1.3, 1.5, 2.1, 2.2, 2.4	<ul style="list-style-type: none"> Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information, including strategic initiatives and resources Considers purpose, needs and limitations when selecting digital devices and applications for different tasks Uses digital technology for basic reading, recording and searching information, and for communications following routine procedures and security requirements

Unit Mapping Information

Assessment Requirements for ICTICT402 Determine project specifications and secure client agreement

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop acceptance criteria for a project
- document acceptance criteria according to organisational standards
- present the document to stakeholders and obtain approval.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business area
- outline project planning methodologies and tools
- identify and apply quality processes
- interpret system development plans
- identify technical tools and their use relating to task list when formulating metrics and milestones
- explain the theory and purpose of metrics.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- client requirements
- technical specifications

- organisational and process goals
- critical business requirements
- predefined high-level acceptance criteria
- project deliverables
- future organisational business processes test plan
- project budget timeframe.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage spare parts in all areas of telecommunications and includes maintenance of a database, stock control and dispatch.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage receipt and dispatch of spare parts	1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work 1.2 Identify hazards and make worksite safe according to relevant safety legislation and company work practices, and use personal

	<p>protective equipment</p> <p>1.3 Unload, unpack and store incoming spare parts using appropriate methods and enterprise procedures, and check off delivered items on documentation</p> <p>1.4 Package, label and relocate outgoing spare parts ready for dispatch using enterprise procedures</p> <p>1.5 Update parts database to reflect current spare parts movements and holdings, following each dispatch or delivery, and complete any other administrative task required by enterprise</p>
2. Store spare parts	<p>2.1 Label spare parts using appropriate identification scheme and place in predefined storage locations</p> <p>2.2 Observe antistatic precautions when handling equipment susceptible to damage by electrostatic discharge</p> <p>2.3 Display, maintain and update material safety data sheets (MSDS) on site</p>
3. Manage stock flow	<p>3.1 Action spare parts requests by checking database for availability and location, and organise the dispatch</p> <p>3.2 Monitor levels of spare parts stock by examining database reports against enterprise usage and replenishing stock when necessary</p> <p>3.3 Investigate and keep records of alternative suppliers of spare parts to minimise impact of availability and cost issues with regular suppliers</p> <p>3.4 Monitor spare parts with limited shelf life, and dispose of and replace when necessary</p> <p>3.5 Audit spare parts holdings for ready supply of items to minimise disruptions to job completions</p> <p>3.6 Update database from appropriate documentation each time a store's transaction occurs to maintain validity of data</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.2, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Recognises and interprets written and visual text to determine key information, and specific requirements and responsibilities

Writing	1.3-1.5, 2.1, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations • Uses expected writing conventions and forms
Oral Communication	3.1	<ul style="list-style-type: none"> • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Numeracy	1.3-1.5, 3.2-3.5	<ul style="list-style-type: none"> • Uses mathematical skills to estimate materials and evaluate and predict resource requirements
Navigate the world of work	1.1-1.4, 2.1-2.3	<ul style="list-style-type: none"> • Takes personal responsibility for adherence to legal and regulatory requirements relevant to spare parts work context, and draws attention to any issues that may affect self or others • Recognises and follows explicit and implicit company and health and safety protocols, and meets expectations associated with own role
Get the work done	All	<ul style="list-style-type: none"> • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, when managing receipt and dispatch, storage and stock flow • Uses systematic, analytical processes when monitoring and auditing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Initiates standard problem solving procedures when identifying hazards within immediate context • Seeks to improve a future response through investigating alternative suppliers • Uses database systems and tools to access, organise, analyse and display information relevant to role

Assessment Requirements for ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- safely apply spare parts management procedures
- efficiently arrange for storage and ordering of spare parts
- research alternative parts replacements
- accurately update spare parts management database.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and database operation
- describe handling of:
 - chemicals and dangerous materials
 - sensitive electronic equipment using antistatic procedures and safeguards
- outline modern storage practices and identification of parts location
- outline work health and safety (WHS) procedures
- identify service level agreements
- describe stocktake and audit of spare parts holdings
- identify telecommunications components and assemblies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site where work may be conducted
- current equipment
- a database for relevant regulations
- organisational procedures
- equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

LGACOM404B Establish cooperative arrangements with other organisations

Modification History

LGACOM404B Release 1: Primary release.

Unit Descriptor

The unit covers identifying, developing, implementing and monitoring cooperative arrangements with other organisations in an effort to improve services provided to the community. The unit is appropriate for staff working in areas of council where community and business development are a major focus.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify opportunities for cooperative arrangements</p>	<p>1.1. Opportunities for <i>cooperative arrangements</i> are identified through consultation with <i>other organisations</i>.</p> <p>1.2. Opportunities identified are analysed to ensure they will provide an increased level, or at least an equivalent level, of service to the community.</p>
<p>2. Develop and implement cooperative policies and projects with other organisations</p>	<p>2.1. Cooperative policies are agreed upon by all participating organisations and disseminated to all involved staff.</p> <p>2.2. Project objectives and <i>performance indicators</i> are determined and plans are drawn up to facilitate the smooth implementation and conduct of collaborative projects.</p> <p>2.3. Implementation methods are organised and agreed actions and work programs are allocated to relevant staff.</p> <p>2.4. Communications strategies are put in place to enable efficient and coherent implementation and conduct.</p> <p>2.5. Resources are identified and accessed in the most cost-effective manner.</p> <p>2.6. Communities are informed of the changes and benefits in service delivery due to the new collaborative arrangements.</p>
<p>3. Monitor and evaluate the effectiveness of the collaborative venture</p>	<p>3.1. Project progress is evaluated with reference to planned time lines and performance criteria at predetermined intervals to assess effectiveness for council and community.</p> <p>3.2. Project is reviewed and project plan and resource allocations are revised when necessary.</p> <p>3.3. Information gathered from project evaluation is used to provide input to continuous improvement and planning processes.</p> <p>3.4. Problems or contingencies that arise are managed and resolved professionally and promptly in conjunction with relevant personnel.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- negotiation with a range of personnel and other agencies
- research and evaluation, including cost-benefit analysis
- written and verbal communication with public and council personnel affected by implementation
- strategic and business planning
- planning and organisational
- time management
- ability to work as part of a team particularly with people from diverse backgrounds
- problem solving
- using appropriate software and technology

Required Knowledge

- relevant council policies and procedures
- sustainable practices
- council operations
- council goals, objectives and strategies
- other organisations potentially interested in cooperative arrangements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- establish cooperative arrangements with other organisations on behalf of council that create measurable benefits to the organisation, incorporate effective evaluation mechanisms and support corporate direction and strategies
- communicate cooperative arrangements and their benefit effectively throughout the organisation.

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables depending on council work flow and planning cycle as long as the critical aspects of evidence can be demonstrated.
Resource implications	Access to organisations with whom cooperative arrangements are to be developed or to simulated case studies.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Cooperative arrangements</i> may include:	<ul style="list-style-type: none"> • joint funding for projects • shared promotional resources • joint ventures to build or construct community facilities • sponsorship arrangements
<i>Other organisations</i> may include:	<ul style="list-style-type: none"> • other councils within the region, state or nation • regional organisations of councils • state or commonwealth agencies • private or business enterprises • community groups
<i>Performance indicators</i> may include:	<ul style="list-style-type: none"> • increases in revenue • customer satisfaction reports • increases in service usage

- increased tourism to the region or municipality

Unit Sector(s)

Not applicable.

LGACOM502B Devise and conduct community consultations

Modification History

LGACOM502B Release 2: Layout adjusted. Range statement edited.

LGACOM502B Release 1: Primary release.

Unit Descriptor

This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise consultation strategies	<p>1.1. A range of consultation strategies is identified and assessed for suitability.</p> <p>1.2. <i>Interested and affected parties</i> are identified.</p> <p>1.3. <i>Resources</i> required to conduct consultation are assessed.</p> <p>1.4. <i>Consultation strategies</i> are chosen that <i>enable and encourage relevant groups</i> or individuals to be involved.</p> <p>1.5. <i>Legislative</i> and council requirements are reviewed to ensure strategies meet all criteria.</p>
2. Conduct consultations	<p>2.1. <i>Information</i> is prepared that is clear, accurate and appropriate to the needs of all parties.</p> <p>2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved.</p> <p>2.3. <i>Information is presented</i> to affected parties at an appropriate time and place.</p> <p>2.4. <i>Access and equity</i> requirements are implemented in the consultations.</p> <p>2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame.</p> <p>2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.</p>
3. Record, analyse and report on results	<p>3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed.</p> <p>3.2. Appropriate suggestions for improvement are incorporated into design parameters.</p> <p>3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised.</p> <p>3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern.</p> <p>3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.</p>

ELEMENT**PERFORMANCE CRITERIA**

- 3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to devise and conduct community consultations where:

- consultation ensures council's image or reputation is maintained or enhanced
- community consultation produces valid and useful information

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including: <ul style="list-style-type: none"> • public and community meetings and forums • surveys and door knocks • appropriate communications equipment and aids such as overhead projectors and computer-based presentations

Range Statement

Co-requisite Unit/s

LGACOMP008A Apply conflict resolution strategies

Modification History

LGACOMP008A Release 2: Layout adjusted.

LGACOMP008A Release 1: Primary release.

Unit Descriptor

This unit covers dealing effectively with conflict, both in the workplace and outside the organisation. The unit outlines the knowledge and skills required to assess potential conflict situations and deal appropriately with the situation to achieve a resolution. The unit is suitable for all people working within the organisation.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess potential conflict situations	1.1 Signs, stages and possible <i>causes of conflict</i> are identified and anticipated. 1.2 Appropriate responses are evaluated against organisational procedures and <i>legal requirements</i> . 1.3 Additional information is identified and sought as required to assist in the assessment of the conflict situation.
2. Implement conflict resolution strategies	2.1 Factors and issues relevant to the conflict are clarified. 2.2 Strategies for dealing with conflict situations are developed in accordance with organisational procedures. 2.3 Assistance is sought as required and is appropriate to the person's skill and responsibility. 2.4 Options for resolution of the conflict are identified which allow for constructive responses to be negotiated. 2.5 <i>Negotiation techniques</i> are used to maintain positive interaction and to divert and minimise aggressive behaviour. 2.6 Effective <i>communication techniques</i> are used to ensure understanding of information received or relayed. 2.7 <i>Social and cultural differences</i> are taken into account in the negotiation style and approach taken. 2.8 Mutual agreement to the situation and its resolution is confirmed and follow up action is agreed upon by all parties. 2.9 Systems, records and reporting procedures are maintained according to organisational procedures.
3. Evaluate response and outcome	3.1 Effectiveness of response is evaluated and reviewed according to information available and organisational practices. 3.2 Accurate and constructive observations of incidents are provided in reviewing and debriefing the situation. 3.3 Records and reports are provided and maintained according to organisational requirements. 3.4 Effects of stress are recognised and addressed through stress management techniques and debriefing.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- problem-solving strategies to know how to deal with unexpected questions or attitudes
- interpersonal skills to develop rapport with other parties in the conflict
- capacity to evaluate own response to situations of conflict and manage own emotions
- communication skills to effectively come to an agreed outcome
- negotiation skills to negotiate difficult situations and resolve problems as they arise
- flexibility to adjust quickly to differing situations
- empathy to develop rapport and understanding with and for the other party
- dealing with difficult people and situations

Required Knowledge

- legislative and/or other legal provisions
- conflict resolution strategies
- organisational policies and procedures relating to managing conflict through negotiation
- recording and reporting procedures
- principles of cooperative team work
- different social and cultural practices

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- interpret accurately and comply with legal and procedural requirements
- identify typical symptoms and causes of conflict in the workplace and ways of resolving conflict situations
- select conflict resolution strategies that are most effective for the objective
- use negotiation techniques to defuse and resolve conflict
- use communication techniques to give clear and accurate

Context of assessment

information in a form that is preferred and understood by the receiver

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of formal and informal situations, involving different types of problems and clients.

Resource implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Causes of conflict*** may include:
- refusal to follow directions and guidance
 - dissatisfaction of client with council service or information
 - disagreement between members of the public
 - disagreement between members of the organisation
 - ejection of persons
 - persons suffering from emotional distress
 - bystander behaviour
- Legal requirements*** may include:
- relevant state and commonwealth legislation
 - decisions of relevant tribunals
 - roles and responsibilities
 - terms and conditions of employment
- Negotiation techniques*** may include:
- strategic questioning and listening to gather information and direct the focus of the people involved
 - positive, confident and cooperative language
 - control of tone of voice and body language
 - using language and concepts appropriate to the people involved
 - using clear presentations of options and consequences
 - demonstrating flexibility and willingness to compromise
 - summarising positions and agreements made to confirm understanding between the negotiating parties
- Communication techniques*** may include:
- verbal and non-verbal language
 - two-way interaction
 - constructive feedback
 - active listening
 - reflection and summarising
- Social and cultural differences*** may include:
- verbal and non-verbal language
 - beliefs and values
 - religious or spiritual observances
 - relationships and family structures
 - social conventions
 - codes of conduct

Unit Sector(s)

LGAGCM710A Manage contracts and contractors

Modification History

LGAGCM710A Release 2: Layout adjusted.

LGAGCM710A Release 1: Primary release.

Unit Descriptor

This unit covers the skills and knowledge required of senior managers responsible for overseeing the development of tenders and the subsequent management of contracts and contractors.

Effective and efficient management of external contracts is now a major component of many managers' roles. The need for high levels of accountability and transparency while managing commercial relationships is addressed in this unit.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations that provide the boundaries for the operation of councils is essential. The unique nature of councils, as a tier of government, directed by elected members and reflecting the needs of local communities must be appropriately reflected.

This unit may also be contextualised to other public or private sectors as long as the essential outcomes of the unit are not changed.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Scope council process and service requirements

- 1.1 ***Council procedures and protocols for management of tenders and contracts*** are identified, considered and used.
- 1.2 Council's strategic and operational plans are reviewed and considered to determine scope and nature of project or service to be contracted.
- 1.3 Size and scope of ***project or service to be contracted*** are determined and documented.
- 1.4 Process to manage tender and contract is documented and appropriate sign-off is secured in line with standard operating procedures.

2. Ensure tender process is planned and managed effectively

- 2.1 Anticipated expense levels of tender are identified and justified.
- 2.2 Tender objectives, including quality, quantity, location, time frame requirements and price limits are clearly defined and documented.
- 2.3 Processes for letting of tender are put in place in line with standard operating procedures.
- 2.4 ***Selection processes*** are developed that comply with legislative requirements, council policies and procedures.
- 2.5 Choice of contractor is justifiable, agreed upon and recorded according to council policies.
- 2.6 Contract is negotiated and agreement reached to maximise benefits for council and following appropriate legal scrutiny and advice.
- 2.7 Contract is drafted and signed according to legislative and organisational requirements and project objectives, reflecting agreement outcomes.

3. Manage contract to achieve desired outcomes

- 3.1 Management plan is developed to ensure effective management of contract.
- 3.2 Performance of contractual obligations is managed in accordance with agreed contract and management plan.

ELEMENT	PERFORMANCE CRITERIA
4. Manage relationships with contractors	<p>3.3 Performance by contractor is reviewed using agreed processes, with any variances analysed and agreed changes implemented to ensure project objectives are met within legal framework of contract.</p> <p>3.4 Reports of project progress and outcomes are prepared and presented in accordance with management plan and standard organisational procedures.</p> <p>3.5 Contracts are concluded in line with management plan and contractual requirements.</p> <p>4.1 Code of conduct is used and communicated to contractors to ensure relationship between parties is managed ethically, transparently and in accordance with legal requirements and council policies and procedures.</p> <p>4.2 Regular and formalised communication processes with contractors are established and rigorously applied.</p> <p>4.3 Sound business relationships with contractors are established and maintained to ensure effective communication and the early identification of potential service delivery problems.</p> <p>4.4 Contractual disputes that arise are managed in accordance with contractual requirements and using established mediation mechanisms.</p>
5. Plan for improved contract management and service delivery processes	<p>5.1 Effectiveness and benefits of contracting process and related service delivery are analysed.</p> <p>5.2 Opportunities for process and service delivery improvements are identified and communicated to appropriate senior personnel within council.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- tender management
- high-level negotiation
- literacy and numeracy skills to manage contracts
- project management
- high-level written and oral communication
- analysis of organisational systems, processes and activities
- developing a range of possible options in solving problems

- time management

Required Knowledge

- legal and council requirements for letting and managing tenders
- council code of conduct for the management of relationships with contractors

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. The candidate will demonstrate the capacity to manage contracts and contractors effectively, ethically and leading to the attainment of stated council objectives.

Critical aspects of evidence to be considered

The demonstrated ability to:

- manage contracts and contractors within council

Context of assessment

Assessment of performance requirements in this unit should be undertaken with the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the range of variables applicable to the workplace environment.

Method of assessment

The following assessment methods are suggested:

- preparation of a major workplace project report/portfolio (that may incorporate assessment of related units) as a key form of assessment that enables candidates to integrate the learning and assessment project into their regular work responsibilities, which enables integrated and holistic assessment of the complex skills and knowledge addressed in this unit
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies
- written and oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioner
- completion of self-paced learning materials, including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance

Evidence should be gathered over a period of time in a range of actual or simulated management environments.

Resource implications

Access to a workplace or simulated case study that provides the following resources:

- relevant council documents, such as strategic and operational plans
- relevant local government legislation and regulations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Council procedures and protocols for the management of tenders and contracts may include:

- codes of conduct for transparent and accountable management of contracts and contractors
- tendering procedures
- reporting requirements

Contracts may cover provision of:

- short-term, one-off services
- lengthy and complex relationships with external service providers offering services to the community

Project or service to be contracted may relate to any sphere of council operation but typically may include:

- capital works
- parks and gardens maintenance
- provision of community care services, such as family care, disability services or child care
- provision of waste and recycling service

Tender selection processes may include:

- advertising period
- use of selective tenders, tender panels and 'open' tenders for contracts of differing values
- establishment of weighted selection criteria
- establishment of a selection panel with complementary expertise

Reports of project progress may include:

- compliance with required timelines
- indicators of service levels and quality
- actual cost against budgeted cost
- customer satisfaction

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Conduct background research to identify traditional owners	1.1 <i>Protocols for consultation</i> with Aboriginal or Torres Strait Islander people are researched and documented. 1.2 <i>Appropriate research</i> is undertaken to identify the correct traditional owners, including consultation with the relevant native title representative body and the National Native Title Tribunal (NNTT). 1.3 Expert advice is sought where appropriate.
2 Identify key stakeholders	2.1 NNTT is consulted about the requirements for registering an Indigenous land use agreement (ILUA). 2.2 <i>Other stakeholders</i> or potential parties to the agreement are identified through consultation with relevant government agencies. 2.3 Other Indigenous people with interests are identified. 2.4 Meetings are held with traditional owners to establish rapport and credibility.
3 Negotiate with traditional owners	3.1 The range of issues to be addressed through an agreement is clarified with council. 3.2 Highly desirable, unacceptable, or possible trade-off positions on each issue are identified for discussion with the traditional owners. 3.3 The scope of the negotiations is identified and agreed with traditional owners. 3.4 <i>Culturally appropriate protocols</i> for negotiations are established. 3.5 Levels of confidentiality and liaison with the media are agreed. 3.6 Processes and timing for consultation with the wider community are agreed. 3.7 Arrangements for liaison with the media are agreed. 3.8 Negotiations are appropriately managed and focussed on mutual outcomes. 3.9 Agreement is reached through negotiation and terms and conditions of agreement are drafted.
4 Register the agreement	4.1 <i>Expert advice</i> is sought on the draft terms and conditions of the agreement. 4.2 Draft terms and conditions of the agreement are documented. 4.3 NNTT is consulted about requirements prior to lodging an ILUA registration. 4.4 Application for registration is lodged with <i>appropriate</i>

ELEMENT**PERFORMANCE CRITERIA**

agencies and any queries or additional requirements are satisfied.

4.5 The agreement is registered.

4.6 *Arrangements* are established for implementation and fulfilment of commitments detailed in the agreement.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- oral and written communication

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Conduct background research	<p>1.1 Previous Indigenous cultural heritage and resource surveys are identified and reviewed.</p> <p>1.2 Relevant commonwealth and state or territory legislation and peak local government associations and council policies are researched and documented.</p> <p>1.3 Extent to which cultural heritage of other non-Indigenous cultures should be acknowledged is identified and taken into consideration.</p>
2 Identify the correct Indigenous people that are authorised to speak for a place	<p>2.1 <i>Indigenous people with rights and interests in a place</i> are identified through the traditional owners, especially those authorised to speak for a place.</p> <p>2.2 Both men and women with rights and interests in an area or place are identified because men and women may be responsible for different heritage places and values and may need to be consulted separately.</p> <p>2.3 Other Indigenous people are identified who may not necessarily be traditional owners but who have interests in a place.</p> <p>2.4 Indigenous people from surrounding areas who may be affected by a project or activity are identified and consulted.</p> <p>2.5 <i>Protocols</i> that Indigenous people have established for consultation are identified and adhered to throughout the process.</p> <p>2.6 Consultation on each new project is undertaken, unless traditional owners and other Indigenous people agree that this is not necessary.</p> <p>2.7 Non-Indigenous people with rights or interests in the place are identified and consulted.</p>
3 Consult with relevant Indigenous people to discuss the project or activity	<p>3.1 <i>Potential implications of the project or activity</i> are outlined factually and clearly.</p> <p>3.2 All <i>relevant documentation and information</i> are provided to the traditional owners and all other Indigenous people with rights and interests in a place.</p> <p>3.3 Sufficient time is allowed for all Indigenous people to decide whether they wish to become involved in the activity or project and to provide informed consent.</p> <p>3.4 All Indigenous groups with an interest in a place are provided with the same information and given sufficient time to provide informed consent.</p> <p>3.5 Where groups are in dispute, a process for developing</p>

ELEMENT	PERFORMANCE CRITERIA
	separate but consistent and similar agreements is established.
4 Establish a process for addressing Indigenous cultural heritage matters	<p>4.1 Manner, timing and level of consultation and involvement with the project or activity are agreed.</p> <p>4.2 The copyright holders of any work undertaken with Indigenous people and the management regime for Indigenous heritage places are identified.</p> <p>4.3 Need for separate reports for male and female traditional owners and a further report that is publicly available is established.</p> <p>4.4 Dissemination of reports is carried out effectively.</p> <p>4.5 The process for obtaining informed consent for displaying any gathered information is identified and agreed.</p> <p>4.6 Protocols and agreements are formalised and documented.</p> <p>4.7 Indigenous people are involved in the development of any terms of reference for, and selection of, consultants.</p> <p>4.8 Resources required to maintain community involvement are identified and secured.</p> <p>4.9 Relevant documentation for council is prepared, including presentation of alternative options.</p>
5 Consult with relevant Indigenous people in identifying their cultural heritage places and values	<p>5.1 Commonwealth and state or territory laws relating to Aboriginal and Torres Strait heritage are complied with by obtaining necessary permits for surveys and other activities required to identify Indigenous heritage values.</p> <p>5.2 Sensitive information collected in the course of identifying Indigenous heritage places and values is protected from further unnecessary disclosure.</p> <p>5.3 Details relating to custodians of information are recorded and protected from further unnecessary disclosure.</p>
6 Implement project or activity	<p>6.1 Meetings are held with identified stakeholders that enable Indigenous people to explain issues relating to Indigenous heritage to non-Indigenous stakeholders.</p> <p>6.2 Processes for mediation and dispute resolution are identified and established.</p> <p>6.3 A precautionary approach is identified in cases where Indigenous people refuse to be involved in a project.</p> <p>6.4 A process to prevent damage or desecration to any Indigenous heritage place is identified and established.</p> <p>6.5 Proposal or activity is revised or rejected in light of Indigenous people not agreeing because of unacceptable impact on their cultural heritage.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- oral and written communication
- cross-cultural competence
- gender and disability
- evaluation
- decision making
- research
- networking
- negotiation and dispute resolution

Required Knowledge

- cultural context
- community controls
- location and resources
- organisational processes
- equity and diversity principles
- legal requirements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- conduct research into cultural heritage and protect any sensitive information collected in the course of the research process
- identify Indigenous people with rights and interests in a place
- meet with Indigenous people to discuss a project or activity

and reach agreement about involvement and consent to their involvement in the project or activity

- establish a process for addressing Indigenous cultural heritage matters in relation to a project or activity.

Context of assessment

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

Evidence required for demonstration of consistent performance

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

Resource implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Develop procedures for manipulation and analysis of data	1.1 Desired data format is specified and based on job requirements. 1.2 Parameters are specified for manipulation of the data sets. 1.3 New procedures are documented clearly explaining the procedure and rationale for development.
2 Establish models required to provide outcome	2.1 Applicability of existing tools, models, theories, applications and solutions is evaluated. 2.2 Feasible parameters, equations and assumptions are specified. 2.3 Models required to provide specified outcome are established.
3 Analyse data	3.1 Steps to be undertaken to analyse and manipulate data are specified. 3.2 <i>Source data limitations</i> and other restricting <i>factors</i> are taken into account when selecting techniques for analysis. 3.3 Data is isolated and retrieved from its source. 3.4 Data is interrogated to ensure reliability. 3.5 Data is prepared for presentation media.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- analysing options
- using tools within software to manipulate data
- reading external data sets into data model

Required Knowledge

- database structures
- scripting and commands
- line instructions and programming
- operating systems:
- range of tools, models, theories, applications and solutions
- data analysis and manipulation techniques.

- UNIX
- DOS
- Windows
- NT

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	<p>Suitable procedures are developed.</p> <p>New procedures are documented.</p> <p>Appropriate models are used and/or created.</p>
Context of assessment	On the job or in a simulated work environment.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to geographic information systems databases and operating systems.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Source data limitations may include:

- currency
- structure
- accuracy
- source of data

Factors may include:

- time
- command line operation
- menu drivers options

Unit Sector(s)

Planning

LGAPLEM512A Provide geographic information systems data

Modification History

LGAPLEM512A Release 2: Layout adjusted.

LGAPLEM512A Release 1: Primary release.

Unit Descriptor

This unit covers developing and applying data management and analytical tools to produce specified outcomes.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse request to develop solution	<p>1.1 Specific problem or question is clarified in consultation with <i>end user</i> to establish <i>end result specifications</i> .</p> <p>1.2 Information required to achieve result is defined and required <i>data</i> sets are correctly determined.</p>
2 Assess data availability	<p>2.1 Availability of required data sets is ascertained through research of <i>internal</i> and <i>external sources</i> .</p> <p>2.2 Custodianship of data is confirmed and access and pricing are determined.</p> <p>2.3 Data is obtained in line with <i>industry standards</i>, statutory requirements and council policy.</p> <p>2.4 Where appropriate, <i>procedures</i> are developed to capture data.</p>
3 Assess data quality	<p>3.1 Data is assessed for <i>integrity</i> to determine suitability for task.</p> <p>3.2 Disparities between data sets are investigated and resolved to ensure integrity of data used.</p>
4 Run standard query	<p>4.1 Appropriate standard query is selected.</p> <p>4.2 Selected query is run to achieve required outcome .</p>
5 Validate outcome	<p>5.1 Appropriate data validation procedures are determined.</p> <p>5.2 <i>Outcome</i> is validated in line with predetermined procedures.</p> <p>5.3 Procedures to refine model or analytical procedures are developed.</p> <p>5.4 End user is consulted regarding suitability of outcome and amendments are negotiated as necessary.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- analysing options
- researching and accessing information
- attention to detail
- negotiating with customers

Required Knowledge

- database structures
- scripting and commands
- line instructions and programming
- operating systems
- SQL or other generic query language
- relationship of spatial features of database
- specific geographic information systems software, such as Genamap, MapInfo or ArcInfo
- potential inaccuracies and problems
- internal and external policies and practices relating to custodianship of data, pricing and access including industry standards, statutory requirements and council policies
- legislation relating to trade practices, copyright, intellectual property, local government acts, roads act and freedom of information legislation.
- UNIX
- DOS
- Windows
- NT

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: consider integrity of data ensure end result meets customer needs, including time frames.
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria applicable to the workplace environment, within the scope of the Range Statement.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace

tasks over sufficient time to demonstrate handling of a range of contingencies

- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance

Evidence should be gathered over a period of time in a range of actual or simulated management environments.

Resource implications

Access to a workplace or simulated case study that provides the following resources:

- relevant hardware and software such as geographic information systems, CAD, desktop publishing, desktop mapping, spreadsheets, word processing, multimedia, graphic animation, plotters, printers and terminals

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

End users may be:

- council departments
- residents and rate payers
- real estate agents
- general public
- council management
- elected members
- state and federal departments
- neighbouring councils
- bus companies
- statutory bodies including land titles office
- land information council
- utilities

End result specification may include:

- graph
- map
- table
- equations

- Data** may include:
- parameters
 - graphical
 - spatial
 - textual
 - hard copy and paper documents, including work registers, rate books, plans and maps
 - computer records using applications programs (databases, spreadsheets and accounting packages) relating to physical or virtual features, including council assets, community facilities, demographic data, census data, property ownership, property boundaries, zonings, organisations, rateable land, dog ownership, bus routes, property classifications, utilities and services and council facilities
- External sources of data sets** may include:
- other councils
 - water authority
 - telecommunications industry
 - gas authority
 - electricity authority
 - land titles office
 - valuer general
 - private industry
 - land information council
 - street directory companies
 - surveys
 - orthophotography
- Internal sources of data sets** may include:
- old plans
 - rates books
 - deeds books
 - transaction books
 - surveys
 - aerial photographs
- Industry standards** may include:
- protocols
 - de facto standards
 - confidentiality
 - privacy
- Procedures for manipulation of data sets** may include:
- command lines
 - SQL or other generic query language
 - scripts
 - programming language
- Integrity of data** may include:
- accuracy
 - quality, which may be affected by age or condition of hard copy documents

- Outcome* may include:
- currency
 - completeness
 - resolution
 - confidence limits
 - scale
 - information for external or internal client
 - creation of map layer
 - building up elements of database

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare inventory of heritage and cultural assets	<p>1.1 <i>Heritage</i> and cultural assets within the community, and council expectations and requirements relating to them, are identified.</p> <p>1.2 The <i>significance</i> of each heritage and cultural asset is assessed according to established criteria and community expectations.</p> <p>1.3 An adequate <i>information</i> base of significant places is obtained through comprehensive field investigation and research.</p> <p>1.4 <i>Data</i> is collected accurately and objectively on heritage and cultural assets.</p> <p>1.5 A comprehensive inventory of heritage and cultural assets is prepared with full and detailed descriptions of history and significance.</p>
2 Assess threats and opportunities for the protection of heritage and cultural assets	<p>2.1 <i>Threats</i> and opportunities are identified to ensure all factors are fully assessed.</p> <p>2.2 Based on input from council and the community, criteria are established to enable threats and opportunities to be prioritised.</p>
3 Identify and develop strategies for the protection of heritage and cultural assets	<p>3.1 <i>Criteria</i> are established to identify priorities.</p> <p>3.2 Consultation with the community and property owners is undertaken to seek views on the conservation action required to protect the significant attributes of the area.</p> <p>3.3 A framework for the legal protection of heritage and cultural assets is established through existing legislation.</p> <p>3.4 Practical and appropriate strategies to conserve heritage and cultural assets are determined.</p> <p>3.5 The effectiveness of strategies is assessed through a comparison with methods used elsewhere.</p> <p>3.6 The policy elements of the proposed heritage program are determined.</p> <p>3.7 Innovative approaches are developed to protect heritage and cultural assets in response to the local community need.</p>
4 Implement strategies for the protection of heritage and cultural assets	<p>4.1 The study and program are adopted by the local authority.</p> <p>4.2 Consultation is undertaken with the community and property owners about the study and proposed heritage program.</p> <p>4.3 Financial resources are identified and procured within budget cycles to support the achievement of required</p>

ELEMENT**PERFORMANCE CRITERIA**

- outcomes.
- 4.4 Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met.
- 4.5 Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes.
- 4.6 Community education and *information* materials are prepared and distributed to ensure ongoing support for the strategy.
- 4.7 The strategy is incorporated into council policies and procedures and relevant legislation.
- 4.8 A timetable for implementation is established and priorities are set.
- 5 **Monitor and review the effectiveness of strategies to protect heritage and cultural assets**
- 5.1 Further research is undertaken on *places* listed as being of local significance in the study.
- 5.2 Additional plans of significance are identified and reviewed.
- 5.3 An annual heritage report is prepared if required.
- 5.4 Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- research
- collation of information from local, national and international sources
- evaluation methodologies
- consultation with a range of community and government agencies
- strategic planning
- budgeting and lifecycle costings
- community education strategies
- project management

Required Knowledge

- heritage assets
- cultural assets
- asset classification

- council structures and services
- town planning
- community needs and expectations
- regulations, standards and policies
- community information

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: <ul style="list-style-type: none"> • identify and protect heritage and cultural assets • identify and implement strategies to protect heritage and cultural assets • put in place monitoring processes
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.

- Resource implications** Access to a workplace or simulated case study that provides the following resources:
- relevant data such as survey information
 - historical research
 - existing reports
 - studies and texts
 - financial and budget information
 - real or simulated consultation process
 - copies of relevant regulations, standards and policies

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Heritage*** may include:
- cultural and environmental issues
 - national and local area significance
 - danger component of heritage element or structure

- Significance*** may be:
- aesthetic, historical, scientific and social aspects
 - community expectations.
 - national
 - state
 - regional
 - local
 - contributory

- Data*** includes:
- survey information
 - historical research
 - existing reports
 - studies and texts

- Information*** may include:
- written and oral records
 - reports
 - instructions
 - directions from supervisor and management
 - formal and informal interviews
 - team meetings
 - reports from other services, agencies, specialists and experts
 - media

- Threats*** may include:
- political emphasis

Criteria may include:

- reductions in maintenance
- lack of planning
- other authorities' planning
- competing interests
- community attitudes
- community preferences
- budget constraints
- legislative provisions
- resources
- time frames
- age
- outstanding craftsmanship
- architectural style
- construction technology
- an association with important events or figures
- building type
- rarity
- technical or creative achievement
- representing a way of life
- artistic
- religious or cultural associations

Places of significance
may include:

- buildings
- structures
- plantings
- subsurface remains

Unit Sector(s)

Land Management

LGAREGS305A Undertake animal or reptile control duties

Modification History

LGAREGS305A Release 2: Layout adjusted.

LGAREGS305A Release 1: Primary release.

Unit Descriptor

This unit covers the capture, assessment of transport and care needs, impounding, monitoring, release and reporting of animals and/or reptiles.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of varying size and locations. Knowledge of the legislation and regulations within which councils must operate is essential. The role of councils, as the third tier of government, in managing the application of a broad range of by-laws and regulations must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Capture animals or reptiles	1.1 Response to request for assistance is timely and efficient use of resources is observed. 1.2 Traffic control precautions are used and access to incident site is controlled to ensure safety of public. 1.3 Safe and humane methods of handling <i>animals or reptiles</i> are observed. 1.4 Where appropriate, animals or reptiles are disposed of in accordance with legislative and council requirements and relevant statutes.
2 Assess transport or care needs	2.1 <i>Transport</i> or intermediate care is provided according to protocols or legislation. 2.2 Containment and loading are secure and safe. 2.3 Temporary holding facilities are arranged or negotiated with landowners where necessary.
3 Impound animals or reptiles	3.1 Impounding decision is consistent with legislative and council requirements. 3.2 <i>Ownership</i> of animals is determined using council records or stock brands. 3.3 Advisory/penalty notices are issued according to council regulations.
4 Monitor or care for animals or reptiles	4.1 Feeding and handling of animals during care is undertaken in accordance with pound procedures and legislative and council requirements. 4.2 Safe work practices, procedures and environmental conditions are observed during handling, monitoring and care duties.
5 Release animals or reptiles to owners/carers or return to environment	5.1 Decision to release or restore animal to environment is in accordance with relevant legislation and procedures. 5.2 Auction of unclaimed stock is performed according to council procedures. 5.3 Recovery of costs and revenue is assessed and enforced according to relevant legislation and procedures.
6 Report on animals or reptiles that are captured, impounded or disposed of	6.1 Reports containing accurate information drawn from council registers are forwarded to relevant officers or authorities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- computers
- video, voice recorders and radio communication
- preparing and issuing instructions and/or explanations to the public
- reporting to council

Required Knowledge

- animal and reptile behaviour
- predators
- dominance
- fear
- aggression
- applicable impounding techniques
- animal and reptile handling and disabling techniques
- animal and reptile dietary and impounding needs
- routine medicinal, chemical and dipping application
- animal health treatment
- humane disposal techniques
- safe and effective use of firearms
- stock brands
- identification tags
- microchip reading
- local area geography
- terrain
- urban and rural navigation
- relevant statutes
- notice-serving process
- court evidence
- traffic control licensing requirements and direction

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work

	practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	<p>Impounding techniques used are appropriate to animal or reptile species and the condition of the animal or reptile.</p> <p>Assessments of animal or reptile health and condition, and the appropriate disposal of animals or reptiles, are in accordance with council policies and procedures.</p> <p>Traffic control is in accordance with relevant licensing requirements.</p> <p>Use of firearms is in accordance with relevant licensing requirements.</p> <p>Notices are served in accordance with council regulations.</p> <p>Safe work practices and concern for public safety are displayed by care and control staff.</p>
Context of assessment	<p>On the job or in a simulated work environment.</p> <p>Written or oral testing.</p>
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Competency in duties may be displayed with domestic animals, livestock, wildlife or reptiles.
Resource implications	Access to a workplace or simulated environment that encompasses impounding processes, techniques and equipment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in

the Performance Criteria is detailed below.

Animals or reptiles may include:

- domestic pets
- livestock
- feral animals
- native animals
- reptiles

Capture or control may include:

- traps
- poles and ropes
- tongs
- tranquilliser guns
- firearms
- vehicles
- loading and yarding
- health, condition and behaviour of animal or reptile from observation or reports
- supervision of, or communication to, other staff or agency personnel
- disposal of deceased animals or reptiles

Transport may include:

- dedicated or contracted transport
- appropriate for care and human safety.

Ownership issues may include:

- verification of claims to ownership by such things as tags or microchips
- recovery of costs relating to transport, sustenance and penalties

Unit Sector(s)

Regulatory Services

MARC037 Operate inboard and outboard motors

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to operate inboard and outboard motors, and to diagnose basic faults.

This unit applies to people working in the maritime industry in the capacity of:

- coxswain on vessels <12 m in length, with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine, operating in inshore or designated waters or
- coxswain on tenders or auxiliary vessels operating within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and a Coxswain Grade 1 NC, as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Operate inboard and outboard motors

- 1.1 Pre-start checks are performed on the motor
- 1.2 Fuel is checked to ensure there is adequate fuel, including a reserve, on board
- 1.3 Motor is started and stopped safely and correctly
- 1.4 Motor controls are used to manoeuvre the vessel safely to complete work tasks
- 1.5 Motor is operated within safe limits during normal manoeuvres

2 Secure vessel on completion of work task

- 2.1 Vessel is moored safely
- 2.2 Fuel system is closed down
- 2.3 Vessel is secured
- 2.4 Fuel is stored to minimise environmental and fire hazards as appropriate
- 2.5 Unserviceable equipment is reported and tagged out as unserviceable

3 Maintain inboard and outboard motors

- 3.1 Fuel filters are drained of excess water
- 3.2 Batteries and connections are maintained to ensure reliable electrical supply to the motor
- 3.3 Engine and gearbox oil is checked and lubrication is applied
- 3.4 Engine mounting gear is checked as necessary

- 4 Identify basic inboard and outboard motor faults**
- 4.1** Operating difficulties caused by fuel-related factors are identified
 - 4.2** Electrical faults are identified, tagged out and reported
 - 4.3** Motor propulsion faults are identified, tagged out and reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARC005 Operate inboard and outboard motors.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=772efb7b-4cce-47fe-9bbd-ee3b1d1eb4c2>

Assessment Requirements for MARC037 Operate inboard and outboard motors

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- conducting pre-start checks, including checking:
 - fuel
 - lubricating oil
 - cooling system
 - motor attachment points
 - water depth
- conducting shutdown checks on inboard and outboard motors, and tagging out and reporting faults
- estimating fuel consumption
- reading and interpreting company standard operating procedures (SOPs) about operating inboard and outboard engines
- storing inboard or outboard motors
- using inboard and outboard motor steering system.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- battery connection and hazards
- International Convention for the Prevention of Pollution from Ships (MARPOL) requirements as it applies to operating inboard and outboard motors
- motor:
 - cooling systems
 - fuel systems
 - lubricating systems
- risks associated with portable fuel tanks

- standard procedures to tag out and report faults
- starting motors
- troubleshooting techniques
- WHS/OHS requirements and work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management system, workplace procedures and operational manuals
- a vessel ≥ 5.0 metres in length with propulsion power of ≥ 75 kW, or appropriate engine ashore
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARF027 Apply basic survival skills in the event of vessel abandonment

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply basic survival skills in the event of vessel abandonment. This unit applies to people working in the maritime industry in a deck and or engine room capacity on vessels up to 80 m and with propulsion power <3000 kW within the exclusive economic zone (EEZ). They could be working independently or as part of a vessel crew.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a General Purpose Hand NC, Coxswain Grade 2 NC, Coxswain Grade 1 NC, Marine Engine Driver Grade 3 NC, Master (Inland waters), Master <24 m NC, Marine Engine Driver Grade 2 NC, Mate <80m NC, Master < 35 m NC and Marine Engine Driver Grade 1 NC, as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012 or relevant skills and experience.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|--|
| 1 Prepare to abandon vessel | <p>1.1 Nature of emergency is determined to minimise potential dangers and threats</p> <p>1.2 Muster and abandon vessel signals are responded to according to vessel safety procedures</p> <p>1.3 Survival equipment is organised to maximise chances of survival</p> <p>1.4 Emergency position indicating radio beacon (EPIRB) is operated to transmit distress signal</p> <p>1.5 Distress calls are made using radio equipment on distress call frequency, if time allows, to communicate the nature of the emergency</p> <p>1.6 Others are assisted to maximise their chances of survival</p> |
| 2 Determine operational safety requirements | <p>2.1 Relevant maritime legislation is identified and implemented</p> <p>2.2 Safety requirements for a range of near coastal vessels are identified, accessed and reviewed</p> <p>2.3 Lifesaving and survival equipment required on board a near coastal vessel are accurately identified</p> <p>2.4 Lifesaving equipment on board is checked and confirmed as serviceable</p> <p>2.5 Lifesaving and survival equipment certificates and documentation are checked for validity</p> <p>2.6 Vessel safety management systems (SMS) and plans are located, interpreted and applied</p> |
| 3 Practise survival techniques | <p>3.1 Typical emergency alarms and types of alarm systems are accurately identified</p> |

- 3.2 Need to abandon vessel is determined according to established safety practice and procedures
 - 3.3 In-water survival techniques are implemented according to established safety practice and procedures
 - 3.4 Threats to survival are identified and treatment options are outlined
- 4 Apply survival techniques**
 - 4.1 Lookout for vessels and aircraft is maintained and distress signals are released on sighting
 - 4.2 During an emergency, work is carried out collaboratively with other shipboard personnel and passengers as required
 - 4.3 During emergency and survival situations, appropriate communication skills and techniques are implemented
 - 4.4 Instructions given by rescue personnel to safely access rescue craft are followed
- 5 Operate lifesaving and survival equipment**
 - 5.1 Range of pyrotechnic and distress signals are operated according to established safety practice and procedures
 - 5.2 Survival equipment is operated according to instructions and accepted survival practice
 - 5.3 Survival radio equipment is operated according to manufacturer instructions and regulatory protocols
 - 5.4 Lifejackets and other lifesaving equipment are operated and used according to instructions
- 6 Participate in abandon vessel drills**
 - 6.1 Regulatory requirements and company procedures for musters and drills are identified and implemented
 - 6.2 Actions required for a range of muster signals are correctly identified
 - 6.3 Action is taken promptly to address problems that may arise when following vessel abandonment procedures
 - 6.4 Hazards are identified that may occur when abandoning vessel risks are minimised according to SMS, and established safety practice and procedures
 - 6.5 Information relevant to use of lifesaving equipment is accessed and applied

6.6 Range of emergencies that may lead to vessel abandonment are outlined

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARF001 Apply basic survival skills in the event of vessel abandonment.

Links

Assessment Requirements for MARF027 Apply basic survival skills in the event of vessel abandonment

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- collecting, managing and interpreting information on the use of lifesaving equipment and procedures to be followed when order to abandon vessel is given
- communicating effectively with other personnel and passengers during simulated and/or actual abandon vessel musters and emergencies
- determining type and extent of emergency and appropriate survival action to be taken
- donning a lifejacket in water and:
 - assisting a survivor to don a lifejacket
 - holding heat escape lessening posture for at least 5 minutes
 - maintaining a group huddle for at least 10 minutes
 - swimming in a group conga line for a minimum of 50 metres
 - swimming in a lifejacket for a minimum of 50 metres
 - towing with a life jacket for a minimum of 25 metres
- ensuring behaviour reflects statutory requirements pertaining to lifesaving appliances
- operating radio equipment, including very high frequency (VHF) or high frequency (HF) radios
- operating and using lifesaving and survival equipment, including:
 - orange smoke flares or red handheld flares
 - life buoys
 - life jacket or personal floatation devices
- planning timing and sequence of individual survival actions to be appropriate to prevailing circumstances and conditions of emergency, and minimising potential dangers and threats to other survivors
- reading and interpreting instructions on emergency procedures, safety management systems (SMS) and plans
- recognising and interpreting alarms and muster signals appropriately
- remaining afloat without a lifejacket for at least 5 minutes.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate techniques for:
 - first aid
 - maritime communication
 - survival with a swamped, semi-submerged tender or dingy
 - using survival equipment
- action to be taken in an emergency situation
- certificates and documentation, including:
 - instructions for use of lifesaving equipment
 - lifesaving and survival equipment certificates
 - pyrotechnic expiry dates
 - record of inspection of equipment
- crew and passenger safety briefing
- construction, outfit and particular characteristics of various types of applicable survival equipment
- distress signals, their use and penalty for misuse
- emergency muster and abandon vessel signals
- emergencies that may lead to vessel abandonment
- established safety practice and procedures
- hazards, including:
 - expired pyrotechnics
 - inaccessible lifejackets
 - no defined abandon ship procedures established
 - poorly maintained equipment
- importance of being ready for any shipboard emergency, including initial actions for survival on vessel; abandonment
- location of:
 - lifesaving appliances on a vessel
 - survival equipment on vessel
- maintenance of lifesaving appliances
- person overboard combination light and smoke float
- purpose and use of relevant personal protective equipment (PPE)
- procedures for:
 - abandoning vessel
 - correctly operating and using lifesaving appliances on board vessels and survival craft, specifically donning a lifejacket, using a lifejacket light and whistle and using handheld pyrotechnics
 - emergency response on board vessels, including abandoning vessel

- regulatory requirements and company procedures for musters and drills
- relevant manufacturer guidelines relating to operating and using survival equipment, including instructions on equipment capability and limitations
- relevant maritime regulations related to required survival equipment on a vessel
- relevant work health and safety (WHS)/occupational health and safety (OHS) legislation and policies, including SMS, plans, processes and techniques
- signs of hypothermia and appropriate treatment
- search and rescue transponders (SARTs)
- standard safety symbols
- steps taken after collision, grounding or other marine casualty and resulting hull damage
- symptoms of hypothermia, its prevention and treatment and related use of protective covers and garments
- threats to survival after abandoning vessel, including dehydration and ingestion of seawater and:
 - appropriate strategies for countering these threats
 - how to minimise dangers
- using survival equipment, including:
 - emergency position indicating radio beacons (EPIRBs)
 - immersion suits
 - SARTs
- value of training and emergency drills for enhancing chances of survival at sea
- ways of maximising detectability using pyrotechnic distress signals, portable high frequency (HF) radios and EPIRBs.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management systems, workplace procedures and operational manuals, including:
 - abandon vessel procedures
 - emergency procedures

- information on the use of lifesaving equipment
- instructions for the use of lifesaving and survival equipment
- lifesaving and survival equipment certificates
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARF028 Follow procedures to minimise and fight fires on board a vessel

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply defined policies and procedures when carrying out fire minimisation procedures and fighting a fire on board a vessel. This unit applies to people working in the maritime industry in a deck and or engine room capacity on vessels up to 80 m and with propulsion power <3000 kW within the exclusive economic zone (EEZ). They could be working independently or as part of a vessel crew.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a General Purpose Hand NC, Coxswain Grade 2 NC, Coxswain Grade 1 NC, Marine Engine Driver Grade 3 NC, Master (Inland waters), Master <24 m NC, Marine Engine Driver Grade 2 NC, Mate <80 m NC, Master <35 m NC and Marine Engine Driver Grade 1 NC, as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012 or relevant skills and experience.

Pre-requisite Unit

Not Applicable

Competency Field

F – Operational Quality and Safety

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Carry out fire minimisation procedures

1.1 Fire hazards and risks on board vessel are identified and reported to designated personnel according to workplace procedures

1.2 Workplace procedures and work instructions for controlling fire risks are followed

1.3 Firefighting equipment is regularly checked and appropriate action is taken to ensure it is operational

1.4 Participation in fire drills and musters is undertaken to ensure readiness for fire emergencies

2 Follow instructions during response to a fire emergency

2.1 Location and class of fire are identified and alarm is raised and or responded to according to workplace procedures

2.2 Appropriate personal protective equipment (PPE) requirements are made ready

2.3 Instructions to contain the spread of fire and smoke are acted upon

2.4 Fire is attacked using appropriate method, firefighting equipment and extinguishing media or agent according to instructions

2.5 Collaboration and communication is maintained with others to support the safety and efficiency of the firefighting operation

3 Support post-fire operations

3.1 Fire watch is carried out as instructed to prevent further outbreak

3.2 Equipment is restored to operational condition according to workplace instructions

3.3 Assistance is provided to preserve fire scene prior to

investigation, as required

3.4 Information relevant for fire incident debrief is provided

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARF002 Follow procedures to minimise and fight fires on board a vessel.

Assessment Requirements for MARF028 Follow procedures to minimise and fight fires on board a vessel

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying extinguishing media to a fire, including:
 - water
 - dry chemical powder
- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- communicating and working collaboratively as a member of a team in a firefighting operation
- correctly using vessel closure and shutdown systems
- conducting effective boundary cooling
- identifying fire hazards and risks
- using fire hose lines (jet spray to fog stream)
- using a fire blanket to extinguish a fire.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chemistry of fire and its relationship to flash point, vapour density, auto ignition temperature and spontaneous combustion
- classes of fire applicable to Australian and New Zealand Standards, including:
 - A – Carbonaceous solids
 - B – Flammable liquids
 - C – Flammable gases
 - E – Electrically energised equipment
 - F – Cooking fats or oils
- detection and suppression systems, including fixed firefighting systems
- extinguishing media, and their use, including:

- extinguishing powders
- firefighting foams
- gaseous extinguishing agents
- water
- fire alarms and signals during on-board fire emergency
- firefighting tactics, techniques and procedures, including team dynamics
- fire hazards and risks, including:
 - cargo
 - clothing
 - cooking oils
 - cordage
 - electrical arcing
 - fuels and lubricants
 - furnishings
 - paints
 - poor housekeeping
 - poor work practices
 - smoking
 - spontaneous combustion
- hazards and threats to life or health during on-board firefighting operations
- international shore connections
- methods of heat transfer
- on-board fire emergency response organisation and procedures
- portable fire extinguishers – colour codes and suitability for class of fire
- principles underlying spread of fire on a vessel
- principles and methods of extinguishment of each class of fire
- fire pumps
- procedure for restoring equipment to operational condition, including:
 - cleaning
 - re-stowing
- types of fire detection, firefighting equipment and systems used on vessels, their features, principles of operation, procedures for their use and problems that can occur
- using a fire bucket
- ventilation procedures
- vessel construction as it relates to fire prevention or protection
- WHS/OHS requirements and safe work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a

minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, workplace procedures and operational manuals
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) that are currently used in industry.

MARF030 Survive at sea using survival craft

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to survive at sea using survival craft. This unit applies to people working in the maritime industry in a deck and or engine room capacity on vessels up to 80 m and with propulsion power <3000 kW within the exclusive economic zone (EEZ). They could be working independently or as part of a vessel crew.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a General Purpose Hand NC, Coxswain Grade 1 NC, Marine Engine Driver Grade 3 NC, Master <24 m NC, Marine Engine Driver Grade 2 NC, Mate <80 m NC, Master < 35 m NC and Marine Engine Driver Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012 or relevant skills and experience.

Assessment Requirements for MARF030 Survive at sea using survival craft

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying appropriate handling strategies to manoeuvre survival craft in rough weather and sea conditions
- boarding a life raft unassisted while wearing a lifejacket and assisting others to board
- collecting, managing and interpreting information on the use of lifesaving equipment
- communicating with other crew members
- determining type and extent of emergency
- jumping safely from a height into the water while wearing a lifejacket and according to established survival practice
- operating radio equipment
- participating in training, musters and emergency drills
- reading and interpreting instructions for emergency procedures and for use of lifesaving and survival equipment
- recognising and interpreting muster signals
- righting an inverted life raft unassisted while wearing a lifejacket according to established survival practice
- swimming while wearing a lifejacket and floating without a lifejacket according to established survival practice
- using a rescue quoit to assist a person to the life raft
- using paddles to manoeuvre survival craft
- using survival equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action to be taken in emergency situations
- calculations required to ration food and water
- technique used to deploy a sea anchor or drogue from the survival craft

- emergency muster and abandon vessel signals
- equipment found in survival craft, its function and procedures for correct operation
- established survival practice
- first aid techniques
- how to launch survival craft
- importance of being ready for shipboard emergencies
- International Convention for the Safety of Life at Sea (SOLAS) regulations
- location of survival equipment on vessel
- maintenance of lifesaving appliances
- means of activating gas release line to inflate life raft
- procedures for abandoning vessel including use of:
 - inflatable life raft
 - life buoys
 - life jackets
- relevant maritime regulations relating to required survival equipment on a vessel
- relevant work health and safety (WHS)/occupational health and safety (OHS) legislation and policies
 - search and rescue transponders (SARTs)
- steps to be taken after collision, grounding or other marine casualty and resulting hull damage
- survival at sea techniques
- survival craft:
 - characteristics of different types of survival craft
 - construction
- techniques for using survival equipment
- time required to make distress calls safely
- threats to survival on vessel abandonment and appropriate strategies for countering these threats
- use and purpose of personal protective equipment (PPE)
- use of distress signals, including flares and penalty for misuse.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe,

impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, workplace procedures, instructions for use of lifesaving and survival equipment, emergency procedures and operational manuals
- survival craft
- tools, equipment, machinery, materials and relevant PPE currently used in industry.

MARI003 Comply with regulations to ensure safe operation of a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply current Commonwealth, state and territory Acts, legislation, codes of practice and other publications pertaining to the safe operation of a vessel up to 12 m in length.

This unit applies to people working in the maritime industry commanding and operating the engines of a commercial vessel:

- <12 m in length
- with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine
- in inshore waters or designated waters or
- as a tender or auxiliary vessel within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and a Coxswain Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, or deck officer, issued under the Navigation Act 2012.

Pre-requisite Unit

I – Regulations and Port Operations

Unit Sector

Not Applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Determine relevant rules and regulations impacting on work practices

2 Comply with industry and professional codes of practice

3 Apply legislative and regulatory requirements to the operation of the vessel

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 International Regulations for Preventing Collisions at Sea are comprehended and implemented

1.2 Responsibilities as the person in charge of a vessel are identified and recorded

1.3 Relevant Commonwealth, state, territory and local legislation governing the vessel and the passage are comprehended

2.1 Relevant industry and professional codes of practice are sourced

2.2 Commitment to comply with industry and professional codes of practice is demonstrated through own behaviour

3.1 Regulatory requirements relating to operational aspects of the vessel are recognised and appropriate procedures are developed

3.2 Situations where rules must be applied in order to avoid collisions are recognised

3.3 Safety requirements are implemented according to legislative and regulatory requirements

3.4 Compliance with all relevant rules and legislation is demonstrated while operating the vessel

- | | | |
|---|------------|--|
| 4 Identify changes in laws and regulations and their implications for vessel operation | 4.1 | Changed legislation and regulations are accessed |
| | 4.2 | Changes in regulatory requirements are identified and applied |
| | 4.3 | Operational procedures are reviewed to reflect changes in legislation and regulations |
| 5 Maintain statutory records | 5.1 | Copies of relevant records are maintained |
| | 5.2 | Evidence of current authorisation, training and relevant licences is maintained according to legislative and regulatory requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARI001 Comply with regulations to ensure safe operation of a vessel up to 12 metres.

Assessment Requirements for MARI003 Comply with regulations to ensure safe operation of a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying regulations pertaining to the safe operation of a vessel
- applying safety management plan
- conducting inductions for crew
- demonstrating an understanding of the duties and responsibilities of a Coxswain
- obtaining and complying with information from Commonwealth, state and territory Acts, legislation, codes of practices and other publications relating to the safe navigation of a vessel.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action that must be taken when assisting vessels in distress
- certificates on board a vessel
- contents of marine notices, annual notices to mariners
- distress signals
- duties and responsibilities of a Coxswain
- function of risk assessments
- International Association of Lighthouse Authorities (IALA) Buoyage System A
- International Regulations for Preventing Collisions at Sea, including:
 - large commercial traffic
- lifesaving and firefighting appliances
- logbook or vessel record book
- *Marine Safety (Domestic Commercial Vessel) National Law Act 2012*, *Marine Safety (Domestic Commercial Vessel) National Law Regulation 2013* and marine orders
- marine pollution prevention
- National Standard for Commercial Vessels (NSCV), in particular, Part B, Part C Section 7, Part D and Part E

- operational areas and classifications of vessels
- safety management systems
- state and territory marine legislation
- work health and safety (WHS)/occupational health and safety (OHS) legislation.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation such as legislation, regulations, codes of practice, workplace procedures and operational manuals including:
 - International Regulations for Preventing Collisions at Sea
 - marine orders 500 series
 - *Marine Safety (Domestic Commercial Vessel) National Law Act 2012*
 - *Marine Safety (Domestic Commercial Vessel) National Law Regulation 2013*
 - National Standard for Commercial Vessels (NSCV), in particular, Part B, Part C Section 7, Part D and Part E
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARK007 Handle a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to manoeuvre a vessel up to 12 metres in length. This includes the ability to berth, moor, anchor and manoeuvre a vessel during emergencies.

This unit applies to people working in the maritime industry in the capacity of:

- coxswain on vessels <12 m in length, with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine, operating in inshore or designated waters or
- coxswain on tenders or auxiliary vessels operating within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and Coxswain Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master or deck officer, issued under the Navigation Act 2012.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Handle vessel in normal conditions

- 1.1 Features of vessel that relate to its handling characteristics are recognised
- 1.2 Details of manoeuvres are communicated to relevant personnel clearly and concisely using standard maritime vocabulary
- 1.3 Situational awareness is maintained to ensure safety of manoeuvres
- 1.4 Manoeuvres are completed to meet passage requirements
- 1.5 Propulsion equipment is used and monitored to assist in completing manoeuvres safely
- 1.6 Safe operating limits of propulsion and steering equipment are not exceeded

2 Handle vessel in adverse weather conditions

- 2.1 Nature of adverse weather conditions is identified and potential impact on the manoeuvrability of the vessel is determined
- 2.2 Appropriate action is determined to ensure the safety of the vessel
- 2.3 Correct use of propulsion equipment is established to assist in completing manoeuvres safely
- 2.4 Safe operating limits of propulsion and steering equipment are not exceeded
- 2.5 Situational awareness is maintained at all times to review actions and ensure the safety of the vessel

3 Handle vessel in emergencies

- 3.1 Nature of emergency is established and required action is determined

- 3.2 Risks to vessel and safety of persons on board are assessed and safety of required action is confirmed
 - 3.3 Details of action are communicated to relevant personnel clearly and concisely using standard maritime vocabulary
 - 3.4 Appropriate manoeuvres are made during the emergency to maintain the safety of the vessel and those on board, and any other vessels or persons involved
 - 3.5 Propulsion equipment is used and monitored to assist in completing manoeuvres safely
 - 3.6 Safe operating limits of propulsion and steering equipment are not exceeded
- 4 Tow and be towed**
- 4.1 Preparations for towing are made safely according to established nautical practice
 - 4.2 Correct towing procedures and precautions are applied when towing and being towed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARK001 Handle a vessel up to 12 metres.

Assessment Requirements for MARK007 Handle a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- anchoring a vessel
- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- handling a disabled or partially disabled vessel
- manoeuvring a vessel to:
 - berth and leave a berth
 - come to and leave a mooring
 - maintain a steady course
 - retrieve a person overboard
 - steer astern
 - turn short around
 - turn a vessel across the tide and across the wind
- maintaining situational awareness
- undertaking preparations for towing, including:
 - crew briefings that include the task at hand and risks to persons on both vessels
 - ensuring means of communication between the two vessels is available
 - ensuring tow ropes are in good condition and of adequate strength and length for the proposed tow
 - ensuring tow line is of sufficient length to minimise shock loading on tow-line
 - making tow fast to the towing vessel to ensure steerage can be maintained
 - making provision for rapid slipping of the tow in emergency situations
 - preparing messenger ropes for passing tow lines
- towing and being towed
- using appropriate communication.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- adverse weather conditions, including:
 - fog and restricted visibility
 - tropical revolving storms
 - wind and sea conditions that may affect the safety of the vessel
- avoidance of tropical revolving storm activity
- elliptical turn
- features of a vessel that relate to its handling characteristics, and their effects, including:
 - displacement and planing hulls
 - propellers
 - propulsion units, including:
 - jet units
 - inboard engines
 - outboard motors
 - rudders
 - trim and displacement
- manoeuvring in the event of emergencies, including:
 - collision
 - disabled or partially disabled vessel
 - grounding
 - person overboard
- manoeuvring characteristics of small power-driven vessels
- manoeuvring a vessel in the vicinity of large vessels
- manoeuvring to beach and re-float the vessel
- manoeuvring a vessel in adverse weather conditions, including:
 - altering course to minimise the effect of wind and sea
 - berth and leave a berth in various wind and tidal conditions
 - deploying a sea anchor to keep vessel head to sea
 - heading to wind and sea to ride out the adverse weather
 - reduction of speed
 - seeking shelter
- procedures for towing and being towed
- stability of a small vessel and stability terms
- techniques for crossing a coastal bar with and against the sea
- techniques for handling a vessel in heavy swell and surf
- trim and displacement
- use of a sea anchor

- Williamson turn
- WHS/OHS requirements and work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management system (SMS), workplace procedures, operational manuals and maritime publications and procedures relating to emergency response
- a vessel ≥ 5.0 m in length
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARN008 Apply seamanship skills aboard a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply practical seamanship skills and techniques as part of work duties aboard a vessel up to 12 m in length.

This unit applies to people working in the maritime industry in the capacity of:

- coxswain on vessels <12 m in length, with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine, operating in inshore or designated waters or
- coxswain on tenders or auxiliary vessels operating within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and Coxswain Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Use and maintain ropes	<p>1.1 Rope types and common areas of use are correctly identified</p> <p>1.2 Ropes are checked for wear and repairs are undertaken according to manufacturer guidelines</p> <p>1.3 Ropes are coiled and stowed correctly</p> <p>1.4 Knots and hitches are tied neatly and securely, and are used according to their correct application</p> <p>1.5 Ropes are spliced neatly and securely according to their correct application</p> <p>1.6 Rope ends are whipped where appropriate to maintain good condition</p>
2 Secure vessel at anchor	<p>2.1 Prior to letting go, anchor and equipment are prepared</p> <p>2.2 Quantity of anchor cable run out or recovered is appropriate to the depth of water, weather and sea conditions, and tidal range in area of operation</p> <p>2.3 During operation, control of cable is maintained within safe operating limits</p> <p>2.4 Degree to which anchor and equipment are secured on completion of anchoring operations is appropriate to forecast conditions</p> <p>2.5 During all operations, anchoring area is kept free of loose ropes, wires and debris</p>
3 Secure vessel at a berth	<p>3.1 At all times, mooring lines and associated equipment are handled safely</p>

- 3.2 Throughout operations, mooring area is kept free of loose ropes, wires and debris
 - 3.3 Tension on ropes is maintained at an appropriate level for the stage and nature of the operation
 - 4 **Check condition and seaworthiness of vessel**
 - 4.1 Coverage and frequency of checks and inspections on vessel seaworthiness are undertaken according to workplace procedures and organisational safety management system
 - 4.2 Watertight integrity is checked and appropriate action is taken to prepare for prevailing and forecast weather and sea conditions
 - 4.3 Degree to which vessel is secured is appropriate to prevailing and forecast conditions
 - 4.4 Irregularities are identified and appropriate action is taken to rectify the situation
 - 4.5 Irregularities beyond ability to rectify are reported in time to enable remedial action to be taken
 - 4.6 Reports of condition are completed according to workplace procedures
 - 5 **Conduct refuelling operations**
 - 5.1 All personal protective equipment (PPE) is accessed and used
 - 5.2 Safety boundary for the refuelling process is established
 - 5.3 Spill prevention systems are correctly deployed
 - 5.4 Refuelling operations are performed safely and according to organisational safety management system

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARN002 Apply seamanship skills aboard a vessel up to 12 metres.

Assessment Requirements for MARN008 Apply seamanship skills aboard a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- checking seaworthiness and general condition of a vessel up to 12 metres
- coiling and stowing ropes
- handling ropes
- identifying deterioration and causes in hull and fittings
- performing an eye splice
- performing common whipping on ropes
- performing preparations for and letting go and weighing anchor
- preparing and throwing a heaving line
- securing a vessel alongside using vessel mooring lines, including:
 - bow and stern lines
 - fore and aft springs
- securing anchor and equipment on completion of anchoring operations
- tying reef knot, bowline, clove hitch, round turn and two half hitches, rolling hitch and sheet bend - single and double.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- anchors, types and characteristics
- basic structural parts of a small vessel
- considerations to make when selecting an anchorage
- correct application of common knots and hitches
- coverage and frequency of checks of vessels seaworthiness
- factors affecting the safety and integrity of vessel; its equipment and materials on board
- how to make a vessel watertight

- identifying and rectifying irregularities in the condition and seaworthiness of the vessel
- large objects likely to move in a sea way
- loading, discharging and movement of weights
- maintenance of synthetic and natural fibre ropes
- materials on deck and below
- mooring line arrangements for securing at a berth
- openings including hatch covers and all other openings that water can enter
- principles of maintaining watertight integrity
- process for checking seaworthiness and general condition of a vessel up to 12 metres including:
 - accommodation and storage spaces
 - anchors
 - galley, stores and equipment
 - large objects likely to move in a sea way
 - materials on deck and below
 - opening
- procedure for anchoring
- refuelling a vessel according to safety regulations and organisational safety management system requirements
- rope types, characteristics and applications, dynamic and non-dynamic, including:
 - braided
 - natural fibre
 - plaited
 - polyester
 - wire core rope
 - wire rope
- safety precautions and pollution control measures during refuelling
- securing a vessel for sea
- types of anchors used on small vessels up to 12 metres
- WHS/OHS requirements and work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating

to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage. With the exception of whipping, splicing and knot tying, the Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) must be undertaken on a vessel ≥ 5.0 metres in length.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management system, workplace procedures and operational manuals
- a vessel ≥ 5.0 m in length
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MEM05004 Perform routine oxy fuel gas welding

Modification History

Release 1. Supersedes and is equivalent to MEM05004C Perform routine oxy acetylene welding

Application

This unit of competency defines the skills and knowledge required to prepare materials and perform routine oxy fuel gas welding of mild/low carbon steel and cast iron where the welding is not required to meet an Australian Standard or equivalent.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements MEM05055 Weld using oxy fuel gas welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1 Follow standard operating procedures (SOPs) 1.2 Comply with work health and safety (WHS) requirements at all times 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs 1.4 Identify job requirements from specifications, sketches, job sheets or work instructions
2	Prepare equipment for welding	2.1 Check condition of gas handling equipment 2.2 Assemble and set up fuel gas welding equipment according to SOPs 2.3 Determine and set gas pressures 2.4 Select consumables
3	Prepare materials for welding	3.1 Identify location of welds in accordance with job specifications 3.2 Clean and prepare materials ready for welding
4	Perform routine welding using oxy fuel gas	4.1 Weld materials to job requirements 4.2 Clean welds according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Fuel gases include one (1) or more of the following:

- acetylene
- liquefied petroleum gas (LPG)
- hydrogen

Materials include one (1) or more of the following:

- mild/low carbon steel
- cast iron

Consumables include one (1) or more of the following:

- filler rods
- fluxes

Welds include the following:

- butt
- fillet

Preparation includes one (1) or more of the following:

- preheating
- setting up jigs
- fixtures
- clamps
- joint preparation

Fuel gas welding equipment includes the following:

- gas cylinders
- hoses
- blowpipes
- tips and nozzles
- regulators
- flashback arrestors

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM05004C Perform routine oxy acetylene welding

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b7050d37-5fd0-4740-8f7d-3b7a49c10bb2>

Assessment Requirements for MEM05004 Perform routine oxy fuel gas welding

Modification History

Release 1. Supersedes and is equivalent to MEM05004C Perform routine oxy acetylene welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- cleaning and preparing materials for welding
- setting up:
 - gas cylinders
 - hoses
 - blowpipes
 - tips and nozzles
 - regulators
 - flashback arrestors
- selecting settings and consumables
- butt and fillet weld materials to comply with specifications
- cleaning welds according to SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- preparatory requirements
- equipment and equipment settings
- purpose of, and setting up requirements, of:
 - gas cylinders
 - hoses
 - blowpipes
 - tips and nozzles
 - regulators
 - flashback arrestors

- fuel gas properties and applications
- weld characteristics.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing routine oxy fuel gas welding at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05007 Perform manual heating and thermal cutting

Modification History

Release 1. Supersedes and is equivalent to MEM05007C Perform manual heating and thermal cutting

Application

This unit of competency defines the skills and knowledge required to perform manual heating, thermal cutting and gouging including the assembly and disassembly and operation of the equipment on a range of materials.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling
MEM12023	Perform engineering measurements
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|--|
| 1 Determine job requirements | 1.1 Follow standard operating procedures (SOPs) |
| | 1.2 Comply with work health and safety (WHS) requirements at all times |
| | 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions |
| 2 Select and set up heating and thermal cutting equipment | 2.1 Select cutting process and/or method appropriate for material |
| | 2.2 Select and assemble appropriate accessories and equipment |
| | 2.3 Ensure equipment is in safe working condition |
| | 2.4 Set up equipment following SOPs |
| 3 Perform heating and thermal cutting | 3.1 Follow equipment start-up procedures and make adjustments as required |
| | 3.2 Make appropriate cutting allowances |
| | 3.3 Minimise wastage of materials when performing manual heating and thermal cutting |
| | 3.4 Identify defects and take corrective action in accordance with SOPs |
| | 3.5 Heat and cut material to specification |
| | 3.6 Inspect shape/size/length of final product for compliance with specifications |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Cutting includes one (1) or more of the following:

- hand held
- self-propelled straight line cutters

Methods include one (1) or more of the following:

- manual
- automatic

Fuel gases include one (1) or more of the following:

- acetylene
- liquefied petroleum gas (LPG)
- hydrogen

Material includes various thicknesses and types of one (1) or more of the following:

- ferrous
- non-ferrous
- non-metallic

Equipment includes the following:

- gas cylinders
- hoses
- blowpipes
- tips and nozzles
- regulators
- flashback arrestors

Unit Mapping Information

Assessment Requirements for MEM05007 Perform manual heating and thermal cutting

Modification History

Release 1. Supersedes and is equivalent to MEM05007C Perform manual heating and thermal cutting

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting equipment appropriate to the material
- checking condition of equipment
- setting up:
 - gas cylinders
 - hoses
 - blowpipes
 - tips and nozzles
 - regulators
 - flashback arrestors
- operating equipment to cut materials making appropriate cutting allowances to ensure material is used in most economical way
- identifying defects and taking appropriate remedial action
- heating material to specification
- checking final product for compliance with specifications.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- cutting processes appropriate to various materials
- heating and cutting specifications
- purpose of, and setting up requirements, of:
 - gas cylinders
 - hoses
 - blowpipes

- tips and nozzles
- regulators
- flashback arrestors
- tools, equipment, techniques and procedures for heating and cutting
- potential equipment faults
- assembling procedures for equipment and accessories
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment
- cutting allowances and reasons for applying them
- procedures and reasons for minimising waste material
- cutting defects and their causes and tools, equipment and techniques required to correct defects.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing manual heating and thermal cutting at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05012 Perform routine manual metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05012C Perform routine manual metal arc welding

Application

This unit of competency defines the skills and knowledge required to carry out routine manual metal arc welding (MMAW) of low carbon mild steel where the welding is not required to meet an Australian Standard or equivalent.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

| | | 2.3 | Set up welding equipment according to SOPs |
| | | 2.4 | Select correct electrodes and adjust settings to suit application |
| | | | |
| 3 | Perform routine welding using MMAW | 3.1 | Weld materials to job requirements |
| | | 3.2 | Clean welds according to SOPs |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:

- butt
- fillet

Preparing includes one (1) or more of the following:

- cleaning
- setting up jigs
- fixtures
- clamps
- joint preparation

Welding equipment includes the following:

- welding leads
- welding machines
- electrode holder

Cleaning includes one (1) or more of the following:

- slag and spatter
- cleaning
- using files
- grinders

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM05012C Perform routine manual metal arc welding

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b7050d37-5fd0-4740-8f7d-3b7a49c10bb2>

Assessment Requirements for MEM05012 Perform routine manual metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05012C Perform routine manual metal arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for performing routine manual metal arc welding (MMAW)
- cleaning and preparing materials to specifications
- setting up welding equipment, selecting appropriate electrodes and adjusting settings to suit application
- welding materials to comply with specifications
- cleaning welds for slag and splatter in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- material and equipment preparation
- equipment set-up and settings
- appropriate welding consumables consistent with standard operating procedures
- MMAW processes and properties.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing routine manual metal arc welding at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05015 Weld using manual metal arc welding process

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM05015 Weld using manual metal arc welding process (Release 1).

Release 1. Supersedes and is equivalent to MEM05015D Weld using manual metal arc welding process.

Application

This unit of competency has been developed for Engineering Tradesperson – Fabrication apprenticeship training and the recognition of trade-level skills in manual metal arc welding (MMAW) on heavy or light metal fabrications. It may also apply to other trade occupations requiring higher level MMAW welding skills.

Weld quality would typically conform to AS 1554 General Purpose, and American Bureau of Shipping (ABS) or equivalent.

Where manual thermal processes associated with preparation, pre-heat and/or post-heat is required unit MEM05007 Perform manual heating and thermal cutting and unit MEM05008 Perform advanced manual thermal cutting, gouging and shaping, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 4

Pre-requisite Unit

MEM05012	Perform routine manual metal arc welding
MEM05051	Select welding processes
MEM05052	Apply safe welding practices
MEM09002	Interpret technical drawing
MEM11011	Undertake manual handling

MEM12023	Perform engineering measurements
MEM12024	Perform computations
MEM13015	Work safely and effectively in manufacturing and engineering
MEM14006	Plan work activities
MEM16006	Organise and communicate information
MEM18001	Use hand tools
MEM18002	Use power tools/hand held operations

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare materials for MMAW	2.1	Prepare materials to achieve the required weld requirements
		2.2	Assemble/align materials to specification, where required
3	Select, assemble and set up	3.1	Identify and select welding equipment and electrodes, accessories and consumables appropriate to the material

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

	welding equipment and consumables	3.2	Assemble and set up AC or DC welding equipment
4	Minimise and rectify distortion	4.1	Apply appropriate distortion prevention measures
		4.2	Rectify any distortion using appropriate techniques
5	Weld to job specification using MMAW	5.1	Ensure weld deposit is to specifications
		5.2	Clean joints to specifications
6	Ensure weld conformance	6.1	Inspect weld joints visually for conformance to specifications
		6.2	Rectify any weld defects with minimum loss of sound metal using correct techniques and tools
		6.3	Complete weld records, where required

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the

- fillet and butt welds carried out in all positions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

following:

Materials include one (1) or more of the following:

- ferrous, including carbon or stainless steel
- non-ferrous metals
- alloys suitable for MMAW welding

Preparation of materials includes one (1) or more of the following:

- pre-heating
- setting up of jigs
- fixtures and clamps
- joint preparation (e.g. bevelling)

Distortion prevention measures include one (1) or more of the following:

- preheating
- setting up of jigs
- fixtures and clamps

Rectify includes the use of one or more of the following:

- oxy acetylene
- air arc equipment
- grinding devices

Defects include one (1) or more of the following:

- porosity
- slag inclusions
- discontinuities
- lack of penetration
- undercut

Unit Mapping Information

Release 2. Supersedes and is equivalent to MEM05015 Weld using manual metal arc welding process (Release 1).

Release 1. Supersedes and is equivalent to MEM05015D Weld using manual metal arc welding process.

Assessment Requirements for MEM05015 Weld using manual metal arc welding process

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM05015 Weld using manual metal arc welding process (Release 1).

Release 1. Supersedes and is equivalent to MEM05015D Weld using manual metal arc welding process.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for welding using manual metal arc welding process (MMAW) to the specified standard
- selecting appropriate weld and joint preparation methods
- consistently weld a range of materials to the specified standard or equivalent using AC or DC welding machines and electrodes while preventing distortion
- rectifying any defects
- completing weld records related to MMAW onto standard workplace forms.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- material preparation for MMAW
- weld joint preparations
- welding electrode classification
- causes of distortion for materials when welded
- causes of weld defects and methods of rectification
- relationships between amperage, electrode and material
- standards for MMAW, including AS 1554 General Purpose any other equivalent standards.

Assessment Conditions

- Assessors must:

- have vocational competency in welding using MMAW process at least to the level being assessed with relevant industry knowledge and experience
- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires.
- Assessment must occur in a functioning workplace. Where assessment in the workplace would be unsafe, impractical or threatens the environment, assessment must occur in a sufficiently rigorous simulated environment that reflects the circumstances that would be experienced in a functioning workplace. Assessment must cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05017 Weld using gas metal arc welding process

Modification History

Release 2. Quantum of hours of workplace practice removed. Supersedes and is equivalent to MEM05017 Weld using gas metal arc welding process (Release 1).

Release 1. Supersedes and is equivalent to MEM05017D Weld using gas metal arc welding process.

Application

This unit of competency has been developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade-level skills in gas metal arc welding (GMAW) on heavy or light metal fabrications. It may also apply to other trade occupations requiring higher level GMAW welding skills.

Weld quality would typically conform to Australian Standard 1554 General Purpose, and American Bureau of Shipping (ABS) or equivalent.

Where manual thermal processes associated with preparation, pre-heat and/or post-heat is required unit MEM05007 Perform manual heating and thermal cutting and unit MEM05008 Perform advanced manual thermal cutting, gouging and shaping, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

MEM05049 Perform routine gas tungsten arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Application

This unit of competency defines the skills and knowledge required to prepare the materials and carry out routine gas tungsten arc welding (GTAW) and applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements Unit MEM05019 Weld using gas tungsten arc welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, sketches, job sheets or work instructions
2	Prepare materials and equipment for welding	2.1	Identify location of welds in accordance with procedures and job specifications
		2.2	Clean and prepare materials ready for welding
		2.3	Set up welding equipment to meet work requirement
		2.4	Select settings and consumables to suit application
3	Perform routine welding using GTAW	3.1	Weld materials to job requirements
		3.2	Clean welds according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:

- butt
- fillet

Materials include one (1) or more of the following:

- low carbon/mild steels
- aluminium

Prepared includes one (1) or more of the following:

- pre-heating
- setting up jigs
- fixtures
- clamps
- joint preparation

Welding equipment includes the following:

- hoses
- welding leads and gas shrouds
- electrodes
- gas regulator
- liners
- contact tips

Consumables include the following:

- tungsten electrodes, filler wire and shielding gas

Clean includes the following:

- slag and spatter

Assessment Requirements for MEM05049 Perform routine gas tungsten arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05049B Perform routine gas tungsten arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas tungsten arc welding (GTAW)
- cleaning and preparing materials for welding to specifications
- setting up welding equipment, including selecting settings and consumables to suit application
- consistently welding materials to specifications
- cleaning welds in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- preparatory requirements
- equipment and equipment settings
- shielding gas properties and applications
- weld characteristics.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing routine GTAW process at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM05050 Perform routine gas metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Application

This unit of competency defines the skills and knowledge required to prepare materials and carry out routine gas metal arc welding (GMAW) and applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard or equivalent.

Where welding is required to meet AS 1554 General Purpose or equivalent codes, work health and safety (WHS) regulations and/or licensing requirements unit MEM05017 Weld using gas metal arc welding process should also be selected.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of tools is required unit MEM18001 Use hand tools and unit MEM18002 Use power tools/hand held operations, should also be selected as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Fabrication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, sketches, job sheets or work instructions
2	Prepare materials and equipment for welding	2.1	Identify location of welds in accordance with procedures and job specifications
		2.2	Clean and prepare materials ready for welding
		2.3	Set up welding equipment to meet work requirement
		2.4	Select settings and consumables to suit application
3	Perform routine welding using GMAW	3.1	Weld materials to job requirements
		3.2	Clean welds according to SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Welds include the following:

- butt
- fillet

Materials include one (1) or more of the following:

- low carbon
- mild steels

Prepared includes one (1) or more of the following:

- pre-heating
- setting up jigs
- fixtures
- clamps
- joint preparation

Welding equipment includes the following:

- hoses
- welding leads and gas shrouds
- gas regulators
- liners
- contact tips

Consumables include the following:

- filler wire and shielding gas

Clean includes the following:

- slag and spatter

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MEM05050 Perform routine gas metal arc welding

Modification History

Release 1. Supersedes and is equivalent to MEM05050B Perform routine gas metal arc welding

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures and safe work practices
- identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas metal arc welding (GMAW)
- cleaning and preparing materials for welding to specifications
- setting up welding equipment, including selecting settings and consumables to suit application
- consistently welding materials to specifications
- cleaning welds in accordance with SOPs.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe welding practices and procedures and use of personal protective equipment (PPE)
- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- shielding gas properties and applications
- post-welding treatments
- weld characteristics.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing routine GMAW process at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM07032 Use workshop machines for basic operations

Modification History

Release 1. Supersedes and is equivalent to MEM07032B Use workshop machines for basic operations

Application

This unit of competency defines the skills and knowledge required to use workshop machines for basic operations in maintenance or jobbing environment.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information
MEM18001	Use hand tools

Competency Field

Machine and process operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, sketches, job sheets or work instructions |
| 2 | Set up machine | 2.1 | Select appropriate machine and tools to meet work requirements |
| | | 2.2 | Sharpen cutting tools, as required |
| | | 2.3 | Install tools according to procedures |
| | | 2.4 | Set guards and adjust, as required |
| 3 | Operate machine | 3.1 | Mount material to be machined and secure using clamping device/ appropriate to the material and work requirements |
| | | 3.2 | Operate machine to suit work and material requirements |
| | | 3.3 | Check machined component against work requirements and predetermined finish |
| | | 3.4 | Make adjustments, as required |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, accessibility of the item, and local industry and regional contexts) are included.

Machines include one (1) or more of the following:

- lathe
- radial arm drill
- mill

Cutting tools include one (1) or more of the following:

- lathe tools
- milling cutters
- drills

Materials include one (1) or more of the following:

- ferrous
- non-ferrous

Clamping devices include one (1) or more of the following:

- chucks
- vices
- clamps
- bars and packing

Assessment Requirements for MEM07032 Use workshop machines for basic operations

Modification History

Release 1. Supersedes and is equivalent to MEM07032B Use workshop machines for basic operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications and work instructions for machine operations
- setting up machines and selecting, sharpening and mounting tools required for the required job
- mounting the material to be processed and safely operating the machine
- checking machined components to ensure it meets specifications and making adjustments, as required.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- cutting tool sharpening methods and techniques
- units of measurement, tool geometry and numerical operations required for basic machining operations
- safe operation of tool sharpening equipment and consequences of incorrect sharpening
- machine set-up and consequences of incorrect speeds and feeds
- procedures for operating workshop machines
- reasons for poor surface finish.

Assessment Conditions

- Assessors must:
 - have vocational competency in using workshop machines for basic operations at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Application

This unit of competency defines the skills and knowledge required to lift and move materials manually and/or using basic manual handling equipment in a wide range of environments.

Maximum manual lifting weight is limited to Safe Work Australia recommendations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Materials handling

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, job sheets or work instructions</p>
2 Lift materials manually	<p>2.1 Determine material weight correctly utilising most appropriate technique, and assess risks associated with lifting</p> <p>2.2 Undertake lifting techniques to Safe Work Australia recommended procedures and having regard to types of movement, methods, storage, height and position</p>
3 Move/shift materials manually	<p>3.1 Select appropriate equipment, as required</p> <p>3.2 Place material safely and securely on moving equipment</p> <p>3.3 Relocate material ensuring safety of personnel and security of material</p> <p>3.4 Unload material and place in a safe and secure manner</p>

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Material weight includes

- determined using scales

Assessment Requirements for MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- assessing the risks associated with lifting materials manually and determining the most appropriate technique
- selecting and using the appropriate equipment to move/shift materials ensuring safety of personnel and security of material.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- manual handling techniques, including individual or team lifting
- appropriate equipment associated with move/shift materials
- hazards of incorrect procedures
- Safe Work Australia standards for manual handling.

Assessment Conditions

- Assessors must:
 - have vocational competency in undertaking manual handling at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Application

This unit of competency defines the skills and knowledge required to estimate approximate answers to arithmetical problems, carry out calculations involving percentages and proportions, and determine simple ratios and averages.

It also covers producing and interpreting simple charts and graphs in manufacturing, engineering or related environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 3

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. requirements at all times
	1.3 Identify job requirements from specifications, sketches, job sheets or work instructions
	1.4 Establish required calculation outcomes from job instructions
	1.5 Determine required calculation method to suit the application, including selection of relevant arithmetic operations and/or formulae
	1.6 Estimate expected results, including rounding off, as appropriate
2 Perform calculations	2.1 Apply calculation method
	2.2 Obtain answer and check against estimation to ensure it is correct
3 Produce charts and graphs from given information	3.1 Transpose data to produce charts or graphs
	3.2 Ensure charts or graphs reflect data on which they are based to meet specifications

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Calculations are performed using one (1) or more of the following:

- pen and paper
- a calculator
- tables
- tablets
- computers

Relevant sources include one (1) or more of the following:

- charts
- graphs
- diagrams
- measurement data
- reference manuals
- specifications

Applications include computations associated with one (1) or more of the following:

- pressure
- volume
- temperature
- heat
- speed
- power
- elasticity
- density
- mass
- force

Arithmetic operations include the following:

- application of subtraction, addition, multiplication and division
- manipulation of decimals, fractions and mixed numbers and whole numbers
- using formulas
- determining percentages
- calculation of proportions and ratios

Charts and graphs include one (1) or more of the following:

- simple histograms
- control charts
- pie charts

Assessment Requirements for MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting data from job instructions and relevant sources to establish required outcomes
- determining the appropriate calculation method to suit the application
- performing calculations and confirming answer/s
- producing and interpreting simple charts and graphs from given data.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- formulae applicable to the determination of perimeter, area and volume of simple geometric shapes and the reasons for using dimensions with the same units
- techniques and procedures for rounding off figures when estimating approximate answers
- features and use of mixed numbers, decimals, fractions and whole numbers
- procedures for carrying out calculations involving fractions and using each of the four basic rules of addition, subtraction, multiplication and division
- concept of percentage and procedures to be followed in converting a decimal and fraction to a percentage
- concepts and calculations of ratio and proportion
- scales applicable to the axes of the graphs or charts
- types of charts and/or graphs used in the individual's field of work
- upper and lower limits of acceptability applicable to data entered on a graph or chart
- trends indicated by the slope or gradient of a graph
- action to be taken when given trends occur or set limits are approached on graphs or charts
- procedures for drawing 'lines of best fit'
- trends indicated by the graphs or charts drawn.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing computations at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Application

This unit of competency defines the skills and knowledge required to work effectively in manufacturing and engineering work situations, including planning routine work and participating in and following work health and safety (WHS) procedures. The unit applies to working either individually or in a team situation and includes contributing to work-related group activities in a manufacturing or engineering workplace.

This unit covers WHS skills associated with carrying out routine operational activities safely and in compliance with legislative and regulatory requirements.

The unit covers the skills associated with participation in quality systems, communication and cooperation with others. The unit applies to workplaces with informal or formal quality management and improvement systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

Nil.

Competency Field

Work health and safety

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|--|
| 1 | Determine job requirements | 1.1 | Identify goals, objectives and task requirements and clarify with appropriate persons, where required |
| | | 1.2 | Prioritise task requirements |
| 2 | Review and modify plan | 2.1 | Adjust timelines, priorities and other planning components to respond to contingencies, as necessary |
| | | 2.2 | Re-examine results of work activity against the plan and identify possible improvements to future performance of work tasks |
| 3 | Work effectively with others in the workplace | 3.1 | Identify own role and responsibilities and relationship to other employees, including employees performing related/interdependent activities |
| | | 3.2 | Identify supervisors and other sources of advice and assistance for own work |
| | | 3.3 | Apply effective interpersonal skills to interact with others and contribute to activities and objectives |
| | | 3.4 | Review and modify own work progress to complement the work of others |
| | | 3.5 | Report own work progress to supervisors and where required to fellow employees using standard operating procedures (SOPs) |
| 4 | Follow safe work practices | 4.1 | Check for and identify hazards in the work area before and during work |
| | | 4.2 | Follow procedures for avoiding or controlling hazards already identified in instructions, signage or other workplace communication |
| | | 4.3 | Identify and report risks and hazards not covered by procedures |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>4.4 Select, use and maintain relevant personal protective equipment (PPE) by procedures, as required</p> <p>4.5 Recognise emergency situations and take appropriate initial emergency action</p> <p>4.6 Follow procedures for responding to emergencies</p> <p>4.7 Report incidents, injuries and other WHS non-conformances according to procedures</p>
5 Work within a quality system	<p>5.1 Follow instructions and procedures and perform duties in accordance with standard operating procedures or quality system requirements</p> <p>5.2 Ensure conformance of product and process to specifications</p> <p>5.3 Report defects and non-conformance to specifications according to procedures</p> <p>5.4 Participate in process improvement procedures, where required</p>
6 Participate in workplace health and safety procedures	<p>6.1 Identify workplace health and safety policies and procedures relevant to own work and work area</p> <p>6.2 Identify relevant WHS managers and representatives for own work area</p> <p>6.3 Provide input to minimise hazards in work area in line with organisation WHS procedures and participative arrangements</p>

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Quality systems include one (1) or more of the following

- quality planning
- quality assurance
- quality control
- quality improvement procedures and processes

Task requirements include one (1) or more of the following:

- timeframe
- quality requirements
- outcome and performance requirements
- job history
- checks
- reporting requirements
- tools and equipment
- materials and parts
- supporting documents

Specifications include one (1) or more of the following:

- task lists
- instructions
- manufacturer manuals
- diagrams and schematics
- sketches
- parts lists
- SOPs

Planning includes one (1) or more of the following:

- preparing a plan to complete the task
- organising task into manageable steps including appropriate order and timing
- monitoring the progress of processes related to own responsibilities
- applying relevant WHS instructions
- collecting, sorting, recording results of work
- seeking advice and guidance on setting priorities and timeframes

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- seeking feedback from supervisor, trainer or mentor

Unit Mapping Information

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and avoiding or controlling hazards
- reporting hazards, incidents, injuries and other work health and safety (WHS) non-conformances following SOPs
- recognising and responding to emergencies following SOPs
- identifying and obtaining, instructions and information on job requirements, including one or more of the following:
 - verbal or written job instructions
 - specifications
 - SOPs
 - charts
 - lists
- identifying and responding to contingencies, including:
 - equipment breakdowns
 - non-conforming components
 - safety hazards
- recording information into proforma workplace documents, including:
 - production tally forms
 - quality control forms
 - safety incident forms
- performing assigned tasks and checking outcome of own work for conformance to specifications
- identifying own responsibilities within the workplace quality system
- giving and receiving feedback on own and group work
- seeking assistance from supervisors and mentors.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use and application of personal protective equipment
- basic quality system terminology and concept, including:
 - quality assurance
 - quality control
 - quality improvement
- procedures to be followed in performing own work
- objectives, requirements and specifications to which the individual's work is to comply
- costs and consequences of poor quality
- effective interpersonal skills:
 - effective listening
 - basic speaking skills
 - use of workplace terminology and jargon
 - giving and receiving feedback
 - checking and clarifying task-related information
 - verbal, visual and written instructions
 - appropriate modes and methods of communication
- barriers to effective communication
- sources of technical expertise/assistance
- hazards and control measures associated with workplace activities.

Assessment Conditions

- Assessors must:
 - have vocational competency in working safely and effectively in manufacturing and engineering at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Application

This unit of competency covers the skills and knowledge required to access, organise and communicate information related to production, maintenance or associated processes or tasks that apply in manufacturing, engineering or related environments.

For accessing and recording of data requiring system knowledge and judgement, Unit MEM16008 Interact with computing technology should be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

Competency Field

Communication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 **Access information**

1.1 Determine information requirements of tasks and access relevant information from a range of sources

1.2 Recognise and use workplace terminology correctly

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2 Organise and analyse information	2.1 Interpret information and organise in accordance with work requirements
	2.2 Determine relevance and implications for immediate work requirements
3 Communicate organised information using established workplace methods	3.1 Identify purpose of communication and appropriate communication method
	3.2 Communicate information using established workplace methods

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range of sources include using one (1) or more of the following:

- job instructions
- specifications
- standard operating procedures (SOPs)
- charts
- lists
- documents
- computer data
- drawings
- sketches
- tables

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- technical manuals and/or charts
- other applicable reference material

Determining relevance of information includes one (1) or more of the following:

- checking relevance of information to own work
- selecting task relevant information from a larger document or from a diagram
- preparing an opinion based on analysis of simple facts
- expressing an opinion on the cause of faults

Workplace terminology refers to one (1) or more of the following:

- equipment
- processes
- workplace areas
- staff
- procedures

Established workplace methods include using one (1) or more of the following:

- proforma reports
- data entry
- verbal
- drawings

Purpose of communication includes one (1) or more of the following:

- simple incident/non-conformance report
- maintenance request
- production records
- material usage records
- work records
- other standard workplace records

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- accessing and recording relevant information from a range of sources
- recognising and using workplace appropriate terminology
- reading, interpreting and following information in workplace documentation
- checking and clarifying information
- organising, categorising and sequencing information
- communicating using appropriate methods and procedures for a variety of situations.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- types of information relevant to the workplace and required tasks
- terminology used in the workplace relevant to own work
- available sources of information
- information analysis techniques appropriate to tasks and position
- methods of categorising and organising information including correct sequencing of information
- methods of recording and communicating information.

Assessment Conditions

- Assessors must:
 - have vocational competency in organising and communicating information at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Application

This unit of competency defines the skills and knowledge required to use a range of hand tools for a variety of general engineering applications.

This unit should not be selected if the hand tool is dedicated to a single operation or machine or when a machine-specific/customised tool is used.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Use hand tools for general engineering applications	2.1	Select hand tools appropriate to the task requirements
		2.2	Use hand tools to produce outcomes that meet job specifications
		2.3	Identify unsafe or faulty tools and mark for repair according to designated procedures before, during and after use
		2.4	Undertake routine maintenance of tools using engineering principles, tools, equipment and procedures
		2.5	Store hand tools safely in appropriate location according to procedures and manufacturers' recommendations

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hand tools include one (1) or more of the following:

- hacksaws
- hammers
- punches
- screwdrivers
- sockets
- wrenches
- scrapers
- chisels
- gouges
- wood planes
- files of all cross-sectional shapes and types
- hand held taps and dies

Applications include one (1) or more of the following:

- adjusting
- dismantling
- assembling and finishing of items or components
- finishing, cutting, scraping of metallic and non-metallic material to size and shape
- tapping/retapping and threading/rethreading new/damaged threads

Drawings include one (1) or more of the following:

- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
- work specifications that include graphic representations that do not require interpretation

Job specifications include one (1) or more of the following:

- finish
- tension
- size
- shape

Routine maintenance includes one (1) or more of the following:

- cleaning
- lubricating
- tightening
- simple tool repairs
- adjustments

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using hand tools to produce the desired outcome to job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine maintenance and cleaning of hand tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and applications of different hand tools used in a general engineering context, including hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and sizes
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools, including lubricating, tightening, simple tool repairs and adjustments using engineering principles and relevant equipment
- storage location and procedures for a range of hand tools.

Assessment Conditions

- Assessors must:
 - have vocational competency in using hand tools at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use hand tools	<p>1.1. Hand tools are selected appropriate to the task requirements.</p> <p>1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape.</p> <p>1.3. All safety requirements are adhered to before, during and after use.</p> <p>1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use.</p> <p>1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>operational procedures, principles and techniques.</p> <p>1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>A person who demonstrates competency in this unit must be able to use hand tools for a range of general engineering applications.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using hand tools or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Hand tools	Hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and types
Job specifications	Finish, tension, size or shape etc.
Routine maintenance	Cleaning, lubricating, tightening, simple tool repairs, hand sharpening and adjustments using engineering principles, tools, equipment and procedures

MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Application

This unit of competency defines the skills and knowledge required to use a range of hand held power tools and fixed power tools for hand held operations used in a variety of general engineering applications.

This unit should not be selected if the power tools used are dedicated to an operation or machine, e.g. nut-runner, air drill and power driver.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use hand tools is required unit MEM18001 Use hand tools should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011 Undertake manual handling

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Use power tools for general engineering applications	2.1	Select power tools appropriate to the task requirements
		2.2	Use power tools for a determined sequence of operations to produce desired outcomes to job specifications
		2.3	Identify unsafe or faulty tools and mark for repair before, during and after use according to SOPs
		2.4	Undertake operational maintenance of tools according to principles, techniques and SOPs
		2.5	Store power tools safely in appropriate location according to manufacturers' recommendations and SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Power tools include one (1) or more of the following:**
- electric or pneumatic/hydraulic drills
 - grinders
 - jigsaws
 - nibblers
 - cutting saws
 - sanders
 - planers
 - routers
 - pedestal drills
 - pedestal grinders
- Power tool operations include one (1) or more of the following:**
- clamping
 - alignments
 - adjustments
- Applications include one (1) or more of the following:**
- loosening and fastening items or components
 - shaping, finishing, cutting, grinding of metallic and non-metallic materials and/or tool bits to size and shape
- Drawings include one (1) or more of the following:**
- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
 - work specifications that include graphic representations that do not require interpretation
- Clamping includes one (1) or more of the following:**
- multigrips
 - vices
 - jigs and fixtures
 - clamps
- Job specifications include one (1) or more of the following:**
- finish
 - size
 - shape
- Operational maintenance includes one (1) or more of the following:**
- cleaning
 - lubricating
 - tightening

Assessment Requirements for MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using a range of hand held and fixed power tools for a variety of general engineering applications
- following designated procedures for dealing with unsafe or faulty power tools
- undertaking routine maintenance and cleaning of power tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements and cleaning of a range of power tools
- storage location and procedures of a range of power tools.

Assessment Conditions

- Assessors must:
 - have vocational competency in using power tools/hand held operations at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEMPE001A Use engineering workshop machines

Modification History

New unit - Release 1

Unit Descriptor

This unit of competency involves setting up and machining components using lathes and other machines, such as milling machines, cut off saws, pedestal grinders and fixed position drilling machines. Tooling might need to be re-sharpened but not ground up from a blank.

The settings for the machines will be calculated by the learner from given formulas, surface speeds and feed rates.

Application of the Unit

This unit is designed for use in a pre-employment skills introduction program and is suitable for use in institutional-based vocational programs. Skills development will take place under direct supervision.

This unit is not to be used in a traineeship or apprenticeship training program or associated qualifications. It is only to be used in pre-employment programs and carries no credit towards apprenticeship/trade and other qualification types in manufacturing and engineering.

This unit should be integrated with the work in the project unit, *MEMPE006A Undertake a basic engineering project*, and skills developed when required by the project.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|------------------------------|-----|---|
| 1 | Prepare a job plan | 1.1 | Identify job requirements from drawings or <i>other relevant materials</i> in consultation with an instructor/teacher/trainer |
| | | 1.2 | Identify <i>appropriate machines</i> in accordance with job requirements |
| | | 1.3 | Identify appropriate tooling in accordance with job requirements |
| | | 1.4 | Calculate cutting speeds and feeds |
| | | 1.5 | Prepare a job/project plan showing machines, tooling, cutting speeds and feeds and an appropriate sequence of operations |
| | | 1.6 | Confirm plan with instructor |
| 2 | Prepare for machining | 2.1 | Obtain appropriate tooling and materials |
| | | 2.2 | Set up tools and materials as required |
| | | 2.3 | Set speeds and feeds |
| 3 | Perform machining operations | 3.1 | Use and wear appropriate personal protective equipment |
| | | 3.2 | Follow safe machining practices |
| | | 3.3 | Machine materials to job requirements |
| | | 3.4 | Use <i>measuring equipment</i> as required |

		3.5	Store completed work in a manner which will prevent/minimise potential damage
4	Complete work requirements	4.1	Clear work area of waste and clean according to requirements
		4.2	Maintain and/or store machines, tools and equipment according to instructions

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- preparing a job plan
- preparing for machining
- performing machining
- calculating speeds and feeds
- using measuring equipment as required
- appropriately cleaning and storing of equipment
- applying safe working practices
- using and applying personal protective equipment

Required knowledge

Required knowledge includes:

- safe machine operation procedures
- material and equipment preparation requirements
- basic marking out techniques
- use and care of measuring tools
- types of machines for cutting, grinding, drilling, turning and milling
- work and tool holding methods for each machine
- safe working practices
- use and application of personal protective equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to prepare materials and use engineering workshop machines to produce engineering components.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessors must be satisfied that the candidate can:</p> <ul style="list-style-type: none"> • work safely • prepare job plans • prepare for machining • perform machining • calculate speeds and feeds • use measuring equipment as required • clean and store equipment as instructed.
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in a learning institution. • Assessment must cover the successful use of a lathe and other relevant workshop machines. • The skills covered by this unit would usually be demonstrated by an individual working alone under direct supervision. • The assessment environment should not disadvantage the candidate. • This unit may be assessed in conjunction with any other units addressing the safety, quality, communication, hand tools, machine operation, recording and reporting associated with using workshop machines.
<p>Method of assessment</p>	<ul style="list-style-type: none"> • Assessment must satisfy the endorsed Assessment Guidelines of the MEM05 Metal and Engineering Training Package. • Assessment methods must be by direct observation of tasks and include questioning on underpinning knowledge to ensure correct interpretation and application.

	<ul style="list-style-type: none"> • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances. • Assessment should be in conjunction with assessment of the project unit and other units integrated into the project.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Other relevant materials	<p>Other relevant materials may include but are not limited to:</p> <ul style="list-style-type: none"> • drawings • sketches • job instructions • schematics • diagrams • technical manuals
Appropriate machines	<p>Appropriate machines may include but are not limited to:</p> <ul style="list-style-type: none"> • milling machines • cut off saws • pedestal grinders • fixed position drilling machines • computer controlled machines

Measuring equipment	Measuring equipment may include but is not limited to: <ul style="list-style-type: none">• micrometers• vernier scaled measuring devices• rules• calipers• gauges

MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces

Modification History

Release 1. Supersedes and is equivalent to MSFFL3010 Install synthetic textile floor coverings to sports facilities.

Application

This unit describes the skills and knowledge required to install synthetic synthetic turf and needle- punch floor coverings to indoor and outdoor sporting facilities and outdoor spaces, including the preparation, cutting, laying out, joining, fixing and finishing of the synthetic textile floor covering material.

This unit applies to flooring technicians installing coverings in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

Pre-requisite Unit

N/A

Unit Sector

Flooring technology

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements and process

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>1.4 Confirm sub-floor suitability for installation consistent with Australian Standards and manufacturer recommendations</p> <p>1.5 Select suitable adhesives, trims and accessories in accordance with work requirements</p> <p>1.6 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation</p>
2. Set out materials	<p>2.1 Check synthetic floor covering material to be installed against work order and acclimatise in accordance with manufacturer recommendations</p> <p>2.2 Cut and lay required shock padding / underlays for synthetic turf floor coverings to specification</p> <p>2.3 Establish working lines and starting point</p> <p>2.4 Prepare adhesives and edge strips for use in accordance with job requirements</p>
3. Lay floor covering	<p>3.1 Identify and follow instructions and sequence for laying and fixing</p> <p>3.2 Organise and use materials for fixing in accordance with safety management requirements</p> <p>3.3 Lay out synthetic floor coverings to meet pattern and specification requirements and to minimise waste and joins</p> <p>3.4 Accurately and clearly mark synthetic floor coverings for cutting</p> <p>3.5 Cut synthetic floor coverings to length and cut joins in preparation for final laying</p> <p>3.6 Join synthetic floor coverings using adhesive and seam tape to in accordance with manufacturer instructions</p> <p>3.7 Complete required line marking in accordance with specification</p> <p>3.8 Fit and finish cover trims to required standards</p> <p>3.9 Check completed installation for flaws in installation and rectify materials and faults</p>
4. Complete housekeeping	<p>4.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>4.2 Check, clean and store tools and equipment in accordance with workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.3 Clean work area and dispose of rubbish safely 4.4 Accurately complete required workplace documentation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to MSFFL3010 Install synthetic textile floor coverings to sports facilities.

Assessment Requirements for MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces

Modification History

Release 1. Supersedes and is equivalent to MSFFL3010 Install synthetic textile floor coverings to sports facilities.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following in accordance with job requirements:
 - 1 synthetic turf grass to an outdoor installation, or recreational or sports area
 - 1 synthetic needle-punch to an indoor installation or recreational or sports area.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- synthetic floor covering installation in sport and outdoor spaces:
 - Australian Standards requirements
 - workplace safety system requirements
 - how to access manufacturer instructions
 - environmental protection and sustainability requirements
 - work flow
 - types of installation locations
 - characteristics and requirements of sub-floor preparation
 - types, characteristics, uses and limitations of:
 - synthetic textile and other floor coverings used in indoor and outdoor spaces and sporting facilities:
 - needle punch carpet
 - PVC-backed carpet
 - rubber-backed carpet
 - synthetic turf:
 - unfilled
 - sand filled
 - rubber filled
 - installation adhesives and their uses:

- plasticised and rubber resin acrylic
- solvent-based outdoor / grass adhesive
- two-part polyurethane
- water, solvent-based and solvent-free adhesives
- underlay and/or shock pads:
 - bonded foam
 - latex foam
 - rubber
 - styrene-butadiene rubber (SBR)
- other materials, including finishing trims, angles and joining tapes
- types, characteristics, safe use, maintenance and limitations of tools and equipment used during installation
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - locations requiring synthetic floor covering installation
 - synthetic floor covering
 - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
 - work orders
 - workplace procedures.

MSL913004 Plan and conduct laboratory/field work

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL913002 Plan and conduct laboratory/field work. Range of conditions removed. Assessment requirements amended. Equivalent outcome.</p>

Application

This unit of competency describes the skills and knowledge to plan and complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available guidelines and advice. Work plans may need to be modified with supervisor agreement to suit changing conditions and priorities.

This unit of competency applies to instrument operators, laboratory assistants and technical assistants working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL913002 Plan and conduct laboratory/field work. Range of conditions removed. Assessment requirements amended. Equivalent outcome.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively planned, prioritised and completed 2 laboratory/field work tasks on 2 separate occasions, including:
 - working independently
 - working in a team context.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures/guidelines for work
- ethical and professional work performance
- problem-solving strategies
- effective interpersonal communication and conflict resolution techniques
- effective team operations for groups
- strategies to maintain work flow
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- workplace procedures
- equipment and materials for relevant technical tasks.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL924003 Process and interpret data

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL924001 Process and interpret data. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to retrieve data, evaluate formulae and perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

This unit of competency applies to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Retrieve and check data	1.1 Store and retrieve data using appropriate files and/or application software
	1.2 Verify the quality of data using workplace procedures
	1.3 Rectify errors in data using workplace procedures
2 Calculate scientific quantities	2.1 Calculate statistical values for given data
	2.2 Calculate scientific quantities using given formulae and data and estimate uncertainties
	2.3 Ensure calculated quantities are consistent with estimations and expectations
	2.4 Report all calculated quantities using the appropriate units and correct number of significant figures
3 Present data	3.1 Present data in clearly labelled tables, charts and graphs
	3.2 Graph data using appropriate scales to span the range of data or display trends
	3.3 Report all data using the appropriate units and number of significant figures
4 Interpret data	4.1 Interpret significant features of tables, charts and graphs, including gradients, intercepts, maximum and minimum values, and limit lines
	4.2 Recognise and report trends in data
5 Keep accurate records	5.1 Transcribe information accurately
	5.2 Verify the accuracy of records following workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Equivalent to MSL924001 Process and interpret data, Release 1.

Links

MSL Laboratory Operations Companion Volume Implementation Guide is available from VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c63a03b-4a6b-4ae5-9560-1e3c5f462baa>

Assessment Requirements for MSL924003 Process and interpret data

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL924001 Process and interpret data. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- processed and interpreted different data sets
- calculated scientific and statistical quantities with or without a calculator or computer software, including the following items:
 - converting units involving multiples and submultiples
 - scientific notation, significant figures, round off, estimate and approximate
 - transposing and evaluating formulae
 - fractions, decimals, proportions and percentages
 - mean
 - median
 - mode
 - standard deviation
- performed at least 5 of the following calculations:
 - perimeters and angles
 - percentage and absolute uncertainties in measurements and test results
 - areas (m²) and volumes (mL, L, m³) of regular shapes, such as packaging
 - dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability
 - ratios, such as mass to mass, mass to volume and volume to volume percentages
 - concentration, such as molarity, g/100mL, mg/L, mg/L, ppm, ppb, dilution mL/L
 - average count, colonies per swab surface and cell counts, such as live and dead/total
 - process variables, such as pressure, gauge pressure, velocity and flow rates

- food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability, % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
- mechanical properties, such as stress, strain, moduli and force
- presenting accurate results in the required format (significant figures, uncertainty units)
- prepared and presented data in the at least 5 of the following formats:
 - tables
 - graphs
 - line graphs
 - histograms
 - pie charts, bar charts and control charts
 - semi-quantitative observations expressed on a scale: 1 to 4 or + to ++++
- recognised and interpreted significant points, anomalies and trends in data.

Knowledge Evidence

- There must be evidence the candidate has knowledge of:
- concepts of metrology, including:
 - that all measurements are estimates
 - repeatability, precision, accuracy and significant figures
 - sources of error, and uncertainty associated with measurement steps
 - traceability
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- workplace procedures for:
 - coding, entering, storing, retrieving and communicating data
 - verifying data and rectifying mistakes
 - maintaining and filing records, and maintaining security of data
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - data sets and records
 - a calculator
 - spreadsheets, computer software, databases and statistical packages
 - computer and relevant software or laboratory information system
 - relevant workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL933005 Maintain the laboratory/field workplace fit for purpose

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL933001 Maintain the laboratory/field workplace fit for purpose. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to clean laboratory work surfaces, clean and store laboratory equipment and monitor laboratory stocks under direct supervision.

This unit of competency applies to laboratory assistants and instrument operators working in all industry sectors. It forms a major part of the work of laboratory assistants, who work in accordance with work instructions and standard operating procedures (SOPs) which incorporate all relevant aspects of work health and safety (WHS) legislation and the codes, guidelines, regulations and Australian Standards applying to environmental hazards and dangerous goods.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL973001 Perform basic tests. Foundation skills information added. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared samples using different processes
- performed at least 3 basic tests or measurements using standard methods and procedures.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concepts of metrology, including:
 - all measurements are estimates
 - measurements belong to a population of measurements of the measured parameters
 - precision, accuracy and significant figures
 - sources of error, uncertainty and repeatability
 - traceability
- international system of units (SI)
- purpose of tests performed as part of job role and principles of the standard methods/specifications used
- sample preparation processes relevant to job role
- typical basic tests and methods relevant to job role
- measurements used for typical tests
- function of key components of the test equipment, pre-use equipment and safety checks
- sources of uncertainty in measurement and methods for control
- workplace and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations
- procedures for recognising and reporting of unexpected or unusual results
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a standard laboratory equipped with basic test equipment, common measuring instruments, materials, standard methods, workplace procedures, SDS and equipment manuals.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973016 Perform aseptic techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL973004 Perform aseptic techniques. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to perform aseptic techniques to maintain the integrity of both the sample source and the sample. It applies to sampling techniques in tissue culture and to generic microbiological procedures.

This unit of competency applies to laboratory assistants and technicians working in the field or laboratory in the biomedical, biological, food processing and environmental industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Assessment Requirements for MSL973016 Perform aseptic techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL973004 Perform aseptic techniques. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely and effectively performed aseptic techniques when performing at least 3 different types of sample transfers from the following list:
 - body fluids (or simulated body fluids)
 - sterile liquid culture media
 - water
 - soil
 - sterile pharmaceuticals
 - yeasts and moulds
 - milk and yoghurt
 - swabs and smears
 - propagation tissue
 - plant material
 - fermented foods
 - fermented beverages
 - bacterial cultures.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- growth requirements of microorganisms including bacteria and fungi in terms of their laboratory culture

- relationship between sterile practices, hygiene procedures and the ability to obtain growth free of contamination
- relationship between sterile practices and accurate test results
- importance of pure culture techniques and aseptic transfer to the successful microbiological investigation and correct interpretation of laboratory results
- cleaning and sanitising requirements of equipment and work area, and effects of physical and chemical agents on microbial growth and death
- sterilisation techniques:
 - flaming
 - high temperature, boiling and autoclaving
 - membrane filtration
 - radiation, gas and/or chemical treatments
- disinfection and sterilisation procedures used in the collection, processing and safe disposal of samples and materials
- principles of infection control related to work health and safety (WHS), and sampling and transfer of materials in microbiological investigations including how to minimise the generation of aerosols when flaming
- relevant hazards and how to deal with the risks presented:
 - injuries from sharps, burners, molten agar
 - ultraviolet (UV) light sources
 - exposure to hazardous substances and/or infectious agents
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and WHS requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a standard laboratory
 - test samples
 - appropriate equipment, including:
 - transfer equipment, such as inoculating loops, pipettes (quantitative and qualitative), flasks, tubes and spatulas
 - Sterilisation equipment such as bunsen burners, bench incinerators, autoclave and/or pressure cooker
 - Storage equipment such as incubators, water baths, refrigerators, freezers, anaerobic jars as required
 - laminar flow units or biohazard cabinets as required
 - swabs
 - appropriate materials, including:

- solid and/or liquid media
- disinfecting and sterilising agents
- consumables
- receptacles for safe disposal of wastes and for processing of reusable materials
- bar coding material and labels
- workplace schedules, procedures and standard methods, SDS and documented safe work practices.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL974021 Perform biological procedures

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL974006 Perform biological procedures. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to interpret work requirements, prepare samples, and perform routine biological procedures. These procedures may involve several steps and are used to classify organisms and biologically active compounds by analysing their biological and/or chemical characteristics. This unit includes interpretation of results and troubleshooting obvious departures from standard procedures.

This unit of competency applies to technical assistants working in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Interpret and schedule work requirements	<p>1.1 Review work request to identify samples, required procedures and materials/equipment/instruments involved</p> <p>1.2 Identify hazards and workplace control measures associated with the sample, preparation methods, reagents and/or equipment</p> <p>1.3 Plan parallel work sequences to optimise throughput of multiple sets of samples</p>
2 Receive and prepare biological samples	<p>2.1 Log samples using standard operating procedures (SOPs)</p> <p>2.2 Record sample description, compare with specification and note and report discrepancies</p> <p>2.3 Prepare samples in accordance with testing requirements</p>
3 Perform techniques that assist in the classification of organisms	<p>3.1 Identify characteristics used to classify organisms</p> <p>3.2 Use dichotomous keys to identify organisms</p>
4 Perform biological procedures	<p>4.1 Set up and use equipment and reagents in accordance with the method</p> <p>4.2 Perform techniques in accordance with the standard operating procedures</p>
5 Maintain a safe work environment	<p>5.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel</p> <p>5.2 Minimise the generation of waste</p> <p>5.3 Safely dispose of biohazardous wastes</p>

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

5.4 Clean, care for and store equipment and reagents as required

6 Maintain laboratory records

6.1 Record entries on report forms or into a laboratory information management system, accurately calculating, recording or transcribing data as required

6.2 Ensure traceability of sample from receipt to reporting of results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL974021 Perform biological procedures

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL974006 Perform biological procedures. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- classify 2 organisms from 2 different kingdoms to species level using a dichotomous approach
- safely and accurately performed 3 multistep biological procedures, using a minimum of 2 different techniques from the following list:
 - multistep staining:
 - haematological
 - histological
 - microbiological
 - preparation and examination of samples to demonstrate mitosis microscopically
 - preparation and enumeration of microscopic samples
 - colorimetry
 - spectrophotometry
 - chromatography
 - electrophoresis
 - electrochemistry
 - multistep molecular technique
 - multistep immunological technique.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- biological principles and concepts underpinning tests and procedures associated with job role:
 - basic classification and taxonomy of organisms including prokaryotes and eukaryotes, bacteria, viruses, fungi, plants, animals, parasites and prions
 - interrelationships of biological systems including the carbon cycle and energy cycle
 - basic structure and function of a plant and animal cell and the respective organelles (plant and animal)
 - cell membrane activity, including diffusion (passive, facilitated and active), osmosis, tonicity and plasmolysis
 - plant and animal tissue types
 - phases of the cell cycle including phases of mitosis
 - mendelian genetics including inheritance, meiosis, karyotypes, dominant and recessive traits, genotypes, phenotypes, and pedigrees
 - basic structure and function of chromosomes, nucleic acids and proteins
 - chemical and physical characteristics of organic molecules
 - basic structure and function of including carbohydrates, fats and amino acids
 - basic role of biological significance of ions, including calcium, iron, magnesium, sodium, potassium, chloride and phosphate
- purpose of procedures implemented (why they are used and what they demonstrate)
- calculation steps to give results in appropriate units and precision
- importance and appropriate use of controls and certified reference materials
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all clinical information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a standard laboratory equipped with appropriate test equipment and instruments, safety equipment, reagents and materials
 - standard operating procedures (SOPs) and testing methods
 - records, including:
 - test calibration results
 - equipment use, maintenance and servicing history
 - faulty or unsafe equipment
 - batch number, catalogue number and use-by-date for analytical kits.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL974025 Prepare tissue and cell cultures

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL974011 Prepare tissue and cell cultures. Foundation skill information added. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to prepare primary tissue cultures for applications, such as maintenance of animal cell lines and propagation of plants by tissue culture, and basic subculture procedures. Personnel are required to manipulate equipment and materials and samples to prevent contamination at all preparation stages. They will have ready access to workplace procedures and will work under direct supervision.

This unit applies to technical assistants working in laboratories in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL973016 Perform aseptic techniques

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| <p>1 Work safely according to the legal and regulatory framework</p> | <p>1.1 Identify hazards and workplace controls associated with the sample, preparation methods, reagents and equipment</p> <p>1.2 Select, fit and use personal protective equipment (PPE)</p> <p>1.3 Address hazards and incidents as they arise</p> <p>1.4 Maintain a chain of custody, traceable to the worker, for all cells and tissues</p> |
| <p>2 Prepare and test cell and tissue culture media</p> | <p>2.1 Select and confirm media specifications and processes/methods</p> <p>2.2 Prepare culture media to suit the application</p> <p>2.3 Sterilise culture media and check for sterility</p> <p>2.4 Perform quality control checks to ensure that culture media is fit for purpose</p> <p>2.5 Store culture media in accordance with specifications</p> |
| <p>3 Prepare tissue or cell cultures</p> | <p>3.1 Select tissue/cell sample to optimise growth and prepare it for culture</p> <p>3.2 Add specified growth agents and/or nutrients</p> <p>3.3 Inoculate culture medium using aseptic techniques</p> |
| <p>4 Monitor tissue or cell culture</p> | <p>4.1 Incubate culture in specified conditions</p> <p>4.2 Monitor growth of culture and record appearance and characteristics</p> <p>4.3 Report presence or absence of contamination</p> |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.4 Subculture the culture to continue the cell line
	4.5 Dispose of biohazardous and other laboratory waste safely
5 Maintain records	5.1 Maintain records of batches of media
	5.2 Complete records of tissue cultures so that they are retrievable, legible and accurate
	5.3 Complete records in accordance with information management, records, quality system and legal requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Learning skills to:
 - monitor cell growth, check growth rates and recognise problems, such as contamination of media by bacteria (e.g. Mycoplasma), fungi and other plant or animal tissue
 - identify expected cell types and recognise normal and abnormal cells using an inverted microscope.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL974011 Prepare tissue and cell cultures, Release 1.

Links

MSL Laboratory Operations Companion Volume Implementation Guide is available from VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c63a03b-4a6b-4ae5-9560-1e3c5f462baa>

Assessment Requirements for MSL974025 Prepare tissue and cell cultures

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL974011 Prepare tissue and cell cultures. Foundation skill information added. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely preparing at least 3 different primary tissue/cell cultures that are free of contamination using tissue/cell culture and basic subculture procedures, including:
 - manipulating equipment and materials and samples to prevent contamination at all preparation stages
 - performing routine maintenance and checks on raw materials and consumables, including use-by-date, possible contamination and storage conditions
 - growing cell lines and tissue to specifications without contaminating the original sample and the environment.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic classes and classification of culturable material including microorganisms, plant/animal cells and tissue
- structure and function of plant/animal cells and organelles
- cell structure, physiology and processes, including simple and facilitated diffusion, plasmolysis, osmosis, tonicity, active transport, energy production, mitosis, motility, phagocytosis and pinocytosis
- concepts and principles of cell growth, including the need for nutrients, the role of growth regulators and the removal of wastes
- types and sources of contamination
- importance of strict aseptic techniques and cleaning procedures
- common applications of plant tissue/cell culture
- common applications of animal tissue/cell culture

- typical methods for sterilisation and disposal of biohazardous:
 - steam and high-pressure air or steam
 - boiling, microwaving and autoclaving
 - filtration
 - gas, chemical and radiation
- typical methods to preparing a primary culture
- suitable culture conditions
- subculture
- quality control checks and quality assurance procedures
- standard methods for preparing culture media, and operation and maintenance manuals for automated media preparation equipment
- workplace and/or legal traceability requirements
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a laboratory equipped with appropriate equipment, samples, cell lines and reagents
 - tissue culture equipment and facilities, including:
 - growth cabinets
 - culture vessels, growth chambers, sterile containers, culture plates, flasks and bottles
 - autoclaves
 - positive filtration apparatus
 - auto pipettes and pipette pumps
 - cell counting chambers and a haemocytometer
 - incubators, including specialised atmosphere carbon dioxide
 - binocular light inverted microscopes
 - centrifuges
 - workplace procedures and standard methods.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL975033 Perform tissue and cell culture techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to <i>MSL975013 Perform tissue and cell culture techniques</i>. Changed prerequisites. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to prepare, maintain and preserve cells and cell lines for a variety of applications, such as large scale culture, production of monoclonal antibodies, production of viral vaccines and amniocentesis studies. Personnel are required to optimise equipment set-up, media and growth techniques. They are required to detect and investigate contamination and take preventative and/or corrective actions under supervision.

This unit applies to laboratory technicians and technical officers working in laboratories in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL973016 Perform aseptic techniques

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Interpret and schedule production requirements	<p>1.1 Review client request and confirm quantity and nature of cells, tissue or products</p> <p>1.2 Select appropriate media, materials, equipment and methods</p> <p>1.3 Plan parallel work sequences to optimise production</p> <p>1.4 Maintain a chain of custody, traceable to the worker, for all cells and tissues</p>
2	Work safely according to the legal and regulatory framework	<p>2.1 Identify hazards and workplace control measures associated with the sample, preparation methods, reagents and equipment</p> <p>2.2 Select, fit and use personal protective equipment (PPE)</p> <p>2.3 Address hazards and incidents as they arise</p> <p>2.4 Safely dispose of biohazardous materials and other laboratory waste</p>
3	Assemble and maintain tissue culture equipment	<p>3.1 Assemble, sterilise or decontaminate equipment according to workplace procedures</p> <p>3.2 Perform pre-use and safety checks in accordance with relevant workplace and operating procedures</p> <p>3.3 Identify faulty or unsafe components and equipment and report to appropriate personnel</p> <p>3.4 Decontaminate area and equipment after use</p>
4	Prepare and test cell and tissue culture media	<p>4.1 Confirm media specifications and processes/methods</p> <p>4.2 Prepare culture media to suit client request</p> <p>4.3 Sterilise culture media and check for sterility</p>

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.4	Perform quality control checks to ensure that culture media is fit for purpose
	4.5	Store culture media in accordance with specifications
5 Obtain, monitor and maintain tissue and cell lines	5.1	Retrieve/obtain the cell lines or tissue sample from fresh or preserved sources and prepare a culture
	5.2	Select specified culture media and add any necessary growth agents or nutrients
	5.3	Incubate cells/tissue in specified conditions
	5.4	Inoculate the media with the specified amount of sample
	5.5	Monitor growth of tissue and cell lines and products
	5.6	Detect contamination/abnormalities and troubleshoot materials, equipment and techniques
	5.7	Passage samples by subculturing to preserve or grow the line
	5.8	Harvest cells or cell products to optimise yields
6 Preserve cells and tissues	6.1	Select the appropriate preservation method
	6.2	Preserve the cell lines or tissue in accordance with the method
	6.3	Check preserved cell lines regularly to ensure viability is maintained
7 Maintain records	7.1	Maintain records of batches of media
	7.2	Maintain records of active and stored tissue and cell lines
	7.3	Complete records so that they are retrievable, legible and accurate

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 7.4 Ensure records conform to the information management, records, quality system and legal requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Equivalent to MSL975013 Perform tissue and cell culture techniques, Release 1.

Assessment Requirements for MSL975033 Perform tissue and cell culture techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to <i>MSL975013 Perform tissue and cell culture techniques</i>. Changed prerequisites. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely prepared and maintained 3 different cell cultures to preserve cells and cell lines that are fit for purpose without contaminating the original sample, including:
 - passaging cell cultures by subculturing
 - preserving cell lines by freezing and cryopreservation
- confirmed the identity of the cell lines and identified abnormalities/contamination if present
- maintained accurate, traceable records of cell lines and tissues and logs of procedures and work completed.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- terminology, including cell lines, growth media, primary culture, passaging, passage number, subculture, anchorage dependent cells, suspension culture, monolayer, confluent, cell line, cell strain, contact inhibition, diploid and viability
- cell biology, including structure, physiology, function, physiological cell growth requirements, nutrient requirements, respiration, temperature and growth cycle
- general purpose of cell lines
- normal and abnormal cell morphology
- critical components of the cell environment and their effects on cell growth, including pH, temperature, buffering, atmosphere, osmotic pressure, osmolarity and viscosity
- types of tissue/cells used as source material

- techniques for characterising a cell line
- selection criteria for media, materials and equipment, including:
 - costs
 - ease of cleaning or sterilisation
 - maintenance of cell growth
- the differences between finite and continuous cell lines
- characteristics of cell culture media and substrates
- nature of substrates including solid, semi-solid, gel or sponge, glass, disposable plastics and three-dimensional matrices
- chemical treatment techniques for pre-treating substrates relevant to the job role
- role of common ingredients in media including salts, carbohydrates, amino acids, vitamins, growth factors, serum and antimicrobial
- contaminants, including endotoxins, bacteria, yeast, fungi and mycoplasma
- typical requirements, problems and procedures associated with the production of specific cell lines relevant to the job role
- tissue culture and continuous culture systems
- methods to prepare primary cultures
- principles and purpose of techniques implemented
- methods to monitor growth of tissue and cell lines
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all client information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - laboratory equipped with appropriate tissue culture equipment and facilities, test equipment, instruments, standards and reagents
 - workplace procedures and standard methods, test results and records.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL975045 Perform laboratory-based ecological techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL975017 Perform laboratory-based ecological techniques. Changes to elements and performance criteria. Foundation skills information added. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to participate in laboratory investigations involving animals, plants and related environmental parameters. The animals or plants might be single specimens, parts of specimens or be in culture or under propagation. The investigations might also be part of experimental models that examine interactions of animals and/or plants and their environments. Investigations would generally relate to taxonomy, physiology and pathology, and would be oriented to scientific research, food production and manufacture, and to investigation of biological environments and ecosystems.

This unit applies to laboratory technicians and technical officers working in biological, biotechnology and environmental industry sectors. It is expected that all work would conform to statutory and work health and safety (WHS) codes of practice. This unit of competency assumes that personnel perform tests and procedures under the close supervision of scientific staff and that the workplace will equip its workers with relevant animal handling skills should they be required. The unit does not cover procedures related to the handling of vertebrates that are subject to national and state/territory animal care and ethics regulations.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL974021 Perform biological procedures

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Process specimens and documentation	<p>1.1 Identify specimens and request forms that do not comply with minimum industry requirements for labelling, identification and test requests</p> <p>1.2 Record any discrepancies and indicate what action is required</p> <p>1.3 Log samples, recording details that allow accurate tracking and chain of custody</p>
2	Participate in the identification and classification of species	<p>2.1 Record macroscopic and/or microscopic details of specimens to assist in their identification and classification</p> <p>2.2 Use taxonomic keys to assist in the identification and classification of species</p> <p>2.3 Perform laboratory analyses that can assist in identification and classification of species</p> <p>2.4 Preserve specimens for future reference</p> <p>2.5 Label preserved specimens for storage and reliable retrieval from collections</p>
3	Maintain viability and integrity of specimens during experimentation	<p>3.1 Provide nutrients and environments to maintain viability of individual specimens and organisms being cultured or propagated</p> <p>3.2 Perform procedures and analyses to monitor the experimental environment</p> <p>3.3 Perform procedures and analyses to monitor the physiology of organisms in the experimental environment</p>

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>3.4 Adjust nutrient requirements and environmental conditions as indicated by monitoring data</p> <p>3.5 Report (to supervisors) data and phenomena that may risk viability of individual specimens or cultures</p> <p>3.6 Report (to supervisors) data and phenomena that are incompatible with the experimental design parameters</p>
4 Integrate laboratory and field data	<p>4.1 Locate field data relevant to the study or experiment</p> <p>4.2 Match field and laboratory data codes for tracking, reporting and chain of custody requirements</p> <p>4.3 Log field and laboratory data into information systems</p> <p>4.4 Assist with writing reports of experiments and related field studies</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Oral communication skills to interact effectively and use appropriate scientific terminology and technical concepts to report data and phenomena that may risk viability of individual specimens or cultures, or are incompatible with the experimental design parameters.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL975017 Perform laboratory-based ecological techniques, Release 1.

Assessment Requirements for MSL975045 Perform laboratory-based ecological techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL975017 Perform laboratory-based ecological techniques. Changes to elements and performance criteria. Foundation skills information added. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively identified and classified at least 5 different animal and plant species for scientific and experimental purposes
- processed, labelled, preserved and stored at least 5 different kinds of specimens, taking care not to contaminate sterile environments or specimens
- performed procedures and analyses to monitor the physiology of 5 different organisms/specimens in the experimental environment and maintained their viability.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- growth requirements of organisms that are subjects of laboratory or greenhouse culture or propagation relevant to job role
- general anatomy of plants and animals that is useful as classification data
- processes that are essential for preservation of plant and animal material for use as reference material
- relationships between field and laboratory data that are useful in giving commentary on the integrity or distress in biological environments
- rationale for selection of techniques used to monitor the experimental environment and the effects of variables on organisms in the experimental environment
- uses of environmental impact statements that incorporate the results of field and laboratory analyses
- workplace and/or legal traceability requirements
- awareness of environmental sustainability issues as they relate to the work task

- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all client information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - equipment and resources for investigating the physiology of plants and animals in the laboratory
 - workplace procedures, sampling plans, test methods and equipment manuals
 - computers and programs for simulated experiments or data analysis
 - items of equipment, reagents, specimens and systems for botanical and zoological techniques
 - laboratory information management systems (LIMS), databases, record and filing systems, including specimen accessioning.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMSUP280 Manage conflict at work

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Application

This unit of competency covers the skills and knowledge required to manage conflict in a range of personal conflict situations.

This unit of competency applies to personnel who are required to liaise and cooperate with other members of the team and to work towards finding common ground and opportunities for problem resolution. It applies to any interactions in the workplace, including interactions between co-workers, between staff and customer/client, and between staff and supervisor.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- 1 **Identify potential sources of conflict**
 - 1.1 Identify actions which are likely to promote a reaction in others
 - 1.2 Assess the other person's needs and/or concerns
 - 1.3 Assess own ability to respond to the other person's needs
 - 1.4 Recognise possible causes of conflict
 - 1.5 Identify potential conflict situations

- 2 **Identify range of alternative approaches**
 - 2.1 Discuss with the other person their needs and concerns
 - 2.2 Identify own needs and concerns and discuss with other person
 - 2.3 Identify possible approaches through which the needs and concerns of both may be met
 - 2.4 Develop a range of alternative approaches for achieving goals

- 3 **Resolve conflicts**
 - 3.1 Identify areas of common ground or objectives that can be mutually supported
 - 3.2 Agree on an approach which will meet the majority of objectives for both parties
 - 3.3 Implement the approach
 - 3.4 Check that the agreed requirements are being met and that conflict has been resolved

- 4 **Respond to problems**
 - 4.1 Identify possible problems in the conflict management process
 - 4.2 Determine problems needing action
 - 4.3 Determine possible causes
 - 4.4 Rectify problem using appropriate solution within area

- of responsibility
- 4.5 Follow through items initiated until final resolution has occurred
 - 4.6 Report problems outside area of responsibility to designated person

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Conflict Conflict in the context of this unit refers to interpersonal conflict and may arise in any work-related context.

Potential sources of conflict Potential sources of conflict include conflicts arising from one or more of the following:

- different learning/problem solving styles
- different work or personal priorities
- different personality styles
- conflicting key performance indicators (KPIs), work goals or targets
- different social, cultural, religious or ethnic background or different gender or sexual preference
- different interpretation of requirements or 'the rules'

Approaches to resolving conflict

Approaches to resolving conflict will be based on direct communication and include one or more of the following:

- informal, face-to-face discussions
- formal/structured face-to-face discussions
- through the use of:
 - telephones and two-way radios
 - memos, faxes, letters or emails

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- anger or aggression arising from industrial relations matters
- disagreements over processes or work practices
- variations in opinions about circumstances or events
- interpersonal disputes arising from changes in personal circumstances

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

Assessment Requirements for MSMSUP280 Manage conflict at work

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Performance Evidence

- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:
- recognise situations, actions and verbal and non-verbal communication that indicate potential or actual conflict
- communicate about needs and concerns of self and others and areas of common ground using:
 - appropriate verbal and non-verbal communication
 - statements that focus on issues and facts, not people and personalities
 - accurate reflection of people's needs and concerns
- implement conflict resolution approach and monitor its success
- apply known solutions to routine problems

manage conflict as it arises.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- likely sources of conflict in own job/workplace
- indicators of potential conflict
- communication approaches to resolving conflict
- conflict resolution skills relevant to own job/workplace.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will use one or a combination of:
 - totally off the job, in which case it will use case studies and role plays as well as questions
 - evidence drawn totally from performance in the workplace

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSS024020 Recognise common geological landforms and samples

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to recognise common geological landforms and relate these to basic geological processes and other ecosystem components. Personnel are also expected to obtain near surface samples of common rocks, minerals and soils and identify them using classification tables and charts.

This unit applies to environmental technicians working in a range of industry sectors, such as environmental services; environmental compliance, auditing and inspection; groundwater and clean water; solid and hazardous waste management; management of contaminated sites; site remediation or rehabilitation; geotechnical services and civil engineering; natural resource management.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Sampling and testing

Unit Sector

Environmental

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---------------------------------|-----|--|
| 1 Prepare for field work | 1.1 | Review job request to identify the equipment involved, samples to be collected and test methods |
| | 1.2 | Identify hazards and read workplace safe work procedures associated with the site, samples, test |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. methods and equipment used
	1.3 Confirm site location, access, timing and any client requirements
	1.4 Assemble all required equipment and materials and check that they are fit for purpose
	1.5 Stow equipment and materials to ensure their safe transport
	1.6 Arrange transport to site
	1.7 Liaise with appropriate personnel on arrival at site to ensure safety and minimise disruption to others
2 Recognise geological structures and processes	2.1 Recognise common landforms and relate these to geological processes
	2.2 Read and interpret simple geological maps, diagrams and aerial photos
	2.3 Apply principles of geological processes and the geological timescale to explain the formation and occurrence of common rocks, minerals, soils and aquifers
3 Identify common rocks and minerals	3.1 Sort handheld specimens of common sedimentary, igneous and metamorphic rocks by observing their textural, structural and mineralogical properties
	3.2 Identify handheld specimens of common rocks and minerals by comparing their physical properties with classification charts and tables
4 Identify common soil types and their properties	4.1 Obtain soil samples using specified sampling equipment and methods
	4.2 Examine soil colour, texture and properties of soil components to classify common soils

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.3 Identify and describe simple soil profiles at field sites
	4.4 Recognise influences of rock type, drainage, age and climate on development of soil profiles
	4.5 Recognise common forms of soil degradation
5 Relate local geology to flora and fauna and land use	5.1 Apply the basic relationships between parent material, climate, topography, soils and living ecosystem components to interpret sites
	5.2 Recognise how local geology can influence the revegetation or rehabilitation of sites
6 Maintain a safe work environment	6.1 Use safe work procedures and protective equipment to ensure personal safety and that of others
	6.2 Minimise environmental impacts of sampling and/or testing and generation of waste
	6.3 Collect and/or dispose of all waste in accordance with environmental and quarantine requirements and workplace procedures
7 Report data and finalise documentation	7.1 Report field data in the required formats and expected timeframe
	7.2 Complete all required documentation
	7.3 Maintain the security and confidentiality of data and documentation in accordance with workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for MSS024020 Recognise common geological landforms and samples

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- recognised and accurately described the geological landforms and associated geological processes for at least 2 different sites
- identified and accurately described the common rocks, minerals and soil types associated with at least 2 different sites.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- an overview of major fields of geology
- structure of the earth's core, crust and major components
- geomorphology and landforms, including agents of erosion and transportation, stability of rocks and minerals in different environments and depositional processes
- regolith, including physical and chemical weathering, climactic effects, stability of minerals, weathering processes, soil formation, common soil types and composition
- rock cycle
- fundamentals of:
 - igneous rocks, including origin of magma, movement of magma, volcanic, plutonic, types of volcanoes and simple tectonic setting
 - sedimentary rocks, including clastic, chemical, organic types, grain size and composition, sorting, roundness, lithification, sedimentary structures and environments of deposition
 - metamorphic rocks, including regional, contact, dynamic metamorphic zones, rock textures and fabrics
- structural geology concepts including: folds, faults, tilts and uplifts
- overview of geological time, including eras, periods, relative time, stratigraphic methods for establishing relative ages of strata, and radiometric dating
- fundamentals of palaeontology, including preservation of fossils and their role in dating strata
- links between local geology, climate, topography and living components of ecosystems
- equipment

- geological sampling and in-field test methods routinely used in job role, including:
 - pre-use checks and safe operating procedures for sampling and test equipment
 - sampling procedures
 - purpose, principles and measurement steps of test
 - calculation steps to give results
 - expected values for sample type
- hazards; health, safety and environment requirements for work role.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
 - access to sites and vehicle transport
 - suitable survey, sampling and testing equipment
 - documentation including: maps and aerial photos; classification charts and tables for rocks, minerals and soils; user manuals, workplace safety procedures, test or survey methods, workplace procedures governing geological sampling and in-field testing

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS025014 Perform sampling and testing of contaminated sites

Modification History

Release 1. Supersedes and is equivalent to MSS025014A Perform sampling and testing of contaminated sites.

Release 2. Prerequisite code updated. Equivalent outcome.

Application

This unit of competency covers the ability to collect samples and conduct field tests/measurements while working safely in a (potentially) hazardous environment. Personnel work under the close supervision of environmental scientists or engineers and use established site health and safety plans and sampling/field testing procedures. They are required to continually monitor levels of risk and use prescribed safe working procedures and safety equipment.

This unit of competency is applicable to environmental technicians in a range of industry sectors, such as environmental services (e.g. sampling and monitoring of air quality, water and soil); environmental compliance, auditing and inspection; management of pollution and contaminated sites; and site remediation or rehabilitation.

While no specific licensing or certification requirements apply to this unit at the time of publication, environmental monitoring and management activities are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

MSS024020 Recognise common geological landforms and samples

Competency Field

Sampling and testing

Unit Sector

Environmental

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 Assist with preliminary site study	<p>1.1 Locate and review relevant legislative, regulatory and/or planning requirements and register for contaminated sites.</p> <p>1.2 Confirm the site location, scope and purpose of the investigation and assigned tasks with supervisor.</p> <p>1.3 Source and review available site data, including site history, geology, hydrogeology and meteorology data.</p> <p>1.4 Summarise information to assist with preparation of a site chronology and identification of gaps or inadequacies in data, potential contaminants and areas of possible contamination.</p>
2 Prepare for site activities	<p>2.1 Confirm the scope and purpose of sampling, testing and/or monitoring activities and data requirements with supervisor.</p> <p>2.2 Liaise with site controller to access site, identify locations of services and arrange for induction, clearances and/or permits, as necessary.</p> <p>2.3 Review risks posed by site contaminants and review the health and safety plan/safe work procedures specified for planned activities.</p> <p>2.4 Confirm the sampling/test methods, sampling/test points, numbers and types of samples and/or measurements with supervisor.</p> <p>2.5 Review specified sampling/test methods with close attention to the sequence of steps and details for each.</p> <p>2.6 Check the operation/calibration of required sampling equipment, test and/or monitoring instruments in accordance with relevant methods, standards and manufacturer instructions.</p> <p>2.7 Ensure all required reagents, solutions and/or calibration standards are obtained and ready for field use.</p> <p>2.8 Assemble and safely stow all sampling equipment, test instruments, materials, containers, safety equipment and personal protective equipment (PPE).</p>

- 2.9 Arrange suitable transport to, from and around site, as required.
- 3 **Assist with site inspection**
- 3.1 Sketch, map and/or photograph the site features.
- 3.2 Conduct a visual inspection to identify site features that may inform the need for and design of subsequent investigations.
- 3.3 Collect preliminary samples, as directed, to help characterise possible contamination hazards prior to detailed investigations.
- 4 **Conduct sampling as directed**
- 4.1 Locate sampling/test points and any services at the site.
- 4.2 Work effectively with other site personnel during drilling excavation and/or survey operations to collect reliable samples, logs and measurements, as necessary.
- 4.3 Follow specified procedures to minimise hazards and/or contamination of samples, self/others, equipment and environment.
- 4.4 Collect and preserve required samples in accordance with sampling plan, relevant methods and/or standards.
- 4.5 Record all information and label samples in accordance with traceability requirements.
- 4.6 Record environmental conditions and/or atypical observations made during sampling that may impact on validity or integrity of samples.
- 4.7 Store and transport all samples back to base in accordance with specified method, chain of custody requirements and relevant codes.
- 5 **Conduct field tests and/or monitoring as directed**
- 5.1 Obtain sample or sub-sample for designated field test.
- 5.2 Check that all equipment, instruments, reagents and calibration standards are fit for purpose.
- 5.3 Set up and calibrate instruments as necessary to ensure

- safe operation and valid results.
- 5.4 Operate equipment/instruments in accordance with test method requirements.
- 5.5 Follow specified procedures to minimise hazards and/or contamination of samples, self/others, equipment and environment.
- 5.6 Perform required measurements and tests on all samples and standards, if appropriate, in accordance with specified methods.
- 5.7 Keep accurate, complete and traceable records of all field observations and test results.
- 6 **Clean, decontaminate and/or dispose of contaminated equipment and materials**
- 6.1 Inspect equipment to assess the degree of contamination.
- 6.2 Use specified procedures to remove material from the exposed outer surfaces of sampling/test equipment and PPE.
- 6.3 Use specified procedures and reagents to neutralise, wash and/or rinse exposed surfaces.
- 6.4 Collect rinsate blanks for analysis and preserve/store in accordance with specified procedure or standard.
- 6.5 Stow items for transport only when thoroughly dry.
- 6.6 Safely collect all debris and sillage from decontamination in accordance with relevant regulations and codes.
- 7 **Finalise site activities**
- 7.1 Arrange for the safe disposal of all hazardous wastes in accordance with relevant regulations and codes.
- 7.2 Ensure all site observations, sampling/test data and results are accurately transferred to the workplace information management system.
- 7.3 Store samples in accordance with method, chain of custody requirements and relevant codes, as necessary.
- 7.4 Ensure samples are dispatched for analytical testing within recommended holding times.

- | | | | |
|---|---|-----|---|
| 8 | Process and interpret data | 8.1 | Review test/monitoring data noting atypical observations. |
| | | 8.2 | Calculate required quantities using relevant test method and ensure values are consistent with expectations. |
| | | 8.3 | Estimate and document uncertainty of measurement in accordance with workplace procedures, if required. |
| | | 8.4 | Record processed results in accordance with workplace procedures. |
| | | 8.5 | Interpret trends in data and/or results and report atypical results promptly to appropriate personnel. |
| | | 8.6 | Determine if obvious procedure or equipment problems have led to atypical data or results. |
| | | 8.7 | Compare results with established threshold levels or environmental quality concentration limits, if relevant. |
| | | 8.8 | Finalise reporting of results in accordance with workplace requirement. |
| | | | |
| 9 | Maintain a safe work environment | 9.1 | Clean all equipment, containers, work area and vehicles according to workplace procedures. |
| | | 9.2 | Check serviceability of all equipment before storage. |
| | | 9.3 | Use defined safe work practices and PPE to ensure personal safety and that of others. |
| | | 9.4 | Minimise the generation of wastes and environment impacts. |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Legislation, regulations, standards, codes, workplace procedures and requirements include the latest version of one or more of:

- federal legislation, such as the Environment Protection and Biodiversity Conservation Act
- state/territory government legislation and local government by-laws, policies, regulations and plans dealing with land use, acquisition, planning and protection; environmental protection and impact assessment; and pollution and contaminated sites
- legislation, standards and codes of practice for work health and safety (WHS)
- registration/licensing and/or accreditation requirements
- Australian and international standards covering environmental management (e.g. AS ISO 14050 Environmental management – Vocabulary and AS/NZS ISO 14000 Basic Set:2007 Environmental Management Basic Set); investigation and sampling of sites with potentially contaminated soil (e.g. AS 4482.1-2005 Guide to the investigation and sampling of sites with potentially contaminated soil - Non-volatile and semi-volatile compounds, and AS 4482.2-1999 Guide to the sampling and investigation of potentially contaminated soil - Volatile substances)
- industry guidelines such as: National Environment Protection Measure Assessment of Site Contamination - Schedule B (2) Guideline on data collection, sample design and reporting
- site plans, maps and specifications; methods and procedures for sampling and in-field testing to meet workplace, client and/or regulatory/certifying body requirements; client sampling schemes and sampling plans
- workplace documents, such as standard operating procedures (SOPs); work schedules; recording and reporting procedures; equipment manuals and warranties; supplier catalogue and handbooks; safety data sheets (SDS) and safety procedures; waste minimisation, containment, processing and safe disposal procedures.

Site information includes one or more of:

- location of site, property details, and current and proposed use
- site history details, such as:
 - site plans, zoning and adjacent land use
 - current and previous present owners, occupiers, users and contaminating uses/activities
 - current and previous buildings and structures

- site industrial processes, raw materials, products, wastes/discharges and waste disposal locations
- product spills/losses, incidents and accidents
- sewer and other utilities/services, plans and previous power sources
- chemical storage and transfer areas
- earth moving activities
- interviews, consultations and complaints.

Sources of information include one or more of:

- government departments, such as Environment, Environmental Protection, Conservation, Primary Industry, Water Resources, Lands and Survey, and Planning
- agencies, such as the Bureau of Meteorology and Geoscience Australia
- libraries and environmental data sets
- companies and employees, community representatives and historical societies.

Visual inspection of the site includes one or more of:

- current uses of site
- disturbed, coloured or stained soil, and bare soil patches
- disturbed or distressed vegetation
- unusual odour
- quality of surface water and surface water drainage
- condition of buildings, floors and roads
- presence of chemical containers and holding tanks
- presence of fill, containment areas, sumps, drains, landfill, and obvious surface hazards, such as asbestos
- underground structures that may be associated with sub-surface contamination
- condition of materials storage/handling facilities, and solid/liquid waste disposal areas
- evidence of off-site migration, on-site spillage of dangerous goods, and staining/sheens on surface water.

Scope and purpose of sampling, field tests and/or monitoring include one or more of:

- determining nature of contamination
- determining concentration and distribution of contamination
- identifying types and concentrations of contaminants for assessing potential exposure levels/risks
- monitoring site conditions to check licence compliance or determine need for remedial action
- rapid analysis of samples that may change between collection

and analysis

- rapid sample analysis during remediation activities
- determining if clean-up has been achieved
- screening of samples in the field.

Samples include one or more of:

- air, soil gases and dust
- soils
- surface water and groundwater
- radiation
- replicates, field and trip (transport) blanks, rinsate blanks and background samples.

Field tests and monitoring include one or more of:

- soil profile measurements and depth of fill
- measurement of bores and water depth
- screening of gas/vapours, soil and water samples using:
 - colour and texture
 - bioluminescence/toxicity test kits
 - colorimetric methods and dye shake tests
 - pH, electrical conductivity, redox potential, temperature, dissolved oxygen and ammonia concentration
 - photo ionisation detectors (PID)
 - flame ionisation detectors (FID)
 - gas detectors
 - portable infrared analysers for methane and carbon monoxide (CO)
 - portable X-ray fluorescence spectrum analyses
 - field gas chromatography
 - measurement of radiation.

Safety procedures include one or more of:

- preparation/approval of site health and safety plan for sampling/testing, and safe work permits/approvals
- use of safe work method statements, site safety induction, risk cards, 'step back' and safety checks, SDS, emergency procedures, and reporting procedures for safety problems
- use of (disposable) PPE such as boots, helmets, gloves, eye and ear protection, overalls, face masks and filters, respirators, encapsulated suits, safety harness and safety torches
- use of hazardous gas monitors/detectors, personal monitors, environmental monitors and radiation dosimeters, and communication equipment
- ensuring two persons are present

- working upwind of known contaminants
- prohibition of eating, drinking and smoking
- decontamination facilities, procedures and materials for plant, equipment and personnel
- safe collection and disposal of hazardous waste
- clear access for emergency vehicles
- regular medical checks.

WHS and environmental management requirements include:

- compliance with relevant federal/state/territory WHS legislation at all times
- assuming that samples are potentially hazardous and applying standard precautions
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and state/territory Departments of Health, where relevant.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS025014A Perform sampling and testing of contaminated sites

Assessment Requirements for MSS025014 Perform sampling and testing of contaminated sites

Modification History

Release 1. Supersedes and is equivalent to MSS025014A Perform sampling and testing of contaminated sites.

Release 2. Prerequisite code updated. Equivalent outcome.

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- conducting at least **one (1)** visual site inspection to identify a site's key features and potential contamination hazards and to inform the design of subsequent investigation(s)
- safely collecting, preserving and labelling a set of samples from at least **one (1)** contaminated site in accordance with a given sampling plan
- safely preparing (sub)samples and conducting at least **two (2)** different tests/analyses in the field using given test methods
- interpreting and applying regulatory and planning requirements for contaminated sites, site sampling/monitoring plans, sampling/test methods, standards and workplace procedures
- recognising hazards and assessing risks; interpreting and applying health and safety plans and safe work methods, including use of designated safety equipment and personal protective equipment (PPE)
- planning for field activities, including researching and summarising site history and chronology, analysing existing data and/or reports, identifying potential contaminants and possible areas of contamination
- preparing for field activities, including arranging site access, induction, permits, conducting reconnaissance, reviewing safety requirements and securing the resources required
- selecting, checking, packaging and transporting supplies, equipment and instruments to and from the field
- collecting reliable samples in accordance with site sampling plan/methods and paying close attention to any pre-treatment, container, preservation, storage, labelling and traceability requirements
- demonstrating correct and safe use of test equipment and/or analysers including set-up, pre-use checks, calibration and performance checks to obtain reliable data
- recognising atypical results as out-of-normal range or an artefact; identifying and rectifying basic instrument faults
- accurately recording site features, environmental conditions and any observations that may impact on reliability of field data

- calculating required quantities using appropriate units, precision, uncertainties and/or calibration graphs
- interpreting gross features/trends in data, identifying atypical results and/or comparing results with established threshold levels or environmental quality concentration limits
- seeking advice when issues/problems are beyond scope of competence/responsibility
- writing/compiling concise and accurate reports in accordance with workplace procedures
- maintaining, cleaning and decontaminating equipment and PPE in accordance with workplace procedures
- working safely and following relevant legislative requirements for the disposal of waste and the preservation of the environment.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- scientific terminology covering the sampling/testing of air, water and soil at contaminated sites and relevant to job role
- overview of specific legislation, regulations, standards and codes of practice related to contaminated sites, and threshold levels or environmental quality concentration limits for contaminants
- common site hazard and risks, risk assessment techniques and use of risk cards
- properties and health risks associated with groups of contaminants, such as:
 - asbestos
 - heavy metals, such as lead, chromium and arsenic
 - chemical manufacture and industry wastes, such as acids/alkalis, resins, dyes, paints, solvents, fuels, oils, fertilisers, insecticides, herbicides, fungicides, aromatic hydrocarbons, phenols, chlorinated phenols, chlorinated benzenes and organochlorines
- overview of sampling plan design for contaminated sites, including preliminary sampling, non-targeted/grid sampling, targeted/judgemental sampling, and different sampling strategies for gas, water and soil
- sampling/test methods/standards relevant to site activities undertaken
- function of key instrument components and operating principles of common sampling/test equipment relevant to site activities undertaken
- common procedure/equipment problems leading to atypical data/results
- processes for labelling, ensuring chain of custody/traceability of samples and management of large volumes of data
- data processing, recording and reporting procedures
- hazards, health, safety and environment requirements relevant to site activities undertaken; use of safe work methods, safety equipment and PPE.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace, or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept in each case).
- Holistic assessment methods include:
 - inspection of contaminated site samples collected by the candidate
 - review of observations, measurements, test results and calculations provided by the candidate
 - review of sampling/test records and site reports prepared by the candidate
 - feedback from supervisors about the candidate's ability to perform sampling and testing of contaminated sites in accordance with given methods and workplace procedures, work safely and produce reliable results within the agreed timeframe
 - oral and/or written questions to assess the candidate's understanding of the principles of sampling/testing of contaminated sites, risk and safety management at contaminated sites, operation of sampling equipment/test instruments/analysers, processing and analysis of data.
- Access is required to all instruments, equipment, materials, workplace documentation, procedures, and specifications associated with this unit including, but not limited to:
 - access to contaminated sites and vehicles
 - appropriate sampling containers, sampling/test equipment, analysers, reagents/consumables, digital camera, global positioning system (GPS), logbooks and data loggers, and/or computers and communication equipment
 - specified PPE, safety equipment and decontamination equipment
 - workplace procedures, work program, maps, site plans, site sampling plans and test methods, standards, environmental data sets, equipment manuals, safety procedures and safe work methods.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR

- having consulted with an organisation providing environmental monitoring, management or technology related services about performing the competency being assessed within the last twelve months.

MSTGN3003 Estimate and cost job

Modification History

Release 1. Supersedes and is equivalent to LMTGN3003B Estimate and cost job

Application

This unit of competency covers skills and knowledge required to estimate materials, labour and time requirements, and establish costs for products and services.

The unit of competency applies to estimating and costing products and services for an identified project, activity or operation.

Discretion, initiative and judgement must be demonstrated on the job, either individually or in a team environment. Work may involve referral of matters to other workplace personnel. Work is undertaken according to established procedures involving a range of products, services and equipment.

This unit of competency is applicable to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Generic

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Gather relevant information about job | 1.1 | Obtain details of customer requirements through discussion with customer or from information supplied |
| | | 1.2 | Develop details of products and services to be provided and any special provisions |
| | | 1.3 | Determine delivery details and methods of transportation, where necessary |
| | | 1.4 | Record details and document specifications |
| 2 | Estimate materials, labour and time | 2.1 | Research, locate and interpret technical information about materials, equipment, products and services required for the job |
| | | 2.2 | Estimate types, quality and quantities of materials required for work |
| | | 2.3 | Estimate acceptable price range for required products |
| | | 2.4 | Estimate labour requirements to perform required services |
| | | 2.5 | Estimate time requirements to perform required services |
| 3 | Calculate costs | 3.1 | Calculate total materials costs and labour costs |
| | | 3.2 | Calculate transport and delivery costs for products, as required |
| | | 3.3 | Determine allowances for overheads and mark-up percentages |
| | | 3.4 | Calculate total job cost |
| | | 3.5 | Calculate final cost to customer |
| 4 | Document and | 4.1 | Use calculators, computers with appropriate software or other aids to estimate, calculate and verify costings |

- verify details** according to workplace procedures
- 4.2 Document details of costs and charges
 - 4.3 Obtain verification of costs, calculations and other details by other enterprise personnel, as required
 - 4.4 Prepare customer quotation in appropriate format to meet required enterprise or industry standards
 - 4.5 Document and record details for future reference

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTGN3003B Estimate and cost job

Assessment Requirements for MSTGN3003 Estimate and cost job

Modification History

Release 1. Supersedes and is equivalent to LMTGN3003B Estimate and cost job

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting work orders, customer requirements, specifications and instructions for products and materials to be used
- locating and interpreting technical information about products, materials, equipment and operating procedures
- estimating and costing materials and equipment, labour, time, transport and overheads, on at least two (2) occasions
- calculating total costs of products or services
- calculating costs to customer and preparing quotation
- using calculators, computer programs and other aids to estimate, calculate and communicate costs
- documenting and communicating job-related information, including customer requirements; products, materials and labour required; costing calculations for products, materials and labour and special conditions in required format
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- products and services offered by the enterprise
- details of materials, products and equipment
- workplace costing procedures
- components of overheads costs
- components of direct labour costs
- work flow and manufacturing processes
- basic mathematical processes and formulas
- labour rates and approximate costs of products and materials
- use of calculators, computers and other technology

- industry standards for customer service and providing quotations
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy National Vocational Education and Training Regulator (NVR)/Australian Quality Training Framework (AQTF) assessor requirements
 - have vocational competency in estimating and costing jobs, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The unit is applicable to all TCF sectors and assessment must ensure it is delivered to suit the industry it is being applied to.

NWPIRR002 Operate basic flow control and regulating devices in irrigation systems

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP222A Operate basic flow control and regulating devices in irrigation systems.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Elements 1 and 2 merged • PC 2.2 removed • PC 4.2 and 4.3 reworded

Application

This unit describes the skills required to operate basic flow control and regulating devices in irrigation systems.

This unit applies to those working as field and operational staff with responsibility for using flow control and metering devices according to organisational procedures.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or in a team, under direct supervision using own familiar resources as required, while performing routine tasks in range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Monitor and regulate required flows in irrigation systems	1.1 Access and apply operating requirements for flows in irrigation systems. 1.2 Use equipment to assist operational activities. 1.3 Monitor, measure and record flows at designated locations and systems according to schedule. 1.4 Identify potential operational problems and provide proactive advice. 1.5 Adjust flow regulation and control mechanisms to increase and decrease flow.
2. Record and report system adjustments	2.1 Produce information relating to flow adjustments. 2.2 Collect, record and report information on flows and abnormalities.
3. Respond to contingencies	3.1 Identify and assess potential risks and contingencies in the operation of flow control and regulating devices. 3.2 Respond to potential and actual risks and contingencies. 3.3 Inform relevant personnel within organisation of potential risks.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website..

Unit Mapping Information

This unit supersedes and is equivalent to NWP222A Operate basic flow control and regulating devices in irrigation systems.

Assessment Requirements for NWPIRR002 Operate basic flow control and regulating devices in irrigation systems

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- collecting and reporting system performance information
- interpreting data
- producing information, including at least one of:
 - meter reading reports
 - daily running sheets
- adjusting and maintaining flow system control mechanisms
- securing flow regulation devices
- identifying flow requirements
- preparing for and conducting flow monitoring
- identifying and reporting operational problems
- completing records and reports

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- impact of the principles of hydraulics on the operation of flows
- system layout
- risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site

- system flow control mechanisms
- relevant lock-out procedures for mechanical and electrical installations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR005 Develop and review a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and review a surface water plan. It includes ensuring environmental considerations are met and source of supply is maintained. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to leaders working in water organisations with responsibility for the development and review of surface water resources including but not limited to rivers and streams, dam catchments, flood retarding, overland flow controls and related drainage. It does not include flood routing through storages.

Those undertaking this unit would work autonomously and lead personnel whilst performing sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Prepare for surface water flow and quality management**
 - 1.1** Identify hazards, assess risks and implement control measures associated with surface water flow requirements
 - 1.2** Identify, interpret and synthesise relevant data to monitor and test water flow, quality and quantity requirements, including release figures
 - 1.3** Identify, interpret and analyse historic source water flow and system capacity information
 - 1.4** Identify and interpret environmental factors impacting surface water flows and quality
 - 1.5** Identify, interpret and review resource and operational protocols
 - 1.6** Complete complex calculations and incorporate analysed results into the surface water plan
- 2 Develop the surface water plan**
 - 2.1** Identify and interpret surface water management requirements
 - 2.2** Identify, interpret and validate stakeholder requirements impacting surface water
 - 2.3** Develop a surface water plan according to relevant legislation, industry standards and workplace procedures
 - 2.4** Identify, investigate and report breaches of surface water management controls
- 3 Review the surface water plan**
 - 3.1** Analyse and report deviations from planned performance measures
 - 3.2** Review objectives of the management and implementation plans
 - 3.3** Review parameters for water usage and quality through monitoring and testing programs
 - 3.4** Report and recommend changes to plan objectives, workplace procedures and usage and quality parameters
 - 3.5** Provide advice and guidance to water users and stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR063 Develop and review surface water management plan.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for NWPIRR005 Develop and review a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- developing and reviewing a surface water plan to ensure environmental considerations are met and source of supply is maintained
- developing effective surface water plans addressing the water organisation's objectives and requirements
- gathering, interpreting and synthesising information including:
 - historical data
 - monitoring and testing results
 - relevant legislation, industry standards and workplace procedures
 - stakeholder requirements
- identifying and interpreting environmental factors
- identifying hazards, assessing risks and implementing control measures associated with surface water flow requirements
- preparing reports and recommendations for changes to the objectives of the surface water plan and its implementation
- reviewing the implementation and development plan
- reading and interpreting complex data and performing complex calculations to track and manage performance of surface water
- using data from testing and other monitoring arrangements to track the performance of the surface water plan and inform the review of the plan

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- climatic and weather characteristics and impacts
- changes to water flow and levels over time
- complex calculations
- hydraulic analysis
- physical assets associated with surface water management

- public and government reporting requirements
- relevant legislation, regulations, industry standards and workplace procedures relating to surface water
- relevant water data including:
 - flow
 - quality and quantity requirements
 - release figures
- rights of water authority control and management procedures
- risk management principles
- stakeholder requirements and rights associated with managing surface water
- surface water sources

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPIRR006 Develop and review an irrigation system plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and review an irrigation system plan.

It includes analysing total irrigation system performance, liaising with customers and stakeholders and reviewing and refining the irrigation system plan. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to leaders with responsibility for the development and review of plans for the management of irrigation systems. Those undertaking this unit would work autonomously and lead personnel whilst performing sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for irrigation system management

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Determine, interpret and analyse water quantity and quality requirements including release and flow rates

- 1.2 Access, interpret and synthesise historical irrigation system capacity and delivery performance information
 - 1.3 Identify and interpret legislative, organisational and environmental requirements and determine system constraints impacting the delivery of irrigation water
- 2 Develop an irrigation system plan**
 - 2.1 Identify and interpret irrigation system management requirements
 - 2.2 Identify and validate customer requirements for irrigated culture
 - 2.3 Consult and communicate with stakeholders and obtain input for the irrigation system plan
 - 2.4 Develop and document an irrigation system plan and an implementation strategy
 - 2.5 Identify, investigate and report breaches of customer entitlements and other usage provisions
- 3 Review and refine the irrigation system plan**
 - 3.1 Evaluate operations and maintenance activities and system performance and incorporate into the irrigation system plan review
 - 3.2 Review objectives of the irrigation system plan and implementation strategy
 - 3.3 Recommend changes to plan objectives and operational and maintenance procedures
 - 3.4 Provide advice and guidance to stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR062 Develop and review irrigation system management plan.

Assessment Requirements for NWPIRR006 Develop and review an irrigation system plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- assessing environmental impacts
- conducting investigations
- consulting and communicating with stakeholders and customers
- determining and interpreting water quantity and quality requirements
- developing and reviewing the operation and maintenance of irrigation systems
- developing effective irrigation system plans addressing the organisation's objectives and requirements
- gathering, interpreting and synthesising information for incorporating into the irrigation system plan including:
 - customer flow rates and usage
 - delivery performance
 - historical system capacity data
 - key indicators
 - stakeholder requirements
- interpreting and applying legislation, standards and policies
- preparing reports and recommendations for changes to the objectives of the plan
- reviewing the implementation and development plan
- using data from monitoring arrangements to track performance of the irrigation system plan

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- customer and stakeholder expectations and requirements
- irrigation operations and maintenance activities
- legislation and regulations including:
 - channel, pipe and pump
 - customer entitlements

- flow rates
- relevant workplace policies and procedures associated with irrigation system plans
- water quantity and quality requirements including release and flow rates
- water requirements for irrigated cultures within the system

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPIRR007 Implement and coordinate a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate a surface water plan.

It includes ensuring environmental and sustainability considerations are met, where appropriate source of supply is maintained and controls for surface water management including catchment land use, flow controls and retardation, release flows and managed usage are implemented and effectiveness monitored.

This unit applies to those working as leaders with responsibility for the management of surface water resources. Those undertaking this unit would work autonomously, leading staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Develop and implement monitoring and testing

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Develop an implementation strategy for the surface water plan according to workplace procedures

programs

- 1.2 Coordinate management plan activities relating to the surface water plan and determine responsibilities and timelines for implementation
 - 1.3 Plan, design and implement monitoring and testing programs
 - 1.4 Identify hazards, assess risks and implement control measures for monitoring and testing programs
 - 1.5 Gather historical surface water collection information and evaluate as input to the planning process
 - 1.6 Monitor water usage, water flow and water quality according to the plan
 - 1.7 Record and analyse test results and education programs
- 2 **Monitor and evaluate performance of surface water plans**
 - 2.1 Review objectives of the surface water and implementation plans
 - 2.2 Identify, investigate and report deviations of surface water flows and controls from management objectives
 - 2.3 Monitor and review environmental factors impacting the collection of surface water
 - 2.4 Make recommendations for changes to plan objectives and procedures and usage and quality parameters
 - 2.5 Provide advice and guidance to water stakeholders
- 3 **Report on monitoring and implementation activities**
 - 3.1 Identify and report deviations from the surface water plan
 - 3.2 Review and report operational problems of controls and regulations from the surface water and implementation plans
 - 3.3 Make recommendations for changes to plan objectives

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR072 Implement and coordinate surface water management plan.

Assessment Requirements for NWPIRR007 Implement and coordinate a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- designing and implementing testing processes and programs
- gathering, interpreting and synthesising information to underpin the implementation of a surface water plan including:
 - current legislation and standards
 - effectiveness of plan controls
 - historical data
 - stakeholder requirements
 - water quantity and quality test results
- implementing management plans for surface water to ensure environmental considerations are met and source of supply is maintained
- monitoring and evaluating the outcomes of the surface water plan
- preparing reports and recommendations for future action
- providing advice about water usage and communicating with stakeholders
- reading and interpreting numerical data related to surface water and environmental factors

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- climatic and weather characteristics and impacts
- environmental and sustainability considerations
- hydraulic analysis
- monitoring and performance procedures
- operation and interrelationships of surface water flows and controls
- operational and maintenance problems
- physical and regulatory control limitations
- relevant legislation, industry standards, regulations and workplace procedures
- risk management principles

- surface water system objectives

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPIRR012 Construct open earthen channels or drains

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP251B Construct open earthen channels or drains.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 revised

Application

This unit of competency describes the skills required to plan and prepare for the construction of open channels or drains and to complete construction operations and subsequent site restoration.

This unit applies to those working as field and operational staff involved in the construction of earthen channels and drains for stormwater or irrigation systems or the remodelling or reconstruction of unserviceable systems.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturers' guidelines.

Those undertaking this unit would work under direct supervision, while performing routine tasks and ensuring minimal damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for construction work	1.1 Determine work requirements from design plans, specifications, instructions and work orders. 1.2 Check site and identify hazards. 1.3 Make appropriate drainage and diversion arrangements without damage to environment. 1.4 Check equipment and open-cut excavation methods to ensure that safety requirements of task and site are met. 1.5 Select suitable soil material.
2. Construct channels or drains	2.1 Construct earthen channels, drains and batters to planned width, depth and gradient. 2.2 Compact soil, apply additives and take earth samples. 2.3 Check construction works to ensure that specifications are met.
3. Restore work site and equipment	3.1 Check, maintain and store equipment, tools and materials. 3.2 Restore work site and add environmental improvements or controls to complete work, according to plans.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP251B Construct open earthen channels and drains.

Assessment Requirements for NWPIRR012 Construct open earthen channels or drains

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing reports and logs
- using safety and personal protective equipment
- using tools and machinery
- interpreting plans, charts and instructions
- applying procedures and standards
- applying channel, drain and batter construction techniques
- identifying soil types, mechanics and compaction rates
- selecting and operating appropriate compaction plant, including tamping foot and smooth drum roller
- operating communication systems
- performing work related calculations
- constructing open earthen channels and drains
- planning work and preparing work site according to given specifications and instructions
- cutting channels to specification
- compacting soil
- taking soil samples
- checking that work meets specifications
- cleaning and storing equipment
- restoring work site

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- channel and drain system design basics
- channel and drain system layout
- environmental aspects of construction
- channel, drain and batter construction processes
- measures to reduce channel deterioration, infestation of weeds, pests and seepage
- relevant utilities and service providers
- safe use of lasers
- use of automatic levels
- basic levelling techniques
- profiles and boning rods
- survey principles
- soil types, mechanics and compaction rates
- capabilities of plant used for construction, including equipment operation, capacity and limitations
- communication systems
- work related calculations
- hazardous materials handling
- landscape and ground structure of work area
- risk factors and potential hazards of construction processes
- effects of weather and conditions on construction site or plant
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR013 Construct and install irrigation delivery and stormwater drainage assets

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP252B Construct and install irrigation delivery and stormwater drainage assets.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Element 2 reworded • PC 2.2 and 2.3 merged

Application

This unit of competency describes the skills required to construct irrigation delivery or stormwater drainage assets on site and to install both constructed assets and prefabricated components.

This unit applies to those working as field staff with specific responsibility for ensuring that the construction and installation of irrigation or stormwater drainage assets is completed in a safe and timely manner.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under indirect supervision, while performing routine tasks and ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Determine work requirements from specifications and instructions. 1.2 Select, fit and use personal protective equipment. 1.3 Perform site check to identify hazards and prevent damage to other utilities. 1.4 Provide appropriate drainage and diversion from work site. 1.5 Check equipment and excavation methods to meet safety requirements of task and site.
2. Construct and install drains, channels and associated fittings	2.1 Provide bedding and foundations according to structure type, location and specification. 2.2 Select, place and install prefabricated components and fittings. 2.3 Check installed fittings and prefabricated components to ensure that specifications are met. 2.4 Construct components on-site.
3. Finalise work	3.1 Check constructions and installations to ensure that specifications are met. 3.2 Check, maintain and store equipment, tools and materials. 3.3 Backfill, compact and restore work site. 3.4 Maintain workplace records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP252B Construct and install irrigation delivery and stormwater drainage assets.

NWPIRR014 Install meters for rural water supplies

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP302A Install meters for non-potable, non-urban water supplies.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • Element 2 removed • One new PC added to Element 1 • PC 1.4 removed • PC 2.4 renumbered • Element 2 and 4 merged • All PC revised

Application

This unit describes the skills required to install water meters for rural water supplies.

This unit applies to those working as field or operational staff installing meters.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently under direct supervision, while performing routine tasks ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm conditions of the site for meter installation	1.1 Identify the location of the site and establish client information from work plans and job specifications. 1.2 Identify access to the site and any conditions of access. 1.3 Assess the conditions of the site. 1.4 Set out the site. 1.5 Carry out a job safety analysis and identify and control hazards.
2. Install meter facilities	2.1 Ensure that excavations provide sufficient width for movements of installation. 2.2 Install meter as set out in design and specifications. 2.3 Check fittings, seals and operation. 2.4 Install ancillary equipment and check for operation and seal. 2.5 Check meter installation for compliance with manufacturer specifications.
3. Restore site	3.1 Backfill with suitable material, moisture content and compaction to maximise compaction efficiency. 3.2 Restore the site to original site conditions.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing NA					Oral communication NA					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP302A Install meters for non-potable, non-urban water supplies.

Assessment Requirements for NWPIRR014 Install meters for rural water supplies

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- planning meter installation and construction
- undertaking calculation of head, flow and measurements of pipes and pressure
- undertaking locational assessment and risk analysis for meter installation
- sampling and testing soil for backfill and installation structures
- analysing the impact of water infiltration on the stability of structures
- measuring the head of water to judge sufficiency for meter's accuracy
- checking power supply and links
- installing ancillary equipment
- positioning solar panels to maximise power collection
- undertaking a job safety analysis and checking hazards and safety requirements
- using and storing equipment on site
- determining excavation requirements
- calculating sump and headwall elevation and orientation
- calculating pipe and meter pit elevation, fall and presentation
- installing transducers and cabling safely
- interpreting manufacturer requirements for fitting meters in meter pits
- using techniques to protect meters from disturbance
- assessing the effectiveness of backfill
- undertaking site restoration
- identifying and analysing client requirements, site conditions and their impact on the types of meter required, and the design of the installation

- identifying and analysing environmental conditions and limitations and the impact of work to be undertaken
- identifying and analysing safety risks and hazards and responding to remove risks and hazards
- preparing sites and equipment for installation
- identifying faults, changes and failure indicators

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the purpose and standards for non-urban water metering
- community expectations for water measurement and use
- standards for the installation of non-urban meters in open and closed conduit systems
- the social, environmental, economic and political responsibilities of water authorities in relation to meter installation
- requirements for checking the pattern approval of meters and compliance with meter installation standards
- meter manufacturers' guidelines and installation manual for specific meters
- the organisation's policies and procedures for water meter installation
- conditions for meter location and suitable installation assets and meters for the conditions
- causes of flow disturbance
- potential environmental causes of meter failure
- the organisation's environmental impact guidelines
- maintenance requirements for meter facility within and open channel
- relevant safety requirements including confined space

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR022 Maintain meters for rural water supplies

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP304A Maintain meter for non-potable, non-urban water supplies.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • PC 4.3 removed • PC 1.3 and 1.4 merged • PC 2.1, 2.3, 2.4 and 2.5 merged and revised

Application

This unit describes the skills required to maintain the operational integrity of already installed meters, metering systems and their components. This unit covers corrective, predictive and preventative maintenance.

This unit applies to those working in the water industry as field or operational staff maintaining meters for rural water supply.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under independently under direct supervision, while performing routine tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm meter type and location within asset management system	1.1 Obtain organisational maintenance plan and manufacturer guidelines. 1.2 Locate meter emplacement on a map, or by GPS, or according to organisational procedures. 1.3 Confirm that meter type and number match maintenance plan or manufacturer guidelines.
2. Check condition of meters and metering system	2.1 Check components and identify faults using an asset condition checklist. 2.2 Establish maintenance requirements.
3. Maintain meter and meter facilities	3.1 Repair or replace faulty components. 3.2 Identify faults which need to be rectified by a third party.
4. Test and recommission	4.1 Ensure meter complies with standards. 4.2 Perform on-site re-test of meter. 4.3 Record faults and meter performance, maintenance and repairs.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication NA					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP304A Maintain meter for non-potable, non-urban water supplies.

Assessment Requirements for NWPIRR022 Maintain meters for rural water supplies

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least two of the different fault types listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading and analysing electronic display
- inputting data into electronic controller
- working with low voltage wiring
- reading manufacturers' instructions, plans, exploded drawings and parts catalogues
- reading verification marks
- using tags and seals
- confirming the site and the meter
- checking meter condition
- replacing components
- documenting the maintenance

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant organisational policies and procedures for water meter maintenance
- organisational rights and responsibilities
- manufacturers' maintenance procedures for specific meter types
- knowledge of checking pattern approval requirements
- standards for non-urban metering

- GPS coordinates
- meter types and accuracy limits
- roles and responsibilities of maintenance personnel
- WHS guidelines
- environmental, cultural and heritage guidelines

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP425B Coordinate and monitor the operation of irrigation delivery systems.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1 removed • PC 2.2 reworded • PC 2.4 revised

Application

This unit describes the skills required to coordinate and monitor irrigation delivery systems to meet performance standards and including system maintenance and customer liaison.

This unit applies to those working as field and operational staff with a specific responsibility for ensuring that the operation of irrigation systems complies with organisational and statutory requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or in a team, while performing complex tasks ensuring minimum damage to the environment in a familiar context. However, the level of responsibility may vary according to the size, scope, location, and technical complexity of process.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm performance measures in irrigation system's management plan	1.1 Identify customer requirements for irrigated culture. 1.2 Identify environmental factors that impact on the irrigation system. 1.3 Consult historic system information and stakeholders as appropriate. 1.4 Confirm performance requirements for an irrigation system management plan.
2. Monitor and coordinate processes and resource targets	2.1 Monitor and test programs and identify, investigate and report any deviations from water quantity, quality, release or flow. 2.2 Evaluate the duration, volume and flow rates of water deliveries and identify, investigate and report deviations from agreed service levels. 2.3 Evaluate maintenance activities and report deviations from targets. 2.4 Identify and record links between operational problems and maintenance activities.
3. Report outcomes of coordination and monitoring	3.1 Analyse, record and report coordination and monitoring data. 3.2 Identify and report current and potential problems. 3.3 Make recommendations for improvements in system performance and/or customer service.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP425B Coordinate and monitor the operation of irrigation delivery systems.

Assessment Requirements for NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assessing environmental impact
- operating irrigation and/or domestic stock supply system
- checking channel flow
- identifying customer requirements for irrigated culture and environmental factors that impact on the irrigation system
- consulting historic system information and stakeholders as appropriate
- confirming performance requirements for an irrigation system management plan
- implementing monitoring and testing programs and investigating and reporting deviations from planned parameters
- evaluating performance of water deliveries and investigating and reporting deviations from agreed service levels
- evaluating performance targets
- analysing and reporting data
- identifying and reporting problems
- making recommendations for system performance or customer service improvements

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislation, policies and procedures

- customer expectations and requirements
- impact of the principles of hydraulics on the operation of flows
- coordination processes
- principles of scheduling
- system layout and operations
- environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
- environment, landscape and ground structure of work area
- risk factors and potential hazards of irrigation and/or domestic and stock supply systems
- equipment operation, capacity and limitations
- water flow calculations
- gravity systems
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIWS002 Operate regulating devices in rural irrigation systems

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to operate regulating devices in rural irrigation systems.

It includes monitoring flows in irrigation systems, recording and reporting system adjustments and responding to contingencies.

This unit applies to those working as field or operational staff with responsibility for using flow control and metering devices according to workplace procedures. Those undertaking this unit would work in a team or under appropriate supervision using own familiar resources as required, while performing routine tasks in range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Monitor and regulate required flows in

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Access and apply operating requirements for flows in

irrigation systems	irrigation systems
	<ul style="list-style-type: none"> 1.2 Use and secure equipment to assist operational activities according to workplace procedures 1.3 Monitor, measure and record flows at designated locations according to work schedule 1.4 Identify potential operational problems and provide solutions 1.5 Adjust and maintain flow regulation and control mechanisms to increase and decrease flow according to workplace procedures
2 Record and report system adjustments	<ul style="list-style-type: none"> 2.1 Produce trend information relating to flow adjustments 2.2 Collect, record and report information on flows and abnormalities
3 Respond to contingencies	<ul style="list-style-type: none"> 3.1 Identify and assess potential risks and contingencies in the operation of regulating devices 3.2 Respond to potential and actual risks and contingencies 3.3 Inform relevant personnel of potential risks according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR002 Operate basic flow control and regulating devices in irrigation systems.

Assessment Requirements for NWPIWS002 Operate regulating devices in rural irrigation systems

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

- adjusting and maintaining flow system control mechanisms
- completing records and reports
- collecting and reporting system performance information
- identifying and reporting operational problems
- identifying flow requirements
- interpreting data
- producing information
- securing flow regulation devices
- using equipment relevant for controlling and regulating water flow for irrigation

Knowledge Evidence

- effects of weather conditions on system operation and worksite
- equipment operation, capacity and limitations
- methods for data collection and reporting
- irrigation system layout
- principles of hydraulics impacting on the operation of flows
- relevant legislation, regulations and workplace procedures
- relevant lock-out procedures for mechanical and electrical installations
- risk factors and potential hazards
- system flow control mechanisms

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS004 Install meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to install meters for rural water supplies.

It includes confirming conditions of the site for meter installation, installing meter facilities and restoring site.

This unit applies to those working as field or operational staff installing meters. Those undertaking this unit would work independently under appropriate supervision, while performing routine tasks ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Confirm conditions of the site for meter installation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify the location of the site and establish client information from work plans and job specifications

- 1.2 Identify access to the site and any conditions of access
 - 1.3 Assess the conditions of the site
 - 1.4 Set out the site for installation of meter according to workplace procedures
 - 1.5 Complete risk assessment and identify and control hazards
- 2 **Install meter facilities**
 - 2.1 Calculate installation elevations according to design
 - 2.2 Install meter as set out according to design and manufacturer specifications
 - 2.3 Check fittings, seals and operation according to workplace procedures
 - 2.4 Install ancillary equipment and check for operation and seal
 - 2.5 Check meter installation for compliance with manufacturer specifications
- 3 **Restore site**
 - 3.1 Backfill with suitable material, moisture content and compact
 - 3.2 Restore the site according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR014 Install meters for rural water supplies.

Assessment Requirements for NWPIWS004 Install meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- calculating pipe and meter pit elevation, fall and presentation
- checking power supply and links
- compacting backfill
- identifying faults, changes and failure indicators
- identifying risks
- installing ancillary equipment
- planning meter installation and construction
- restoring site
- undertaking a risk assessment and checking hazards and safety requirements

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- causes of flow disturbance
- different types of meters
- environmental impact guidelines
- meter manufacturer guidelines and installation manual for specific meters
- potential causes of meter failure
- relevant legislation, regulations and workplace procedures
- relevant meter standards
- relevant safety requirements
- requirements for checking the pattern approval of meters and compliance with meter installation standards
- workplace policies and procedures for water meter installation

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS006 Maintain meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to maintain meters for rural water supplies. It includes maintaining operational integrity of already installed meters, metering systems and components. It also includes corrective, predictive and preventative maintenance.

This unit applies to those working in the water industry as field or operational staff, maintaining meters for rural water supply. Those undertaking this unit would work under appropriate supervision, while performing routine tasks in familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Confirm meter type and location

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Obtain organisational maintenance plan and manufacturer guidelines
- 1.2 Locate meter facility according to workplace procedures

- | | | |
|----------|------------|---|
| | 1.3 | Confirm meter type and number match to maintenance plan |
| 2 | 2.1 | Conduct a risk assessment of a meter site according to workplace procedures |
| | 2.2 | Check metering components and identify faults according to workplace procedures |
| | 2.3 | Establish maintenance requirements according to workplace procedures |
| 3 | 3.1 | Repair or replace faulty components according to workplace procedures |
| | 3.2 | Identify faults which need to be rectified by a third party to relevant personnel |
| 4 | 4.1 | Ensure meter complies with standards |
| | 4.2 | Perform on-site re-test of meter according to workplace procedures |
| | 4.3 | Record faults and meter performance, maintenance and repairs |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR022 Maintain meters for rural water supplies.

Assessment Requirements for NWPIWS006 Maintain meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying seals
- checking and reporting meter condition
- confirming location of worksite and meter
- identifying manufacturer instructions, plans, exploded drawings and parts catalogues
- identifying verification marks
- reading and analysing meter display
- replacing components
- reporting maintenance requirements
- working with low voltage wiring

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- checking pattern approval requirements
- location methods including:
 - GPS
 - maps
- manufacturer maintenance procedures for specific meter types
- meter types and accuracy limits
- relevant legislation, regulations and workplace procedures
- relevant workplace policies and procedures for water meter maintenance
- standards for non-urban metering
- work, health and safety (WHS) risk assessments

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

NWPIWS008 Monitor and conduct maintenance on rural irrigation assets

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor and conduct maintenance on rural irrigation assets.

This includes monitoring asset and equipment performance, conducting maintenance on assets and equipment and compiling process records and reports. It also includes pipelines and associated fittings.

This unit applies to those working as field staff with the responsibility for monitoring the operation of flow control, measuring and regulating devices, conducting maintenance and ensuring problems and anomalies are rectified by specialist technicians. Those undertaking this unit would work under appropriate supervision, performing routine tasks and ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Prepare for work | 1.1 Interpret work requirements for monitoring rural irrigation assets from plans, drawing specifications and instructions |
| | 1.2 Select and check equipment and tools to meet the safety requirements of the task and site |
| | 1.3 Select, fit and use required safety equipment, including personal protective equipment |
| | 1.4 Undertake risk assessment at worksite according to workplace procedures |
| 2 Monitor asset and equipment performance | 2.1 Identify rural irrigation assets and equipment |
| | 2.2 Check and interpret information and specifications on assets and equipment performance |
| | 2.3 Report on assets and equipment performance |
| 3 Conduct maintenance on assets and equipment | 3.1 Undertake routine maintenance according to maintenance schedule |
| | 3.2 Secure assets and equipment according to workplace procedures |
| | 3.3 Identify and report problems to relevant personnel for correction |
| | 3.4 Identify, select, place and join components and associated fittings |
| 4 Monitor asset and equipment performance | 4.1 Schedule and monitor routine inspections of system assets |
| | 4.2 Collect, analyse and report data on system asset performance and usage |
| 5 Compile process records and reports | 5.1 Identify process faults and monitor the operational condition of assets and equipment |
| | 5.2 Report on adjustment requirements according to workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for NWPIWS008 Monitor and conduct maintenance on rural irrigation assets

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- collecting and recording data on asset performance
- collecting and recording information on equipment performance
- conducting a risk assessment and identifying control measures
- conducting routine maintenance tasks and securing assets and equipment
- identifying and reporting on asset performance
- identifying and reporting operational problems
- inspecting rural irrigation assets and equipment
- interpreting plans and instructions
- interpreting policies, procedures and standards
- producing reports
- selecting appropriate equipment and tools, including personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- data collection and recording
- effects of weather and conditions on maintenance and assets
- equipment operation, capacity and limitations
- flow measurement procedures
- ground structure
- irrigation asset and equipment performance parameters
- lock out procedures
- relevant utilities and service bodies
- relevant legislation, regulations and workplace procedures
- risk factors, and potential hazards and control measures
- system hydraulics
- system layout

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS012 Monitor and schedule water deliveries

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor and schedule water deliveries.

It includes scheduling water deliveries for irrigation and domestic or supply systems, including monitoring flows, analysing data, coordinating hydraulic processes and compiling operational reports.

This unit applies to those working as field staff and operators with a specific responsibility for ensuring water deliveries meet customer requirements. Those undertaking this unit would work under appropriate supervision, while performing routine tasks and ensuring minimum damage to the environment, in a familiar.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

|----------|----------------------------------|------------|---|
| 1 | Schedule water deliveries | 1.1 | Identify and record customer water orders according to workplace procedures |
|----------|----------------------------------|------------|---|

- | | | |
|----------|--|---|
| | 1.2 | Analyse water orders to determine water delivery and flow rate requirements |
| | 1.3 | Schedule water deliveries to meet flow rate requirements and organisational standards for channel balance and capacity restraints |
| 2 | Monitor water delivery | |
| | 2.1 | Monitor channel flow rate, regulation and delivery according to customer requirements |
| | 2.2 | Maintain delivery performance records according to workplace procedures |
| | 2.3 | Analyse system performance using system data and records to determine actual and planned performance |
| 3 | Coordinate and control water delivery | |
| | 3.1 | Calculate system adjustments according to demand and organisational requirements |
| | 3.2 | Coordinate flow regulation, channel levels, security of flow devices and settings according to demand and organisational requirements |
| 4 | Compile records of water delivery | |
| | 4.1 | Compile reports from systems performance data |
| | 4.2 | Maintain appropriate measurement and delivery records according to workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR042 Monitor and schedule water deliveries.

Assessment Requirements for NWPIWS012 Monitor and schedule water deliveries

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- adjusting system according to demand
- analysing volumes and flow rates required for water deliveries
- completing relevant documentation
- coordinating flow regulating devices
- identifying and responding to operational problems
- identifying control system faults
- monitoring and regulating system performance
- monitoring channel flow
- performing work related calculations
- preparing schedules for water deliveries for customer orders for irrigation and domestic stock supply systems
- producing reports

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- control systems
- coordination processes
- effects of weather and conditions on operation of site plant
- environmental aspects of irrigation and/or stock and domestic supply system
- equipment operation, capacity and limitations
- flow measurement procedures
- gravity systems
- impact of the principles of hydraulics on the operation of flows
- policies and standard operating procedures
- principles of scheduling
- relevant legislation, regulations and workplace procedures

- system hydraulics
- system layout and operations
- water flow calculations

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPNET002 Prepare and restore work site

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP226B Prepare and restore work site.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.1 removed • PC 2.3 and 2.4 merged

Application

This unit describes the skills required to prepare work sites. The ability to follow work instructions, use a range of equipment and tools to prepare a safe work site and subsequently to restore the site to the required condition is essential to satisfactory performance.

This unit applies to those working as field and operational staff performing a wide range of functions that support construction, maintenance and operations processes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturer specifications.

Those undertaking this unit would work under supervision, performing routine tasks, in mostly familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Networks

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Determine site preparation requirements from specifications, instructions and pre-work inspections. 1.2 Identify and report potential hazards to public and environment and assess risks. 1.3 Perform a site check according to legislative and organisational requirements to identify risks and prevent damage to other utilities. 1.4 Select and check work site equipment, tools and materials as appropriate to meet task and safety specifications. 1.5 Select, fit and use personal protective equipment.
2. Prepare work site	2.1 Position safety equipment and materials to prevent potential risks to public and environment. 2.2 Store and secure equipment and materials. 2.3 Use work site equipment, manual or mechanical excavation equipment, tools and materials. 2.4 Provide appropriate drainage and diversion of site inflows from work site without damage to environment.
3. Restore work site	3.1 Backfill and compact excavations according to specifications. 3.2 Remove excess soil, debris and unwanted materials from site. 3.3 Restore work site to meet environmental and organisational requirements using equipment, tools and materials.
4. Review, record and report activities	4.1 Check, maintain and store equipment, tools and materials. 4.2 Maintain workplace records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP226B Prepare and restore work site.

Assessment Requirements for NWPNET002 Prepare and restore work site

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- setting up compacting and reinstating a site
- interpreting and applying numerical data in specifications and plans
- excavating backfill
- preparing site for planting and plant vegetation
- interpreting plans, instructions, standard operating procedures and work requirements
- using tools and equipment
- identifying and responding to operational problems
- planning work site layout
- selecting, using, maintaining, cleaning, storing and securing materials and equipment
- clearing and preparing work site according to specifications
- restoring work site
- cleaning, maintaining and storing equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS
- risk factors and potential hazards of site preparation and restoration
- environmental aspects of site preparation and restoration

- trenching, shoring and excavation management
- excavation procedures and site restoration
- relevant utilities and service bodies
- communication systems
- landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on construction site or plant

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPNET011 Locate, identify and protect utilities

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP234B Locate, identify and protect utility services.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • PC 1.3 and 1.6 removed • PC 1.1 and 1.2 reordered • PC 2.1 reworded • PC 3.1 revised

Application

This unit describes the skills required to work near utility services during the construction, repair or installation of utilities' infrastructure. Work activities may involve trench excavation or the application of trenchless technologies for installation or repair.

This unit applies to those involved in the construction, repair or installation of underground utility infrastructure and locating, identifying and protecting existing utilities' infrastructure to prevent damage, injury, death or loss of service.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under supervision, performing routine tasks, in mostly familiar context ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare to locate utility services at work site	1.1 Obtain plans and relevant information from specific utility service owners using appropriate information source. 1.2 Determine work site boundaries and requirements from plans, specifications and instructions. 1.3 Determine type, size and likely configuration of all underground and overhead services from plans and typical or local installation practices. 1.4 Identify hazards and precautions associated with excavating or working near utilities' apparatus.
2. Locate utility apparatus by excavation	2.1 Select tools and equipment for location of all apparatus. 2.2 Locate and identify apparatus and indicators of apparatus presence using tools and equipment. 2.3 Determine full extent of apparatus in the ground.
3. Operate plant in close proximity to underground or overhead utility apparatus	3.1 Monitor plant during work activities. 3.2 Identify potential or actual encroaches of plant on minimum clearances to apparatus. 3.3 Give instructions to plant operator using agreed signals.
4. Protect and support utility apparatus during excavation and backfilling	4.1 Protect apparatus according to utility owner requirements to prevent damage. 4.2 Support apparatus along or across excavation according to utility owner requirements or engineering advice to prevent damage. 4.3 Report damage to apparatus to utility owner according to agreed protocols. 4.4 Reinstate apparatus during backfill according to utility owner's requirements.
5. Initiate emergency	5.1 Recognise emergency situations or events. 5.2 Implement emergency response for particular infrastructure

procedures	involved.

Assessment Requirements for NWPNET011 Locate, identify and protect utilities

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- locating and identifying utilities
- assessing and identifying risk of potential hazards associated with each utility
- responding to all types of emergencies relating to utility services
- using basic mathematics for calculations and measurement
- communicating with employees, other service providers and customers
- gathering information regarding location of utilities at a particular site
- applying safe work methods for locating and protecting utilities at or near a work site
- selecting and using tools and equipment
- monitoring use of equipment
- using agreed procedures and signals to ensure timely warnings of proximity to utilities' apparatus
- protecting and supporting apparatus during performance of work tasks and during site restoration
- applying emergency procedures in response to a range of specific incidents

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- published guidelines for working near utility services in the state or territory in which work is being undertaken
- system layout
- environmental aspects of excavation
- relevant utilities and service bodies
- communication systems
- landscape and ground structure of work area
- risk assessment and identification of potential hazards associated with each utility
- emergency response procedures for all types of utility services
- equipment operation, capacity and limitations
- effects of weather and conditions on site or plant

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPNET019 Prepare and restore worksite

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to prepare and restore worksite.

It includes following work instructions, using a range of equipment and tools to prepare a safe worksite and restoring worksite to the required condition.

This unit applies to those working as field and operational staff performing a wide range of functions and supporting construction, maintenance and operations processes. Those undertaking this unit would work under appropriate supervision, performing routine tasks, in mostly familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Networks

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for work

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify and report potential hazards to public and environment and assess risks

1.2 Determine worksite preparation requirements from

- specifications, instructions and pre-work inspections
- 1.3** Perform a worksite check according to legislative and organisational requirements to identify risks and prevent damage to other utilities
 - 1.4** Source and check worksite equipment, tools and materials as appropriate to meet task and safety specifications
 - 1.5** Select, fit and use personal protective equipment
 - 1.6** Identify, notify and communicate with customers and stakeholders according to workplace procedures
- 2 Prepare worksite**
- 2.1** Position safety equipment and materials to prevent potential risks to public and environment
 - 2.2** Store and secure equipment and materials according to workplace procedures
 - 2.3** Use worksite equipment, excavation equipment, tools and materials according to manufacturer instructions and workplace procedures
 - 2.4** Drain and divert water flows from worksite to prevent damage to environment
- 3 Restore worksite**
- 3.1** Backfill and compact excavations according to specifications
 - 3.2** Restore worksite by landscaping, planting and materials
 - 3.3** Remove excess soil, debris and unwanted materials from worksite according to workplace procedures
 - 3.4** Restore worksite using equipment, tools and materials to meet environmental and workplace procedures
- 4 Review and report activities**
- 4.1** Tag and report faulty equipment, tools and advise appropriate personnel
 - 4.2** Store equipment, tools and materials according to manufacturer and workplace instructions
 - 4.3** Complete and process workplace records according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPNET002 Prepare and restore work site.

Assessment Requirements for NWPNET019 Prepare and restore worksite

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- cleaning, maintaining and storing equipment
- clearing and preparing worksite according to specifications
- communicating with appropriate environmental controls
- compacting and reinstating worksite
- excavating backfill
- identifying and responding to worksite issues
- interpreting and applying numerical data in specifications and plans
- interpreting plans, instructions, workplace procedures and work requirements
- planning worksite layout
- preparing worksite for planting and plant vegetation
- selecting, using, maintaining, cleaning, storing and securing materials and equipment
- using tools and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- communication systems
- effects of weather and conditions on construction worksite or plant
- environmental aspects of worksite preparation and restoration
- equipment operation, capacity and limitations
- excavation procedures and worksite restoration
- landscape and ground structure of work area
- relevant legislation, industry standards and guidelines
- relevant utilities and service bodies
- relevant workplace procedures
- risk factors and potential hazards of worksite preparation and restoration

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPNET029 Locate, identify and protect utilities

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to locate, identify and protect utilities.

It includes preparing to locate utility services at the worksite, locating utility assets by excavation, operating plant near underground or overhead utility assets. It also includes protecting and supporting utility assets during excavation and backfilling and initiating emergency procedures.

This unit applies to those involved in locating, constructing, repairing or installing underground utility infrastructure to prevent damage, injury, death or loss of service. Those undertaking this unit would work under appropriate supervision, performing routine tasks, in mostly familiar context ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Networks

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to locate utility services at worksite

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify utility assets or services by communicating with relevant authorities

- 1.2 Determine and mark worksite boundaries and requirements from plans, specifications and workplace instructions
 - 1.3 Determine type, size and likely configuration of all underground and overhead services from plans and typical or local installation practices
 - 1.4 Conduct risk assessment for environmental and safety factors including personal and protective equipment to ensure it is safe to commence work
 - 1.5 Identify yourself to your customers and determine customer needs
- 2 Operate pipe and cable locating equipment**
- 2.1 Identify and select appropriate locating equipment
 - 2.2 Operate pipe and cable locating equipment according to manufacturer instructions
 - 2.3 Interpret false signals or interference with pipe and cable locating equipment and make appropriate adjustments
 - 2.4 Mark the approximate location of services on the surface of the worksite according to workplace procedures
 - 2.5 Conduct test excavation to visually confirm service location according to workplace procedures
- 3 Operate plant near underground or overhead utility assets**
- 3.1 Monitor plant during work activities according to workplace procedures
 - 3.2 Identify potential or actual encroaches of plant on minimum clearances to assets
 - 3.3 Give instructions to plant operator using agreed signals
- 4 Protect and support utility assets during excavation and backfilling**
- 4.1 Protect and support assets according to utility owner requirements to prevent damage
 - 4.2 Report damage to assets to utility owner according to workplace procedures
 - 4.3 Restore worksite using equipment, tools and materials to meet environmental and workplace procedures

- | | |
|--------------------------------------|--|
| 5 Maintain locating equipment | 5.1 Perform daily maintenance of equipment according to manufacturer instructions |
| | 5.2 Record maintenance details according to workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPNET011 Locate, identify and protect utilities.

Assessment Requirements for NWPNET029 Locate, identify and protect utilities

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying safe work methods for locating and protecting utilities at or near a worksite
- assessing and identifying risk of potential hazards associated with each utility
- communicating with stakeholders
- contacting relevant authorities for the correct location of utilities or services
- monitoring use of equipment
- protecting and supporting utility assets during performance of work tasks and during worksite restoration
- selecting and using tools and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- communication systems for locating utilities
- plans of underground and overhead services
- effects of weather and conditions on worksite or plant
- emergency response procedures
- environmental aspects of excavation
- equipment operation, capacity and limitations
- landscape and ground structure of work area
- relevant legislation, regulations and workplace procedures
- relevant utilities and service bodies to contact for the correct location of utilities or services including Dial Before You Dig
- risk assessment and identification of potential hazards associated with each utility

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPSOU006 Develop and manage a flood plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and manage a flood plan.

It includes analysing and modelling data relating to flooding, developing effective management and warning systems and communicating outcomes concisely. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to those working as leaders with responsibility for the preparation of flood management strategies and flood warning systems. Those undertaking this unit would work autonomously with leadership responsibilities, while performing complex tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Source

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and prepare for flood operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Access and interpret historical rainfall run-off and flooding regimes of specific catchments

- 1.2 Collate and analyse simulated, hypothetical and estimated rainfall intensity data and model catchment
 - 1.3 Estimate and record flood levels, extents and flow rates
 - 1.4 Identify and interpret storage asset specifications including regulatory requirements, industry standards and workplace procedures
 - 1.5 Identify resources, environment and stakeholders at risk during a flood event
- 2 Develop a flood plan**
 - 2.1 Consult with stakeholders to obtain input for flood planning
 - 2.2 Develop and document a plan for managing the flood impact on a storage asset
 - 2.3 Confirm performance measures for flood operations
 - 2.4 Develop plan components and activities for implementation
 - 2.5 Develop a flood plan according to relevant legislation, industry standards, workplace procedures and environmental requirements
- 3 Monitor and evaluate flood plan**
 - 3.1 Assess and record a flood event according to industry standards and workplace procedures
 - 3.2 Evaluate the roles of storage and retarding basins safety and flood attenuation strategies
 - 3.3 Evaluate current flood classifications and impacts according to flood plan
 - 3.4 Formulate planning controls for flood plain and waterway management
 - 3.5 Evaluate current flood warning systems according to flood plan
 - 3.6 Recommend and develop changes to existing flood plain and waterway management controls and warning systems
- 4 Report on implementation of the plan**
 - 4.1 Collate, analyse and record information according to workplace procedures

- 4.2 Prepare and present reports to relevant persons
- 4.3 Communicate findings and recommendations to stakeholders according to workplace procedures and relevant regulations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to NWPSOU028 Prepare and report on data related to flood operations.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for NWPSOU006 Develop and manage a flood plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing and developing flood mitigation warning systems and strategies
- analysing, interpreting and modelling flood data
- assessing and recording a flood event
- communicating flood planning findings with stakeholders and relevant persons
- developing a flood plan including:
 - documenting an implementation plan
 - identifying plan components and activities for completion
 - specifying environmental requirements
- developing critical flood warning systems
- developing strategies to mitigate the impact of potential future floods
- identifying and interpreting storage asset specifications

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- catchment hydrology principles including the roles of:
 - retarding basins
 - safety and flood attenuation strategies
 - water storage
- current flood classifications and flood warning systems
- performance measures for flood operations
- relevant documentation associated with developing and managing a flood plan including:
 - industry standards
 - workplace procedures
- relevant legislation and regulatory requirements associated with developing and managing a flood plan including:
 - by-laws

- environmental legislation
- work health and safety (WHS) legislation
- planning schemes
- storage asset specifications
- water flow measurement and flow routing models

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPSOU007 Implement and coordinate a catchment plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate a catchment plan.

It includes coordinating, monitoring and extending the development of the catchment plan to ensure all aspects are implemented and performance measures and objectives are met. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to those working as leaders with responsibility for management of water catchments. Those undertaking this unit work autonomously, leading staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Source

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan for catchment management

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Confirm performance measures for catchment plan

- 1.2 Identify and interpret legislative requirements and organisational policies for the management of water catchment
- 1.3 Identify and interpret catchment plan requirements
- 1.4 Identify stakeholder requirements impacting the catchment area
- 1.5 Gather historical catchment data and evaluate as input to the planning process
- 1.6 Identify, interpret and assess water quality and quantity requirements
- 1.7 Identify and interpret environmental and developmental factors impacting water catchment
- 2 **Develop the catchment plan**
 - 2.1 Develop catchment plan components and activities for implementation
 - 2.2 Coordinate catchment plan activities and determine responsibilities and timelines for implementation activities
 - 2.3 Communicate the catchment plan with relevant personnel and stakeholders according to regulations and workplace procedures
- 3 **Monitor and review catchment plan**
 - 3.1 Design and implement monitoring and testing programs and check for compliance against the catchment plan
 - 3.2 Analyse, interpret and record testing results according to workplace procedures
 - 3.3 Identify and investigate current and potential problems for catchment management
 - 3.4 Evaluate objectives and performance of the water catchment plan and report deviations
 - 3.5 Report investigation results and make recommendations according to workplace procedures
 - 3.6 Identify, investigate and report deviations from plan objectives
 - 3.7 Review objectives of the catchment and implementation plans

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR073 Implement and coordinate catchment management plan.

Assessment Requirements for NWPSOU007 Implement and coordinate a catchment plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing, interpreting and recording test results
- communicating responsibilities of the catchment plan with personnel and stakeholders
- confirming performance measures for the catchment plan
- designing and implementing monitoring and testing activities
- developing implementation plans including objectives and requirements specified in the catchment plan
- evaluating objectives and performance measures of the catchment plan and reporting deviations
- identifying and reporting investigation results
- gathering, interpreting and synthesising information for the water catchment plan including:
 - environmental impacts
 - historical data
 - plan components
 - relevant legislation and industry standards
 - stakeholder requirements
 - water quality test results
- implementing and managing activities in water catchments that impact on water yield and quality
- performing activities associated with implementing and managing catchment plan components
- preparing reports and recommendations for future action

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- environmental impacts of water catchment
- catchment plan development and components

- problem identification and investigation
- relevant information associated with implementing and coordinating a water catchment plan including:
 - historical records and data
 - water industry standards
 - water industry legislation and regulations
 - workplace policies and procedures
- risk management principles
- water quality determinants

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPTRT028 Operate and control reclaimed water irrigation

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to operate and control reclaimed water irrigation.

It includes assessing sites for reclaimed water irrigation and quality of reclaimed water for irrigation. It also includes implementing reclaimed water irrigation, responding to water or soil quality issues and compiling reclaimed water irrigation records.

This unit applies to staff members with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation. Those undertaking this unit would work under appropriate supervision, performing routine tasks in a familiar context, and ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Treatment

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess sites for reclaimed

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify soil and water interactions and soil properties

- water irrigation** important for plant growth
- 1.2** Identify soil sampling sites, collect samples and conduct soil testing according to workplace procedures
 - 1.3** Classify soils using field texture, pH and structure analysis
 - 1.4** Monitor and determine the water holding capacity of soil
- 2 Assess quality of reclaimed water for irrigation**
 - 2.1** Sample and test reclaimed water and interpret quality parameters
 - 2.2** Determine crops suitable for the quality of reclaimed water and worksite conditions
- 3 Implement reclaimed water irrigation**
 - 3.1** Identify features of irrigation systems
 - 3.2** Operate and maintain irrigation equipment according to manufacturer instructions
 - 3.3** Identify and apply irrigation scheduling options for reclaimed water
 - 3.4** Produce water budgets using crop factors and climate data
 - 3.5** Apply irrigation water and collect and monitor tail water or runoff
- 4 Respond to water or soil quality issues**
 - 4.1** Develop irrigation management options to respond to water quality issues
 - 4.2** Identify and apply requirements and options for soil ameliorants
 - 4.3** Monitor infiltration and drainage
- 5 Compile reclaimed water irrigation records**
 - 5.1** Compile reports from system data according to workplace procedures
 - 5.2** Report observations outside defined parameters for further action to relevant personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPTRT062 Operate and control reclaimed water irrigation.

Assessment Requirements for NWPTRT028 Operate and control reclaimed water irrigation

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing critical aspects of reclaimed water reuse management relating to the project or site
- applying environmental policies, plans and procedures
- assessing environmental risks at the worksite
- identifying environment, health and safety risks and impact on soil, stock and operators
- identifying soil groups
- implementing reclaimed water reuse irrigation
- monitoring and managing soil
- monitoring, operating and controlling reclaimed water irrigation
- participating in and contributing to reviews of reclaimed water reuse procedures
- sampling and testing soil and water
- solving operational problems
- using safety and personal protective equipment (PPE)

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- best management practices for the use of reclaimed water for irrigation purposes
- community and agency roles and responsibilities in monitoring water quality
- effects of weather and conditions on operation of site or plant
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- interpretation and use of safety data sheets
- key characteristics of reclaimed water
- key principles of irrigation practices, including irrigation scheduling
- primary agencies involved in drinking water quality management
- reclaimed water usage licensing procedures and requirements
- relevant legislative requirements

- soil groups
- water hazardous agents and preventative strategies
- water quality performance indicators
- water supply system
- workplace procedures

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

PMBWELD301 Butt weld polyethylene plastic pipelines

Modification History

Release 1. Supersedes and is equivalent to PMBWELD301B Butt weld polyethylene plastic pipelines

Application

This unit of competency covers the skills and knowledge required to butt weld polyethylene (PE) plastic pipelines. It applies to welding undertaken in the field and in factory conditions. Pipelines may be for transmission of gas or liquids.

This unit of competency applies to experienced operators who are required to calculate appropriate welding parameters to be used, set up equipment, perform butt weld, assess joints against specifications and solve problems within area of responsibility.

This unit of competency applies to an experienced operator demonstrating theoretical and technical knowledge and well developed skills in situations that require some discretion and judgement. The operator may work alone or as a member of a team or group and will work in liaison with other shift team members, team leader and supervisor, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Welding

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---|-----|---|
| 1 | Identify materials as being compatible for welding | 1.1 | Identify materials as polyethylene (PE) from specifications and work site instructions |
| | | 1.2 | Identify PE materials and pipes supplied as being compatible for welding from specifications |
| 2 | Calculate appropriate pipe welding parameters | 2.1 | Identify welding machine type and operating data |
| | | 2.2 | Identify pipe materials and dimensions |
| | | 2.3 | Perform welding parameter calculations for individual welding machines and pipe details |
| | | 2.4 | Prepare field operational sheets as per enterprise requirements |
| 3 | Maintain and calibrate welding equipment | 3.1 | Set up welding equipment and work area |
| | | 3.2 | Ensure safety equipment is available and operational |
| | | 3.3 | Identify non-conformance, report and rectify |
| | | 3.4 | Check operation and calibrate where required, heating, trimming, and pressure systems |
| 4 | Perform welding to required standard | 4.1 | Assemble pipeline components in welding machine |
| | | 4.2 | Clean, align and trim pipe ends |
| | | 4.3 | Perform heating, welding, and cooling phases using calculated welding parameters |
| | | 4.4 | Monitor and record achieved weld parameters for each joint according to enterprise requirements |
| | | 4.5 | Clean up equipment when completed according to enterprise procedures |
| | | 4.6 | Clean up work site, dispose of scrap materials according to enterprise procedures |
| | | 4.7 | Use personal protective equipment (PPE) according to enterprise requirements |

- | | | | |
|---|---|-----|---|
| 5 | Assess quality of completed joints | 5.1 | Identify quality requirements for joints |
| | | 5.2 | Assess joints against specification requirements, and report results |
| | | 5.3 | Identify and report non-conformances according to enterprise requirements |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used.

Applicable legislation, regulations, standards and codes of practice include:

- health, safety and environmental (HSE) legislation, regulations and codes of practice relevant to the workplace, manual handling and hazardous materials
- Australian/international standards relevant to the materials being used and products being made, including one or more of:
 - AS/NZS 4130:2009 Polyethylene (PE) pipes for pressure applications, or its replacement
 - AS/NZS 4131:2010 Polyethylene (PE) compounds for pressure pipes and fittings, or its replacement
 - AS/NZS 4401:2006 Plastics piping systems for soil and waste discharge (low and high temperature) inside buildings - Polyethylene (PE), or its replacement
 - AS/NZS 5065:2005 Polyethylene and polypropylene pipes and fittings for drainage and sewerage applications, or its replacement

- ISO 21307:2011 Plastics pipes and fittings -- Butt fusion jointing procedures for polyethylene (PE) pipes and fittings used in the construction of gas and water distribution systems or its replacement
- any relevant licence and certification requirements.

All operations to which this unit applies are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and such requirements the legislative requirements take precedence.

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or any combination of:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Tools and equipment

Tools and equipment include:

- hydraulic activated butt welding machines
- pipe supports
- measurement devices, including one or more of:
 - pressure gauges
 - timers
 - temperature probes
 - callipers
 - computer-based pressure/temperature monitors
- cleaning equipment
- spray equipment.

Additional tools and equipment will be selected as required from:

- hand tools used in this process

- hoists/lifting equipment not requiring any special permits or licences
- manual handling, aids such as hand carts and trolleys
- relevant PPE.

Hazards

Hazards must be identified and controlled. Identifying hazards requires consideration of:

- power tools, leads and power supplies
- hazardous products and materials
- cutting equipment
- sharp edges, swarf and scrap
- protrusions or obstructions
- slippery surfaces, spills or leaks
- rotational equipment or vibration
- smoke, dust, vapours or other atmospheric hazards
- high temperatures
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- equipment failures
- machinery, equipment and product mass
- other hazards that might arise.

Problems

Routine and non-routine problems must be resolved.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person.

Non-routine problems are unexpected problems or variations of previous problems and include one or more of:

- variations in quality
- emergency situations
- intermittent faults.

Operational knowledge includes one or more of:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people.

Routine problems are predictable and have known solutions and include one or more of:

- variable PE materials and pipes as supplied
- equipment malfunction or wear and tear
- variable field site conditions.

Unit Mapping Information

Release 1. Supersedes and is equivalent to PMBWELD301B Butt weld polyethylene plastic pipelines

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=932aacef-7947-4c80-acc6-593719fe4090>

Assessment Requirements for PMBWELD301 Butt weld polyethylene plastic pipelines

Modification History

Release 1. Supersedes and is equivalent to PMBWELD301B Butt weld polyethylene plastic pipelines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- read and interpret designs, plans, patterns, procedures, job specifications, instruments/control panels, material labels and safety data sheets (SDS)
- plan the welding process and sequence tasks
- use mathematics to calculate welding parameters
- set up butt welding equipment and materials/components to meet specifications
- operate the equipment to weld the materials
- monitor key variables, including:
 - temperature
 - pressure
 - alignment
 - colour and uniformity
 - surface finish/appearance
 - tolerance for weld/joint
 - consistency of weld
 - product output rate
 - mechanical strength of weld (e.g. tensile strength results)
 - product integrity and general conformance to specification
- make adjustments to remedy faults and nonconformity
- maintain output and product quality using appropriate instruments, controls, test information and readings
- calibrate equipment according to procedures
- identify hazards and apply relevant hazard controls
- apply safety procedures
- apply housekeeping procedures
- apply waste management procedures
- recognise early warning signs of equipment/processes needing attention or with potential problems
- distinguish between causes of problems, including:
 - operational problems

- instrument failure/malfunction
- electrical failure/malfunction
- mechanical failure/malfunction
- wrong readings
- equipment design deficiencies
- materials properties
- process variables
- raw material variations/contamination
- process abnormalities
- procedural errors
- recognise and prioritise problems requiring action
- resolve routine and non-routine problems
- communicate effectively with team/work group and supervisors
- complete workplace records.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including knowledge of:

- function and operating principles of butt welding equipment, components and ancillary equipment
- types and application of butt welding processes and their effect on the welded product
- impact of variations in welding process variables and raw materials on product quality and production output
- factors which may affect product quality or production output and appropriate remedies
- characteristics of materials and their behaviour in relation to welding process variables and stages of production
- quality requirements at each production stage
- common adjustments in process variables and their impact on product quality and production output
- impact of variations in raw materials and equipment operation in relation to final product
- possible changes to materials properties to better suit specific process requirements
- routine and non-routine problems that may arise, the range of possible causes and appropriate actions
- organisation procedures relevant to the work environment/job role
- hierarchy of control
- hazards that may arise in the job/work environment and:
 - their possible causes
 - potential consequences
 - appropriate risk controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- In all plants it may be appropriate to assess this unit concurrently with units such as:
 - teamwork
 - communication.
- Where the assessee does not currently possess evidence of competency in *PMBPROD287 Weld plastics materials*, it may be co-assessed with this unit.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
 - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
 - must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start and stop procedures and responding to problems
 - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from demonstration of skills and one or more of:
 - walk-throughs
 - pilot plant operation
 - industry-based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition the assessor or anyone acting in subject matter expert role in assessment shall demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
 - relevant VET or other qualification/Statement of Attainment
 - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
 - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
 - being currently employed undertaking the type of work being assessed
 - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
 - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
 - conducting on the job training/assessments of the type of work being assessed
 - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMBWELD302 Electrofusion weld polyethylene pipelines

Modification History

Release 1. Supersedes and is equivalent to PMBWELD302B Electrofusion weld polyethylene pipelines

Application

This unit of competency covers the skills and knowledge required to weld polyethylene (PE) plastic pipes using electrofusion. It applies to welding of pipes and pipelines undertaken in the field and in factory conditions. Pipelines may be for transmission of gas or liquids.

This unit of competency applies to experienced operators who are required to select welding parameters to be used, set up equipment, perform electrofusion weld, assess joints against specifications and solve problems within area of responsibility.

This unit of competency applies to an experienced operator demonstrating theoretical and technical knowledge and well developed skills in situations that require some discretion and judgement. The operator may work alone or as a member of a team or group and will work in liaison with other shift team members, team leader and supervisor, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Welding

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Identify compatibility of commercial electrofusion control systems**
 - 1.1 Identify electrofusion welding control unit type and operating data
 - 1.2 Identify pipe material and dimension compatibility with electrofusion fittings
 - 1.3 Identify control unit compatibility with electrofusion fitting control

- 2 **Maintain and calibrate electrofusion control unit equipment**
 - 2.1 Set up electrofusion welding equipment and work area according to enterprise procedures
 - 2.2 Ensure safety equipment is available and operational according to enterprise procedures
 - 2.3 Identify non-conformance, report and rectify according to enterprise procedures
 - 2.4 Determine equipment is operational according to specifications

- 3 **Perform electrofusion welding to required standard**
 - 3.1 Prepare pipe and fitting according to specification
 - 3.2 Perform heating, welding and cooling phases using selected electrofusion welding parameters
 - 3.3 Monitor and record achieved electrofusion weld parameters for each joint according to enterprise procedures
 - 3.4 Clean up equipment when completed according to enterprise procedures
 - 3.5 Clean up work site, dispose of scrap materials according to operational procedures

- 4 **Assess quality of completed electrofusion joints**
 - 4.1 Identify quality requirements for electrofusion joints according to specifications
 - 4.2 Assess joints against specification requirements and report results
 - 4.3 Identify and report non-conformances according to enterprise requirements

5	Identify compatibility of commercial electrofusion control systems	5.1	Identify electrofusion welding control unit type and operating data
		5.2	Identify pipe material and dimension compatibility with electrofusion fittings
		5.3	Identify control unit compatibility with electrofusion fitting control

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used.

Applicable legislation, regulations, standards and codes of practice include:

- health, safety and environmental (HSE) legislation, regulations and codes of practice relevant to the workplace, manual handling and hazardous materials
- Australian/international standards relevant to the materials being used and products being made, including one or more of:
 - AS/NZS 4129:2000 Fittings for polyethylene (PE) pipes for pressure applications, or its replacement
 - AS/NZS 4130:2009 Polyethylene (PE) pipes for pressure applications, or its replacement
 - AS/NZS 4131:2010 Polyethylene (PE) compounds for pressure pipes and fittings, or its replacement
 - AS/NZS 4401:2006 Plastics piping systems for soil and waste

- discharge (low and high temperature) inside buildings - Polyethylene (PE), or its replacement
- ISO 21307:2011 Plastics pipes and fittings -- Butt fusion jointing procedures for polyethylene (PE) pipes and fittings used in the construction of gas and water distribution systems, or its replacement
- any relevant licence and certification requirements.

All operations to which this unit applies are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and such requirements the legislative requirements take precedence.

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or any combination of:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Tools and equipment

Tools and equipment include:

- calibrated output electrofusion control units
- pipe clamp supports
- measurement devices, including one or more of:
 - timers
 - temperature probes
 - callipers
 - computer-based output monitors
- cleaning equipment
- spray equipment.

Additional tools and equipment will be selected as required from:

- hand tools used in this process

- hoists/lifting equipment not requiring any special permits or licences
- manual handling aids, such as hand carts and trolleys
- relevant personal protective equipment (PPE).

Hazards

Hazards must be identified and controlled. Identifying hazards requires consideration of:

- power tools, leads and power supplies
- hazardous products and materials
- cutting equipment
- sharp edges, swarf and scrap
- protrusions or obstructions
- slippery surfaces, spills or leaks
- rotational equipment or vibration
- smoke, dust, vapours or other atmospheric hazards
- high temperatures
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- equipment failures
- machinery, equipment and product mass
- other hazards that might arise.

Problems

Routine and non-routine problems must be resolved.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person.

Non-routine problems are unexpected problems or variations of previous problems and include one or more of:

- variations in quality
- emergency situations
- intermittent faults.

Operational knowledge includes one or more of:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people.

Routine problems are predictable and have known solutions and include one or more of:

- variable PE materials and pipes as supplied
- equipment malfunction or wear and tear
- variable field site conditions.

Unit Mapping Information

Release 1. Supersedes and is equivalent to PMBWELD302B Electrofusion weld polyethylene pipelines

Links

Assessment Requirements for PMBWELD302 Electrofusion weld polyethylene pipelines

Modification History

Release 1. Supersedes and is equivalent to PMBWELD302B Electrofusion weld polyethylene pipelines

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- read and interpret designs, plans, patterns, procedures, job specifications, instruments/control panels, material labels and safety data sheets (SDS)
- plan the welding process and sequence tasks
- set up electrofusion welding equipment and materials/components to meet specifications
- prepare electrofusion joint assemblies
- operate the electrofusion control unit to weld the materials/components
- monitor key variables, including:
 - voltage
 - fusion time
 - cooling time
 - alignment
 - product output rate
 - product integrity and general conformance to specification
- maintain and calibrate equipment according to procedures
- identify hazards and apply relevant hazard controls
- apply safety procedures
- apply housekeeping procedures
- apply waste management procedures
- recognise early warning signs of equipment/processes needing attention or with potential problems
- distinguish between causes of problems, including:
 - operational problems
 - instrument failure/malfunction
 - electrical failure/malfunction
 - mechanical failure/malfunction
 - wrong readings
 - materials properties
 - process variables
 - raw material variations/contamination

- procedural errors
- recognise and prioritise problems requiring action
- resolve routine and non-routine problems
- communicate effectively with team/work group and supervisors
- complete workplace records
- do basic arithmetical manipulations, including additions, subtractions, divisions, fractions and percentages.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including knowledge of:

- function and operating principles of electrofusion welding equipment, components and ancillary equipment
- impact of variations in welding process variables and raw materials on product quality and production output
- factors which may affect product quality or production output and appropriate remedies
- characteristics of materials and their behaviour in relation to welding process variables and stages of production
- quality requirements at each production stage
- common adjustments in process variables and their impact on product quality and production output
- routine and non-routine problems that may arise, the range of possible causes and appropriate actions
- organisation procedures relevant to the work environment/job role
- hierarchy of control
- hazards that may arise in the job/work environment and:
 - their possible causes
 - potential consequences
 - appropriate risk controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- In all plants it may be appropriate to assess this unit concurrently with units such as:
 - teamwork
 - communication.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant

- will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start and stop procedures and responding to problems
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from demonstration of skills and one or more of:
 - walk-throughs
 - pilot plant operation
 - industry-based case studies/scenarios
 - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition the assessor or anyone acting in subject matter expert role in assessment shall demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
 - relevant VET or other qualification/Statement of Attainment
 - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
 - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions

- Currency can be demonstrated through one or more of:
 - being currently employed undertaking the type of work being assessed
 - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
 - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
 - conducting on the job training/assessments of the type of work being assessed
 - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PSPPCY004 Support policy implementation

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPPOL404A Support policy implementation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to identify, implement and monitor relevant policy and report on implementation.

This unit applies to public sector staff and other stakeholders working in a role where they are required to support policy implementation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Policy

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify relevant policy	1.1 Identify work situations that are shaped by government or organisation policy. 1.2 Identify and locate policy relating to particular work situations.
2. Implement policy	2.1 Interpret policy to be implemented to identify and plan for change in work practices. 2.2 Identify the implications of policy for individual work practices, confirm and adjust practices to reflect policy requirements. 2.3 Support others affected by policy requirements to accommodate those requirements.
3. Monitor and report on policy implementation	3.1 Gather, record and report information that will assist with the evaluation of the effectiveness of policy implementation. 3.2 Gather, record and report information that will assist with evaluation of policy impact on organisational outcomes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPOL404A Support policy implementation.

Assessment Requirements for PSPPCY004 Support policy implementation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion:

- reading complex and formal documents and providing information on their application
- preparing accurate written reports with language and structures suited to the intended audience
- working with legislation drafters and legal advisers
- consulting on and preparing policy guidelines
- adjusting communication to suit different audiences
- gathering and analysing policy feedback

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- practices and procedures for developing policy guidelines
- policy feedback mechanisms
- current organisation policies
- government policies and international policy obligations that impact on organisation policy
- organisation and government procedures and protocols
- public sector codes of ethics and code/s of conduct

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPREG003 Apply regulatory powers

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPREG401C Exercise regulatory powers.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to cover the exercise of powers under the organisation's enabling legislation and other relevant legislation for regulation, monitoring, inspection and investigation.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently as part of a team, performing routine tasks involving a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Regulatory

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish regulatory powers	<p>1.1 Access and use current information relating to enabling legislation and regulations to maintain up-to-date knowledge of requirements.</p> <p>1.2 Confirm powers provided under the legislation and the boundaries of those powers.</p> <p>1.3 Identify and confirm compliance requirements of the legislation, related regulations, standards, codes of practice and policy.</p> <p>1.4 Identify and confirm acts and omissions that comprise non-compliance or offences under the legislation.</p>
2. Apply enabling legislation	<p>2.1 Identify and analyse circumstances where regulatory powers will be exercised to determine response or measures to apply.</p> <p>2.2 Identify circumstances requiring the exercise of regulatory powers that are outside own limits and refer to others.</p> <p>2.3 Identify risks associated with the exercise of regulatory powers and strategies to manage risks.</p> <p>2.4 Apply enabling legislation consistent with the boundaries and powers contained therein.</p>
3. Utilise other legislation and standards	<p>3.1 Identify other legislation and standards which impact on powers and confirm their requirements.</p> <p>3.2 Resolve or refer apparently conflicting legislative directions.</p>
4. Work with other organisations	<p>4.1 Identify organisations that have jurisdictions which may overlap and establish and maintain relationships.</p> <p>4.2 Identify organisations available to provide assistance and advice or take referrals and establish relationships for mutual benefit.</p> <p>4.3 Follow organisational protocols and procedures when working with other organisations.</p> <p>4.4 Refer compliance matters to other organisations for action when required.</p> <p>4.5 Follow lead agency protocols and/or lines of authority during operations involving more than one organisation.</p>

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPREG401C Exercise regulatory powers.

Assessment Requirements for PSPREG003 Apply regulatory powers

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis
- using information technology to access relevant legislation and procedures
- reading complex written materials and applying them to work practices
- using scanning techniques
- engaging in discussion involving exchanges of often complex oral information
- choosing regulatory responses and/or measures to fit the circumstances and justifying those responses against legislation, guidelines, policy and regulations

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- full range of regulatory powers and the limits to those powers
- enabling legislation
- offences under the legislation
- aspects of criminal law, administrative law, industrial law, contract law
- statutory time limits
- terminology used in legislation and procedures
- organisational policies, guidelines and regulations
- public sector legislation including, health and safety and environment relating to the exercise of regulatory powers

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPREG008 Act on non-compliance

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPREG405B Act on non-compliance.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to issue advice, instructions, warnings, notices, fines and other actions in response to non-compliance situations. It includes attending situations where non-compliance is suspected or alleged, and taking action on non-compliance.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work in as part of a team under routine guidance, performing routine tasks in a range of mostly familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Regulatory

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Attend situations where non-compliance is suspected/alleged	1.1 Follow procedure. 1.2 Maintain personal conduct. 1.3 Protect the safety of self and others. 1.4 Make prompt requests for assistance. 1.5 Carry out activities and actions in accordance with rules of evidence.
2. Take action on non-compliance	2.1 Consider mitigating circumstances. 2.2 Select action on non-compliance to match the seriousness of the offence. 2.3 Inform clients of the action, justification for it and their rights of appeal. 2.4 Take action in accordance with legal requirements. 2.5 Carry out personal actions and/or conduct in accordance with protocols and protect the rights and responsibilities of clients.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPREG405B Act on non-compliance.

Assessment Requirements for PSPREG008 Act on non-compliance

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking negotiation and conflict resolution
- applying risk management and self-preservation techniques
- using judgment and decision making
- exchanging often complex oral information in a form to suit diverse audiences
- writing requiring accuracy of expression and formality in structure and format

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation
- organisational parameters for decision-making
- range of appropriate actions possible for different offences
- negotiation in the context of achieving compliance
- awareness of social and cultural issues

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUACOM012 Liaise with media at a local level

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to liaise with media at an incident and for providing information about local events. It includes determining media requirements for providing information to publicise an event.

The unit is applicable to personnel of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Communication

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Determine media requirements

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Organisational procedures are followed when liaising with the media
- 1.2 Media's potential interest is assessed and arrangements are made to meet their needs

- | | | |
|---------------------------------------|------------|---|
| | 1.3 | Operational responsibilities are balanced against provision of information to the media |
| 2 Provide information to media | 2.1 | A positive image of the organisation is maintained when liaising with the media |
| | 2.2 | Every opportunity is used to promote the organisation, its services and personnel, in accordance with organisational requirements |
| | 2.3 | Information is supplied to the media when operational situation permits |
| 3 Publicise an event | 3.1 | Relationship is established with media contacts, in accordance with organisational requirements |
| | 3.2 | Event details and support materials are gathered and presented in a logical and concise manner to the media |
| | 3.3 | Information provided to media is recorded and maintained, in accordance with organisational requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUACOM012B Liaise with media at a local level.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUACOM012 Liaise with media at a local level

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- communicating facts
- determining media requirements
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- liaising with media and other organisations
- maintaining positive image of the organisation to the media
- prioritising between operational responsibilities and provision of information to media
- providing information to the media
- publicising an event

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication techniques and skills
- media relationships
- media requirements
- operational responsibilities
- opportunities for media interest and events
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and procedures relating to media liaison
- presentation of information in a newsworthy and informative manner
- provision of relevant and succinct information
- requirements of different media
- role of media in disseminating information

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, regulations, codes of practice and operation manuals.

PUAEMR005 Treat operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to identify, plan and implement treatment options to reduce risk. It includes making risk decisions by identifying, assessing and implementing risk control measures, treatment options and monitoring and reviewing risk mitigation processes.

The unit applies to personnel working in a relatively simple and routine workplace in which organisational policy and procedures are used. They would normally have local supervisory and/or management responsibility and will apply appropriate solutions to a variety of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

PUAEMR027 Assess operational risk

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Make risk decisions

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Hazards are identified and risks are assessed, in accordance with operational policies and procedures

- | | | |
|--|------------|--|
| | 1.2 | Risk that is determined as unacceptable is documented and noted for treatment |
| 2 Identify and select treatment options | 2.1 | Treatment options of known risks are identified and confirmed, in accordance with organisational standards, guidelines and supervisor's guidance |
| | 2.2 | Treatment options under consideration are evaluated for effectiveness within the given context |
| | 2.3 | Selected treatment options are documented and communicated, in accordance with organisational policies and procedures |
| 3 Implement treatment options | 3.1 | Treatment plans incorporating selected options are implemented, in accordance with organisational policies and procedures |
| | 3.2 | Treatment plans are communicated within the workplace, in accordance with organisational policies and procedures |
| 4 Monitor and review risks and process | 4.1 | Effectiveness and efficiency of the treatment plan is monitored, reviewed and recorded, in accordance with organisational policies and procedures, to ensure compliance and validity |
| | 4.2 | Residual risk is calculated and communicated to supervisors, so that a decision can be made whether to accept the risk or re-establish the risk management process |
| | 4.3 | Treatments are adjusted and communicated following the review process |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR026 Treat operational risk.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAEMR005 Treat operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least three separate occasions and includes

- communicating with personnel at all levels of organisation and risk management specialists
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- implementing and monitoring designated actions
- implementing treatment options including identifying and selecting treatment options
- interpreting information and data to identify areas for improvement
- making observations and recording outcomes accurately
- managing simple project implementation
- monitoring and reviewing risks mitigation processes
- undertaking basic research to access relevant information and data
- using consultation and negotiation skills in relation to developing plans

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- duty of care
- communication techniques
- legislation including regulations, codes of practice, associated standards and guidance material
- organisational documentation, policies, procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- guidelines relevant to risk
- risk assessment including
 - benefits to individual and organisation
 - cost benefits from implementation of treatment
 - cost of implementing treatment option
- risk management terminology and language relevant to industry standards including

- acceptable risk
- residual risk
- unacceptable risk
- specified methods or tools for use in the identification and analysis of risk
- team work principles and strategies
- techniques and methods used to identify or analyse risk management information
- techniques for giving and receiving feedback in a constructive manner
- treatment options for risks including
 - avoidance of risk
 - changing consequences of an identified hazard impact
 - changing likelihood of an initiating event or source of risk occurring
 - hazard impacting on elements at risk
 - removing a risk source
 - retaining risk based on an informed decision
 - risk mitigation
 - sharing risk
 - treatment options may
- treatment plans including
 - budgeting
 - expected outcome of treatments
 - performance measures
 - responsibilities
 - review process to be used
 - schedules

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder involvement throughout the treatment process and that an informed analysis and selection of treatment options has been

undertaken using the methodology and procedures approved by the organisation.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR006 Assess operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to identify and assess risk in an operational environment. It includes establishing the risk context by identify, analysing and evaluating risk.

The unit of competency applies to personnel at a relatively simple and routine level, in which they are using established organisational policy and procedures. Personnel would normally have local supervisory or management responsibility and apply appropriate solutions to a variety of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Establish the risk context

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Risk assessment objectives and scope are identified using organisational risk management procedures, industry standards and guidelines
- 1.2** Risk criteria are identified and confirmed, in accordance with organisational policies, procedures or with

supervisor's guidance

- 1.3 Structure for planning required to conduct a risk assessment is determined
 - 1.4 Stakeholder aims and objectives are identified and recorded, in accordance with organisational procedures and guidelines
- 2 Identify risk**
 - 2.1 Sources of risk which affect the situation or objectives are identified and recorded, in consultation with stakeholders
 - 2.2 Risks are identified using a specified methodology or tool, in accordance with organisational procedures and guidelines
 - 2.3 Risk statements describing consequences are generated, in accordance with organisational procedures
- 3 Analyse risk**
 - 3.1 Risks are analysed by estimating the likelihood of consequences, in accordance with organisational procedures
 - 3.2 Levels of risk are determined, documented and communicated, in accordance with organisational policies and procedures
- 4 Evaluate risk**
 - 4.1 Levels of risks are prioritised for control, in consultation with stakeholders
 - 4.2 Risk assessment rating is compared to established risk evaluation criteria and is communicated to the supervisor
 - 4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR027 Assess operational risk.

Assessment Requirements for PUAEMR006 Assess operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least three separate occasions and includes

- analysing organisational information and data
- communicating with stakeholders
- contributing to the assessment of resources
- establishing risk context and identifying, analysing and evaluating risk
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- interpreting information and data to identify areas for improvement
- making observations including interactions between personnel, their activities, equipment, environment and systems
- preparing detailed reports for a range of target groups including WHS/OHS or risk committee, WHS/OHS representatives, managers and supervisors
- undertaking basic research including accessing information and data
- using consultation and negotiation skills in relation to developing plans and implementing and monitoring designated actions

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of

- communication techniques including language style and active listening
- concept of duty of care in emergency risk management
- organisational documentation, policies, procedures and guidelines including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- principles of operational risk assessment
- risk management terminology and language
- risk profiles or criteria including
 - how likelihood will be defined
 - level at which risk becomes acceptable or tolerable

- nature and types of causes and consequences that can occur and how they will be measured
- risk mitigation and how level of risk is determined
- roles and responsibilities in assessing risk
- timeframes of likelihood or consequences
- views of stakeholders
- whether combinations of multiple risks should be considered and if so how and which combinations should be considered
- specified methods and tools used in the identification and analysis of risk
- structure and forms of legislation including regulations, codes of practice, industry standards and guidance material
- techniques and methods used to identify and analyse information

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAFER008 Confine small emergencies in a facility

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to confine small emergencies in a facility and it applies to occupants who are required to have first attack firefighting skills. It includes preparing for emergency situations, identifying and assessing an emergency, safely confining emergencies, using initial response equipment and reporting on the facility's emergency response.

Small emergencies in a facility include incidents such as small fires that can be controlled using a fire extinguisher; chemical spills that can be controlled using facility personal protective clothing and equipment and a spill kit; or a vehicle accident where there is no significant injury or damage.

The unit has been developed to cover the facilities as specified in Australian Standard (AS) 3745 and AS4083. For this unit, as covered by AS3745 and/or AS4083, occupants are people attending a facility on a permanent or temporary basis such as an employee, contractor, student or resident, but not a visitor or patient and a facility is a building, structure or workplace that is, or may be, occupied by people (occupants).

All aspects of the unit must be undertaken in line with legislative requirements, organisational policies and procedures, and accepted safe work practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Facility Emergency Response

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for emergency situations

1.1 Possible facility emergency situations and responses are identified by the occupant

1.2 Emergency resources are identified and their location is ascertained

1.3 Problems with emergency resources are identified and reported to relevant personnel, in accordance with the facility emergency plan

2 Identify and assess emergency

2.1 Hazards are identified and effectiveness of initial response actions are assessed

2.2 Advice in relation to the emergency is sought, in accordance with the facility emergency plan

2.3 Where initial response actions are considered unsafe or inappropriate action is taken to discontinue, in accordance with the facility emergency plan

3 Safely confine emergencies

3.1 Facility emergency is confined to the immediate area, in accordance with facility emergency response procedures

3.2 Emergency resources are used, in accordance with facility emergency response procedures and safe work practices

3.3 Emergency resources are used, in accordance with facility emergency response procedures

4 Use initial response equipment

4.1 Initial response equipment is checked to ensure its serviceability prior to use

4.2 Equipment is selected and used in response to the facility emergency

4.3 Use of equipment is coordinated with other emergency actions, in accordance with the facility emergency plan

5 Report facility emergency response

5.1 Emergency and response is documented and reported, in accordance with the facility emergency plan

5.2 Use of initial response equipment is documented and

reported, in accordance with the facility emergency plan

- 5.3 Initial response equipment is marked or positioned after use, in accordance with the facility emergency plan and a report to relevant personnel is completed to indicate if any equipment requires servicing and/or replacing

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAWER008B Confine small facility emergencies.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFER008 Confine small emergencies in a facility

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with occupants, emergency personnel and stakeholders
- complying with facility policies and procedures
- confining emergencies safely
- giving and following instructions
- identifying and acting to avoid or control any associated hazards
- identifying and assessing an emergency
- implementing facility emergency response procedures
- preparing for emergency situations
- reporting facility emergency response
- restowing initial response equipment
- using initial response equipment
- utilising risk management processes

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- actions to be followed when initial response action is not safe
- facilities and equipment that may be used safely to confine emergencies
- facility emergency plan and emergency response procedures
- initial response actions including activation of response team, activation of suppression systems, use of alerts, containment of emergency, evacuation of area, removal of occupants from danger, removal of emergency, basic aid, shut down procedures, use of containment systems and use of portable fire extinguishers, fire blankets and/or hose reels
- kinds of emergency resources
- legislation, industry standards, codes of practice and regulations
- limitations of initial response equipment, emergency control equipment or facilities

- methods of extinguishment
- organisational/facility documentation, policies and procedures
- possible hazards types of emergencies
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant activities, exercises, case studies and/or simulations
 - reflective of a range of emergency situations that may be expected in a facility
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational policies, facility emergency plan and emergency response procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR008 Operate aerial ignition equipment in an aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, operate and maintain aerial ignition equipment in an aircraft. It includes preparing aerial ignition equipment, conducting aerial ignition operations and servicing, maintaining and storing ignition equipment.

Equipment may comprise automated incendiary machines and handheld manual incendiary injection. The ignition equipment is used to drop consumables such as incendiaries from a fixed wing aircraft, helicopter or a remotely piloted aircraft as part of aerial ignition operations.

Aerial ignition equipment introduces fire into the landscape in order to ignite either prescribed burn or burning as part of a fire suppression strategy. Because of the risks involved aerial ignition must be conducted in accordance with an approved burn plan or incident action plan with the ignition sequence and intervals planned and monitored.

The unit is applicable to a person required to operate ignition equipment in a helicopter in order to ignite either a prescribed burn or burning as part of a fire suppression strategy. An incendiary operations supervisor is responsible for supervising the aerial ignition.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR017 Work safely around aircraft

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare aerial ignition equipment

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Personal protection clothing and equipment and other safety equipment is checked and worn in accordance with organisational procedures
- 1.2 Requirements for aerial ignition operations are identified and confirmed with relevant personnel
- 1.3 Activities are undertaken in accordance with standards, legislation, organisational procedures and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- 1.4 Ignition equipment and consumables to be used are confirmed
- 1.5 Ignition equipment and consumables are stored and transported in accordance with organisational procedures and regulatory requirements
- 1.6 Ignition equipment is installed in aircraft in accordance with organisational procedures and aircraft operator requirements
- 1.7 Ignition equipment is inspected and tested to ensure correct operation, where required
- 1.8 Consumables are loaded into ignition equipment in accordance with organisational procedures

2 Conduct aerial ignition operations

- 2.1 Principles of team resources management are established and maintained for aerial ignition operations
- 2.2 Briefing is received from pilot on aircraft safety including aircraft emergency procedures
- 2.3 Response procedures for emergency situations involving ignition equipment or aircraft are confirmed with pilot

and incendiary operations supervisor

- 2.4 Communication with pilot and incendiary operations supervisor is maintained to ensure aerial ignition operations achieves burn prescription
 - 2.5 Ignition equipment is operated in accordance with organisational procedures and manufacturers' specifications
 - 2.6 Adjustments to ignition equipment are undertaken, as required or requested
 - 2.7 Ignition operations are conducted in accordance with burn plan
- 3 Service, maintain and store ignition equipment**
- 3.1 Ignition equipment is isolated or shut down in accordance with organisational procedures and manufacturers' guidelines prior to departure of aircraft from ignition site
 - 3.2 Excess incendiary devices are stored or disposed of in accordance with organisational procedures
 - 3.3 Ignition equipment is serviced, maintained and repaired within scope of authority
 - 3.4 Ignition equipment faults are documented and forwarded to appropriate personnel for action
 - 3.5 Ignition equipment is stored and forwarded to appropriate personnel for maintenance

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR312 Operate aerial ignition equipment in an aircraft.

Assessment Requirements for PUA FIR008 Operate aerial ignition equipment in an aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- adhering to safe working practices if machine or ignition equipment malfunctions
- applying organisation procedures for aerial ignition
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including aircraft or other emergency procedures
- checking and wearing of personal protective clothing and equipment
- conducting aerial ignition operations using approved ignition equipment and consumables
- demonstrating pre-flight testing and installation, where required, of aerial ignition equipment
- operating for extended periods in an aircraft
- operating ignition equipment from an airborne aircraft
- preparing and maintaining ignition equipment
- receiving briefing from pilot on aircraft safety
- reporting equipment malfunctions, accidents and incidents
- servicing, maintaining, repairing and storing equipment and consumables
- shutting down or isolating ignition equipment
- using communications equipment
- using ignition equipment
- working as a member of a team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aircraft operator's policy and procedures for aerial ignition
- aircraft safety and emergency procedures
- characteristics and limitations of ignition equipment and consumables
- consumables such as capsules containing potassium permanganate and ethylene glycol (antifreeze)
- emergency procedures for equipment malfunction
- guidelines relating to safe use of ignition equipment used by organisation

- mechanical knowledge sufficient to service, maintain and repair aerial ignition equipment
- methods for disposal of excess consumables
- organisational policies and procedures for aerial ignition
- personal protection clothing and equipment for operating the aerial ignition equipment
- requirements for packing and transporting aerial ignition equipment and consumables
- risk mitigation and hazard identification
- roles and responsibilities of team involved in aerial ignition operations
- Team Resources Management (TRM) principles
- types and applications of aerial ignition equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions. Assessment will take place in a simulated environment followed by an assessment by an accredited operator on the job.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of exercises, case studies and/or simulations
- appropriate materials, equipment and tools currently used in industry including
 - aerial ignition equipment and consumables
 - an aircraft
 - an area to conduct operations
 - personal protective clothing and equipment and relevant safety equipment
 - safe disposal facilities
 - suitable tools for testing, maintenance and inspection of equipment
 - transport of consumables and ignition equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR017 Work safely around aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply safe work practices when working around aircraft for organisational operations. It includes working safely in or around aircraft and facilitating safe ground support.

The unit is applicable to the provision of introductory training for personnel providing support services for aerial operations, noting that personnel undertaking specialist functions such as aircraft marshalling, aircraft refuelling, fire suppressant mixing and loading and ground-to-air radio communications will require further training. It also applies to the provision of safety training for operational personnel who may be required to utilise aircraft or work in the vicinity of aircraft in the performance of their work tasks and/or the provision of foundation training for all aviation related roles for fire, land management and emergency management.

Work is performed independently or under limited supervision as a single operator or within a team environment.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Work safely in and around aircraft

- 1.1 Site and job hazards are identified, risks are assessed and control measures are implemented
- 1.2 Personal protective clothing and equipment is worn and used correctly in accordance with organisational procedures
- 1.3 Appropriate clearances and permissions, where required, are obtained and procedures are adhered to whilst operating in aircraft movement areas
- 1.4 Any approach to an operating aircraft is made from an angle visible to the pilot or air crew and with approval of the pilot or air crew
- 1.5 Adequate clearance is maintained from propellers, rotors, engines, exhaust gases and engine intakes
- 1.6 Typical manoeuvring patterns of aircraft are anticipated and a safe distance is maintained
- 1.7 Instructions or signals from pilots or staff controlling aircraft are complied with in accordance with organisational procedures

2 Facilitate safe ground support

- 2.1 Briefing on safety and tasks are received and acknowledged from task supervisor
- 2.2 Appropriate approvals and precautions are observed when positioning vehicles or equipment close to aircraft
- 2.3 Instructions from pilots and/or authorised air crew coordinating aircraft operations are followed
- 2.4 Aircraft loading and other activities relating to the aircraft, where required, are conducted under pilot or authorised air crew supervision
- 2.5 Aircraft hazards and equipment defects are reported to pilot or approved task supervisor
- 2.6 Compliance is maintained around aircraft in accordance with air base regulations

- 2.7 Accidents are identified and reported to pilot and/or task supervisor
- 2.8 Directions from pilot or air crew are followed during an emergency

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR209 Work safely around aircraft.

Assessment Requirements for PUAFIR017 Work safely around aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- complying with regulatory requirements and organisational procedures
- ensuring safety and quality procedures are applied
- following directions from pilot or air crew during an emergency
- identifying hazards and risks and acting to minimise, mitigate, control or eliminate
- implementing precautions and aviation emergency procedures, as required
- participating in briefings
- reporting accidents
- using personal protective clothing and equipment
- working safely around aircraft.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- actions to be taken in the event of an emergency
- air base site hazards
- airbase access and security requirements
- airbase layout, facilities and services including working zones and lighting facilities
- aircraft design features including 'no step' places
- aircraft features and movement characteristics
- aircraft operations including loading and refuelling precautions
- content of briefings
- correct selection, fitting and wearing of personal protective clothing and equipment for tasks to be performed
- hazards of working around aircraft
- organisational policies and procedures including safe work practices around aircraft
- risk identification and mitigation processes

- roles and responsibilities of personnel supervising, managing and supporting aircraft operations
- safety equipment including fire extinguisher and first aid kit
- types of aircraft which may include but is not limited to aeroplanes, helicopters, remotely piloted aircraft and their movement characteristics
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAFIR203 Respond to urban fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to an urban fire where offensive and defensive strategies are used. It includes proceeding to a fire, preparing extinguishing media and/or equipment for use, entering a structure, conducting search and rescues and combatting fires.

The unit applies to firefighting personnel who work as a member of a team, under direct supervision. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR207 Operate breathing apparatus open circuit

Competency Field

Fire

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Proceed to fire

- 1.1** Information received about the location and type of fire is confirmed
- 1.2** Appropriate personal protective clothing and equipment is donned, in accordance with organisational procedures
- 1.3** Most effective route to the fire is identified and navigated safely

2 Prepare extinguishing media and/or equipment for use

- 2.1** Water supplies at the incident to support firefighting are located
- 2.2** Equipment to access and supply water to firefighting operations are identified and assembled, in accordance with organisational procedures
- 2.3** Nominated extinguishing media and/or equipment is identified, obtained and accessed
- 2.4** Extinguishing media and equipment are used, in accordance with manufacturers' specifications and organisational procedures

3 Enter the structure

- 3.1** Hazards are identified, monitored and controlled, in accordance with organisational procedures
- 3.2** Personal protective clothing and equipment selected is appropriate to the hazards
- 3.3** Organisational breathing apparatus procedures and safe work practices are followed
- 3.4** Structure is entered, in accordance with organisational procedures and safety practices
- 3.5** Safe paths of access and egress are identified and maintained throughout the incident
- 3.6** Life is protected and damage to property and the environment is minimised, in accordance with organisational procedures

4 Conduct search and rescue

- 4.1** Systematic primary and secondary searches are conducted
- 4.2** Rooms are searched and marked, in accordance with organisational procedures

- 4.3 Casualties are located, assisted and rescued, in accordance with organisational procedures
 - 4.4 Fatalities are located and protected, in accordance with organisational procedures and relevant legislation
 - 4.5 All persons are accounted for and information is reported utilising the organisations chain of command.
- 5 Combat fires**
 - 5.1 Personal safety is maintained, in accordance with organisational procedures and workplace health and safety guidelines
 - 5.2 Organisational firefighting objectives, strategies and tactics are received, confirmed and implemented as directed
 - 5.3 Firefighting considerations are taken into account when implementing firefighting tactics
 - 5.4 Equipment and extinguishing media used to combat the fire are appropriate to the class of fire and support firefighting requirements
 - 5.5 Firefighting equipment is positioned to achieve maximum effect in suppressing the fire, protecting exposures and preserving evidence of fire cause
 - 5.6 Extinguishing media is applied using appropriate application techniques
 - 5.7 Fire suppression techniques are applied to minimise hazards to occupants trapped or lost within the structure
 - 5.8 Communication with team members and the supervisor are maintained throughout the incident
- 6 Observe and react to changes in conditions and fire behaviour**
 - 6.1 Changing conditions at the fire are observed and their effects on fire behaviour are noted and reported
 - 6.2 Evidence of changing conditions at the fire are reported
 - 6.3 Firefighting tactics are adapted to meet changing conditions and fire behaviour
- 7 Participate in ancillary operations**
 - 7.1 Ancillary activities to complement firefighting operations and prevent further damage to the structure and its contents are undertaken

- | | |
|---|---|
| 8 Conclude firefighting operations | <p>7.2 Water runoff from the fire is monitored and conditions are reported</p> <p>7.3 Damage to the environment at the incident is minimised through appropriate firefighting and ancillary activities</p> <p>8.1 Firefighting equipment is collected and stowed at the incident</p> <p>8.2 Incident scene is made safe for the public</p> <p>8.3 Defective or missing equipment is identified and reported</p> <p>8.4 Incident information is record and completed, in accordance with organisational procedures</p> |
|---|---|

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

types of fire must include

- fires involving dangerous goods and/or hazardous substances
- mobile property
- non-structures
- structures

personal protective clothing and equipment must include

- breathing apparatus
- eye protection
- hearing protection
- turnout uniform and gloves

water supplies must include

- open
- reticulated
- static

equipment must include

- and may also include other extinguishing substances
- BA and control equipment
- branches, nozzles and monitors

- extinguishing media must include:
- fire extinguishers
 - forcible entry tools
 - hoses and hose fittings
 - ladders and rope lines
 - portable lights
 - radios
 - salvage gear
 - small gear and ancillary equipment
 - standpipes, hydrants and booster connections
- extinguishing media must include:
- extinguishing powder
 - foam
 - gaseous extinguishing agents
 - water
- hazards must include three or more of the following:
- electricity, including photovoltaic generation
 - gas
 - hazardous products and materials
 - industrial (machinery, equipment and products)
 - smoke, darkness and heat
 - structural collapse
 - structural hazards
 - unauthorised personnel
- assisted must include
- first aid
 - handing over to ambulance, medical or other organisational care
 - protecting from the elements
 - providing refreshments
- firefighting objectives must include
- confining the spread of fire
 - extinguishment
 - protecting exposures
 - rescuing occupants
 - salvage and overhaul
 - ventilation
- fire strategies must include
- defensive mode
 - direct attack
 - indirect attack
 - offensive mode
- firefighting tactics must include
- cooling the fuels
 - excluding oxygen
 - interrupting the chemical chain reaction
 - removing fuels

firefighting considerations must include

- ventilation
- available firefighting resources
- extinguishing media
- fire exposures
- indications of extreme fire behaviour
- signs of structural collapse
- size of fire
- stage of fire development
- topography
- type of fire
- weather

firefighting activities must include

- anticipating fire behaviour
- applying extinguishing media
- applying techniques to maximise effect and minimise damage
- ensuring safety
- hose stream techniques
- locating and accessing fire
- protecting and notifying supervisor of evidence of fire cause
- search and rescue

changing conditions at the fire must include

- fire spread
- flame colour and size
- impending structural collapse
- increase in heat
- increase or decrease in fuel available to fire
- increase or decrease in heat of fire
- increase or decrease in oxygen available to fire
- other materials becoming involved in fire
- signs of structural collapse
- smoke colour
- weather conditions

evidence of changing conditions at the fire must include

- fire spread
- flame colour and size
- impending structural collapse
- increase in heat
- smoke colour
- weather conditions

ancillary activities must include

- damming water run off
- guarding against hazards
- making up equipment

recording appropriate incident information must include

- overhaul
- salvage
- securing the area
- attendance records
- completing personal notebooks logs and/or report forms
- equipment used
- objectives set
- obtain relevant details
- owner or occupant details
- problems encountered

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR203B Respond to urban fire.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR203 Respond to urban fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including maintaining the health and safety of self and others
- combating fires through implementing firefighting objectives, strategies and tactics
- concluding firefighting operations
- conducting search and rescue
- controlling fire environment by cooling fire gases
- entering structures affected by fire
- identifying hazardous materials
- instigating actions to avoid risk of injury
- moving in smoke and darkness
- observing and reacting to changes in conditions and fire behaviour
- obtaining water from reticulated or static water supplies
- operating a firefighting branch
- operating fire extinguishers
- participating in ancillary operations
- preparing extinguishing media and equipment for use
- proceeding to a fire
- recording incident information
- selecting and using firefighting equipment
- using extinguishing media on a fire
- using personal protective clothing and equipment
- using structural entry techniques
- utilising breathing apparatus, associated equipment and operational procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- ancillary activities
- basic signs of fire cause and activities for protecting evidence
- behaviour of a building or structure in a fire
- chain of command
- change in conditions at a fire caused by increase or decrease in
 - fuel available to fire
 - increase or decrease of oxygen available to fire
- different construction types and their behaviour in a fire
- equipment and tools used in fire suppression activities extinguishing media
- fire behaviour
- fire ground signals including audible and visual
- fire tetrahedron
- firefighting foams
- firefighting tasks, tactics and techniques
- hazardous materials identification
- hazards and actions to minimise, mitigate, control or eliminate
- identification of various building types including structural elements and materials, causes and signs of structural failure
- methods of heat transfer
- natural ventilation procedures
- navigation and map reading
- organisational documentation, policies and procedures including procedures for working with ladders, ropes, lines and tying knots
- portable fire extinguishers
- principles and methods of extinguishment
- salvage and overhaul
- signs of structural collapse
- water supplies
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety assessments and/or risk mitigation processes, safe work practices and personal protective clothing and equipment

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situation that reflects workplace conditions.

Competency should be assessed on the job and/or in a range of simulated fire environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- a relevant appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - range of controlled or simulated fires, firefighting equipment, extinguishing media and breathing apparatus and associated equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to a wildfire, work as a safe and situationally aware member of a crew to attack and extinguish a fire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to firefighting personnel who work as a member of a team. It includes preparing to respond to fire; proceeding to fire; obtaining and using firefighting equipment and extinguishing media; combating wildfire; observing and reacting to wildfire and weather conditions; participating in mop up and patrol activities; supporting operations and recovering and storing equipment. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

| | 5.2 | Weather conditions and changes to fire behaviour are observed and reported |
| | 5.3 | Variations in topography, fuel features and fuel arrangements are observed and reported |
| | 5.4 | Escape routes and safety zones are confirmed and maintained throughout the incident |
| | 5.5 | Communication is maintained with other firefighting personnel throughout operational activities |
| 6 Participate in mop up and patrol activities and support operations | 6.1 | Mopping up activities are carried out, as directed |
| | 6.2 | Patrol of the perimeter or sector of the fire is maintained, as directed |
| | 6.3 | Activities to support firefighting operations are carried out, as directed |
| 7 Recover and store equipment | 7.1 | Equipment and consumables are recovered, as directed |
| | 7.2 | Firefighting equipment is collected and stored at the incident |
| | 7.3 | Cleaning and maintenance are carried out in accordance with organisational procedures |
| | 7.4 | Damaged or lost equipment is identified and reported |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

extinguishing media must include two of the following

- class A foam
- retardants
- soil
- water
- wetting agents

personal protective clothing and equipment must include

- eye and head protection
- turnout uniform and gloves

types of wildfire must include

- surface

types of fuel must include one of the following

- forest
- grass
- scrub

firefighting equipment must include

- hand tools
- hose and small gear
- pump
- tanker

firefighting tactics must include

- control line construction
- mopping up
- patrol
- use of extinguishing media

suppression techniques must include

- dry and wet firefighting

Unit Mapping Information

Assessment Requirements for PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- combating wildfires
- communicating on the fire ground using a range of tools
- detecting hot spots, hazardous trees, unsecured wildfire perimeter
- maintaining situational awareness
- maintaining health and safety of self and others in work area
- observing and reacting to wildfire and weather conditions
- obtaining and using firefighting equipment and extinguishing media
- participating in mop ups, patrol activities and support operations
- participating in entrapment safety procedures
- preparing to respond to a fire
- proceeding to a fire
- reacting to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- recovering, reinstating and storing equipment
- undertaking dry and wet wildfire attack
- undertaking operational activities safely, in accordance with organisational procedures
- using extinguishing media in wildfire control
- using wildfire control tools and equipment
- working with firefighting equipment
- working as a member of a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication on the fire ground using radio and telephone

- consumables including flagging tape, fuel, rubbish and signs
- extinguishing media, water, foam and suppressants
- escape routes including prepared tracks, roads, trails and waterways
- earth moving equipment such as bulldozers, graders and tractors with blades
- equipment for firefighting including chainsaw, ropes and lines, drip torch and knap sack
- evidence related to fire cause including fresh vehicle tracks, items or objects at scene, nature and behaviour of fire at the scene upon arrival, nature and colour of smoke and number of columns, people and vehicles leaving the scene and whether gates on access routes to the fire were closed, opened or locked
- fire behaviour
- fuel features including arrangement and distribution, moisture content, quantity, size and type
- indicators of fire behaviour including flame height and length, noise, rate of spread, smoke colour and density, spotting and extreme fire behaviour
- organisational documentation, policies and operating procedures
- safety zones including bare ground, burnt areas, clearings, rivers and site of recent wildfire or prescribed burn, static water bodies and defensible space
- support operations including providing and transporting food, water and equipment
- tactics for firefighting including backburning, burning out and patrol
- types of wildfire including crown and ground
- types of fuel including crop, heath, peat, coal, combustible soils and plantation
- strategies for firefighting including defensive, direct and indirect attack, offensive and parallel attack
- variations in topography including aspect, elevation, landscape features and slope
- weather conditions including atmospheric stability, relative humidity, temperature and variations to wind speed and direction
- wildfire control tactics and techniques
- wildfire hazards
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including health and fitness requirements, hygiene and wellbeing, safe work practices, safety assessments and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that

reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR215 Prevent injury

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

- | | |
|--|---|
| <p>1. Prepare to respond to fire</p> | <p>1.1 Information about location of fire, <i>type of wildfire</i> and most effective route to the fire is obtained, taking into account local conditions.</p> <p>1.2 Personal protective clothing and equipment, and food and fluid requirements are identified and relevant preparations undertaken prior to departure as per organisational standards.</p> |
| <p>2. Proceed to fire</p> | <p>2.1 Location of the fire and <i>type of fuel</i> is confirmed on approach.</p> <p>2.2 Access to the area is gained safely without damage to vehicles and equipment, and minimum damage to the environment.</p> <p>2.3 <i>Evidence relevant to fire cause</i> is noted and brought to the attention of the supervisor.</p> <p>2.4 <i>Indicators of fire behaviour</i> are observed and communicated to supervisor.</p> |
| <p>3. Obtain and use firefighting equipment and extinguishing media</p> | <p>3.1 Nominated <i>extinguishing media</i> and <i>firefighting equipment</i> are located and obtained.</p> <p>3.2 Equipment is used in accordance with organisational and manufacturer's procedures.</p> |
| <p>4. Combat wildfire</p> | <p>4.1 Instructions are received, <i>firefighting strategies and tactics</i> are confirmed and implemented in accordance with organisational safe work practices and procedures.</p> <p>4.2 <i>Suppression techniques</i>, equipment and extinguishing media appropriate to wildfire conditions are used.</p> <p>4.3 Control lines are prepared in accordance with supervisor's instructions.</p> <p>4.4 Equipment is positioned, made ready for use and protected from damage in accordance with</p> |

- organisational procedures.
- 4.5 Fire is attacked taking into account *wildfire hazards* as directed and in accordance with organisational procedures.
 - 4.6 Evidence of fire cause and area of fire origin are protected.
 - 4.7 *Communication* is maintained at all times in accordance with organisational procedures.
- 5. Observe and react to wildfire and weather conditions**
- 5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor.
 - 5.2 *Weather conditions* and changes to fire behaviour are observed and reported to supervisor.
 - 5.3 *Variations in topography, fuel features* and fuel arrangements are observed and effect on fire behaviour is reported to supervisor as required.
 - 5.4 *Escape routes* and *safety zones* are identified and maintained at all times.
 - 5.5 Communication is maintained with other firefighting personnel and supervisor throughout operational activities.
- 6. Participate in mop-up and patrol activities and support operations**
- 6.1 Mopping-up activities are carried out in accordance with organisational procedures.
 - 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures.
 - 6.3 Activities to *support firefighting operations* are carried out in accordance with organisational procedures.
- 7. Recover and store equipment**
- 7.1 Equipment and *consumables* are recovered as directed.
 - 7.2 Equipment is stored in accordance with organisational procedures.
 - 7.3 Cleaning and maintenance are carried out in accordance with organisational procedures.
 - 7.4 Damaged or lost equipment is reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- detect hot spots, hazardous trees, unsecured wildfire perimeter
- undertake dry and wet wildfire attack
- use wildfire control tools and equipment
- work as a member of a team

Required Knowledge

- communication on the fireground
- extinguishing media, water, foam, suppressants
- fire behaviour (fuel, weather and topography)
- health and fitness requirements
- hygiene and wellbeing
- organisational operating procedures
- safe work practices
- wildfire control tactics and techniques
- wildfire hazards, safety techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- react to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- use firefighting equipment
- participate in dry wildfire control
- use extinguishing media in wildfire control
- maintain health and safety of self, other workers and people in the immediate work area
- participate in mop-up and patrol
- undertake operational activities safely

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated field-based workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an agency approved simulated and/or field-based workplace environment.

Specific resources for assessment

Access is required to:

- controlled or contained fires and/or simulated workplace environment
- firefighting equipment and extinguishing media

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. <i>Bold italicised</i> wording in the Performance Criteria is detailed below.	
<i>Type of wildfire</i> must include:	<ul style="list-style-type: none"> • crown • ground • surface
<i>Type of fuel</i> may include:	<ul style="list-style-type: none"> • crop • forest • grass • heath • peat, coal and combustible soils • plantation • scrub
<i>Evidence relevant to fire cause</i> may include:	<ul style="list-style-type: none"> • fresh vehicles tracks • items or objects at scene • nature and behaviour of fire at the scene upon arrival

	<ul style="list-style-type: none"> • nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
Indicators of fire behaviour may include:	<ul style="list-style-type: none"> • flame height and length • noise • rate of spread • smoke colour and density • spotting
Extinguishing media must include:	<ul style="list-style-type: none"> • water
and may also include:	<ul style="list-style-type: none"> • Class A foam • retardants • soil • wetting agents
Firefighting equipment must include:	<ul style="list-style-type: none"> • drip torch • hand tools • hose and small gear • knap sack • pump • tanker
and may also include:	<ul style="list-style-type: none"> • chainsaw • ropes and lines
Firefighting strategies must include:	<ul style="list-style-type: none"> • defensive • direct attack • indirect attack • offensive: • parallel attack
Firefighting tactics may include:	<ul style="list-style-type: none"> • backburning • burning out • control line construction • mopping-up • patrol • use of extinguishing media
Suppression techniques may include:	<ul style="list-style-type: none"> • dry firefighting • wet firefighting
Wildfire hazards may include:	<ul style="list-style-type: none"> • burns • disorientation • electrical installations and powerlines • embers

	<ul style="list-style-type: none"> • falling branches/trees • fatigue • heat related illness • lack of visibility • machinery/vehicle • manual handling • noise • radiant heat • smoke inhalation • snake or insect bite • sprain or fracture • trips and falls • water bombing operations
Communication may include:	<ul style="list-style-type: none"> • paging • personal contact • phone • radio • written notes
Weather conditions may include:	<ul style="list-style-type: none"> • atmospheric stability • relative humidity • temperature • variations to wind speed and direction
Variations in topography may include:	<ul style="list-style-type: none"> • aspect • elevation • landscape features • slope
Fuel features must include:	<ul style="list-style-type: none"> • arrangement/distribution • moisture content • quantity • size • type
Escape routes may include:	<ul style="list-style-type: none"> • prepared tracks • roads • trails • waterways
Safety zones may include:	<ul style="list-style-type: none"> • bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

<i>Support firefighting operations</i> may include:	<ul style="list-style-type: none"> • providing/transporting food, water and equipment for an incident • working with earth moving equipment such as bulldozer, grader, tractor with blade
<i>Consumables</i> may include:	<ul style="list-style-type: none"> • flagging tape • fuel • rubbish • signs

PUAFIR207 Operate breathing apparatus open circuit

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to select, don, operate and maintain breathing apparatus equipment in a hazardous atmosphere. It includes conducting pre-donning checks and tests of breathing apparatus; donning and checking of breathing apparatus; operating breathing apparatus and concluding breathing apparatus operations.

The unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct pre-donning checks and tests on breathing apparatus

1.1 Breathing apparatus is inspected for immediate use, in accordance with the organisational procedures

1.2 Faulty or damaged equipment is reported and recorded, in accordance with the organisational procedures

2 Don and check breathing apparatus

2.1 Breathing apparatus is donned, in accordance with the organisational procedures

2.2 Breathing apparatus is started and checked, in accordance with organisational procedures

2.3 Ancillary equipment required for tasks is selected for use

3 Operate breathing apparatus

3.1 Hazards are identified, monitored and controlled, in accordance with the organisational procedures

3.2 Communication is established and maintained with team members and other appropriate personnel throughout activity

3.3 Response activities are undertaken as a member of a team, demonstrating effective application of breathing apparatus, in accordance with the organisational procedures

3.4 Breathing apparatus control procedures are followed, in accordance with the organisational procedures

3.5 Entrapment procedures are implemented, in accordance with the organisational procedures

3.6 Personal safety is maintained, in accordance with organisational procedures

4 Conclude operations

4.1 Breathing apparatus set is shut down, in accordance with organisational procedures

4.2 Breathing apparatus set is removed, in accordance with organisational procedures

4.3 Cleaning and maintenance of breathing apparatus is

undertaken, in accordance with organisational procedures

4.4 Equipment is made ready for operational use, in accordance with organisational procedures

4.5 Participating in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

type of breathing apparatus must include

- open circuit

breathing apparatus is inspected must include

- ancillary equipment
- cylinder pressure
- integrity of air flow system
- serviceability and integrity of components

breathing apparatus control procedures must include

- entry or exit control officer
- entry or exit control point
- organisational procedures
- principles of breathing apparatus control
- stage one (one entry point) and stage two (multiple entry points)
- timing device

breathing apparatus control equipment must include

- breathing apparatus set tallies
- control boards
- entry control officer identification
- guideline and branch line tallies
- personal lines
- procedures

hazards must include

- disorientation in smoke/darkness or confinement
- entrapment
- exhaustion of air supply (regular gauge monitoring)

communications must include

entrapment procedures must include

- failure to maintain a face seal
- fire
- hazardous atmospheres
- malfunction of equipment
- manual handling
- structural hazards and/or hazardous materials
- distress signal unit
- hand signals
- portable radio
- activating the distress signal unit
- calling for assistance
- ceasing all strenuous activity
- operating breathing apparatus
- relocating to safest available place
- remaining calm

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR207B Operate breathing apparatus open circuit.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUAFIR207 Operate breathing apparatus open circuit

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- conducting pre-donning checks and tests on breathing apparatus
- donning and checking breathing apparatus
- following organisational policies and procedures including implementing entrapment and breathing apparatus emergency procedures
- inspecting breathing apparatus after its use
- inspecting breathing apparatus and concluding breathing apparatus operations
- moving in conditions of reduced visibility
- operating breathing apparatus
- participating in debriefing sessions
- returning breathing apparatus to operational status
- complying with organisational procedures for breathing apparatus use and maintenance

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- characteristics, component parts, operation of compressed air breathing apparatus
- how breathing apparatus supports personal protection
- industry standards for breathing apparatus
- operation of breathing apparatus
- operational testing, operating procedures and safe work practices when wearing breathing apparatus

- organisational documentation, policies and procedures including entrapment procedures
- performance of breathing apparatus control equipment
- personal protective clothing and equipment
- respiratory system and effects of hazardous atmospheres on the body
- types of hazardous atmospheres including heated, smoke or other suspended particles
- use of personal lines and tallies
- utilisation of distress signal unit
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety assessments and risk mitigation

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - range of controlled or simulated scenarios, breathing apparatus and associated equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply safe work practices when operating in or around aircraft at an airbase. It includes working safely near aircraft and facilitating safe ground support and it applies to personnel working in the public safety sector who work around aircraft.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Work safely in and around aircraft

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Personal protective clothing and equipment is used, in accordance with operational procedures

1.2 Precautions and clearances are obtained and followed

when operating on or near aircraft movement areas

- 1.3 Any approach to an operating aircraft is made, in accordance with organisational aircraft approach procedures, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew
- 1.4 Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes
- 1.5 Typical manoeuvring patterns of aircraft are anticipated through activities
- 1.6 Instructions or signals from pilots or staff controlling aircraft are complied with, in accordance with organisational procedures
- 1.7 Site hazards are identified and risks are assessed and control measures are implemented

2 Facilitate safe ground support

- 2.1 Appropriate precautions are observed when positioning vehicles or equipment close to aircraft
- 2.2 Aircraft design features are taken into account whilst boarding, loading or handling aircraft
- 2.3 Instructions from pilots and staff coordinating aircraft operations, organisational procedures and placards are followed during ground support operations
- 2.4 Aircraft loading is conducted under pilot or flight crew member supervision and appropriate weight, balance and loading system are complied with
- 2.5 Areas are designated and separated, in accordance with site features and specific operations being conducted
- 2.6 Fitting of equipment to an aircraft is conducted under pilot supervision, in accordance with appropriate regulatory approvals
- 2.7 Aircraft fuels, oils, and supplies are stored and handled, in accordance with regulatory requirements and organisational procedures
- 2.8 Aircraft or equipment defects or hazards are reported to pilot and/or appropriate supervisor
- 2.9 Appropriate aerodrome regulations are complied with

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR209B Work safely around aircraft.

Assessment Requirements for PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- complying with regulatory requirements and organisational procedures
- delivering briefings in appropriate locations including an area that is free of distractions including movement and noise, is safe and convenient to subsequent deployment needs and has the necessary facilities and equipment
- ensuring safety and quality procedures are applied
- identifying hazards and risks and acting to minimise, mitigate, control or eliminate
- implementing precautions and working safely whilst around aircraft
- using personal protective clothing and equipment and specialist aviation support equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aerodrome layout, facilities and services including working zones and lighting facilities
- aerodrome legislation, industry standards, regulations and security procedures
- aircraft features and movement characteristics
- aircraft performance, operation, loading and refuelling precautions
- assessment and risk mitigation processes
- organisational documentation, policies and procedures
- participation in briefings including Situation, Mission, Execution, Administration, Command/control, Safety (SMEACS) and questions
- personal protective clothing and equipment including fire extinguisher, first aid kit, high visibility protective overalls and vests, respiratory protection, signalling devices, lighting or beacons and head, hand, eye, ear and foot protection
- roles and responsibilities of personnel supervising, managing and supporting aircraft operations
- site hazards

- suitable locations for conducting briefings and debriefings
- types of aircraft including aeroplanes, helicopters, remotely piloted aircraft and airborne vehicles
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safe work practices around aircraft

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to identify and avoid workplace hazards and risks, to maintain personal safety and to report identified issues to supervisors and team members.

It is designed as an introduction to safe work practices and is specifically relevant to a workplace requiring personnel to be involved in incidents, prescribed burns and/or operational aspects of emergency management. It includes identifying, implementing and monitoring effectiveness of workplace hazards and risk control procedures.

The unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

demonstrate achievement of the element.

1 Identify workplace hazards and risks, and advise others

1.1 Procedures and practices are followed to identify hazards and risks in the workplace

1.2 Identified hazards and risks in the work area are communicated to team members and supervisors

1.3 Identified risk factors which may create or escalate the immediate risk to life, property or the environment are reported, in accordance with organisational procedures

2 Implement hazard and risk control procedures

2.1 Personal protective clothing and equipment is selected and donned, in accordance with organisational procedures

2.2 Hazard identification and risks controls are implemented, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines and organisational procedures

2.3 Equipment appropriate for dealing with a hazard is selected for use and checked, in accordance with organisational procedures

2.4 Personal health and welfare is managed, in accordance with organisational policy

3 Monitor effectiveness of hazard and risk control procedures

3.1 Situation awareness is maintained to ensure the continued effectiveness of hazard and risk control procedures

3.2 Changes in incident behaviour and conditions are reported immediately through the chain of command, in accordance with organisational procedures

3.3 Activities and debriefings regarding hazard and risk control procedures are participated in, as appropriate

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

personal protective clothing and equipment must include

- eye and head protection

PUAFIR302 Suppress urban fire

Modification History

Release 2. Updated superseded HLT Pre-requisite unit.

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to work as a member of a team under limited supervision when suppressing an urban fire. It includes responding to fires and determining extinguishing media, equipment and structural fire behaviour. It also includes protecting people; how to attack fires, ventilate structures, observe and react to fire conditions; undertake ancillary firefighting operations and complete operations.

The unit applies to personnel required to suppress a range of different types of structure and non-structure fires where there is the potential for multiple hazards to be present.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

HLTAID011 Provide First Aid

PUAFIR203 Respond to urban fire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Initiate response to fire

1.1 Fire details are received and initial response is determined, in accordance with organisational procedures

1.2 Firefighting personal protective clothing and equipment requirements are determined and used, based on available information

1.3 Changes to fire conditions are reported and acted on to determine firefighting tactics

1.4 Firefighting considerations are taken into account when determining tactics

2 Determine extinguishing media and equipment

2.1 Available static or reticulated water supplies to support firefighting operations are identified and capacity is determined

2.2 Selection of hose and equipment is sufficient to support firefighting operations

2.3 Extinguishing media are selected, in accordance with the type of fire within the area of operation

2.4 Breathing apparatus is used within its' safe work limitations, in accordance with manufacturers' specifications and organisational procedures

3 Determine structural fire behaviour

3.1 Combustion processes taking place in the structure are determined

3.2 Tactics for terminating combustion processes are determined

3.3 Presence of hazardous materials located in the fire area are identified and an appropriate plan of action is determined

4 Protect people

4.1 Primary and secondary searches are planned, conducted and supported, in accordance with organisational procedures

4.2 Appropriate priority and support is allocated to fire

rescue and evacuation activities

4.3 Casualties are treated and/or handed into the care of medical personnel once clear of threat of fire

5 Attack fire

5.1 Firefighting strategies and tactics are prioritised, implemented and monitored, in accordance with organisational procedures

5.2 Firefighting extinguishing media are selected, in accordance with the type of fire and the actual or potential hazards identified within the area of operations

5.3 Fire is located and access is gained in the safest and most effective manner to minimise damage to property or the risk of injury to others or self, in accordance with organisational procedures

5.4 Potential fire behaviour is anticipated and action is taken to protect the safety of self and others and to achieve determined strategies

5.5 Breathing apparatus procedures are complied with, in accordance with organisational requirements

5.6 Fire is attacked using a range of extinguishing media and application techniques appropriate to type and size of fire, in accordance with manufacturers' specifications and organisational procedures

5.7 Evidence of fire cause is protected and action is taken, in accordance with organisational procedures

5.8 Firefighting suppression activities, including extinguishing media, are used to contain spread of fire and damage to the environment and property

5.9 Burning and smouldering materials are identified and extinguished, in accordance with organisational requirements

5.10 Communication is maintained and monitored throughout firefighting operations, in accordance with organisational procedures

5.11 Firefighting ancillary activities are undertaken to avoid or minimise risk of environmental damage

6 Ventilate structure

6.1 Structures are ventilated, as required, using the most appropriate natural and mechanical ventilation

		techniques, in accordance with organisational procedures
	6.2	Structures are ventilated without endangering personnel or increasing the spread of fire, in accordance with organisational procedures
7 Observe and react to fire conditions	7.1	Fire is continually monitored and significant changes affecting the status of the fire and effectiveness of selected firefighting strategies are reported, in accordance with organisational procedures
	7.2	Firefighting strategies and tactics are modified and adjusted, in accordance with organisational procedures, the changing conditions at the fire or as directed
8 Undertake ancillary firefighting operations	8.1	Firefighting and ancillary activities undertaken at the incident ensure that the risk of injury to the public, other personnel and self is avoid or minimised
	8.2	Salvage and overhaul activities are undertaken to support the conclusion of firefighting operations, in accordance with organisational procedures
9 Complete operations	9.1	Equipment is made ready for operational use, in accordance with organisational procedures
	9.2	Damaged or missing equipment is replaced, recorded and/or reported, in accordance with organisational procedures
	9.3	Participate in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

fire must include

- fires involving electricity
- industrial complex
- mobile property fires

personal protective clothing and equipment must include	<ul style="list-style-type: none">• multi-storey structures• structure and non-structure fires which may also include<ul style="list-style-type: none">• fires involving fuels and chemicals• ship fires• breathing apparatus• distress alarms• structural fire protective clothing
reporting of changes to fire condition must include	<ul style="list-style-type: none">• initial reports at scene• reports of achievement during firefighting e.g. completion of rescue and fire under control etc.• reports of significant changes in conditions• Situation Reports (SITREPS)
equipment must include	<ul style="list-style-type: none">• branches/nozzles• breathing apparatus and control equipment• fire extinguishers• forcible entry tools• hand tools• hoses and hose fittings• ladders and rope lines• portable lighting• radios• salvage gear• small gear and ancillary equipment• stand pipes, hydrants and booster connections• ventilation equipment
extinguishing media must include	<ul style="list-style-type: none">• extinguishing powders• foams• gaseous extinguishing agents• water
firefighting strategies must include	<ul style="list-style-type: none">• confining the spread of fire• extinguishment• protecting exposures• protection of area of fire origin and evidence of cause• rescuing occupants• salvage and overhaul
access must include	<ul style="list-style-type: none">• forcible entry• normal entry• roof access from ladders and/or aerial

- application techniques must include
- appliance
 - defensive mode
 - direct attack
 - direction of attack
 - indirect attack
 - offensive mode
- ancillary activities must include three or more of the following
- damming and/or draining water runoff
 - guarding against hazards
 - making up equipment
 - overhaul
 - protecting the ignition site
 - salvage
 - securing the area
 - supply of materials
- structures to be ventilated must include
- commercial
 - high rise buildings
 - mobile structures i.e. road, rail, aviation and marine vehicles
 - multi-storey
 - residential

Release 2. Updated superseded HLT Pre-requisite unit.

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- attacking fires
- completing operations
- controlling fire environment by cooling fire gases
- determining extinguishing media and equipment
- firefighting tactics including cooling the fuels, interrupting the chemical chain reaction, removing fuels, excluding oxygen and ventilation
- firefighting suppression activities including locating and accessing the fire, search and rescue, anticipation of fire behaviour, ensuring safety, applying extinguishing media, applying techniques to maximise the effect and minimise the damage and identifying and protecting area of fire origin and evidence of cause
- initiating response to fire
- observing and reacting to fire conditions whilst maintaining situational awareness
- operating breathing apparatus
- operating firefighting equipment
- participating as a firefighting team member
- performing ancillary firefighting operations
- protecting people
- recognising fire behaviour indicators
- undertaking salvage and overhaul
- using natural and mechanical ventilation techniques
- utilising firefighting strategies and tactics for rescue, exposures, confinement, extinguishment, overhaul, ventilation and salvage
- working with a range of extinguishing media

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the

requirements of the elements, performance criteria and range of conditions and includes knowledge of

- combustion processes including spontaneous heating combustion and ignition
- damage to the environment from fire suppression activities including air pollution, hazards to flora and fauna, soil and water pollution
- structural fire behaviour and factors which impact on spread
- fire behaviour indicators
- firefighting tactics including cooling fuels, interrupting chemical chain reaction, removing fuels, excluding oxygen and ventilation
- firefighting considerations including available firefighting resources, extinguishing media, fire exposures, signs of structural collapse, size of fire, topography, type of fire and weather
- hazardous materials including those defined by the Australian Dangerous Goods Code and other fire extinguishing substances
- organisational documentation, policies and procedures including reporting and recording incident details and breathing apparatus control procedures
- personal protective clothing and equipment requirements including breathing apparatus
- purpose of ventilation techniques including assisting in fire suppression activities, facilitating evacuation of occupants, maximising visibility within a structure, minimising damage, preventing build up of toxic or explosive atmospheres and providing clean air
- strategies and methods of attack for extinguishing fires in a range of structures
- types of media for firefighting and their suitability for different classes of fire
- use of firefighting equipment and application of techniques
- ventilation techniques including horizontal, hydraulic, mechanical, natural and vertical
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed on the job or in a simulated environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations

- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - firefighting equipment, breathing apparatus, control equipment and extinguishing media
 - firefighting, ventilation and salvage equipment
 - range of controlled or simulated fires
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work as a member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to personnel who work as a member of a crew or team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR204 Respond to wildfire

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

- | | |
|---|--|
| 1 Receive and report details of wildfire | 1.1 Details of the wildfire including location, type, behaviour and developments are received and recorded |
| | 1.2 Fire details are reported, in accordance with organisational requirements |
| 2 Prepare to respond to fire | 2.1 Location of wildfire is confirmed and safest access route is determined |
| | 2.2 Personal protective clothing and equipment, apparel, food and water are obtained before departure, in accordance with organisational requirements |
| | 2.3 Most appropriate appliance or vehicle is selected and used |
| 3 Proceed to fire | 3.1 Location of wildfire is confirmed by observation or from instructions while on approach |
| | 3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or environmentally sensitive areas |
| | 3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of appropriate authorities |
| | 3.4 Navigational aids are used for planning and operational purposes |
| | 3.5 Notification of arrival and appropriate report is provided |
| 4 Protect people and assets | 4.1 As far as conditions allow the number, location and safety of people and assets in the threatened area is determined and assessed |
| | 4.2 Appropriate protective procedures are implemented, under direction, to protect persons in the path of a wildfire |
| | 4.3 Access by the public and personnel to hazardous locations is controlled, as directed, in accordance with organisational procedures |
| | 4.4 Defensibility of property and assets is considered and, if appropriate, assistance is provided to help occupiers |
| | 4.5 Safety of people and assets in the threatened area is |

- monitored
- 4.6** Safety of people and security of assets in the area is checked and reported after the fire
- 5 Combat wildfire**
- 5.1** Briefing is received including area of operations, strategies and tactics to be employed
- 5.2** Escape routes and safety zones are confirmed and communicated to personnel
- 5.3** Firefighting media and equipment are selected and used in accordance with organisational procedures
- 5.4** Fire hazards are identified and action is taken to minimise the risks of injury to the public, personnel and self
- 5.5** Firefighting strategies and tactics are implemented to achieve objectives and to minimise overall damage and impact on assets and the environment
- 5.6** Fuel, weather and topographical factors are observed and potential fire behaviour is anticipated and acted upon to ensure safety
- 5.7** Communication is maintained with supervisor through the chain of command and with other firefighters in the work area
- 5.8** Fire control activities are undertaken to minimise overall damage and impact on assets and the environment
- 5.9** Potential fire behaviour is considered and acted upon to ensure safety and achievement of objectives
- 5.10** Fire reports are provided to supervisor, as required
- 5.11** Area of origin and evidence of fire cause are protected and brought to the attention of supervisor or relevant authority, in accordance with organisational procedures
- 6 Conduct mop up and patrol activities**
- 6.1** Mop up activities are carried out, in accordance with organisational procedures
- 6.2** Patrol of the fire is maintained
- 7 Recover and maintain equipment**
- 7.1** Equipment is made ready for operational use, in accordance with organisational procedures

- 7.2 Damaged or missing equipment is replaced, recorded and/or reported, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- anticipating and reacting to changing wildfire behaviour
- applying Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing risk to life, property and the environment
- contributing to the implementation of firefighting strategies
- combating wildfires, performing firefighting tactics, and using firefighting equipment and extinguishing media
- communicating and working with team members
- conducting mop ups and patrol activities
- detecting hot spots and hazardous trees
- implementing and monitoring firefighting strategies and tactics
- interpreting fire weather, fuels and terrain and predicting likely impact on fire behaviour
- maintaining safety and health of self, other workers and people in a wildfire area
- participating in briefings and confirming instructions
- preparing to respond to wildfires, using navigation equipment
- proceeding to wildfires
- receiving, recording and reporting information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- crew protective procedures
- access to wildfires
- recognition of environmentally sensitive areas and actions to minimise damage
- escape routes including prepared tracks, roads, trails and waterways
- fire behaviour and its response to different fuels, topography and weather conditions
- fire cause

- fireground hazards
- fire report requirements
- fuel types and factors that impact fire development
- media and equipment for firefighting
- means of transport to fire ground
- navigational aids including aerial photographs, compass, global positioning systems and maps
- organisational documentation, policies and procedures
- potential fire behaviour including fire development, flame height and intensity, fuel load and arrangement, rate of speed, spotting, change due to terrain, topography, changes due to weather conditions, winds and fire winds.
- protective procedures including alerts and warnings, insitu protection and relocation
- safety zones including bare ground, burnt areas, clearings, rivers, site of recent wildfire or prescribed burns and static water bodies
- strategies for firefighting including offensive strategies including direct attack, indirect attack, parallel attack and combined attack and defensive strategies including community and asset protection
- tactics for firefighting including back burning and burning out, control line construction - hand and machine and direct suppression and extinguishment
- tasks for firefighting including application of firefighting media, control line construction, mopping up and patrol
- topographical factors that affect fire development
- types of fires including crown, ground and surface
- types of assets that require protection
- weather factors that influence fire development
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safety near vehicles and machines

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - access to wildfire or prescribed burns and/or approved field based environment
 - firefighting equipment and extinguishing media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

2	PUA12 V2	Application of the Unit added Unit revised to reflect current work requirements Context of Assessment revised Method of assessment added
1	PUA00 V8.1	Primary release on TGA

Unit Descriptor

This unit covers the competency required to work as a situation-aware member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR204B Respond to wildfire

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1. Receive and report details of wildfire | 1.1 Details of the wildfire including its location, <i>type</i> , behaviour and development are received and recorded.
1.2 Fire details are reported in accordance with organisational procedures. |
| 2. Prepare to respond to fire | 2.1 Location of the wildfire is confirmed and the safest effective <i>access</i> route is determined.
2.2 <i>Personal protective clothing and equipment</i> , apparel, food and water are obtained before departure, in accordance with organisational requirements.
2.3 Most appropriate method of transport to the wildfire is selected and used. |
| 3. Proceed to fire | 3.1 Location of the wildfire is confirmed by observation or from instructions while on approach.
3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or <i>environmentally sensitive areas</i> .
3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of the appropriate authority.
3.4 <i>Navigational aids</i> are used for planning and operational purposes. |
| 4. Protect people and assets | 4.1 As far as conditions allow, number, location and safety of people and <i>assets</i> in the threatened area is determined and assessed. |

- 4.2 Appropriate *protective procedures* are implemented under direction, to protect persons in the path of a wildfire.
- 4.3 Access by the public and personnel to hazardous locations is controlled as directed and in accordance with organisational procedures.
- 4.4 Defensibility of property is considered and, if appropriate, assistance is provided to help occupiers.
- 4.5 Safety of people and assets in the threatened area is monitored during the course of the fire.
- 4.6 Safety of people and security of assets in the area is checked and reported after the passing of the fire.

5. Combat wildfire

- 5.1 Access to the area of operations is gained in the safest and most effective manner.
- 5.2 Notification of arrival and appropriate report is provided.
- 5.3 Briefing is received including area of operations, strategies and tactics to be employed.
- 5.4 Most suitable location to commence wildfire control operations is selected.
- 5.5 *Firefighting media and equipment* are selected and used effectively and safely in accordance with organisational procedures.
- 5.6 *Fire hazards* are identified and action taken to minimise the risk of injury to the public, personnel and self.
- 5.7 *Firefighting strategies* are implemented to achieve objectives in accordance with organisational procedures.
- 5.8 Fire control activities are undertaken to minimise overall damage and impact on assets and the environment.
- 5.9 *Potential fire behaviour* is considered and acted upon to ensure safety and achievement of objective.
- 5.10 *Fuel, weather* and *topographical factors* are observed and potential fire behaviour anticipated.
- 5.11 Communication is maintained with supervisor and other firefighters in the work area.
- 5.12 *Fire reports* are provided to supervisor as required.
- 5.13 Area of origin and *evidence of fire cause* are protected and brought to attention of supervisor or relevant authority.
- 5.14 *Escape routes* and *safety zones* are established

- and communicated to personnel.
- 6. Conduct mop-up and patrol activities**
- 6.1 Mop-up activities are carried out in accordance with guidelines and conditions.
- 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures and guidelines.
- 7. Recover and maintain equipment**
- 7.1 Equipment is made up and made ready for operational use in accordance with organisational procedures.
- 7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in writing and orally
- detect hot spots and hazardous trees
- interpret fire weather, fuels and terrain and predict the likely impact on fire behaviour
- mop-up
- read maps
- receive briefings and confirm instructions
- undertake back burning and burning out
- use wildfire control tools and equipment
- work as part of a team

Required Knowledge

- defensive/offensive firefighting strategies and tactics:
 - asset protection
 - backburning and burning out
 - control lines and firebreaks
 - defensible space
 - direct, indirect, parallel attack
 - fire attack procedures
 - lighting patterns
 - standard operating procedures; reporting; patrol; mop-up
 - wet, dry firefighting
- fire behaviour:

- fire development
- flame height and intensity
- rate of spread,
- junction zones
- spotting
- firefighting protocols
- fireground hazards
- fire weather conditions and impact on fire behaviour:
 - atmospheric stability
 - relative humidity
 - temperature
 - wind speed and direction
- fuel and its impact on fire behaviour
 - moisture content, quantity, type, arrangement and distribution,
 - size, drought effect, curing
- organisational first aid requirements
- organisational procedures for dealing with injury
- protection of area of origin and evidence of fire cause
- safety near vehicles and machines
- terrain and physical feature and their impact on fire behaviour and suppression:
 - aspect
 - fuel variations
 - slope
 - weather variations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- anticipate and react to changing wildfire behaviour
- observe and react to weather behaviour
- accurately assess whether or not it is safe to defend assets
- undertake dry wildfire control activity
- monitor effectiveness of tactics
- use firefighting equipment and extinguishing media
- maintain safety and health of self, other workers and

- people in the wildfire area
- use communication equipment
- read maps
- protect area of origin and evidence of fire cause

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of performance at a wildfire or prescribed burn is required for attainment of Elements 5 and 6 of this unit.

The remaining elements should be assessed in an agency approved field-based environment or simulation.

Specific resources for assessment

Access is required to:

- access to wildfire or prescribed burns and/or approved field-based environment
- firefighting equipment and extinguishing media

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

different work environments and situations that may affect performance. <i>Bold italicised</i> wording in the Performance Criteria is detailed below.	
<i>Types</i> must include:	<ul style="list-style-type: none"> • crown • ground • surface
<i>Access</i> may include:	<ul style="list-style-type: none"> • aircraft • boat • foot • vehicle
<i>Environmentally sensitive areas</i> may include:	<ul style="list-style-type: none"> • areas of: <ul style="list-style-type: none"> • fragile soils • native flora and fauna • rare and endangered species • threat to water quality
<i>Navigational aids</i> must include:	<ul style="list-style-type: none"> • maps
and may also include:	<ul style="list-style-type: none"> • aerial photographs • compass • global positioning systems
<i>Assets</i> may include:	<ul style="list-style-type: none"> • area of rare or sensitive flora and fauna • buildings • culturally significant sites • crops • plantations • property • public lands • stock • utilities and infrastructure (rail, power and telephone lines, water supply structures, communications towers, bridges)
<i>Protective procedures</i> may include:	<ul style="list-style-type: none"> • alerts and warnings • in-situ protection • relocation
<i>Firefighting media</i> must include:	<ul style="list-style-type: none"> • water
and may also include:	<ul style="list-style-type: none"> • Class A foam • earth • fire suppressants (short and long term) • retardants

	<ul style="list-style-type: none"> • wetting agent
Firefighting equipment must include:	<ul style="list-style-type: none"> • driptorch • hand tools • hose and small gear • pump • tanker
and may also include:	<ul style="list-style-type: none"> • aircraft • chainsaw • earth moving machinery • knap sack • ropes and lines
Fire hazards must include:	<ul style="list-style-type: none"> • burns • disorientation • environmental • falling branches and trees • falling objects • fatigue • heat-related illness (heat exhaustion and dehydration) • lack of visibility • manual handling • mine shafts • rolling objects • smoke inhalation • snake or insect bite • sprain or fracture • trips/falls • water bombing operation
Firefighting strategies must include:	<ul style="list-style-type: none"> • combination attack • combined strategy • defensive strategy • direct attack • indirect attack • mop-up • offensive strategy • parallel attack • patrol
Potential fire behaviour may include:	<ul style="list-style-type: none"> • fire development • flame height and intensity • fuel load and arrangement • rate of spread

	<ul style="list-style-type: none"> • spotting • change due to terrain, topography • change due to weather conditions - winds, fire whirls
Fuel may include:	<ul style="list-style-type: none"> • crop • forest • grass • heath • plantation: <ul style="list-style-type: none"> • stage 1 – post establishment • stage 2 – pre-canopy closure • stage 3a – canopy closure (unpruned) • stage 3b – canopy closure (pruned) • stage 4 – thinned • stage 5 – mature • stage 6 – harvesting/clear felling • scrub
Fuel factors which may impact on fire development must include:	<ul style="list-style-type: none"> • arrangement/distribution • effects of drought • moisture content • quantity • seasonal effects • size • topography • type
Weather factors which may impact on fire development must include:	<ul style="list-style-type: none"> • anabatic winds • atmospheric stability • cold fronts • diurnal variations • katabatic winds • land breezes • local effects • relative humidity • sea breezes • temperature • vegetation edge effects • wind changes • wind direction and speed
Topographical factors which may impact on fire development must include:	<ul style="list-style-type: none"> • aspect • elevation • local wind effects

	<ul style="list-style-type: none"> • slope • wind turbulence
<i>Fire reports</i> may include:	<ul style="list-style-type: none"> • effectiveness of strategies and tactics • fire behaviour • number and status of resources • safety and hazards • weather • welfare of personnel • work achieved and required
<i>Evidence of fire cause</i> may include:	<ul style="list-style-type: none"> • fresh vehicles tracks • nature and behaviour of fire at the scene upon arrival • nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
<i>Escape routes</i> may include:	<ul style="list-style-type: none"> • prepared tracks • roads • trails • waterways
<i>Safety zones</i> may include:	<ul style="list-style-type: none"> • bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

Unit Sector(s)

Not applicable.

PUAFIR310 Operate specialist appliance

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to operate a specialist appliance at an incident.

A specialist appliance is a vehicle designed for a specific purpose which may include hazardous materials response, mobile communication, heavy rescue, salvage or specialist mechanical support.

The unit applies to personnel who are required to safely operate specialist appliances in emergency response and firefighting situations. It should be noted that individuals may be required to demonstrate competence to organisational standards to be deemed an operator of a specific specialist vehicle.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Site specialist appliance

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Specialist appliance and ancillary equipment is sited, in accordance with organisational procedures, to minimise

hazards which may impact on safe working operations

- 1.2** Specialist appliance is positioned, in accordance with organisational procedures, to support operational requirements and to prevent injury to personnel or damage to equipment and facilities
 - 1.3** Personal protective clothing and equipment is selected and worn, in accordance with organisational procedures and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines
 - 1.4** Specialist appliance equipment is deployed, in accordance with organisational procedures and WHS/OHS guidelines
- 2 Operate specialist appliance**
- 2.1** Specialist appliance is operated, in accordance with organisational procedures and manufacturers' specifications
 - 2.2** Safe clearances are maintained to ensure that personnel are not injured by the operation of specialist appliance
 - 2.3** Performance of specialist appliance is monitored and adjusted, as required, in response to changed conditions and to achieve determined strategies and objectives
 - 2.4** Action is taken to rectify any deficiencies in the operation of specialist appliance, as required
 - 2.5** Specialist appliance is operated in a manner that prevents injury to personnel or damage to equipment and facilities
 - 2.6** Fire spread, onsite hazards and atmospheric conditions including potential impact on specialist appliance operations are monitored and relevant information is referred to appropriate personnel
 - 2.7** Communication is established and maintained through the chain of command
- 3 Conclude specialist appliance operations**
- 3.1** Ancillary equipment is collected and stowed, in accordance with organisational procedures and WHS/OHS guidelines
 - 3.2** Specialist appliance is checked and maintained, and any faults or deficiencies are reported, in accordance with organisational procedures

3.3 Participate in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR318 Operate specialist appliance.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUA FIR310 Operate specialist appliance

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- checking and maintaining equipment and reporting faults
- concluding specialist appliance operations
- identifying and avoiding hazards
- implementing safe work practices
- operating specialist appliance
- operating equipment located on specific appliances
- siting specialist appliance
- using approved communication methods
- working with ancillary equipment
- wearing personal protective clothing and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- ancillary equipment
- communication methods on fire ground
- hazards including atmospheric conditions such as wind direction and strength, fire explosion, fire spread, hazardous atmospheres such as smoke and toxic gases and structural collapse
- impact of weather on operation of specialist appliance
- organisational documentation, policies and procedures for use in specialist appliances
- personal protective clothing and equipment
- potential hazards
- principal features and components of specialist appliance
- safe working operations including compliance with manufacturers' specifications, organisational operational procedures and WHS/OHS guidelines
- specialist appliance including breathing apparatus unit, command unit, firefighting appliance

either non-water or foam, foam or water tender, HAZMAT (hazardous materials) response unit, hose layer, lighting and salvage units and rescue tender

- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective clothing and equipment currently used in industry including
 - organisational specialist appliances and site suitable for assessment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR312 Operate aerial ignition equipment in an aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, operate and maintain aerial ignition equipment in an aircraft. Aerial ignition equipment is used to drop incendiaries, capsules or gelled petroleum, from fixed wing aircraft or helicopter.

Aerial ignition operations are undertaken to modify or reduce fuel loads in key areas and to decrease fire intensity and suppression difficulty at wildfires or prescribed burns.

The unit applies to personnel responsible for the safe, effective and efficient conduct of aerial ignition operations to a specified burn prescription and/or fire suppression operation and for liaising with ground and support crews including incendiary operation supervisors.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR209 Work safely around aircraft

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for operations of ignition equipment

- 1.1** Personal protection clothing and equipment and other safety equipment is selected, inspected and tested, in accordance with organisational procedures, prior to operations commencing
- 1.2** Requirements for aerial ignition operations are identified and confirmed with relevant personnel
- 1.3** Activities are undertaken, in accordance with industry standards, legislation, organisational procedures, Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- 1.4** Incendiary device to be used is confirmed
- 1.5** Incendiary devices and associated consumable materials are stored and transported, in accordance with the organisational procedures and requirements
- 1.6** Ignition equipment is installed in aircraft, in accordance with the organisational procedures and aircraft operator requirements
- 1.7** Ignition equipment is inspected to ensure correct operation
- 1.8** Mixing operations for incendiary device are undertaken, in accordance with organisational procedures, manufacturers' guidelines and prevailing conditions
- 1.9** Incendiary devices are loaded into ignition equipment, in accordance with the organisational procedures
- 1.10** Ignition equipment is tested and adjusted, where required, to ensure correct operation

2 Conduct aerial ignition operations

- 2.1** Ignition equipment is operated, in accordance with organisational procedures and the manufacturers' specifications
- 2.2** Adjustments to ignition equipment are undertaken, as required, in response to changed conditions or alterations to burn plan
- 2.3** Emergency procedures are conducted, as required

- 2.4** Communications between pilot, navigator and ignition equipment operator are maintained throughout the operation
- 2.5** Ignition operations are conducted, in accordance with burn plan
- 3 Service, maintain and store incendiary equipment**
- 3.1** Excess incendiary devices are disposed of, in accordance with organisational procedures
- 3.2** Ignition equipment is serviced, maintained and repaired within scope of authority
- 3.3** Equipment faults are documented and forwarded to appropriate personnel for action
- 3.4** Ignition equipment is stowed and forwarded to appropriate personnel for maintenance

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Ignition equipment must include one of the following

- automated incendiary machines
- hand held manual incendiary injection
- helitorch aerial or drip torch

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR312B Operate aerial ignition equipment in an aircraft.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUA FIR312 Operate aerial ignition equipment in an aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- adhering to safe working practices if machine or ignition equipment malfunctions
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including aircraft or other emergency procedures and personal protective clothing and equipment
- conducting aerial ignition operations using approved devices and equipment
- demonstrating pre-flight testing and installation of aerial ignition equipment
- following approved flight plan
- implementing industry standards and legislation
- operating for extended periods in an aircraft
- preparing for of ignition equipment
- reporting equipment malfunctions, accidents and incidents
- selecting, inspecting and testing personal protective clothing and equipment
- servicing, maintaining, repairing and storing approved devices and equipment
- using communications equipment
- using ignition equipment including helitorch aerial or drip torch, hand held manual incendiary injection and automated incendiary machines
- working as a member of a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- aircraft safety
- characteristics and limitations of incendiary devices and equipment
- emergency procedures
- guidelines relating to safe use of equipment including personal protective equipment
- incendiary capsule materials including potassium permanganate, ethylene glycol (antifreeze),

- petroleum products, gelling powder and methanol
- ignition equipment including helitorch aerial or drip torch, hand held manual incendiary injection equipment and automated incendiary machines
- industry standards
- lighting patterns
- mechanical knowledge sufficient to service, maintain and repair aerial ignition equipment
- mixing equipment
- organisational documentation, policies and procedures including procedures for working in aerial ignition operations
- service, maintenance and repair of equipment
- personal protection clothing and equipment including ear protectors, eye protection, gloves and other personal protection gear, fire resistant clothing, footwear, rubber gloves, vapour masks and respirators and safety helmets with visors
- types and applications of aerial ignition equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety and emergency procedures for undertaking aerial ignition operations, risk mitigation and hazard identification

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Assessment will take place in a simulated environment followed by an assessment by an accredited operator on the job.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - aerial ignition equipment and materials
 - aircraft
 - an area to conduct operations
 - appropriate tools for testing, maintenance and inspection of equipment
 - personal protective equipment and relevant safety equipment

- safe disposal facilities
- transport of incendiary devices and ignition equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, conduct and evaluate simple prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for preparing, conducting and evaluating a simple prescribed burn on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to burn

- 1.1 Burn operations for a simple prescribed burn are identified and undertaken, in accordance with approved prescribed burn plan, burn plan objectives, organisational procedures and legislative and regulatory requirements
- 1.2 Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
- 1.3 Burn notifications and plans are issued to persons or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
- 1.4 Control lines, including secondary control lines, are specified and prepared, in accordance with organisational procedures
- 1.5 Prescribed burn plan operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works are completed
- 1.6 Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
- 1.7 Fuel conditions are monitored, in accordance with organisational procedures and prescribed burn plan
- 1.8 Resource requirements are confirmed with reference to burn plan

2 Conduct burn

- 2.1 Prescribed burn notifications are issued, in accordance with organisational procedures
- 2.2 Pre-burn checks are conducted, in accordance with organisational procedures
- 2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
- 2.4 Resources are gathered and personnel are briefed, in accordance with prescribed burn plan and contingency

arrangements

- 2.5 Burn ignition strategies, including lighting techniques patterns and sequences are implemented, in accordance with organisational procedures and prescribed burn plan
 - 2.6 Burning is monitored, patrol activities are conducted and operational changes made, as required
 - 2.7 Contingencies are implemented, in accordance with prescribed burn plan, as required
 - 2.8 Burn documentation is kept, in accordance with organisational procedures
 - 2.9 Burn operations are concluded and burn security is implemented, in accordance with organisational procedures
 - 2.10 Crews are debriefed and resources released from the burn
 - 2.11 Incidents are reported and investigated, in accordance with organisational procedures
- 3 Conduct post burn activities**
- 3.1 Outcomes of the burn are assessed against burn objectives, in accordance with organisational procedures
 - 3.2 Variations from the burn plan are reported, in accordance with organisational procedures
 - 3.3 Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
 - 3.4 Prescribed burn records are submitted, in accordance with the organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include

- approval of plan for the conduct of prescribed burning
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

personnel or organisation must include one or more of the following

- personnel or organisations who
 - have an interest in adjacent land to which a burn could spread
 - have an interest in managing the consequences of a burn
 - have an interest in specific assets
 - have an interest in the area to be burned
 - may be concerned by evidence of a burn

resources must include one or more of the following

- contingency resources
- crews for control, suppression and ground ignition
- equipment and supplies
- logistical support
- other vehicles
- tankers

burn ignition strategies and tactics must include

- contingency arrangements
- fire behaviour to be achieved
- ignition methods, lighting patterns, sequencing and timing of ignition

lighting techniques must include one or more of the following

- hand held
- vehicle mounted propelled incendiaries
- wind and waterproof matches

lighting techniques and patterns must include

- contour lighting
- echelon
- grid
- line

- lighting sequence must include one or more of the following
- multi-line
 - spot
 - lighting sequences that considers
 - fuel arrangement
 - fuel moisture
 - slope
 - time of day
 - wind direction
- monitoring burn must include one or more of the following
- fire shape and spread
 - flame height
 - fuel moisture content
 - predictions
 - rate of spread
 - recording
 - safety considerations
 - smoke development
 - weather observation
 - wind speed and direction
- concluding operations and burn security must include one or more of the following
- mitigating hazards for public safety
 - mopping up and black out
 - patrolling burn area
 - reopening roads
 - transfer of responsibility, as per organisational procedures
- outcomes of the burn must include one or more of the following
- achievement of burn objectives
 - escapes
 - external impacts
 - levels of scorch
 - percentage of area burnt
 - reporting and storage of burn documentation

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR412 Conduct simple prescribed burns.

Links

Assessment Requirements for PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazards, risk mitigation and safety of personnel
- checking burn and crew activities
- completing burn notifications
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings, safe burns utilising resources and post burn activities including operations and security
- confirming resources, location, construction and suitability of control lines for prescribed burns
- identifying and implementing restoration and rehabilitation activities
- implementing contingency arrangements
- interpreting and implementing simple prescribed burn plans
- interpreting simple prescribed burn plans and objectives, fire behaviour conditions and existing and forecast weather conditions
- monitoring equipment
- planning for contingencies
- preparing for a simple prescribed burn
- recording actions taken
- using fire prediction tools and resources

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- briefing and debriefing content and processes
- burn notification including verbal and written notification
- characteristics of a simple prescribed burn including completed in one shift, involves

minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area

- conclusion of simple prescribed burns including operations and security
- contingency arrangements including command structure, safety considerations such as escape routes and safety zones, actions to take in the event of unexpected fire behaviour changes, resolution of escapes, special resources and secondary control lines, resource requirements, resolution of resource breakdowns, injury on fire line and burn targets not met
- contingency plans
- fire prediction tools
- ground ignition patterns and techniques
- impact of conditions at simple prescribed burns on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative and organisational authorisations required
- organisational documentation, policies and procedures
- outcomes of simple prescribed burn
- personnel and organisations involved in simple prescribed burn activities
- required permits
- resource requirements
- restoration and rehabilitation
- seasonal restrictions on simple prescribed burns
- simple prescribed burn and securing burn monitoring
- techniques, patterns and sequencing for lighting
- types of property and assets
- types of simple prescribed burns, prescribed burn plans and objectives
- weather conditions including: temperature, relative humidity, weather changes, atmospheric stability, drought index, fire danger index, weather forecasts, actual or anticipated changes in conditions and progress targets not met
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in a range of actual and/or field based workplace environments with evidence collected from undertaking a simple prescribed burn being required.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - fire management and contingency plans
 - lighting and suppression crews
 - lighting and suppression equipment
 - simple prescribed burn plans
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop simple prescribed burn plans for specified burn areas and to prepare the plans to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for the development of simple prescribed burn plans.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify burn areas and burn objectives

1.1 Areas requiring simple prescribed burning are identified, in accordance with organisational procedures

1.2 Burn objectives are identified, in accordance with organisational procedures

1.3 Target groups are identified and consultation process is undertaken, in accordance with organisational procedures

1.4 Legislative and regulatory requirements are identified and complied with throughout planning process

2 Prepare prescribed burn plan for simple burn

2.1 Key features of the burn area are identified including variations in terrain, fuel types and quantities control lines and weather

2.2 Risks from proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environment and ecological risks

2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures

2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined

2.5 Burn ignition strategies and tactics required for fire behaviour, intensity and that are suitable for location are determined, in accordance with organisational procedures

2.6 Lighting techniques and lighting patterns are identified

2.7 Hazard and risk mitigation are determined and asset protection works are identified

2.8 Strategies for mitigating hazards and risks are identified and required preparatory works are identified

2.9 Strategies and tactics for controlling prescribed burn are identified

- 2.10 Type and quantity of resources required are identified
 - 2.11 Prescriptions for implementation of burn plan strategies and tactics are documented, in accordance with organisational procedures
 - 2.12 Contingencies are outlined in the prescribed burn plan
 - 2.13 Prescribed burn plan is prepared, in accordance with organisational procedures
- 3 Gain approval of prescribed burn plan**
- 3.1 Prescribed burn plan is submitted for approval, in accordance with organisational procedures and legislative requirements
 - 3.2 Modifications and amendments to prescribed burn plan are made based on feedback received
 - 3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

simple prescribed burn plan must include

- an approved plan for conduct of simple prescribed burn
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

simple prescribed burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- management of cultural sites and activities
- protection of fire sensitive ecological communities

target consultation groups must include one or more of the following

- vegetation management
- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- groups or individuals that may be adversely affected
- other groups and people within prescribing organisation

lighting techniques must include

- hand held
- wind and/or waterproof matches

lighting patterns include one or more of the following

- contour lighting
- echelon
- grid
- line
- multi-line
- spot

operational hazards must include two or more of the following

- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous material
- high fuel loads
- ignition methods
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following

- impact of smoke on vulnerable communities near burn area
- safety of any people permanently or temporarily in burn area
- safety of people involved with burn implementation
- safety of people on areas adjacent to burn area

property and assets must include two or more of the following that are near the burn area

- camps or recreational areas
- commercial land use such as crops or industry
- cultural sites or historical buildings
- other property and assets
- plantations

environmental and ecological risks must include

- research plots and reference areas
- stock
- urban areas
- utilities - power and telephone lines, water supply structures and communications towers
- impact on
 - native flora and fauna including rare and endangered species
 - smoke
 - soil
 - use of chemical fire suppressants
 - water quality or supply
- crews for ground ignition and suppression
- equipment backup
- ignition and suppression equipment and supplies
- logistical support
- other vehicles
- tankers

resources must include one or more of the following

Assessment Requirements for PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- assessing fuel types and quantities in burn area
- determining actions to minimise impacts of simple prescribed burn
- developing contingency arrangements
- developing pre-burn work schedule
- gaining simple prescribed burn approval
- identifying and working with resources
- identifying burn areas including developing timelines for planning and conduct of simple prescribed burn, simple prescribed burn objectives, strategies and tactics to meet simple prescribed burn objectives, ignition strategies and lighting techniques and patterns for ignition
- identifying resources
- identifying, assessing and mitigating operational hazards and risks
- identifying, assessing and mitigating risks to people, property and assets, ecological and environmental risks
- implementing legislation and regulations
- interpreting map of area and identifying key features
- predicting anticipated fire behaviour and intensity in burn area
- preparing plans and map for simple prescribed burning
- targeting consultation groups are identified, liaised with and consulted

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- accumulated fuels
- characteristics of simple prescribed burns including completed in one shift, involves minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
- contingencies
- effects of fire on vegetation, fauna, people, property, assets, ecology and the environment
- fire behaviour for fuel type being prescribed
- fire prediction tools
- ignition strategies and tactics
- legislative, regulatory, organisational and permit requirements for simple prescribed fires
 - notification requirements
 - organisational documentation, policies and procedures
 - planned burn hazards and risks
 - resource requirements and capabilities
- simple prescribed burn plans
- simple prescribed burning ignition and suppression strategies
- smoke management
- target groups and community
- traffic management plan requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in a range of actual and/or field based workplace environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - area requiring application of fire under prescribed conditions

- existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR504 Assist with formulation and implementation of plans and policies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to consult on, develop, implement and evaluate a policy or plan for an organisation. It applies to personnel required to contribute, both individually and as part of a work team, to the formulation and implementation of organisational policies and plans.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Monitor administration of organisational policies, procedures and plans

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Requirements for the administration of organisational policies, procedures and practices are identified and monitored

- | | | |
|--|------------|--|
| | 1.2 | Policies and plans that are no longer relevant are identified and recommendations for change are made, in accordance with organisational procedures |
| 2 Identify and consider stakeholder concerns | 2.1 | Stakeholders are identified and consulted, in accordance with organisational procedures |
| | 2.2 | Organisation is represented at stakeholder meetings and external events with policies, procedures and plans explained |
| | 2.3 | Meetings with stakeholders are conducted on a regular basis or as required, in accordance with organisational procedures |
| 3 Facilitate policy change within the organisation | 3.1 | Policies, procedures and plans are facilitated, in accordance with organisational procedures |
| | 3.2 | Personnel are encouraged to participate in and comment on proposed changes to policies, procedures and plans |
| | 3.3 | Formal submissions on policies, procedures, plans and operational issues are drafted based on feedback |
| | 3.4 | Submissions are written and submitted, in accordance with organisational procedures |
| 4 Contribute to strategic and operational planning process | 4.1 | Contributions are made to organisational forward planning initiatives |
| | 4.2 | Contributions to strategic and operational planning processes are focused on activities relevant to the organisation |
| 5 Assist in the preparation and implementation of organisational business plans | 5.1 | Development of strategic plan is contributed to and linked to organisational business planning |
| | 5.2 | Organisational objectives and plans are implemented through activities and projects related to legislation, industry awards and agreements and policies and procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR504B Assist with formulation and implementation of plans and policies.

Assessment Requirements for PUAFIR504 Assist with formulation and implementation of plans and policies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assisting in the development, implementation and evaluation of policies, procedures or plans
- assisting in the preparation and implementation of organisational business plans
- contributing to strategic and operational planning processes
- developing and proposing submissions
- facilitating policy and plan change within the organisation
- following consultative processes
- identifying and considering stakeholder concerns
- implementing change management strategies to deal with resistance to policy development
- monitoring the administration of organisational policies, procedures and plans

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- concepts involved in the policy cycle
- consultative procedures and processes in the policy cycle
- methods for implementing and evaluating policies, procedures and plans
- organisational documentation, policies and procedures including submissions
- reasons for resistance to policy development and strategies for dealing with issues that arise
- role of management, employees and stakeholders in policy and plan development
- stakeholders and external organisations
- submission types
- types of operational plans
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated over time and in a range of contexts; the evaluation of the development and implementation of organisational plans and policies may require a few months.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR506 Conduct complex prescribed burns

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare and conduct complex prescribed burns, in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. A burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. A prescribed burn may require several separate ignitions (ground and/or aerial) possibly over several days. It may have several high value assets requiring complex protection actions.

The unit applies to personnel responsible for preparing, conducting and evaluating complex prescribed burns on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to burn

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Complex prescribed burn operations are identified and undertaken, in accordance with approved prescribed burn plan, burn objectives, organisational procedures, and legislative and regulatory requirements
- 1.2 Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
- 1.3 Burn notifications and plans are issued to personnel or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
- 1.4 Control lines, including secondary control lines are specified and prepared, in accordance with organisational procedures
- 1.5 Prescribed burn plan, operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works completed
- 1.6 Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
- 1.7 Fuel conditions are monitored, in accordance with organisational procedures
- 1.8 Resource requirements are confirmed with reference to burn plan and anticipated conditions
- 1.9 Forecast weather conditions are monitored throughout prescribed complex burn

2 Conduct burn

- 2.1 Burn notifications are issued, in accordance with organisational procedures
- 2.2 Pre-burn checks are conducted, in accordance with organisational procedures
- 2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
- 2.4 Resources are gathered and personnel briefed, in accordance with prescribed burn plan and contingency arrangements
- 2.5 Burn ignition strategies and tactics are implemented, in accordance with prescribed burn plan and organisational procedures including lighting techniques for ground and/or aerial ignition, as relevant to the specific burn, lighting patterns and lighting sequence
- 2.6 Burning is monitored, patrol activities are conducted and operational changes made, as required
- 2.7 Contingencies are implemented, as required, in accordance with prescribed burn plan
- 2.8 Burn documentation is kept, in accordance with organisational procedures
- 2.9 Burn operations are concluded and burn security is implemented in accordance with organisational requirements
- 2.10 Crews are debriefed and resources released from the burn
- 2.11 Incidents are reported and investigated in accordance with organisational procedures

3 Conduct post burn activities

- 3.1 Outcomes of burn are assessed and reported against burn objectives, in accordance with organisational procedures
- 3.2 Variations from burn plan are reported, in accordance with organisational procedures
- 3.3 Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
- 3.4 Complex prescribed burn records are submitted, in

accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include

- an approved plan for conduct of prescribed burning
- map identifying the area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

operational hazards must include one or more of the following

- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- ignition methods
- plant
- road traffic
- vegetation

environmental and ecological risks must include three or more of the following

- impact of smoke
- impact of use of any chemical fire suppressants
- impact on native flora and fauna, including rare and endangered species
- impact on soil
- impact on water quality or supply

contingency arrangements must include

- actions to take in the event of unexpected weather
- command structure
- dealing with escapes
- resource breakdowns
- resource requirements
- safety considerations including escape routes and safety zones
- special resources and/or secondary control lines
- wind changes

personnel or organisations must include one or more of the following

- personnel or organisations who
 - have an interest in managing the consequences of a burn
 - have an interest in preventing health impacts from smoke e.g. nursing homes, health departments
 - have an interest in specific assets
 - have an interest in the area to be burned
 - may be adversely affected by the burn
 - may be concerned by evidence of a burn
 - may have adjacent land to which a burn could spread

resource requirements must include one or more of the following

- contingency resources
- crews for
 - aircraft ground support
 - control and suppression
 - ground ignition

burn ignition strategies and tactics must include:

- equipment and supplies
- logistical support
- tankers and other vehicles
- contingency arrangements
- fire behaviour to be achieved
- ignition methods, lighting patterns, sequencing and timing of ignition

lighting techniques for ground and aerial ignition must include three or more of the following

- hand held drip torch
- aerial drip torch
- aerial incendiaries
- hand held propelled incendiaries
- vehicle mounted propelled incendiaries
- vehicle mounted incendiaries
- wind and/or waterproof matches

lighting patterns must include two or more of the following

- backing fire ignition
- spot or grid ignition
- strip ignition
- flank fire ignition

lighting sequence must include

- fuel arrangement
- fuel moisture
- slope
- time of day
- wind direction

monitoring complex prescribed burn must include four or more of the following

- fire development, shape and spread
- flame height
- fuel moisture content
- predictions
- rate of spread
- safety considerations
- smoke development
- weather observations

conclusion and complex prescribed burn security activities must include

- mitigating hazards for public safety
- mopping up and blacking out
- patrolling burn area
- reopening roads
- transfer of responsibility procedures

outcomes of the complex prescribed burn must include two or more of the following

- achievement of burn objectives
- escapes
- external impacts
- levels of scorch
- percentage of area burnt
- reporting and storage of burn documentation
- all those involved with burn implementation
- any in areas adjacent to burn area
- any permanently or temporarily in burn area
- impact of smoke on vulnerable communities near burn area

safety of people must include

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR511 Conduct complex prescribed burns.

Assessment Requirements for PUA FIR506 Conduct complex prescribed burns

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings
- conducting post burn activities
- conducting safe complex prescribed burn operations by utilising appropriate resources (ground and air)
- confirming location, construction and suitability of control lines for prescribed burns
- confirming resources required
- evaluating outcomes against objectives
- identifying and protecting assets
- implementing contingency arrangements
- interpreting and implementing complex prescribed burn plans
- interpreting existing and forecast weather conditions and fire behaviour conditions
- issuing verbal and written burn notifications
- monitoring burn and patrol activities
- preparing to burn
- recording actions taken
- responding to changing conditions
- restoring and rehabilitating sites
- using fire prediction tools
- using monitoring equipment
- utilising lighting techniques and sequencing
- working with ignition patterns and techniques

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- characteristics of complex prescribed burns including involvement of a variety of fuels and terrain, medium to large areas, moderate to high risk, range of fire intensity and significant potential impact on assets
- contingency plans
- evaluation of burn outcomes against objectives
- fire prediction tools and their use
- fuel sampling techniques
- ground and aerial ignition patterns and techniques
- impact of conditions of a complex prescribed burn on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative, regulatory and organisational authorisations
- organisational documentation, policies and procedures
- permit requirements
- procedures for monitoring, concluding and securing burn
- resource requirements and capabilities
- restoration and rehabilitation activities including site stabilisation and recording and reporting future restoration and rehabilitation requirement
- seasonal restrictions on prescribed complex burns
- smoke modelling and smoke impacts
- techniques, patterns and sequencing for lighting
- traffic management plans
- types of prescribed complex burns
- types of property and assets within or near burn area including urban areas, commercial land use such as crops or industry, any cultural sites or historical buildings, other property and assets, stock, utilities such as power and telephone lines, water supply, structures and communications towers, camps or recreational areas, plantations and research plots and reference areas
- verbal and written burn notifications
- weather conditions including temperature, relative humidity, wind, atmospheric stability, drought index, fire danger index, weather forecasts and actual or anticipated changes in conditions
- weather monitoring techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions. Competency should be demonstrated in an operational environment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - an area for proposed complex prescribed burn
 - authorisation to light burn
 - fire management plans
 - lighting and suppression crews
 - lighting equipment
 - prescribed burn plans including plan for proposed assessment burn
 - suppression equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR515 Develop complex prescribed burn plans

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop complex prescribed burn plans for specified burn areas to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area at a time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. The burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. It may require several separate ignitions, ground and/or aerial, possibly over several days and it may include a number of high value assets requiring complex protection actions.

The unit is applicable to personnel responsible for developing complex prescribed burn prescriptions.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify burn area and burn objectives

2 Prepare prescribed burn plan for a complex burn

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Areas requiring complex prescribed burn plans are identified, in accordance with organisational and permit procedures and legislative and regulatory requirements
- 1.2 Burn objectives are identified and consultation process is undertaken, in accordance with organisational procedures
- 1.3 Target consultation groups are identified, and consultation process is initiated, in accordance with organisational procedures
- 1.4 Legislative and regulatory requirements are identified and complied with throughout planning process
- 2.1 Key features of burn area are identified including variations in terrain, fuel types and quantities, control lines and weather
- 2.2 Risks from the proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environmental and ecological risks
- 2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures
- 2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined
- 2.5 Burn ignition strategies and tactics suited to location that provide required fire behaviour and intensity are determined, in accordance with organisational

procedures

- 2.6 Lighting techniques and patterns for both ground based and/or aerial ignition for specific burn are identified
 - 2.7 Strategies for mitigating hazards and risks are identified and preparatory works are planned
 - 2.8 Strategies and tactics for controlling prescribed burn are identified
 - 2.9 Type and quantity of resources required are identified
 - 2.10 Conditions for implementation of burn ignition strategies and tactics are specified, in accordance with organisational procedures
 - 2.11 Prescribed burn plan is prepared, in accordance with organisational procedures
 - 2.12 Contingencies are outlined in prescribed burn plan
- 3 Gain prescribed burn plan approval**
- 3.1 Prescribed burn plan is submitted for approval, in accordance with legislative and organisational requirements
 - 3.2 Modifications and amendments to prescribed burn plan are made, based on feedback received
 - 3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

- complex prescribed burn plans must include
- approved plan for conduct of prescribed burning
 - map identifying area to be burned
 - specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset, biodiversity and community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

target consultation groups must include one or more of the following

- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- other groups and people within the prescribing organisation
- people that may be affected by burn

burn ignition strategies and tactics must include

- contingency planning
- fire behaviour to be achieved
- ignition methods, sequencing and timing of ignition

lighting techniques for ground and aerial ignition must include three or more of the following

- hand held drip torch
- aerial drip torch
- aerial incendiaries
- hand held propelled incendiaries
- vehicle mounted propelled incendiaries
- vehicle mounted incendiaries
- wind and/or water proof matches

lighting patterns must include two or more of the following

- backing fire ignition
- spot or grid ignition
- strip ignition
- flank fire ignition

operational hazards must include two or more of the following

- adjoining land use and proximity to urban areas
- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- high fuel loads
- ignition method
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following

- impact of smoke on vulnerable communities near the burn area
- safety of any people permanently or temporarily in burn area
- safety of people involved with burn implementation
- safety of people on areas adjacent to burn area

property and assets must include two or more of the following

- any of the following that are in or near the burn area
 - camps or recreational areas
 - commercial land use such as crops or industry
 - cultural sites or historical buildings
 - other property and assets
 - plantations
 - research plots and reference areas
 - stock
 - urban areas
 - utilities - power and telephone lines, water supply structures and communications towers

environmental and ecological risks must include

- impact of native flora and fauna including rare and endangered species
- impact of smoke
- impact of soil
- impact of use of chemical fire suppressants
- impact on water quality or supply

resources required must include one or more of the following

- aircraft and crews including incendiary operations supervisors and machine operators for aerial ignition
- aircraft ground support
- control line standards
- crews and supervisors for ground ignition, control and patrol work
- equipment and supplies including fuel and incendiaries
- planning and logistical support
- pre-burn work schedule
- tankers, other ignition and suppression vehicles, equipment and fuel

Assessment Requirements for PUA FIR515 Develop complex prescribed burn plans

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risks mitigation and safe work practices
- assessing characteristics of multiple fuel types, terrain and weather
- developing a pre-burn work schedule
- developing contingency arrangements
- documenting complex prescribed burn plans including objectives
- gaining complex prescribed burn approval
- identifying actions to minimise impacts of complex prescribed burn preparation
- identifying resources
- identifying, assessing and mitigating operational hazards and risks including to people, property, assets, ecology and environment
- identifying, liaising and consulting with target consultation groups
- interpreting maps of area and identifying key features
- predicting fire behaviour and intensity in burn area
- preparing maps for complex burn operational use
- preparing plans for complex prescribed burns including developing lighting techniques and patterns for ground and/or aerial ignition, tactics involving multiple fuel types, ignition strategies, burn objectives, strategies and tactics to meet objectives and timelines for planning and conduct of burn
- recommending actions and communicating them
- responding to feedback and adjusting plans for approval

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- accumulated fuels
- burn feasibility
- characteristics of complex prescribed burn including medium to large areas, moderate to high risk, range of fire intensity, significant potential impact on assets and variety of fuels and terrain
- complex prescribed burning ignition and suppression strategies including ignition patterns and sequences for ground and aerial
- contingency arrangements
- control line suitability
- effects of fire on people, property, assets, ecology and environment
- fire prediction tools
- fuel sampling techniques
- legislative, regulatory, organisational and permit requirements
- organisational documentation, policies and procedures including pre-burn procedures
- planned burn hazards and risks
- resource capabilities
- smoke modelling
- traffic management
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- written and verbal notification requirements

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

PUAFIR601 Develop and administer organisational policies, procedures and practices

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to administer policies, procedures and practices to support the achievement of organisational and operational objectives.

The unit applies to personnel required to lead a team to develop policies and supporting procedures to meet identified organisational needs. Policies developed will require integration into the organisation's strategic and business planning.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

outcomes.

demonstrate achievement of the element.

1 Identify and develop policies, procedures and practices

- 1.1 Need for new or review of policies, procedures and practices is identified in consultation with stakeholders
- 1.2 Consultative processes are used to exchange information with stakeholders about policies, procedures and practices to assist in problem solving and decision making, in accordance with organisational procedures
- 1.3 Cooperation and input is obtained from stakeholders
- 1.4 Policies, procedures and practices are reviewed or developed with stakeholders, in accordance with organisational procedures
- 1.5 Reviewed or new policies, procedures and plans are submitted, in accordance with organisational procedures

2 Manage the implementation of policies, procedures and practices

- 2.1 Reviewed or new policies, procedures and practices are integrated into organisational strategic and business plans
- 2.2 Reviewed or new organisational policies, practices and procedures are implemented and monitored for adherence and compliance
- 2.3 Administration procedures are updated to reflect reviewed or new policies, procedures and processes
- 2.4 Communication about reviewed or new policies, procedures and processes to stakeholders is facilitated, in accordance with organisational procedures
- 2.5 Policies and procedures information is gathered, stored and safely secured with confidentiality maintained, in accordance with organisational procedures
- 2.6 Copyright provisions are observed, in accordance with organisational procedures

3 Review policies, procedures and practices

- 3.1 Policies, procedures and practices are reviewed to ensure they are current and meet organisational business and strategic plans
- 3.2 Decisions and actions about policies, procedures and practices are recorded, in accordance with organisational

procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to conduct an initial assessment on receipt of a call, when enroute and/or at the incident and to then take action to maintain public safety, preserve scene and record details and information on arrival at the scene of an accident or incident.

The unit is applicable personnel who are the first to arrive at the scene of an accident or incident. It applies to public safety personnel at an incident who need to understand the importance of maintaining the legal integrity of a scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Assessment Requirements for PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying questioning skills to gain accurate information
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- communicating information and liaising with all stakeholders
- conducting assessment enroute and at the incident scene
- implementing organisational policies and procedures
- observing scene and surrounding environment
- recording and reporting details of incident scene in accordance with organisational requirements
- securing and preserving scene, evidence and area or origin
- securing scene including removing non-emergency personnel from scene, isolating scene and erecting barriers
- taking notes accurately

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- factors impacting on public safety and scene preservation including those that could impact on safety of investigators, response team, security and/or preservation of actual site, security and preservation of situational evidence and traffic
- factors that may impact security of scene including topography, climatic conditions, human interference, animal interference, preservation of life/property, structural integrity and availability of personnel
- methods of securing scene
- organisational and legislative requirements
- organisational documentation, policies and procedures
- organisational procedures relative to scene preservation, collecting information and taking

witness details

- tactical factors affecting quality of investigation including environmental circumstances, chronology of events, access to scene, number of persons at scene, availability of support services and boundaries
- types of incident scenes
- witness details including name, contact details and other details are recorded, in accordance with organisational policies, procedures and legislative requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAMAN005 Manage projects

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage and evaluate projects.

The unit is applicable to any personnel undertaking a project management role. This includes management of small and short term projects as well as roles with a specific project management focus.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUATEA003 Lead, manage and develop teams

Competency Field

Management

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify project scope

1.1 Identify and record scope, objectives and outcomes of project

1.2 Strategy to achieve project objectives, outcomes and client requirements is developed

1.3 A risk management system is developed and applied to ensure project objectives can be met within organisational accountability frameworks

2 Acquire project resources

2.1 Project resources and equipment are identified, acquired and allocated

2.2 Project scope and objectives are analysed to determine tasks to achieve agreed outcomes on time and within budget

2.3 Process for monitoring, evaluating and reporting performance against objectives are developed and applied

2.4 Roles and responsibilities of team members and stakeholders are identified and agreed

3 Manage project activities

3.1 Project is initiated, in accordance with organisational policies and strategic direction, in consultation with stakeholders

3.2 Tasks are implemented, in accordance with project plan and organisational procedures

3.3 Communication process is established including responsibilities for conflict resolution

3.4 Progress is monitored to ensure time, performance, cost and quality of project is achieved

3.5 Proposed variations are investigated and negotiated, in consultation with stakeholders

4 Finalise project and evaluate and report on activities

4.1 Project is completed, outcomes are recorded and opportunities for future improvement are established

- 4.2 Evaluation of completed project is undertaken against agreed objectives and is reported to stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAMAN005B Manage projects.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUAMAN005 Manage projects

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing outcomes on completion of project
- designing strategies to achieve project outcomes and client requirements
- evaluating and reporting on project performance and project achievements
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying and preparing project scope
- implementing communication strategies with internal and external clients
- managing project according to predetermined timeframes and available resources
- maximising team effectiveness and staff selection
- monitoring project progress
- negotiating with contractors and suppliers
- obtaining project resources.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- basics of contract law
- communication techniques
- cost schedule control systems
- human resource management and policies
- integration of project activities
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements
- organisational procurement guidelines
- project management systems, tools and techniques

- project plans
- project specifications and objectives
- resource management
- risk management techniques
- types of stakeholders.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOIL202 Use basic equipment operations for oil spill response

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to operate, deploy, monitor and recover basic (Level 1) oil spill response equipment, whilst working as a team member.

An oil spill is the release of liquid petroleum hydrocarbon into the environment, either aquatic or on land. There are three categorised levels of oil spills; Level 1 spills are mild, causing localised damage in marine and or land environments.

The unit is applicable to personnel deployed to operate basic (Level 1) oil spill response equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Marine Pollution Response

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Undertake a health and safety site review

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify and communicate potential oil spill hazards and risks

1.2 Report hazards and risks, in accordance with

- organisational procedures
- 1.3** Select and use personal protective clothing and equipment, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines and Safety Data Sheet (SDS) requirements
- 2 Prepare Level 1 equipment for use**
- 2.1** Use the incident action plan and/or site specific deployment plan to identify and select oil spill response equipment, in accordance with organisational requirements and supervisor's instructions
- 2.2** Use organisational procedures and manufacturers' specifications, in the management of routine preoperational checks of equipment
- 2.3** Report unsafe or faulty equipment, in accordance with organisational procedures, and set aside for repair and/or replacement
- 3 Operate and/or deploy Level 1 equipment**
- 3.1** Operate and maintain equipment, in accordance with organisational procedures and manufacturers' specifications
- 3.2** Complete work tasks, in accordance with organisational procedures, WHS/OHS requirements and the incident action plan
- 3.3** Identify, action and monitor environmental implications associated with oil spill response and maintenance of equipment
- 3.4** Monitor oil spill environmental conditions, in conjunction with operational activities
- 4 Check, clean and store Level 1 equipment**
- 4.1** Report equipment use, in accordance with organisational procedures, site specific deployment plan and incident action plan requirements
- 4.2** Clean, secure and store equipment, including personal protective clothing and equipment, in accordance with organisational procedures, manufacturers' specifications and maintenance manuals
- 4.3** Report equipment faults or damage to supervisor, in accordance with organisational procedures
- 4.4** Maintain and clean workplace, in accordance with organisational procedures and WHS/ OHS guidelines

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOIL201 Use basic equipment operations for oil spill response.

Links

Assessment Requirements for PUAOIL202 Use basic equipment operations for oil spill response

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- checking, cleaning and storing Level 1 equipment including monitoring their performance
- communicating with team members and organisational personnel
- following organisational policies and procedures
- identifying hazards including chemical, operational and working environments
- loading and unloading materials safely
- modifying activities in relation to risk and environment
- operating and deploying Level 1 equipment
- preparing Level 1 equipment for use including preoperational checks
- reading and interpreting Safety Data Sheets (SDS)
- recognising and addressing problems when dismantling, inspecting and assembling equipment
- undertaking a health and safety site review including identifying and assessing potential risks
- using personal protective clothing and equipment
- working in a team to safely deploy and monitor basic (Level 1) equipment for the containment, recovery and storage of oil from a spill

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics and liabilities of Level 1 oil spill equipment including operation of and environmental impact of the equipment
- environmental conditions and implications of oil spill including oil spill response equipment required
- organisational documentation, policies and procedures
- personal protective clothing and equipment

- potential hazards
- preoperational checks
- safe working procedures and practices
- Safety Data Sheets (SDS)
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply health, safety and risk controls when working on an oiled shoreline. It includes identifying potential hazards, following procedures for risk control, supporting safety guidelines for working with oil and reporting on hazards, injuries and near misses.

The unit is applicable to shoreline supervisors and/or coordinators responsible for health, safety and risk controls to ensure the wellbeing of all responders reacting to an oiled shoreline incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Marine Pollution Response

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify potential hazards

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify and analyse hazards at oiled shoreline before and during incident

1.2 Complete a risk assessment for identified hazards in

accordance organisational procedures and Work, Health and Safety (WHS)/ Occupational Health and Safety (OHS) requirements

- 1.3 Identify and apply controls for hazards
 - 1.4 Review effectiveness of controls within the shoreline supervisor or coordinator's scope of authority
 - 1.5 Identify and report on any remaining risks to relevant personnel and organisations or agencies
- 2 Follow procedures for risk control**
- 2.1 Select, use and maintain personal protective clothing and equipment, in accordance with Safety Data Sheet (SDS) requirements
 - 2.2 Develop site specific health and safety plan and continuously review throughout incident
 - 2.3 Coordinate induction training for oil spill responders attending incident
- 3 Follow safety guidelines for working with oil**
- 3.1 Explain contact procedures for personnel involved in oil spill response
 - 3.2 Follow approved safety procedures and use personal protective clothing and equipment, as specified, in accordance with organisational procedures
 - 3.3 Implement safety procedures when operating near volatile oil substances
- 4 Report hazards, injuries, near misses**
- 4.1 Communicate and apply reporting requirements for hazards, injuries and near miss incidents
 - 4.2 Implement remediation strategies and practices, as required, following completion of incident report
 - 4.3 Complete organisational documentation and reports, in accordance with organisational procedures and forward to relevant personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOIL301 Apply health, safety and risk controls when working on oiled shorelines.

Assessment Requirements for PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including applying health and safety practices when working in oiled shoreline environments
- assessing risks
- complying with safety guidelines for working with oiled shorelines
- developing and reviewing site specific health and safety plans
- ensuring tasks are performed to meet safety requirements and quality systems
- following procedures for risk control
- identifying, documenting and managing health and safety, potential hazards and associated risks for oiled shorelines and continually review
- implementing controls for hazardous in oiled shoreline situations
- implementing emergency provisions
- implementing organisational policies and procedures
- recognising potential emergency situations and communicating promptly
- reporting hazards, injuries and near misses
- using personal protective clothing and equipment and material safety data sheets

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- correct use of equipment for handling materials
- environmental impacts and risks to individuals and the community
- hazards and hazardous areas including chemical, operational and working environments
- operational characteristics of oil spill equipment
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- risk mitigation processes including controls for hazards
- Safety Data Sheets (SDS)

- severity of risks from materials
- site specific health and safety planning
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Simulations will be required for the timely assessment of this unit of competency. Simulations should be based on potential work environment and should include the use of case studies and scenarios using what if questions and answers.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUAOIL304 Use advanced equipment operations for oil spill response

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to safely deploy, operate, monitor and recover advanced oil spill response equipment.

The unit is applicable to personnel responsible for the choices and deployment of appropriate advanced oil spill response equipment to meet the type of oil spill operations and environmental conditions for Level 1, 2 or 3 responses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Marine Pollution Response

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Manage safety of operation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Identify hazards and risks for the site and equipment use through a job safety analysis
- 1.2 Apply the hierarchy of controls to manage hazards and risks

- 5.2 Identify, action and monitor environmental implications associated with the operation and maintenance of equipment
- 5.3 Identify any changes to response as a result of ongoing monitoring of operations
- 6 **Check, clean and store equipment**
 - 6.1 Maintain records of equipment use, in accordance with organisational procedures, the incident management system and incident action plan
 - 6.2 Clean, secure and store equipment, in accordance with organisational procedures, manufacturers' specifications, maintenance manual and/or supervisor's instructions
 - 6.3 Report and take action on equipment malfunction, fault, wear or damage, in accordance with organisational procedures
 - 6.4 Maintain and clean workplace, in accordance with organisational procedures, WHS/OHS requirements and demobilisation plan

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOIL302 Use advanced equipment operations for oil spill response.

Assessment Requirements for PUAOIL304 Use advanced equipment operations for oil spill response

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (OHS)/Occupational Health and Safety (OHS) requirements
- checking, cleaning and storing advanced equipment
- communicating with work team, incident management team and stakeholders including conducting briefings and debriefings
- completing maintenance records
- conducting pre-operational checks
- demonstrating safe deployment and operation of equipment to contain, recover and store oil
- ensuring safety and hazard control procedures are implemented
- following organisational policies and procedures
- handling and using equipment safely including loading and unloading of equipment and materials
- identifying hazardous situations and taking appropriate action
- identifying hazards including chemical and operational and working environments
- managing the safety of oil spill operation
- modifying activities dependent on risk and environment
- monitoring and reassessing situations to ensure response meets environmental conditions
- monitoring equipment performance including identifying equipment requiring licensed operators
- performing risk assessments
- preparing advanced equipment for use
- reading and interpreting Safety Data Sheets (SDS)
- recognising and addressing problems when dismantling, inspecting and assembling equipment
- using personal protective clothing and equipment
- working safely

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication methods and techniques including briefing and debriefing processes
- deployment plans
- environmental implications
- hazards including chemical and operational and working environments
- hierarchy of controls
- incident action plans
- operational characteristics of advanced oil spill response equipment
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- safe operation of equipment
- Safety Data Sheets (SDS)
- WHS/OHS requirements and responsibilities including risk mitigation processes

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAOPE015 Conduct briefings and debriefings

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to lead and conduct a briefing and/or a debriefing in operational and nonoperational situations, in a range of environments. It includes planning and preparing for briefings and debriefings, conducting briefings and debriefings and concluding briefings and debriefings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and prepare for briefing and debriefing

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Content and format for briefing and debriefing are determined
- 1.2 Briefing and debriefing plan is prepared, in accordance with organisational policies and procedures
- 1.3 Personnel involved in the activity are identified and informed of briefing and debriefing requirements

- | | | |
|---|------------|---|
| | 1.4 | Safe and appropriate location for the briefing and debriefing is selected |
| 2 Conduct briefing and debriefing | 2.1 | Purpose and structure of the briefing and debriefing is outlined to incident personnel |
| | 2.2 | Understanding is sought and clarifications are provided, as required |
| | 2.3 | Contributions during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged |
| | 2.4 | Briefing is conducted using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) |
| | 2.5 | Briefing and debriefing checklist is used, as appropriate, in accordance with organisational policies and procedures |
| 3 Conclude briefing and debriefing | 3.1 | Contributions of personnel are acknowledged in a positive way |
| | 3.2 | Briefing and debriefing follow up action is identified and acted upon in a timely manner |
| | 3.3 | Debriefing activity is reviewed against the policies, procedures and training of the organisation to identify lessons learnt and opportunities for continuous improvement |
| | 3.4 | Briefing and debriefing findings are summarised and recorded, in a format suitable for subsequent action |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

content and format for briefings and

- adapting language to suit audience

debriefings must include

- collaborative approach
- descriptive and illustrative
- facilitator led
- predetermined Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- problem based

Assessment Requirements for PUAOPE015 Conduct briefings and debriefings

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- communicating with personnel in a group setting
- concluding briefings and debriefings including follow up and subsequent actions
- conducting briefings and debriefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- eliciting and encouraging contributions to briefings and debriefings in a constructive and positive way
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- planning and preparing for the briefings and debriefings including content, format and location
- preparing briefing and debriefing checklist and plan

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements performance criteria and range of conditions and includes knowledge of

- appropriate follow up and subsequent actions after a briefing or debriefing
- briefing and debriefing plans
- content and format for conducting briefings and debriefings
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- personnel roles and responsibilities
- personnel who may participate in briefings and debriefings including contractors, local, state, territory and federal government employees, operations personnel, support personnel, volunteers and personnel from other organisations and/or agencies
- safe and appropriate locations to conduct briefings and debriefings
- types of briefings and debriefings
- use of Situation, Mission, Execution, Administration/logistics, Command/control and Safety

(SMEACS) in briefings

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOPE016 Manage a multi-team sector

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage a multi-team response at an incident which may be time critical and/or potentially threatening to life, property or the environment.

An individual performing in this role has the title of Sector or Division Commander and/or Level 1 Operations Officer and is delegated responsibility by either the Incident Controller or Operations Officer. The individual is responsible for managing a sector or division at an incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

One of the following

PUAFIR302 Suppress urban fire

PUAFIR303 Suppress wildfire.

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct assessment of incident

- 1.1 Initial briefing is obtained, in accordance with organisational procedures
- 1.2 Risk assessment of all factors relevant to the sector is conducted
- 1.3 Resources for the incident are identified
- 1.4 Constraints which may impede the response are identified
- 1.5 Initial response options are identified and assessed

2 Take command of sector

- 2.1 Command of all sector personnel is established and maintained, in accordance with organisational policies and procedures
- 2.2 Communications systems are used, in accordance with organisational policies and procedures
- 2.3 Reporting processes are activated, in accordance with organisational policies and procedures, to provide continuous monitoring and evaluation of incident

3 Implement operations portion of IAP

- 3.1 Incident Action Plan (IAP) is communicated to teams, in accordance with organisational procedures
- 3.2 Resources are deployed within area of operations to ensure portion of the IAP is implemented, in accordance with organisational procedures
- 3.3 Operations are conducted and monitored, in accordance with the IAP
- 3.4 Operational reports are issued, in accordance with organisational policies and procedures
- 3.5 Operations are modified, as required, to suit the situation

4 Manage and monitor sector operations

- 4.1 Sector is managed, in accordance with organisational policies and procedures
- 4.2 Safe work practices and health and welfare procedures

and arrangements are implemented and monitored

- 4.3 Strategies are implemented, and tactics are determined, in accordance with the IAP
 - 4.4 Team leaders are briefed on Incident Controller's intent and are tasked, in accordance with the IAP
 - 4.5 Specific tasks are reviewed and modified, as required
 - 4.6 Regular exchange of information is maintained within the chain of command on incident situation, progress, achievement of incident objectives and identified risks
 - 4.7 Unexpected situations that require a quick and decisive response are recognised and responded to in accordance with the Incident Controller's intent
 - 4.8 Situation reports are provided through the chain of command on required modification to the IAP, including additional resources required, surplus resources and hazards present
 - 4.9 Need for logistical support is identified and communicated through the chain of command
 - 4.10 IAP activities are coordinated with adjacent sectors
- 5 Manage post incident operations**
- 5.1 Resources are accounted for and demobilised, in accordance with organisational requirements
 - 5.2 Post operational documentation is completed, in accordance with organisational procedures
 - 5.3 Sector debriefing is conducted, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOPE016A Manage a multi-team sector.

Links

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAOPE016 Manage a multi-team sector

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing information and support the chain of command
- adapting tactics
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing effectiveness of strategies and tactics on sector or division
- briefing and debriefing personnel
- completing documentation
- conducting an assessment of the area of operation
- deploying and managing human and physical resources
- establishing command of sector or division
- following organisational policies and procedures
- identifying and assessing risks
- implementing operations portion of the incident action plan
- leading teams
- maintaining shared situational awareness
- making decisions, negotiating and resolving conflict
- managing and monitoring sector or division operations
- managing post incident operations including demobilisation arrangements
- providing reports through the chain of command
- using communications systems.

Knowledge Evidence

- Australasian Inter-service Incident Management System (AIIMS) structure
- constraints on actions that may limit available options
- equipment and personnel capabilities for incident type

- human and physical resources available for the incident
- incident action plan objectives, strategies and tactics including Incident Controller's intent
- incident site layouts
- initial response options
- organisational command structure
- organisational policies, procedures and documentation for managing operations
- post operational procedures
- processes for implementing, monitoring, amending and reviewing strategies and tactics
- requirements for reporting and recording
- risk assessment
- types of incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work with others whilst making a positive contribution to the effectiveness and efficiency of a team in a work environment, when under direct supervision. Limited responsibility towards others is required.

The unit applies to personnel working in public safety and is particularly pertinent to new staff in assisting with integration into the team culture of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Team work

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Contribute to team activities

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Roles and responsibilities of team members are recognised
- 1.2 Contribution is made to identifying team goals and objectives

- 1.3 Work activities are completed to required standards and within stated timeframes, in accordance with organisational policies and procedures
 - 1.4 Assistance in the completion of tasks is requested from other team members
 - 1.5 Team members are assisted to ensure efficient and safe completion of tasks, in accordance with organisational policies and procedures
 - 1.6 Participation by team members is encouraged and acknowledged
 - 1.7 Changes in allocated roles and responsibilities are implemented, in accordance with organisational procedures
 - 1.8 Team meetings are attended regularly, punctually and are contributed to, in accordance with organisational procedures
- 2 Share knowledge and information**
- 2.1 Information related to work is communicated with team members to enable efficient completion of tasks, in accordance with the organisational policies and procedures
 - 2.2 Knowledge and skills are shared between team members
- 3 Give and receive support to or from team members**
- 3.1 Feedback or assistance is given to other team members in an appropriate and timely manner
 - 3.2 Team members are supported in achieving organisational goals
 - 3.3 Feedback from other team members is acted upon, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUATEA001B Work in a team.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attending and working in a variety of team situations
- completing organisational documentation
- contributing to organisational goals and team activities, team meetings and the achievement of tasks consistent with goals
- displaying interpersonal skills and encouraging team members
- following instructions
- following organisational policies and procedures
- giving and receiving support to and from team members
- identifying work conditions and types of activities to be undertaken
- listening and using a variety of communication skills
- providing appropriate suggestions, feedback and information to team members
- reporting information
- requesting assistance from appropriate personnel
- sharing knowledge and information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- composition of teams including roles and responsibilities of members
- nonoperational and operational communication processes
- organisational documentation, policies and procedures
- organisational goals and activities
- potential work task conditions
- techniques for assisting and supporting others
- techniques for giving and receiving feedback in a constructive manner
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

RGRHBR302 Carry out natural mare mating procedures

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to carry out mare mating procedures using stallions for natural service to maximise conception rates and live foal outcomes. It includes identifying mares in oestrus, attending mares for service, providing support for reproductive services and keeping accurate records.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour

Unit Sector

Horse Breeding (HBR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to perform mare mating procedures	1.1 Interpret the work program to determine work to be undertaken, and confirm with supervisor 1.2 Communicate with other workers to ensure smooth operation of the mating process 1.3 Adhere to requirements for the care and handling of horses 1.4 Select, use and maintain personal protective equipment (PPE) for safety and infection control purposes
2. Identify mares in a state of oestrus	2.1 Identify and select mares due for teasing or service 2.2 Identify work health and safety hazards, including horse behaviour and body language, assess risks and implement suitable controls 2.3 Catch and restrain selected mare, and foal if present, using safe horse handling techniques, for teasing or other oestrus identification procedures 2.4 Complete stud records according to workplace requirements
3. Attend mares for service	3.1 Prepare mare for hand service according to stud practice 3.2 Separate from mare and safely restrain foal, if present, according to stud practice 3.3 Restrain mare safely for natural service, using appropriate equipment according to stud practice 3.4 Attend mare for the service process 3.5 Return mare to box or paddock 3.6 Complete workplace records
4. Handle mares for routine veterinary reproductive procedures	4.1 Handle mare and foal to ensure both are settled and safe 4.2 Lead mare (and foal) into crush, ensuring safety and wellbeing of both mare and foal, if present 4.3 Use an appropriate restraint method in the crush 4.4 Provide support for manual or ultrasound follicle and pregnancy testing procedures 4.5 Assist the veterinarian to prepare for examination,

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	swabbing or treatment of the mare
5. Maintain accurate identification and records	5.1 Complete records of identification and breeding according to industry standards 5.2 Report details of any treatment performed, including follow-up treatment

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information in written work program and instructions
Writing	<ul style="list-style-type: none"> Record information relating to mating mares and breeding, accurately and legibly
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following regulatory and workplace procedures, including safe work, safe horse handling practices, and animal welfare requirements, in own role and work area
Interact with others	<ul style="list-style-type: none"> Work cooperatively with a range of personnel in different roles using clear communication techniques to carry out mating activities
Get the work done	<ul style="list-style-type: none"> Plan and sequence multiple tasks; monitor activity and prioritise tasks to achieve outcomes Make decisions about routine mating activities, taking responsibility for actions taken Use workplace technology, tools and systems to complete records and reports

Assessment Requirements for RGRHBR302 Carry out natural mare mating procedures

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- carried out natural mating preparation and service procedures for at least three mares, including:
 - two with a foal at foot
 - one maiden mare
- maintained accurate records of mating and breeding activities for each individual horse.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices relevant to mare mating procedures:
 - relevant horse breeding terminology
 - relevant anatomy and physiology of male and female reproductive systems in horses, including conception and gestation
 - common infertility in mares and what may be treated by veterinarians
 - oestrus cycle in mares and dioestrus behaviour and its detection
- safe work practices:
 - safe horse handling techniques
 - hazard and risk identification and minimisation
 - personal protective equipment (PPE)
 - biosecurity, hygiene and infection control practices relevant to mating procedures
- key regulatory requirements relating to animal welfare
- mare identification methods, including mare status and stallion booking
- procedures for preparation for mating, including:

- uterine swabbing and treatment
- role of veterinarians in carrying out follicle and pregnancy testing
- mare handling procedures, including types and purpose of different handling restraints
- workplace recording and reporting procedures, including stud recordkeeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace with teasing yards, stud veterinary facilities, breeding area or barn and foal restraint areas
- resources, equipment and materials:
 - mares to be mated, assessed as suitable for the experience and skill of the individual
 - at least one working stallion and teaser
 - tack, equipment and restraints required for teasing and natural mating
 - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
- specifications:
 - workplace recording and reporting forms or systems
 - work instructions or program for carrying out mating procedures.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Links

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c4b8489-f7e1-463b-81c8-6ecce6c192a0>

RGRHBR303 Assist with artificial insemination of mares

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to assist with mare artificial insemination (AI) procedures to maximise conception rates and live foal outcomes. It includes identifying mares in oestrus, attending mares for service, providing support for reproductive services and keeping accurate records.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour

Unit Sector

Horse Breeding (HBR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for AI mare procedures	1.1 Interpret the work program to determine work to be undertaken, and confirm with management 1.2 Communicate with other workers to ensure smooth operation of the production process 1.3 Adhere to requirements for the care and handling of horses 1.4 Select, use and maintain personal protective equipment (PPE) for safety and hygiene purposes
2. Identify mares in a state of oestrus	2.1 Identify and select mares due for teasing or service 2.2 Identify work health and safety hazards, including horse behaviour and body language, assess risks and implement suitable controls 2.3 Catch and restrain selected mare, and foal if present, using safe horse handling techniques, for teasing or other oestrus identification procedures 2.4 Complete stud records according to workplace requirements
3. Attend mares for AI	3.1 Prepare mare for AI routines according to stud practice 3.2 Restrain mare safely for AI and secure any foal at foot in close proximity 3.3 Attend mare for the AI process 3.4 Return mare, and foal if present, to box or paddock 3.5 Complete workplace records
4. Handle mares for routine veterinary reproductive procedures	4.1 Handle mare and foal to ensure both are settled and safe 4.2 Lead mare (and foal) into crush, ensuring safety and wellbeing of both mare and foal, if present 4.3 Use an appropriate restraint method in the crush 4.4 Provide support for manual or ultrasound follicle and pregnancy testing procedures and AI 4.5 Assist the veterinarian to prepare for examination, swabbing, treatment or AI of the mare

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information in written work program and instructions

RGRHBR304 Assess suitability of horses for specific uses

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to assess the suitability of horses for specific uses, and defines the standard required to identify horse conformation, assess soundness and temperament of horses, and maintain accurate data documentation.

The unit applies to individuals who work under broad direction, taking responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding and other horse industry environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour

Unit Sector

Horse Breeding (HBR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess horse conformation	1.1 Observe horse body language and behaviour to identify potential safety risks prior to approaching individual horses 1.2 Determine conformation requirements for specific use of a horse 1.3 Evaluate the conformation of a horse using relevant horse sector criteria and practices 1.4 Report on the desirable conformation of a horse
2. Report on unsoundness and blemishes in the horse	2.1 Examine the horse for unsoundness and blemishes using safe horse handling techniques 2.2 Record unsoundness and blemishes detected, including those on the fore and hind limbs and hooves, and assess level of effect for specific use 2.3 Report issues of unsoundness to relevant personnel
3. Report on the way of going of horses	3.1 Evaluate and report on essential elements of the way of going of the horse 3.2 Assess and report on the natural gaits of the horse 3.3 Detect and report defects in the way of going of the horse, including lameness
4. Report on undesirable behaviours and habits of horses	4.1 Observe and determine any behavioural issues the horse has that could pose a workplace risk or impact on horse suitability for purpose 4.2 Report behavioural issues that may be hazardous to people and other horses, according to workplace practices
5. Evaluate overall suitability of the horse for specific uses	5.1 Identify the horse characteristics needed for a specific use 5.2 Analyse findings from examining and observing individual horses to determine suitability for the specified use 5.3 Identify breed of horse and determine the effect this may have on suitability for use 5.4 Report on the findings of horse suitability for specific uses using correct concepts and horse industry terminology

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Record data and observations in workplace forms accurately and legibly
Oral communication	<ul style="list-style-type: none"> Use active listening and questioning techniques to clarify and confirm requirements Use clear language suitable for intended audience to ensure clarity of meaning when reporting and giving reasons for findings to others
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following workplace procedures, including safe horse handling practices and animal welfare requirements, in own role and work area
Get the work done	<ul style="list-style-type: none"> Apply specialist knowledge to analyse assessment findings and make decisions about horse suitability; taking responsibility for decisions and the outcome of the assessment Use workplace technology, tools and systems to complete records and reports

Assessment Requirements for RGRHBR304 Assess suitability of horses for specific uses

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- identified and assessed the suitability of at least three horses for specific uses
- maintained appropriate records of each horse assessed
- evaluated the overall suitability of each horse for specific uses, and reported on findings.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- desirable and undesirable conformations for specific uses
- common blemishes on fore and hind limbs and hooves
- common behavioural issues in horses
- desirable and undesirable natural gaits
- process for determining characteristics needed for specific uses
- impact of breeding or parentage on individual horse suitability for a specific use
- factors that affect suitability of an individual horse for a specific use, including gender, class and age
- how the final assessment could affect value of horse
- horse industry terminology relevant to assessing horse suitability.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- various live horses to be assessed for suitability for specific uses, assessed as suitable for the experience and skill of the individual
- specifications:
 - criteria for specific uses the horses are to be used for.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

RGRHBR305 Handle young horses

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to handle young horses in order to conduct a range of routine tasks, including catching and weaning foals and preparing yearlings for sale.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding and horse industry environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour

Unit Sector

Horse Breeding (HBR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work with young horses	1.1 Interpret and clarify work instructions and workplace procedures for handling young horses 1.2 Identify hazards and risks associated with catching and handling young horses, and implement control measures to minimise 1.3 Assemble gear, and check gear and facilities for safe use 1.4 Select and correctly fit personal protective equipment (PPE) appropriate for activities 1.5 Ensure records relating to young horses are updated regularly and accurately according to workplace requirements
2. Catch and handle foals	2.1 Catch foals of various ages using safe and ethical horse handling techniques 2.2 Restrain foals for routine health and husbandry procedures according to workplace practices
3. Assist with weaning foals	3.1 Identify suitable facilities for the safe handling, training and weaning of foals 3.2 Fit foals with a halter or head collar 3.3 Lead weanling foals 3.4 Handle weanling foal legs and pick up feet
4. Perform routine tasks preparing and presenting yearlings for sale	4.1 Carry out routine daily checks of yearlings according to workplace procedures 4.2 Lead yearlings for exercise and presentation 4.3 Exercise yearlings according to individual requirements 4.4 Shampoo, groom and trim yearlings in safe facility 4.5 Fit head collars, bridles, bits, rugs and safety gear

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Navigate the world of work	<ul style="list-style-type: none"> Follow work health and safety, safe horse handling and animal welfare requirements associated with own role and area of work with young horses
Get the work done	<ul style="list-style-type: none"> Plan and sequence tasks, prioritising activities to achieve work outcomes for handling young horses Use workplace technology, tools and/or systems to complete records and reports

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c4b8489-f7e1-463b-81c8-6ecce6c192a0>

Assessment Requirements for RGRHBR305 Handle young horses

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- safely handled and conducted a range of routine activities with young horses, including:
 - caught and handled three foals
 - assisted with weaning three foals
 - prepared and presented three yearlings for sale
- completed required records for each horse.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- suitable facilities for weaning and yearling preparation
- potential dangers to the foal and mare during weaning, and appropriate actions to reduce them
- stress responses sometimes associated with weaning for both mare and weanling:
 - fretting
 - over-heating
 - refusing food
 - overeating
 - self-inflicted injuries
- potential dangers to the yearlings during sale preparation, and appropriate actions to reduce them:
 - removing any potential hazards from stalls and handling areas
 - exercising in confined areas
 - monitoring exercise
- effects of exercise on joints and bones of the legs

- various responses in yearlings associated with sale preparation:
 - fretting
 - poor appetite
 - overeating
 - stable vices
- suitable tack and equipment for young horses
- safe horse handling techniques for young horses
- key features of regulatory requirements relevant to working with horses for:
 - work health and safety, including use of personal protective equipment
 - animal welfare
 - biosecurity.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions, including a small handling yard and crush
- resources, equipment and materials:
 - various young horses including weaning foals, weanlings and yearlings – note that young horses can be less compliant and highly reactive, and should be assessed as suitable for the experience and skill of the individual
 - appropriate tack for handling and caring for young horses
 - personal protective equipment (PPE) correctly fitted and applicable for task for individual
- specifications:
 - work instructions and workplace procedures for handling young horses.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c4b8489-f7e1-463b-81c8-6ecce6c192a0>

RGRHBR306 Raise young horses

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to raise young horses, including observing foal development, meeting dietary needs, and handling and assisting with educating young horses.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding and horse industry environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour

Unit Sector

Horse Breeding (HBR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor young horse development	1.1 Observe and assess young horse health, conformation, development and behaviour 1.2 Detect and report symptoms of ill health, common diseases, undesirable conformation and developmental disorders 1.3 Record young horse health and growth rate according to workplace practices 1.4 Vaccinate young horses under instruction
2. Monitor young horse behaviour	2.1 Observe young horse behaviour 2.2 Detect and report signs of stress to relevant personnel 2.3 Record observed behaviour according to workplace practices 2.4 Provide enrichment activities to young horses
3. Meet the dietary requirements of young horses	3.1 Monitor young horses for signs of adequate nutrition 3.2 Wean foals onto suitable pasture and supplement with feeds 3.3 Meet feed requirements of growing horses 3.4 Ensure feeding plans for young horses are appropriate for purpose
4. Handle and assist with the education of young horses	4.1 Check paddocks and facilities to minimise the risk of injury and blemishes to young horses 4.2 Use safe and ethical horse handling techniques to assist in educating young horses to be led and tied up 4.3 Provide young horses with social support of other young horses and/or nanny mare or gelding 4.4 Train weanlings and yearlings to parade for sale

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Writing	<ul style="list-style-type: none"> Record and report health and development information about young horses accurately in workplace forms

Assessment Requirements for RGRHBR306 Raise young horses

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- safely handled, fed and cared for at least three young horses (covering foals, weanlings and/or yearlings)
- observed each young horse and reported on behaviour and development
- educated three young horses to be led, tied and paraded in hand.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for raising young horses, including:
 - desirable and undesirable conformation and strategies to address undesirable conformation or characteristics
 - developmental disorders of young horses
 - diseases and common illnesses associated with young horses
 - monitoring behaviour
- animal health and welfare practices for young horses:
 - feeding and nutrition requirements for young horses and weaning foals
 - vaccination, worming and rotational or seasonal parasite programs
 - weaning practices
 - enrichment activities
- work health and safety practices applicable to working with young horses
- safe horse handling techniques for educating young horses
- hygiene, infection control and biosecurity practices applicable to working with young horses
- key principles and features of animal welfare legislation.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - various young horses – note that young horses can be less compliant and highly reactive, and should be assessed as suitable for the experience and skill of the individual
 - appropriate tack and equipment used for handling and caring for young horses
 - personal protective equipment (PPE) correctly fitted and applicable for task of individual
- specifications:
 - work instructions and workplace procedures for handling young horses.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

RGRHBR307 Carry out procedures for foaling down mares

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to monitor mares and their newborn at foaling; and refer high risk issues or problems for expert advice.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts within horse breeding and other horse industry environments.

No licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

Nil

Unit Sector

Horse Breeding (HBR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for foaling	1.1 Calculate and document foaling due dates for all mares confirmed pregnant 1.2 Assess and monitor condition and health status of pregnant mare prior to foaling, including arranging for Caslick to be opened for

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>relevant mares</p> <p>1.3 Identify hazards and assess and control risks in assisting with birthing, and follow safe work and safe horse handling practices</p> <p>1.4 Check and prepare birthing equipment, resources and materials, and environment, including personal protective equipment for safety and infection control purposes</p> <p>1.5 Move mares to an area where intervention can be carried out with minimal disruption and where biosecurity and quarantine procedures can be implemented</p> <p>1.6 Prepare a foaling plan according to workplace practices</p>
2. Monitor the foaling process	<p>2.1 Make regular observations to detect the signs of imminent parturition</p> <p>2.2 Prepare a pregnant mare for foaling</p> <p>2.3 Check regularly for signs of problems that may occur during foaling, and seek professional advice if required</p> <p>2.4 Make regular observations of mare and foal during foaling</p> <p>2.5 Ensure the foaling environment, facilities and equipment are maintained in a safe, hygienic and operational state</p> <p>2.6 Update and maintain records of foaling and foaling outcomes</p>
3. Carry out monitoring after foal has been born	<p>3.1 Allow mare to lie and rest for as long as possible</p> <p>3.2 Allow the foal to stand to break the umbilical cord, and treat stump with iodine</p> <p>3.3 Assist with tying the placenta after the mare stands and checking for expulsion</p> <p>3.4 Examine the placenta to ensure no part of it has been retained</p> <p>3.5 Monitor the mare and foal for nursing and general health</p> <p>3.6 Maintain foaling environment, facilities and equipment in a safe, hygienic and operational state, and report or fix faults</p> <p>3.7 Update foaling records accurately according to workplace practices</p>
4. Monitor and report on newborn foals	<p>4.1 Monitor and report on the health of newborn foal</p> <p>4.2 Record the markings and other identifying features of newly born foals</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.3 Report conditions or signs of ill health requiring veterinary assistance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Use basic arithmetic to calculate gestation times and expected birthing dates

Assessment Requirements for RGRHBR307 Carry out procedures for foaling down mares

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- monitored and prepared at least two mares for foaling
- checked and monitored the condition of each mare post-foaling
- handled one newly born foal safely
- recorded and reported details of mares and foals according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for foaling down mares, including:
 - signs of dystocia or malpresentation by timing rate of progress in giving birth and the initial presentation of the foal
 - stages of foaling and common timeframes, including water breaking, expulsion of the foetus, and expulsion of afterbirth
 - scenarios where specialist advice or assistance is needed
 - reasons for undertaking and timing of IgG (immunoglobulin) test on newborn foals
 - common timeframes for foals to stand and drink
 - features of safe and secure post-foaling environment
- safe work practices:
 - safe and ethical horse handling techniques
 - hazard identification and practices for controlling risks in foaling and post-foaling environment
 - personal protective equipment (PPE) for safety and infection control
 - maintaining hygienic and environmentally responsible workplace practices

- workplace recording and reporting requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - various live mares in-foal and newborn foals assessed as suitable for the experience and skill of the individual
 - appropriate tack for horse and activity
 - PPE correctly fitted and applicable to activity for the individual
 - equipment required for foaling down
- specifications:
 - work instructions for carrying out foaling down of mares
 - foaling recording/reporting forms.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for RGRHBR401 Maintain horse stud records

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assisted with preparing nominations for at least three horses for sale, bonus scheme and/or exhibition
- obtained or prepared information, records and/or registrations for two external bodies as instructed
- maintained accurate routine stud records relevant to own role
- identified and recorded arrival and departure of at least three horses
- entered information and data into workplace systems.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- nature of stud business in which the individual works
- processes and protocols of the stud business in which the individual works
- types of records and record keeping system used by the horse stud
- requirements and procedures laid down by the relevant breed societies or the keeper of the relevant stud book
- legislative requirements and workplace procedures and instructions relevant to role for:
 - animal health and welfare
 - biosecurity
 - workplace health and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- specifications:
 - for stud records
 - application or entry forms for exhibitions, bonus schemes or sales.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

RGRHBR403 Handle and care for breeding stallions

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to handle and care for stallions, particularly throughout the mating process.

The unit applies to individuals who use specialised horse breeding knowledge and skills and have experience working with stallions. They have responsibility for a work activity, area or team, and provide and communicate solutions for a range of predictable and sometimes unpredictable problems in the horse breeding sector.

Licensing, legislative, regulatory or certification requirements apply to this unit. Users are advised to check with the relevant Principal Racing Authority for current licence or registration requirements.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour

Unit Sector

Horse Breeding (HBR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to handle stallions	1.1 Identify work hazards, assess risks and implement suitable controls for activities involving stallions 1.2 Confirm the work program with management 1.3 Communicate with other workers to ensure smooth operation of the mating process 1.4 Research known behaviour of individual stallions to be handled, and advise others of any specific risks 1.5 Ensure workers involved with activities have the skills needed to safely handle stallions 1.6 Select, check and maintain tools and equipment, including personal protective equipment (PPE) used for safety and hygiene purposes
2. Care for stallions	2.1 Observe body language and behaviour of stallions before handling, and assess safety risks 2.2 Catch, groom and exercise stallions using safe horse handling techniques to maintain fitness and monitor for condition and general health 2.3 Parade stallion for prospective breeders to select according to workplace practices 2.4 Conduct checks and observe, identify and record changes in stallion behaviour and health 2.5 Comply with prescribed nutritional programs, and complete records 2.6 Monitor work hazards, assess risks and implement suitable controls on an ongoing basis 2.7 Maintain prescribed horse health routines throughout and between breeding seasons
3. Serve mares or dummy	3.1 Select and fit appropriate halter, bit and/or chain to control stallion 3.2 Approach mare to pre-tease 3.3 Identify and implement any additional requirements to ensure safe mating procedure 3.4 Allow stallion to mount mare or dummy safely 3.5 Ensure stallion ejaculates and dismounts mare safely

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.6 Collect semen for sampling or mating according to workplace procedures, and minimising stress to stallion 3.7 Wash stallion down according to workplace hygiene practices
4. Complete hygiene and administration activities	4.1 Clean equipment, collection and mating areas, and store equipment according to workplace procedures 4.2 Dispose of all containers, leftover fluids, waste and debris following environmental and biosecurity procedures 4.3 Complete all records and documentation

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information in written work program and instructions
Writing	<ul style="list-style-type: none"> Record information relating to mating stallions accurately and legibly
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following regulatory and workplace procedures, including safe work, safe horse handling practices, animal welfare and biosecurity requirements, in own role and work area
Interact with others	<ul style="list-style-type: none"> Work cooperatively with a range of personnel in different roles using clear communication techniques to carry out mating activities
Get the work done	<ul style="list-style-type: none"> Plan and sequence multiple tasks; monitoring activity and prioritising tasks to achieve outcomes Make decisions about routine mating activities, taking responsibility for actions taken Use workplace technology, tools and/or systems to complete records and reports

Assessment Requirements for RGRHBR403 Handle and care for breeding stallions

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- safely handled and attended at least one stallion throughout three mating processes and/or semen collections used for artificial insemination (AI)
- cared for and monitored the stallion for signs of disease, ill health or injury
- maintained workplace records for stallion.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for handling and caring for stallions, including:
 - stallion behaviour, body language and potential safety risks
 - common equine injury and disease that affect breeding stallions
 - procedures for monitoring stallion health
 - indicators of stallion health and welfare
 - accurate identification and recording in the mating process
 - strategies for managing efficient and well-managed stud activities to maximise conception rates and live foal outcomes
- work health and safety requirements and safe work practices:
 - safe horse handling techniques
 - hazard identification, risk assessment and controls
 - handling frozen semen and working with liquid nitrogen – AI only
 - types and correct fit of personal protective equipment (PPE)
 - duty of care for workers
- key requirements of environmental and biosecurity procedures, including for:

- disposing of wastes
- infection control
- site hygiene
- workplace recording and reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - at least one live stallion – note that stallions can be less compliant and highly reactive, and should be assessed as suitable for the experience and skill of the individual
 - various mares for mating, or dummies
 - equipment and restraints required for mating activities
 - appropriate tack for horse and activity
 - PPE correctly fitted and applicable to activity for the individual
- specifications:
 - work instructions or program for carrying out mating procedures.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret key information in a range of documentation, including work program, and entry requirements and application processes for exhibiting and selling horses

Skill	Description
Writing	<ul style="list-style-type: none"> Prepare and present data and information clearly in a logical and sequenced structure to enhance readability
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for maintaining records, following workplace procedures and requirements from external bodies
Interact with others	<ul style="list-style-type: none"> Use communication practices and protocols suitable for liaising with management, operational personnel and external personnel
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning and sequencing tasks and workload; meeting requirements of student stable management and expectations of own role Uses main features and functions of digital tools to complete tasks

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
RGRHBR505 Oversee administration of student records	ACMHBR401 Carry out student stable management duties	Code and title changed to reflect appropriate industry sector usage, level of responsibility and intent of unit Removal of points duplicating performance criteria in performance evidence	No equivalent unit

Links

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c4b8489-f7e1-463b-81c8-6ecce6c192a0>

Assessment Requirements for RGRHBR505 Overseas administration of stud records

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- managed processes for the sale and/or exhibition of at least three horses
- prepared forms and records for three external organisations
- followed up on processes to ensure the maintenance of accurate and up-to-date stud records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operations and business objectives of the workplace stud
- workplace stud program, procedures and instructions
- procedures and requirements for:
 - breed societies
 - keeper of the relevant stud book
 - sales and exhibition bodies
 - breeding bonus schemes
- breeding records and data and reporting requirements, including:
 - service and foaling dates
 - horse and foal identification
 - stallion and mare deaths
 - stillbirths and neonatal deaths
 - abnormalities
- regulatory requirements relevant to role for:
 - animal health and welfare

- work health and safety
- biosecurity
- employment of staff and contractors
- financial reporting.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - application or entry forms for exhibitions or sales
 - financial and other workplace records or systems
- specifications:
 - stud records for selected horses.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

RIICAR301D Rehabilitate exploration site

Modification History

Release	Comment
1	This unit replaces RIICAR301A Rehabilitate exploration site
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to rehabilitate exploration sites in Drilling and Metalliferous mining.

This unit is appropriate for those in operational or technical specialist roles

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Drilling

Metalliferous mining

Elements and Performance Criteria

1. Plan and prepare for site rehabilitation	<p>1.1 Access, interpret and apply exploration site rehabilitation documentation and ensure the work activity is compliant</p> <p>1.2 Access, read, interpret and apply the rehabilitation plan and Environmental Work Procedures (EWP)</p> <p>1.3 Identify, address and report potential hazards and risks</p> <p>1.4 Select and wear personal protective equipment appropriate for the work activity</p> <p>1.5 Obtain map of area and identify location of sites to be rehabilitated</p>
---	---

	1.6 Establish communication system and protocols 1.7 Carry out rehabilitation plant and equipment pre-start checks
2. Rehabilitate exploration site	2.1 Assess and address hydrocarbon spills at drill site 2.2 Ensure saline or contaminated water sumps are completely dry 2.3 Identify and address waste materials according to rehabilitation plan and Environmental Work Procedures (EWP) 2.4 Operate plant and machinery to scarify all cleared areas 2.5 Retrieve cleared vegetation and return to rehabilitated site 2.6 Remove and dispose of all rubbish 2.7 Re-vegetate area, if required 2.8 Record rehabilitation details 2.9 Inspect rehabilitated site for compliance
3. Cap drill holes	3.1 Excavate hole collar to suitable depth 3.2 Pour excess drill chips into drill hole 3.3 Select and insert hole plug firmly into hole opening/collar, and ensure water ingress and future erosion is prevented 3.4 Backfill excavated soil onto plug and compact firmly, allowing for subsidence and run off 3.5 Peg hole site and mark with ID number
4. Rehabilitate access tracks	4.1 Remove all windrows 4.2 Scarify tracks 4.3 Retrieve cleared vegetation and restore to access track 4.4 Block or disguise the entrance to the track

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIICAR301A Rehabilitate exploration site

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIICAR301D Rehabilitate exploration site

Modification History

Release	Comment
1	This unit replaces RIICAR301A Rehabilitate exploration site
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of exploration site rehabilitation including:
 - selecting and using the required tools and equipment
 - correctly following rehabilitation procedures
 - identifying and applying hole-capping methods
- demonstrates completion of rehabilitating exploration sites that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - correctly interpreting a rehabilitation plan and Environmental Work Procedures
 - marking the location of sites to be rehabilitated on a map of the area
 - completing plant and equipment pre-start checks
 - identifying, recording and reporting hazards and risks
 - completing rehabilitation operations

Knowledge Evidence

The candidate must demonstrate knowledge in rehabilitating exploration sites through:

- relevant state or territory regulations
- rehabilitation principles and practices
- environmental work procedures

- types and operational characteristics of plant/equipment used in rehabilitation operations
- re-vegetation methods and types
- hole-capping methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors	

	assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.
--	--

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIICAR302D Rehabilitate small mine site

Modification History

Release	Comment
1	This unit replaces RIICAR302A Rehabilitate small mine site.
2	Editorial corrections. Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to rehabilitate small mine sites in Extractive and Metalliferous mining.

This unit is appropriate for those working in operational or technical specialist roles.

No licensing, legislation, or certification requirements apply to this unit at the time of publication.

Unit Sector

Extractive

Metalliferous mining

Elements and Performance Criteria

1. Plan and prepare for small mine site rehabilitation	<p>1.1 Access, interpret and apply small mine site rehabilitation documentation and ensure the work activity is compliant</p> <p>1.2 Access, read, interpret and apply the rehabilitation plan and Environmental Work Procedures (EWP)</p> <p>1.3 Identify rehabilitation and vegetation removal requirements</p> <p>1.4 Identify natural water flow/water courses around the site</p>
--	--

	<p>1.5 Ensure removal of all recoverable equipment no longer required</p> <p>1.6 Identify specific equipment, materials and operations required</p> <p>1.7 Identify, address and report hazards</p> <p>1.8 Identify plan to minimise rehabilitation time and residual damage</p>
2. Rehabilitate site	<p>2.1 Apply WHS procedures and information throughout the work</p> <p>2.2 Identify and address site environmental concerns</p> <p>2.3 Select and use correct equipment and materials</p> <p>2.4 Remove abandoned materials and rubbish from site</p> <p>2.5 Restore surface in accordance with rehabilitation plan</p> <p>2.6 Remove residual mullock to designated location</p> <p>2.7 Establish run-off and drainage channels</p> <p>2.8 Maintain communication systems and protocol</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIICAR302D Rehabilitate small mine site

Modification History

Release	Comment
1	This unit replaces RIICAR302A Rehabilitate small mine site.
2	<p>Editorial corrections.</p> <p>Required frequency and volume of evidence amended in Performance evidence.</p> <p>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.</p>

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for safe, effective and efficient small mine site rehabilitation including:
 - selecting and using the required tools and equipment
 - correctly following rehabilitation procedures
- demonstrates completion of rehabilitating small mine sites that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - correctly interpreting a rehabilitation plan and Environmental Work Procedures
 - identifying, recording and reporting hazards and risks
 - completing rehabilitation operations
 - correctly operating and using equipment and materials

Knowledge Evidence

The candidate must demonstrate knowledge in small mine site rehabilitation through:

- identifying non-native plants
- relevant internal and external bodies

- accessing, reading and interpreting written material appropriate for local conditions
- graphic information
- identifying faults
- procedures for the disposal of environmentally sensitive fluids and materials
- planning for rehabilitation
- ground-water procedures and handling

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years

Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.
---------------	--

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIENV401E Supervise dust and noise control

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to supervise dust and noise control in the resources and infrastructure industries.

It applies to those working in supervisory roles. They are generally responsible for the output of others, contribute to the development of technical solutions to non-routine problems and apply management plans to the workplace.

Licensing, legislative and certification requirements may apply to this unit and can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Access and share requirements and procedures	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to supervise dust and noise control 1.3 Communicate clearly to relevant personnel 1.4 Explain the health and environmental implications of non-conformance to all relevant personnel
2. Plan and implement site requirement	2.1 Plan control measures and work practices with colleagues to ensure compliance 2.2 Implement control measures and work practices to ensure compliance 2.3 Plan and implement dust and noise monitoring according to workplace procedures 2.4 Identify dust and noise control training needs and implement training as required
3. Monitor, adjust and	3.1 Identify, rectify and report actual/potential dust and noise problems

ELEMENT	PERFORMANCE CRITERIA
report	<p data-bbox="555 304 1134 338">promptly and decisively to ensure compliance</p> <p data-bbox="507 349 1342 416">3.2 Manage activities so that potential non-compliance issues are minimised</p> <p data-bbox="507 427 1442 495">3.3 Submit recommendations on improvements in dust and noise control according to workplace procedures</p> <p data-bbox="507 506 1430 573">3.4 Inform individuals/teams of the results of improvements in dust and noise control</p> <p data-bbox="507 584 1318 651">3.5 Maintain systems, written records and reporting procedures according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul data-bbox="512 1021 1394 1088" style="list-style-type: none"> • Identifies and interprets information from workplace procedures, policies, documentation and systems
Oral communication	<ul data-bbox="512 1111 1430 1211" style="list-style-type: none"> • Presents information or assistance using industry specific vocabulary • Uses listening and questioning to clarify and confirm understanding
Problem solving	<ul data-bbox="512 1234 1445 1335" style="list-style-type: none"> • Identifies a range of factors that impact on a decision, including own values and principles, the needs, power, values, beliefs and assumptions of stakeholders

Unit Mapping Information

Supersedes and is equivalent to RIIENV401D Supervise dust and noise control.

Links

Companion Volume implementation guides is found on VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIENV401E Supervise dust and noise control

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- supervise dust and noise control on at least two occasions, including:
 - accessing and interpreting compliance documentation
 - investigating and implementing control measures
 - implementing dust and noise monitoring
 - processing written reports and records
 - identifying recommendations and communicating to the work team.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for supervising dust and noise control
- work effectively with others to supervise dust and noise control in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to supervise dust and noise control
- key policies, procedures and documentation required to supervise dust and noise control
- the organisation and site requirements and procedures
- harmful dust and noise levels

- the health and environmental implication of non-conformance
- potential dust and noise problems
- dust and noise control measures
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to supervising dust and noise control
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes

Links

Companion Volume implementation guides is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

RIIMEX201E Suppress dust in open-cut environments

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to suppress dust in open-cut environments in coal mining, metalliferous mining and extractive industries. It involves carrying out and adjusting dust suppression activities based on the site's application schedule and prevailing weather conditions.

The unit applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take some responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Unit Sector

Coal mining

Extractive

Metalliferous mining

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for dust suppression	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply dust suppression documentation 1.3 Select and wear personal protective equipment required for work activities 1.4 Identify potential hazards and environmental issues,

ELEMENT	PERFORMANCE CRITERIA
	implement control measures within scope of own role and escalate where required 1.5 Obtain and interpret emergency procedures and identify steps required to respond to emergencies 1.6 Select, access and interpret appropriate dust suppression procedure for the work activity and site conditions 1.7 Carry out pre-start and start-up according to manufacturer specifications and site requirement
2. Apply dust suppressant and rehabilitation measures	2.1 Apply selected dust suppression methods according to site requirements 2.2 Adjust dust suppression activities to the application schedule and weather conditions 2.3 Communicate and coordinate activities with others prior to, during and on completion of the work activity 2.4 Confirm dust creation is minimised 2.5 Apply rehabilitation measures to stabilise dumps and tailings sites
3. Carry out post-operational procedures for suppressing dust	3.1 Carry out park up, shutdown and secure equipment procedures according to manufacturer specifications and site requirements 3.2 Carry out operator maintenance and servicing according to manufacturer specifications and site requirements 3.3 Complete records and reports according to site requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Calculates basic measurements including mass and dimensions
Oral communication	<ul style="list-style-type: none"> Conveys information and requirements clearly and listens actively
Reading	<ul style="list-style-type: none"> Identifies and interprets specific information from workplace documentation
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none">• Completes records and reports using sector specific vocabulary, grammatical structures and conventions

Unit Mapping Information

Supersedes and is equivalent to RIIMEX201D Suppress dust in open-cut environment.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for RIIMEX201E Suppress dust in open-cut environments

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- suppress dust in open-cut environments on at least two occasions, including:
 - identifying situations requiring dust suppression, including any hazards and environmental considerations
 - applying rehabilitation measures to stabilise dumps and tailings sites.

During the above, the candidate must:

- locate and apply required documentation, policies and procedures
- implement the requirements, procedures and techniques to suppress dust safely, effectively and efficiently in an open-cut environment, including:
 - using vehicle directions and signals
 - applying equipment operating requirements and procedures
 - identifying and addressing hazards
 - interpreting plans, reports, maps and specifications
 - working while wearing protective equipment
- work effectively with others to undertake and complete dust suppression in an open-cut environment that meets the required outcomes, including:
 - communicating with others to receive and clarify work instructions
 - completing written and verbal records and reports
 - applying decision making and troubleshooting techniques.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- policies, procedures and documentation required to suppress dust in open-cut environments, including those relating to:
 - basic geological and technical data relating to rock formations
 - environmental protection
 - fire, accident and emergency
 - personal protective equipment
 - site maintenance records and reporting requirements
 - site operational, quality and communication requirements
 - site product characteristics
 - work health and safety
- types, characteristics, technical capabilities and limitations of plant and equipment required to suppress dust in open-cut environments, including:
 - pre-start, start-up and operating techniques
 - isolation and shutdown procedures
- principles, methods and techniques for suppressing dust in open-cut environments, including:
 - interpreting plans, reports, maps and specifications
 - interpreting required data
 - applying rehabilitation measures to stabilise dumps and tailing sites
 - using vehicle directions and signals.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - an environment where dust prevention is required
 - dust prevention equipment
 - simulated or actual documentation of work requirements and reports
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

***While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO206D Conduct bulk water truck operations

Modification History

Release	Comments
1	This unit replaces RIIMPO206B Conduct bulk water truck operations. Performance Criteria amended to make requirements more explicit; Manoeuvring, Driving and Parking Up added; Operator Maintenance element added.
2	Modification History added.
3	Editorial corrections; removed repetition from Performance Criteria; amend reference to Licensing requirements in Unit Application.
4	Performance Criteria 3.6 amended for clarity. Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Performance Criteria 3.6 and Performance Evidence grammatical corrections. No new content.

Application

This unit describes a participant's skills and knowledge required to conduct bulk water truck operations in the Coal and Metalliferous mining and Extractive.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Extractive

Coal mining

Metalliferous mining

Elements and Performance Criteria

<p>1. Plan and prepare for bulk water truck operations</p>	<p>1.1 Access, interpret and apply bulk water truck operations documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify and address potential risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for work activities</p> <p>1.5 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency</p>
<p>2. Operate truck</p>	<p>2.1 Carry out pre-start, start-up, park-up, shutdown, and secure equipment procedures</p> <p>2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity</p> <p>2.3 Select and modify the operating technique to appropriately meet changing work conditions</p> <p>2.4 Drive truck within recommended speed, engine capability and limitations</p> <p>2.5 Act on or report monitoring systems and alarms</p> <p>2.6 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p>
<p>3. Load, haul and distribute water</p>	<p>3.1 Position water cart at load and discharge/distribution points</p> <p>3.2 Load water cart to within the authorised carrying capacity and to suit the site and task conditions</p> <p>3.3 Carry out water haulage operations efficiently, safely and smoothly avoiding surge and sway</p> <p>3.4 Discharge/distribute water efficiently in accordance with requirements and procedures</p> <p>3.5 Monitor and maintain discharge and distribution systems throughout the operations</p> <p>3.6 Complete the work plan within the operating capacity of the equipment</p>
<p>4. Carry out machine operator maintenance</p>	<p>4.1 Prepare machine for maintenance</p> <p>4.2 Conduct inspection and fault finding</p> <p>4.3 Carry out scheduled maintenance tasks</p> <p>4.4 Return machine to service</p>

	4.5	Process written maintenance records
5. Conduct housekeeping activities	5.1	Clear work area and dispose of or recycle materials
	5.2	Manage/report hazards, and maintain a safe working environment
	5.3	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

No equivalent unit

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIMPO206D Conduct bulk water truck operations

Modification History

Release	Comments
1	This unit replaces RIIMPO206B Conduct bulk water truck operations. Performance Criteria amended to make requirements more explicit; Manoeuvring, Driving and Parking Up added; Operator Maintenance element added.
2	Modification History added.
3	Editorial corrections; removed repetition from Performance Criteria; amend reference to Licensing requirements in Unit Application.
4	Performance Criteria 3.6 amended for clarity. Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Performance Criteria 3.6 and Performance Evidence grammatical corrections. No new content.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of bulk water truck operations including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - carrying out vehicle refuelling requirements and procedures
 - driving and operating the vehicles and equipment to site conditions and requirements

- applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
- applying problem solving and troubleshooting techniques
- works effectively with others to undertake and complete bulk water truck operations that meets all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - complying with written and verbal reporting requirements and procedures
- demonstrates completion of conducting bulk water truck operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - correctly positioning water cart at load and discharge/distribution points and load water cart to capacity
 - distributing water efficiently across haul roads
 - adjusting driving and operating techniques to suit the work environment and ground conditions
 - completing a minimum of 500 metres bulk water truck operations

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting bulk water truck operations:

- identifying equipment processes, technical capability and limitations
- identifying, interpreting and using geological and technical data (basic)
- using mine operational systems
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- applying chemical and fuel safety measures
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,

- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

Assessment Requirements for RIIMPO304E Conduct wheel loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of wheel loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the wheel loader for operations and adjusting techniques to suit site conditions
- shifting loads, carries the load as close to the ground as possible and deposits load to the correct location
- parking and securing the equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques
- conduct loading and unloading
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment according to original equipment manufacturer manual
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- inspect and prepare work area

- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for wheel loader operation without attachments, including those relating to:

- work health and safety, including signs of operator fatigue and how it should be managed identifying
- operational, maintenance and basic diagnostics
- housekeeping activities
- personal protective equipment
- maintenance and basic diagnostics
- fire, accident and emergency

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- geological and technical data
- loading techniques
- plans, reports, maps, specifications

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - wheel loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years

Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.
---------------	--

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO318F Conduct civil construction skid steer loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 5.3.

Application

This unit describes the skills and knowledge required operate a skid steer loader to load, haul and distribute materials.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

Assessment Requirements for RIIMPO318F Conduct civil construction skid steer loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 5.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types (i.e. one different material per occasion) including:
 - stripping/spreading materials
 - backfilling
 - excavations
 - mixing materials
- selecting, fitting, testing, using and removing attachments on at least two occasions (i.e. one attachment per occasion), the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
 - multipurpose bucket
 - forks
 - dozer blade
 - backhoe
 - auger
 - chain digger
 - power broom
 - profiler

- tiller/mixer
- rotary hoe
- hammer
- asphalt cutter/saw
- concrete cutter/saw
- rake
- assisting with loading and unloading skid steer loader from float/trailer
- safely parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operations, including those relating to:

- isolation requirements for skid steer loader
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment

- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - a skid steer loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment

- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Assessment Requirements for RIIMPO319E Conduct backhoe/loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	This version was released with RII Resources and Infrastructure Industry Training Package Version 7.1. Editorial amendments to Performance Evidence to clarify task requirements.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loader/backhoe operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types (i.e. one different material type per occasion) including:
 - mixing materials
 - stripping/spreading materials
 - trench excavation
 - backfilling
 - lifting and carry materials
 - loading dump trucks, wagons, hoppers or chutes
 - cutting/boxing
- selecting, fitting, testing, using and removing at least two attachments (i.e. one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
 - extending devices
 - tilt bucket
 - buckets

- compaction wheel
- ripper
- plate compactor
- rock breaker
- auger
- broom
- mower/slasher
- forklift
- 4 in 1 bucket and free/rock grab
- parking and securing of equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- work safely around other machines and personnel
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for backhoe/loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities

- project quality requirements
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - backhoe/loader
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided

- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO324F Conduct civil construction grader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Minor change to performance evidence.
Release 4	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Application

This unit describes the skills and knowledge required to conduct grader operations.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Assessment Requirements for RIIMPO324F Conduct civil construction grader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Minor change to performance evidence.
Release 4	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of grader operations that safely, effectively and efficiently follows workplace procedures to meet carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types including:
 - cutting and maintaining drains
 - forming/upgrading/maintaining roads
 - mixing/ spreading materials
 - scarifying and ripping
 - cutting and trimming of batters
 - trimming of road sub-grades and pavements
 - site clean-up
 - form and carry a windrow
- selecting, fitting, testing, using and removing at least two attachments, the attachment must be certified and approved in line with workplace procedures
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- establish weight of load
- apply levelling techniques
- apply cut and fill techniques
- conduct towing of equipment/plant where required
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for grader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems and laser levelling equipment

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions

- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - unit plant type
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces

- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO335E Conduct skid steer loader operations without attachments

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Application

This unit describes the skills and knowledge required to operate and shift materials using skid steer loaders with the standard bucket attachment.

This unit applies to those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Coal mining

Extractive

Metalliferous mining

Assessment Requirements for RIIMPO335E Conduct skid steer loader operations without attachments

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations without attachments that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating skid steer loader, and adjusting techniques to suit site conditions
- shifting loads to the correct location, carrying them as close to the ground as possible
- performing at least one of the following skid steer loading tasks on each occasion (i.e. two different tasks in total):
 - stripping and spreading materials
 - backfilling
 - loading vehicles
 - excavations
 - mixing materials
 - site clean up
 - lifting and carrying materials
 - using communication methods to confirm activity, direction of travel, and process to safely move and transport load
 - shifting and placing materials
- assisting with loading and unloading skid steer loader from float/trailer
- park up, shut down and prepare machine for maintenance

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices and identify and report potential hazards and environmental issues, and assess risks
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply problem solving and troubleshooting techniques when operating equipment
- select and use required tools and equipment
- inspect and prepare work area
- manage changes in the loads centre of gravity during transportation
- use a range of communication techniques and equipment essential to the safe completion of work instruction, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with skid steer loader operations

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operation without attachments, including those relating to:

- materials handling using safety data sheets
- environmental protection
- fire, accident and emergency
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- maintenance and basic diagnostics
- housekeeping activities
- personal protective equipment
- chain of responsibility for loading and unloading of equipment
- machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

- technical capabilities and limitations
- equipment specifications
- ground conditions
- type and weight of load
-

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - a skid steer loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Companion Volume Implementation Guides are available from VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

RIIWH202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare for working in confined space	<p>1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant</p> <p>1.2 Obtain, confirm, clarify and apply work instructions and agreed procedure</p> <p>1.3 Obtain, confirm, clarify and apply safety requirements</p>
--	---

	<p>1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements</p> <p>1.5 Confirm the emergency response procedure is with the stand-by person and understood</p> <p>1.6 Identify, obtain and implement signage and barrier requirements</p> <p>1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults</p> <p>1.8 Identify, confirm and apply the environmental protection requirements</p> <p>1.9 Position rescue equipment by the entry permit</p>
2 Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Ensure that the atmosphere is tested and monitored for harmful elements</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space correctly</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3 Exit confined space	<p>3.1 Exit confined space correctly</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined space</p> <p>3.4 Secure access to the confined space</p> <p>3.5 Remove tagging and lock-out</p> <p>3.6 Accurately complete confined space entry permit</p>
4 Clean up	<p>4.1 Clear work area and dispose of or recycle materials</p> <p>4.2 Clean, check, maintain and store tools and equipment</p> <p>4.3 Remove, clean and store barriers and signs</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS202A Entering and working in confined spaces

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIIWHS202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - obtain appropriate entry permit and instructions for performing work in confined space
 - interpreting and applying safe work method statements
 - apply tagging and lock out
 - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
 - entering the confined space
 - using atmospheric monitoring devices prior to entering the confined space
 - working in the confined space
 - using atmospheric monitoring devices during confined space activity
 - applying safe materials handling methods
 - exiting the confined space
 - remove tagging and lock out

Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWH202E Enter and work in confined spaces

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Application

This unit describes the skills and knowledge required to enter and work in confined spaces in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for working in confined space	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to enter and work in confined spaces 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Obtain and confirm authorisation of a confined space entry permit

ELEMENT	PERFORMANCE CRITERIA
	<p>that meets regulatory requirements</p> <p>1.5 Select and wear appropriate personal protective equipment for planned work activities</p> <p>1.6 Obtain and interpret emergency procedures with the stand-by person, and be prepared for emergency situations</p> <p>1.7 Identify, obtain and implement signage and barrier requirements according to workplace procedures</p> <p>1.8 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults to relevant personnel</p> <p>1.9 Position rescue equipment by the entry permit</p>
2. Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Test and monitor the atmosphere for harmful elements according to workplace procedures</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space according to workplace procedures</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3. Exit confined space	<p>3.1 Exit confined space according to workplace procedures</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined spaces according to workplace procedures</p> <p>3.4 Remove tagging and lock-out procedures</p> <p>3.5 Complete confined space entry permit requirements according to workplace procedures</p>
4. Clean up	<p>4.1 Clear work area and dispose of materials according to workplace procedures</p> <p>4.2 Remove, clean and store barriers and signs</p> <p>4.3 Conduct equipment inspections to identify faults according to manufacturer specifications and workplace procedures and report to relevant personnel</p> <p>4.4 Conduct routine operational servicing, lubrication and housekeeping activities according to workplace procedures</p> <p>4.5 Process written maintenance records according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation and regulations
Writing	<ul style="list-style-type: none"> Produces and completes written documents required for workplace procedures
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities
Oral communication	<ul style="list-style-type: none"> Uses a range of communication techniques and systems to communicate with others

Unit Mapping Information

Supersedes and is equivalent to RIIWHS202D Entering and working in confined spaces.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for RIIWHS202E Enter and work in confined spaces

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- enter and work in confined spaces on at least two occasions, including:
 - obtaining the required entry permit and instructions for performing work in confined spaces
 - interpreting and applying workplace procedures
 - applying tagging and lock out procedures
 - selecting, wearing and caring for personal protective equipment
 - using atmospheric monitoring devices prior to entering the confined space
 - entering the confined space
 - working in the confined space
 - using atmospheric monitoring devices during confined space activity
 - applying safe materials handling methods
 - exiting the confined space
 - removing tagging and lock out.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for entering and working in confined spaces
- work effectively with others to enter and work in confined spaces in a way that meets all required outcomes

- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation relevant to enter and work in confined spaces
- key policies, procedures and documentation required to enter and work in confined spaces, including:
 - entry and exit procedures, risks and regulations
 - site and equipment safety requirements
 - site isolation and site control responsibilities and authorities
 - safety data sheets
 - incidents and emergency response documentation
- principles and techniques for identifying and responding to:
 - areas that constitute confined spaces
 - types of air contaminants and toxic gases
 - limitations of breathing apparatus
 - relevant hazards and emergencies
- equipment types, characteristics, technical capabilities and limitations
- principles and techniques for using confined space and industry terminology
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to entering and working in confined spaces
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert	

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
		experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

RIIWH204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to work safety at heights in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Identify work requirements	<p>1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant</p> <p>1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards</p>
-------------------------------	--

	<p>1.3 Adhere to WHS requirements</p> <p>1.4 Identify, select and check safety equipment for serviceability</p> <p>1.5 Identify, manage and report potential risks and hazards</p>
2. Identify work procedures and instructions	<p>2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability</p> <p>2.2 Select, wear and care for personal protective equipment</p> <p>2.3 Inspect/install fall protection and perimeter protection equipment</p> <p>2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights</p> <p>2.5 Ensure safety system has been installed correctly</p> <p>2.6 Select and install appropriate signs and barricades</p>
3. Access and install equipment	<p>3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted</p> <p>3.2 Ensure all required equipment is installed</p> <p>3.3 Use recommended methods to access work area for people, tools and equipment</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate</p> <p>4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with authorised personnel to ensure safety system is dismantled and removed</p> <p>5.2 Clear work area and dispose of or recycle materials</p> <p>5.3 Clean, check, maintain and store tools and equipment</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS204A Working safely at heights

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risk associated with working at heights and implement control methods
 - selecting wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
 - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials

- complying with equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWH204E Work safely at heights

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to work safely at heights in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to work safely at heights 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Inspect worksite to determine layout and physical condition, condition of structures and equipment requirements 1.5 Adhere to legislative requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>1.6 Select appropriate plant, tools and equipment for the job, inspect them for serviceability and rectify or report any faults prior to commencement of work activities</p> <p>1.7 Select and wear personal protective equipment appropriate for work activities</p> <p>1.8 Obtain and interpret emergency procedures, and be prepared for emergency situations</p>
2. Identify work procedures and instructions	<p>2.1 Consult with relevant personnel to select materials, tools and equipment required for the work activities</p> <p>2.2 Inspect and install fall protection and perimeter protection equipment</p> <p>2.3 Identify methods of moving tools and equipment to the work area according to workplace procedures</p> <p>2.4 Ensure the safety system has been installed according to workplace procedures</p> <p>2.5 Select and install appropriate signs and barricades according to workplace procedures</p>
3. Access and install equipment	<p>3.1 Consult with relevant personnel to ensure anchor fall protection and associated equipment is fitted and adjusted according to workplace procedures</p> <p>3.2 Ensure all required equipment is installed according to workplace procedures</p> <p>3.3 Access work area for people, tools and equipment according to workplace procedures</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe according to workplace procedures</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment according to workplace procedures</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed according to workplace procedures</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate according to workplace procedures</p> <p>4.7 Reassess risk control measures, as required, in accordance with workplace procedures and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with relevant personnel to ensure safety system is dismantled and removed according to workplace procedures</p> <p>5.2 Clear work area and dispose of materials</p>

ELEMENT	PERFORMANCE CRITERIA
	5.3 Clean and maintain the plant and equipment, inspect for ensure serviceability and rectify or report any faults or issues to relevant personnel 5.4 Process written maintenance records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation and regulations
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities
Oral communication	<ul style="list-style-type: none"> Uses a range of communication techniques and systems to communicate with others

Unit Mapping Information

Supersedes and is equivalent to RIIWHS204D Working safely at heights.

Links

Companion Volume implementation guides is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIWHS204E Work safely at heights

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- work safely at heights on at least two occasions, including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risks associated with working at heights and implementing control methods
 - selecting, wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking the correct fitting, adjusting and anchoring of fall protection and associated equipment
 - performing work safely at heights.

During the above, the candidate must:

- locate and apply relevant documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for working safely at heights
- work effectively with others to work safely at heights in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to work safely at heights

- key policies, procedures and documentation required to work safely at heights, including:
 - statutory and regulatory authority requirements
- principles and techniques for work safely at heights, including:
 - heights safety systems
 - safe work methods
- principles and techniques for identifying names and functions of equipment, components and materials
- principles and techniques for complying with equipment manufacturer instructions and specifications
- safe shifting and handling of tools and materials
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to working safely at heights
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment

- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWH5205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWH5205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Application

This unit describes the skills and knowledge required to control vehicle and pedestrian traffic using stop-slow bats, hand signals and approved communication devices in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work in teams in live traffic environments under some degree of supervision.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented registered training organisations are advised to contextualise the unit of competency by referring to the existing state/territory OHS legislative requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to control traffic	1.1 Select and wear personal protective equipment required for work activities 1.2 Access, interpret and confirm work instructions and plan work 1.3 Access, interpret and apply required workplace policies, procedures, jurisdictional safety and environmental protection requirements 1.4 Obtain and interpret site emergency procedures and prepare for accidents and emergencies 1.5 Select tools and equipment, check for serviceability, and rectify faults and report according to workplace policies and procedures
2. Control traffic and operate	2.1 Adjust approved communication devices according to site

communication devices	<p>requirements</p> <p>2.2 Direct traffic using hand held stop-slow bat and visibly clear and unobstructed hand signals as required</p> <p>2.3 Monitor traffic, make adjustments for changing traffic conditions and position waiting vehicles as required</p> <p>2.4 Communicate messages to other personnel, confirm recipient understanding and clarify as required</p> <p>2.5 Check and perform maintenance on approved communication devices according to requirements</p> <p>2.6 Check communications contact after nominated period of non-contact</p> <p>2.7 Report traffic offenders according to workplace policies and procedures</p>
3. Conduct housekeeping activities	<p>3.1 Confirm and remove signs and devices in line with job requirements and cover as required</p> <p>3.2 Clean, check and store tools and equipment</p> <p>3.3 Report environmental damage and potential for future damage as required</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Applies basic mathematical problem solving processes, including simple addition, subtraction, multiplication and division
Oral communication	<ul style="list-style-type: none"> Listens to short, explicit instructions for work procedures and asks questions to clarify and confirm
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Technology	<ul style="list-style-type: none"> Identifies purposes, specific functions and key features of common digital systems and tools and operates them as required
Writing	<ul style="list-style-type: none"> Produces and completes workplace reports using appropriate vocabulary, grammatical structures and conventions

Unit Mapping Information

Supersedes and is equivalent to RIIWHS205D Control traffic with stop-slow bat.

Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIWHS205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWHS205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Control traffic with a stop-slow bat according to traffic guidance schemes in a manner that is safe and follows workplace policies and procedures on at least two occasions, including:
 - directing pedestrian traffic, including at least one of the following:
 - ~ pedestrians with mobility issues
 - ~ pedestrians with prams
 - ~ cyclists
 - using approved communication devices to transmit message and report traffic offenders, including the use of at least one of the following devices:
 - ~ hand held radios
 - ~ telephones.

During the above, the candidate must:

- coordinate operations with pilot vehicle in a shuttle flow work arrangement
- participate in risk assessment and management processes
- identify the type and scope of hazards and their impact and recommend risk control measures
- identify key environmental protection issues and describe required solutions
- locate and complete at least one incident report
- complete housekeeping requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- risk assessment processes and hierarchy of control
- work instructions and procedures for planning work
- jurisdictional safety requirements relevant to temporary traffic management

- environmental protection requirements
- site emergency procedures
- site and equipment safety requirements
- traffic control requirements and procedures for directing the following pedestrian traffic groups:
 - pedestrians with mobility issues
 - pedestrians with prams
 - cyclists
- traffic guidance scheme and traffic management plan compliance
- communication device operations, including:
 - hand held radios
 - telephones
- traffic control equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities
- the effects of travel speed and vehicle mass on stopping distances.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - stop-slow bat
 - personal protective equipment
 - hand held radio or telephone
- be conducted in a safe environment; and
- be assessed in context of this sector's work environment on a real live road setting under supervision; and
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 year
	2	2 years
Drilling, Coal Mining and Extractive (Quarrying), Metalliferous Mining and Civil Construction	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any	

	relevant regulation.
--	----------------------

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit develops a participant's skills and knowledge required to implement a traffic management plan in Civil construction.

This unit is appropriate for those working in supervisory roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare to implement traffic management plan	<p>1.1 Access, interpret and apply traffic management documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify, address and report potential risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for the work activity</p>
---	---

	<p>1.5 Identify, obtain and implement traffic control signage and devices</p> <p>1.6 Select, and check for faults, tools and equipment to carry out tasks</p> <p>1.7 Identify, confirm and apply environmental protection requirements</p> <p>1.8 Check the designated traffic controllers' training and qualifications for currency</p> <p>1.9 Advise traffic controllers of the traffic flow requirements</p>
2 Set out the traffic guidance scheme	<p>2.1 Select traffic guidance scheme to suit site conditions, traffic volumes and work activities</p> <p>2.2 Determine and ensure adherence to work schedule, maximum traffic delays, signals and site communications</p> <p>2.3 Ensure signs and devices are correctly positioned on the approaches to the work area</p> <p>2.4 Ensure that signs and devices are positioned and displayed on each approach</p> <p>2.5 Ensure signs and devices are positioned and displayed laterally</p> <p>2.6 Ensure traffic is controlled effectively to protect the work crew</p>
3 Monitor traffic guidance scheme	<p>3.1 Ensure traffic flow is monitored and effectiveness of guidance scheme determined</p> <p>3.2 Monitor work activities and provide guidance to adjust scheme</p> <p>3.3 Apply process for dealing with traffic controllers who fail to adhere to approved procedures</p> <p>3.4 Apply procedures to deal with offending motorists</p>
4 Close down traffic guidance scheme	<p>4.1 Ensure traffic is controlled to protect work crew removing traffic control devices</p> <p>4.2 Ensure signs are removed in sequence to provide maximum warning during removal</p> <p>4.3 Ensure guidance scheme details are recorded and reported as required</p> <p>4.4 Ensure incidents are recorded and reported as required</p>
5 Clean up	<p>5.1 Ensure work area is appropriately cleared</p> <p>5.2 Ensure tools and equipment are cleaned, checked, maintained</p>

	and stored
--	------------

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS302A Implement traffic management plan

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the traffic management plans that meet all of the required outcomes including:
 - complying with written and verbal reporting requirements and procedures
 - communicating clearly and concisely with others to receive and clarify work instructions
 - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of implementing traffic management plans that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - complying with State/Territory regulations on three separate live traffic projects, and
 - completing one (1) project controlling site construction vehicles
 - identify and select traffic guidance scheme according to conditions
 - identify and select traffic guidance scheme according to conditions select and implement signage and device requirements, position and display according to site plan

- monitor and adjust scheme according to variances in requirements
- apply procedures to deal with non-compliant crew and motorists

Knowledge Evidence

The candidate must demonstrate knowledge of implementing a traffic management plan through:

- accessing, interpreting and applying legislative, organization and site requirements and procedures for:
 - JSAs/JSEA/Safe work method statement
 - potential hazards and risks
 - controlling traffic
 - basic signalling
 - signs and devices
 - radio operations
- identifying equipment types, characteristics, technical capabilities and limitations
- identifying site isolation and traffic control responsibilities and authorities
- identifying quality requirements
- applying civil construction terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

SFICRO302 Conduct crocodile surveys

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to plan and conduct crocodile field surveys in natural crocodile habitats.

The unit applies to individuals who work under broad direction to collect information about crocodile activity in Australian waterways.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Unit Sector

Crocodile (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan crocodile field survey activity	1.1 Determine crocodile management program aims and the importance of records 1.2 Determine crocodile field survey objectives and site location(s)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Plan logistic and supply requirements according to location, duration and size of crocodile surveying field trip</p> <p>1.4 Access maps, photographs or global positioning system (GPS) or other available data</p> <p>1.5 Determine crocodile field survey activity incorporating teamwork, humane treatment of crocodiles and waterway safety procedures</p> <p>1.6 Determine legislation and regulations, biosecurity and environmental standards, and risks and contingencies associated with crocodile survey activity</p> <p>1.7 Select and prepare equipment and supplies according to field survey objectives</p>
2. Carry out crocodile field survey activity	<p>2.1 Prepare vehicle(s) and load equipment and supplies</p> <p>2.2 Locate crocodile field survey site and conduct survey activity according to timeframes and crocodile waterway safety procedures</p> <p>2.3 Communicate with team members while conducting designated roles</p> <p>2.4 Maintain accurate raw data, including accurate crocodile size estimates during field survey activity</p> <p>2.5 Minimise environmental impact and biosecurity risks during crocodile field survey activity</p>
3. Finalise crocodile field survey activity	<p>3.1 Unload, clean and check equipment for faults</p> <p>3.2 Report any faults to appropriate personnel and store as per workplace requirements</p> <p>3.3 Complete required documentation according to field survey requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret technical information relating to crocodile species
Writing	<ul style="list-style-type: none"> Use appropriate technical information to document survey findings relating to crocodile species
Oral communication	<ul style="list-style-type: none"> Communicate clearly, concisely and in a culturally sensitive manner

Assessment Requirements for SFICRO302 Conduct crocodile surveys

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- planned and conducted at least three crocodile survey activities
- documented data relating to crocodile survey activities on at least three occasions.

In doing the above, there must also be evidence that the individual has:

- worked effectively in a team
- followed crocodile risk and safety standards
- treated crocodiles humanely
- complied with legislation and regulation associated with crocodiles
- complied with biosecurity and environmental standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- crocodile survey data on:
 - population
 - habitat
 - nesting
 - sizes of crocodiles
- resources required to scope crocodile data:
 - data collection equipment
 - cyber tracking devices
 - global positioning system (GPS)
 - suitable software applications to record crocodile data
 - cyber tracking devices

- drones
- crocodile waterway safety procedures
- risk factors working with crocodiles and around crocodiles
- appropriate action if confronted by an aggressive crocodile
- culturally sensitive communication protocol
- team protocol during collection of data via survey:
 - roles of team members
 - importance of interaction between team members
 - the use of appropriate communication methods
- crocodile management program or policy aims, including:
 - maintenance of a healthy population of saltwater crocodiles in their natural habitat
 - promotion of the saltwater crocodile as a natural resource that has economic use and benefit if used sustainably
 - respect for the cultural values of the Indigenous population's crocodile management
 - management of concentrated numbers in areas where there is a high risk to people, livestock and pets
 - provision for crocodile awareness and information in parks, reserves and conservation areas
 - working with other government groups, business and industry to make locals and visitors aware of crocodiles
 - encouragement for everyone to be responsible in activities near the natural environment of crocodiles
- state and territory legislation, regulations and codes of practice associated with crocodile habitats and crocodile activity
- key features of biosecurity guidelines for crocodile waterways, including not contaminating waterways:
 - survey data documenting and processing methods.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to crocodile waterways
 - equipment and supplies to undertake field survey in crocodile habitats
- specifications:
 - crocodile safety documentation, policies and procedures
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO305 Prepare to work with crocodiles

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare to work with crocodiles.

The unit applies to individuals who prepare for work with crocodiles on farms, research facilities, wildlife parks or in crocodile habitats. While this unit relates mostly to saltwater crocodiles, it also entails comparisons with other crocodile species.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Unit Sector

Crocodiles (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify key features of crocodile anatomy and physiology	1.1 Determine the key physical characteristics of saltwater and freshwater crocodiles

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Identify the key features and functions of crocodile anatomy 1.3 Source information about common crocodile health issues
2. Identify behavioural patterns of different crocodile species	2.1 Identify the key drivers that affect crocodile behaviour 2.2 Identify key behavioural characteristics of saltwater and freshwater crocodiles
3. Determine and follow safety requirements in crocodile habitats	3.1 Source information about features of crocodile habitats 3.2 Identify key risk factors in crocodile habitats 3.3 Use appropriate communication method to inform relevant personnel and/or members of the public to obey crocodile warning signs and follow safety procedures
4. Access information about crocodile operations in controlled environments	4.1 Determine the reasons for crocodile farming and the importance of crocodile skin quality 4.2 Identify reasons for crocodile research and the functions of a crocodile research facility 4.3 Determine the reasons for caring for crocodiles in a wildlife park 4.4 Identify crocodile handling requirements when working with crocodiles in controlled environments
5. Identify legislation, regulations and management programs relating to the protection of crocodiles	5.1 Determine appropriate crocodile and animal protection legislation/regulation and codes of practice 5.2 Identify and observe crocodile management program aims 5.3 Determine biosecurity issues associated with working with crocodiles in controlled environments and in the wild

Foundation Skills

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- observed crocodile operational and safety requirements on farms, wildlife parks, research facilities or crocodile habitats on at least five different occasions.

In doing the above, there must be evidence that the individual has:

- identified the differences in crocodile species
- identified risks associated with working with crocodiles
- followed legislation/regulation and codes of practice associated with crocodiles
- followed biosecurity guidelines
- located and applied required documentation, policies and procedures
- communicated appropriately and respectfully with others.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- species of crocodylians around the world, including:
 - Indo-Pacific/estuarine/saltwater crocodiles – *Crocodylus porosus*
 - freshwater crocodiles – *Crocodylus johnstoni*
 - alligators and caimans
 - gharials
- the characteristics of saltwater crocodiles and freshwater crocodiles
- key features of crocodile anatomy
- crocodile behavioural patterns
- key drivers that affect crocodile behaviour
- crocodile health issues, including:

- diseases
- thermal stress – where the animal is unable to thermoregulate correctly
- capture stress – when the animal is caught and handled
- social stress – arising out of competition and the inability of adults to establish a territory (e.g. enclosure too small, densities too high)
- low temperatures causing impediments to food digestion
- environmental hygiene
- risk factors working with crocodiles and around crocodiles
- crocodile waterway safety procedures
- the use of appropriate communication methods
- culturally sensitive communication protocol
- crocodile management program or policy aims, including:
 - ecological maintenance of a large and healthy population of saltwater crocodiles living in their natural habitat
 - promotion of the saltwater crocodile as a natural resource that has economic use and benefit if used sustainably
 - respect for the cultural values of the Indigenous population with regard to crocodile management
 - management of concentrated numbers in areas where there is a high risk to people, livestock and pets
 - provision for crocodile awareness and information in parks, reserves and conservation areas
- reasons for crocodile farming:
 - crocodile skin/leather to produce goods with emphasis on skin quality
 - crocodile meat
- crocodile research facility purposes:
 - to expand knowledge about crocodiles as a species
 - to assist with the profitability and sustainability of commercial crocodile production
- reasons for caring for crocodiles in wildlife parks:
 - education
 - conservation
 - research
 - tourism
- state and territory legislation, regulations and codes of practice associated with crocodile waterways and crocodile welfare
- biosecurity guidelines for Australian waterways and crocodile-controlled environments.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to a crocodile farm, wildlife park, research facility or crocodile habitat
- specifications:
 - crocodile safety documentation, policies and procedures
- relationships:
 - relevant personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO306 Work safely in crocodile habitats

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to work safely in crocodile habitats.

The unit applies to individuals who work in various industries, capacities and roles where crocodiles are found.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Unit Sector

Crocodiles (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify crocodile species and habitat	1.1 Determine the key characteristics of various crocodile species 1.2 Identify key features of natural crocodile habitats

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Access information about crocodile behaviour in the wild	2.1 Determine behavioural patterns of saltwater crocodiles in the wild, and compare to other crocodile species 2.2 Source information about the key drivers that affect crocodile behaviour in the wild
3. Conduct allocated work procedures and meet safety requirements in crocodile habitats	3.1 Participate in safe crocodile habitat procedures while meeting allocated work requirements 3.2 Access information about humane treatment of crocodiles and risk factors in crocodile habitats 3.3 Observe and adhere to all safety and biosecurity requirements in crocodile habitats according to relevant legislation/regulation, codes of practice and crocodile habitat safety procedures 3.4 Carry communication equipment when in crocodile habitats and use as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Communicate in a clear, concise and culturally sensitive manner

Assessment Requirements for SFICRO306 Work safely in crocodile habitats

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has followed safe crocodile habitat procedures on at least two occasions.

In doing the above, there must also be evidence that the individual has:

- identified the differences in crocodile species
- treated crocodiles humanely
- adhered to all crocodile risk and safety standards and notices
- observed legislation and regulations associated with crocodiles
- complied with biosecurity guidelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the existence of different ‘crocodilian’ species, including:
 - Indo-Pacific/estuarine/saltwater crocodiles – *Crocodylus porosus*
 - freshwater crocodiles – *Crocodylus johnstoni*
- the characteristics of saltwater crocodiles and freshwater crocodiles
- crocodile behavioural patterns
- key drivers that affect crocodile behaviour
- use of communication equipment
- culturally sensitive communication protocol
- state and territory legislation, regulations and codes of practice associated with crocodile habitats and crocodile welfare and activity
- environmental biosecurity guidelines
- crocodile habitat safety procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to crocodile habitats
- specifications:
 - crocodile safety material.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO401 Manage minor crocodile incidents in the wild

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to manage minor incidents relating to human interactions with crocodiles. This does not include managing incidents with human fatalities. It includes working with various agencies in relation to the incidents.

The unit applies to individuals who work with crocodiles in crocodile habitats. While this unit relates mostly to saltwater crocodiles, it may also entail incidents with other crocodile species.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Crocodile (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate crocodile incident	1.1 Investigate nature of incident from eyewitness reports or own inspection 1.2 Make assessment of key factors that may impact an appropriate response, including victim care, public and personal health and safety, crocodile care, biosecurity and environmental factors 1.3 Collect information to determine action according to the chain of command and workplace procedures 1.4 Interview informants to determine details of the incident
2. Respond to crocodile incident	2.1 Contact appropriate agencies to report the incident and seek medical assistance if required 2.2 Establish communications necessary to manage the situation 2.3 Transport resources and personnel to site and, if required, instruct personnel to establish physical barriers to keep the public away from the incident site 2.4 Establish site procedures and implement emergency plans according to the nature of the incident and health and safety requirements 2.5 Implement measures that minimise risk to the public, habitats, species and communities
3. Coordinate response to crocodile incident	3.1 Inform the general public and media of the nature of the incident and agency decisions according to workplace procedures 3.2 Brief volunteers or personnel on workplace health and safety hazards, preventative measures, the use of personal protective equipment (PPE) and reporting requirements 3.3 Manage immediate media response in calm, factual and logical manner
4. Complete crocodile incident management action	4.1 Follow incident management processes for debrief of the incident 4.2 Document incident and action taken, and determine if follow-up procedures are required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Complete incident documentation using appropriate technical terminology
Oral communication	<ul style="list-style-type: none"> Address the general public and media using clear factual language Provide brief and clear instructions to manage incident processes Communicate in a culturally sensitive manner

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
SFICRO401 Manage minor crocodile incidents in the wild	Not applicable	Unit has been created to address an emerging skill required by industry	Newly created

Links

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=e31d8c6b-1608-4d77-9f71-9ee749456273>

Assessment Requirements for SFICRO401 Manage minor crocodile incidents in the wild

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- managed at least five simulated minor crocodile incidents
- conducted at least one simulated media interview.

In doing the above, there must also be evidence that the individual has:

- complied with crocodile risk and safety standards
- treated crocodiles humanely
- complied with biosecurity and health and safety guidelines
- communicated with relevant parties.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- risk factors in crocodile habitats
- types of potential incidents involving crocodiles
- potential hazards and risks at the site of a crocodile incident:
 - crocodile weight and size (if it is still at the scene or in the vicinity)
 - other crocodiles in the vicinity
 - unpredictable behaviour
 - environmental hazards and contamination
 - peoples' actions
- basic features of incident management system, including:
 - roles of team members, including medical personnel
 - chain of command and communication
 - sequence of action to be followed

- incident zones – hot, warm, cold
- incident barricade procedures
- briefing and debriefing processes
- media communication:
 - getting background information about the interview/key areas of focus/the interviewer
 - preparing by mapping out key message(s)
 - staying factual in information delivery, not speculating
 - explaining events in a manner that can be understood by the audience
 - remaining even-tempered
 - not answering hypothetical questions
- agency liaison, including:
 - medical
 - government
 - national parks
- safe working practices, including:
 - personal protective equipment (PPE)
 - hygiene and biosecurity procedures
 - basic manual handling techniques
- biosecurity guidelines for crocodile habitats, including not contaminating waterways
- culturally sensitive communication protocol.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources:
 - policies relating to media interviews
- specifications:
 - crocodile safety documentation, codes of practice, policies and procedures
- relationships:
 - relevant parties.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO403 Capture, transport and release crocodiles

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to use recognised manual manipulation techniques to capture, transport and release a crocodile working in a team. While this unit relates mostly to saltwater crocodiles, it may also entail incidents with other crocodile species

The unit applies to individuals who work as team members to assist in crocodile operational activity.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace and the capture and release of crocodiles.

Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Unit Sector

Crocodiles (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for capture, transport and release of a crocodile	1.1 Identify appropriate legislation/regulation and codes of practice for safe and humane capture, transport and release of crocodiles 1.2 Discuss the different methods of capture, transport and release

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>depending on the crocodile's size with relevant personnel</p> <p>1.3 Discuss team roles for capturing, transporting and releasing crocodiles with relevant personnel</p> <p>1.4 Select and fit appropriate personal protective equipment (PPE) and check first aid kit is complete</p> <p>1.5 Prepare operational equipment required for the capture, transport and release of crocodiles, incorporating safety, biosecurity, environmental and regulatory requirements</p> <p>1.6 Conduct a full rehearsal of the operation and establish the required communication processes according to workplace procedures</p>
2. Capture a crocodile	<p>2.1 Prepare the crocodile trap or device to be used for crocodile capture</p> <p>2.2 Locate crocodile to be captured and estimate its length</p> <p>2.3 Monitor crocodile behaviour and consult with appropriate personnel to determine if chemical restraint is required</p> <p>2.4 Capture the crocodile according to standard operating procedures (SOPs)</p> <p>2.5 Restrain the crocodile's jaw according to SOPs to prevent the animal from striking or lunging</p> <p>2.6 Cover the crocodile's eyes to limit sight and calm the animal</p> <p>2.7 Load the crocodile according to workplace procedures and safe work practices</p>
3. Transport a crocodile	<p>3.1 Prepare crocodile for transport according to workplace transport and biosecurity SOPs</p> <p>3.2 Monitor crocodile behaviour and vitals at all stages and maintain situational awareness to ensure safety of self, others and crocodile, and report any abnormal conditions or crocodile behaviour to appropriate personnel</p> <p>3.3 Maintain transport environment in a manner that is conducive to crocodile welfare and according to the appropriate crocodile code of practice</p>
4. Use manual manipulation techniques to move a crocodile	4.1 Safely manoeuvre the crocodile to the agreed location using appropriate equipment and physical effort in a haul team when required

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.2 Cooperate and communicate with team members to ensure safety and minimal stress to the crocodile
5. Release a crocodile	5.1 Remove crocodile constraints according to SOPs, maintaining safe work practices and avoiding unnecessary stress to the crocodile 5.2 Reposition crocodile in a planned location and monitor during recovery phase
6. Review and debrief information relating to crocodile capture, transport and release	6.1 Participate in crocodile capture, transport and release debrief session 6.2 Discuss processes and identify possible procedural improvements with team members or appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Provide brief and clear procedural information Communicate in a culturally sensitive manner

Assessment Requirements for SFICRO403 Capture, transport and release crocodiles

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked in a team:

- capturing, transporting and releasing at least five crocodiles.

In doing the above, there must also be evidence that the individual has:

- complied with crocodile risk and safety standards
- treated crocodiles humanely
- worked in a team environment
- used appropriate equipment correctly
- complied with regulation associated with crocodile care
- complied with biosecurity guidelines and environmental standards
- communicated with relevant parties.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of equipment and how to use, including:
 - vehicles
 - rescue straps/webbing, ropes, slings
 - harpoons
 - glide mats or similar improvised equipment
 - head/eye protection for crocodiles
 - wooden dowel
 - first aid kit
 - tape
 - traps, cages or other crocodile relocation devices

- key features of crocodile anatomy and physiology, including:
 - different crocodile species size
 - the animal's sensory organs
 - the animal's muscular jaw
 - the animal's muscular tail
- techniques involved in the manoeuvring of crocodiles, including:
 - roles of team members, including first aiders
 - communication
 - sequence of action to be followed
- variations to methods in crocodile capturing techniques depending on the size of the crocodile
- ways to restrain crocodiles, including:
 - using a crocodile trap with a gate that is secured and is appropriate for a large crocodile
 - working in a team that enables operators to restrain a crocodile and secure its jaws
 - covering the crocodile's eyes to limit sight so as to calm the animal
 - hauling the crocodile into the transport vehicle using the appropriate haulage methods for a large crocodile
 - when to seek advice from appropriate personnel regarding the use of chemical restraint
- crocodile habitat safety procedures, including:
 - never swimming or wading through any water in northern Australian waterways
 - only crossing rivers at shallow water sites or rocky areas in the narrowest section, no more than 30 cm (knee deep)
 - carrying some form of communication equipment
 - being careful when walking through long grass and when near banks
- appropriate action if confronted by an aggressive crocodile:
 - maintain sight of crocodile while retreating as rapidly as possible
 - raise the alarm and identifying location of crocodile to others
 - ensure all team members are accounted for and uninjured
 - use communication systems to inform others
- state and territory regulations and codes associated with crocodile habitats and crocodile activity
- biosecurity guidelines for crocodile habitats:
 - not contaminating waterways
 - observing standard operating procedures (SOPs)
- culturally sensitive communication protocol.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crocodiles
 - equipment required for manual manipulation techniques
- specifications:
 - crocodile safety documentation, codes of practice, policies and procedures
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SIRRV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Maintain stock handling and storage

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Maintain cleanliness of stock handling and storage areas.
- 1.2.Ensure correct environmental conditions for storage of

- areas. perishable and other stock to prevent loss or damage as required.
- 1.3. Remove and dispose of waste to minimise safety risks and environmental impacts.
 - 1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.
 - 2.1. Check incoming stock quantities against order documentation.
 - 2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.
 - 2.3. Record stock delivery, and report discrepancies with orders as required.
 - 2.4. Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.
 - 2.5. Store or display stock promptly in designated location.
 3. Replenish stock levels.
 - 3.1. Rotate, replenish and present stock according to organisational requirements for stock levels.
 - 3.2. Record stock waste or shrinkage according to organisational procedures.
 - 3.3. Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - plain English documents that outline organisational policies and procedures for stock control
 - basic order and delivery documentation and stock labels.
- Numeracy skills to:
- calculate stock levels.
- Planning and organising skills to:
- complete stock control activities in a logical and time efficient sequence.
- Technology skills to:
- use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
 - receive and process incoming stock
 - store retail stock
 - maintain retail stock levels
 - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
 - stock quality is poor
 - stock quantity errors
 - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
 - rotation and replenishment
 - product life cycle
- organisational stock control policies and procedures for:
 - receiving stock from suppliers
 - recording incoming stock
 - recording and reporting stock discrepancies and quality issues
 - recording stock waste and shrinkage
 - stock quality standards
 - unpacking, storage and display of stock
 - damaged or missing stock

- key features of retail products that relate to handling and storage:
 - handling techniques to minimise damage
 - general care
 - optimum storage conditions
 - features of damaged or spoiled stock
 - correct disposal methods
- safe manual handling techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
 - delivery dockets
 - orders
 - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRINV002 Control stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor stock receipt and dispatch.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.
- 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

- correctly.
- 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
 - 1.4. Act on variations to quantity and quality of delivered stock.
 - 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.
 - 2.1. Monitor stock and maintain stock at required levels.
 - 2.2. Maintain, monitor and adjust stock reorder cycles as required.
 - 2.3. Provide clear information to team members about individual stock recording responsibilities.
 - 2.4. Maintain stock storage and movement records.
 - 2.5. Record and report stock discrepancies.
 - 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.
 - 3.1. Process and raise stock orders according to organisational procedures.
 - 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
 - 3.3. Liaise with suppliers to ensure continuity of supply.
 - 3.4. Resolve routine supply problems or refer to appropriate personnel for action.
 - 3.5. Distribute stock within the organisation according to required allocations.
 - 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.
 - 4.1. Regularly check storage of stock and ensure its protection.
 - 4.2. Identify, record and report stock losses.
 - 4.3. Identify avoidable losses and establish reasons for them.
 - 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.
 - 5.1. Explain procedures for stocktake and cyclical counts to team members.
 - 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
 - 5.3. Provide team members with clear directions for performance of each task.
 - 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.
Numeracy skills to:	<ul style="list-style-type: none">calculate:<ul style="list-style-type: none">supplier costs and complex order costscomplex details of stock on hand and stock losses and produce complex numerically-based reportsreconcile incoming stock and invoices against purchase orders.
Technology skills to:	<ul style="list-style-type: none">use business technology for inventory management.

Unit Mapping Information

No equivalent unit.

Links

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
 - receipt
 - dispatch
 - ordering
 - stock level monitoring
 - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - receipt and dispatch of goods, including inspection for quantity and quality
 - stock ordering and reordering
 - stock replenishment
 - stock rotation
 - reporting of stock discrepancies, damage and loss
 - safe transport, handling and storage of goods
 - stock control
 - stocktaking and cyclical counts
 - pricing, labelling and packaging
 - stock security
- key aspects of legislation and codes of practice relevant to stock control:
 - Australian Consumer Law
 - Work Health and Safety (WHS)

- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
 - rotation and replenishment
 - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER001 Produce visual merchandise displays

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to display retail merchandise. It requires the ability to prepare, produce and maintain merchandise displays in accordance with visual merchandising requirements.

This unit applies to all businesses that sell retail merchandise. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller businesses, senior personnel might also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Prepare to produce visual merchandise display.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Review visual merchandising display guidelines, and seek clarification as required.
- 1.2. Obtain merchandise, materials and equipment required for

- the display.
- 1.3. Prepare product labels and price tickets from in-house documents and according to organisational requirements.
 - 1.4. Unpack merchandise according to manufacturer instructions.
2. Display merchandise.
- 2.1. Produce display following visual merchandising display guidelines.
 - 2.2. Ensure merchandise is displayed according to manufacturer instructions where specific requirements for display and storage exist.
 - 2.3. Display merchandise labels and price tickets according to organisational requirements.
 - 2.4. Handle and move stock and equipment according to safe manual handling guidelines to prevent injury to self.
 - 2.5. Promptly return excess stock to storage area, and store according to organisational requirements.
 - 2.6. Check and ensure area around the display remains clear of debris.
3. Maintain display.
- 3.1. Review displays against visual merchandising display guidelines, and refine as required.
 - 3.2. Maintain clear and correct product and pricing information for merchandise.
 - 3.3. Identify damaged or out of date stock, and remove from display as required.
 - 3.4. Rotate and replenish merchandise to maintain optimum stock levels.
 - 3.5. Monitor the display regularly to maintain appearance and cleanliness of display and display area.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret plain English documents that outline organisational policies and procedures related to display of merchandise.
- Numeracy skills to:
- estimate dimensions of display areas and appropriate size of displays from display documentation.
- Planning and organising skills to:
- prepare for display and complete display activities in a logical and time-efficient sequence.
- Technology skills to:
- prepare product labels and price tickets.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMER001 Produce visual merchandise displays

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines and organisational procedures to prepare and produce three merchandise displays, from the following list, of varying sizes and complexities:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- maintain each of the above displays and display area, adequate stock level and appearance of display.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- basic principles of visual merchandising as they relate to producing retail visual merchandise displays
- visual merchandise display guidelines and how they are used in creating a retail displays
- organisational procedures for:
 - correct manual handling techniques for protection of self and merchandise
 - correct storage of merchandise and equipment
 - damaged or out of date stock
 - maintenance of display areas
 - merchandise rotation and replenishment
 - product labelling and pricing
 - unpacking merchandise.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a range of retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- organisational visual merchandise display guidelines
- organisational procedures for:
 - manual handling techniques for protection of self and merchandise
 - storage of merchandise and equipment
 - damaged or out of date stock
 - maintenance of display areas
 - merchandise rotation and replenishment
 - product labelling and pricing
 - unpacking merchandise
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to coordinate store visual merchandising activities and ensure adherence to organisational standards, policies and procedures for the display of merchandise.

It applies to individuals working in frontline roles in a diverse range of retail industry sectors and business contexts that display retail products for sale. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Coordinate visual merchandise requirements.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Access and interpret organisational visual merchandising guidelines, and policies and procedures.
- 1.2. Communicate visual merchandising standards and display

- requirements to team members.
- 1.3. Plan appropriate timing for producing and dismantling visual merchandise displays.
 - 1.4. Communicate roles and responsibilities for visual merchandising to team members.
 - 1.5. Plan and coordinate promotional and special event displays as directed by management.
2. Supervise visual merchandise activities.
 - 2.1. Supervise construction and maintenance of displays to achieve balance and visual impact.
 - 2.2. Ensure display information accurately depicts product or service being promoted.
 - 2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow.
 - 2.4. Ensure displays meet organisational standards and visual merchandise guidelines.
 - 2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.
 3. Review impact of visual merchandise activities.
 - 3.1. Evaluate promotions or special event displays and determine impact on sales results.
 - 3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Problem solving skills to:

- overcome difficulties relevant to the display of merchandise.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- for each of the above visual merchandising activities:
 - communicate requirements with team members
 - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
 - types of displays and their impact

- display location
- display lighting
- display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
 - customer complaints
 - profitability
- safe work practices for displaying merchandise with particular emphasis on:
 - safe use of equipment
 - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
 - price
 - features
 - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
 - organisational visual merchandise display guidelines
 - organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
 - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- team members; these can be:
 - individuals in an industry workplace, or

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment, clear registers, count money, calculate non cash transactions, and reconcile and record takings.

It applies to individuals working in frontline operational roles in a diverse range retail industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Retail Financials

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Balance and secure takings.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Perform register or terminal balance at designated times.
- 1.2.Separate cash float from takings prior to balancing and secure takings.

- 1.3. Supply change to register or terminal and accurately record.
 - 1.4. Obtain and interpret register or terminal reading or print-out.
 - 1.5. Secure cash and non cash documents according to organisational procedures.
2. Reconcile takings.
 - 2.1. Count cash accurately.
 - 2.2. Calculate non cash documents accurately.
 - 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
 - 2.4. Investigate or report discrepancies between register or terminal reading and sum of cash and non cash transactions to relevant personnel.
 - 2.5. Record takings and file records according to organisational procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
 - balance a register or terminal on three occasions with complete accuracy
 - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
 - identify and resolve three different types of balancing discrepancies
 - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - balancing
 - clearance of terminal and transference of tender
 - recording takings
 - consumables required by system
 - security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- organisational policies and procedures for non-cash transactions:
 - credit cards
 - EFTPOS

- vouchers
- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
 - cash handling
 - cash float
 - operation of point-of-sale equipment
 - register or terminal balance
 - security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
 - customers from diverse backgrounds
 - resolution of two routine customer problems
 - provision of accurate information to address two general customer enquiries
 - referral of unresolved customer enquiry
 - use of effective communication techniques and positive body language.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
 - open and closed questioning
 - paraphrasing
 - effective listening
 - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
 - positive customer service
 - poor customer service

- organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- customers from a diverse range of backgrounds; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse market.	<p>1.1 Identify and analyse <i>store merchandise and marketing policy and procedures</i>.</p> <p>1.2 Monitor <i>customer requirements</i> formally and informally in order to evaluate market trends and customer needs.</p> <p>1.3 Research new products and services.</p> <p>1.4 Identify, evaluate, implement and review opportunities to improve sales.</p> <p>1.5 Monitor <i>merchandise range</i> to identify the demand for individual items and seasonal variations.</p> <p>1.6 Monitor market competition.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Analyse factors affecting stock levels and range requirements.	2.1 Apply mathematical calculations to measure analyse and report on existing and potential stock loss and dissipation and its <i>impact on business operations</i> . 2.2 Analyse store or department sales figures to determine contribution rates of product lines. 2.3 Determine store or department space requirements and brand product mix according to store policy. 2.4 Determine future directions for merchandise ranges according to store policy.
3 Plan merchandise ranges.	3.1 Develop and implement buying plan according to outcomes of analysis and store policy. 3.2 Determine future directions for merchandise ranges according to store policy. 3.3 Liaise with <i>relevant personnel</i> to coordinate promotional and marketing activities. 3.4 Analyse store or department sales figures to determine contribution rates of product lines. 3.5 Determine investment levels with reference to previous years' sales figures, predicted demand and projected gross profit. 3.6 Identify and act upon contribution improvement opportunities. 3.7 Determine store or department space requirements and brand product mix according to store policy. 3.8 Determine stock levels according to peak seasons, special events and supplier lead time. 3.9 Analyse, evaluate and amend merchandise range and sources of supply according to management, staff and customer <i>feedback</i> .
4 Establish supplier relations.	4.1 Develop cooperative relationships with supplier representatives according to store policy. 4.2 Continuously review existing suppliers in regard to quality, profitability, service and delivery status. 4.3 Identify new suppliers and delete existing suppliers according to <i>performance indicators</i> .

ELEMENT	PERFORMANCE CRITERIA
5 Negotiate supply of goods.	<p>5.1 <i>Negotiate</i> and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.</p> <p>5.2 Authorise special <i>pricing arrangements</i> and customer payment agreements and communicate to relevant staff and management personnel according to store policy.</p> <p>5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.</p> <p>5.4 Identify <i>market factors</i> affecting supply and communicate to relevant personnel.</p> <p>5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.</p> <p>5.6 Take immediate corrective action where potential or actual problems with supply are indicated.</p> <p>5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.</p> <p>5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback.</p>
6 Monitor quality control.	<p>6.1 Establish merchandise quality standards with suppliers according to <i>legal requirements</i>, customer requirements and store policy.</p> <p>6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.</p> <p>6.3 Record and analyse stock return figures against target figure.</p>
7 Introduce product ranges.	<p>7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.</p> <p>7.2 Implement <i>staff training</i> in product knowledge to introduce product range.</p> <p>7.3 Demonstrate or display new ranges to <i>staff</i> according to store merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
8 Maximise profit.	<p>8.1 Calculate or estimate individual product range contributions against budget and targets.</p> <p>8.2 Develop and implement product range assessment checks against budget and targets.</p> <p>8.3 Calculate or estimate overall selling space contributions according to store merchandising plan.</p> <p>8.4 Maximise profit margins in negotiations with suppliers.</p> <p>8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law.</p> <p>8.6 Negotiate specifications for <i>terms of trade</i>.</p>
9 Rationalise stock.	<p>9.1 Review and update stock range at regular intervals.</p> <p>9.2 Identify stock lines to be <i>deleted</i> and take action to minimise adverse effect on profit.</p> <p>9.3 <i>Consolidate stock</i> as required to maximise sales potential.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
 - market trends and projections
 - sales figures and investment levels
 - space requirements
- negotiation skills
 - interpersonal communication skills to:
 - liaise with relevant personnel
 - establish supplier relationships, negotiate supply of goods
 - provide information and training on product range
 - provide feedback and coaching through clear and direct communication

REQUIRED SKILLS AND KNOWLEDGE

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
 - developing pricing policies
 - calculating and estimating product range contributions
 - calculating the cost of stock loss and dissipation
 - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - marketing
 - buying
 - profit margins
 - quality control
 - stock inventory levels: current and future
 - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
 - market needs
 - range of merchandise available
 - market competition
 - existing and possible new suppliers
 - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
 - pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
 - store policy and procedures
 - legislation and statutory requirements
 - industry codes of practice
 - merchandise and supplier data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback

EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store merchandise and marketing policies may include:

- store culture
- current market position
- target market.

Customer requirements may be monitored by:

- questionnaires
- surveys
- observation.

Merchandise range may include:

- existing stock
- new stock.

RANGE STATEMENT

Impact on business operations may include:

- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:

- verbally
- in writing
- in groups
- individually.

Performance indicators may include:

- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:

- face-to-face
- correspondence
- meetings
- telephone or electronic media.

Pricing arrangements may include:

- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

Market factors may include:

- fashion trends

RANGE STATEMENT

- product availability
 - sales performance.
- Legal requirements* may include:
- sale of second-hand goods
 - Trade Practices and Fair Trading Acts
 - licence, patent or copyright arrangements
 - pricing procedures, including GST requirements.
- Staff training* may include:
- on-the-job
 - off-the-job
 - one-on-one coaching
 - any combination of the above.
- Staff* may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Terms of trade* may include:
- special buys
 - payment terms
 - promotional deals with supplier.
- Stock lines may be *deleted* due to:
- changes in store policy and culture
 - sales performance
 - customer requirements
 - fashion trends
 - product availability
 - problems with supply.
- Methods to *consolidate stock* may include:
- movement of stock between departments or stores.

Competency field Inventory

SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to manage the use of social media platforms to interact with customers and promote products and services.

It applies to individuals working in customer service management roles in a diverse range of industry sectors and business contexts that have a social media presence. They operate independently with some responsibility for decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Marketing

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Prepare to use social media.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Review organisational social media requirements and policies and procedures.
- 1.2. Research various social media platforms, and identify and compare their audience, functionality and reach.

- 1.3. Research emerging trends in social media platform use.
- 1.4. Select social media platforms that meet brand needs and reach target customer.
- 1.5. Source information and content from internal and external sources for use on social media platforms
- 1.6. Develop content in line with target audience, brand cultures and social media requirements as required.
- 1.7. Source or create a social media calendar.
2. Use social media to enhance customer engagement.
 - 2.1. Create opportunities to attract and promote user-generated content.
 - 2.2. Respond to customers in a timely manner, directing them to relevant information as required.
 - 2.3. Identify potential brand damage, and take action to prevent escalation.
 - 2.4. Promptly respond to customer complaints and issues according to social media policies and procedures.
 - 2.5. Adhere to legal and ethical practices for social media use.
3. Promote products and services.
 - 3.1. Identify social media marketing opportunities and curate and post content to promote products and services.
 - 3.2. Use social media to promote special offers, events and promotions as required.
 - 3.3. Post content according to social media policies and procedures.
4. Review social media use.
 - 4.1. Track social media activity using monitoring tools.
 - 4.2. Identify opportunities to improve customer experience, and recommend to relevant personnel.
 - 4.3. Update the look and feel of the social media account to maximise effectiveness.
 - 4.4. Report on social media engagement and reach to relevant personnel.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

- Reading skills to:
- interpret technical terminology relevant to the use of social media platforms.

- Writing skills to:
- use correct spelling and grammar in social media posts.
- Technology skills to:
- upload images, text files, PDF files, audio files, video files and link associated files
 - import and export software functions
 - conduct online research for appropriate content
 - compare social media platform functionality.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- research four social media platforms and select two platforms for use, appropriate to business needs and target customer
- use the above two social media platforms to engage the customer by:
 - curating and posting written and visual content appropriate to the target customer
 - promote one organisational marketing activity
 - respond to two of the following types of customer social media posts:
 - customer reviews
 - user generated content
 - questions
 - complaints
 - troll
- review effectiveness of social media platform across a one month period by:
 - reporting on social media activity
 - making at least one recommendation for continuous improvement of social media use.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for social media use
- rules and regulations and terms of use of specific social media platforms:
 - privacy
 - spamming
 - copyright
 - creative commons
- social media trends:
 - trending platforms
 - consumer behaviour
 - trending content

- various social media platforms:
 - demographic of primary users
 - key features and uses
 - integration into business activity
 - useability
 - privacy and security features
 - costs
- legal and ethical practices for use of social media:
 - responsible use of platforms
 - responsible marketing practices
 - fair competition guidelines
 - duty of care
 - bullying and harassment policy
- types of social media users and their impacts:
 - troll
 - angry customer
 - misguided customer
 - unhappy customer
 - complimentary customers
 - brand advocates
- techniques for:
 - marketing the business using social media platforms:
 - promoting products
 - promoting special events
 - creating brand awareness
 - responding to customer posts on social media:
 - customer reviews
 - user generated content
 - questions
 - complaints
 - troll
- social media tools, and their use, for:
 - monitoring
 - scheduling social media content
 - capturing engagement and reach data
- commercial impact of social media platform both favourable and unfavourable:
 - importance of consumer reviews and user generated content
 - value of building a community of advocates on a social media platform
 - types of crisis issues or conflicts that can arise on social media locally, nationally and internationally

- sources and types of social media content:
 - product information
 - images and photos
 - links to other websites
 - videos
 - text and graphics
 - current trends
 - Internet.

Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for social media use
 - legal and ethical use of social media
- social media content calendar that details:
 - key events and promotions
 - milestones and relevant dates
 - content for release
- files for use across social media platforms:
 - image files
 - text files
 - PDF files
 - audio files
 - video files
 - link associated files
- computer or mobile device with Internet access
- social media monitoring tools
- social media platforms
- customer postings on social media platforms
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Develop product and service knowledge.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify and access sources of information on products and services.
- 1.2. Interpret information about availability, features and benefits of products and services.

- | | |
|----------------------------------|--|
| | 1.3. Compare products and services based on product information. |
| | 1.4. Identify and use opportunities to update knowledge for the product and service range. |
| 2. Respond to customer requests. | 2.1. Answer customer questions about products and services with current and accurate information. |
| | 2.2. Use questions to clarify customer information needs. |
| | 2.3. Explain product and service details using clear communication. |
| | 2.4. Source additional information when answer to customer request is unknown or refer to relevant colleagues. |
| 3. Enhance information provided. | 3.1. Identify situations where additional information may assist the customer. |
| | 3.2. Advise on alternative products or services that may meet customer needs when requested item is not available. |
| | 3.3. Recommend complementary products, specials, new lines and promotions to customers according to their needs. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Numeracy skills to:

- interpret pricing information.

Unit Mapping Information

Assessment Requirements for SIRXPDK001 Advise on products and services

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- access and interpret sources of information on four different products or services
- respond to four different customer inquiries for product or service information that individually or cumulatively require provision of information on all of the following:
 - features and benefits
 - price
 - alternative products or services
 - complementary products or services.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - interactions with customers
 - product or service pricing
- basic key aspects of legislation that impact provision of information for the product or service range:
 - Australian Consumer Law
 - product or service specific legislation
- interpersonal communication techniques:
 - active listening and questioning
 - communication methods which convey information clearly and concisely
- product and service information for the product or service range:
 - features and benefits
 - price
 - care and handling of products
 - availability
 - storage requirements, shelf life and use by date
 - warranties

- ingredients or materials contained in product
- origins
- alternative products and services
- complementary products and services.

Assessment Conditions

Skills must be demonstrated in a services industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a product or service range
- sources of product information
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators outlining factors that impact provision of information for the product or service range
 - price lists
 - organisational policies and procedures relevant to product and service advice
- customers; these can be:
 - customers in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
 - monitoring adherence to organisational security policies and procedures
 - responding to two occurrences of non-adherence to security policies and procedures
 - communicating security policies and procedures to one team member
 - ensuring security equipment is utilised and in correct working order
 - reporting on opportunities for improved store security.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - use of security equipment
 - suspicious customer behaviour
 - suspicious team member behaviour
 - armed robbery
 - cash and non-cash security
 - merchandise security
 - theft
 - responding to security breaches
 - reporting security risks and breaches
 - surveillance of merchandise
 - personal security
 - general store security
 - team members' security training
 - security for opening and closing premises
 - reporting problems and faults
 - security of visitors, sales representatives, contractors and vendors
 - security risks likely to endanger customers or team members

- legislation as relevant to store security and own level of responsibility:
 - privacy laws
 - Australian Consumer Law
 - reporting procedures
- impacts of security breaches on individuals and organisation:
 - emotional distress
 - financial loss
 - commercial impacts
- common security risks within the retail workplace and techniques to:
 - identify risk
 - minimise risk
- types of store alarms and security systems used in industry.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant equipment:
 - alarm systems
 - surveillance equipment
 - point-of-sale equipment
 - communication equipment
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
 - organisational policies and procedures as listed in the Knowledge Evidence
- customers and team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Sales

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Establish customer needs.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Connect with the customer within designated response times and establish rapport.
- 1.2. Use questioning and active listening to facilitate effective two-way communication.

- 1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.
- 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.
 - 2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.
 - 2.2. Clearly explain and promote product and service features and benefits where relevant.
 - 2.3. Advise on promotional events where relevant.
 - 2.4. Provide additional information to address customer questions and objections.
 - 2.5. Offer comparisons to competitor product or service range as required.
 - 2.6. Collaborate with the customer to determine product or service option most suited to their needs.
 - 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.
 - 3.1. Select and use appropriate techniques to close sale.
 - 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.
 - 3.3. Farewell customer on leaving, and invite to return.
 - 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - detailed in-house and supplier product information documents
 - plain English documents that outline organisational customer service policy and procedures.
- Numeracy skills to:
- interpret basic fee information from in-house documents and complete basic pricing calculations.
- Problem-solving skills to:
- respond to customer objections and provide appropriate solutions to satisfy customer needs.
- Technology skills to:
- use technologies equipped with search functionality and information systems to source product and service information.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
 - appropriate communication
 - establishment and clarification of customer needs, wants and expectations
 - product and/or service knowledge
 - appropriate sales approach to sell benefits and features of products and/or services
 - overcome objections and close sales
 - upsell and/or cross sell additional products and/or services that complement the sale
 - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
 - cultural diversity
 - special needs
- sales techniques:
 - opening techniques
 - recognising buying signals
 - strategies to focus customer on specific products and services
 - selling add-ons and complementary products
 - overcoming customer objections
 - closing techniques

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
 - professional service standards and protocols for retail industry personnel
 - attitudes and attributes expected by the retail industry to work with customers
 - different customer service needs and expectations
- for the particular retail organisation:
 - product and service knowledge:
 - product and service range offering
 - product specifications, features and benefits
 - designated response times for providing customer service
 - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for:
 - customer service
 - sale of products and services
 - resolving customer complaints
 - collection and storage of customer details
 - organisational product information and price lists
 - supplier brochures, information sheets and price lists
 - promotional activity information
 - current plain English regulatory documents distributed by government regulators for:
 - consumer protection law
 - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Follow point of sale work systems.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Open and close point-of-sale terminal at designated times and according to organisational procedures.
- 1.2.Clear point-of-sale terminal and transfer cash.
- 1.3.Handle cash according to organisational policies and

- procedures.
- 1.4.Maintain supplies of change at agreed levels in point-of-sale terminal to agreed levels.
 - 1.5.Maintain adequate supplies of consumables.
2. Process point-of-sale transactions.
 - 2.1.Identify transaction type and required procedure to be followed.
 - 2.2.Correctly interpret sale price information.
 - 2.3.Make accurate calculations for pricing and collection of payment.
 - 2.4.Enter accurate sale information into point-of-sale equipment.
 - 2.5.Confirm price to customer and check customer payment against sale value.
 - 2.6.Provide correct change for cash payments.
 - 2.7.Identify transaction errors, follow procedures for resolution and complete accurate records.
 3. Complete sales.
 - 3.1.Generate and complete documentation associated with the sale.
 - 3.2.Confirm and process any purchase follow up activities.
 - 3.3.Acknowledge and thank customer in line with organisational policy.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information from various sources and calculate accurately with or without the use of a calculator. • measure or estimate quantities to calculate costs. • calculate percentage discounts.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXSL002 Follow point-of-sale procedures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow procedures for set up, maintenance and close of point-of-sale area/terminal on three different occasions
- perform three point-of-sale transactions for each of the following:
 - cash sales
 - non-cash sales
- perform three point-of-sale transactions for each of the following:
 - refunds
 - exchanges
- make six accurate financial calculations relating to product pricing that individually or cumulatively involve:
 - multiple products
 - products of varying prices
 - products with percentage discounts
- follow procedures to complete four sales that require post purchase activity.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
- basic key aspects of legislation that impact point-of-sale activities:
 - Australian Consumer Law
- features of products sold by the organisation
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - clearance of terminal and transference of tender

- recording takings
- consumables required by system
- security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- procedures for non-cash transactions:
 - credit cards
 - EFTPOS
 - vouchers
- types of purchase follow up activities and associated organisational policies and procedures:
 - placing of orders
 - delivery
 - issuing of invoices
 - issuing of receipts
 - wrapping and packing.

Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for point-of-sale activities
- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation that impact point-of-sale activities as listed in the Knowledge Evidence
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan and complete recreational SCUBA dives to a maximum depth of 18 metres and to respond to problematic and emergency situations involving self and dive buddy. It also requires the ability to assemble and disassemble equipment and to complete basic maintenance at the water's edge.

It applies to dive leaders, usually known as divemasters, or instructors and to assistant instructors who use these skills when leading participants in SCUBA diving activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

In order to procure air, equipment, and other services to engage in recreational open water diving without supervision, divers must hold certification (C-Card) issued by an industry authorised organisation. That industry certification may or may not be issued concurrently with an Australian Qualification Framework (AQF) qualification or Statement of Attainment identifying achievement of competency in this unit. C-Card certification would be required to gain employment as a divemaster or instructor.

Those delivering training and assessment to support this unit should consult the relevant industry bodies to determine any partnership arrangements for courses, trainers and assessors that can lead to joint AQF and industry regulated C-Card certification.

Pre-requisite Unit

Nil

Competency Field

SCUBA Diving

Unit Sector

Outdoor Recreation

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Plan dives.

2. Prepare for the dive.

3. Complete dives.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Determine site, depth and duration of dives.

1.2. Identify hazards and medical problems and assess risks associated with use of equipment, site, depth and duration of dives.

1.3. Prepare dive plans for single and repetitive dives according to industry technical and safety criteria.

1.4. Calculate no decompression limits and maximum operating depth.

1.5. Use dive computer or dive tables, as required, to plan requirements.

2.1. Select and assemble dive equipment suited to conditions and dive requirements, and check for safe working condition.

2.2. Utilise dive computers or dive tables, as required, to finalise details of dive, according to industry technical and safety criteria.

2.3. Confirm activity safety and emergency response procedures to ensure compliance during activities.

2.4. Confirm protocols for communications between divers buddy and activity leaders.

2.5. Fit and adjust equipment and exposure suit to self, in conjunction with buddy, to ensure comfort and safety.

2.6. Complete buddy cross checks for all equipment.

2.7. Participate in pre-dive roll call.

3.1. Utilise techniques to enter and exit the water according to conditions and own ability.

3.2. Execute controlled descents and ascents with buddy and equalise at appropriate times.

3.3. Adjust and maintain positive, neutral and negative buoyancy at appropriate times during dive.

3.4. Control underwater swimming and navigate a basic course.

3.5. Monitor depth and time throughout dive, according to

- planned dive tables or use of dive computer data.
- 3.6. Monitor air supply, check pressure gauges regularly and communicate supplies with buddy.
 - 3.7. Use techniques that minimise damage to the diving environment throughout all activities.
 - 3.8. Participate in post-dive roll call and ensure dive log is completed.
 - 3.9. Disassemble SCUBA gear on completion of dive.
4. Maintain safety and complete rescues.
 - 4.1. Safely approach, and negotiate obstacles and hazards to minimise risk of injury.
 - 4.2. Maintain buddy contact, cooperation and communication throughout dive.
 - 4.3. Identify problematic or emergency situations promptly, and assist buddy with rescues.
 - 4.4. Self-rescue from problematic or emergency situations.
 - 4.5. Use an alternate air source and make controlled air sharing ascents.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • interpret detailed and familiar organisational safety and emergency response procedures.
Oral communication skills to:	<ul style="list-style-type: none"> • use clear and unambiguous verbal and non-verbal communications to make intent known with diving buddy and support crew.
Numeracy skills to:	<ul style="list-style-type: none"> • interpret and calculate numerical data involving pressures, percentages and depths.
Teamwork skills to:	<ul style="list-style-type: none"> • work in harmony with a buddy diver to plan and complete safe dives.
Planning and organising skills to:	<ul style="list-style-type: none"> • manage own timing to complete activities within planned timeframes.
Self-management skills to:	<ul style="list-style-type: none"> • critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and complete four open water dives each for different parameters
- prior to each dive, and at the water's edge:
 - assemble own diving equipment
 - inspect all equipment for safety and serviceability
 - fit and adjust equipment to self, including appropriate weights, in conjunction with buddy
 - complete a BWRAF (buoyancy, weights, releases, air, final) check in conjunction with buddy
- during each dive, use effective techniques to control:
 - entry and exit
 - descent and ascent
 - underwater swimming
 - buoyancy both underwater and at the surface
 - mouthpiece clearing for both snorkel and regulator
 - exchanges between regulator and snorkel, in-water at the surface
 - swimming at the surface using snorkel; fully geared
 - buddy contact, cooperation and communication, using correct signals for communication
 - navigation of a basic course with an underwater compass
- across all dives, collectively participate in simulations to respond to problematic and emergency situations and:
 - clear partially and fully flooded masks
 - remove and replace mask underwater
 - remove and replace SCUBA system in-water at the surface
 - remove and replace weight system and SCUBA kit in water too deep in which to stand
 - use an alternate air source to provide air to and receive air from a diver, and make controlled air sharing ascents
 - provide buddy assistance for two situations
- after each dive, disassemble SCUBA gear.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for diving activities
- factors to consider when planning a dive:
 - dive location
 - objectives
 - abilities of self and buddy
 - depth and duration of dive
 - contingencies
- features of diving environments, particularly those relevant to local conditions, sufficient to understand the impacts on diving activities and locations:
 - water conditions:
 - temperature and thermocline
 - visibility
 - movements, currents, waves, tides
 - density of fresh and salt water
 - topography; bottom and shoreline
 - aquatic life; animals and plants
 - weather conditions
 - hazards and techniques used to safely negotiate these:
 - surface hazards
 - overhead obstructions
 - entanglement and entrapment in natural and constructed features
 - special environmental features, including any cultural and heritage features, minimal impact techniques specific to diving environments, and why these are important to conservation
 - any local regulations specific to diving
- how to use dive computers to
 - determine no-decompression limits for single and repetitive dives
 - properly plan and execute a dive
- features, function and operation of dive computers, and advantages of dive computers over dive tables when planning and completing dives
- the physics of diving; the physical principles of matter and their application to diving activities and hazards:
 - sound
 - light
 - buoyancy
 - pressure and gas laws
 - temperature

- for the following medical problems related to diving, the causes, prevention, symptoms, first aid and treatment:
 - direct effects of pressure during descent, types of squeezes and barotrauma:
 - mask
 - suit
 - ears
 - sinuses
 - lungs
 - teeth
 - direct effects of pressure during ascent:
 - gas expansion – ears, sinuses, lungs, stomach, intestines and teeth
 - lung over pressurization and overexpansion injuries
 - vertigo
 - indirect physiological effects of pressure:
 - decompression illness
 - nitrogen narcosis
 - carbon dioxide excess and relationship to overexertion
 - oxygen toxicity
 - shallow water blackout and relationship to hyperventilation
 - issues related to contaminated air
 - other physiological and psychological problems:
 - drowning and secondary drowning
 - carotid sinus reflex
 - inadequate ventilation (hypoventilation)
 - atmospheric issues – hypothermia, hyperthermia, sunburn
 - bite and sting injuries from aquatic animals and plants
 - issues related to use of medication, drugs and alcohol
 - fatigue and exhaustion
 - stress and panic
 - over confidence
- for the following diving equipment, identifying features, functions, operation and, where relevant, how to fit and adjust for comfort and safety:
 - fins
 - face masks
 - snorkels
 - buoyancy control devices
 - exposure suits, booties and gloves of different grades suited to different conditions
 - weight ballast systems
 - cylinders and valves, cylinder support systems
 - regulators

- submersible pressure gauges
- alternative air sources of different types
- timing devices
- depth gauges
- underwater compasses
- floats and flags
- lights
- emergency equipment carried by dive operators:
 - signalling devices, acoustical and visual
 - first aid kits
 - oxygen kits
- for all of the above equipment, how to inspect for safety and serviceability
- the purpose and importance of pre and post-dive roll calls
- inclusions of personal diving log books and the importance of completing after each dive
- communication protocols used between divers, buddies and activity leaders:
 - hand signals
 - noise signals such as rapping on cylinder
 - use of slates
 - use of signalling devices, acoustical and visual
- dive buddy systems and procedures used to:
 - cross check gear
 - maintain contact and cooperation
 - maintain common safety
- techniques used to:
 - enter and exit the water
 - descend and ascend using safety stops
 - swim underwater and at the surface in diving gear
 - maintain buoyancy both underwater and at the surface
 - use an alternate air source to provide air to and receive air from a diver, and make controlled air sharing ascents
 - rescue self and buddy from problematic and emergency situations.

Assessment Conditions

Skills must be demonstrated in an open water site during daylight hours. Dives can be completed from either a boat or from the shore.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction

- the first two of the four required open water dives must include at least 20 minutes at a depth between 5 and 12 metres
- the last two of the four required open water dives must include at least 20 minutes at a depth between 5 to 18 metres
- no more than three dives can be completed in any one day
- the following resources must be available to replicate industry conditions of operation and also for the purpose of assessing the candidate's ability to identify features and operational use:
 - first aid equipment
 - oxygen equipment
 - communication equipment for emergency response
 - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- a diving buddy with whom the candidate can dive
- fins
- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits suitable for conditions
- timing devices
- depth gauges
- underwater compasses
- signalling devices, acoustical and visual
- dive computers
- organisational safety and emergency response procedures for diving activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess open water diving skills and to authorise the issuance of C-Card certification.

SISOSCB006 Perform diver rescues

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to both lead, and complete diver rescues using a range of dive specific techniques. It requires the ability to fully assess the situation, determine a response and complete rescues using methods and equipment appropriate for the situation. It also covers the administration of in-water rescue breathing, and oxygen.

This unit does not require the provision of first aid, which is covered in other units, but does require the recognition and assessment of common diving related illnesses and injuries.

It applies to dive leaders, usually known as divemasters or instructors who work independently in the field using discretion and judgement to manage problems and emergencies when they arise.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

Competency Field

SCUBA Diving

Unit Sector

Outdoor Recreation

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Determine rescue requirements and prepare for rescue.
2. Rescue divers.
3. Use supplemental oxygen.
4. Debrief and complete

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify divers in need of rescue and determine their condition.
- 1.2. Assess situation, identify hazards promptly, assess risks and manage to avoid injury to self and others.
- 1.3. Determine appropriate rescue methods and techniques for situation, according to degree of urgency and condition of divers in need of rescue.
- 1.4. Select rescue equipment according to requirements.
- 1.5. Assess abilities, establish a chain of command and allocate roles and responsibilities to others.
- 1.6. Provide clear and concise instructions and confirm rescue crew understanding of roles, communication protocols and rescue actions.
- 1.7. Implement rescue operations according to organisational policies and procedures for emergency response.
- 2.1. Use equipment and rescue techniques appropriate to situation.
- 2.2. Provide reassurance and clear and concise instructions to divers being rescued.
- 2.3. Rescue divers on surface, using techniques appropriate to situation.
- 2.4. Assist responsive divers to surface and to reach boat or shore.
- 2.5. Bring unresponsive divers to the surface, provide in-water rescue breathing, and tow to boat or shore.
- 2.6. Maintain safety of self, others and rescuees throughout rescue operations.
- 2.7. Evaluate and monitor condition of rescued divers and determine need for first aid, medical treatment or evacuation.
- 2.8. Utilise underwater search patterns to locate missing divers.
- 3.1. Assess diver casualty to identify need for supplemental oxygen.
- 3.2. Administer oxygen, as authorised by organisation and allowed under local law.
- 4.1. Participate in incident management debrief and identify

reports.

future response improvements.

4.2. Complete required incident reports according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> interpret detailed familiar organisational policies and procedures for emergency response.
Writing skills to:	<ul style="list-style-type: none"> record detailed and accurate factual information about rescue responses.
Oral communication skills to:	<ul style="list-style-type: none"> use clear and unambiguous verbal and non-verbal communications to make intent known.
Teamwork skills to:	<ul style="list-style-type: none"> pro-actively and cooperatively direct and work within teams to coordinate rescue logistics, solve arising problems and effect efficient rescues.
Self-management skills to:	<ul style="list-style-type: none"> critically analyse all circumstances and implications to coordinate a considered response to rescue requirements.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISOSCB006 Perform diver rescues

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and complete a range of simulated rescue operations:

- collectively cover responses to all of the following diver issues:
 - panicked diver at the surface and underwater
 - over exerted diver at the surface and underwater
 - vertigo
 - cramping
- complete two surface non-swimming assisted rescues and collectively use reach and extension techniques
- complete two surface swimming assisted rescues while consistently entering the water without losing sight of the diver in need and:
 - establish diver's buoyancy
 - execute rescues with and without floatation devices
 - execute towing with and without equipment removal
 - use two towing techniques
- complete two underwater rescues while consistently maintaining buoyancy of self and rescued diver both underwater and at the surface:
 - use an alternate air source to provide air to a diver, and make a controlled air sharing ascent
 - bring an unresponsive diver to the surface
- provide one surface in-water rescue, using two of the following breathing techniques while consistently controlling an open airway:
 - mouth-to-pocket mask
 - mouth-to-mouth
 - mouth-to-nose
- assist divers to exit the water as follows:
 - one responsive diver without assistance
 - one responsive diver with assistance from team members
 - one unresponsive diver without assistance
 - one unresponsive diver with assistance from team members
- for at least one simulated rescue bring together multiple elements of rescue operations to include:
 - bringing an unresponsive diver to the surface

- establishing buoyancy both underwater and at the surface
- providing on surface in-water rescue breathing
- towing diver
- assisting diver to exit the water
- set up oxygen equipment on one occasion
- administer oxygen using a pocket mask on one occasion (where not prohibited by local legal requirements)
- complete one underwater search for missing divers using a search pattern to be chosen from the following list:
 - linear
 - circular
 - U pattern
 - jack stay
 - expanding square
- for each rescue operation:
 - consistently negotiate hazards safely and effectively
 - establish a chain of command, allocate and communicate roles and responsibilities to team members and participants to effectively complete rescues
 - participate in a debrief and complete an incident report.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response
- principles of a chain of command as relevant to dive rescue operations
- roles and responsibilities that can be allocated to team members and participants to effectively complete a diver rescue
- communication protocols for dive rescue operations:
 - hand signals
 - calls
 - whistles
- diver issues that can occur during SCUBA diving activities:
 - panicked diver
 - over exerted diver
 - drowning
 - vertigo
 - cramping
 - temperature related problems including hypothermia and hyperthermia
 - pressure related injuries including decompression sickness, arterial gas embolism and other lung overexpansion injuries

- stings or bites from marine animals
- diver low or out of air
- equipment related problems including over weighting
- missing diver
- for the above issues:
 - signs that indicate need for rescue and or first aid
 - how they affect choice of rescue techniques
 - appropriate actions and communications with the rescued diver
 - risks related to the rescue diver
 - first aid treatments for those that relate to illness or injury
- for surface non-swimming assisted rescues, features, functions and techniques used with rescue equipment:
 - reach equipment
 - throw bags, lifebuoys and slings
 - throw ropes
- for surface swimming assisted rescues, techniques for:
 - entering water without losing sight of diver in need
 - using floatation equipment
 - removing equipment from rescued diver and considerations for doing this
 - towing with and without equipment removed
- for underwater rescues, techniques used for:
 - establishing and maintaining buoyancy of rescued diver, both underwater and at the surface
 - using an alternate air source to provide air to a diver, and making controlled air sharing ascents
 - assisting responsive divers to the surface
 - bringing unresponsive divers to the surface while controlling buoyancy
- techniques for providing in-water rescue breathing:
 - removing equipment
 - opening the airway
 - mouth-to-pocket mask
 - mouth-to-mouth
 - mouth-to-nose
- techniques for:
 - assisting responsive divers to exit the water, with and without assistance from team members
 - exiting unresponsive divers from the water, with and without assistance from team members
- for oxygen administration:
 - situations that require the use of oxygen and benefits to divers
 - features, functions and operation of oxygen delivery systems, pocket masks

- appropriate flow rates
- hazards associated with the administration of oxygen and methods used to manage these
- team members that are authorised to administer oxygen and any legal requirements applicable in the local state or territory
- options that are available post rescue, when these might be used and how to contact authorities to assist:
 - assisted treatment via remote communications
 - emergency evacuation and medical treatment
 - hyperbaric chamber
- underwater search patterns used to locate lost divers, advantages and disadvantages of each:
 - linear
 - circular
 - U pattern
 - jack stay
 - expanding square
- format, inclusions and use of incident reports.

Assessment Conditions

Skills must be demonstrated in an open water site during daylight hours. Dives can be completed from either a boat or from the shore.

Assessments, for rescues, can only be completed through simulated activities. Simulations must incorporate time critical requirements.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction
- surfacing an unresponsive diver can only be completed at a maximum depth of 9 metres
- the following resources must be available to replicate industry conditions of operation:
 - first aid equipment
 - communication equipment for emergency response
 - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues
- fins

- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits suitable for conditions
- timing devices
- depth gauges
- underwater compasses
- rescue equipment:
 - reach equipment
 - throw bags, lifebuoys or slings
 - throw ropes
- oxygen equipment:
 - oxygen delivery systems
 - pocket masks or other barrier devices
- template incident reports
- organisational policies and procedures for emergency response.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess diver rescues.

SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan and conduct work in open spaces while upholding sustainable practices. This unit requires the ability to conduct research of the current land condition, capability, uses and practices, and develop and implement strategies to achieve sustainable practices for outdoor programs and activities.

This unit applies to operation or program managers who are responsible for planning, implementing and evaluating sport, recreation or fitness programs and activities across a range of activity areas. They work autonomously with responsibility for management of resources and upholding of sustainable work practices.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Resource Management

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Plan sustainable

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Determine opportunities and options for using open space

- activities for work in open spaces.
- within the local community.
- 1.2 Review and document relevant codes of practice and local government requirements for use of open space.
 - 1.3 Consult with colleagues and other stakeholders about issues of responsibility for environmental and social sustainability.
2. Conduct minimal impact activities.
 - 2.1 Select and use minimal impact techniques and procedures appropriate to the area.
 - 2.2 Conduct activities using positive sustainable outcomes for local communities and environments.
 - 2.3 Advise clients of appropriate behaviours in open space environments and address any unacceptable behaviours.
 3. Monitor impacts and changes.
 - 3.1 Monitor and record changes in the natural environment using appropriate technology.
 - 3.2 Collect environmental information on behalf of environmental agencies or local government as required.
 - 3.3 Advise appropriate authorities of environmental and social change promptly.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • analyse data on conservation strategies • research usage and potential usage.
Writing skills to:	<ul style="list-style-type: none"> • develop a plan to improve efficiency while drawing on data analysis.
Learning skills to:	<ul style="list-style-type: none"> • maintain currency of information related to sustainable practices in open spaces.
Problem-solving skills to:	<ul style="list-style-type: none"> • assess threats and opportunities • compare conservation strategies and select appropriate strategies • monitor and evaluate the effectiveness of strategies and develop alternative strategies where appropriate • identify current use of resources • develop strategies to maximise efficiency of resource use.
Planning and organising skills to:	<ul style="list-style-type: none"> • work within identified timeframes and budgets • plan, implement and monitor strategies for optimal resource use

- establish criteria to evaluate open spaces.
 - apply sustainable work practices on an ongoing basis.
- Self-management skills to:

Unit Mapping Information

Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct at least three sessions in two or more open space environments to minimise environmental impacts of sport, fitness or recreation activities
- for each of the sessions incorporate:
 - local government requirements
 - industry codes of practice
 - provision of advice to clients regarding the use of open spaces
 - management of client behaviour in open spaces
- provide feedback on the environmental impact of at least five sport, fitness or recreation activities conducted in open spaces.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation, regulations and land management requirements and guidelines:
 - permits in national parks or on land under control of traditional owners
 - restrictions on camp site operations and use of open fires
- global environmental issues, in particular a layperson understanding of the science associated with:
 - climate change
 - energy
 - land management
 - waste and consumption
 - water
- environmental and social impacts of sport, fitness or recreation industry in relation to global environmental issues in particular sites and communities
- practical sustainability considerations for sport, fitness or recreation operations, incorporating those related to:
 - environmentally or culturally sensitive areas and associated minimal impact practices
 - handling and disposal of waste, including human waste

- industry codes of practice
- use of water sources
- minimal impact techniques and procedures in relation to:
 - activity-specific guidelines
 - energy use
 - group size
 - interaction with wildlife
 - local customs and courtesies
 - noise
 - setting of camps
 - souveniring
 - use of tracks
 - waste disposal
- biophysical and socio-cultural elements in an environment and the relationship between them
- information collection techniques for monitoring environmental and social impact, including what is observed and measured and how specific data is recorded.

Assessment Conditions

Skills must be demonstrated in:

- an outdoor space that could be used for sport, recreation or fitness work purposes.

Assessment must ensure access to:

- areas or locations containing natural systems or components of these systems
- resources and information relevant to the natural system
- relevant information impacting on conservation of natural systems
- relevant stakeholder and local government information regarding the use of open spaces
- industry code of ethical practice
- organisational documentation relevant to open space planning.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITTGDE001 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to share information about a specific local Australian Indigenous culture. It is this localised focus that distinguishes this unit from SITTGDE007 Research and share information on Australian Indigenous cultures.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of local cultural knowledge, appropriate behaviour and local community consultation.

This unit applies to those people who are able to share local Australian Indigenous cultural knowledge with others. They may work at many different levels, as cultural knowledge has no direct relationship with organisational levels of responsibility.

The local Australian Indigenous cultural knowledge necessary to achieve competency in this unit may only be accessible to those individuals who identify as elders or who are authorised by local elders on behalf of their communities.

There are many different Indigenous language groups in Australia, therefore the focus of cultural interpretation will vary and should ultimately be decided in consultation with elders on behalf of the local community.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Consult with local Australian Indigenous community.
2. Share information about local Australian Indigenous culture.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Liaise with community members regarding tourism activities, and ways in which cultural information can be used to make these activities authentic to the local area.
- 1.2.Prepare for and conduct activities according to the needs and wishes of the local Australian Indigenous community.
- 1.3.Identify potential conflicts with the local Australian Indigenous community and seek solutions.
- 2.1.Share an appropriate level of information about aspects of Australian Indigenous culture with customers.
- 2.2.Advise customers about culturally appropriate behaviour.
- 2.3.Show respect for Australian Indigenous cultures and values through appropriate behaviour during activities.
- 2.4.Show customers traditional and contemporary practices when appropriate.
- 2.5.Use local language and share with customers when appropriate.
- 2.6.Invite customers to actively participate and share in the Australian Indigenous cultural experience when appropriate.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Writing skills to:	<ul style="list-style-type: none">• make notes about Australian Indigenous culture, to share with others.
Learning skills to:	<ul style="list-style-type: none">• develop own knowledge and understanding of Australian Indigenous cultures.
Teamwork skills to:	<ul style="list-style-type: none">• work effectively with the local Australian Indigenous community or with those who are authorised by elders on behalf of the community with regard to the preparation of appropriate information and activities.

Assessment Requirements for SITTGDE001 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with local Australian Indigenous community elders or persons approved by relevant local Indigenous community elders on at least three occasions and in a culturally appropriate manner to identify acceptable protocols for sharing aspects of local Indigenous culture with others
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and at three different sites.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- culturally acceptable practices and protocols within a specific local Australian Indigenous community that address:
 - the type of information that can be shared
 - who can give information
 - who can receive the information
 - what activities are appropriate
 - who should be involved in activities
- aspects of a specific local Australian Indigenous culture as appropriate to specific community:
 - art
 - bush foods and medicine
 - dance
 - music
 - storytelling
 - tools and implements
- copyright and intellectual property issues associated with providing information about local Australian Indigenous cultures.

Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace where research is conducted and shared on Australian Indigenous cultures
- a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

- sites where Indigenous cultural experiences take place:
 - cultural centre
 - gallery
 - natural setting
- involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in the tourism industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE002 Work as a guide

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to work effectively as a guide. It covers key legal, ethical, safety, environmental and professional development issues that guides must consider in their day-to-day work.

This unit applies to guides who may work across multiple industry sectors as employees, volunteers, or independent contractors. They may operate within a single site, or in a particular city, region or tourist precinct, but often move across sites, cities and regions.

Guides apply discretion and judgement within established organisational procedures, and when guiding a tour or activity they take a lead role without supervision. Sometimes guides are the owner-operators of small tour operations.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Plan guiding activity.

2. Communicate with tourism industry operators.

3. Guide tours or activities.

4. Develop guiding skills and knowledge.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Identify key guide information sources and contacts.

1.2. Review required roles and responsibilities for prospective guiding activity.

1.3. Plan resource, labour and logistical aspects of the guiding activity.

1.4. Use industry knowledge and guide networks to enhance the quality of guiding services provided to customers.

2.1. Liaise with internal and external stakeholders to organise all aspects of the guiding activity.

2.2. Achieve mutual understanding and agree on details relevant to guiding activities.

2.3. Provide accurate information and explanations about customer requirements and special requests.

2.4. Identify nature and key facts of operational problems and provide appropriate solutions in consultation with tourism operator.

3.1. Conduct guiding activities according to legal, industry and safety requirements.

3.2. Actively participate in risk assessment as an integral part of work activities.

3.3. Take account of ethical considerations for particular contexts.

3.4. Support sustainable work practices.

4.1. Identify and use opportunities to update knowledge and skills required by guides.

4.2. Maintain knowledge of technologies used by guides.

4.3. Identify and access sources of guide support when required.

4.4. Share knowledge with colleagues to enhance quality of service provided to customers.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">• read and interpret industry codes of practice and regulations.
Writing skills to:	<ul style="list-style-type: none">• complete risk assessment documentation.
Problem-solving skills to:	<ul style="list-style-type: none">• evaluate legal, ethical, safety and sustainability issues and requirements for guiding activities• make decisions on appropriate behaviours and actions.
Initiative and enterprise skills to:	<ul style="list-style-type: none">• make contingency plans when required, to deal with unexpected circumstances.
Teamwork skills to:	<ul style="list-style-type: none">• work effectively with industry operators.

Assessment Requirements for SITTGDE002 Work as a guide

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct three guiding activities with different customers or groups which involve:
 - liaising with one or more tourism industry operators
 - identifying potential operational problems and appropriate solutions
 - incorporating client requirements and special requests
- undertake a full risk assessment for each of the above guiding activities that:
 - identifies inherent risks
 - identifies hazards
 - reports on hazards
- demonstrate how legal, ethical, safety and sustainability requirements have been met in the planning of each of the above guiding activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- interrelationship between tour operations and wholesaling sectors and the role of guiding in the tourism industry
- cultural considerations in dealing with industry colleagues, customers, suppliers and local communities
- roles and responsibilities for guides, and the specific roles of each of these guides:
 - adventure guides
 - city hosts
 - driver guides
 - meet and greet guides
 - site guides
 - tour guides
 - tour managers
- roles and services provided to guides by peak guiding bodies and industry associations to assist in developing guiding knowledge
- industry and legal compliance requirements that affect guiding operations:

- consumer protection laws
- occupational licensing and industry accreditation
- contents of various guiding codes of conduct or practice and the impacts of non-compliance
- public liability and the guide's duty of care
- environmental laws
- permit requirements for operating in protected areas
- Queensland Tourism Services Act 2003 requirements for guides when working in Queensland
- work health and safety
- different types of technologies and their uses:
 - presentation technologies
 - radio-frequency identification (RFID) codes for handheld devices
 - social networking
- opportunities to update own knowledge as a guide:
 - familiarisation tours
 - industry seminars
 - participation in industry accreditation schemes
 - participation or membership in professional guide associations
 - research
 - social networking
 - training courses
- tourism operators that work in collaboration with guides:
 - inbound tour operators
 - other guides
 - retail outlets:
 - factory outlets
 - opal or souvenir outlets
 - tax free stores
 - suppliers of any tourism product or service that is a component of the touring itinerary:
 - accommodation providers
 - airlines
 - attraction or theme parks
 - coach companies
 - cultural sites
 - event venues
 - food and beverage outlets
 - tour operators and cruise operators
- safety issues that affect guiding operations in particular contexts, particularly those related to customer safety in different environments

- ethical considerations for guides:
 - compliance with industry codes of conduct
 - cultural considerations
 - dealings with local communities
 - dealings with Indigenous communities
 - provision of services as promoted or confirmed
 - relationships with industry colleagues, customers and suppliers
 - avoiding unconscionable conduct
- sustainable work practices includes considerations for:
 - economic:
 - business profitability
 - environmental:
 - minimal impact practices
 - waste minimisation
 - social:
 - host community interactions
 - Australian Indigenous contexts.

Assessment Conditions

Skills must be demonstrated in an operational guiding environment. This can be:

- a real guiding activity
- a simulated industry environment or activity.

Assessment must ensure access to:

- environments in which guiding activities take place:
 - tourist attractions
 - visitor sites
 - on board various forms of transportation
- organisational specifications:
 - codes of conduct
 - procedures for liaising with tourism industry operators that are involved in the operation of guided activities
 - running sheets for tours and activities
 - incident report templates
 - passenger lists
 - risk assessment template
- microphone
- props and signage

- customer groups of a size and nature that reflect the commercial environment in which the guide operates
- tourism industry operators with whom the individual can interact; these can be:
 - those involved in organising a tour or activity who interact with the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context
- participants undertaking a tour or activity for whom the individual can act as guide; participants can be:
 - those participating in a tour or activity who interact with the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to research and share information about Australian Indigenous cultures in an appropriate way. It focuses on information that is widely available to the general community.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of culturally appropriate behaviour and local community consultation.

This unit applies across many industry sectors. It is particularly relevant to cultural tourism operations and to individuals who work in customer service and guiding roles with differing levels of responsibility. Information could apply to Australian Indigenous communities and cultures across Australia, or to a specific Australian Indigenous community and culture.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Research general information on Australian Indigenous cultures.
2. Share general information on Australian Indigenous cultures.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify key information sources on Australian Indigenous cultures.
- 1.2. Select and use formal and informal research techniques to access current, accurate and relevant information about Australian Indigenous cultures.
- 1.3. Obtain information in a culturally appropriate way.
- 2.1. Identify and use Australian Indigenous interpreters where possible.
- 2.2. Provide guidance to customers on appropriate behaviour when interacting with Australian Indigenous people.
- 2.3. Share clear and accurate information on Australian Indigenous cultures to enhance cultural awareness, ensuring acknowledgment of the diversity of cultures.
- 2.4. Share information in a manner respectful of local community values and customs.
- 2.5. Answer questions according to community wishes about what information can be shared.
- 2.6. Respond to culturally inappropriate behaviour by customers to minimise the likelihood of causing offence.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Writing skills to:

- make notes about Australian Indigenous culture to share with others.

Learning skills to:

- develop own knowledge and understanding of Australian Indigenous cultures.

- Teamwork skills to:
- work respectfully with Australian Indigenous interpreters and Australian Indigenous communities or with those who are authorised by elders on behalf of the community with regard to the preparation of appropriate information and activities.

Assessment Requirements for SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with relevant Australian Indigenous community elders or persons approved by relevant Indigenous community elders in a culturally appropriate manner to identify acceptable protocols for sharing knowledge on local Indigenous culture with others
- using relevant sources of information listed in the knowledge evidence, undertake research on Australian Indigenous culture relevant to the regional context to develop current knowledge of:
 - art and music
 - bushcraft, bush food and bush medicine
 - contemporary Australian Indigenous life and culture
 - cultural centres, galleries and natural sites
 - dance
 - history, pre- and post-European contact
 - land ownership
 - tools and implements
 - traditional life and culture
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and using at least three different locations.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on Australian Indigenous cultures:
 - artworks
 - events
 - exhibitions
 - experiences (of self or others)
 - films
 - images
 - internet

- music
- performances
- Indigenous people
- traditional owners
- presentations
- professional associations
- printed texts
- protocols for researching and sharing information about Australian Indigenous cultures that address:
 - the type of information that can be shared
 - who can give information
 - who can receive the information
 - what activities are appropriate
 - who should be involved in activities
- fundamental Australian Indigenous intellectual property issues:
 - strong links between intellectual property and cultural heritage
 - issues associated with the reproduction and sale of Indigenous cultural works.

Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace where research is conducted and shared on Australian Indigenous cultures
- a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

- cultural sites, galleries or natural settings
- information sources verified or supported by Indigenous communities
- involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

Assessment Requirements for SITTGDE008 Prepare specialised interpretive content on flora, fauna and landscape

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- prepare three different presentations, with each presentation:
 - using at least four credible and reliable sources of information
 - demonstrating knowledge of flora, fauna and landscape as listed in the knowledge evidence
 - using appropriate ecological terminology and concepts
 - incorporating interpretive themes and messages
 - organising information in a logical and suitable manner for presentation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of interpretation in creating a powerful customer experience
- sources of information on flora, fauna and landscape in the relevant geographic context
- landscapes of interest within a local region and their general characteristics
- key ecological terminology and concepts:
 - biodiversity and abundance
 - biotic and physical factors
 - carbon cycle
 - community relations
 - energy flow
 - food web
 - life cycles
 - nutrient cycle
 - populations
 - succession
 - water cycle
 - zonation
- interrelationships between parts of the ecosystem:

- developmental processes related to the formation of local landscapes:
 - geological formations and history
 - soil composition and its relation to plant and animal life and water catchment areas
- principles of Gondwana theory and the impact of Gondwana on plant and animal communities
- major landscape types and their characteristics:
 - alpine
 - coastal
 - desert
 - outback
 - temperate
 - tropical
- major species of flora and fauna within the local landscape:
 - characteristics
 - commonalities
 - interactions between species and the environment
 - nature of species and where it is found
 - nutrition and life cycles
 - roles of individual species
 - species harmful to humans
- identification techniques for flora and fauna
- environmental influences that affect landscape:
 - climate
 - earthquake
 - fire
 - flood
- human impact on landscape:
 - industrial activity
 - land clearing
 - mining
- management regimes and codes of practice for local landscape
- Australian Indigenous perspective on local landscape
- information sources frequently used by guides:
 - artworks
 - events
 - exhibitions
 - experiences and observations (of self or others)
 - films
 - geological societies, plant study groups or wildlife societies
 - images

- internet
- music
- local experts
- traditional owners
- performances
- presentations
- professional associations
- printed texts.

Assessment Conditions

Skills must be demonstrated in an operational guiding environment. This can be:

- an industry workplace where specialised interpretive content is developed for guiding activities
- a simulated activity involving the development of specialised interpretive content for guiding activities.

Assessment must ensure access to:

- current sources of information as listed in the knowledge evidence
- current interpretive resources
- equipment used to source, record and store information:
 - computer and software
 - internet
 - data storage equipment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD002 Develop interpretive activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives for an activity; develop operational aspects; and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE005 Prepare and present tour commentaries or activities.

The unit applies to many industry sectors and has particular relevance in tourism, sport and recreation, and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and developing interpretive activities may be for a series of activities in a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Establish need for activities.

1.1. Identify need for interpretive activities, based on customer, organisation and community needs.

1.2. Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues.

2. Create activities.

2.1. Identify and evaluate a range of potential information and resources, including other specialists as required.

2.2. Develop interpretive framework for activities.

2.3. Generate and select ideas for potential messages, themes and storylines.

2.4. Identify relationships between themes, storylines and the site.

2.5. Incorporate interpretive media that matches the site.

2.6. Conduct a risk assessment and incorporate controls into activity development.

2.7. Evaluate and integrate legal, ethical and sustainability considerations.

2.8. Develop resources to support activities.

2.9. Develop activity within budget to meet agreed objectives.

3. Evaluate activities.

3.1. Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities.

3.2. Modify activities according to feedback received.

3.3. Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:

- evaluate wide ranging information and tease out creative themes and messages for activities
- analyse and interpret complex information and communicate it creatively to customers.

Oral communication

- consult with colleagues about development issues for interpretive

skills to: activities.

Numeracy skills to: • calculate costs in order to work within established budgets.

Planning and organising skills to: • coordinate creative and practical aspects of activities.

Technology skills to: • use software to develop products that support the delivery of educational and commercial interpretive activities in both real and virtual contexts.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=68c40a93-e51d-4e0f-bc06-899dff092694>

Assessment Requirements for SITTPD002 Develop interpretive activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and develop one single interpretive activity and one series comprising at least three interpretive activities combined into an overall program, for at least two of the following:
 - attractions
 - guided activities or walks
 - sporting activities
 - theme parks
 - virtual activities
- plan and develop the above interpretive activities using at least two of the following themes:
 - cultural
 - heritage
 - historical
 - nature
- ensure above interpretive activities include key messages that reflect subject matter knowledge and meet the needs of different customer groups and commercial and operational constraints
- identify review mechanisms for above interpretive activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- subject matter around which activities are developed
- influential principles and theories of interpretation
- physical and digital interpretive media
- resource considerations for the development of interpretive activities:
 - apps and other digital content
 - costumes
 - guest speakers
 - handouts

- information and communications technology
- natural resources
- props
- professional organisations
- special interest organisations
- specialists:
 - actors and performers
 - creative designers
 - cultural advisers
 - designers
 - environmental educators
 - heritage specialists
 - historians
 - interpretation consultants
 - marketers
 - subject matter experts
 - technical experts
- practical processes that support activity development:
 - budgeting
 - evaluation
 - needs analysis
 - resource development
 - scheduling
- creative communication techniques for interpretive activities:
 - games
 - illustrated talks
 - role-playing
 - sensory awareness exercises
 - storytelling
 - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes:
 - determining overall risk level
 - determining exposure to the risk
 - estimating probability of negative impacts
 - identifying consequences that could result from the identified risk
- legal, ethical and sustainability considerations for activity development:
 - cultural appropriateness
 - duty of care
 - minimal impact

- minimising waste and conserving resources.

Assessment Conditions

Skills must be demonstrated in an operational tourism environment. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- a real or simulated environment for which interpretive activities can be planned and developed
- information sources on subject matter of interpretive activities, resources and other specialists
- current technology for use in activity development
- customers sufficient in number to reflect different customer, organisational or community needs and locations for interpretive activities; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD009 Develop environmentally sustainable tourism operations

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan strategically for environmentally sustainable operations. This is subject to a range of regulatory requirements that relate to environmental sustainability at land management agency and federal, state or territory, and local government level. It requires the ability to establish and operate a sustainable operation and to monitor its environmental impact.

The unit applies to those in the tourism industry with managerial responsibilities in strategic planning and product development. Planning may be for a whole region or local area or for a particular venue, organisation, event or product. The unit applies to any operation with a strong focus on environmental sustainability.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for SITTPD009 Develop environmentally sustainable tourism operations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop a plan for a tourism operation that supports environmental sustainability and provides evidence of:
 - analysis of key environmental issues
 - consultation with key stakeholders
 - evaluation of proposed operation
 - development of strategies and operational approaches that maximise positive impacts
 - integration of current legislation, regulations and industry codes
- implement the above plan, complying with environmentally sustainable practices, guidelines and legal requirements
- monitor and evaluate the environmental impact of the above tourism operation through:
 - community consultation and involvement
 - internal and external education programs
 - implementing sustainable operational initiatives:
 - regularly reviewing optimal group sizes
 - scheduling for optimal weather conditions and seasons
 - selecting most appropriate equipment and transport modes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- current research trends in the area of ecologically sustainable operations
- current and emerging issues and trends relevant to above operation and the environment
- global environmental issues, in particular a layperson's understanding of the science associated with:
 - climate change
 - energy
 - land management
 - waste and consumption
 - water

- relevance of particular environmental issues to the area or region of work and the specific features and vulnerabilities of the local environment
- methods of environmental evaluation:
 - environmental impact study (EIS)
 - evaluation of organisational capacity to comply with:
 - environmental and community protection laws
 - industry and ecotourism codes of practice
 - social sustainability
 - site studies
- consultation and communication mechanisms used by organisations in the product development process:
 - features
 - nature
 - objectives and outcomes
 - scope
 - time parameters
- strategic frameworks and operational systems and procedures that support environmentally sustainable operations:
 - customers
 - equipment and supplies
 - staff
- ways of balancing ecological sustainability and the economic viability of an operation
- potential negative environmental impacts:
 - disturbance of flora and fauna
 - introduction of exotic and feral species
 - physical damage
 - pollution
 - visual impacts
 - waste issues
- laws, regulations and land management requirements and guidelines:
 - need for permits in national parks or on land under control of traditional owners
 - restrictions on operations in relevant areas.

Assessment Conditions

Skills must be demonstrated in a destination, location, organisation or event for which an environmentally sustainable operation can be established. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- current information about environmental practices:
 - legislation
 - guidelines
 - industry codes of practice
- current information and communications technology to support the research and planning process
- stakeholders with whom consultations can take place, these can be:
 - consumer representatives
 - host community
 - investors
 - government authorities
 - land management agencies
 - suppliers of environmentally-friendly products; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITXCCS002 Provide visitor information

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to access general information on facilities, products and services available in the local area and to provide this to visitors.

The unit applies to frontline service personnel working in a range of tourism, travel, hospitality, entertainment and cultural contexts. Information is often provided face-to-face, but may be by telephone or other remote mechanisms.

It applies to frontline service personnel who routinely respond to visitor requests for general local area information. They may be working independently or with guidance from others in restaurants, hotels, wineries, attractions, entertainment venues, tour operations, visitor information centres and at tour desks.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1. Access and update visitor information. | 1.1. Identify and access sources of visitor information.
1.2. Obtain general information on local facilities, products and services to meet different visitor needs.
1.3. Share information with colleagues to support the efficiency and quality of service.
1.4. Identify and use <i>opportunities to update and maintain local area knowledge</i> . |
| 2. Provide information to visitors. | 2.1. Identify specific information and assistance needs of visitors, including those with special needs.
2.2. Provide appropriate scope and depth of information to meet visitor needs.
2.3. Identify and use opportunities to promote internal products and services. |
| 3. Seek feedback on information provision. | 3.1. Proactively seek visitor feedback to ensure required information has been provided.
3.2. Follow procedures for any formal visitor evaluation.
3.3. Provide information on visitor feedback to relevant colleagues. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • interpret sometimes detailed product and local area information • research, sort and use relevant information.
Writing skills to:	<ul style="list-style-type: none"> • record simple notes and basic information on local facilities, products and services for visitors.
Oral communication skills to:	<ul style="list-style-type: none"> • listen and respond to range of visitor requests, asking questions to clarify and confirm.
Learning skills to:	<ul style="list-style-type: none"> • review own knowledge of information required to assist visitors and participate in activities that continuously update it.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the

candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Opportunities to update and maintain local area knowledge must include at least four of the following:

- informal discussions with colleagues and visitors
- internal newsletters and external promotional material
- local information centre
- participating in local familiarisation tours
- local media: newspaper, radio and television
- personal observation or exploration
- principal or supplier of the product or service
- staff noticeboards
- team meetings.

Unit Mapping Information

Assessment Requirements for SITXCCS002 Provide visitor information

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information about local area features to three different visitors on three different occasions
- provide above information and assistance in a culturally appropriate manner and according to organisational service standards
- extend personal knowledge of relevant facilities, products and services
- seek formal and informal feedback from visitors on above services.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on the available local area facilities, products and services:
 - brochures
 - library
 - local council
 - local people and local identities with specialised knowledge
 - local visitor guide booklets and maps
 - online reservation systems
 - organisation information
 - organisation-designed information systems
 - principal supplier of a product
 - product library
 - room directories
 - social media websites
 - state or territory government tourism authority information systems
 - timetables
- information on the local area features:
 - accommodation options
 - dining options

- entertainment venues
- local attractions
- local personal services facilities
- local shopping facilities
- local transport options
- organisation-specific information
- road conditions
- sporting facilities
- tours, local outings and trips
- travelling routes
- weather conditions
- organisational service procedures and standards:
 - designated response times for acknowledging customers and their enquiry
 - personal presentation and hygiene standards
- awareness of customs and practices of various social and cultural groups of visitors to assist with meeting visitor needs and expectations in regards to:
 - modes of greeting, farewelling and conversation
 - body language and body gestures
 - formality of language
 - clothing
- methods of collecting feedback:
 - formal:
 - surveys
 - interviews
 - structured questioning
 - informal:
 - observation
 - casual discussion
- organisational service procedures and standards.

Assessment Conditions

Skills must be demonstrated in an operational customer service environment in a service based industry such as tourism, travel, hospitality or events where information is sourced and provided to visitors. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- sources of information on the local area facilities, services and general products, and their availability
- organisational specifications for customer service standards
- visitor surveys and feedback forms
- visitors from different cultural backgrounds with whom the individual can interact; these can be:
 - visitors to an industry workplace during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITXCCS006 Provide service to customers

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to communicate effectively with and provide quality service to both internal and external customers. It requires the ability to establish rapport with customers, determine and address customer needs and expectations, and respond to complaints.

The unit applies to those frontline service personnel who deal directly with customers on a daily basis and who operate with some level of independence and under limited supervision.

This includes individuals working in a range of tourism, travel, hospitality and events contexts.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

1. Communicate with internal

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Communicate with customers in a professional manner

- and external customers. within designated response times using appropriate verbal and non-verbal communication.
- 1.2. Observe and respond to non-verbal communication of customers.
 - 1.3. Use active listening and questioning to facilitate effective two-way communication.
 - 1.4. Select a *medium of communication* appropriate for the customer and *situation*.
2. Follow defined organisational standards when delivering service.
 - 2.1. Practise high standards of personal presentation and hygiene according to organisational requirements.
 - 2.2. Follow organisational customer service policies and procedures.
 - 2.3. Adhere to professional standards expected of service industry personnel.
 3. Provide service to customers.
 - 3.1. Establish rapport with customer to promote goodwill and trust during service delivery.
 - 3.2. Identify customer needs and expectations, including customers with special needs.
 - 3.3. Promptly meet all reasonable customer needs and requests.
 - 3.4. Identify and anticipate operational problems and take action to minimise the effect on customer satisfaction.
 - 3.5. Recognise and act upon opportunities to deliver additional levels of service beyond customer's immediate request.
 4. Respond to customer complaints.
 - 4.1. Proactively recognise customer dissatisfaction and take swift action to avoid escalation to a complaint.
 - 4.2. Respond to customer complaints in a professional manner.
 - 4.3. Identify solutions in consultation with customer.
 - 4.4. Resolve complaints according to own level of responsibility and organisational policy.
 - 4.5. Escalate complex service issues to higher level staff for action.
 5. Provide internal feedback on customer service practices.
 - 5.1. Provide ongoing internal feedback on service practices, policies and procedures, and suggest improvements.
 - 5.2. Identify individual and recurring complaints and provide internal feedback to avoid future occurrence.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> interpret messages, notes, letters, online communications, and policies and procedures.
Writing skills to:	<ul style="list-style-type: none"> record clear and concise messages, notes, emails, faxes and letters.
Self-management skills to:	<ul style="list-style-type: none"> deal with customer enquiries in a logical sequence while accommodating other work commitments.
Technology skills to:	<ul style="list-style-type: none"> use electronic communication media.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Medium of communication must include consideration of:

- assistive technology
- email or other electronic communication
- face-to-face communication
- fax
- written messages for restaurant bookings or phone messages
- standard forms and pro formas
- telephone
- use of interpreters
- two-way communication systems.

Situation must involve consideration of the following factors:

- access of the sender and receiver to necessary equipment and technology
- degree of formality required
- required format
- technical and operational features to fulfil the need
- technical skills required to use the medium
- urgency and timeframes.

Assessment Requirements for SITXCCS006 Provide service to customers

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify customer requirements and provide quality customer service to three different internal and three different external customers to meet requirements
- provide service to above customers in line with organisational customer service standards and within designated organisational response times
- demonstrate procedures to respond to and resolve three different customer complaints according to organisational policies and procedures
- demonstrate effective communication with the above internal and external customers, including any with special needs
- seek formal and informal feedback from customers on above service.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- principles of quality customer service and positive communication
- appropriate non-verbal communication for customer service:
 - body language
 - culturally specific communication customs and practices
 - dress and accessories
 - gestures and mannerisms
 - use of space
 - voice tonality and volume
- methods for enhancing service delivery in response to staff and customer feedback
- specific industry sector:
 - professional service standards expected of service industry personnel
 - attitudes and attributes expected by the service industries to work with customers
 - standards of personal presentation and hygiene
 - different customer service and communication expectations, especially those with special service needs
- particular organisation:

- types of customers
 - external
 - internal
 - new
 - regular or repeat
 - visitors
- designated response times for acknowledging customers and their enquiry
- personal presentation and hygiene standards
- customer service policies and procedures, in particular those for:
 - acknowledging and greeting customers
 - complaint and dispute management
 - empowerment of different levels of personnel to resolve complaints, disputes, service issues and customer compensation
 - loyalty programs
 - presentation standards for customer environment, customer service personnel, and documents and promotional materials
 - pricing guarantees
 - product quality
 - refunds and cancellation fees
 - response times
 - service guarantees
 - training staff for customer service and complaint handling
- awareness of special needs, customs and practices of various social and cultural groups of customers in regards to:
 - modes of greeting, farewelling and conversation
 - body language and body gestures
 - formality of language
 - clothing
- methods of collecting feedback:
 - formal:
 - surveys
 - interviews
 - structured questioning
 - informal:
 - observation
 - casual discussion
- essential features, conventions and usage of different types of communication techniques and equipment.

Assessment Conditions

Skills must be demonstrated in an operational business environment where customers are served. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies, procedures and templates relating to:
 - customer service standards
 - designated response times
 - presentation standards
 - procedures for dealing with customer complaints
 - customer surveys and feedback collection
 - recording and reporting customer feedback
- internal and external customers with different cultural backgrounds and special service needs with whom the individual can interact; these can be:
 - customers in an industry workplace during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITXCOM004 Address protocol requirements

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to source and access information on protocol requirements to fulfil any sales or operational need. It requires the ability to identify appropriate information sources, access and interpret specific details of protocol requirements, and coordinate the use of protocol.

The unit applies to many tourism, travel, hospitality and event sectors and is particularly relevant to events, function coordination, tour operations and tour guiding.

Protocol affects a broad range of business and government activity and the breadth and depth of protocol knowledge required will vary. This unit does not require in-depth knowledge of protocol requirements, but rather focuses on the ability to collect and interpret protocol information.

This unit applies to a range of people working independently or with limited guidance, including tour and event coordinators and managers, tour guides, and front of house or duty managers.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Source information on appropriate protocol requirements.

1.1. Assess the need for protocol to be followed for the particular situation.

1.2. Identify relevant sources of protocol information.

1.3. Liaise with customers to determine appropriate protocol.

1.4. Interpret relevant protocol information to inform work practice.

2. Coordinate the use of protocol.

2.1. Identify specific work activities requiring a particular protocol to be observed.

2.2. Provide protocol briefings to staff and suppliers.

2.3. Coordinate the use of correct protocol for the delivery of product or service.

3. Update knowledge of protocol.

3.1. Identify and use opportunities to update protocol knowledge.

3.2. Share updated knowledge with customers and colleagues as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:

- interpret unfamiliar and complex protocol information.

Writing skills to:

- compose correspondence reflecting correct protocols, when preparing correspondence to dignitaries and officials, invitations, and team briefing papers.

Oral communication skills to:

- liaise with customers, clients, their agents and personal assistants to confirm protocol requirements
- address dignitaries and officials using appropriate language.

Self-management skills to:

- take responsibility for meeting protocol requirements.

Unit Mapping Information

SITXCOM301 Address protocol requirements

Assessment Requirements for SITXCOM004 Address protocol requirements

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source accurate information on protocol requirements for at least two of the following:
 - organising an event or function, such as a meeting, reception or tour
 - organising accommodation
 - issuing marketing materials reflecting correct titles of dignitaries
 - meeting the requirements of dignitaries and officials
 - meeting the requirements of entertainers and masters of ceremony
- integrate protocol requirements into oral and written material for each of the above
- update and integrate knowledge of protocol when organising each of the above.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- main types of civic functions held in Australia
- importance and role of protocol in different business situations
- key sources of information on protocol for:
 - Australian honours system:
 - order of precedence
 - ranks and forms of address
 - wearing of honours and medals
 - involvement of Indigenous Australians and other cultural groups in business activities
 - correct use of national and state symbols:
 - flags
 - anthems
 - military salutes
 - forms of address for different dignitaries and officials, both for written correspondence and in oral communication
- sources of protocol information:
 - Aboriginal Land Councils

- Australia Day Council
- customers, clients, their agents and personal assistants
- federal, state or territory, and local government protocol departments
- internet
- libraries
- Office of the United Nations
- specific work activities impacted by protocol requirements:
 - addressing and introducing dignitaries and officials
 - correspondence to dignitaries and officials
 - issuing invitations
 - liaison with dignitaries and officials
 - preparing:
 - briefing papers
 - marketing materials
 - running sheets
- protocols for the following different situations:
 - invitations to dignitaries and officials
 - arrival procedures, for heads of state or government officials
 - introduction protocols and order of speakers
 - order of precedence for official guests
 - seating arrangements
 - dress styles
- opportunities to update protocol knowledge:
 - informal networking with colleagues
 - internet research
 - reading relevant journals.

Assessment Conditions

Skills must be demonstrated in an operational tourism, travel, hospitality or events environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current protocol information relevant to organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

TAEASS301 Contribute to assessment

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to contribute to the assessment process.

It applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role, and for whom collecting the evidence for assessment is an adjunct to principal work responsibilities. The unit applies to those involved in collecting evidence for assessment against units of competency or accredited courses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Clarify role and responsibilities in the assessment process	<p>1.1 Discuss and confirm the purpose of the assessment with relevant people</p> <p>1.2 Discuss and confirm benchmarks for assessment with the qualified assessor</p> <p>1.3 Access, read and clarify assessment plan with the qualified assessor</p> <p>1.4 Discuss and agree with the qualified assessor specific responsibilities in gathering evidence, and the types of evidence to be gathered</p>
2. Confirm organisational arrangements for evidence gathering	<p>2.1 Access and confirm relevant assessment system policies and procedures, organisational, legal and ethical requirements, and other relevant advice on assessment</p> <p>2.2 Clarify the nominated assessment tools and methods for collecting evidence with the qualified assessor, to ensure that the procedures to be followed, and the instruments to be used are clear</p> <p>2.3 Discuss and confirm with the relevant people the assessment context, including the candidate's characteristics and any need for reasonable adjustments</p> <p>2.4 Confirm and arrange resource requirements in consultation with relevant people</p>
3. Collect evidence in accordance with the assessment plan	<p>3.1 Explain the assessment process to the candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to the qualified assessor, prior to undertaking assessment activities</p> <p>3.2 Use assessment instruments to gather quality evidence within the available time and resources, according to organisational, legal and ethical requirements</p>
4. Record and report findings	<p>4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to the assessment system's policies and procedures</p> <p>4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment, and whether the evidence collected meets the rules of evidence</p> <p>4.3 Document areas for improvement in collecting evidence for future assessment activities</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.2	<ul style="list-style-type: none"> Seeks feedback to build knowledge to improve process and professional practice
Reading	1.3, 2.1, 2.2, 2.4, 3.2	<ul style="list-style-type: none"> Sources and interprets procedural, and compliance information
Writing	1.1, 1.2, 1.3, 2.1, 2.3, 2.4, 3.2, 4.1, 4.3	<ul style="list-style-type: none"> Completes workplace documentation accurately using the appropriate language
Oral Communication	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> Communicates information and process requirements clearly, based on techniques appropriate to the audience and environment Uses appropriate speaking and listening techniques to obtain specific information, and to support the assessment process
Navigate the world of work	2.1, 2.2, 3.2, 4.1	<ul style="list-style-type: none"> Accesses, confirms and takes responsibility for adherence to policies, procedures, and legal and ethical requirements
Interact with others	4.2	<ul style="list-style-type: none"> Asks questions to clarify understanding, and seeks feedback and further information
Get the work done	3.1, 4.1	<ul style="list-style-type: none"> Organises work according to defined requirements, taking some responsibility for decisions regarding the format of information

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- clarifying the role to be taken during the assessment
- clarifying the assessment plan with the qualified assessor, including agreement about:
 - what evidence will be collected
 - how the evidence will be collected
- carrying out a minimum of three evidence-gathering activities and, on each occasion:
 - document evidence in a clear and concise manner
 - document feedback from others involved in the assessment

reporting findings to the qualified assessor, including an explanation of how the assessment meets the rules of evidence on each of the three occasions.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment
- the principles of assessment
- the rules of evidence
- the different purposes of assessment
- the diversity of assessment contexts
- different types of evidence
- evidence-gathering methods
- the purpose and features of assessment tools, and assessment plans

- potential barriers and processes relating to evidence-gathering procedures, and assessment processes
- the organisational policies and procedures relevant to this unit of competency.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to qualified assessors for consultation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes Asks questions in order to clarify understanding, and to provide and seek feedback Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
 - different learning objectives
 - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a mentoring plan	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Document mentoring plan in accordance with organisational requirements 1.3 Establish ground rules and negotiate realistic expectations 1.4 Establish and maintain confidentiality of the relationship in

ELEMENT	PERFORMANCE CRITERIA
	accordance with legislation, policy and procedures
2. Facilitate mentoring relationship	<p>2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship</p> <p>2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives</p> <p>2.3 Support the person being mentored to develop and use skills in problem solving and decision making</p> <p>2.4 Use personal and professional networks to assist the person being mentored</p> <p>2.5 Provide information, and guidance to enhance engagement in the workplace</p> <p>2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures</p>
3. Monitor mentoring relationship	<p>3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements</p> <p>3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process</p> <p>3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders</p> <p>3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met</p>
4. Evaluate effectiveness of mentoring	<p>4.1 Establish and discuss benefits gained from the mentoring process</p> <p>4.2 Reflect on and articulate the personal benefits gained from providing mentoring</p> <p>4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> Sources and interprets texts relevant to mentoring context, including organisational policies and learner information
Writing	1.1, 1.3, 2.5, 3.1, 3.2, 4.3	<ul style="list-style-type: none"> Develops content and documents information relevant to mentoring plan
Oral Communication	2.4, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback
Navigate the world of work	1.1, 1.4, 2.6, 4.3	<ul style="list-style-type: none"> Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring
Interact with others	1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Builds rapport using collaboration with others to achieve joint outcomes and effective interaction Provides mentoring and role modelling to achieve agreed outcomes Cooperates and consults with others to clarify understanding and seek feedback
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems, considering options for different approaches

Assessment Requirements for TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA0015 Organise receipt and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise receipt and despatch operations in accordance with regulations, codes of practice and workplace requirements in the transport and logistics industry.

It includes planning and organising receipt operations, storing received stock, despatching ordered stock and completing documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and organise receipt and despatch operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Product characteristics and workplace procedures are applied to stock analysis

1.2 Resources are identified to match product characteristics

- 1.3 Timeframes are scheduled to enable receipt or despatch of stock according to workplace procedures
 - 1.4 Work processes are planned to meet specified timeframes
- 2 **Organise the storage and despatch of stock**
 - 2.1 Employees, equipment and storage areas are allocated and supervised
 - 2.2 Individuals are informed of work requirements and deadlines
 - 2.3 Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
 - 2.4 Discrepancies in stocks are noted and reported in accordance with workplace procedures
- 3 **Complete documentation**
 - 3.1 Documentation and records regarding receipt and despatch operations are confirmed
 - 3.2 Documentation and records are completed and proofread
 - 3.3 Documentation and records are processed in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIA3018 Organise despatch operations and TLIA3019 Organise receipt operations.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIA0015 Organise receipt and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying contingency plans in accordance with workplace procedures
- applying relevant legislation and workplace procedures
- communicating and working with others
- estimating size, shape and special requirements of goods and loads
- identifying relevant stock and goods coding and labelling
- monitoring work activities in terms of specified deadlines
- operating and selecting equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, labels, information and signs
- selecting and using relevant equipment and communications technology
- selecting and using required personal protective equipment (PPE) and conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- discrepancies and appropriate actions to resolve
- documentation and record requirements for receipt and despatch operations
- equipment used for organising receipt and despatch operations including safety precautions and procedures
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for organising receipt and despatch operations
- regulations relevant for organising receipt and despatch operations, or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for organising receipt and despatch operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0020 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to package goods.

It includes selecting materials, packing, and labelling packaged goods to the required labelling standards and regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select materials and pack goods

1.1 Packaging specifications and order packaging documentation are obtained and interpreted

1.2 Packaging equipment suitable for the goods to be packed is selected and checked for safe operational use

		1.3	Packaging materials are identified and matched to specifications
		1.4	Work plan is followed, materials are used economically, and appropriate packaging is used and secured to minimise loss and damage in transit or storage
		1.5	Work is conducted in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements
		1.6	Completed packed goods are stacked to minimise damage in accordance with workplace procedures
		1.7	Hazards and control measures are identified and implemented prior to commencing work
2	Label packaged goods	2.1	Workplace labelling standards are identified and followed
		2.2	Appropriate goods handling, labelling and other identification symbols are used
		2.3	Relevant documentation is attached in accordance with workplace procedures
		2.4	Workplace documentation is completed according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2011 Package goods.

Assessment Requirements for TLIA0020 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, and performance criteria on at least one occasion and include:

- applying safety precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- attaching and completing relevant documentation to goods
- checking and monitoring equipment performance
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when conducting work
- completing documentation related to work activities when packaging goods
- following work activities in terms of planned schedule
- reading and interpreting instructions, procedures and labels
- selecting and using relevant materials
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- differences in equipment
- documentation requirements for packaging goods such as a workplan
- housekeeping standards and procedures
- operational work systems and equipment for packaging goods problems associated with packaging goods and appropriate action to resolve these problems
- potential problems and possible solutions relating to packaging goods
- relevant legislation, regulations, codes of practice, industry guidelines and workplace policies and procedures for packaging goods
- relevant WHS/OHS and environmental protection procedures and guidelines

- site layout and obstacles
- size, shape and special requirements estimations of goods.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA2011 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes selecting materials, packing, and labelling packaged products/loads to the required labelling standards.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Select materials and pack products

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Packaging specifications and order packaging documentation are correctly interpreted

- 1.2 Packaging technology suitable for the goods to be packed is selected
- 1.3 Packaging materials are identified and matched to specifications
- 1.4 Work plan is followed, materials are used economically and appropriate packaging is used to minimise loss and damage in transit or storage
- 1.5 Work is planned in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements
- 1.6 Completed packed goods are stacked to minimise damage from within and outside

2 Label packaged products/loads

- 2.1 Workplace labelling standards are identified
- 2.2 Appropriate goods handling, labelling and other identification symbols are used
- 2.3 Invoices and picking slips are attached as required
- 2.4 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2011A Package goods.

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when packaging goods
- completing documentation related to work activities when packaging goods
- estimating the size, shape and special requirements of goods and loads
- implementing contingency plans when packaging goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance when packaging goods
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting instructions, procedures and labels relevant to packaging goods
- selecting and using relevant communications, computing equipment and materials when packaging goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to packaging goods
- documentation requirements for packaging goods, such as a workplan
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for packaging goods
- problems that may occur when packaging goods and appropriate action that can be taken to resolve these problems
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for packaging goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements and relevant regulations, as part of work activities within the transport and logistics industries.

It includes identifying products in a subsection of a warehouse or other storage area, examining quality, reporting on products, as well as using inventory and labelling systems to identify and locate products.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify products in a

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products are identified against specified criteria in

subsection of a warehouse or other storage area	<p>accordance with workplace procedures</p> <p>1.2 Storage and handling characteristics are identified and applied consistently</p> <p>1.3 Products are described to internal customers identifying features that may affect location, safety or storage requirements</p>
2 Examine quality and report on products	<p>2.1 Products are inspected in accordance with workplace quality assurance procedures</p> <p>2.2 Workplace procedures are followed to replace, return or dispose of stock/products that are not useable</p> <p>2.3 Non-conforming products are recorded/reported in accordance with workplace procedures</p>
3 Use inventory and labelling systems to identify and locate products	<p>3.1 Inventory and labelling systems are used to locate products within the workplace</p> <p>3.2 Goods are physically located and identified</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2014A Use product knowledge to complete work operations.

Assessment Requirements for TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in products and services in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when handling, transporting and storing products and providing information on products and services
- completing documentation related to work activities
- estimating the size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- reading and comprehending simple statements in English
- reading, interpreting and following instructions, procedures, information and signs relevant to handling, transporting, storing products and providing information on products and services
- selecting and using relevant communications, computing and load handling equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations relevant to products being identified, handled, transported, stacked and/or stored as part of work operations
- categories or groups of products and requirements for special handling, stacking and storage
- documentation requirements including reports and records concerning damaged or contaminated goods
- focus of operation of work systems, equipment, management and site operating systems for packaging goods
- housekeeping standards and procedures
- purpose and use of cataloguing and labelling systems
- site layout and obstacles
- strategies to seek out sources of product knowledge and to use this information to inform work
- types of equipment and storage areas appropriate for different categories of goods including perishable, fragile, dangerous, composition/state goods
- workplace procedures and policies for identifying, handling, stacking and storing particular categories of products.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIA3016 Use inventory systems to organise stock control

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use inventory systems to organise stock control in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes identifying inventory and stock control systems in use in the workplace, using re-order procedures to maintain stock levels, organising cyclical stock counts and reporting discrepancies or variances.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify inventory

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Workplace inventory and stock control equipment, software

and stock control systems in use in the workplace		and systems are identified
	1.2	Reasons for common database approach to inventory records and documentation in the warehouse are explained
	1.3	Procedures for identifying and reporting discrepancies or variances are identified
2 Use re-order procedures to maintain stock levels	2.1	Stock level maintenance checking is conducted
	2.2	Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures
	2.3	Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures
3 Organise cyclical stock counts and report discrepancies or variances	3.1	Process for cyclical stock count is planned and work is allocated to team members
	3.2	Clear directions on tasks to be performed are given
	3.3	Stocktake activities are conducted in accordance with workplace procedures
	3.4	Types and causes of record discrepancies are identified
	3.5	Procedures for noting and correcting minor discrepancies are used
	3.6	Major discrepancies are reported in accordance with workplace procedures
	3.7	Workplace documentation is completed
4 Produce reports on record keeping and inventory functions	4.1	Types of reports to be produced from inventory records systems are identified
	4.2	Reports are produced in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3016A Use inventory systems to organise stock control.

TLIA3018 Organise despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise despatch operations in accordance with codes/regulations and workplace requirements in the transport and logistics industry.

It includes planning and organising despatch operations, organising the storage and despatch of stock, and completing all required documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and organise despatch operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Knowledge of product characteristics and workplace procedures are applied to stock analysis

- 1.2 Resources including manual handling equipment, employee competencies, storage areas and goods management equipment are identified to match product characteristics
 - 1.3 Deadlines are scheduled to meet order requirements
 - 1.4 Work processes are planned to meet deadlines
- 2 Organise the storage and despatch of stock**
- 2.1 Employees, equipment and storage areas are allocated and supervised
 - 2.2 Individuals are informed of work requirements and deadlines
 - 2.3 Work processes are monitored to ensure that human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
 - 2.4 Stock discrepancies are noted and reported in accordance with company procedures
- 3 Complete documentation**
- 3.1 Required despatch documentation and records are confirmed
 - 3.2 Required despatch documentation and records are completed clearly and proofread
 - 3.3 Required despatch documentation and records are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLIA3038 Control and order stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to control and order stock for a workplace store in accordance with relevant codes of practice, regulations and workplace procedures.

It specifically covers maintaining stock levels and records, organising and administering stocktakes, identifying stock losses, processing stock orders and following up orders.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Maintain stock levels

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Stock levels are monitored and maintained at levels

- and records** prescribed by workplace specifications
- 1.2 Stock security systems are monitored and adjusted as required
 - 1.3 Stock re-order cycles are maintained, monitored and adjusted as required
 - 1.4 Colleagues are informed about their individual responsibilities for recording stock
 - 1.5 Stock storage and movement records are maintained in accordance with workplace procedures
 - 1.6 Stock performance is monitored and fast/slow moving items are identified and reported in accordance with workplace procedures
- 2 Organise and administer stocktakes**
- 2.1 Stocktakes are organised at the appropriate time and responsibilities are allocated to staff
 - 2.2 Accurate reports on stocktake data are produced within designated timelines
- 3 Identify stock losses**
- 3.1 Losses are accurately identified, recorded and assessed against potential loss as forecast, on a regular basis
 - 3.2 Identified losses are reported in accordance with workplace procedures
 - 3.3 Avoidable losses are identified, reasons are established, and appropriate solutions are recommended and implemented to prevent future avoidable losses
- 4 Process stock orders**
- 4.1 Orders for stock are accurately processed in accordance with workplace procedures
 - 4.2 Stock ordering and recording systems are accurately maintained
 - 4.3 Purchase and supply agreements are correctly used and appropriate details are recorded
 - 4.4 Negotiated purchase and supply agreements are recorded accurately and filed for retrieval
- 5 Follow up orders**
- 5.1 Delivery process is monitored to meet agreed deadlines
 - 5.2 Appropriate liaison is undertaken with colleagues and suppliers to ensure continuity of supply

5.3 Routine supply problems are followed up or referred to the appropriate person in accordance with workplace policy

5.4 Stock is distributed in accordance with agreed allocations

6 Complete documentation

6.1 Required records and documentation are confirmed

6.2 Required records and documentation are completed clearly and proofread

6.3 Required records and documentation are processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3038A Control and order stock.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIA3038 Control and order stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in stock and systems in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- monitoring stock levels
- reading and interpreting relevant instructions, procedures and labels
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications and computing equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- contacts and sources of information and documentation needed when controlling and ordering stock
- customer service policies and procedures
- how to interpret workplace specifications and orders for supplies
- principles of stock control
- problems that may occur and appropriate action that can be taken to resolve these problems
- procedures for ordering stock
- protocols and procedures for liaising with supplier representatives, drivers and colleagues using appropriate technology
- relevant codes of practice and legislative requirements (for example dangerous goods regulations, health and hygiene regulations)

- site layout
- stock control documentation and systems used in workplace stores
- stock security systems
- systems for completing relevant records and documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIC0023 Operate four wheel drive vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a four wheel drive vehicle.

It includes driving a four wheel drive vehicle on roads, traversing gradients, ascending and descending steep gradients, and operating in rugged terrain.

It also includes using vehicle equipment/controls and completing pre-start and post-operational checks safely in accordance with the relevant state/territory legislated roads and traffic licence requirements.

Full or provisional driver licence must be held prior to commencing this unit of competency.

Driving involves the application of four wheel drive vehicle operating principles and procedures to maintain the safety and operation of a four wheel drive vehicle across a variety of on-road and off-road contexts.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the

Performance criteria describe the performance needed to demonstrate

essential outcomes.

achievement of the element.

1 Operate four wheel drive vehicles

- 1.1** Pre-start checks of vehicle and equipment are carried out in accordance with manufacturer specifications and roadworthy requirements
- 1.2** Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.3** Tyres are checked for pressure suitable for terrain and/or changed in accordance with manufacturer and workplace procedures
- 1.4** Vehicle fuel, water and any ancillary equipment are checked before starting vehicle journey in accordance with manufacturer and workplace procedures
- 1.5** Loads are secured in accordance with workplace and safety requirements
- 1.6** Vehicle is driven on-road and off-road in accordance with legislative and workplace requirements at appropriate operating speeds for road or track conditions and hazards
- 1.7** Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation in surrounding terrain
- 1.8** Road conditions are constantly monitored, negotiated and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 1.9** Vehicle is parked and shut down in accordance with workplace and manufacturer requirements

2 Operate vehicle on or across a gradient

- 2.1** Intended vehicle path is inspected prior to negotiating gradient
- 2.2** Loads are secured in accordance with workplace and safety requirements
- 2.3** Appropriate gear and/or range are selected, and engine revolutions are maintained to ensure constant traction
- 2.4** Vehicle is driven on-road and off-road in accordance with legislative and workplace requirements at appropriate speeds for conditions and gradient hazards
- 2.5** Vehicle equipment/controls are set and operated in

- accordance with manufacturer instructions for operation on or across a gradient
- 2.6** Gradient conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 3 Operate vehicle ascending a steep gradient**
- 3.1** Intended vehicle path is inspected prior to negotiating ascent
- 3.2** Appropriate gear and/or range are selected to ascend grade, and engine revolutions are maintained to ensure constant traction
- 3.3** Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation while ascending a steep gradient
- 3.4** Stall recovery techniques are applied in accordance with manufacturer and workplace procedures
- 3.5** Ascent conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 4 Operate vehicle descending a steep gradient**
- 4.1** Intended vehicle path is inspected prior to negotiating gradient
- 4.2** Appropriate gear and/or range are selected to descend grade, and engine revolutions are maintained to ensure constant traction
- 4.3** Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation while descending a steep gradient
- 4.4** Stall recovery techniques are applied in accordance with manufacturer and workplace procedures
- 4.5** Descent conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 5 Operate vehicle in rugged terrain**
- 5.1** Intended vehicle path is inspected prior to negotiating rugged terrain
- 5.2** Appropriate gear and range are selected to negotiate rugged terrain and engine revolutions are maintained to ensure

- constant traction
- 5.3 Vehicle equipment and controls are set and operated in accordance with manufacturer instructions for operation in surrounding terrain
 - 5.4 Vehicle chains are fitted in accordance with manufacturer instructions and environmental conditions, as required
 - 5.5 Vehicle load is inspected, positioned and secured to maximise traction for four wheel driving
 - 5.6 Rugged conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 6 Complete post-operations check**
- 6.1 Vehicle is parked and shut down in accordance with workplace procedures and manufacturer requirements
 - 6.2 Faults or malfunctions are recorded and/or reported in accordance with workplace procedures
 - 6.3 Vehicle and equipment are cleaned and stored after use in accordance with manufacturer and workplace procedures
 - 6.4 Documentation and journey reports are completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC2025 Operate four wheel drive vehicle.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIC0023 Operate four wheel drive vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- cleaning and storing vehicles and equipment
- communicating effectively with others
- completing relevant documentation
- conducting pre-start checks
- demonstrating low-risk driving behaviours
- identifying and reporting operational faults
- identifying job hazards and taking required action
- implementing contingency plans
- interpreting and following operational instructions
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, procedures, information and signs
- recording and reporting any identified problems, faults or malfunctions promptly in accordance with workplace procedures
- using and adjusting vehicle equipment/controls, as required:
 - brakes
 - electronic traction control
 - freewheeling hubs
 - gears/range
 - heating and cooling systems
 - jacks
 - tyres
- working with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- documentation and record keeping requirements
- effect of hard surface driving (such as transmission wind up) on a four wheel drive system
- effect of loads while negotiating a gradient
- efficient driving techniques and safe driving strategies
- environmental impact of four wheel driving
- hazards and risks associated with traversing cross gradients
- hazards that may exist when operating a four wheel drive vehicle in on-road and off-road situations, and action to minimise, control or eliminate identified hazards
- low risk driving behaviours:
 - creating and maintaining crash avoidance space
 - protecting crash avoidance space
 - road rules and directions
 - space and time management
- pre- and post-operational checks and related action
- problems that may occur when operating a four wheel drive vehicle, and action that can be taken to report or resolve the problems
- relevant land management procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- vehicle equipment/controls, instruments and indicators, and their use
- vehicle handling procedures and techniques for a range of road and track conditions
- workplace procedures for operating a four wheel drive vehicle in both on-road and off-road situations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions in a four wheel drive vehicle typical of that which is driven in the workplace.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises and case studies
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor unit Application change to clarify terms
- PC 1.2 Minor terminology change
- Minor word changes in Performance Evidence
- Minor word changes in Knowledge Evidence.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific codes of practice, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Special load is the collective term for those items of cargo which, due to their nature or value, will require special treatment and/or equipment during the transport activities.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Load and unload vehicle

2 Secure and protect vehicle and load

3 Complete documentation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
- 1.2 Hazardous and specialised cargo are identified and handled in accordance with required workplace procedures, work health and safety (WHS)/occupational health and safety (OHS) requirements
- 1.3 Vehicle is loaded in consultation with relevant personnel and required documentation in accordance with vehicle loading regulations and workplace safety requirements
- 1.4 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
- 1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
- 1.6 Ancillary equipment is operated in accordance with workplace procedures and manufacturer instructions during loading and unloading operations
- 2.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions
- 2.2 Load is protected in accordance with legal and workplace safety requirements
- 2.3 Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity
- 2.4 Loaded vehicle is inspected and checked for security to travel
- 3.1 Documentation is completed and proofread in accordance with workplace procedures

- 3.2** All required cargo transportation documentation is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3014 Load and unload vehicles carrying special loads.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor unit Application change to clarify terms
- PC 1.2 Minor terminology change
- Minor word changes in Performance Evidence
- Minor word changes in Knowledge Evidence.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating and working collaboratively effectively with others when loading and unloading special loads
- completing relevant documentation
- complying with dangerous goods systems and relevant regulatory requirements, as required
- estimating size, shape and special requirements of loads
- identifying and correctly using load handling equipment when loading and unloading hazardous cargo and/or specialised cargo
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of relevant documentation
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- using manual handling techniques safely.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of special loads such as:
 - controlled waste
 - powders
 - raw grain product
- housekeeping standards and workplace procedures
- methods for securing special loads
- National Transport Commission (NTC) Load Restraint Guide
- relevant dangerous goods systems and dangerous goods regulation requirements, including emergency information panels, their meaning and implications for loading and unloading processes
- risks and hazards when loading and unloading special loads, and related precautions to control the risk
- site layout considerations and obstacles to unloading operations
- WHS/OHS procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, handling equipment and PPE currently used in industry
- applicable documentation, including workplace procedures, regulations, NTC Load Restraint Guide, codes of practice and operation manuals.

TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and care for livestock in transit, in accordance with relevant regulations and industry codes of practice for caring for livestock in transit.

It includes preparing to transport livestock, caring for and controlling livestock in transit, using appropriate animal husbandry techniques, and completing relevant documentation as required.

Work is performed under limited or minimum supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to transport livestock

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Health condition and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace procedures

- 1.2 Vehicle is checked that it is positioned correctly on loading dock, hazards are identified and required action is taken to minimise, control or eliminate identified hazards in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and workplace procedures
 - 1.3 Livestock crate drainage system is inspected to ensure drainage of livestock effluent from the vehicle is in accordance with regulatory requirements and workplace procedures
 - 1.4 Livestock crate is checked for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit in accordance with regulatory requirements and workplace procedures
 - 1.5 Poor quality livestock is identified and reported to specified person/s in accordance with workplace procedures
 - 1.6 Feed provisions and other requirements including veterinary products for livestock, prior to and during transit, are identified and organised
 - 1.7 Portable stockyards are assembled as required in accordance with regulatory requirements and workplace procedures
 - 1.8 National vendor declaration is obtained and checked for accuracy in accordance with regulatory requirements
 - 1.9 Loaded livestock is visually assessed to ensure correct density of livestock within the pen and adjustments are made as required in accordance with regulatory requirements and workplace procedures
- 2 Care for and control livestock in transit**
- 2.1 Wellbeing of livestock is regularly monitored during loading, transit and unloading, and appropriate action is taken in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
 - 2.2 Relevant handling equipment is used to aid handling of livestock during loading and unloading operations, in accordance with regulations and workplace procedures
 - 2.3 Action is taken for care and wellbeing of livestock in an

- accident during transit
- 2.4** Distressed livestock is identified and handled in an appropriate manner in accordance with regulatory requirements and workplace procedures
- 3 Use animal husbandry techniques**
- 3.1** Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
- 3.2** Prescribed medication is administered to livestock in accordance with veterinary directions and workplace procedures
- 4 Completion of documentation**
- 4.1** National vendor declaration transport section is completed correctly and clearly by transport operator
- 4.2** National vendor declaration is given to the appropriate person upon reaching destination on the declaration

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3020 Care for livestock in transit.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- inspecting vehicle to ensure livestock crate drainage system is in place and is effective in control of livestock effluent
- checking livestock crate for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit
- loading livestock to ensure correct density of livestock within the pen
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) requirements and guidelines and workplace procedures
- communicating effectively and working collaboratively with others in the care of livestock in transit
- completing relevant documentation including relevant sections of National Vendor declaration
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit

- insurance rights and requirements of clients
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- WHS/OHS/OSH requirements and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID0020 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift materials safely using manual handling methods.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess risks associated with relocating load

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

1.2 Storage locations are determined and potential routes to be

followed are identified

- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
- 1.6 Worksite hazards are identified, and corrective action is taken prior to commencing shifting products, goods or materials
- 1.7 Risks in potential routes are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of products, goods or materials
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered when moving loads
- 1.11 Appropriate personal protective equipment (PPE) is identified and used
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned consistent with the code of practice for manual handling and in accordance with the risk assessment
- 2.2 Process for relocating load is proposed, including predicting and planning for potential difficulties
- 2.3 Proposed process is checked for compliance with codes of practice and workplace procedures

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
- 3.2 Team lifting tasks are coordinated
- 3.3 Planned process and route are followed
- 3.4 Relocated products, goods or materials are set down without

damage to goods, personnel or equipment and are checked for stability

- 3.5 Relocation is checked to ensure it meets work requirements and variances are reported to relevant personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001 Shift materials safely using manual handling methods.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0020 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying and following relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling products, goods or materials
- communicating effectively with others when manually lifting and handling products, goods or materials
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and products, goods or materials in accordance with workplace procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of products, goods or materials
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling products, goods or materials
- working systematically with required attention to detail without injury to self or others, or damage to products, goods, materials, or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- relevant WHS/OHS workplace procedures, codes of practice and industry guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling products, goods or materials and related precautions to control the risk, including:
 - controlled actions on a movement during lifting
 - distance over which load is to be shifted
 - frequency of shifting operations
 - load on the spine during lifting
 - postures and positions during lifting
 - rotation and side movement of the spine during lifting
 - time allowed for shifting the load
 - type, weight and position of the load, including loose, liquid, dangerous or hazardous products, goods or materials
- site layout and obstacles
- work layout.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess risks associated with

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

relocating load

- 1.2 Storage locations are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
- 1.6 Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
- 1.7 Risks in potential routes are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered when moving loads
- 1.11 Appropriate personal protective equipment is determined
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties
- 2.3 Proposed process is checked for compliance with code of practice and workplace procedures

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
- 3.2 Applications appropriate for team relocation of load are identified
- 3.3 Team lifting tasks are coordinated
- 3.4 Planned process and route are followed

- 3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability
- 3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
 - controlled actions on a movement during lifting
 - distance over which load is to be shifted
 - frequency of shifting operations
 - load on the spine during lifting
 - postures and positions during lifting
 - rotation and side movement of the spine during lifting
 - time allowed for shifting the load
 - type, weight and position of the load
 - work layout
 - site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

and operation manuals.

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Load and unload goods/cargo**
 - 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
 - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
 - 1.4 Load is packed/unpacked to make safe and effective use of available spaces
 - 1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
 - 1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
 - 1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
 - 1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
 - 1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
- 2 Secure and protect load**
 - 2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
 - 2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
 - 2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
 - 2.4 Load is protected in accordance with legal and workplace safety requirements
- 3 Complete**
 - 3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

documentation

and current ADG Code, as required

- 3.2 All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2004A Load and unload goods/cargo.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national Load Restraint Guide (LRG), codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

industry.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check forklift condition

- 1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
- 1.2 Attachments are checked to ensure appropriate adjustment and operation
- 1.3 Mirrors and seats are adjusted for safe operation by driver
- 1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements

2 Drive forklift

- 2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
- 2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
- 2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
- 2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures

3 Operate forklift to handle loads

- 3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
- 3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures

4 Monitor site conditions

- 4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
- 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

5 Monitor and maintain forklift performance

- 5.1 Performance and efficiency of vehicle operation is monitored during use
- 5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
- 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLID2022 Conduct weighbridge operations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct weighbridge operations.

It includes setting up for weighbridge operations, weighing loaded and unloaded vehicles, finalising weighbridge operations, and completing required records and documentation in accordance with workplace procedures and regulatory requirements.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Set up for weighbridge operations

- 1.1 Weighbridge systems, including equipment, computer and recording arrangements, are checked for operational status
- 1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturer instructions and relevant legislation
- 1.3 Accurate reporting of results of inspection and testing is kept in accordance with statutory requirements, workplace procedures and industry guidelines
- 1.4 Hazards are identified, risks are assessed, and control measures are implemented
- 1.5 Faults and discrepancies in weighbridge operation are identified and appropriate action is undertaken in accordance with workplace procedures

2 Weigh loaded vehicles

- 2.1 Vehicles are directed onto platform to obtain accurate weight
- 2.2 Weight of loaded stationary vehicle is registered against vehicle and load identification
- 2.3 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement
- 2.4 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

3 Weigh unloaded vehicles

- 3.1 Vehicles are directed onto platform to obtain accurate weight
- 3.2 Weight of unloaded stationary vehicle is registered against vehicle
- 3.3 Proposed load weight is assessed for conformance to statutory requirements
- 3.4 Loading operations are commenced in accordance with legal loading weight, customer requirements and workplace procedures, and vehicle is re-weighed to establish final load weight, as required
- 3.5 Vehicle and load information are entered into workplace recording system and invoice is issued to driver, as required
- 3.6 Weighbridge documents, invoices or receipts are obtained in

accordance with statutory and workplace requirements

3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

4 Complete weighbridge operations

4.1 Weighbridge systems, including equipment, computer and recording arrangements, are secured or made ready for next shift

4.2 Record of operations is maintained and filed in accordance with workplace procedures and statutory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2022A Conduct weighbridge operations.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2022 Conduct weighbridge operations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- identifying, selecting and efficiently and effectively using weighbridge equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of weighbridge equipment
- operating and adapting to differences in equipment in accordance with workplace procedures
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems, errors or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- setting up and maintaining weighbridge equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- calculation method and approaches for metric and imperial systems
- classification procedures
- correct weighing procedures, including statutory and workplace requirements
- emergency response procedures
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- problems that may occur when conducting weighbridge operations and appropriate actions that can be taken to resolve these problems
- records and documentation requirements for weighbridge operations
- relevant regulations for conducting weighbridge operations, including relevant dangerous goods systems and dangerous goods regulation requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout
- weights and measures regulations
- workplace procedures for conducting weighbridge operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, National Transport Commission (NTC) Load Restraint Guide, relevant dangerous goods systems and dangerous goods regulation requirements, codes of practice, workplace procedures and operation manuals.

TLIE0002 Process workplace documentation

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to process workplace documentation and gather data in accordance with workplace requirements. Processing documentation/data is carried out as an integral part of work operations in the context of the workplace concerned.

It includes planning and completing documentation and data gathering to fulfil an identified purpose, including legislative obligations.

Work may be performed in a team or autonomous working situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan documentation/data 1.1 Purpose of workplace documentation/data gathering is

gathering	identified and confirmed in accordance with legislative obligations and workplace procedures
2 Complete documentation/data gathering	<p>1.2 Information needed for completing workplace documentation/data is identified as required in accordance with legislative obligations and workplace procedures</p> <p>2.1 Data is gathered, required documentation is prepared and forms are completed, in accordance with workplace policies and procedures</p> <p>2.2 Information/data is gathered and entered into computerised system, as required, in accordance with regulatory requirements and workplace procedures</p> <p>2.3 Workplace documents and electronic applications and systems are maintained accurately and in a timely manner in accordance with regulatory requirements and workplace procedures</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE2008 Process workplace documentation.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE0002 Process workplace documentation

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) legislation and workplace procedures
- completing workplace documentation and forms
- ensuring processed information and data is checked for relevance, accuracy and completion
- operating and adapting to differences in electronic applications and systems in accordance with operating procedures
- reading, interpreting and organising information and data needed for completing and processing workplace documentation and forms
- working collaboratively with others when completing and processing workplace documentation, data and forms
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- writing and entering information and data into electronic applications and systems in a timely manner.

Knowledge Evidence

- procedures for processing workplace documentation and data using relevant workplace technology
- relevant procedures and duty of care requirements
- relevant WHS/OHS legislation, regulatory requirements and workplace responsibilities
- requirements and sources for workplace documentation, including:
 - data
 - diaries
 - forms
 - logs

- typical problems in processing workplace documentation and data and appropriate action and solutions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, electronic applications and systems, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIE0008 Calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to calculate mass, area and quantify dimensions.

It includes calculating loads to be transported or placed in storage, calculating load limits of transport and/or storage systems, and organising the loading in accordance with relevant legislation and workplace requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation.

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Calculate loads for transport or storage

1.1 Order forms and work orders are read, and requirements are noted

1.2 Shape, balance characteristics, dimensions and mass of load/s are identified

1.3 Weights and volumes are totalled to calculate load

requirements of transport or storage system

- 2 Calculate load limits of transport and/or storage**
- 2.1** Allowable load limits for storage and/or transport systems are identified in accordance with legislative requirements and workplace procedures
 - 2.2** Capacity of transport and storage systems in terms of mass, area and volume is calculated
- 3 Organise loads**
- 3.1** Loads are restricted to allowable range
 - 3.2** Loads are spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
 - 3.3** Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002 Estimate/calculate mass, area and quantify dimensions.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE0008 Calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- calculating volume and safely moving liquids
- identifying, selecting and using relevant calculation equipment
- interpreting and following operational instructions and prioritising work
- performing mathematical operations required when calculating mass, area and volumes of loads and transport/storage facilities
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- limitations of loads for storage and/or transport systems
- national and international codes and regulations relevant to workplace activities
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate actions that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- requirements for safely moving liquids
- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIE3004 Prepare workplace documents

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan workplace

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose and audience for document are identified

document

- | | | |
|-------------------------------------|------------|--|
| | 1.2 | Appropriate format for document is established to meet workplace requirements |
| | 1.3 | Relevant information is identified and selected for inclusion in document |
| 2 Prepare workplace document | 2.1 | Document is drafted in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary appropriate for reader/s |
| | 2.2 | Document is edited and presented in a final version appropriate to task |
| 3 Complete workplace forms | 3.1 | Work related form/s is interpreted to identify information required for its completion |
| | 3.2 | Required information for completion of form is gathered from relevant sources in accordance with workplace procedures |
| | 3.3 | Form/s is completed in accordance with workplace policy and procedures, and applicable regulations and codes |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3004A Prepare workplace documents.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE3004 Prepare workplace documents

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing documentation related to work activities
- reading and interpreting relevant instructions, procedures, information and labels
- reading, writing and comprehending simple statements in English
- working collaboratively with others
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- conventions for sentence construction, grammar, spelling, style and punctuation
- equipment and materials required for completing documents and forms, and instructions and precautions for their use
- format and layout of various documents and forms used in workplace activities
- relevant Australian and international codes of practice and regulations relevant to documents and/or forms being prepared
- relevant work health safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- workplace procedures and policies for completing documents/forms.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIF2010 Apply fatigue management strategies

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS PERFORMANCE CRITERIA

Elements describe the Performance criteria describe the performance needed to demonstrate

essential outcomes. achievement of the element.

- | | |
|---|---|
| 1 Identify and act on signs of fatigue | 1.1 Potential causes of fatigue are identified and actions taken to minimise their effects in accordance with workplace procedures |
| | 1.2 Personal warning signs of fatigue are recognised, and necessary steps are taken in accordance with workplace procedures, to ensure that effective work capability and alertness are maintained |
| 2 Implement strategies to minimise fatigue | 2.1 Workplace procedures are assessed to minimise fatigue |
| | 2.2 Factors that increase the risk of fatigue-related accidents and incidents are minimised |
| | 2.3 Fatigue management strategies are implemented in accordance with workplace policy and procedures |
| | 2.4 Lifestyle choices are made that promote the effective long-term management of fatigue |
| | 2.5 Effective practices in combating fatigue are adopted and applied |
| | 2.6 Personal fatigue management strategies are communicated to relevant people |
| | 2.7 Appropriate counter measures are planned to combat fatigue |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2010A Apply fatigue management strategies.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIF2010 Apply fatigue management strategies

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures (SOPs) as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required actions to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate actions in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance

- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective (PPE) equipment currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIG2007 Work in a socially diverse environment

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply cultural awareness, communication principles and problem-solving techniques to facilitate working in a socially diverse environment. This is done in accordance with workplace procedures, relevant anti-discrimination and equal employment opportunity (EEO) regulations.

It includes communicating with customers and colleagues from diverse backgrounds and dealing with cross-cultural misunderstandings.

Work is performed with limited or minimum supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

G – Teamwork

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Communicate with customers and colleagues from diverse backgrounds

- 1.1 Customers and colleagues from all cultural groups are valued and treated with respect and sensitivity
- 1.2 Cultural differences are accommodated in verbal and non-verbal communication
- 1.3 Where language barriers exist, efforts are made to communicate through use of gestures or simple words in the other person's language
- 1.4 Assistance from colleagues, reference material or outside organisations is obtained as required

2 Deal with cross-cultural misunderstandings

- 2.1 Issues that may cause conflict or misunderstanding in the workplace are identified
- 2.2 Difficulties are addressed with the appropriate people and assistance is sought from team leader/supervisor as required
- 2.3 When difficulties or misunderstandings occur, possible cultural differences are considered
- 2.4 Efforts are made to resolve misunderstandings, taking account of cultural considerations
- 2.5 Issues and problems are referred to the appropriate team leader/supervisor for follow-up

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIG2007A Work in a socially diverse environment.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIG2007 Work in a socially diverse environment

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- communicating and working effectively with others when working in a socially diverse environment
- completing documentation related to working in a socially diverse environment
- reading, interpreting and applying instructions, legislation, procedures, information and signs relevant to working in a socially diverse environment
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- awareness of the culture of Australia's Indigenous and non-Indigenous peoples
- cultural awareness
- principles of equal employment opportunity (EEO) and anti-discrimination legislation as they apply to individual employees
- principles that underpin cultural awareness
- recognition of the different cultural groups in Australian society
- recognition of various international customer groups (appropriate to the sector and individual workplace)
- typical cross-cultural misunderstandings and problems, and appropriate ways of dealing with them
- typical modifications or reasonable adjustments that can occur in a workplace

- workplace policies and procedures relevant to socially diverse work environment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations and codes of practice.

TLIH0005 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to interpret road maps and navigate pre-determined routes as part of transport operations.

It includes identifying and determining the most appropriate route and completing required route documentation in accordance with operational requirements.

It involves the application of map reading principles and procedures when interpreting street maps which includes either a road map, directory or global positioning system (GPS) device; and following pre-determined routes.

Work is performed under general or limited supervision.

Work must be carried out in accordance with relevant state or territory roads and/or traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate

essential outcomes.

achievement of the element.

1 Identify and complete pre-planned route

- 1.1 Pre-determined route documentation is accessed and interpreted
- 1.2 Relevant street maps are identified and accessed for pre-planned route
- 1.3 Street map symbols for pre-planned route are recognised and interpreted
- 1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate street map
- 1.5 Pre-determined route directions are interpreted, and route is traced using street map
- 1.6 Key intersections and other landmarks along route are identified for use in following planned route
- 1.7 Alternative contingency routes are identified for emergencies or traffic delays
- 1.8 Pre-determined route is correctly followed

2 Complete necessary documentation

- 2.1 Required route documentation is completed in accordance with workplace procedures, as required
- 2.2 Required route documentation is filed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH2001 Interpret road maps and navigate pre-determined routes.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIH0005 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- completing documentation related to route navigation, as required
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job task
- reading and interpreting relevant instructions, procedures, information and signs
- using street maps and other route documentation to complete and navigate pre-determined routes, as required, and in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- current route information about accidents or emergencies that might close or restrict traffic
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations and rest stops as required
- operational procedures for interpreting road maps, using global positioning system (GPS) devices and navigating routes
- relevant state or territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- traffic conditions at various times of the day and night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate actions that should be taken

- workplace requirements for recording and documenting route information, as required.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry to navigate routes
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIH0006 Plan and navigate routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to plan and navigate routes.

It includes interpreting information from a street map which includes either a road map, directory or global positioning system (GPS) device; planning the most appropriate route taking into account pertinent factors; and completing required trip documentation in accordance with workplace procedures as part of transport operations, in accordance with relevant state and/or territory roads and traffic authority regulations.

This unit relates to the work of a commercial vehicle driver in the transport industry.

Work is performed under general or limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Interpret street maps

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Symbols on a street map are recognised and interpreted for navigating routes

- 2 Plan routes**
 - 1.2** Destination location is identified using a street map
 - 2.1** Given a location and a destination, the most direct and alternative routes between two points are identified using a street map
 - 2.2** Hazards are identified, risks are assessed, and control measures are implemented
 - 2.3** Information on height, width and load limits of road infrastructure and other restrictions on thoroughfares is accessed, interpreted and taken into account when planning a route for a journey, as required
 - 2.4** Suitable route is selected to ensure the most efficient, safe, secure and legal transport operation
- 3 Follow planned route**
 - 3.1** Planned route is correctly followed with aid of a street map
 - 3.2** Route documentation is completed in accordance with workplace policies and procedures, as required
 - 3.3** Parking is conducted in accordance with workplace policies and procedures, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH3002 Plan and navigate routes.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIH0006 Plan and navigate routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and interpreting required information and developing contingency routes, including road restrictions, traffic conditions and service stations/rest stops
- applying fatigue management techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant workplace policies and procedures
- completing relevant documentation, as required
- interpreting and following workplace instructions and prioritising work
- interpreting information to allow effective route planning
- modifying route planning activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- planning and navigating a route effectively, including:
 - alternative routes for contingencies such as road works, emergencies or delays
 - transport routes to meet workplace policies and procedures
 - planning routes in accordance with workplace policies and procedures
- reading and interpreting relevant instructions, procedures, information and signs, including:
 - estimating route distances using map information
 - identifying roads and intersections
 - identifying town and suburb locations
 - reading and interpretation of map symbols
- reporting and/or rectifying identified problems promptly in accordance with workplace procedures.
-

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on particular routes
- features and contents of street maps, and techniques for their use in transport navigation
- known traffic conditions at various times of the day along specific routes
- location of service stations and rest stops
- physical hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards on long routes
- workplace procedures for planning and navigating transport routes
- workplace policies and procedures for recording and documenting route information.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
- A simulator or online assessment is not suitable for the final assessment of this unit of competency.

TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use infotechnology devices in the workplace in accordance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures, within the transport and logistics industry.

It includes identifying infotechnology equipment and systems; setting up, using and shutting down computer-based equipment and systems; and inputting, storing and presenting files/data. It also involves implementing workplace procedures for managing and securing data.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

K – Technology

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Identify infotechnology systems**
 - 1.1 Types of infotechnology equipment used in the work area are identified
 - 1.2 Functions of equipment, component parts and accessories are identified
 - 1.3 Applications for workplace activities of different infotechnology equipment and systems are interpreted
 - 1.4 Routine faults in operating systems, software applications and operator errors are identified
 - 1.5 Sources of information on rectifying/reporting faults with operating equipment, systems and application are identified
- 2 Access and operate computer-based equipment and systems**
 - 2.1 Work environments and equipment are adjusted to meet ergonomic requirements and workplace policies and procedures
 - 2.2 Systems are accessed and checked, as required, for viruses
 - 2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturer guidelines
 - 2.4 Infotechnology equipment and software operating manuals and/or help screens are used to inform work practices
 - 2.5 Required application software packages and accessories are selected and accessed
 - 2.6 Required file and/or data to be accessed is identified
 - 2.7 Files/data are filed in accordance with workplace procedures
 - 2.8 Shut-down procedures for files, applications and equipment are followed
- 3 Input, store and present files/data**
 - 3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader, touch screen or other system
 - 3.2 Accurate input is confirmed
 - 3.3 Files are accessed in accordance with workplace

- procedures
- 3.4 Data is manipulated to suit work requirements and is checked for accuracy
 - 3.5 Saved files are accessed through relevant directories
 - 3.6 Information and disk/s are stored, as required
 - 3.7 Information is presented using computerised projection facilities as required
- 4 Implement workplace procedures for managing and securing data**
- 4.1 Security procedures are followed in accordance with workplace procedures
 - 4.2 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIK2010A Use infotechnology devices in the workplace.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and/or completing electronic documentation through the use of infotechnology devices in the workplace
- adapting to differences in software and hardware equipment in accordance with operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices in the workplace
- applying relevant legislation and workplace procedures
- identifying and using computer equipment, software, processes and procedures required within the job context
- identifying fault-finding procedures
- implementing contingency plans when using infotechnology devices in the workplace including using security and backup software and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- operating infotechnology devices used within the workplace in accordance with operational requirements
- reading and interpreting instructions, procedures, information, operational instructions and manuals relevant to using infotechnology devices in the workplace
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

the requirements of the elements and performance criteria and include knowledge of:

- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines for using computer equipment in the workplace
- typical problems that can occur when using infotechnology devices and computer applications in the workplace and related appropriate action that can be taken to prevent or solve these problems
- WHS/OHS risks and hazards when using computer equipment for work tasks, and ways of controlling these risks/hazards
- workplace procedures for using computer equipment and application software appropriate for work role.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIL3003 Conduct induction process

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct an induction process for new workers and trainees commencing employment in the workplace, in accordance with relevant regulatory requirements, operational policies and procedures for the workplace concerned.

It includes outlining the relationship between the employee and the company, establishing and explaining the requirements of the position, and completing relevant workplace documentation.

Work involves planning, coordinating and conducting an induction program to prepare workers to enter and participate in the work activities of a workplace.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Outline the relationship between employee and the company

- 1.1 Employee is greeted and introduced to key personnel and areas in the workplace
- 1.2 Workplace objectives, operating systems and workplace structures are explained
- 1.3 Relationship between employee's position, and the workplace structure and objectives is identified
- 1.4 Required work health and safety (WHS)/occupational health and safety (OHS), workplace procedures and employment conditions are explained
- 1.5 Sources of information and assistance for employee are identified
- 1.6 Emergency procedures are explained

2 Establish requirements of position

- 2.1 Job role, responsibilities and reporting relationships are explained
- 2.2 Immediate work colleagues are introduced
- 2.3 Workplace facilities and layout are shown to employee and flow of work/materials/goods and functions carried out in the area/s are explained
- 2.4 Initial training in relevant WHS/OHS, equipment and work systems is provided in accordance with workplace procedures
- 2.5 Employee rights and responsibilities in terms of equal employment opportunity, sexual harassment and anti-discrimination are explained
- 2.6 Training opportunities are organised to develop individual job roles
- 2.7 Workplace expectations of work functions and outputs are clarified
- 2.8 Opportunities for employee to clarify concerns and ask questions are provided

3 Complete relevant workplace documentation

- 3.1 Workplace personnel records are completed in accordance with workplace requirements
- 3.2 Tax declaration and other relevant documentation are checked for compliance with requirements

- 3.3 Employee is requested to provide any additional information needed and notes are taken of any additional actions required
- 3.4 Workplace-specific documentation is submitted to appropriate personnel as required, in accordance with workplace requirements
- 3.5 Requirements of commonwealth and state/territory legislation on equal employment opportunity, sexual harassment and anti-discrimination are fulfilled

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL3003A Conduct induction process.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIL3003 Conduct induction process

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- identifying and correctly using relevant equipment
- interpreting and following operational instructions
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- prioritising work
- reading interpreting and following relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- customer service standards and procedures
- emergency procedures and related equipment
- employee conditions of service
- instructional methods and resources required to conduct an induction program

- personal protective equipment and instructions for its use
- site or workplace layout
- WHS/OHS policies and procedures
- workplace documentation and record keeping procedures and requirements
- workplace hazards and related hazard minimisation procedures
- workplace induction procedures and documentation requirements
- workplace structures and employee roles and responsibilities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor transport logistics in accordance with relevant regulatory requirements, standards and codes of practice, including the Australian Dangerous Goods (ADG) Code and workplace procedures.

It includes mobilising resources, coordinating multi-modal transport activities, monitoring consignment/s and implementing a contingency management strategy.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Mobilise resources**
 - 1.1 Optimal resource level is acquired to meet operational schedule requirements
 - 1.2 Relevant regulatory and insurance requirements are determined and implemented
 - 1.3 Allocated resources are assessed and monitored to ensure operational effectiveness and efficiency
 - 1.4 Changes to resource allocation are undertaken where deficiencies or over-supply are apparent, in accordance with enterprise procedures
- 2 Coordinate multi-modal transport activities**
 - 2.1 Facilities, personnel and equipment are made ready to accommodate interchange functions
 - 2.2 Security arrangements are invoked as required
 - 2.3 Loading and unloading operations are conducted in accordance with operational schedule and applicable statutory requirements, codes of practice and enterprise procedures
 - 2.4 Relevant documentation is completed/updated in accordance with operational schedule and reporting requirements
- 3 Monitor consignment tracking**
 - 3.1 Consignment tracking systems are monitored against workplace quality standards
 - 3.2 Variations from workplace quality standards are identified and appropriate action is initiated to rectify identified problems or to institute required improvements
- 4 Implement contingency management strategy**
 - 4.1 Operational schedule is continually reviewed in taking into account information updates, reports and feedback
 - 4.2 Nature, extent and impact of issues or incidents are identified and assessed against contingency management strategy
 - 4.3 Relevant information is processed to establish priorities and responses for dealing with issues or incidents
 - 4.4 Operations are redirected and controlled to meet changes in transport environment and tasks, in accordance with enterprise procedures
 - 4.5 Liaison is initiated and maintained with organisations/individuals affected by changed operational schedules

4.6 Actions undertaken are clearly documented and filed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL5019A Implement and monitor transport logistics.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and monitoring transport logistics
- completing documentation related to implementing and monitoring transport logistics
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communication equipment to required protocol
- prioritising work and coordinating self and others in relation to transport logistics activities
- providing leadership and working collaboratively with others
- reading and interpreting transport schedules, regulatory requirements, customer instructions, workplace procedures and manuals relevant to implementing and monitoring transport logistics
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and applying appropriate application of technology, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant Australian standards and associated certification requirements
- business policies, procedures and plans including procedures for outsourcing components of operations and engaging additional resources
- code, regulatory, permit and licence requirements relevant to transport logistics
- operational transport logistics systems, resources, management and workplace operating systems
- problems that may occur when implementing and monitoring transport logistics and action that can be taken to resolve or report these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and regulations
- relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to transport logistics
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- risks and hazards related to implementing and monitoring transport logistics and ways of controlling the risks involved
- transport and equipment applications, capacities, configurations, safety hazards and control mechanisms
- workplace policies and procedures, including those covering issue resolution and grievance
- workplace procedures for implementing and monitoring transport logistics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Pre-requisite Unit

Not applicable

Competency Field

LIC - Licencing Units

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work/task

- 1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and site inspection is conducted in accordance with workplace procedures
- 1.2 Work area operating surface is assessed to determine suitability for operational use of forklift truck in accordance with workplace procedures
- 1.3 Suitability of forklift truck and attachment working load limit (WLL) is determined for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
- 1.4 Working area is inspected and appropriate paths for operating the forklift truck and moving and placing load/s in work area are assessed and managed in accordance with workplace procedures
- 1.5 Hazard and risk control measures are identified and reported to relevant person/s in accordance with workplace procedures
- 1.6 Traffic management plan implementation is confirmed in accordance with workplace procedures
- 1.7 Appropriate communication procedures are identified with relevant people in accordance with workplace procedures
- 1.8 All work is confirmed to ensure coverage of work/task requirements for the relevant work area is in accordance with workplace procedures

- 2 Prepare for work/task**
- 2.1** Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures
 - 2.2** Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures
 - 2.3** Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures
 - 2.4** Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures
 - 2.5** Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures
 - 2.6** Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements
 - 2.7** Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures
 - 2.8** Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures
 - 2.9** Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures
- 3 Perform work/task**
- 3.1** Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures

- 3.2 Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures
 - 3.3 Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures
 - 3.4 Unplanned and unsafe situations are responded to in accordance with safe work procedures
 - 3.5 Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures
 - 3.6 Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures
- 4 Pack Up**
- 4.1 Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures
 - 4.2 Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2001 Licence to operate a forklift truck

Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
 - maintaining safe operating speed
 - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
 - battery charge as required by manufacturer requirements
 - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
 - checking for signs of paint separation and stressed welds indicating potential structural weakness
 - document evidence of damage
 - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
 - ensuring availability of correct forklift truck logbook and updating records as required
 - ensuring forklift truck tyres or other attachment/s are securely fitted
 - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
 - fluid leaks
 - lights are working effectively
 - safety equipment checks
 - signage and labels to ensure they are visible and legible
 - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
 - insufficient lighting
 - other specific hazards including dangerous goods
 - overhead hazards and fixed structures, roof beams and doorways
 - restricted and poorly ventilated areas

- surface suitability based on forklift truck and task requirements
- the risk of collision with people, moving plant and fixed structures
- weather conditions
- complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
- conducting operational checks, which must ensure:
 - all controls are located, identified and tested for functionality
 - all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
 - hazard warning systems (e.g. reversing beepers, lights and horns) are functional
 - recording and maintaining accurate information relating to forklift truck operations
 - safety devices as fitted
 - start-up is in accordance with manufacturer requirements
 - steering, transmission and brake functions comply with operating requirements
 - there are no unusual noises
- confirming and following traffic management plan procedures relevant to their role in the work area
- conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
- determining relevant lifting attachment to perform work/task
- determining lift requirements including:
 - positioning of unusually balanced/shaped loads
 - centre of gravity
 - dynamic nature of load
 - tyre/attachment positioning
 - weight
- ensuring risk control measures within the work area are effective as per workplace procedures
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various environmental conditions
- maintaining communication with other workplace personnel through using worksite procedures including:
 - audible and visual warning devices
 - signage
 - two-way radio
 - verbal instructions
 - written instructions
- maintaining three points of contact whilst accessing and egressing forklift truck and ensuring

- rungs / steps are free of hazards
- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
 - aligning tynes/attachment to load
 - carrying out a lift to 75% of the maximum height
 - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
 - correctly using horns and mirrors in workplace
 - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
 - driving applicable to conditions and moving loads safely
 - driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
 - an 'S' bend with a minimum 90 degrees left and right turn
 - ensuring load/s remains stable through pick up, transport and placement
 - forklift truck speed is appropriate to load and surroundings
 - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
 - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
 - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
 - tilting mast (or forks if applicable) to ensure balance of load
 - using gluts/dunnage appropriately and lowering load safely
 - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
 - reporting to relevant person/s on site risk control measures that are not in place or are deficient
 - setting up an exclusion zone
 - securely parking forklift truck and isolating in appropriate position including:
 - minimising possible access by unauthorised person/s
 - tynes/attachment lowered to required position in accordance with manufacturer requirements
 - park brake applied
 - switching off, isolating fuel/power source and removing key according to workplace procedures
 - shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
- communication procedures including:
 - audible and visual warning devices
 - hand signals
 - questioning techniques
 - signage
 - traffic warning systems
 - two-way radio
 - written instructions
- forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
- impact of the following on the operation of the forklift truck including:
 - failure/loss of control including brakes and steering
 - failure of equipment during forklift truck operations
 - forklift truck instability causes including:
 - deterioration of ground condition
 - overloading
 - pick up and placement of load
 - irregular loads
 - operating on ramps and uneven surfaces and in restricted spaces
 - use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
 - labels on the actual load
 - markings on the actual load
 - paperwork such as consignment notes, running sheets and weighbridge dockets
 - weighing a carton and calculating load
- manufacturer requirements, instructions and operator's manual
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
 - wind
 - lightning
 - water/ice impacted surface/ground
 - rain
 - extreme heat
 - Ultra violet (UV) exposure
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
 - lock out and tag out procedures
- relevant procedures for refuelling and recharging forklift truck using appropriate PPE

including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling
- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
 - bale clamps
 - carpet spike for carpet rolls
 - drum carrier
 - jib attachment
 - paper roll clamps
 - personnel work platforms
 - rotators
 - slippers/fork extensions on tynes
- suitability and lifting capability of the attachment to be used
- shut down procedures for a forklift truck in accordance with manufacturer requirements
- traffic management plan procedures and requirements
- typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
- workplace procedures including work plan which may be verbal, documented/written, or electronically generated
- work area operating surface suitability including issues with:
 - backfilled ground
 - bitumen (damaged, cracked)
 - concrete (damaged, cracked)
 - hard compacted soil
 - potholes
 - railway tracks
 - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
 - soft soils
 - trench covers
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety

and Health (OSH) requirements, safe work and workplace procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
 - approved codes of practice and relevant guidance material
 - relevant Australian technical standards
 - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to safely operate a boom-type Elevating Work Platform (EWP) where the length of the boom is 11 metres or more in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a Risk Work Licence (HRWL) to operate this plant.

Boom-type elevating work platform means a telescoping device, hinged device, or articulated device, or any combination of these, used to support a platform on which personnel, equipment and materials may be elevated.

A person performing this work is required to hold a boom-type elevating work platform HRWL.

This unit requires a person operating an EWP to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Pre-requisite Unit

Not applicable

Competency Field

LIC - Licencing Units

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work/task

- 1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and a site inspection is completed in accordance with workplace procedures
- 1.2 Work area ground/operating surface is assessed to determine suitability for operational use of EWP in accordance with manufacturer requirements and workplace procedures
- 1.3 EWP capabilities are established for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
- 1.4 Appropriate paths for operating the EWP and moving in work area are assessed and determined in accordance with workplace procedures
- 1.5 Relevant hazard and risk control measures are applied and advised to relevant person/s in accordance with workplace procedures

- 1.6** Traffic management plan implementation is confirmed in accordance with workplace procedures
 - 1.7** Appropriate communication procedures are identified, with relevant people in accordance with workplace procedures
 - 1.8** All work is confirmed to ensure coverage of work/task requirements for the relevant work area in accordance with workplace procedures
- 2 Prepare for work/task**
- 2.1** Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with workplace procedures
 - 2.2** Risk control measures for hazards identified are checked for implementation in accordance with workplace procedures
 - 2.3** Safety equipment including Personal Protective Equipment (PPE) are inspected, fitted correctly and used in accordance with manufacturer requirements and safe work procedures
 - 2.4** EWP is accessed in a safe manner in accordance with manufacturer requirements and safe work procedures
 - 2.5** Pre-start EWP checks are carried out in accordance with manufacturers requirements and safe work procedures
 - 2.6** EWP is started and is checked for any abnormal noises in accordance safe work procedures
 - 2.7** EWP is positioned correctly as per work plan in work area in accordance with relevant manufacturer requirements and safe work procedures
 - 2.8** EWP is stabilised appropriately in accordance with the workplan, relevant manufacturer requirements and safe work procedures

- 2.9** Operational checks from base controls are carried out in accordance with relevant manufacturer requirements and safe work procedures
 - 2.10** All platform controls are located, identified and tested in accordance with manufacturer requirements and safe work procedures
 - 2.11** All damage and defects are reported and appropriate action is taken to rectify in accordance with manufacturer requirements and safe work procedures
 - 2.12** EWP logbook is inspected and is correct for the EWP, is completed and signed in accordance with manufacturer requirements and safe work procedures
 - 2.13** Weather and work environmental conditions are assessed to determine any impact on EWP operation and positioning as per workplan in accordance with manufacturer requirements and safe work procedures
- 3 Perform work/task**
- 3.1** Relevant hazard prevention/control measures identified are checked for implementation in accordance with safe work procedures
 - 3.2** EWP is safely located at point of work in work area in accordance with safe work procedures
 - 3.3** EWP platform is positioned for work tasks and stability and all operations are monitored constantly in accordance with safe work procedures
 - 3.4** Work gear and tools are stowed and secured in accordance with safe work procedures
 - 3.5** EWP is operated using all movements in accordance with safe work procedures and manufacturer requirements
 - 3.6** Unplanned and unsafe situations are responded to in accordance with safe work procedures

- 3.7 All communication signals are correctly interpreted and followed whilst EWP is operated in accordance with safe work procedures
 - 3.8 EWP platform is accessed and egressed in accordance with safe work procedures and manufacturer requirements
 - 3.9 EWP is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures
- 4 Pack up**
- 4.1 Post-operational EWP checks are carried out in accordance with manufacturer requirements and safe work procedures
 - 4.2 EWP boom is retracted, lowered, stowed and secured in accordance with manufacturer requirements and safe work procedures
 - 4.3 Safety equipment and PPE is disconnected from platform in accordance with safe work procedures
 - 4.4 Relevant motion locks and brakes are applied as required in accordance with manufacturer requirements and safe work procedures
 - 4.5 Outriggers and/or stabilisers, plates or packing if fitted are stowed and secured in accordance and with manufacturer requirements and safe work procedures
 - 4.6 EWP is shut down in accordance with manufacturer requirements and safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Links

Assessment Requirements for TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- advising relevant person/s on site in relation to any hazards and risk elimination/control strategies
- applying safe operating procedures for an Elevating Work Platform (EWP) including all functions within the safe working rated capacity including:
 - boom/s as low as possible and fully retracted whilst travelling (self propelled EWP only)
 - boom/s in line with EWP where practical whilst travelling (self propelled EWP only)
 - EWP stability
 - gently accelerating and braking to minimise boom/s swing (self propelled EWP only)
 - maintaining safe operating speed in relation to the work condition
 - travelling with work platform raised to an appropriate height for the terrain and visibility in relation to direction of travel (self propelled EWP only and in accordance with manufacturers specifications)
- applying emergency procedures
- applying traffic management plan procedures relevant to their role in the work area
- carrying out operational checks on EWP including:
 - testing of all EWP safety devices
 - all controls are located, identified and tested for functionality from the base controls and platform controls
 - hazard warning systems including travel beepers and lights are functional
 - start-up is in accordance with manufacturer requirements
 - steering, transmission and brake functions comply with operating requirements (self

- propelled EWP only)
- there are no unusual noises
- carrying out pre-start checks, including visual inspection which must include:
 - battery fluid level as required by manufacturer requirements
 - checking compliance plate is relevant to the load/s being used on the EWP
 - engine / mechanical fluid level checks as required by manufacturer requirements
 - ensuring availability of correct logbook and updating records as required
 - ensuring EWP platform and attachment/s fitted in platform are secured
 - evidence of damage
 - fluid leaks
 - lights are working effectively (where fitted)
 - safety equipment checks
 - signage and labels to ensure they are visible and legible
 - structural weaknesses including paint separation or stressed welds
 - wheels and tyres for damage/correct inflation if applicable
- checking compliance plate and load chart for reach requirements and load suitability
- clarifying workplan and checking understanding
- complying with Commonwealth, State and/or Territory work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) legislation and regulations
- controlling and operating a boom type elevating work platform ensuring movements and control functions are safe, smooth and comply with operating requirements including:
 - any combination of the movement of the extending boom used to support a platform on which personnel, equipment and materials are elevated to perform the work task/s
 - avoidance of ground depressions
 - correctly using observer guidance of work platform, main chassis and extending boom
 - demonstrating the safe operation of an EWP in forward and reverse, while maintaining visibility (where applicable)
 - driving (where applicable) applicable to conditions and moving platform and load/s safely
 - ensuring warning devices are functioning correctly
 - interpreting directional arrows correctly on platform controls during forward, reverse, left and right
 - lowering boom to its resting position
 - monitoring platform, main chassis and extending boom movement constantly ensuring safe work procedures are followed
 - raising platform and slewing within manufacturer requirements
 - raising platform to its full extent or 75% of the maximum height capacity (whichever is greater)
 - stability of the EWP and the work platform
 - manoeuvring and positioning the platform to perform work task/s safely whilst at its full extent or a minimum height of 75% of the maximum capacity (whichever is greater)

- conducting and applying hazard identification and risk elimination or minimisation strategies including:
 - barricades and controls to prevent the risk of collision with people, moving vehicles and fixed structures
 - environmental conditions including:
 - wind
 - lightning
 - water impacted ground
 - rain
 - extreme heat
 - Ultra Violet (UV) exposure
 - ground conditions (surface and slopes) and assessing work area operating surface suitability based on machine and task requirements
 - overhead hazards including electric lines and service pipes
 - personal protective equipment (PPE)
 - restricted areas and crush points from work platform and external surroundings
 - safety related tags on electrical switches/isolators that have an impact on point of work of EWP operator
 - sufficient lighting
 - suitable area for set-up, positioning and safely operating EWP
 - suitable firm and stable operating surface
 - use of safety observer
- entering work platform correctly including:
 - lowering platform safely and stably to appropriate height to access safely
 - clipping on of fall restraint/arrest device
 - accessing platform safely
- exiting work platform correctly including:
 - lowering platform safely and stably to appropriate height to egress safely
 - unclipping of fall restraint/arrest device
 - exiting platform safely
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- inspecting and using relevant safety equipment, including:
 - anchor point/s
 - emergency retrieval system from base controls and platform controls where fitted
 - energy absorber/s
 - lanyard/s
 - safety harness/es
- interpreting and confirming relevant documentation, workplace instructions, safety information and emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various work environmental conditions

- maintaining communication with other workplace personnel using appropriate workplace procedures including procedures to ensure all movements are conveyed clearly and succinctly including:
 - 2-way radio
 - audible and visual warning devices
 - making and interpreting hand signals
 - questioning to confirm understanding
 - signage
 - written instructions
- recording and maintaining accurate information relating to EWP operations
- reporting to relevant person/s on site risk control measures that are not in place or deficient
- stabilising procedures for an EWP including:
 - checking levels
 - removing obstacles and obstructions
 - deploying and retracting outriggers (if fitted)
 - establishing correct size plates for packing (if required)
- shutting down a boom type EWP in accordance with manufacturer requirements and workplace procedures
- using and interpreting EWP manufacturer requirements and data, including compliance plate and load chart, to enable correct EWP selection for task including:
 - boom
 - platform
 - weight including outrigger load or wheel load.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards, codes of practice and guidelines to safely operate an EWP (boom length 11 metres or more) including:
 - nominal reach, measured horizontally from centre point of rotation to outer edge of platform in its most extended position
 - vertical distance from floor of platform to surface supporting elevating work platform with platform at its maximum height
- appropriate mathematical calculations to estimate loads ensuring EWP is not overloaded
- appropriate workplace communication procedures including:
 - 2-way radio
 - audible and visual warning devices
 - questioning techniques
 - signage
 - hand signals

- traffic warning systems
- written instructions
- compliance with permit condition requirements including:
 - from electrical supply authority
 - if operating on roads or footpaths
- EWP characteristics and capabilities, manufacturer requirements and instructions
- hazards including:
 - all ground and /or operating surface hazards
 - traffic including pedestrians, vehicles, other mobile plant and building structures
 - overhead hazards including electric lines, service pipes, doorways, roof beams, and lights
 - obstacles or obstructions
 - insufficient lighting
 - other relevant hazards
- identification and avoidance of person/s potential crush or entrapment points
- identification and avoidance of potential contact with overhead electrical conductor's
- identification and avoidance of potential contact with structures near work platform/boom or chassis
- impact of the following on the operation of the EWP including:
 - failure/loss of control including brakes and steering
 - failure of equipment including hydraulic system
 - EWP and platform instability due to:
 - deterioration of ground/operating surface condition
 - gradient of operating surface
 - overloading
 - poor load placement
 - irregular loads
 - emergency procedures and safety equipment, including the use of:
 - safety harness/es
 - energy absorbers
 - lanyard/s
 - anchor point/s
 - emergency retrieval systems
- lock out and tag out procedures
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions
- procedures for recording, reporting and maintaining workplace records and information
- relevant manufacturer requirements and instructions
- relevant procedures for refuelling/recharging EWP using appropriate PPE
- risk assessment process including hierarchy of control:
 - elimination

- substitution
- isolation
- engineering controls
- administrative controls
- personal protective equipment (PPE)
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations
- procedures for shutting down a boom type EWP in accordance with manufacturer requirements
- relevant documentation requirements
- suitability and lifting capability of the EWP to be used
- traffic management plan procedures and requirements
- typical routine problems encountered operating a EWP and adjustments required for correction
- wind speed factors that affect stability of EWP as per manufacturer requirements
- work area operating surface suitability including issues with:
 - backfilled ground
 - bitumen (damaged, cracked)
 - concrete (damaged, cracked)
 - hard compacted soil
 - potholes
 - railway tracks
 - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
 - soft soils
 - trench covers
- work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and codes of practice requirements for boom type elevating work platforms
- work plan which may be verbal, documented/written, or electronically generated

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace

conditions.

- Simulators must not be used in the assessment of this unit of competency

Resources for assessment must include access to:

- appropriate boom-type elevating work platform (boom length 11 metres or more) in a safe/serviceable condition in accordance with manufacturer requirements
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
 - approved codes of practice and relevant guidance material
 - relevant Australian technical standards
 - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable).

TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck high risk work (HRW) licence.

This unit requires a person operating a forklift truck to plan the work, conduct routine checks on a forklift truck, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work

- 1.1 Potential workplace hazards are identified
- 1.2 Risk control measures are identified consistent with regulatory requirements and the hierarchy of control
- 1.3 Appropriate forklift truck is selected in accordance with load and workplace conditions
- 1.4 Working area is inspected to determine appropriate paths for moving loads and forklift truck in accordance with workplace conditions
- 1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures

2 Conduct routine checks

- 2.1 Prior to operation, forklift truck is visually checked for any damage or defects
- 2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard
- 2.3 All controls are located, identified and confirmed
- 2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
- 2.5 Forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise
- 2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures

- 2.7 All forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures
- 2.8 Issues, defects and damage identified during routine checks are reported and recorded in accordance with workplace procedures, and appropriate action is taken

3 Shift load

- 3.1 Weight of load is assessed to ensure compliance with forklift truck data plate specifications
- 3.2 Appropriate hazard prevention/control measures are implemented and communicated to personnel in the work area
- 3.3 Forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures
- 3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards
- 3.5 Load movement is monitored constantly to ensure safety of personnel and load, and structural stability
- 3.6 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans

4 Shut down and secure forklift truck

- 4.1 Forklift truck is parked to avoid hazards
- 4.2 Forklift truck is shut down in accordance with manufacturer specifications and workplace procedures
- 4.3 Routine post-operational forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures
- 4.4 Forklift truck is secured to prevent unauthorised access/use
- 4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

Skill	Performance feature
Employment skills to:	<ul style="list-style-type: none"> • operate a forklift truck in different types of workplaces transferring key principles of safe operation to different contexts • improve own performance in safely and efficiently operating a forklift truck by incorporating learnings from different workplaces and different conditions into current performance
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information including: <ul style="list-style-type: none"> • selecting appropriate forklift in accordance with load and workplace conditions • load weight assessment, to ensure compliance with forklift truck data plate specifications • controlling and monitoring instrument readings
Language skills to:	<ul style="list-style-type: none"> • use and interpret vocabulary specific to forklift truck operations and workplace procedures to communicate with other workplace personnel • use non-verbal feedback to support effective communication • use relevant communications conventions
Literacy (reading) skills to:	<ul style="list-style-type: none"> • interpret documentation that includes technical specificity including: <ul style="list-style-type: none"> • forklift truck data plate • plant operation manuals and manufacturer specifications • workplace procedures, including emergency plan • workplace signage and labels
Literacy (writing) skills to:	<ul style="list-style-type: none"> • accurately record and maintain information relating to operating a forklift truck, including: <ul style="list-style-type: none"> • incident reports • vehicle checking and maintenance records
Self-management skills	<ul style="list-style-type: none"> • implement risk control measures • initiate emergency management strategies

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2001A Licence to operate a forklift truck

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a forklift truck and satisfy all of the unit elements, performance criteria and foundations skills requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating a forklift truck
- carrying out post-start operational checks, which must ensure:
 - attachment movements and control functions are smooth and comply with operating requirements
 - hazard warning systems (e.g. lights and horns) are functional
 - safety devices are checked, including
 - deadman's switch
 - emergency descent device (hydraulic)
 - reversing beepers
 - start-up is in accordance with procedures
 - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
 - battery charge checks, as required
 - ensuring availability of logbook, records, handbook and/or operating manuals
 - fitting and interpreting forklift truck data plate
 - fluid checks
 - forklift truck attachment security checks
 - identifying approved modifications and/or attachments fitted, to manufacturer specifications in accordance with forklift truck or attachment data plate
 - locating, identifying and confirming all controls
 - safety equipment checks
 - signage and label visibility and legibility checks
 - updating records as required
- communicating with other workplace personnel through
 - using appropriate worksite protocols

- listening
- making and interpreting hand signals
- questioning to confirm understanding
- signage
- verbal and non-verbal language
- written instructions
- complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
- conducting and monitoring safe forklift truck operations that include moving loads safely, driving and manoeuvring, picking up and placing loads at various stack heights and carrying out all functions to the maximum height and load capacity
- driving a forklift truck with load in forward and reverse, while maintaining visibility
- planning and preparing for forklift truck operations including:
 - conducting a workplace risk assessment
 - identifying hazards associated with operating a forklift truck, which must include
 - forklift truck instability (e.g. due to overloading, poor load placement, irregular loads)
 - ground conditions (e.g. condition of pavement, slopes)
 - insufficient lighting
 - overhead hazards (e.g. electric lines, service pipes)
 - traffic (e.g. pedestrians, vehicles, other plant) and the risk of collision with people, moving plant and fixed structures
 - weather conditions (e.g. wind, lightning, rain)
 - selecting hazard prevention strategies in accordance with the hierarchy of control
 - putting in place effective controls for identified hazards
 - visually checking a forklift truck for any damage or defects prior to operation including
 - evidence of damage
 - leaks
 - structural weaknesses (including paint separation or stressed welds)
- receiving and interpreting workplace instructions, safety information and emergency procedures
- shutting down a forklift truck in accordance with manufacturer specifications and workplace procedures including
 - parking in a suitable location away from dangerous areas
 - correctly positioning fork arms (tips down, tilted forward, lowered to ground)
 - selecting appropriate transmission/gear for parking (relevant to transmission type)
 - applying hand/parking brake
 - turning off engine power
 - removing ignition key as required
 - shutting off LPG gas cylinder valve as required

- securing equipment in accordance with manufacturer specifications and against unauthorised operation
- securing site
- ensuring access ways are clear
- identifying and segregating defective equipment and reporting to authorised personnel
- connecting batteries to charger as required
- verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including
 - environmental conditions (e.g. wind, lightning, storms)
 - failure/loss of control (e.g. brakes and steering)
 - failure of equipment (e.g. hydraulic system)
 - forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards relevant to operating a forklift truck
- Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one's own responsibilities
- forklift truck characteristics and capabilities (including use of load data plates)
- forklift truck operations and safe operating techniques
- hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
 - control labels
 - forklift data plates/labels
 - forklift warning decals
- organisational and workplace standards, requirements, policies and procedures for operating a forklift truck
- procedures for recording, reporting and maintaining workplace records and information
- relevant Australian and industry standards, codes of practice and guidelines to safely

- operate a forklift truck
- risk control measures including:
 - barricades and traffic control (e.g. traffic management plan)
 - compliance with permit condition requirements from electrical supply authority, including
 - adequate illumination
 - disconnected power
 - excavation safeguards
 - insulated electric lines
 - maintaining safety observer zone
 - movement of obstructions
 - observing limits of approach
 - pedestrian control (barricades, signs, etc.)
 - power disconnection or compliance with electrical supply authority requirements
 - safety tags on electrical switches/isolators
 - using safety observer inside exclusion zone
 - using personal protective equipment
 - selecting forklift truck to suit load and workplace conditions
 - typical routine problems encountered operating a forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for *Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements.

If the working zone is located at a 'live' site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must **not** be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring that candidates have access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of Performance Assessment
- relevant workplace procedures and standards for operating a forklift truck, including:
 - approved codes of practice and guidance
 - relevant Australian and international technical standards
 - manufacturer guidelines (instructions, specifications or checklists) for the purpose of Performance Assessment
 - relevant industry standards and operating procedures (where applicable)
 - safe work method statements (SWMS), as required.

TLIO5017 Manage security of storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage security of storage facilities as part of work undertaken in various contexts within the transport and logistics industry.

It includes assessing security risks, specifying security requirements and implementing, monitoring and reviewing storage security plan performance.

The unit generally applies to those who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O - Security

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess security risks

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|-----|--|
| 1.1 | Records of security breaches, thefts and damage are reviewed to identify past security storage incidents |
| 1.2 | Potential risks to the security of stock, personnel, facilities, information and equipment are identified, considering |

- internal and external factors
- 1.3 Discrepancies between identified risk and current storage security situations are noted
- 2 Specify security requirements**
- 2.1 Decisions and adjustments to storage security equipment and procedures are made based on risk assessment
- 2.2 Questions and feedback from stakeholders are sought and responded to promptly
- 2.3 Finalised storage security plan offering optimal security of storage facility is devised taking into account all feedback and assessments of security risks
- 3 Implement storage security plan**
- 3.1 Storage security plan is implemented and appropriate workplace personnel are informed
- 3.2 Staff competency requirements to implement security plan are addressed with required training
- 3.3 Equipment and needs for improvements are allocated and/or obtained
- 3.4 Storage security plan, policies and procedures are trialled in conjunction with a system for feedback to identify and suggest further improvements
- 4 Monitor and review storage security plan performance**
- 4.1 Security reports are collated and categorised
- 4.2 Reports are compared to identify trends in breaches
- 4.3 Security procedures are modified to rectify identified gaps

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIO5017A Manage security of storage facilities.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIO5017 Manage security of storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- assessing, implementing, monitoring and reviewing security plan
- communicating effectively with others when completing work activities to ensure security approaches are understood and implemented
- completing documentation related to work activities including documentation of loss, damage or other security issues
- monitoring performance of equipment or technology designed to enhance security
- monitoring work activities in terms of planned schedule
- working collaboratively with others to enhance security awareness.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- business policies for security provision, including out-sourcing components of operations and engaging additional resources
- focus of operation of security systems, resources, management and workplace operating systems
- licence and permit requirements relevant to security procedures
- problems that may occur when planning and managing security procedures and action that can be taken to resolve these problems
- regulations, codes of practice and legislative requirements relevant to planning and managing workplace security procedures
- relevant Australian standards and certification requirements
- resource availability including the competencies of individuals in the team/group

- risks and hazards related to planning and managing security procedures and ways of controlling these risks
- workplace procedures for planning and managing security procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIR0004 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to negotiate a contract.

It includes negotiating contract specifics with contractors, completing contract negotiations and completing enterprise contract requirements.

The unit generally applies to those with procurement responsibilities.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Negotiate contract specifics with

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Preferred suppliers are verified prior to contract negotiations through a prequalification process

- | | |
|--|---|
| contractor | <ul style="list-style-type: none"> 1.2 Requirements of the contract are clearly documented and agreed to by the relevant parties 1.3 Areas of ambiguity or concern are clarified and resolved 1.4 Contract negotiations are conducted in accordance with relevant legislation and workplace policies and procedures 1.5 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor, including the determination of key performance indicators (KPIs) |
| 2 Complete contract negotiations | <ul style="list-style-type: none"> 2.1 Contract documentation is drafted in accordance with relevant legislation, workplace policies and procedures and negotiated conditions of service and supply 2.2 Technical and legal support in drafting contracts is accessed, as required 2.3 Contract documentation is signed and exchanged between relevant parties |
| 3 Complete enterprise contract requirements | <ul style="list-style-type: none"> 3.1 Documentation systems are established to ensure that the contractual terms and KPIs are met 3.2 Quality assurance procedures for supplied goods/services are initiated 3.3 Workplace systems that require interaction with contractors are identified and actioned 3.4 Contract and ancillary documentation are completed and stored, as required, in accordance with workplace policies, procedures and regulatory requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4003 Negotiate a contract.

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIR0004 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace policies and procedures
- communicating and working collaboratively and effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying a contract to cater for variations in service and/or supply of goods/services
- monitoring compliance with agreed key performance indicators (KPIs)
- reading and interpreting procedures and regulatory requirements relevant to negotiating a contract.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- key principles of contracts, including:
 - key legal requirements for the acquisition of service and/or supply of goods/services
 - workplace policies, procedures and relevant documentation for contract negotiation
- key provisions of relevant legislation, codes of practice and national standards that affect contracts for the service and/or supply of goods/services
- knowledge of the service and/or supply of goods/services being supplied
- prequalification processes, including work health and safety (WHS)/occupational health and safety (OHS) and chain of responsibility compliance
- techniques for negotiation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes to PC 2.2, 2.4 and 2.7
- Minor statement changes from Performance Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Analyse supply requirements

2 Evaluate potential contractors

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose and specifications of required goods/services are identified

1.2 Criteria to evaluate potential or existing contractor performance is established

1.3 Quantities of required goods/services are determined

1.4 Frequency of ordering/requesting of goods/services is identified

2.1 Contractors of requested goods/materials/services are identified

2.2 Comparative costings for goods/materials/services are obtained in accordance with regulatory and organisational policies and procedures

2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed

2.4 Contractors are evaluated in relation to established criteria and in accordance with regulatory and organisational policies and procedures

2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service

2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors

2.7 Information and data generated during selection process is filed and maintained in accordance with organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4002A Source goods/services and evaluate contractors.

Links

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes to PC 2.2, 2.4 and 2.7
- Minor statement changes from Performance Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace policies and procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors,

and related appropriate action that can be taken

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services and evaluating potential supply contractors.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIR4003 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to contract transport and logistics services in compliance with relevant regulations, standards, legal requirements, codes of practice and workplace procedures.

It includes negotiating the contract, finalising the contract negotiations, as well as completing all contract requirements with a contractor.

The unit generally applies to those with responsibility for resource coordination and allocation, and who lead individuals or teams.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

essential outcomes.

demonstrate achievement of the element.

1 Negotiate contract specifics with contractor

1.1 Requirements of the contract are clearly documented and agreed to by the relevant parties

1.2 Areas of ambiguity or concern are clarified and resolved

1.3 Negotiations are undertaken with selected contractor for the contracting of required goods/services on a 'without prejudice' basis

1.4 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor including the determination of key performance indicators

1.5 Alternative contractors are negotiated with if agreement is unable to be reached with preferred contractor

1.6 Contract negotiations are conducted in accordance with established workplace requirements and relevant legislation

2 Complete contract negotiations

2.1 Contract documentation is drafted in accordance with relevant legislation, workplace procedures and negotiated conditions of service and supply

2.2 Technical support in drafting contracts is accessed as required

2.3 Contract documentation is signed and exchanged between relevant parties

3 Complete enterprise contract requirements

3.1 Documentation systems are established to ensure traceability of orders and financial transactions

3.2 Workplace systems that require interaction with contractors are identified and actioned

3.3 Quality assurance procedures for supplied goods/services are initiated

3.4 Contract and ancillary documentation is completed and stored as required, in accordance with workplace procedures and regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4003A Negotiate a contract.

Assessment Requirements for TLIR4003 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying activities to cater for variations in workplace contexts and environment
- operating electronic communications equipment to required protocol
- planning and monitoring work activities in terms of schedule
- prioritising work and coordinating self and others in relation to workplace activities
- providing leadership and working collaboratively with others when negotiating a contract
- reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
- selecting and applying appropriate technology and information systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and the range of conditions on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying activities to cater for variations in workplace contexts and environment
- operating electronic communications equipment to required protocol
- planning and monitoring work activities in terms of schedule
- prioritising work and coordinating self and others in relation to workplace activities
- providing leadership and working collaboratively with others when negotiating a contract
- reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
- selecting and applying appropriate technology and information systems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to administer inventory systems. It includes identifying inventory systems, tracking inventory, planning and administering inventory systems and completing inventory audits and reports.

Inventory is defined as the quantity of goods owned and stored by an organisation that is intended either for resale or is raw materials and components used in producing goods that are then sold.

Inventory systems provide visibility and integration in the supply chain and they are used to record transactions associated with receiving, reducing or writing inventory off. An inventory system can include desktop software, barcode scanners, barcode labels, mobile devices and applications.

The unit is applicable to those with responsibilities for inventory systems within a supply chain. No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X - Logistics

Unit Sector

Cross sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Identify inventory systems**
 - 1.1 Software, applications and devices used in the inventory system are identified
 - 1.2 Third party inventory control operations are verified
 - 1.3 Demand forecasting methods and tools are determined
 - 1.4 Inventory system policies, procedures and processes are confirmed
- 2 Plan and administer inventory**
 - 2.1 Inventory characteristics are ascertained
 - 2.2 Stock specifications, locations, labels and reference numbers are validated using the inventory system
 - 2.3 Receipt and despatch stock is securely stored in designated locations and the inventory system is updated, as required
 - 2.4 Stock is monitored and reordered to meet optimum replenishment requirements, in accordance with organisational inventory procedures
 - 2.5 Stock is requisitioned and documentation is updated on the inventory system, as required
 - 2.6 Stock sorting, recycling and disposal is undertaken, in accordance with organisational inventory procedures
 - 2.7 Stock damage and losses against forecasts are assessed and investigations are completed into unacceptable cases
 - 2.8 Stock security is maintained, in accordance with organisational inventory procedures
- 3 Track inventory**
 - 3.1 Inventory is monitored and tracked using the inventory system
 - 3.2 Buyers are kept informed of stock levels, in accordance with organisational inventory procedures
 - 3.3 Inventory transactions are monitored, in accordance with organisational inventory procedures
 - 3.4 Reorder cycles are adjusted to maintain consistent

supply, as required

- 3.5 Discrepancies, out of specification and redirection opportunities are managed and reported using the inventory system
 - 3.6 Inventory reports are analysed and corrective action is taken, as required
 - 3.7 Vendor Managed Inventory (VMI) systems are used to manage inventory, as required
- 4 Complete inventory audits and reports**
- 4.1 Inventory audits and cycle counts are performed, in accordance with organisational inventory procedures
 - 4.2 Report on inventory system management is produced, in accordance with organisational inventory procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to TLIA3016 Use inventory systems to organise stock control.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing and managing stock quality including analysing discrepancies, out of specification and redirection opportunities
- categorising and labelling stock
- checking inventory specifications
- ensuring handling, sorting, disposal and recycling of stock is performed
- following organisational inventory policies and procedures
- identifying inventory characteristics
- maintaining and managing optimum stock levels
- meeting inventory system documentation requirements
- monitoring stock security
- reading and interpreting information and data related to inventory systems
- recording and maintaining inventory information
- undertaking quality control
- using the inventory system including inventory software and applications
- utilising Vendor Managed Inventory (VMI) systems
- validating third party inventory control operations.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- features of inventory systems
- financial implications of inventory management
- inventory documentation and reporting requirements including those for discrepancies, out of specification and redirection opportunities
- inventory loss and damage control
- inventory policies and procedures
- inventory tracking and security
- layout of inventory storage areas

- maintenance and monitoring of stock quality and levels
- methods for categorising and labelling inventory
- principles of inventory management
- principles of quality control
- reorder cycles
- storage conditions for the maintenance of inventory including product life cycles, maximising use, rotation and replenishment requirements
- third party inventory control operations
- types of inventory systems
- valuation methods for different inventory items
- Vendor Managed Inventory (VMI) systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
 - inventory systems and stock control equipment and tools
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to maintain stock control and receivals. It includes establishing supply arrangements, monitoring and maintaining stock, processing receivals and storing stock, determining stock wastage and discrepancies and performing stock audits and reporting.

Stock control involves the monitoring and managing of an organisation's stock. It applies to all stock at every stage of the production process from purchasing and delivery to using and reordering stock.

Receivals is the function of checking items delivered as new stock or supplies. It requires the inspection of goods and materials for quality, condition and quantity and the allocating of space in the storage facility or warehouse.

The unit is applicable to those with responsibilities for stock control and/or receivals within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

demonstrate achievement of the element.

1 Establish supply arrangements

- 1.1** Approved business data, forecasting methods and measures to calculate stock levels for standard business periods, peak seasons and special events are established
- 1.2** Optimum supply arrangements are sourced and negotiated using approved purchasing specifications
- 1.3** Stock quantities and cost effective terms of purchase are established
- 1.4** Agreements are recorded, in accordance with stock control and receipt procedures

2 Monitor and maintain stock

- 2.1** Stock control systems and equipment to administer and monitor ordering processes and procedures, including real time tracking information from stock handling and data collection technologies, are used
- 2.2** Stock levels and reorder cycles are monitored and maintained using approved forecasting methods and tools
- 2.3** Evaluation of stock against specifications, including adjusting sources of supply, is undertaken, as required
- 2.4** Optimal safety stock placement and service level optimisation is monitored, in accordance with the continuity plan and stock control and receipt procedures
- 2.5** Stock levels are recorded and reported, in accordance with stock control and receipt procedures

3 Process receivals and store stock

- 3.1** Orders for stock are processed and documented, including checking and recording receivals, against purchase and supply agreements
- 3.2** Stock is distributed, transported and stored in an approved storage area using safe manual handling techniques
- 3.3** Stock is inspected for quality, use by dates and damage
- 3.4** Stock is labelled and any excess is reported, in accordance with stock control and receipt

procedures

- | | | |
|--|------------|--|
| 4 Determine stock wastage and discrepancies | 4.1 | Control system and procedures for stock with high wastage or loss is implemented |
| | 4.2 | Stock is rotated for maximum use and minimum wastage, as required |
| | 4.3 | Excess or spoilt stock, including hazardous substances, is disposed of safely, in accordance with stock control and receipt procedures |
| | 4.4 | Stock losses and discrepancies are recorded, in accordance with stock control and receipt procedures, and security measures are reviewed |
| 5 Perform stock audits and report | 5.1 | Stock audits are performed and reports are produced within designated timeframes |
| | 5.2 | Audit findings and discrepancies in stock and receipts are reported to approved personnel |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing stock loss, wastage, excesses and discrepancies
- completing stock orders and receivals within established timelines
- disposing of stock safely including hazardous substances
- forecasting stock and receivals using approved methods and tools
- identifying supply sources for different types of products
- identifying third party inventory control operations
- implementing cost effective stock purchasing and control systems
- maintaining stock and receival data and records
- monitoring optimal safety stock placement and service level optimisation
- monitoring stock control systems, stock quality and cost effectiveness of supplies
- performing stock audits
- producing stock control reports
- receiving, storing, monitoring and maintaining stock levels over life cycle periods
- undertaking supplier and customer relationship management
- utilising stock handling, receivals and data collection technologies
- working with continuity plan and stock control and receival policies and procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- continuity plans
- contractual and preferred supplier arrangements
- disposal methods for stock and waste including hazardous substances
- stock control and receivals policies and procedures
- principles of stock control including:
 - approaches to calculating stock levels and replenishment requirements
 - factors that may influence purchase specifications

- forecasting methods for calculating inventory consumption
- methods and tools for calculating cost effective stock quantities including
 - methods of stock control including FIFO (First In, First Out) and LIFO (Last In, First Out)
 - standard measures and formulas for yield testing
 - stock control systems including bin card system, imprest system, integrated point of sale system and ledger systems
- product life and storage requirements for specific stock
- real time information using stock data technologies
- report requirements on stock loss, wastage, excesses and discrepancies
- safe manual handling techniques
- safe stock placement and service level optimisation
- security measures for stock including storage and tracking
- stock control audits
- stock ordering and delivery processes
- stock quality control
- stock reorder cycles for standard business periods, peak seasons and special events
- supplier and customer relationship management
- supply sources for different types of products
- types of computerised stock control systems, their functions and features.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
 - access to suppliers with whom the learner can interact, commercial purchase specifications, stock control procedures and reports and costs and contractual documentation used for the purchase of stock
 - stock control software systems and applications
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Application

This unit involves the skills and knowledge required to apply work health and safety (WHS)/occupational health and safety (OHS) regulations and codes of practices in the electrotechnology workplace.

It includes applying safe working practices, following workplace procedures for hazard identification and risk control. It also includes electrotechnology worker responsibilities and application for health and safety, risk management and adherence to safety practices as part of electrotechnology work functions when preparing to enter a work area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Cross Discipline

Unit Sector

Electrotechnology

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to enter an electrotechnology workplace

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Work area access permits are obtained from appropriate person/s in accordance with workplace procedures

risk control

- 3.2** Hazards in the work area are identified and reported to relevant person/s in accordance with workplace procedures
- 3.3** WHS/OHS documentation and incident records are completed in accordance with regulatory requirements and workplace procedures
- 3.4** Workplace instructions are followed in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace.

Assessment Requirements for UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) regulations, legislation, codes of practices and procedures in the workplace, including:
 - identifying typical hazards associated with work environments and assessing risk/s in an electrotechnology workplace
 - applying and reviewing risk control measures to minimise, control or eliminate identified hazards
 - reporting hazards to relevant person/s
 - applying safe working practices/methods
 - contributing to WHS/OHS consultative processes
- following relevant workplace emergency management procedures and instructions relating to WHS/OHS and emergency incidents
- selecting and using appropriate personal protective equipment (PPE)
- applying correct manual handling techniques
- confirming (safe) isolation of an electrical supply and isolation of potential electrical and non-electrical hazards has been completed by an authorised person
- demonstrating safe methods of removing an electric shock victim from a live electrical situation
- selecting an appropriate ladder for a given situation and performing a safety check before use
- completing relevant WHS/OHS documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- effective verbal and written communication techniques
- electrotechnology work environment, including:
 - appropriate fire extinguisher for a given type of fire
 - commonly used workplace safety signs

- relevant industry standard for safe workplace procedures
- risk assessment documentation
- typical hazards associated with a range of work environments
- use of fire extinguishers
- housekeeping and potential hazards in relation to improper housekeeping
- workplace procedures used to control the risks associated with workplace hazards
- legal requirements relevant to WHS/OHS in the workplace, including:
 - appropriate personal protective equipment (PPE)
 - asbestos awareness and reporting hazardous gases, including supervisory requirements and duty of care
 - difference between hazards and risks
 - duty holder responsibilities, as specified in WHS/OHS Acts, regulations and codes of practice
 - employer and employee responsibilities, rights and obligations
 - general aims and objectives of the relevant state or territory legislation relating to WHS/OHS
 - hazards that may be present in the electrotechnology workplace, the harm they can cause and how this harm occurs
 - housekeeping and potential hazards in relation to improper housekeeping
 - major functions of safety committees and representatives
 - powers of health and safety inspectors
 - relevant WHS/OHS regulations, codes and practices
 - underlying principles of WHS
- life support - cardiopulmonary resuscitation (CPR) in the workplace, including:
 - first aid
 - responsibilities of the first aider
 - priorities of first aid management for any accident or injury
 - procedures required at an accident scene
 - legal and ethical issues, which may impact on the management of care
 - 'duty of care'
 - examination of a casualty for injuries
 - effect of cardiopulmonary arrest on the body
 - managing simulated conditions of airway obstruction, respiratory arrest and cardiopulmonary arrest
 - single and two-person CPR
 - signs and symptoms of an altered level of consciousness
 - management of simulation of a casualty with an altered level of consciousness
 - signs and symptoms of shock
 - management of simulation of a casualty in shock
- relevant safe work method statements (SWMS)/job safety analysis (JSA) or risk mitigation processes, including:

- emergency management plan
- hierarchy of WHS/OHS hazard risk control measures
- principles of risk assessment/management and required documentation
- typical hazards associated with electrotechnology work environments and their control, including:
 - asbestos, including:
 - common types of asbestos containing building materials
 - warning signs used to identify the presence of asbestos
 - effects of asbestos on the human body
 - requirements for reporting the presence of asbestos
 - silica, including:
 - types of materials that contain crystalline silica (silica dust)
 - methods of releasing silica dust
 - recommended levels of exposure to crystalline silica
 - effects of crystalline silica on the human body
 - hazardous gases
 - chemicals in the workplace, including:
 - hazardous substances and dangerous goods and their classifications
 - labelling and storage requirements for chemicals
 - purpose and interpretation of safety data sheets (SDS)/material safety data sheets (MSDS)
 - confined spaces, including:
 - control measures for working in a designated confined space
 - hazards associated with working in a confined space
 - workplace situations that could be classified as a confined space
 - physical and psychological hazards, including excessive noise, vibration, thermal stress, radiation, lasers, occupational overuse syndrome, stress, drugs and alcohol
 - safe manual handling principles, including:
 - procedures and methods for manual handling
 - situations that may cause manual handling injuries
 - types of manual handling injuries and their effect
 - working at heights, including:
 - hazards and precautions associated with working on ladders, elevated work platforms (EWP) and scaffolds
 - identification of work area as a height risk and use appropriate safety equipment to prevent a fall
 - working safely with electricity, including:
 - effects of electric shock on the human body
 - protection offered by a residual current device (RCD)
 - need for ensuring the (safe) isolation of an electrical supply

- appropriate method of removing an electric shock victim from a live electrical situation
- precautions that can minimise the chance of electric shock (earthing, extra-low voltage (ELV), fuses, circuit breakers and RCDs)
- common causes of electrical accidents.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, emergency management plan, equipment specifications, regulations, codes of practice and operation manuals
- relevant WHS/OHS legislation, regulations and codes of practice related to hazards management in the electrotechnology industry and workplace.

UEERL0001 Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Application

This unit involves the skills and knowledge required to attach flexible cord and plug to electrical equipment for connection to a single phase supplies up to 230 volts (V) alternating current (a.c.) supply.

It includes planning and attaching flexible cord and plug, using test equipment for inspection and safety testing. It also includes locating, inspecting, testing and repairing faults in flexible cords and plugs.

This unit does not cover the knowledge and skills necessary for work associated with high current faults on complex electrical apparatus, circuits and electrical work; in hazardous areas or on electrical equipment that is part of an explosion-protection technique; nor, work associated with fixed wiring.

The skills and knowledge described in this unit require a licence or permit to practice in the workplace where work is carried out on electrical installations which are designed to operate at voltages greater than 50 V a.c. or 120 V direct current (d.c.).

Competency development activities in this unit are subject to regulations directly related to licensing. Where a licence or permit to practice is not held, a relevant contract of training, such as an Australian Apprenticeship, is required.

Additional and/or other conditions may apply in some jurisdictions subject to regulations related to electrical work. Practice in the workplace and during training is also subject to work health and safety (WHS)/occupational health and safety (OHS) regulations.

Pre-requisite Unit

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

Competency Field

Restricted Licensing

Unit Sector

Electrotechnology

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan electrical equipment connection

2 Attach flexible cord and plugs

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Work is planned, sequenced and prepared in accordance with WHS/OHS requirements and workplace procedures
- 1.2 Condition and ratings of cord and plugs are in accordance with workplace procedures and work instruction from appropriate person/s
- 1.3 Flexible cords and plugs are selected in accordance with relevant industry standards and workplace procedures for condition and rating
- 1.4 Materials necessary to complete work are obtained and checked in accordance with workplace procedures and work instructions
- 1.5 Tools, equipment and testing devices needed to carry out work are obtained in accordance with workplace procedures and checked for correct operation and safety
- 1.6 Flexible cord and plugs are prepared without damage to insulation and conductors and in accordance with relevant industry standards
- 2.1 WHS/OHS workplace policies and procedures are followed
- 2.2 Single insulated metal framed equipment is earthed in accordance with relevant industry standards and workplace procedures
- 2.3 Double insulated equipment is inspected and maintained in accordance with relevant industry standards and workplace procedures
- 2.4 Conductors are connected to terminals ensuring required polarity is in accordance with relevant industry standards

- | | | |
|--|------------|--|
| 3 Inspect and test equipment for operation and safety | 3.1 | Electrical installation and operation of cord and plug/s connected to electrical equipment are inspected and tested in accordance with relevant industry standards, work instructions and workplace procedures |
| | 3.2 | Quality checks of work are undertaken in accordance with workplace procedures |
| 4 Locate and repair fault in flexible cord and plug/s | 4.1 | Electrical equipment and attached flexible cord and plug/s are isolated in accordance with WHS/OHS requirements and workplace procedures |
| | 4.2 | WHS/OHS workplace policies and procedures are followed |
| | 4.3 | Quality checks of the attached flexible cord and plug/s are undertaken in accordance with workplace procedures to detect any abnormal, damage or fault |
| | 4.4 | Faults in attached flexible cord and plug/s are determined and details of components to be replaced are recorded in accordance with workplace procedures |
| | 4.5 | Faults in attached flexible cord and plug/s are repaired, as required, in accordance with workplace procedures |
| | 4.6 | Repairs are inspected and tested for compliance with industry standards |
| | 4.7 | Unplanned events are referred to supervisor for direction in accordance with workplace procedures |
| | 4.8 | Status report/s is completed and supervisor notified in accordance with workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UEE Electrotechnology Training Package Companion Volume Implementation Guide.

Attaching cords and plugs to electrical equipment must include:

- any cord, cable and plug connected to equipment and cord extension leads intended for single phase supplies up to 230 V

Safe working procedures within in the scope of this unit must:

- be in accordance with AS/NZS 4836 Safe working on low-voltage electrical installations

Unit Mapping Information

This unit replaces and is equivalent to UEENEEP024A Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply.

Assessment Requirements for UEERL0001 Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- applying relevant industry standards
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including using risk control measures
- applying quality to workplace procedures and instructions
- attaching flexible cord/s and plug/s and without damage
- inspecting flexible cords and plugs for damage, faults or abnormalities
- dealing with unplanned events in accordance with problem-solving techniques and workplace procedures
- determining the current rating of a range of commonly used flexible cords
- drawing of a basic electrical circuit using correct symbols
- testing flexible cords, plugs and connected equipment for operation and safety up to 230 volts (V) alternating current (a.c.), including polarity and continuity testing
- finding and repairing faults in attached flexible cords and plugs in accordance with established procedures
- preparing to attach flexible cord and plug supplies up to 230 V a.c. supply
- providing status report/s
- using testing equipment
- selecting appropriate flexible cords for a range of single phase appliances relating to application, load and service duty
- identifying correct plug and socket polarities for the range of commonly used 230 V plug socket combinations
- selecting the correct plug and socket combinations for a range of applications, including use in damp areas
- fitting a range of various plugs and sockets with attention to requirements, colour code, polarity and correct termination of conductors with the sheath well into the body, and the cord grip anchored
- terminating cords to several appliances utilising the appropriate cord type and rating.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- electrical safety requirements, including the requirements of AS/NZS 4836 Safe working on low-voltage electrical installations
- basic electrical circuits, including:
 - simple electric circuit (supply, control device and load)
 - industry standard symbols, units of measurement and the abbreviation for electromotive force, potential difference, current and resistance
 - using multiples and sub-multiples for voltage, current and resistance values
 - a.c and direct current (d.c.) supplies
 - single phase electrical loads
 - electrical circuit protection devices
- relationships in an electrical circuit, including:
 - relationship between voltage, current and resistance (Ohm's Law)
 - changes in circuit parameters for altered values of voltage, current and resistance
 - electrical power in relationship to d.c. or resistive a.c. circuits
- test equipment - resistance measurement, including:
 - types of electrical test equipment used for resistance measurement (analogue and digital multimeters, insulation resistance testers and continuity testers)
 - selection of appropriate electrical test instrument for continuity and insulation resistance measurement
 - using analogue and digital multimeters for resistance measurement (ensuring zero setting, correct scale selection, avoidance of parallax error and estimation of between division readings for analogue multimeters)
 - continuity tests and using a continuity tester to check the polarity of a three-core extension cord
 - insulation resistance tests and minimum values for insulation resistance for low voltage (LV) equipment
 - reasons for insulation resistance testing is conducted at higher than supply voltage to relevant industry standards
 - using insulation resistance handheld tester
 - care and storage of electrical instruments
 - regulatory requirements relating to the maintenance and testing of test instrumentation for resistance measurement
- selection of flexible cords and plugs to suit given applications, including:
 - types, structures and applications of common cores, including:
 - parallel two core unsheathed ('figure 8')
 - cords, light duty sheathed
 - ordinary duty sheathed

- heavy duty sheathed
- textile braided
- service duty
- purpose of colour coding and the recommended single phase colour code
- conventional code used in the most common alternative colours
- factors affecting the choice of plugs and sockets, including ingress protection (IP) rating
- connecting flexible cords and plugs to appliances, including:
 - design features of plugs and sockets which protect the conductor terminations from undue force when disconnecting a cord - tortuous path
 - cord preparation - not to mark/damage the inner core when stripping the sheath for termination, double the end of the conductor to be terminated
 - purpose of earthing
 - structure of double insulated appliances, symbol, reasons they should not be earthed, and maintenance of the integrity of the double insulation
 - preparation of the surfaces at an earthing connection before and after completion of the termination, including terminations exposed to corrosion, and those for which no specific earthing terminal is provided
 - techniques for fitting plugs and sockets
 - techniques for terminating cords and conductors including consequences of poor electrical terminations
- testing, including:
 - importance of conducting both visual and electrical tests to ensure leads are safe and appropriate for connection to supply in regard to physical condition
 - checking the polarity of plug, and for any abnormal or obvious damage or fault
 - minimum acceptable value of insulation resistance between active neutral and earth
 - conducting insulation resistance and continuity tests prior to, and after, connecting cords and plugs to appliances
 - visually checking that the cord/plug assembly has a suitable IP rating for the operating environment
 - visual checks to ensure that arrangements for protection against dangers of mechanical movement as relevant are undamaged and in place
 - techniques for fault finding attached cords and plugs, and cord extension leads
- producing documentation and reports, including:
 - nature and content of, and the need to produce, status reports and documents
- relevant WHS/OHS legislated requirements including inspection and testing of electrical equipment
- relevant industry standards
- relevant manufacturer specifications and operating instruction for tools, equipment and testing devices
- relevant safe job safety assessments or risk mitigation processes
- relevant workplace policies, procedures and instructions, including relevant workplace quality procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated suitable workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, relevant industry standards, codes of practice and operation manuals.

UETDRRF002 Perform EWP rescue

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 2.0.

Application

This unit covers the performance of rescue procedures from an elevated work platform (EWP) in the workplace. It specifies the mandatory requirements of rescue from a raised EWP by a work party member on the ground and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

HLTAID009 Provide cardiopulmonary resuscitation

Competency Field

Refresher Training

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to perform EWP

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Instruction in hazards and risk control measures for specific work areas and work activities are identified and

rescue procedures	obtained
	1.2 Tools and emergency equipment are checked for safety, functionality and placed in an accessible location to facilitate response and rescue according to established procedures
2 Carry out EWP rescue procedures	2.1 Workplace procedures and work instructions for controlling risk are followed
	2.2 Workplace procedures for removing the victim, where necessary, from contact with or in vicinity of live apparatus and lowering the EWP to the ground are followed
	2.3 Workplace procedures for removing the victim from the EWP are followed
	2.4 Workplace procedures for carrying out cardiopulmonary resuscitation (CPR), if required at the site, and treatment, where necessary, by medical professionals are followed
	2.5 The worksite is secured and entry controlled until appropriate authorities inspect and release the site
3 Complete the EWP rescue procedure	3.1 Processes for reporting accidents and/or incidents to authorised personnel are confirmed in accordance with established procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UETDTRRF03 Perform EWP rescue.

Assessment Requirements for UETDRRF002 Perform EWP rescue

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 2.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- identifying operational instructions and confirming the function of emergency equipment to facilitate rescue from an incident on an elevated work platform (EWP)
- accessing controls and lowering the EWP in accordance with mobile equipment instructions/workplace procedures
- removing the victim from the EWP to the ground in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency procedures for the EWP rescue of a victim encompassing:
 - inspection of rescue equipment
 - assessing hazards to rescuer, victim and others
 - isolation procedures, where appropriate
 - safe approach distances (SAD) appropriate to EWP rescue
 - involvement of external emergency services
 - emergency retrieval systems
- emergency procedures required to undertake EWP rescue of a victim encompassing:
 - placement of rescue equipment
 - controlling hazards to rescuer, victim and others
 - maintaining SAD appropriate to EWP rescue
 - practical steps in rescuing a person
 - removing victim to safe location/place of safety.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry for performing EWP rescue
- applicable documentation, including workplace procedures, relevant industry standards, equipment specifications, regulations, codes of practice and operation manuals.

UETTDREL14 Working safely near live electrical apparatus as a non-electrical worker

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Application

This unit covers compliance with working safely up to the defined safe approach distance (SAD) near energised electrical apparatus, including electrical powerlines, for non-electrical workers.

It includes work functions that may be performed, such as vegetation control, scaffolding, rigging, painting and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker. Also included is the preparation of risk assessment control measures that encompass job safety assessment. It does not include any work that is or may be performed by other competent operatives within the defined safe working zone. The defined safe working zone is that so defined by relevant state or territory regulatory agencies/bodies, local government legislation, industry bi-partite bodies, guidelines/codes of practices or other related requirements for safe work and access near live electrical and mechanical apparatus.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licencing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

There are no prerequisite competencies to this unit.

Competency Field

Entry Level Cross Discipline

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to work safely near live electrical apparatus as non-electrical worker

- 1.1** Instructions related to the work to be performed safely near live electrical apparatus as non-electrical worker are received and confirmed
- 1.2** Relevant requirements and established procedures to be followed and relevant personnel to be communicated with for the work to be performed are identified
- 1.3** Work health and safety (WHS)/occupational health and safety (OHS) policies and procedures to be followed for the work to be performed are received and confirmed
- 1.4** Suggestions to assist in meeting the safety requirements for working near live electrical apparatus as a non-electrical worker are made to others involved in the work
- 1.5** Hazards are identified, WHS/OHS risks assessed and control measures prioritised, implemented and monitored, including emergency exits kept clear, according to established procedures
- 1.6** Scope of responsibility and process of relevant work permit(s) issue are identified, received and confirmed according to requirements and established procedures
- 1.7** Relevant responsibility associated with first aid, safety observers and/or other related work safety procedures at the worksite are identified in accordance with requirements and established procedures to ensure safety measures are followed in the instance of an incident
- 1.8** Processes for identifying and reporting client issues to appropriate personnel are identified in accordance with industry/community standards
- 1.9** Site and the work schedule to be prepared are confirmed according to given instructions for a quality outcome and to minimise risk and damage to property, commerce, stock and individuals in accordance and established procedures

- 3.5 Works completion records and report forms/data sheets are completed accurately in accordance with given instructions and established procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UETTDREL14A Working safely near live electrical apparatus as a non-electrical worker.

Links

Assessment Requirements for UETTDREL14 Working safely near live electrical apparatus as a non-electrical worker

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- applying sustainable energy principles and practices
- completing all of the following:
 - confirming the safe working zone for safe work and access near live electrical apparatus
 - identifying relevant technical standards, acts, regulations and codes/guidelines
 - identifying established (enterprise) procedures
- completing all of the following:
 - confirming the principles of electricity, the three phase power system, electric shock and resuscitation, and power system
 - recognising aerial voltage systems
 - identifying low voltage (LV) aerial circuits
 - identifying high voltage (HV)
- identifying all of the following:
 - procedures in the event of an incident
 - events constituting an incident
 - procedures for responding to incidents
 - hazard and risk assessment procedure
 - conduct worksite hazard assessment
 - confirmation of essential components of hazard assessment checks
 - applying hazard identification in electrical work
 - confirmation of the basic safety principles for work on electrical works
 - hazard identification and risk assessment
 - hazard control
 - risk assessment and management (job safety analysis (JSA)) control
 - the hierarchy of controls, including evaluation, worksite hazard and risk assessment checklist, pre-job hazard assessment check (HAC) items, planned inspection and

- pre-work hazard risk assessment form
- identifying all of the following:
 - use of work permits and/or authorisation permits
 - sustainable energy principles and practices
 - possible effects of weather conditions on working near electrical apparatus as a non-electrical worker
- dealing with unplanned events on at least one (1) occasion.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic electrical principles encompassing:
 - fundamental units - basic measurement of units
 - electrical characteristics of material - characteristics of solid materials; insulators; and terms electrical charge, electrical current and electromagnetic forces
 - nature of electrical current and change - basic rules of electrical current flow
 - sources of electricity - basic fundamentals of alternating current (a.c.), direct current (d.c.) and single electromagnetic field source (induction)
 - simple circuits - circuit protection devices used on the network; effects of an open circuit, a closed circuit and a short circuit and earthing – using the ground as a form of conductor to return current back to a source
 - resistance - relationship between voltage and current and resistance (Ohms Law)
 - effects of current - physiological effects and protection for physiological effects; basic principle by which electrical current can result in the production of heat, light and electromagnetic fields and typical effects of current
 - three phase and single-phase power systems - star delta configurations, three phase star connections, relationship between line and phase voltages, three phase 4 wire systems - purpose of the neutral
 - consequences of short circuits - arc flash, electricity supply industry (ESI) protection schemes
 - magnetism - magnetic field patterns, concepts of electromagnetism, effects of electromagnetism and magnetic fields around straight conductors
 - hazards encountered in an ESI environment - touch and step potentials, electric shock, fire, chemicals, falls and safe use of tools and equipment
- transmission, distribution and rail power systems encompassing:
 - relationship between the transmission, distribution and rail/tram system within an overall power system - different organisations responsible for generation, transmission, distribution and rail/tram; how they correlate and their functions
 - characteristics of a transmission, distribution and rail system - principal components; typical voltage levels and methods of transmission and distribution, including grid type transmission systems, radial, parallel and ring main feeders
 - relationship between an overhead and underground supply systems within an overall

- power system - advantages/disadvantages and applications
- single line drawings and layouts - drawings and layouts of transmission and distribution systems, including radial, parallel and ring main feeders and the HV equipment associated with substations
- fundamentals for working safely near live electrical apparatus for non-electrical worker encompassing:
 - standards, guidelines/codes of practice, Commonwealth/state/territory/local government legislation, supply authority regulations and/or enterprise requirements, including relevant certification and licensing applicable to working safely up to the defined safe working zone near energised electrical apparatus, including electrical powerlines, for non-electrical worker
 - definitions of terminologies - 'safe working zone', 'risk assessment', 'safe approach distances (SAD) zones', 'safe working distances', 'work permits', 'access authorisation permits', 'technical standards', 'isolation procedures' and 'compliance requirements'
 - WHS/OHS policies and procedures for working safely - duties of a safety observer, permit to work systems and isolation procedures, safe application of different types of tools and equipment and operation of mobile plant and machinery (e.g. elevated work platform (EWP)) near live electrical apparatus
 - techniques and precautions in undertaking different work functions and working safely up to the defined safe working zone near energised electrical apparatus (including electrical powerlines) for non-electrical worker (work functions that may be performed include vegetation control, scaffolding, rigging, painting and/or any other activity that requires working safely near live electrical apparatus by a non-electrical worker).

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.

UETIDRRF08 Perform EWP controlled descent escape

Modification History

Release 2. Amendment to the Performance Evidence.

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Application

This unit covers the performance of elevated work platform (EWP) controlled descent escape procedures in the workplace. It specifies the mandatory requirements for self-rescue from a raised EWP and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work.

Other conditions may apply under state and territory legislative and regulatory licencing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

There are no prerequisite competencies to this unit.

Competency Field

Refresher Training

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to perform EWP **1.1** Instruction in hazards and risk control measures for

controlled descent escape	specific work areas and work activities are identified and obtained
	1.2 Tools and emergency descent equipment are checked for safety and function to ensure accessibility according to established procedures
2 Carry out EWP controlled descent escape	2.1 Workplace procedures and work instructions for controlling risk are followed
	2.2 Workplace procedures for evacuating an EWP basket employing emergency descent equipment are followed
	2.3 The worksite is secured and entry controlled until appropriate authorities inspect and release the site
3 Complete the EWP controlled descent escape procedure	3.1 Processes for reporting accidents and/or incidents to authorised personnel are confirmed in accordance with established procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for UETTDRRF08 Perform EWP controlled descent escape

Modification History

Release 2. Amendment to the Performance Evidence.

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- accessing, inspecting, securing and attaching emergency descent equipment to self in accordance with workplace procedures
- evacuating the elevated work platform (EWP) and descending to the ground in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- procedures for EWP controlled descent escape encompassing:
 - inspection of rescue equipment
 - assessing hazards to self and others
 - involvement of external emergency services as appropriate
 - safe approach distances (SAD) appropriate to EWP controlled descent escape
- procedures required for EWP controlled descent escape encompassing:
 - fitting of rescue equipment
 - controlling hazards to self and others
 - maintaining SAD for an EWP controlled descent escape
 - removing self to safe location/place of safety

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry for performing EWP controlled descent escapes
- applicable documentation, including workplace procedures, relevant industry standards, equipment specifications, regulations, codes of practice and operation manuals.

AHCSS00029 Cotton Industry Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0. Skill set updated to replace superseded first aid unit, as approved by the AISC in consultation with ASQA.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Description

Not applicable.

Pathways Information

These units provide credit towards AHC20116 Certificate II in Agriculture.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBAC202 Assist agricultural crop maintenance
- AHCMOM202 Operate tractors
- AHCMOM304 Operate machinery and equipment
- AHCWHS201 Participate in work health and safety processes
- AHCWRK202 Observe environmental work practices
- AHCWRK204 Work effectively in the industry
- HLTAID010 Provide basic emergency life support

Target Group

Those working as farm hands in the cotton production industry.

Suggested words for Statement of Attainment

These competencies meet the minimum industry requirements for cotton industry work.

AHCSS00030 Farm Business Management Skill Set

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0. Qualifications and unit codes and titles updated.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Description

This skill set covers the skills and knowledge to plan and manage a farm business and the associated risks.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC41019 Certificate IV in Agribusiness
- AHC51419 Diploma of Agribusiness Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS512 Develop and implement family business structures and relationships
- AHCBUS516 Develop and review a business plan
- AHCBUS517 Monitor and review business performance
- BSBRSK501 Manage risk

Target Group

This skill set is for individuals who plan and manage a farm business and the associated risks.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *BSB Business Services Training Package* meet the requirements for those responsible for farm business planning and management, including risk management.

AHCSS00032 Identify Plants for Indigenous Land Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC31516 Certificate III in Indigenous Land Management.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AHCILM302	Provide appropriate information on cultural knowledge
AHCPCM201	Recognise plants
AHCPCM303	Identify plant specimens

Target Group

Workers in a range of industries who are working on Country or with Indigenous Communities.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for an introduction to recognising and working with plants that are significant to Indigenous Communities.

AHCSS00042 Organic Crop Management Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0. Updated elective code.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Description

This skill set is designed to meet industry requirements for workers who manage organic crop production.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC41616 Certificate IV in Organic Farming
- AHC51816 Diploma of Organic Farming.
-

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB501 Develop climate risk management strategies
- AHCBAC408 Manage agricultural crop production
- AHCBAC509 Plan and manage long-term weed, pest or disease control in crops
- AHCORG403 Manage organic soil improvement

Target Group

This skill set is for individuals responsible for planning, implementing and managing organic crop production.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for managing organic crop production.

AHCSS00044 Organic Horticulture Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC41616 Certificate IV in Organic Farming and AHC51816 Diploma of Organic Farming.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AHCAGB501	Develop climate risk management strategies
AHCORG403	Manage organic soil improvement
AHCPHT402	Develop a crop regulation program
AHCPHT404	Implement and monitor a horticultural crop harvesting program
AHCPMG410	Implement the pest monitoring and evaluation plan

Target Group

Individuals responsible for planning, implementing organic horticultural production.

Suggested words for Statement of Attainment

These competencies meet the minimum industry requirements for managing organic horticultural production.

AHCSS00045 Spray Operator Skill Set

Modification History

Release	TP Version	Comment
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards Certificate II in Conservation and Land Management.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AHCPMG203	Work effectively in a pest management environment
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals

Target Group

Individuals who plan and prepare for a specific weed management program.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those who work with team members to carry out a specific weed management program.

AHCSS00046 Organic Livestock Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC41616 Certificate IV in Organic Farming and AHC51816 Diploma of Organic Farming.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCLSK505	Develop production plans for livestock
AHCAGB501	Develop climate risk management strategies

Target Group

Individuals responsible for managing organic livestock production systems.

Suggested words for Statement of Attainment

These competencies meet industry requirements for managing organic livestock production systems.

AHCSS00047 Report on Aboriginal Cultural Sites Skill Set

Modification History

Release	TP Version	Comment
Version 1	1.0	Initial release

Description

Pathways Information

These units provide credit towards Diploma of Conservation and Land Management.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AHCASW307	Support the documentation of Aboriginal cultural landscapes* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW309	Interpret Aboriginal cultural landscape* <i>AHCASW302 Relate Aboriginal culture to sites work*</i> <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW501	Survey and report on Aboriginal cultural sites* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM508	Propose a negotiated outcome for a given area of Country
LGALAND504A	Undertake effective consultation with Indigenous people on matters of cultural heritage

Target Group

Experienced Aboriginal sites workers who are managers or supervisors with responsibility for writing sites survey reports.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for Aboriginal sites survey reporting.

AHCSS00048 Permaculture Demonstrator Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards a Certificate III in Permaculture.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCPER301	Research and communicate information on permaculture principles and practices
AHCPER303	Maintain integrated plant and animal systems
AHCPER316	Select plant and animal species in a permaculture system
AHCPER321	Demonstrate permaculture practices to small groups of learners

Target Group

School teachers and permaculture demonstrators.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those providing practical instruction to small groups of learners.

AHCSS00049 Pig Health Supervisor Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Unit codes updated.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Description

Pathways Information

These units provide credit towards the following Certificates:

- AHC30416 Certificate III in Pork Production
- AHC40116 Certificate IV in Agriculture.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCHM304 Transport and store chemicals
- AHCECR302 Collect and preserve biological samples
- AHCLSK304 Carry out post-mortem examination of livestock
- AHCLSK307 Euthanase Livestock
- AHCLSK404 Implement and monitor animal welfare programs
- AHCLSK409 Supervise animal health programs

Target Group

This skill set is for individuals who are working as pig health supervisors in the pork production industry.

Suggested words for Statement of Attainment

These competencies meet the industry welfare and quality assurance requirements for stockperson supervisors working in the pork industry.

AHCSS00050 Pork Industry Euthanasia Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards the following Certificates:

- AHC30116 Certificate III in Agriculture
- AHC30416 Certificate III in Pork Production

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AHCLSK307	Euthanase livestock
AHCLSK331	Comply with industry animal welfare requirements

Target Group

Individuals who are working as animal attendants in the pork production industry.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for stockpersons working in the pork industry.

AHCSS00053 Poultry Egg Industry Pullet Rearing Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC30516 Certificate III in Poultry Production.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AHCPLY206	Catch and load poultry
AHCPLY302	Brood poultry
AHCPLY306	Clean, disinfect, or fumigate intensive production sheds
AHCPLY307	Implement, monitor, and review biosecurity measures in poultry production
AHCLSK310	Implement feeding plans for intensive production
AHCLSK313	Monitor livestock production growing environments

Target Group

Individuals who are working as poultry stockpersons rearing pullets in the poultry egg industry.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for poultry egg industry pullet rearing.

AHCSS00054 Poultry Egg Industry Stockpersons Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC30516 Certificate III in Poultry Production.

Skill Set Requirements

- BSBESB402 Establish legal and risk management requirements of new business ventures
- BSBHRM416 Process payroll
- BSBLDR414 Lead team effectiveness
- BSBOPS401 Coordinate business resources

Target Group

This skill set is for individuals responsible for supervising administration officers working in the production horticulture industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for supervisors of administration officers working in the production horticulture industry.

AHCSS00068 Production Horticulture Technology Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Version created to correct typographical errors and update BSB code and title.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Description

This skill set provides the skills and knowledge required to use technology in the production horticulture industry.

Pathways Information

These units provide credit towards *AHC30620 Certificate III in Production Horticulture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS301 Use hand held e-business tools
- AHCMOM305 Operate specialised machinery and equipment
- AHCMOM311 Operate precision control technology
- BSBTEC201 Use business software applications

Target Group

This skill set is for individuals responsible for using technology in the production horticulture industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for using technology in the production horticulture industry.

AHCSS00069 Recognise Aboriginal Cultural Sites Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards Certificate III in Aboriginal Sites Work.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCASW302	Relate Aboriginal culture to sites work* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW303	Identify and record Aboriginal-sites, artefacts and cultural landscapes* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM306	Follow Aboriginal cultural protocols
BSBWHS302	Apply knowledge of WHS legislation in the workplace

Target Group

Aboriginal-sites workers responsible for sites work activity under supervision.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for introductory Aboriginal-sites work.

AHCSS00070 Recognise Native and Feral Fauna Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Updated unit code.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Description

Pathways Information

These units provide credit towards AHC31420 Certificate III in Conservation and Ecosystem Management.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCFAU202 Recognise fauna
- AHCWHS301 Contribute to workplace health and safety processes
- AHCWRK303 Respond to emergencies

Target Group

This skill set is for workers working in bushland who may come into contact with native fauna.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for identifying and responding to encounters with native and feral fauna.

AHCSS00071 Recognise Native Fauna in Indigenous Land Management Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Updated unit code.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Description

Pathways Information

These units provide credit towards Certificate III in Indigenous Land Management.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCFAU201 Recognise fauna
- AHCILM302 Provide appropriate information on cultural knowledge
- LGAREGS305A Undertake animal or reptile control duties

Target Group

This skill set is for workers in a range of industries working on Country or with Indigenous Communities.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for working on Country around fauna that is significant to Indigenous Communities.

AHCSS00072 Pest Management Planning Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to <i>AHCSS00043 Vertebrate Pest Management Planning Skill Set</i> . Minor edits, title changed, and units of competency updated to current versions.

Description

This skill set prepares individuals working in the rural and land management sector who are required to consult with stakeholders and design and develop pest management plans.

Pathways Information

These units of competency provide credit towards *AHC30318 Certificate III in Rural and Environmental Pest Management* and *AHC41716 Certificate IV in Pest Management*.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCPMG306 Determine pest control techniques
- AHCPMG409 Implement a pest management plan
- AHCPMG412 Develop a pest management plan
- AHCPMG413 Define the pest problem
- BSBPMG418 Apply project stakeholder engagement techniques

Target Group

This skill set is for individuals who are:

- Authorised Control Officers in NSW and the ACT
- Agency biosecurity officers
- Local government officers

- Land owners
- Land managers.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meets the industry standards for applying a strategic planning approach to the principles of integrated pest management.

AHCSS00073 Advanced Chemical Spray Application Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to <i>AHCSS00026 Advanced Chemical Spray Application Skill Set</i> . Unit codes and titles amended.

Description

This skill set provides the skills and knowledge required to interpret weather conditions, plan and develop procedures, transport, handle and store chemicals and implement chemicals and monitor the safe application of chemicals using machinery and equipment.

Pathways Information

These units of competency provide credit towards a large number of qualifications in the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package*, including but not limited to *AHC40116 Certificate IV in Agriculture* and *AHC40316 Certificate IV in Production Horticulture*.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCHM304 Transport and store chemicals
- AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases
- AHCCHM404 Develop procedures to minimise risks in the use of chemicals
- AHCCHM405 Plan and implement a chemical use program
- AHCMOM315 Operate chemical application machinery and equipment
- AHCWRK302 Monitor weather conditions

Target Group

This skill set is for individuals responsible for planning, risk management and application tasks associated with the spray application of chemicals used in primary production.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for those responsible for planning and risk management associated with the spray application of chemicals in primary production.

AHCSS00074 Agricultural Chemical Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to <i>AHCSS00027 Agricultural Chemical Skill Set</i> . Minor editing changes.

Description

This skill set describes the skills and knowledge required to transport, handle, store, prepare and apply chemicals.

Pathways Information

These units of competency provide credit towards qualifications in Certificate II, Certificate III and Certificate IV in various sectors of the horticulture and agriculture industry including the following broad industries:

- Production Agriculture
- Production Horticulture
- Amenity Horticulture (Arboriculture, Parks and Gardens, Landscaping)
- Nursery Production and Retail
- Turf Management
- Animal Breeding and Racing
- Beekeeping
- Pest Management (Vertebrate, Weeds and Invertebrate)
- Conservation and Land Management (Lands, Parks and Wildlife, Natural Area Restoration)
- Irrigation
- Indigenous Land Management.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCHM304 Transport and store chemicals
- AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Target Group

This skill set is for individuals responsible for applying agricultural chemicals.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet state/territory licensing requirements for the application of agricultural chemicals.

AHCSS00075 Basic Beekeeping Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to <i>AHCSS00028 Basic Introduction to Beekeeping Skill Set</i> . Minor edits.

Description

This skill set describes the basic skills and knowledge required to operate a beehive or small apiary.

Pathways Information

These units of competency provide credit toward the *AHC31818 Certificate III in Beekeeping*.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK203 Open and reassemble a beehive
- AHCBEK205 Prepare and use a bee smoker
- AHCBEK206 Assemble and maintain beekeeping components
- AHCBEK302 Manipulate honey bee brood
- AHCBEK304 Remove a honey crop from a hive
- AHCBEK313 Manage pests and disease within a honey bee colony

Target Group

This skill set is for entry level workers in the beekeeping industry and for hobbyist beekeepers.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the basic requirements for the maintenance and monitoring of beehives.

AHCSS00076 Australian Native Stingless Bees Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Description

This skill set describes the basic skills and knowledge required to identify, procure, establish and maintain a hive of Australian native stingless bees.

Pathways Information

This unit of competency provides credit toward a range of qualifications from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

AHCNRM301 Establish an Australian native stingless bee colony

Target Group

This skill set is for individuals seeking to expand their skills and knowledge in bee husbandry to include Australian native stingless bees.

Suggested words for Statement of Attainment

This unit of competency from *the AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meets the basic requirement for the maintenance and monitoring of Australian native stingless bees.

AHCSS00077 Pollination Services Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Description

This skill set describes the advanced skills and knowledge required to conduct a commercial business in pollination services within the beekeeping industry.

Pathways Information

These units of competency provide credit toward the *AHC31818 Certificate III in Beekeeping*, *BSB42615 Certificate IV in New Small Business* and *BSB42515 Certificate IV in Small Business Management*.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK405 Select and establish an apiary site
- AHCBEK408 Provide bee pollination services
- BSBSMB403 Market a small business
- BSBSMB406 Manage small business finances

Target Group

This skill set is for experienced beekeepers seeking to develop specialist beekeeping and business skills.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* and the *BSB Business Services Training Package* meet the basic requirements for conducting a contracting pollination service.

AHCSS00078 Queen Bee Breeding Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Description

This skill set describes the advanced skills and knowledge required to commercially breed queen bees for the beekeeping industry.

Pathways Information

These units of competency may provide credit toward the *AHC31818 Certificate III in Beekeeping*.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK402 Perform queen bee artificial insemination
- AHCBEK409 Rear queen bees

Target Group

This skill set is for experienced beekeepers seeking to expand into specialist queen bee breeding.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the basic requirements for queen bee breeding.

AHCSS00079 Carbon Farming Services Advisor (CFSA) Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers the skills and knowledge required of consultants and advisors who provide guidance and advice on the establishment of a carbon farming project to generate carbon credits. It also applies to carbon farming project managers.

Note the term 'advice' referred to in this skill set does not relate to financial advice which requires an Australian Financial Services License (AFSL). This skill set does not address the skills or the generic knowledge requirements in 'ASIC Regulatory Guide 146: Training of financial product advisors'.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC50116 Diploma of Agriculture
- AHC51216 Diploma of Community Coordination and Facilitation
- AHC51419 Diploma of Agribusiness Management
- AHC60319 Advanced Diploma of Agribusiness Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project
- AHCCFP501 Advise on carbon farming project planning and implementation
- FNSFMK512 Apply knowledge of emissions markets
- LGALAND503A Develop agreements with native title holders/traditional owners

Target Group

This skill set is for agribusiness consultants and advisors who provide guidance and advice on the establishment of a carbon farming projects to generate carbon credits.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package, Financial Services Training Package and the Local Government Training Package* meet the requirements for individuals who provide advice on carbon farming projects to generate carbon credits.

AHCSS00080 Introduction to Carbon Farming Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers an introduction to carbon farming for individuals who participate in various carbon farming or land management projects, under supervision.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC30116 Certificate III in Agriculture
- AHC31416 Certificate III in Conservation and Land Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP301 Identify the effects of climate change as a factor in land management
- AHCWRK204 Work effectively in the industry
- AHCWRK205 Participate in workplace communications
- AHCWRK209 Participate in environmentally sustainable work practices

Target Group

This skill set is for individuals who participate in carbon farming projects, under supervision.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the requirements for workers participating in carbon farming projects.

AHCSS00081 Introduction to Carbon Farming Savanna Burning Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Updated unit code.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers an introduction to carbon farming for individuals who participate in savanna burning carbon farming projects, under supervision, including projects carried out on Aboriginal land.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC30116 Certificate III in Agriculture
- AHC31420 Certificate III in Conservation and Ecosystem Management.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP301 Identify the effects of climate change as a factor in land management
- AHCFIR202 Assist with prescribed burning
- AHCILM306 Follow Aboriginal cultural protocols
- AHCILM307 Implement Aboriginal cultural burning practices

Target Group

This skill set is for individuals who participate in savannah burning carbon farming projects, under supervision.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the requirements for workers participating in savanna burning carbon farming projects, including projects carried out on Aboriginal land.

AHCSS00082 Carbon Farming Aerial Savanna Burning Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Unit codes updated.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers the skills and knowledge required by individuals to work on carbon farming aerial savanna burning projects that are carried out on grazing land, or national or state/territory parks or on Aboriginal land.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC30116 Certificate III in Agriculture
- AHC31420 Certificate III in Conservation and Ecosystem Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP301 Identify the effects of climate change as a factor in land management
- AHCFIR202 Assist with prescribed burning
- AHCILM306 Follow Aboriginal cultural protocols
- AHCILM307 Implement Aboriginal cultural burning practices
- PUAFIR209 Work safely around aircraft
- PUAFIR312 Operate aerial ignition equipment in an aircraft

Target Group

This skill set is for individuals who work on carbon farming aerial savanna burning projects, including projects carried out on Aboriginal land.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *PUA12 Public Safety Training Package* meet the requirements for individuals who work on carbon farming aerial savanna burning projects.

AHCSS00083 Carbon Farming Savanna Burning Operations Leader Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers the skills and knowledge required of individuals who lead and take responsibility of all aspects of the direct operations of work on savanna burning carbon farming projects, carried out on grazing land, national or state/territory parks or on Aboriginal land.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC30116 Certificate III in Agriculture
- AHC31416 Certificate III in Conservation and Land Management
- AHC40116 Certificate IV in Agriculture
- AHC40916 Certificate IV in Conservation and Land Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP301 Identify the effects of climate change as a factor in land management
- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCILM306 Follow Aboriginal cultural protocols
- AHCILM307 Implement Aboriginal cultural burning practices
- PUAFIR303 Suppress wildfire
- PUAFIR402 Conduct simple prescribed burns
- PUAFIR406 Develop simple prescribed burn plans

- PUAFIR506 Conduct complex prescribed burns
- PUAFIR515 Develop complex prescribed burn plans

Target Group

This skill set is for individuals who lead and take responsibility of all aspects of the direct operations of work on savanna burning carbon farming projects, including projects carried out on Aboriginal land.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *PUA12 Public Safety Training Package* meet the requirements for workers who lead and take responsibility of all aspects of the direct operations of work on savanna burning carbon farming projects.

AHCSS00084 Carbon Farming Vegetation Method Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers planning a carbon farming project for individuals who are considering the establishment of a land-based, carbon farming project to generate carbon credits, utilising a vegetation method.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC40916 Certificate IV in Conservation and Land Management
- AHC41019 Certificate IV in Agribusiness

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP402 Prepare to comply with measuring and modelling requirements of a carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project
- AHCCFP405 Increase carbon using vegetation and/or agricultural approaches
- FWPFGM5219 Undertake carbon stock sampling of forests and plantations

Target Group

This skill set is for individuals who are considering the establishment of a land-based carbon farming project to generate credits, utilising a vegetation method.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *FWP Forest and Wood Products Training Package* meet the requirements for individuals to plan a land-based, carbon farming project to generate carbon credits, utilising a vegetation method.

AHCSS00085 Carbon Farming Soil-based Method Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers planning a carbon farming project for land owners, land holders or land managers, who are considering the establishment of a soil-based, carbon farming project to generate carbon credits

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC40916 Certificate IV in Conservation and Land Management
- AHC41019 Certificate IV in Agribusiness

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP401 Increase soil organic carbon using land management practices
- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project

Target Group

This skill set is for land owners, land holders or land managers, who may undertake work on a land-based carbon farming project.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the requirements for land owners, land holders or land managers, who may undertake work on a land-based carbon farming project.

AHCSS00086 Carbon Farming Agricultural Method Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers planning a carbon farming project for individuals who are considering the establishment of a land-based, carbon farming project to generate carbon credits, utilising an agricultural method.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC40916 Certificate IV in Conservation and Land Management
- AHC41019 Certificate IV in Agribusiness

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project
- AHCCFP405 Increase carbon using vegetation and/or agricultural approaches

Target Group

This skill set is for individuals who are considering the establishment of a land-based carbon farming project to generate credits, utilising an agricultural method.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the requirements for individuals to plan a land-based, carbon farming project to generate carbon credits, utilising an agricultural method.

AHCSS00087 Farm Business Finances Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers the skills and knowledge to plan and manage farm business finances.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS511 Manage enterprise staff requirements
- AHCWRK403 Supervise work routines and staff performance
- BSBHRM405 Support the recruitment, selection and induction of staff
- TAEDL301 Provide work skill instruction

Target Group

This skill set is for individuals who manage the staff employed or contracted to a farm business.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package*, the *BSB Business Services Training Package* and the *TAE Training and Education Training Package* meet the requirements for those responsible for staff employed or contracted to a farm business.

AHCSS00089 Business Skills For Sports Turf Management Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 4.0.

Description

This skill set provides a range of business management skills required for management functions in the sports turf industry.

Pathways Information

These units of competency provide a pathway and credit towards AHC51019 Diploma Sports Turf Management.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS511 Manage enterprise staff requirements
- AHCBUS518 Prepare and monitor budgets and financial reports
- AHCWHS401 Maintain work health and safety processes
- CHCMGT007 Work effectively with the Board of an organisation

Target Group

This skill set is for individuals who currently work in the sports turf industry and want to develop business management skills.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Land Management Training Package* and *CHC Community Services Training Package* provide some of the business skills required in the management of a sports turf facility.

AHCSS00090 Introduction To Sports Turf Maintenance Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 4.0.

Description

This skill set provides a range of basic skills appropriate for volunteer and casual workers engaged in the sports turf industry.

Pathways Information

These units of competency provide a pathway and credit towards AHC20919 Certificate II Sports Turf Management.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMOM203 Operate basic machinery and equipment
- AHCTRF205 Assist in the preparation of turf surfaces for play
- AHCTRF207 Renovate grassed areas

Target Group

This skill set is for individuals who assist in sports turf maintenance activities for sporting clubs as a volunteer or casual worker.

Suggested words for Statement of Attainment

These competencies are from the *AHC Agriculture, Horticulture and Land Management Training Package* and meet the industry requirements for supporting the setup and basic maintenance of a sports turf surfaces.

AHCSS00091 Technical Skills For Sports Turf Management Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 4.0.

Description

This skill set provides a range of technical skills for managing irrigation, soils, plant nutrition and sports turf renovation programs.

Pathways Information

These units of competency provide a pathway and credit towards AHC51019 Diploma of Sports Turf Management.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG507 Audit irrigation systems
- AHCPCM402 Develop a soil health and plant nutrition program
- AHCSOL401 Sample soils and interpret results
- AHCTRF506 Manage sports turf renovation programs

Target Group

This skill set is for individuals who currently work in a trade role in the Sports Turf industry and want to increase their technical skills in sports turf management.

Suggested words for Statement of Attainment

These competencies are from the *AHC Agriculture, Horticulture and Land Management Training Package* and meet the industry requirements for technical skills for supporting the setup and management of sports turf surfaces.

AHCSS00092 Irrigation Retailer Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.</p> <p>Supersedes and is not equivalent to <i>AHCSS00037 Irrigation Retailer Skill Set</i>. Skill set requirements amended, new and additional units required for completion of skill set.</p>

Description

This skill set provides the skills and knowledge required to recommend irrigation products and services, provide irrigation sales and service, design domestic urban irrigation systems, coordinate visual merchandising, build customer relationships and loyalty and advise on products and services within an irrigation retail operations environment.

Pathways Information

These units of competency provide credit towards *AHC32419 Certificate III in Irrigation Technology* and *AHC41119 Certificate IV in Irrigation Management*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMER303 Sell products and services
- AHCMER304 Recommend irrigation products and services
- ICTWOR304 Manage spare parts
- MEM12024 Perform computations
- SIRRINV001 Receive and handle stock
- SIRRINV002 Control stock
- SIRRMER003 Coordinate visual merchandising

Target Group

This skill set is for individuals responsible for irrigation retail operations.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for irrigation retail operations within the irrigation industry.

AHCSS00093 Gravity Fed Irrigation Operator Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.</p> <p>Supersedes and is not equivalent to <i>AHCSS00031 Gravity Fed Irrigation Operator Skill Set</i>.</p> <p>Skill set requirements amended and new units required for completion of skill set.</p>

Description

This skill set provides the skills and knowledge required to operate gravity fed irrigation systems within the irrigation industry.

Pathways Information

These units of competency provide credit towards *AHC32419 Certificate III in Irrigation Technology* and *AHC41119 Certificate IV in Irrigation Management*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG301 Install gravity fed irrigation systems
- AHCIRG336 Operate and maintain gravity fed irrigation systems
- AHCIRG337 Measure irrigation delivery system performance
- AHCIRG338 Troubleshoot irrigation systems
- AHCIRG339 Monitor soils under irrigation
- AHCIRG347 Maintain pressurised irrigation systems
- AHCWRK405 Implement and monitor environmentally sustainable work practices

Target Group

This skill set is for individuals responsible for operating gravity fed irrigation systems.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for Irrigation Australia Ltd certified gravity fed irrigation operator.

AHCSS00094 Irrigation Agronomist Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.</p> <p>Supersedes and is not equivalent to <i>AHCSS00033 Irrigation Agronomist Skill Set</i>.</p> <p>Skill set requirements amended and new units required for completion of skill set.</p>

Description

This skill set provides the skills and knowledge required to provide irrigation agronomist advice to irrigation end-users on system types, purchase and use.

Pathways Information

These units of competency provide credit towards *AHC41119 Certificate IV in Irrigation Management* and *AHC51619 Diploma of Irrigation Design*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG435 Determine hydraulic parameters for an irrigation system
- AHCIRG436 Implement an irrigation-related environmental protection program
- AHCIRG437 Schedule irrigations
- AHCIRG507 Audit irrigation systems
- AHCIRG509 Develop an irrigation and drainage management plan
- AHCSOL401 Sample soils and interpret results
- AHCWRK509 Provide specialist advice to clients

Target Group

This skill set is for individuals responsible for irrigation agronomy.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for Irrigation Australia Ltd certified irrigation agronomist.

AHCSS00095 Irrigation Contractor Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.</p> <p>Supersedes and is not equivalent to <i>AHCSS00034 Irrigation Contractor Skill Set</i>.</p> <p>Skill set requirements amended, new and additional units required for completion of skill set.</p>

Description

This skill set provides the skills and knowledge required to work in an irrigation contracting business, managing the irrigation installation post-design process.

Pathways Information

These units of competency provide credit towards *AHC41119 Certificate IV in Irrigation Management*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG435 Determine hydraulic parameters for an irrigation system
- AHCIRG439 Interpret and apply irrigation designs
- AHCIRG442 Supervise irrigation system installation
- AHCSOL401 Sample soils and interpret results
- AHCWRK405 Implement and monitor environmentally sustainable work practices

Target Group

This skill set is for individuals responsible for managing irrigation installation post-design process in an irrigation contracting business.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for Irrigation Australia Ltd certified irrigation contractor.

AHCSS00096 Irrigation Installer Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.</p> <p>Supersedes and is not equivalent to <i>AHCSS00035 Irrigation Installer Skill Set</i>.</p> <p>Skill set requirements amended and new units required for completion of skill set.</p>

Description

This skill set provides the skills and knowledge required to install irrigation within the irrigation industry.

Pathways Information

These units of competency provide credit towards *AHC32419 Certificate III in Irrigation Technology* and *AHC41119 Certificate IV in Irrigation Management*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG337 Measure irrigation delivery system performance
- AHCIRG338 Troubleshoot irrigation systems
- AHCIRG339 Monitor soils under irrigation
- AHCIRG342 Interpret irrigation plans and drawings
- AHCIRG345 Install pressurised irrigation systems
- AHCWRK405 Implement and monitor environmentally sustainable work practices

Target Group

This skill set is for individuals responsible for installing irrigation.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for Irrigation Australia Ltd certified irrigation installer.

AHCSS00097 Irrigation Manager Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.</p> <p>Supersedes and is not equivalent to <i>AHCSS00036 Irrigation Manager Skill Set</i>.</p> <p>Skill set requirements amended, new and additional units required for completion of skill set.</p>

Description

This skill set provides the skills and knowledge required to manage irrigation systems.

Pathways Information

These units of competency provide credit towards *AHC41119 Certificate IV in Irrigation Management*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG435 Determine hydraulic parameters for an irrigation system
- AHCIRG436 Implement an irrigation-related environmental protection program
- AHCIRG437 Schedule irrigations
- AHCIRG444 Manage irrigation systems
- AHCSOL401 Sample soils and interpret results

Target Group

This skill set is for individuals responsible for managing irrigation systems.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for Irrigation Australia Ltd certified irrigation manager.

AHCSS00098 Pressurised Irrigation System Operator Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.</p> <p>Supersedes and is not equivalent to <i>AHCSS00062 Pressurised Irrigation System Operator Skill Set</i>.</p> <p>Skill set requirements amended and new units required for completion of skill set.</p>

Description

This skill set provides the skills and knowledge required to operate pressurised irrigation systems within the irrigation industry.

Pathways Information

These units of competency provide credit towards *AHC32419 Certificate III in Irrigation Technology* and *AHC41119 Certificate IV in Irrigation Management*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG337 Measure irrigation delivery system performance
- AHCIRG338 Troubleshoot irrigation systems
- AHCIRG339 Monitor soils under irrigation
- AHCIRG346 Operate pressurised irrigation systems
- AHCIRG347 Maintain pressurised irrigation systems
- AHCWRK405 Implement and monitor environmentally sustainable work practices

Target Group

This skill set is for individuals responsible for operating pressurised irrigation systems.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for Irrigation Australia Ltd certified pressurised irrigation operator.

AHCSS00099 Irrigation Systems Auditor Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Unit codes updated.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Description

This skill set provides the skills and knowledge required to assess irrigation systems and site operations, collect and manage data, analyse and present research information, and prepare irrigation systems audit reports within the irrigation industry.

Pathways Information

These units of competency provide credit towards *AHC41119 Certificate IV in Irrigation Management* and *AHC51619 Diploma of Irrigation Design*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG435 Determine hydraulic parameters for an irrigation system
- AHCIRG438 Select and manage pumping systems for irrigation
- AHCIRG507 Audit irrigation systems
- AHCWRK502 Collect and manage data
- AHCWRK510 Audit site operations
- AHCWRK513 Write and present reports
- BSBINS401 Analyse and present research information

Target Group

This skill set is for individuals responsible for auditing irrigation systems.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for irrigation systems auditors within the irrigation industry.

AHCSS00100 Irrigation Systems Efficiency Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set provides the skills and knowledge required to operate pressurised irrigation systems, troubleshoot irrigation systems and measure irrigation delivery system performance within the irrigation industry.

Pathways Information

These units of competency provide credit towards *AHC31119 Certificate III in Irrigation Technology*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG337 Measure irrigation delivery system performance
- AHCIRG338 Troubleshoot irrigation systems
- AHCIRG346 Operate pressurised irrigation systems

Target Group

This skill set is for individuals responsible for maintaining irrigation systems efficiency.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for maintaining irrigation systems efficiency within the irrigation industry.

AHCSS00101 Irrigation Retail Sales Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set provides the skills and knowledge required to recommend irrigation products and services, design domestic urban irrigation systems, estimate and cost a job, manage spare parts, recommend and sell irrigation products and services, provide customer service and process customer complaints within an irrigation retail sales environment.

Pathways Information

These units of competency provide credit towards *AHC31119 Certificate III in Irrigation Technology*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMER301 Process customer complaints
- AHCMER401 Coordinate customer service and networking activities
- AHCMER407 Provide irrigation sales and service
- MEM12024 Perform computations
- MSTGN3003 Estimate and cost job
- SIRXCEG003 Build customer relationships and loyalty
- SIRXPDK001 Advise on products and services
- SITXCCS006 Provide service to customers

Target Group

This skill set is for individuals responsible for irrigation product and service retail sales.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for product and service retail sales within the irrigation industry.

AHCSS00102 Irrigation Meter Installation and Validation Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set provides the skills and knowledge required to install and validate irrigation meters within the irrigation industry.

Pathways Information

These units of competency provide credit towards *AHC21119 Certificate II in Irrigation and AHC32419 Certificate III in Irrigation Technology*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCWHS301 Contribute to work health and safety processes
- AHCWRK309 Apply environmentally sustainable work practices
- NWPIRR014 Install meters for rural water supplies
- NWPIRR022 Maintain meters for rural water supplies
- NWPNET002 Prepare and restore work site
- NWPNET011 Locate, identify and protect utilities

Target Group

This skill set is for individuals responsible for installing and validating irrigation meters.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for Irrigation Australia Ltd certified meter installer and validator.

AHCSS00103 Basic Tree Worker Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0. Skill set updated to replace superseded first aid unit, as approved by the AISC in consultation with ASQA.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Description

This skill set provides the basic knowledge and skills required to operate chainsaws to cut and trim felled trees, remove tree materials and control traffic in support of a ground based arboricultural work team.

Pathways Information

These units of competency provide pathways into the Certificate II in Arboriculture and Certificate III in Arboriculture.

Licensing/Regulatory Information

Licensing, legislative, regulatory, or certification requirements apply to the following units in some states and territories and may differ according to jurisdiction:

- FWPCOT2239 Trim and cut felled trees
- RIIWHS205E Control traffic with stop-slow bat

Skill Set Requirements

- FWPCOT2237 Maintain chainsaws
- FWPCOT2239 Trim and cut felled trees
- FWPHAR2206 Operate a mobile chipper/mulcher
- HLTAID011 Provide First Aid
- RIIWHS205E Control traffic with stop-slow bat

Target Group

This skill set is for individuals wanting to enter the arboriculture industry with basic mechanical skills required to support ground based arboricultural work.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products*, *HLT Health and RII Resources and Infrastructure Training Packages* meet the minimum standards for supporting ground based arboriculture work.

AHCSS00104 Introduction to Arboriculture Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Description

This skill set provides arborist skills and knowledge to identify, prune and maintain trees.

Pathways Information

These units of competency provide a pathway and credit towards AHC30820 Certificate III in Arboriculture and meet the entry requirements for AHC50520 Diploma of Arboriculture.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some States and Territories.

Skill Set Requirements

- AHCARB314 Implement a tree maintenance program
- AHCARB316 Perform pruning operations
- AHCARB323 Identify trees

Target Group

This skill set is for individuals with an existing horticultural or agricultural qualification and/or experience without a current Certificate III in Arboriculture and who want to meet the entry requirements for AHC50520 Diploma of Arboriculture. It is also for individuals that are seeking entry level work in Arboriculture or a pathway into AHC30820 Certificate III in Arboriculture.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* provides arborist skills and knowledge to identify, prune and maintain trees.

AHCSS00105 Arborist Works Coordinator Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Description

This skill set provides qualified arborists with the practical skills and knowledge required to function as an Arborist Works Coordinator on an arboricultural work site.

Pathways Information

These units of competency provide direct credit towards the Certificate III in Arboriculture (Arborist Works Coordinator) specialisation. The unit *AHCARB408 Perform a ground-based tree defect evaluation* provides direct credit towards *AHC50520 Diploma of Arboriculture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCARB316 Perform pruning operations
- AHCARB406 Verify pruning specifications
- AHCARB407 Supervise and audit tree operations
- AHCARB408 Perform a ground-based tree defect evaluation
- AHCARB409 Conduct a safety audit

Target Group

This skill set is for individuals with an existing trade level arborist qualification and experience who want to develop skills to function as an Arborist Works Coordinator on an arboricultural work site.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the minimum standards required to meet the needs of an Arborist Works Coordinator.

AHCSS00106 Digital Agronomy Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge required to provide digital agronomic advice on system types, purchase and use.

Pathways Information

These units of competency provide credit towards *AHC51920 Diploma of Applied Agronomy* from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and provide specialist skills in digital agronomy.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB516 Select and implement a GIS for sustainable agricultural systems
- AHCAGB523 Interpret and use agricultural data

Target Group

This skill set is for agricultural professionals who require specialist skills in digital agronomy.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for agricultural professionals in providing digital agronomic advice and expertise.

AHCSS00107 Production Horticulture Machinery Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.</p> <p>Supersedes and is equivalent to <i>AHCSS00065 Production Horticulture Machinery Skill Set</i>.</p> <p>Minor edits and unit of competency updated to current version.</p>

Description

This skill set provides the skills and knowledge required to operate machinery in the production horticulture industry.

Pathways Information

These units provide credit towards *AHC30620 Certificate III in Production Horticulture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMOM302 Perform machinery maintenance
- AHCMOM304 Operate machinery and equipment
- AHCWHS301 Contribute to work health and safety processes
- TLILIC0003 Licence to operate a forklift truck

Target Group

This skill set is for machinery operators working in the production horticulture industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for machinery operators working in the production horticulture industry.

AHCSS00108 Production Horticulture Manager Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.</p> <p>Supersedes and is equivalent to <i>AHCSS00066 Production Horticulture Manager Skill Set</i>.</p> <p>Minor edits and units of competency updated to current version.</p>

Description

This skill set provides the skills and knowledge required to manage workers in the production horticulture industry.

Pathways Information

These units provide credit towards *AHC50320 Diploma of Production Horticulture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS511 Manage enterprise staff requirements
- AHCBUS514 Negotiate and monitor contracts
- AHCWHS502 Manage work health and safety processes
- BSBESB407 Manage finances for new business ventures

Target Group

This skill set is for production horticulture managers working in the production horticulture industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for managers working in the production horticulture industry.

AHCSS00109 Production Horticulture Supervisor Skill Set

Modification History

Release	Comments
Release 1	<p>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.</p> <p>Supersedes and is equivalent to <i>AHCSS00067 Production Horticulture Supervisor Skill Set</i>.</p> <p>Minor edits and unit of competency updated to current version.</p>

Description

This skill set provides the skills and knowledge required to supervise workers in the production horticulture industry.

Pathways Information

These units provide credit towards *AHC40320 Certificate IV in Production Horticulture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCWHS401 Maintain work health and safety processes
- AHCWRK401 Implement and monitor quality assurance procedures
- AHCWRK403 Supervise work routines and staff performance
- TLILIC0003 Licence to operate a forklift truck

Target Group

This skill set is for production horticulture supervisors working in the production horticulture industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for supervisors working in the production horticulture industry.

AHCSS00110 Basic Biosecurity Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the basic knowledge and skills required to support biosecurity activity and compliance for a property, farm or land management situation for animal husbandry, plant production or land and aquatic environment management, including businesses, volunteer groups and government and non-government agencies and organisations.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHC BIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity
- AHC BIO204 Follow site biosecurity procedures
- AHC BIO301 Identify and report signs of unusual disease or pest
- AHC BIO303 Apply biosecurity measures

Target Group

This skill set is for individuals, new employees or existing workers who work in a horticulture, agriculture or conservation and land management environment where biosecurity is an important part of the job role for the prevention of diseases and pests.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the basic industry requirements for complying with biosecurity procedures in the workplace.

AHCSS00111 Medicinal Cannabis Manager Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to implement and monitor regulatory and quality requirements in the medicinal cannabis industry.

Pathways Information

These units of competency provide credit towards a range of qualifications from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package, including AHC42320 Certificate IV in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC401 Apply security measures for medicinal cannabis
- AHCMDC402 Monitor medicinal cannabis production for compliance and quality

Target Group

This skill set is for of individuals who work in the medicinal cannabis industry at the supervisory or managerial level.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for implementing and monitoring regulatory and quality requirements in the medicinal cannabis industry.

AHCSS00112 Site Manager for Biosecurity Emergency Response Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the knowledge and skills required for farm managers or site managers to understand the link between on-farm biosecurity implementation and management, and their role within a biosecurity emergency response agency.

Pathways Information

These units of competency provide pathways into a range of qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBER302 Work effectively in a biosecurity emergency response
- AHCBER503 Manage active operational emergency disease or pest sites
- AHC BIO204 Follow site quarantine procedures
- AHC BIO401 Plan and implement a biosecurity program

Target Group

This skill set is for individuals employed as farm or property managers where there is a potential for a biosecurity threat and the need to work with government agencies during a biosecurity emergency response.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the industry requirements for working with biosecurity emergency response agency staff during a biosecurity emergency response.

AHCSS00113 Firearms Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the knowledge and skills required for workers in land management and/or biosecurity who hold a valid firearms license and encounter pest animals, animals in distress or animals subject to a biosecurity order and who are required to use firearms to ethically and humanly euthanise them in the field.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

State or territory licensing, legislative or certification requirements apply to firearms use in all Australian jurisdictions and must be adhered to. Destruction of pest animals must comply with state or territory animal cruelty legislation.

Skill Set Requirements

- AHCLSK331 Comply with industry animal welfare requirements
- AHCPMG304 Use firearms to humanely destroy animals
- AHCWHS301 Contribute to work health and safety processes

Target Group

This skill set is for individuals who are licensed to use firearms and are employed in land management, biosecurity or pest management roles.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for ethically euthanising animals in the field using a firearm.

AHCSS00114 Design Roof Gardens, Vertical Gardens and Green Facades Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to design roof gardens, vertical gardens and green facades for commercial and or residential projects, in consultation with building, landscape and horticultural professionals. It includes applying knowledge of the functions, benefits and characteristics of roof gardens, vertical gardens and green walls, national, state, territory and local authorities' policy, procedure and permit requirements, building regulations and horticultural requirements to designs, as well as the selection of growing media and plants, planning for maintenance requirements and producing project plans.

Pathways Information

These units of competency provide credit towards a range of qualifications in the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, including:

- AHC42020 Certificate IV in Landscape
- AHC50416 Diploma of Horticulture
- AHC50616 Diploma of Landscape Design.

These units of competency also build on skills and knowledge attained in AHC Certificates III and IV in Landscape Construction, Landscape and Horticulture from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* to provide specialist skills in roof garden, vertical garden and green facade infrastructure.

Licensing/Regulatory Information

Licensing, legislative or certification requirements may apply to the work undertaken in this skill set in some jurisdictions. Users are advised to check with the relevant regulatory authorities.

Skill Set Requirements

- AHCGRI501 Design roof gardens
- AHCGRI502 Design vertical gardens and green facades
- AHCPCM512 Design specialised landscape

Target Group

This skill set is for experienced horticultural, landscaping, landscape design and/or construction workers, builders or developers who design roof gardens, vertical gardens and green facades in association with specialists and building professionals.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet industry requirements for planning and designing roof gardens, vertical gardens and green facades.

AHCSS00115 Construct Roof Gardens, Vertical Gardens and Green Facades Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to safely construct roof gardens, vertical gardens and green facades for commercial and or residential projects. It includes applying knowledge and skills in reading and interpreting plans and specifications, setting out sites and applying knowledge of vertical gardens and facades and roof garden construction requirements including irrigation and drainage, growing media and plant types.

Pathways Information

These units of competency provide credit towards a range of qualifications in the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, including:

- AHC40416 Certificate IV in Horticulture
- AHC42020 Certificate IV in Landscape
- AHC50416 Diploma of Horticulture
- AHC50616 Diploma of Landscape Design.

Licensing/Regulatory Information

Licensing, legislative or certification requirements may apply to this skill set in some jurisdictions depending on the location of the work and/or plant and equipment used. Users are advised to check with the relevant regulatory authorities.

Skill Set Requirements

- AHCGRI401 Construct roof gardens
- AHCGRI402 Construct vertical gardens and green facades
- AHCLSC301 Set out site for construction works
- AHCPGD402 Plan a plant establishment program
- AHCSOL305 Prepare growing media

- AHCWHS301 Contribute to work health and safety processes
- CPCCOM2001 Read and interpret plans and specifications
- RIIWHS204E Work safely at heights

Target Group

This skill set is for experienced horticultural, landscaping and/or construction workers and/or builders who construct roof gardens, vertical gardens and green facades in new and or existing buildings.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, the *CPC Construction, Plumbing and Services Training Package* and the *RII Resources and Infrastructure Training Package* meet industry requirements for constructing or installing roof gardens, vertical gardens and green facades.

AHCSS00116 Maintain Roof Gardens, Vertical Gardens and Green Facades Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to maintain green infrastructure specific to commercial and or residential roof gardens, vertical gardens and green facades.

Pathways Information

These units of competency provide credit towards a range of qualifications in the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, including:

- AHC20416 Certificate II in Horticulture
- AHC30116 Certificate III in Agriculture
- AHC30716 Certificate III in Horticulture
- AHC30916 Certificate III in Landscape Construction
- AHC31016 Certificate III in Parks and Gardens
- AHC40416 Certificate IV in Horticulture
- AHC42020 Certificate IV in Landscape.

These units of competency also build on skills and knowledge attained in AHC30917 Certificate III in Landscape Construction from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* to provide specialist skills in roof garden, green wall and green facade infrastructure.

Licensing/Regulatory Information

Licensing, legislative or certification requirements may apply to this unit in some jurisdictions, depending on the location of work and/or plant and equipment used. Users are advised to check with the relevant regulatory authorities.

Skill Set Requirements

- AHCGRI301 Maintain roof gardens, vertical gardens and green facades
- AHCPGD304 Implement a landscape maintenance program
- AHCPMG301 Control weeds
- AHCPMG302 Control plant pests, diseases and disorders
- RIIWHS204E Work safely at heights

Target Group

This skill set is for horticulture workers responsible for maintaining roof gardens, vertical gardens and green facades.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* and the *RII Resources and Infrastructure Training Package* meet industry requirements for maintaining roof gardens, vertical gardens and green facades.

AHCSS00117 Introduction to Conservation and Ecosystem Management Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides basic skills and knowledge for individuals to recognise common plants and animals in natural landscapes and to undertake basic conservation and ecosystem works in the conservation and ecosystem management industry.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCECR203 Perform basic ecological restoration works
- AHCFAU202 Recognise fauna
- AHCPCM204 Recognise plants

Target Group

This skill set is for individuals who wish to develop basic skills as means to enter the conservation and ecosystem management industry, or develop basic skills in identifying common native plants and animals and support conservation works.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for performing basic conservation and ecosystem works.

AHCSS00118 Seed Processing Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides basic skills and knowledge for individuals to identify seeds, collect and extract the seeds and perform seed germination tests for a range of native plants found in the natural landscape to assist in revegetation, restoration and rehabilitation works in the conservation and ecosystem management industry.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

Federal, state or territories and local government licensing or regulatory requirements apply to this skill set for the collection and removal of plant materials, including seed, from natural landscapes, parks and reserves.

Skill Set Requirements

- AHCECR305 Collect native seed
- AHCSDT302 Identify seeds
- AHCSDT306 Perform a seed germination test
- FWPFGM3202 Extract seed

Target Group

This skill set is for individuals who are employed or who support the conservation and ecosystem management industry, or who are employed in a production nursery industry and require skills in the processing and testing of native seeds.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package and Forest and Wood Products Training Package meet industry requirements for identifying, collecting, extracting and testing native plant seed.

AHCSS00119 Induction to Work in the Medicinal Cannabis Industry Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to apply regulatory and quality requirements to work in the medicinal cannabis industry.

Pathways Information

These units of competency provide credit towards the AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC301 Apply security regulatory requirements to work in the medicinal cannabis industry
- AHCMDC302 Apply regulatory and quality requirements to the production of medicinal cannabis

Target Group

This skill set is for individuals entering the medicinal cannabis industry, including those with or without previous experience in agriculture or horticulture.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for induction to work in the medicinal cannabis industry.

AHCSS00120 Medicinal Cannabis Cultivation and Production Assistant Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to assist in cultivation and production operations in the medicinal cannabis industry.

Pathways Information

These units of competency provide credit towards a range of qualifications from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package, including AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC201 Assist with propagation of medicinal cannabis
- AHCMDC202 Assist with care and maintenance of medicinal cannabis
- AHCMDC203 Assist with harvest and pre-processing of medicinal cannabis
- AHCMDC301 Apply security regulatory requirements to work in the medicinal cannabis industry

Target Group

This skill set is for individuals entering the medicinal cannabis industry, including those with or without previous experience in agriculture or horticulture.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for cultivation assistants in in the medicinal cannabis industry.

AHCSS00121 Medicinal Cannabis Cultivation and Production Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to undertake skilled work in cultivation and production operations in the medicinal cannabis industry.

Pathways Information

These units of competency provide credit towards the AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC301 Apply security regulatory requirements to work in the medicinal cannabis industry
- AHCMDC302 Apply regulatory and quality requirements to the production of medicinal cannabis
- AHCMDC303 Undertake propagation of medicinal cannabis
- AHCMDC304 Undertake care and maintenance of medicinal cannabis
- AHCMDC305 Undertake harvest and pre-processing of medicinal cannabis

Target Group

This skill set is for individuals entering the medicinal cannabis industry, including those with or without previous experience in agriculture or horticulture.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for undertaking skilled work in cultivation and production operations in the medicinal cannabis industry.

AHCSS00122 Pork Industry Stockperson Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0. Supersedes and is not equivalent to <i>AHCSS00052 Pork Industry Stockperson Skill Set</i> . <i>Skill set requirements amended and a new unit required for completion of skill set.</i>

Description

This skill set provides the skills and knowledge required to administer medication to livestock, implement animal health control programs, apply pork production industry biosecurity, work health and safety, animal welfare and enterprise quality assurance requirements, and care for the health and welfare of pigs, and move and handle pigs within the pork production industry.

Pathways Information

These units of competency provide credit towards *AHC30116 Certificate III in Agriculture and AHC30416 Certificate III in Pork Production*, with the exception of the units *AHCPRK201 Care for health and welfare of pigs*, *AHCPRK203 Move and handle pigs* and *AHCWRK206 Observe enterprise quality assurance procedures*.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHC BIO303 Apply biosecurity measures
- AHCLSK301 Administer medication to livestock
- AHCLSK309 Implement animal health control programs
- AHCLSK331 Comply with industry animal welfare requirements
- AHCPRK201 Care for health and welfare of pigs
- AHCPRK203 Move and handle pigs
- AHCWHS301 Contribute to work health and safety processes

- AHCWRK206 Observe enterprise quality assurance procedures

Target Group

This skill set is for individuals working as animal attendants in the pork production industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry welfare and quality assurance requirements for stockpersons working in the pork industry.

AHCSS00123 Administrator in Mined Land Rehabilitation Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set provides basic skills and knowledge for administrative support on mined land rehabilitation projects in the conservation and ecosystem management industry.

Pathways Information

These units of competency provide pathways into a range of Certificate III and Certificate IV qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package including:

- AHC31421 Certificate III in Conservation and Ecosystem Management.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS408 Operate within a budget framework
- AHCILM306 Follow Aboriginal cultural protocols
- AHCWRK305 Coordinate work site activities
- BSBPMG427 Apply project procurement procedures
- BSBTEC301 Design and produce business documents

Target Group

This skill set is for individuals who provide administrative support for projects in mined land rehabilitation. They are administrators who require skills in a rural or remote setting and generally work on site or in an office environment off site.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management* and *BSB Business Services Training Packages* meet industry requirements for administrative support workers on mined land rehabilitation sites.

AHCSS00124 Mined Land Rehabilitation Field Worker Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set provides basic skills and knowledge for working onsite on mined land rehabilitation projects in the conservation and ecosystem management industry.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package including:

- AHC31421 Certificate III in Conservation and Ecosystem Management.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCECR304 Undertake direct seeding
- AHCFAU302 Identify fauna in the field
- AHCILM306 Follow Aboriginal cultural protocols
- AHCPM303 Identify plant specimens
- AHCSAW304 Implement erosion and sediment control measures

Target Group

This skill set is for individuals who are field workers and support projects in mined land rehabilitation and require skills in a rural or remote setting.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet industry requirements for field workers on mined land rehabilitation sites.

AHCSS00125 Mined Land Rehabilitation Machine Operator Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set provides basic skills and knowledge for individuals to operate machinery to assist with rehabilitation works on mined land in the conservation and ecosystem management industry.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package including:

- AHC31421 Certificate III in Conservation and Ecosystem Management.

Licensing/Regulatory Information

Federal, state or territories and local government licensing or regulatory requirements apply to this skill set for the operation of machinery.

Skill Set Requirements

- AHCILM306 Follow Aboriginal cultural protocols
- AHCMOM304 Operate machinery and equipment
- AHCSAW202 Recognise landforms and soil types
- AHCSAW303 Construct conservation earthworks
- AHCSAW304 Implement erosion and sediment control measures
- FWPCOT3314 Comply with soil and water protection

Target Group

This skill set is for individuals who are machine operators supporting mined land rehabilitation projects and require skills in the operation of associated machinery.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management* and *FWP Forest and Wood Products Training Packages* meet industry requirements for machine operators in mined land rehabilitation.

AHCSS00126 Mined Land Rehabilitation Project Coordinator Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set provides basic skills and knowledge for undertaking project coordination tasks in the rehabilitation of mined land in the conservation and ecosystem management industry.

Pathways Information

These units of competency provide pathways into a range of Certificate IV qualifications in the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* including:

- AHC40920 Certificate IV in Conservation and Ecosystem Management.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCECR301 Maintain native ecosystem areas
- AHCECR308 Conduct a site inspection for ecological restoration
- AHCECR311 Implement ecosystem reconstruction works
- AHCILM306 Follow Aboriginal cultural protocols
- AHCNRM605 Develop a monitoring, evaluation and reporting program
- AHCWHS401 Maintain work health and safety processes
- AHCWRK305 Coordinate work site activities
- RIICAR302D Rehabilitate small mine site

Target Group

This skill set is for individuals who are employed in or who support, mined land rehabilitation projects and require skills in the coordination of these projects. They provide support to project managers and project team members.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management and RII Resources and Infrastructure Industry Training Package* meet industry requirements for coordinating projects in mined land rehabilitation.

AHCSS00127 Milking Equipment Maintenance Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set describes the skills and knowledge required to identify faults of milking equipment that do not require the services of qualified trades people, carry out routine adjustments and maintenance of equipment to rectify poor performance and ensure compliance with food safety standards and requirements.

Pathways Information

These units of competency provide credit towards the AHC30221 Certificate III in Dairy Production and a number of AHC Certificate IV qualifications.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB405 Analyse and interpret production data
- AHCDRY304 Carry out routine service of milking equipment
- AHCDRY305 Conduct mechanical tests on milking machines

Target Group

This skill set is for individuals who undertake routine servicing, maintenance and troubleshooting of milking equipment for the dairy production industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for undertaking routine servicing and maintenance of milking equipment.

AHCSS00128 Design Brief for Therapeutic Horticulture Garden Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set provides the skills and knowledge required to develop a design brief for a therapeutic horticulture garden.

Pathways Information

These units of competency provide credit towards *AHC40416 Certificate IV in Horticulture and AHC42421 Certificate IV in Landscape Design*.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHPCM404 Recommend plants and cultural practices
- AHCTHH401 Develop a therapeutic horticulture design brief

Target Group

This skill set is for experienced horticulture or landscaping design contractors responsible for providing professional design services for therapeutic horticulture garden design in the capacity of a sole trader or small business.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for developing a therapeutic horticulture design brief as a horticulture or landscape design contractor.
